For expenses necessary for the preservation, operation, maintenance, and care of existing river and harbor, flood control, and related works, including such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality or other public agency, outside of harbor lines, fishways, flood control structures, navigation and recreation; surveys and charting of northern and northwestern lakes and connecting waterways, clearing and straightening channels; and removal of obstructions to navigation, $1,864,464,000, to remain available until expended, of which such sums as become available in the Harbor Maintenance Trust Fund, pursuant to Public Law 99-662, may be derived from that Fund, and of which such sums as become available from the special account established by the Land and Water Conservation Act of 1965, as amended (16 U.S.C. 460l), may be derived from that account for construction, operation, and maintenance of outdoor recreation facilities: Provided, That with $1,500,000 of the funds appropriated herein, the Secretary of the Army, acting through the Chief of Engineers, is directed to perform cultural resource mitigation and recreation improvements at Waco Lake, Texas, at full Federal expense notwithstanding the provisions of the Water Supply Act of 1968: Provided further, That the Secretary of the Army, acting through the Chief of Engineers, is directed to use $2,000,000 of the funds appropriated hereunder to grade the basin within the Hansen Dam feature of the Los Angeles County Drainage District, California, project to enhance and maintain areas of outdoor recreation and to provide for future use of the basin for compatible purposes consistent with the Master Plan including recreation and environmental restoration: Provided further, That, the Secretary of the Army, acting through the Chief of Engineers, is directed to use $1,000,000 of the funds appropriated herein to fully investigate, the development of an upland disposal site recycling program on the Black Warrior and Tombigbee Rivers project and the Apalachicola River and connecting lakes and waterways project: Provided further, That, for the Raritan River Basin, Green Brook Sub-Basin, New Jersey, project, the Secretary of the Army, acting through the Chief of Engineers, is directed to implement the locally preferred plan for the element in the western portion of Middlesex Borough, New Jersey, which includes the buyout of up to 22 homes, and flood proofing of four commercial buildings along Prospect Place and Union Avenue, and also the buyout of up to three commercial buildings along River and Lincoin Avenues, at a total estimated cost of $15,000,000, with an estimated Federal cost of $11,500,000 and an estimated non-Federal cost of $3,500,000.

REGULATORY PROGRAM

For expenses necessary for administration of laws pertaining to regulation of navigable waters and wetlands, $128,300,000, to remain available until expended.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

For expenses necessary to clean up contamination throughout the United States resulting from work performed as part of the Nation’s early atomic energy program, $140,000,000, to remain available until expended.

GENERAL EXPENSES

For expenses necessary for general administration and related functions in the Office of the Chief of Engineers and offices of the Division Engineers, activities of the Humphreys Engineer Center Support Activity, the Institute for Water Resources, and the chief of Engineer Districts, $152,000,000, to remain available until expended: Provided, That no part of any other appropriation provided in title I of this Act shall be available to fund the activities of the Chief of Engineers or the executive direction and management activities of the division offices: Provided further, That none of these funds shall be available to support in an office of congressional affairs within the executive office of the Chief of Engineers.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for official representation and representation expenses (not to exceed $5,000); and during the current fiscal year the Revolving Fund, Corps of Engineers, shall be available for official reception and representation expenses (not to exceed $100 for replacement only) and hire of passenger motor vehicles.

GENERAL PROVISIONS

CORPS OF ENGINEERS—CIVIL

SEC. 101. Section 110(b)(3)(B)(ii) of division B, title I of Public Law 106-554 is amended by inserting the following: "Provided, That the Secretary shall credit the San Gabriel Water Quality Authority with the value of all prior expenditures by the non-Federal interests that are compatible with the purposes of this Act".

Mr. POMBO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to engage in a colloquy with the gentleman from Alabama about two very important water projects in my district that I believe deserve to receive Federal funding during the fiscal year 2002 appropriations process.

Let me begin by talking about the Banta-Carbona Irrigation District fish screen project. This project is located at the entrance to the Banta-Carbona Irrigation District intake channel on the San Joaquin River.

This pending environmental disaster could be shut down by these Federal funds.

Further, WRDA of 1999 authorized $25 million for conjunctive use and groundwater recharge projects within the Stockton East Water District. This study concluded that a demonstration project should be the next step.

I support the efforts of the Stockton East Water District, and I am requesting the gentleman’s support of up to $2.5 million in fiscal year 2002 for the project.

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. POMBO. I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, I thank the gentleman from California for yielding, and as I mentioned before, I promise to continue working with the gentleman from California during the
congressional record—house

June 27, 2001

Mr. POMBO. Mr. Chairman, I thank the gentleman, and conclude by saying that the gentleman from Alabama (Mr. CALLAHAN) and the ranking member from Texas (Mr. VISCONTI) deserve to be commended for crafting a sound bill, and I want to thank them for their tireless efforts and work on this bill.

Mr. BENTSEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of this bill, and I want to commend the chairman and the ranking member for working with a very difficult budget to put this bill together. I want to commend them for funding projects when they were facing at one point a 14 percent cut in the Corps' construction budget; yet they were able to figure out a way to do this.

Mr. Chairman, as a member of the Committee, I offered the amendment when we were marking up the budget resolution to restore the Corps funds. Unfortunately, that amendment failed, but I was hopeful that the chairman would figure out a way to do this.

I also want to thank them for figuring out a way to increase funding for the Brays Bayou project in my district, which just saw tremendous flooding along with the Sims and other bayous. I appreciate what they did for the Port of Houston project, although we did not get as much money as we would have liked. We hope that will be resolved.

Mr. Chairman, I would like to enter into a colloquy with the chairman regarding the Sims Bayou Texas project. The Sims Bayou Flood Control Project which is currently under construction is funded at $8 million in the committee's budget, I offered the amendment when we were marking up the President's fiscal year 2002 budget request, although it is $3 million below the amount which the Corps of Engineers Galveston District tells us is necessary to keep the project on schedule to be completed by 2009. As I mentioned, the greater Houston area just suffered tremendous flooding as a result of Tropical Storm Allison, including many of the neighborhoods along the Sims in my congressional district, and the district of the gentlewoman from Texas (Ms. JACKSON-LEE); and I think it is important for the chairman and the members of the subcommittee to know, however, where the Federal project had been constructed and was completed was not flood prone where there had otherwise been flooding in previous storms.

So the project does work and these projects do work. The chairman and the ranking member know that, and I think the rest of the Congress needs to know that as well.

I realize that the gentleman from Alabama (Mr. CALLAHAN) was faced with a very tight budget, and I appreciate the job that was done by the chairman and the ranking member, and the members of the subcommittee. I would ask as this bill progresses, that the committee consider increasing the allocation for Sims to get it up to the amount that the Corps would like to have to stay on track if additional funds become available through the appropriations process or through a requested reprogramming from the Corps of Engineers.

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. BENTSEN. I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, we will be glad to work with the gentleman and the victims of Tropical Storm Allison. We are happy to work with the gentleman from Texas (Mr. BENTSEN), and the entire Texas delegation to provide whatever assistance we can.

Mr. BENTSEN. Mr. Chairman, the majority whip, whose area includes the Brays, has been a very strong supporter of these projects. We have authored legislation on this, and I appreciate the work of the chairman and the ranking member, and the gentleman from Texas (Mr. EDWARDS).

Mr. Chairman, I rise in qualified support of H.R. 2311, the FY 2002 Energy and Water Appropriations bill.

When the Budget Committee, on which I serve, considered the President's proposal and produced a budget, I knew it was going to be very hard for Congress to fund many important water transportation and flood control projects. I recognize the incredibly difficult circumstances Chairman SONNY CALLAHAN, Ranking Member PETER VISCONTI have endured in crafting this bill. I would also like to thank my good friend from Texas, Mr. EDWARDS, a distinguished Member of the Subcommittee, for all the help and information he and his office have provided me.

In light of the dramatic budget cuts proposed for the Corps, I applaud the Subcommittee for funding the Brays Bayou flood control project at the Harris County Flood Control District's capability—$5 million. When completed, the Brays Bayou project will be a national model for local control, community participation, flood damage reduction in a heavily populated urban watershed, and the creation of a large, multi-use greenway/detention area on the Willow Waterhole tributary. The Brays project is a demonstration project for a new reimbursement program initiated by legislation I authored along with Mr. DELAY that was included in Section 211 of WRDA 1996. The program gives local sponsors more responsibility and flexibility, resulting in projects more efficient implementation in tune with local concerns.

I am very encouraged that the Brays project is on track to be fully funded at $5 million in Fiscal Year 2002, rather than $4 million, as the Administration suggested. The project will improve flood protection for an extensively developed urban area along Brays Bayou in southwest Harris County including tens of thousands of residents in the flood plain, the Texas Medical Center, and Rice University.

The entire project will provide three miles of channel improvements, three flood detention basins, and seven miles of stream diversion resulting in a 25-year level of flood protection. Current funding is used for the detention element of the project. Originally authorized in the Water Resources Development Act of 1990 and reauthorized in 1996 as part of a $400 million federal/local flood control project, over $20 million has already been appropriated for the Brays Bayou Project.

However, besides the admirable considerations, Brays Bayou is a flood protection project. The Committee has wisely lowered that to $70 million below the 2001 level. When I introduced an amendment to remedy this in the mark-up of the budget, I warned that Congress would not stand for such a large shortfall affecting public safety and navigational water projects. I am relieved that much of the proposed cut was restored, and I commend the Chairman and ranking member for their effort.

I appreciate that the Committee saw fit, to fully fund the Administration's request for the Sims Bayou project. Unfortunately the Administration did not request the full amount the Corps says is necessary to keep the project on schedule. My constituents are adversely affected by this cut. According to the Galveston District of the Corps, without funding the full $12 million capability of Corps for Sims, construction will fall behind and crucial funding is needed because of the great risks people have faced and will continue to face until completion of the project in this highly populated watershed. The need was illustrated when Tropical Storm Allison caused great damage to thousands of homes in this watershed several weeks ago.

The project is necessary to improve flood protection in the extensively developed urban area along Sims Bayou in southern Harris County. The Sims Bayou project consists of 19.3 miles of channel enlargement, rectification, and erosion control and will provide a 25-year level of flood protection. Before the funding shortfall, the Sims Bayou project was scheduled to be completed two years ahead of schedule in 2009. We cannot be confident of that prediction unless Sims funding is raised to $12 million in the Senate version and the Conference Report.

Flood control projects are necessary for the protection of life and property in Harris County, but improving navigation in our Port an integral part of the growth of our economy in the global marketplace. Therefore Mr. Chairman, I am disappointed that this legislation provides only 30 out of the needed $46.8 million for continuing construction on the 1215
Houston Ship Channel expansion project. When completed, this project will generate tremendous economic benefits to the nation and will enhance one of our country’s most important trade and economic centers.

The Houston Ship Channel, one of the world’s most heavily trafficked ports, desperately needs expansion to meet the challenges of expanding global trade and to maintain its competitive edge as a major international port. Currently, the Port of Houston is the second largest port in the United States in total tonnage, and is a catalyst for the southeast Texas economy, contributing more than $5 billion annually and providing 200,000 jobs.

The Houston Ship Channel expansion project calls for deepening the channel from 40 to 45 feet and widening it from 400 to 530 feet. The ship channel modernization, considered the largest dredging project since the construction of the Panama Canal, will preserve the Port of Houston’s status as one of the premier deep-channel Gulf ports and one of the top transit points for cargo in the world. Besides the economic and safety benefits, the dredged material from the deepening and widening will be used to create 4,250 acres of wetland and bird habitat on Redfish Island.

I want to take this opportunity to urge those who will be conferees on this legislation to fund the Port of Houston project to its capability. This project is supported by local voters, governments, chambers of commerce, and environmental groups.

I thank all the subcommittee members, Chairman, Ranking Member, and especially Representative EDWARDS for their support and their work under tough budgetary circumstances.

Mrs. EMERSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise today to commend the gentleman from Alabama (Mr. CALLAHAN), chairman of the Subcommittee on Energy and Water, and the gentleman from Indiana (Mr. VISCLOSKY), the ranking member, as well as the staff for doing a tremendous job in writing this bill under very, very challenging circumstances. They have done a tremendous job.

Mr. Chairman, I also want to make mention, as the gentleman from Texas (Mr. BENTSEN) did, about restoring the funding for the Corps of Engineers, which is very critical for my district, which has the largest amount of Mississippi and the Missouri Rivers. The work that the Corps does with regard to flood protection is vital to many people in my district.

I want to make mention of the excellent job that the complete staff and our chairman did with regard to hazardous waste worker training. It is a very vital issue. I have a lot of people who actually have worked in the facility in Paducah, Kentucky, who have faced many challenges; and the work that is ongoing there requires a lot of training for protection of lives.

But my real purpose in standing here today is to talk about the language in the bill that prevents the implementa-

tion of the egregious plan by the Fish and Wildlife Service which would impact the flow of the river transportation on the Missouri River. I can understand the concerns over the endangered species that this plan is designed to protect, but I think the cost is too high. I am not willing to displace thousands of farmers along the Mississippi and the Missouri Rivers. I cannot find a good way to explain to my farmers that they have to move because some fish upstream are not happy with their living conditions. It is not possible for me to do that.

This plan calls for a controlled release, but one cannot control the release and ensure that there will be no flooding. Early this month in 3 days the river rose from normal stage to flood stage from one end of Missouri to the other. The water level from Gavins takes 5 days to get to Kansas City and 10 days to get to St. Louis. Once released, the water is not retrievable. The “spring rise” prescribed by Fish and Wildlife would have added to the flooding experienced in Missouri earlier this month.

The Missouri River does not flow through my district, but the Missouri River feeds the Mississippi River and provides as much as two-thirds of its flow during dry years. Missouri River transportation is not minor and is very, very important to my constituents.

I am also concerned about this plan because from an energy standpoint we have an obvious crisis right now with the delivery of energy, and the Fish and Wildlife plan calls for low flows during the summer during peak power demand, reducing the availability of clean hydropower in the summer. Given the investment that our mercury project is making, I do not believe that we should implement a plan that will hinder hydropower production.

The Missouri Department of Natural Resources, which is an independent agency within Missouri, and with whom I did not agree on many occasions, as well as our Democratic Governor Bob Holden, as well as the entire Missouri delegation, Republicans and Democrats, the Senate and House, all reject the Fish and Wildlife Service plan, as do many others up and down the Mississippi River and the Missouri River all of the way down to New Orleans.

Mr. Chairman, I will listen to the Missouri Department of Natural Resources which says that the science behind this plan is not accurate and certainly will not do anything to help these species. Frankly, I reject the notion that the Fish and Wildlife Service is always right and our experts at DNR are wrong, and I clearly oppose that plan and hope that we can reach a compromise that is in the best interest of everyone involved.

Mr. Green of Texas. Mr. Chairman, I move to strike the last word.

I want to engage the chairman in a colloquy and talk about the critical importance to the people of Harris County, but before I do, I thank the gentleman from Alabama (Mr. CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY) for their efforts on flood control and drainage projects. I thank the gentleman from Texas (Mr. EDWARDS) who serves on the subcommittee for his efforts over the years.

Mr. Chairman, I am concerned about the level of funding for flood control projects, particularly the Greens Bayou and Hunting Bayou, all of which flow through my district in Harris County. Greens Bayou flooded nearly half of the 30,000 homes that were damaged by Tropical Storm Allison, while Hunting Bayou affected hundreds of homes as well. These two bayou systems need to be considered for increased support since the recent floods, increased funding for continued improvement to both the Greens and the Hunting Bayou systems.

Mr. Chairman, to see the estimated $4 billion-plus damage, and the loss of 25 lives, we on this floor realize the need to continue the Corps of Engineers projects not only in my district, but all of our districts throughout the country. In light of the recent severe flooding from Tropical Storm Allison, I ask the gentleman from Alabama (Mr. CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY) for their assistance to ensure that funding is restored as the bill moves through conference.

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. Green of Texas. I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, we are happy to work with the gentleman and the entire “T” committee with respect to their needs. We have discussed this with the majority whip, and he is concerned about some of the problems that are facing Texas. Yes, we will do everything we can to facilitate their needs for these very important projects.

Mr. Green of Texas. Mr. Chairman, I thank the gentleman. We have worked together, the seven Members of Congress who represent Harris County. The Greens Bayou I share with the gentleman from Texas (Mr. BRADY), and we have been out to see the devastation of our constituents, along with the gentleman from Texas (Mr. DELAY). I appreciate the efforts of the gentleman.

Mr. Green of Wisconsin. Mr. Chairman, I move to strike the last word for the purpose of entering into a colloquy with the gentleman from Alabama (Mr. CALLAHAN), the chairman of the Subcommittee on Energy and Water.

Mr. Chairman, as the chairman is aware, on September 11, 2000, an agreement was reached between the State of
Wisconsin and the Army Corps of Engineers to transfer 17 locks along the Fox River to the State of Wisconsin for ownership. Under the memorandum of agreement signed by then-Governor Tommy Thompson and Assistant Secretary for the Army Joseph Westphal, the Army Corps of Engineers is to provide the ‘full closure costs’ of $10 million to the State of Wisconsin upon the transfer.

This bill that we are considering today has allocated $5 million to the Army Corps for the transfer of the locks to the State of Wisconsin. Unfortunately, without the full payment of $10 million, this transfer and decades of negotiations will be placed in jeopardy. It is essential, in my view, that full funding for the transfer be included in the fiscal year 2002 appropriation bill or else the local and State matching grants for this project will be jeopardized.

This memorandum of agreement was a promise by the Federal Government to the State of Wisconsin, and I do not believe that we can shirk this responsibility.

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Wisconsin. I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman. I want to tell the gentleman that we applaud this historic agreement that the Governor and the State of Wisconsin have reached with the Corps of Engineers, and it is our intention to see that this commitment of the contract is fulfilled. We know the importance of it because when the gentleman first came to us and explained the importance of it, we, at the gentleman’s insistence, put the first $5 million in there.

We thought it could be a two-step project; but if this is going to interfere with the project, it is my intention to find somewhere in the budget the additional $5 million so this project can move forward as expeditiously as possible.

Mr. GREEN of Wisconsin. I appreciate the chairman’s willingness and commitment to make this transfer a reality. I congratulate him for the hard work that he has done and his staff has done on this bill. I look forward to working with him on this important project.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I move to strike the last word.

Mr. Chairman, my first order of business is to thank the chairman and the ranking member of this subcommittee for their very hard and collaborative work on this project. I want to clarify for some of my constituents that is, that the Army Corps of Engineers works, the funding on these projects works, for even though I come from Houston which is flood worn and weary, the areas where the Army Corps of Engineers and the funding from the Subcommittee on Energy and Water Development is the full task. I am very pleased to report unbelievably that there was no flooding. I am very grateful for that. My constituents likewise have said the same. That shows us that the areas that Houston did not have its work completed are in dire need.

And so I was to offer an amendment today giving an increase in funding to the Army Corps of Engineers of some $20.5 million, but knowing the hard work of this committee and the tightness of the efforts that it is making, I will not offer that amendment but offer to say that we can stand some additional assistance. Although I am gratified for the $5 million for the Brays Bayou, Mr. Chairman, that had progress on it where it was completed to a certain point and that area did not flood. We now have some $9 million in the budget with a capacity for $12 million. But there are areas that did flood, the Hunting area, the Greens Bayou area that flowed even though mostly into my colleague’s district, had an impact on some of our neighboring districts.

I am very interested in working with this committee and asking the chairman and the ranking member for their assistance as we provide the potential necessary dollars to either expedite or continue working on projects that have obviously worked.

I might say, Mr. Chairman, in addition, that the Army Corps of Engineers was very visible during the aftermath of the flood, taking aerial views. The general from the Dallas area who is over the whole region came in, which shows me that this is a worthwhile investment. I would like to enter into a colloquy with the chairman to ask him to provide us with assistance, in particular to monitor and work with us on Sims Bayou; to monitor and work with us on Hunting Bayou, and as well my colleagues have already mentioned the bayous in their community, we all work as a team, but to work with us in the Houston and Harris County area along with, of course, as the gentleman mentioned, the majority whip who has an interest obviously in these issues.

Mr. CALLAHAN. Mr. Chairman, will the gentlewoman yield?

Ms. JACKSON-LEE of Texas. I yield to the gentleman from Alabama.

Mr. CALLAHAN. I thank the gentlewoman for yielding. Yes, Mr. Chairman, we will be happy to work with her in any capacity we can and with the entire delegation from Texas. The gentlewoman has water needs in Texas now, and I encourage her full intent to do everything we can to assist her in those projects to make certain that, number one, we preclude flooding in the future; and, number two, that we repair any damage that was done during the most recent floods.

Ms. JACKSON-LEE of Texas. I thank the gentleman very much. I would offer to say to the ranking member that I thank him for his work. I look forward to working with his staff.

Mr. Chairman, I yield to the gentleman from Indiana to comment on these efforts. We have already worked with him and his staff. I want to thank him. I would appreciate his assistance as well as we move through this process with the funding for bayous that have yet been completed or need additional assistance.

Mr. VISCLOSKEY. We would be happy to continue to work closely with the gentlewoman.

Ms. JACKSON-LEE of Texas. I thank the ranking member very much.

Mr. Chairman, if I would simply say that these dollars are well needed, they have been well invested, we saw the impact of the funding sources of the Army Corps of Engineers, but we are still suffering. We look forward to working with this Congress to help us as we try to improve those conditions.

Mr. BISHOP. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of H.R. 2311, the Energy And Water appropriations bill. I commend the full committee, subcommittee ranking member Visclosky, and especially Chairman Callahan for all their hard work, particularly on the Tri-Rivers project.

Commercial barge on the Appalachicola, Chattahoochee, and Flint Rivers system is an important issue for our region’s economic infrastructure. I am pleased to see the increased level of funding that this committee has appropriated. Recently, I traveled to Georgia and Florida with Members of the House and Senator Graham of Florida to observe the Tri-Rivers process firsthand. This is a very, very intricate, sensitive area and issue, particularly with Representatives from the three States of Alabama, Florida and Georgia.

The ports on these rivers provide jobs and revenue, particularly for my area of southwest Georgia. The ports of Bainbridge and Columbus generate 548 jobs and over $3 million in State and local taxes. These jobs have a direct impact on the economies of small river towns like Bainbridge, Georgia. Revenue generated at both of the ports, that is, Bainbridge and Columbus, total over $40 million and in turn contribute over $1 million in State and local taxes. The barge system has many economic and environmental advantages that are often overlooked. Barging is energy efficient. An inland barge can transport more materials using far less fuel than other means of transport. A navigable river system provides a competitive alternative that helps reduce rates for other modes of transportation. These
rivers must remain navigable if we are to continue to see these economic rewards.

In the past, the Corps of Engineers has done an environmentally messy job and caused a great deal of anguish in Georgia, Florida and Alabama, particularly in the Apalachicola, Florida area. We know now that better management of water levels upstream by the Corps and better care in the disposal of the waste from dredging will help all of us have a mutually enjoyable use of the river system. The money that is appropriated in this bill will help ensure that dredging has a minimal environmental impact.

It is my vision to see continued economic success for the communities that take advantage of the Apalachicola, Chattahoochee, and Flint Rivers as one of their means of transportation. I encourage my colleagues today to support rural industry and efficient transportation by voting yes on this energy and water appropriations bill.

Mr. TANCREDO. Mr. Chairman, I thank the ranking member and all those who support this bill because I think it is much needed and it is a step forward.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:
SEC. 104. (a) CONVEYANCE AUTHORIZED.—The Secretary of the Army shall convey to the United States in and to a parcel of land consisting of approximately 4.35 acres located in Pottawatomie County, Tuttle Creek Lake, Kansas.

(b) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the real property to be conveyed under subsection (a) shall be determined by a survey satisfactory to the Secretary.

(c) REVERSION.—If the Secretary determines that the property conveyed under subsection (a) ceases to be held in public ownership or to be used as a site for a fire station, all right, title, and interest in and to the property shall revert to the United States, at the option of the United States.

Mr. TANCREDO. Mr. Chairman, in his budget request to Congress, President Bush proposed reversing the cost-sharing ratio of major shore protection projects from 65 percent Federal share/35 percent local share, to 35 percent Federal/65 percent local. The energy and water appropriations bill includes language to block this proposal. The Tancredo-Blumenauer amendment would strip the bill of this fiscally damaging and environmentally questionable legislative rider.

In an interview with the Associated Press yesterday, Office of Management and Budget spokesman Chris Ullman said that the White House continues to believe that the Federal Government should spend less to build beaches. "Since most of the benefits are to localities and local beachgoers, it seems reasonable that they would pay the majority of the costs of sustaining those beaches."

The Army Corps of Engineers recently began the world’s largest beach replenishment project, to provide 100-foothigh dunes along all 136 miles of New Jersey’s coast. This is at an average cost of $60 million per mile. Right now, the Federal Government is obligated to pay the majority of that cost, or 65 percent to be exact. What is worse, most artificial beaches wash away within 1 year of replenishment, leaving taxpayers’ money and environmental damage left in their wake, so to speak.

We encourage you to support the Bush administration’s effort to save tax dollars and cut environmentally questionable spending by removing this legislative rider on beach replenishment cost-sharing.

The current Federal policy of subsidizing beach projects, by the way, is a $50-year agreement with towns. That policy is unsustainable. That means 65 percent of the cost we would be required to fund for 50 years at current levels.

The Duke University program for the study of developed shorelines estimated that the cost to pump sand on just four Atlantic coast States, Florida, South Carolina, North Carolina and New Jersey, will be more than $4 billion.

Many of these beach communities are privately owned and privately re-nourish their beaches. They pay for the projects through hotel-use taxes and progressive property tax assessments according to how close the property lies to the beach. Many, many of these areas, of course, are some of the most expensive areas, most expensive pieces of property that you can purchase in the United States of America. To suggest that the Federal Government has the responsibility to pay for 65 percent of the cost of the renourishment project on that beach every year is ridiculous.

Let me quote from a statement of the administration’s position on this that they have just put out:

"The administration appreciates the committee’s efforts to address administration funding priorities for the Army Corps of Engineers program. However, the administration is concerned about the increase of over $568 million over the request for Corps programs. We can have a strong water resources program at the funding level proposed in the budget by establishing priorities among projects. The administration is particularly concerned that the bill contains approximately $360 million for about 350 specifically identified projects and activities that were not included in the President’s budget. We urge Congress to limit the number of projects and to focus funding on those projects that address the Corps’ principal mission areas."

"We are disappointed that the committee has included legislation that would preclude the Corps from carrying out in fiscal year 2002 the administration’s proposal to increase local cost-sharing for the renourishment phase of ongoing shore protection projects. This proposal would help ensure that the Federal Government’s long-term renourishment obligations do not crowd out other important funding needs. We urge the Congress to reconsider this proposal."
Florida. I want to preserve them, and I want to make absolutely certain that the Corps of Engineers understands that this is one of the reasons for the Corps should not be borne by the State of Florida in the 65-35 ratio that they are talking about.

Mr. Chairman, the beaches in Florida are probably the most beautiful in the world, especially in the panhandle of Florida next door to my district.

Mr. Chairman, I rise to join the chairman in strong opposition to this amendment. First of all, coastal shore protection projects are equivalent to flood protection for inland communities. This proposal places storm damage prevention and shore protection projects that have a clear advantage over comparable inland flood control projects. It will disproportionately affect poor communities which will be unable to raise adequate funds for these projects. It also violates the cost-sharing agreements already in place for some ongoing shore protection projects. It abrogates existing, ongoing, long-term contracts with non-Federal sponsors, and it is inconsistent with the agreed cost-sharing adopted by the WRDA legislation of 1986.

Mr. Chairman, I am strongly opposed to the gentleman’s amendment.

Mr. PALLONE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to speak strongly against this amendment for several reasons. First of all, I want to address my comments to some of the comments that the gentleman from Colorado (Mr. TANCREDO) made. I need to start by strongly disagreeing, and I want to make clear that if this amendment were to pass, I assure everyone that the shore protection beach replenishment projects in New Jersey and probably throughout the country would simply not take place. It is erroneous to assume that the towns that are being asked to foot the bill, and in this case under this amendment the additional costs to pay for these beach replenishment projects, would be able to pay for them. They simply would not.

I live in a municipality that has about 30,000 people. I represent some towns that have less than 2,000 people. They barely are able to get the money together now to pay for the percentage that they have to pay toward Federal Government paying most of the cost. If they had to double or triple that under the funding formula that the gentleman from Colorado (Mr. TANCREDO) is proposing, the beach replenishment projects would simply not take place.

Let me say that in my district where one of these projects basically extends about 50 miles along the shoreline, that with a very small exception, probably of that 50 miles maybe no more than one or two, we are talking about public municipally owned beaches. We are not talking about mansions and big homes and wealthy Gold Coast municipalities here. The town that I live in has 5 miles of that 50-mile coastline that is affected by a beach replenishment project. We are what we call an urban-aid project in New Jersey, which means we are one of the poorer towns in the State. We have the second poorest town in the State. I will not mention the name. I do not need to. That is also part of the project. We are not talking about rich areas.

This will not happen. These projects will not take place if this amendment were to pass.

Now let me talk about two other things that I think are misleading here with regard to this amendment. First of all, I think it has to be understood that the current beach replenishment program is done in a way to save the Federal Government money. Not cost the Federal Government more money, but save the Federal Government money. I will say why.

The Army Corps of Engineers goes through a very strict cost benefit analysis in deciding which of these beach replenishment projects to fund, and they weigh the costs and the benefit to the Federal Government. In every case, the cost to the Federal Government has to be significantly less than the benefit. What is the cost to the Federal Government if they do not do the projects? Well, we know about FEMA. We know about the disaster declarations after a hurricane or a tidal wave or whatever it happens to be.

We have a lot of hurricanes along the New Jersey coast. Every time there is a hurricane, there is a disaster declaration. The Federal Government, under FEMA, has to come in and spend millions and millions of dollars to replace and rectify the situation and the damage that occurs.

The Army Corps of Engineers does these beach replenishment projects not because they want to give somebody a nice beach to sit on but because they know that they do not have to come in with a disaster declaration because the storm does not affect the upland area, the infrastructure, the utilities, the roads, that the Federal Government would have to come in and bail out.

This is done to save the Federal Government money that they would have to pay through disaster declaration. It makes no sense not to do these projects from the Federal Government’s point of view. It is cost effective.

Lastly, I want to make one other point. Mr. Chairman. It has not been said yet but I am sure I am going to hear from some that somehow these projects are not good for the environment. That is simply not true. There is strong indication that when beach replenishment is done it is a good thing for the environment. We have been able to do the beach replenishment so that the surfers and the bathers and the fisherman are not negatively impacted. It can be done and it has been done, and it has to be done under the current law so there is access to the beaches for the public and so that the beaches are done or sculpted in a way that the people that use the ocean, whether they be fisherman or surfers or whatever, can continue to do so.

I urge you not let me tell me that a vote on this amendment is a good environmental vote. That is simply not true. I am one of the staunchest defenders for the environment in the
House of Representatives. A vote against this is a good environmental vote. I am going to tell everybody I know who thinks that somehow this is something that relates to the environment, it is not. Beach replenishment is good. It helps the Federal Government cut costs. It is good for the communities and it is good for the environment.

Mr. WELDON of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Tancoredo amendment, which removes the protections in the bill for existing projects and allows for contracts the government has signed with communities across the Nation to be broken. The Tancoredo amendment singles out existing beach renourishment, storm damage prevention projects for special adverse treatment. This amendment would cause serious harm to a project already underway in my district, Brevard County.

The Federal Government caused most of the erosion along the beaches in Brevard County when they constructed the Federal inlet in 1953. This inlet was to create Point Canaveral and a facility for the U.S. Navy so that they could take part in testing of their ballistic missile program.

Indeed, one can say the Federal inlet in Brevard County was part of our national effort to win the Cold War. Studies have been completed by the Corps of Engineers, the county, independent experts and, yes, even the U.S. Department of Justice and all have found the Federal Government largely at fault.

In fact, the Justice Department settled a case brought by over 300 coastal property owners because they knew the Federal Government was guilty. That agreement calls for this project to be completed.

There are serious environmental issues here as well. Brevard County beaches are home to the largest concentration of nesting and endangered sea turtles in North America. Ten percent of the entire sea turtle nesting population in North America lays its eggs on these beaches. Throwing a roadblock in front of this project will further threaten this endangered species and contribute to more habitat erosion.

In short, the formula that currently exists is the proper formula, and I believe that this amendment would do serious harm.

Mr. BROWN of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. WELDON of Florida. I yield to the gentleman from South Carolina.

Mr. BROWN of South Carolina. Mr. Chairman, I rise in strong opposition to the amendment to reduce the Federal Government’s investment in beach renourishment.

This proposal is not only shortsighted but it clearly violates today’s agreements that local communities have arranged with the Army Corps of Engineers. To walk away from these commitments is simply wrong. How can we expect the coastal communities in South Carolina and other States to successfully budget for other major infrastructure investments if we arbitrarily increase their local cost share by over 80 percent?

I support reigning in unnecessary government spending, but our shore protection program, Mr. Chairman, is absolutely necessary for us to maintain the natural resources’ responsibility for coastal hazard and erosion protection. If we do not honor the current Federal-local cost-sharing formula, we should know the communities in my district, including Folly Beach and Folly Beach and 150 miles of the shoreline of South Carolina will be facing an enormous financial hardship, so much so that it jeopardizes the progress we have made in improving our water and waste water infrastructure, roads, and bridges.

Without the current cost-share partnership, we risk the preservation of the beautiful beaches that attract over 12 million visitors throughout our country. Our beaches belong to everybody. They provide a wonderful source of recreation for both young and old Americans. We hope our responsibility will be seen to help preserve these great natural resources.

Contrary to the programs’ critics, beach renourishment is a sound investment. I urge my colleagues to reject this ill-advised amendment.

Mr. WELDON of Florida. Mr. Chairman, it took 15 years in Brevard County to develop this formula and this agreement. This amendment would set back years of work. I strongly encourage all of my colleagues to keep the faith that has been hatched between the Federal Government and all of these communities throughout the country. The provisions, the language that the chairman and the ranking member have put in this bill, I think, are very wise in grandfathering the existing programs under the current formula; and I would encourage all of my colleagues to reject this amendment.

Mr. CALLAHAN of Alabama. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto be limited to 20 minutes, the time to be equally divided between the proponent of the amendment and a Member opposed.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

Mr. BLUMENAUER of Oregon. Mr. Chairman, I yield to the gentleman from Colorado.

Mr. TANCREDO of Colorado. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The CHAIRMAN. The time will be equally divided between the sponsor of the amendment, the gentleman from Colorado (Mr. TANCREDO), and the gentleman from Alabama (Mr. CALLAHAN) will control the time in opposition.

The Chairman recognizes the gentleman from Colorado (Mr. TANCREDO).

Mr. TANCREDO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in response to some of the claims that have been brought up here, especially by my friend, the gentleman from New Jersey (Mr. PALLONE), who suggests that there is no environmental concerns that should come up as a result of this and that anybody that suggests there is an environmental problem is simply off base, of course, he is therefore saying that the following organizations, American Rivers, Earth Justice Legal Defense Fund and Environmental Defense, Friends of the Earth, League of Conservation Voters, National Wildlife Federation, Sierra Club, all of these people do not know what they are talking about when it comes to environmental issues and whether in this particular case especially they are simply off base.

Well, I do not certainly consider myself to be an expert in this particular area but I would say that there is some cause for concern with regard to the environmental issues developed by this beach replenishing program.

Federally subsidized beach projects mainly benefit wealthy vacation condo owners and tourism. The gentleman from Myrtle Beach, South Carolina (Mr. BROWN) referred to the fact that 12 million visitors a year enjoy these particular areas.

I think that is wonderful. Now, in fact, who is benefiting from those 12 million visitors? It is, of course, the communities that are adjacent to these beaches. Those communities should be responsible for the majority of the cost of replenishing the beaches. That is all we are saying here. We are agreeing with the administration.

Mr. Chairman, I yield such time as he may consume to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER of Oregon. Mr. Chairman, I appreciate the courtesy of the gentleman in yielding time to me. I am pleased to join him in cosponsoring this amendment.
Mr. Chairman, I think the gentleman had it right when he mentioned that there is at least an argument when you look at the major environmental organizations around the country who suggest that this Congress ought to have a debate like this on this floor on the environmental and economic impacts of these massive beach replenishment programs.

With all due respect to our other friend from Florida, it is true that the Federal Government at times has created these problems. It is because we are in a vicious cycle here. We engineer our beaches, we fortify them, we put up jetties, we accelerate the process of coastal erosion, and we make the problem worse.

Then we come forward with these interesting projects. We have watched over the last decade as the Corps of Engineers and this Congress has expanded dramatically the sweep of the Federal involvement in beach nourishment and replenishment.

I think we ought to take a deep breath, take a step back and support this amendment, and give this administration an opportunity to pursue an initiative that is both environmentally sensitive and is fiscally responsible.

When we look at these massive projects, we have authorized one and two-thirds billion dollars in the last decade alone. In the State of New Jersey, where my good friend mentioned a moment ago it was of concern to his district, well, it is. If you look at beach nourishment costs in New Jersey, it is $60 million per mile.

In WRDA, I dare say there were very few Members on this floor who understood the massive project that was slipped in without significant debate for a 4 mile stretch of beach in Dare County, North Carolina, for $1.8 billion, a commitment over the next 50 years. I would dare say that a massive project on this scale merits discussion on the floor of this Chamber, but we do not have it. I was a member of the authorizing committee. It was news to me. I dare say it was news to other Members here.

It is not a benign process akin to laying a road in some area that we have to put the beach spoils, the dredging spoils. This saves the Federal Government money.

Take a look at the record. Mr. Chairman, there have been exposes; in fact, there have been journalistic exposes dealing with the State of Florida with the massive amount of ecological destruction. There is not just spoils with white sand that we would have to pay somebody to take over. Oftentimes we go out to these sensitive ecosystems for dredging materials that we end up putting in these areas.

If you look at the cost factors, noted Duke geologist Orrin Pilkey, a recognized expert in this area, points out that usually beach nourishment projects cost twice what the cost estimates indicate that it ends up being about half as effective.

We could look in Ocean City, Maryland, where the Army Corps of Engineers budgeted to use 15 million cubic yards of sand over the next 50 years of beach replenishment, but in the first 3 years of that project the Corps had used one-third of the total sand allocation. I am blanking right now on the project, and I can get it for you, where it has been on average one a year on the east coast.

There are problems here of significant magnitude. It is not ecologically benign. It is extraordinarily expensive, and we are facing a situation where FEMA has commissioned studies that indicate over the next 60 years we are going to have 25 percent of the structures within 500 feet of the ocean coastline subjected to erosion and damage.

That is without taking into account the impact of global climate change.

Mr. Chairman, I think this is an opportunity for people who care deeply about the environment to join with people who sympathize with the members of this committee who do not have enough money to solve the problems and allow the Bush administration to see if they can come up with a better cost formula. The Democrats ought to be able to submit to this. It is something else that the Clinton administration wanted to do. I think this is an important issue.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. SHAW). No man in this body has been more vocal and outstanding in the preservation of beaches than the former mayor of Fort Lauderdale.

Mr. SHAW. Mr. Chairman, I thank the gentleman for yielding me time. I want to congratulate the chairman of the full committee as well as the ranking members of the full committee and subcommittee for recognizing the importance of beach renourishment.

I have heard some figures thrown out here today that make absolutely zero sense. $60 million a mile? I know of no beach renourishment anywhere in the country, and I checked with the gentleman from New Jersey, and he said that is absolutely preposterous.

I listened to the gentleman from Colorado where he said he is no expert on the particular subject. He has brought the amendment here, and he has quoted some various environmental organizations, some of which have credibility, some of which I think are somewhat debatable.

But, in any event, let me ask the question to any environmentalist here in the Chamber: I have beaches that are nothing but rock. Is that an environmentally sensitive area that should be protected? These were naturally covered with sand. Now the sand is gone. In Boca Ratn, Florida, a whole strip is nothing but rock. You go down into the Florida Keys. In Dade County and Dade County, you are seeing the same thing. These beaches need to be renourished.

If one is concerned about the turtle and reproduction of the turtle, they do not lay their eggs in rocks; they lay them in beach sand. There is great sensitivity as to the time we do the beach renourishment. It is very strictly regulated as to the breeding seasons of the turtle, so you do not destroy their natural habitat.

We talk about FEMA and 500 feet within the beach. I can tell you, the ocean is coming right up to many of the structures, and they are going to be destroyed if we do not get this involved and stay involved in beach renourishment.

The right of contract, the word of the Federal Government, the obligations of the government that would all be wiped out with this senseless amendment.

This amendment must be defeated. I urge all my colleagues to vote against this amendment.

I would say in closing, view the beaches of this country as a national park. We heard that the local communities should pay because they are the ones benefiting from it. Do you want to make the same argument about our national park system? I doubt it. It is there for all Americans.

Over half the Americans in this country do their vacationing at the beaches of this country. Let us keep our beaches safe. Let us keep them environmentally where they should be.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from North Carolina (Mr. JONES). Mr. JONES of North Carolina. Mr. Chairman, I thank the gentleman very much for yielding me time.

I want to say to my good friend from Colorado (Mr. TANCREDO), I generally agree with him on just about every vote we have; but on this one he is totally wrong. I want to take a different perspective.

Not talking about the environmental issues, I must say to the gentleman from Oregon, I have great respect for you also, though I disagree, but Dr. Gilkey is an extremist. I do not have the time to get into why I feel he is an extremist, but he is.

Let me very briefly say that what we are talking about is the economy of these areas, the people that pay taxes, the people that want to do for their families. That is really what it comes down to.

Let me give you an example. In Dare County, which the gentleman made reference to earlier, the Corps of Engineers says for every $1 spent on beach renourishment in Dare County, it will return $1.90 cents to the Federal Government. So any time we can make
those kinds of investments, we need to do that. We need to partnership with the people of this country that pay the taxes.

So I want to say to the chairman and the ranking member, thank you very much for this effort. I want to close in saying, Mr. Chairman, that beaches are this country’s economic engines. Four times as many people will visit beaches this year as will visit the national parks. That is telling you how important the beaches are to the American people.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from Delaware (Mr. CASTLE).

Mr. CASTLE. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, I too rise in opposition to this amendment. It has been stated that four times as many people visit our beaches as visit the national parks in our country.

What do people dream about? They dream about going to the beach. If they talk about their retirement, they talk about a beach someplace. People want to basically be on beaches. We have many beaches in Delaware that are probably as popular in these buildings around here as any beaches in the entire country. Foreign visitors want to come to beaches in the United States of America.

There is tremendous economic production from the beaches that we have across this country, a huge tax benefit, up to 180 times the Federal share that is involved in paying for the beach replenishment which we have. If we did not have this replenishment, it would be almost impossible to have these dreams, to have the ability to offer our beaches to people around the United States of America.

It also protects our migrant birds, which come into my State and come into some other States. It protects us from major storms. And there is huge population growth across the United States of America from our beaches back inland, because people like to be able to access and go to the beaches of our country.

This, unfortunately, is an amendment which is wrong-headed in terms of what it does, and we should defeat it.

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to say to this body and to the world that when I retire, if I ever do, I intend to spend a great deal of time in southern Florida on my boat; and I want to view these beautiful beaches as I patrol the waters of the Atlantic and the Gulf Mexico and the Keys, and I want to go down in history, if I leave any mark on this Congress, as the man who saved the Florida beaches. I think the fact that I am going to go down in history as the man who preserved the beauty of the Florida beaches is a good compliment to the service that I have had in this Congress. So I look forward to that reputation.

Mr. Chairman, I reserve the balance of my time.

Mr. TANCREDO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I have a feeling that regardless of what happens with this amendment, even if it were to pass, that my friend and colleague, the gentleman from Alabama (Mr. CALLAHAN), will be able to enjoy a very pleasant retirement on the beaches.

The fact is that, of course, we are not talking about anything here that is going to eliminate the beaches of the Nation. It is just crazy to suggest that if we would allow the administration to go back and do whatever it thought necessary, all of a sudden, all the beach property in this Nation is gone. Nobody would take care of it. The communities that live alongside of it, the homes that are built alongside of it, it is not their responsibility; it is somehow ours. And if we did not kick in 65 percent, it all disappears.

Of course, that is not accurate. It is not what this amendment is intended to do, but it is typical. I know any time we are trying to cut ten cents out of the budget around here, it is almost the most dire consequence we can possibly think of that we use in response to the request to cut the funds.

This is not even a request to cut. We will still spend the money; it is just who is going to be responsible for it. It is not even mandating that we go to the 65-35 split, 65 local. It is saying let us put the administration have the option of managing this. It is not mandating a thing in here.

Mr. Chairman, I yield the balance of my time to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I would suggest that if people really are serious about preserving the beaches, that maybe this Chamber could be more serious about global climate change, the rising level of oceans, because what we are talking about with beach nourishment, if what the scientific experts tell us is accurate, we may be fighting a losing battle.

I would duly suggest that maybe suggesting allowing the Bush administration an opportunity to revisit these issues is not something that is a radical and extreme position. It is one of these areas where there is a convergence, I think, of fiscal conservatism and thoughtful environmentalism.

It is true that sometimes there are rocks that occur on beaches. There is a natural ebb and flow. We have it in beaches in Oregon. What we have done, however, in our infinite wisdom, is we continue to fortify the beaches, to engineer them, to put up jetties, to put in sand, to disrupt the process, so actually it ends up making it worse over time.

So the Federal taxpayer is on the hook. We mess up the natural process of restoring the beaches, and when we further looking at changes that are a natural part of the environmental process, we just make it worse.

In Oregon, we had a situation with the senior Senator from our State having beachfront property that is being eroded, and there was a great hullabaloo because there was an effort to try and restore and fortify and wall off that portion of the beach. We made it a difficult public policy decision that that would simply put the taxpayer on the hook and deflect the problem further.

Mr. Chairman, I appreciate that these are difficult, but I would think that we need to take our time, stepping up and being serious about this. Otherwise we are going to end up putting the taxpayer on the hook for a lot of money that is going to make the problem worse over time.

Mr. CALLAHAN. Mr. Chairman, I yield the balance of my time to the gentleman from Florida (Mr. YOUNG), the chairman of the committee, who knows firsthand the importance of this issue.

Mr. YOUNG of Florida. Mr. Chairman, I want to thank the gentleman from Alabama (Mr. CALLAHAN), the subcommittee chairman, for doing a really good job on this bill, as I have said earlier. I must say that I really appreciate his commitment to Florida’s beaches. I know that he will have many opportunities to help support Florida’s beaches and protect them in his pristine condition. We go through the various appropriations processes. Seriously, I really do appreciate that support.

Mr. Chairman, I rise in opposition to this amendment and in favor of the committee position. We cannot think about this. The subcommittee thought that we should review this issue, and we did. The reason that we have a formula of Federal-State-local partnership is for the same reasons we have a partnership for highways. We have a Federal-State-local formula for building highways and maintaining highways, because people all over America use highways, all over America. People from all over America use beaches, wherever they might be in America.

We have heard the arguments about the economic effect, the economic impact. We have heard the arguments about the pleasure-seeking people who go to the beach to swim and get out into the sun and have a good time, and all of those are good, solid arguments. There is more to it than just that.

The fact of the matter is that having a good beach protects the infrastructure of the community. Now, I live in a
community where we have water on the Gulf of Mexico on one side, water from Tampa Bay on the other and water from the Biscayne Bay goes right up the middle, but we have a lot of water front. I can tell my colleagues when we get a hurricane in Florida, in my part of the State, most of the damage comes from the high water that pounds against the sea wall, that pounds against these structures. The better beach that exists, the less damage we have to the infrastructure. I have seen roads and highways washed out because there was no beach to protect against that hurricane tidal surge. So it is important that we not only have the economic effect, the tourist effect, but the effect of protecting the infrastructure of the communities.

Now, the formula was established by law. We did consider it seriously, but I think it is important that we stick with the existing contracts. If the gentleman wants to change the formula, the gentleman should go to the appropriate authorizing committee and offer a bill.

Mr. LOBIONDO. Mr. Chairman, I rise in strong opposition to this amendment. It maybe well-intentioned, but it is important that we not only have the economic effect, the tourist effect, but the effect of protecting the infrastructure of the communities.

Mr. TANCREDO. Mr. Chairman, I rise today in strong opposition to this amendment which would eliminate the federal cost share of 65 percent for US Army Corps of Engineers beach replenishment projects.

Beach replenishment is vital to the coastal economies in our country. Millions of residents and small businesses make their home near the coastline and that population increases dramatically in the summer as tourists flock to the beaches. The continued economic health of our nation's beaches is dependent on these important beach replenishment projects by the US Army Corps of Engineers. The pristine white sand beaches are not only a vital component of the tourist industry, but an important natural resource that supports populations of commercially and recreationally significant fish and rare and endangered species.

Mr. SAXTON. Mr. Chairman, I rise today in strong opposition to this amendment which would eliminate the federal cost share of 65 percent for beach replenishment for ongoing and future projects.

Coastal communities have been asked to "voluntarily" increase their cost share for beach replenishment projects to 65 percent, despite that current project authorizations are at a 35 percent state cost share. This is obviously unfair to the State and local governments, who have budgeted their costs for beach replenishment based on their contracts with the federal government and do not have the additional funds which is almost double their authorized cost share.

Coastal States have consistently shown their commitment to assist in the preservation and replenishment of beaches along the Nation's coastlines. The proposed Federal change in cost sharing would only result in the delay or elimination of projects potentially increasing the property damage from hurricanes and severe storm events.

Many coastal communities, such as mine, have suffered from repeated storm events over the last several years which has resulted in the narrowing and lowering of the beaches and dunes. This steady erosion has reduced storm protection that would otherwise have been available, which will only result in more property damage when the next storm or hurricane hits.

Each state receives federal funds to protect its communities from natural disaster, whether it is tornado, earthquake, drought resulting in crop damage, flood or hurricane. It is not fair to the coastal communities to withhold federal funds that would otherwise be available to prevent damage from natural disaster.

I urge by fellow colleagues to oppose this amendment and remember all states benefit from our nation's beautiful shoreline.

Mr. FRELINGHUYSEN, Mr. Chairman, I rise in opposition to the amendment.

I commend Chairman CALLAHAN for producing a bill that ensures our Nation's commitment to work in continued partnership with our state and local communities to address the vital need of shore protection and for supporting the traditional funding ratio that worked so well in my home state of New Jersey, tourism is vital to keeping our economy. With 127 miles of our clean beaches open for visitors from around the country and the world; this federal/state partnership helps maintain a dynamic tourism industry that employs over 800,000 people in my state alone.

Mr. Chairman, I urge my colleagues to oppose this amendment.

Mr. CALLAHAN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time having expired, the question is on the amendment offered by the gentleman from Colorado (Mr. TANCREDO).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. TANCREDO. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XXVIII, further proceedings on the amendment offered by the gentleman from Colorado (Mr. TANCREDO) were postponed.

Mr. BARTON of Texas. Mr. Chairman, I move to strike the last word. I would like to enter into a colloquy with the gentleman from Alabama (Mr. CALLAHAN), the distinguished chairman of the subcommittee.

Mr. Chairman, my family came to Texas in the 1840s and settled in Hill and Bosque County in the 1870s around a community called Whitney. My great-great-grandfather and my great-grandfather and my grandfather and my father all grew up on a farm under what is now Lake Whitney, because in the 1940s, the Corps of Engineers built a public lake. Since 1954, that lake has been open for use. There have been hundreds, if not thousands, of boat docks put on that lake, but beginning in the 1970s, the Corps began to refuse permits for new boat docks and, as the old boat docks have declined, they have refused to allow them to continue to be maintained.

I had submitted language to the Subcommittee on Energy and Water Appropriations that would be no cost, but would simply allow a holder of a permit on Lake Whitney for a boat dock to use that permit. I would like to ask the distinguished gentleman from Alabama (Mr. CALLAHAN), the chairman of the subcommittee, "Beach Boy Callahan," if he would support at some point in the process insertion of language that is of absolutely no cost to the Federal Government, but which would allow people around Lake Whitney which, at some point in time, had a permit for a boat dock to utilize that permit.

Mr. EDWARDS. Mr. Chairman, will the gentleman yield?

Mr. BARTON of Texas. I yield to the gentleman from Texas.

Mr. EDWARDS. Mr. Chairman, I am a little surprised because I represent
both Hill County and Bosque County. This is the first I have heard about it, and none of this is in the gentleman’s district. I respect the fact that he has family ties in the area, but as a member of the subcommittee, I would have at least asked the gentleman to contact me if I am aware of what he is trying to do.

Mr. BARTON of Texas. Mr. Chairman, reclaiming my time, the gentleman will yield. I had no idea this issue was coming up. It is wholly within my district. I am the only Texan of either party on this subcommittee. I do not know that I would have objection; I do not know if I would support the gentleman’s request, but it seems like it would have been common courtesy to approach me personally.

Mr. BARTON of Texas. Mr. Chairman, I have done that. Mr. EDWARDS. It would have been common courtesy to approach me personally and say, I am going to come to the floor today to talk to the chairman of the subcommittee about something that is not in my district that is within yours.

Mr. BARTON of Texas. Mr. Chairman, if I could reclaim my time, I think the gentleman from Waco has got an absolutely sincere complaint. The gentleman and I have spoken on this several times, but not in the last week. I thought this was in the bill.

Mr. BARTON of Texas. Mr. Chairman, not in the last month, not in the last year that I can recall. My request to the gentleman would be this: This bill still has a long way to go. I am more than willing to sit down with the chairman of the subcommittee, the ranking member, and the gentleman from Texas and see if we agree, and I would think this would change the shape of my congressional district, that I would have some input on this.

Mr. BARTON of Texas. Mr. Chairman, again reclaiming my time, the gentleman and I have not had a discussion on this recently.

Mr. BARTON of Texas. Yes, we have. Yes, we have.

Mr. BARTON of Texas. Mr. Chairman, I will say to the gentleman, I honestly do not recall that discussion. I have dealt with this issue since 1974 when I worked for former Congressman Tiger Teague, and I think I would remember if we had discussed any time in the last 12 months on this.

My request is simply one of common courtesy. I would like to work with the gentleman on this. I would like to work with the chairman on this. I would like to have a discussion, but I would not make any decision today on this. Let us work in good faith and sit down, since this is entirely, completely within my congressional district.

Mr. BARTON of Texas. Mr. Chairman, again reclaiming my time, I will withdraw my request for a colloquy, because I am focused at what the gentleman has just said.

Mr. EDWARDS. Mr. Chairman, if the gentleman will yield, I am stunned that this came up on the floor today, quite frankly. But despite being stunned on both sides, let us sit down and talk this out as two Members of Congress from the State of Texas and see if we can proceed.

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield? Mr. BARTON of Texas. I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, let me explain my position. This problem is not limited to just one county in Texas. It is also applicable to other portions of Alabama and other States where the same type of incident is taking place. My agreement with the gentleman from Texas (Mr. BARTON) was that I would agree to sit down with him to try to work out a problem that impacts me as well as other Members of Congress.

So it was not intended to move into one particular county, but to discuss the overall issue of what they are doing with these facilities that these people have been using, in some cases for decades. I think that we ought to try to find a solution that will apply to Alabama and to Georgia and to Missouri and all over the Nation, because we are all facing a similar problem.

Mr. BARTON of Texas. Mr. Chairman, reclaiming my time, let me say one thing, because I am not going to press the point. But the language that I had prepared does not expand the number of boat permits, it simply says if there is an existing boat permit or has been, that it can be utilized. That is all it does.

Mr. EDWARDS. Mr. Chairman, will the gentleman yield? Mr. BARTON of Texas. I yield to the gentleman from Texas.

Mr. EDWARDS. Mr. Chairman, I think what the gentleman from Alabama has suggested makes eminent sense; I respect that. I would look forward to being a part of that conversation along with other Members, but the gentleman from Texas’s comments only focused on a lake in my district, not in any other district.

Mr. BARTON of Texas. That is true, that is true.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 106. None of the funds made available in this Act may be used to revise the Missouri River Master Water Control Manual when it is made known to the Federal entity or otherwise responsible for funds are made available that such revision provides for an increase in the springtime water release program during the spring heavy rainfall and snow melt in the upper Missouri Basin that have rivers draining into the Missouri River below the Gavins Point Dam.
June 27, 2001

CONGRESSIONAL RECORD—HOUSE

of the Congressional Budget Act of 1974, as amended: Provided, further, That these funds are available to subsidize gross obligations for the principal amount of direct loans not to exceed $26,000,000.

In addition, for administrative expenses necessary to carry out the program for direct loans and/or grants, $280,000, to remain available until expended: Provided, That the Bureau of Reclamation is directed to assess and collect the full amount of the additional mitigation and restoration payments authorized by section 3407(d) of Public Law 102-575, to remain available until expended.

Provided, That the Bureau of Reclamation shall be available for activities or functions budgeted as policy and administration expenses, to be derived from such sums as may be collected in the Central Valley Project Restoration Fund pursuant to sections 3407(d), 3406(c)(3), 3405(f), and 3406(c)(1) of Public Law 102-575, to remain available until expended. Provided, That of the amount appropriated, the amount of program activities that can be financed by the Reclamation Fund shall be derived from that Fund.

COURSE VALLEY PROJECT RESTORATION FUND.

For carrying out the programs, projects, plans, and habitat restoration, improvement, and acquisition provisions of the Central Valley Project Improvement Act, $55,039,000, to be derived from such sums as may be collected in the Central Valley Project Restoration Fund.

POLICY AND ADMINISTRATION

For necessary expenses of policy, administration, and acquisition functions in the office of the Commissioner, the Denver office, and offices in the five regions of the Bureau of Reclamation, to remain available until expended, $968,000, to be derived from the Reclamation Fund and be nonreimbursable as provided in 43 U.S.C. 377: Provided, That no part of any other appropriation in this Act shall be available for administrative expenses.

AMENDMENT OFFERED BY MR. HINCHLEY

Mr. VISCLOSKY. Mr. Chairman, I offer an amendment. The Clerk read as follows:

Amendment offered by Mr. HINCHLEY:

SEC. 201. None of the funds made available in this Act may be used by the Bureau of Reclamation (either directly or by making the funds available to an entity under a contract) for the issuance of permits for, or any other activity related to the management of, commercial rafting activities within the Auburn State Recreation Area, California, until the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) are met with respect to such commercial rafting activities.

SEC. 202. Section 101(a)(6)(C) of the Water Resources Development Act of 1999 (113 Stat. 274) is amended to read as follows:

“(C) MAKEUP OF WATER SHORTAGES CAUSED BY FLOOD CONTROL OPERATION.—The Secretary of the Interior shall enter into, or modify, such agreements with the Sacramento Area Flood Control Agency regarding the operation of Poloma Dam and Reservoir, as may be necessary, in order that, notwithstanding an interagency agreement or provision of law, 100 percent of the water needed to make up for any water shortage caused by variable flood control operation during any year for such agreements with the Sacramento Area Flood Control Agency regarding the operation of Poloma Dam and Reservoir, as may be necessary, in order that, notwithstanding an interagency agreement or provision of law, 100 percent of the water needed to make up for any water shortage caused by variable flood control operation during any year for such agreements with the Sacramento Area Flood Control Agency,“.

Mr. CALLAHAN (during the reading).

Mr. Chairman, I ask unanimous consent that the remainder of title II be considered as read in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection. The CHAIRMAN. Are there any amendments to title II?

If not, the Clerk will read.

The Clerk read as follows:

DEPARTMENT OF ENERGY

ENERGY PROGRAMS

Savings

For Department of Energy expenses including the purchase, construction and acquisition of plant and capital equipment, and for energy supply activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of property or any facility or for plant or facility acquisition, construction, or expansion; and the purchase of not to exceed 17 passenger motor vehicles for replacement only, not to exceed $329,347,000, to remain available until expended.

AMENDMENT OFFERED BY MR. HINCHLEY

Mr. HINCHLEY. Mr. Chairman, I offer an amendment. The Clerk read as follows:

Amendment offered by Mr. HINCHLEY:

In title III, in the item relating to “DEPARTMENT OF ENERGY PROGRAMS; ENERGY SUPPLY” after the aggregate dollar amount, insert the following: ‘‘(increased by $50,000,000)’’.

In title III, in the item relating to “ATOMIC ENERGY DEFENSE ACTIVITIES NATIONAL NUCLEAR SECURITY ADMINISTRATION; WEAPONS ACTIVITIES” after the aggregate dollar amount, insert the following: ‘‘(reduced by $60,000,000)’’.

Mr. CALLAHAN. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto be limited to 10 minutes, the time to be equally divided between the proponents of the amendment and a Member opposed.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. HINCHLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to thank the chairman of the subcommittee for a very good work product, but every product can be improved, and I think that this amendment would improve this energy and water bill significantly.

One of the problems we face as a country, Mr. Chairman, is the fact that our energy policy looks backward rather than forward. We are dependent too heavily on fossil fuels, and increasingly those fossil fuels are coming from places beyond our shores. We are currently dependent on more than 50 percent of our oil from places outside of the United States.

What this amendment would do would be to increase the funding for renewable energy within this bill by $50 million. It would pay for that funding by taking $60 million from the Energy Department’s missile program.

Now, that missile program within the Energy Department currently is funded at the rate of $5.1 billion. That is just within the ‘‘Energy’’ Department. This bill increased that funding by $118 million for the projected fiscal year.

My amendment would take $60 million from that $118 million increase and apply $50 million of it to alternative energy. By alternative energy, of course, we mean producing energy through direct solar, by wind, geothermal and similar technologies.

□ 1630

It is important that we do so. It is important that we do so, because we want to improve the availability of energy from sources other than fossil fuels, and it is particularly important in terms of nuclear security, because we want to reduce the amount of energy that we need to import from places that are outside the United States.

We can do that by advancing technologies that promote solar, wind, and geothermal energy. And, up until recently, the United States led the world in the production of energy through photovoltaic cells and other direct solar means; however, beginning in the decade of the 1980s, we began to lose that edge. And that edge currently is enjoyed by the Japanese.

They have the edge on us by producing electricity directly from solar and by other solar means and photo-voltaic cells particularly.

Up until recently, we had the edge in producing additional energy through wind technologies. We have lost that edge to the Danes and to the Germans. They are currently ahead of us, and they have more advanced technology for producing energy through wind than we do.

We know that within the next several decades, production of energy through solar and wind technologies and geothermal technologies will provide industrial opportunities globally to the tune of hundreds of billions of dollars, perhaps, trillions of dollars, even by the midpart of this century. And for that reason, alone, as well as our own independence and security, we ought to
be advancing these techniques for energy production.

Mr. Chairman, I think that this amendment, which would increase our funding for renewable energy technologies by $50 million, is frankly little enough; and perhaps, the least that we could do at this particular moment. It would prevent this increase by drawing from the Energy Department's missile program. As we know, the Defense Department under Secretary Rumsfeld is currently engaged in a top-to-bottom review of our military defense program, and our nuclear missile program is going to be a major part of that.

Mr. Chairman, this bill funds nuclear programs through the Energy Department in ways that are, I think, greatly outdated, even archaic. For example, there is a provision in this bill to pay $96 million for a particular type of cruise missile which is used only by the B-52 bomber.

Now the B-52 bomber is 40 years old. It is clearly an outdated technology, and it is very likely that when the Rumsfeld review, top-to-bottom of our defense needs, is completed that this particular program is going to be rapidly phased out.

I can cite a number of other nuclear technology examples that are archaic, that are outdated, and which will undoubtedly not be funded as a result of the top-to-bottom review of the Rumsfeld program. So, therefore, I think it makes sense to take this money from that program and put it here to renewable energy.

Mr. Chairman, I reserve the balance of my time.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from California (Mrs. TAUSCHER).

Mrs. TAUSCHER. Mr. Chairman, I thank the gentleman from Alabama (Mr. TAUSCHER) for yielding me the time to me.

Mr. Chairman, I kind of feel like I am torn between two of my favorite things, as the ranking member on the panel to oversee the national nuclear security administration, I believe we should be investing more money in nonproliferation programs and counterproliferation programs. Obviously, as a Californian, I think it is very important that we work hard to make sure that we have strong energy policies and diversify our portfolio to make sure that we have renewables and alternatives to fossil fuels, but I cannot support this amendment, because we are investing very needed money and, frankly, robbing Peter to pay Paul.

Mr. Chairman, I urge my colleagues to vote against the Hinchey amendment.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. THORNBERRY).

Mr. THORNBERRY. Mr. Chairman, I appreciate the gentleman from Alabama (Mr. CALLAHAN) for yielding the time to me.

Mr. Chairman, I share the desire of the gentlewoman from California (Mrs. TAUSCHER) that we become more energy independent, but it would be a great mistake to take further funds away from our nuclear weapons program.

What the gentleman from New York (Mr. HINCHEY) may not realize is that our existing nuclear weapons are 18 years old and aging. They were designed to last about 12 years.

We have decided as a country that we are not going to conduct nuclear tests, but some way we have to make sure these weapons continue to be safe, reliable, and secure. If we do not have the funds to conduct surveillance and to conduct scientific tests, to see whether these weapons continue to be reliable, the only option for us is to go back to nuclear testing.

I am afraid amendments like this which would reduce the funds available to just make sure what we have now is safe, secure, and reliable drives us inexorably back towards nuclear testing which is not an option I suggest the gentleman would like.

Mr. Chairman, I oppose the amendment; and I suggest my colleagues do likewise.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from New Jersey (Mr. FRELINGHUYSEN).

Mr. FRELINGHUYSEN. Mr. Chairman, I thank the gentleman from Alabama (Mr. CALLAHAN) for yielding me the time; and I rise in opposition to this amendment.

Last year, Mr. Chairman, at this time, we were rightfully fixated on the security of our national labs and protection of our nuclear weapons program and data and research. This amendment would strip dollars away from the National Nuclear Security Administration's weapons activities program, the very programs we have worked to strengthen in last year's budget as a result of well-publicized security breaches.

As important as support is for renewable energy programs, the sponsor better find a better account to take it from. I oppose this amendment.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentlewoman from New Mexico (Mrs. WILSON).

Mrs. WILSON. Mr. Chairman, I rise in strong opposition to this amendment. We have cut the nuclear weapons budget in this country below what the President requested by $200 million.

I have a letter here from John Gordon that he handwrote to me this afternoon about this amendment and some way it might result in the further reduction of money for the nuclear weapons stockpile stewardship program. It says in part, now, on top of this comes news of potential further budget cuts resulting from possible floor amendments. This is completely unacceptable if we are to have any chance of meeting our high-priority mission needs.

The nuclear weapons program is supposed to certify the safety, security, and reliability of the nuclear weapons stockpile. Our stockpiling is aging, and we must continue to make sure it is safe and reliable for this country.

As much as I support conservation and investment in renewable energy, this is the wrong place at the wrong time to take that money from.

Mr. CALLAHAN. Mr. Chairman, we have only one more speaker and I think we have the right to close?

The CHAIRMAN. The gentleman has 1 minute remaining and the right to close. All time has expired on the other side.

Mr. CALLAHAN. Mr. Chairman, I yield the balance of my time to the gentleman from Tennessee (Mr. WAMP), a valuable member of the Subcommittee on Energy and Water Development and our expert on this issue.

Mr. WAMP. Mr. Chairman, I want to thank the gentleman from Alabama (Mr. CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY), the ranking member, for hearing our bipartisan plea to increase the funding for renewable energy sources in this bill.

We increased the funding $100 million above the President's request. We worked overtime to make sure that this appropriation bill matches the national energy policy from a balanced comprehensive approach. And as the cochairman of the Energy Efficiency and Renewable Energy Caucus with the gentleman from Colorado (Mr. UDALL), I thank them for hearing our plea to increase renewables.

The result is good and balanced, but the other side of the well-intended amendment of the gentleman from New York (Mr. HINCHEY) is that it takes funding from our nuclear stockpile stewardship and management.

Our country must maintain a safe and reliable stockpile for nuclear weapons. That decision has been made. This is not even debatable, frankly, in this country, in terms of the consensus of Americans that expect us to have a reliable nuclear weapons stockpile.

We must maintain our national preparedness, and we are losing that capability, so we must fight back this amendment in a bipartisan way.

Mrs. TAUSCHER. Mr. Chairman, I rise in reluctant opposition to this amendment.

Reluctant because I have been an outspoken critic of the President's budget, which made drastic cuts to COE's renewable energy programs. Programs that promote renewable energy technologies must be part of any comprehensive, comprehensive energy plan.

I am pleased that my colleagues on the Appropriations Committee have restored some of the funding to the renewable energy accounts, providing $1 million above last year's levels.
June 27, 2001

CONGRESSIONAL RECORD—HOUSE 12137

Clearly more needs to be done. It is important to advance development of renewable technologies for applicable use in our homes and businesses and on our grids as soon as possible.

But Mr. Chairman, I must oppose any attempt to defer fully funding our nuclear weapons programs while we wait for the Secretary of Defense’s Strategic Review to be completed.

As a Member of the House Armed Services Committee, I can tell you that the Secretary has briefed me and my colleagues on the status of this Review, and based on these briefings, it is unclear when this Review will be completed.

These programs are vital to our national security and cannot afford to be underfunded or delayed until the Administration concludes its Review.

I’d even given some of the military needs identified in this year’s supplemental appropriations bill, like training and readiness, military personnel quality of life issues, and advanced weapons systems; it is clear that the funding needs of our nuclear weapons programs at DOE next year must be maintained in this bill.

Mr. Chairman, I urge my colleagues to oppose this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. HINCHHEY).

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. HINCHHEY. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to the clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from New York (Mr. HINCHHEY) will be postponed.

The Clerk will read.

The Clerk reads as follows:

NON-DEFENSE ENVIRONMENTAL MANAGEMENT

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for non-defense environmental management activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition of real property or facility construction or expansion expenses; or (3) used to support multipurpose activities inconsistent with the restrictions provided in 18 U.S.C. 1913; (2) used for litigation expenses; or (3) used to support multi-State efforts or other coalition building activities.

For salaries and expenses of the Department of Energy necessary for departmental administration in carrying out activities pursuant to the Nuclear Waste Policy Act of 1982, Public Law 97–425, as amended: Provided further, That $6,000,000 shall be provided to affected units of local governments, as defined in Public Law 97–425, to conduct appropriate activities pursuant to the Act: Provided further, That the distribution of the funds as determined by the units of local government shall be approved by the Department of Energy: Provided further, That the funds for the State of Nevada shall be made available solely to the Nevada Division of Emergency Management by direct payment and units of local government by direct payment: Provided further, That within 90 days of the completion of each fiscal year, the Nevada Division of Emergency Management and the Governor of the State of Nevada and each local entity shall provide certification to the Department that all funds expended from such payments have been expended for activities authorized by Public Law 97–425 and this Act. Failure to provide such certification within such time period shall result in the Nevada Division of Emergency Management and the Governor of the State of Nevada and each local entity shall be prohibited from any further funding provided for similar activities: Provided further, That none of the funds herein appropriated may be: (1) used directly or indirectly to influence legislative action on any matter pending before Congress or a State legislature or for lobbying activity as provided in 18 U.S.C. 1912; (2) used for litigation expenses; or (3) used to support multi-State efforts or other coalition building activities.

For Department of Energy expenses for the purpose of acquiring, reconstructing, or expanding, and purchase of any real property or any facility or for plant or facility acquisition, construction, or expansion, or condemnation of any real property or any facility to carry out the purposes of Public Law 97–425, to conduct appropriate activities pursuant to the Act:

For necessary expenses to maintain, decontaminate, and otherwise remediate uranium processing facilities, $393,425,000, of which $272,641,000 shall be derived from the Uranium Enrichment Decontamination and Decommissioning Fund, all of which shall remain available until expended.

SCIENCE

For Department of Energy expenses including the purchase, construction and acquisition of plant and capital equipment, and other expenses necessary for multipurpose activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition of real property or facility construction or expansion, or condemnation of any real property or facility for or for plant or facility acquisition, construction, or expansion, and purchase of not to exceed 25 passenger motor vehicles for $2,500,000 to remain available until expended:

NUCLEAR WASTE DISPOSAL

For nuclear waste disposal activities to carry out the purposes of Public Law 97–425, as amended, including the acquisition of real property or facility construction or expansion, or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, or condemnation of any real property or any facility to carry out the purposes of Public Law 97–425, to conduct appropriate activities pursuant to the Act:

NON-DEFENSE ENVIRONMENTAL MANAGEMENT

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for non-defense environmental management activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition of real property or facility construction or expansion expenses; or (3) used to support multipurpose activities inconsistent with the restrictions provided in 18 U.S.C. 1913; (2) used for litigation expenses; or (3) used to support multi-State efforts or other coalition building activities.
of passenger motor vehicles and official re-
ception and representation expenses (not to
exceed $35,000), $209,611,000, to remain avail-
able until expended, plus such additional
amounts as necessary to cover increases in
the estimated amount of cost of work for oth-
ers notwithstanding the provisions of the
Anti-Deficiency Act (31 U.S.C. 1511 et seq.):
Provided, That such increases in cost of work
are offset by revenue increases of the same
or greater amount, to remain available until
expended: Provided further, That of the funds
provided to the Department of Energy under
title III, in the item relating to ''WEAP-
ons design and nuclear weapons effects.''

AMENDMENT NO. 2 OFFERED BY MR. KUCINICH

Mr. KUCINICH. Mr. Chairman, I offer an
amendment.

The CHAIRMAN. The Clerk will des-
ignate the amendment.

The text of the amendment is as fol-
lows:

Amendment No. 2 offered by Mr. KUCINICH:
In title III, in the item relating to ''WEAP-
ONS ACTIVITIES'', after the aggregate dollar
amount, insert the following: ''reduced by $122,900,000'':

In title III, in the item relating to ''De-
fense Non-Proliferation'', after the aggregate dollar amount, insert the fol-
lowing: ''reduced by $46,000,000'':

Mr. KUCINICH. Mr. Chairman, the
National Ignition Facility is a multi-
billion-dollar giant laser designed to
blast a radioactive fuel pellet in an at-
tempt to create a nuclear fusion explo-
sion. The Department of Energy con-
cludes that the National Ignition Facility
is important to its Stockpile Stewardship
program, but according to experts, the
project is overbudget, may not be tech-
nically feasible, and is not necessary to
maintain our nuclear arsenal.

According to Dr. Robert Cviak, a
physicist and former OMB Program Ex-
aminer for Department of Energy nu-
clear weapons programs, the NIF will
consume $5 billion to build, $4 billion
more than the Department of Energy's
original estimate. Including operating
costs, the NIF will consume more than
$32 billion, six times the Department of
Energy's original estimate.

Dr. Cviak also reports that the De-
partment of Energy has yet to solve
numerous technical problems that pre-
vent NIF from fully venting the
fusion explosion. Full operation of
NIF is already 6 years behind its origi-
nal schedule.

In fact, according to former Los Alamos
physicists Leo Mascheroni, the chance of
NIF reaching ignition is zero. Not 1 percent. Those who say 5
percent are just being...polite.

What is all that money being spent for?
Department of Energy says the NIF helps us maintain our nuclear
weapons, but experts disagree. When
asked about NIF's utility for weapons
maintenance, Edward Teller, father of
the hydrogen bomb and co-founder of
the Lawrence Livermore National Lab-
oratory, replied that it had "none whatsoever."

Sandia National Laboratory's former
vice president called NIF "worthless"
for maintaining nuclear weapons safety
and reliability.

Lawrence Livermore Laboratory
weapon designer Seymour Sack called
NIF "worse than worthless" for the
task.

Ray Kidder, another Livermore phys-
icist, has stated, "As far as main-
aining the stockpile is concerned, NIF is
not necessary."

In fact, NIF is an instrument for
developing new nuclear weapons. Depart-
ment of Energy itself touts NIF as
playing an essential role in under-
standing the physics of nuclear weap-
ons design and nuclear weapons effects.

This type of nuclear weapons design ac-

tivity violates the spirit of both the
Nuclear Non-Proliferation Treaty and the
Comprehensive Test Ban Treaty.

NOR is there a consensus with the De-
partment of Energy on NIF's impor-
tance. Officials at Sandia National Lab-
oratory, another DOE facility, have
challenged Department leaders on NIF,
calling for a scaled-down version in
order to make sure it works and that it
can be built affordably.

Now, at the same time that Congress
is covering the spiralling cost of NIF,
an instrument of proliferation, we have

cut funding for the DOE's nonprolifera-
tion activities. The bill we have before
us cuts nearly $27 million from the 2001
nonproliferation budget.

This cuts are commendable for con-
cern for all of us, because even funding at fiscal
year 2001 levels would not be enough to
address the problem. Currently, for in-
stance, there are enough quantities of
fissile material in Russia to make
more than 40,000 nuclear weapons, and
the resource-starved Russian Govern-
ment cannot secure all of this material
on its own.

The bipartisan Cutler-Baker panel
that recently studied these issues called the risk of theft of Russian nu-
clear materials the United States' most urgent unmet national security
threat. Their report urged sharp in-
creases in spending on nonprolifera-
tion, not cuts.

Our amendment attempts to address
these skewed priorities by taking
money being used for proliferation-
type activities and setting it aside for
national security programs that could be considered by this House
and approved by this House.

The amendment reduces NIF funding
by one-half. This still represents a $14.5
million increase in funding over the
last year.

At the same time that we slow down
the dubious National Ignition Facility,
we add $24 million to the Immobiliza-
tion Program, which disposes of sur-
plus plutonium; $19 million to the Ma-
terials Protection, Control and Ac-
counting Program, which seeks to se-
cure 603 metric tons of at-risk weap-
ons-scalable nuclear material in Russia;

$r23 to the Nuclear Cities Initia-
tive, which helps find employment for
nuclear scientists in Russia's 10 closed
civilian nuclear cities so that they are not

tempted to sell sensitive information to
groups developing weapons of mass
destruction.

I urge a yes vote on this amendment.
Let us demonstrate our Nation's com-
mitment to smart government and take
the leadership role in the fight to
prevent proliferation of nuclear weap-
ons.

Mr. WAMP. Mr. Chairman, I move to
strike the last word in opposition of
the amendment.

Mr. Chairman, again, I applaud the

tenure of the author of the amendment
to increase our accounts for renewable
cut the $24 million from the 2001

energy, but as the Republican cochair-
man with the gentleman from Colorado
(Mr. UDALL) of the House Renewable

electricity for a bipartisan way we have worked tirelessly with the
gentleman from Alabama (Chairman CALLAHAN)
and the gentleman from Indiana (Mr. VISCLOSKY), ranking member, to in-
crease these renewable accounts by

$100 million above the President's re-
quest.

This is even by those in the renew-
able energy field being applauded as a
great victory at this point in the pro-
cess. Now, if there are future victories
to be had for renewables, and I hope there are this year, they need to take place at the conference committee where we have an increase in the allocation on the Senate side, and I believe still room for debate on the final funding levels for these important renewable energy functions. I will be there at that conference advocating on behalf of further increases in these renewable accounts.

But here we go taking the money again out of an absolutely essential function of our Federal Government. Our nuclear weapons stockpile stewardship is critically important for the good of this country and, indeed, the entire free world. If we are going to be able to test these weapons without firing these weapons, then facilities like NIF must be supported.

Grated the management of the project itself has not been stellar, and it has had to be improved, but the fact is the imperative is there to finish the project, to continue to support our nuclear weapons stockpiling stewardship, and to be able to maintain these weapons and test these weapons without firing these weapons.

We increased at this subcommittee these nonproliferation accounts that the gentleman referred to by $71 million. Again, we have done a very good job at the subcommittee of balancing all of these needs because we agree with the gentleman on the points that he made. But we have already done that work. What the gentleman’s amendment actually does is takes it further and cuts into our national preparedness, something that we cannot afford to do.

There is no question that some people would come to the floor today and oppose this NIF. But, Mr. Chairman, our country wants us to maintain a safe and reliable nuclear stockpile.

Mr. Chairman, I rise in strong opposition of the Kucinich-Lee amendment. As the mother of a 10-year-old, I share my colleagues’ hope for a peaceful world free of nuclear weapons.

I believe the United States should reduce the number of nuclear weapons we maintain, and I introduced legislation today with the gentleman from North Carolina (Mr. SPRATT) calling on President Bush to do just that.

I agree that funding for nonproliferation programs is well short of what is needed, but I also believe that, as long as this country relies on nuclear weapons as a central part of our national security strategy, we have a commitment to maintain them in a safe and reliable condition.

Our best hope for maintaining the reliability of our nuclear weapons without testing is a robust Stockpile Stewardship program that includes the National Ignition Facility known as the NIF.

The NIF is an essential component of our Stockpile Stewardship program because it will allow us to create conditions similar to those that exist within a nuclear explosion without actually conducting live tests of nuclear weapons. Tremendous progress has been made in constructing this facility.

Since construction began, over $1 billion has been invested in the NIF, and more than 1,000 tons of equipment have been installed. The building housing the NIF is 98 percent complete, and 70 percent of the laser glass has been produced and meets specification.

Mr. Chairman, we can ill afford to abandon the NIF at this critical juncture in the Stockpile Stewardship program. We must give the Nation’s nuclear stewards the tools they need to maintain the safety, security and reliability of our Nation’s nuclear deterrent.

Finally, Mr. Chairman, I would like to submit for the RECORD a letter I received today from Ambassador Thomas Graham, who negotiated the nonproliferation treaty, expressing his support of the NIF.

I would also like to direct the RECORD on quotes attributed to Dr. Edward Teller. Dr. Teller’s quote is, “I was misquoted giving the appearance I did not support this NIF project. It is necessary that I correct this completely wrong impression.” I am for the NIF.

Mr. Chairman, I urge my colleagues to strongly vote down this amendment. It will jeopardize our ability to have a safe and reliable and certificable stockpile.

Mr. Chairman, I include the following documents for the RECORD as follows:

MRS. TAUSCHER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition of the Kucinich-Lee amendment. As the mother of a 10-year-old, I share my colleagues’ hope for a peaceful world free of nuclear weapons.

I believe the United States should reduce the number of nuclear weapons we maintain, and I introduced legislation today with the gentleman from North Carolina (Mr. SPRATT) calling on President Bush to do just that.

I agree that funding for nonproliferation programs is well short of what is needed, but I also believe that, as long as this country relies on nuclear weapons as a central part of our national security strategy, we have a commitment to maintain them in a safe and reliable condition.

Our best hope for maintaining the reliability of our nuclear weapons without testing is a robust Stockpile Stewardship program that includes the National Ignition Facility known as the NIF.

The NIF is an essential component of our Stockpile Stewardship program because it will allow us to create conditions similar to those that exist within a nuclear explosion without actually conducting live tests of nuclear weapons. Tremendous progress has been made in constructing this facility.

Since construction began, over $1 billion has been invested in the NIF, and more than 1,000 tons of equipment have been installed. The building housing the NIF is 98 percent complete, and 70 percent of the laser glass has been produced and meets specification.

Mr. Chairman, we can ill afford to abandon the NIF at this critical juncture in the Stockpile Stewardship program. We must give the Nation’s nuclear stewards the tools they need to maintain the safety, security and reliability of our Nation’s nuclear deterrent.

Finally, Mr. Chairman, I would like to submit for the RECORD a letter I received today from Ambassador Thomas Graham, who negotiated the nonproliferation treaty, expressing his support of the NIF.

I would also like to direct the RECORD on quotes attributed to Dr. Edward Teller. Dr. Teller’s quote is, “I was misquoted giving the appearance I did not support this NIF project. It is necessary that I correct this completely wrong impression.” I am for the NIF.

Mr. Chairman, I urge my colleagues to strongly vote down this amendment. It will jeopardize our ability to have a safe and reliable and certificable stockpile.

Mr. Chairman, I include the following documents for the RECORD as follows:
It is my opinion that the NIF will almost certainly be a nuclear fusion bomb for the hydrogen bomb. Such demonstration will be valuable in the Nation’s search for ways that future functioning of fusion bombs can be assured.

Mr. CALVERT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to this very irresponsible amendment. We often debate the proper roles and responsibilities of the Federal Government, but I thought we all agreed that Congress exists in large part to provide for our national security.

This amendment strikes at the heart of our country’s defense. If we pull support from the National Ignition Facility, we would cripple our nuclear weapons stockpile, the cornerstone of our national defense.

NIF is the only facility that can create the extreme temperature and pressure conditions that exist in exploding nuclear weapons. Without NIF, we would lose our ability to fully understand the operations of our arsenal.

NIF is also the only facility that can create fusion ignition—burn in the laboratory. Without NIF, we would not be able to access and certify the aging nuclear stockpile unless we renew underground testing.

Do not just take my word for it. The head of the National Nuclear Security Administration in DOE has said that, without NIF, we will need to begin underground tests once again.

We need to ensure that our weapons are safe and that they will work. NIF gives us this assurance. Stand up for the defense of our Nation. I urge my colleagues to vote against this ill-advised amendment.

Ms. LEE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I stand today in strong support of this amendment to cut funding from the National Ignition Facility and to transfer that money to crucial nonproliferation programs and to the national Treasury.

This project has already sucked up billions of taxpayer dollars while endangering our environment and sabotaging efforts to reduce nuclear nonproliferation. Instead of continuing to go down this path, let us stand up today for peace, for security, and fiscal common sense.

NIF has cost billions and will cost billions more and will not increase our national security. The National Ignition Facility is not some crucial component to our security system. It is an albatross, mired in cost overruns and dubious science.

When Edward Teller, the father of the hydrogen bomb, says that NIF has no utility whatsoever, we really should listen.

Now, at the same time, the Energy and Water Development Appropriations bill cuts funding for nonproliferation programs that represent an investment in peace, which is really an investment worth making. So this amendment restores badly needed dollars to programs that will make us truly safer.

This is not a trade-off in security. It is an enhancement of security. Now is not the time to cut support for efforts to curtail the spread of nuclear weapons. Reducing the number of nuclear weapons in the world and reducing the amount of nuclear material in the world enhances our security.

\[1645\]

So we must move forward toward a safer future, not backwards to a more dangerous past.

Finally, this amendment returns over $56 million to the national treasury. Fifty-six million dollars. That money can be used to house the homeless, to care for our seniors, or to feed the hungry. Without housing, without medical care, without food for all, how can we really be secure?

Once again I urge my colleagues’ support of this amendment.

Mr. RYAN of Wisconsin. Mr. Chairman, I move to strike the requisite number of words, and I rise in favor of the amendment.

Mr. Speaker, I am in support of this amendment from a good-government-taxpayer point of view. This program has failed audit after audit after audit. Just the most recent GAO audit has given it a failing grade. This program is 6 years over its original completion date, and it is almost $4 billion over budget.

For us, as the legislative branch of government, to properly conduct our proper oversight role over the executive branch, to see if their proper stewardship of our taxpayer dollars is making sense and is being implemented well, and for us to walk away from these kinds of abuses, is quite simply irresponsible.

I support the Kucinich amendment. I do not think it strikes a devastating blow to our nuclear stockpile program. In fact, I think this is a good thing, because it says that if an organization is going to take taxpayer dollars, they have to spend them wisely, have a good plan in place, and that we will not chase good money after bad. These audits need to be paused before we can reward this program with the funding they are asking for.

Mr. CALLAHAN. Mr. Chairman, I ask unanimous consent to limit debate on this particular amendment to 10 minutes, 5 minutes for a proponent and an opponent.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

Mr. VISCOSKY. Mr. Chairman, I object momentarily.

The CHAIRMAN. Objection is heard.

Mr. THORNBERRY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment. I support the nonproliferation efforts which can reduce the amount of nuclear material and nuclear expertise which is floating around the world and which some reports say is the greatest single threat to U.S. security, but I cannot support reductions in programs that keep our own nuclear stockpile safe, secure, and reliable.

I would say to the gentleman who just spoke in the well that this Congress is not walking away from the management difficulties that the NIF has had. As a matter of fact, in the Committee on Armed Services we have had a number of hearings over the past several years on the NIF and its management difficulties. As a matter of fact, I think one of the reasons we have a new entity within the Department of Energy to help with those problems in the past. And I can report that the new National Nuclear Security Administration and General Gordon, its head, has moved aggressively to solve the management problems that the NIF has had in the past.

As my colleague from California has said, we have sunk a tremendous amount of money into this project. To walk away now would be the height of folly. But I want to take just a second to put the NIF into its proper context, because I think many of my colleagues do not realize we continue to rely today on nuclear weapons as the central part of our security deterrent; yet those nuclear weapons are 18 years old, on average. They were designed to last 12 years, and so they are already well beyond their design life.

What many people do not realize also is that there is a lot we do not know about nuclear weapons and how they work. In spite of the fact that we have avoided many of the past number of years, going back to 1945, there is a lot about what happens with a nuclear explosion that we do not understand, and NIF and other programs like that are designed to help us understand what is going on so that as our weapons age we can continue to have confidence that they are safe, secure, and reliable. If we do not have NIF or other tools like NIF, then the uncertainties will grow, and they will grow to a point where the President and a Congress will have no choice but to resume nuclear testing, and that will have enormous consequences.

I would point out to my colleagues that this subcommittee has already cut the President’s request by $176 million. That gives me enormous concern. But to take more money out of the President’s request to increase the uncertainties and here to stop the funding for NIF, which is one of the essential tools to answer those questions as our stockpiles age, would be a serious, serious mistake.

Mr. Chairman, I think that what we have before us as an amendment will
CONGRESSIONAL RECORD—HOUSE

June 27, 2001

The CHAIRMAN. The gentleman from Ohio (Mr. KUCINICH) has 1½ minutes remaining, and the gentleman from Tennessee (Mr. WAMP) has 3½ minutes remaining.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume, and I would like to cite the latest GAO report about the NIF, which was issued on May 17th, and continues to recommend an independent scientific review of NIF. It says:

In our report, we recommended that the Secretary of energy arrange for an independent outside scientific and technical review of NIF's remaining technical challenges. NIF still lacks an independent external review process. Independent external reviews are valuable for measuring cost, schedule, and technical success in any large and ambitious science project. Yet, no such external independent reviews of NIF have been conducted or planned. The DOE's own orders state that external independent reviews are beneficial; however, DOE plans to continue its own internal review process, allowing Defense Programs officials to manage the project themselves.

It is very clear, Mr. Chairman, that accountability has been lacking. While we know about the lack of accountability at NIF, we also have an opportunity here to take a strong position with respect to nonproliferation and fund some of those programs that have been cut back.

Mr. WAMP. Mr. Chairman, I yield myself the balance of my time.

Whether coming at the amendment from a budget-cutting perspective or coming at it from an anti-nuclear or non-proliferation perspective, it does not serve our country well today to retreat from our national preparedness, including the ultimate deterrent of a safe and reliable nuclear weapons stockpile. We built it, we must maintain it for a purpose, and we must maintain it for a purpose. The entire free world is depending on us.

And, frankly, in closing, I want to say we now have better management for our weapons stockpile than we had 5 years ago. There is no question that NNSA was a good move. It was done by a bipartisan team led by the gentleman from Texas (Mr. THORNHILL) and the gentleman from California (Mrs. TAUSCHER), and I applaud their work. Because today, under General Gordon's leadership, the NNSA is responsibly re-forming our nuclear weapons programs so that we are prepared for the future.

For too long our weapons activities have been put on the back burner.

□ 1700

We have been funding through our national security programs weapons, and our personnel on active duty and our Guard and Reserve, but we cannot ignore our weapons activities to the back burner and expect to have an infrastructure that is capable of the next generation of nuclear weapons if we need them, or a workforce. We have a

hurt the security of the United States not only here but in the long term, and I hope will reject it.

Mr. CALLAHAN. Mr. Chairman, I ask unanimous consent that all debate on this amendment, and all amendments thereto, be limited to 10 minutes, the time to be equally divided between the proponent of the amendment and a Member opposed.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama to limit the debate to 10 minutes, 5 minutes divided equally on each side?

There was no objection.

The CHAIRMAN. The gentleman from Ohio (Mr. KUCINICH) will control the time in favor of the amendment, and a Member on the opposite side will control the time in opposition to the amendment.

Mr. KUCINICH. Mr. Chairman, I yield such time as he may consume to the gentleman from Massachusetts (Mr. OLIVER).

Mr. OLIVER. Mr. Chairman, I thank the gentleman for yielding me this time, and I am rising in support of the amendment that has been proposed by the gentleman from Ohio, in part, I think, to clear up some of the issues along the way.

The expenditure in nuclear programs is far beyond what we need to be expending in nuclear programs. That is as simple as one can say it. The increase in nuclear programs in this budget is by a very significant amount over the previous year when we have such great other needs. The amendment that the gentleman has proposed returns $56 million to the Treasury, which by the way is about similar to the amount that was involved in the amendment we had been offered by the gentleman from New York seeking only an additional $50 million for renewable energy research programs. It seems to me that that would be a far, far better way to use the $56 million that otherwise would be returned to the Treasury by the gentleman from Ohio and his amendment.

I just want to point out, in partial reply on exactly the same amendment earlier, the gentleman from Tennessee was speaking about what the committee had done, and I do commend the committee for returning, on renewable energy sources, $100 million, which had been cut from the budget for renewable energy sources by the President's request. In returning that amount of money, they now have in the bill $377 million for renewable energy research and development, which is exactly $1 million more than there was in the previous bill.

Now, I would just point out here that in the National Energy Policy Report that has come out, the policy report has at one point a statement that President George W. Bush understands the promise of renewable energy and strongly encourages alternative sources, such as wind, biomass, and solar energy. And in another place here the statement reads that "renewable and alternative fuels offer hope for America's energy future." I do not think it is appropriate to have only a $1 million increase in the accounts for renewable energy, commendable though it is, that the subcommittee has recommended $100 million more than the President had proposed, because he had cut so much out of what he is in other places here saying are such important pieces of work to be done.

It seems to me that we would be far wiser to use money that might be saved from the NIF and otherwise, by the amendment, would return to the treasure that would really significantly help in producing the kind of energy that we need for the future in renewable sources that does not produce global warming, CO₂, in most of its forms, and produces very little, except renewable sources, in biomass.

The CHAIRMAN. Does the gentleman from Tennessee (Mr. WAMP) seek to control the time in opposition to the amendment?

Mr. WAMP. I do, Mr. Chairman.

Mr. Chairman, I yield 3 minutes to the gentlewoman from California (Mrs. TAUSCHER).

Mrs. TAUSCHER. Mr. Chairman, I thank my colleague for yielding me this time. We can have our own opinion, but we cannot have our own separate set of facts; and the facts about the NIF are very clear. While there were significant production failures and management problems in the NIF in 1999, even into early 2000, that has been dramatically fixed by new management. And, frankly, we have not had any GAO reports saying anything other than that.

These investments are critical to our stockpile stewardship program. They are critical to having an ability to certify the sustainability and the safety of these weapons. The NIF is a project that was plagued with problems; but even today, in the Subcommittee on Military Procurement, General Gordon, the director of the National Nuclear Security Administration, testified that the NIF is now problem free. It is a program that is going forward, that we have significant investment in, and it is critical to our ability to have a stockpile stewardship program that enables us to certify weapons without testing.

So I think that while there are rumors out there that the NIF is still plagued with problems, I want to assure my colleagues that they need to vote down this amendment. I urge them to strongly oppose it. We need the NIF for stockpile stewardship, and we need it for nuclear security.

Mr. KUCINICH. Mr. Chairman, how much time remains?
graying workforce and aging infrastructure throughout the weapons complex.

I represent the Y–12 in Oak Ridge, Tennessee, where bricks fall off the walls and people have to report to work in hard hats because the infrastructure has eroded.

Mr. Chairman, we must reinvest in the modernization of these facilities. We have buildings that are 50 years old. We have not adequately funded those facilities. This strikes at NIF, but NIF is at next-generation of being able to test without activating these weapons and testing underground, maintaining the weapons stockpile reliability. We must do this and fight back this amendment.

Mr. Chairman, I urge a ‘no’ vote on this amendment.

Mr. WATERS. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. KUCINICH).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. KUCINICH. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 8 of rule XVIII, further proceedings on the amendment offered by the gentleman from Ohio (Mr. KUCINICH) will be postponed.

Mr. BARR of Georgia. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to enter into a colloquy with the distinguished gentleman from Alabama (Mr. CALAHAN), the chairman of the Subcommittee on Energy and Water Development.

Mr. Chairman, since being elected to the Congress, I have worked closely with the Army Corps of Engineers to ensure full pool lake levels at West Point Lake. On several occasions, the Army Corps has imprudently lowered the lake level, causing environmental degradation and severely affecting the use of the lake by the tens of thousands of citizens who rely on it for their water, energy, and recreation.

Over the last year, however, with the assistance of former Assistant Secretary of the Army for Civil Works, Joseph R. Capella, we were able to work on making sure that the Army Corps in managing West Point Lake, respected the benefit-cost priorities that were established by Congress when this project was authorized by title II, section 203 of the Flood Control Act of 1962, Public Law No. 87–874 (76 Stat. 203) of the Flood Control Act of 1962, Public Law No. 87–874 (76 Stat. 203 of the Flood Control Act of 1962, Public Law No. 87–874 (76 Stat. 203).

Secondly, I want to thank the gentleman from Michigan (Mr. BONIOR) for his sponsorship of this, as well as the gentlewoman from Ohio (Ms. KAPTUR).

Mr. Chairman, for those who have grown up along the shores of the Great Lakes, we know that the Great Lakes define the region by which we live. It is what we are about. It is what has made the Great Lakes the wealthiest area on the planet Earth because of this wonderful and abundant resource.

Mr. Chairman, we depend on our drinking water, our recreation, the engine of our economy on the water in the Great Lakes. Tourism is our second largest industry. We do about $10 billion a year in tourism. Families come to Michigan to fish, to use our beautiful beaches, to swim in our lakes and enjoy our sand dunes. They do not come to Michigan to look at oil wells or oil derricks. We are passionate about protecting the Great Lakes.

We cannot afford to put our greatest natural resource at risk. When I say that, 95 percent of all of the fresh water on planet Earth, comes out of the Great Lakes and its connecting waters; 20 percent, a fifth of the fresh water on planet Earth, comes out of the Great Lakes. We are amazed and appalled and alarmed that some in Michigan are proposing to drill for oil and gas beneath our Great Lakes. They seek to
add 30 new directional drills along our shores. They are moving at breakneck speed to get this done. Over their life-
time, these rigs that are drilled already in place have produced less than one-third of a day’s supply of natural gas and oil.

This process began with seven wells, up to 13, now back to seven as far back as 1979. There is virtually very little that has accured. I remind my colleagues that 1 quart of oil can contami-
nate up to 2 million gallons of drinking water. Just think of the damage that would do if we had directional slant dr-illing.

If we have a drill that hits a pressure pocket, it can spew gas and oil back out like a geyser, Mr. Chairman. There is also another problem that we have experienced in one of the drills in the area. I wish to warn Michigan. It is Great Lakes hydrogen sulfide. It is a poisonous gas. It is very similar to cyanide. It was released back in 1997 and 1998, sending 20 people in that region to the hospital.

Under the present movement to ac-
cess and explore gas and oil, our drink-
ing water could be contaminated. Oil could wash up to our shores; and if that happened, it could take as much as 500 years to completely flush out.

In conclusion, let me say, Mr. Chair-
man, oil and water do not mix. Let us put an end to this bad idea by passing this amendment sponsored by my colleague, the gentleman from Michigan (Mr. STUPAK), the gentlewoman from Ohio (Ms. KAPTUR), and put an end to this once and for all.

This amendment would prohibit the Army Corps from spending funds to issue any new permits for oil and gas drilling under the Great Lakes. We need to preserve this national beauty for future generations. Drilling in the Great Lakes is a formula for disaster. I urge my colleagues to support the amendment.

Mr. Chairman, I yield 4½ minutes to the gentleman from Michigan (Mr. STUPAK), my distinguished colleague and leader on this issue.

Mr. STUPAK. Mr. Chairman, I thank the gentlewoman for yielding me this time.

Mr. Chairman, this could be a great day for the Great Lakes and all of us who live along the Great Lakes shore. The Arctic Ocean is under the Great Lakes. Since the 106th Congress 4 years ago, I have sought to ban the practice of drilling for oil and gas in and under our Great Lakes. Early on I was a lone voice among public officials on this issue.

But I have been rewarded for my ef-
forts. Mr. Chairman, with strong support from both sides of the aisle, Demo-
crats and Republicans, and from Members inside and outside of the Great Lakes basin. This is a bipartisan effort that represents how this issue has found its time and place in the House of Rep- resentatives.

This is not a Florida situation. We have drilling in Michigan for oil and gas. But what our amendment says is to keep these rigs from drilling for oil and gas on our shoreline. We should not be drilling in the world’s greatest supply of fresh water. We should not have to be drilling on the shoreline of fresh water for 34 million people who live around the Great Lakes. Let us not jeopardize our Great Lakes. Let us not jeopardize their drinking water. Let us not drill for gas and oil under our Great Lakes.

This amendment is important be-
cause our State of Michigan is moving forward to open new areas for drilling along the shores of Lake Michigan, Lake Huron, Lake St. Clair, the con-
necting waterway between Lake Huron and Lake Erie.

Consider, Mr. Chairman, that 18 per-
cent of the world’s fresh water is found in the Great Lakes. Ninety-five percent of our Nation’s fresh water is found in the Great Lakes. It is the home and workplace of 34 million people. The procedure that Michigan plans to au-
thorize does not involve oil platforms located in the water of the Great Lakes themselves. Instead, the rigs would be located along the shore. Oil pockets under the lakes would be tapped by drilling at an angle from the shore rigs. This is a procedure known as direc-
tional drilling.

Michigan law already permits State officials to move forward to lease bottomlands of the Great Lakes for drilling, without a new vote of the Michigan State House or State Senate. Michigan can move forward to lease bottomlands without permission from any other Great Lakes State. But as people inside the circle of Michigan have learned what Michigan is doing, Mr. Chairman, they have raised their voice in opposition. The Governor of Ohio has said he would never consider such a procedure. The Wisconsin Sen-
ate has said no to directional drilling. Members of the Michigan legislature themselves are waking up to the dan-
gers that this practice presents to the Great Lakes. Although the Michigan Senate earlier this month voted to sup-
port new drilling, that language last night was eliminated from a House-Senate conference report and the lan-
guage allowing directional drilling has been eliminated in Michigan.

Here in Congress, a bipartisan group of Members from this body and the other body have brought forth bills to block any new drilling for oil and gas underneath the Great Lakes. But de-
spite all of these actions, the State of Michigan can still move forward by ad-
ministrative action and still plans to do so under the leadership of Governor Engler. Leasing of bottomlands of the Great Lakes for new oil and gas could take place within months under the current administration in Michigan.

Michigan State officials have argued that the procedure is safe. A set of rec-
ommendations made up by a panel, a set of recommendations directed by the Michigan Governor to study the safety of directional drilling, have not been implemented and will not be imple-
mented. They want to drill up in my district and they have never yet had a hearing in my district as required under the procedures as to whether or not you should drill in the Great Lakes.

Mr. Chairman, we may be able to imagine the hazards of drilling, but it is harder to see the benefits. What is the economic trade-off here that you could argue in favor of drilling under our Great Lakes? The answer, Mr. Chairman, is small and short-term gain for Michigan’s budget and profits for oil companies; but at large that faces the threat of drilling would see virtually no benefits. The proposed 30 or so new wells would yield only enough oil to meet the needs of Michi-
gan residents for 3 weeks and enough natural gas for 4 weeks.

Mr. Chairman, of all the places in the Nation where we might wish to sink oil wells, I believe we can argue that we would never choose the shoreline shared by the people of Chicago, Milwau-
kee, Detroit, Cleveland, Toronto, and Buffalo among others. Let us block this procedure.

I thank the U.S. Senators in the Michigan delegation and other Sen-
ators for their efforts. I would like to thank my colleagues, the gentleman from Michigan (Mr. BONIOR), the gen-
tlewoman from Ohio (Ms. KAPTUR), the gentleman from Michigan (Mr. CAMP), the gentlewoman from Florida (Mrs. THURMAN), the gentleman from Wisconsin (Mr. BARRETT), the gentleman from Ohio (Mr. LAFOURRETE), the gent-
lewoman from Ohio (Ms. KAPTUR), and others who stepped forward to cospon-
sor legislation to ban directional drilling each and every Congress that I have introduced it.

A vote for this amendment tells the American public that we understand that the Great Lakes, one of the Na-
tion’s, one of the world’s greatest re-
sources, should and will be protected. Vote “yes” on the Bonior amendment.

The CHAIRMAN. Does the gentleman from Alabama, seek the time in opposi-
tion to the amendment?

Mr. CALLAHAN. Yes, Mr. Chairman. The CHAIRMAN. The gentleman from Alabama is recognized for 30 min-
utes.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. CAMP).

Mr. CAMP. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise today in support of a new amendment offered by my col-
leagues from the Midwest, an amend-
ment which prohibits the Federal Gov-
ernment from facilitating drilling projects in the Great Lakes. This

□ 1715
amendment is a vote in support of the most precious fresh water resource we have.

It remains unclear whether or not the Federal Government or the Army Corps of Engineers has any authority in this area, but I believe it is important to make a statement on protecting the Great Lakes. For example, section 10 of the Rivers and Harbors Act cited in this amendment was passed in 1899 and only refers to blocking navigable waters.

Protection of the Great Lakes basin best remains with the eight Great Lakes Governors and two Canadian Premiers. Earlier this month, the governors and premiers came together and signed Annex 2001 which protects the Great Lakes from commercial withdrawals of water. So while not a perfect solution, I am voting for this amendment to be sure the word goes out that our Federal Government should not be participating in our Great Lakes and this amendment does that.

I applaud Members of both parties for working to protect our lakes. I urge my colleagues to vote in favor of protecting our greatest natural resource.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. HOEKSTRA).

Mr. HOEKSTRA. I thank the gentleman for yielding me this time.

Mr. Chairman, my district represents roughly 150 miles of Lake Michigan shoreline. On a day-to-day basis the quality of life and the very livelihood of many of my constituents are directly affected by Lake Michigan and the Great Lakes. The Great Lakes are one of this Nation’s most precious resources. This amendment is one way we can help protect and preserve the largest body of fresh water in the world.

I am and have always been in favor of States rights and there are some that will invoke that issue in regard to this amendment. Action by Congress is needed, however, because the Great Lakes States and provincial governments of Canada have a patchwork of regulations that do little to protect the Great Lakes from the dangers associated with oil and gas drilling. Canada allows vertical drilling to line the bottomlands of Lake Erie. While some States in the Great Lakes region allow drilling, others have banned this practice. Protection of this resource cannot vary from State to State or from one body of water to the next. Everything is interconnected in the Great Lakes region and the decisions that place Lake Erie at risk in turn place Lake Michigan at risk and vice versa. The only appropriate policy is to keep drills out of the Great Lakes.

I feel it is necessary today to vote in favor of this amendment to eliminate the risk as opposed to allowing this activity to take place. In addition to supporting this amendment today, I am also introducing legislation that will require further study of the environmental impact of any gas drilling in the Great Lakes. I will ask for a comprehensive assessment of the condition, safety, and the potential environmental effects of pipelines that run under the Great Lakes and through the States that surround those lakes. And I will ask for a comprehensive study to determine how much oil and gas might be gained by drilling in the Great Lakes region.

We should go further. We need a comprehensive plan to protect the Great Lakes. This is a good first step.

Mr. CALLAHAN. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. DELAY), the majority whip.

Mr. DELAY. Mr. Chairman, I cannot believe I am standing here like this. It is the height of irresponsibility. I think Members should oppose this amendment because it establishes a horribly irresponsible precedent for our energy security in this country. The Democrat leadership is constraining our economy within the same energy straitjacket that they applied under the Carter administration and that they are applying now in California that brings blackouts.

The working people of America are depending on us to open energy reserves to safe, environmentally responsible exploration. Without reliable energy, our economy will crumble. It will mean blackouts, layoffs, and plant closings.

This energy security obstructionism is one aspect of a broader effort to systematically choke off every promising source of domestic energy. It is hard to fathom how this campaign to block energy production gains its driving force. It is anything but a misguided motivation to weaken America and to leave us beholden to foreign sources of energy.

The Democratic leadership is at war with our ability to produce an adequate and dependable energy supply. They oppose safe oil exploration. They oppose expanded nuclear power. They oppose clean coal. They oppose ANWR. They oppose tapping the natural gas trapped beneath public lands. They oppose drilling in the Gulf of Mexico. And now they oppose slant drilling in Michigan.

Now, they are for closing plants. They are for closing refineries. They are against opening any new plants. They oppose everything that allows us to increase our supply. Their actual objective must be to eradicate America’s energy security. Why else would the Democrat leadership be recklessly pursuing a policy that is weakening the United States economy?

The question for Democrats to answer is this: Where will Americans go for the energy that they need to sustain their quality of life after you have completely strangled our ability to produce the energy that we need? What will Democrats tell the men and women who worked in gas lines? What explanation will they offer families suffering through frequent and recurring blackouts? What justification will they offer to workers when they open a pink slip after plants are forced out of business by spiraling energy costs?

And this environmental extremism, this radical environmentalism is entirely unwarranted. Today, slant drilling technology allows us to safely withdraw oil and gas beneath bodies of water from the shore. Environmentally safe. We do not have to trade environmental safety for energy security.

Members, please oppose these amendments that weaken America by enhancing the power that foreign suppliers of energy hold over our Nation. And more recently, an oil company sold 2 minutes to the distinguished gentleman from Wisconsin (Mr. BARRETT).

Mr. BARRETT of Wisconsin. Mr. Chairman, I applaud the gentleman from Michigan (Mr. BONIOR) for introducing this amendment along with the gentleman from Michigan (Mr. STUPAK) and others.

Mr. Chairman, I rise in strong support of this amendment. Unfortunately, some public officials in Michigan are using recent fuel price spikes to justify their desire to open up the Great Lakes to oil and gas drilling. Although drilling in the Great Lakes may bring a profit to the oil companies, it is not going to solve our national energy crisis or even temporarily drive down the cost of gas in the Midwest. In fact, it is estimated that new wells in the Great Lakes will only yield enough oil to meet one State’s needs for 3 weeks. The negligible benefits of expanded oil and gas drilling in the Great Lakes is hardly worth it considering the risks. The type of directional drilling industry proposes carries the risk of oil spills and toxic hydrogen sulfide releases, ruining the lakes’ pristine ecosystem and jeopardizing human health. Many of us recall the Exxon Valdez oil spill which dumped 11 million gallons of crude oil contaminating 300 miles of shoreline and causing billions of dollars in damage to one of our most pristine natural wildlife refuges in Alaska. And more recently, an oil company devastated the Galapagos Islands, ruining miles of shoreline and destroying the environment.

As the world’s biggest source of fresh water, the Great Lakes must be protected from such a tragedy. I think the 34 million people inhabiting the Great Lakes basin as well as Americans across the country would agree.

Unfortunately, State officials in Michigan are ignoring common sense and pushing forward in their efforts to reverse a moratorium on Great Lakes drilling. It is therefore incumbent upon Congress to protect the Great Lakes. Banning Federal funding through
amendment is a step in the right direction and would send a strong signal to those eager to exploit Great Lakes resources.

People in Wisconsin and other Great Lakes States are blessed to have the world’s most pristine lakes and fresh water resources in our backyard. We get our drinking water from them, our kids swim in them, and our tourism industry depends on them. Because the Great Lakes are such an important part of our daily lives, we are not willing to gamble with this precious resource for short-term gain.

I urge my colleagues’ support of this amendment. Please stand with us to protect the Great Lakes from environmental hazard and degradation.

Mr. CALLAHAN. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. KNOLLENBERG), a member of our subcommittee.

Mr. KNOLLENBERG. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in strong opposition to the amendment. The amendment is overly broad and would prohibit all agencies in the Energy and Water bill including the Corps of Engineers, the Department of Energy, and a portion of the Department of the Interior from expending funds for drilling in the Great Lakes. I have concerns that needed grants from these Federal agencies would be cut off as a result of this amendment. This is another attempt by the amendment’s author and others to shift decision-making authority over the Great Lakes to the Federal Government, just like the water management issue. They would rather have bureaucrats in Washington to manage our resources than those of us who actually live there. I do not think that is right.

The issue is under the jurisdiction of the State of Michigan and our State legislature and the governments of all the Great Lakes States. This is not just a Michigan issue. The Michigan State legislature has made a decision that this will be handled by State agencies, including the Michigan Department of Environmental Quality, Department of Natural Resources, and the State’s Natural Resources Commission.

□ 1730

They have made this decision on their own, free from Federal interference, which is as it should be. In fact, my home State of Michigan is not alone in this sentiment. It is shared by others. In a letter from the Interstate Oil and Gas Compact Commission, and I have a letter here, which has 30 of our Nation’s 50 States as members, this letter went to EPA administrator Christie Todd10

10 Christie Todd is a former EPA administrator.

Todaswes, “The majority States of the IOGCC regard drilling beneath the Great Lakes and protection of the environment in relation to that drilling to be matters that are within the exclusive jurisdiction of the States and not the United States EPA or other Federal agencies.

This amendment would be counter to the belief of the IOGCC and the majority of States in our Union. Remember again, there are 30 States involved here.

Mr. Chairman, directional drilling should not be confused with offshore drilling. Directional drilling sites are inland. In the State of Michigan, they are prohibited from being closer than 1,500 feet from the shoreline. Conversely, offshore drilling done from ships or rigs directly in the water is prohibited by State law in five of the eight Great Lakes States.

In 1997, the Michigan Environmental Science Board concluded directional drilling posed little or no risk to the contamination to the Great Lakes. Since 1979, there have been no accidents and no significant impact to the environment or public health. I think the evidence that directional drilling is safe and an effective procedure and does not warrant any kind of Federal encroachment. State geologists estimate the production of new oil and gas resources from the Great Lakes could provide, contrary to what one might have heard, as much as $100 million to the Michigan Natural Resources Trust Fund, the State’s sole source of funds for land acquisitions, recreational projects, and natural resource development.

The revenue produced by leasing of land for drilling is crucial; and without it, state-owned natural resources could be taken without compensation by private wells drilled along the State of Michigan shorelines and the other States as well; on private lands, I might add.

Furthermore, I believe directional drilling can be done in an environmentally safe manner, and it may be one solution to some of our energy woes.

This amendment is counterproductive because our Nation, particularly those in California, are currently experiencing an energy supply shortage and prohibiting directional drilling in the Great Lakes would cut off a critical supply source.

Mr. Chairman, this amendment is little more than an example of mission creep by which the Federal Government slowly, slowly gains more and more authority. This mission creep amendment should not pass this House. I urge Members to oppose this amendment.

The CHAIRMAN. The Committee will rise informally.

The SPEAKER pro tempore (Mr. SHIMKUS) assumed the Chair.

SUNDAY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Ms. Wanda Evans, one of his secretaries.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

The Committee resumed its sitting.

Mr. BONIOR. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Illinois (Mr. Kirk).

Mr. KIRK. Mr. Chairman, first I want to commend the gentleman from Alabama (Mr. CALLAHAN) for restoring funding for renewable energy in this bill.

With regard to contamination of Lake Michigan, we have had the Rock Goble, the Fish Hook Flat, alewife, nuclear waste and PCBs. Lake Michigan has had enough. We killed Lake Erie in the middle and northern Michigan. The Great Lakes are home to half of the world’s supply of fresh water. It is one of our Nation’s greatest environmental treasures. I strongly support the Bonior-LaTourette bipartisan amendment and am totally committed to Lake Michigan’s environment and urge Members to support this worthy goal.

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I might point out that the purpose of this debate, what the gentleman from Michigan (Mr. BONIOR) is attempting to do, is to restrict the Corps of Engineers from granting any further permits for this venture.

This is what the Corps of Engineers is all about. The Corps of Engineers is there to protect the environment, to make absolutely certain that everything with respect to any type of activity on the lake is in the best interest of the environment and of the American people and the area.

I would beg to differ that the permitting process on this is not taking place, because it is. They cannot do it without permits. If the gentleman’s amendment is adopted, the Corps would be prevented from issuing the permits, resulting in a halting of further exploration.

I might say that every day we hear in these 1-minutes the Members of the minority talking about the energy crisis, and this is an opportunity to do something about the energy crisis while not doing anything to harm the environment. So I would urge the Members to pay close attention to what this debate is all about.

Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. UPTON).

Mr. UPTON. Mr. Chairman, I would join my Michigan Republican colleagues who have spoken in support of this amendment, the gentleman from Michigan (Mr. CAMP) and the gentleman from Michigan (Mr. HOEKSTRA), also in support of the amendment.
Some say that this is a safe process, slant drilling. Well, I have to say, I am not convinced that the science, in fact, is correct. No one has ever suggested that the oil perhaps underneath the Great Lakes is an Arab oil field. It will not provide a lot of oil under anyone’s estimation. So why should we take the risk?

I grew up on the shores of Lake Michigan, and I can remember as a young boy in the 1960s and even into the 1970s there in fact had been an oil spill on the southern shore of Lake Michigan, and I will say virtually every day, every day in St. Joe, Benton Harbor, my hometown and along the southern shore of Lake Michigan, anyone that went to the beach got oil from the sand on themselves. I do not think there was a house along the street that did not have a little bottle of Mr. Clean on the kitchen step, which was the only stuff that would take that oil off our clothes, off our shoes, name it.

That smell of Mr. Clean stays with me from this day, from those summer days of always getting oil on our feet, our clothes, off our shoes, name it.

One of the first pieces of legislation I passed as a young Member of this House was oil-spill legislation. I remember almost a cataclysmic event in Bay City, Michigan, that would have destroyed, I think, the ecosystem of the Great Lakes, for decades, if not more than 100 years.

This is a Great Lakes watershed area that is not like someplace else. When the oil is there, it stays there and it stays there for a long time.

I support this amendment. It is bipartisan. For those of us that have districts along the Great Lakes, I think that all of us, I would hope, would support it. After all, we know our Great Lakes area better than just about anybody else.

This is a wise amendment. I support the amendment. I would hope that my colleagues would also vote for this when we take it up tomorrow. I appreciate the bipartisanship that it certainly has, and I would just compliment my colleagues in support of this amendment to make sure that, in fact, we do not have oil spills throughout the Great Lakes.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. SHIMKUS).

Mr. SHIMKUS. Mr. Chairman, I have a lot of good friends on both sides of the aisle that are addressing this issue, and I really get concerned and I struggle with this.

Southern Illinois used to have one of the largest oil fields in the country 50 years ago, decades ago. Guess what? It was all pumped out. To benefit the United States of America, we drilled in southern Illinois. We still have some marginal wells there. They pump about two barrels a day. They are the little seesaw horses that one sees when they drive down the road.

My cornfields and soybean fields are just as important as any lakefront beach property. Sometimes I think we put our eggs in the wrong basket. We are in an energy crisis. Fuel is at an all-time high. We do not want to drill off the Great Lakes. We had a vote yesterday, where we do not want to drill off of Florida. Heaven no, we do not want to go into ANWR. So my basic question is: Where do we go?

I will say where we go. We are going to the Saudi Arabia sheiks. We are going to pony up our dollars. We are going to be held hostage by Saudi Arabia for our oil.

I just do not understand. We can send people to the Moon. We can send people to Mars. We can go all over this world, and we cannot drill safely?

So I ask you to bring a little common sense to the table. Do the environmentalists have some natural resources. We have places that expended our natural resources for the benefit of our country. Now it is time to make sure that we are energy self-sufficient, not reliant on foreign oil. If we rely on foreign gasoline online, we have to do a couple of things. We have to drill. We have to transport and we have to refine and, of course, we have to add ethanol.

Mr. BONIOR. Mr. Chairman, I yield 2 minutes to the distinguished gentlewoman from Ohio (Ms. KAPTUR), the cosponsor of the amendment.

Ms. KAPTUR. Mr. Chairman, I thank the gentleman from Michigan (Mr. BONIOR) for yielding me this time.

Mr. Chairman, last week the Members of our body voted to send a message to the Bush administration that oil and water do not mix. The House voted overwhelmingly to stop offshore drilling off the coast of Florida by a vote of 247 to 164. Seventy Republicans voted overwhelmingly to stop offshore drilling in the Great Lakes. As environmentalists protested outside Lake Pointe Manor banquet hall where he was speaking, Cheney said he supports searching for new sources of fuel. Possibly, he said, that could include the controversial plan to slant drill under the lakes.

"The technology in my judgment is extraordinarily good," Cheney said.

"I'd also like to remind everybody that we have a serious problem in our dependence on foreign oil sources."

He added that to meet the country's electricity needs, between 1,300 and 1,900 new generators would have to be built for coal, gas and nuclear energy.

"Those are the three options for the foreseeable future," he said. "The attractive features of coal are that we've got a lot of it ... and it's cheap."

Cheney was at the banquet hall south of Howell attending a $1,000-a-plate fund-raiser for Michigan Republic:7's campaign for President. Republicans joined 177 Democrats in a rebuke to the White House drilling policy. Nonetheless, Vice President Cheney claims that drilling can be conducted without environmental damage. Where does the administration stop in its single-minded desire to appease the oil and gas special interests? How many times do we have to send this message before the administration gets it?

"I'd also like to remind everybody that we have a serious problem in our dependence on foreign oil sources."

Cheney also spoke to about 500 people who paid $25 each to attend a rally at the banquet hall, where he touted the passage of the "socially responsible" tax cut in a speech to the American Bankers Association. Cheney's tour began in Florida, where he made a quick stop in Warren and then attending a $1,000-a-plate fund-raiser in St. Joseph. Cheney was speaking in Warren to about 500 people who paid $25 each to attend a rally at the banquet hall, where he touted the passage of the “socially responsible” tax cut in a speech to the American Bankers Association. Cheney’s tour began in Florida, where he made a quick stop in Warren and then attending a $1,000-a-plate fund-raiser in St. Joseph.

"Michigan's lakes already are under an adversay for mercury. Where does he think the mercury comes from? It comes from the emissions of those dirty coal-fire plants," Farough said. "He is pushing drilling in Alaska and in the Great Lakes but even if we kept all of what we could get, it would only lower our imports by 2 percent."

"He is pushing drilling in Alaska and in the Great Lakes. He is pushing off the ANWR. So my basic question is: Where do we go?

"I will say where we go. We are going to the Saudi Arabia sheiks. We are going to pony up our dollars. We are going to be held hostage by Saudi Arabia for our oil.

"I just do not understand. We can send people to the Moon. We can send people to Mars. We can go all over this world, and we cannot drill safely?"
In Warren, Cheney climbed into a fuel-cell vehicle and munched on popcorn provided by the escape room run hybrid truck. He said he was impressed by what he saw at the GM facility.

"I am . . . optimistic. With American technology and ingenuity there's no question we can solve any problems down the road," Cheney said.

The tour came a week after GM announced a 25-year collaboration with General Hydrogen Corp., a pioneer in fuel-cell technology. GM hopes the partnership will accelerate the development of fuel-cell vehicles, which create electricity directly from a reaction between hydrogen and oxygen. The vehicles emit only water vapor from their tailpipes.

Rick Wagoner, GM's president and CEO, applauded the Bush administration's energy plan.

"We believe the plan makes sense and believe the auto industry can help implement it," Wagoner said.

Rogers, who defeated state Sen. Dianna Byrne in the race to succeed James A. "Doc" Sundaga, by 110 votes in November, garnered more than $350,000 for his campaign through the Cheney visit. He faces his first re-election bid in 2002.

The Associated Press contributed to this report.

Mr. BONIOR. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Ohio (Mr. KUCINICH).

Mr. KUCINICH. Mr. Chairman, I thank the gentleman from Michigan (Mr. BONIOR) for yielding me this time.

Mr. Chairman, in the 20th century the greatest resource issue was oil, but in the 21st century the greatest resource issue in the world will be water.

The freshwater resources of the Great Lakes are as precious to the U.S. as oil is to the Middle East. It is our health. It is our wealth. It is our economic future. It is our environmental future.

Clean water is a basic right in a democratic society. The oil companies should not be permitted to privatize the Great Lakes.

The Bible tells a story of Esau, who sold his birthright for a mess of potage. Let us not sell America's birthright for any kind of the Great Lakes.

I am from Minnesota, a State with a special respect for the Great Lakes. Yet, today, discussion persists about drilling in this pristine area, particularly directional or slant drilling, is what is being discussed.

Since 1979, the seven existing directionally drilled wells have produced enough energy to cover less than a half day of consumption. Think about this: risking the Nation's largest supply of fresh water for a few hours of consumption.

As a Nation, we must not fall back into the old way of doing things in this country. We will never get balance in our energy policies if we continue to debate drilling in our Nation's most pristine areas.

I urge this Congress to have the vision to develop new approaches to energy policy in this country. I urge Members to consider the ramifications, before risking this resource for a few hours of energy consumption. Let us give our children and their children the splendor of the Great Lakes coastline. Let us keep the shores of the Great Lakes pristine.

Mr. BONIOR. Mr. Chairman, I yield 2 minutes to the distinguished gentlewoman from the State of Minnesota (Ms. MCCOLLUM).

Ms. MCCOLLUM. Mr. Chairman, I rise today to strongly oppose drilling in this most precious resource. I visited Minnesota's North Shore and you will immediately know why.

Lake Superior is a constant source of wonder for many of us in this country. It helped to shape our landscape, our climate, it supports our economy, and it enhances our quality of life.

I oppose drilling not because we do not need to find additional energy resources. We do. But these lakes are just too valuable and too many families' lives would literally be at risk without fresh drinking water. It is simply not worth the risk.

We are making progress in using energy more efficiently, reducing our reliance on coal and natural gas through energy efficiency and technology; but we must work hard to make bigger investments in current programs to do more.

Investments do not always have to cost money either. We can and we must reduce our consumption by supporting wind, solar power and renewable fuels, like ethanol, which we produce in Minnesota.

Future generations depend on us not to jeopardize today's greatest natural resources. An oil spill or any related disaster on the shores of the Great Lakes would impact fresh drinking water for 35 million people, and for what? For less than 1 day's worth of oil and natural gas.

The Great Lakes are important to this Nation. They are important to my State. They are important to the families in this country. They have been crucial in our historical and economic development. Our communities continue to play a critical role in Minnesota, and water is a part of that.

I urge my colleagues to support today's drinking water for future generations. I urge my colleagues to support this amendment.

Mr. BONIOR. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Ohio (Mr. STUPAK), the gentleman from Minnesota (Mr. LUTHER), and the gentlewoman from Ohio (Ms. KAPTUR), and other colleagues from the Great Lakes region for consistently championing the preservation and protection of these precious lakes.

I live on Lake Erie and appreciate the lake for its natural beauty. But Lake Erie is far more than a pretty backdrop. Ohioans rely on the lake for our region's economic well-being. We rely on Lake Erie to ship goods, to provide us with drinking water, to play host for recreational activities, and to attract tourists from all over the world.

The Great Lakes contain 20 percent of all the fresh water in the world; and yet attempts are now being made to expand so-called directional drilling under the beds of the Great Lakes, jeopardizing the water, the shorelines, and the surrounding wetlands. These attempts are being made even though the existing oil and gas wells in operation under the Great Lakes have not produced enough oil and gas to fuel our domestic needs for even a single day.

President Bush's solution for the country has been to drill early and drill often. Drill in the Arctic National Wildlife Preserve, drill in the Gulf of Mexico, drill in the five Great Lakes. Instead of pursuing fossil fuels to the end of the Earth, Congress should author an energy policy that addresses both the immediate and long-term energy needs of our people.

We should explore for additional sources of oil and gas. We cannot drill our way out of dependence on foreign oil. Any strategy that calls for drilling in the Great Lakes, where there is more drinking water than any other place on Earth, fails even the most basic risk-reward analysis.

Fossil fuels are a finite resource. Instead of risking despoiling of every piece of ground or water under which fossil fuels may reside, we must focus instead on using energy resources more efficiently, increasing our use of renewable fuels and encouraging conservation.

Last week, this body supported an amendment that afforded protection to the coast of Florida from the potential ravages of oil exploration. Today I ask my colleagues to afford the Great Lakes the same protection.

Mr. BONIOR. Mr. Chairman, I yield 1½ minutes to the distinguished gentleman from Maryland (Mr. HOYER).

Mr. HOYER. Mr. Chairman, I thank the gentleman for yielding me time, and I congratulate him and the gentleman from Michigan (Mr. STUPAK)
and others on both sides of the aisle for sponsoring this amendment.

Mr. Chairman, I rise today in strong support of the amendment to prohibit the Army Corps from issuing any permits to provide for directional drilling for either natural gas or oil on the Great Lakes.

Mr. Chairman, I live on a great lake, Lake Michigan. My district borders the lake. I want to point out to the Members, especially those opposed that Lake Michigan alone provides fresh clear drinking water to about 10 million residents of not only Wisconsin, but also Michigan and Illinois.

I hear from the opponents saying we need more drilling and we need more drilling, but I have yet to hear the word “conservation.”

I would like to point out to the Members that in the 22 years that drilling has occurred on the Great Lakes, a grand total of 439,000 barrels of crude oil has been extracted. Well, if you would support us and increase the fuel efficiency for automobiles, light trucks, and SUVs by only a small amount, we could save 1 million barrels of crude per day in this country, obviating the need to go into fresh water areas like the Great Lakes, which, as has been said many times, has 20 percent of the world’s fresh water, and provide for drilling and looking for crude on that great body of water.

Mr. BONIOR. Mr. Chairman, I yield 30 seconds to the distinguished gentleman from Wisconsin (Mr. OBEY), the ranking member of the Committee on Appropriations.

Mr. OBEY. Mr. Chairman, I simply want to take the time to thank the two gentlemen for offering this amendment. The greatest body of fresh water in the world is Lake Superior. Lake Michigan is certainly not far between. The only proper level of risk such a pristine resource is zero risk. I congratulate the gentlemen for offering the amendments.

Mr. BONIOR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank my colleague for his comments and support on this. Mr. Chairman, again I want to thank my friend, the gentleman from Michigan (Mr. STUPAK), for his leadership on this and all the colleagues who have spoken on this amendment.

The State of Michigan is a very gorgeous State. We are talking about more than just Michigan here, we are talking about all the Great Lakes States and the connecting waterways that touch them.

But I would like to focus on in my State for a second, if I could, because we have had a history, Mr. Chairman, of being ravaged. If you go back 300 years ago, John Jacob Astor and his ilk came into our State and they took the fur and the animals out of our Great Northwest. It took them about 5 years before they depleted some of the most precious resources we had, leaving extinct many of the most important mammals in our Northwest region.

Then, of course, in the next century, after the pine had been exhausted in Maine, the lumbermen came into the State of Michigan, and built the country. At one point, the State of Michigan was 17,187 trees. We had pine, spruce, fir, as tall as great redwoods out West today, reaching 200 feet in the air; and they were leveled. Thanks to Franklin Roosevelt and the CCC and the second growth policy of replanting during those 9 years during the Great Depression, the CCC and the 90,000 workers planted, Mr. Chairman, 465 million trees in our State.

Then the Boston mineral magnates came in, and they took the iron and the copper that Houghton, Burke, and all the others discovered in our great State.

I give you this history, because now the attack is on our water resources. And if you do not believe my word today, all you need do is open the record in our State. We have 11,000 inland lakes. Every one of them is filled with mercury.

I went and got my fishing license the other day. They gave me a little booklet that said if you are a pregnant woman or 15 years of age or under, you cannot eat a good amount of the fish in the inland lakes. The Governor of our State has issued permits to dump raw and untreated sewage in our rivers and streams, to the point now where many of our beaches are closed in our State because of E. coli bacteria.

I give you this history, because now the attack is on our water resources. And if you do not believe my word today, all you need do is open the record in our State. We have 11,000 inland lakes. Every one of them is filled with mercury.

And now he is pursuing a policy of drilling in the Great Lakes, extending 30 more wells. We do not need that. Oil and water do not mix.

I think it has been made very clear today that this is our most precious resource. A fifth of the fresh water on the planet is in our region, and we need to protect it. We need to protect it from diversion, we need to protect it from drilling, we need to protect it from being polluted with E. coli bacteria in our rivers and streams and closing our beaches; we need, as my colleague from Michigan (Mr. STUPAK) has said on numerous occasions, a water policy for our State. We do not have it. Until we do, we need to do all we can to protect this most valuable resource.

So I ask my colleagues, please, do not create this picture. For all of my colleagues who come up into our beautiful State, who travel up into Michigan, from the South, from the east coast, from the other parts of the Midwest who come to vacation, they do not come to see this, they come to swim in our lakes, they come to use our beautiful sand dunes, they come to fish in our waters, they come to rest on our beaches, and they come to drink our wonderful water.

So, Mr. Chairman, I would say to my colleagues, thank you for your support
June 27, 2001

CONGRESSIONAL RECORD—HOUSE 12149

on this amendment. Vote for the amendment that has been offered, and make sure that we can save one of the most precious resources that God has given our planet.

Mr. Chairman, I yield back the balance of my time.

Mr. CALLAHAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Michigan (Mr. ROGERS).

Mr. ROGERS of Michigan. Mr. Chairman, I want to commend my colleague from Michigan.

This is a solution, though, that is looking for a problem. There is not one State in the Great Lake States that allows offshore drilling, not one. There is a moratorium on new angle drilling wells in Michigan. What are we doing? This is not about protecting the Great Lakes. This is not about talking about protecting the diversion of our water; not at all. What we have here is a direction that many in this Chamber I hope would disagree, including those who may have ambitions to hold office of Governor. I trust my Governor. I trust the Governors of the Great Lake States to be in charge of the water of the Great Lake States.

As a matter of fact, underneath the Great Lakes today, there is about 22,000 barrels of crude oil an hour flowing under the Great Lakes. There are 550 offshore wells in Canada. This bill addresses none of that. There are 5 million tons of oil bobbing around on the Great Lakes every year, 20 spills a year in our Great Lakes. This amendment does nothing to address any of those issues.

This is not about protecting the Great Lakes; this is about the Federal Government going into the State of Michigan and telling the legislators, there you do not know what you are doing. Do we want to talk about our Great Lakes? You ought to live there in February. You ought to have to put up with the cold weather in the winters and the high degree of snow. Let us not get confused about what we are doing here.

There are some great protections of our Great Lakes, and I trust those Governors, and I trust those legislators to do the right thing.

I want to say again, because this is very important, I heard it 10 times tonight if I heard it once, that somebody is out there trying to build an oil rig in the Great Lakes, and they are going to do it now, and President Bush is leading the charge. There is not one State in the Great Lakes that allows offshore drilling, not one. There is a moratorium on directional drilling in the State of Michigan today. So what are we doing?

Mr. Chairman, I do not believe that a bureaucrat in Washington whose only experience with the UP is a picture in the National Geographic is going to do anything for the protection of our shoreline, our Great Lakes. I want people who live there. The gentlewoman from Ohio to talk about home, and that is how we learn the needs of those Great Lakes. Why? Because we live there. We see the water, we see the pollution, we fought back and took back Lake Erie, and now we can eat the fish. We could not about 10 or 15 years ago.

Why? Because the people of the Great Lake States stood up. It is nothing that Congress did. It is not us arguing this issue, it is the people around the Great Lakes. Why? Because those in California are taking care of California needs in their districts, and those legislators who are State-elected and Governors who are elected by all of the people of the Great Lake States are protecting our Great Lakes.

Mr. Chairman, I have a passion for this stuff as well. We have a real difference of opinion on what we are doing here. Diversion of water. There is a bill in this House to empower Congress to decide what happens on diversion issues in the States. Truth, last I checked, Kansas and Arizona and New Mexico and California could use a bit extra water, and last I checked, there are more of them than there are of us. It has no business in this Chamber. It has all the business in the chambers in our State legislatures back home.

This is a solution that is looking for a problem.

There is this package of bills in, and I have done many of them, one to encourage the States to protect the diversion of that water, the States to do it. I have a bill in that continues the ban on offshore drilling in our Great Lakes and goes after the 550 wells currently in operation in Canada that are out in the water. Even the industry tells us they do not want to put a pipe in that fresh water. They do not want to do it. Anything that touches the water they do not want to be a part of. We ought to be proud of it, and we ought to stand up with them today.

But what the Federal Government can give us, they can take away. Pretty soon, maybe the faces of this Chamber will change, and maybe pretty soon the folks in this Chamber will decide that we want oil in the Great Lakes, and since many of us do not live there, and the bureaucracies of Washington, D.C., that do not get to visit there much are going to decide, maybe it is worth it.

The thing that will protect us then, my good esteemed colleagues, is our State legislators and our Governors of those Great States.

Mr. Chairman, I want to urge this body to reject this amendment, to throw away all the rhetoric about how this is going to pollute the water and people are rushing to put platform drilling in the Great Lakes, and they cannot wait for that oil to gush through Lake Superior and Lake Michigan. That is just absolutely not true.

What I would encourage the gentleman from Michigan to do is to work with us, and let us try to work with them; it is not a solution, it is a moratorium on offshore drilling. I want those people to be able to play in the water and not have 20 spills on average a year.

Does the gentleman want to do something for the Great Lakes? Let us be a partner with them and help them solve those problems. Let us not flex our muscles as the Federal Government and come in and tell those legislators, you really do not know what you are doing out here. We are here to help you.

I used to be an FBI agent, and when I would walk into a local police station and tell them that there was a warm welcome then, and I can tell you, Congress is not going to get a warm welcome in the State halls in Lansing.

Mr. Chairman, this is an important issue. It is an extremely important issue. I grew up on a lake. I want that lake safe for my kids. I want them to go to Lake Michigan and be able to play in the water and not have to worry about turning green when they come home. I want them to be able to eat the fish in Lake Erie. Meaning no disrespect to this Chamber, I just came from the State legislature, and I have seen the good things that Congress can do, and I have seen the bad things that Congress can do, and I served with some very bright people in the State legislature. I served with a great Governor who understood that we had to protect our Great Lakes while we have a moratorium on drilling. I want those people empowered to make a difference for the Great Lakes.

I would urge this body’s strong rejection of the Federal Government encroaching into the business of Great Lake States.

I applaud all of the Members for getting up here and talking about their passion for protecting our greatest natural resource there. Well, let us do it. Let us be a partner with the States. Talk to our State legislators, talk to our Governors. They will be with us. Talk to the people and ask them, who do they want to protect their Great Lakes? Is it the people that get up every morning and eat breakfast there and go off to work and send their kids off to school every day, 7 days a week; or is it a bureaucrat that they have never met in the halls of some bureaucracy over here who is going to make an arbitrary decision on how it ought to look; or is it a Member from California who stands up and passionately argues, maybe 40 or 50 years from now, that it is worth the risk to stick a pipe in fresh water?
Stand up for our Great Lakes today. Stand up for the environment of Michigan, Ohio, Pennsylvania, Indiana, Minnesota, Wisconsin, Illinois, New York, and for the people of our home States. Stand up for it by rejecting the Federal Government’s role of encroaching on our ability back home to protect our greatest national resource. I would urge this body’s rejection of the Bonior amendment.

Mr. LEVIN. Mr. Chairman, I rise in strong support of the amendment offered by my colleague Representative BONIOR. I urge its passage by the House.

There should not be any controversy over this issue. The Great Lakes should not be put at risk just so energy companies can extract a few weeks’ supply of oil. It was with a certain amount of disbelief that I learned that Governor Engler and the Michigan Department of Natural Resources had proposed to lift a 1997 moratorium restricting new development of oil and gas drilling under the Great Lakes. I believe this proposal is short-sighted.

The Great Lakes are a vital natural resource to Michigan. The Lakes are our State’s crown jewels, and the heart of Michigan’s multi-billion-dollar tourist industry. In addition, the Great Lakes contain 20 percent of the world’s fresh water. Why would we ever choose to place all this at risk? The environmental damage from an oil spill would be catastrophic.

The amendment before the House today is only common sense. It would bar any funds in this bill from being used to expand oil and gas drilling beneath the Great Lakes.

Mr. Chairman, the Great Lakes are an invaluable resource to the people of Michigan and, indeed, the entire country. The Great Lakes are also part of the environmental legacy we will leave to our children and grandchildren. I urge all my colleagues to join me in voting for the Bonior amendment.

Mr. CALLAHAN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BONIOR).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. BONIOR. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Michigan (Mr. BONIOR) will be postponed.

Mr. CALLAHAN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. SMITH) announced the time. Mr. SMITH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2001, and for other purposes, had come to no resolution thereon.

PROVIDING FOR CONDITIONAL ADJOURNMENT OF THE HOUSE AND RECESS OR ADJOURNMENT OF THE SENATE

Mr. YOUNG of Florida. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 176) and ask unanimous consent for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 176

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on the legislative day of Thursday, June 28, 2001, or Friday, June 29, 2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned until 2 p.m. on Tuesday, July 10, 2001, or until noon on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate recesses or adjourns at the close of business on Thursday, June 28, 2001, Friday, June 29, 2001, Saturday, June 30, 2001, Monday, July 2, 2001, Tuesday, July 3, 2001, Thursday, July 5, 2001, Friday, July 6, 2001, or Saturday, July 7, 2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand recessed or adjourned until noon on Monday, July 9, 2001, or until such time on that day as may be specified by its Majority Leader or his designee in the motion to recess or adjourn, or until noon on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first.

Sec. 2. The Speaker of the House and the Majority Leader of the Senate, acting jointly after consultation with the Minority Leader of the House and the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

The SPEAKER pro tempore (Mr. SHIMKUS). Is there objection to the request of the gentleman from Florida?

Mr. OBEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. SHIMKUS). The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF A CONCURRENT RESOLUTION FOR THE ADJOURNMENT OF THE HOUSE AND SENATE FOR THE INDEPENDENCE DAY DISTRICT WORK PERIOD

Mr. HASTINGS of Washington, from the Committee on Rules, submitted a privileged report (Rept. No. 107–117) on Friday and no votes. Is that a correct understanding?

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Speaker, the gentleman is correct. Let me state just briefly that the plan will be to convene the house at 9 o’clock in the morning. We will conclude the consideration of the appropriations bill for energy and water. At the conclusion of that bill, we will then begin the rule and the bill for the agriculture appropriations. We will proceed into the evening on the agriculture appropriations bill on tomorrow, Thursday, and at a reasonable time we will make a determination as to how late we will go tomorrow night.

The gentleman is correct that, as I announced with the approval of the leadership yesterday, Members can expect that there will be no votes on Friday.

Mr. OBEY. Mr. Speaker, further reserving the right to object, I think Members need to know what the reality is in terms of their catching planes. They were told the day before yesterday that we would not be into a long march into the night on Thursday. Could the gentleman give us some idea of how long the majority is intending to proceed so that Members on both sides have some idea of what to do with their plane reservations?

Mr. YOUNG of Florida. If the gentleman would yield further. As we discussed yesterday on this subject, we will very likely plan to go late tomorrow night, but also as we discussed, we would not go beyond midnight, or a reasonable time in the evening, if it appears that we have no opportunity to conclude the bill.

Mr. Speaker, I doubt that we will be able to conclude the bill on tomorrow. I would suspect the House could work its will for an earlier departure.

Mr. OBEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. SHIMKUS). Is there objection to the request of the gentleman from Florida?

There was no objection.

The concurrent resolution was agreed to.
Mr. Davis of Florida, regarding agency, which shall be debatable for 60 hours: Mr. Traficant of Ohio, regarding Buy Authorizing appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2002.

Mr. Hastings of Washington, from the Committee on Rules, submitted a privileged report (Rept. No. 107-118) on the resolution (H. Res. 183) providing for consideration of the bill (H. R. 2330) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes, which was referred to the House Calendar and ordered to be printed.

Mr. Callahan. Mr. Speaker, I ask unanimous consent that, during further consideration of H.R. 2311 in the Committee of the Whole pursuant to unanimous consent that, when the House adjourns today, it adjourn to meet at 9 a.m. tomorrow.

The Speaker pro tempore. Is there objection to the request of the gentleman from Alabama?

Mr. Visclosky. I yield to the gentleman from Indiana.

Mr. Visclosky. Mr. Speaker, I withdraw my reservation of objection. The Speaker pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Hour of Meeting on Thursday, June 28, 2001

Mr. Callahan. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 9 a.m. tomorrow.

The Speaker pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

22nd Annual Report of the Federal Labor Relations Authority for Fiscal Year 2000—Message from the President of the United States

The Speaker pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Government Reform:

To the Congress of the United States:

George W. Bush,

Executive Order Blocking Property of Persons Who Threaten International Stability or Security in the Western Balkans—Message from the President of the United States (H. Doc. No. 107-91)

The Speaker pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations and ordered to be printed:

To the Congress of the United States:

Pursuant to section 202(b) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(b) (IEEPA), and section 301 of the National Emergencies Act, 50 U.S.C. 1621, I hereby report that I have exercised my statutory authority to declare a national emergency in response to the unusual and extraordinary threat posed to the national security and foreign policy of the United States by (1) actions of persons engaged in, or assisting, sponsoring, or supporting, extremist violence in the former Yugoslav Republic of Macedonia, southern Serbia, the Federal Republic of Yugoslavia (FRY), and elsewhere in the Western Balkans region, and (ii) the actions of persons engaged in, or assisting, sponsoring, or supporting acts obstructing implementation of the Dayton Accords in Bosnia or United Nations Security Council Resolution 1244 of June 10, 1999, in Kosovo. The actions of these individuals and groups threaten the peace in or diminish the security and stability of the Western Balkans, undermine the authority, efforts, and objectives of the United Nations, the North Atlantic Treaty Organization (NATO), and other international organizations and entities present in those areas and the wider region, and endanger the safety of persons participating in or providing support to the activities of those organizations and entities, including United States military forces and Government officials. In order to deal with this threat, I have issued an Executive order blocking the property and interests in property of those persons determined to have undertaken the actions described above.

The Executive order prohibits United States persons from transferring, paying, exporting, withdrawing, or otherwise dealing in the property or interests in the property of persons identified in the Annex to the order or persons designated pursuant to the order by the Secretary of the Treasury, in consultation with the Secretary of State. Included among the activities prohibited by the order are making or receiving by United States persons of any contribution or provision of funds, goods, or services to or for the benefit of any person designated in or
In southern Serbia, ethnic Albania extremists have used the Ground Safety Zone (GSZ), originally intended as a buffer between KFOR and FRY/Government of Serbia (FRY/GoS) forces, as a safe haven for staging attacks against FRY/GoS police and soldiers. Members of ethnic Albanian armed extremist groups in southern Serbia have, on several occasions fired on joint U.S.-Russian KFOR patrols in Kosovo. NATO has negotiated the return of FRY/GoS forces to the GSZ, and facilitated negotiations between Belgrade authorities and ethnic Albanians insurgents and political leaders from southern Serbia. A small number of the extremist leaders have since threatened to seek vengeance on KFOR, including U.S. KFOR.

Individuals and groups engaged in the activities described above have threatened falsely of having U.S. support, a claim that is believed by many in the region. They also have aggressively solicited funds from United States persons. These fund-raising efforts serve to fuel extremist violence and obstructionist activity in the region and are inimical to U.S. interests. Consequently, the Executive order I have issued is necessary to restrict any further financial or other support by United States persons for the persons designated in or pursuant to the order. The actions we are taking will demonstrate to all the peoples of the region and to the wider international community that the Government of the United States strongly opposes the recent extremist violence and obstructionist activity in Macedonia and southern Serbia and elsewhere in the Western Balkans. The concrete steps we are undertaking to block access by these groups and individuals to financial and material support will assist in restoring peace and stability in the region and help protect U.S. military forces and Government officials working towards that end.

GEORGE W. BUSH.

years 2002 and 2003, to make incentive grants to States to implement child passenger-protection programs. Unlike other TEA–21 programs, the child passenger protection education grant program expires at the end of 2001.

H.R. 691 extends the program to 2003, consistent with the authorization period for other TEA–21 programs.

Mr. Speaker, H.R. 691 does not affect direct spending, therefore, offsetting spending reductions are not required. The objective of the bill and the program it authorizes is to prevent deaths and injuries to children, educate the public concerning the proper installation of proper restraints, and train child passenger safety personnel concerning child restraint use.

Every day children sustain injuries or die in motor vehicle crashes. In 1999, more than 1,100 children under the age of 10 were killed in motor vehicle crashes and another 182,000 were injured.

Many of these injuries and deaths could have been avoided with the correct use of safety seats and seat belts; however, many adults are unaware they are using safety restraints incorrectly or not at all, thereby placing their child at risk.

In the fiscal year 2000, in my own State of Washington, child passenger protection education grant funds were used to train 196 law enforcement and child passenger safety certified technicians and 11 certified instructors, establish 25 law enforcement community child passenger safety teams covering 27 of the 39 counties in the State focusing on Native American and Hispanic populations, and conduct 75 child passenger safety awareness events.

In fiscal year 2001, my State of Washington is using its funds to train an additional 100 child passenger safety technicians, conduct additional events and clinics, establish additional community child passenger safety teams, and implement a public education program to promote the Nation’s first booster seat law.

Mr. Speaker, these types of activities are being reflected in State programs across the Nation, the emphasis being placed on cultural and ethnic minorities, rural and low-income and special needs populations and documented low-usage areas based upon available surveys and crash data.

The child passenger protection education program is reducing the number of children being killed in traffic crashes across the country and is deserving of our strong support. I strongly support the bill and urge its approval.

Mr. Speaker, I yield 3 minutes to my colleague, the gentleman from Pennsylvania (Mr. BORSKI).

Mr. Speaker, let me first commend the manager of the bill, the gentleman from Washington (Mr. LARSEN), who has become a very productive member of the Committee on Transportation and Infrastructure in his short time here.

Mr. Speaker I would also like to pay my compliments to the distinguished gentleman from Minnesota (Mr. OBERSTAR), ranking member of the full committee, who is a great Member of Congress and a great leader of transportation.

I do not know of anyone in the Congress who has been a better protector of the traveling public, and I want to commend him for his wisdom in sponsoring this bill and bringing it before the Congress today.

Mr. Speaker, in the last 25 years, the Nation has made significant gains in child passenger safety. Since 1975, child restraint systems have saved the lives of more than 4,000 children involved in automobile crashes.

During that time, the fatality rate for children has decreased steadily; however, the number of deaths has not dropped rapidly due to population increases and a doubling of highway travel. In 1999, 1,135 children, 10 years of age and under were killed; and 182,000 were injured in highway crashes.

Child restraint systems are effective. In 1998, only 8 percent of all children under age 5 rode unrestrained, but they accounted for more than half of all child-occupant fatalities.

Without doubt, the single most effective way to protect our children in the event of a crash is to ensure that all children are buckled up in their appropriate restraint system on every trip.

H.R. 691 will help us do that. The bill will support State programs to educate the public on child restraints and help us continue to reduce the tragic toll of deaths and injuries to our children on the Nation’s highways.

In fiscal year 2000, Mr. Speaker, the State of Pennsylvania received $323,000 in Child Passenger Protection Education Grant funds to establish child passenger safety stations in all State police barracks and increase the awareness of rural and minority populations in the State.

In fiscal year 2001, the State is using its funds to purchase 17 mobile fitting stations, fund child passenger safety courses, and develop new materials to promote child passenger safety among health and medical personnel.

Mr. Speaker, I, again, want to commend the gentleman from Pennsylvania (Mr. OBERSTAR) for his leadership in bringing this measure before us, and I strongly support the bill and I urge its approval.

Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Minnesota (Mr. OBERSTAR), the ranking member of the Committee on Transportation and Infrastructure.

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman from Washington for yielding me this time.

Mr. Speaker, I join the gentleman from Pennsylvania (Mr. BORSKI), ranking member of the Subcommittee on Highways and Transit in complimenting the gentleman from Washington (Mr. LARSEN) on his leadership and his hard work in being a very studious, energetic member of our Committee on Transportation and Infrastructure and on this particular subcommittee as well. I thank the gentleman from Pennsylvania for his very kind comments. I am grateful for those good words.

I also want to express my sincere appreciation to the chairman of the full committee, the gentleman from Alaska (Mr. YOUNG), for agreeing to move this legislation quickly and the gentleman from Wisconsin (Mr. PETRILLO), chair of the Subcommittee on Highways and Transit for helping to move this bill. I recognize that there is a deadline upon us that we must close and we must get this legislation enacted so that the programs can be funded.

I introduced this bill on Valentine’s Day earlier this year to protect our most cherished loved ones, our children. I was an advocate in ISTEA and again in TEA–21 for this legislation for its funding, which has provided $7.5 million in each of the previous fiscal years for the child protection education grant program.

But unlike the other programs of TEA–21, this particular program expired this year. So we need to provide authorization for funding in the coming fiscal years 2002 and 2003 so that the excellent work can get under way again and continue programs that the States have so vigorously and effectively initiated.

In 1999, there were 1,100 children under the age of 5 killed in vehicle crashes and another 300,000 were injured. But the startling statistic is six out of the 10 killed in those crashes were unrestrained. That is not acceptable.

The previous administration established a goal to increase seatbelt use nationwide and reduce child occupant fatalities, a goal of 15 percent by 2000 and 25 percent by 2005. The grant program has been very effective in achieving those goals.

Congress did provide the funds. Forty-eight States and the District of Columbia and the territories have received grants under the program. Since 1997, the number of child fatalities from traffic crashes has declined 17 percent. That exceeded the goal, 15 percent, by the end of last year.

Restraint for children, infants has risen to 97 percent from where it was in 1996, 85 percent. For children age one to four, it is up from 60 percent in 1996 to 94 percent for last year.

Now, I have a personal witness of how effective this program can be. My late wife and I insisted with our children that they all use their child restraint,
I urge the passage of this legislation by this body, promptly by the other body, signature into law by the President, and implementation with the adequate funding that we need to carry it out.

Mr. SIMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to thank the gentleman from Minnesota (Mr. OBERSTAR) in his dedication on this subject in making sure this gets done. It is a very important subject.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield for just a moment. Mr. SIMPSON, I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Speaker, I apologize for not thanking the gentleman from Idaho (Mr. SIMPSON) for pinch-hitting on the floor and substituting and helping us move this bill. We are grateful for the gentleman’s care and concern, and I thank him for his kind words.

Mr. SIMPSON. Mr. Speaker, I am very honored to do so, I want to thank the gentleman for his support on this subject and his interest in it and his dedication to it.

Mr. Speaker, I yield back the balance of my time.

Mr. LARSEN of Washington. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. KENNEDY of Minnesota). The question is on the motion offered by the gentleman from Idaho (Mr. SIMPSON) that the House suspend the rules and pass the bill, H.R. 691.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill passed.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBERS TO THE COMMISSION ON INTERNATIONAL RELIGIOUS FREEDOM

The SPEAKER pro tempore. Without objection, pursuant to section 201(b) of the International Religious Freedom Act of 1998 (22 U.S.C. 6431), amended by Public Law 106–55, and upon the recommendation of the minority leader, the Speaker appoints the following Members of the House to the Commission on International Religious Freedom to fill the existing vacancies thereon, for terms to expire May 14, 2002:

Ms. Leila Sadat, St. Louis, Missouri
Ms. Felice Gaer, Paramus, New Jersey

There was no objection.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

STRENGTHENING UNITED STATES FOREIGN ASSISTANCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. MORAN) is recognized for 5 minutes.

Mr. MORAN of Virginia. Mr. Speaker, I would like to say a few words about a national priority that too often gets overlooked: humanitarian and development assistance in our foreign operations appropriations bill.

That bill will probably be coming to the floor within the next few legislative days. Foreign assistance is an important and effective policy device when words and diplomacy are not enough or when military action is not appropriate. Strengthening U.S. foreign assistance will improve the lives of millions of people around the world and is consistent with America’s tradition of extending a helping hand to those less fortunate.

We, and in fact much of the rest of the world, too easily forget the fact that, over the last half century, U.S. humanitarian and development assistance has successfully elevated the standards of living for millions of people. More than 50 nations have graduated from U.S. assistance programs since World War II, including such nations as France, Spain, Portugal, South Korea, Taiwan, Italy, and Germany. More than 30 of these former aid recipients have gone on to become donor nations themselves.

In the years, foreign assistance programs have helped create some of our closest allies and best trading partners and greatest contributors to the world’s economy. For example, the United States now exports to South Korea in just 1 year: $218 billion in TEA–21 over the 6 years.

It is available to train safety professionals, police officers, fire and emergency medical personnel, high school educators, grade school, elementary school educators in safety and in all aspects of child restraint use.

Every State that gets a grant submits a report to the Department of Transportation describing the activities they have carried out with the funds made available under the grant, and the Secretary of Transportation will report to Congress within the coming year on the success of this program with a complete description of all the programs carried out, materials developed, and the success stories from the States.

Mr. Speaker, it is my hope that this Administration and this Congress will embrace this package of 3 bills which provide for a new framework to support our foreign assistance efforts and to strengthen our nation’s democratic pillars around the globe.

Please call the roll by the name as it appears on this page.

Ms. Felice Gaer, Paramus, New Jersey

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.
75 million people a year, and most of them will live in the world’s poorest countries.

If current trends continue, the result will be more abject poverty, environmental damage, epidemics, and political instability; and we are not such an isolated island of prosperity that we are not immune from the ramifications of the desperation.

From our own shores to the far reaches of the world, there is ample evidence that we have not been able to use our trade policies as effectively as we would like to address the negative impact of globalization which contributes to these great disparities between the privileged and impoverished.

Our failure to respond adequately to these problems is a moral dilemma that should be a pivotal part of our overall foreign assistance and international trade framework. Consider, for example, the plight of the seriously ill in the developing world. It is a testament to the failure of industrialized nations that 80 times more pharmaceutical products are sold in the much less populace west than on the entire continent of Africa.

Each year, 300,000 people in Africa develop sleeping sickness, and many of them die from this disease. It is a disease that we could conquer if we had the political will and the research budget to do it, but we do not. We will apply more of our resources to cure bald American males than African children with sleeping sickness.

The most shocking global misallocation of health resources, of course, is the HIV/AIDS pandemic. AIDS is a global crisis which threatens the very governments in every Nation including the United States. This is not merely a health issue, this is an economic, social, political, and moral issue. AIDS has destroyed societies, destabilized governments, and has the potential to topple democracies. According to UNAIDS, nearly 22 million people have lost their lives, and over 36 million people today are living with HIV and AIDS. Fewer than 2 percent of them have access to life-prolonging therapies or basic treatments. The number of new infections of HIV is estimated at 15,000 every day, and it is growing. I am told that nearly a quarter of some of Africa’s armies are HIV positive.

In a year when President Bush has requested an $8 billion increase in spending over the current $320 billion defense budget, U.N. Secretary General Kofi Annan has called for a global AIDS trust fund to raise $7 billion to $10 billion a year to combat the pandemic. That is almost the same figure as the defense spending increase that we would be adding to a $320 billion budget. This has to be a joint effort among governments, private corpora-

tions, foundations, and nongovernmental organizations.

We are highest among the 22 OECD countries in terms of what we spend on foreign assistance, and we have got to spend more. It is in our interest as well as in the interest of the rest of the world. If we are going to maintain our position as the world’s superpower, the most prosperous Nation in the history of western civilization, then we have got to share our resources. If we do not, we are going to pay a price in the long run.

These are national priorities, and I hope that they get better addressed in our foreign assistance budget and in our national priorities generally.

The SPEAKER pro tempore (Mr. KENNEDY of Minnesota). Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, I rise today to add my voice to those who have been talking about support for a patient’s bill of rights. But, of course, Mr. Speaker, not just any patient’s bill of rights. I support the robust patient’s bill of rights sponsored by my esteemed colleagues, Mr. McCAIN, Mr. KENNEDY, and Mr. EDWARDS in the Senate, and the companion legislation proposed by the gentleman from Iowa (Mr. GANSKE) and the gentleman from Michigan (Mr. DINGELL) in the House. I support the patients’ bill of rights that puts patients before profits and values human life over the bottom line.

The idea of a patients’ bill of rights is nothing new to this Congress. We have all listened to the rhetoric and we have all been involved in the debate. As a Member of Congress since 1996, I must say that it is interesting to see where this debate has gone. I find it worth commenting that the question we are now faced with is not so much whether or not we should pass a patient’s bill of rights but which version we should pass. In other words, we are all in agreement that patients need to be afforded an increased level of protection from the predatory tendencies of managed care organizations.

Rather than immediately delve into the particulars of why we should prefer one version over another, I believe it is instructive to take a step back for a moment and look at the concept of a patients’ bill of rights in the first place. The very idea that patients have the potential to make decisions and determinations about their own health care is a moral imperative. It is simply unethical to take a patient’s well-being into account, it is simply unethical to do so. Any motive other than profit is extraneous and inappropriate.

Now, obviously, this narrow-minded approach has put us in the situation that we are currently in. And I would suggest, Mr. Speaker, that we simply take stock of where we are as a country with a health care delivery system, put patients before profits, make sure that patients and their physicians have the opportunity to collaborate, to make decisions and determinations about the kind of treatment they should receive, and not some bureaucrat or clerk sitting in an office. That is the only real way to do it.

So I would urge all of my colleagues and all of America to really support the Ganske-Dingell bill so that patients can have real rights, and that is the right to be involved, the right to live, the right to get good medicine when they are in need of it.

HONORING THE NATION’S PREMIER LATINA LABOR LEADER, DOLORES HUERTA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Ms. SOLIS) is recognized for 5 minutes.

Ms. SOLIS. Mr. Speaker, I rise today to honor one of our Nation’s premier Latino labor leaders, Dolores Huerta.

Growing up in a predominantly Latino neighborhood in Southern California, I often looked to my community leaders for lessons in how to live and how to treat other people. One of the most influential role models continues to be Dolores Huerta, a prominent civil rights leader who has fought for the rights of farmworkers for more than 40 years.

Born in Dawson, New Mexico, on April 10, 1930, Dolores Huerta was
raised along with her four siblings in the San Jacoquin Valley town of Stockton, California. While there, she wit- nessed the plight of farm workers, enduring physical harm and more than 20 arrests for peacefully exercising her right of free speech.

Her dedication to farm workers and people of color across America has earned her numerous accolades, including the American Civil Liberties Union Roger Baldwin Medal of Liberty Award, the Eugene Debs Foundation Outstanding American Award, the Ellis Island’s Medal of Freedom Award, and induction into the National Women’s Hall of Fame.

Today, my colleagues, we have the opportunity to honor Dolores Huerta, not only for her unwavering dedication to farm workers but to her commit- ment to creating a better environment for all Americans. This resolution that I am presenting today marks the first time in recorded history that Congress has chosen to honor a Latina labor leader. I urge all my colleagues to sup- port this resolution.

PRESCRIPTION DRUGS

The SPEAKER pro tempore. Under a previous order of the House, the gen- tleman from Vermont (Mr. SANDERS) is recognized for 5 minutes.

Mr. SANDERS. Mr. Speaker, as my colleagues may know, tragically mil- lions of American citizens cannot af- ford the outrageously high costs of pre- scripton drugs in this country. Some of these people die, others suffer, and still others take money from their food budgets or other basic necessities of life to buy the life-sustaining drugs that their doctors prescribe.

Tragically, and I think many of us are fully aware of this now, citizens of the United States pay by far, not even close, the highest prices in the world for prescription drugs. Only a small fraction of us have taken our constituents across the Can- dian border, others have gone over the Mexican border and have found, for example, that tamoxifen, a widely-pre- scribed breast cancer drug, sells in Canada for one-tenth of the price, one- tenth of the price that it sells in the United States. And this is for women who are struggling for their lives.

But it is not only Canada that has lower prescription drug prices. For every $1 spent in the United States for a prescription drug, those same drugs are purchased in Switzerland for 65 cents, the United Kingdom for 64 cents, France for 51 cents, and Italy for 49 cents. Meanwhile, year after year the pharmaceutical industry appears at the end of a long legislative process, loop-holes were put into the amendment that made it ineffective. While the law remains on the books, it has not been implemented by either the Clinton ad- ministration or the Bush adminis- tration.

In an increasingly globalized econ- omy where we import food and other products from all over the world, it is incomprehensible that pharmacists and prescription drug distributors are unable to import or reimport FDA safety approved drugs that were manufac- tured in FDA approved facilities.

Mr. Speaker, tomorrow as part of the agriculture appropriations bill, the gentlewoman from Connecticut (Ms. DELAUNO) and the gentleman from New York (Mr. CROWLEY) and I will intro- duce essentially what the Crowley bill was that passed overwhelmingly last year.

Despite huge opposition from the pharmaceutical industry, I am con- fident that Congress will stand up and vote to begin the process to lower pre- scription drug costs in this country.

As Dr. David A. Kessler, former FDA Commissioner under President Bush and President Clinton stated in support of reimportation last year, “I believe that the widespread practice of wholesale-pharmacy sales when drugs need to be stored and handled, and who would be importing them under the strict over- sight of the FDA, are well-positioned
to safely import quality products rather than having American consumers do this on their own.” That is Dr. David Kessler.

Mr. Speaker, I hope tomorrow will win an overwhelming victory for prescription drug consumers in this country.

LIFT MEDICAID CAPS IN U.S. TERRITORIES

The SPEAKER pro tempore (Mr. KENNEDY of Minnesota). Under a previous understanding of the House, the gentleman from Guam (Mr. UNDERWOOD) is recognized for 5 minutes.

Mr. UNDERWOOD. Mr. Speaker, a couple of speakers this evening have talked about the need to improve health care for all American citizens, the most recent speaker talking about prescription drugs, and earlier my colleague talking about a real Patients’ Bill of Rights.

This evening I would like to raise another issue, and that is lifting of the Medicaid Territorial caps in the United States, including my home Island of Guam.

At the start of this Congress, I, along with other territorial delegates from the Virgin Islands, America Samoa, and the Resident Commissioner of Puerto Rico, introduced a bill, H.R. 48, to remove caps on Medicaid payments to the U.S. territories and adjust the statutory matching rate. H.R. 48 is authored by my esteemed colleague, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN), formerly a practicing physician there.

When this bill was first introduced during the 106th Congress, we reported that Medicaid allotments fell far short of meeting the needs of indigent populations in the Territories, and because of depressed economic conditions, high unemployment rates and the rising health care needs of growing indigent populations, the reliance on Medicaid assistance continues to surge way beyond the Federal cap and beyond the Territorial Government’s ability to match Federal funds.

In Guam, for example, for fiscal year 2000, Medicaid assistance was capped at $3.4 million. However, the Government of Guam, because of the emerging population, spent approximately 3 times that amount to serve the medical needs of the people of Guam. For fiscal year 2001, the Medicaid ceiling is capped at an additional $209,000 at $5.6 million. However, the estimated cost to provide medical care to Guam’s needy today is approximately $27 million over that amount, resulting in a drastic overrun for the Government of Guam, way beyond any match that is expected of any State jurisdiction.

I fear the squeeze will even be greater as the Government of Guam implements the President’s tax cut plan which has a deep impact on the economy of Guam and the Virgin Islands. These two U.S. jurisdictions have tax systems which mirror the Internal Revenue Service of the United States, Colorado and Idaho, which means whatever tax policies are implemented on the Federal level automatically take effect at the local level, even without consulting us. The Government of Guam has no surplus to cover the anticipated $30 million shortfall in revenues which will result from this tax cut.

Thus, the struggle to provide medical services to Guam’s needy will be more than the local economy can bear. Lifting the Medicaid caps for territories and changing the Federal Territorial matching rate currently set at 50–50 would provide relief to the neediest populations of the Territories.

This legislation proposes that the Federal Territorial matching share be set at the share of the poorest State, which is currently a 77 to 23 Federal-State match. Congress must consider the reality that Territorial Governments have not shared in the same economic prosperity which has been experienced in the U.S. mainland, and should recognize this by changing the matching rate.

I stand here this evening to urge my colleagues to join in support of H.R. 48. Health care is an issue of importance to every American, whether they reside in the 50 States or the U.S. Territories. Resolving Medicaid issues in the Territories is a step in the right direction towards providing much needed health care relief for Americans, no matter where they live. We are all one country when it comes to responsibilities like service to our country. We should all be one country when it comes to realizing benefits and services like health care.

CORRECT UNEQUAL TREATMENT AMERICANS IN THE TERRITORIES FROM MEDICAID PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) is recognized for 5 minutes.

Mrs. CHRISTENSEN. Mr. Speaker, I rise today to join my colleague from Guam in once again speaking out against the unequal treatment that the American citizens in the Territories receive from the Medicaid program. By virtue of where we live and only by virtue of where we live, low-income Americans in the territories are not able to receive the full benefits of the Medicaid program.

For the residents of my district, the U.S. Virgin Islands, in order for a family of 4 to qualify for medical care under Medicaid, the maximum salary that a family can earn is $8,500 a year, one-half of the Federal minimum wage. By contrast, in year 2002, all States at a minimum will provide Medicaid for all children 19 years old and younger living in families at or below the poverty level at $17,050 for a family of 4, more than twice that amount.

Historically the Government of the Virgin Islands matched the Federal contribution with a combination of cash and in kind. When the value of both is added, it equals and many times exceeded the Federal contribution. While this resolves the Federal requirement on paper, it has created a financial havoc for the Territorial hospitals and clinics that really incur the cost of in-kind services but never get reimbursed.

Because of the cap and 50–50 local match, the local Virgin Islands Government also bears the brunt of the cost of the Medicaid program contributing 66 percent of the financial burden on the Territory’s hospitals; and compounding this dilemma is the fact that the Virgin Islanders, nor do the residents of Guam, get SSI benefits, which means that our disabled citizens are also excluded from the benefits of this program, again just because of where we live. I place emphasis on “where we choose to live” because the fact that all a low-income Virgin Islands resident has to do to receive SSI or full Medicaid benefits is to move to Miami or New York where a growing number of our residents now reside. We would prefer to keep our poor, sick and disabled residents at home instead of sending them to these districts because of an iniquity in the law.

Moreover, it is plain wrong that families must move away from their homes and friends in order to receive a benefit that their fellow citizens on the mainland do not have to leave their home to receive.

Why does this unequal treatment exist? The answer most given is that the Territories do not pay Federal income taxes, but it is not as simple as that. The fact is that people who receive SSI and themselves in the States do not pay Federal taxes because they do not earn enough money.

This Congress in their wisdom, through the earned income tax credit and other tax credits, allow low-income Americans to pay very little Federal taxes. But these same citizens, like my constituents, all pay Social Security and Medicare payroll taxes for which there are no credits or exemptions.

How is it that one group of American citizens, or even residents who are not citizens, can receive medical care even though they do not pay Federal taxes while another group does not. Likewise when my constituents are called to serve their country when we
are at war or even when we are not, they are not asked whether they pay Federal taxes; and we serve willingly and freely and in large numbers.

Mr. Speaker, a recent report, the Access Improvement Project of the Virgin Islands, revealed that great disparities exist for Medicaid eligible children in the Virgin Islands compared to the continental United States. The report shows that while the Nation as a whole spends an average of $76 for EPSDT screening per Medicaid eligible child, the U.S. Virgin Islands only spent $1.20. Additionally, the total Medicaid expenditures per child also shows an astonishing disparity. In the age group 15 to 20, national Medicaid expenditures were approximately 599 percent more than what is being spent in the Virgin Islands. We also received a 50 percent match, despite a State like Mississippi where the income is $1,500 higher than ours. They receive 80 percent match. And the Virgin Islands Medicaid program cannot provide wheelchairs, hearing aids or prosthetic devices, and only provides physical and occupational therapy to a limited degree because of the limited funding.

Mr. Speaker, the gentleman from Guam (Mr. UNDERWOOD) and I pledge to work to remove the Medicaid cap and to right this injustice on behalf of the poor and disabled in our districts. I hope that our colleagues will agree that it is not right to penalize American citizens of similar circumstances only because of where they live, and that they will join and support our efforts.

1915

NATIONAL ENERGY POLICY

The SPEAKER pro tempore (Mr. KENNEDY of Minnesota). Under the Speaker's announced policy of January 3, 2001, the gentleman from Colorado (Mr. MCINNIS) is recognized for 60 minutes as the designee of the majority leader.

Mr. MCINNIS. Mr. Speaker, before I start this evening on the main subject of which I intend to spend the majority of my time on, I want to tell you that today I had a visit from the Future Farmers of America that was very, very good. It is refreshing to have young men and women like this and young men and women of the different groups, not only Future Farmers of America but the different groups that come in to see us, the leadership groups and so on. It does tell you that there is a lot of promise with this new generation, that there is sure a lot more going in favor of that generation than there is going against it. So I felt pretty good. It recharges somebody in my kind of position to see that the nation is following behind us, which is something that we become very dedicated to, because, after all, whether you are a Democrat or a Republican, regardless so where you fall down on the issues, if you really looked at the heart of why most of us are here, it is because we do care about the greatest country on the face of the earth and we do care about being able to hand this country over to a generation that will deliver the same kind of promise to this great country as have the previous generations.

With that, Mr. Speaker, I want to address this evening energy. We have got to talk about energy. I will tell you why and what is happening with energy. We are actually seeing energy prices begin to drop. In fact, energy prices are dropping rather dramatically here just in the last couple of weeks. My concern about energy becoming more affordable, which of course is the basis that we begin to forget the shortage of energy that we have had in the last several months, that we begin to forget the necessity to conserve and to continue to conserve, not just for the period of time that we had the shortage but for the sake of future generations like these Future Farmers of America that were in my office today. I think that we have to adopt permanent conservation methods for future generations as an investment. It is an investment in the future. I think we have to stand up to some of the realities of the shortages that were created over here in the last year. Why did they come about? What is happening? What are we going to do to secure our Nation's future as far as its energy needs?

As the price begins to fall, people begin to take energy and push it off their plate. It is not such a priority. Gasoline alone has fallen 20, 30 cents a gallon in my district. By the way, if my colleagues happen to be anywhere in the United States where gasoline has not dropped in price, they better take a look at the operator, because somebody is making a lot of money. Natural gas prices have begun to drop dramatically. Electric prices have begun to drop rather dramatically. Why? Because, number one, we are coming out of the winter season, obviously we are into summer right now but, two, the supply is beginning to catch up with the demand. Why is it beginning to catch up with the demand? One, we have had increased production overseas, and, two, people are beginning to exercise energy conservation, so the demand and the economy has brought that demand down. In other words, conservation and the slowness of the economy have begun to bring the demand down while the supply goes up. So as supply and demand come closer together, that is where your price matches. If in fact at some point it looks like supply will exceed demand, in other words, you have more than you can sell, prices drop rather dramatically.

So this summer the good news is we are going to have reasonable gasoline prices. Of course, you can go to work, et cetera. But I do not want that to hide the necessity for each and every one of us in here to continue to take a look at what is necessary for this country to conserve and to continue to look for resources that we think are necessary so that this country can stay on an even keel with the needs that it has in the future. It would be a dramatic mistake, a dramatic and serious mistake, for us to assume that everything is going to be the subject of puttering off into the forest. In fact, that was a warning, a warning shot that was fired over our bow, so to speak, in the last few months. It was a message to us that we need to look with an approach on some very, very important parts of, one, how can we conserve, number two, probably more important than anything I have discussed so far this evening, the importance of having an energy policy for this Nation.

Let me spend just a few moments on the energy policy for this Nation. The problem in the last 8 years under the previous administration is that we really never had an energy crisis. During the Clinton days in office, there never really was an energy crisis. So as a result, that administration never really did set forth on trying to come up with some type of energy policy. Why? When you decide to come up with some kind of energy policy, that is condescending. You talk about ANWR. You need to talk about hot subjects like nuclear utilization of energy. You need to talk about hot subjects of where you store waste. You need to talk about and have some discussions with the auto manufacturers about increasing the mileage that we get on our cars. A lot of those conversations are going to be under a very, very heated debate as this administration, the Bush administration, begins to put together an energy policy. So it is a debate that any smart politician would like to avoid. Why take the heat when you do not really have to? If the energy prices are reasonable, in fact, they were not only reasonable over the years of the Clinton administration, they were cheap, why take on the heat of dragging this country through the debate of an energy policy?

Well, things have changed. We know, of course, in the last 5 or 6 months, it seems only a few weeks after President Bush and Vice President CHENEY took
office, that we began to feel a shortage. They did not run from it. That is important that not. We have seen a lot of criticism lately of our President and our Vice President, most of it quite unjustified but nonetheless it is out there. Criticism about how dare they say we go and look for future energy resources. How dare they say a program to get our energy surpluses up here has its budget cut? What is this new administration thinking by putting on the table the different areas of energy and energy reserves in this country and at least asking the question, should we or should we not drill, for example, in those particular areas? Should we or should we not begin to take a second look at nuclear and say maybe we ought to consider it, like France, by the way, of which most of the energy in Europe comes is generating and a clean. Some of the conservation methods. It is controversial to go out to those car manufacturers and say, we need better mileage for those vehicles.

But this administration was willing to do it because they have had to. And, by the way, now that energy prices are dropping, the political heat on coming up with an energy policy is not near as great as it was just 3 weeks ago. Just 3 or 4 weeks ago when the prices were still up there, the heat was fairly extensive in these chambers. But what really will test us is if we are willing to continue to work with the President and the Vice President in putting together an energy policy despite the fact we are not under a lot of heat in these chambers to do exactly that. And I think we have an obligation to do that. Because, as I said, in those last few months what came over the bow of our ship was a warning shot. It did not hit the side of the ship. Our boat did not sink as a result of this energy. We have had some blackouts in California but that really focuses more on negligence by the leadership out in California. It did not occur in 49 other States, by the way, which does make California stand out, saying, “California, 49 States must be doing something right. You must need to adjust something you’re doing.”

The key here is that while we got a warning shot, let us not ignore it. I have not so much ideas this evening and some things I would like to go over with my colleagues. This evening, my remarks really are going to focus on what I call common sense and resource development. It does not read common sense of resource development. It reads this common sense, resource development. In other words, we have got a lot of conservation, for example, and that is the first one I have got down here. Conservation.

Let’s talk about conservation for a couple of minutes. There are a lot of commonsense things in conservation that we can use. And it does not create a lot of pain with the American people. As I have said numerous times on this House floor, the average American driver that owns a car you do not have to change your oil every 3,000 miles. Now, you may have been convinced by marketing efforts that your engine is going to fall out of your car or the engine is going to blow up if you do not change it. But get your oil changed every 3,000 miles, but the fact is if you read the owner’s manual, you are going to discover that your car only needs its oil changed maybe every 6,000 miles. In some cases 7 or 8 or 9,000 miles. Now, you can begin to become a participant in this conservation by simply changing your oil when the owner’s manual tells you to change it. That is not painful to the American people. It is not painful to my colleagues. That is what I call common sense. That is an example of common sense approach to our resource development that we need. Part of that resource development is conservation. There are a lot of things. Of course the simplest thing that anybody can think of which absolutely causes you no pain is shut off the lights when you leave the room. Shut off the lights when you leave the house, I said the other day in Europe, when you go into a hotel in Europe, you actually have a little card. When you walk into the room, you slide that card into a slot. As long as that card is in that slot, you have electricity. But as you leave the hotel, you pull the card out and the lights go off so you do not forget to leave lights on in your hotel room. Does that cause you any pain? No. Does it impact your life-style in a negative fashion? No. In fact, it will actually save money. Do this in your own home, watch out to turn out those lights, and it also helps you become a responsible and responsible participant in conservation efforts. That is a key part, I think, in resource development.

Some people would like you to believe that the only way you can have resource development is to exclude conservation, that when the President and the Vice President talk about resource development, that they have ignored conservation, they have drawn a line through it. That is just political propaganda. That is all that is. It is bogus. I have talked to the Vice President of the United States’ policy on energy is and conservation plays an important part in it. But the President and the Vice President have had enough courage to say, look, you cannot do it on just one of these elements alone. You have to plug up the gap that we have or the gap that we might have in the near future simply through conservation. You can make a significant dent in it, but you cannot make it with just simply conservation. Nor can you make it up with the alternative forms of energy.

I want to point out that if you go all throughout the world, you pick every alternative form of energy you can find, solar, wind, other types of renewable energy generation to be the highest bid. That is, if you took all of that renewable alternative energy in the world and you applied it all to the United States, in other words, only the United States that got that alternative energy, that would only meet at the most 3 percent of our needs. That is not going to be an answer, but it is an important part of the answer. It is a critical piece of the puzzle when combined with conservation. Then you have got to take a look at other renewables. What is a good renewable source out there that generates electricity and provides recreation and provides fisheries and prevents flooding and allows us any other number of benefits? Hydropower. Now, I speak of hydropower with great admiration because I come from the West. My family has had many generations on both sides out of the mountains in Colorado. The mountains in Colorado, but not always out of the area. I think almost half the geographical area of the country only gets about 14 percent of the water. Out here in the East, in some areas you sue to get rid of the water. You try and shove the water over on your neighbor’s property.

Out in the West we need storage. We have about 6 weeks every year out in the West, out in those Rocky Mountains, you have all been out there, you have skied in my district. Aspen, Vail, Telluride, Beaver Creek, Steamboat, Glenwood, Durango. You have skied out there. You think the snow never ends. You think there is lots of moisture out there. First of all, we do not need the moisture in the winter. We need the moisture primarily for agriculture, municipal use, et cetera. For about 6 weeks as that snow melts off those high mountain peaks, and my direct connection with the good Lord, we do not know how to time that. We cannot control the timing of that. Sometimes it comes early, sometimes it comes late. Mostly it comes early. So we have to have the capability to store it. So we all are storing that water, water which we have to have, remember that in the West we have got to store it, not only just for flood control but for our drinking water. So why not while we are storing the water use the energy generation potential of the water and generate electricity.

I am going to show you exactly how hydropower works here in just a few minutes. It is probably the cleanest energy generator we have got out there. What we do is we take the water as it goes down, we spin a generator and we create electricity. Keep in
mind one thing: Hydrodopower, when we have a generator, it spins, that is natural gas. We use a fuel. We have to use natural gas.

So we consume one part of our environment to create electricity. That is the beauty of capitalism. 

Now it is not the best product, and you will go for the best product but right now it is the best product. We have a conscious decision not to explore for more oil and gas and to continue to become more reliant. The trade-off is then we become more reliant on foreign oil. Now there are all kinds of risks to that and we ought to be aware of that. What happened in the State of California is they adopted a policy for many, many years, in fact they were using alternative energy. Vice President Cheney has said that on a number of occasions. The President himself has talked about the importance of conservation, but it will not wipe out this gap.

Let us take a look. How do we close this gap? What do we do to minimize, to minimize this gap, to bring consumption in with production? That is, by the way, what brings your price down. We can conserve and conserve, and careful, very careful. Vice President Bush has said that that and the President has talked about the importance of conservation, but it will not wipe out this gap.

What fills in the gap? Well, what fills in the gap, of course, is foreign oil. We become more and more dependent on people like Saddam Hussein to provide for that gap. Gas has a pretty negative connotation to it. I pulled up 19,000 hits. I did not look at each hit but up came 19,000 hits on conservation ideas. So your computer really at home can help us conserve energy in this country.

I took a look at the words that have negative thoughts to them in regard to energy-related. I can say that oil and gas has a pretty negative connotation to it. Same thing with coal, same thing with nuclear. There are some people out there, again using strict rhetoric, political rhetoric in a lot of occasions, will lead you to believe that, look, exploration for oil or natural gas or nuclear generation for electricity or hydropower, that is that bad; that we can get our power by simply conserving or simply using alternative or solar. Do not buy into this argument that solar is going to replace at least in the near term, and near term meaning the next 10 to 20 years, do not buy into that argument that solar alone is going to do it. That is why we do not have solar generation in our homes today, although a few of them have it with those panels on the roof but it is not very efficient and it is not very effective. That is why most homes do not have it.

I can assure you that once somebody masters how to put that solar energy into a home to generate, for example, your electricity or to provide the energy needs that you have, we are going to go solar. That is where the market will take us. That is the beauty of the capitalistic market. It will never go for the best product but right now it is not the best product, and you are being led down a path without a good return at the end when people say that solar is renewable energy, or other factors or even conservation will solve our problem.

The fact is, we have to have oil and gas until we are able to make some fairly significant technological advances in solar and other alternative fuels so that at some point in the future we will have solar, but today you need oil and gas. We have to face up to the fact that we have to have further exploration.

Here is a chart to give you an idea. This is energy production. It is a flat line at our growth rates last year, flat line energy production. This is energy consumption, the red line. Look at the angle of the red line compared to the flat green line. You say, all right, Scott, there is the energy consumption. There is the energy production. What fills in the gap? Well, what fills in the gap, of course, is foreign oil. We become more and more dependent on people like Saddam Hussein to provide for that gap.

Here is an angle with my pointer, conservation maybe brings it down maybe around like that. It will take care of a good chunk of that gray area but it will not take care of the biggest portion of it.

Then if we take a look at alternative energy like the solar and so on, maybe a little tiny fraction. Certainly, the technological advances we have today, for example, on solar or other alternative energy will not make at all the kind of dent that conservation will make but it will help a little. So after you take that into consideration you still have a significant gap here.

What does that significant gap represent? Well, it represents energy. It represents whether you have air conditioning for elderly people. It represents whether you have refrigeration for storage of food. It represents vehicles and I am not just talking about your car. I am talking about the ability for everything, to run ambulances, to drive semis, to move food from one point in the country to the other point in the country. I do not have to say what needs we have as far as oil and gas, but we cannot pretend to let it always happen in the other person's backyard. We cannot pretend that we do not really need to drill for oil and gas, that somehow oil and gas pipelines are going to fall out of the sky because we need it and we do not have to go through the pain of having to look for it. That is the political reality.

The fact is, in this country, we have to continue to do that or we can make a conscious decision, as they did in California over the years, we can make a conscious decision not to explore for that and become dependent on other sources. In other words, in the United States we can make a decision not to continue to explore for more oil and gas and to continue to become more reliant. The trade-off is we then become more reliant on foreign oil.
Leadership, however, requires that you stand up here and say, we need conserve, coal has a negative connotation, but we do have to continue to explore for oil and gas. We need to do it in an environmentally sensitive method, a responsible method, which not only mitigates the impact to the environment.

The days of mitigation for the environment are pretty well gone, where you go in and you have a project and you are supposed to mitigate for the environment. Those days are pretty well gone. We have now accepted the responsibility for future generations that we have a higher standard, not just mitigation but enhancement, enhancement of the environment. We have done this with wetlands. We have done this with our endangered species, any number of different things. We have actually, because we are concerned about the environment for future generations, we have lifted it to a higher standard where we think will be of benefit to future generations while at the same time allowing utilization, say, of a resource.

Well, let me go on here. We have a very negative connotation based on coal. Coal generates a lot of power in this country and it generates a lot of jobs in this country and it can be done in a doggoned responsible way. Now you have to exercise oversight over it. I said on taking a mountain bike, a mountaintop, for example. I am not too sold on burning coal without the most modern efforts we have, the smoke stack technological instruments that we have, technological instruments that we have to clean that coal, to make sure that the area that comes out has a minimum impact on our environment if we are going to burn coal. What can we do today? We can do a lot of that. Now some of my colleagues, because of the negative connotation to it, say shut it down. My guess is they are not relying on coal. My guess is they do not have jobs dependent on coal. My guess is they have never been in a coal-powered generation facility. That is a responsibility that each and every one of us have. In fact, it is incumbent upon us to go out when we talk about these things, when we talk about hydropower or when we talk against hydropower we ought to go look at a dam. You ought to go out and see what kind of impact, both negative and positive, it might have. We have to weigh it out. That is exactly what the President and the vice president have said on their energy policy. Put it down. Put it down on that table. Then let us debate it. If it does not work, take it off. But everybody has an obligation to put their idea on the table so that we can have this debate, so that we can develop some kind of energy policy for this country.

As I said earlier, I am concerned that because energy prices are dropping that us, Mr. Speaker, in leadership positions will begin to say well, that is not as important as it was three or four years ago. Prices are down. Our constituents are not concerned. The complaints are not out there. Let us move on to something else. We cannot do that. We just got a warning shot. Do not let that go unnoticed because of the fact that our energy prices have dropped.

I would just reemphasize right here, I know I brought this chart up a couple of minutes ago but I just want to reemphasize one thing. That is our production. That is energy production today. That is demand. Now demand came down just a little but the fact is this is our projected shortfall, right there, projected shortfall. Every one of us can make that projected shortfall. We can drop that shortfall by allowing continued exploration in this country under reasonable oversight, using common sense and to the environment. Now, it is very interesting to hear about people. I mentioned this the other day when I was making comments because I find it kind of ironic. I, of course, get out in the mountains. I love the mountains. I know I brought this chart up a couple of minutes ago but I just want to reemphasize right here. I mentioned earlier if we make the conscience decision, which we are free to do, that is why we are on this floor, that is why we have this debate, if, in putting our energy policy together, as the President and Vice President have said we need to do, we need an energy policy, if my colleagues out here make a conscience decision not to have further exploration of our natural gas and our oil reserves in this country, only one thing can happen, you cannot fill the gap in with conservation. It helps, but does not fill the gap.

You cannot fill the gap in with solar energy. The only way you can fill in the gap between supply and demand, when you decide not to drill or further explore in our country, is right here, foreign countries like Iraq. Take a look at our dependence on Iraqi oil exports to the United States. Take a look at that line. The more you decide not to find alternative resources, the more you cannot do to continue to use oil and gas, very negative about mining; you have got to get mining out of here; we cannot have mining. It is interesting comments from somebody on a mountain bike made of titanium.

I said to my friend, I said that bike you have got is one of the most technically advanced bikes in the world. That thing you can lift it, no matter how strong you are, even a child can lift that thing up, it is so light. But you know why that is? Because we have mines, we have minerals. We are able to have oil and gas production. We are able to come up with things like this device which, by the way, utilizing your bicycle is a good way to conserve. In fact, by using that resource we in the long run can use less of it by developing something like a bicycle that is comfortable to ride and a bicycle of which people can recreate on without having to use a gasoline-powered engine, for example.

The fact here is, look at this, our demand for product, this is our demand for product right here. U.S. crude production, these bars right here of production, that is production, 1990, 1991. This right here is the petroleum demand. Take a look at what demand has done to production. When you have that kind of gap, your price skyrocket. That is the kind of gap that begins to lead to a crisis.

If we did not have an energy crisis this last few months, with the exception in California, blackouts in New York. New York City may face some. We do have a drought up in the northwest on the Columbia River.

Mr. Speaker, the fact is 49 out of the 50 States were in pretty good shape. We had an energy crunch, not an energy crisis. That energy crisis is just sitting out there waiting to fire right into the center of us, unless we do something to prepare for it.

I mentioned earlier if we make the conscience decision, which we are free to do, that is why we are on this floor, that is why we have this debate, if, in putting our energy policy together, as the President and Vice President have said we need to do, we need an energy policy, if my colleagues out here make a conscience decision not to have further exploration of our natural gas and our oil reserves in this country, only one thing can happen, you cannot fill the gap in with conservation. It helps, but does not fill the gap.

Take a look at our dependence on Iraqi oil exports to the United States. Take a look at that line. The more you decide not to find alternative resources, the more you cannot do to continue to use oil and gas, very negative about mining; you have got to get mining out of here; we cannot have mining. It is interesting comments from somebody on a mountain bike made of titanium.

I said to my friend, I said that bike you have got is one of the most technically advanced bikes in the world. That thing you can lift it, no matter how strong you are, even a child can lift that thing up, it is so light. But you know why that is? Because we have mines, we have minerals. We are able to have oil and gas production. We are able to come up with things like this device which, by the way, utilizing your bicycle is a good way to conserve. In fact, by using that resource we in the long run can use less of it by developing something like a bicycle that is comfortable to ride and a bicycle of which people can recreate on without having to use a gasoline-powered engine, for example.
Lightning did not just strike California and they got picked out of the bunch. What California did, our states did, is what we are in the energy crisis. We have several things we ought to discuss since California brought it on themselves.

Number one, a fair question for us to ask to California, to ask the governor of the state of California, "What are you doing to pull yourself up by your bootstraps?" In other words, that word called self help, what are you doing. California leadership, to pull your people in that State out of the energy crisis that you have.

We have to be careful. I am critical of the governor of California, whom, by the way, has blamed everybody else but himself. I never heard him once say that he accepts at least a part of the blame for their shortage out there. That is why I am so critical of the leadership of the State of California.

I want to tell all of my colleagues that we are very dependent on that State. We do not walk away from California. We should not walk away from California. It is a State. We have an inherent obligation to help California. That help should not come without some kind of matching grant, so to speak, matching effort.

They have to make their own effort, but when you look at it from an economic point of view, California is the sixth most powerful economy in the world, we better not walk away from them; not only do we have what I think is an obligation to help California because they are a State. They are our brothers. They are our sisters. They are our neighbors. They are a State of the United States.

We do not walk away when another State is in trouble, so we also cannot walk away from California, because California is the sixth most powerful economic unit in the world.

What do you have to do to get help from the rest of us? First of all, California, and I hope the governor of California has an opportunity to visit with me at some point, you have a lot of power generation facilities to be built in your State. You cannot continue to demand energy and have energy demand continue to grow while at the same time say "not in my backyard."

You cannot continue to depend on people outside your State lines to supply your generation inside your State, unless you want to subject yourself to the ups and downs of price fluctuations. That is exactly what happened.

California is not deregulated. They call it deregulation. They sold their generation outside. Outside owners run it, because they thought they could save money by buying the spot market, which means the prices go up and down by the hour in power, by the hour in electrical power.

They thought they could outsmart the market. What did they do? They bought spot power. The people now control the power, the price goes up. You have to be able to build your own resources within the State of California.

I know that California is now looking at that. They opened their first power plant in 13 years, as I understand it, as I mentioned earlier in my comments, yesterday or today. That is good; not enough, but it is good. You are headed in the right direction.

Mr. Speaker, I want my colleagues from California to know that the rest of us feel an obligation to help your State. But, by gosh, California, you have to help yourself. You have to allow some natural gas lines. You have not allowed a transmission line, not natural gas to your house, but a transmission line to move large volumes of natural gas by pipeline.

You have put price caps. That is one of the problems I am going to go through in a little more detail. Let us just really quickly go to that while we are on the subject.

Let us talk about price caps. I can tell you in fairness of disclosure, I am a student of Adam Smith, the Wealth of Nations. That is the capitalistic system where you have supply and demand. You have to have some oversight so you do not have monopolies, but you have to be careful of abuses, and I understand that. You have to understand, especially in the government, we are not business experts in the government.

None of us are business experts. In fact, a lot of us in these chambers, I happen to have been, but a lot of the people in these chambers have never operated a business.

Where do you think we develop the expertise to go into the marketplace which has been regulated in this country for hundreds of years? Where do you think we can go into it and decide that government manipulation of the market is for the benefit of the consumer, then, in the end, how to beat the market?

It is like leasing. I will give you an analogy here. It is like you own a house and you rent the house to a tenant. You rent it to somebody and you say to the person you are renting to, look, you pay me $500 a month rent for the house, and, by the way, I will pay all the utilities.

Do you know what is going to happen with the person that is renting your house since you are paying their utilities? The air conditioning will be set at 50 in the summer, and the heat will be set so high in the winter you will look over at your house and you will see the windows open so they can get rid of the heat.

Price caps encourage waste of energy. Take a look. Price caps are bad for consumers, the economy and the environment.

The polling in California, and maybe throughout the country, but 70 percent of the American people say they like the idea of price caps. That is where leadership comes in. That is where we as leaders have to say, look, on the short-term basis, you are asking for a short-term return and a long-term risk.

The risk is substantial. The risk is substantial that more waste will occur. Mr. Speaker, the risk is substantial that you cannot artificially hide prices. I know it is painful.

Let me say we do not have price caps in Colorado. Do you know what has happened to my wife and my family here in the last 6 months? We have conservation energy. Why have we conserved energy? Because we did not have price caps.

Do you know that not having price caps what happened to our bill? Our bill went through the ceiling with our natural gas bill. We were stunned. We got a $500 natural gas bill one month and you want to bet that we did not start conserving immediately. Of course, we did.

It is like leasing. You would have had a price cap where it said, look, no matter how much you use, we are only going to have to pay a cap of this amount, it defeats the purpose.

It is a manipulation of the market. That never happened in the history of this country. I know it is popular. I know it is popular. Seventy-five percent of the people support it.

I am telling you, take a look at the history. Seventy-five percent of you supported it, but there has never been successful price caps in the history of this Nation ever.

It is always popular when it is suggested, because, of course, it is only suggested when prices go up. But it has never, ever worked. That is where we have a leadership obligation to at least stand up to the popular opinion and say, I know we want to jump on board, but before we do jump on board, take a look at what the long-term risk of putting price caps on it does.

Price caps impede energy conservation and drive away new energy supplies. Some have called for regionwide price caps, including costs-of-service regulation. That is an aspect of California's effort. Simply put, wholesale and retail price caps prevent markets from working properly.

It is a manipulation of the market and is a politically expedient solution that has exaggerated problems that they are supposed to fix. Price caps create an imbalance between supply and demand by preventing utilities from passing along market prices.
Retail price caps disrupt the natural relationship between supply and demand and prevent markets from operating efficiently. Without incentives for conservation and harms the environment.

Retail price caps eliminate consumers’ incentives to conserve in times of tight supply, because consumers are not paying the true cost of the electricity, for example. Without incentives to reduce consumption, older, dirtier plants are kept running longer.

Let me say that price caps sound good, but think about it. If you artificially keep the price low, you are not putting the investment out there that you need for further supply and reserves for further supply exploration.

If you keep price caps, you have no encouragement at all for people to conserve their energy or to use their own self help. They should not look at this as a way that we are helping the people, but California has to deploy or employ their own self help. They should not look at this as a way to get more natural gas and other things.

In fact, I think all of us would admit that the primary driver outside of the State of California, where you do not have price caps, the primary drive for conservation was the fact that because we did not have price caps, our bills went through the roof. You can bet that the energy conservation immediately went into place.

Mr. Speaker, I hope that as prices begin to drop that all of us continue our responsibility for energy conservation.

Let me just summarize my position on California. California is a very important State. We cannot walk away from them. They are a State after all.

They are the sixth most powerful economic power in the world, but California has not used its economic power to our advantage.

They have expanded water-based recreation projects in Wisconsin, for example, and the turbine to create electricity. That is the beauty of the nature of this thing. It is a renewable resource.

We are not using natural gas. In fact, we are not using any fuel at all to generate electricity. This is a renewable resource.

The storage of the water that is necessary provides for recreation. In fact, our largest recreational water body in the West is Lake Powell. That provides for a tremendous amount of family recreation. It provides for fisheries. It helps us control floods, etcetera, etcetera.

So the water comes in, the water drops through, turns the turbine here, and the turbine the generates the electricity, and out it goes on these power lines. But do you know what? You have got to be able to let these power towers allow transmission lines in their State, but California cannot expect the other 49 States to bail them out.

We ought to help, but California has to pull itself up by its own bootstraps. California has never employed their own self help. They should not look at the other 49 States, which, by the way, are not in the situation California is, because they did not say “not in my backyard,” because they did not refuse to allow generation plants in their State, because they did not refuse to allow gas transmission lines in their State, but California cannot expect the other 49 States to bail them out.

We ought to help, but California has to pull itself up by its own bootstraps. California has never employed their own self help. They should not look at the other 49 States, which, by the way, are not in the situation California is, because they did not say “not in my backyard,” because they did not refuse to allow generation plants in their State, because they did not refuse to allow gas transmission lines in their State, but California cannot expect the other 49 States to bail them out.

We ought to help, but California has to pull itself up by its own bootstraps. California has never employed their own self help. They should not look at the other 49 States, which, by the way, are not in the situation California is, because they did not say “not in my backyard,” because they did not refuse to allow generation plants in their State, because they did not refuse to allow gas transmission lines in their State, but California cannot expect the other 49 States to bail them out.

You are not going to get electricity without electrical generation plants. You are not going to have natural gas without natural gas transmission. That is the point I am making about California.

Let me talk for just a moment here about another common sense approach, and that is hydroelectric, hydropower electricity conservation combined with common sense. Worldwide, 20 percent of all electricity is generated by hydropower.

We are the 2nd largest producer of hydropower in the world. Canada is first. Hydropower makes a lot of sense. Remember, with hydropower, we do not have to have a coal burning facility. We are not using natural gas. In fact, we are not using any fuel at all to generate electricity. This is a renewable resource.

What we are grasping, what we are grabbing is the energy that is created as a result of the fall of the water. You put the water here, it end up here, and the energy that is created between the two points is what we grab to spin a turbine to create electricity. That is exactly what hydropower is about.

That is the beauty of the nature of this thing. It is a renewable resource.

The storage of the water that is necessary provides for recreation. In fact, our largest recreational water body in the West is Lake Powell. That provides for a tremendous amount of family recreation. It provides for fisheries. It helps us control floods, etcetera, etcetera.

So the water comes in, the water drops through, turns the turbine here, and the turbine generates the electricity, and out it goes on these power lines. But do you know what? You have got to be able to let these power towers allow transmission lines in your area. You cannot always think that the burden is going to be on your neighbor’s property. You cannot always think that the burden is going to be on every other State of the union, which is exactly the policy that the leadership in California adopted. That is why one out of 50 States has got a real serious problem.

Now, up in the northwest, of course, the Columbia River is way down because of the drought. I think, frankly, going back to California, you have got to commend the people in California. In the last month, we have seen a tremendous amount of conservation in California.

I think because they have some of these price caps and they are also selling bonds, they are indebting future generations to pay for this generation’s use of power. Talk about unfairness.

For years here, when I was in the Congress, we talked about how future generations do not deserve the debt that we are putting on them, that we should balance the budget.

In the State of Washington, the Columbia River, are they using the water power today, and they are selling bonds, they are indebting their State and letting future generations pay for the power. That is not right. We ought to absorb the pain as we go.

It is the same thing with hydropower. You have to have transmission towers. There is a lot of common sense that can be deployed more that will give us results where one State does not suffer at the expense of other States, where some people do not suffer at the expense or benefit at the expense of other people. There is a lot we can do.

Let us take a look at, real quickly, hydropower. This is a very important statement that I wanted to cover. Take a look at what utilizing hydropower does. This first step here is clean. It is clean. It prevents the burning of 22 billion gallons of oil or 120 million tons of coal each year.

The hydropower that we have in place in this Nation, we are the second largest user in the world. Canada is the first, our utilization of hydropower saves us and prevents the burning of 22 billion, 22 billion gallons of oil, and 120 million tons of coal. That is a lot of coal that we do not have to burn because we have used a common sense approach and we have built hydropower.

Now, as with exploration of coal, as with conservation, you need to use a reasonable approach and you need to use an approach that is sensitive to the environment. I do not propose for a moment that we go out and build a dam anywhere we want to build a dam, but I do propose that we do not reject it on its face.

I do propose that hydropower be something that we consider, that it go on the table for this energy policy that we have all determined is absolutely necessary for future generations of this country. Our leadership obligations require us to begin and complete the process of an energy policy.

Take a look at what it does. Hydropower does not produce greenhouse gases or other air pollution. We have heard a lot about air pollution. We have heard a lot about greenhouse gases. Hydropower does not produce that. Hydropower leaves behind no waste. Think about it. When you burn gas or oil or any other resource, you leave behind no waste. When you do not leave any waste. The water goes through, turns the turbine, generates the electricity.

Reservoirs formed by hydropower projects in Wisconsin, for example, have expanded water-based recreation resources. It is renewable, and it is common sense. That is the kind of policy that we have to put in place for energy in this country.
Let me just kind of summarize my comments this evening and what I think is essential. First of all, I pointed out at the beginning in my remarks that energy prices are beginning to drop. In fact, it is my prediction that we will actually have an electricity glut, an electrical glut here in the next year or so.

Believe it or not, last year we had 158, now this is not in California, but throughout the rest of the Nation, we had 158 new generation plants come online last year, 158. What you have been reading in the media or hearing from some of the political rhetoric is that there had not been any electrical generation facilities. We had 158.

In fact, if we build out everything that is planned for the next 5 years, if you take weekends out, we will have a new generation facility open every day for the next 5 years if you do not count weekends and if all of those projects that are planned are built out. We are going to have an excess of electric generation, but that is part of the market. It will work itself out.

But the key is this, you cannot have good energy policy by having artificial price on the product. You cannot have price caps. I know it is popular. I know it is the politically correct thing to be talking about.

I know I am going against the wave of popular thought, but the reality is, by going out and selling bonds or by putting an artificial cap or a price, one, you do not help at all in conservation, you encourage waste; and, two, somebody has to pay for it.

Remember basic accounting. Every time you have a debt, you have a credit. Every time you have a credit, it has got to balance out. Every time you sell something artificially low in price, you have to subsidize it. Somebody is paying for it. In California, they are selling bonds to raise the cash to buy the electricity that is being used today. Those bonds are going to be paid by the working people of tomorrow. A little unfair, a little inequitable in my opinion.

But to come back to my main point, we have an obligation to help California. California has an obligation to help itself. We have an obligation in this country to conserve. That is part of it.

Probably the most important poster is this poster right here because I think this diagram illustrates our energy production if it is going to remain flat, I think it will go up a little, but if it is going to remain flat, and our energy consumption is going to continue to climb at that angle, we are going to have this projected shortfall. Common sense will allow us to fill in that shortfall. Common sense allows us to do it.

How do we do it? Conservation will fill in a part of that chart. Alternative fuel like solar generation or alternative generation will fill in a little gap of it. But the reality of it, it is going to have to be filled in by further exploration of natural gas resources or nuclear resources or coal resources.

We can combine. Our answer is not any one of those things I mentioned, not coal, not nuclear, not conservation, not solar. None of those standing alone can solve the energy crisis that we could have in the future. Certainly it is not solving the energy crunch that we have today.

But combined, when you combine conservation with alternative fuels, with renewable energy like hydro-power, with further oil and natural gas exploration, when you put that combination, you can construct a model that can deliver the energy needs to this Nation without requiring undue sacrifice on the lifestyles of the people of this Nation. You can create a model that will provide energy for future generations. After all, our discussions on this floor, our discussions are not just focused on this generation. This generation has an obligation to think about future generations. We have an obligation to provide energy just as much as we have an obligation to provide a strong defense, just as much as we have an obligation to provide a strong educational system.

It is no less of a responsibility to take a look at our future energy picture than it is to take a look at education or health care or any other issue you want to talk about for future generations. We have that opportunity today.

So I would urge my colleagues that, even while the price of energy is dropping, we have an obligation to continue to urge people to conserve. We have an obligation to continue to try and assist our colleagues in California and every other State in this country, to say just because energy has become more affordable does not mean that our energy crunch does not still exist.

We have got to plan for the future. We had that opportunity today in our hands. Now it is going to require leadership. It is going to require an energy policy which we have not seen for 8 years.

We have got a President. We have got an administrative team and many of my colleagues on both sides of the aisle that are prepared to put together an energy policy. That debate has already begun. Now we need to take it to its logical conclusion, and that is to come up with a policy for this generation and future generations of this country in regards to energy.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 933

Mr. JEFFERSON. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor from H.R. 933. There was no objection.

DIGITAL DIVIDE ELIMINATION ACT OF 2001

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. JEFFERSON) is recognized for 5 minutes.

Mr. JEFFERSON. Mr. Speaker, I am here today to discuss the digital divide that is plaguing our country and to garner support for legislation my colleagues and I have introduced to help alleviate this crisis, H.R. 2281, The Digital Divide Elimination Act of 2001.

Computers are becoming the crucial link to education, information, and to commerce. For all Americans, personal and economic success will depend on having the ability to understand and use these powerful information tools. However, according to the Department of Commerce, less than 10 percent of households with income below $20,000 own computers or have used the Internet, an absolutely alarming statistic. Unless this changes, these poor families in both urban and rural areas will be left behind.

Educators and industry leaders alike realize a serious problem associated with the digital divide and are taking steps to bring computer technology to schools and libraries across America. We, as public officials, applaud these efforts. However, these efforts are not enough.

If we are going to truly give every American access to technology and improve the way our children learn, the Federal Government must join in to bolster these efforts and, more importantly, to help extend technology and technology access to every home in America. Only then will these children and their families gain an appreciation for technology and the Internet in the home, unfettered by the constraints of an institutional setting.

The legislation my colleagues and I have reintroduced this year provides additional tax incentives to induce private companies to donate computer technology and to induce poor families to purchase computers.

First, the legislation increases the special deduction for computer donations from three-fourths of the computer’s sales price to the higher of the full sales price or its manufacturing cost. For example, if the manufacturing cost of a computer is $500 and the sales price is $1,000, the charitable deduction is increased from $750 to $1,000.

The special deductions for computers has already induced computer manufacturers to donate thousands of computers to schools across America. Now, as a result of this provision, computer

VerDate Aug 31 2005 14:38 Feb 22, 2007 Jkt 089102 PO 00000 Frm 00080 Fmt 0688 Sfmt 0634 E:

jette on PROD1PC67 with BOUND RECORD

managed contractors will have an even greater incentive to donate unsold computer equipment even where the depreciated cost of the computer exceeds its market price. Under current law, it is more economical for many non-manufacturers to throw away used computers than to donate them to charity because they can take a higher tax deduction for disposing of the computer than for donating it. That is clearly bad tax policy. Thankfully, this provision will change that result.

In addition, non-manufacturers will also have a greater incentive to donate computer equipment even where the depreciated cost of the computer exceeds its market price. Under current law, it is more economical for many non-manufacturers to throw away used computers than to donate them to charity because they can take a higher tax deduction for disposing of the computer than for donating it. That is clearly bad tax policy. Thankfully, this provision will change that result.

Second, the legislation will extend the special computer deduction through 2004 and expand it to include donations, not only to libraries and training centers, but also to nonprofits that provide computer technology to poor families. Nonprofits such as Computers for Youth in New York City have placed computers into the homes of hundreds of low-income families. We need to encourage similar efforts by nonprofits all over the country. Only then can we make our mutual goal of bringing technology into every home in America a reality.

Finally, the legislation will provide a refundable credit equal to 50 percent of the cost for computer purchases by families receiving the earned income tax credit up to $500. While the cost of computers and Internet access are dropping, the cost of computers still remains a barrier for many low-income working families. Returning half of the cost of the computers to these families will go a long way towards helping working families help themselves and provide a brighter future for their children.

Mr. Speaker, bringing technology to all our children is key to our Nation’s future and prosperity. I implore my colleagues to recognize the long-term negative impact that could result from not eliminating the digital divide and urge their support of this legislation. Together, we can ensure a much brighter tomorrow for our children and give them the tools necessary to compete and lead the next generation to an even brighter future.

HMO REFORM

The SPEAKER pro tempore (Mr. MCDONNELL). Under the Speaker’s announcement of January 3, 2001, the gentlewoman from California (Mrs. CAPPS) is recognized for 60 minutes as the designee of the minority leader.

Mrs. CAPPS. Mr. Speaker, I rise this evening to speak about the need for a strong and enforceable patient’s bill of rights for the American people.

I am one of three nurses currently serving in the House of Representatives, and there are other health professionals of all stripes among my colleagues, from doctors to public health specialists and microbiologist, from psychologists and social workers to psychiatrists. Together, in all of our experience and training, we know that access to care and the care we receive in this country is not the best that could be.

Tonight we are going to share with our colleagues our firsthand experiences and make the case for the Ganske-Dingell bill. We have seen firsthand the damage caused by the excesses of the bean counters and the men in green eyeshades when they are too aggressive in containing costs. These bureaucrats have often done real harm to real people when they have taken on the role of medical professionals. Those of us here in Congress with medical backgrounds want to give our constituents the ability to fight back, and we think that the Ganske-Dingell bill is the best way to do this.

This legislation guarantees access to high quality health care, including access to emergency or specialty care, to clinical trials, and direct access to pediatricians and OB-GYNs. It also holds health plans accountable when they interfere in the medical decisions of a trained medical professional. It provides for a strong external review process by medical professionals; and then, after that process, and if that process is exhausted, patients will have access to State courts.

The HMOs have bitterly criticized this proposal on the grounds it will lead to frivolous lawsuits. The Ganske-Dingell bill is based on one in practice in the State of Texas which has allowed patients to sue their HMOs and there have been only a handful of lawsuits of any kind. There is no evidence that this bill will lead to frivolous lawsuits, but it is an essential protection that our patients need because of the deterrent factor that it provides.

Managed care organizations are operating in an environment designed to keep costs low, and we do need to control costs to keep health care affordable, but HMO administrators are under an incredible amount of pressure to cut corners. Often this pressure is excessive and leads to insensitive, inappropriate, and sometimes very damaging actions. Abuses of patients’ rights to quality health care are very common, too common. These needs to be a counterforce on the side of quality care, on the side of the patients, and that counter force has, at the bottom line, the threat of going to the courts.

Access to the courts will help to restore the balance to the scales and will prevent the need for efficiency outweighing the need for quality care. It is what gives the patient’s bill of rights its teeth. Without it, HMOs are free to continue their current practices without fear of the consequences. My constituents do not want to go to court to get the health care that they need, but HMOs do not always want to provide that care. And HMOs do not want to go to court either. The threat of appropriate litigation is how average Americans will keep the HMOs honest. We need to give patients that tool.

Mr. Speaker, if the ceiling in this room were to collapse today because of a contractor doing shoddy work to save money, those of us who were injured would be able to sue that contractor in State court. This provides an important incentive for contractors to do their work well. The same should apply to managed care.

And so I support this legislation, as do many of my colleagues with medical backgrounds. We know our patients. We know the HMOs. We know this issue and its importance. We know the challenges we face and we know how to overcome them. We know this bill is the right thing to do. So we are here this evening, Mr. Speaker, to help our colleagues see this example as well. We have an obligation to our constituents to do our duty and to pass this legislation.

I want to now introduce and invite to the podium a colleague of mine, the gentlewoman from New York (Ms. SLAUGHTER). She is going to present her viewpoint as a microbiologist with a master’s degree in public health. She is particularly respected for her efforts on genetic nondiscrimination and women’s health.

Ms. SLAUGHTER, Mr. Speaker, I thank the gentlewoman from California for taking time this evening and for yielding to me.

In my judgment, one of the most important aspects of the patient’s bill of rights is that it gets the least attention, and it is the potential impact on public health. Now, although most people think of this initiative as one involving individual patients and their access to care, there are major public health implications as well.

In our Nation, public health has become something of a forgotten stepchild of the health care system. In
other industrialized nations, public health goes hand-in-hand with individual health care: Communicable diseases, treated in a standardized fashion, all children receive vaccinations during their regular checkups, and public health professionals can track the incidence of disorders like cancer based on geography.

None of that is true in the United States. In this country, we have created an artificial division between individual health care and public health. Children are supposed to receive immunizations on a certain schedule, but many fail to receive some or all of their shots because they move, switch insurance plans, or lose coverage. Different States track and report different disorders in different ways, and the health of the individual is examined in total isolation from the health of the community.

The patient’s bill of rights has the potential to address some of these problems. For example, the Ganske-Dingell bill contains a solid proposal giving women greater access to the GYN. This provision can help us attack rates of sexually transmitted diseases by allowing women to go directly to the right doctor without having to waste the time, the effort, and the money of passing through a gatekeeper physician. If we can help women get treatment for sexually transmitted diseases quickly and effectively, we can reduce the rates of transmission.

Similarly, the Ganske-Dingell bill has provisions regarding direct access to pediatricians for children. Parents need to be able to get their children to the right doctors as quickly as possible, especially in the cases of communicable diseases, which often can be mistaken for innocuous illnesses in their early stages and spread like wildfire in settings like day care and schools. If we can prevent the transmission of diseases like these and many others when the patients can get timely care under their insurance plan, we benefit the whole community. Sick people create sick communities. When we delay care, we place numerous other individuals at the risk of illness. A patient’s bill of rights would help patients directly to get the care they need.

I would like to note that State, local, and Federal governments have a major financial stake in the patient’s bill of rights as well. When patients cannot receive timely care under their insurance plan, they often seek care in other places, such as clinics and emergency rooms. And in many cases the cost of their care must be absorbed by the facility, the State assistance plans, and Medicaid. The Federal Government spends tens of millions of dollars each year in an effort called disproportionate share hospitals, which treat high numbers of patients lacking coverage. If we could reduce the amount of unreimbursed care in this Nation by even a small fraction, it would make a tremendous difference to many struggling hospitals and facilities, and that in turn would allow those facilities to dedicate more resources to public health goals, like indigent care and outreach.

Finally, as a public health professional, I find it deeply troubling that Congress would allow insurance companies to continue practicing medicine without a license. Insurance company bureaucracies have no business inserting themselves into the doctor-patient relationship. Middle managers should not second-guess M.D.’s. If insurers want to practice medicine, then they must be responsible for the consequences when things go wrong, and that means being held liable for medical malpractice.

I am pleased that our colleagues in the other body are debating a strong, responsible patient’s bill of rights. The House majority leadership bill, H.R. 2215, does not pass muster, and I hope that all of us will pass up this anemic version in favor of a real patient’s bill of rights, H.R. 522, the Ganske-Dingell Patients’ Bill of Rights.

Mrs. CAPPS. Mr. Speaker, I want to thank my colleague, the gentlewoman from New York (Ms. SLAUGHTER), and particularly for her perspective from a public health point of view.

I know many of us, when we saw the managed care plans coming on the horizon as a cost containment method, applauded the program for its preventive care aspects, and some HMOs still do offer these, and they are to be commended. But many, in their cost cutting methods, have curtailed the prevention aspect and the guidance and some of the extra programs that are offered through counseling and health education, advice for families, and the periodic checkups that are part of a good developmental program for children in favor of cost containment. So I think we should go back and accentuate.

We need to point out that this patient’s bill of rights is not an attempt to do away with managed care, but to reform it and to bring it back into the arena of the responsibility of health professionals for the care of their patients and the ability of patients to get the kind of care that will be in their best interest in health care.

I wish now to give time to my colleague, the gentleman from Ohio (Mr. STRICKLAND). He is a psychologist and now is my colleague on the Subcommittee on Health of the Committee on Commerce. He has been a leader for a long time on the patient’s bill of rights and comes to Congress with his perspective, coming right out of his work in psychology in his Congressional District. I am happy to yield to him.

Mr. STRICKLAND. I thank the gentlewoman for yielding to me.

Before coming to this House, I practiced psychology in a maximum security prison, working with mentally ill people, including some of the most seriously mentally ill in American society. I worked in a large psychiatric hospital; and I have worked with emotionally disturbed children. The fact is that we do need a strong patient’s bill of rights. And it is puzzling to me, it is truly puzzling to me that today in America patients can be abused by managed care organizations and have no legal recourse.

I would like to share with my colleagues tonight a story of one of my constituents. Every one of us here in the Congress, whether we are Democrats or Republicans, regardless of what part of the country we are from, have constituents who come to us with their problems, and I would like to talk this evening about a young woman who is 31 years of age. She lives in a small town in Highland County, Ohio. Her name is Patsy Haines.

Patsy’s husband called my office several weeks ago and he asked if we could be helpful. He told us that his wife suffered from chronic leukemia that she had worked for 5 years at this company until she became too ill to work. She was diagnosed with this life-threatening illness. Her doctor told her that she needed a bone marrow transplant. Patsy has a brother who is willing to participate, who is willing to help her, and he is a perfect match for such a transplant surgery.

The problem is that Patsy cannot get her insurance company to agree to pay for this surgery.

I went to the James Cancer Hospital in Columbus, Ohio, possibly one of the premier cancer facilities in this Nation. I spent half a day there, and I talked with the doctor who is over the entire transplant program at the center, and I spent a couple of hours with a young doctor, a very inspiring doctor, who is a specialist when it comes to bone marrow transplant surgery. This young doctor was incredibly sympathetic to Patsy Haines’ condition, and agreed to talk with her and her physician.

After his consultation, he agreed that this young woman needs this surgery. He told me that if she receives this surgery, she has a very good possibility of recovery, of living a long life, of being a mother to her child, a wife to her husband. But the sad fact is that Patsy Haines does not receive this surgery, she very likely will lose her life.

This past Saturday I went to a high school in Hillsboro, Ohio. Community members had brought together items to auction off for Patsy. Patsy was there in a wheelchair because her illness has progressed to the point where her legs are badly swollen and she needs a wheelchair in order to get around. People sat on those high school
bleachers, and they bought items which had been offered for auction. Patsy Haines is an incredibly inspiring young woman.

I do not know if she is watching tonight or if her family or community members are watching tonight, but she inspires me. I said something at that auction that I truly believe, that none of us are islands. None of us in this world stand alone. As Members of Congress, we should have the attitude that each constituent’s joy is joy to us, and each constituent’s grief is our own.

I feel grief for Patsy Haines tonight. It is shameful in the United States of America in the year 2001 that we have car washes and sell cupcakes and auction off small household items to get the resources necessary to help a young woman get the medical attention she needs. I believe American people do not want us to be in this set of circumstances. The American people are with us on this issue. Poll after poll shows that the American people believe if an HMO or an insurance company makes a medical decision and deprives a person of necessary and needed medical treatment, that they ought to be held responsible in a court of law.

As the gentlewoman said, the State of Texas has such a law, the State from whence our President came and where he was governor. During the last Presidential campaign I remember the President talking about the Texas Patients’ Bill of Rights, and he displayed some pride in the fact that Texas had done this.

What we are trying to do in this Congress with the Ganske-Dingell bill and on the Senate side with the McCain-Kennedy-Edwards bill is to do basically what the State of Texas did. The gentlewoman is right, in Texas this law has been in effect for 2 years, and there have been literally half a dozen lawsuits. The reason for that is, I believe, once this law is in place and the insurance company makes a medical decision and deprives a person of necessary and needed medical treatment, they ought to be held responsible in a court of law.

So tonight we are talking about something really important. I hope the American people are watching. I believe the American people of every persuasion, conservative to liberal, Republican, Democrat, Independent, strongly believe that citizens of this country should be protected from this kind of awful, terrible, treatment.

I hope as a result of what we are trying to do here Patsy Haines and her family, and Americans like her, will no longer be subject to this kind of mistreatment. What we are doing in the next few weeks here in Washington is as important as anything that this Congress has done in perhaps decades because we are taking the necessary step to see that American citizens, regular moms and dads and kids, get the kind of care they need.

I will close by saying this. A couple of days ago a colleague of mine held a press conference in Columbus, Ohio, and came out in opposition to the Patients’ Bill of Rights because of the ability to bring suit that is given to the patient in this legislation.

There was a business executive there that had suffered a serious illness and was there to talk about the fact that he had been taken care of by his company. But not all of us are business executives. Some of us are just ordinary citizens like Patsy Haines. Our responsibility here in this Congress is to make sure that ordinary citizens are protected.

I thank the gentlewoman for this special order and giving me the chance to talk about the fact that the American people are watching, and as a result of the fact that they are watching us, I believe we have a very, very good chance of actually getting this legislation passed and signed into law.

Mrs. CAPPS. Mr. Speaker, I thank my colleague from Ohio for sharing such a moving story. It is remarkable in this land of ours we have some of the best possibilities for health care in the world, and some of that is due to funding for research which has been promoted and supported from this House, this very body. We stand behind the great advances in our medical technology and our skills and opportunity. Yet at the same time we have such a gap between our ability to give health care and those who are actually able to get it.

Mr. Speaker, one of the barriers are those without access to any health insurance. They talk about health care delayed and denied and lives lost or destroyed. Two of them told us of having to fight for needed health care while also having to fight at the same time the physically and emotionally devastating disease of cancer. All of their energy and attention was needed at that time and should have been directed to fight the illness and not an insensitive health care system.

We also talk about the plight of those who accepted their denials because they felt powerless to fight the large systems. I would say as a physician who has been involved in public health, I know that prevention is worth a pound of cure, but it does not take an M.D. degree to know that. Our grandparents told us that over and over again.

If we are ever to rein in the high cost of medicine, we can only do it by ensuring that everyone in this country, regardless of income level or ethnicity, has access to good primary care, secondary care and tertiary care when they need it. To do this the bipartisan Patient Protection Action of 2001, the Patients’ Bill of Rights that we are discussing this evening sponsored by the gentlewoman from Iowa (Mr. GANSKE), the gentleman from Michigan (Mr. DINGELL) and the gentleman from Georgia (Mr. NORWOOD) and Senators MCCAIN, KENNEDY and EDWARDS is an important step, long overdue, but better late than never, and a step that we must take now.
Even after the Patients' Bill of Rights becomes law, we will still have to provide health care coverage to the 43 to 45 percent of Americans who do not have health care coverage. We have to close the gap of color and those who live in rural areas. We have to make sure that our young people of color have access to health care careers, and can go back and serve their underserved communities.

A lot of debate is being focused on the liability causes that my colleagues referred to, and I think it is important to make it clear that this is not about lawsuits and large awards, it is about putting the necessary teeth in the legislation to make sure that the HMOs and insurance plans put the patient and his or her medical needs in front of their profits. Money cannot buy back the ability to walk to the paraplegic who lost mobility because of delayed health care, or bring back a loved one because they did not receive the diagnostic treatment that they needed.

The bill that we support does not, nor has it ever held employers who do not participate in making medical decisions to be liable. Employers if they do not intervene in making those decisions have never been held liable by the Patients' Bill of Rights that was introduced even in the last Congress by the gentleman from Iowa (Mr. GANSKE) and the gentleman from Michigan (Mr. DINGELL).

On the other hand if a managed care organization makes a decision about health care, they should be held liable. Providers have been liable for years, and managed care organizations or insurance plans who make decisions about medical care should be liable as well.

There is so much wrong with the managed care system that needs to be corrected, I know we could probably go on for longer than an hour. But we in this body do have the opportunity to put it back on the right track by passing H.R. 526, the Ganske-Dingell-Norwood bill which is also called the Bipartisan Patient Protection Act of 2001. We are here this evening to join you to say, let's do it.

Mrs. CAPPS. I thank the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) for sharing her story. She brought up something that I want to accent, because I think it is such a sadness to see what I call revictimization that so often occurs with people and their bureaucratic paperwork that they need to do. Often facing terrible diagnoses with sometimes horrendous outcomes and strenuous treatment regimes that they must go through and then to have to deal with the insurance company to provide the coverage. It is like doing battle on every front. It must feel to the patient and also to their family like being kicked when you are down, when you have such a battle and such a struggle with your health care itself, and trying to save your life, and to get back on track again with your health and then to be constantly nit-picked or told no, not this, and so many hoops to go through, I really feel like we need to get it back into the priority and to streamline many of the approval processes and to make it so that we are treating people with the dignity really that all of us know as American citizens that we want to have. For this to be so completely, not always, but so frequently gone down a different path, that is a most humiliating experience for someone who has to go through it. That is certainly part of what we want to correct in this Ganske-Dingell patients' bill of rights.

Now it is a pleasure for me to yield time to one of my fellow nurses here in Congress the gentlewoman from New York (Mrs. McCARTHY). She represents one extreme end of the country and I am out there in the other end but we have lived through a situation that makes us truly joined at the heart. We have worked together to make sure that the patients' bill of rights, for example, includes whistleblower protection for nurses and other important pieces. It is no surprise to either the gentlewoman from New York or I that the American Nurses Association and so many of the other nurse groups around the country are strongly in support of this particular patients’ bill of rights.

Mrs. McCARTHY of New York. I thank my colleague from California and my fellow nursing partner and certainly our friends that are physicians. You have heard stories tonight from us. You have heard us tell stories about our constituents. But I think if you hear and have listened to us, why are we so passionate about this? Why are we backing the patients' bill of rights? I am going to tell you a story, also, but this story is very personal. Even before I ever came to Congress, I had spent over 32 years, my life, as a nurse. All of us, we went into health care because we care about taking care of people. And we see our doctors today, they still care about their patients. They are fighting for their patients on a daily basis.

But I want to tell you a personal story on why this bill is personal to me. Going back several years ago, something happened in our family. My son ended up being in the hospital. I have to say when he was in the hospital and he was in the intensive care unit, he got the best care you could possibly ever see. Because he was in the hospital, everything was approved. Then Kevin had to spend a long time in rehab. And his actual rehab was actually going to spend a year in rehab. My son was only 26 years old at that time. He went through the sessions in the morning. I would be there with him 18 hours a day. By lunchtime, I am saying to myself, "Well, he's not tired, let's do rehab again."

Gentleman. I went to the head of the unit and I said, "Let's do the whole session all over again."

"Well, we can't."

I said, "What do you mean you can't?"

"Well, the insurance companies will never pay for a double session."

I kind of sat down and I thought about it for a while and I said, well, I can do a lot of this stuff on my own with him, I had the training for it, I knew what I was doing. But then I went back to the director and I said, Wait a minute. My son is 26 years old. He can do more. And if we actually look at it, if he has double sessions, that means he is going to get his therapy himself, the cardiologist and he is going to be out of here twice as fast. As I said to you, they had told me he would be in rehab for a full year.

Well, we won that battle. I got him the double sessions because the hospital realized even that was only the beginning of our battle. Because every single thing that we had to have done for Kevin as far as rehab and everything else, we had to fight for those services. But here is where the kicker came in as far as I am concerned. Kevin had to have a procedure done. He had to go back in the hospital. Five doctors, five of their doctors, their doctors, said Kevin had to go in the hospital for a surgery. We were turned down. Each doctor went to bat, said, wait a minute, he has to go in the hospital and he has to have this surgery done. And he was turned down, he was turned down, turned down. All the way up to the point where I finally talked to the medical director of the HMO and I said, "Why are you denying him this operation?"

"We do not feel he needs it."

I said, "Who are you to make that decision when five of your doctors, a neurosurgeon, a neurologist, the surgeon, the cardiologist and the vascular man said he had to be in the hospital for this operation?"

I said, "Do you know what my son's medical history is?"

He said, "Well, actually I have it."

By the way, his medical history was a little bit longer than the Manhattan telephone book. He did not understand it. He could not understand it.

Now, we were kind of lucky. The company that Kevin worked for happened to be the company that Kevin was covered under. Well, I found out who the CEO was of that company and I called him up. I said, this is ridiculous. And he agreed with me and he called...
and Kevin was in the hospital in a couple of days.

My point is, why did we have to go through this? Why did I have to spend that time trying to get the care for my son that he needed? If anyone even thinks that Kevin wanted to go back in the hospital or I wanted him back in a hospital, believe me, that is not the place we wanted to be. We would have been happy if we had never seen another hospital the rest of our lives.

Now I am in Congress and on a daily basis we have to fight for my constituents to get the care, number one, that they deserve. They deserve. Because the decisions are made by our doctors. And unfortunately when we talk about the patients’ bill of rights, people out there do not even realize the consequences that are going on in the health care system today because of the rights that doctors do not have anymore. Doctors are not encouraging their children to become doctors and we are seeing all of our patients, no one is going to go with you, if the correct care is given to them. We are not slamming all of them. What we are saying is, though, until you come up with a situation where it might be chronic health care or maybe a life and death situation, or maybe it is a bone marrow transplant which they still consider experimental, but if you fight it long enough, you are going to get it, it is just that they want you to fight for it, and that is wrong. All of us have seen families going through so much. They should not have to worry, can I do this, can I raise the money to have it done. America is better than that. We know America is better than that.

Mrs. CAPPS. I want to thank my colleague from New York for sharing her personal story of how she fought hard, she had to make that tough decision; that she fought hard, she had to make a lot of phone calls. Some folks do not have that facility. Maybe there are language barriers. Maybe there are other barriers or they give up. That is compromised health care. That is health care that goes unmet, health needs that go unmet. Her son happened to work for the HMO, the president or whatever the situation, so that she had a personal connection. How about the thousands and thousands of families that do not have that privilege and have that opportunity? We need to speak for them. We need to have this be legislation that really does address the issues so that situations can be relieved just as a matter of course, not as a matter of privilege.

But I want to bring up and am happy to have the gentlewoman from the Virgin Islands join us as well, but I do not want to leave another topic that the gentlewoman from New York brought up in her testimony as a nurse, and that is, the important measure in this bill, the whistleblower protection. Let me make a couple of statements about it and ask our colleague who is a family physician to respond as well from the hospital perspective.

I am concerned now as many in this House and many across the country are about the shortage of nurses. We have a crisis. We have 126,000 positions going vacant today in our hospitals and health care facilities across this land. We have many things we need to do to address this. But one of the issues that is of real concern to those who work at the front line and in the health care settings is the demoralization that occurs when professional standards have been trained and goes to work in a setting and sees and observes something which is not to that standard and has no recourse. It is the most awful experience to go through and think, this is wrong, and sometimes you are there and you have participated, and for fear of your job, you cannot go to someone in higher authority or to an outside agency and a place without fear of retaliation. So this whistleblower protection which has been included in the Ganske-Dingell patient protection bill is vital. I know from my own personal experience in public health out in the community to have this accountability so that the confidence that you have when you go through training, which is hard enough, and then go out to work, which is also challenging. This kind of work that we are talking about that nurses and doctors and health care professionals provide is not the easiest in the world. It has its tremendous rewards. But when you feel that barricade, that you see something and you cannot report it because your livelihood will be on the line, well, that demands correction. That piece in this bill I believe we stand up for. Maybe either of my colleagues would like to comment.

Mrs. CHRISTENSEN. Let me just say that the nurses from the Virgin Islands are up this week as well and this is something they are very concerned about. I wholeheartedly agree with everything the gentlewoman said about needing to keep that in the patients’ bill of rights, the fact that it is included only in the Ganske-Norwood-Dingell bill. But I wanted to say something about something else that our colleague said. She said that when her son was in rehab, if I heard her correctly, the rehab facility decided that even if they were not going to get reimbursed they would provide the service and soak up the cost.

We find that happening more and more often with either the provider or the facility is saying, well, we know this is necessary. So we are going to take the chance. We are going to provide it to the patient even if we do not get reimbursed. Well, hospitals cannot afford not to be reimbursed and still be able to provide quality service to the patients that come to them, and providers on the other hand, they are also taking the risk and saying well, I know my patient needs this, I am going to go ahead and do it, make the referral or order the diagnostic test but when they come up for review later on they run some risks as well.

We find that more and more providers, whether it is a hospital or a physician or another health provider, they are making those decisions to provide the care and take the risks but it also puts the patient under some stress that again they do not need to know well, am I going to have this paid for. I am really glad we are here tonight supporting the Ganske-Dingell-Norwood bill because this bill provides for
access to specialists. The decision is going to be what is medically nec-
essary, access to emergency room services, just using your layperson's judgment so that people can get care and get it early and that our facilities and our providers can be reimbursed for the services they provide.

Mrs. CAPPs. It is really common sense legislation. Those of us who have been doing health care work. I have spent 2 decades in my school community in the public schools of my community on the front lines every day with families that were seeking medical care and doing battle with their HMOs. This is not to do away with them. We are not trying to give insurance a bad name. We need it.

There are good plans but when excess occurs and when people step over the line, companies do and providers do, then they have to be held accountable because the bottom line is a matter of our common sense and what is right for families, for individuals, for this country really in terms of access to health care and good quality health care. I appreciate the comments of the gentlewoman on that.

I want to also make sure that we include in this discussion another very important piece of the Patients' Bill of Rights which includes the opportunity to have clinical trials be continued and be about your insurance.

I have some personal experience myself, so many families do, with members of family who are confronted with the most awful diagnosis, one of the most awful of all, which is the word cancer, and to know that many of the treatments that work for cancer are so recent in their discovery that they have not yet been fully implemented or approved under the Food and Drug Administration and, therefore, they are still undergoing clinical trial and what if your doctor tells you that without treatment and without this particular kind of treatment, as our colleagues stated earlier in this hour, that there is no chance really for life to even continue, you might have a few months at best but you could try this clinical trial, you could embark on that course. I know personally, with my own family, that you do not hesitate for a minute; give me that chance; give me that right to hang onto, particularly if it is one that has gone through several phases but it is still not approved yet and yet it has offered hope to others and treatment and good results to others; oh, you cling to that with your life, to get that treatment for your loved one, and in yet that very dark hour in your life, so many of insurance companies give you this ultimatum: You go down that path and you seek that medical treatment and you lose your insurance; you are losing all of your insurance.

That is like a death sentence. That is an amazing position to be put into as a person, or with your loved one sitting there beside you having to make those terrible choices that should not be forced on our patients to make this kind of choice. So that is why this Ganske-Dingell bill will require that insurance companies continue their basic coverage of patients when they elect to participate in clinical trials.

Now that makes sense. That is a good thing to do. That is what we should be doing for those with the awful diagnoses that many are facing. We want to make sure that new and different treatments are available to all patients without having them lose their ability to have coverage for regular treatments. This is a good measure within this Ganske-Dingell bill. So I offer it as one of the reasons I am supporting it because the gentlewoman with me tonight would like to comment on that or any of the other topics that we have left out.

Mrs. McCARTHY of New York. One of the things we will like comment on and support the words that the gentlewoman has just said, again we as health care providers know a lot of times that when our patients are certainly looking for something to hang onto, and God knows we have seen our patients fight for every breath that they take and they want to try something to continue to be with their loved ones, but it is the loved ones that unfortunately are faced with this fighting most of the time; a lot of the patients do not. We have become their advocates. We are still taking our oath very seriously; the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) as a doctor, myself and the gentlewoman from California (Mrs. CAPPS) as nurses. We are there to protect our patients, as I said earlier, and we will continue to do that.

I think again what I am seeing, which really starts to scare me because there are families that really have good insurance and those that have minimum insurance, those that have really good insurance and those that have minimum insurance, will get the health care that they need; those that do not they are not going to get the health care. I spent, like I said, 32 years in nursing. We did not know who was wealthy. We did not know who was poor. Everybody got the same kind of treatment in the hospital.

Mrs. CHRISTENSEN. Absolutely.

Mrs. McCARTHY of New York. The majority of hospitals in this Nation do not make money. They are always in the red because every penny they get goes back into the infrastructure of the hospital.

Mrs. McCARTHY of New York. The majority of hospitals in this Nation do not make money. They are always in the red because every penny they get goes back into the infrastructure of the hospital.

Now, I think the three of us, once we get this Patients' Bill of Rights through, we could come back and talk about all the otherills that we are seeing in the health care system, things that all of us are working on for future bills, because we have to start addressing them and we have to face them. We cannot hide our heads in the sand anymore.

Five years ago, when the gentlewoman came in, we started talking about the whole collapse of our health care system; 5 years ago. Here we are now finally having a bill out there that can make a difference, but we have a long way to go. We have to bring the health care system back to the way it was. Certainly our hospitals have learned to cut down on costs. Certainly we have to make sure there is not fraud and abuse. We will do that, but we still can deliver a good health care system to our patients. The Patients' Bill of Rights will do that.

This is the only true bill because it has the protections in there for our health care workers, our nurses, our doctors. It is certainly going to make our nurses stand up and take their responsibility and if they do their job right they will be fine. It is a shame, it is a shame that we have had to come this far to do legislation in this great House that we work in but sometimes that is why we are here, to make them, whether it is the HMOs, whether it is the auto manufacturers, or different corporations, to do the right thing.

The Patients' Bill of Rights does the right thing for the American people.

Mrs. CHRISTENSEN. As I said earlier, too, this is something that the people of America have clearly said they want. All of the provisions that are included in the Ganske-Dingell–Norwood bill are direct responses to what the people of this country have said. They want to see in their health care system to our patients. The Patients' Bill of Rights will do that.

This is the only true bill because it has the protections in there for our health care workers, our nurses, our doctors. It is certainly going to make our nurses stand up and take their responsibility and if they do their job right they will be fine. It is a shame, it is a shame that we have had to come this far to do legislation in this great House that we work in but sometimes that is why we are here, to make them, whether it is the HMOs, whether it is the auto manufacturers, or different corporations, to do the right thing.

The Patients' Bill of Rights does the right thing for the American people.

Mrs. McCARTHY of New York. One of the things we will like comment on and support the words that the gentlewoman has just said, again we as health care providers know a lot of times that when our patients are certainly looking for something to hang onto, and God knows we have seen our patients fight for every breath that they take and they want to try something to continue to be with their loved ones, but it is the loved ones that unfortunately are faced with this fighting most of the time: a lot of the patients do not. We have become their advocates. We are still taking our oath very seriously; the gentlewoman from the Virgin Islands as a doctor, myself and the gentlewoman from California as nurses. Mrs. CHRISTENSEN. Absolutely.

Mrs. McCARTHY of New York. The majority of hospitals in this Nation do not make money. They are always in the red because every penny they get goes back into the infrastructure of the hospital.

Mrs. McCARTHY of New York. The majority of hospitals in this Nation do not make money. They are always in the red because every penny they get goes back into the infrastructure of the hospital.

Now, I think the three of us, once we get this Patients' Bill of Rights through, we could come back and talk about all the otherills that we are seeing in the health care system, things that all of us are working on for future bills, because we have to start addressing them and we have to face them. We cannot hide our heads in the sand anymore.

Five years ago, when the gentlewoman came in, we started talking about the whole collapse of our health care system; 5 years ago. Here we are now finally having a bill out there that can make a difference, but we have a long way to go. We have to bring the health care system back to the way it was. Certainly our hospitals have learned to cut down on costs. Certainly we have to make sure there is not fraud and abuse. We will do that, but we still can deliver a good health care system to our patients. The Patients' Bill of Rights will do that.

This is the only true bill because it has the protections in there for our health care workers, our nurses, our doctors. It is certainly going to make our nurses stand up and take their responsibility and if they do their job right they will be fine. It is a shame, it is a shame that we have had to come this far to do legislation in this great House that we work in but sometimes that is why we are here, to make them, whether it is the HMOs, whether it is the auto manufacturers, or different corporations, to do the right thing.

The Patients' Bill of Rights does the right thing for the American people.

Mrs. McCARTHY of New York. One of the things we will like comment on and support the words that the gentlewoman has just said, again we as health care providers know a lot of times that when our patients are certainly looking for something to hang onto, and God knows we have seen our patients fight for every breath that they take and they want to try something to continue to be with their loved ones, but it is the loved ones that unfortunately are faced with this fighting most of the time: a lot of the patients do not. We have become their advocates. We are still taking our oath very seriously; the gentlewoman from the Virgin Islands as a doctor, myself and the gentlewoman from California as nurses. We are there to protect our patients, as I said earlier, and we will continue to do that.

I think again what I am seeing, which really starts to scare me because there are families that really have good insurance and those that have minimum insurance, those that have really good insurance and those that have minimum insurance, will get the health care that they need; those that do not they are not going to get the health care. I spent, like I said, 32 years in nursing. We did not know who was wealthy. We did not know who was poor. Everybody got the same kind of treatment in the hospital.

Mrs. CHRISTENSEN. Absolutely.
that that quality health care is equally accessible to all of our citizens and reside in this nation.

Mrs. CAPPS. I want to make sure, just as we drew this to a close, I have a pledge I want to make with my two colleagues, but I want to make sure that we leave on the record the answers to a couple of myths that are out there. One of the parts of the employer that there is this fear that if we do this Patients' Bill of Rights that the employer who provides the insurance will be liable, that the lawsuit will include them. We have been assured that they are in the business of providing insurance plans for their employees, who are also occasionally patients. If then their employees choose that plan and they give them only that range of plans to choose from that, then clearly, they are making decisions when the insurance company itself makes decisions which are not in the patient's best interest.

The insurance company is the one who must be held accountable, not the employer in that case.

The other myth that is out there is, and I have heard it on the floor, I have heard it among some of our colleagues who say it is just going to drive up the cost of health care insurance, and there are so many particularly small businesses who are struggling now to provide it, they want to provide it but that is another topic that we are going to address another time about making health care available in a variety of ways, not just putting it on the backs of mostly small business providers.

The cost of the premiums in Texas, in the plan that this Patients’ Bill of Rights, this Dingell-Ganske plan is based on, that the premiums went up, I think they characterized it as a Big Mac, actually just a very small amount of an increase in a premium that most constituents, most employees would be happy to make if they knew they had the benefits that we have been outlining as part of this Ganske-Dingell Patient Protection Act.

So we want to make sure that it is clear that we do in this country hold people accountable when they make mistakes. Doctors, health care providers, all of us had insurance policies when the insurance company itself makes decisions which are not in the patient’s best interest.

Mrs. CAPPS. I, so appreciate my colleagues being here. I think we are almost out of time, but I will yield further to the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) for some comments.

Mrs. CHRISTENSEN. I am glad that the gentlewoman made the clarification about the employer not being liable, the fact that the premiums and lawsuits do not rise, because we have that experience. It is also important to point out that this is a real bipartisan bill. There has been a lot of work and a lot of compromise to bring this bill forward that addresses issues and has addressed some of the concerns of people on both sides of the aisle. This is a bipartisan effort to address something that has been of great concern to the American people.

Mrs. CAPPS. Mr. Speaker, we will now close and remind our colleagues that we did pass this very bill before in this House. So let us just do the right thing and pass it again. This is my pledge that I want to make to my dear colleagues who have walked us here this evening, the gentlewoman from New York (Mrs. McCARTHY), and the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN), let us pass the Patients’ Bill of Rights and then let us gather on the floor to discuss some other needs in health care, such as the nurse and professional shortage, as such those without any access to health care because we still have a long way to go. We are willing and we are prepared, we are going to be here until we can address each of these issues. So I will join my colleagues again on the floor at a further time.

Mr. TANCREDO. Mr. Speaker, tonight, I want to talk about a couple of subjects.

First of all, I cannot help but reflect upon some of the prior speakers and what they have talked about, especially in terms of our energy crisis. I will only spend a couple of minutes on that, because I addressed it a couple of times in the past also.

It is undeniably true we have an energy crisis in the United States. It is undeniably true that gas prices are rising, that blackouts, rolling brownouts, all kinds of things are occurring throughout the United States, but especially in California and on the West Coast.

We spend a great deal of time in this body debating as to exactly why that has occurred, and, in fact, there are a number of reasons, of course. They deal mostly with supply problems. We just do not have enough energy. We do not produce enough.
Mr. TANCREDO. "The First Amendment restricts government’s abridgement of free speech.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will remind Members that the rules of the House prohibit characterization of Members of the Senate even though not their own remarks.

Mr. TANCREDO. "The First Amendment restricts government’s abridgement of free speech. But government hasn’t threatened to muzzle Manson. He will not be barred from performing by any government officials.

CONGRESSIONAL RECORD—HOUSE

June 27, 2001
The opposition to his performance here has come from private groups led by Baptist youth minister Jason Janz, and others, according to the Rocky Mountain News. I have no remedy for this. It's one of the peculiarities of the City of Denver had agreed to something like that, had put tax dollars into it. I wonder whether or not the mayor would not be in political trouble the next election.

Would not people in the City say, how could you possibly make me pay for something like this? I think it is horrible. Or even, I do not have an opinion on it, I just have absolutely no desire to fund this particular expression of this particular "artist".

"It's not a question of whether Manson should be condemned or allowed to perform. Of course, both of these things should happen. Manson debases our values, culture and civil conventions. Jason Janz's criticism of him is wholly appropriate. Someone needs to say that, otherwise, I worry that would be more disturbing. To most who attend, Ozfest will be little more than a fun summer concert featuring a variety of performers. The Manson acolytes there will be in the minority. And while they snigger at the establishment's attack on their idol, it still serves a purpose. They may understand when they grow up.

Again, that is Mike Rosen in the Rocky Mountain News.

Now, this leads to another issue and even a much more relevant than this particular event in Denver Colorado in last week. This leads us to a debate we were having on the floor of the House here last week. It was a debate on whether or not we should be funding the National Endowment for the Arts and Humanities.

It was fascinating from a number of standpoints. We have done this every year. The debate occurs every single year. Much of the same thing is heard over and over again as to whether or not government funds should be used to support "art".

Now, what if this had happened in Colorado, everything that I just described, and they had been paid for entirely with tax dollars? Would there not have been a different kind of debate? Would we not have been able to enter into the discussion an argument that, although, certainly, someone, Manson, should be allowed to perform, no one, certainly I would never prohibit him from doing his thing by law. But the question remains is whether or not someone should be forced to pay for it through the taking away of their tax dollars, providing it for this experience.

Certainly there would have been an outcry. Certainly people would have said absolutely not. You know, I do not care whether this person does its thing on the stage and spews forth its blige, I do not care about that. If people want to do it, want to see it, that is their business, and I certainly agree. But making me pay for it through my tax dollars, that is quite another matter.

Now, that would have been an interesting debate, and I wonder how it would have come out. I wonder if the City of Denver, I wonder if the mayor of the City of Denver had agreed to something like that, had put tax dollars into it, I wonder whether or not the mayor would not be in political trouble the next election.

Would not people in the City say, how could you possibly make me pay for something like this? I think it is horrible. Or even, I do not have an opinion on it, I just have absolutely no desire to fund this particular expression of this particular "artist".

Well, I think that that would be a legitimate argument. Do my colleagues not, Mr. Speaker? I think that, in fact, that would be a legitimate debate had we paid for that with tax dollars. I think there would have been significant political ramifications and repercussions to be made by the political leaders in Denver.

But it did not happen that way. It was totally voluntary. People went, paid their price at the door, and went in; and I say, of course, that is fine. They can do what they want to do. If you as a citizen would do it, I would tell you no. It does not matter. I would never stop anyone from either going to see this person or, on the other hand, I would never try to stop this person from actually getting on stage and doing whatever it is it does.

So the question, then, comes as to how we can, every single year, take money from Americans, hard-working Americans, many of whom have to make decisions about, you know, if they are going to pay the rent this month or if they are going to pay their gas bill.

How can we take money from them to support the, quote, artistic endeavors of others of a similar, well no matter, no matter not just anti-Christian, but absolutely no argument as to the value, quote, value of the art. It is still absolutely wrong for any of us here to make that sort of elitist decision for all members of society, that we would take away their monies and give it to a particular kind of art or a particular kind of artist. How can we justify that?

I guess, to a certain extent, I am going to have to actually talk about what we have been funding over these years. I almost hate to say it, but I wish we could put up here one of these signs that say "be careful, the following may not be suitable for viewing by young people" or whatever, because it is certainly some of the nastiest sort of thing. I will try to avoid being too incredibly graphic, but I guess it is pretty hard to suggest that this is not inappropriate for us to discuss here since we paid for it, since we took money from Americans, from hard-working citizens and paid for this stuff that I am going to tell my constituents and give it out.

Let us start with 1998, the National Endowment for the Arts was criticized for funding this New York theater which staged the play "Corpus Christi", a blasphemous play depicting Jesus having sexual relations with his apostles.

By the way, a great deal of what has happened here, a great deal of what the NEA chooses support has a decidedly homo-erotic, anti-Christian, and certainly not just anti-Christian, but a hatred of Christianity, and the most bizarre kind of sexual connotation, not just connotation, but aspects that you can imagine. That really a lot of this stuff that they choose to do. Okay.

One would have thought that the NEA might refrain from funding the Manhattan Theater Club ever again given the theater's decision to present "Corpus Christi." Not so. The very next year, the theater was awarded another grant of $37,000. This year, the theater was awarded another grant of $50,000. Let us start with 1998, the National Endowment for the Arts was criticized for funding this New York theater which staged the play "Corpus Christi", a blasphemous play depicting Jesus having sexual relations with his apostles.

One would have thought that the NEA might refrain from funding the Manhattan Theater Club ever again given the theater's decision to present "Corpus Christi." Not so. The very next year, the theater was awarded another grant of $37,000. This year, the theater was awarded another grant of $50,000. Let us start with 1998, the National Endowment for the Arts was criticized for funding this New York theater which staged the play "Corpus Christi", a blasphemous play depicting Jesus having sexual relations with his apostles.
the Women Make Movies, that is what it is called, by the gentleman from Michigan (Mr. HOEKSTRA), chairman of the Committee on Education and the Workforce Subcommittee on Oversight and Investigations.

At the time, the gentleman from Michigan (Mr. HOEKSTRA) noted that the NEA gave more than $300,000 over a 3-year period to Women Make Movies, that is the name of this organization, which distributed numerous pornographic films such as "Sex Fish", "Watermelon Woman", and "Blood Sisters". These films included depictions of explicit lesbian pornography, oral sex, and sadomasochism.

In 1997, the American Family Association distributed to most Members of Congress clips of some of these and other pornographic films distributed by Women Make Movies.

Criticism of the NEA for funding a group that distributes pornographic works was dismissed by the agency which funded Women Make Movies as late as 1999, giving two grants, one for $12,000, one for $30,000. The Women Make Movies continues to distribute hardcore pornography.

Then there is the Wooly Mammoth Theater Company, a Washington, D.C. theater, a frequent recipient of NEA money, generated controversy in the past for NEA when it staged Tim Miller's one-man performance titled "My Queer Body". This play describes what it is like to have sex with another man, climbs into the lap of a spectator. I do not even want to read this.

Shrugging off the controversy this year, the NEA gave the theater $28,000. Wooly Mammoth's 2000 season, this was last year actually, will include the production "Preaching to the Perverted", written and performed by Holly Hughes, who herself has been the cause of controversy.

Hughes sued the U.S. Government for refusing to fund her indecent work and lost. The Supreme Court ruling was that NEA was not obliged to fund pornography. Despite this Court's ruling, the NEA is still choosing to pay for Holly Hughes' offensive work through its support of Wooly Mammoth. In the Wooly Mammoth's Internet catalog, "Preaching to the Perverted" is described as follows: "If you loved the solo extravagances of Tim Miller", the follow I just mentioned, "you won't want to miss this unique and irreverent evening of legal and sexual politics."

Then there is the Whitney Museum of American Art. It has been a regular recipient of NEA funds for over the years and several times provided fodder for the critics. This in recent years included a work by Joel-Peter Witkin titled "Maquette for Crucifix", a naked Jesus surrounded by sadomasochistic obsessed and many grotesque portrayals of corpses and body parts.

Another Whitney exhibit was a film by Suzie Silver titled "A Spy". It depicts Jesus Christ as woman standing naked with breasts exposed.

Another time it even gone through, it is certainly hard to describe. But we paid for it. We appropriated money in this House. We took money from citizens in this country and paid for this. So it is only right that we should be forced to have to hear that we paid for as grotesque as it is. It is hard for me to read it. I am sure it is hard for many people to hear it. I do not like having to do it. But, in fact, you paid for it. America. You might as well understand what you bought.

Incredibly, Whitney also included "Piss Christ", Andres Serrano's photograph of a crucifix in a jar of urine, the very same work which began the NEA controversy in 1989, as well as a film by porn star Annie Sprinkle entitled "The Sluts and Goddesses Video Workshop or How to be a Sex Goddess in 101 Easy Steps", and on and on and on.

Walker Art Center, a performance at this Minneapolis theater and NEA recipient outright out of existence this year, a Democrat from West Virginia, and many other Members of Congress.

To make a statement about AIDS, artist Ron Athey, who was HIV positive pierced his body with needles, cut designs into the back of another man, bloated the man's blood with paper towels and set the towels over the audience on a clothes line. Then NEA chair Jane Alexander defended the performance, and the Walker Arts Center has continued to receive NEA funds for several years. This year's take, this was a couple years ago, this year's take for the avant-garde center is $70,000.

The NEA was criticized in 1997 for funding the Museum of Contemporary Art in New York because of the work of Carolee Schneeman, an artist credited with inspiring Miss Sprinkle whose pornographic funding have caused a lot of problems for the NEA also. I hesitate to even go into what that one was about.

Franklin Furnace, New York. This New York theater frequently receives NEA funds. The theater's performance often promotes homosexuality and blast traditional morality. Its year 2000 grant, $19,000.

The Theater for New York City, the Catholic League for Religious and Civil Rights brought this New York's theater to national attention recently because of its anti-Catholic bigotry. The theater staged the play "The Pope and the Witch", depicting the Pope called John Paul II, as a heroin-addicted paranoid advocating birth control and the legalization of drugs. The theater received a grant in 1997. The Americans paid for this, $30,000 in 1997 and $12,000 in the year 2000.

Really, I have just pages and pages of this kind of thing. I will enter them into the RECORD, but I will not go on with that in description here audibly tonight. It is just too revolting even for me to deal with.

But my point is this, that all of this is considered to be absolute garbage. That is my opinion. I cannot imagine anyone wanting to see it. I cannot certainly imagine wanting to participate in it. I certainly cannot believe that anyone would have the audacity to suggest that we have to take money from people who have the same feeling as I do about this and give it to these performers in order for there to be a good art thriving in America.

Robin Hood theory here. In fact, most of the programming on these stations, even that of the "arts" of the NEA has absolutely no appeal to the bulk of America, the majority of Americans, certainly Americans of low income. They are not really interested by and large in that kind of entertainment. Again, if they are, that is fine. They can make their own decisions about it, but it is incredible to me that we can do this; that we can take money from them and provide support for materials and for programming that is only really enjoyed, I say only, but primarily enjoyed by a different group of people, and most of the time people more well off.

There is also the issue of the corruption of the artists and scholars that we fund. It is I think absolutely true, no one welcomes of the "arts"; it has a corrupting influence on it. Artists and want-to-be artists begin to gravitate toward what they think the government is going to fund and find themselves sort of chasing the government dollar.

The influence of government funding of the arts is a negative one and a corrupting one. The politicization of whatever the Federal cultural agencies touch was driven home by Richard Goldstein, a supporter of the National Endowment for the Humanities himself. He pointed out that "the NEH can single-handedly direct the tenor of textbooks and the content of curriculum. Though no chairman of the NEH can single-handedly direct the course of American education, he can nurture the nascent trends and take advantage of informal opportunities to shape the kind of claims he makes that "the NEH can ‘persuade’ with the cudgel of Federal funding out of sight but hardly out of mind.''

Then, finally, every time we debate this issue we are confronted by people who will say that we must do this, we must in fact provide money for the arts community, the National Endowment for the Arts and Humanities, because of the effect that the arts have on our spirit, the soul, the uplifting nature of the arts; that to provide public funding for this is a good because of the way it in fact changes the culture, and they would suggest, for the positive. Well, what if, Mr. Speaker, I came before the

108th Congress 1st Session

Mr. GREGG. The reason I am rising is to register my disagreement with the amendment that my distinguished friend Mr. Kasich has offered. I rise in support of the amendment that the chairman of the Rules Committee has offered.

We have an opportunity here. We are taking from the poor to support a particular brand of programming. It is the particular brand of programming that people stay on the air. Again, it is certainly not because I lousy from my point of view. But that does not matter. It is just my opinion. And it is quite true. We never give out a dollar here in this body without also saying how it should be spent. Those are the strings we attach to it. And when we do that for the "arts," it is a corrupting influence on it. Artists and want-to-be artists begin to gravitate toward what they think the government is going to fund and find themselves sort of chasing the government dollar.

The influence of government funding of the arts was 'persuade' with the cudgel of Federal funding out of sight but hardly out of mind.'
Mr. Speaker, I suggest that there is another argument I could make using exactly the same logic. What if I were to come before the body and say, I know something that we should be doing that does all of the things I have just said, is an incredible influence on our lives, that provides an outlet for emotional needs of millions of people, and it is called religion and I am going to ask this body to appropriate $150 million this year for religion.

Now, the first thing that someone would say is we cannot do this because there is this wall of separation that exists in the minds of many, but nowhere in the Constitution, by the way, that separates church and State. But the real reason why we cannot do it and the reason I would never suggest it because the minute we decide to fund religion in this body, we will then begin to decide whose religion, what brand of religion. What about this particular denomination? Why should they not be funded as opposed to that denomination?

Someone somewhere would have to make a decision. So we would establish an Endowment for Religion, and we would appoint some people to it. We would say we will give them the money because Congress does not want to get into the battle about which religion to fund. We will give $150 million to the National Endowment for Religion, and they will make the decision because they are the experts. They know what is best. If they give it all to the Baptists, that is fine. If they split it up with the Jews, the Catholics, the Presbyterians, whatever, it is their decision to make. It is their $150 million. They will make the decision. How many Members in this body would agree with such a thing? No one. I suggest that we would not get very many votes for such a proposal. And rightly so.

It is not our place because the minute that we start doing that, we are automatically discriminating if we pick one over another, which must be done. There is absolutely no difference, Mr. Speaker, none whatsoever, in the funding of the arts and the funding of religion. Each one of those things has its particular brand. It appeals to certain individuals, but other individuals. Somebody has to make a decision about which one of these things gets funded, and then we will come to the House and hold up a list of things that has been funded by that organization and some people will be outraged by it, as I imagine there were some tonight as I was reading through the list of things that we have funded that the government has paid for. Some people will listen and say that is great stuff. I wish a billion dollars was put into it.

What happens is there is discrimination in this thing through the list of things that we have funded that the government has paid for. Some people will listen and say that is great stuff. I wish a billion dollars was put into it.

Now, the first thing that someone would say is we cannot do this because there is this wall of separation that exists in the minds of many, but nowhere in the Constitution, by the way, that separates church and State. But the real reason why we cannot do it and the reason I would never suggest it because the minute we decide to fund religion in this body, we will then begin to decide whose religion, what brand of religion. What about this particular denomination? Why should they not be funded as opposed to that denomination?

Mr. LANGEVIN, for 5 minutes, today.
Mr. SANDERS, for 5 minutes, today.
Mr. UNDERWOOD, for 5 minutes, today.
Mr. JEFFERSON, for 5 minutes, today.
Mrs. CHRISTENSEN, for 5 minutes, today.

The motion was agreed to; accordingly (at 10 o'clock and 10 minutes p.m.), under its previous order, the House adjourned until tomorrow, Thursday, June 28, 2001, at 9 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker’s table and referred as follows:

2698. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency’s final rule—Bifenazate; Pesticide Tolerances for Emergency Exemptions (OPPE-301143; FRL-67688-5) (RIN: 20760-A876) received June 26, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2699. AMENDMENT NO. 24: In title I, under the heading “AGRICULTURAL RESEARCH SERVICE—SALARIES AND EXPENSES”, insert at the end the following:

**Sec. 1. REPORT REGARDING GENETICALLY Engineered Foods.**

(a) In General.—Not later than one year after funds are made available to carry out this section, the Secretary of Agriculture, acting through the National Academy of Sciences, shall complete and transmit to Congress a report that includes recommendations for the following:

1. **Data and Tests.** The type of data and tests that are needed to sufficiently assess and evaluate human health risks from the consumption of genetically engineered foods.

2. **Monitoring Systems.** The type of Federal regulatory structure to approve genetically engineered foods that are safe for human consumption.

(b) Authorization of Appropriations.—There is authorized to be appropriated to the Secretary of Agriculture $500,000 to carry out this section.

H.R. 2330

OFFERED BY: MR. WINKER

AMENDMENT NO. 25: Insert before the short title the following new section:

**Sec. 1.** None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel of the Department of Agriculture to make any payment to producers of wool or producers of mohair for the 2000 or 2001 marketing years under section 814 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (as enacted by Public Law 106-387; 114 Stat. 1548A–55).

H.R. 2330
Mr. PAUL. Mr. Speaker, I am pleased to take this opportunity to draw my colleagues’ attention to the attached article “Postal Service Has Its Eye On You” by John Berlau of Insight magazine, which outlines the latest example of government spying on innocent citizens. Mr. Berlau deals with the Post Office’s “Under the Eagle’s Eye” program which the Post Office implemented to fulfill the requirements of the Nixon-era Bank Secrecy Act. Under this program, postal employees must report purchases of money orders of over $3,000 to federal law enforcement officials. The program also requires postal clerks to report any “suspicious behavior” by someone purchasing a money order. Mr. Speaker, the guidelines for reporting “suspicious behavior” are so broad that anyone whose actions appear to a postal employee to be the slightest bit out of the ordinary could become the subject of a “suspicious activity report,” and a federal investigation. As postal officials admitted to Mr. Berlau, the Post Office is training its employees to assume those purchasing large money orders are criminals. In fact, the training manual for this program explicitly states that “it is better to report many legitimate transactions that seem suspicious than to let one illegal one slip through.” This policy turns the presumption of innocence, which has been recognized as one of the bulwarks of liberty since medieval times, on its head. Allowing any federal employee to assume the possibility of a crime based on nothing more than a subjective judgment of “suspicious behavior” represents a serious erosion of our constitutional rights to liberty, privacy, and due process.

I am sure I do not need to remind my colleagues of the public’s fierce opposition to the “Know Your Customer” proposal, or the continuing public outrage over the Post Office’s proposal to increase monitoring of Americans who choose to receive their mail at a Commercial Mail Receiving Agency (CMRA). I have little doubt that Americans will react with the same anger when they discover that the Post Office is filing reports on them simply because they appeared “suspicious” to a postal clerk. This is why I will soon be introducing legislation to curb the Post Office’s regulatory authority over individual Americans and small business (including those who compete with the Post Office) as well as legislation to repeal the statutory authority to implement these “Know Your Customer” type policies. I urge my colleagues to read Mr. Berlau’s article and join me in protecting the privacy and liberty of Americans by ensuring law-abiding Americans may live their lives free from the prying “Eagle Eye” of the Federal Government.

Since 1997, the U.S. Postal Service has been conducting a customer-surveillance program, “Under the Eagle’s Eye,” and reporting innocent activity to federal law enforcement. Remember “Know Your Customer”? Two years ago the federal government tried to require banks to profile every customer’s “normal and expected transactions” and report the slightest deviation to the feds as a “suspicious activity.” The Federal Deposit Insurance Corp. withdrew the requirement in March 1999 after receiving 300,000 opposing comments and massive bipartisan opposition.

But while your bank teller may not have been spying and watching on every financial move, your local post office has been (and is) watching you closely. Insight has learned. That is, if you have bought money orders, transferred money using wire transfers or bought cash cards from a postal clerk. Since 1997, in fact, the window clerk may very well have reported you to the government as a “suspicious” customer. It doesn’t matter that you are not a drug dealer, terrorist or other type of criminal or that the transaction itself was perfectly legal. The guiding principle of the new postal program to combat money laundering, according to a U.S. Postal Service training video obtained by Insight, is: “It’s better to report 10 legal transactions than to let one illegal ID transaction get by.” Many privacy advocates see similarities in the post office’s customer-surveillance program, called “Under the Eagle’s Eye,” to the “Know Your Customer” rules. In fact, in a postal-service training manual also obtained by Insight, postal clerks are admonished to “know your customers.”

Both the manual and the training video give a broad definition of suspicious activity in instructing clerks when to fill out a “suspicious activity report” after a customer has made a purchase. “The rule of thumb is if it seems suspicious,” the video’s guide for instructing clerks is suspicious,” says the manual. “As we said before, and will say again, it is better to report many legitimate transactions that seem suspicious than to let one illegal one slip through.” It is statements such as these that raise the ire of leading privacy advocates on both sides of the aisle.

The same sort of response came from another prominent critic of “Know Your Customer,” this time on the left, who was appalled by details of the anti-money laundering video. “The postal service is training its employees to invade their customers’ privacy,” Greg Nojeim, associate director of the American Civil Liberties Union Washington National Office, tells Insight. “This training will result in the reporting to the government of tens of thousands of innocent transactions that cast a shadow over the legitimate business. I had thought the postal-service’s eagle stood for freedom. Now I know it stands for. We’re watching you!”

But postal officials who run “Under the Eagle’s Eye” say that flagging customers who do not follow “normal” patterns is essential if law enforcement is to catch criminals laundering money from illegal transactions. “The postal service has a responsibility to know what their legitimate customers are doing with their instruments.” Al Gillum, a former postal inspector who now is a consulting manager, tells Insight. “If people are buying instruments outside of a norm that the entity itself has to establish, that’s where you-start with suspicious activity.”

The anti-money-laundering program started in 1997 already has helped catch some criminals. “We’ve received acknowledgment from our chief postal inspector that information from our system was very helpful in the actual catching of some potential bad guys,” Gibson says.

Gillum and Gibson are proud that the postal-service’s Bank Secrecy Act compliance officer, says the anti-money-laundering program started in 1997 already has helped catch some criminals. “We’ve received acknowledgment from our chief postal inspector that information from our system was very helpful in the actual catching of some potential bad guys,” Gibson says.

Post Office is filing reports on them simply because they appeared “suspicious” to a postal clerk. This is why I will soon be introducing legislation to curb the Post Office’s regulatory authority over individual Americans and small business (including those who compete with the Post Office) as well as legislation to repeal the statutory authority to implement these “Know Your Customer” type policies. I urge my colleagues to read Mr. Berlau’s article and join me in protecting the privacy and liberty of Americans by ensuring law-abiding Americans may live their lives free from the prying “Eagle Eye” of the Federal Government.
It also was the Bank Secrecy Act that opened the door for the "Know Your Consumer" rules on banks, to which congressional leaders objected as a threat to privacy. Lawrence Lindsey, now head of the Bush administration's National Economic Council, recently pointed out that more than 100,000 reports are collected on innocent bank customers for every one conviction of money laundering. "That ratio of 99,999-to-1 is something we normally would not tolerate as a reasonable balance between privacy and the collection of guilty ver- dictiva."

"The postal service tells its employees to write checks on it, so why does he want to buy so many money orders? Our customers don't seem to be asking for it. Why would a baseball standing citizen in the community, but deacon in the church, could be the most up-and-coming leader in the church?'' Gillum asks. ''Why would a person who switches from a transaction that requires an 8105-A form to one that doesn't seem to be asking for it?" Gillum tells Insight. "The presumption seems to be that from the standpoint of the postal office and the Bank Secrecy regulators every cit- izen is a suspect.''

Both Singleton and Nojeim say "Under the Eagle's Eye" unfairly targets the poor, mi- norities and immigrants—people outside of the traditional banking system. "A large proportion of the reports will be immigrants sending money back home," Nojeim says. Singleton adds, "It lends itself to discrimi- nation and harassment and also, I think, it lends itself to also open a large number of reasons to believe that there is something going on there beyond just a legitimate pur- chase of money orders." But Gillum would not discuss any of the "parameters" the postal service uses to test for suspicious activity, saying that’s a secret held among U.S. law-enforcement agencies. And if a clerk’s report isn’t sent to the Treasury Department’s Financial Crimes Enforcement Network (FinCEN) to be shared with law enforcement agencies worldwide. Although he says FinCEN wants the postal service to send all reports along with the postal authorities only will send the clerks’ reports if they fit into suspicious-activity reports as the postal service."

"Our philosophy is to follow what the regu- lations require, and if they don’t require us to fill out an SAR (suspicious-activity re- port) . . . then we wouldn’t necessarily do it," 7-Eleven spokeswoman Margaret Chabris tells Insight. Asked specifically if people who cancel or change a transaction might be targeted, she said, "We are not required to fill out an SAR if that happens." So why does the U.S. Postal Service?

That’s one of the major issues raised by critics such as Postal Watch’s Merritt. He argues for this to be imposed on its com- panies for private businesses on tracking, money orders. "Being a government agency, we feel it’s our responsibility that we should set the tone," he said. The Treasury Depart- ment “basically challenged us in the hundred- nineties to step up to the plate as a govern- ment entity," Gillum adds.

In fact, Gillum thinks the Treasury may mandate that the private sector follow some as- pects of the postal-service’s program. He adds, however, that the postal service is not arguing for this to be imposed on its com- petitors.

Critics of this snooping both inside and outside the postal service are howling mad that the agency’s reputation for protecting the privacy of its customers is being com- promised. "It sounds to me that they’re going past the Treasury guidelines," says Rick Merritt, executive director of Postal Watch, a private watchdog group. The regu- lations, he said, do not give specific ex- ample cases of suspicious activity, leaving that largely for the regulated companies to determine. But the postal-service training video points to suspicious customers. "Such a sus- pective activity on a customer counting money in the line. It warns that even customers whom clerks know well often be suspicious if they frequently purchase money orders."

"Gee, I know he seems like an okay guy," says Sam Slick, the devil, wants to give cus- tomers the benefit of the doubt."

"The video, which Gibson says cost $90,000 to make, uses entertaining special effects to illustrate its points. Employing the angel- and- devil theme often used in cartoons, the video presents two tiny characters in the imagination of a harried clerk. Regina Goodclerk, the angel, constantly urges the clerk to fill out suspicious-activity reports on customers. "Better safe than sorry," she says. Sam Slick, the devil, wants to give cus- tomers the benefit of the doubt."

Some of the examples given are red flags such as a sleazy-looking customer ordering the postal clerk a bribe. But the video also encourages reports to be filled on what appear to be suspicious money order pur- chases. A black male teacher and Little League coach whom the female clerk, also black, has known for years walks into the post office wearing a crisp, pinstriped suit and purchases $2,800 in money orders, just under the $3,000 daily minimum for which the postal service requires customers to fill out a form. He frequently has been buying money orders during the last few days."

"Mr. CAMP. Mr. Speaker, I rise today to pay tribute to Lloyd Oyster, a decorated soldier from World War II. I would like to acknowledge his bravery as a servicemen fighting on the front lines in Europe at the Battle of the Bulge. His many medals and awards demonstrate his bravery and patriotism. I am proud to stand and honor this outstanding citizen of the United States and would like to call his admi- rable actions to the attention of my colleagues in the House of Representatives."

I have attached for the record an article printed in the Ogemaw County Herald by Deanne Cahill about Mr. Oyster’s experience as a World War II soldier.

Six decades ago, at the end of World War II. Lloyd Oyster was given a choice. The Lupton man had to decide whether or not to spend an extra year in Europe and re- ceive the medals he was entitled to, or re- turn home to his wife and baby daughter. Critically wounded in the Battle of the Bulge, Oyster didn’t hesitate. He wanted to go home. He didn’t regret that decision until recently, when he remarried his youngest son, Joe, that he wished he would have stayed and received his medals.

Without letting his father know, Joe went on a mission to grant his father’s wish.
On Monday, June 4, that wish was granted when Rep. Dave Camp presented Oyster, one by one, with the Good Conduct Medal, Purple Heart, European-African-Middle Eastern Campaign Medal with four Bronze Stars, the World War II Victory Medal, the American Campaign Ribbon, the Combat Infantryman Badge and the Honorable Service Lapel Button WW II.

An honored but humble Oyster graciously accepted his medals from Camp, but said many others were far more deserving. "I didn't do any more than anybody else did," he said. "(After his mother died) we stayed together and Dad raised us on the farm."

Eventually two of his older brothers enlisted in the service. One went off to fight in Europe, the other to the Pacific. At the age of 21, Oyster was working at Borden's Dairy in West Branch and met 17-year-old Marge. Oyster worked with Marge's sister's husband, and the sister would often visit at the dairy. He would walk Marge home after he was finished with work because she was frightened to walk alone.

"That started it," Oyster said. "That is how we got acquainted, and from there she tried to rope me in, and she did."

In late 1942 Oyster was drafted into the Army. He could have been deferred because Borden made products for the government, but Oyster opted against deferment. "I was no worse or better than anyone else," he said. "I was just defending my country." The soldier made a surprise counterattack and the Battle of the Bulge ensued.

Oyster added that fear was always present. "You're nuts," he said. "You have got guns and artillery aimed at you.""I wanted to go over and finish the job," he said. "But I wanted a boy.""I was no worse or better than anyone else," he said. "I was just defending my country." The soldier made a surprise counterattack and the Battle of the Bulge ensued.

"I was just defending my country." The soldier made a surprise counterattack and the Battle of the Bulge ensued.

Along the way back home, they stopped in England, gangrene had set in. "They wanted me to take my leg," Oyster said. "I said no. At this time penicillin was just being introduced." Doctors administered penicillin to Oyster. "The infection cleared up and I got to save my leg," he said.

On Dec. 31, 1944, as Oyster lay in a hospital in England, Marie gave birth to their first child, Nancy. Oyster was then put into limited service and transferred to the Air Force. "I wanted to be in the Air Force in the first place," he said. "It (the Air Force) is the best place you can be, as far as I'm concerned. It was almost like sending me home, putting me in there." For the remainder of the war, Oyster was stationed at the 8th Army Headquarters, located about 30 miles from London, taking care of three generals' vehicles.

"They were going to send our division to Japan," he said. "But before we got shipped out, the war was over."

Oyster sailed home, this time on the Queen Mary. Upon arrival back into the United States, Oyster was given a choice. "They told me that I could go in the hospital for two to three months and get my disability, I wanted to go home," he said, looking at his wife in England, gangrene had set in. "They wanted me to take my leg," Oyster said. "I said no. At this time penicillin was just being introduced." Doctors administered penicillin to Oyster. "The infection cleared up and I got to save my leg," he said.

Oyster sailed home, this time on the Queen Mary. Upon arrival back into the United States, Oyster was given a choice. "They told me that I could go in the hospital for two to three months and get my disability, I wanted to go home," he said, looking at his wife in England.

Oyster returned home to claim his bride, and the couple settled back into the Lupton area.

Two more daughters, Joyce and Susan, followed in 1946 and 1948. Oyster yearned for a son. "You take them as they come," he said. "But I wanted a boy."

"I kept trying to have a good one," said Oyster teasingly. "If I couldn't do better than that, I thought I better stop."

The Oysters now have 23 grandchildren and 11 great-grandchildren. Years later Oyster traveled to the veterans' hospital to receive his medical benefits and a wheelchair. When he was discharged from the hospital in England, he was listed as a amputee.

"Veterans records showed that I had a wooden leg and chucking. They wanted to know where my wooden leg was."

For many years, Oyster worked construc-
EXTENSIONS OF REMARKS

His volunteer involvement in the Cincinnati community is legendary. He is particularly well known for his advocacy on behalf of children and his passion for education. His public service has taken him from president of the Wyoming, Ohio School Board in 1986 to more recent positions as Co-Chair of the Ohio Education Improvement Council and membership on the National Commission on Teaching and America's Future. Bob has capably led numerous local organizations, including the Greater Cincinnati March of Dimes, the Greater Cincinnati Chamber of Commerce, the National Advertising Council Board, and Beech Acres For the Love of Kids Parenting Conference.

All of us in Cincinnati congratulate Bob on his outstanding career with Procter & Gamble, thank him for his many years of dedicated community service, and wish him well in the new challenges to come.

TRIBUTE TO JOHN AND MARY KOLIMAS

HON. WILLIAM O. LIPINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. LIPINSKI. Mr. Speaker, I rise today to pay tribute to John and Mary Kolimas who recently celebrated their fiftieth wedding anniversary on June 16, 2001.

John and Mary represent the epitome of married life and family values. They have raised six wonderful children—Mamie, Chris, Bob, Barb, Rich, and Paul. I can attest first-hand to their ability as parents; their son Paul is a former employee of mine and a man I have great respect for. John and Mary have also been blessed with nine beautiful grandchildren: Nicole, Jordan, Kelly, Amie, Cathy, Samantha, Alexandria, Jesenia, and Michael. They also have one deceased grandchild, Elizabeth.

Friends of the couple fondly recall their meeting at a dance in 1948 at St. Stanislaus Bishop and Martyr Catholic Church. They were married at that same church three years later in 1951 by Mary’s brother, Father Edwin Karlowiczer. Their outstanding devotion to the Catholic Church has continued throughout their marriage.

Both John and Mary attended St. Stanislaus Bishop and Martyr Catholic Grammar School. John graduated from Foreman High School, where he was class president. He served in the Navy for two years, and then attended Loyola University in Chicago under the GI Bill. Mary graduated from Holy Academy High School.

The couple was surrounded by seventy-five relatives and friends for mass and a joyous reception at the Rosewood West Restaurant on Saturday, June 16. Mary’s brother, Father Edwin Karlowiczer, presided over the mass along with Father John Sayaya. In attendance for the celebration were Mary’s four sisters: Therese, Kay, Janet, and Jean; and John’s sisters: Helen, Bernice, and Emily. The group enjoyed a video presentation of pictures and music from the couple’s fifty years together.

I have the highest level of respect for devoted couples like John and Mary. Their ability to love and raise children serves as a model for all of us to follow. I encourage my colleagues to join me in celebrating the fiftieth wedding anniversary of John and Mary and the strong family values they represent.

CONNIE BREMNER, RECIPIENT OF ROBERT WOOD JOHNSON COMMUNITY HEALTH LEADERSHIP AWARD

HON. DENNIS R. REHBERG
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. REHBERG. Mr. Speaker, Connie Bremner, lifelong resident of Browning, Montana, is of the age when retirement is an option, but it’s the last thing on her mind. Connie doesn’t have the time nor inclination for anything but selfless service to the elderly and disabled in her community.

Connie, director of the Eagle Shield Senior Citizens Center, on the Blackfeet Indian Reservation, is the recipient of the prestigious Robert Wood Johnson Community Health Leadership Award of $100,000. The award gives $95,000 to the center and $5,000 to Connie. This award is one of only ten given nationwide. Most of the award money will go to fund short-term care for terminally ill people who are unable to get help elsewhere. Some of the money will be used to start money for a proposed Blackfeet health care program.

Browning is in a lonely community on the wind swept plains down the eastern slopes of the Montana Rockies. It’s the heart of the Blackfeet Indian Reservation, a place where things have never been easy. When Connie became director of the Eagle Shield Senior Citizens Center in Glacier County, the nation’s 95th poorest, she found the center and the seniors in distressed conditions. Connie made it her objective to transform the facility into a model health and wellness center. She took the barest of bare-bones facilities and breathed life into it—and not just life, but spirit. Eagle Shield now serves over 600 elders with a wide range of programs, from nutrition education and meal delivery to home personal assistance and social activities. Connie’s efforts to expand, improve, and modernize health care for the impoverished, the elderly and the disabled has not only met physical needs, but has lifted spirits and provided hope.

Connie began with a loan of $70,000 from the tribal government, which has already been repaid. The Robert Wood Johnson Community Health Leadership Program’s press release states that Connie’s “hard work has yielded great success for Eagle Shield, including the creation of an Alzheimer’s screening and treatment program and a licensed, Medicaid reimbursed personal care attendant program for over 100 people with a disability unable to care for themselves.”

Connie expanded the personal care attendant program until now is serves over 100 people, ranging from age 4—94. In addition, the center “has trained 300 younger tribal members to become certified personal care attendants. Of those, 90 are currently employed, and to the United States of America. can oversee public health and public safety, but only people can give love and compassion, and the most vital thing we do in life is look after each other by reaching out in kindness to the oldest and youngest and weakest among us. It is known in Browning that nothing will keep her from taking care of her elders. The elders count on Connie. Montana counts on Connie.

It is an honor to read Connie Bremner’s accomplishments into the Congressional Record, although it should be recognized that this woman’s deeds of love and kindness will leave a record much more enduring and significant in the community of Browning than this RECORD of ink and paper in the Halls of Congress. Connie Bremner has shown that the true treasures in Montana—The Treasure State—are people, the old and the young, the weak and the strong. Connie is a treasure to the Blackfeet Nation, to the state of Montana, and to the United States of America.

A TRIBUTE TO LESTER C. PHILLIPS

HON. BOB ETHERIDGE
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. ETHERIDGE. Mr. Speaker, I rise today to honor a great North Carolinian and son of Harnett County, Mr. Lester C. Phillips who recently received the Distinguished Service Award of the Occoneechee Council of the Boy Scouts of America.

Lester Phillips was born on August 25, 1930 in Sampson County, North Carolina to Floyd and Emma Phillips and spent the majority of his early years working on the family farm. He married Winifred Naylor in 1950 and together they raised two sons Ray and Robert. In 1959, Lester moved his young family just up the road to Harnett County, and the town of Dunn, to seek employment opportunities and a better life for his family.

Upon his arrival in Dunn, Lester landed a job with the H.P. Johnson Oil Company, where he quickly became Mr. H.P. Johnson’s most trusted employee. In fact, Mr. Johnson was often over heard saying that “when he wanted something done right, he always looked to Leck.” After several years of working for Mr. Johnson, Lester began his career in the trucking business, which would later lead to his ownership of a small gas station on Highway 301 South in Harnett County and later the development of a waste management enterprise. From these humble beginnings Lester built a nationally recognized business that served locations all the way from Florida to Alaska.

Not only is Lester an outstanding success in the business world, but he is also a remarkable family man and community leader. He is also an active member at Spring Branch Baptist Church in Dunn.

But today we are here to pay tribute to Lester’s contributions to the young people of Harnett County, and to celebrate his recent accomplishment, receiving the Distinguished Service Award from the Boy Scouts of America. As the father of an Eagle Scout and a recipient of the Boys Scouts’ Silver Beaver...
Award, I know first hand the importance that the organization plays in the lives of our nation’s young people. With the help of men like Lester, the Boy Scouts mold young men to be active and productive citizens. I want to honor Lester today for helping to strengthen our nation’s social fabric.

Mr. Speaker, Lester Phillips is a remarkable example of a citizen servant. He selflessly uses his time and energy to better the lives of the young men in Harnett County. He touches so many lives in so many public ways, but Lester’s most important contributions to others are the ones only he knows about. And that is the way he wants it to be. That is a true testament to his unique and special character and the reason we honor him in this House today.

INTRODUCTION OF THE INDIAN AND ALASKA NATIVE Foster Care and Adoption

HON. DAVE CAMP
BY MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. CAMP. Mr. Speaker, today, I am pleased to be joined by Representatives Hayworth, Kildee and Bonoir to introduce legislation to correct an inequity in the laws affecting many Native American children. This effort is also supported by the National Indian Child Welfare Association, American Public Human Service Association, and National Congress of American Indians.

Every year, for a variety of often tragic reasons, thousands of children across the country are placed in foster care. To assist with the cost of food, shelter, clothing, daily supervision and school supplies, foster parents of children who have come to their homes through state court placement receive money through Title IV–E of the Social Security Act. Additionally, states receive funding for administrative training and data collection to support this program. Unfortunately, because of a legislative oversight, many Native American children who are placed in foster care by tribal courts do not receive foster care and adoptive services to which all other income-eligible children are entitled.

Not only are otherwise eligible Native children denied foster care maintenance payments, but this inequity also extends to children who are adopted through tribal placements. Currently, the IV–E program offers limited assistance for expenses associated with adoption and the training of professional staff and parents involved in the adoption. These circumstances, sadly, have meant that many Indian children receive little Federal support in caring for their homes.

In many instances, these children face insurmountable odds. Many come from abusive homes. Foster parents who open their doors to care for these special children deserve our help. These generous people who take these children into their homes should not have to worry about whether they have the resources to provide nourishing food or a warm coat, or even adequate shelter for these children. This legislation will go a long way to ease their concerns.

EXTENSIONS OF REMARKS

June 27, 2001

Mr. Speaker, I am particularly pleased to call to the attention of the House of Representatives Len’s distinguished career because he has always worked diligently in securing the American Heritage River designation for the Upper Susquehanna-Lackawanna Watershed in 1998. Working closely with my office, Len was an invaluable assistant in compiling a great deal of information and working with local elected officials and other interested parties. I wish him all the best.

HONORING DR. JERRY SASSON,
PRINCIPAL OF TERRACE PARK ELEMENTARY SCHOOL UPON HIS RETIREMENT

HON. ROB PORTMAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. PORTMAN. Mr. Speaker, I rise today to pay tribute to Jerry Sasson, a friend and constituent, who is retiring after 11 years as principal of Terrace Park Elementary School (TPES) in the Second District of Ohio.

Jerry is a special kind of principal because he is a special kind of person. He has been called a one-of-a-kind educator, who spends time in the classroom every day, knows the name and face of every one of his 300 students, writes a personal, handwritten birthday card to each student every year, and sends students notes at home to recognize personal accomplishments. He encourages kindness and respect among students, teachers and parents, and is aware of each student’s specific challenges and talents.

An Ohio native, Jerry received his Doctor of Education in Educational Leadership from the University of Cincinnati in 1992. He graduated with a Master of Education in Guidance and Counseling and a Bachelor of Science in Education from the University of Dayton. Jerry received his school psychology certificate from Xavier University in 1972. Jerry began his career as a high school English teacher at Fenwick High School in Middletown, Ohio, and went on to become Fenwick’s Director of Guidance and Counseling. From 1972 through 1979, he served the Hamilton County Office of Educational Services as a school psychologist and, in 1979, he joined the Mariemont, Ohio City School District as Director of Special Services, a position he retained while serving as principal. In 1990, he became the principal of TPES, a school within the Mariemont School District.

Jerry is well known for his regular column on parenting, Parent Pride, which appears in the publication of the Mariemont City School District. He tackles tough subjects such as tolerance, assertiveness, morals and responsibility. He’s not afraid to tell us as parents that the best way to raise happy, productive children is to create and maintain home, school and community environments that focus on nurturing and support for all. Jerry believes that most difficult school-related issues—such as bullying, behavior problems, or violence—are not just school issues, but family and community issues, too. And he’s right: schools can create zero tolerance policies, but it all comes
back to the attitudes and relationships at home. All of us in the Greater Cincinnati area are grateful for Jerry's many years of dedicated and caring service. We appreciate his outstanding leadership and friendship, and wish him well in many new challenges and opportunities to come.

TRIBUTE TO BERNARD SIMS
HON. WILLIAM O. LIPINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. LIPINSKI. Mr. Speaker, I rise today to pay tribute to one of the most respected citizens in my district, Bernard Sims. Bernard Sims died on June 3rd at the age of 97. Bernard was well known throughout his hometown of LaGrange, Illinois as a leader, counselor, and teacher. During his ninety-seven years, Bernard fought for equal rights for all citizens. Bernard refused to tolerate discrimination in any form. His promotion of mutual respect has forever made the city of LaGrange a better place.

One of the most respectable traits of Bernard's character was his ability to get things done. He led through action. His friends respectably recall when Bernard led a sit-in at the Walgreen's lunch counter until the establishment agreed to serve African Americans. His nonviolent approach and his positive attitude shaped the LaGrange civil rights movement. Bernard was wholly diplomatic in his actions and respect for him crosses all racial and ethnic lines.

Bernard was a well-known football and baseball star at Lyons Township High School. He worked as an auto mechanic, a handyman, and a real estate entrepreneur. He was born to the first African American family in LaGrange and Bernard met his wife, Helen, in 1953 at a LaGrange diner. The couple spent a remarkable seventy-five years together until his death. Bernard lived his ideals through membership in the Knights of Columbus, Toastmasters, and the NAACP. His active life and positive attitude helped him make a difference everywhere he went.

Bernard was an asset to our community and will be greatly missed. My thoughts and prayers go out to Bernard's family and the LaGrange community during this time of mourning. I am certain Bernard's legacy will live on in the community for years to come. His community-minded spirit holds a lesson for all of us.

PERSONAL EXPLANATION
HON. W. TODD AKIN
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. AKIN. Mr. Speaker, on Monday, June 25, I missed three recorded votes because my flight from St. Louis was canceled. Had my flight not been canceled, I would have voted as follows on these three Resolutions:

"Yea" on H. Res. 180, calling on Communist China to release Li Shaomin and all other American scholars of Chinese ancestry;

"Yea" on H. Res. 99, expressing the sense of the House that Lebanon, Syria and Iran should call upon the Hezbollah to allow Red Cross representatives to visit four abducted Israelis presently held by Hezbollah forces in Lebanon; and

HON. AMO HOUGHTON
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. HOUGHTON. Mr. Speaker, I am pleased to join my friend, Mr. OBERSTAR, and 123 of our colleagues, in introducing the bipartisan "High-Speed Rail Investment Act of 2001." We believe this bill is critical to getting high-speed rail projects started across the country and liberating our Nation's highways and airways from increasingly serious congestion. This legislation, a companion to S. 250 in the other body, is designed to put into place development of high-speed rail. The House passed a similar bill in the 106th Congress.

Congestion on our highways and in our skies is at a crisis point. The cost to our nation in terms of lost productivity and wasted fuel could be as high as $100 billion a year. This will only get worse as road and air travel continue to increase. We cannot resolve this problem simply by building new roads and new airports; the costs are enormous and in many places we simply do not have the space. Our rail system is underused. We fail to meet our standards of systems in most other developed industrial countries. We have scarce fiscal and land resources and we must make more efficient use of our existing infrastructure. The rail lines are there already.

Our bill would build on the current rail infrastructure. The bill would authorize Amtrak to issue $12 billion in bonds over the next 10 years for high-speed rail projects in up to 12 regional corridors identified by the Department of Transportation. The bond proceeds could be invested in high-speed rail rights-of-way, rolling stock and other capital improvements. Bonds could also be issued by Amtrak on behalf of any other qualified intercity passenger rail carrier with the approval of the Secretary of Transportation. The bondholders would receive federal tax credits in lieu of interest payments and the credits would be included in taxable income. States would provide at least a 20 percent match which would be deposited in a trust account to redeem the bonds, but Amtrak would remain ultimately responsible for repaying the principal. The state match would help ensure that only high priority projects are funded.

The bill provides that not more than $1.2 billion in bonds could be issued in each fiscal year from 2002 to 2011. Also, not more than $3 billion could be designated for qualified projects in the northeast rail corridor between Washington, DC and Boston, Massachusetts. In addition, not more than $3 billion could be designated for any individual state for qualified projects.

We believe this proposed legislation is forward looking, cost-effective, and absolutely necessary if we are to ensure that our nation's transportation system can handle the expected growth in travel without being overwhelmed by congestion and gridlock. We encourage our colleagues to join us in cosponsoring this legislation.

HON. MARGE ROUKEMA
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mrs. ROUKEMA. Mr. Speaker, each and every day Americans are exposed to a deluge of negative images of young citizens. Television, radio and newspaper reports are replete with stories of the misdeeds of young Americans. Frankly, coverage of ringing alarm bells and scandal sells. However, this kind of coverage does not tell the entire story. Nor is it fair to the millions of younger Americans who are doing good, helping their friends and neighbors and volunteering to improve their communities.

Therefore, Mr. Speaker, I rise today to draw the attention of my Colleagues to the efforts of just one group of young people—the students at the Lounsberry Hollow Middle School. This weekend I was pleased and gratified to participate as the Vernon Township Fireman's Association honored this group of community-minded, energetic youngsters. Under the guidance of the Director of the School's enrichment program, their outstanding teacher, Vernoy Paolini, the students at Lounsberry Hollow Middle School worked for over 2 1/2 years to raise $36,000 to help fire fighters do their lifesaving work.

These students in Vernon Township have set a record and a high standard for all of us to recognize. Nearly three years ago, the students became interested in an emerging firefighting technology—thermal imaging cameras. The students embarked on an effort to raise the funds to provide Vernon's firefighters with these cameras. They organized a range of creative activities. They sponsored Tupperware Bingo, sold pens and pencils, sponsored games, collected cans, gathered food, sold 15,000 lollipops, established the "Change Makes a Difference" program, etc. With this dedication and commitment, they raised over $36,000.

In the meantime, State Senator Bob Littell (R-Franklin) stepped in and through his leadership on the Senate Appropriations Committee, provided communities all across the state assistance to purchase the thermal cameras. Undaunted, the young people redefined themselves to helping reduce fire dangers.
They changed their focus and purchased a "Safety House Trailer" for the various area fire departments to use in their fire prevention and training activities.

Clearly, these students had help—assistance from their teachers, community leaders, elected officials, and parents. All of them deserve our heartfelt thanks for their role in this project.

Mr. Speaker, I rise to commend and congratulate Lounsberry Middle School, its faculty and staff. But I also rise to offer, on behalf of the Sussex County community, my heartfelt thanks to its students. They are great Americans and their actions typify the kind of community dedication that has made America strong.

INTRODUCTION OF THE FAIR BALANCE PRESCRIPTION DRUG ADVERTISEMENT ACT OF 2001

HON. FORTNEY PETE STARK
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. STARK. Mr. Speaker, I rise today to introduce the Fair Balance Prescription Drug Advertisement Act, a bill to deny tax deductions for unbalanced direct to consumer (DTC) pharmaceutical advertising placing more emphasis on product benefits rather than risks or failing to meet Federal Food, Drug and Cosmetic Act Requirements.

The bill will ensure that DTC advertisements are presented in a fair manner, balancing risks and consequences. Print ads would be required to display pros and cons in equal typeface and space, and on the same or facing pages. If the advertisements ran onto additional pages, those pages would have to be consecutive with the first pages. In television and radio ads, risk and benefit descriptions would be allotted equal airtime and volume level. Pharmaceutical companies who do not follow these guidelines will not be eligible for an advertising tax deduction.

Since the FDA relaxed restrictions on television advertising in 1997, DTC advertising has soared. Drug companies’ advertising expenditures doubled between 1998 and 2000. Last year, Merk-Medco cited a report that projected that by 2005, DTC advertising expenditure will reach seven billion dollars annually.

This increased spending correlates with increased prices of prescription drugs. Like any other commodity, greater product recognition leads to increased demand, and higher prices.

Large-scale advertising may also lead consumers to demand drugs that may not be medically necessary or appropriate for the patient’s condition. According to the National Institute for Health Care Management, 86% of patients who request a prescription for Claritin from their doctor receive one.

Doctors often find that patients are difficult to dissuade when they have heard the promises of a new drug. Physicians who acquiesce, however, can put their patients’ health at risk. Before the FDA had published clinical trial results of the arthritis drug Celebrex, physicians had prescribed $1 billion worth of the drug in response to patient demands. The doctors had done this without realizing that Celebrex contains an ingredient to which many patients are allergic. In another example, between its release in October of 1999, and the summer of 2000, 22 patients taking the flu drug Relenza had died. The FDA later determined that in the majority of these cases, the drug should never have been prescribed.

Physicians are beginning to recognize dangers of DTC as well. This month, the American Medical Association in their annual convention decided to ask the

In addition to health dangers, physician’s responses to pressure from “informed” patients can have economic consequences. According to the Blue Cross and Blue Shield Association, a one year dosage of the arthritis medicine Celebrex costs $900, while the same dosage of ibuprofen, which may be adequate to treat many patients’ pain, costs only $24.

Just yesterday, the Wall Street Journal raised concerns about the power of DTC advertising. Due to an intensive new campaign by the Genzyme corporation, many dialysis patients who used to use the over-the-counter medication Tums as a calcium supplement are switching to Renagel, a prescription medication that costs up to ten times the same day.

DTC advertisements may also prevent patients from requesting, and physicians from prescribing generic brand drugs. According to a Merk-Medco 2000 study, increasing a health care plan’s dispensing rate of generic drugs by 1% can reduce drug spending by 12%

Although prescription drug advertisements are purportedly intended to educate consumers, a University of California study determined that drug companies frequently fail short of this goal. In a survey of 320 print ads, only 9% included information on the drug’s success rate, and the same number attempted to clarify misconceptions about the condition the drug is prescribed to treat. Clearly, something must be done to make these ads more honest.

According to a May 2000 Business Week article, some drug companies claim that the increased advertising can alert hospital physicians to new medications that may reduce a patient’s length of stay, and thus reduce overall costs. However, most of the money spent on DTC drug advertisements goes to heartburn, allergy medications, and vanity drugs like those that prevent hair loss. These advertisements promote consumers to seek expensive treatment for conditions that they might not have felt the need for treatment in the past.

This bill I am introducing today would decrease the economic incentives for DTC advertising by taking away the tax deduction for ads that are not fairly balanced. Why should taxpayer funds go to drug companies’ questionable advertising techniques that endanger lives and ultimately raise overall health expenditures? By denying tax deductions for unbalanced prescription drug ads, we may be able to change pharmaceutical company behavior to ensure that their advertising includes clear, life saving information that will better inform the American public, reduce health care costs, and save lives. I urge my colleagues to join me in support of this legislation, and look forward to working with them to make fair, balanced drug advertising a reality.

EXTENSIONS OF REMARKS

HON. JAY INSLEE
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. INSLEE. Mr. Speaker, I would like to take this opportunity to recognize and commemorate the dedication of a great Navy Memorial Statue in my congressional district. “The Homecoming” will be dedicated on July 4, 2001, in Kirkland, Washington. This bronze statue is the third of its kind in the nation and will be dedicated “for those families that also served”—the families that kept the home fires burning while their loved ones fought for their country. We often overlook these unsung “veterans” of the battles the United States has fought and this sculpture dramatically calls attention to the families’ sacrifices. I cannot help but feel indebted to those who have paid a great individual expense to preserve and strengthen the freedom that we enjoy, and future generations will cherish.

The statue is a 7-foot high, 36-inch platform bronze depiction of a returning serviceman embracing his wife and child. It will be installed at Marina Park near the water’s edge of Lake Washington at a ceremony on the 4th of July.

Kirkland resident Edward L. Kilwein, Sr. is on the Board of Directors of the US Navy Memorial Foundation and, along with the Lake Washington Navy League, spearheaded the push to have “The Homecoming” permanently grace the City of Kirkland. Kirkland Mayor Larry Springer, along with a unanimous motion from the Kirkland City Council, assured the expansion of Kirkland’s first-class public art inventory that honors the men and women of the US Armed Services and their families.

I ask my colleagues in the 107th Congress to please join me in commemorating the dedication of “The Homecoming.”

CONGRATULATING THE PEPSI GIANTS, 2001 GUAM MAJOR LEAGUE BASEBALL CHAMPIONS, AND MVP BENJIE PANGELINAN

HON. ROBERT A. UNDERWOOD
OF GUAM
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. UNDERWOOD. Mr. Speaker, I would like to take this opportunity to congratulate the Pepsi Giants for having recently won the Guam Major League Baseball’s championship. Having swept the University of Guam Tritons in four of the best-of-seven series, the Giants became only the fourth team in GML history to win back-to-back championships.

Although they lost the season opener to the Continental Golden Jets, this past season proved to be truly amazing for the Giants. The team went on to win all 15 of their regular season games and later swept the GML’s National League Division by three games enroute to finishing the season with a 22-game winning streak.

More impressive, however, was the record set by Benjie Pangelinan, this year’s series...
Most Valuable Player (MVP). Scoring 11 runs, 6 RBI's, and 15 hits—including 11 singles, two doubles, one triple, and a homer, this Giant’s catcher/center fielder was enough to merit the coveted award. His second year in a row as MVP, Benjie finished the series 15-for-18 for an .833 batting average. A feat that will go down in GML history, Benjie’s batting average broke the series record of .556 set in 1993 by Fernando Diaz.

Always a team player, Benjie claims to have derived more satisfaction from the fact that his team won the championship. He recognizes that this is a feat that was not singlehandedly accomplished. Despite his superior performance, he still credits all of his team members for the victory. He notes that although the Giants have lost formidable players in the past, a new crop of athletes has emerged to fill in the void. In addition, he credited the team’s family members for their sacrifices and support in giving the players the chance to be out on the field and have such a wonderful season. Benjie is married to Nicole Oulette Pangelinan and they have a three-year-old child, Kiana.

Regional and local competitions such as the Guam Major League baseball games provide entertainment, promote community relations and prepare our athletes for higher levels of competition. Once again, I would like to commend and congratulate the Pepsi Giants and especially the series MVP, Benjie Pangelinan, for their superb performance and efforts which resulted in this year’s championship. I am sure that they will stay committed to their winning ways in the years to come.

A BILL TO MAKE PERMANENT THE AUTHORITY TO REDACT FINANCIAL DISCLOSURE STATEMENTS OF JUDICIAL EMPLOYEES AND JUDICIAL OFFICERS

HON. HOWARD COBLE
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. COBLE. Mr. Speaker, along with the Ranking Member of the Subcommittee on Courts, the Internet, and Intellectual Property, Representative Berman, I rise to introduce a bill to make permanent the authority to redact financial disclosure statements of judicial employees and judicial officers.

Under the Ethics in Government Act, judges and other high-level judicial branch officials must file annual financial disclosure reports. However, due to the nature of the judicial function and the increased security risks it entails, section 7 of the “Identity Theft and Assumption Deterrence Act of 1998” allows the Judicial Conference to redact statutorily required information in a financial disclosure report where the release of the information could endanger the filer or his or her family. This provision will sunset on December 31, 2001, in the absence of further legislative action.

The Judicial Conference Committee on Financial Disclosure recently submitted a report on section 7. The Committee monitors the release of financial disclosure reports to ensure compliance with the statute, reviews redaction requests, and approves or disapproves any request for the redaction of statutorily mandated information where the release of the information could compromise the security of the filer. In 2000, the Committee noted that: (1) 13 financial disclosure reports were wholly redacted because the judge was under a specific, active security threat; (2) 140 judges’ reports were partially redacted (9 of which were based on specific threats; the other 81 due to general threats and the potential risk of disclosure of a family member’s unsecured workplace or a residence of a judge or a judge’s family); and (3) a total of 218 financial disclosure reports, which includes reports from previous years, were partially redacted.

The purpose of the annual financial disclosure reports required by the Ethics in Government Act is to increase public confidence in government officials and better enable the public to judge the performance of those officials. However, federal judges should be allowed to redact certain information from financial disclosures when they or a family member is threatened. Importantly, the practice has never interfered with the release of critical information to the public.

This bill will eliminate the sunset clause in section 7 and permit the Judicial Conference to permanently redact information in financial disclosure reports where the information could endanger the filer or his or her family. This is a good bill, and I urge my colleagues to support it when it is brought to the House Floor for consideration.

REMARKS HONORING FORMER DALLAS COWBOYS QUARTERBACK TROY AIKMAN

HON. KAY GRANGER
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Ms. GRANGER. Mr. Speaker, I want to commend NFL quarterback Troy Aikman on his very successful football career, and extend my gratitude for his steadfast dedication to improving the lives of children. Mr. Aikman has more than equaled his professional career with his personal involvement in the community. His character both on and off the field has been a tremendous asset to the Dallas-Fort Worth area.

Troy Aikman was born in West Covina, California. His family moved to Henryetta, Oklahoma, where he graduated from Henryetta High School. Aikman went on to play college football at the University of Oklahoma and the University of California, Los Angeles. He quickly became a star. Upon Mr. Aikman’s graduation, he was the third highest rated quarterback in NCAA history. He also won the highest award for college quarterbacks, the Davey O’Brien National Quarterback Award.

When Mr. Aikman was drafted in the first round by the Cowboys, he quickly became the leader of the team and an integral part of the Dallas-Fort Worth community. During his 12 seasons with the Cowboys, Mr. Aikman led them to three Super Bowl Championships and played in six Pro Bowls. He was named Super Bowl XXVII Most Valuable Player for his performance in the Cowboy’s first Super Bowl of the 1990’s. Mr. Aikman is also the Cowboy’s all-time leader in passing yards, touchdown passes, completion percentage, pass attempts and completions. The Cowboys will surely miss his talent and leadership.

Mr. Aikman has devoted himself to helping critically ill children. In 1992, he established The Troy Aikman Foundation to provide financial support for the physical, psychological, social, and educational needs of critically ill children whose needs are not being met by any other viable resource. Through the Foundation, Mr. Aikman created “Aikman’s End Zones” for children’s hospitals. “Aikman’s End Zones” are interactive playrooms and theaters designed to give critically ill children a place of refuge during their stays in the hospital. Depending on the space available, the facility includes an 8-foot-tall replica of Troy’s helmet, a 1,100 gallon saltwater aquarium, a theater, and an interactive computer network. Mr. Aikman established End Zones at the Children’s Hospital of Dallas, Texas and at Cook Children’s Medical Center in Fort Worth, Texas. His ultimate goal is to have Aikman’s End Zones in every NFL city.

Mr. Aikman has also teamed up with the Starbright Foundation, founded by Stephen Spielberg and General H. Norman Schwarzkopf. The Starbright Foundation’s mission is to improve the lives of critically ill children through technology and entertainment. Starbright provides the interactive computer network in “Aikman’s End Zones.”

In addition to his foundation activities, Mr. Aikman has served on the board of Stars for Children and has been honorary chairman for numerous charitable fundraisers throughout the Dallas-Fort Worth area. Mr. Aikman sponsors a scholarship at Henryetta High School for students who want to attend college but can’t afford it, and has also established a permanently endowed scholarship at the University of California, Los Angeles. In 1994, Aikman was honored for his community service when he received the Byron “Whizzer” White Humanitarian Award.

Mr. Aikman has also become a children’s book author. In 1995 he published his first book titled Things Change. The message of the book is how to use change to one’s advantage and view difficult times as learning experiences rather than as setbacks. In 1998, he published a second book called Aikman: Mind, Body & Soul which is his autobiography.

Troy Aikman continues to give unselfishly to our community, and we are grateful for the work he has done. He is the perfect example of what a terrific role model professional athletes can be if they use the fame and wealth they have been blessed with in a positive way.

Mr. Speaker, I want to once again congratulate Troy Aikman on a wonderful football career and thank him for his unwavering dedication to improving the lives of children.
TRIBUTE TO SERGEANT FIRST CLASS DEBORAH L. THORN

HON. IKE SKELTON
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. SKELTON. Mr. Speaker, let me take this opportunity to congratulate Sergeant First Class Deborah Thorn, of Fort Leonard Wood, Missouri, who was recently named as the 2001 Army Drill Sergeant of the Year. SFC Thorn was chosen out of 2400 drill sergeants across the active Army. The Army’s drill sergeants are responsible for all initial entry training for the Army’s 120,000 new recruits annually.

SFC Thorn enlisted in the Army on her birthday, 3 September 1993 and has served in Fort Huachuca, Arizona and Germany before moving to Fort Leonard Wood to become a drill sergeant assigned as a drill sergeant for the last 25 months in Alpha Company, 795th MP Battalion, 14th MP Brigade. She will attend the Advanced Noncommissioned Officer Course in July. Following her completion of the course, she will then serve a year at Training and Doctrine Command headquarters as an advisor to the commander on drill sergeant and basic training matters.

Mr. Speaker, I know the Members of this body will join me in congratulating SFC Thorn for her outstanding dedication and service to the U.S. Army. She is a tremendous role model for soldiers, not only at Fort Leonard Wood, but across the entire U.S. Army. I join her husband Lee and daughter Samantha in wishing SFC Thorn all the best in the days ahead.

VASSAR POLICE CHIEF JOHN HORWATH: A BASHDE OF HONOR

HON. JAMES A. BARCIA
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. BARCIA. Mr. Speaker, I rise today to honor Vassar Police Chief John Horwath as he prepares to close the book on a long and venerable career serving and protecting the citizens of Vassar, Michigan. John’s faithfulness and dedication in his work has made him an invaluable part of law enforcement in Vassar for over 30 years.

As Chief, John has made great strides in making and keeping Vassar a safe and enviable place to call home. Just last February, John put himself at great personal risk when he chased and apprehended a bank robbery suspect who had fled by car and later took off on foot. John’s valor, talent and dedication to duty have been a hallmark of his tenure.

He has helped establish the Vassar Police Department as a top shelf agency that others should seek to emulate. Moreover, the impact of his hard work and adherence to excellence have undoubtedly made a profound difference in the lives of countless people throughout his career.

EXTENSIONS OF REMARKS

John, however, has never been content to limit his contributions to the workplace. He has been an avid and frequent community activist who has worked tirelessly for friends, neighbors and strangers for many years. During the Persian Gulf War, John made it his mission to garner homefront support and display patriotism for our overseas troops. He also has often gone the extra mile in helping coordinate safety measures for scores of events in the Vassar area. In addition, John was one of the first to respond to the needs of his neighbors during the 1986 flood that devastated the community and he earned a special commendation for providing relief and support to the victims.

Those employed in law enforcement fully understand the important role family plays in supporting such work. John’s wife, Katherine, and four children, RaeAnn, Michael, Matt, and John Thomas, have willingly and generously shared John with the community and everyone is the better for it.

Finally, Mr. Speaker, I wish to praise John Horwath’s work ethic and steadfast dedication. He has been an outstanding asset to the Vassar Police Department and the entire community. His presence will be sorely missed. I ask my colleagues to join me in congratulating John for his 36 years of service and in wishing him the best in his retirement.

INTRODUCTION OF THE "THOMASINA E. JORDAN INDIAN TRIBES OF VIRGINIA FEDERAL RECOGNITION ACT"

HON. JAMES P. MORAN
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. MORAN of Virginia. Mr. Speaker, today I am joined by Representatives. J. O ANN DAVIS, RICK BOUCHER, TOM DAVIS, BOBBY SCOTT, and EDWARD SCHROCK in introducing the "Thomasina E. Jordan Indian Tribes of Virginia Federal Recognition Act."

This legislation will grant federal recognition to six Indian tribes in Virginia: the Chickahominy Tribe, Chickahominy Indian Tribe Eastern Division, the Upper Mattaponi, the Rappahannock Tribe, the Monacan Tribe, and the Nansemond Tribe.

As we approach the 400th anniversary of the first permanent European settlement in North America, it seems appropriate that the direct descendants of the native Americans, who met these settlers, should be recognized by the federal government and that we acknowledge these historic tribes and the significance of their heritage. Together, the men and women of these tribes represent a long neglected part of our nation’s history.

The Virginia tribes have fought hard to retain their heritage and cultural identity. The legislation we are introducing today describes the history of the tribes and their early treaty rights with the Kings of England and the colonial government. Like much of our early history as a nation, the Virginia tribes were subdued, pushed off their land, and up to the mid 20th century, denied full rights as U.S. citizens. Despite their devastating losses of land and population, the Virginia Indians successfully overcame the years of racial discrimination that denied them equal opportunities to pursue their education and preserve their cultural identity.

Federal recognition would provide what the government has long denied, legal protections and financial obligations, including certain social services and benefits the federal government provides the 558 recognized tribes. At a time when our nation is trying to remedy past injustices to the Indians, Virginia’s Indians are denied these benefits because none are recognized by the federal government. Not one of the 558 tribes recognized by the federal government reside in Virginia.

I know that the gaming issue may be at the forefront of some members’ concerns. In response to this concern, we have worked to close any potential legal loopholes in the legislation to ensure that the state could prevent casino-type gaming by the tribes. Having maintained a close relationship with many of the members of these tribes, I believe they are sincere in their claims that gambling is inconsistent with their values. This position is already borne out by the fact that none of the tribes today engage in bingo gambling despite the fact that they have all established nonprofit organizations that are permitted under Virginia law to operate bingo games despite compelling financial needs that revenues from bingo could address.

The real issue for the tribes is one of recognition and the long overdue need for the federal government to affirm their identity as Native Americans. Coupled with this affirmation is an opportunity for the tribes to establish a more equitable relationship with the state and secure federal financial assistance for the tribes’ social services, health care and housing needs. Many of their older members face the prospect of retiring without pensions and health benefits that most Americans take for granted.

I urge my colleagues to support this legislation.

INTRODUCTORY COMMENTS: "MEDICARE RURAL AMBULANCE SERVICE EQUITY ACT OF 2001"

HON. JOHN P. MURTHA
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. MURTHA. Mr. Speaker, from an urban setting to the furthest reaches of rural America, Americans have come to expect and rely on health care that includes emergency ambulance service. Unfortunately, for many of us, our first exposure to medical care is, all too often, the EMS unit that responds to our call for help. Yet, for millions of Americans living in rural America this cornerstone of medical care is in danger of collapse.

Typically, rural EMS is a small one or two unit service, staffed by volunteers, not affiliated with a major medical facility, that responds to 350 to 500 calls per year within a large radius (37 miles average) who’s greatest danger to its existence comes from Medicare.

From the Pacific Northwest to the Florida panhandle to the rural setting of Pennsylvania,
A TRIBUTE TO SISTER SHARON BECKER
A HEALTH CARE COMMUNITY LEADER

HON. JERRY LEWIS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. LEWIS of California. Mr. Speaker, I would like today to congratulate Sister Sharon Becker of St. Mary Medical Center in Apple Valley, California, who has been elected to the leadership council of the Sisters of St. Joseph of Orange. Sister Sharon is one of five Sisters who are responsible for giving direction to this health care community.

Since she joined St. Mary Medical Center in 1993, Sister Sharon’s vision and leadership has helped make the hospital one of the most highly-regarded in the High Desert and recognized throughout San Bernardino County for its quality of care. Her dedication to serving the poor and disadvantaged has made St. Mary’s a leader in services to the needy in the area. She has been forceful in convincing other community leaders to also ensure that a safety net remains in place for the truly needy.

While in Apple Valley, Sister Sharon developed a program for at-risk pregnant women that is now a full-fledged outreach center. She opened a High Desert office for Catholic Charities, making its disaster relief and services to the poor available for the first time. She established a Food Resource Center that provides a range of counseling services for families receiving government food assistance. She started an annual “Share the Warmth” drive to acquire shoes and coats for needy children. And she started an annual Thanksgiving food drive for needy families. She was one of the original members of the San Bernardino County Children and Families Commission.

As a member of the leadership council, Sister Sharon will help direct the ministries of the Sisters of St. Joseph of Orange. Through the St. Joseph Health Care System, the council oversees the operation of 15 acute health care facilities, as well as an array of clinics, home-healthcare services and hospices in California, Texas and Arizona. The sisters have been ministering to the sick since 1912 in California, and their hospitals served 143,000 inpatients and 2.3 million outpatients in 2000.

Mr. Speaker, the patients who receive top-notch care at St. Mary’s Medical Center will enthusiastically endorse Sister Sharon as a good choice to help run the ministries health care system. We will miss her direct leadership in the High Desert, but have no doubt that she will ensure that the entire system improves over her five-year term. Please join me in congratulating her and wishing her well in this important new role.

INTRODUCING THE RENTERS RELIEF ACT

HON. ELIOT L. ENGEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. ENGEL. Mr. Speaker, I rise today to introduce legislation that addresses a crisis in our country. My bill, the Renters Relief Act, provides a refundable tax credit of up to $2,500 for people paying more than 30 percent of their income toward housing costs.

Throughout our nation, millions of working families are being forced to pay rent they can’t afford. Housing costs are often the greatest drain on a family’s economic resources.

I would like to call to my colleagues’ attention some disturbing facts from around the country: In Atlanta, Georgia there are 11,907 families waiting for housing assistance from HUD. In Los Angeles Metro region more than 400,000 renters have, incomes less than 50 percent of the area median income, and pay over half of their income for rent or are living in severely substandard housing, the “worst” case scenario. In Boston, the average monthly fair market rent for a two-bedroom apartment in the metro area is $874, that means a family must earn at least $35,000 or else they will be spending more than 30 percent of their income on housing.

We have heard the statistics over and over. The fact is we are not producing enough housing that is guaranteed for low and moderate-income people. We are not building nearly enough public housing to accommodate our needs. Incomes are not keeping up with housing costs. I have been frustrated at not being able to help more of my constituents.

In fact, three years ago Secretary Cuomo said that “Not even families working full-time at minimum wage can afford decent quality housing in the private rental market. This is not just a big city problem but affects America’s growing suburbs as well.”

HUD’s own research indicates that a wide variety of market forces have contributed to this crisis of housing affordability through the 1990s. Among these are “continued suburbanization of population and employment, regulatory barriers to development of multifamily housing, underinvestment in affordable housing by local communities, continuing discriminatory barriers, and the simple economics of supply and demand in which rising incomes for higher income families drive up rents faster than the poorest families can afford. Also, the growth in the crisis during the 1990s can also be attributed to the elimination of Federal appropriation for additional rental vouchers between 1995 and 1998.”

I urge my colleagues to turn the tide. Join me in moving the Renters Relief Act forward!

HONORING DR. BOBBY JONES OF NASHVILLE, TENNESSEE FOR TWENTY-FIVE YEARS OF SERVICE TO THE GOSPEL MUSIC INDUSTRY

HON. BOB CLEMENT
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. CLEMENT. Mr. Speaker, I rise today to honor Dr. Bobby Jones of Nashville, Tennessee. For more than twenty-five years, he has promoted and performed gospel music during his “Bobby Jones Gospel” show worldwide. In fact, I have known him for a number of years and consider him to be a personal friend.

Bobby Jones is truly a pioneer in taking gospel music to a wider audience via tele­vision programming beginning with his local television show on WSMV–Channel 4 in Nash­ville, and over the past twenty years as a person­ality on Black Entertainment Television (BET). His programs have inspired, informed, and entertained a generation of Americans. In fact, “Bobby Jones Gospel” is credited with...
being the first and only nationally syndicated black gospel television show. Jones has also produced a wealth of new musical talent to the world through his television shows. Artists such as Yolanda Adams, Kirk Franklin, and Hezekiah Walker first came to the attention of the public after being showcased on “Bobby Jones Gospel.” Additionally, his video program on BET, is the only national black gospel video program to date. He also hosts a weekly syndicated gospel countdown show heard on radio stations across the nation.

Bobby Jones has always aspired to great things. The Henry County, Tennessee, native dreamed of a musical career at an early age, which drove him to graduate from high school at the age of 15 and to earn a bachelor’s degree from Tennessee State University (TSU) at the age of 19. An education major, he went on to earn a master’s degree from TSU, and doctorate from Vanderbilt University. Upon graduation, Jones successfully taught in both the Tennessee and Missouri school systems. He is also credited with forming the now familiar “Black Expo,”—fairlike events, which take place across the Nation and celebrate the many contributions of African Americans to the community in which they take place.

Bobby Jones has been honored numerous times by his peers. In 1980, he received The Gabriel Award and an International Film Festival Award for writing and performing Make A Joyful Noise. In 1982, he was nominated for a Grammy Award, along with his group, New Life. The Gospel Music Association (GMA) honored him in 1984, with a Dove Award for Black Contemporary Album of the Year. That same year he picked up a Grammy Award for “Best Vocal Duo for a Soul/Gospel Performance” for the single he recorded with Barbara Mandrell, “I’m So Glad I’m Standing Here Today.” He also won an NAACP Image Award in 1984. The GMA honored him with the “Commonwealth Award for Outstanding Con-tribution to Gospel Music” in 1990. In 1994, Jones was nominated for a Cable ACE Award. His autobiography, My 25 Years in Gospel Music: Make A Joyful Noise was recently released by Doubleday Books. Another recent venture is his new television program “Bobby Jones Presents . . .” for the Word Network. This show contains classic performances from “Bobby Jones Gospel.”

Jones is to be commended and honored for twenty-five years of outstanding service to the gospel music industry. He is a beloved figure in the gospel music industry. He is a beloved figure for many years to come.

TWENTY-FIVE YEARS OF THE HELSINKI COMMISSION

HON. STENY H. HOYER
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. HOYER. Mr. Speaker, twenty-five years ago this month, on June 3, 1976, a law was enacted creating the Commission on Security and Cooperation in Europe. We know it as the “Helsinki Commission.” One of the smallest and most unique bodies in the U.S. Government, it perhaps ranks among the most effective for its size. I have been proud to be a member of the Commission for the past 16 years.

When President Gerald Ford signed, in Helsinki in 1975, the Final Act of the Conference on Security and Cooperation in Europe, he said that “history will judge this Conference not by what we say here today, by what we do tomorrow—not only by the promises we make, but by the promises we keep.” That piece of rhetoric has not only been repeated in various forms by every United States President since; it has continually served as a basis for U.S. policy toward Europe.

Credit for this fact, and for the Commission’s establishment, first goes to our late colleague here in the House, Millicent Fenwick, and the late-Senator Cliffside Cove, both of New Jersey. Observing the foundation of human rights groups in the Soviet Union and Eastern Europe was hoped to encourage their governments to keep the promises made in Helsinki, she and other Members of Congress felt it would be good to give them some signs of support. Keep in mind, Mr. Speaker, that this was in the midst of detente, meeting dissidents, and other otherwise antagonistic great powers. It was a time when the nuclear B52 was thought to be more powerful than the human spirit, and the pursuit of human rights in the communist world was not considered sufficiently realistic, except perhaps as a propaganda tool with which to woo a divided European continent and polarized world.

The philosophy of the Commission was otherwise. Respect for human rights and fundamental freedoms is, as the Helsinki Final Act indicates, a prerequisite for true peace and true security. As such, it is also a principle guiding relations between states, a legitimate matter for discussion among them. This philosophy, broadened today to include democratic norms such as free and fair elections and respect for the rule of law, remains the basis for the Commission’s work.

Of course, the Commission was not meant to be a place for mere debate on approaches to foreign policy; it had actually to insert itself into the policy-making process. The Commission staff led during those early years by R. Spencer Oliver, was superb in this respect. It knew the Soviet Union and Eastern Europe. It worked with non-governmental organizations to increase public diplomacy and, subsequently, public support for human rights advocacy. The staff developed the ability to insert principle into policy at the negotiating table. Over time, as State Department and other Executive-brach officials would come and go, the Commission staff developed the institutional memory to recall what worked and what doesn’t, allowing human rights policy to be more powerful than the human spirit, and the pursuit of human rights in the communist world was not considered sufficiently realistic, except perhaps as a propaganda tool with which to woo a divided European continent and polarized world.

The Helsinki Commission also became the champion of engagement. Commission members did not simply speak out on human rights abuses; they also traveled to the Soviet Union and the communist countries of East-Central Europe, meeting dissidents, observing the arrests and seeking to gain access to those in the prisons and prison camps. At first, the Commission was viewed as such a threat to the communist system that its existence would not be acknowledged, but Commissioners went anyway, in other congressional capacities until such time that barriers to the Commission were broken down. The Commission focus was on helping those who had first inspired the Commission’s creation, namely the Helsinki and human rights monitors, who had been severely persecuted for assuming the mid-1970s that they could act upon their rights. Ethnic rights, religious rights, movement, association and expression rights, all were under attack, and the Commission refused to give up its dedication to their defense.

Eventually, the hard work paid off, and the beginning of my tenure with the Commission coincided with the first signs under Gorbachev that East-West divisions were finally coming to an end. Sharing the chairmanship with my Senate counterpart, first Alfonse D’Amato of New York and then Dennis DeConcini of Arizona—the Commission argued against easing the pressure at the time it was beginning to produce results. We argued for the human rights counterpart of President Reagan’s “zero option” for arms control, in which not only the thousands of dissidents and protesters, and millions of everyday people—workers, farmers, students—all felt more openings, real freedom, and a true security. As such, it is also a principle guiding relations between states, a legitimate matter for discussion among them. This philosophy, broadened today to include democratic norms such as free and fair elections and respect for the rule of law, remains the basis for the Commission’s work.

Of course, the Commission was not meant to be a place for mere debate on approaches to foreign policy; it had actually to insert itself into the policy-making process. The Commis-
Commission was among the first to suggest not as rhetoric but as a real possibility the holding of free and fair elections, tearing down the Berlin Wall, and beginning a new world order in Europe.

Of course, Mr. Speaker, those of us on the Commission knew that the fall of communism would give rise to new problems, namely the extreme nationalisms which communism swept under the rug of repression rather than neutralized with democratic antiseptic. Still, none of us fully anticipated what was to come in the 1990s. It was a decade of democratic achievement, but it nevertheless witnessed the worst violations of Helsinki principles and provisions, including genocide in Bosnia-Herzegovina and brutal conflicts elsewhere in the Balkans as well as in Chechnya, the Caucasus and Central Asia, with hundreds of thousands innocent civilians killed and millions displaced. Again, it was the Commission which helped keep these tragedies front and center in Western and other minds—through human rights, holding hearings, visiting war zones and advocating an appropriately active and decisive U.S. response. In the face of such serious matters, too many sought to blame history and even democracy, equated victim with aggressor and flippantly abandoned the principles upon which Helsinki was based. Again the Commission, on a bipartisan basis in dialogue with different Administrations, took strong issue with such an approach. Moreover, with our distinguished colleague, CHRISTOPHER SMITH of New Jersey, taking his turn as Chairman during these tragic times, the Commission took on a new emphasis in seeking justice for victims, providing much needed humanitarian relief and supporting democratic movements in places like Serbia for the sake of long-term stability and the future of the people living there.

In this new decade, Mr. Speaker, the Commission has remained actively engaged on the issues of the time. Corruption and organized crime, trafficking of women and children into sexual slavery, mass murders on religious and other grounds, legal and discrimination in society, particularly against Romani populations in Europe, present new challenges. Senator BEN NIGHTHORSE CAMPBELL of Colorado, the latest Commission Chairman, has kept the Commission current and relevant. In addition, there continue to be serious problem areas or widespread or systemic violations of OSCE standards in countries of the Balkans, Central Asia and the Caucasus, or reversals of democratization process as in Belarus. The Commission was born in the Cold War, but its true mission is to strive for a world where freedom, justice and development is so vitally important to this country.

To conclude, Mr. Speaker, I wish to erase any illusion I have given in my praise for the Helsinki Commission on its first quarter of a century that it had single-handedly vanquished the Soviet empire or stopped the genocidal policies of Slobodan Milosevic. No, this did not occur, and our own efforts pale in comparison to the courage and risk-taking of human rights activists in the countries concerned. But I would assert, Mr. Speaker, that the wheels of progress turn through the interaction of numerous cogs, and the Commission has been one of those cogs, maybe with some extra grease. The Commission certainly was the vehicle through which the United States Government was able to bring the will of the American people for morality and human rights into Euro-American diplomacy.

To those who were in the Soviet gulag, or in Ceausescu’s Romania as a recent acquaintance there relayed to me with much emotion, the fact that some Americans and others were out there, speaking on their behalf, gave them the will to survive those dark days, and to continue the struggle for freedom. Many of those voices were emanating in the non-governmental community, groups like Amnesty International, Freedom House and Human Rights Watch. Through the Helsinki Commission, the voice of the United States Congress was said to be heard as well, and I know that all of my colleagues who have been on the Commission or worked with it are enormously proud of that fact.

IN MEMORY OF MR. JAMES V. PSENICKA

HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. KUCINICH. Mr. Speaker, I rise today to honor the memory of a very fine man, Mr. James V. Psenicka, for his dedicated years of service and countless contributions to the community.

Mr. Psenicka was born in Maple Heights to Czech immigrants who met and married in the United States. The family then moved to Streetsboro to purchase land. Mr. Psenicka graduated from Kent State High School in 1950 and immediately joined the staff of “The Neighborhood News” where he served as a reporter and advertising salesman. He soon earned his bachelor’s degree in journalism from Kent State University in 1955.

Although his commitment to “The Neighborhood News” earned the newspaper countless awards and honors, Mr. Psenicka kept family and friends first. He enjoyed traveling with his wife and three sons to Canada, Greece, Europe, and many other places. He relished boating and gardening. You would often see Mr. Psenicka off the coast of Lake Erie fishing.

Mr. Psenicka also had an incredible dedication to his local community. He served as a member of Karlin Hall on Fleet Avenue and the Small Business Advisory Council to the U.S. Congress. In addition, Mr. Psenicka served as a dedicated member to the Kiwanis Club of South East Cleveland, the world’s largest service organization.

Mr. Speaker, please join me in honoring the memory of Mr. James V. Psenicka, a man that has touched the Cleveland and world community in many ways. His love, dedication, and honor will be greatly missed.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT OF 2002

SPEECH OF
HON. WES WATKINS
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 21, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2217) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes.

Mr. WATKINS. Mr. Speaker, I rise today in support of H.R. 2217, the Interior Appropriations Act for Fiscal Year 2002. Among the components of that act is funding for the Department of Energy’s Office of Fossil Energy and its program of oil and natural gas research and development. Few among us understand what an important role oil and natural gas research and development plays in our nation’s ability to produce critical quantities of those resources for our domestic consumption.

I would like to introduce into the RECORD today one of the recommendations contained in a report of the Interstate Oil and Gas Compact Commission (IOGCC) entitled A Dependent Nation: How Federal Oil and Natural Gas Policy is Eroding America’s Economic Independence. This report contains the IOGCC’s “governors’ own set of recommendations for a national oil and natural gas policy. It is my hope that this information will help explain why federally funded oil and natural gas research and development is so vitally important to this country.

RECOMMENDATION 2: PROMOTE THE EXPANSION OF RESEARCH TO RECOVER DOMESTIC OIL AND GAS RESOURCES

This far-reaching recommendation encompasses a number of initiatives designed to ensure the nation’s reserves are fully developed. First, to make informed decisions regarding the nation’s energy future, the public must have definitive information on the actual domestic petroleum resource.

For example, there are vast known reserves of oil in the United States. The IOGCC estimates that 361 billion barrels will remain in the ground after conventional recovery technologies have been applied. In addition, there are oil and natural gas reserves located on private and public lands and offshore that have not been analyzed or catalogued. Some of these reserves may exist in environmentally sensitive areas or in difficult-to-access locations that would require extraordinary exploration and production measures or advanced research to develop. Therefore, in addition to identifying the entire oil and gas resource base of the country,
DEFINING THESE RESOURCES IS ONLY A FIRST STEP. AS AN ADVOCATE-FOR OIL AND NATURAL GAS RESEARCH, THE IOGCC ALSO STRONGLY SUPPORTS PROGRAMS TO PROVIDE ADDITIONAL RESEARCH AND DEVELOPMENT (R&D) IN AN INVESTMENT IN THE COUNTRY'S FUTURE AND ITS ENERGY SECURITY. "TECHNOLOGICAL ADVANCE MIGHT BE THE MOST IMPORTANT FACTOR IN GUARANTEERING AMERICA'S NONRENEWABLE RESOURCES LAST FOREVER."

As noted by the Task Force on Strategic Energy Research and Development, "There is growing evidence of a brewing 'R&D crisis' in the United States—the result of cutbacks and refocusing in private-sector R&D and reductions in federal R&D. Support for research and development is indeed being simultaneously reduced in the private and public sectors. R&D cannot be turned on and off like a water tap. The acquisition of new knowledge and the embodiment of new knowhow and services in the economy is a cumulative process that requires continuous effort to sustain. The accumulation of cutbacks in public and private R&D costs the United States a major shortfall and setbacks in R&D in the United States—characterized by the lack of consistent attention to longer-term needs and problems, a shrinking population of scientists and engineers available to perform high-quality R&D, and a loss of incentives and opportunities for new generations of technologists." A 1997 report commissioned by the IOGCC confirmed the declining trend in oil and gas research and development. "When private R&D is federal expenditure of R&D in the outlook is more bleak. Private spending is substantially... but federal spending remains disproportionately small compared to the relative importance of oil and gas to U.S. energy requirements."

Enrollment in petroleum-related majors at America's colleges and universities has shrunk dramatically. According to the University of Texas at Austin, home of one of the largest petroleum engineering programs in the nation, undergraduate enrollment in the Department of Petroleum Engineering plummeted more than 80 percent from a high of 1,200 in 1982 to 222 in 1999. About 1,300 students currently are enrolled in undergraduate petroleum engineering programs in the U.S., down sharply from more than 11,000 in 1983. A 1997 study published by the IOGCC expressed alarm at the loss of experienced and entry-level technical personnel, noting "there is a 5- to 7-year gap between decisions to increase exploration budgets and resulting new oil production, even when experienced technical staff are available. However, few have considered the long-term effects of the 1986 petroleum jobs massacre (in which 500,000 jobs were lost) and how the events of 10 years ago will influence future energy policy and supplies...Any crisis in oil supply causing increases in domestic activity will be constrained by a lack of qualified staff. The federal government could fulfill a vital role in reversing the trend. The country's network of national laboratories, for example, could be used and suited for the mission of energy research.

In addition, the IOGCC supports a reallocation of U.S. Department of Energy resources to provide research and development funding for oil and natural gas. The DOE's budget request totals $18.9 billion for fiscal year 2001. For fossil energy research and development, $176 million, less than 2 percent of the budget. About $160 million is requested for oil and natural gas research. This represents slightly more than 1 percent of total DOE energy research expenditures. The DOE's Office of Fossil Energy highlights the importance of R&D. "Looking forward, the domestic oil and gas industry will be challenged to continue extending the frontiers of technology. Ongoing advances in exploration and production (E&P) productivity are essential if producers are to keep pace with steadily growing demands for oil and gas, both in the United States and abroad."

The NPC notes "producers are turning to private agencies to develop new technology for specific applications. Industry consortia have been formed to address critical technology challenges such as deep water development. While many of these changes improve the efficiency with which research and development dollars are spent, concern has been expressed that basic and long-term research are not being adequately addressed. Meanwhile, solar and renewables technologies, which provide less than 10 percent of U.S. energy, would receive more than $457 million. The 28 percent increase in funding ($99 million) for 2001 represents more than the total request for oil and natural gas research. Reality dictates that additional funding for oil and natural gas research and development is unlikely. However, the IOGCC supports a drastic shift in how available tax dollars are spent. In the early years of the DOE, large and expensive demonstration projects dominated R&D spending. "That early emphasis on demonstration projects, reflecting the turmoil of the late 1970s, was, in retrospect, misplaced." Despite billions of dollars spent on renewable energy R&D during the period of 1990-1999, there has been little impact by renewables on the nation's total energy consumption pattern (Figure 6). In fact, in 1999, renewables supplied a nearly identical percentage of the nation's total energy consumption as in 1975. According to Hodel and Deitz, "however important alternative sources eventually may be, our best estimate is that we will continue to meet our energy needs with oil and gas for at least the remainder of this and the next generation of Americans, and very possibly several succeeding ones as well. Without some kind of energy breakthrough or aggressive government mandates, oil and gas appear certain to be our predominant fuels for the next 40 to 100 years." A broad range of parties assembled by the National Petroleum Council to assess the future of the oil and gas industry expressed...surprisingly broad agreement...on the outlook for the next 21 years, including, "The United States and the world will still be using large amounts of oil and gas in 2030, not significantly different from the more than 60 percent share of world energy consumption these fuels represent today."

The case for redirecting R&D dollars to where they would provide more effective is especially compelling when one considers budget freezes and cutbacks. Past successes, including...three-dimensional seismic, polycrystalline diamond drill bits and horizontals...have increased lower costs and improved recovery, should be built upon.

To ensure that these limited resources are spent wisely, the IOGCC recommends the budgets for energy research and development be considered by the same congressional subcommittees. Current congressional structure oversimplifies fossil fuel and renewables research budgets to be evaluated in separate budget bills handled by separate subcommittees of the House and Senate Appropriations Committees. As a result, separate comparisons of expenditures and impacts are difficult, and there is a lack of flexibility in allocating finite resources."

The NPC notes the "past three decades, the petroleum business has transformed itself into a high-technology industry... Looking forward, the domestic oil and gas industry will be challenged to continue extending the frontiers of technology. Ongoing advances in exploration and production (E&P) productivity are essential if producers are to keep pace with steadily growing demand for oil and gas, both in the United States and worldwide. Continuing innovation will also be needed to sustain the industry's leadership in the intensely competitive international arena, and to retain high-paying oil and gas industry jobs at home."

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

SPEECH OF HON. JAMES V. HANSEN OF UTAH IN THE HOUSE OF REPRESENTATIVES

Thursday, June 21, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2217) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes;

Mr. HANSEN. Mr. Chairman, H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, contained language under the National Park Service/Land Acquisition and State Assistance section regarding federal grants to the State of Florida for acquisition of lands or waters within the Everglades National Park, including the areas known as the Frog Pond, the Rocky Glades and the Eight and One-Half Square Mile Area. This language begins on page 29, line 15 of the House engrossed bill and continues until page 30, line 11. This language does not constitute any new authority to acquire land or to obligate funds beyond existing law under Public Law 101-229, the Everglades National Park Protection and Expansion Act of 1989. The Committee on Resources has primary jurisdiction over this statute. The authority of the federal government to acquire land, directly or indirectly by eminent domain, must be specific. If I felt that this language in the Interior appropriations bill authorized new acquisition authority, I would be exercising more power than the rules of the House of Representatives to have the language struck on a point of order.

Similarly, nothing in this language from the Interior appropriations bill provides any new project authorization beyond that contained in the Everglades National Park Protection and Expansion Act. Again, I would have raised a point of order against the text if I believed that it constituted new or amended project authori-

I hope this clarifies any questions or concerns that my colleagues or the public might have regarding these provisions.

HON. ZOE LOFGREN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Ms. LOFGREN. Mr. Speaker, I rise to congratulate Reverend John L. Freeseemann of the Holy Redeemer Lutheran Church in San Jose, California, on the 25th Anniversary of his Ordination. On the 27th day of June, 1976, Reverend John L. Freeseemann was ordained in the Lutheran Church. For 25 years he has served both his parish community and the people of Santa Clara County faithfully and devotedly.

Reverend John Freeseemann has been a tireless advocate of ecumenism in San Jose and the surrounding communities; he has provided a decade of responsible leadership as a board member and past president of the California Council of Churches, and is a founding member and the current president of California Church Impact. Reverend Freeseemann has also served for eight terms as president of the Santa Clara County Council of Churches. Reverend John Freeseemann gives tirelessly of his time and talents to support children and families as a founding member, two-term vice president, and current president of Resources for Families and Communities in Santa Clara County.

As the pastor of Holy Redeemer Lutheran Church for 11 years, Reverend Freeseemann has established his San Jose parish as a place of safety, of compassion and of hope. Under his loving guidance, Holy Redeemer has expanded its ministries to the community at large.

I wish to congratulate Reverend John L. Freeseemann on this, the 25th Anniversary of his Ordination, and to thank him for his many years of service to the people of San Jose. Our community is the richer for his faithful service.

INTRODUCTION OF THE BIO-TECHNOLOGY AND AGRICULTURE IN THE DEVELOPING WORLD ACT OF 2001

HON. EDDIE BERNICE JOHNSON
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

My bill establishes a grant program under the Foreign Agricultural Service in the Department of Agriculture to encourage research in agricultural biotechnology. Eligible grant recipients include historically black colleges and universities, land-grant colleges, Hispanic serving institutions, and tribal colleges or universities. Non-profit organizations and consortia of for-profit and in-country agricultural research centers are also eligible.

I encourage my colleagues to support this important piece of legislation.

EXTENSIONS OF REMARKS

HON. E. CLAY SHAW, JR.
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

Mr. SHAW. Mr. Speaker, the U.S. Postal Service links together cities and towns, large and small, across America through delivery of the mail. Since our nation’s founding, mail delivery has been especially important to rural America, places that were at first a long walk away, then a long horse ride, and even for years a long automobile ride from the nearest post office. The Internet today has helped reduce the distance between cities, and even countries, but mail delivery continues to be an important function for all Americans.
Most Americans, probably, are unaware that for decades rural letter carriers have used their own transportation to deliver the mail. This includes all rural letter carriers who today drive their own vehicles in good weather and bad, in all seasons, in locations that can range from a canyon bottom to mountain top, ocean view to bayou. Rural letter carriers drive over 3 million miles daily and serve 24 million American homes, over 66,000 rural and suburban routes. The mission of rural letter carriers has changed little over the years, but the type of mail they deliver has changed substantially—increasing to over 200 billion pieces a year. And although everyone seems to be communicating by email these days, the Postal Service is delivering more letters than at any time in our nation’s history. During the next decade, however, we know that will change.

Electronic communication is expected to accelerate even faster than it has in the last five years. Some of what Americans send by mail today will be sent online. According to the General Accounting Office (GAO), that will include many bills and payments. In its study, U.S. Postal Service: Challenges to Sustaining Performance Improvements Remain Formidable on the Brink of the 21st Century, dated October 21, 1999, the GAO reports that the Postal Service’s core business—letter mail—will decline substantially. As a result, the revenue the Postal Service collects from delivering First-Class letters also will decline.

While the Internet will eventually reduce the amount of letter mail rural letter carriers deliver, the Internet will present some new opportunities for delivering parcels. Rural letter carriers have for decades delivered the packages we order from catalogs, and now they deliver dozens of parcels every week that were ordered online. For some rural and suburban Americans the Postal Service still remains the only delivery service of choice. Today, the Postal Service has about 33 percent of the parcel business. However, if the Postal Service is as successful as it hopes in attracting more parcels, that could create a problem for rural carriers. Most items ordered by mail are shipped in boxes that, once filled, are much more expensive to operate than traditional vehicles—especially with today’s higher gasoline prices. So without the ability to use the actual expense method and depreciation, rural carriers must use their pay to cover vehicle expenses. Additionally, the Postal Service has placed 11,000 postal vehicles on rural routes, which means those carriers receive no EMA.

All these changes combined have created a situation contrary to the historical Congressional intent of using reimbursement to fund the government service of delivering mail, and also has created an inequitable tax situation for rural letter carriers. If actual business expenses exceed the EMA, a deduction for those expenses should be allowed. I believe we must correct this inequity, and so I am introducing a bill that would reinstate the deduction for a rural letter carrier to claim the actual cost of the business use of a vehicle in excess of the EMA reimbursement as a miscellaneous itemized deduction.

In the next few years, more and more Americans will use the Internet to get their news and information, as well as receive and pay their bills. But mail and parcel delivery by the United States Postal Service will remain a necessity for all Americans—especially those in rural and suburban parts of the nation. Therefore, I encourage my colleagues to support this bill and ensure fair taxation for rural letter carriers.

EXTENSIONS OF REMARKS

June 27, 2001

Mr. MORAN, and the Chairman of the Judiciary Committee, Mr. SENSENBRINNER, the Class Action Fairness Act of 2001.

Mr. BOB GOODLATTE, of Virginia

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. GOODLATTE. Mr. Speaker, I am pleased to introduce today, along with my good friends from Virginia, Mr. BOUCHER and Mr. MORAN, and the Chairman of the Judiciary
class actions moot. This creates an incentive for each class counsel to obtain a quick settlement of the case. This offers an opportunity for the defendant to play the various class counsel against each other and drive the settlement value down. The loser in this system is the class member whose claim is extinguished by the settlement, at the expense of counsel seeking to be the one entitled to recovery of fees.

Our bill is designed to prevent these abuses by allowing large interstate class actions to be heard in federal court. It would expand the statutory diversity jurisdiction of the federal courts to allow class action cases involving minimal diversity—that is, when any plaintiff and any defendant are citizens of different states—to be brought in or removed to federal court.

Article III of the Constitution empowers Congress to establish federal jurisdiction over diversity cases—cases where the defendant is a citizen of a different State." The grant of federal diversity jurisdiction was premised on concerns that state courts might discriminate against out-of-state defendants. In a class action, only the citizenship of the named plaintiffs is considered for determining diversity, which means that federal diversity jurisdiction will not exist if the named plaintiff is a citizen of the same state as the defendant, regardless of the citizenship of the rest of the class. Congress also imposes a monetary threshold—now $75,000—for federal diversity claims. However, the amount in controversy requirement is satisfied in a class action only if all of the class members are seeking damages in excess of the statutory minimum.

These jurisdictional statutes were originally enacted years ago, well before the modern class action arose, and they now lead to perverse results. For example, under current law, a citizen of one state may bring in federal court a simple $75,001 slip-and-fall claim against a party from another state. But if a class of 25 million product owners living in all 50 states brings a class action, the federal court must decide which $25 million claim is the controlling one. In connection with this decision, the defendant will be required to show that the plaintiff was injured by a single defective product manufactured for the entire nation. This result is certainly not what the Framers had in mind when they established federal diversity jurisdiction. Our bill offers a solution by making it easier for plaintiff class members and defendants to remove class actions to federal court, where cases involving multiple state laws are more appropriately heard. Under our bill, if a removed class action is found not to meet the requirements for proceeding on a class basis, the federal court would dismiss the action without prejudice and the action could be refiled in state court.

In addition, the bill provides a number of new protections for plaintiff class members including a requirement that notices sent to class members be written in "plain English" and provide essential information that is easily understood. Furthermore, the bill provides judicial scrutiny for settlements that provide class members only coupons as relief for their injuries, and bars approval of settlements in which class members suffer a net loss. The bill also includes provisions that protect consumers from being disadvantaged by living far away from the courthouse. These additional consumer protections will ensure that class action lawsuits benefit the consumers they are intended to compensate.

This legislation does not limit the ability of anyone to file a class action lawsuit. It does not change anybody's rights to recovery. Our bill specifically provides that it will not alter the substantive law governing any claims as to which jurisdiction is conferred. Our legislation merely closes the loophole allowing federal courts to hear big lawsuits involving truly interstate issues, while ensuring that purely local controversies remain in state courts. This is exactly what the framers of the Constitution had in mind when they established federal diversity jurisdiction.

I urge each of my colleagues to support this very important bipartisan legislation.

HONORING HUGH LEE GRUNDY FOR HIS DEDICATED SERVICE TO THE UNITED STATES OF AMERICA

HON. ERNIE FLETCHER
OF KENTUCKY

Wednesday, June 27, 2001

Mr. FLETCHER. Mr. Speaker, today I rise to recognize Hugh Lee Grundy, a man who has devoted a lifetime of hard work and dedication to America’s Armed Forces in Southeast Asia. Mr. Grundy is the retired President of Air America, an organization that served a special and undercover purpose for our nation’s Central Intelligence Agency and allied countries in Asia and throughout the world. Hugh Grundy of Crab Orchard, Kentucky spent 50 to 60 years in the active world of aviation, and I am truly proud to stand here today and honor him here in the U.S. House of Representatives.

Mr. Grundy was born at Valley Hill, Kentucky on the Grundy family farm, which he now owns and operates. Mr. Grundy raised and showed saddle horses at state and county fairs while growing up. Throughout his schooling, he worked on the family farm, a farmstead, rising to the position of assistant General Manager. He learned to fly light planes in Central Kentucky in his teenage years. Mr. Grundy attended Aeronautical School in California and eventually became a teacher there. He then worked for Pan American Airlines.

Mr. Grundy faithfully served his country in various capacities for more than 30 years. During World War II, Mr. Grundy served his country as an Engineering Officer and Air Crew Member. He reached the rank of Major in the United States Army in 1945. At the close of World War II, Mr. Grundy exchanged active duty for the reserves and returned to Pan American. Later he was transferred to Shanghai, China to work for the China National Aviation Corporation.

Mr. Grundy served concurrently as President of Air America, Air Asia, and Civil Air Transport from 1954 to 1976. As President of Air America, Mr. Grundy commanded over 10,000 men and women serving in Vietnam, Cambodia, Laos, and Thailand. Mr. Grundy came out of retirement twice in order to return to preside over Southern Air Transport, a company based in Miami, Florida.

In June of 2001, the CIA presented Mr. Grundy with two citations, one in his capacity as President of Civil Air Transport and Air America, and one to him personally. This was the second time Mr. Grundy was given recognition by the CIA, the first being a medal for Honorable Service upon the occasion of his retirement from Air America.

Today I rise, Mr. Speaker, to salute Mr. Grundy for his commitment to aviation, his service to our country, and his patriotic leadership throughout the years.

INTRODUCTION OF ENERGY MARKETING MONITORING ACT—H.R. 2331

HON. STEPHEN HORN
OF CALIFORNIA

Wednesday, June 27, 2001

Mr. HORN. Mr. Speaker, for the past year, the energy markets in California have been in a state of turmoil that has produced periodic blackouts, soaring prices for electricity and natural gas and an atmosphere of uncertainty about energy supplies for the future. In addition to those serious concerns, there have been a wide range of charges that energy suppliers are engaging in illegal collusion to fix market prices and gouge consumers.

Earlier this year, on Wednesday, 22nd, I asked the General Accounting Office, our nonpartisan and highly professional source for detailed information on many subjects, to investigate what was happening in California and to provide an overview of information on prices and impacts on consumers, producers and electricity providers. I also requested information on the causes of price increases and problems with the reliability of energy supplies. Finally, I requested evaluation of actions taken by the Federal Energy Regulatory Commission, the state of California, and other parties involved.

Although GAO has been able to provide preliminary information regarding California’s supply, demand, and market problems, there has been a significant problem in obtaining the detailed market information necessary for comprehensive analyses or evaluation. GAO interviews with these market participants have yielded only general information and it is unclear at this time whether FERC has in its possession comprehensive market data.

In short, Mr. Speaker, at a time when Congress is wrestling with the complex and highly technical issues involved in both the California market and national energy supply, our own expert agency has limited access to the information it needs to provide analysis of what is happening and recommendations on what should be done to change federal laws and regulations.

In creating the Federal Energy Regulatory Commission (FERC) in 1977 under the Department of Energy Organization Act, Congress did not explicitly address the Commissioner General’s (GAO’s) authority to request and subpoena information from any body subject to FERC jurisdiction. Today, I am introducing legislation to correct this problem by making clear that the GAO and the Commissioner General have the authority to request...
and subpoena information from energy companies or other participants subject to the jurisdiction of the Federal Energy Regulatory Commission.

This legislation clarifies the functions of the Comptroller General to include: Monitoring and evaluating the functions and activities of FERC.

Access to market information from those subject to FERC jurisdiction including energy prices, costs, demand, supply, industry and market structure, auction processes, and environmental impacts.

Authority to issue subpoenas, and compliance with any issued subpoena, to those subject to FERC jurisdiction, including materials related to the jurisdiction of the Federal Energy Regulatory Commission, including materials related to energy prices, costs, demand, supply, industry and market structure, auction processes, and environmental impacts.

“(c) SUBPOENAS.—To assist in carrying out the Comptroller General’s responsibilities under this section, including any audit, investigation, examination, analysis, review or evaluation, the Comptroller General may issue subpoenas to any person described in subsection (b) requiring the production of any books, documents, papers, statistics, data, records, and information.

“(d) SECURING COMPLIANCE WITH SUBPOENA.—Upon petition by the Comptroller General or the Attorney General (upon request of the Comptroller General), any United States district court within the jurisdiction of which an inquiry under this section is carried out may, in the case of refusal to obey a subpoena of the Comptroller General issued under this section, issue an order requiring compliance therewith, and any failure to obey the order of the court may be treated by the court as a contempt thereof."

The text of H.R. 2331 is below:

H.R. 2331

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Energy Market Monitoring Act".

SEC. 2. FINDINGS.

The Congress makes the following findings:

(1) When Congress created the Federal Energy Regulatory Commission in 1977 under the Department of Energy Organization Act, it did not explicitly address the Comptroller General’s authority to request and subpoena information from facilities or businesses engaged in energy matters related to the Federal Energy Regulatory Commission’s activities. Closing gaps in the scope of the Comptroller General’s access to such information would facilitate the Comptroller General’s monitoring of the Nation’s energy programs.

(2) For a function properly to provide consumers with goods at a competitive price, and to protect consumers from unjust prices or price manipulation, the markets must be transparent in their transactions. Although the Federal Energy Regulatory Commission is responsible for market monitoring, it is unclear whether the Federal Energy Regulatory Commission has in its possession or has requested from market participants comprehensive market data.

(3) To ensure transparency of energy markets, and both consumers and suppliers, the General Accounting Office, as the investigative arm of Congress, must have full authority to examine all markets and market participants’ activities.

SEC. 3. FUNCTIONS OF COMPTROLLER GENERAL

(a) AMENDMENT.—Title IV of the Department of Energy Organization Act (42 U.S.C. 7171-7174) is amended by adding at the end the following new section:

"FUNCTIONS OF COMPTROLLER GENERAL

"Sec. 408. (a) SCOPE OF ACTIVITIES.—The Comptroller General shall monitor and evaluate the functions and activities of the Federal Energy Regulatory Commission.

"(b) ACCESS TO INFORMATION.—Any person owning or operating facilities or business premises subject to the jurisdiction of the Federal Energy Regulatory Commission shall provide the Comptroller General with access, including the right to make copies, of any books, documents, papers, statistics, data, records, and information where such material relates to the jurisdiction of the Federal Energy Regulatory Commission, including materials related to energy prices, costs, demand, supply, industry and market structure, auction processes, and environmental impacts.

"(c) SUBPOENAS.—To assist in carrying out the Comptroller General’s responsibilities under this section, including any audit, investigation, examination, analysis, review, or evaluation, the Comptroller General may issue subpoenas to any person described in subsection (b) requiring the production of any books, documents, papers, statistics, data, records, and information.

"(d) SECURING COMPLIANCE WITH SUBPOENA.—Upon petition by the Comptroller General or the Attorney General (upon request of the Comptroller General), any United States district court within the jurisdiction of which an inquiry under this section is carried out may, in the case of refusal to obey a subpoena of the Comptroller General issued under this section, issue an order requiring compliance therewith, and any failure to obey the order of the court may be treated by the court as a contempt thereof."

SEC. 408. Functions of Comptroller General.

INDIAN GOVERNMENT FOUND RESPONSIBLE FOR BURNING SIKH HOMES AND TEMPLE IN KASHMIR

HON. EDOULPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. TOWNS. Mr. Speaker, in March 2000 when President Clinton was visiting India, 35 Sikhs were murdered in cold blood in the village of Chitti Singhpora in Kashmir. Although the Indian government continues to blame alleged "Pakistani militants," two independent investigations, by the Movement Against State Repression and Punjab Human Rights Organization and the International Human Rights Organization based at Ludhiana, have proven that the Indian government was responsible for this atrocity.

Now it is clear that this was part of a pattern designed to pit Sikhs and Kashmiri Muslims against each other with the ultimate aim of destroying both the Sikh and Kashmiri freedom movements. The Kashmir Media Service reported that several thousand Indian soldiers were caught in Srinagar trying to set fire to a Sikh temple and some Sikh homes. Sikh and Muslim villagers overpowered the troops as they were about to sprinkle gunpowder on Sikh houses and the temple. The Border Security Forces rescued several other troops. The villagers even seized a military vehicle, which the army later had to come and reclaim.

At a subsequent protest rally, local leaders said that this incident was part of an Indian government plan to create communal riots. As such, it fits perfectly with the Chitti Singhpora massacre.

Mr. Speaker, India has been trying to commit atrocities in order to promote violence by minorities against each other. Now that the massive numbers of minorities, that the Indian government has murdered, have been exposed, the government is trying to get these same minority groups to kill each other. The plan to create more bloodshed is backfiring on the Indian government. Fortunately, the groups have joined together to oppose the government's plan.

Such a plan is an unacceptable abuse of power. As the leader for democracy in the world, we should take a stand against this government's actions, which target minority groups for violence and abuse.

Given these kinds of actions it makes it very difficult to advocate that this Administration should lift the sanctions against India. To ensure the survival and success of freedom in South Asia, our government should go on record strongly supporting self-determination for all the peoples and nations of South Asia in the form of a free and fair, internationally-monitored plebiscite. This is the best way to support democracy in all of South Asia and to create strong allies for America in that troubled region.

LOSS OF A TRUE HEROINE, MRS. SUSAN WADHAMS

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. SCHAFFER. Mr. Speaker, Tuesday, Colorado lost one of its true heroines, Mrs. Susan Wadhams, of Littleton. Many of us on Capitol Hill also mourn the loss of Susan. She was my Chief of Staff and played an integral part in making many of our most celebrated legislative victories possible.

For most, Susan will be remembered for her boundless passion for America. She was an authentic patriot through and through. She enjoyed her work in the Congress and counted the opportunity a rare privilege. She utilized her station to advance the cause of freedom, liberty and human life every day she was here.

How tragic and ironic it is that her life with us has ended too soon. But Susan firmly persuaded all those around her to eventually share in her unwavering faith in God, and to take comfort in the promise of Heaven. From that standpoint, Mr. Speaker, we know that Susan's life has not ended. It is only different. She has surely joined the Community of Saints, and this I say with confidence, predicted upon what I learned about Susan as our friendship deepened.

First and foremost, Susan was a pious Christian whose devotion to the Lord was established in the ancient traditions of the Roman Catholic Church. She was a wife, a mother, and a grandmother. She lived her life within this context. Her professional accomplishments were all achieved through a consistent ethic wherein the magnanimous goal of
June 27, 2001

improving the American environment for fam-
yli, faith, and children became the exclusive measure
remnant.
For me personally, I am deeply inspired by
Susan’s valor. She left Washington two years ago,
returning to Colorado in order to spend more
time with her husband, her family, and the
community she loved. Leaving the arena of pub-
lic leadership, however, was not an op-
tion for Susan.
You see, Mr. Speaker, Susan understood
America from the perspective of our Nation’s
Founders. She went to her grave convinced
that God has richly blessed the United States of
America and that his design for our coun-
try was of glorious expectation and hope. She
believes that each American shares a burden of
honor and loyalty to the Almighty and that the
essence of American citizenship entails a spir-
itual duty to lead through love. Susan’s love for
her family, friends, neighbors, and ac-
cquaintances was omnipresent though some-
times subtle or complex; yet when fully ap-
preciated was embraced and profound, certainly
invigorating, but more often, infectious.
That was especially the case in our
office.
Susan was a splendid woman—elegant in
every way, and pursuits were of no interest
to her. She would not be distracted. She was
dedicated and disciplined. She lived life the way
she engaged politics—no nonsense, nothing
to excess, just win. Mr. Speaker, there are
dozens of elected officials whose election vic-
tories were engineered by Susan Wadhams.
I’m only one among them all.

Of course, means that have been there
nearly as many whose public goals were
 thwarted by Susan’s political prowess. It’s
simple, Mr. Speaker, if Susan Wadhams was on
your side, your chances of winning were quite
good. If she was against you, you best think
of another line of work. Her opponents re-
pected her, too.

Susan’s passion for America was her ad-
antage, and her faith was her power. This
was a woman who knew herself and knew the
times she was in; whose confidence exuded
leadership and whose leadership caused ac-
tion.

Susan’s battle with cancer was no less he-
roic. If it was, it was in fear, it was well con-
cealed. She was a model of courage, even
before her affliction. Though too short, her life
was complete and her legacy is unmistakable.
I thank God for my acquaintance with Susan.
Our friendship is one I genuinely regard as a
gift of Providence. I miss Susan Wadhams,
and I will never forget her.

Mr. Speaker, others have shared with me
their sentiments on the passing of Susan. I am
deeply grateful for the outpouring of condo-
lement by so many, and I pledge to pass along
these comments to her survivors. Their appreci-
ation, I assure the House, will be great, too.
Mr. Speaker, at this point, I hereby submit for
the RECORD the comments I’ve so far re-
ceived, along with two press accounts of Su-
nan’s life.

For Susan, being tough as nails was second
nature to her, with politics, earning her
a reputation I truly admired. However,
what impressed me most about Susan was
her willingness to aid women in entering the
political arena. Not only was she a mentor
for me, but for many other women who have
crossed the Schaffer office threshold.

Susan loved life, the west, her family
and friends. She once loved daisies. Since
then, I have not looked at a daisy, nor
will I ever without remembering her. I have
lost a friend.—Brandi Graham

Susan Wadhams hired me for my first job
on Capitol Hill. In my interview she said,
‘Not many young women have the courage to
move 2,000 miles away from their friends
and family to pursue their ambitions. I think it’s
great that you are working to follow your
dreams and I would like to be a part of help-
ing young women like you in politics.’ She
continued, ‘We need more women in this
field, [you] would never forget that. I would not
be where I am today without her. Susan
left an indelible mark on all who knew her, she
would be greatly missed.—Melissa Carlson,
former staff member for
Congressman Bob Schaffer and current Dep-
uty Press Secretary for Governor George E.
Patakii, (R-NY).

The best memory Susan ever shared with
me was from her childhood in Colorado.
She had a pet lamb which stayed in a pen just
outside her house in Susan’s. When Susan
went to bed at night, she would open the
window and pull the lamb inside. When the
lamb became too big to pull through the
window, it would never learn how to under-
stand that it could no longer come in. I love
this story. I’m going to miss Susan.—Kriste
Kaefer, the Heritage Foundation.

I’ll like to add that Susan was very, very
happy to be back here in Colorado with her
family during this last year. We’ll miss her
dearly.—Kent Holmes

I think these sums up Susan pretty well:
Strong: Susan was perhaps one of the
strongest individuals I have ever had the
privilege of knowing.
Understated: She accomplished
much through sheer will and force of
personality.
Smart: She possessed a lightning quick wit
and a firm grasp of casuistry.
Activist: Her activist nature was con-
tagious.
Nationalist: A true patriot if there ever
was one.—Rob Nanfelt

When Susan first interviewed me for a Leg-
islative position with Bob, something just
clicked. She talked about how she valued
our lives and how much we missed Colorado.
She had accomplished so much in her life.
As a young staffer striving to make it in the
competitive Capitol Hill environment, I was
impressed by her. I wanted to learn from her
success. Once I started working with Bob, I
saw her as a mentor. We talked freely about
God, family and the importance of focusing
on the right priorities in life. She discussed
her previous bout with cancer and how im-
portant it was to have access to quality
health care. I am sorry she didn’t make it
through this time. My thoughts and prayers
go out to her family. We will miss her.—
Stacy Brooks

Right up to the very end, May 15 to be
exact, Susan was still thinking of others—
she’s son’s birthday was coming up and
she needed a flag flown over the Capitol, and she
needed it by June 17 to present to him for his
birthday. To me it really showed the love she
had for her family, as well as other people.—
Gwen Schwartz

I think that she was a deep down good
woman who loved politics and loved to be in-
volved. She will definitely be missed in CO
and here in DC.—Eric Price

Susan was a terrific Chief in that she pos-
sessed the management skills necessary for
the position but legislatively, she was as
green as the rest of us. Bob’s first staff, his
freshmen staff, had two people with prior
legislative experience and the rest of his
were fresh from Colorado. We knew tons
about the way Colorado’s government worked,
but were unfamiliar with the whole
process of introducing legislation, Whip
meetings, who to call if we needed a picture
hung—all the little things that make an of-
fice hum. The flow of information was al-
ways two ways and we never felt as if Susan
was above us, rather she was with us, learn-
ing together.

Under her guidance, our service to Colo-
radas was crafted to be responsive and dill-
gen. Always steady in her convictions,
Susan approached the challenges of man-
aging the boss, and his staff, with a common
sense approach. Never acting on her own self
interests, she skillfully advocated the staff
and their needs but maintained her author-
ity with a “buck stops here” mentality. She
was the best Chief a staffer could ask for.
Having worked for her, I am a better per-
son.—Marcus Dunn

I admired her very much—she was a great
mentor to me!—Marge Klein

[From the Rocky Mountain News, June 26, 2001]

GOP ACTIVIST SUSAN WADHAMS DIES AT AGE 55
CAMPAIGNER KNOWN FOR ASTUTE JUDGMENT
AND LOVE OF POLITICS

(by Lynn Bartels and Michele Ames)

Susan Wadhams, who campaigned on the
ground for Republican candidates while her
state patrolman father flew three Colorado
governors around the state, was known as a
strong-willed woman who stood by her con-
victions.

Wadhams, the former chief of staff for U.S.
Rep. Bob Schaffer and the spokeswoman for
the Colorado Department of Natural Re-
sources, died of cancer Monday.

She was 55.

“She is going to leave a terrible hole in the
politics of Colorado,” said Walt
Klein, a former campaign manager who hired
Wadhams.

Several friends say they knew of only one
other person whose interest in politics riv-
aled hers: her husband, Dick Wadhams,
spokesman for Gov. Bill Owens.

“They were perfect for each other,” said
Roy Palmer, Owens’ chief of staff. “We’ve
lost a great woman.”

Funeral services are pending.

Susan Marie McBreen was born May 4, 1946,
in Birmingham, Ala., to Lucille and Donald
McBreen, while her father was a military
pilot. After his stint in the service, Donald
McBreen returned to Colorado and Elbert
County and joined the Colorado State Pa-
trol.

Donald McBreen flew three governors:
John Love, John Vanderhoof and Dick
Lamm.

Each McBreen got her political start help-
ing former U.S. Sen. Bill Armstrong in his
first congressional run in 1972.

“She was a very astute judge of people and
candidates,” Armstrong said.

Susan and Dick Wadhams met in 1980 while
working on former Colorado Republican
Susan Wadhams, chief spokeswoman for the Colorado Department of Natural Resources, hired her as communications director.

She came home to Colorado in 1999. The next year, Greg Walcher, director of the Department of Natural Resources, hired her as communications director.

She is survived by her husband; her father; her brother; Craig, an officer with the Aurora Fire Department; two children; Khristie Barker, 33, and Gregory Farrell, 31; and two grandsons.

[From the Denver Post, June 26, 2001]
STATE FIGURE SUSAN WADHAMS DIES
DNR SPOKESWOMAN LOSES CANCER FIGHT
(By Fred Brown and Theo Stein)

Susan Wadhams, chief spokeswoman for the Colorado Department of Natural Resources, died Monday evening after a long struggle with cancer. She was 55.

Wadhams, the wife of Gov. Bill Owens' press secretary, Dick Wadhams, had worked for the state since January 1999.

"Susan was a close personal friend," Owens said. "Colorado has lost a very special person."

As the main public information officer for the Department of Natural Resources, Wadhams had to stay current on some of the state’s stickiest land management debates.

In the past year, she wrote press releases about the state’s support for the Animas-La Plata dam project, a challenge to federal population data on black-tailed prairie dogs and a controversial predator control study.

Susan Wadhams also served as head of the interdepartmental information team, which is responsible for coordinating information on oil and gas exploration, the state land board, forestry and parks.

She also was a member of the Judicial Nominating Commission for the Jefferson County district.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, June 28, 2001 may be found in the Daily Digest of today’s RECORD.

MEETINGS SCHEDULED

JULY 10
2:30 p.m.
Foreign Relations
To hold hearings on the nomination of Lori A. Forman, of Virginia, to be Assistant Administrator for Asia and the Near East, United States Agency for International Development.

SD-419

JULY 11
9:30 a.m.
Governmental Affairs
To hold hearings on S.803, to enhance the management and promotion of electronic Government services and processes by establishing a Federal Chief Information Officer within the Office of Management and Budget, and by establishing a broad framework of measures that require using Internet-based information technology to enhance citizen access to Government information and services.

SD-342

JULY 12
10 a.m.
Appropriations
Transportation Subcommittee
Business meeting to markup proposed legislation making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002.
The House met at 9 a.m.

The Reverend Byron E. Powers, Senior Pastor, The Church Love Is Building, Church of God, Sheffield, Ohio, offered the following prayer:

So we pray, Almighty and Gracious God, Your Word declares that "this is the day that the Lord has made." We recognize this day that You have given us, these great United States, for our heritage. Help us to treasure and guard it. Help us, this day, always to prove ourselves to be cognizant of Your favor and eager to fulfill Your awesome purpose in this world. Forgive us for our sin, the discord, confusion, pride, and arrogance, that hinders our relationship with You and one another.

In our diversity, mold us into one united people. Empower our leaders this day with the spirit of wisdom, so that righteousness, justice, and peace may prevail and that, through obedience to Your commandments, we may show forth Your praise among the nations of the Earth.

So, Heavenly Father, we ask this day that our Nation and leaders will be blessed; that our influence will be enlarged; that Your hand would be upon us, and keep us from evil that we may not cause pain. We pray this in Your Name that is above all others. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Texas (Mr. HALL) come forward and lead the House in the Pledge of Allegiance.

Mr. HALL of Texas led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The gentleman from Ohio (Mr. NEY) is recognized for 1 minute and to revise and extend his remarks.

Mr. NEY. Mr. Speaker, it is my privilege to welcome the Honorable Reverend Byron E. Powers as our guest chaplain. Reverend Powers is currently the Senior Pastor of the Church Love Is Building in Sheffield, Ohio, one of the great parishes in the region.

Reverend Powers has devoted his life to helping others, and previously served as the senior pastor for churches in Illinois and Florida. He has earned a Bachelor of Arts in Psychology from Lee University and a Master of Arts in Clinical Pastoral Counseling from Ashland Theological Seminary. In addition to his pastoral responsibilities, he currently serves as senior chaplain to the Lorain Police Department. He has been married for 19 years to his wife Frankie, and they have three wonderful children, Sarah, Rachel and Nathan.

Reverend Powers is a leader in the community. His commitment and compassion for those less fortunate has led him to assist many in the area around Sheffield while working tirelessly to serve his community and the great State of Ohio.

It is my distinct pleasure to welcome Reverend Powers to the Congress of the United States and thank him for leading the House in prayer.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

The SPEAKER. Pursuant to House Resolution 180 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2311.

 seznam

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes, with Mr. SIMPSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole House rose on Wednesday, June 27, 2001, a demand for a recorded vote on the amendment offered by the gentleman from Michigan (Mr. BONIOR) had been postponed and the bill was open for amendment from page 22, line 19, through page 22, line 4.
CONGRESSIONAL RECORD—HOUSE  
June 28, 2001

CONGRESSMAN RODNEY T. TACREDO  
(20th District of Colorado)  

The CHAIRMAN. The gentleman from Colorado (Mr. TACREDO) and the defendant, the Chair, demand the aye or no vote on the amendment offered by the gentleman from Colorado (Mr. TACREDO) in order to bring the pending business to a vote.

The CHAIRMAN. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Colorado (Mr. TACREDO) on which further proceedings were postponed and on which the ayes prevailed by voice vote. The Clerk will redesignate the amendment. The text of the amendment is as follows:

Amendment No. 4 offered by Mr. TACREDO  

In title I, strike section 105 (relating to shore protection projects cost sharing).
Amendment offered by Mr. HINCHY. In title III, in the item relating to "DEPARTMENT OF ENERGY PROGRAMS; ENERGY SUPPLY" after the aggregate dollar amount, insert the following: "(increased by $50,000,000)."

Amendment offered by Mr. HINCHY. In title III, in the item relating to "ATOMIC ENERGY DEFENSE ACTIVITIES NATIONAL CIVILIAN NUCLEAR SECURITY ADMINISTRATION; WEAPONS ACTIVITIES" after the aggregate dollar amount, insert the following: "(reduced by $60,000,000)."

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The CHAIRMAN. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 163, noes 258.

[Names of Representatives voting 'aye' and 'no' are listed here.]

[Vote result is announced.]

Mr. CAMP and Mr. ROHRABACHER changed their vote from "aye" to "no." Mr. SHERMAN changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. HINCHY.

The CHAIRMAN. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from New York (Mr. HINCHY) on which further proceedings were postponed and on which the ayes prevailed by a voice vote.

The Clerk will designate the amendment.

The text of the amendment is as follows:

```
Amendment offered by Mr. HINCHY: In title III, in the item relating to "DEPARTMENT OF ENERGY PROGRAMS; ENERGY SUPPLY" after the aggregate dollar amount, insert the following: "(increased by $50,000,000)."

Amendment offered by Mr. HINCHY. In title III, in the item relating to "ATOMIC ENERGY DEFENSE ACTIVITIES NATIONAL CIVILIAN NUCLEAR SECURITY ADMINISTRATION; WEAPONS ACTIVITIES" after the aggregate dollar amount, insert the following: "(reduced by $60,000,000)."

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The CHAIRMAN. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 163, noes 258, not voting 12, as follows:

[Roll No. 201]

Mr. PASTOR changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT NO. 2 OFFERED BY MR. KUCINICH

The CHAIRMAN. The unfinished business is the demand for a recorded vote on amendment No. 2 offered by
The gentleman from Ohio (Mr. KUCINICH), on which further proceedings were postponed and on which the noes prevailed by a voice vote.

The Clerk will redesignate the aggregate dollar amount, the following: “(reduced by $112,500,000)”. In title III, in the item relating to “Defense Nuclear Nonproliferations”, after the aggregate dollar amount, the following: “(increased by $66,000,000)”. (Roll No. 202)

NOT VOTING—11

Mr. KIND and Mr. FRANK changed their vote from “aye” to “no.”

So the amendment was rejected.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. ERLICH, Mr. Chairman, on rollcall Nos. 199, 200, 201, and 202, I was unable to vote. Had I been present, I would have voted “no” on all four.

AMENDMENT OFFERED BY MR. BONIOR

The CHAIRMAN. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Michigan (Mr. BONIOR), on which further proceedings were postponed, and which the ayes prevailed by voice vote.

The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. BONIOR:

At the end of the bill, insert after the last sentence (preceding the short title) the following new section:

SEC. 803. No funds provided in this Act may be expended to issue any permit or other authorization under section 10 of the Rivers and Harbors Appropriation Act of 1899 (33 U.S.C. 463), or to issue any other lease, license, permit, approval, or right-of-way, for any drilling to extract or explore for oil or gas from the land beneath the water in any of Lake Huron, Lake Ontario, Lake Michigan, Lake Erie, Lake Superior, Lake St. Clair, the St. Mary’s River, the St. Clair River, the Detroit River, the Niagara River, or the Saint Lawrence River from Lake Ontario to the 46th parallel of latitude.
Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?  
Mr. VISCOSKY. I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, the gentleman is correct.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The text of the remainder of the bill through page 39, line 18, is as follows:

DEFENSE NUCLEAR NONPROLIFERATION

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other incidental expenses necessary for atomic energy defense, defense nuclear nonproliferation activities, in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, $945,231,000, to remain available until expended.

NAVAL REACTORS

For Department of Energy expenses necessary for naval reactors activities to carry out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition (by purchase, condemnation, construction, or otherwise) of real property, plant and capital equipment, facilities, and facility expansion, $688,045,000, to remain available until expended.

OFFICE OF THE ADMINISTRATOR

For necessary expenses of the Office of the Administrator of the National Nuclear Security Administration, including official representation and representation expenses (not to exceed $12,000), $10,000,000, to remain available until expended.

ENVIRONMENTAL AND OTHER DEFENSE ACTIVITIES

DEFENSE ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for atomic energy defense environmental restoration and waste management activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; and the purchase of not to exceed 30 passenger motor vehicles, of which 27 shall be for replacement only, $5,174,539,000, to remain available until expended.

DEFENSE FACILITIES CLOSURE PROJECTS

For expenses of the Department of Energy to accelerate the closure of defense environmental management sites, including the purchase, construction and acquisition of plant and capital equipment and other necessary expenses, $1,092,878,000, to remain available until expended.

DEFENSE ENVIRONMENTAL MANAGEMENT PRIVATIZATION

For Department of Energy expenses for privatization projects necessary for atomic energy defense environmental management activities authorized by the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), $143,268,000, to remain available until expended.
CONGRESSIONAL RECORD—HOUSE  June 28, 2001

12208

OTHER DEFENSE ACTIVITIES
For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for atomic energy defense, other defense activities, in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility for or on plant or for faciltiy construction or expansion, $487,464,000, to remain available until expended.

DEFENSE NUCLEAR WASTE DISPOSAL
For nuclear waste disposal activities to carry out the purposes of Public Law 97-425, as amended, including the acquisition of real property or facility construction or expansion, $310,000,000, to remain available until expended.

POWER MARKETING ADMINISTRATIONS
BONNEVILLE POWER ADMINISTRATION FUND
Expenditures from the Bonneville Power Administration Fund, established pursuant to Public Law 93-454, are approved for official reception and representation expenses in an amount not to exceed $1,500.
During fiscal year 2002, no new direct loan obligations may be made.

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION
For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy, including transmission wheeling and ancillary services pursuant to the provisions of section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the southeastern power area, $4,381,000, to remain available until expended, notwithstanding the provisions of 31 U.S.C. 3302, to up to $3,000,000 collected by the Southwestern Power Administration pursuant to the Flood Control Act to recover purchase power and wheeling expenses shall be credited to this account as offsetting collections, to remain available until expended for the sole purpose of making purchase power and wheeling expenditures.

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION
For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy, including transmission wheeling and ancillary services pursuant to the provisions of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the southeastern power area, $28,038,000, to remain available until expended; in addition, notwithstanding the provisions of 31 U.S.C. 3302, to not to exceed $5,200,000 in reimbursements, to remain available until expended: Provided, That up to $1,512,000 collected by the Southwestern Power Administration pursuant to the Flood Control Act to recover purchase power and wheeling expenses shall be credited to this account as offsetting collections, to remain available until expended for the sole purpose of making purchase power and wheeling expenditures.

CONSTRUCTION, REHABILITATION, OPERATION AND MAINTENANCE, WESTERN AREA POWER ADMINISTRATION
For carrying out the functions authorized by title III, section 302(a)(1)(E) of the Act of August 4, 1977 (42 U.S.C. 7152), and other related activities including conservation and renewable energy, that appropriated, there is authorized for including official reception and representation expenses in an amount not to exceed $1,500, $172,165,000, to remain available until expended, of which $166,651,000 shall be derived from the Bonneville Power Administration Fund: Provided, That the amount herein appropriated, $1,227,000 is for deposit into the Utah Reclamation Mitigation and Conservation Account pursuant to title IV of the Reclamation Projects Authorization and Adjustment Act of 1992: Provided further, That none of the funds collected by the Western Area Power Administration pursuant to the Flood Control Act of 1944 and the Reclamation Project Act of 1939 to receive purchase power and wheeling expenditures shall be credited to this account as offsetting collections, to remain available until expended for the sole purpose of making purchase power and wheeling expenditures.

FALCON AND AMISTAD OPERATING AND MAINTENANCE FUND
For operation, maintenance, and emergency costs for the hydroelectric facilities at the Falcon and Amistad Dams, $2,663,000, to remain available until expended, of which $166,651,000 shall be derived from the Falcon and Amistad Operating and Maintenance Fund of the Western Area Power Administration, as provided in section 3109, the hire of passenger motor vehicles, and official reception and representation expenses (not to exceed $3,000), $181,155,000, to remain available until expended: Provided, That notwithstanding any other provision of law, not to exceed $181,155,000 of revenues from fees and annual charges, and other services and collections in fiscal year 2002 shall be retained and used for necessary expenses in that fiscal year shall remain available until expended: Provided further, That the sum herein appropriated from the General Fund shall be reduced as revenues from fees and annual charges and other collections result in a final fiscal year 2002 appropriation from the General Fund estimated at not more than $3: Provided further, That none of the funds made available to the Federal Energy Regulatory Commission in this or any other Act may be used to construct the Gulfstream Natural Gas Project.

DEPARTMENT OF ENERGY

SEC. 301. (a) None of the funds appropriated by this Act may be used to award a management and operating contract, or award a significant enhancement or expansion to an existing management and operating contract, unless such contract is awarded using competitive procedures or the Secretary of Energy, grants, on a case-by-case basis, a waiver to the Secretary to award such a contract: Provided, That the Secretary may not delegate the authority to grant such a waiver.
(b) At least 60 days before a contract award for which the Secretary intends to grant such a waiver, the Secretary shall submit to the Committees on Energy and Water Development of the Committees on Appropriations, the Committee on Environment, Safety, and Health, the Committee on Agriculture, and the Committee on Commerce, and the Committee on Education and the Workforce of the House of Representatives, and to the Committee on Appropriations, the Committee on Energy and Water Development Appropriations, the Committee on Environment, Safety, and Health, the Committee on Commerce, and the Committee on Education and the Workforce of the Senate on behalf of such committees the Secretary of Energy, grants, on a case-by-case basis, a waiver to the Secretary to award such a contract: Provided, That the Secretary may not delegate the authority to grant such a waiver.
(c) In specificity, the substantive reasons why such a waiver should be granted.

SEC. 302. None of the funds appropriated by this Act may be used to:
(1) develop or implement a workforce restructuring plan that covers employees of the Department of Energy; or
(2) provide enhanced severance payments or other benefits for employees of the Department of Energy.

SEC. 303. None of the funds appropriated by this Act may be used to augment the $21,900,000 made available for obligation by this Act for severance payments and other benefits and community assistance grants under section 3161 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484; 42 U.S.C. 7274h).

SEC. 304. None of the funds appropriated by this Act may be used to:
(1) from the Department of Energy to the Occupational Safety and Health Administration of the Department of Labor to provide enhanced severance payments or other benefits for employees of the Department of Energy; under section 3161 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484; 42 U.S.C. 7274h) unless the Department of Energy submits a reprogramming request approved by the appropriate Congressional committees.

SEC. 305. None of the funds appropriated by this Act may be used to:
(1) from the Department of Energy to the Occupational Safety and Health Administration of the Department of Labor to provide enhanced severance payments or other benefits for employees of the Department of Energy; under section 3161 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484; 42 U.S.C. 7274h) unless the Department of Energy submits a reprogramming request approved by the appropriate Congressional committees.

(2) from the Department of Energy to the Occupational Safety and Health Administration of the Department of Labor to provide enhanced severance payments or other benefits for employees of the Department of Energy.

SEC. 306. None of the funds in this Act or any other Act for the Administrator of the Bonneville Power Administration may be used to enter into any agreement to perform energy efficiency services outside the legally defined Bonneville service territory, with the exception of services provided international, including services provided on a reimbursable basis, unless the Administrator certifies in advance that such services are not available from private industry.

SEC. 307. None of the funds appropriated in other than Energy and Water Development Appropriations Acts may be used for Department of Energy laboratory directed research and development (LDRD).

SEC. 308. Not later than March 31, 2002, the Secretary of Energy, after consultation with the Nuclear Regulatory Commission and the Occupational Safety and Health Administration, shall transmit to the Committee on Appropriations, the Committee on Energy and Commerce, and the Committee on Education and the Workforce of the House of Representatives, and to the Committee on Appropriations, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Health, Education, Labor, and Pensions of the Senate, a report containing an implementation plan for the transfer, on October 1, 2002—
(1) from the Department of Energy to the Nuclear Regulatory Commission of regulatory authority over nuclear safety at the Department of Energy’s science laboratories; and
(2) from the Department of Energy to the Occupational Safety and Health Administration of regulatory authority over worker safety at such laboratories.

Out of funds appropriated by this Act for Environment, Safety, and Health, the Secretary of Energy shall transfer $4,000,000 to...
the Nuclear Regulatory Commission and $120,000 to the Occupational Safety and Health Administration. For purposes of this section, the Department of Energy’s science laboratories are the Argonne National Laboratory, the Lawrence Berkeley National Laboratory, the Oak Ridge National Laboratory, the Pacific Northwest National Laboratory, the Argonne National Laboratory, the Fermi National Accelerator Laboratory, the Princeton Plasma Physics Laboratory, the Stanford Linear Accelerator Center, and the Thomas Jefferson National Accelerator Facility.

SEC. 309. When the Department of Energy makes a user facility available to universities and other potential users, or seeks input from universities and other potential users regarding significant characteristics or equipment in a user facility or a proposed user facility, the Department shall ensure broad public notices of such availability or such need for input to universities and other potential users. When the Department of Energy considers the participation of a university or other potential user in the establishment or operation of a user facility, the Department shall employ full and open competition in selecting such a participant. For purposes of this section, the term “user facility” includes, but is not limited to: a user facility as described in section 2203(a)(2) of the Energy Policy Act of 1992 (42 U.S.C. 13503(a)(2)) National Nuclear Security Administration Defense Programs Technology Deployment Center/User Facility; and any other Department facility designated by the Department as a user facility.

TITLE IV
INDEPENDENT AGENCIES
APPALACHIAN REGIONAL COMMISSION

For expenses necessary to carry out the programs authorized by the Appalachian Regional Development Act of 1965, as amended by section 309, notwithstanding section 405 of said Act, and, for necessary expenses for the Federal Co-Chairman and the alternate on the Appalachian Reclamation Commission, for payment of the Federal share of the administrative expenses of the Commission, including services as authorized by 5 U.S.C. 3109, and hire of passenger cars, $1,290,000, to remain available until expended.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

SALARIES AND EXPENSES

For necessary expenses of the Defense Nuclear Facilities Safety Board in carrying out its activities authorized by the Atomic Energy Act of 1954, as amended by Public Law 100–203, section 5051, $3,100,000, to remain available until expended.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

SALARIES AND EXPENSES

For necessary expenses of the Nuclear Waste Technical Review Board, as authorized by Public Law 100–203, section 5051, to remain available until expended.

TITLE V
GENERAL PROVISIONS

SIC. 501. None of the funds appropriated by this Act may be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before Congress, other than to communicate to Members of Congress as described in 18 U.S.C. 1913.

SIC. 502. (a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—It is the sense of the Congress that, to the greatest extent practicable, all equipment and products purchased with funds made available in this Act should be American-made.

(b) NORCROSS CORPORATION.—In providing financial assistance to, or entering into any contract with, any entity using funds made available in this Act, the head of each Federal agency, to the extent practicable, shall provide to such entity a notice describing the statement made in subsection (a) by the Congress.

(c) PROHIBITION OF CONTRACTS WITH PERSONS FALSELY LABELING PRODUCTS AS MADE IN AMERICA.—If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a “Made in America” inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, the person shall be ineligible to receive any contract or subcontract made with funds made available in this Act, pursuant to the debarment, suspension, and ineligibility procedures described in sections 9.407 and 9.409 of title 48, Code of Federal Regulations.

SIC. 503. (a) None of the funds appropriated or otherwise made available by this Act may be used to determine the final point of discharge for the interceptor drain for the San Luis Unit until development by the Secretary of the Interior of the National Reclamation law.

(b) The costs of the Kesterson Reservoir Cleanup Program, and the costs of the San Joaquin Valley Drainage Program shall be classified by the Secretary of the Interior as reimbursable or nonreimbursable and collected pursuant to the “Cleanup Program—Alternative Repayment Plan” and the “SJVP—Alternative Repayment Plan” described in the report entitled “Kesterson Reservoir Cleanup Program and San Joaquin Valley Drainage Program, February 1995”, prepared by the Department of the Interior, Bureau of Reclamation.

SEC. 508. (a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—It is the sense of the Congress that, to the greatest extent practicable, all equipment and products purchased with funds made available in this Act should be American-made.

(b) NORCROSS CORPORATION.—In providing financial assistance to, or entering into any contract with, any entity using funds made available in this Act, the head of each Federal agency, to the extent practicable, shall provide to such entity a notice describing the statement made in subsection (a) by the Congress.

(c) PROHIBITION OF CONTRACTS WITH PERSONS FALSELY LABELING PRODUCTS AS MADE IN AMERICA.—If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a “Made in America” inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, the person shall be ineligible to receive any contract or subcontract made with funds made available in this Act, pursuant to the debarment, suspension, and ineligibility procedures described in sections 9.407 and 9.409 of title 48, Code of Federal Regulations.

SIC. 503. (a) None of the funds appropriated or otherwise made available by this Act may be used to determine the final point of discharge for the interceptor drain for the San Luis Unit until development by the Secretary of the Interior of the National Reclamation law.

(b) The costs of the Kesterson Reservoir Cleanup Program, and the costs of the San Joaquin Valley Drainage Program shall be classified by the Secretary of the Interior as reimbursable or nonreimbursable and collected pursuant to the “Cleanup Program—Alternative Repayment Plan” and the “SJVP—Alternative Repayment Plan” described in the report entitled “Kesterson Reservoir Cleanup Program and San Joaquin Valley Drainage Program, February 1995”, prepared by the Department of the Interior, Bureau of Reclamation.

SEC. 508. (a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—It is the sense of the Congress that, to the greatest extent practicable, all equipment and products purchased with funds made available in this Act should be American-made.

(b) NORCROSS CORPORATION.—In providing financial assistance to, or entering into any contract with, any entity using funds made available in this Act, the head of each Federal agency, to the extent practicable, shall provide to such entity a notice describing the statement made in subsection (a) by the Congress.

(c) PROHIBITION OF CONTRACTS WITH PERSONS FALSELY LABELING PRODUCTS AS MADE IN AMERICA.—If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a “Made in America” inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, the person shall be ineligible to receive any contract or subcontract made with funds made available in this Act, pursuant to the debarment, suspension, and ineligibility procedures described in sections 9.407 and 9.409 of title 48, Code of Federal Regulations.

SIC. 503. (a) None of the funds appropriated or otherwise made available by this Act may be used to determine the final point of discharge for the interceptor drain for the San Luis Unit until development by the Secretary of the Interior of the National Reclamation law.

(b) The costs of the Kesterson Reservoir Cleanup Program, and the costs of the San Joaquin Valley Drainage Program shall be classified by the Secretary of the Interior as reimbursable or nonreimbursable and collected pursuant to the “Cleanup Program—Alternative Repayment Plan” and the “SJVP—Alternative Repayment Plan” described in the report entitled “Kesterson Reservoir Cleanup Program and San Joaquin Valley Drainage Program, February 1995”, prepared by the Department of the Interior, Bureau of Reclamation.

The CHAIRMAN. Are there any points of order to any of the sections so opened?

Mr. LARGENT. Mr. Chairman, I make a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. LARGENT. Mr. Chairman, I make a point of order that section 308 of the bill, beginning on page 32, line 24, and ending on page 34, line 6, violates clause 2 of rule XXI of the rules of the House of Representatives prohibiting legislation on appropriations bills.

As I understand the intent of section 308, the language in question directs the Secretary of Energy to write a report to Congress on a plan to transfer certain regulatory functions in DOE science laboratories to the Nuclear Regulatory Commission and the Occupational Safety and Health Administration. My reading of the amendment, however, goes much further. I think that the language contained in the bill would actually effectuate the transfer of these functions to the NRC and OSHA.

In any event, Mr. Chairman, the language in section 308 clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the rules of the House because it changes current law, where no plan to transfer these functions is present.

I therefore insist on my point of order.

The CHAIRMAN. Does any other Member care to be heard on the point of order?

Hearing none, for the reasons stated by the gentleman from Oklahoma (Mr. LARGENT), the point of order is sustained, and section 308 of the bill will be stricken.

The CHAIRMAN. Are there amendments by any other Member?

AMENDMENT NO. 1 OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 1 offered by Mr. Traficant:
The CHAIRMAN. Pursuant to the order of the House of Wednesday, June 27, 2001, I call on the gentleman from Ohio (Mr. TRAFICANT) to make a statement. A Member opposed each will control 10 minutes.

Mr. TRAFICANT. Mr. Chairman, I yield myself such time as I may consume.

I want to give a little background on this amendment, and I want the appropriators to know that I have gone three times to the authorizing committee. This is the only drinking water supply for 125,000 of my constituents. The Senators, both Republicans, and every mayor supports stopping the banning slant drilling under a lake when there are so many natural resources in that region.

Let me tell my colleagues about the hypocrisy. Our Department of Natural Resources will not allow any drilling under the lake adjacent to the Mosquito Creek Reservoir because there are trumpet swans and Canadian geese habitat. I have 125,000 people who depend on this for drinking water with no backup water supply. And just on June 3, not counting last year, we had an earthquake of 3.6 in the district of the gentleman from Ohio (Mr. LATOURETTE), district to the north, not far from this lake.

Now, I have supported energy development. I have tried not to be hypocritical, because everybody says, not in my backyard. But when I believe that there are people, as we did in Florida, when there is fresh water, as we have done with the Great Lakes; God almighty, this is just common sense, and I did not have an amendment for this bill until I had seen the efforts made at the Great Lakes, and I worked 3 years through the authorizing committee.

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. TRAFICANT. Mr. Chairman, I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, certainly this is something not only that we forgot to put in, which should have been put in, but we appreciate the gentleman bringing it to our attention and allowing us to be a part of his effort to continue to encourage companies to buy American.

We have no objection to this amendment and would happily accept it.

Mr. VISCOSKY. Mr. Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to my good friend and classmate, the gentleman from Indiana.

Mr. VISCOSKY. Mr. Chairman, I appreciate the gentleman yielding.

On behalf of all the steelworkers I represent, I am also happy to accept the gentleman's amendment.

Mr. TRAFICANT. Mr. Chairman, I ask for an aye vote, and I yield back the balance of my time.

The CHAIRMAN. Does any Member claim time in opposition to the amendment?

Hearing none, the question is on the amendment offered by the gentleman from Ohio (Mr. TRAFICANT).

The amendment was agreed to.

AMENDMENT OFFERED BY MS. BERKLEY

Mr. TRAFICANT. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. TRAFICANT).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments?

AMENDMENT OFFERED BY MS. BERKLEY

Ms. BERKLEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Ms. BERKLEY: Page 37, after line 11, insert the following:

SALARIES AND EXPENSES

NUCLEAR WASTE TECHNICAL REVIEW BOARD

For additional expenses of the Nuclear Waste Technical Review Board, to be derived from the Nuclear Waste Fund, for the Board (1) to evaluate the technical and scientific validity of activities undertaken by the Secretary of Energy relating to the packaging and transportation of high-level radioactive waste and spent nuclear fuel, as authorized by section 503 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10283), (2) to hold hearings, sit and act, take testimony, and receive evidence, as authorized by section 504(a) of such Act (42 U.S.C. 10284(a)), and (3) to request the Secretary (or any contractor of the Secretary) to provide the Board with records, files, papers, data, and information, as authorized by section 504(b) of such Act (42 U.S.C. 10284(b)), and the aggregate amount otherwise provided in this Act for “Energy Programs—Nuclear Waste Disposal” is hereby reduced by: $500,000.

The CHAIRMAN. Pursuant to the order of the House of Wednesday, June 27, 2001, the gentleman from Nevada (Ms. BERKLEY) and a Member opposed each will control 10 minutes.

The Chair recognizes the gentleman from Nevada (Ms. BERKLEY).
CONGRESSIONAL RECORD—HOUSE

Ms. BERKLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. CALLAHAN. Mr. Chairman, I yield the gentleman from Nevada.

Ms. BERKLEY. Mr. Chairman, I yield the gentleman from Nevada.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Nevada. So I think the gentleman is on the right track; I think she is just a little early, because in a sense, it is an admission that it is going to happen.

Mr. VISCOSKY. Mr. Chairman, I yield to the gentleman from Indiana.
Mr. Chairman, two nights ago this House passed legislation that would prohibit dangerous trucks coming to this country from Mexico. Certainly trucks containing nuclear waste going through our neighborhoods is more serious than dangerous Mexican trucks, which we prohibited from coming onto our highways.

It seems to me there is not one of us that can go home to our constituents and say we voted down a piece of legislation that would demand that the Department of Energy actually publish the proposed transportation routes of 77,000 tons of toxic nuclear waste. This nuclear waste is going to be coming across all our neighborhoods, all of our towns, through our communities, through 43 States en route to Yucca Mountain, Nevada.

Now, I appreciate the fact that both the chairman and the ranking member suggest that perhaps this is premature, but listening to what the administration has been saying with their new reliance on nuclear energy and the fact that in the coming language itself, although there has not been completion of the scientific study saying Yucca Mountain will be the Nation’s repository, certainly nobody reading the signs can say that this country is not trying very hard to make Yucca Mountain, which has been selected as the only site, the one that is acceptable for nuclear waste. I might add, however, that it is not acceptable, and it is very apparent that it is not.

The fact of the matter is that we have a right to know, and we have a right to protect our constituents. Our constituents, American citizens, have a right to know what their government intends to do. And I would like to hear an honest discussion by the nuclear weapons tests that were conducted at the Nevada test site in the 1950s and the 1960s, when we were told there was absolutely no danger to detonating those atomic weapons in the middle of the Nevada desert. The fact of the matter is, every single, and let me repeat that, every single employee of the Nevada test site that worked on those atomic tests are all dying of cancer now and other horrible, heinous ailments. And that is because our Federal Government said, Don’t worry, be happy; there is nothing wrong. This is a similar situation 50 years later, and we are hearing the exact same thing from our Federal Government.

For this body not to stand up and make a determination to keep our neighborhoods, our schools, our hospitals, and the people that we represent safe--

Mr. BACA. Mr. Chairman, I rise in support of the Berkley amendment to the Energy and Water FY 2002 Appropriations bill, H.R. 2311. We must study the problems associated with the transportation of nuclear waste and protect our communities.

The likelyest routes will truck much of California’s radioactive waste along Interstate 15 and along train tracks straight through San Bernadino County.

It has been said that used fuel is so dangerous that the nuclear plants must isolate the fuel from human contact for 10,000 years. So why would we run the risk of shipping it through our backyards without the proper scientific research and before we have weighed all our options?

Congress has spent billions of dollars on the Yucca Mountain storage site and it is still unknown whether this site is environmentally sound or not. Why should our tax dollars be spent and our health be put at risk without finding out all aspects of this issue? Scientific research that is now in the process has potential risks that could end in catastrophic disasters and yet no other option has been proposed.

We must ensure the security of our community. Nuclear waste is a serious issue that must be handled very carefully and thoroughly. I am committed to protecting the health and environment of the 42nd district of California along with all the districts in the United States.

Ms. BERKLEY. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question was taken; and the Chairman announced that the noes appeared to have it.

Ms. BERKLEY. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from Nevada (Ms. BERKLEY) will be postponed.

AMENDMENT OFFERED BY MRS. KELLY

Mrs. KELLY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mrs. KELLY:

In title IV, in the item relating to “Nuclear Regulatory Commission—Salaries and Expenses”, after the second and fourth dollar amounts, insert the following: “(reduced by $700,000);”.

In title IV, in the item relating to “Nuclear Regulatory Commission—Office of Inspector General”, after the first and second dollar amounts, insert the following: “(increased by $700,000).”

The CHAIRMAN. Pursuant to the order of the House of Wednesday, June 27, 2001, the gentlewoman from New York (Mrs. KELLY) and a Member opposed each will control 5 minutes.
The Chair recognizes the gentleman from New York (Mrs. KELLY).

Mr. KELLY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise for the purpose of entering into this colloquy with the distinguished chairman of the committee, the gentleman from Alabama (Mr. CALLAHAN).

I wish to discuss the importance of providing additional funding for the NRC Inspector General. I feel that providing the Inspector General with more resources will help the NRC better perform its responsibility of ensuring the safe operation of our Nation's nuclear power plants. Through my own experience, I have found that the agency's priorities have not always been what they should be.

In February of last year, an accident occurred at the Indian Point 2 nuclear power plant in my district. A steam generator tube burst, and the plant was shut down immediately. It goes without saying the people in the community surrounding the plant, myself included, are seriously troubled by this accident. We expected the Federal agency responsible for handling nuclear safety would make every effort to quickly repair and restore public confidence in the plant. I regret to say that the NRC fell short of this very reasonable expectation.

Though the agency itself acknowledged that this plant had the highest risk assessment of any plant in the Nation, they were on red as risk assessment, they demonstrated a stunning indifference to a litany of legitimate concerns about the plant's safety. The NRC chairman refused to play any role whatsoever in the very difficult deliberation as to when the plant ought to be started back up. The NRC chairman refused to hold a confirmation hearing at the plant, or even come to Buchanan to see the plant and the surrounding community firsthand.

Not once during the entire 11-month period that the plant was down did the chairman or any of the NRC commissioners think they ought to come to Buchanan, New York, and look at this plant. So the chairman can imagine my profound concern when I learned about some of the places that the NRC chairman and the commissioners did think they ought to go during the time the plant was down: places like Korea, Spain, and Mexico. The public record indicates that during the time the Indian Point 2 plant was down, the chairman of the NRC visited a nuclear power plant in Scotland. He visited three in Canada.

During this time, investigators from the IG's office were at Indian Point cataloguing all of their mistakes. They found a troubling number of things at this plant, and the most troubling they discovered was that an inspection performed back in 1997 plainly indicated the strong likelihood of a leak. The NRC had that information back in 1997. It showed that there was a strong likelihood of a leak, but nothing was done because nobody at the NRC ever looked at the inspection report. This should not have happened.

I realize there is a new interest in nuclear power, and I should say that I am not against nuclear power. But the way that the NRC handled the Nation's most troubled plant raises some real concerns. I understand the gentleman from Alabama has provided a generous increase in the funding for the Inspector General in this bill. I commend him and thank him for it.

Is it the gentleman's understanding that this additional funding will be available for further independent reviews of NRC regulatory activities?

Mr. CALLAHAN. Mr. Chairman, will the gentlewoman yield?

Mrs. KELLY. I yield to the gentleman from Alabama.

Mr. CALLAHAN. I thank the gentlewoman for her work on this issue, Mr. Chairman; and I share her feelings about the importance of ensuring that the NRC Inspector General is provided the resources it needs for conducting independent reviews. This additional $800 million that we have in this bill is available for this very purpose.

Mrs. KELLY. I thank the gentleman. I would ask only that the gentleman continue to keep in mind the importance of a strong funding level for the NRC Inspector General as we continue to work on this bill, and also that he continue to vigorously oversee the agency to ensure that unnecessary travel expenses are not incurred by the NRC officials.

Mr. CALLAHAN. If the gentlewoman will yield further, I will continue to closely monitor all expenditures incurred by NRC officials to ensure that their resources are not improperly squandered.

Mrs. KELLY. I thank the gentleman from Alabama very much, the distinguished chairman of the subcommittee. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

Mr. CALLAHAN. The amendment is withdrawn.}

AMENDMENT OFFERED BY MR. DAVIS OF FLORIDA

Mr. DAVIS of Florida. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. Davis of Florida:

In title III, in the item relating to “FEDERAL ENERGY REGULATORY COMMISSION—SALARIES AND EXPENSES,” strike the last proviso relating to Gulfstream Natural Gas Project.

The CHAIRMAN. Pursuant to the order of the House of Wednesday, June 27, 2001, the gentleman from Florida (Mr. DAVIS) and a Member opposed each other on the question of agreement.

The Chair recognizes the gentleman from Florida (Mr. DAVIS).

Mr. DAVIS of Florida. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to set the context of this amendment because it takes us back a little bit. Last week, we had a debate on the floor of the House of Representatives. It was a very heated, very partisan debate. In the context of this amendment I offered, along with the gentleman from Florida (Mr. SCARBOROUGH), to prevent the Secretary of the Interior from going forward with issuing any new leases for offshore oil drilling, oil and gas, 17 miles off the coast of Pensacola, some of the most pristine beaches in not just the State of Florida but of the country, and about 200 miles off the coast of Tampa Bay, my home.

The House adopted our amendment by a vote of 247, and the bill is now in the Senate where it will be debated there. Unfortunately, the highly esteemed chairman of the Subcommittee on Energy and Water Development, the gentleman from Alabama (Mr. CAL- LAHAN), was in Alabama, with other members of the Alabama delegation traveling with the President, and was not present for the debate. I regret that, and I know he certainly regrets it as well. But the House has done its will and spoke on that particular issue.

The reason I rise today to offer this amendment is because the gentleman from Alabama (Mr. CALLAHAN) has inserted some language in this particular bill we are debating, which I think is fair to describe as a response to the debate last week. What that language, which I will speak about in more detail in a while, along with other Members both Democrats and Republicans, what that language does is to punish the State of Florida and, I would submit, other States who have a stake in a natural gas pipeline that has already had $800 million spent on it and is due to open in approximately 1 year.

The language that the gentleman from Alabama (Mr. CALLAHAN) has inserted would basically bring that pipeline to a grinding halt. I think that is an irresponsible position for the House of Representatives to take today. I personally would not want to go home on the 4th of July and have to explain that I had voted for a bill that had that language in it.

To understand the gentleman's point. His point is he wishes he had been here for the debate, and I think he disagrees in the strongest terms with the outcome of the debate last week. But that debate is over, and we are dealing with a new issue today and it is an issue that affects hundreds of workers’ lives.

Mr. Chairman, I reserve the balance of my time.
Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume, and I rise in opposition to the amendment.

Mr. Chairman, let me say that, as the gentleman from Florida just mentioned, yes, they did bring up this measure while I, along with the other members of the Alabama delegation, were traveling with the President last week, which is their prerogative. I think, out of deference to me and to my State and to my delegation, that they should have at least informed us the night before of their intent. But they failed to do that, which is their prerogative. They do not have to notify me of anything if they do not want to.

But I thought it awful strange they waited until we got out of town. When it was obvious we could not get back, they made no effort to do with permitting us the opportunity to defend our State.

But this amendment has nothing to do with that. As the gentleman from Florida said, the vote last Thursday was the will of the Congress. This has nothing to do with permitting the drilling of oil off the coast of Alabama, which 181 does. It has nothing to do with that.

I think it is the height of hypocrisy for Floridians, especially the sponsor of this amendment, to say we are not going to allow drilling for natural gas in the Gulf of Mexico because it is 270 miles off the coast of Tampa, but at the same time we want a pipeline from Alabama to Florida because we need this gas. They tell us that a 142 percent expectation of increased need is going to take place in the next 6 years in Florida. So what they said was, do not drill for the gas, but go ahead and build the pipeline and supply us with gas.

Mr. Chairman, they have got to make up their mind. It is the height of hypocrisy to try to pull the wool over the Floridians’ eyes just because it might look good in the local newspaper, or statewide newspaper, if someone happens to be running for a public office statewide. It is the height of hypocrisy to say on the one hand, go ahead and build the pipeline and supply us with gas, but on the other hand, we do not have to do with permitting the drilling of oil off the coast of Alabama, which 181 does. It has nothing to do with that.

The gentleman from Alabama (Mr. CALLAHAN) is correct about that. I yield 4 minutes to myself to respond. Mr. Chairman, I am going to stick to the facts today. I think that holds us up to the standard that we should be held up to. First, I am flattered at the notion that I had the chance to control the timing of the debate last week. I wish I had that much influence. It is clear that the gentleman from Florida (Mr. SCARBOROUGH) and I do not.

As far as the notice, I regret that the gentleman from Alabama was not aware. The amendment was not filed until the morning of the debate because I had difficulties with the Congressional Budget Office getting an amendment that would not be subject to a point of order, and that is the reason why the amendment only has a 6-month duration for the fiscal year.

Mr. Chairman, let me correct something the gentleman from Alabama said. Section 181 is 200 miles, not 270 miles, off the coast of Tampa Bay, my home. That is where I grew up. I remember an oil spill that happened there when I was a child. It was not a rig. It was a barge, but it had the same environmental impact. This is the same thing to Floridians, which is what is going to happen.

We do not want that to happen to our neighbors in Florida, and we are not going to let that happen. But, in my opinion, why build a pipeline to transport energy when the author of this bill is the one who authored the other bill saying do not drill for gas.

Mr. Chairman, why are we going to disrupt the sandy bottom of the beautiful Gulf of Mexico and risk that brown sand turning the beautiful beaches of the panhandle in Destin and in Pensacola into a brown beach in a short while? Why would we risk that if we are not going to have a resource? It is a mystery to me.

The only solution I can find to that mystery is that someone is grandstanding here. Someone either believes or wants it to happen on the one hand, and is trying for some reason to convince the Floridians that might read about this that he is a savior of Florida, and maybe he is.

I think Jeff Bush has done more. Mr. Chairman, to preserve the pristine beaches of Florida and make sure that there is no offshore drilling off the coast of Florida than anybody in history, and he is to be commended for that. But I do not know how we can tolerate the hypocrisy of what we are hearing here today, and that is do not drill for oil. That is accepted. That is not in question today; but just in case we do, then send it to Florida through this pipeline that we are going to lay on the bottom of the beautiful Gulf of Mexico.

Mr. Chairman, I reserve the balance of my time.

Mr. DAVIS of Florida. Mr. Chairman, I yield 4 minutes to myself to respond. Mr. Chairman, I am going to stick to the facts today. I think that holds us up to the standard that we should be held up to. First, I am flattered at the notion that I had the chance to control the timing of the debate last week. I wish I had that much influence. It is clear that the gentleman from Florida (Mr. SCARBOROUGH) and I do not.

Mr. Chairman, let me correct something the gentleman from Alabama said. Section 181 is 200 miles, not 270 miles, off the coast of Tampa Bay, my home. That is where I grew up. I remember an oil spill that happened there when I was a child. It was not a rig. It was a barge, but it had the same environmental impact. This is the same thing to Floridians, which is what is going to happen.

We do not want that to happen to our neighbors in Florida, and we are not going to let that happen. But, in my opinion, why build a pipeline to transport energy when the author of this bill is the one who authored the other bill saying do not drill for gas.

Mr. CALLAHAN. Mr. Chairman, I yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, let me correct some-
Mr. CALLAHAN mentioned the Governor of the State of Florida. He supports my amendment, Mr. Chairman, and Floridians support this amendment.

If this pipeline was not being built yet, I think the gentleman from Alabama (Mr. CALLAHAN) could have a plausible basis for his position. But let me just state the facts, and then yield to the gentleman from Florida (Mr. SCARBOROUGH).

This pipeline has had $800 million spent on it. There are hundreds of workers all over the country who are thankfully on the verge of earning a bonus for early completion. What are we saying to these workers and their families if we pass a bill today that brings that project to a grinding halt? I do not think that is responsible. That is why we are debating today, whether or not the Congress ought to take that position.

Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. SCARBOROUGH).

Mr. SCARBOROUGH. Mr. Chairman, I thank the gentleman from Florida for this amendment. I want to underline what he said about the Governor of the State of Florida. Jeb Bush not only supported our efforts in a bill that we have dropped regarding 181; and he and the State of Florida support the pipeline.

I think there is some hypocrisy going on here. I also think some people are having some fun, and I have no problem with people having fun on the House floor with some tongue-in-cheek amendments. But I could not help being moved yesterday by the gentleman from Alabama’s (Mr. CALLAHAN) love for northwest Florida beaches, and his stated desire to protect them. And he said yesterday that he is going to do everything he can to protect the environment of northwest Florida. He specifically noted the scenic beauty of the beaches from Perdido Key all the way over to Panama City beach, Destin, Seaside. It is a wonderful place, is it not, Mr. Chairman? And he knows because we are neighbors.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. SCARBOROUGH. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, the gentleman from Alabama (Mr. CALLAHAN) also spoke of his love for the pristine beaches of the west coast of Florida, not just the northwest. He favored all of our beaches yesterday in that debate.

Mr. SCARBOROUGH. Yes, sir, and they are beautiful, too, sir. Mr. Chairman, my grandmother would term what the gentleman from Alabama (Mr. CALLAHAN) is doing for us in northwest Florida as gracious plenty; but I have to say, I thought I could do one thing in return to help his constituents the way he is trying to help mine, and if we can get a unanimous consent later on, maybe after this vote, that is being moved yesterday by the gentleman from Florida (Mr. SCARBOROUGH), and the State of Florida, from Perdido Key all of the way over to Destin, Seaside. It is a wonderful place, is it not, Mr. Chairman; and Florida wants, we can have, maybe after this amendment passes, we can have a body of friendship. I would like to move an amendment to protect the workers of the district of the gentleman from Alabama (Mr. CALLAHAN) and the State of Florida from layoffs and firings that would occur if the Callahan language were to survive.

As much as I appreciate his love for the natural beauty of northwest Florida, I feel an equally pressing need to show my affection for the working men and women of the State of Alabama. Just as he wants to protect Florida jobs that would be lost if those who are currently employed working on the Gulf—where the guy gets up, he wants milk to complete their work. And that is in my district, too, at Berg Steel and across the States of Louisiana and Texas and Alabama.

I fear, though, that the precedent that is being set by what the chairman has attempted to do in this bill could be dangerous because, let us think about it. Just for 1 second, let us think about it. If we use this logic that is being used, like, for instance, communities that do not want drilling 17 miles off their beaches should not be able to get natural gas, well, let us see how that would apply to other things. If one likes chicken, under the amendment’s logic, community chicken farms would have to spring up on every block because it would be hypocritical not to have chicken coops in the back yards of everybody’s house that eats chicken. Think about sausage. In Pensacola, Florida, we have a place called The Coffee Cup. It is a coffee shop, you get bacon, and I will be the first to admit, I love bacon. I consume bacon. But I sure as heck do not want to have a self-sustaining Coffee Cup slaughterhouse in the parking lot behind that restaurant and every other restaurant, but, using this logic, would have to do it.

Got milk? Better tie up the cow behind the barn because if one likes milk, if you consume milk, you better have the cow. Just like on the commercial where you use this milk on your cereal, it looks preposterous. That is the world that we are heading into if we have protectionism where if you consume it in your district, you have to make it in your district.

Mr. Chairman, that is why I think this is tongue-in-cheek, because the gentleman from Alabama (Mr. CALLAHAN) knows that is not the way that the American economy works. The gentleman from Alabama (Mr. CALLAHAN) knows that there are strengths in every area. Texas, Louisiana, Mississippi, Alabama, they have their strengths. Northwest Florida and the State of Florida, they also have their strengths; and who among us does not know that Florida’s strength lies in its natural beauty of its beaches.

I want to say that I understand that the chairman was upset because we took this vote when the State of Alabama Caucus, most of them, were out of the Capitol. Mr. Chairman, as I said to him in the cloakroom before I hugged you for trying to protect my district so much, my staff worker that was responsible for tracking the whereabouts of the Alabama delegation must have been off that day. I know it will shock the gentleman, but I did not know that the delegation was down with the President in Alabama. I found out when we were on the floor, and if the gentleman from Alabama (Mr. CALLAHAN) wants, we can have, maybe after this amendment passes, we can have a body of friendship. I would like to move an amendment to protect the workers of the district of the gentleman from Alabama (Mr. CALLAHAN) and the State of Florida. I yield 5 minutes to the gentleman from Florida (Mr. SCARBOROUGH).

Mr. SCARBOROUGH. Mr. Chairman, the Davis-Scarborough amendment would have passed 247 to 191 instead of 247 to 188. It was not even close. Mr. Chairman, that is why I think the gentleman from Florida (Mr. DAVIS) nor I controls what happens on this floor.

So I will say once again, it does not make sense for us to have this philosophy that if one does not produce it, one cannot consume it. It leads to a thousand different ridiculous conclusions. Therefore, I am hoping that the Davis-Scarborough amendment will pass and that we can move forward and that we can have this pipeline that will help workers not only in Florida, but also in Alabama, Louisiana, Mississippi and Texas.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair reminds Members to direct their comments to the Chair and not to other Members.

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me say that once again we are experiencing sort of a desperate, sort of an attempt to mislead the Members of Congress as to what this amendment is all about.

This amendment has zero to do with drilling off the coast of Alabama or Florida. It has nothing to do with it. It means, that is water under the dam. That water is gone. They did that in my absence, and I will accept the gentleman’s apology. And let me apologize to him. I never thought the gentleman ought to keep track of me. I never thought that the gentleman ought to get his scheduler to poll to see where the Alabama delegation is. But this is a body of compromise, a body of congeniality, a body of friendship. I would
never think of doing this to anyone in Florida when I knew they were gone; but that is water under the dam.

This amendment has zero to do with the drilling aspect, and yet trying to tell the Members of this body that it does. It has to do with the laying of a pipeline from Mobile, Alabama, my district, to Florida, and even the Florida newspapers are saying that the gas pipeline will cause damage in the Gulf of Mexico.

So here we have the Florida Naples Daily saying that it is going to cause damage to the environment, and now we do not have the Florida delegation defending that, they are saying, go ahead and destroy our environment. Build that nasty old pipeline. Bring the gas in from somewhere else.

Mr. Chairman, we ought to talk about the subject matter, not what happened last week.

Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi (Mr. WICKER), a distinguished and knowledgeable Member of this issue and also a member of the subcommittee.

Mr. WICKER. I thank the gentleman for yielding me this time.

Mr. Chairman, a former Member of this body once went down in history when he made the statement, “Don’t confuse me with the facts, my mind is made up.”

Although the chairman of the subcommittee has just told us that this is not about the drilling in lease area 181, I did have to feel that way last week during the discussion of the Davis amendment. “Don’t confuse us with the facts,” some of our colleagues said, “our minds are made up.”

“First of all, that this Nation is in an energy crisis. Just forget the fact that area 181 is way out in the Gulf of Mexico. My mind is made up. Forget the fact that we need to get rid of our dependence on foreign sources of energy. Just forget that. Don’t confuse me with that fact, our minds are made up.”

And then there was the constant discussion last week about drilling off the coast of Florida. Even The Washington Post, the next day, talked about drilling off the coast of Florida without giving the reader the foggiest notion of what we were talking about.

Mr. Chairman, you talk about the Davis amendment. “Forget the fact that this Nation is forgoing this energy,” my colleagues say, “our minds are made up.”

“Don’t confuse us with the facts,” someone says. “The chairman’s view on that. I do not think the amendment actually would do and why we are here.

Mr. CALLAHAN. Mr. Chairman, will the gentlewoman yield?

Mrs. THURMAN. I thank the gentleman from Alabama.

Mr. CALLAHAN. No, that is not why we are here. This has nothing to do with the drilling. It has to do with the pipeline, not the drilling.

Mr. Chairman, I yield myself 1 minute. The gentleman who last spoke wants to reiterate his comments last week and the chairman does not and I respect the chairman’s view on that. I do not think we should redebate it. But since he brought it up, let me respond.

There are 21 days of crude oil in section 181. We do not think as Floridians we would be foolish enough to satisfy our energy needs and exposing ourselves to undue environmental risk for 21 days of crude oil. The House has spoken on that. We sent a very strong message that we need a more balanced approach to environmental and energy policy not just in Florida but in the country, and that vote stands.

Mr. Chairman, I yield 2 minutes to the gentlewoman from Florida (Mrs. THURMAN).

Mrs. THURMAN. I thank the gentleman for yielding me this time.

I stand today to say that I support the amendment offered by the gentleman from Florida (Mr. DAVIS). I was struck a little bit by the idea that we are not here because of what happened last week. And so at some point I would like the gentleman from Alabama to tell us why we are here then.

This is a project that, in fact, is going to be completed in about 753 miles long. The fact of the matter is that in my district, because this comes through my district, it was controversial. FERC held public hearings at which the concerns of these interested citizens were heard. In response, Gulfstream modified the pipeline plan and now FERC is reviewing the revised plan. So I do not think there is really a legitimate reason at this time for the House to stop this process, and I think that is what this amendment actually would do and why we are here.

Mr. CALLAHAN. Mr. Chairman, will the gentlewoman yield?

Mrs. THURMAN. I yield to the gentleman from Alabama.

Mr. CALLAHAN. No, that is not why we are here. This has nothing to do with the drilling. It has to do with the pipeline, not the drilling.

Mr. Chairman, a former Member of this body once went down in history when he made the statement, “Don’t confuse us with the facts, my mind is made up.”

Although the chairman of the subcommittee has just told us that this is not about the drilling in lease area 181, I decided to feel that way last week during the discussion of the Davis amendment. “Don’t confuse us with the facts,” some of our colleagues said, “our minds are made up.”

“First of all, that this Nation is in an energy crisis. Just forget the fact that area 181 is way out in the Gulf of Mexico. My mind is made up. Forget the fact that we need to get rid of our dependence on foreign sources of energy. Just forget that. Don’t confuse me with that fact, our minds are made up.”

And then there was the constant discussion last week about drilling off the coast of Florida. Even The Washington Post, the next day, talked about drilling off the coast of Florida without giving the reader the foggiest notion of what we were talking about.

So what we are talking about, Mr. Chairman, is drilling in the colored-in area here which is called ‘Sale 181 Area.’

As Members can see, it is over 213 miles from Tampa Bay, this drilling which our friends from Florida are calling off the coast of Florida. 213 miles away. Over 100 miles away from Panama City there. Yet it is being described by people in that delegation as being off the coast of Florida.

Now, it is true that there is a small strip of water, a small strip of the gulf in lease area 181 that goes up to the coast of Alabama. I want to suggest, perhaps, a statement that Mr. CALLAHAN should apologize on behalf of the State of Alabama for being so close to Pensacola, Florida. But the fact of the matter is that this strip that extends within 17 miles of the coast of Alabama is Alabama’s territory. If Alabama should get to make that choice.

And also forget the fact, our friends tell us, the supporters of the Davis amendment, that drilling offshore is not only environmentally sound nowadays but it can even be environmentally friendly.

Now, let me say a word of caution to my colleagues, Mr. Chairman. And I mean this sincerely. There has been the use of the word “hypocrisy” by both sides. Someone is going to jump up sometime and ask that we be taken down. I wish we would not use the word “hypocrisy.” I think that has been established as perhaps going above and beyond what we can do on this floor. I think there is a degree of audacity in the argument here. And the audacity, the gentleman from Florida (Mr. SCARBOROUGH) is right, it is bipartisan. It is bipartisan.

I learned from the State Department yesterday that most nations in the world claim 12 nautical miles off the coast as their territory. Only one nation does not do this and that is Communist China. They claim 200 miles. There is a little bit of a parallel here. The people of Florida are saying off the coast of Florida is 213 miles. “That’s our coast.” Off the coast of Florida is 108 miles from Fort Walton Beach. They are saying, “Don’t give us the 12 nautical miles. Give us 108 miles. Give us 213 miles.” A bit of audacity there.

Mr. Chairman, I have some data from the State Department. We do not need this pipeline anymore. We were talking last week with the Davis amendment about 7.8 trillion cubic feet of natural gas. I think this body, Mr. Chairman, made a grave mistake to decide that this Nation will forgo this very needed natural resource. It is not a question of where you put the sausage factory. It is not a question of where you bring the cow. This is where the natural gas is. It is right there in lease area 181. We have decided, and I hope we can reverse that decision, Mr. Chairman, we have decided to forgo it. So since we are not going to have the 7.8 trillion cubic feet, I say there is no need for the pipeline to carry only 1 million cubic feet per day.

I urge the defeat of the Davis amendment.

Mr. DAVIS of Florida. Mr. Chairman, I yield myself 1 minute.

The gentleman who last spoke wants to reiterate his comments last week and the chairman does not and I respect the chairman’s view on that. I do not think we should redebate it. But since he brought it up, let me respond.

The amendment has zero to do with the coast of Alabama. I want to suggest, perhaps, a statement that Mr. CALLAHAN should apologize on behalf of the State of Alabama for being so close to Pensacola, Florida. But the fact of the matter is that this strip that extends within 17 miles of the coast of Alabama is Alabama’s territory. If Alabama should get to make that choice.

And also forget the fact, our friends tell us, the supporters of the Davis amendment, that drilling offshore is not only environmentally sound nowadays but it can even be environmentally friendly.

Now, let me say a word of caution to my colleagues, Mr. Chairman. And I mean this sincerely. There has been the use of the word “hypocrisy” by both sides. Someone is going to jump up sometime and ask that we be taken down. I wish we would not use the word “hypocrisy.” I think that has been established as perhaps going above and beyond what we can do on this floor. I think there is a degree of audacity in the argument here. And the audacity, the gentleman from Florida (Mr. SCARBOROUGH) is right, it is bipartisan. It is bipartisan.

I learned from the State Department yesterday that most nations in the world claim 12 nautical miles off the coast as their territory. Only one nation does not do this and that is Communist China. They claim 200 miles. There is a little bit of a parallel here. The people of Florida are saying off the coast of Florida is 213 miles. “That’s our coast.” Off the coast of Florida is 108 miles from Fort Walton Beach. They are saying, “Don’t give us the 12 nautical miles. Give us 108 miles. Give us 213 miles.” A bit of audacity there.

Mr. Chairman, I have some data from the State Department. We do not need this pipeline anymore. We were talking last week with the Davis amendment about 7.8 trillion cubic feet of natural gas. I think this body, Mr. Chairman, made a grave mistake to decide that this Nation will forgo this very needed natural resource. It is not a question of where you put the sausage factory. It is not a question of where you bring the cow. This is where the natural gas is. It is right there in lease area 181. We have decided, and I hope we can reverse that decision, Mr. Chairman, we have decided to forgo it. So since we are not going to have the 7.8 trillion cubic feet, I say there is no need for the pipeline to carry only 1 million cubic feet per day.

I urge the defeat of the Davis amendment.

Mr. DAVIS of Florida. Mr. Chairman, I yield myself 1 minute.

The gentleman who last spoke wants to reiterate the comments last week and the chairman does not and I respect the chairman’s view on that. I do not think we should redebate it. But since he brought it up, let me respond.
June 28, 2001

CONGRESSIONAL RECORD—HOUSE

happened last week, but some of the articles that I have read in Florida actually do say that, and that was controversial.

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

In response to the gentlewoman as to why we are doing it today, I had my staff poll the Florida delegation to make certain they were all going to be here today and that was the appropriate time to bring it up, when the Florida delegation was all here.

In response to the gentleman from Mississippi’s suggestion about Pensacola, Mr. Chairman, a lot of people in that Panhandle called me my entire tenure when I was in the Senate asking me to annex them into Alabama. Maybe that is a solution. If we annex the whole Panhandle into Alabama, they then will not have any argument about it being 17 miles away.

And with further respect to his indication that my words could be taken down for saying the word “hypocrisy,” maybe he is right. It is the height of arro
gance of arrogance. I did not want to use the word. This is the height of arrogance. Florida is happy to burn it, but they block the rest of America from securing a steady and adequate supply of natural gas.

That is why Members from Florida are not blocking a proposed natural gas pipeline that will stretch 800 miles through gulf waters from Alabama to the beaches on Florida’s west coast. And that is the same gulf waters that Florida placed off-limits to exploration that could help the rest of the country. I oppose the gentleman from Florida’s amendment to block opposition to this pipeline.

Florida rivals California as a prime example of the not-in-my-backyard syndrome. Let Florida take the lead in conservation. Let them make do with the half the natural gas that they are projected to need. If Florida is going to lead America to greater dependence on foreign sources of energy, then let them do it on their own.

There is another thing Floridians ought to remember, as pretty as their beaches may be, they are still a long way down the road to rail passengers. And if their reactionary opposition to oil exploration holds sway, tourists will be making their way to Florida on shoe leather. Members should oppose this amendment to help Floridians understand the implications of their actions.

Mr. DAVIS of Florida. Mr. Chairman, I yield myself 2 minutes to respond to the previous comments.

First, there is a very important distinction between my amendment today and the amendment last week. The purpose of the amendment last week was to protect the beaches of Florida. It was not to punish any other State. I am not going to speak to what the purpose of the language in the bill is, but I will tell you what the effect is. The effect is to punish Florida, not to protect anybody else.

Secondly, with respect to jobs. Last week, every Member of Congress that spoke in opposition to the Davis-Scarborough amendment from an oil-producing State and they were protecting jobs in their areas. As I said on the floor and I will say again today, they do not have to apologize for that.

But let me just say today, this is not about protecting jobs in Florida. This is about protecting jobs in Texas, Alabama, North Carolina and other States. Those are the States where there are hundreds of workers who have already spent time building a pipeline that is nearing completion. So this is not about protecting jobs in Florida today.

Mr. DELAY made the comment that we want natural gas but we do not want rigs off our coast. Yes, we think that is a false choice.

We do not think we should have to choose between spoiling our beaches and running the air conditioner. We think we can have balance. Know what? If people in Texas and Louisiana want to drill more off their coast and sell us their natural gas, and I am sure they will mark it up for a pretty reasonable profit, they should do that but we do not want that. We have not given up our beaches or our drilling rights, and we have not given up on our beaches but we have not given up on our beaches, and that is why we do not want the rigs in our backyard.

Now let me say another very important reason why the gentleman from Texas needs to be adopted. We want competition in Florida. We do not want to happen in Florida what happened in California, which is the market fails and the consumers get squeezed. This pipeline will create competition. We will have more than one pipeline in Florida, and that is good for consumers. It is the way the market is supposed to work. It is good, old-fashioned competition.

Finally, the statement was made that Florida needs to do more in conservation energy efficiency. That is absolutely correct, but let us do it together as a country, and Texas and Florida, let us work together as a Congress to empower consumers and States to do more to use energy more wisely and more efficiently.

Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. SCARBOROUGH).

Mr. SCARBOROUGH. Mr. Chairman, let me just say, I have always respected the gentleman from Texas (Mr. DELAY) because he shoots it straight, and what he told us during his 4 minutes was what this is really about, and this provision really is about punishing Florida. It is an act of revenge because of what happened last week.

Regarding a couple of the statements of the gentleman from Mississippi (Mr. WICKER), he once again said it is way out in the Gulf of Mexico. It is not. It is 17 miles.

Another thing, the gentleman from Alabama (Chairman CALLAHAN) is offended because he said this is a House of courtesy, that he should have been notified because it is a House of courtesy. Right after that, he accused me
personally of demagoguery and hypocrisy and of intentionally misleading Members.

I did not take his words down because he loves the northwest Florida environment so much. Also, I had the gentleman from Mississippi (Mr. WICKER) to come up soon afterwards and try to tone things down, as I hope we can do. Unfortunately, the gentleman from Mississippi (Mr. WICKER) then went on and compared my district to Communist China, but we will talk about that at another day.

I hope we can tone this down, and I hope we can understand what this really is all about. It is about punishing the State of Florida because over 200, almost 250 people, in this Chamber voted to protect our shoreline.

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to respond somewhat to the comments of the gentleman from Florida (Mr. SCARBOURGH) about where we are today and why we are here.

He keeps bringing up, everyone keeps bringing up, the vote that took place last week in our absence. As to whether or not it was done in the still of the night while I was gone, that is something that we can resolve. Maybe it was not. Maybe they had good intentions. Maybe they were just, I do not want to say ignorant, of my absence, but and I apologized to him, as I have already said, about the hypocrisy word; and I have changed that to arrogance. That is not the issue.

The issue is the pipeline, and the issue is what is going to be put in the pipeline. The gentleman from Florida has already said that they already have pipelines going into Florida; they want to build more pipelines because they need more natural gas. Now since we are not going to be able to drill in this particular section of the gulf, there is not going to be any more natural gas. So why build a pipeline when the gentleman’s own newspapers in Florida are telling him that it could be devastating to his own environment? And therein comes my want to protect the beautiful beaches of Florida and especially the beautiful beaches of the Tampa Bay area.

When I take my boat to Florida, as I mentioned the other day, when I retire, if I ever do, when I go there I am going to go dock at a marina in Sarasota. That is where I want to be because that water is so pure, those beaches are so clean. I do not want to do anything to damage those beaches.

This is not about drilling. This is about the fact that this body decided we do not need any more drilling; we do not need any more natural gas. If we are not going to have any more natural gas, why do we need a pipeline to transport it? Therein lies the arrogance of what I was referring to when I mentioned the word hypocrisy. That is what I was referring to.

Mr. Chairman, I yield 5 minutes to the gentleman from Louisiana (Mr. TAUZIN), the chairman of the Committee on Energy and Commerce, who is more impacted by this than Alabama, than Florida, than anybody else, because it is closer to his district than anywhere else; and he is about as knowledgeable of this industry as anyone in this body.

Mr. TAUZIN. Mr. Chairman, I thank the gentleman from Alabama (Mr. CALLAHAN) for yielding me this time.

Mr. Chairman, I do want to calm things down because things get said in the heat of argument that I know Members would rather they did not say. So let me put something on the record.

The wetlands, the pristine wetlands in many cases, in my State are precious to me, and the waters of Louisiana are precious. They produce 28 percent of this Nation’s landings and seafood that all of us enjoy, and we do it simultaneously with producing 27 percent of the Nation’s natural gas and 27 percent of the Nation’s oil. Keep that in mind.

Our people have made a commitment to this country, not just to keep our wetlands safe, not just to keep our fisheries up and sound and running for everyone, but also to produce oil and gas for the rest of the country, including Florida. There is a national wildlife reserve in my district called Mandalaay. I asked Secretary Norton if she ever came to it. She said she did not.

Come to Mandalaay National Wildlife Reserve in my district, come and see it. It is full of wildlife, not just a few wildlife like one herd of caribou, but a mass of wildlife. We have the best wells drilled in Mandalaay National Wildlife Reserve producing oil and gas for the rest of America.

I asked her, is the National Wildlife Reserve in Louisiana less precious than ANWR? Less precious than section 181? Less precious than any block of land off of California? Why is it that this country makes a moral judgment that drilling off the coast of Florida? Even if this block were really off the coast of Florida instead of off the coast of Alabama and Louisiana and Mississippi, even if the facts were right that this land we are talking about in the gulf were really closer to Florida than it is to Louisiana in its entirety, not just in one little point, even if that judgment was right, and I question that, what makes production of resources in those areas of the country more desirable, from a moral standpoint, than production in the beautiful wetlands of Louisiana?

Now, I take quarrel with the gentleman who talked about our waters. We drained 40-something States through Louisiana. A lot of muddy water comes through Louisiana. Yet our wetlands are precious to us, but yet we accommodate this Nation in its oil and gas needs.

The gentleman from Alabama (Mr. CALLAHAN) has raised a good question. We are going to debate an energy policy on this floor pretty soon. We ought to think about the morality of an energy policy that says for some parts of America one does not have to take any risk, one does not have to take any risk at all, because somebody else will take the risk for them. Somebody else’s wetlands, somebody else’s coast is going to take a risk for them.

I asked Secretary Norton what would happen to this country if Louisiana decided to put an amendment on this floor to stop oil and gas drilling off our coast because we thought our Mandalaay wetlands and our wetlands were as precious as the wetlands and the beaches of other States of this country? If we decided not to take that risk anymore, what would happen to this country if we lost 27 percent of the oil and the gas?

What was the answer? It would be pretty severe.

I said, no, ma’am. It would be catastrophic. This country would fall apart.

We are already buying oil from Iraq to turn it into jet fuel to put it in our planes to fly over Iraq to bomb the radar sites that are trying to kill American pilots today. How stupid is that policy? In this country we are going to be debating real broad national energy policy. And, yes, we will talk about conservation, and we will talk about protecting the environment and supplying this country with the energy it needs so that Americans can turn on the lights and they will not be off as they were in California this summer.

We have a moral question to answer in this body, too. Is it moral to protect some people from the risks of production and to ask some of us to do it all? The answer should be no. A pipeline is not needed if the natural gas is not produced.

Mr. DAVIS of Florida. Mr. Chairman, I yield 2 minutes to the gentleman from Oklahoma (Mr. CARSON).

Mr. CARSON of Oklahoma. Mr. Chairman, I rise in strong support of the Davis amendment to strike the language from the appropriations bill that would stop the Gulf Stream pipeline in mid-construction.

The chairman and the gentleman from Louisiana (Mr. TAUZIN) raised great points about the need for an energy policy. And in the interest of consistency it should be noted that I voted to explore and produce in section 181, just as I support opening up other public lands across this country.

It is critical that construction of this pipeline be allowed to continue, especially at a time when we do recognize the need for improving our energy infrastructure. I think both of us on both
CONGRESSIONAL RECORD—HOUSE

CADES of the aisle would agree that improving and increasing our infrastructural and its ability to supply the country with energy is a keystone of any sensible energy policy. The completion of this pipeline will provide much needed natural gas throughout central and southern Florida, as well as providing many jobs for the people of the Gulf Coast region.

After all, pipes have already been ordered and delivered. Commitments have been made to construction companies. Contracts have been signed with customers. Power plants are now being built in anticipation of this project being completed.

The gentleman from Alabama (Mr. CALLAHAN) is right that this is not a vote about section 181. I was in the minority of this House in supporting drilling in the Gulf of Mexico. Today, the question is whether in the annals of all the wise policy tools at our disposal whether we shall cut off our nose to spite our face. Passing this appropriations bill with a prohibition would have the effect of stopping this pipeline and its construction.

The Federal Energy Regulatory Commission has already approved the project. The construction materials are already ordered at the cost of $800 million. The current language would prevent FERC from continuing the various approvals that are needed for going construction.

Keeping this language in the energy and water appropriations bill would be both bad energy policy and bad public policy. If we are serious about improving our infrastructure, let us build this pipeline.

Let us not act in petulance or in haste just because we lost one vote. In this case, we worked together to improve our national energy policy. I strongly encourage a “yes” vote on the Davis amendment to strike this unfortunate language from the energy and water appropriations bill.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from Alabama (Mr. BACHUS).

Mr. BACHUS. Mr. Chairman, I thank the gentleman from Alabama (Mr. CALLAHAN) for yielding me this time.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. DAVIS).

Mr. DAVIS of Florida. Mr. Chairman, I yield myself 1 minute.

Mr. CALLAHAN. Mr. Chairman, nobody has answered the question yet why we are here. The gentleman from Mississippi (Mr. WICKER) said we are here to redebate the amendment; the gentleman from Alabama (Mr. CALLAHAN) to put the language in the amendment, but he still has not told us why we are here.

Let me say what is happening because this is a fact. We have opened a can of worms here today. I would say to the gentleman from Alabama (Mr. CALLAHAN), we are hearing a new debate and the debate is that a pipeline on which $800 million has already been spent, we are going to debate whether it used the right kind of steel and if it did not we are going to shut it down. That is lunacy. Yes, this pipeline has some steel from other countries and it also has a lot of steel from the United States. Some of it was fabricated in Mobile, Alabama.

Let me add something else. I have been asked questions whether this is a unionized project or not. We are going to debate whether this was unionized after it has been built? What are we going to do construct the thing and build a fishing reef off the coast of Mobile? This is a unionized project. Is it 100 percent unionized? No, it is not. So, what is that a basis to defeat the amendment and scrap this project? Lunacy.

Let me also point out, this pipeline was built to transport natural gas that is already being drilled and extracted in the Mobile area.

Mr. DAVIS of Florida. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. SCARBOROUGH).

Mr. SCARBOROUGH. Mr. Chairman, I thank the gentleman for yielding me time.

Just very quickly, I want to say that we did find out why we are here today. Again, the gentleman from Texas (Mr. DELEG) is a straight shooter. He told us why we are here today, because of the vote of last week; basically telling Florida if you do not want to drill, then you do not get our gas.

He also talked about oil, which, of course, has not happened, this is not about oil, it is about natural gas. It is about oil, eventually.

Also I just want to say to the gentleman from Louisiana (Mr. TAUSIN), certainly Louisiana does take the risk; but it takes an economic risk. That is what America is about. He says that this is about good politics. Possibly some of the proposals that have been put forth over the last couple of weeks have been good politics; but I can tell you, they are bad energy policy.

At the risk of being hit from all sides, I recently proposed a compromise that would comply with 100- mile limits for oil drilling. Technically the finger that comes up here on this map of Tract 181 is in Alabama waters and we should not be really interfering with that lease sale. The gentleman from Florida (Mr. SCARBOROUGH), I yield myself such time as I may concern.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. MICA).

Mr. MICA. Mr. Chairman, the question has been asked, why are we here? We really should be here not to talk about good politics. Possibly some of the proposals that have been put forth over the last couple of weeks have been good politics; but I can tell you, they are bad energy policy.
from Alabama (Mr. CALLAHAN) is right in opposing the amendment and prohibiting the construction of this pipeline. Why do we need a pipeline if we ban gas development?

I proposed that we should prohibit oil drilling in this finger, and then allow natural gas to be extracted from all of 'Tract 181', which we need. We have an expected population increase of 29 percent in Florida by 2020, and the demand for natural gas to produce electricity will grow by 97 percent.

The United States Department of Energy report entitled "Inventory of Power Plants in the United States" revealed that during the next decade, 28 of 34 electrical generating plants planned for Florida are designed for natural gas.

Here is an article for a plant in New Smyrna Beach. It is 2 weeks old; that proposed power plant is gas-turbine generated. Here is another proposed power plant mentioned this past week in the Orlando Sentinel, it is also gas-turbine generated. Where are we going to get the natural gas?

You cannot have it both ways, and I think the gentleman from Alabama (Mr. CALLAHAN), by his provision, in banning this pipeline, is correctly raising serious energy policy questions. We must have good energy policy, but we cannot be dependent on bad politics to make good energy decisions.

Mr. DAVIS of Florida. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin (Mr. OBRE), the ranking member on the Committee on Appropriations.

Mr. OBRE. Mr. Chairman, I really do not have a dog in this hunt, coming from Wisconsin; but I simply want to observe that there has been a false parallelism between the idea that if you are going to prevent drilling off the coast of Florida, then somehow it makes sense to prevent the construction of this pipeline.

There is a big difference. The drilling has not occurred; the pipeline is already largely constructed. Secondly, there is no question that Florida is going to need the natural gas. So it seems to me that there is a false parallelism which should be dismissed by any neutral Members of the body.

Second, let's not kid anybody: this amendment is not being offered because of the merits of the amendment. This amendment is here because it is payback time. There are some people in this place who are unhappy with the fact that last week this House said, "No, we are going to protect the beaches of Florida. The oil companies are not going to be able to drill any damn place they want. They are going to have to take other higher values into consideration."

So, now people who are resentful of that are thinking it would be nice if you could tweak the Florida Representatives for standing up for their own environmental interests and make them pay a price for protecting their beaches from the money lust of the oil companies. This is basically what you are talking about.

So I think that any Member who does not have a dog in this hunt ought to recognize this amendment for what it is. It is a clever attempt at retaliation. I think the House is above that kind of thing, and I would urge that the amendment be offered by the gentleman today to remove this provision in the bill be adopted.

Any area has the right to protect its environmental resources. That is what Florida did last week, and the House ought to respect it.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. OGREN).

Mr. OGREN. Mr. Chairman, I hardly ever disagree with my ranking member on appropriations, but I do not think this amendment is about retaliation. I think it is about a real energy debate we need to have here on this floor.

I agree, Florida probably does not want to become like Louisiana or Texas. I am worried that they want to become like California, where they do not want to produce. I am glad at least they want to pipeline sometimes, because that is not the case in California. Yet, when the price goes up, because our supplies are low, they want price caps and they complain about it.

I am worried about this, that if we do not adopt this amendment, if Florida recognizes you need to produce your resources, we will see a California in the southeastern United States, and we will have the same problem in the southeastern United States as we do in California.

We can produce. I have platforms offshore that are emitting zero pollution right now. Thirty years ago we did not have that; but today we have that, because we have different standards today. That can be done in the Gulf of Mexico, whether it is in Texas, Louisiana, Alabama, Mississippi, or Florida waters; and, frankly, it can be done off the coast of California.

So I am glad to be here to enjoy this energy debate. And it is not about retaliation. I think it is about energy that we need to talk about on this floor.

Mr. DAVIS of Florida. Mr. Chairman, I yield 2 minutes to the gentleman from Indian Rocks, Florida (Mr. YOUNG), distinguished chairman of the House Committee on Appropriations.

Mr. YOUNG of Florida. I thank the gentleman for yielding me time.

Mr. Chairman, several days ago I suggested to the House that this might be an opportunity to have a war between different delegations; and I had hoped that we would avoid that, because we have enough problems with our foreign suppliers. We have enough problems, that we do not need to have problems within our own country. The fact is that we do need more production of oil and gas, whatever types of energy we can produce. We are a consuming Nation, and we need to produce.

But most of the conversations today have not been about this amendment. I have enjoyed the debate, except for one part. I did not really appreciate the debate of the gentleman from Texas (Mr. DELAY) when he attacked the Florida delegation, because most of the Florida delegation has been there every step of the way to produce more energy at home, rather than relying on foreign sources. So I thought that attack was a little bit out of order.

However, the great debate about where we are to drill or not to drill has been the amendment. This amendment merely strikes three lines out of the bill. Let me tell you what those lines are: "Provided further, That none of the funds made available to the Federal Energy Regulatory Commission in this or any other Act may be used to authorize construction of the Gulf Stream natural gas project." That is the amendment, to strike that language.

Here is why we ought not to be so exercised with each other. The issues are these: the permits to authorize the construction of this pipeline have already been issued. You are not going to change that, unless you are going to change the basic law. You are not going to change that with this language.

The amendment of the gentleman from Florida (Mr. DAVIS) to strike this language is fine, and I am going to vote for it; but the fact of the matter is, this whole debate is really about nothing. Because the bill has already been issued. It has been a good vehicle for the debate on the question of 'Tract 181' and the issue of who drills and who does not drill.

We have to be together on this. To divide this Congress, to divide this House over this issue, is not a smart thing to do. We need to calm down the rhetoric and need to get about becoming energy independent from the rest of the world.

Mr. DAVIS of Florida. Mr. Chairman, I yield the time to the gentleman from Bradenton, Florida (Mr. MILLER).

Mr. MILLER of Florida. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, for our distinguished chairman of the subcommittee, I thank him for referring to Sarasota. Those are my beaches in Sarasota. I have some of the most beautiful beaches in Florida on the west coast, Anna Maria, Longboat Key, Siesta; and I hope the gentleman brings his boat down to our area.

But I am also the base where the pipeline comes ashore in Manatee County, at Port Manatee. Just as it
leaves the gentleman’s district, it comes ashore in my district and has a big economic impact. So I think we need to recognize the importance of the pipeline and its investors, who are spending over $1 billion on this pipeline. Now, if there was not enough gas, they would not be spending over $1 billion on this pipeline to build it from two areas.

This issue was brought up in a manager’s amendment on Monday which had something to do with Venice beaches, and I appreciate that in the manager’s amendment last week when we addressed the issue of this pipeline. So this is strictly about the pipeline. The investors, they are the ones putting the money at risk, so we do not even make that decision. We should go ahead with the pipeline.

With respect to H. Res. 181, since I only have a few seconds left, I think we need to open that up for discussion. The gentleman from Florida (Mr. Mica) is right. There is plenty of gas there. I think we should drill for that gas. This was a 6-month delay. We kind of let the people in Florida get caught between our Governor and our President, and I think there is room for compromise. I think there is a middle ground.

That is what we need to look for: move ahead, because we need the energy in our country, but let us not fight over this pipeline. The pipeline needs to go ahead, and it is going to be continued.

Mr. Chairman, I hope everyone votes for this amendment.

Mr. DAVIS of Florida. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, I just want to make two points a little more clearly, and then I think we have had a thorough, heartily debate. The first is I wish I had the chart here today to show how many rigs have gone up, and I would submit can go up, hugging the coast of Louisiana, Texas, far removed from any chance of polluting the coast of Florida.

We have a supply out there, and we Floridians are willing to pay a fair price to consume the energy we need for our State. Again, we do not want to be trapped like California. We want competition. We want more than one pipeline. Adopting this amendment will help achieve that.

Let me finally say, just to put this in perspective, if we were to raise the CAPE standards by 14 miles per hour, that would generate 10 times more result than the entire amount of natural gas and crude oil in section 181.

Mr. Chairman, I yield the balance of my time to the gentleman from Florida (Mr. SCARBOROUGH).

□ 1145

Mr. SCARBOROUGH. Mr. Chairman, I thank the gentleman from Florida (Mr. DAVIS) for yielding to me.

This debate really has been about respect or the lack thereof of the people of Florida and their wishes. We have been called hypocrites, audacious, arrogant; implied as being unpatriotic, communist, Chinese, all because last week some very powerful people, some very powerful corporations, were shocked by the outcome of the vote on the Davis-Scarborough amendment.

I think we have to go back to the issue of respect and respect the will of the people in my district, respect the people of the State of Florida, just like we need to respect the will of the people of Alabama, Mississippi, Louisiana, Texas and Alaska to determine their own fate. We are very close to Alabama, and what affects Alabama affects us. We need to work together.

Mr. Chairman, I yield back the balance of the time.

This has been an interesting debate, even though probably 90 percent of the time was spent on talking about an issue that is not even in the amendment. It is a project that is of great interest to Florida (Mr. Young) is right. Maybe this amendment will have no impact. I think he is wrong, because I think it is sending a message. They are talking about the parochialism of this issue with respect to the gentleman from Florida (Mr. SCARBOROUGH) and the gentleman from Florida (Mr. DAVIS).

Mr. Chairman, this is about my district. This pipeline originates in my district. What the gentleman from Florida (Mr. DAVIS) said is we are going to take all you are already extracting, because you have too much, and we are going to send it to Florida because they do not have any. He is right, except we do not have too much.

When we ship gas out of the State of Alabama, our power rates are going to become competitive, and they go up. So that is not the issue. The issue is that I think that this issue was brought up at such a time that was inconvenient to the Alabama delegation to be here and defend themselves. They have apologized for that. We accept that apology.

I am saying this is an environmental issue, and the issue is whether or not we need to build a pipeline if we are not going to permit drilling. That is the issue. It is of keen interest to me and to the people of my State as well. All they talked about today in their selfish vision and their selfish manner is that this is going to hurt Florida. We are not going to have gas to air condition our homes. Do not do this to us. I am saying, it is going to impact Alabama as well. If the gentleman from Florida (Mr. Young), the chairman of the committee, is right, and FERC would have the authority to stop this, then there is no need for this debate.

If I want to stop it, I think I can stop it through the permitting process in the State of Alabama, which I might; if this amendment is adopted, that is probably what I will do. But I do not think this amendment is going to be adopted, and I know that some people have come up to me and said, Sonny, you would not retaliate and take some of my projects out in the conference committee that you have been so generous with in the past 3 or 4 or 5 weeks; that is not the case. I would not think of doing that.

Mr. Chairman, I will say that this is a project that is of great interest to me, and that I would like very much to defeat this amendment, and I would encourage my colleagues to vote “no.”

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Florida (Mr. DAVIS).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. DAVIS of Florida. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Florida will be postponed.

RECORDED VOTE

The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Florida (Mr. Berkley), and the amendment offered by the gentleman from Florida (Mr. Davis).

The Chair will reduce to 5 minutes the time for any electronic vote after the first vote in this series.

RECORD VOTE

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Nevada (Ms. Berkley), on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

The vote was taken by electronic device, and there were—aye 102, noes 321, not voting 10, as follows:

Messrs. SMITH of Washington, BILIARAKIS, HOLDEN, SANDLIN, GANSKE, GRAVES, RODRIGUEZ, SCOTT and SHEHVIN, and Mrs. MYRICK and Mrs. BIGGERT changed their vote from "aye" to "no."

Messrs. STUPAK, KENYON, of Rhode Island, SHAYS, BOSWELL, SOUDER, RANGEL, and HINCHLEY and Ms. VELICLEIGH changed their vote from "no" to "aye."

So the amendment was rejected. The result of the vote was announced as above recorded.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, the Chair announces he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device will be taken on each amendment on which the Chair has postponed further proceedings.

AMENDMENT OFFERED BY MR. DAVID OF FLORIDA

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Florida (Mr. Davis) on which further proceedings were postponed and on which the noes prevailed by vote of June 28, 2001.

The Clerk redesignate the amendment.

The Clerk redesignated the amendment.

The CHAIRMAN. A record vote has been demanded. A record vote was ordered.

The CHAIRMAN. This will be a 5-minute vote.

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Florida (Mr. Davis) on which further proceedings were postponed and on which the noes prevailed by vote of June 28, 2001.

The Clerk redesignate the amendment.

The Clerk redesignated the amendment.
Mr. GILMAN. Mr. Speaker, earlier today, I stated for: 

The result of the vote was announced for: 

So the amendment was rejected. 

In light of the dramatic budget cuts proposed by the Administration, I applaud the Subcommittee for funding the Brays Bayou flood control project at the Harris County Flood Control District's capability—$5 million. When completed, the Brays Bayou project will be a national model for local control, community participation, flood damage reduction, a heavily populated urban watershed, and the creation of a large, multi-use greenway/detention area on the Willow Waterhole tributary. The Brays project is a demonstration project for a new reimbursement program initiated by legislation I authored along with Mr. DELAY that was included in Section 211 of WRDA 1996. The program gives local sponsors more responsibility and flexibility, resulting in projects more efficient implementation in tune with local concerns.

I am very encouraged that the Brays project is on track to be fully funded at $5 million track for Fiscal Year 2002, rather than $4 million, as the Administration suggested. The project will improve flood protection for an extensively developed urban area along Brays Bayou in southwest Harris County including tens of thousands of residents. The project will provide the largest dredging project since the Hurricane Allison caused great damage to thousands of homes in this watershed several weeks ago.

The project is necessary to improve flood protection in the extensively developed urban area along Simms Bayou in southern Harris County. The Sims Bayou project consists of 19.3 miles of channel enlargement, rectification, and erosion control and will provide a 25-year level of flood protection. Before the funding shortfall, the Sims Bayou project was scheduled to be completed two years ahead of schedule in 2009. We cannot be confident of that prediction unless Sims funding is raised to $12 million in the Senate version and the Conference Report.

Flood control projects are necessary for the protection of life and property in Harris County, but improving navigation in our Port is an integral step for the rapid growth of our economy in the global marketplace. Therefore, Mr. Speaker, I am disappointed that this legislation provides only $30.8 out of the needed $46.8 million for continuing construction on the Houston Ship Channel expansion project. When completed, this project will generate tremendous economic and environmental benefits to the nation and will enhance one of our region’s most important trade and economic centers.

The Houston Ship Channel, one of the world’s most heavily-trafficked ports, desperately needs expansion to meet the challenges of expanding global trade and to maintain its competitive edge as a major international port. Currently, the Port of Houston is the second largest port in the United States in total tonnage, and is a catalyst for the south- east Texas economy, contributing more than $5 billion annually and providing 200,000 jobs.

The Houston Ship Channel expansion project calls for deepening the channel from 40 to 45 feet and widening it from 400 to 530 feet. The ship channel modernization, considered the largest dredging project since the construction of the Panama Canal, will preserve the Port of Houston's status as one of the premier deep-channel Gulf ports and one of the top transit points for cargo in the world. Besides the economic and safety benefits, the dredged material from the deepening and widening will be used to create 4,250 acres of wetland and bird habitat on Redfish Island.

I want to take this opportunity to urge those who will be conferees on this legislation to fund the Port of Houston project to its capability. This project is supported by local voters,
governmental, chambers of commerce, and environmental groups.

I thank all the subcommittee members, the Chairman, the Ranking Member, and especially Representative EDWARDS for their support and their work under tough budgetary circumstances.

Mr. GILMAN. Mr. Chairman, I rise in strong support of H.R. 2311, the fiscal year 2002 energy and water appropriations bill. I commend the committee’s distinguished Chairman, Mr. CALAHAN for his diligence and work on this important fiscal year 2002 appropriations bill.

H.R. 2311 is an important appropriations measure that funds our Nation’s waterways, flood control, and irrigation infrastructure, as well as various important programs administered by the Department of the Energy.

Included in this measure is $100,000 for the Ramapo-Mahwah flood control project. This project involves the construction of features for flood protection in the Ramapo and Mahwah Rivers in Mahwah, New Jersey and Sufferen, New York. Flooding has occurred frequently over the past 33 years, causing extensive damage. Accordingly, the inclusion of this funding will provide the Army Corps with the funding necessary to proceed forward with the first step to initiate a refinement of the project’s cost.

Moreover, H.R. 2311 includes an appropriation of $3 million for the New York City Watershed Protection Program. Nine million New York’s: receive their drinking water from the New York City watershed. Accordingly, it is imperative that public health and environmental concerns be addressed along the New York City watershed. This appropriation will provide assistance for New York State for the design and construction of water supply storage, treatment, and distribution facilities, and surface water resource protection and development projects.

Accordingly, I urge all of my colleagues to support this important bill.

Mr. RUSSLE. Mr. Chairman, I rise in favor of H.R. 2311, making appropriations for energy and water development for fiscal year 2002. This bill is consistent with the levels set forth in the budget resolution and complies with the Budget Act.

H.R. 2311 provides $23.7 billion in discretionary budget authority and $24.9 in outlays for the Department of Energy, the Bureau of Reclamation and various independent agencies.

This is a straightforward bill that neither ignites emergencies nor provides advanced appropriations. The bill also does not rescind any previously enacted budget authority.

The bill is within the 302(b) allocation of the Appropriations’ Subcommittee on Energy and Water. It therefore complies with section 302(f) of the Congressional Budget Act, which prohibits consideration of appropriations measures that exceed the appropriate subcommittee’s 302(b) allocation.

On this basis, H.R. 2311 is worthy of our support.

The CHAIRMAN. Under the previous order of the House, no further amendments are in order.

Under the rule, the Committee rose; accordingly, the Committee rose; and the Speaker pro tempore (Mrs. Biggert) having assumed the chair, Mr. SIMPSON, Chairman of the Committee on Appropriations, on the House, reported that the Committee, having had under consideration the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes, pursuant to House Resolution 180, reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

Under clause 10 of rule XX, the yeas and nays are ordered.

Mr. HASTINGS of Washington. Madam Speaker, by direction of the Committee on Rules, I call up House Resolution 183 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 183

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House of the state of the Union for consideration of the bill (H.R. 2330) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. After general debate the bill shall be considered for amendment under the five-minute rule. The amendment printed in the report of the Committee on Rules accompanying this resolution shall be considered as adopted in the House and in the Committee of the Whole. Points of order against provisions in the bill, as amended, for failure to comply with clause 2 of rule XXI are waived. During consideration of the bill for further amendment, the Chairman of the Committee of the Whole may accord priority in recognition on the basis of whether the Member offering an amendment has caused it to be printed in the portion of the Congressional Record designated for that purpose in clause 8 of rule XVIII. Amendments so printed shall be considered as read. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill, as amended, to the House with such further amendments as may have been adopted. The previous question shall be considered ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Washington (Mr. HASTINGS) is recognized for 1 hour.

Mr. HASTINGS of Washington. Madam Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Ohio (Mr. HALL), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Madam Speaker, House Resolution 183 is an open rule providing for consideration of the bill H.R. 2330, Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act of 2002.

The rule provides 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. The rule waives all points of order against consideration of the bill. The rule further provides that the bill shall be read for amendment by paragraph, and that the amendment printed in the report of the Committee on Rules accompanying the rule shall be considered as adopted.

The rule waives all points of order against provisions in the bill, as amended, for failure to comply with clause 2 of rule XXI, prohibiting unauthorized or legislative provisions in a general appropriations bill.

Finally, the rule allows the chairman of the Committee of the Whole to accede in recognition to Members who have preprinted their amendments in the Congressional Record and provides one motion to recommit with or without instructions.

Madam Speaker, H.R. 2330 appropriates $74.2 billion in fiscal year 2002 budget authority for agriculture and related programs through the Department of Agriculture and other agencies. This figure is $2.4 billion less than last year's appropriations, but $234 million more than the President's request. The bulk of the spending goes to food stamps, $22 billion; the Food and Drug Administration, $4 billion; child nutrition programs, $10.1 billion; supplemental nutrition for Women, Infants and Children, $4.1 billion; and the Federal Crop Insurance Program, $3 billion.

In addition, this bill provides $1 billion for the Agriculture Research Service; $720 million for the Food Safety and Inspection Service; and $946 million for the Farm Service Agency.

Madam Speaker, I am particularly pleased that the Committee on Appropriations has included $150 million for market loss payments for America's apple growers. As a representative of the number one apple-producing district in the Nation, I am acutely aware of the devastating losses sustained by apple growers in the last year.

In our area, for example, countless warehouses, packing houses and other apple-related businesses have either shut down, declared bankruptcy, or downsized dramatically. In county after county, growers find that it costs substantially more to produce a box of apples than the market will pay to buy it.

And, unlike many farms that can easily switch crops when prices are down for one commodity, apple growers cannot simply pull up their orchards and grow something else for a few years until apple prices go back up again. In the face of unfair competition from China and other Asian nations, our growers have few tools with which to fight back.

Apple growers are an unusually independent breed. They have suffered ups and downs of the market for years without asking for any kind of Federal assistance that has long been common to other types of crops and farming. But never before have we suffered the kinds of losses we are experiencing right now. For that reason, I would like to commend the gentleman from Florida (Mr. Young) and the gentleman from Texas (Mr. Bonilla) and their colleagues on the Committee on Appropriations for recognizing the dire situation in apple country and for providing this much-needed assistance.

Madam Speaker, this is a fair bill. It funds a number of high-priority programs while cutting out wasteful, unnecessary and duplicative spending. Accordingly, I urge my colleagues to support both this open rule and the underlying bill, H.R. 2330.

Madam Speaker, I reserve the balance of my time.

Mr. HALL of Texas. Madam Speaker, I yield myself such time as I may consume, and I thank the gentleman from Washington (Mr. HASTINGS) for yielding me the customary time.

Madam Speaker, this is an open rule. It has everything to do with the bill that makes appropriations for the Department of Agriculture and other related agencies for fiscal year 2002. As my colleague from Washington described, this rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations.

This allows germane amendments under the 5-minute rule. This is the normal amending process in the House. All Members, on both sides of the aisle, will have the opportunity to offer amendments that do not violate the rules for appropriations bills.

Madam Speaker, this is generally a good bill that serves America's farmers as well as the poor and hungry in this land. And I commend the ranking Democrat, the gentlewoman from Ohio (Ms.
I would like to thank the esteemed ranking member for yielding time to me on this rule on our agriculture appropriation bill for the year 2002. Let me say that it has been a pleasure to work with our new chairman, the gentleman from Texas (Mr. Bonilla). We think we have perfected the bill as it has moved through subcommittee and full committee. Nonetheless, I must rise reluctantly to oppose this rule.

We did go before the Committee on Rules to try to get the permission to offer amendments here on the floor today. We were refused. I wanted to go through a few of those amendments that we believe are worthy and would make this a much better bill.

Probably one of the most important amendments is the Global Food for Education initiative inspired by the work of Senators Bob Dole and George McGovern. It takes our school lunch program from this country and extends its concept abroad, using food to help over 9 million needy children in 38 countries to both promote their education and help them develop fully by having decent nutrition. We very much want to continue this program. We really believe that we allowed ourselves to become bottled up by artificial budget rules that prevented us from going on record to do what is right in this current bill.

I would very much like to have this Global Food for Education initiative extended directly by Congress as a part of the regular order in this appropriation bill.

The gentlewoman from Connecticut (Ms. DeLauro) will probably be speaking against the rule soon on the question of food safety and improved food inspection. On the surface, the bill before us looks like it provides more...
Mr. NUSSLE. The gentleman from Texas is correct. The gentleman that his understanding is correct. The gentleman from Texas (Mr. BONILLA), the chairman of the subcommittee, developed a bill that was within its 302(b) allocation as set by the Committee on Appropriations. However, the bill as reported from the Committee on Appropriations included a provision, which I opposed, by the way. This amendment included additional spending that really should be mandatory and under the jurisdiction of the Committee on Agriculture. However, the Committee on Appropriations adopted this amendment, which would provide an additional $150 million in emergency funding to assist apple producers.

Some Members expressed concern over the emergency designation, which in effect would increase spending above the level assumed by the budget resolution, so that designation will be eliminated from the bill by the rule before us at the present time. As a result of this action, the Committee on Appropriations has not exceeded our 302(a) allocation as set by the Committee on the Budget.

I want to assure my friend from Iowa and Members that it was not the intent and it is not the policy of the Committee on Appropriations to present a bill that is in excess of its allocation. It is simply the fact that after extensive discussions with the leadership, the Committee on Agriculture, and the Committee on the Budget, it was determined that the most expeditious way to resolve the matter and get this bill on the floor was the elimination of the emergency designation.

Mr. NUSSLE. It is my further understanding that the Committee on Appropriations will increase the subcommittee’s 302(b) allocation to the level provided by this bill and adjust the 302(b) allocation to each subcommittee by an offsetting amount.

Mr. YOUNG of Florida. Madam Speaker, the gentleman’s understanding is correct. It is the intent of the Committee on Appropriations to address this matter the next time it meets to consider revisions to the allocations by increasing the 302(b) allocation for this bill to a level equal to the amount this bill as passed by the House and to reduce other allocations for outstanding bills by the same amount.

The committee does not intend a wholesale reprioritization of the budget to address this matter. We are also somewhat limited in our options because we have already passed three bills out of the House. It is not the intent of the Committee on Appropriations to reduce the 302(b) allocations of bills previously passed by the House to accommodate this spending in the agriculture bill.

Mr. OBEY. I thank the gentleman. This does not mean the committee is precluded from a later re-allocation as we work on these bills with the Senate during conference deliberations. Further, I would say to the gentleman from Iowa that it is my intention that the defense allocation will be preserved and maintained. Defense expenditures are critical to our national security, and I assure the gentleman that we will fully abide by the provisions of the Budget Act. However, this does not mean the committee is precluded from a later re-allocation as we work on these bills with the Senate during conference deliberations. Further, I would say to the
This is a bipartisan bill and it is brought to the floor with, I think, agreement that the real needs of the majority of the people who are needing assistance for food, is met and that it is a bill that I think we can all support in the House.

There are a couple items that I am very pleased that were included. One is funding for the National Animal Disease Center in Ames. This is in response to real concerns that we have with foot and mouth disease; mad cow disease; those types of problems that can be devastating to our livestock industry; and also for food safety for Americans. Also, they have increased the funding for the AgrAbility program, something that is very dear to me. What this program does is help people continue to farm even with disabilities. And $1.6 million in this bill for this very important program is very much appreciated.

This bill funds our research in a manner that agriculture is desperately in need of, new opportunities, new ways of adding value to their products. The way to do that is through research. So I am very pleased with the emphasis that the chairman has put on research.

Also, a key element for the Department is food safety. I am very pleased that the FDA has increased funding of $115 million to a level of $1.18 billion. That is the largest increase in history. The Food Inspection Service has an increase of $25.4 million, raising that total to $720 million, also a very substantial increase to meet the needs that we have to provide not only the best quality food but the safest food anywhere to be found in the world.

So, again, I ask Members to support this rule, support this bill. It is good for agriculture. It is good for all of our citizens.

Mr. HALL of Ohio. Madam Speaker, I yield 5 minutes to the gentleman from Connecticut (Ms. DELAUNO).

Ms. DELAUNO. Madam Speaker, I rise in opposition to the rule. It busts the budget caps. There has been a double standard applied to some programs within this bill, and I was fully supportive of the assistance to apple growers in this country, because I think it is the right thing to do to help an industry that we depend on that helps us.

On the other hand, what they have done here with the Committee on Rules is they have made an exception for one emergency and have said no to all other emergencies that face American families. Whether it is family farmers facing the loss of their family farms, whether it is biodiesel fuels, Meals on Wheels, low-income nutrition assistance, we have emergencies that we need to address. We just cannot pick and choose, which ones we want and which ones are politically advantageous.

Specifically, this rule blocks an amendment that I brought to the committee to provide urgent emergency funds to address the food safety crisis. Americans are more likely to get sick from food today than they were a half century ago, and the outbreak of food sickness is expected to go up by as much as 15 percent over the next decade. Each year, some of my colleagues have mentioned this already, 5,000 Americans die from foodborne illnesses, 76 million get ill and 325,000 are hospitalized. Just 2 days ago, the Excel Corporation recalled 190,000 pounds of ground beef and pork because of the possible contamination by deadly E. Coli in Kentucky, in Tennessee, in Georgia. Sara Lee pled guilty to selling tainted meat that was linked to a nationwide listeriosis in 1998 that killed 15 people. Grocery stores are afraid that their food is unsafe to sell.

Lest one thinks that these are things that I just made up, we have a number of headlines from recent news: A Big Recall of Meat Amid E. Coli Fears; Sara Lee Fined in Meat Recall Linked to 15 Deaths; USDA Blamed in Slaughter Violations; Grocers Demand Produce Inspections; Contaminated Food Makes Millions Ill Despite Advances.

Experts like Joe Levitt from the FDA are telling the press that, quote, we do have a real problem. To address this problem, I asked the committee to allow an amendment to provide $2.23 million in emergency funds, $90 million to increase inspection of imported foods from 1 to 10 percent, $73 million for over 600 new inspectors to inspect all high-risk and domestic farms twice a year and all other domestic farms every 2 years, and $5 million for the food safety and inspection service to ensure the implementation of new food safety procedures to strengthen our food safety efforts.

The Food and Drug Administration inspects all food except meat, poultry, and eggs. They inspect fruit juices, vegetables, cheeses, and seafood. These foods are the sources of 85 percent of food poisoning; and last year, recalls of FDA-regulated products rose to 313, the most since the mid-1980s, and 36 percent above the average.

FDA inspects less than 1 percent of imported food that comes into the United States, and this is a market that has expanded from 2.7 million items coming in to our country to 4.1 million items, and that increase has happened in just the last 3 years.

In the domestic market, the FDA inspects high risk farms no more than once a year and other farms are inspected only once in 7 years.

The FDA has only 400 people to inspect all domestic food, and we have 5,000 food safety inspectors and food plants in the United States. They have less than 120 people to inspect imported food. Food Safety and Inspection Service has held public hearings on a wide
range of issues: procedures for imported food, risk management, emergency measures. We know what has happened in Europe with food and mouth. We know about the threat of mad cow. It is vital that the FSIS has the resources it needs. American families should be able to go out to dinner, to buy the foods they need in order to take care of their children or their families are going to be in jeopardy. In the 1920s, Upton Sinclair wrote in a novel, The Jungle, he highlighted the abuses of the meat packaging industry. It brought a wave of reform in this country. We need to move forward on food safety, not to move backward to the days that Sinclair wrote about. This is about providing the agency that is responsible for protecting our food supply, give them the resources to have the inspectors that they need in order that Americans will be safe. I urge my colleagues to oppose this rule.

Mr. HASTINGS of Washington. Madam Speaker, I yield 3 minutes to the gentleman from Iowa (Mr. NUSSLE), the distinguished chairman of the Committee on the Budget.

Mr. NUSSLE. Madam Speaker, I rise to support the rule and to speak in favor of H.R. 2330, providing appropriations for agriculture and related agencies. As reported by the Committee on Appropriations, this bill is technically consistent with the budget resolution and complies with the Congressional Budget Act. As the chairman of the Committee on the Budget, I wish to report to my colleagues that H.R. 2330 provides $15.7 billion in budget authority and $15.97 billion in outlays for fiscal year 2002. The bill does not provide any advanced appropriations.

As reported, the bill also designates $150 million in emergencies, which increased both the levels of the budget resolution caps by the same amount. It also rescinds $3.7 billion, but this rescission produces no savings in outlays. As reported by the Committee on Appropriations on June 27, the bill does exceed the Subcommittee on Agriculture, Rural Development, Food and Drug’s 302(b) allocation. Therefore, it does not violate section 302(c) of the Budget Act, which prohibits the consideration of appropriation legislation that exceeds the reporting subcommittee’s 302(b) allocation.

Members may be aware that I am concerned and have been concerned that the reported bill designates $150 million in agricultural emergency for the purpose that is already accommodated in the budget resolution. This designation had the effect of increasing the levels of the budget resolution and the statutory caps by the same amount. The budget resolution clearly anticipated the need for additional agricultural assistance by increasing the Committee on Agriculture’s allocation by $5.5 billion in fiscal year 2001. Indeed, earlier this same week, the House passed a bill that provided that same $5.5 billion in agricultural emergency funding that was provided to agriculture. In addition, the budget resolution provided another $7.3 billion of agriculture spending in fiscal year 2002 and included a procedure that could increase the total to as much as $63 billion. The Committee on Agriculture is free to use that portion and allocation as it sees fit for specialty crops.

While I continue to have concerns about the emergency designation, the chairman of the Committee on Appropriations and I have agreed, and we just shared that colloquy on the floor a moment ago, that the designation would be stricken by this rule and that the bill would be protected from resulting points of order.

Furthermore, the gentleman from Florida (Mr. YOUNG) agreed that the Committee on Appropriations would revise its 302(b) allocations and reflect the fact that the bill should be offset by other appropriation bills. It was further agreed that the offsets would not come out of the bills that have already passed the House or bring Defense below the levels of the President’s budget submission. The gentleman from Florida (Mr. YOUNG) is a man of his word. He has done his best in bringing this bill to the floor, as has the gentleman from Texas (Mr. BONILLA).

In view of the good faith comments of the gentleman from Florida (Mr. YOUNG) and commitments in this regard, I urge Members not only to support the bill but to support the rule.

Mr. HALL of Ohio. Madam Speaker, I reserve the balance of my time.

Mr. HASTINGS of Washington. Madam Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. YOUNG), my distinguished colleague and classmate.

Mr. LAHOOD, Madam Speaker, I thank the gentleman from Washington (Mr. HASTINGS) for yielding me the time.

Madam Speaker, I want to pay my compliments to the chairman of the committee, the gentleman from Texas (Mr. BONILLA) and his staff and also to the gentleman from Ohio (Ms. KAPTUR) and the staff on the Democratic side for putting together a good bill. I think there is no doubt that every Member that is on the subcommittee, of which I am the newest Member, believes that this is a good bill. Even though there are some who believe that the rule did not allow for some consideration of opportunities to solve some problems, many of those problems were discussed in the subcommittee and were fixed. As many amendments as people wanted to offer were able to be offered, thanks to the chairman. I know that the ranking member, the gentleman from Ohio (Ms. KAPTUR) offered many amendments, some of which were adopted, some of which were not. Other Members had the same community.

So this notion that this is not a good rule because some people do not have the opportunity, those opportunities were provided to the subcommittee Members, and there was a full debate on many of these issues. Although I am a new member of the subcommittee, I am certainly not new to the issues of agriculture. During the last 6 years, and I have been a member of the agricultural authorization committee and I have worked very hard with many Members, including some who are in the Chamber today, on agricultural issues, in trying to solve agricultural problems.

Agriculture is in a recession. This bill is extraordinary. It makes an awful lot of sense, I think, to pass the rule and certainly pass the bill. There will be some opportunities for some people to make modifications or offer amendments, and then there will be additional time, obviously later on, when there is a conference.

But today I think is the day to pass the rule, pass this good bill, keep things moving, and really assist those in agriculture who need the kind of assistance and help and research funds that this bill provides.

Mr. HASTINGS of Washington. Madam Speaker, I am pleased to yield such time as he may consume to the gentleman from Texas (Mr. SESSIONS), my colleague on the Committee on Rules.

Mr. SESSIONS. Madam Speaker, I thank the gentleman from Washington, my colleague on the Committee on Rules, for yielding me this time.

Madam Speaker, my colleagues and I understand what we are talking about today is the rule. That is what we are debating right now, about whether we are going to move forward on the rule,
an opportunity to put this on the floor, an opportunity to vote on this and get the appropriations bill done before we go home.

I think it is important to understand that what this rule provides for is an incredible amount of money for some very important projects, to some things that sustain America, to some things that we have, how we deal with people in our country.

We should not go too far from understanding that this bill provides $2.2 billion for food stamps. This bill provides $1.2 billion for the Food and Drug Administration. They know how to administer their business. They know what they are doing, and $1.2 billion will cover that. Child nutrition programs, $10.1 billion. The Supplemental Nutrition Program for Women, Infants, and Children, known as WIC, $4.1 billion.

What we are doing with this bill and with this rule is to make sure that the agriculture of this country is not only safe and the food they produce is reliable, but also trying to make sure that we look at the resources and assets that we have in this country and say that we believe that conservation programs are important; we think people who are engaged in agriculture are important.

We are making sure that our Federal Crop Insurance Corporation is funded, $3 billion. We are trying to prepare ourselves to make sure that people who live in rural areas and who are in agriculture know that Washington will deal fairly with them.

But we also recognize that part of the argument we are going to hear today is we are not spending enough money. Well, I might remind my colleagues that we cannot spend enough money to make sure that some people in this body will always be happy, but that we go back to the budget that we set in place earlier in the year, and that this program that we are doing for the 2002 agriculture appropriations act falls in line with what this body said it would do. Then, through the leadership of the gentleman from Texas (Mr. BONILLA), we have had an opportunity to craft through many discussions and through many votes a policy of this country that is good on a moving-forward basis.

So I support what we are doing here today. This rule is important for us to continue the process, not only on this appropriations bill, but to make sure that we finish in time and move forward on the commitment that we have to the country, to make sure that the public policy of this Republican Congress and, yes, one that the President will sign, to make sure that people who are involved in agriculture and consumers and, yes, women and children and people who are on food stamps, will make sure that the system is there and reliable and works properly.

So I applaud the gentleman from Texas (Mr. BONILLA) for his hard work, and our chairman, the gentleman from Florida (Mr. YOUNG), and also the gentleman from Washington (Mr. HASTINGS), a member of the Committee on Rules who has worked carefully to make sure that this rule is fair and open. Lastly, I would like to give accolades to the gentleman from California (Mr. DREIER), who is our chairman, who has worked very diligently to make sure that the rule that was crafted not only exemplified what this body would be in favor of, but would also be something that people in his home State of California would be proud of.

Mr. HALL of Ohio. Madam Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HASTINGS of Washington. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I think this is a good rule. It is an open rule that we typically have for appropriations bills. As was mentioned earlier, there was some criticism by members of the Committee on Rules not allowing some amendments to be made in order. I think what the Committee on Rules really did was protect the product of the Committee on Appropriations.

Yes, there were some waivers in this; but essentially the will of the Committee on Appropriations was such that they went through their process and added some issues to this bill that required waivers. We gave them, and protected the product that they desired.

Madam Speaker. I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered. The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the resolution.

The question was taken: and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HALL of Ohio. Madam Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. The aye side appeared to have it. The nay side appeared to have it. The ayes had it.

Mr. HASTINGS (WA). Madam Speaker, I yield the balance of my time, and I move the previous question on the resolution.

The previous question was ordered. The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the resolution.

The question was taken: and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HALL of Ohio. Madam Speaker, I move that the Clerk strike from the previous question the word 'aye,' and strike the clerk's previous announcement that the ayes appeared to have it.

NOT VOTING—18

Mrs. TAUSCHER, Ms. ESHOO, Mr. WAXMAN, and Mr. RUSH changed their vote from “yea” to “nay.”

Messrs. MANZULLO, TAYLOR of North Carolina, and BALDACCI changed their vote from “nay” to “yea.”

So the resolution was agreed to.

The result of the vote was announced as above recorded.

The motion to reconsider was laid on the table.

Stated against:
Ms. SLAUGHTER, Madam Speaker, I was unavoidably detained due to emergency dental work during rollcall vote No. 207. Had I been present, I would have voted “no” on rollcall vote No. 207.

SUNDAY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Ed Thomas, one of his secretaries.

ANNUAL REPORT OF THE CORPORATION FOR PUBLIC BROADCASTING—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mrs. BIGGERT) laid before the House the following message from the President of the United States; which was read and, together with the accompanying parts, without objection, referred to the Committee on Energy and Commerce:

To the Congress of the United States:

GEORGE W. BUSH,

GENERAL LEAVE

Mr. BONILLA. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and that I may include tabular and extraneous material on H.R. 2330.

The SPEAKER pro tempore. Is there objection?

Mr. BONILLA. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and that I may include tabular and extraneous material on H.R. 2330.

Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2002

The SPEAKER pro tempore (Mrs. BIGGERT). Pursuant to House Resolution 183 and rule XVIII, the Chair declares the House in the Committee of the Whole on the House of the State of the Union for the consideration of the bill, H.R. 2330.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole on the State of the Union for the consideration of the bill (H.R. 2330) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes, with Mr. GOODLATTE in the chair.

The Clerk read the title of the bill. The CHAIRMAN, Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Texas (Mr. BONILLA) and the gentlewoman from Ohio (Ms. KAPTUR) each will control 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. BONILLA).

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we are delighted today to be presenting the Agricultural Appropriations bill for fiscal year 2002. I want to acknowledge the good work of the gentlewoman from Ohio (Ms. KAPTUR), my ranking member, who has contributed to this process over the last few weeks.

It has been a pleasure working with her and all the members of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies on both sides of the aisle.

I believe we have produced a good bipartisan bill that deals with a lot of the specific issues that Members are concerned about in their districts across the country, ranging from research projects to inspection issues, to FDA issues, to just any possible issue that has come up. There have been 2,500-plus requests from individual Members, and we have done our best to accommodate that.

Mr. Chairman, I am just delighted that we have seen good, strong bipartisan support for the effort we have undertaken in putting this bill together.

Mr. Chairman, I am pleased to bring before the House today the fiscal year 2002 appropriations bill for Agriculture, Rural Development, Food and Drug Administration and Related Agencies.

My goal this year has been to produce a bipartisan bill, and I believe we have done a good job in reaching that goal.

The subcommittee began work on this bill in early March, before the administration produced its budget. We had 6 public hearings beginning on March 8. The transcripts of these hearings, the administration’s official statements, the detailed budget requests, several thousand questions for the record and the statements of members and the public are all contained in six hearing volumes.

In order to expedite action on this bill, we completed our subcommittee’s hearings on May 6.

The subcommittee and full committee marked up the bill on June 6 and June 13 respectively.

We have tried very hard to accommodate the requests of Members, and to provide increases for critical programs. We received 2,532 individual requests for specific spending, from almost every Member of the House. Reading all of the mail I received, I can confirm to you that the interest in this bill is completely bipartisan.

This bill does have significant increases over fiscal year 2001 for programs that have always enjoyed strong bipartisan support. Those increases include:

- Agricultural Research Service, $79 million;
- Animal and Plant Health Inspection Service, $55 million;
- Food Safety and Inspection Service, $25 million;
- Farm Service Agency, $201 million;
- Natural Resources Conservation Service, $77 million; and
- Food and Drug Administration, $120 million.

I would like to say that I am very happy that we were able to provide significant increases for the Food and Drug Administration. I think it is vitally important for that agency to have the resources to perform its public health mission. We are able to provide FDA the following increases above last year’s level:

$15 million to prevent outbreaks of BSE, or Bovine Spongiiform Encephalopathy, which is commonly known as “Mad Cow disease”;

$10 million to increase the number of domestic and foreign inspections, and to expand import coverage in all product areas;
$10 million to reduce adverse events related to medical products;
$10 million to better protect volunteers who participate in clinical research studies;
$9 million to provide a safer food supply;
$23 million to complete construction of the replacement facility in Los Angeles that we initiated last year;
And full funding of increased pay costs for existing employees.

I want to stress how important this is. In the past, FDA and all other agencies in this bill were forced to reduce the level of services provided to the public, in order to absorb legislated payroll increases. This year, we want to be sure that does not happen. I am sure that we all want to see that there is no slippage in research, application review, inspections, loan servicing, and all the other payroll-intensive operations that are financed through our bill. We worked hard to find these resources. I am glad we were able to do it, and I am sure the agencies will put them to good use.

Mr. Chairman, we all refer to this bill as an agriculture bill, but it does far more than assisting basic agriculture. It also supports human nutrition, the environment, and food, drug, and medical safety. This is a bill that will deliver benefits to every one of our constituents every day no matter what kind of district they represent.

I would say to all Members that they can support this bill and tell all of their constituents that they voted to improve their lives while maintaining fiscal responsibility.

The bill is a bipartisan product with a lot of hard work and input from both sides of the aisle. I would like to thank the gentleman from Florida, (Chairman YOUNG), and the gentleman from Wisconsin, (Mr. OBEY), who serve as the distinguished chairman and ranking member of the Committee on Appropriations.

I would also like to thank all my subcommittee colleagues: the gentleman from New York (Mr. WALSH); the gentleman from Georgia (Mr. KINGSTON); the gentleman from Washington (Mr. NETHERCUTT); the gentleman from Iowa (Mr. LATHAM); the gentlewoman from Missouri (Mrs. EMERSON); the gentleman from Virginia (Mr. GOODE); the gentlewoman from Illinois (Mr. LAHOOD); the gentlewoman from Connecticut (Ms. DELAURO); the gentleman from New York (Mr. HINCHEN) the gentleman from Florida (Mr. BOYD).

In particular, I want to thank the gentlewoman from Ohio (Ms. KAPTUR), the distinguished ranking member of the subcommittee, for all her good work on this bill this year and the years in the past.

Mr. Chairman, I would like to include at this point in the RECORD tabular material relating to the bill.

Mr. Chairman, I include the following Comparative Statement of Budget Authority for the RECORD:
### AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS BILL, 2002 (H.R. 2330)

1/ In addition to appropriation.
Mr. Chairman, I reserve the balance of my time.

Mr. RAUPUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me rise to say that this is a good bill that, in fact, is getting better at every stage of the legislative process.

The gentleman from Texas (Mr. BONILLA), chairman of the Subcommittee, and our committee staff have worked to draft a fair bill within tight budget allocations; but the underlying amounts in different sections of the bill are far from what is necessary, given many of the needs of rural America and our food assistance programs.

This is the first bill managed by our new chairman, the gentleman from Texas (Mr. BONILLA). Let me congratulate our new chairman and thank the gentleman for his cooperation throughout.

When we all work together, hopefully, will put us in a position to continue to work towards the best possible bill for America's future.

I want to thank our new minority staff member, Martha Foley, very much for her hard work.

Mr. Chairman, let us put this bill in perspective. To begin with, overall we have a spending level for 2002 of $74,360 billion of which $15,669 billion is discretionary spending, plus an additional $150 million for the Hinchey apple disaster response.

Several times today already, each of us have been touched by agriculture and other agencies in this bill; the food that we have eaten; some of the fabrics we are wearing; perhaps, even the blended fuels that were used in the vehicles that brought us to work; or the medications or vitamins that we take on any day.

We have been benefited by the research in this bill, by education and training, by inspection services that are operating at our red alert levels now to keep hoof and mouth disease and mad cow disease out of this country, and by marketing services that take the bounty of this land around the world.

Truly, this is the committee that is concerned about food, fiber, the fuels of the future, and the condition of our forests.

Mr. Chairman, nearly 80 percent of the spending in this bill is mandatory spending, including our farm price support programs. Only one-fifth of the bill, 20 percent, is discretionary. Half of the spending in the bill is for food programs which keep America’s people the best-fed people on Earth.

The bill, as reported, is about $260 million in discretionary spending above the President’s request, but a little more than $3 billion below this year's level due to the absence of natural disaster and other emergency farm provisions.

Earlier, during the discussion on the rule, we discussed several improvements that should be included in this bill that amendments could make possible, but amendments that were denied in the Committee on Rules.

There was an amendment offered by the gentlewoman from Connecticut (Ms. DELATORE) that would recognize that we need more money for the WIC program, the Women, Infants, and Children feeding program, due to the fact that participation is running 80,000 people more per month than the administration had expected predominantly due to higher unemployment levels.

The amendment of the gentleman from New York (Mr. HINCHEY) and others makes room for helping small specialty crop producers who are facing hard times. He has been successful in dealing with one sector, the apple sector, in this bill.

My own effort adopted by the full committee insists that the integrity of producer votes is protected in the pork checkoff program. It directs funds be spent only on those programs that the producers have approved and this directive has been included in the final bill.

Mr. Chairman, there are also other elements that we still need to work through as we amend here on the floor and then as we move to the Senate: one is the Global Food for Education program, which the gentleman from Massachusetts (Mr. McGovern) and the gentlewoman from Missouri (Mrs. Emerson) are both here in the House; improved food safety and increased food inspection need more attention; also new biofuels funding, including ethanol, biodiesel, and biomass-related fuel production to help move America toward energy independence.

There are six titles in this bill, and I just want to highlight a couple major points in each of those.

In Title I, Agricultural Programs, we have been able to take the first steps to fund relocation of some of our important laboratories in Arizona, as well as consolidating and modernizing our key agricultural research facilities in Ames, Iowa.

We are just so happy to be able to make progress there, the most important labs in our country that protect the entire livestock production in our Nation, as well as maintain the best veterinary service that the world knows so well.

In the APHIS, Animal Plant Health Inspection Service, we have been able to improve by $2 million and increase the buildings account for a facility at the Miami International Airport.

In our conservation programs, the NRCS has scored below the administration request by $25 million.

In rural development in Title III, the bill increases these important programs by $87 million over the research request, in the important account of water and wastewater disposal grants; funding is included at a level of $75 million over the request.

There is a million dollars included for rural cooperative development grants beyond the request, and $3 million to restore the rural telephone loan program that the administration proposed to end.

In Title IV, Domestic Food Programs, the $18 million in increases above the request will help us to secure the Farm Bill today that can make this bill a hallmark of the 21st century.

I will support it and encourage our colleagues to support it. But I also will definitely vote for a number of amendments being offered here on the floor today that can make this bill a hallmark of the best America can do when we are a Congress with the will to do.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield such time as he may consume to the gentleman from Florida (Mr. YOUNG), the Chairman of the Committee on Appropriations, my friend.

Mr. YOUNG of Florida. Mr. Chairman, I first want to congratulate the gentleman from Texas (Mr. BONILLA). This is the gentleman’s first year as a chairman of a Subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies, and he has done an outstanding job.
The gentleman came as a seasoned Member. The gentleman took over this very important role as chairman of the subcommittee, and he not only has produced a good bill, but he produced it in record time.

Although, he is a new chairman, he was the first one with a markup, and I congratulate the gentleman.

Mr. Chairman, I also congratulate the gentlewoman from Ohio (Ms. KAPTUR), the ranking minority member, who worked very well in partnership to produce a pretty good bipartisan bill.

As usual, there will be some differences, as we proceed, and proceed we will, but I will urge Members to support the bill and be very logical and realistic as we approach the issue of amendments.

Now, on the subject of amendments. We are trying to accommodate Members, as I announced yesterday, to assess where we were in the afternoon and see if there was some way to get Members out of here at a reasonable time.

It is pretty obvious we cannot complete consideration of this bill today, so I see no reason to go on into the late hours of the night or the wee hours of the morning.

However, in order to arrive at a reasonable adjournment time today, it is going to be necessary for Members to be willing to limit some debate, to agree to some time limits, which the gentleman from Wisconsin (Mr. OBEY) and I are working on this very minute.

Also, I would like for the Members to know if Members have an amendment that they would like to have considered on this bill, it would be a good idea for them to advise the gentlewoman from Ohio (Ms. KAPTUR) or the gentleman from Wisconsin (Mr. OBEY) on that side or myself and the gentleman from Texas (Mr. BONILLA) on this side so that we can put those potential amendments into the list of the universe of amendments that we have to deal with.

We will be better able to manage this bill if we can do that. I put Members on notice that it would be a good idea to do that as soon as possible.

Mr. Chairman, will the gentleman yield?

Mr. OBEY. Mr. Chairman, the gentleman yield?

Mr. YOUNG of Florida. Mr. Chairman, I would like to ask the gentlewoman from Ohio (Ms. KAPTUR) to address these important issues and others as we debate the bill.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Colorado (Mr. TANCREDO).

Mr. TANCREDO. Mr. Chairman, I, too, want to rise in, in a way, admiration of the committee for their work but also like to repeat what the gentleman just said. For the benefit of all Members, the floor or all Members whose staff may be watching in their offices, every Member is coming up and telling us they want to get out of here early tonight. It is my understanding that the leadership intends to try to make that happen. But we need to know which Members intend to offer their amendment and which Members do not intend to offer their amendments.

So I would ask every single Member on our side of the aisle, if they are contemplating an amendment or a collocation today, to take almost 2 hours on colloquies, if they are contemplating any of that, they need to let us know immediately, because we need to do two things.

We need, first of all, to try to establish which amendments are going to be offered today and how much time is going to be taken on them. We have had the cooperation of five or six Members who have told us that they will be happy to settle for 10 minutes a side, for instance. We need to fill out the rest of that. We need to know how far we are going to get in the bill today. Then if we can reach agreement on that, then that enables us to have some idea, perhaps, of what we can package so that we can figure what we are facing when we get back.

But what I would urge Members not to do to us is to neglect to contact us now, then see their point in the bill passed, so their amendment is not in order, and then try to redraft their amendment as a look-back at the end of the bill. We will not save any time that way.

If Members have amendments, we need them to be prepared now to bring them up today in the regular order on the bill so that we can get out of here at a reasonable time.

Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for those comments. We are working hard. Now, if we get the cooperation of the membership, we can accomplish quite a bit of consideration on this bill today and still get us out of here at a reasonable time, and we will talk about that time little later so that the universe of amendments will be for today.

With that, again, I want to congratulate the gentleman from Texas (Chairman BONILLA).

Ms. KAPTUR. Mr. Chairman, I yield 3 minutes to the gentlewoman from Connecticut (Mrs. DeLAURO), a very hard-working and able member of our subcommittee.

Ms. DeLAURO. Mr. Chairman, I want to thank the gentleman from Texas (Chairman BONILLA) and to the gentlewoman from Ohio (Ms. KAPTUR), the ranking member of the committee. I thank them for their leadership.

Given the kind of budget constraints that we have, there was a lot of hard work and a good bill that has been produced, though there are a few critical issues that remain that we need to continue to work on.

I also want to say thank you to this subcommittee and the associate staff for all the hard work.

The bill addresses many of the urgent needs of American families. Let me just take a moment to focus on the crisis in agriculture today. America’s economy and security relies on the strength of agriculture. Yet America’s farmers are facing the toughest times since the Great Depression.

Connecticut is a leader in New England’s agriculture, in eggs, peaches, milk production per cow. The Nation’s oldest agriculture experiment station is just up the street from my home in New Haven. Like other farmers, Connecticut farmers face plunging commodity prices and soaring gas prices.

Urban sprawl puts it in the top 10 States in lost farmland. This spring, record low temperatures eliminated almost 40 percent of our peach, pear, grape and apple crops.

Mr. Chairman, I am proud of the funding for programs that reach out and help our farmers: rural development, conservation, pest management, commodity marketing assistance.

This bill also funds food safety efforts, but in my view, as I have expressed before in the House today, does not go far enough. It needs to do more. Americans are more likely to get sick from what they eat today than they were a half century ago, and outbreaks of food sickness are expected to go up by more than 15 percent over the next decade.

Each year 5,000 Americans die from food-borne illnesses, 76 million get ill, and 325,000 are hospitalized. Just 2 days ago, the Excel Corporation recalled 190,000 pounds of ground beef and pork because of possible contamination by deadly E. coli.

The Food and Drug Administration inspects all food except meat, poultry and eggs. Yet to cover the 30,000 U.S. companies that make this food, the FDA has only 400 inspectors. For the 4.1 million imported food items entering the country, the FDA has less than 120 inspectors. To address this crisis facing the families, I will offer an amendment to increase the funds for inspections and other food safety initiatives.

As we move toward the conference, I also would like to work with the chairman to address the funding shortage that threatens WIC. If the administration’s unemployment predictions come true, this essential nutrition program for low-income families, which yields more than $3 in savings to the government in reduced spending on programs such as Medicaid, will, in fact, not have enough funds to serve all who are eligible, all eligible women, infants and children.

I look forward to working with the gentleman from Texas (Chairman BONILLA) and the gentlewoman from Ohio (Ms. KAPTUR) to address these important issues and others as we debate the bill.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Colorado (Mr. TANCREDO).

Mr. TANCREDO. Mr. Chairman, I, too, want to rise in, in a way, admiration of the committee for their work...
on this particular piece of legislation, on this bill. It is truly commendable in a situation where profligate spending in the form of government checks and it is commendable to have a bill coming here that is only 1.5 percent above last year's spending and only 1.7 percent above the President's request.

There is no particular program in the bill with which I rise to take issue. I do wish, however, to just briefly discuss a point of concern that I have with the general tenor of our agricultural support payments. It is the fact that welfare, whether it is provided for able-bodied individuals or large corporate farmers, has a corrupting influence on both. The welfare farm subsidies keep land prices high, makes it harder for small farmers to enter into the market. Farm subsidies decrease the incentive to be efficient, and I urge the committee to think carefully about it.

The point of concern that I have with the gentleman from Texas (Chairman BONILLA) is that this bill has been a place where a win-win situation for the agriculture sector.

This is a list, by States, I have a list here from CBO of those States that receive a percentage of their net farm income as a result of government payments. It is quite astounding. In 1999, the State of Illinois had 112 percent of its net farm income a government check; Indiana, 93 percent; North Dakota, 93 percent; Iowa, 87 percent; Missouri, 78 percent; Montana, 77. At least 12 States have government checks representing more than 50 percent of their net farm income. This is an unsustainable activity, and I urge the committee to think carefully about it in the future.

Ms. KAPTUR. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. HINCHHEY), a member of our subcommittee who single-handedly turned this bill on end and was able to get language to deal with specialty crop producers across our country, a very large group and a distinguished member of our subcommittee.

Mr. HINCHHEY. Mr. Chairman, I thank the gentlewoman from Ohio (Ms. KAPTUR), ranking member, for her leadership on this committee and on this issue. I also want to express my appreciation to the chairman of the subcommittee. I think that the gentleman from Texas (Mr. BONILLA), in his first year as chairman of the subcommittee, has produced a very good bill, and it has a chance of being a bill that will greatly benefit the agriculture sector.

This bill adds $260 million to the President's request for the U.S. Department of Agriculture. It increases funding for farm programs, conservation, rural development, education and research, nutrition, and food safety. When you add in the $5.5 billion in emergency agricultural spending that the House passed earlier this week, total funding for these programs is substantially increased over last year. As with some of these bills, of course, it could be even better. I think we should have made in order the amendment of the gentlewoman from Connecticut (Ms. DeLAURO) to increase funding for food safety as well as the amendment of the gentlewoman from Ohio (Ms. KAPTUR) to fund the Global School Lunch Initiative.

But the gentleman from Texas (Chairman BONILLA) has written a balanced bill that addresses important priorities for rural America. The bill also includes $150 million for a market loss assistance program for apple growers. I offered this provision in committee with the gentleman from New York (Mr. SWEENEY) and the gentleman from New York (Mr. SWEENEY), and it was adopted by a strong bipartisan vote of 34 to 24.

I appreciate everything that the gentleman from Texas (Chairman BONILLA), the gentleman from Florida (Chairman YOUNG) and the gentleman from California (Chairman DREIER) have done to protect this funding.

I also would like to thank the gentleman from Oregon (Mr. HASTINGS) and the gentleman from New York (Mr. REYNOLDS) for their parts in writing the rule as well.

The U.S. apple industry is suffering serious financial hardships for the fifth straight year as a result of low prices, bad weather, and plant diseases. During this time, the total value of U.S. apple production fell more than 25 percent, and losses from the 2000 crop alone will probably top $500 million. This is a nationwide figure and includes losses, not only in New York, but also in Massachusetts, Michigan, Washington State, Pennsylvania, and every other place where apples are grown as a commodity crop.

Some of the apple losses can be blamed on foreign competition, the Chinese, for example, who were found guilty of dumping apple juice concentrate in the United States at prices below production costs. Increased tariffs have not significantly improved the price of apple juice in the last year.

Apple producers in New York and the Northeast watched the value of their crop decline as a result of severe hail damage. In Michigan, growers suffered a crippling epidemic of fire blight that destroyed thousands of acres of orchards.

Compared with the billions of dollars that Congress routinely sends to commodity producers, $150 million is a drop in the bucket. This payment, however, will mean the difference between life and death for many growers across the country.

Mr. Chairman, apple growers face the same market, regulatory, trade and weather conditions, and it would make the double AMTA payments necessary for row crop farmers. It is preposterous that our foreign policy differentiates so radially between them.

This is a good bill, Mr. Chairman. I am happy to support it.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Alabama (Mr. RILEY).

Mr. RILEY. Mr. Chairman, I have an amendment at the desk that I intend to withdraw, but first I would like to engage the chairman in a colloquy.

Mr. Chairman, I rise to acknowledge a job well done by the chairman and the ranking member. Agricultural programs are often arcane and seem to affect only the agricultural community, but through the chairman's leadership, the committee has produced a sound bill that benefits not only the agricultural community, but the Nation as a whole.

It is my understanding that the constraints placed upon the committee prevented funding for nearly all new research projects. One such unfunded project would have been undertaken by researchers at Auburn University, one of the leading agricultural research institutions in the country. This project sought to ensure public health through the development of improvements in poultry.

Mr. Chairman, this study, which I strongly support, will continue safely and efficiently producing poultry, and in an effort to address the environmental, human and animal concerns, I ask for your immediate consideration of a $1.3 million human health poultry-byproduct-study at Auburn University. This study will determine the risks associated with poultry production and the contributions the poultry community can make to environmental stewardship and food safety through the development of innovative techniques documenting the presence of pathogens in the various phases of the production cycle and instituting techniques to eliminate them. This study, Mr. Chairman, will safeguard public health, the end-use consumer and the environment, all at minimal taxpayer expense.

Mr. BONILLA. Mr. Chairman, will the gentleman yield?

Mr. RILEY. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, first, I want to acknowledge that the gentleman from Alabama (Mr. RILEY) has worked very hard on this issue that is very important to Auburn University, and I would be pleased to work with the gentleman as we go to conference on this issue. It is going to be a difficult issue, and the gentleman and I have had discussions about that before, but we are going to give it our best shot. Again, I know how significant and how important it is to the folks in Alabama.

Mr. RILEY. Mr. Chairman, I thank the gentleman from Texas (Chairman BONILLA) for his time and his consideration. I look forward to working with him.

Mr. KAPTUR. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. BOYD), a member of our subcommittee, a rancher, and one of the most knowledgeable members of our subcommittee.

June 28, 2001
Mr. BOYD. Mr. Chairman, I want to thank the gentlewoman from Ohio for yielding me this time. I want to commend the gentleman from Texas (Mr. BONILLA), my chairman, and the gentlewoman from Ohio (Ms. KAPTUR), my ranking member, and their staff for their good work they have done on this bill.

Mr. BONILLA. Mr. Chairman, I reserve the balance of my time.

Mr. KAPTUR. Mr. Chairman, I would like to inquire as to our remaining time on both sides, please.

The CHAIRMAN. The gentlewoman from Ohio (Ms. KAPTUR) has 13 1/2 minutes remaining, and the gentleman from Texas (Mr. BONILLA) has 21 minutes remaining.

Ms. KAPTUR. Could I ask the gentleman if he has any additional speakers?

Mr. BONILLA. Not at this time, but there may be more coming.

Ms. KAPTUR. Mr. Chairman, I yield 1 1/2 minutes to the gentleman from Georgia (Mr. BISHOP), a distinguished member of the authorizing committee.

Mr. BISHOP. Mr. Chairman, I thank the gentlewoman for yielding me this time.

Mr. Chairman, this Congress can make historic progress in making agricultural programs that enable farmers to survive in today’s markets and to continue providing the highest quality commodities at the lowest cost to consumers.

The House has already passed a bill providing immediate farm relief, and the Committee on Agriculture has moved aggressively to draft a new multiyear farm bill to secure greater long-term stability. Today, we are considering a bill for the next fiscal year that provides $24 billion more than the President’s budget; more for research, including some $7 million more in Georgia; more for crop insurance; more in rural electric and communications loans; more for child nutrition and WIC programs; and sets aside more than $79 billion over 10 years in new emergency aid, including $7.4 billion for next year.

While I support a higher overall agriculture budget, it is time to move the process forward to close any remaining differences in House and Senate negotiations. Our goal is to save our agricultural system at a time of crisis, and today we can take another step in that direction.

Mr. Chairman, while I am concerned that the bill does not give enough help to small and disadvantaged farmers and research and capacity grants for the 1890 Land Grant Universities, I support the amendment of the gentlewoman from North Carolina (Mrs. CLAYTON) to do that.

Today, Mr. Chairman, we can move the process forward to bring more help to American agriculture. I urge my colleagues to join in support of this bill. It is a good bill. It moves the process forward, takes drastic steps in the right direction; and, hopefully, we can do what we need to do for America’s agriculture.

Mr. BONILLA. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. THORNBERRY).

Mr. THORNBERRY. Mr. Chairman, I thank the distinguished chairman, the gentleman from Texas (Mr. BONILLA), for yielding me this time; and I rise for the purpose of a brief colloquy.

I am sure the chairman is aware, a serious threat has sprung up in wheat growing areas making the lives of our already-struggling farmers even more difficult. A fungus called Karnal bunt has been found in my district as well as in one or two other districts by the gentleman from Texas (Mr. STENHOLM). While Karnal bunt poses no threat to humans or animals, it can make wheat kernels and flour ground from them unpalatable. At this time, a few counties have been quarantined. It appears it has been well contained, but we will have issues of compensation and appropriate action before us.

I have been working with the chairman and ranking member of the full committee, the gentleman from Texas (Mr. COMBEST) and the gentleman from Texas (Mr. STENHOLM), as well as the chairman of the Subcommittee on Conservation, Credit, Rural Development and Research, the gentleman from Oklahoma (Mr. LUCAS), but I would request the distinguished gentleman’s continued assistance in working with USDA and the administration to deal with this issue appropriately and to deal with those who have been affected fairly.

Mr. STENHOLM. Mr. Chairman, will the gentleman yield?

Mr. THORNBERRY. I yield to the gentleman from Texas.

Mr. STENHOLM. I thank my friend for yielding to me, and I would like to say that the situation the gentleman has described is accurate, but here are the facts to date:

Seven producers affected, 10 elevator operators affected, 17 fields tested positive, 1.4 million bushels contaminated, and 21 bushels yet to be tested. An elevator operator in my district first discovered the fungus and bunted kernels in a load of grain delivered to his facility.

For these and many other reasons, I join my colleagues in working with USDA to contain this outbreak and ensuring the critical assistance provided to producers, elevator operators, and others in agribusiness who have seen their livelihoods put on hold.

We look forward to working with my colleague, with the chairman, and with USDA, who are on top of this, and APHIS, to make sure that we contain it. It is extremely important to our industry.

Mr. BONILLA. Mr. Chairman, will the gentleman yield?

Mr. THORNBERRY. I yield to the gentleman from Texas.

Mr. BONILLA. I thank my friend for yielding, and I would be more than happy and enthusiastic about helping my friend work on this problem. This is not a new problem for wheat producers. Accordingly, we will work to do everything possible to get USDA to act...
Ms. CAPTUR. Mr. Chairman, will the gentleman yield?

Mr. THORNBERY. I yield to the gentlewoman from Ohio.

Ms. CAPTUR. Mr. Chairman, I would like to thank my chairman for generously yielding that minute, and I just want to say that I share the gentleman’s deep concern about what this particular condition can do to our export market.

We had a situation a couple of years ago where we had USDA officials up before our committee and we asked where on the continent does Karnal bunt exist. I said was it Canada? No, we do not have it in Canada. Is it in the United States? No, it is not in the United States. I said, how very very well yield to that that is fair to all.

I would just express to the chairman of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies, to the ranking member on the authorizing committee, and to the gentleman from Texas (Mr. THORNBERY) that this Member is vitally interested in that problem, and he has my full cooperation on it.

Ms. CAPTUR. Mr. Chairman, I yield myself 30 seconds to say, however, that the costs of remediating that should not only be borne by the public sector. That is something that we have to work together to try to deal with the conditions that can come in here from other countries.

I would just express to the chairman of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies, to the ranking member on the authorizing committee, and to the gentleman from Texas (Mr. THORNBERY) that this Member is vitally interested in that problem, and he has my full cooperation on it.

Mr. Chairman, I yield 3 minutes to the gentlewoman from North Carolina (Mrs. CLAYTON), a very, very esteemed member of the authorizing committee, and one of the hardest-working Members of this Congress.

Mrs. CLAYTON. Mr. Chairman, I thank the gentlewoman for yielding me this time. I want to commend both the chairman and the ranking member for their time and effort. They have been given a very difficult task of meeting the ever-demanding needs of the agricultural sector in the face of a difficult economic environment for agriculture, but also in the face of a number of environmental threats and trying to move us into the 21st century. They also have been given a very tight allocation, and I understand they are trying to work within the budget. I am on the Committee on the Budget, so I know the constraints that were imposed upon them.

There are many things they did very, very well; and I want to commend them on that. Indeed, they did increase allocations for APHIS, which I will talk a little more about, and that is desperately needed. There are some current threats that they are trying to provide sufficient funds to address those issues. They also recognized the ever-demanding need for research for agricultural communities and our institutions. Again, I think we have an opportunity to make sure as we increase those research dollars that there is some equity and parity among the institutions that we have. I will have a chance to discuss that a little later.

I want to commend them for all the things they have done. However, I do want to point out a couple of areas that I think we should give consideration to in the future. Although there may be new dollars there may be problems with the conditions that can come in here from other countries. I yield to the gentleman yield?

Mr. BONILLA. Mr. Chairman, I yield myself 4 minutes.

Ms. DELAUNOY. Mr. Chairman, will the gentleman yield?

Mr. BONILLA. I yield to the gentlewoman from Connecticut.

CONGRESSIONAL RECORD—HOUSE

Ms. DeLAURO. Mr. Chairman, I thank the gentleman for agreeing to the colloquy. I want to address the pressing need of adequate funding for the WIC program. At current funding levels, States may be unable to serve approximately 200,000 low-income mothers, infants, and children. From my State of Connecticut alone, 1,300 people would not be served.

We know that the WIC program currently serves about 47 percent of all infants born in the United States, and we know the WIC dollars are excellent investments. Every dollar spent on WIC yields more than $3 in savings to the government in reduced spending on programs such as Medicaid.

WIC has contributed to better birth outcomes and reduction in childhood anemia, key indicators of the health of American children. The program provides mothers, infants, and children with nutritious supplemental food packages, nutrition education and counseling, and a gateway to pre- and post-natal health care. The program also reduces fetal deaths and infant mortality and reduces low birth-weight rates.

I might just say we have an average participation rate for this fiscal year at about 7.2 million. That reflects the average participation for the first half of the year through March. That historically is the kind of participation that we have seen in the past. December and February are always the lowest participation months. Last year, average participation for the first half of the year was nearly 50,000 below average participation for the year as a whole. According to the Center for Budget and Policy Priorities, average WIC participation for the first 8 months of fiscal year 2001 was 80,000 higher than average participation for the first 6 months of the year.

Mr. Chairman, I have a concern that when unemployment increases, as it is doing, so does the poverty rate. And we need to understand that the WIC participation cannot increase as unemployment rises if none of the families that are eligible for WIC as a result of increased unemployment enroll.

I think if we are looking at the kinds of unemployment rates where there is the view that that unemployment rate is going to rise, then we are going to see an additional number of people who need to take advantage of the WIC program. We should do this now. State WIC programs make their decisions this fall about how to run their programs. As we move toward conference, and there are 352(b) reallocations, I would like to work with the chairman to address the potential funding shortcoming for the WIC program. If the administration’s unemployment predictions come true, we will see that this very
essential program will not have enough funds to serve all eligible women, infants, and children. The food assistance program is supported by the Alliance for Retired Americans; the Children’s Foundation; Church Women United; The Communication Workers of America; Familles U.S.A.; The National Education Association; Network, a national Catholic social justice lobby; the Presbyterian Church; Public Citizen; The Service Employees International Union, SEIU; and the Universal Health Care Action Network.

Mr. Chairman, every time anyone comes up here to talk on the pharmaceutical industry, their disinformation campaign goes forward; and this issue in opposition to this amendment the issue is, quote/unquote, “safety,” “Every Member here should understand that Initiative program is implemented to compromise safety, it only makes it possible to move the reimportation bill that we passed last year forward.” Ms. KAPTUR. Mr. Chairman, I yield 3 minutes to the gentleman from Vermont (Mr. SANDERS).

Mr. SANDERS. Mr. Chairman, even the New York Yankees sometimes lose, and it has been known that on occasion the Los Angeles Lakers lose a ballgame. But, Mr. Chairman, one organization never loses, and that organization has hundreds of victories to its credit and zero defeats in the United States Congress, and that is the pharmaceutical industry.

For decades now, good people in the House and Senate, Democrats and Republicans, have attempted to do something about lowering the cost of prescription drugs in this country so that Americans do not have to pay by far the highest prices in the world for the medicine they need. And year after year with lies, distortions, well-paid lobbyists, massive amounts of advertising, and millions in campaign contributions, pharmaceutical industry always wins. Americans die and suffer because they cannot afford the outrageous cost of prescription drugs, and we remain the only country in the industrialized world that does not in one way or another regulate the cost of prescription drugs.

As part of this bill, the gentlewoman from Connecticut (Ms. DELAuro), the gentleman from New York (Mr. CROWLEY), the gentleman from California (Mr. ROHRABACHER) and I will be introducing an amendment which is exactly the same as the Crowley amendment that 363 Members of this House voted for last year. This amendment will serve as a placeholder so we can move the reimportation bill forward that was passed overwhelmingly last year, but was not implemented.

In a globalized economy, prescription drug distributors and pharmacists should be able to purchase and sell FDA safety-approved medicines at the same prices as in other countries. The passage of reimportation will lower the cost of medicine by 30 to 50 percent and enable Americans to pay the same prices as people in Canada, Europe, Mexico and all over the world.

Mr. Chairman, the amendment is supported by the Alliance for Retired Americans; the Children’s Foundation; Church Women United; The Communication Workers of America; Familles U.S.A.; The National Education Association; Network, a national Catholic social justice lobby; the Presbyterian Church; Public Citizen; The Service Employees International Union, SEIU; and the Universal Health Care Action Network.

Mr. Chairman, every time anyone comes up here to talk on the pharmaceutical industry, their disinformation campaign goes forward; and this issue in opposition to this amendment the issue is, quote/unquote, “safety,” “Every Member here should understand that Initiative program is implemented to compromise safety, it only makes it possible to move the reimportation bill that we passed last year forward.”
catch airplanes late tonight in order to period, I would hope that we can move ask for the membership's support. Senate it can be made even better. But Let us hope as we move toward the first place.

ice so we could have timely inspections Animal, Plant Health Inspection Serv-

spector general, additional help for the Associated Press on this question. RE-

RECORD a Sunday, June 24 article from

nation inside our country.

pated. Now we have this real contami-

uous issue. It essentially can make our wheat export limits as China now exports to us we are having trouble in our wheat expected that this fungus had moved into parts of California, where it was sus-

ected, immediately closed its borders and in Texas, and I believe even in

larly. As foot-and-mouth disease has been to Euro-

lowed the spread of a plant disease that curtains production to infected fields. The dis-

ease's main impact is economic: 80 countries ban imports of wheat grown in infected re-

That could be as crippling for American growers, who last year produced nearly $6 billion of wheat, as would be the discovery of foot-and-mouth disease in the U.S. livestock, said Brett Myers, executive vice president of the Kansas Wheat Growers Association. Europe's foot-and-mouth outbreak has cost millions of dollars for the slaughter of some 3 million animals and a ban on exports.

The suspected Karnal bunt contamination was first reported to the USDA on May 25, and Michael Bryant, co-owner of the elevator in Olney, Tex., that found it.

But it was seven days before the USDA's Animal and Plant Health Inspection Service (APHIS) confirmed the finding, and 15 days passed before it quarantined the first affected counties.

"Their reaction to the situation was not as timely as we would have liked," said Kansas Agriculture Secretary Jamie Clover Adams.

Charles P. Schwalbe, deputy director of APHIS's plant protection and quarantine program, said his agency sent the sample away for testing at a national lab instead of using a local one to make sure it had accu-

rate and legally defensible information before taking action.

"The decisions that emerge . . . mean live-

lihood to people from time to time," Schwalbe said.

The Karnal bunt found in Throckmorton and Young counties in Texas were the first confirmed cases in the nation's wheat belt, an area extending from central Texas to Alberta, Canada.

On June 19, concern grew as the USDA added neighboring Archer County to the quarantined area, followed by Baylor County the next day. The disease had been quarantined in Fort Worth, about 150 miles southeast.

Karnal bunt, which originated in India, was first detected United States in 1996 in Arizona and California. It has since spread to southern Texas and New Mexico.

In Arizona the amount of land used to grow wheat dropped almost 50 percent after a quarantine was imposed in 1996 in four counties, according to the Arizona Agricultural Statistics Service.

But Arizona is a minor durum wheat producer, and U.S. wheat growers have reassured overseas buyers that the disease was far from the nation's major winter wheat producing region. Winter wheat, which is planted in the fall and harvested in the spring, accounts for about two-thirds of U.S. wheat and is used primarily for bread. Durum wheat is used for pasta.

With half the winter wheat going to the ex-

port market, the discovery of the disease at the southernmost edge of the nation's bread-

basket just as the harvest was getting north sent shock waves through the wheat belt.

State regulators feared that custom har-

vesters—cutters who follow the ripening crops—would spread the fungus.

Oklahoma, just 50 miles from the two Texas counties where disease was first discovered, immediately closed its borders and ordered combinations coming into the state to be blocked and inspected. Harvesters from international wheat buyers use a USDA certification of cleanliness were turned back.

"We need to preserve our heritage and our wheat industry. The spread of Karnal bunt in the U.S. hand. His office said he has not decided whether to ask for an inquiry.

Mr. Chairman, I yield back the bal-

Mr. Bonilla. Mr. Chairman, I yield 2 minutes to the gentleman from Wash-

Mr. Nethercutt. Mr. Chairman, I thank the gentleman for yielding me this time and for his kind remarks.

Mr. Chairman, I am delighted to stand in support of this bill. We have had a lively and valuable discussion on both sides of the aisle on various issues.

Mr. Chairman, I think the sub-

committee chairman has done a won-

derful job to put this bill together in essentially record fashion. I am grate-

ful to him for his leadership.

I am supportive of this bill because it has a strong research component for agriculture, production agriculture, to be sure that it has the tools and the in-

formation and the technology nec-

essary to compete in a world market.

That is what we need for our farmers.

I am also pleased that this bill under 

the chairman's leadership has increased food safety and inspection. We have the safest, surest food supply in the world and we must make sure that we acknowledge what we have done and do not denigrate it in debate on the issue, because we have a very safe system. We need to keep it safe. We will keep it safe with the resources that are available in this bill.

At the subcommittee and the full committee level, I had raised the issue of ecoterrorism. When we spend multi-

millions of dollars on agriculture re-

search but yet some of that research gets destroyed by extremists, eco-

terrorists who seek to destroy ag-

riculture research, then we need to make sure we, as taxpayers and as Members of this body, protect that re-

search.

This is not the place or the time for that issue and the discussion sur-

rounding it, but it is an issue that we need to attend. My expectation is that we will attend to it as we go through the legislative process later in this year. I thank those of us who care deeply about agriculture need to be critically aware that ecoterrorism is a reality in this country. We need to pro-

tect the research and the researchers.
Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentlewoman from Connecticut (Mrs. JOHNSON).

Mrs. JOHNSON of Connecticut. Mr. Chairman, I want to thank the gentleman for this opportunity to express my strong support for his bill and point out a small provision of it that is extremely important to the farmers of the northeastern part of the Nation, particularly to those in Connecticut. I strongly support the increase in funding for the EQIP program, the Environmental Quality Incentives Program, because it will help us achieve our national attainment goals in the area of clean water.

The AFO/CAFO regulations are expensive. My State has adopted all of the in keeping the bill free of costly requirements for compliance with the AFO/CAFO regulations; and the only reason frankly, the only possible way that small farmers can survive these costly regulations is through the technical assistance that the EQIP funds provide to them to help them determine what projects will, in fact, contain runoff. These funds give them some help in offsetting the costs of developing manure management programs and other modern approaches that will enable them to make a significant contribution to the cleanliness of our waterways and also, in the long run, to the revitalization of Long Island Sound.

In New England, we have very steep, hilly farms. We also have more rainfall than other parts of the country. So the burden on us is, frankly, far higher than the burden on other parts of the country. We are not a part of the country that benefits much from the farm bill through its crop assistance and other programs but so some of its conservation dollars, and these EQIP dollars, are extremely important to us. I thank the chairman for uncapping them and making more resources available for compliance with the AFO/CAFO requirements.

Mr. BONILLA. Mr. Chairman, our Committee has worked hard to bring a good bill to the House. We have made prudent recommendations for the use of the budgetary allocation available to us, and we have done yeoman work on important issues such as trade policy, that have caused concern in prior years. I think we have a very good bill, and I know that we will have a good debate. In closing, I would certainly hope that everyone would support this bill on final passage.

Mr. KIND. Mr. Chairman, today the House is considering funding for the fiscal year 2002 Agriculture appropriations bill. This bill provides funding for U.S. Department of Agriculture and the Food and Drug Administration. As a Member of Congress from a large agribusiness district who is also concerned about this Nation’s long-term fiscal health, I am concerned that this measure is yet another repeat of past agriculture spending packages—where Congress is providing fewer-and-fewer farmers with financial assistance.

The failure of Congress to make fundamental changes to current agriculture policy, which had led to many farmers being driven off their land due to the perverse financial incentives, is beyond reasonable belief.

It is my hope that future agriculture policy will be equitable, providing federal assistance—when needed—to all producers. It is my hope that future agriculture policy respects the broad diversity of rural America. It is my hope that future agriculture policy provides for clean and safe drinking water, along with improved soil and air quality.

Mr. Chairman, this measure obviously covers more than just financial assistance to American farmers. In addition, it provides important funding for nutrition programs, food inspection, and safety. For these reasons, it is very important that this measure is passed.

Mr. BEREUTER. Mr. Chairman, this Member is grateful and pleased that this legislation includes funding for several important projects of interest to the State of Nebraska. First, this Member is pleased that H.R. 2330 provides $461,000 for the Midwest Advanced Food Manufacturing Alliance (MAFMA). The alliance is an association of 12 leading research universities and corporate partners. Its purpose is to develop and facilitate the transfer of new food manufacturing and processing technologies. The MAFMA awards grants for research projects on a peer review basis. These awards must be supported by an industry partner willing to provide matching funds. During the seventh year of competition, MAFMA received 39 proposals requesting a total of $1,382,555. Eleven proposals were funded for a total of $348,147. Matching funds from industry for these funded projects total $605,601 with an additional $57,115 from in-kind funds. These figures convincingly demonstrate how successful the program has been in leveraging support from the food manufacturing and processing industries.

Mr. Chairman, the future viability and competitiveness of the U.S. agricultural industry depends on its ability to adapt to increasing worldwide demands for U.S. exports of intermediate and consumer goods. In order to meet these changing worldwide demands, agricultural research must also adapt to provide more emphasis on adding value to our basic farm commodities. The Midwest Advanced Food Manufacturing Alliance can provide the necessary cooperative link between universities and industries for the development of competitive food manufacturing and processing technologies. This will, in turn, ensure...
The program provides guarantees for 30-year fixed-rate mortgages for the purchase of an existing home or the construction of a new home.

Mr. Chairman, in conclusion, this Member supports H.R. 2330 and urges his colleagues to approve it.

Mr. LARGENT. Mr. Chairman, I rise today to express my support for H.R. 2330, the FY 2002 Appropriations bill. I am pleased that the Appropriations Committee has both supported our farmers and displayed fiscal discipline by remaining close to the President's budget request. This responsible bill addresses the needs of our nation's farmers and ranchers while keeping in mind the desire of American consumers to buy affordable and safe agriculture products.

I want to commend the full committee for passing a number of important amendments. Specifically, I am pleased that employees of the Farm Service Agency will be better able to deliver farm ownership, farm operating, and disaster loans through improved salary and expense funding and through additional resources for agricultural credit programs. This assistance will provide much-needed relief as the workload of this vital agency has grown in response to a weakening farm economy.

I am also pleased with the investment this bill makes in the future safety and health of our citizens and our environment. The research that will be facilitated and advanced through this bill will ensure the continued quality of our food supply by improving safety guards. The conservation programs within the bill also reflect foresight. The desire of farmers to preserve American soil exemplifies the respect and attachment they have for the land in which they are invested.

Lastly, I am encouraged by the Distance Learning and Telemedicine Program which will link rural Americans with resources and opportunities previously available only in urban areas. As we seek a prosperous future for our rural residents, we must find ways to stimulate local economies. This bill advances that goal through education and enhanced services that will enable individuals and families to stay in their hometowns while receiving educational and health services. Using technology to provide useful links between rural and urban areas will slow the flight to cities and preserve smaller towns and municipalities, which are vital pieces of the American fabric.

I commend the chairman, and all of the members of the committee for crafting this responsible bill.

Mr. TANCREDO. Mr. Chairman, I rise in opposition to H.R. 2330, the Agriculture Appropriations Act, a bill considered on the floor today which makes appropriations for the Department of Agriculture and related agencies. But more specifically, I rise in strong opposition to the increase provided in the bill for the Food and Drug Administration (FDA) and the possible delay in approval of the PMA by a 90 vote. From this point onward, the FDA engaged in an obvious pattern of delay and deception and even went as far as to remove TMJ Implants' Fossa-Eminence Prosthesis from the market, which had been available for almost 40 years. This has done nothing more than to cause harm to patients and cost the company millions of dollars.

This was done at the same time that the application for TMJ Concepts, a competitor of TMJ Implants, sailed through the process. Several allegations have come to light over the last two years detailing the fact that several Agency employees have worked under the direction of TMJ Concepts' associates.

The agency went so far as to reconvene a new Medical Devices Advisory Committee late last year, with a clear majority of its members lacking the required expertise, which delayed the company's application.

It was not until Mr. Bernard Statland, the new Director of the Office of Device Evaluations (ODE) was brought in that the logjam was broken the PMA was quickly approved.

As the above demonstrates, several concerns remain about the process that has taken place over the last two years. It is no secret that everyone involved in this case believes that there have been significant questions raised about the process—the sluggish pace of the review of the engineering data for both the total and partial joint and, more importantly, the constant "moving of the goal posts" during the review of both PMAs.

Over the last 2 years, my office has received numerous letters from physicians all across the country—from the Mayo Clinic to the University of Maryland—each describing the benefit of the partial joint and the fact that the partial and total joint results in immediate and dramatic in pain relief in range of motion and increased function.

While I am, of course, pleased that the application has been approved by the FDA after...
much delay, the circumstances of the last 2
years calls into question the integrity of the
agency and, it is for this reason that I bring it
to the House’s attention.

Dr. Christensen is a true professional and a
pioneer in his field and holder of the first pa-
tients. His implants are widely accepted as ef-
fective and safe throughout the dental and
surgery community—indeed, several of my
constituents have literally had their lives
changed by the procedure. I am convinced
that the work of TMJ is and always has been
on solid, scientific principles and the re-
moval of the implants work of TMJ is and al-
ways has been on solid, scientific principles
and the removal of the implants work.

I would like to take this opportunity to sub-
mit to the RECORD two articles from FDAWebview which shed light on the TMJ Im-
plant case.

of various people and declarations are fine, but when you add up the numbers, I think that’s the take-home lesson.”

With TMJ Implants, Statland said, FDA played “a consultative role,” although he would not address Christensen’s complaints that the early stages of the review were far from consultative. “I’m pro-technology,” he stressed. “I want good devices to be out there to help people. At the same time, I want full disclosure, so people can make good decisions.”

Rosen acknowledged that after Statland began disagreeing with FDA’s issues dividing the company from reviewers, there were holes in the data (e.g., patients lost to follow-up) that the company had provided and that reviewers apparently didn’t know how to assess. After one round-table discussion, on 2/18, he and Mike Cole worked through the weekend to extract from the company’s prospective clinical study data a sufficient analysis of patients who had at least three years’ experience with the Fossa-Eminence implant. On 2/27, he presented this to the reviewers, and it answered all of their questions. That left only the labeling, which then moved quickly to completion.

Christensen, who had enlisted legal, political and media help in his frustration with the process, told us 2/27 he is now “very pleased” with the result, although he thinks FDA owes him for some of his extraordinary costs restoring two devices to market. He has resumed full marketing efforts. By his calculations, he has $6 million to $8 million in losses to make up.

Mr. BONILLA. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the bill shall be considered for amendment under the 5-minute rule and the amendment printed in House Report 107–118 is adopted.

During consideration of the bill for amendment, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered read.

The Clerk will read.

The Clerk read as follows:

H.R. 2330

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes, namely:

TITLE I

AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING, AND MARKETING

OFFICE OF THE SECRETARY

For necessary expenses of the Office of the Secretary of Agriculture, and not to exceed $75,000 for employment under 5 U.S.C. 3109, $3,015,000: Provided, That not to exceed $11,000 of this amount shall be available for official reception and representation expenses, not otherwise provided for, as determined by the Secretary: Provided further, That none of the funds appropriated otherwise made available by this Act may be used to pay the salaries and expenses of personnel of the Department of Agriculture to carry out section 798(d) of Public Law 104–127: Provided further, That none of the funds made available by this Act may be used to enforce section 798(d) of Public Law 104–127.

AMENDMENT OFFERED BY MS. KAPTUR

Ms. KAPTUR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Ms. KAPTUR.

In title I, under the heading “OFFICE OF THE SECRETARY” insert after the first dollar amount the following: “(increased by $1,700)”.

In title V, under the heading “FOREIGN AGRICULTURAL SERVICE”–“SALARIES AND EXPENSES” insert after the second dollar amount the following: “(increased by $1,700)”.

Ms. KAPTUR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Ms. KAPTUR. Mr. Chairman, through the amendment, this bill at the subcommittee level and full committee level, we very, very much wanted to have a straightforward appropriation for continuation of the Global Food for Education program. Thus far we have been unable to achieve that in the base bill and have only been able to achieve report language that essentially says that we, as the Congress, expect that the Secretary of Agriculture will continue a program begun last year that is moving our surplus commodities and food commodities around the world to 38 countries, feeding over 9 million needy children. This program is a win-win for America’s farmers and ranchers and definitely a win-win for hungry children around the world, including young girls who are supposed to go to school and receive a decent ration in whatever country they might live.

Unfortunately, in the base bill, there is not $300 million appropriated to continue this program straightforwardly. Rather, all we have is some language that says to the Secretary, “We think it’s a great idea; we hope you can figure out a way to continue the program; and we expect you to continue the program.”

The purpose of this amendment as drafted would be to symbolically take $1,700 from the Secretary’s own accounts and to make those available to the Foreign Agricultural Service. Now, we know $1,700 is not a whole lot, you might be able to buy some stationery with that, but the number 1700 happens to be the number of the McGovern-Emerson bill, which is the bill that would permanently authorize this program for which we would appropriate necessary funds in any fiscal year.

Now, the program as it currently operates is having a tremendous impact around the world. In fact, there are some countries where organizations are now building schools, albeit humble school buildings, maybe thatched roof schools, where children are coming to receive this food. It has tremendous support from so many of our non-governmental organizations, like Catholic Charities, like AC迪/VOCA, like Mercy Corps, like CARE, the very organizations that the World Food Program works through all across the world to feed those who are most in need.

So the purpose of this amendment as drafted really is to say, look, why are we involved in this budget charade of saying to the Congress: if we directly appropriate $300 million, we can’t do that because we break some sacrosanct budget rule here and, therefore, we can’t appropriate real dollars. So we’ll just put report language in the bill. Compare this to the other option that, we’re able to do that as a House. We can appropriate $300 million and she can spend the dollars out of the Commodity Credit Corporation and it doesn’t score.

I do not think there is a person in my district that would understand this kind of budget charade. So the purpose of this amendment is really to draw attention to what is happening here and to say that a large number of our Members on this side of the aisle really want this program to have permanently appropriated dollars. We want to be able to do that as a House. We are handcuffed in the procedures allowed through subcommittee and full committee in order to achieve that.

It is not my intention to move forward with this amendment because I do not want to do a fig leaf. I want to do a real appropriation. But I want to use this amendment as a mechanism to allow others who support this program to speak and to, in the strongest language possible, let the administration know that we are serious. Quite frankly, this bill is a nice piece, it is my intention, working with some of my other colleagues, to bring this up in the other body.

Mrs. EMERSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to enter into a colloquy with the gentleman from Texas (Mr. BONILLA) as well as the gentleman from Massachusetts (Mr. MCGOVERN) and the gentlewoman from Ohio (Ms. KAPTUR) with regard to the continuation of the Global Food for Education Initiative.

Mr. Chairman, the Global Food for Education Initiative was implemented as a pilot program during fiscal year 2001. The Department of Agriculture used $300 million of discretionary funds from the Commodity Credit Corporation to start this pilot program.

Mr. Chairman, I have joined with the gentleman from Massachusetts (Mr. MCGOVERN) and others in introducing the George McGovern-Robert Dole International Food for Education and Child Nutrition
Act of 2001 so that we actually can authorize this program for a 5-year period. However, it is unlikely that this authorizing legislation will be approved in time to provide a seamless transition from the pilot to the authorized program for fiscal year 2002.

An amendment was offered to continue the pilot program at the current level of funding during our markup in the agriculture appropriations subcommittee, but we determined that, for lots of reasons, it would not be part of our bill today. However, I was pleased at the efforts of the gentleman from Texas to include language explaining that the House of Representatives expects the Department of Agriculture to continue the GFEI pilot program in the fiscal year 2002.

Mr. Chairman, it is my hope that the committee supports the international school feeding programs. I would like to see the GFEI continued for the next fiscal year. Is it the gentleman from Texas’ expectation that the Department of Agriculture will continue to fund this program at its current level in fiscal year 2002?

Mr. BONILLA. Mr. Chairman, will the gentlewoman yield?

Mrs. EMERSON. I yield to the gentleman from Texas.

Mr. BONILLA. It is hard to speculate as to what the Department is going to do, but I can assure her that this is something that we are all concerned about. I know the gentlewoman from Ohio (Ms. KAPTUR) has worked on this as well, along with the gentleman from Massachusetts (Mr. MCGOVERN), the gentleman from New York (Mr. WALSH), and others. The subcommittee included report language that encourages the Secretary to continue this program at the same level as the current fiscal year. Accordingly, I will be pleased to work with the gentlewoman to seek that USDA continues a program that they initiated administratively.

Mrs. EMERSON. I thank the gentleman.

Mr. MCGOVERN. Mr. Chairman, will the gentlewoman yield?

Mrs. EMERSON. I yield to the gentleman from Massachusetts.

Mr. MCGOVERN. First of all, I want to thank the gentlewoman from Missouri for her tremendous leadership on this issue and also the gentleman from Massachusetts, Mr. MCGOVERN. The two of them have been vigilant all through our efforts in subcommittee and full committee. I want to thank the gentleman from Texas, Mr. BONILLA, for trying to do as much as he could do. I would hope that we might even consider doing a joint letter to the Secretary as we move toward conference, if that is possible, in order that this program be given the serious attention that it demands at the Department of Agriculture. I want to thank all my colleagues for their tremendous efforts.

Also, I understand Senator Dole has gone through a bit of a procedure at the Cleveland Clinic recently. If he is watching this, I hope our remarks make him feel better. I also want to thank Senator McGovern who has been such a stalwart supporter and innovator, a genius really on this program. We thank him for traveling up here recently to join us in a press conference in front of the Capitol. We hope in their stead here today that we do what is necessary to continue this program.

Mrs. EMERSON. I thank the gentleman from Texas.

Mr. BOB DOLE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to make a few observations about the conversation that we have just heard with respect to this proposal. I think the key words that Members ought to keep in mind were the words of the subcommittee chairman. When he was asked whether or not he did expect the Department to, in fact, continue this program, he correctly pointed out that it is always difficult to predict what any agency, including USDA, will do. That is precisely why, in my view, the committee should have adopted the amendment that we tried to attach in full committee and why this House should have acted on it today.

Here is the situation that we face on this issue. We have had, for the past year, a pilot program going on which in essence takes the value of surplus food in this country and uses it to provide nutrition for young children abroad.

We have been asked by former Senator George McGovern and former Senator Bob Dole, who each on occasion was honored with the nomination of his party to the Presidency of the United States, we have been asked by both of them to continue the program and to make it a long-term commitment. That is something we ought to do.

I would submit that no one in the history of the Congress knows more about child nutrition than George McGovern and Bob Dole. They devoted a great deal of time and effort to it and they are immediately interested in the fact that children in this country were adequately nourished, and they are trying to also do something to recognize that we have responsibilities to people around the world who are not as fortunate as we are.

The problem we have is that when the gentlewoman from Ohio (Ms. KAPTUR) and others sought to offer the amendment, we were told if we offer the amendment and if we do that in this bill, then this bill will be scored and that will hurt us vis-a-vis the Budget Act.

I would simply say I think this is a sad example of how we have been tied up by some of the ludicrous accounting rules that get in the way of our achieving the needed policy goals.

We are stuck in a battle of accountants and the lawyerly interpretation of what accountants tell us and, as a result, we are prevented from doing something which we obviously ought to do.

We have one problem. The agency has not decided to proceed. This Congress had a choice. It could tell the agency to get off the dime and proceed or it could pass the buck. I think that is unfortunate. It seems to me that if the Congress had indicated today, through an amendment on this legislation, that we were directing them to proceed, the agency would have proceeded. We would then have not had the accounting problem and we could have, in fact, delivered on this program.

We have a simple choice. We have surplus commodities in this country. The question is, will the taxpayers be asked to pay money in order to store them or will they be asked to pay money in order to ship them so they can be used to provide nutrition for young children abroad who need them?
June 28, 2001

That is a win-win proposition, both for those kids and our farmers. It ought to be a no-brainer as well, and I think it is indeed unfortunate that we have been prevented from offering the amendment today.

Ms. KAPTUR. Mr. Chairman, if the gentleman will yield, I reserve the right, as we move toward conference, to reintroduce this issue into the debate as we further perfect this bill.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

The Clerk will read.

The Clerk read as follows:

EXECUTIVE OPERATIONS

CHIEF ECONOMIST

For necessary expenses of the Chief Economist, including economic analysis, risk assessment, cost-benefit analysis, energy and new uses, and the functions of the World Agriculture Outlook Board, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1622z), and including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $5,000 is for employment under 5 U.S.C. 3109, $7,704,000.

Ms. LEE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to enter into a colloquy with the chairman of the committee. I had intended to offer an amendment to provide funding to make it easier for students to purchase organic and whole foods in the school breakfast and lunch programs, but I will not offer my amendment today. I want to thank the gentleman from Texas (Mr. BONILLA), and the ranking member, the gentlewoman from Ohio (Ms. KAPTUR) for their support of my intention to assist schools in purchasing healthy foods for their school breakfast and lunch programs. This would include organic, locally grown and fresh produce. At a time when our children’s health is threatened by such conditions as obesity and type II diabetes, it is more important than ever to ensure that they have healthy options when they eat at school.

Currently, our tax dollars buy a high fat, high caffeine, fast food diet, which is turning into an extremely expensive public health problem. According to the Centers for Disease Control and Prevention, youth nutrition and obesity are an epidemic in the United States. The Healthy Farms and Healthy Kids Report states that the awful irony is that our multibillion dollar investment is yielding a multibillion dollar public health crisis in school-aged children while at the same time 83 percent of farmers who are perched precariously on the edge of urban sprawl are threatened with extinction. In many school districts in my State of California and around the Nation, urban, rural, and suburban, it is a real challenge to serve fresh, ethnically diverse meals prepared on-site from whole ingredients obtained by local farms.

With the commitment from the schools and the community, things can be better. In my district, for example, in Berkeley, California, they are facilitating a district-wide food systems-based curriculum supporting garden classrooms and cooking programs in every school.

In Berkeley, local funding has allowed the schools to have a garden in every school, and they are opening fresh salad bars with organic and other fresh foods. So this will help our schools and our local farmers, and, of course, of the purveyors like schools, we believe we will demonstrate that we can bring more healthy foods into our schools while lowering the costs but still supporting our farmers. So I would just like to ask the gentleman from Texas (Mr. BONILLA) for his help really in the future to secure funds to make it easier to get healthy foods from our farms to our children and to our schools, of course. I look forward to working with him and our ranking member, the gentlewoman from Ohio (Ms. KAPTUR), to ensure that this provision could possibly be contained in the final version of the fiscal year 2002 Agricultural Appropriations Act.

Mr. BONILLA. Mr. Chairman, will the gentlewoman yield?

Ms. LEE. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I would be happy to work with the gentlewoman from California (Ms. Lee) and the folks at USDA to provide some positive direction in this area. There is not a parent out there that is not concerned about good nutrition for children so I thank the gentlewoman for bringing this up and would look forward to again trying to direct USDA, somehow working with the gentlewoman on this issue of organic foods.

Ms. KAPTUR. Mr. Chairman, will the gentlewoman yield?

Ms. LEE. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. Mr. Chairman, I just wanted to say to the gentlewoman from California (Ms. Lee) that I fully support her efforts. I think she has raised an exceedingly important issue for our country. Without question, the nutrition of our children will yield the health of the future generation. The high use of sugar and high fats in the diets of our youth are creating an untenable, extremely unhealthy situation in this country that even the Surgeon General has recognized.

One of the hardest challenges we face within the U.S. Department of Agriculture is to get the nutrition part of the agency, which has over half of its budget, to talk to the production side, which is the part the gentlewoman is talking about. That is producers, organic producers, small farmers, must be linked to our local school districts. This has been a tough job. I really support the gentlewoman on her efforts. Her goals of helping our children, I think, are commendable and also getting the Department of Agriculture to see its responsibilities toward our youth by working with farmers who can provide that fresh product in fruits and vegetables, with ethnic and racial sensitivity at the most local of levels, which is where we all live.

So I look forward to working with the gentlewoman as we move the bill in the other body and hopefully we can strengthen this measure as we move forward. I thank the gentlewoman so very much for bringing up this very important issue today.

Ms. LEE. Mr. Chairman, I want to thank the chairman and our ranking member for their colloquy and for their assistance and look forward to working with them. I come from an urban community. I look forward to working with our rural and suburban and urban legislators on this.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OFFICE OF THE CHIEF FINANCIAL OFFICER

For necessary expenses of the Office of the Chief Financial Officer, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 is for employment under 5 U.S.C. 3109, $10,325,000.

OFFICE OF THE CHIEF INFORMATION OFFICER

For necessary expenses of the Office of the Chief Information Officer, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 is for employment under 5 U.S.C. 3109, $10,325,000.

COMMON COMPUTING ENVIRONMENT

For necessary expenses to acquire a Common Computing Environment for the Natural Resources Conservation Service, the Farm and Foreign Agricultural Service and Rural Development mission areas for information technology systems, and services, $2,000,000, to remain available until expended, for the capital asset acquisition of shared information technology systems, including services as authorized by 7 U.S.C. 691-16 and 40 U.S.C. 1421-28: Provided, That obligation of these funds shall be consistent with the Department of Agriculture Service Center Modernization Plan of the county-based agencies, and shall require the concurrence of the Department’s Chief Information Officer.

OFFICE OF THE CHIEF FINANCIAL OFFICER

For necessary expenses of the Office of the Chief Financial Officer, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 is for employment under 5 U.S.C. 3109, $10,325,000.

OFFICE OF THE CHIEF INFORMATION OFFICER

For necessary expenses of the Office of the Chief Information Officer, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 is for employment under 5 U.S.C. 3109, $10,325,000.

CONGRESSIONAL RECORD—HOUSE
OFFICE OF THE ASSISTANT SECRETARY FOR CONGRESSIONAL RELATIONS (INCLUDING TRANSFERS OF FUNDS)

For necessary salaries and expenses of the Office of the Assistant Secretary for Congressional Relations to carry out the programs funded by this Act, including programs involving intergovernmental affairs and liaison with non-governmental organizations, $3,718,000: Provided, That these funds may be transferred to agencies of the Department of Agriculture funded by this Act to maintain personnel at the agency level; Provided further, That no other funds appropriated to the Department by this Act shall be available for the Department for support of activities of congressional relations.

OFFICE OF COMMUNICATIONS

For necessary expenses to carry out services relating to the coordination of programs involving public affairs, for the dissemination of agricultural information, and for the coordination of information, work, and programs authorized by Congress in the Department, $8,975,000, including employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 shall be available for employment under 5 U.S.C. 3109, and not to exceed $2,000,000 may be used for farmers' bulletins.

OFFICE OF THE INSPECTOR GENERAL

For necessary expenses of the Office of the Inspector General, including employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and the Inspector General Act of 1978, $71,429,000, including such sums as may be necessary for contracting and other arrangements with public agencies and private persons pursuant to section 6(a)(9) of the Inspector General Act of 1978, including not to exceed $50,000 for employment under 5 U.S.C. 3109, and including not to exceed $125,000 for certain confidential operational expenses, including the payment of informants, to be funded with appropriations made available pursuant to section 706(a) of the Organic Act of 1944 to the Inspector General pursuant to Public Law 95-452 and section 1337 of Public Law 97-98.

OFFICE OF THE GENERAL COUNSEL

For necessary expenses of the Office of the General Counsel, $32,937,000.

For necessary expenses of the Department of Agriculture, to comply with the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601 et seq., and the Resource Conservation and Recovery Act, 42 U.S.C. 6901 et seq., $15,665,000, to remain available until expended: Provided, That funds available herein to the Department for Hazardous Materials Management may be transferred to any agency of the Department for its use in meeting all requirements pursuant to the above Acts on Federal and non-Federal lands.

For Departmental Administration, $7,386,000, to provide for necessary expenses for maintenance and operation of offices of the Department and for general administration and disaster management of the Department, repairs and alterations, and other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 is for employment under 5 U.S.C. 3109, and for which this appropriation shall be reimbursed from applicable appropriations in this Act for travel expenses incident to the holding of hearings as required by 7 U.S.C. 551-554.

OFFICE OF RESEARCH, EDUCATION AND ECONOMICS

For Departmental Administration, $75,398,000, to provide for necessary expenses for maintenance and operation of offices of the Department and for general administration and disaster management of the Department, repairs and alterations, and other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 is for employment under 5 U.S.C. 3109, and for which this appropriation shall be reimbursed from applicable appropriations in this Act for travel expenses incident to the holding of hearings as required by 7 U.S.C. 551-554.

the occupancy or use of land and facilities (including land and facilities at the Beltsville Agricultural Research Center) issued by the agency, as authorized by law, and such fees shall be credited to this account, and shall remain available until expended for authorized purposes.

AMENDMENT NO. 24 OFFERED BY MR. TIERNEY

Mr. TIERNEY. Mr. Chairman, I offer amendment No. 24.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 24 offered by Mr. Tierney:
In title I, under the heading “AGRICULTURAL RESEARCH SERVICE-SALARIES AND EXPENSES”, insert at the end the following:

SEC. 10. REPORT REGARDING GENETICALLY ENGINEERED FOODS.

(a) IN GENERAL.—Not later than one year after funds are made available to carry out this section, the Agency shall complete and transmit to Congress a report that includes recommendations for the following:

(1) DATA AND TESTS.—The type of data and tests that are needed to sufficiently assess and evaluate human health risks from the consumption of genetically engineered foods.

(2) MONITORING SYSTEM.—The type of Federal monitoring system that should be created to assess any future human health consequences from long-term consumption of genetically engineered foods.

(3) REGULATIONS.—A Federal regulatory structure to approve genetically engineered foods does not as of yet exist.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary of Agriculture $500,000 to carry out this section.

Mr. BONILLA. Mr. Chairman, I reserve a point of order on this amendment.

The CHAIRMAN. The point of order is reserved.

Mr. TIERNEY. Mr. Chairman, there is probably no more important responsibility for a government than to protect the well-being of its citizens. For this reason, it is essential that we properly assess the best way to ensure the safety of genetically engineered foods.

This amendment presented at the desk seeks a National Academy of Sciences study to examine three important health-related aspects of genetically engineered foods. One, whether or not the tests being performed on genetically engineered foods really ensure their health safety and whether or not they are adequate and relevant; two, what type of monitoring system is needed to assess future health consequences from genetically engineered foods; and, lastly, what type of regulatory structure should be in place to approve genetically engineered foods for humans to eat.

In the year 2000, more than 100 million acres of land around the world were planted with genetically engineered crops. This is 25 times as much as was planted just 4 years before. In fact, genetically engineered food crops planted and marketed by United States farmers include 45 kinds of corn, canola, tomatoes, potatoes, soybeans, and sunflowers. In contrast, the growing presence of genetically engineered foods and despite industry assertions that the foods are safe to eat, the public remains unconvinced. The discovery last year of genetically engineered Starlink corn that was not approved for humans to eat in taco shells was a wake-up call. Now, that the cat is out of the bag, Starlink’s manufacturers want the Environmental Protection Agency to declare Starlink safe for human consumption.

Mr. Chairman, that is no way to protect our health. As the Centers for Disease Control noted earlier this month, we need to properly evaluate genetically engineered foods before they get into the food supply. In my home State of Texas, the Environmental Protection Agency is considering legislation that would impose a 5-year moratorium on the growing of genetically engineered foods. Similar legislation is pending in New York. In fact, according to the Grocery Manufacturers of America, as of March this year there were eight bills in six States that would ban or put a moratorium on the planting of genetically engineered crops.

We cannot afford to bury our heads in the sand and let the public’s concerns continue to grow. We need to develop a standard of tests that can be applied to all genetically engineered food to ensure that it is safe for our children and ourselves to eat.

The Food and Drug Administration does not conduct its own testing of genetically engineered products. Instead, the Food and Drug Administration provides guidelines and then relies upon the companies who produce genetically engineered products to test their safety. Companies voluntarily share the results of the tests on genetically engineered products with the Food and Drug Administration.

Under new rules proposed on January 17 by the last administration, companies in the future will have to give 120 days’ notice to the Food and Drug Administration before producing new genetically engineered products on the market. But even with these new rules, it remains the responsibility of the companies that create the market and market these products to test for their safety. We need to be sure that these companies are doing the right tests in the right way.

In addition to ensuring that testing methods are adequate, we need to ensure that our regulatory system is also sufficient to protect our health. The National Academy of Sciences has said, "A solid regulatory system and scientific base are important to acceptance and safe adoption of agricultural biotechnology, as well as for protecting the environment and public health.”

Our current regulatory system, in which the Food and Drug Administration, the Environmental Protection Agency, and the United States Department of Agriculture share jurisdiction over genetically engineered food, may not be the best way to ensure the health and safety of the foods we eat. We need to be certain that testing, regulation and monitoring of genetically engineered foods over the long term are effective and appropriate in determining the potential health effects of eating genetically engineered foods.

I think that is what we are looking for, Mr. Chairman. We want consumers to feel secure when they eat, and we want farmers to be confident when they market their products. We should heed the words from this study, and we should fund the study proposed in this amendment.

Mr. Chairman, I thank the chairman for his attention.

The CHAIRMAN. Does the gentleman from Texas (Mr. BONILLA) insist upon his point of order?

Mr. BONILLA. I continue to reserve my point of order, Mr. Chairman.

The CHAIRMAN. The gentleman continues to insist on his point of order.

Mr. KUCINICH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the Tierney amendment. I think the gentleman from Massachusetts raised an excellent point about the need for further study. The truth is that in 1999, more than 100 million acres of genetically engineered crops were planted in this country, and the consumption of genetically engineered crops is happening. Yet we really do not have much information about the effects; we really do not know much about how this might have some implications for public health. That is why many States are starting to look at this quite critically, and the issues that are raised here certainly merit more study.

The gentleman from Massachusetts (Mr. TIERNEY) should be congratulated for raising this issue and for asking for a more thorough review of this. I can say that I think most people
in this country would support such a call. People are concerned about the food they eat, and they are certainly concerned about new technology which may, in one way or another, change the functional characteristics of the food, as well as the properties of the food and the way in which the food interacts in the human medium.

I think the gentleman from Massachusetts (Mr. TIERNEY) for his work.

Mr. TIERNEY. Mr. Chairman, will the gentleman yield?

Mr. KUCINICH. I yield to the gentleman from Massachusetts.

Mr. TIERNEY. Mr. Chairman, I would hope that the chairman would just know, this is the second year we have presented this motion; and I think it is a pretty balanced motion.

We are seeking here to both give consumers confidence, that the gentleman from Ohio points out very clearly is a very big concern for people; but we also are trying to make sure that farmers know that they can go to the market with confidence. It is going to do us no good in terms of the economics of our society to have a bunch of farmers that are creating a product in which the consumers have no confidence, so there is no market there.

This particular amendment was a hope to strike the point where we get the National Academy of Science to determine for us what is the best testing regime, what is the best way to monitor this as it goes through, and what is the best way to make sure that we have a regulatory structure to give the confidence at both of those levels.

Mr. KUCINICH. Mr. Chairman, reclaiming my time, the gentleman is correct on that. As a matter of fact, American farmers are quite concerned about the safety of genetically engineered products on their markets, because if their markets begin to dry up, as they have in some countries, then American farmers are not able to sell what we know is the best agriculture in the world, here from America. But if the products are genetically engineered, if there has not been much study and there is concern about quality, safety and other things, then our farmers can endure economic loss.

I want to again thank the gentleman from Massachusetts (Mr. TIERNEY) for raising this issue, and I hope that the gentleman would respectfully consider his amendment as being in order.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) still insist on his point of order?

Mr. BONILLA. Mr. Chairman, I continue to reserve my point of order.

The CHAIRMAN. The gentleman continue to reserve his point of order.

Mr. SMITH of Michigan. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I commend the gentleman for their interest in providing wholesome food. It is important. I would like to point out, however, that regarding the Starlink corn question, there had been no ill effects to humans. That is good news.

I would like to also point out that, because we have been cross-breeding for 1,000 years, every food item that we buy in a store, except a couple of varieties of fish, have been genetically modified. This has happened simply because farmers have been looking for ways to improve the quality and cost of food.

I think it is very important that we continue our scientific effort with this new technology of genetic modification. We must also consider the importance of its tremendous potential in developing better food products and more healthy and nutritious products that have vaccines. Also, especially in the developing countries of this world, we now have the potential of developing the kind of plants and seeds that can grow in those arid soils or those types of climatic conditions where they could not grow food before. So we need to proceed in our scientific research.

Just a point before I yield for a comment. We have the best regulatory system in the world in terms of our oversight of genetically engineered products. Between the United States Department of Agriculture, the Food and Drug Administration and the Environmental Protection Agency, we now have the ability to review, regulate and test these products that are coming to market to assure safety.

Mr. TIERNEY. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Michigan. I yield to the gentleman from Massachusetts.

Mr. TIERNEY. I might respectfully just disagree with the gentleman on the last point, as I think the National Academy of Science does, when they indicated that they think this idea of having three different agencies with overlapping and different responsibilities would be better served to look at what kind of regulatory structure that could put in place that would give us more confidence.

Also I want to draw a point on the study they would talk about on Starlink. One, I think we want that kind of information before the problem arises, and that is partly why I filed this bill; and, secondly, there is still some controversy swirling around the study the gentleman talked about and the results of it.

I suspect from the gentleman’s comments and the importance he puts on genetically engineered foods that he favors my bill, which would be a companion bill, and if we set up the right kind of test that people could have confidence in, if we set up the right kind of monitoring system that people would know would be some thing we could rely on, and if we had the right kind of regulatory structure, it would benefit people that take the right kind of position, as well as people that might be skeptical or more on that.

The idea is to follow the advice of the National Academy and do just that. Let them give us the advice through the gentleman’s amendment, I propose to tell us what would be the best testing regime, how would you monitor it, and how would you regulate it.

Mr. SMITH of Michigan. Mr. Chairman, reclaiming my time, I think it is important, and I hope everyone agrees that we have to depend on scientific information and testing, and not emotions, to be the basis of the decisions we make.

Mr. TIERNEY. Mr. Chairman, at this point I am not going to answer the gentleman’s objections on technical matters on this, and I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

CONGRESSIONAL RECORD—HOUSE

June 28, 2001

BUILDINGS AND FACILITIES

For acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities as necessary to carry out the agricultural research programs of the Department of Agriculture, where not otherwise provided, $8,757,000; to remain available until expended (7 U.S.C. 2299h): Provided, That funds may be received from any State, other political subdivision, organization, or individual for the purpose of establishing any research facility of the Agricultural Research Service, as authorized by law.

COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION ACTIVITIES

For payments to agricultural experiment stations, for cooperative forestry and other research, for facilities, and for other expenses, $507,452,000, as follows: to carry out the provisions of the Hatch Act (7 U.S.C. 361a–1), $180,148,000; for grants for cooperative forestry research (16 U.S.C. 592a–a7), $21,884,000; for payments to the 1890 land-grant colleges, including Tuskegee University (7 U.S.C. 3222), $32,604,000, of which $989,000 shall be made available to West Virginia State College in Institute, West Virginia; for special grants for agricultural research (7 U.S.C. 450(i)), $22,163,000; for competitive research grants (7 U.S.C. 450(b)), $15,721,000; for competitive research grants (7 U.S.C. 450(c)), $32,409,000; for special grants for agricultural research on improved pest control (7 U.S.C. 450(c)), $15,721,000; for competitive research grants (7 U.S.C. 450(b)), $105,767,000; for the support of animal health and disease programs (7 U.S.C. 3195), $5,098,000; for supplemental and alternative crops and products (7 U.S.C. 3318), $950,000; for grants for research pursuant to the Critical Agricultural Materials Act of 1981 (7 U.S.C. 178) and section 1742 of the Food and Agriculture Act of 1977 (7 U.S.C. 3318), $639,000, to remain available until spent; for the 1994 research program (7 U.S.C. 3318), $989,000; to remain available until expended; for grants for research pursuant to the Critical Agricultural Materials Act of 1981 (7 U.S.C. 178) and section 1742 of the Food and Agriculture Act of 1977 (7 U.S.C. 3318), $639,000, to remain available until expended; for the 1994 research program (7 U.S.C. 3318), $989,000; to remain available until expended; for enhancement fellowship grants (7 U.S.C. 3152(b)(6)), $2,995,000, to remain available until expended.
June 28, 2001

AMENDMENT NO. 22 OFFERED BY MR. SMITH OF MICHIGAN

Mr. SMITH of Michigan. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 22 offered by Mr. Smith of Michigan:

In title I under the heading “COMPETITIVE STATE RESEARCH, EDUCATION, AND Extension Service” – “RESEARCH AND EDUCATION ACTIVITIES” – insert after the dollar amount relating to “competitive research grants (7 U.S.C. 3152(b)(1))” the following: “including grants for authorized competitive research programs regarding enhancement of the nitrogen-fixing ability and efficiency of plants”.

Mr. SMITH of Michigan. Mr. Chairman, this amendment does is to include research to increase the efficiency of nitrogen fixation from plants.

We have a situation where the nitrogen fertilizer of this country is made out of natural gas. It is estimated that 3 to 6 percent of the natural gas produced in the United States is used to produce nitrogen. Farmers use that nitrogen fertilizer and therefore natural gas. If plants could do a better job of fixing "N" in the soil, we would save energy and reduce the cost to farmers.

This simply says let us include in our research effort research into the fixation of nitrogen. We now have plants that can put nitrogen back into the soil. We have started on this research. We need to move ahead. It is part of the whole renewable energy effort that we need to consider.

I thank the chairman and ranking member for supporting the amendment.

Mr. Chairman, I have an amendment today that would address the challenge of increased farm input costs due to continued high energy prices. Specifically, the amendment would direct the Cooperative State Research, Education, and Extension Service (CSREES) Competitive Grants Program better to the National Research Initiative, to include grants for research into improving nitrogen-fixation ability of crop plants.

As we are aware, higher energy costs over the last two crop years have further stressed farmers who have been on an extended period of low commodity prices. From 1999 to 2000, U.S. producers incurred an additional $2.4 billion in fuel costs. In the 2001 crop year, energy costs are expected to increase an additional $1.5 billion for farmers. As a result, agricultural bottom lines continue to suffer, and many farmers have gone out of business, despite increasing government support.

While we work to accomplish the larger goals set forth in the President’s comprehensive energy plan, I think we should also be sure that no stone is left uncovered with respect to finding new ways to improve our energy usage and consumption. One area where I believe there is great potential for improvements is the reduction of fertilizer input costs on farms through greater nitrogen fixation ability.

In the United States, nitrogen fertilizer production and use require 3 to 6 percent of the country’s natural gas production. Natural gas prices and nitrogen fertilizer prices are closely related, with over 70 percent of the cost of nitrogen fertilizer attributable to natural gas. The tripling of natural gas prices last winter highlights this relationship, as nitrogen fertilizer costs skyrocketed over 350 percent. This huge increase obviously left farmers scrambling to modernize planting decisions and find other ways to cut fertilizer input costs.

One way that we can do this is by developing plants that put nitrogen into the soil. For example, in a typical soybean-corn rotation—where people are attempting to burn their fruit trees to keep them away from their homes, and children are kept indoors.

The amendment was agreed to.

Mr. HANSEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I come to the floor today on behalf of all the farmers and ranchers in Utah and other western States who are dealing with the devastating outbreaks of Mormon Crickets and grasshoppers. This outbreak, now under declaration of emergency by the Governor of Utah, is considered to be the worst in over 60 years and is spreading over 1.5 million acres.

These insects, which breed undisturbed and untreated on the vast acres of BLM and Forest Service land and then spread to neighboring State and private land, are devouring the crops and rangeland to the tune of what is expected to be at least $25 million worth of damage.

However, this is not all. In Oak City, Utah, for example, the mayor informs me that the crickets have now inundated the community water system at the sealed collection boxes and tanks. They are now moving into towns, where people are attempting to burn their fruit trees to keep them away from their homes, and children are kept indoors.

Line-item funding has been eliminated, and formerly available funds from previous years have all been expended in battling these insects. The plight of these lands has become such a critical concern, that I have asked our Subcommittee on Public Lands to hold oversight hearings on this issue next month. Timely and adequate funding has been a continual issue for us.

While I understand there are not any line-item funds for Mormon Cricket and grasshopper treatment in this bill as it stands today, I understand the chairman is aware of the problem we are facing and has instructed me to ensure there is sufficient APHIS funds for the 2002 fiscal year specific to Mormon Cricket and grasshopper treatment, as well as working with us to ensure the Secretary addresses our emergency problem with contingency funds.

I thank the chairman and look forward to working with him and obtaining emergency funds.

Mr. BONILLA. Mr. Chairman, will the gentleman yield?

Mr. HANSEN. Mr. Chairman, I move to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I thank my friend for yielding. I appreciate the hard work that the gentleman has undertaken on this issue. I know it is a very serious problem.

The committee and this chairman are aware of the emergency conditions that exist in Utah and throughout the Great Basin region caused by the Mormon Crickets. The gentleman from Utah has my assurance that proper funding for this problem is obtained in a timely manner this year and that specific funding for addressing the Mormon Cricket and grasshopper
problem is identified to meet future needs in the FY 2002 bill.

Mr. HANSEN. Mr. Chairman, re-
claiming my time, I thank the chair-
man and appreciate his help on this
critical matter and look forward to ad-
dressing this issue in conference and
with the Secretary's help.

Mr. GEORGE MILLER of California.
Mr. Chairman, I move to strike the last
word.

Mr. Chairman, I rise in support of en-
suring that all warm-blooded animals
used in research receive the protection
for which the Animal Welfare Act enti-
tles them and, therefore oppose the
language that has been included in the
bill before us which will continue to
deny those protections to those species
that constitute the majority of the
animals used in research.

In 1970, the Congress specifically
amended the Animal Welfare Act to
provide for the protections of all warm-
blooded animals used in experiments.
Since then, however, the U.S. Depart-
ment of Agriculture has unfairly and
illegally denied those modest safe-
guards to a majority of the research
animals, over 20 million birds, rats, and
mice used each year.

When Congress amended the law, we
certainly did not intend to exclude 95
percent of the animals used in re-
search. This is confirmed by our es-
teeed former colleague from the
other body, Senator Bob Dole, who,
along with my great friend, the late
Congressman George Brown, further
improved the treatment of lab animals
in 1985.

I wish to enter into the RECORD the
letter from Senator Dole on this sub-
ject. To correct this 30-year-old wrong,
USDA committed the beginning of the rule-
making process to extend the Ani-
mal Welfare Act regulations to these
animals, I am disappointed that the
Agriculture Appropriations Sub-
committee chose to add language that
prohibits USDA from going forward
with this rulemaking which is long overdue.
The scientific community
must be held accountable to the public
for its treatment of animals. The
American public expects animal re-
search to be conducted as humanely as
possible. We in Congress cannot assure
them that if we not only allow, but also
encourage, USDA to exclude the major-
ity of research animals from this
law's protection.

Mr. Chairman, I urge that this lan-
guage be stricken in the conference
committee between the House and the
Senate.

The letter referred to previously fol-
lows:

CONGRESSIONAL RECORD—HOUSE
WASHINGTON, DC,

JOHN MCAIRDE,
Director, Alternatives Research and Develop-
ment Foundation, Eden Prairie, MN.

DEAR Mr. MCAIRLE: Thank you for your letter of 19 February requesting amend-
tus of laboratory animals under the Animal Welfare Act (AWA).

I support the use of animals in research but firmly believe that there is a responsi-
bility incumbent upon researchers to provide basic protections to the animals they use. It
is obvious that good animal care is essential to ensuring good quality research. Through
good animal treatment and minimizing pain-
ful tests, biomedical research gains in both
accuracy and humanity.

As someone deeply involved with the proc-
ess of revising and expanding the provisions
care to all laboratory animal laboratories, I
intend to exclude 95 percent of the animals
meant to include birds, mice, and rats. When
Congress stated that the AWA applied to “all
warm-blooded animals,” we certainly did not
mean to exclude the tendons and ligaments of the animals
used in biomedical research laboratories.

Although the National Institutes of Health and the Association for Assessment and Accredi-
tation of Laboratory Animal Care Interna-
tional provide oversight for some of the
birds, mice, and rats used for experimen-
tation, many research institutions fail out-
side their purview. With AWA regulations
soon extended to these animals, I believe
USDA, with its substantial experience in en-
forcement, is best suited to ensuring human
care for all laboratory animals, moreover,
neither NIH’s policy nor voluntary accredi-
tation includes legal consequences for failure
to perform. The Animal Welfare Act does.

I am aware of efforts by opponents of ani-
mal welfare to prevent coverage of birds,
mice, and rats as detrimental to research. This notion is preposterous. A similar strat-
agy was employed by opponents of my 1985
amendments to the Act. I am happy to ob-
serve that none of their predications about the
dire consequences for research ever ma-
terialized.

Indeed, those amendments have facilitated significant improvements in laboratory ani-
mal care and use, which in turn have bene-
itted research. In fact, I understand that
those members of the research community
best informed about laboratory animals sup-
port the inclusion of birds, mice, and rats.

From their work on the front lines, they rec-
ognize, as you and I do, that uniform protec-
tions not only are humane, but also ensure consistent experimental results and level the
playing field in vital scientific research.

Those who oppose USDA’s efforts to fulfill
its court settlement with your organization,
I believe, are overlooking the long-term ben-
et results to crafting better science.

We owe much to laboratory animals—that
were true in 1985 and is truer today. I would
hope that the Bush Administration and
Members of the present Congress, some of
whom stood with me in 1985 in advancing my
amendments, will recognize that all animals
used in experimentation deserve the benefit
of the modest requirements of the Animal
Welfare Act. I would urge them to allow
USDA to achieve this end by pursuing a full
and fair rulemaking as provided in the set-
tlement agreement.

I wish you the best of luck not only in de-
fending the Animal Welfare Act, but also in
your ongoing efforts to advance humane
methods of biomedical research.

Sincerely,

BOB DOLE.

THE CHAIRMAN. The Clerk will read.

The Clerk read as follows:

None of the funds in the foregoing para-
graph shall be available to carry out re-
search related to the production, processing
or marketing of tobacco or tobacco products:
Provided, That this paragraph shall not apply
To research on the medical, biotechnological,
food, and industrial uses of tobacco.

NATIVE AMERICAN INSTITUTIONS ENDOWMENT
FUND
For the Native American Institutions En-
dowment Fund authorized by Public Law
103–382 (7 U.S.C. 301 note), $7,100,000.

EXTENSION ACTIVITIES
For payments to States, the District of Co-
lumbia, Puerto Rico, Guam, the Virgin Is-
lands, Micronesia, Northern Marianas, and
American Samoa, $18,648,000; for urban and
rural development, $103–382 (7 U.S.C. 301
note), $7,100,000; for the nutrition and family
education program, $275,940,000; payments
for extension work for the National In-
stitutions Endowment Fund authorized by
Public Law 103–382 (7 U.S.C. 301 note), $7,100,000.

For payments to States, the District of Co-
lumbia, Puerto Rico, Guam, the Virgin Is-
lands, Micronesia, Northern Marianas, and
American Samoa, $18,648,000; for urban and
rural development, $103–382 (7 U.S.C. 301
note), $7,100,000; for the nutrition and family
education program, $275,940,000; payments
for extension work for the National In-
stitutions Endowment Fund authorized by
Public Law 103–382 (7 U.S.C. 301 note), $7,100,000.
Samoan to availability of an equal sum from non-Federal sources for expenditure during the current fiscal year.

**INTEGRATED ACTIVITIES**

For the integrated research, education, and extension competitive grants programs, including necessary administrative expenses, as authorized by section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7626), $43,355,000, as follows: payments for the water quality program, $12,971,000; payments for the food safety program, $14,967,000; payments for the national agriculture pesticide impact assessment program, $4,531,000; payments for the Food Quality Protection Act risk mitigation program, $1,497,000; payments for the methyl bromide phaseout program for major food crop systems, $12,971,000; payments for the Food Quality Protection Act implementation program for major food crop systems, $12,971,000; payments for the food security program under the laws enacted by the Congress for the Food Safety and Inspection Service, $71,774,000, including funds for the wholesale market development program for the design and development of wholesale and farmer market facilities for the major metropolitan areas of the country: Provided, That this appropriation shall be available for the control of outbreaks of insects, plant diseases, animal diseases, and to protect the environment, as authorized by law, $587,386,000, of which $4,096,000 shall be available for aircraft and the purchase of not to exceed $25,000 for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $33,117,000 for field employment pursuant to law (31 U.S.C. 9701).

**AMAND AND PLANT HEALTH INSPECTION SERVICE**

**MARKETING SERVICES**

For necessary expenses to carry out services related to consumer protection, agricultural marketing and distribution, transportation, and regulatory programs, as authorized by law, and for administration and coordination of payments to States, including field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225) and not to exceed $90,000 for employment under 5 U.S.C. 3109, $71,774,000, including funds for the wholesale market development program for the design and development of wholesale and farmer market facilities for the major metropolitan areas of the country: Provided, That this appropriation shall be available pursuant to law (7 U.S.C. 2225) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building. Fees may be collected for the cost of standardization activities, as established by regulation pursuant to law (31 U.S.C. 9701).

**LIMITATION ON ADMINISTRATIVE EXPENSES**

Not to exceed $60,506,000 (from fees collected) shall be obligated during the current fiscal year for administrative expenses: Provided, That if crop size is understated and/or other uncontrollable factors occur, the agency may exceed this limitation by up to 10 percent with notification to the Committees on Appropriations of both Houses of Congress.

**Funds for Strengthening Markets, Income, and Supply (Section 32)**

**INTEGRATED ACTIVITIES**

For necessary expenses to carry out services authorized by the Fish and Wildlife Act of August 8, 1956; (2) transfers otherwise provided in this Act; and (3) not more than $15,995,000 for formulation and administration of marketing agreements and orders pursuant to the Agricultural Marketing Agreement Act of 1937 and the Agricultural Act of 1961.

**PAYMENTS TO STATES AND POSSESSIONS**

For necessary expenses to carry out the provisions of the United States Grain Standards Act, for the administration of the Packets and Stockyards Act, for certifying procedures used to protect purchasers of farm products, and for the administration of the Poultry Products Inspection Act, the Poultry Products Inspection Act, the Poultry Products Inspection Act, and the Egg Products Inspection Act, in addition to not exceed $50,000 for representation allowances and for expenses pursuant to section 6 of the Egg Products Inspection Act, $720,652,000, and in addition, $1,000,000 may be credited to this account from fees collected for the cost of laboratory accreditation as authorized by section 1017 of Public Law 102-237: Provided, That this appropriation shall be available for the Department of Commerce as authorized by section 102-237 of Public Law 102-237, $1,347,000.

**FOOD INSPECTION, PACKERS AND STOCKYARDS ADMINISTRATION**

For necessary expenses to carry out the provisions of the United States Grain Standards Act, for the administration of the Packets and Stockyards Act, for certifying procedures used to protect purchasers of farm products, and for the administration of the Poultry Products Inspection Act, the Poultry Products Inspection Act, the Poultry Products Inspection Act, and the Egg Products Inspection Act, in addition to not exceed $50,000 for representation allowances and for expenses pursuant to section 6 of the Egg Products Inspection Act, $720,652,000, and in addition, $1,000,000 may be credited to this account from fees collected for the cost of laboratory accreditation as authorized by section 1017 of Public Law 102-237: Provided, That this appropriation shall be available for the Department of Commerce as authorized by section 102-237 of Public Law 102-237, $1,347,000.

**GRAIN INSPECTION, PACKERS AND STOCKYARDS ADMINISTRATION**

For necessary expenses to carry out the provisions of the United States Grain Standards Act, for the administration of the Packets and Stockyards Act, for certifying procedures used to protect purchasers of farm products, and for the administration of the Poultry Products Inspection Act, the Poultry Products Inspection Act, the Poultry Products Inspection Act, and the Egg Products Inspection Act, in addition to not exceed $50,000 for representation allowances and for expenses pursuant to section 6 of the Egg Products Inspection Act, $720,652,000, and in addition, $1,000,000 may be credited to this account from fees collected for the cost of laboratory accreditation as authorized by section 1017 of Public Law 102-237: Provided, That this appropriation shall be available for the Department of Commerce as authorized by section 102-237 of Public Law 102-237, $1,347,000.

**INFORMATION SERVICES**

For necessary salaries and expenses of the Office of the Under Secretary for Marketing and Regulatory Programs to administer programs under the laws enacted by the Congress for the Agricultural Marketing Service and the Food Safety and Inspection Service, $90,000, including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $25,000 for employment under 5 U.S.C. 3109, $33,117,000: Provided, That this appropriation shall be available pursuant to law (7 U.S.C. 2225) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building.

**INSPECTION AND WEIGHING SERVICES**

For necessary salaries and expenses of the Office of the Under Secretary for Food Safety and Inspection Service, $481,000.

**OFFICE OF THE UNDER SECRETARY FOR FOOD SAFETY**

**MARKETING SERVICES**

For necessary salaries and expenses of the Office of the Under Secretary for Food Safety and Inspection Service, $481,000.

Mr. BONILLA (during the reading).

Mr. Chairman, I ask unanimous consent that the remainder of the bill through page 25, line 1, be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

**FOOD SAFETY AND INSPECTION SERVICE**

**MARKETING SERVICES**

For necessary salaries and expenses of the Office of the Under Secretary for Marketing and Regulatory Programs to administer programs under the laws enacted by the Congress for the Agricultural Marketing Service and the Food Safety and Inspection Service, $90,000, including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $25,000 for employment under 5 U.S.C. 3109, $33,117,000: Provided, That this appropriation shall be available pursuant to law (7 U.S.C. 2225), and not to exceed $25,000 for employment under 5 U.S.C. 3109, $33,117,000: Provided, That this appropriation shall be available pursuant to law (7 U.S.C. 2225) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building. Fees may be collected for the cost of standardization activities, as established by regulation pursuant to law (31 U.S.C. 9701).

**LIMITATION ON ADMINISTRATIVE EXPENSES**

Not to exceed $60,506,000 (from fees collected) shall be obligated during the current fiscal year for administrative expenses: Provided, That if crop size is understated and/or other uncontrollable factors occur, the agency may exceed this limitation by up to 10 percent with notification to the Committees on Appropriations of both Houses of Congress.

**Funds for Strengthening Markets, Income, and Supply (Section 32)**

**INTEGRATED ACTIVITIES**

For necessary salaries and expenses of the Office of the Under Secretary for Food Safety and Inspection Service, $481,000.
field employment pursuant to the second sentence of the Omnibus Budget Reconciliation Act of 1944 (7 U.S.C. 2225), and not to exceed $75,000 shall be available for employment under 5 U.S.C. 3106: Provided further, That this appropriation will be available pursuant to law (7 U.S.C. 2225) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building.

AMENDMENT OFFERED BY MS. DELAURO

Ms. DELAURO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Ms. Delauro:

In title I, in the item relating to “FOOD SAFETY AND INSPECTION SERVICE”, insert at the end the following:

In addition, for the Food Safety and Inspection Service to improve food safety and reduce the incidence of foodborne illnesses, $50,000,000: Provided, That such amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985: Provided further, That such amount shall be available only to the extent that an official budget request, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, is transmitted by the President to the Congress.

In title VI, in the item relating to “FOOD AND DRUG ADMINISTRATION—SALARIES AND EXPENSES”, insert at the end the following:

In addition, for the Food and Drug Administration to improve food safety and reduce the incidence of foodborne illnesses, $183,000,000: Provided, That such amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985: Provided further, That such amount shall be available only to the extent that an official budget request, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, is transmitted by the President to the Congress.

Ms. Delauro (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Connecticut?

There was no objection.

Mr. BONILLA. Mr. Chairman, I reserve a point of order on this amendment.

The CHAIRMAN. A point of order is reserved.

Mr. BONIOR. Mr. Chairman, I ask unanimous consent that all debate on this amendment be limited to 30 minutes and that the time be equally divided.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The time will be equally divided between the proponent of the amendment, the gentlewoman from Connecticut (Ms. Delauro) and a Member opposed.

Mr. BONILLA. Mr. Chairman, I claim the time in opposition.

The CHAIRMAN. The gentlewoman from Connecticut (Ms. Delauro) is recognized for 15 minutes.

Ms. Delauro. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, my amendment provides emergency funds to address the food safety crisis that faces our Nation today. Today more Americans are getting sick from the food that they eat. Outbreaks of food sickness are expected to go up by as much as 15 percent over the next 10 years. The outbreaks are reported across the spectrum: fish, eggs, beef and lettuce, to name a few. The statistics are staggering. Five thousand Americans die every year from foodborne illness, and 76 million get ill and 325 are hospitalized. Medical expenses and lost productivity cost us every year $5.6 billion and $9.4 billion respectively.

Two days ago the Excel Corporation recalled 150 million pounds of ground beef and pork because of possible contamination by deadly E. coli. Sara Lee pled guilty to selling tainted meat linked to a nationwide outbreak of Listeriosis in 1998, and 15 people were killed.

Grocery stores are afraid that their food is unsafe. Slaughterhouses are killing cattle before the animals are unconscious because there are not enough inspectors to ensure that the law is enforced.

George Grob, Deputy Director and Inspector General of Health and Human Services states that, and I quote, “Any reasonable person would worry about it. If the inspection process worked really well, there would be fewer recalls.”

To address the problem I asked the committee to allow an amendment that would provide a total of $213 million in emergency funds, $90 million for more inspections of imported foods, $73 million for additional inspections of domestic food products, and $50 million for the Food Safety Inspection Service to ensure that it has the resources that it needs to implement food safety procedures and regulations.

The Food and Drug Administration inspects all meat, poultry and eggs. This food, which includes fruit juices, vegetables, cheeses, seafood, is the source of 85 percent of food poisoning in this country. In the United States alone, there are 30,000 companies that produce these food items, and last year recalls of FDA-regulated products rose to 315, the most since the 1980s and 36 percent above average.

Mr. Chairman, FDA inspects less than 1 percent of imported food, and that market has expanded from 2.7 million items to 4.1 million items in just 3 years. In the domestic market, the FDA does not inspect all high-risk firms more than once a year; other firms are visited only once in 7 years. The FDA employs 400 people to inspect domestic food. It would need 300 more inspectors. To increase its inspection of imported food from 1 percent to 10 percent would require 1,600 employees.

The FDA needs resources in order to begin to meet its goal, and that is what this amendment does, is to begin the process of increasing the number of inspectors in order to look at imported foods and take the 1 percent of the inspections to 10 percent, and it would add 630 inspectors to guarantee that all high-risk firms are inspected. Once a year, all other firms every 2 years, and all food warehouses every 3 years.

The last part of the amendment says, let us have $50 million for the Food Safety Inspection Service to allow it to reach its goal of looking at reducing food-borne illnesses that are carried by meat and poultry by 25 percent.

The FSIS has held public hearings to look at how we deal with imported food and procedures, risk management, and emergency outbreaks. We only have to look at our European friends to see what they have gone through with foot and mouth and with mad cow illness to understand that what we need to do is to be able to meet any kind of emergency. We need to move forward on food safety, not backwards. If we continue to not provide the kinds of inspection services that are needed, in fact, we will move backwards and jeopardize the health of this country.

Mr. Chairman, I ask for support of this amendment and to provide the emergency assistance for food safety.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin.

Mr. OBEY. Question: How many times have we all heard: "The government is too blasted big. Get the government out of our lives." I bet my colleagues have heard it a lot. Yet the first time that we have an outbreak of disease someplace, the first time that people die from contaminated food, all of a sudden people say, "Where is the government? What are they doing? Why don’t they get off their duffs? Why don’t they protecting the public interest?"

Well, there is very good reason for that. It is because we are not providing the resources necessary to provide an
June 28, 2001

CONGRESSIONAL RECORD—HOUSE

12259

Mr. Chairman, 5,000 Americans are going to die this year because of contaminated food, and millions are going to become sick, and I do not believe that we cannot do better.

Mr. BONILLA. Mr. Chairman, I continue to reserve my point of order, and I reserve the balance of my time.

Ms. KAPTUR, Mr. Chairman, I yield 5 minutes to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I thank the gentlewoman for yielding to me, and I want to commend her for her terrific efforts in subcommittee and in full committee, and now on the floor, to get appropriate attention to the important question of food safety in our country. It really is staggering to think that 76 million Americans every year have some type of food-borne illness.

As modern a society as we are, we question, why does this happen? Part of the reason for it is because our food system, in many ways, is moving very far away from home.

It used to be that you knew the farmer where your eggs came from. You knew the farmer who grew your strawberries. There was local accountability. You knew where your chickens came from. You knew where your beef for your sausage came from, because there was a small community and you went to the stores and the outlets that they operated.

Mr. Chairman, today we live in a very industrialized food system, and industrialized food processing has not necessarily brought with it a safer food system. In fact, last year, 315 Food and Drug Administration regulated food products were recalled, the most recalls in 1 year since the mid-1980s.

It was a 36 percent increase above the average. The reason for that is, even though we have certain scientific methods in place, the way in which our food is processed actually encourages food-borne illness.

For example, in the area of beef, if you go into some of our slaughter houses and meat-packing plants now, which are very, very mechanized, often, an intestine will be pierced and E. coli will be driven into flesh in the animal that is ultimately then cut up and sold on the supermarket shelf. That is a tremendous problem.

Mr. Chairman, some of that is not detected by the human eye. Industrial slaughtering is different than when animals were cut by hand and there were not so many animals slaughtered per day. It is really an oversight.

Mr. Chairman, some of that is not detected by the human eye. Industrial slaughtering is different than when animals were cut by hand and there were not so many animals slaughtered per day. It is really an oversight.

It has never been easy to work in a meat processing facility. At the beginning of the 20th century, books were written about what was going on inside these meat-packing plants, and through the 20th century, we tried to improve the situation.

In poultry, for example, if you look at the USDA inspectors who are on a line, the rate at which birds move by them has become so fast, the human eye cannot necessarily see the different types of salmonella and povereira and other bacterial microbes that can infect the meat product.

In spite of the fact that we seem to be so modern, some of the very problems that we have as a fact that food is grown and processed very far from home has made the system in some ways extremely vulnerable.

It is surprising to us also that in a country as bountiful as ours that we have increasing amounts of food imports.

Over the last 4 years alone, imported foods sold in the United States have increased by 50 percent, from 2.7 million items in 1997 to 4.1 million last year alone. But of all the foreign imports coming in here, as the gentlewoman from Connecticut (Ms. DeLAURO) has accurately described, only 1 percent are inspected.

So we all get sick from food poisoning, they do not report it to the Centers for Disease Control. A lot of times they do not really realize what is wrong with them until a couple of days later. At the local level, there is not an automatic reporting upstream to the CDC. So a lot of the food poisoning goes unreported.

The DeLauro amendment would provide additional funds for food inspection. The cost is $98 million more for imported food inspection, which we so desperately need at our borders; $73 million more for FDA inspections of domestic food processors. Many processors do not even get inspected once a year; sometimes it takes up to 2 years.

The FDA actually is the agency where 75 percent of the problem is, 75 percent of the outbreaks and problems relate to FDA-inspected facilities. This means inspection is inadequate.

The DeLauro amendment would provide $50 million for USDA food safety and inspection service to carry out new procedures and regulations for meat and poultry food products. For example, USDA is currently addressing port of entry procedures and the development of contingency plans for emergency breakouts. Remember, we had that problem of strawberries in Michigan causing children to become so ill.

To this day, we were never actually able to track back where the problem was. To those strawberries came from. We knew they were processed in southern California. Their origin was Mexico, California. Their origin was Mexico, and we knew they were processed in southern California. Their origin was Mexico, and we knew they were processed in southern California. Their origin was Mexico. The FDA actually is the agency where 75 percent of the problem is, 75 percent of the outbreaks and problems relate to FDA-inspected facilities. This means inspection is inadequate.

The DeLauro amendment would provide $50 million for USDA food safety and inspection service to carry out new procedures and regulations for meat and poultry food products. For example, USDA is currently addressing port of entry procedures and the development of contingency plans for emergency breakouts. Remember, we had that problem of strawberries in Michigan causing children to become so ill.

To this day, we were never actually able to track back where the problem was. To those strawberries came from. We knew they were processed in southern California. Their origin was Mexico, and we knew they were processed in southern California. Their origin was Mexico, and we knew they were processed in southern California. Their origin was Mexico.

We have an absolutely safe source of food in this country.

The purpose of this amendment is to, over a 3-year period of time, bring us to where the FDA says we should be in protecting the public health of this country.

When we had subcommittee hearings earlier in the year, here is what the FDA said in response to questions: “The inspection coverage of food manufacturers, particularly those risk-manufacturers, has been inadequate over the past several years.”

FDA estimated we would need at least $220 million for an optimum inspection schedule of domestic food facilities under our jurisdiction. This would provide inspection of high-risk farms twice each year, warehouses every 3 years, and all other food firms every 7 years.

Now, people can argue all day long about government priorities, but the fact is that we are here today unable to offer this amendment because the budget situation under which we are operating prevents us from even getting a vote on the amendment offered by the gentlewoman.

Why are we in this position? Because the majority party and the White House insisted early on to take virtually every dime of the surpluses that we were expecting to accumulate in those 10 years and pour all of those monies into tax cuts. They put the lion’s share of those tax cuts into the pockets of the very wealthiest people in this country.

So this Congress decided it was more important to give the wealthiest 1 percent of people in this country, who, over the last 20 years, have seen an after-tax rise in their income of $141,000 per family, than to give those people an additional tax cut of $35,000 a year than it is to meet our primary obligations to strengthen Social Security, to strengthen education, to strengthen Medicare, and to do all of these other little things that we need to do if we are going to protect the food supply of this country and the environment in which we all live.

So I simply take the well today, knowing full well that this amendment will not receive a vote because of the rule under which the bill is being considered, to suggest that this again is another example of how we are neglecting our responsibilities of stewardship in order to do the easy political thing and throw all of the money that we were expecting to accumulate in those surpluses to tax cuts for the most prosperous people in this society.

Mr. Chairman, I cannot believe this Congress could not achieve a better balance in priorities. I cannot believe that intelligent people on both sides of the aisle cannot figure out a way to guarantee that we do provide at least the minimum coverage that the Agency itself says we ought to provide in order to protect the health of the American people.
of the agencies that we charge with protecting our food, our food supply, which is ultimately about the man, it is about the safety of every man, women and child in this country. That is all that we are asking about here.

Given the statistics, which are staggering, 5,000 deaths, 73 million people ill, 350,000 people hospitalized, it is unconscionable that we do not recognize this as a crisis and as an emergency.

We cannot allow this to continue. We can do something about it.

Parliamentary inquiry

Mr. BONILLA. Mr. Chairman, I have a parliamentary inquiry. Is the gentlewoman from Connecticut (Ms. DeLAURO) withdrawing her amendment?

The CHAIRMAN pro tempore (Mr. WHITFIELD). Is the gentlewoman from Connecticut withdrawing her amendment, or does she continue to want to move forward on her amendment?

Ms. DE LAURO. Mr. Chairman, I would like to continue to move forward with my amendment.

Point of Order

The CHAIRMAN pro tempore. Does the gentleman from Texas (Mr. BONILLA) insist on his point of order?

Mr. BONILLA. Mr. Chairman, I do.

The CHAIRMAN pro tempore. The gentleman will state his point of order.

Mr. BONILLA. Mr. Chairman, I make a point of order against the amendment, because it proposes to change existing law and constitutes legislation in an appropriations bill, and, therefore, violates clause 2 of rule XXI. The rule states, in pertinent part, an amendment to a general appropriation bill shall not be in order if changing existing law.

The amendment includes an emergency designation under section 251 of the Balanced Budget and Emergency Deficit Control Act of 1985, as such, constitutes legislation in violation of clause 2 of rule XXI. I ask for a ruling from the Chair.

The CHAIRMAN pro tempore. Does the gentlewoman from Connecticut want to be heard on the point of order?

Ms. DeLAURO. No, Mr. Chairman.

The CHAIRMAN pro tempore. Then the Chair is prepared to rule on the gentleman’s point of order.

The Chair finds that this amendment includes an emergency designation under section 251(b)(2)(a) of the Balanced Budget and Emergency Deficit Control Act of 1985, the amendment therefore constitutes legislation in violation of clause 2 of rule XXI.

The point of order is sustained. The amendment is not in order.

The CHAIRMAN pro tempore (Mr. WHITFIELD). The Committee will rise informally.

The SPEAKER pro tempore (Mr. LATHAM) assumed the Chair.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Edwin Thomas, one of his secretaries.

The SPEAKER pro tempore. The Committee will resume its sitting.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

The Committee resumed its seating.

The CHAIRMAN pro tempore. The Clerk read as follows:

OFFICE OF THE UNDER SECRETARY FOR FARM AND FOREIGN AGRICULTURAL SERVICES

For necessary salaries and expenses of the Office of the Under Secretary for Farm and Foreign Agricultural Services to administer the laws enacted by the Farm Service Agency, the Foreign Agricultural Service, the Risk Management Agency, and the Commodity Credit Corporation, $561,000.

FARM SERVICE AGENCY SALARIES AND EXPENSES (INCLUDING TRANSFERS OF FUNDS)

For necessary expenses for carrying out the administration and implementation of programs administered by the Farm Service Agency, $990,506; Provided, That the Secretary is authorized to use the services, facilities, and authorities (but not the funds) of the Commodity Credit Corporation to make program payments for programs administered by Agency: Provided further, That other funds made available to the Agency for authorized activities may be advanced to and merged with this account: Provided further, That these funds shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $1,000,000 shall be available for employment under 5 U.S.C. 3109.

STATE MEDIATION GRANTS

For grants pursuant to section 502(b) of the Agricultural Credit Act of 1987, as amended (7 U.S.C. 1928c–2), $4,993,000.

DAIRY INDENMITY PROGRAM (INCLUDING TRANSFER OF FUNDS)

For necessary expenses involved in making indemnity payments to dairy farmers and manufacturers of dairy products under a dairy indemnity program, $100,000, to remain available until expended: Provided, That such program is carried out by the Secretary in the same manner as the dairy indemnity programs described in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (Public Law 106-367; 114 Stat. 154A-13).

AGRICULTURAL CREDIT INSURANCE FUND PROGRAM ACCOUNT (INCLUDING TRANSFERS OF FUNDS)

For gross obligations for the principal amount of direct and guaranteed loans as authorized by 7 U.S.C. 1928-1929, to be available from funds in the Agricultural Credit Insurance Fund, as follows: Farm ownership loans, $1,128,000,000, of which $1,000,000,000 shall be for guaranteed loans and $128,000,000 shall be for direct loans; operating loans, $2,600,000,000, of which $1,500,000,000 shall be for subsidized guaranteed loans, $500,000,000 shall be for subsidized guaranteed and $600,000,000 shall be for direct loans; Indian tribe land acquisition loans as authorized by 25 U.S.C. 488, $2,000,000; for emergency insured loans, $25,000,000 to meet the needs resulting from natural disasters; and for both unsubsidized and subsidized guaranteed loans as authorized by 7 U.S.C. 5101-5106.

For the cost of direct and guaranteed loans, including the cost of modifying loans as defined in section 502 of the Congressional Budget Act of 1974, as follows: farm ownership loans, $7,806,000, of which $4,508,000 shall be for guaranteed loans and $3,298,000 shall be for direct loans; operating loans, $174,030,000, of which $52,650,000 shall be for unsubsidized guaranteed loans, $67,800,000 shall be for subsidized guaranteed loans, $38,860,000 shall be for direct loans; and Indian tribe land acquisition loans as authorized by 25 U.S.C. 488, $118,000; and for emergency insured loans, $3,363,000 to meet the needs resulting from natural disasters.

In addition, for administrative expenses necessary to carry out the direct and guaranteed loan programs, $274,769,000 shall be transferred to and merged with the appropriation for “Farm Service Agency, Salaries and Expenses”.

For administrative expenses, as authorized by the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 6893), $75,142,000: Provided, That not to exceed $700 shall be available for official reception and representation expenses, as authorized by 7 U.S.C. 1506b(4).

CORPORATIONS

The following corporations and agencies are hereby authorized to make expenditures, within the limits of funds and borrowing authority available to each corporation or agency and in accordance with law, and to make contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Contract Act as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such corporation or agency, except as hereinafter provided.

FEDERAL CROP INSURANCE CORPORATION FUND

For payments as authorized by section 516 of the Federal Crop Insurance Act, such sums as may be necessary, to remain available until expended (7 U.S.C. 2209b).

COMMODITY CREDIT CORPORATION FUND REIMBURSEMENT FOR NET REALIZED LOSSES

For fiscal year 2002, such sums as may be necessary to reimburse this Corporation for net realized losses sustained, but not previously reimbursed, pursuant to section 2 of the Act of August 17, 1961 (15 U.S.C. 713a-11).

OPERATIONS AND MAINTENANCE FOR HAZARDOUS WASTE MANAGEMENT

For fiscal year 2002, the Commodity Credit Corporation shall not expend more than $5,000,000 for site investigation and cleanup expenses, and operating and maintenance expenses to comply with the requirement of section 107(g) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.) and section 102 of the Resource Conservation and Recovery Act, 42 U.S.C. 6901.
CONGRESSIONAL RECORD—HOUSE

TITLe II
CONSERVATION PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT

For necessary salaries and expenses of the Office of the Under Secretary for Natural Resources and Environment to administer the laws enacted by the Congress for the Forest Service, the Rural Development, the Natural Resources Conservation Service, $736,000.

NATURAL RESOURCES CONSERVATION SERVICE CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a–f), including permanent and conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures for soil and water management as may be necessary to prevent floods and the siltation of reservoirs and to control agricultural related pollutants); operation of conservation plant materials centers; classification and mapping of soil; dissemination of information; acquisition of lands, water, and interests therein for use in the plant materials centers; operation and maintenance at a nominal cost not to exceed $100 per day of an evaluation or purchase of citrus trees for the purpose of determining the suitability of citrus trees for planting in the western United States, and for such purposes as may be necessary to improve irrigation and drainage, and for the development of water storage, diversion, and reclamation systems; and for research, investigation, and surveys of water resources and environment to administer the laws enacted by the Congress for the Forest Service, the Rural Development, the Natural Resources Conservation Service, $736,000.

WATERSHED AND FLOOD PREVENTION OPERATIONS

For necessary expenses to carry out preventive measures that are not limited to research, engineering operations, methods of cultivation, the growing of vegetation, rehabilitation of existing works and changes in the distribution of water, or the establishment of watershed protection and flood prevention programs authorized by the Act of April 27, 1944 (7 U.S.C. 2225), and not to exceed $25,000 shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $110,000 shall be available for employment under 5 U.S.C. 3109.

WATERSHED AND FLOOD PREVENTION PROGRAMS

For necessary expenses to carry out preventive measures that are not limited to research, engineering operations, methods of cultivation, the growing of vegetation, rehabilitation of existing works and changes in the distribution of water, or the establishment of watershed protection and flood prevention programs authorized by the Act of April 27, 1944 (7 U.S.C. 2225), and not to exceed $25,000 shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $200,000 shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $30,500,000 is for technical assistance or improvement of permanent and temporary buildings; and operation and maintenance of aircraft, $782,762,000, to remain available until expended (7 U.S.C. 2229b), or which not to exceed $7,000,000 is for survey and water forecasting, and of which not to exceed $30,500,000 is for the establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures for soil and water management as may be necessary to prevent floods and the siltation of reservoirs and to control agricultural related pollutants); operation of conservation plant materials centers; classification and mapping of soil; dissemination of information; acquisition of lands, water, and interests therein for use in the plant materials centers; operation and maintenance at a nominal cost not to exceed $100 per day of an evaluation or purchase of citrus trees for the purpose of determining the suitability of citrus trees for planting in the western United States, and for such purposes as may be necessary to improve irrigation and drainage, and for the development of water storage, diversion, and reclamation systems; and for research, investigation, and surveys of water resources and environment to administer the laws enacted by the Congress for the Forest Service, the Rural Development, the Natural Resources Conservation Service, $736,000.

ARCTIC AND ANCHORAGE KILL PROGRAMS

For the purpose of the Arctic and Anchorage Kill Program, $50,000,000: Provided, That this appropriation shall be available for those Arctic and Anchorage kill operations that may be necessary to carry out the provisions of the Organic Act of 1957 (16 U.S.C. 1862) and the U.S.-Canada Joint Commission Agreement of June 28, 2001.
Secretary of Agriculture as Rural Economic 

Communities and enterprise communities designated by the 

empowerment zones and enterprise communities described in section 381E(d)(1) of such Act, of which $27,431,000 shall be for the rural communities programs described in section 381E(d)(2) of such Act, and of which $9,030,000 shall be for the rural business and cooperative 

development programs described in section 381E(d)(3) of such Act; Provided further, That any prior year balances for high cost energy grants authorized by section 19 of the Rural Electrification Act of 1936 (7 U.S.C. 901(19)) shall be transferred to and merged with the 

Rural Development Account.

RURAL DEVELOPMENT SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses for carrying out the administration and implementation of programs in the Rural Development mission area, including activities with institutions concerning the development and operation of agriculture and rural communities, as authorized by title IV of such Act, and for cooperative 

agreements; $134,733,000, Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $1,000,000 may be used for employment under 5 U.S.C. 3109; 

Provided further, That not more than $10,000 may be provided to provide modest non-

monetary awards to non-USDAA employees: 

Provided further, That any balances available from prior years in the Rural Utilities 

Service, Rural Housing Service, and the Rural Business-Cooperative Service salaries and 

expenses accounts shall be transferred to and merged with this account.

RURAL HOUSING SERVICE

RURAL HOUSING INSURANCE FUND PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

For gross obligations for the principal amount of direct and guaranteed loans as authorized by title V of the Housing Act of 1949, to be available from funds in the rural housing insurance fund, as follows: 

$1,202,650,000 for section 502 loans to section 502 borrowers, as determined by the Secretary, of which $1,064,650,000 shall be for direct loans, and of which $3,137,968,000 shall be for unsubsidized guaranteed loans; $32,324,000 for section 504 housing repair loans; $114,068,000 for section 515 rental housing; $90,770,000 for section 538 guaranteed multi-family housing loans; 

$5,000,000 for section 524 site loans; $11,776,000 for credit sales of acquired property, of which up to $1,776,000 may be for multi-family credit sales; and $5,000,000 for section 523 self-help housing land development loans.

For the cost of direct and guaranteed loans, including the cost of modifying loans, as defined in Cooperative Credit Insurance Account, Fiscal Year 1974, as follows: 

section 502 loans, $180,274,000 of which $140,108,000 shall be for direct loans, and of which $40,166,000 shall be for unsubsidized guaranteed loans; section 504 housing repair loans, 

$10,386,000; section 515 rental housing, $48,274,000; section 538 multi-family housing guaranteed loans, $3,921,000; section 524 site loans, $28,000; multi-family credit sales of acquired property, 

$750,000; and section 523 self-help housing land development loans, $254,000; 

Provided, That for the total amount appropriated in this paragraph, $11,656,000 shall be available through June 30, 2002, for authorized empowerment zones and enterprise communities designated by the Secretary of Agriculture as Rural Economic Area Partnership Zones.

CONGRESSIONAL RECORD—HOUSE

June 28, 2001

work out whatever needs to be done with the majority.

Mr. BONILLA. Mr. Chairman, if the gentlewoman will yield, we would have no objection to that, and she would be allowed to do that.

Ms. KAPTUR. Mr. Chairman, I thank the gentlewoman.

The CHAIRMAN pro tempore (Mr. WHITFIELD). Without objection, the gentlewoman from North Carolina (Mrs. CLAYTON) withdraws her amendment and, without prejudice, will be able to reoffer at an appropriate time.

There was no objection.

Mrs. CLAYTON. At a later time?

The CHAIRMAN pro tempore. At a later point in the reading, the gentlewoman from North Carolina will be able to reoffer her amendment.

Mrs. CLAYTON. Do I need further 

information at this time, or do I have to make sure, have I reserved my 

right? Is my amendment protected? All 

right? Is my amendment protected? All 

the Chair will read.

The Clerk read as follows:

RENTAL ASSISTANCE PROGRAM

For rental assistance agreements entered into or renewed pursuant to the authority under section 521(a)(2) or agreements entered into in lieu of debt forgiveness or payments for eligible households as authorized by section 502(c)(5)(D) of the Housing Act of 1949, $693,504,000; and, in addition, such sums as may be necessary, as authorized by section 521(c) of the Act, to liquidate debt incurred prior to fiscal year 1992 to carry out the rental 

assistance program under section 521(a)(2) of the Act: Provided, That in any fiscal year, no more than $10,000,000 shall be available to debt 

forgiveness or payments for eligible 

households as authorized by section 502(c)(5)(D) of the Act, and not to exceed $10,000 per project for advances to nonprofit organizations or public agencies to cover direct costs (other than purchase price) incurred in purchasing projects pursuant to section 502(c)(5)(C) of the Act: Provided fur-

ther, That agreements entered into or renewed during fiscal year 2002 shall be funded for a 5-year period, although the life of such agreement may be extended to fully utilize amounts obligated.

MUTUAL AND SELF-HHELP HOUSING GRANTS

For grants and contracts pursuant to section 523(h)(1)(A) of the Housing Act of 1949 (2 U.S.C. 1490c), $35,925,000, to remain available until expended (7 U.S.C. 2209(b)): Provided, That of the total amount appropriated, $1,000,000 shall be available through June 30, 2002, for authorized empowerment zones and enterprise communities and communities designated by the Secretary of Agriculture as Rural Economic Area Partnership Zones.

RURAL HOUSING ASSISTANCE GRANTS

For grants and contracts for very low-income housing repair, supervisory and technical assistance, compensation for construction defects, and reimbursement made by the Rural Housing Service, as authorized by 42 U.S.C. 1474, 1474c, 1490, and
For the cost of direct loans, $16,494,000, as authorized by the Rural Development Loan Fund (42 U.S.C. 9812(a)), of which $1,724,000 shall be for Federally Recognized Native American Tribes and of which $3,449,000 shall be for Delta Region counties (as defined by Public Law 100–460): Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 302 of the Congressional Budget Act of 1974: Provided further, That these funds are available to subsidize gross obligations for the principal amount of direct loans of $38,176,000: Provided further, That of the total amount appropriated, $2,730,000 shall be available through June 30, 2002, for the cost of direct authorized empowerment zones and community enterprises and communities designated by the Secretary of Agriculture as Rural Economic Area Partnership Zones.

In addition, for administrative expenses to carry out the direct loan programs, $7,361,000 shall be transferred to and merged with the appropriation for “Rural Development, Salaries and Expenses”.

For the amount of direct loans, as authorized under section 313 of the Rural Electrification Act, for the purpose of promoting rural economic development and job creation, $6,316,000.

For the cost of direct loans, including the cost of modifying loans as defined in section 502 of the Congressional Budget Act of 1974, $3,616,000.

Of the funds derived from interest on the cushion of credit payments in fiscal year 2002, as authorized by section 313 of the Rural Electrification Act of 1936, $3,616,000 shall not be obligated and $3,616,000 are rescinded.

For rural cooperative development grants authorized under section 310B(e) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932), $7,500,000, of which $2,600,000 shall be for cooperative agreements for the appropriate technology transfer for rural areas program: Provided, That not to exceed $1,507,000 of the total amount appropriated shall be available to cooperatives or associations of cooperatives whose primary focus is to provide assistance to small, minority producers.

For grants in connection with a second round of empowerment zones and enterprise communities $14,967,000, to remain available until expended for empowerment zones and rural enterprise communities as authorized in the Taxpayer Relief Act of 1997.

For the principal amount of direct distance learning and telemedicine loans, $300,000,000; and for the principle amount of broadband telecommunication loans, contingent upon the enactment of authorizing legislation, $100,000,000.

For the cost of direct loans and grants, as authorized by 7 U.S.C. 950aaa et seq., $121,107,000; municipal rate rural electric loans, $794,358,000; loans made pursuant to section 306 of that Act, rural electric, $2,600,000; Treasury rate direct electric loans, $500,000,000; and guaranteed electric loans, $100,000,000; 5 percent rural telecommunications loans, $74,827,000; cost of money rural telecommunications loans, $300,000,000; and rural telecommunications loans, $120,000,000.

For the cost, as defined in section 502 of the Congressional Budget Act of 1974, including the cost of modifying loans, of direct and guaranteed loans authorized by the Rural Electrification Act of 1936 (7 U.S.C. 935 and section 305(d)(2), and as follows: cost of rural electric loans, $3,889,000; and the cost of telecommunication loans, $2,036,000: Provided, That notwithstanding section 305(d)(2) of the Rural Electrification Act of 1936, the guaranteed rate interest rates may exceed 7 percent per year.

In addition, for administrative expenses necessary to carry out the direct and guaranteed loan programs, $36,322,000, which shall be transferred to and merged with the appropriation for “Rural Development, Salaries and Expenses”.

The Rural Telephone Bank is hereby authorized to make such expenditures, within the limits of funds available to such corporation in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as may be necessary in carrying out its authorized functions during the fiscal year ending June 30, 2002 and within the resources and authority available, gross obligations for the principal amount of direct loans shall be $174,615,000.

For the cost, as defined in section 302 of the Congressional Budget Act of 1974, including the cost of modifying loans, of direct loans authorized by the Rural Electrification Act of 1936 (7 U.S.C. 950, $2,584,000.

For the principal amount of direct learning and telemedicine loans, $300,000,000; and for the principle amount of broadband telecommunication loans, contingent upon the enactment of authorizing legislation, $100,000,000.

For the cost of direct loans and grants, as authorized by 7 U.S.C. 950aaa et seq., $26,941,000, to remain available until expended for the definition of “rural area” used for the Distance Learning and Telemedicine Program authorized by 7 U.S.C. 950aaa: Provided further, That the cost of direct loans shall be defined in section 502 of the Congressional Budget Act of 1974.

For necessary expenses to carry out the National School Lunch Act (42 U.S.C. 1751 et seq.), except section 21, and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.), except sections 17 and 21; $10,988,746,000, to remain available through September 30, 2003, of which $4,748,038,000 is hereby appropriated and $5,340,708,000 shall be derived by transfer from funds available under the Act of August 24, 1955 (7 U.S.C. 612c): Provided, That except as specifically provided under this heading, none of the funds made available under this heading shall be used for studies and evaluations: Provided further, That up to $4,507,000 shall be available for independent verification of school food service claims: Provided further, That of the funds provided under this heading, $2,000,000 shall be available for new activities to enhance integrity in the National School Lunch Program.

For amendment offered by Mrs. Davis of California. Mr. Chairman, I offer an amendment. The Clerk read as follows: Amendment offered by Mrs. Davis of California: In title IV under the heading “Child Nutrition Programs”, insert before the period at the end the following: “Provided further, That the Secretary of Agriculture may not take into account the availability of a basic allowance for housing for members of the Armed Forces when determining the eligibility of persons for free or reduced-price lunch programs”.

Mr. BONILLA. Mr. Chairman, I reserve a point of order. We have not seen this amendment.

The CHAIRMAN pro tempore. The point of order is reserved.

Mrs. DAVIS of California. Mr. Chairman, I realize this amendment will most likely not be ruled in order, but I offer it to raise awareness to a critical problem.

In an effort to leverage its limited quality-of-life resources, the armed services are privatizing military family housing. I support this effort. In fact, we have some wonderful projects online in San Diego. But as you know, obviously there are unintended consequences of a good program. I would like to point out two in particular.

This is creating a loss of income to school districts, and it is affecting the eligibility for free and reduced school

CONGRESSIONAL RECORD—HOUSE

Amendments to the Agriculture Bill of 2002

Mr. BONILLA. Mr. Chairman, I would like to point out two in particular.

This is creating a loss of income to school districts, and it is affecting the eligibility for free and reduced school

transmission and local dial-up Internet service in areas that meet the definition of “rural area” used for the Distance Learning and Telemedicine Program authorized by 7 U.S.C. 950aaa: Further, that the cost of direct loans shall be defined in section 502 of the Congressional Budget Act of 1974.

TITLE IV

DOMESTIC FOOD PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR FOOD, NUTRITION AND CONSUMER SERVICES

For necessary salaries and expenses of the Office of the Under Secretary for Food, Nutrition and Consumer Services to administer the laws enacted by the Congress for the Food and Nutrition Service, $592,000.

FOOD AND NUTRITION SERVICE

CHILD NUTRITION PROGRAMS

INCLUSIVE TRANSFER OF FUNDS

For necessary expenses to carry out the National School Lunch Act (42 U.S.C. 1751 et seq.), except section 21, and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.), except sections 17 and 21; $10,988,746,000, to remain available through September 30, 2003, of which $4,748,038,000 is hereby appropriated and $5,340,708,000 shall be derived by transfer from funds available under the Act of August 24, 1955 (7 U.S.C. 612c): Provided, That except as specifically provided under this heading, none of the funds made available under this heading shall be used for studies and evaluations: Provided further, That up to $4,507,000 shall be available for independent verification of school food service claims: Provided further, That of the funds provided under this heading, $2,000,000 shall be available for new activities to enhance integrity in the National School Lunch Program.

Amendment offered by Mrs. Davis of California. Mr. Chairman, I offer an amendment. The Clerk read as follows: Amendment offered by Mrs. Davis of California: In title IV under the heading “Child Nutrition Programs”, insert before the period at the end the following: “Provided further, That the Secretary of Agriculture may not take into account the availability of a basic allowance for housing for members of the Armed Forces when determining the eligibility of persons for free or reduced-price lunch programs”.

Mr. BONILLA. Mr. Chairman, I reserve a point of order. We have not seen this amendment.

The CHAIRMAN pro tempore. The point of order is reserved.

Mrs. DAVIS of California. Mr. Chairman, I realize this amendment will most likely not be ruled in order, but I offer it to raise awareness to a critical problem.

In an effort to leverage its limited quality-of-life resources, the armed services are privatizing military family housing. I support this effort. In fact, we have some wonderful projects online in San Diego. But as you know, obviously there are unintended consequences of a good program. I would like to point out two in particular.

This is creating a loss of income to school districts, and it is affecting the eligibility for free and reduced school

transmission and local dial-up Internet service in areas that meet the definition of “rural area” used for the Distance Learning and Telemedicine Program authorized by 7 U.S.C. 950aaa: Further, that the cost of direct loans shall be defined in section 502 of the Congressional Budget Act of 1974.
lunch programs for the children of military families.

Let me also tell my colleagues some background. When a family lives in a military family housing community, they basically forfeit their basic housing allowance. But when that community housing becomes privatized, this basic allowance housing is included on the servicemembers' pay statement. That is called an LES. Servicemembers do not actually receive this income, however. It is basically pass-through.

Unfortunately, under the Department of Defense rules, this amount is included as income in determining eligibility for free and reduced school lunches.

The Department of Defense adds the allowance to the pay statement to assist them in accounting, but the servicemember is not getting any additional pay for the family, and certainly not for their children.

This could happen. Perhaps, on a Sunday in December, a military housing community is owned and operated by the military. But on Monday, that housing community is operated by a private company, still on the Federal land, but the servicemember has never moved, but has less money really in his pocket if his child does not become eligible for free and reduced lunch. They had that eligibility before.

So families are losing some assistance, children are losing their free lunches, and school districts are losing Federal funds. It is the smaller school districts particularly that are especially affected by this. So we need to take a look at this issue, and I think we need to change the rules. This is no way to believe the gentlewoman has really brought us up on an issue that we never have considered, never were asked to consider during our regular hearings and so forth.

I think this does involve also the authorizing of the Committee on Education and the Workforce since they have jurisdiction over the school lunch program, the free and reduced lunch program, although we have jurisdiction over the expenditures for that.

Knowing that some of our military personnel are extremely pressed, even some eligible for food stamps when serving the Government of the United States at points around the world, it would seem to me that we should find a way to encourage the Department of Education, the Department of Agriculture to treat our military personnel with the respect that they deserve.

I want to compliment the gentlewoman for bringing this issue to the attention of our subcommittee and pledge my own cooperation with her in resolving this in the weeks and months ahead, and certainly also encourage her to testify before the Committee on Education and the Workforce as well as the authorizing Committee on Agriculture.

We here on the Committee on Appropriations will continue to work with the gentlewoman from California (Mrs. Davis) as we move to conference with the other body.

The CHAIRMAN pro tempore. Does the gentleman from California (Mr. Bonilla) insist on his point of order?

Mr. Bonilla. Mr. Chairman, I would ask the Chair if the gentlewoman from California (Mrs. Davis) is going to take this issue and I certainly will ask to withdraw my amendment.

Ms. Kaptur. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would just like to say to the gentlewoman from California (Mrs. Davis) and to the chairman of the subcommittee that I do believe the gentlewoman has really brought us an issue that we never have considered, never were asked to consider during our regular hearings and so forth.

I think this does involve also the authorizing of the Committee on Education and the Workforce since they have jurisdiction over the school lunch program, the free and reduced lunch program, although we have jurisdiction over the expenditures for that.

Knowing that some of our military personnel are extremely pressed, even some eligible for food stamps when serving the Government of the United States at points around the world, it would seem to me that we should find a way to encourage the Department of Education, the Department of Agriculture to treat our military personnel with the respect that they deserve.

I want to compliment the gentlewoman for bringing this issue to the attention of our subcommittee and pledge my own cooperation with her in resolving this in the weeks and months ahead, and certainly also encourage her to testify before the Committee on Education and the Workforce as well as the authorizing Committee on Agriculture.

We here on the Committee on Appropriations will continue to work with the gentlewoman from California (Mrs. Davis) as we move to conference with the other body.

The CHAIRMAN pro tempore. Does the gentlewoman from California (Mrs. Davis) intend to withdraw her amendment?

Mrs. Davis of California. Yes, Mr. Chairman, I will do that. I know that there are colleagues on the other side of the aisle who have confronted this problem in their community, and I appreciate their help and support on this as well.

Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from California?

There was objection.

Mr. Schrock. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to take this opportunity to speak on behalf of this amendment that was introduced by the gentlewoman from California (Mrs. Davis). At a time when retention in the military is down, we need to find as many ways as possible to support our sailors, soldiers, airmen, marines and their families.

The Department of Agriculture’s current policy of counting the basic allowance for housing as part of income is unfair to the young men and women of the military who have dedicated their lives in service to our country.

Many military families, many new military families are finding it difficult just to make ends meet. Many are living just above the poverty level. The long hours, the months away from loved ones and low-paying jobs for spouses is often the norm for these families. When military communities introduced privatized housing to help military families save on living costs, it, unfortunately, does not always save money for the servicemembers.

When a member lives on base, they forfeit their basic allowance for housing. When a member lives in a privatized community, the Department of Defense adds the allowance to their pay statement, but this is money they never see.

When the Department of Agriculture includes this amount as income, it affects many families’ eligibility for free or reduced school lunches. Schoolchildren lose their free lunches, families lose their assistance, and school districts lose Federal funds that receive this money to assist for free and reduced school lunch programs.

At the Naval Amphibious Base Little Creek in Virginia Beach, they were working with the Department of Housing Authority to plan for privatized housing in Virginia Beach and Norfolk, which I represent. I do not want to see what is happening as the debate of the gentlewoman from California (Mrs. Davis) happen to the military families in our area.

I urge my colleagues to support this amendment. I thank the gentlewoman from California (Mrs. Davis) for introducing it.

The CHAIRMAN pro tempore. The Clerk will read.

The Clerk read as follows:

SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC) (INCLUDING TRANSFERS OF FUNDS)

For necessary expenses to carry out the special supplemental nutrition program as authorized by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786), $4,137,086,000, to remain available through September 30, 2003: Provided, That none of the funds made available under this heading shall be used for studies and evaluations: Provided further, That of the total amount available, the Secretary may obligate up to $25,000,000 for the farmers’ market nutrition program and up to $15,000,000 for senior farmers’ market activities from any funds not needed to maintain current caseload levels: Provided further, That notwithstanding section 17(h)(10)(A) of
such Act, up to $10,000,000 shall be available for expenses specified in section 17(h)(10)(B), no less than $6,000,000 of which shall be used for the development of electronic benefit transfer systems: Provided further, That none of the funds made available in this account shall be available for the purchase of infant formula except in accordance with the cost containment and competitive bidding requirements specified in section 17 of such Act: Provided further, That none of the funds provided shall be available to pay administrative expenses that are not fully reimbursed by other Federal Government departments or agencies unless authorized by section 17 of such Act.

FOOD STAMP PROGRAM

For necessary expenses to carry out the Food Stamp Act (7 U.S.C. 2011 et seq.), $21,991,966,000, of which $1,000,000,000 shall be placed in reserve for use only in such amounts and at such times as may become necessary for the purchase of rice to carry out the market price support program operations: Provided, That none of the funds made available under this heading shall be used for studies and evaluations: Provided further, That funds made available for Employment and Training block grants shall remain available until expended, as authorized by section 16 of the Food Stamp Act: Provided further, That funds provided under this heading may be used to procure food coupons necessary for program operations in this or subsequent fiscal years until electronic benefit transfer implementation is complete.

COMMODITY ASSISTANCE PROGRAM

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses to carry out the commodity supplemental food program as authorized by section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 1771 et seq.) and the Emergency Food Assistance Act of 1983, $12,018,313,000, to remain available until September 30, 2003: Provided, That none of these funds shall be available to reimburse the Commodity Credit Corporation for commodities donated to the program: Provided further, That of the total amount available, the Secretary may obligate up to $15,000,000 for senior farmers’ market activities from any funds not needed to maintain current caseload levels: Provided further, That notwithstanding section 5(a)(2) of the Agriculture and Consumer Protection Act of 1973 (Public Law 88–366; 7 U.S.C. 1621c note), $20,820,000 of this amount shall be available for administrative expenses of the commodity supplemental food program.

FOOD DONATION PROGRAMS

For necessary expenses to carry out section 4(a) of the Agriculture and Consumer Protection Act of 1973; special assistance for the purchase of food as authorized by section 10(i)(2) of the Comacts of Free Association Act of 1985, as amended; and section 311 of the Older Americans Act of 1965, $150,790,000, to remain available through September 30, 2003.

FOOD PROGRAM ADMINISTRATION

For necessary administrative expenses of the domestic food programs funded under this Act, $126,656,000, of which $5,000,000 shall be available only for simplifying procedures, reducing overhead costs, tightening regulations, improving food stamp benefit delivery, and assisting in the prevention, identification, and prosecution of fraud and other violations of the Act; not to exceed $4,500,000 shall be available to improve integrity in the Food Stamp and Child Nutrition programs: Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $150,000 shall be available for employment under 5 U.S.C. 1107.

TITLE V

FOREIGN ASSISTANCE AND RELATED PROGRAMS

FOREIGN AGRICULTURAL SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Foreign Agricultural Service, including carrying out title VI of the Agricultural Act of 1954 (7 U.S.C. 1761–1768), market development activities abroad, and for enabling the Secretary to carry out the agreements with the Commodity Credit Corporation for the export of agricultural commodities under this Act, $158,000 for representation allowances and for necessary expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1765), $122,631,000: Provided, That the Service may utilize advances of funds, or reimburse this appropriation for expenditures made on behalf of Federal agencies, public and private organizations and institutions under agreements executed pursuant to the Agricultural Trade Development Program at any time when the applicable international activity agreement for such program is in effect: Provided further, That none of the funds appropriated in this account may be used to pay the salaries and expenses of personnel to disburse funds to any rice trade association under the market access program or the foreign market development program at any time when the applicable international activity agreement for such program is in effect: Provided further, That none of the funds appropriated in this account may be used to promote the sale or export of tobacco or tobacco products.

PUBLIC LAW 80 GRANT ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

For administrative expenses to carry out the Commodity Credit Corporation’s export guarantee program, GSM 102 and GSM 103, $4,021,000, to cover previous expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1765), $122,631,000: Provided, That the Service may utilize advances of funds, or reimburse this appropriation for expenditures made on behalf of Federal agencies, public and private organizations and institutions under agreements executed pursuant to the Agricultural Trade Development Program at any time when the applicable international activity agreement for such program is in effect: Provided further, That none of the funds appropriated in this account may be used to promote the sale or export of tobacco or tobacco products.

TITLE VI

RELATED AGENCIES AND FOOD AND DRUG ADMINISTRATION

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Food and Drug Administration, including hiring and purchasing of passenger motor vehicles; for pay- ment of space rental and related costs pursuant to Public Law 92–313 for programs and activities of the Food and Drug Administration that are included in the rental of special purpose space in the District of Columbia or elsewhere; and for miscellaneous and emergency expenses of enforcement activities, authorized and approved by the Secretary and to be accounted for solely on the Secretary’s certificate, not to exceed $25,000; $1,342,339,000, of which not to exceed $211,716,000 to be derived from prescription drug user fees authorized by 21 U.S.C. 379(h), including any such fees assessed prior to the current fiscal year but credited during the current year, in accordance with 21 U.S.C. 379(k)(4), and shall be credited to this appropriation and remain available until expended: Provided, That the total amount appropriated $6,000,000 for costs related to occupancy of new facilities at White Oak, Maryland, shall remain available until September 30, 2003.

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Brown of Ohio: In title VI, in the item provided for “DEPARTMENT OF HEALTH AND HUMAN SERVICES-FOOD AND DRUG ADMINISTRATION-SALARIES AND EXPENSES”, insert before the
Mr. BROWN of Ohio (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BONILLA. Yes, Mr. Chairman.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN pro tempore. The Chairman recognizes the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, I yield myself 3 minutes and 15 seconds.

Within the next 5 years, patents on brand-name drugs with combined U.S. sales approaching $20 billion will expire. Given the tremendous cost savings with generic competition, it has never been more important to reduce unnecessary delays in FDA approval of generic drugs.

The amendment I am offering today, along with the gentleman from California (Mr. WAXMAN), the gentleman from Michigan (Mr. DINGELL), the gentleman from Arkansas (Mr. BERRY), and the gentleman from New Jersey (Mr. PALLONE), would increase funding for the Office of Generic Drugs by $2.5 million. Our amendment builds on the $1.5 million increase already allocated to this office under the leadership of the chairman, the gentleman from Texas (Mr. BONILLA), and the ranking member, the gentlewoman from Ohio (Ms. KAPTUR).

I am pleased the gentlewoman from Ohio (Ms. KAPTUR) supports this amendment. While I understand how difficult it is to allocate limited FDA resources, this amendment will pay for itself many times over. Additional dollars committed to the Office of Generic Drugs will generate enormous returns for American consumers, for Federal and State governments, and for employment-sponsored health plans.

Prescriptions increased by 18.8 percent last year, accounting for half the increase in national health spending and a third of the increase in employer-sponsored health coverage. Generic drugs cost on average 40 to 80 percent less than their brand name counterparts. Sometimes they are 90 percent cheaper.

To get a sense of the savings inherent in approving these drugs more rapidly: brand-name drug companies receive 6 additional months of market exclusivity when they conduct pediatric clinical trials. That 6 months, on the average, represents $695 million in lost consumer savings each year. It takes 6 to 12 months, on average, to review a new drug application. It takes 18 months, on average, to review a generic drug application. Multiply that $695 million, Mr. Chairman, times the full universe of generic drugs, and the 6-month difference means tens of billions of dollars in lost savings.

There are 300 scientists on staff today to review generic drug applications. There are more than 2,100 scientists on staff to review new drug applications. By giving the Office of Generic Drugs the resources it needs, we can make a tangible difference in easing the prescription drug spending burden. Opportunities to reduce both public and private spending on prescription drugs without sacrificing access or quality are very hard to come by.

Our amendment provides an additional $250,000 to fully fund a national campaign to raise public awareness about generic drugs. Generic drugs are as safe and as effective as brand-name drugs; they are just cheaper. But there is clearly an information gap when it comes to generics. Forty-three percent of Americans report no bias against generic drugs, but only 54 percent fill prescriptions with the generics. There is a misperception that as conditions become more serious, the use of generic drugs becomes more risky. The greatest bias against generic drugs exists when cost savings, unfortunately when cost savings are potentially the greatest for serious conditions requiring expensive long-term treatment.

If we can get generic drugs to market on a more timely basis and encourage more widespread use of these products, the public and private sector savings will quickly dwarf our investment. I ask the Members of this Congress to support the amendment.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in opposition to the amendment. The bill that the committee has presented to the House includes a very carefully balanced recommendation for funding for the Food and Drug Administration. The $39 million provided in this bill for generic drug activities includes a 17 percent increase for generic drug review, generated by any savings.

I should also note that the funding for generics includes the only FDA program increase above the President’s budget, which certainly demonstrates our commitment to affordable, effective, and safe generic drugs. So, again, I rise in opposition to the amendment.

Mr. Chairman, I yield back the balance of my time.

Mr. BROWN of Ohio. Mr. Chairman, I yield 2 minutes to the gentleman from Arkansas (Mr. BERRY), who has fought for low-cost prescription drugs for several years in this body.

Mr. BERRY. Mr. Chairman, I want to thank the distinguished gentleman from Ohio for his leadership in this effort.

The American people, Mr. Chairman, are continuing to be robbed by the brand-name prescription drug manufacturers in this country. The reason that happens is because they have patient protection, they have trade barriers, they can protect themselves, and they have limited access to generic medicine. It is time that we do something about that. It is time that we make reasonably priced prescription medicine available to the American people. We know that they could be saving $20 billion a year today if they had access to generic medicine that is not available to them today.

What we are asking in this amendment is that we provide $2.5 million to the FDA so they can have the ability to approve more generic medicine to the American people that would be offered at a much more reasonable price and create competition in the prescription medicine market that we have to deal with today. Generic drugs cost, on average, 75 percent less than brand names.

As I said, we know that we can save the American people $20 billion a year if we do this. It takes 6 to 12 months to review a new drug application, but it takes 18 months today, because of FDA’s limited ability, to approve a generic drug application. This does not make any sense that this would be the case.

I urge the Members of this House to vote for this amendment and support the effort of the gentleman from Ohio to provide the American people with reasonably priced prescription medicine.

Mr. BROWN of Ohio. Mr. Chairman, I yield 1½ minutes to the gentleman from New Jersey (Mr. PALLONE), who has been very involved in health care issues, especially prescription drug and managed care issues.

Mr. PALLONE. Mr. Chairman, I rise in support of the Brown amendment. There is a need for statutory or legislative initiatives that allow timely access and availability of generic drugs once the patent on a brand-name drug
I want to thank both the chairman of the subcommittee and also the ranking member because this amendment actually builds for the $1.5 million increase they have in the bill. This would help move generic drugs to the market quicker. We are talking about $2.5 million. It typically takes 6 to 12 months to review a new drug application, but 18 months for generics.

This will help all our people, but particularly our seniors, who take more prescription drugs and spend billions every year on prescription drugs. Let us see if we can get generics there to save our seniors some dollars.

Mr. BROWN of Ohio. Mr. Chairman, how much time do I have remaining?

The CHAIRMAN. The gentleman from Ohio has 2 minutes remaining.

Mr. BROWN of Ohio. Mr. Chairman, I yield 1½ minutes to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I thank the gentleman for yielding me this time, and I thank him so very much for bringing up this important amendment.

I think it is important for the membership to know this does not involve any new money but merely a reallocation of funds within the Food and Drug Administration itself. So this is a very, very worthy amendment.

We have had to try to fight in this bill and the bill last year to try to get more attention to the approval of generic drugs, which so many Americans obviously need. They are a lot less expensive. I can remember when Claude Pepper used to stand on this floor trying to get generic drug incentives put into the law.

So I want to thank the gentleman from Ohio, as always, taking the leadership in health questions and certainly trying to get medicine to people who need it. In my neighborhood, there are many citizens who make a choice between food and medicine every weekend when they shop at the local supermarket. This will help families like them.

We need to get FDA working more quickly. And I am so happy that the gentleman from the Committee on Energy and Commerce has brought this to our attention and has given us additional drive to get additional generic drugs approved. So I fully support his amendment. It is within the budget resolution and within our allocation, and I would urge the membership to support him.

Mr. BROWN of Ohio. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the gentlewoman from Toledo.

In summary, Mr. Chairman, this amendment increases funding for the Office of Generic Drugs, to speed the approval process for generic drugs, to get them on the market more quickly, because generic drugs save money; all ways 40 to 60 to 80 percent over the price of a name-brand drug, sometimes as much as 90 percent. Consumers deserve access to generic drugs as quickly as possible. It will save money for America’s consumers; it will save money for all levels of government that provide prescription drugs to employees and to citizens of this country; it will save money for employer health care plans.

Mr. Chairman, I ask for support of the Brown amendment on generics.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. BROWN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. BROWN of Ohio. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Ohio (Mr. BROWN) will be postponed.

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Brown of Ohio:

In title VI, in the item relating to “DEPARTMENT OF HEALTH AND HUMAN SERVICES—FOOD AND DRUG ADMINISTRATION—SALARIES AND EXPENSES”, insert before the period at the end of the first paragraph the following:  

: Provided further, That of the total amount appropriated, $5,000,000 is available for the purpose of carrying out the responsibilities of the Food and Drug Administration with respect to antibiotic drugs, in addition to other allocations for such purpose made from such total amount.

Mr. BROWN of Ohio (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. The Chair would seek clarification. The time divided is between the gentleman from Ohio (Mr. BROWN) and the gentleman from Texas (Mr. BONILLA)?

Mr. BONILLA. The Chair is correct.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from Ohio (Mr. BROWN) and the gentleman from Texas (Mr. BONILLA) each will control 10 minutes.

The Chair recognizes the gentleman from Ohio (Mr. BROWN).
Mr. BROWN of Ohio. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, the amendment allocates funds to carry out the FDA’s antimicrobial resistance plan. On January 18, 2001, the FDA, the Centers for Disease Control and Prevention, and the National Institutes of Health unveiled an action plan developed by an interdepartmental task force that provides the United States with a comprehensive approach to combat the emerging threat of antimicrobial resistance. The plan designated 13 near-term priorities to deal with the problem of antibiotic resistance.

The introduction of antibiotics in the 1940s gave the medical community an overwhelming advantage in its fight against infectious diseases, against TB and pneumonia, against cholera and typhoid, against many other long-term killers. But as bacteria have been exposed to antibiotics, resistant strains have emerged as a real threat to the efficacy of antibiotic drugs and to human health. The recent experience of the global medical community with tuberculosis is an excellent example of what can happen when an infectious disease develops antibiotic-resistant strains, and the threat that this poses to public health in the United States and around the world.

Mr. Chairman, multidrug-resistant TB is as a result of antibiotic overuse, incorrect or interrupted treatment, and an inadequate supply of effective drugs. While outpatient treatment for standard TB costs a few thousand dollars, treatment of multidrug-resistant TB, MDRTB, costs as much as $250,000, and it may not be successful.

Mr. Chairman, we do not want to see this scenario of increased costs and increased mortality repeated with other infectious diseases. The first step in addressing the problem of antibiotic resistance is to identify the true scope of the problem. We know that AR infections are seen more often in emergency rooms. We know that antibiotic resistance occurs wherever antibiotics are used, and we know that overuse and misuse of antibiotics exacerbates the problems of antibiotic resistance.

But we need to know which drugs are being affected most, and when, how and why antibiotic drugs are being prescribed. We must educate the American public on the proper use of antibiotics, and we must encourage the development of new antimicrobial therapies.

The amendment I am proposing today does not seek to ban the use of any antibiotics, it would simply appropriate the funds necessary to implement those near-term priorities of the government’s action plan that would take these problems seriously. These priorities were not set by me. They were not set by my colleagues. They were not set by any special interest groups. They were established by doctors and scientists and public health officials from FDA, CDC, NIH and other Federal agencies.

The Committee’s Appropriations has recommended a $1.1 million budget increase for FDA over last year. This $5 million set aside would allow FDA to begin to execute the portions of the antimicrobial resistance action plan within its responsibility and would leave the decision on the sources of the offset to the Agency.

Mr. Chairman, I ask for Members to support the Brown amendment on antibiotic resistance.

Mr. Chairman, I reserve the balance of my time.

Mr. LATHAM. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in opposition to the amendment. The bill that the committee has before us includes a very carefully balanced recommendation for funding for the Food and Drug Administration, including $27 million for antimicrobial resistance activities. This is an increase of over 70 percent from just 2 years ago, which clearly demonstrates our commitment in this area.

The gentleman’s amendment proposes to increase funding for certain purposes, but it makes no proposal on where the money should come from. I would like to say that I am very happy that we were able to provide significant increases for the FDA. It is vitally important that the agency to have the resources to perform its public health mission. We were able to provide them the following increases above last year’s level: $15 million to prevent BSE, or bovine spongiform encephalopathy, which is commonly known as mad cow disease; $10 million to increase the number of domestic and foreign inspections; $10 million to expand import coverage in all product areas; $10 million to reduce adverse events related to medical products; $10 million to better protect volunteers who participate in clinical research studies; $9 million to provide a safer food supply; $1.75 million to improve the timeliness of generic drug application review and to provide generic drug education; and full funding of increased payroll costs for existing employees.

I want to stress how important this is. In the past, FDA and all other agencies in this bill were forced to reduce the level of services provided to the public in order to absorb payroll increases. This year we want to be sure that does not happen. I am sure that all of us want to see that there is no slippage of activities at FDA involving research, application review, inspections, and all of the other payroll-intensive operations that are financed through our bill. We worked hard to find these resources. I am glad we were able to do it, and I am sure FDA will put them to good use.

Now here is my point. In the real world, when we go to conference with the other body, the increase that the gentleman’s amendment proposes would have to come out of other functions. The one thing that does not happen. I am sure that we reduce protection for people participating in clinical trials, or reduce resources for blood safety or BSE prevention.

Mr. Chairman, I ask all Members to support the committee’s recommended increases in FDA. I oppose the gentleman’s amendment, and I ask for its defeat.

Mr. Chairman, I yield back the balance of my time.

Mr. BROWN of Ohio. Mr. Chairman, I yield 3 minutes to the gentleman from New York, Mr. Slaughter.

Ms. SLAUGHTER. Mr. Chairman, I rise in strong support of the Brown-Slaughter amendment. This amendment would set aside $5 million in the FDA’s budget for the purpose of implementing FDA’s portion of the public health action plan to combat antimicrobial resistance. As a former microbiologist with a master’s degree in public health, I am profoundly concerned over the rising number of infections that do not respond to the majority of antibiotics in our medical arsenal.

In my judgment, the resistance of bacterial infections to antibiotics represents a major public health crisis in the Nation today. According to the Centers for Disease Control and Prevention, in some parts of the country more than 40 percent of streptococcus pneumoniae infections are highly resistant to penicillin. Moreover, approximately 70 percent of the bacterial infections acquired in a hospital setting are resistant to at least one antimicrobial drug. As long ago as 1997, at least one strain of staphylococci developed resistance against the last and strongest antibiotic available: vancomycin.

These facts have a real impact on patients. According to the WHO, 1 American dies every 38 minutes because of a drug-resistant infection. When frontline drugs against these infections are not available, patients are sicker for longer periods of time. In the case of patients with suppressed immune systems, or those recovering from surgery or injury, a delay in effective treatment of infection can be fatal. Children are particularly susceptible. In 1999, the CDC reported that four otherwise healthy children had died of drug-resistant staphylococcus aureus infections.

If we fail to slow the rise of resistance to these infections, we could find ourselves returning to a day when common infections like tuberculosis and salmonella could become untreatable, and potentially fatal.
A wide range of factors are contributing to the rise of resistance of antimicrobial agents. They include the overuse of antibiotics, viral infections which do not respond to antibiotics; the misuse of antibiotics, such as the use of a newer, broad-range antibiotic when a less recent version would be equally effective; and the decline in simple sanitation measures, like effective handwashing.

The various agencies responsible for the many aspects of the antimicrobial resistance issue have come together and issued a comprehensive plan of attack against this problem. “A Public Health Action Plan to Combat Antimicrobial Resistance” was developed in partnership with the FDA, the CDC, and the National Institutes of Health, with input and assistance from the Agency for Health Care Policy and Research, the Department of Agriculture, the Department of Defense, Department of Veterans Affairs, the Environmental Protection Agency, the Health Care Financing Administration, and the Health Resources and Services Administration.

This was an exhaustive and overarching effort to show the advance of antimicrobial resistance. As one of the lead agencies in developing this plan, the FDA has a crucial role to play in its implementation. The Brown-Slaughter amendment would set aside $5 million for the FDA to begin to stem the rising tide of antimicrobial resistance. This modest investment has the potential to save untold numbers of lives.

I urge my colleagues in the strongest possible terms to support the Brown-Slaughter amendment. Antimicrobial resistance is a quiet crisis growing in the United States, and we ignore it at our own risk.

Mr. BROWN of Ohio. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. KUCINICH).

Mr. KUCINICH. Mr. Chairman, I thank the gentleman for yielding me this time, and thank him for his leadership on this issue.

Mr. Chairman, how many times have Americans gone to a doctor, been prescribed an antibiotic only to find out it did not work, that it was not effective for the disease? This is routine and costly, taking medication, hoping it is going to be of value to fight infection is something that is repeated many times around the world. Yet we know for some reason antibiotics are not effective because of certain resistance. What the gentleman from Ohio (Mr. BROWN) is doing is trying to get an additional $5 million to fund components of the action plan to combat antimicrobial resistance.

Mr. Chairman, this money will be money well spent because this is not only a health problem in this country, this is a world health problem. I thank the gentleman for his dedication.

Mr. BROWN of Ohio. Mr. Chairman, I yield 2 minutes to the gentlewoman from Ohio (Ms. KAPTUR), who is the ranking member of the subcommittee.

Ms. KAPTUR. Mr. Chairman, I want to compliment the gentleman from Ohio (Mr. BROWN) for taking leadership on this important issue of antimicrobial research.

Mr. Chairman, it has been amazing to me among families and friends, staff members and their families back home, how many individuals go into a hospital and are the victims of an infection. In spite of some of the best knowledge we have with modern medicine, yet we find that there is this antimicrobial resistance that in some ways is as a result of the technologies that we brought on board in the 20th century.

As we now embark on the 21st century, this research to add funding to help to expedite the action plan to combat antimicrobial resistance is essential. We need to ensure that every action has an equal and opposite reaction. I am sure that is the case, that scientists note every day, whether we are talking about HIV/AIDS or whether we are talking about antibiotics. I have been amazed at people who have taken antibiotics and find their systems having to readjust anywhere from 6 months to a year.

Mr. Chairman, I want to compliment the gentleman. The amendment would simply authorize funding for priorities already set by the health agencies of this government. I urge my colleagues for a “yes” vote on this important amendment.

Mr. Chairman, I yield myself such time as I may consume.

Mr. BROWN. Mr. Chairman, my amendment sets aside $250,000, which in the totality of this budget is very, very small, for the FDA to develop labeling requirements indicating that no child slave labor was used in the growing and harvesting of cocoa.

Forty-three percent of the world’s cocoa beans come from small scattered farms in the Ivory Coast. The beans are prized for their quality and abundance. In the first 3 months of 2001, more than 47,300 tons of them were shipped to the United States to be processed by U.S. cocoa processors.

There are more than 600,000 small farms and no corporate or government agency in the Ivory Coast is monitoring them for slave labor. The United Nations estimates that approximately 200,000 slaves are working in various trades in West Africa and the State Department has estimated that about...
15,000 children between the ages of 9 and 12 have been sold into forced labor in northern Ivory Coast in recent years. Let me repeat that. The State Department has estimated that about 15,000 children between the ages of 9 and 12 have been sold into forced labor in northern Ivory Coast in recent years.

On many of the farms, the fields are cleared and the crops are harvested by boys between the ages of 12 and 16 who were sold or tricked into slavery. Some are even as young as 9. These boys come from neighboring countries, including Mali, Burkina Faso, Benin, and Togo and do not speak the most common language used in the Ivory Coast, French. They are children, who, out of respect, will do anything to help their parents. The boys are uneducated, comb like cows and are woody of offers of money, bicycles, and trade jobs. “Locateurs” offer them work as welders or carpenters, and they are told falsely that they will be paid $170 a year. As soon as they accept the offer, they are sold into slavery and are forced to clear the fields and harvest the cocoa crop. They live on corn paste and bananas, work 12 to 14 hours a day for no pay, suffer from whippings, are locked up at night in small, windowless rooms, and are given cans to urinate in.

One of these boys, Aly Diabate, was sold into slavery when he was barely 4 feet tall. He said, “Some of the boys were taller than me. It took two people to put the bag on my head. And when you didn’t hurry, you were beaten. The beatings were a part of my life. Anytime they loaded you with bags and you fell while carrying them, nobody helped you. Instead, they beat you and beat you until you picked it up again.”

Mr. Chairman, this must be stopped. Just like we cannot accept slave labor in factories in Asia, we must not accept products being sold in this country that are made by enslaved child labor. In 1999, former President Clinton issued an executive order prohibiting Federal agencies from purchasing products made by enslaved child labor. In 2000, the Agriculture Department estimated that there are currently some 15,000 children working on cocoa and similar plantations in the Ivory Coast alone. That is the source of about 43 percent of the cocoa that is imported into this country. I think that if people in this country knew that they were buying products that were the result of slave labor, particularly the labor of children as young as 8 or 9 years old, they would not buy it. And I think that this amendment which proposes a simple labeling mechanism to indicate where this cocoa is coming from and the slave conditions under which it is being farmed and harvested is a good amendment and it ought to be adopted.

Mr. ENGEL. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Ms. KAPUR), the ranking member on the agriculture subcommittee.

Ms. KAPUR. Mr. Chairman, I thank my esteemed colleague the gentleman from New York for yielding me this time and rise in opposition to the amendment which is a very straightforward and simple amendment to ask FDA to develop a label indicating that enslaved child labor was not used to harvest the cocoa beans. That is all this does. We want to ensure that when people of this country eat chocolate, they are not eating chocolate that was processed by child slavery.

I urge my colleagues to support this amendment.

Mr. Chairman, I reserve the balance of my time.
And a 1998 report from UNICEF, the United Nations Children's Fund, confirmed that some Ivory Coast farmers use enslaved children, many of them from the poorer neighboring countries of Mali, Burkina Faso, Benin and Togo. A report by the Geneva-based International Labor Organization, released June 15, found that trafficking in children is widespread in West Africa.

SOME OF THE BAGS WERE TALLER THAN ME

Ali Diabate and 18 other boys labored on a 494-acre farm, very large by Ivory Coast standards, in the southwestern part of the country. Their days began when the sun rose, which at this time of year in Ivory Coast is a few minutes after 6 a.m. They finished work about 6:30 in the evening, just before nighttime, trudging home to a dinner of burned bananas. A treat would be yams seasoned with saltwater “gravy.”

After dinner, the boys were ordered into a 24-by-20-foot room, where they slept on wooden planks. The window was covered with hardened mud except for a baseball-size hole to let some air in. “Once we entered the room, nobody was allowed to go out,” said Mamadou Diarra of the Malian consulate in Bouake, the capital city of the region. “In Ivorian law, and adult who orders a minor to hit and hurt somebody is automatically responsible as if he has committed the act.”

Le Gros, 46, said he did not order any beatings. “I only beat one boy who had run away,” he said. “This one, his face showed what was happening. He was sick; he had (excrement) running down his shirt. This one, his face showed what was happening.”

“Once we entered the room, nobody was allowed to go out.”

When the boys were 7 years old, Le Gros said, he bought one of them for 25,000 francs (about $35), the farmer said. “Anytime they loaded you with bags and you couldn’t carry them, nobody helped you. Instead, they beat you and beat you until you picked it up again.”

Le Gros, whose name is Lenkipo Yeo, de- nied that he bought the boys for the work that he had in the fields. “I bought each of you for 25,000 francs” (about $35), said Le Gros. “I bought each of you, and then I bought you for 25,000 francs.”

Le Gros said he ordered the boys to work from 5 a.m. until 4 p.m. in the hot sun. They worked without breaks. He said they were treated “like animals.”

One of Le Gros’ overseers beat him, said the boy. “One of the worst I did,” Le Gros said. “A hand to the face.”

There were a few instances of children escaping from the farm. According to medical records, other boys had healed scars as well as open, infected wounds all over their bodies. Police freed the boys, and a few days later the Malian consulate in Bouake sent them all home to their villages in Mali. The sick boy was treated at a local hospital, and then he was sent home, too.

Ivory Coast is known as one of the world’s largest cocoa producers. The beans that they harvest go to places like Hershey, Pennsylvania; Milwaukee, Wisconsin; and San Francisco. America’s biggest users of these beans are ADM Cocoa in Milwaukee, a subsidiary of Illinois-based Archer Daniels Midland; Barry Callebaut, which has its headquarters in Zurich, Switzerland; Minneapolis-based Cargill; and Nestle USA of Glendale, California, a subsidiary of the Swiss food giant.

It talks about these boys being beaten, and held, being tired, slim with no smiles, and many boys having healed scars as well as open infected wounds all over their bodies. It talks about the reasons that there is no law enforcement in the countries which are the suppliers. And it talks about the amount of money being made by the firms that use this kind of indentured servitude.

I think $250,000 out of a multibillion-dollar budget is almost nothing to ask to have proper labeling of a product. If we can have happy faces on carpets that come from the Indian subcontinent, we can certainly have proper labeling of chocolate products that come into this country from places like Ivory Coast. I really want to thank the gentleman from New York (Mr. Engel), who is a member of the Committee on International Relations, for bringing this issue to us.

It is always difficult for us to get labeling legislation passed by this subcommittee and full committee, but, my goodness, do we not have a moral responsibility to do this? It is within budget, what he is asking to do. It is asking FDA to meet not only its scientific responsibilities to this country but its moral responsibilities.

Mr. Chairman, I rise in strong support of the Engel amendment and commend the gentleman for bringing this again to the House floor so that the American people can understand what is going on.

Mr. ENGEL. Mr. Chairman, I yield myself such time as I may consume.

CONGRESSIONAL RECORD—HOUSE

12271

JUNE 28, 2001

And a 1998 report from UNICEF, the United Nations Children’s Fund, confirmed that some Ivory Coast farmers use enslaved children, many of them from the poorer neighboring countries of Mali, Burkina Faso, Benin and Togo. A report by the Geneva-based International Labor Organization, released June 15, found that trafficking in children is widespread in West Africa.

SOME OF THE BAGS WERE TALLER THAN ME

Ali Diabate and 18 other boys labored on a 494-acre farm, very large by Ivory Coast standards, in the southwestern part of the country. Their days began when the sun rose, which at this time of year in Ivory Coast is a few minutes after 6 a.m. They finished work about 6:30 in the evening, just before nighttime, trudging home to a dinner of burned bananas. A treat would be yams seasoned with saltwater “gravy.”

After dinner, the boys were ordered into a 24-by-20-foot room, where they slept on wooden planks. The window was covered with hardened mud except for a baseball-size hole to let some air in. “Once we entered the room, nobody was allowed to go out,” said Mamadou Diarra, the Malian consul in Bouake, the capital city of the region. “In Ivorian law, and adult who orders a minor to hit and hurt somebody is automatically responsible as if he has committed the act.”

Le Gros, 46, said he did not order any beatings. “I only beat one boy who had run away,” he said. “This one, his face showed what was happening. He was sick; he had (excrement) running down his shirt. This one, his face showed what was happening.”

“One of the worst I did,” Le Gros said. “A hand to the face.”

There were a few instances of children escaping from the farm. According to medical records, other boys had healed scars as well as open, infected wounds all over their bodies. Police freed the boys, and a few days later the Malian consulate in Bouake sent them all home to their villages in Mali. The sick boy was treated at a local hospital, and then he was sent home, too.

Ivory Coast is known as one of the world’s largest cocoa producers. The beans that they harvest go to places like Hershey, Pennsylvania; Milwaukee, Wisconsin; and San Francisco. America’s biggest users of these beans are ADM Cocoa in Milwaukee, a subsidiary of Illinois-based Archer Daniels Midland; Barry Callebaut, which has its headquarters in Zurich, Switzerland; Minneapolis-based Cargill; and Nestle USA of Glendale, California, a subsidiary of the Swiss food giant.

It talks about these boys being beaten, and held, being tired, slim with no smiles, and many boys having healed scars as well as open infected wounds all over their bodies. It talks about the reasons that there is no law enforcement in the countries which are the suppliers. And it talks about the amount of money being made by the firms that use this kind of indentured servitude.

I think $250,000 out of a multibillion-dollar budget is almost nothing to ask to have proper labeling of a product. If we can have happy faces on carpets that come from the Indian subcontinent, we can certainly have proper labeling of chocolate products that come into this country from places like Ivory Coast. I really want to thank the gentleman from New York (Mr. Engel), who is a member of the Committee on International Relations, for bringing this issue to us.

It is always difficult for us to get labeling legislation passed by this subcommittee and full committee, but, my goodness, do we not have a moral responsibility to do this? It is within budget, what he is asking to do. It is asking FDA to meet not only its scientific responsibilities to this country but its moral responsibilities.

Mr. Chairman, I rise in strong support of the Engel amendment and commend the gentleman for bringing this again to the House floor so that the American people can understand what is going on.

Mr. ENGEL. Mr. Chairman, I yield myself such time as I may consume.
I think that the gentlewoman from Ohio made two very, very good points at the end. Throughout her speech she made good points, but I want to raise two that she made at the end. This is only $250,000. It is a very, very small amount, and such a small amount to ensure that the cocoa and the chocolate in this country has not come to be by slave labor of children. I think that is a very, very small price to pay.

There is a moral responsibility as the gentlewoman points out, a moral responsibility for us not to allow slavery, child slavery, in the 21st century. This is a small amount of money, it is in the budget, it will not do any harm whatsoever; and I think that it will certainly bring us to the point that this Congress can look with pride and say that we are making an attempt to stop something that we thought did not exist anymore and only now are we being made aware of the fact that slavery is continuing to rear its ugly head in the year 2001.

I want to just again urge my colleagues to support this. This should have bipartisan support because again we are talking about children and we are talking about slavery. I do not think the American people would want to knowingly eat chocolate or cocoa that was harvested by children who have been tricked into slavery.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore (Mr. BASS). The question is on the amendment offered by the gentleman from New York (Mr. ENGEL).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

Mr. ENGEL. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN pro tempore. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from New York (Mr. ENGEL) will be postponed.

Mr. BONILLA. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. ISAACSON) having assumed the chair, Mr. Bass, pro tempore of the Committee of the Whole House on the State of the Union, reported that the Committee, having had under consideration the bill (H.R. 2330) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes, had come to no resolution thereon.

LIMITING AMENDMENTS DURING FURTHER CONSIDERATION OF H.R. 2330, AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

Mr. BONILLA. Mr. Speaker, I ask unanimous consent that during further consideration of H.R. 2330 in the Committee of the Whole pursuant to House Resolution 183, no further amendment to the bill may be offered except the following amendments, each of which shall be debatable for 10 minutes:

An amendment offered by Mrs. CLAYTON related to rental assistance, which may be offered at any time during consideration; an amendment offered by Mr. TRAFFICANT related to Buy American; an amendment offered by Mr. ALLEN related to the total costs of research and development and approvals of new drugs; an amendment offered by Ms. KAPTUR related to biofuels; an amendment offered by Ms. KAPTUR related to BSE; an amendment offered by Ms. KAPTUR related to 4-H Program Centennial; an amendment offered by Mr. LUCAS of Oklahoma related to watershed and flood operations; an amendment offered by Mrs. MINK of Hawaii related to the Hawaii Agriculture Research Center; an amendment offered by Mrs. MINK of Hawaii related to the Oceanic Institute of Hawaii; an amendment offered by Mr. BLUMENAUER related to price supports; an amendment offered by Mr. ROYCE related to allocations under the market access program; an amendment offered by Mr. SMITH of Michigan related to the Food Security Act; an amendment offered by Mr. SMITH of Michigan related to the Agriculture Market Transition Act; an amendment offered by Mr. SMITH of Michigan related to the nitrogen-fixing ability of plants; an amendment offered by Mr. BACA related to Hispanic-serving institutions; an amendment offered by Ms. PELOSI related to HIV.

Two, the following additional amendments, each of which shall be debatable for 20 minutes:

An amendment offered by Mr. BROWN related to abbreviated applications for the approval of new drugs under section 505(j) of the Food, Drug and Cosmetic Act; an amendment offered by Mr. STUPAK or Mr. BOEHLENT related to elderly nutrition; an amendment offered by Mrs. CLAYTON related to socially disadvantaged farmers.

Three, the following additional amendments, each of which shall be debatable for 30 minutes:

An amendment offered by Mr. HINCHey related to American Rivers Heritage; an amendment offered by Mr. KUCINICH related to transgenic fish; an amendment offered by Mr. GUTKNECHT related to drug importation.

Four, the following additional amendments, each of which shall be debatable for 40 minutes:

An amendment offered by Mr. SANDERS related to drug importation; an amendment offered by Mr. WEINER related to mohair.

Five, the following additional amendment, which shall be debatable for 60 minutes, and which may be brought up at any time during consideration:

An amendment offered by Mr. OLVER or Mr. GILCHREST related to Kyoto.

Each additional amendment may be offered only by the Member designated in this request, or a designee; shall be considered as debatable for the time specified equally divided and controlled by the proponent and an opponent; shall not be subject to amendment; and shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Texas?

Mr. YOUNG of Florida. Mr. Speaker, reserving the right to object, I only do so to advise the House what we are doing.

After the approval of the unanimous consent request, we will go back to the Committee of the Whole and we will have the votes that were rolled to this time. At the conclusion of that time, I believe we are to deal with the amendment of the gentlewoman from North Carolina (Mrs. CLAYTON) briefly. At that point then, the subcommittee chairman will move to rise; and we will have concluded the business for the day. We will return to this bill the day after we return from our July 4 Independence Day recess.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Texas?

Mr. OBEY. Mr. Speaker, reserving the right to object, I would just like to clarify what that means is that after the disposition of the Clayton amendment, we will have the three votes, that will be it for the evening. And then when we return after the July 4 recess, this bill will be the first order of business. We will take it up on Wednesday, and we will debate it to its conclusion?

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentlewoman from Florida.

Mr. YOUNG of Florida. Mr. Speaker, this bill would be considered on the day after we return from the recess.

Mr. OBEY. We mean Wednesday by that; do we not?

Mr. YOUNG of Florida. Yes.

Mr. OBEY. That will be the first bill up, and it will be debated to its conclusion?

Mr. YOUNG of Florida. I would expect that it would be first, and I know one reason why it will not be first.

Mr. OBEY. If I could also clarify the language of the unanimous consent request, the last paragraph reads, "Each
additional amendment may be offered only by the Member designated in this request. By that word "additional," you mean the amendments previously cited, does not the gentleman?

Mr. BONILLA. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Speaker, that is correct.

Mr. OBEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

The SPEAKER pro tempore. Pursuant to House Resolution 183 and rule XVIII, the Chair declares the House in the Committee of the Whole on the State of the Union for the further consideration of the bill, H.R. 2330.

Amendment Offered by Mrs. CLAYTON

Mrs. CLAYTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN pro tempore. The Clerk will designate the amendment.

Mrs. CLAYTON. Mr. Chairman, yes. Mr. Chairman, the amendment I have offered amends title III of the Rural Housing Insurance Act. Mr. Chairman, this is an amendment that allows us to speak to the issue of rural housing, particularly rental housing, that are not available in our area. What this particular amendment does, it allows for monies that were not spent, that were allocated by this Congress during the floods, on the rental housing. It provides the opportunity to redirect some balance of dollars available. It simply gives authority of those monies to use up to $5.9 million of the balance it has. Originally in the year 2000, the Supplemental Appropriation Act provided $32 million to section 515 and $13.6 million for 1,000 units in section 521.

At the end of this year, they spent $20 million. There remains $12 million unspent.

Mr. BONILLA. Mr. Chairman, will the gentlewoman yield?

Mrs. CLAYTON. Mr. Chairman, I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I apologize for the confusion that we had a few minutes ago, and we would be delighted to accept the amendment of the gentlewoman from North Carolina.

Mrs. CLAYTON. Without me explaining it, the gentleman will accept it? I like that.

Mr. Chairman, I shall not go further as I understand that he is willing to accept my amendment, which gives the opportunity for the five States to now have rental assistance to senior citizens and single family members can have an apartment. I am delighted.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentlewoman from North Carolina (Mrs. CLAYTON).

The amendment was agreed to.

The CHAIRMAN pro tempore. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed in the following order: amendment by the gentleman from Ohio (Mr. BROWN); amendment by the gentleman from New York (Mr. ENGEL).

Mr. OBAMA. Mr. Chairman, the amendment I have offered amends title III of the Rural Housing Insurance Act. Mr. Chairman, this is an amendment that allows us to speak to the issue of rental housing, particularly rental housing, that are not available in our area. What this particular amendment does, it allows for monies that were not spent, that were allocated by this Congress during the floods, on rental housing. It provides the opportunity to redirect some balance of dollars available. It simply gives authority of those monies to use up to $5.9 million of the balance it has. Originally in the year 2000, the Supplemental Appropriation Act provided $32 million to section 515 and $13.6 million for 1,000 units in section 521.

At the end of this year, they spent $20 million. There remains $12 million unspent.

Mr. BONILLA. Mr. Chairman, will the gentlewoman yield?

Mrs. CLAYTON. Mr. Chairman, I yield to the gentleman from Texas.

The CHAIRMAN pro tempore. When the Committee of the Whole rose earlier to take up a recorded vote on the amendment by the gentleman from New York (Mr. ENGEL) had been postponed and the bill was open for amendment from page 49 line 9 through page 57 line 15.

Amendment Offered by Mrs. CLAYTON

In title III, in the item relating to "Rural Housing Insurance Fund Program Account" add at the end the following:

Of the amounts made available under this heading in section 515 of title II of Public Law 106-256 (114 Stat. 540) for gross obligations for principal amount of direct loans authorized by title V of the Housing Act of 1949 for section 515 rental housing, the Secretary of Agriculture may use up to $5,986,197 for rental assistance agreements described in the item relating to "Rental Assistance Program" in such chapter.

The Speaker pro tempore. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed in the following order: amendment by the gentleman from Ohio (Mr. BROWN); amendment by the gentleman from New York (Mr. ENGEL).

The CHAIRMAN pro tempore. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed in the following order: amendment by the gentleman from Ohio (Mr. BROWN); amendment by the gentleman from New York (Mr. ENGEL).
CONGRESSIONAL RECORD—HOUSE

June 28, 2001

TANCREDO, HOEKSTRA, BASS, DUNN, GALLEGLY, KIRK, TIBERI, MCCRERY, TAUZIN, GOODLATTE, and TERRY, and Ms. PRYCE of Ohio changed their vote from "no" to "aye." So the amendment was agreed to.

The result of the vote was announced as above recorded.

ANNOUNCEMENT BY THE CHAIRMAN PRO TEMPORE

The CHAIRMAN pro tempore. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Ohio (Mr. Brown) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will designate the amendment. The Clerk designated the amendment.

The CHAIRMAN pro tempore. A recorded vote has been demanded.

The vote was taken by electronic device, and there were—ayes 271, noes 140, not voting 22, as follows:

Jackson:1753

Mr. BARR of Georgia changed his vote from "aye" to "no." Messrs. SENSENBRINER, JOHNSON of Illinois, WAMP, HYDE, QUINN, HEFLEY, JENKINS, McINTYRE, ROGERS (TX), CRAMER, and TAUZIN of Ohio changed their vote from "no" to "aye." So the amendment was agreed to.

The result of the vote was announced as above recorded.

ANNOUNCEMENT BY THE CHAIRMAN PRO TEMPORE

The CHAIRMAN pro tempore. Pursuant to clause 6 of rule XVIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on each amendment on which the Chair has postponed further proceedings.

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BARR of Georgia changed his vote from "no" to "aye." So the amendment was agreed to.

The result of the vote was announced as above recorded.

ANNOUNCEMENT BY THE CHAIRMAN PRO TEMPORE

The CHAIRMAN pro tempore. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Ohio (Mr. Brown) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will designate the amendment. The Clerk designated the amendment.

The CHAIRMAN pro tempore. A recorded vote has been demanded.

The vote was taken by electronic device, and there were—ayes 271, noes 140, not voting 22, as follows:

[Vote List]
So the amendment was agreed to.

The result of the vote was announced as above recorded.

CONGRESSIONAL RECORD—HOUSE

A recorded vote was ordered.

The CHAIRMAN. A recorded vote has been demanded.

The CHAIRMAN. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 291, noes 115, not voting 27, as follows:

[Ayers Roll No. 210]

AYES—291

Baker (OK)    Wicker (FL)
Barton (TX)   Young (AK)
Bell (CA)     Wolf (MO)
Costello (IL)  Young (FL)
Coyne (NY)   Crumley (FL)

The CHAIRMAN. This will be a 5-minute vote.

A recorded vote was ordered.

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. BONILLA. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tem (Mr. LAHOOD) having resumed the chair, Mr. GOODLATTE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2360) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes, had come to no resolution thereon.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Lundregen, one of its clerks, announced that the Senate has passed without amendment a concurrent resolution of the following title:

H: Con. Res. 176. Concurrent resolution providing for a conditional adjournment of the House of Representatives and a conditional recess or adjournment of the Senate.

HEARTFELT THANKS TO ANNE HOLCOMBE, CINDY SEBO, AND VICKY STALLSWORTH

(Mr. EHlers asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EHlers. Mr. Speaker, I hope you will be kind on the time allotted, because I want to take a few moments to recognize a very special person who has worked in this Chamber for some time, who has graced this Chamber and has helped us a great deal, and she will soon be leaving, and that is Ms. Anne Holcombe, who is seated at the front desk.

Mr. DREIER. Mr. Speaker, will the gentleman yield?

Mr. EHlers. I yield to the gentleman from California.

Mr. DREIER. Mr. Speaker, I thank the gentleman from Michigan (Mr. EHlers), my friend, for yielding to me. I join today in recognizing Anne Holcombe. This is her last day as the senior legislative clerk, so I, along with my colleagues, thought it appropriate that we take 1 minute, since
you enjoy them so much, Anne, a special order.
I know that you enjoy sitting here through special orders. If you had a chance of a 1 minute or a special order, I suspect that you might prefer a 1 minute.
Anne is moving to Charlotte, North Carolina to be closer to her family and to start a new chapter in her life. I want to wish her well. Our colleague, the former Mayor of Charlotte, North Carolina, a distinguished member of the Committee on Rules, Sue Myrick, will become your representative here in the House.
Anne’s professionalism on the dais has been a steady source of confidence that the records of the House will always be in order, that is why we are all very sad to see her leave.
I cannot think why Anne would want to leave the House. I know that you greatly enjoy sitting here waiting until 3 o’clock in the morning until the committee that I am privileged to Chair reports a rule down here.
As I said, I think why Anne would want to leave the House. I know that you greatly enjoy sitting here waiting until 3 o’clock in the morning until the committee that I am privileged to Chair reports a rule down here.
I cannot think how much you enjoy special orders that often extend up to, under our great reform process, midnight we know, but you do, obviously, grace the dais extraordinarily well.
You have worked here for many years. Anne started in September of 1996, Mr. Speaker, as a legislative information specialist and was responsible for researching, editing, and maintaining the legislative database that we, in the House, as well as the general public, depend on for information about what is happening here in the Congress.
In October of 1997, Anne was promoted to assistant chief floor clerk, where she made sure that the bills we spoke on the House floor were transposed into marvelous eloquence, of course, while still complying with the rules of the House.
Then in January of 2000, Anne was promoted again to senior legislative floor clerk. She has done a terrific job in serving this institution and her country very well.
Mr. Speaker, if the gentleman will continue to yield, I would also like to note that we also have two official reporters out of whose right here, who is actually finishing her last day, Cindy Sebo, who has worked long and hard, and also Vicky Stallsworth, who is also completing her last day here.
I guess the place is going to be empty when we come back. No one will be here to do any work. I hope very much that these positions are filled.
Let me say to all three that we wish them well in their future endeavors, and I thank my friend for yielding.
Mr. EHLLERS. Mr. Speaker, reclaiming my time, I want to add my congratulations to all three of them and especially my heartfelt thanks. I have always made a point of trying to get to
I am delighted that both of the reporters who are leaving us are here present so we can say thank both Cindy and Vicky as well. I hope you spell your names properly as you transcribe this.
They work tirelessly. They are going on to other things and other lands. I cannot imagine why Vicky, who is moving to Fort Collins, Colorado; and Anne, who is moving to North Carolina, if you are going to leave Washington to find a better place, I can understand that; but I would certainly recommend Grand Rapids, Michigan, especially this time of year. So come up there and stop in and see us.
Cindy will be leaving for the private sector. She will remain in this area, and we hope we see her around here occasionally.
So from the bottom of my heart, thank you to all of you. Congratulations. God bless you in your future endeavors and employment.
Mr. HOYER. Mr. Speaker, will the gentleman yield?
Mr. EHLLERS. I yield to the gentleman from Maryland.
Mr. HOYER. Mr. Speaker, I appreciate the gentleman yielding.
I did not rise to defend the Washington metropolitan area as a place to live, notwithstanding his observations. But I did rise to say thank you on behalf of all of us, not on a partisan sense, although I am on this side of the aisle, and there are others on the other side of the aisle, but to, again, remind ourselves that the people who serve in the operations of the people’s House are those who never rise and speak. They also serve who stand and record, the poet might have said.
To Anne and Cindy and Vicky, we appreciate very much, what you have done. You have at times been asked to spend long, long, long hours. You have fought fatigue; and I am sure, although you do not have to admit this, fought boredom as well in the operations that you have been responsible for.
You make it possible for the American public, even if they cannot see us on C-SPAN, even if they cannot be in the gallery, even if years later they are trying to find out what happened on the floor of the House, their House, doing their business, you make it possible for them to find out. You do so with incredible accuracy and efficiency. We thank you for that, and we acknowledge how critically important you are to the operations of this House.
I am not surprised that one of you is going into the private sector. Maybe both of you are going into the private sector, I am not sure, our two reporters, or Anne returning to North Carolina to be closer to her family, because there are, in my opinion, no more talented, no more highly motivated, no more productive individuals hired by the private sector than those who work on this Hill and certainly, all those who work at the desk and who record our debates.
It is a hallmark of American democracy that we want to be open to the public. We want to make sure that we have an accurate and accurate record of proceedings. You have enabled us to continue to do that.
We thank you. We wish you Godspeed. We hope that you take with you very positive feelings about this House, that you know firsthand that, although there are fights and disagreements, and sometimes we are much smaller than we ought to be, that, at bottom, almost everybody, indeed everybody in this House, cares about their country and cares about their constituents. You have had the opportunity to see that firsthand. As I tell the pages, I hope you will tell that story wide and far.
We thank you, and we wish you the best of everything in the days ahead. Thank you for yielding.
Mr. SKELTON. Mr. Speaker, will the gentleman yield?
Mr. EHLLERS. I am happy to yield to the gentleman from Maryland.
Mr. SKELTON. Mr. Speaker, I, too, would like to add my best wishes to Anne Holcombe as she leaves and also say farewell to Cindy and Vicky for the work that they have done.
Regarding Anne, I was sitting here thinking of the old Irish tune that has the melody of “When Johnny Comes Marching Home.” A phrase in there is “Johnny, we hardly got to know you.” It just seems like you came last week, and time flies so fast, and we hardly got to know you.
You have done so well. You have been very friendly. You have been very particularly kind to me in making sure the podium is at the right height. Your professionalism, your competency is beyond match. So we thank you for your efforts, your hard work. We wish you the very best in your next chapter of life, and do not forget us. God bless.
Mr. EHLLERS. Mr. Speaker, reclaiming my time, I want to thank all three of the speakers, the gentleman from California (Mr. DREIER), the gentleman from Maryland (Mr. HOYER), and the gentleman from Missouri (Mr. SKELTON) for their eloquent comments.
Frankly, they stole my speech, and there is not much I can add to it other than to say, on behalf of all of those who use this Chamber and rely on you as well as the broader American public who sees your work constantly on the news, I commend you to the Congressional Record. I want to thank all of you for your hard service here. I wish you well. God bless you wherever you go.
ELECTION OF MEMBER TO COMMITTEE ON ARMED SERVICES AND COMMITTEE ON SCIENCE

Mr. FOLEY. Mr. Speaker, I offer a resolution (H. Res. 194), and I ask unanimous consent for its immediate consideration.

The SPEAKER pro tempore (Mr. LaHood). The Clerk will report the resolution.

The Clerk read as follows:

H. Res. 194

Resolved, That the following Member be and is hereby elected to the following standing committees of the House of Representatives:

Armed Services: Mr. Forbes.
Science: Mr. Forbes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO HAVE UNTIL MIDNIGHT, FRIDAY, JULY 6, 2001 TO FILE REPORTS ON H.R. 2215, 21ST CENTURY DEPARTMENT OF JUSTICE APPROPRIATIONS AUTHORIZATION ACT, AND H.R. 2137, CRIMINAL LAW TECHNICAL AMENDMENTS ACT OF 2001

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary have until midnight on Friday, July 6 to file the reports to accompany H.R. 2215 and H.R. 2137.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

AUTHORIZING THE SPEAKER, THE MAJORITY LEADER, AND THE MINORITY LEADER TO ACCEPT RESIGNATIONS AND MAKE APPOINTMENTS AUTHORIZED BY LAW OR THE HOUSE WITHOUT STANDING ADJOURNMENT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Tuesday, July 10, 2001, the Speaker, Majority Leader, and Minority Leader be authorized to accept resignations and to make appointments authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, JULY 11, 2001

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday, July 11, 2001.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1613

Mr. SIMMONS. Mr. Speaker, I ask unanimous consent to remove my name from H.R. 1613.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

APPOINTMENT OF THE HONORABLE TOM DAVIS TO ACT AS SPEAKER PRO TEMPORE TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS THROUGH JULY 10, 2001

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

I hereby appoint the Honorable Tom Davis to act as Speaker pro tempore to sign enrolled bills and joint resolutions through July 10, 2001.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

The SPEAKER pro tempore. Without objection, the appointment is agreed to.

There was no objection.

REPORT ON EMERGENCY REGARDING PROLIFERATION OF WEAPONS OF MASS DESTRUCTION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 107–93)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations and ordered to be printed:

To the Congress of the United States:

Enclosed is a report to the Congress on Executive Order 12938, as required by section 204 of the International Emergency Economic Powers Act (50 U.S.C. 1703(c)) and section 401(c) of the National Emergencies Act (50 U.S.C. 1641(c)).

GEORGE W. BUSH,

PRESIDENT'S COMPREHENSIVE NATIONAL ENERGY POLICY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Science, the Committee on Resources, the Committee on Ways and Means, the Committee on Transportation and Infrastructure, and the Committee on Education and the Workforce:

To the Congress of the United States:

One of the first actions I took when I became President in January was to create the National Energy Policy Development Group to examine America's energy needs and to develop a policy to put our Nation's energy future on sound footing.

I am hereby transmitting to the Congress proposals contained in the National Energy Policy report that require legislative action in conjunction with executive actions that my Administration is already undertaking, these legislative initiatives will help address the underlying causes of the energy challenges that Americans face now and in the years to come. Energy has enormous implications for our economy, our environment, and our national security. We cannot let another year go by without addressing these issues together in a comprehensive and balanced package.

These important legislative initiatives, combined with regulatory and administrative actions, comprise a comprehensive and forward-looking plan that utilizes 21st century technology to allow us to promote conservation and diversify our energy supply. These actions will increase the quality of life of Americans by providing reliable energy and protecting the environment.

Our policy will modernize and increase conservation by ensuring that energy is used as efficiently as possible. In addition, the National Energy Policy will modernize and expand our energy infrastructure, creating a new high-tech energy delivery network that increases the reliability of our energy supply. Further, it will diversify our energy supply by encouraging renewable and alternative sources of energy as well as the latest technologies to increase environmentally friendly explo- ration and production of domestic energy resources.

Importantly, our energy policy improves and accelerates environmental protection. By utilizing the latest in pollution control technologies to cut harmful emissions we can integrate our desire for a cleaner environment and a sufficient supply of energy for the future. We will also strengthen America’s energy security. We will do so by reducing our dependence on foreign sources of oil, and by protecting low-income Americans from soaring energy prices and supply shortages through programs like the Low Income Housing Energy Assistance Program.
My Administration stands ready to work with the Congress to enact comprehensive energy legislation this year.

GEORGE W. BUSH.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will now entertain 1 minute requests.

CONSERVATION IS CRITICAL PIECE OF PUZZLE

(Mr. REHBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REHBERG. Mr. Speaker, while we all know we cannot conserve our way out of the energy crunch, conservation is a critical piece of the puzzle if we are going to solve this problem. In times like these, each and every American must do their part. This means turning out the lights when leaving a room, walking more often instead of driving, and investing in new technologies and alternative renewable energy sources.

While some in this Chamber merely talk about conservation, President Bush is actually doing something about it.

Today, President Bush announced $77 million in Federal conservation grants which will help accelerate the development of fuel cells in new technology for tomorrow's cars and buildings. These grants will play a critical role in lowering emissions and improving energy efficiency.

Mr. Speaker, instead of throwing rocks and using America's energy problems for political gain, President Bush is providing leadership and solutions.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

HIGH COST OF PRESCRIPTION DRUGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. GUTKNECHT) is recognized for 5 minutes.

Mr. GUTKNECHT. Mr. Speaker, today I rise to talk about an issue that is of great concern to all Americans, but is of particular concern to the 53 million Americans that have no health insurance and to the 14 million American seniors that do not have prescription drug coverage under their Medicare benefit. What I am talking about is the high cost of prescription drugs.

I want to show a chart for the benefit of the Members that begins to illustrate just how serious this problem is. The first chart shows the Members begins to talk about the differentials or the difference between what we pay in the United States and what they pay in Europe for some of the most commonly prescribed drugs.

We have heard a lot over the last several years about how much difference there is between Canada and the United States and how much difference there is between Mexico and the United States. But many Americans do not realize there are enormous differences between what we pay for exactly the same drugs made in the same plants here in the United States compared to what they pay in Europe.

For example, the first drug on this list is a drug called Allegra, 120 milligrams. It is triple in the United States what they pay in Europe for the same drug. Some people will say, well, they have price controls in Europe. In some countries in Europe, that is true. But in Germany and Switzerland, it is not true.

Take a look at the drug Coumadin, which is a drug that my father takes. In the United States, it is quadruple the $8.22, which they charge for the average price in Europe.

Mr. Speaker, my colleagues need to understand that, once a person is diagnosed, it is likely that they will stay on that drug for the rest of their lives. So we are talking about an enormous difference over the life-span of a patient who needs this drug.

Take a look at a drug Zithromax down here at the bottom. It is a new wonder drug in terms of being an antibiotic. It is a marvelous drug. But I wonder whether Americans should really have to pay three times what consumers in Europe have to pay.

As my colleagues can see, it is $486 for a month's supply here in the United States compared to $176.19. That is seven times more than Americans are required to pay.

Mr. Speaker, my colleagues need to understand that, once a person is diagnosed, it is likely that they will stay on that drug for the rest of their lives. So we are talking about an enormous difference between the United States and Europe.

In the United States, it is quadruple the $8.22, which they charge for the average price in Europe.

Mr. Speaker, I am not asking for the world. The amendment I intend to offer is very narrowly focused. It simply says that the FDA cannot stand between law-abiding citizens who have legal prescriptions and allowing them to bring into the United States drugs which are otherwise approved by the FDA. In fact, we even go further. We say it cannot be a controlled substance. It can be a non-codine. The drugs we are talking about are drugs that are commonly prescribed. I will appreciate my colleagues' support on that amendment.

Mr. Speaker, I submit herewith for the RECORD a few fact sheets regarding the Medicare drug benefit argument.

Some say that the FDA lacks the resources to inspect mail orders. The truth is that the FDA is focusing its inspections in the wrong places. Instead of stopping illegal drugs reported by illegal traffickers, the FDA concentrates on approved drugs being brought in by law-abiding citizens. So far this year the FDA has detained 18 times more packages from Canada than they have from Mexico. This is outrageous. They are spending all of their resources chasing law-abiding citizens.

One of the biggest arguments of the people who oppose my amendment is that they say, well, we are going to ultimately have a Medicare benefit, a prescription drug benefit. There will be no need to import drugs. But for a lot of people right now, that will not be the case. The problem is there is no real competition.

But the biggest concern that a lot of people raise is what will this do in terms of public safety. Let me say this. More people have been killed in the United States from unsafe tires being brought into the United States from other countries than by bringing legal drugs into the United States by law-abiding citizens. As a matter of fact, there is no scientific study that demonstrates that there is a threat of injury to patients importing medications, legal medications, with a prescription, from an industrialized country.

What is more, millions of Americans have no prescription drug coverage. Stopping importation of FDA-approved drugs only threatens their safety. Remember, Members, a drug that an individual cannot afford is neither safe nor effective, and too many Americans are put in the position where they simply cannot afford the drugs that they need.

Mr. Speaker, I am not asking for the world. The amendment I intend to offer is very narrowly focused. It simply says that the FDA cannot stand between law-abiding citizens who have legal prescriptions and allowing them to bring into the country drugs which are otherwise approved by the FDA. In fact, we even go further. We say it cannot be a controlled substance. It cannot be a codine. The drugs we are talking about are drugs that are commonly prescribed. I will appreciate my colleagues' support on that amendment.

Mr. Speaker, submit herewith for the RECORD a few fact sheets regarding the Medicare drug benefit argument.

Some say a Medicare drug benefit will eliminate the need for importation. The truth is that simply shifting high prices to the government only transfers the burden to American taxpayers. Moreover, Medicare...
coverage won't help the millions of Americans without health insurance.

Some say importation is merely an indirect way of enacting price controls. The truth is—Importing prescription drugs to the United States will lower prices here and, in the long run, force Europe to pay more for drug research and development costs. The best way to break down price controls is to open up health care markets.—Stephen W. Schondelmeyer, Pharm.D., Ph.D., Professor and Director, PRIME Institute, Head, Dept. of Pharmaceutical Care & Health Systems, College of Pharmacy, University of Minnesota.

Some say the FDA lacks the resources to inspect mail orders. The truth is—The FDA is focusing its inspection resources in the wrong places. Instead of stopping illegal drugs imported by illicit traffickers, the FDA concentrates on approved drugs imported by law-abiding citizens. So far this year, the FDA detained 18 times more packages coming from Canada than from Mexico. Last year, the FDA detained 90 times more packages than Mexico. Worse, last year Congress appropriated $23 million for border enforcement, but the Secretary of Health and Human Services refused to use the funds.

Some say importation jeopardizes consumer safety. The truth is—No known scientific study demonstrates a threat of injury to personal health from medications or a prescription from industrial countries. What’s more, millions of Americans have no prescription drug coverage. Stopping importation of FDA-approved drug threatens their safety. A drug you can’t afford is neither safe nor effective.

---

CONGRESSIONAL RECORD—HOUSE

June 28, 2001

The SPEAKER pro tempore (Mr. LAHood). Under a previous order of the House, the gentleman from Iowa (Mr. Nussle) is recognized for 5 minutes.

Mr. Speaker, pursuant to Sec. 314 of the Congressional Budget Act and Sec. 221(c) of H. Con. Res. 83, the concurrent resolution on the budget for fiscal year 2002, I hereby submit for printing in the CONGRESSIONAL RECORD revisions to the allocations for the House Committee on Appropriations.

As reported to the House, H.R. 2330, the bill making appropriations for Agriculture and Related Agencies for fiscal year 2002, includes an emergency-designated appropriation providing $150,000,000 in new budget authority and $143,000,000 in new outlays. Under the provisions of both the Budget Act and the budget resolution, I must adjust the 302(a) allocations and budgetary authority and $143,000,000 in new outlays. Under the provisions of both the Budget Act and the budget resolution, I must adjust the 302(a) allocations and budgetary authority and $143,000,000 in new outlays. This changes the 302(a) allocation for fiscal year 2002 to $661,450,000,000 for budget authority and $683,103,000,000 for outlays. The increase in the allocation also requires an increase in the budgetary aggregates to $1,626,638,000,000 for budget authority and $1,590,801,000,000 for outlays.

The rule providing for consideration of H.R. 2330 strikes the emergency designation from the appropriation. Upon adoption of the rule, Sec. 314 of the Congressional Budget Act provides that these adjusted levels are automatically reduced by the amount that had been designated an emergency. Should the rule (H. Res. 183) not be adopted, these adjustments shall apply while the legislation is under consideration and shall take effect upon final enactment of the legislation. Questions may be directed to Dan Kowalski at 67270.

MICROBIDES DEVELOPMENT ACT OF 2001

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mrs. Morella) is recognized for 5 minutes.

Mrs. MORELLA. Mr. Speaker, I rise today to introduce the Microbicides Development Act of 2001. I am pleased that so many of my good friends and colleagues have signed on as original cosponsors of this legislation which I am dropping in this evening. My thanks go to them.

Mr. Speaker, this week the United Nations convened a special session of the U.N. General Assembly to address how to combat the spreading HIV and AIDS epidemic. We have entered the third decade in the battle against HIV and AIDS. June 5, 1981, marked the first reported case of AIDS by the Centers for Disease Control, and since that time 400,000 people have died in the United States, and globally 21.8 million people have died of AIDS.

Tragically, women now represent the fastest growing group of new HIV infections in the United States, and women of color are disproportionately at risk. In the developing world, women now account for more than half of the HIV infections, and there is growing evidence that the position of women in developing societies will be a critical factor in shaping the course of the AIDS pandemic.

So what can women do? Women need and deserve access to a prevention method that is within their personal control. Women are the only group of people at risk who are expected to protect themselves without any tools to do so. We must strengthen women’s immediate ability to protect themselves, including providing new women-controlled technologies; and one such technology does exist, called microbicides.

The Microbicides Development Act, which I am introducing, will encourage Federal investment for this critical research with the establishment of programs at the National Institutes of Health and the Centers for Disease Control and Prevention. Through the work of NIH, nonprofit research institutions, and the private sector, a number of microbicide products are poised for successful development. But this support is no longer enough for actualizing microbicides through the development pipeline and into the hands of millions who could benefit from them. Microbicides can only be brought to market if the Federal Government helps support critical safety and efficacy testing.

Health advocates around the world are convinced that microbicides could have a significant impact on HIV and AIDS and sexually transmitted diseases. Researchers have identified almost 60 microbicides, topical creams and gels that could be used to prevent the spread of HIV and other sexually transmitted diseases such as chlamydia and herpes. But interest in the private sector in microbicide research has been lacking.

According to the Alliance for Microbicide Development, 38 biotech companies, 28 not-for-profit groups, and seven public agencies are investigating microbicides and phase III clinical trials have begun on four of the most promising compounds. The studies will evaluate the compounds' efficacy and acceptability and will include consumer education as part of the compounds' development. However, it will be at least 2 years before any compound trials are completed.

Currently, the bulk of funds for microbicides research comes from NIH, nearly $25 million per year, and the Global Microbicide Project, which was established with a $35 million grant from the Bill and Melinda Gates Foundation. However, more money is needed to bring the microbicides to market. Health advocates have asked NIH to increase the current budget for research to $75 million per year.

Mr. Speaker, today the United States has the highest incidence of STDs in the industrialized world. Annually, it is estimated that 15.4 million Americans acquired a new sexually transmitted disease. STDs cause serious, costly, even deadly conditions for women and their children, including infertility, pregnancy complications, cervical cancer, infant mortality, and higher risk of contracting HIV.

This legislation has the potential to save billions of dollars in health care costs. Direct cost to the U.S. economy of sexually transmitted diseases and HIV infection is approximately $8.4 billion. When the indirect costs, such as lost productivity, are included, that figure will rise to an estimated $20 billion. With sufficient investment, a new microbicide could be available around the world within 5 years, a small fraction of the difference that would make it happen.
Mr. GANSKE. Mr. Speaker, will the gentlewoman yield?

Mrs. MORELLA. I yield to the gentleman from Iowa.

Mr. GANSKE. Mr. Speaker, I just want to commend the gentlewoman from Bethesda, Maryland, for her long-time concern on issues related to women’s health. I think this is a vitally important bill. It is something that this Congress should pass. It will affect millions and millions of women in a positive way. Sexually transmitted disease is a tremendous problem in this country. My hat is off to the gentlewoman, and I am happy to be a cosponsor of her bill.

Mrs. MORELLA. Mr. Speaker, I was just going to thank the gentleman from Iowa (Mr. GANSKE) for being a cosponsor and for his work in making sure that we have appropriate access to health care.

EDUCATION IN AMERICA

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, the gentleman from New York (Mr. OWENS) is recognized for 60 minutes as the designee of the minority leader.

Mr. OWENS. Mr. Speaker, we are about to enter our July recess for the 4th of July holiday, and it must be noted that this Congress has completed two major legislative developments to date. One of those, of course, has been fully completed: the tax bill. That is fully completed, signed into law, and checks will begin to move soon.

Those checks will be going to the people at the very bottom of the rung as a result of legislation which was first proposed by the Progressive Caucus that every American should get some benefit from this tax cut. That did not exactly happen, but every taxpayer is getting a small benefit as a result of the action taken early in the session by the Progressive Caucus. The idea got out there and kept moving until finally it was incorporated in another form in the tax bill. So people at the bottom are going to get some small amount of money from the tax bill. That is real. It is completed.

The other piece of legislation that has not yet been completed is the education bill, the leave-no-child-behind legislation of the President. The new President, of course, made this a high priority; and we have moved in both Houses, with both parties cooperating extensively, to pass the leave-no-child-behind legislation separately in the House and in the Senate. But there has been no conference, and the bill is now on hold.

I think it should be noted that there are rumors that the bill will be held deliberately until we have a chance to negotiate the major question of financing for the education bill. Education is on the legislative back burner right now; but in the hearts of the people who are polled out there, legislation is still a number one concern.

Education has to remain on the front burner. The fact it is being held here is a good development in that the critical question in the legislation that passed the House versus the legislation that passed the Senate is the amounts of money that are appropriated to carry out the features of the bill. The amounts of money are critical.

We do state in the legislation that passed the House that there will be an increase in an authorization for an increase in title I funds of double the amount that exist now in 5 years. In 5 years, in other words, we will have twice as much funding for title I as we have today. It will move from the present amount to about $72.2 billion in authorization year by year. Authorization is there. That does not guarantee that the appropriation, of course, will keep pace.

The Senate bill has even more money earmarked for increases, but they do not have a commitment from the White House that the appropriation is going to follow the authorization. The big question is will the authorizations be honored. We had a great deal of effort to get bipartisan agreements.

I reluctantly voted for the education legislation because of the fact it did two things: one, it got rid of the consideration of vouchers for private schools as a Federal policy. And I think to clear the board and have vouchers off the discussion table was good for Federal legislative policy.

However, the critical question of will we have more resources was also addressed. And the fact that the bill does promise to double title I funds, which are the funds that go most directly to the areas of greatest need, impressed me to the point where I voted for the bill, even though there were some other features, which I will discuss later, which I do not consider to be desirable.

The critical point is, are there more resources? The need to have resources to maintain what I call opportunity-to-learn standards is a critical point that I have been trying to make for all these years. Opportunity to learn is the most important factor if we really want to improve education and have more youngsters who are attending our public schools benefit from the process. What we are trying to do, however, is force a process of accountability, insist that schools measure progress by the tests that are taken by the students and the scores on the tests, and that that is the way we should measure accountability. A school system is held accountable for improved test scores.

On the other hand, the opportunity-to-learn standards are ignored completely. Opportunity to learn means that before the test is given we must guarantee that the student will have an adequate place to learn; classrooms that are not overcrowded, libraries that have up-to-date, laboratories that have science equipment. The opportunity to learn means that we have the right equipment, the right facilities. It means that we have certified teachers in the classroom. It means that all the resources that are needed are there before we start the testing.

But the process that we have pushed here is a process which tries to ignore the opportunity to learn as a major factor.

So we need to hold the education legislation because that vital component is missing. Let us hold it until we can negotiate an increase in the resources, an increase in the amount of money we use to purchase resources, and those resources will provide the opportunity to learn. It may be that it will be end-game negotiations all of the way to the end of the session. Legislation has benefited greatly over the last few years through the end-game negotiation process, right down to the very last hours of the session. When the White House and the Congress came together and they had their priorities on the table, education has fared very well.

Mr. Speaker, I hope that by holding the legislation this time until we get to that end-game negotiation, we will get the kind of funding necessary to make the legislation that we have passed have some real significance. If we do not get some additional funding for the Leave No Child Behind funding, then it is a fraud. It has no substance if it is not going to provide additional resources.

There is a need to refresh ourselves and come back to an understanding of the fact that we have passed these two pieces of legislation in the House of Representatives and the Senate. There is no reason to rest on our laurels. We still have a basic problem of that bill that passed having great gaps in it, and those great gaps are not going to be closed in the end-game negotiation unless the people that we represent, our constituents, understand where we are and why there is a great need for more Federal involvement in the improvement of education.

I want to use as an example a series of articles that have appeared in the Daily News in New York City to talk about the New York City school system, and I want to use New York City as a negative model. It is not the way it should be, but it is the way that it is in most of our large cities. I would not bore my colleagues with a discussion of what is going on in New York City unless I did not think that it was applicable all over the country in other big cities, and it is also applicable in rural areas.
Yesterday we voted on a bill to establish a commission to plan for the anniversary, 50th anniversary, of the Brown v. Board of Education. The commission explicitly relates to the question of segregation in public schools and whether or not it was legal. The Supreme Court struck down the fact of segregation and clearly made it illegal. Our concern with segregation has begun to fade as far as segregation by race is concerned. The phenomenon we face now is a more subtle phenomenon. We have segregation in another way; not by race, but segregation of the people who have no power away from those who do have power. It turns out in many cases that the people who do not have power in the big cities are people who happen to be minorities also.

In the rural areas there are large numbers of schools scattered primarily throughout the country; these are poor people who are in the same position because they have poor schools as a result of having no power. Folks who have money, who have power, always guarantee that their children get the best schooling possible. People with money in larger and larger numbers are sending their children to private schools; and, of course, there are not enough private schools to accommodate 53 million children. Others who have money and are in control of their schools and of the budget-making processes of their counties or cities or their school districts, they make certain that they have good schools. Where they have the power to do that, they have done it for their children.

We have a problem, however, because many of the people who have power, who have control about the decision-making with the budget are not involved to the point where their children or grandchildren are in the schools. The people who have the power, the people who have the most influence do not care about public schools enough to allow through on guaranteeing that you have the best schools possible.

We have a serious situation where we have schools that are stuck in a time bind. One of the greatest problems of our society is that in scattered primary of them are so old. When one looks at the physical age of the structures, one gets a good visible manifestation of the way in which education and schooling gets a good visible manifestation of the physical age of the structures, one of them are so old. When one looks at our schools is that physically so many of them are stuck in a time bind. One way in which education and schooling gets a good visible manifestation of the physical age of the structures, one of them are so old. When one looks at our schools is that physically so many, of big cities, are failing in the same way, at the same rate, for the same reason, and that is why I want to bring to your attention what this Daily News series has pointed out, and how the implications read in the New York City. Reading from their own editorial page, “This week in a Daily News special report entitled Save Our Schools, you have been reading about the meltdown of the New York City educational system. As documented in chilling detail in more than 20 articles, the crisis has reached critical mass.”

Now, Daily News is not a radical newspaper. They very seldom use extreme words like “meltdown.” When they say “meltdown,” you have to consider that they have been shocked, and this is truly a serious situation.

“This laboratory of failure, this culture of catastrophe, puts 1.1 million school children at risk. It must end. That is why the Daily News has launched a campaign, no, a crusade, to rescue what was once a world-class system that created opportunities for millions.” I think it is important to point out that the New York City school system was once considered a world-class system. It gave a lie to the notion that any big system, any bureaucratic system is automatically a wasteful system and a nonproductive system. The New York City school system produced the young people who went on to city colleges and who created a record of achievement and higher education in science and you name it; every scholarly endeavor that you can mention were the products of the New York City system. In the best public-financed colleges. At one point City University had the highest percentage of Ph.D.s of any college in the Nation.

This was a system that was once a world-class system, and I submit it was a world-class system at a time when the people who were in charge of the system also had children who were attending the schools in the system; when the power, the power to make the system work was in the hands of the people whose children were attending the system. We have lost the kind of concerns and the kind of scrutiny and the kind of effective application of resources because of the fact that the people who are in charge and the people whose children are in the schools are the decision-makers.

Continuing with the statement in the Daily News, “How abysmal is the situation? Sixty percent of the students in public elementary and middle schools cannot read at grade level. A third are functionally illiterate, and 70 percent lack proficiency in math. Nearly 50 percent finish high school in 4 years. In the original class of 2000, 19.5 percent dropped out before graduation, a 12 percent leap from the class of 1998.” This percentage who dropped out before graduation represents a 12 percent change from the class of 1999.

A mere 35 percent of the kids take the Scholastic Assessment Test required for college. A mere 35 percent take the SAT, versus 73 percent of the rest of the children in New York State who take that same test. Only a broken system produces such a rock bottom number. It is appalling.

Just 44 percent of teachers hired last year for city schools had credentials, down from 1999. Meanwhile, 16 percent of all teachers are uncertified, the most in a decade.

Ten percent of parents did not bother to pick up their kids’ report card. Fifteen percent do not know what grade their child is in, and the PTA at one school has only two members.

Oh, yes, they say in passing, “The buildings are falling down. Eighty-five percent of schools need major repairs.” I am going to repeat that paragraph because herein lies the story of denial of opportunities to learn.

How can the children of the New York City school system score well on the series of tests that are being proposed? The Leave No Child Behind legislation was pushed by the White House and now passed by both Houses has a testing regimen which starts in the third grade. From the third to the eighth grade, children will be tested. If you test children who are going to school under these conditions, I can tell you now without looking at the tests, most of them will fail.

Here are the conditions that the school, the children in the schools of New York will be facing as they take the tests. I am repeating this paragraph because herein lies the story of denial of opportunity to learn by the children in the schools of New York.

I am going to make it simple by reading from an excellent editorial that appeared in the Daily News which accompanied their series on the New York City school system. I think it was a most important editorial. It appeared in the Daily News on the day that the series got started and it was forthright in dealing with the exposure of rampant waste and corruption and inadequacies. At the same time every day this series sought out uplifting models that could be replicated, and it sought out models which contradicted the general notion that poor neighborhoods cannot have good schools. There were examples all over New York City which prove this not to be true.

But in the end the Daily News pinpoints the fact that the school system is in great trouble. In terms of service to the majority of the children attending the schools of New York City, we are falling at a faster and faster rate, and it is likely that school systems in Los Angeles, Philadelphia, a number of big cities, are failing in the same way, at the same rate, for the same reason, and that is why I want to bring to your attention what this Daily News series has pointed out, and how the implications read in the New York City. Reading from their own editorial page, “This week in a Daily News special report entitled Save Our Schools, you have been reading about the meltdown of the New York City educational system. As documented in chilling detail in more than 20 articles, the crisis has reached critical mass.”

Now, Daily News is not a radical newspaper. They very seldom use extreme words like “meltdown.” When they say “meltdown,” you have to consider that they have been shocked, and this is truly a serious situation.

“This laboratory of failure, this culture of catastrophe, puts 1.1 million school children at risk. It must end. That is why the Daily News has launched a campaign, no, a crusade, to rescue what was once a world-class system that created opportunities for millions.” I think it is important to point out that the New York City school system was once considered a world-class system. It gave a lie to the notion that any big system, any bureaucratic system is automatically a wasteful system and a nonproductive system. The New York City school system produced the young people who went on to city colleges and who created a record of achievement and higher education in science and you name it; every scholarly endeavor that you can mention were the products of the New York City system. In the best public-financed colleges. At one point City University had the highest percentage of Ph.D.s of any college in the Nation.

This was a system that was once a world-class system, and I submit it was a world-class system at a time when the people who were in charge of the system also had children who were attending the schools in the system; when the power, the power to make the system work was in the hands of the people whose children were attending the system. We have lost the kind of concerns and the kind of scrutiny and the kind of effective application of resources because of the fact that the people who are in charge and the people whose children are in the schools are the decision-makers.

Continuing with the statement in the Daily News, “How abysmal is the situation? Sixty percent of the students in public elementary and middle schools cannot read at grade level. A third are functionally illiterate, and 70 percent lack proficiency in math. Nearly 50 percent finish high school in 4 years. In the original class of 2000, 19.5 percent dropped out before graduation, a 12 percent leap from the class of 1998.” This percentage who dropped out before graduation represents a 12 percent change from the class of 1999.

A mere 35 percent of the kids take the Scholastic Assessment Test required for college. A mere 35 percent take the SAT, versus 73 percent of the rest of the children in New York State who take that same test. Only a broken system produces such a rock bottom number. It is appalling.

Just 44 percent of teachers hired last year for city schools had credentials, down from 1999. Meanwhile, 16 percent of all teachers are uncertified, the most in a decade.

Ten percent of parents did not bother to pick up their kids’ report card. Fifteen percent do not know what grade their child is in, and the PTA at one school has only two members.

Oh, yes, they say in passing, “The buildings are falling down. Eighty-five percent of schools need major repairs.” I am going to repeat that paragraph because herein lies the story of denial of opportunities to learn.

How can the children of the New York City school system score well on the series of tests that are being proposed? The Leave No Child Behind legislation was pushed by the White House and now passed by both Houses has a testing regimen which starts in the third grade. From the third to the eighth grade, children will be tested. Here are the conditions that the school, the children in the schools of New York will be facing as they take the tests. I am repeating this paragraph because herein lies the story of denial of opportunity to learn by the children in the schools of New York.
fact that only 44 percent hired were
certified. That is down from 59 percent
the year before. I want to stress that if we
had many more who were certified. We are
rapidly losing all the qualified teachers
needed in schools where the best teach-
ing is needed.

"Meanwhile, 16 percent of all teach-
ers are uncertified, the most in a deca-
das. As for parents, 10 percent didn't
bother to pick up their kids' report
cards. And 85 percent of schools need
major repairs."

What they do not tell you is that of
this 85 percent, quite a number of these
schools are 100 years old and should
have been replaced a long time ago.

There are honeycomb success stories
among the failures. They give exam-
plies of public schools that are doing a great
job.

Continuing to read from the Daily
News editorial statement of June 22:

"Unfortunately, such efforts are but
seeds of real reform. To truly trans-
form education, activist moms and dads
must team up with better trained
teachers and with principals who don't
double as building managers. Schools
must no longer be fettered by the
United Federation of Teachers' crip-
pling work rules and its lifetime pro-
tection program for inept instructors.
Finally, the Board of Education must
be abolished so that accountability—
and mayoral control—can reclaim the
system.

"Those 1.1 million kids deserve a gen-
uine chance to become beacons for the
city's future, a chance they will have
only if New Yorkers unite to save our
schools."

I disagree with the remedies. The
New York Daily News set of articles
clearly related the problem and is to be
applauded for that. It leaps to conclu-
sions that have no basis in fact or expe-
rience as to remedies. To abolish the
board of education is to throw away
any opportunity for this generation of
New York children to get an education.
It would take more than a generation
to rebuild anything that is half as good
as what you have already. The board of
education obviously has serious prob-
lems at present, but most of these
problems are problems which are di-
rectly related to a lack of resources, the
denial of the resources.

We have just gone through a situa-
tion where a clear statement was made
by a judge after months of considering
a case that was brought against the
State of New York in terms of its allo-
cation of resources to the City of New
York. That case sums up the need for
opportunity to learn in a way which is
far simpler than I could state it else-
where. But it is important that we un-
derstand that nothing would be more
beneficial to the well being and progress of the Nation than the pro-
vision of the opportunity to learn that I
am talking about.

Opportunity to learn for all would
mean that we understand that brain-
power is the greatest need of the Na-
tion and the world. Education for all,
including the least among us, is a vital
investment in the future of the Nation.
Economic power, technology power,
the power of cultural influence and
influence are entirely dependent on
our reserve of brainpower. About 2 years ago, we launched the last
super high-tech aircraft carrier that we
launched and the Navy admitted at
that time that it was about 300 crew
member short because they did not
have the necessary trained personnel.
There was a lack of brainpower. There
was a lack of young crewmen who had
the aptitude to be trained to run the
high-tech equipment on the aircraft
carrier.

I am saying again that New York
City schools are examples of what is
happening all over the country. They
are frozen in time in terms of providing
a basic education not even do
as well as they were doing 50 years ago.
But here is the challenge that faces us
in terms of going into the future,
where the challenges are much greater
and the education system needs to be
equipped to do a far better job. Brain-
power is the key to where this Nation
is going. Unless we have a system
that can educate all of the young people
and guarantee that there are pools of
trained personnel to draw from, then
our entire society is in serious trouble.
We do not just have a shortage of sci-
entists, we do not just have a shortage
of trained computer personnel, infor-
mation technology personnel, we have
shortages right across the board.

Half of the graduate students in our
big universities are foreigners. More
than half of the graduate students
studying science at the highest levels
are foreigners. Whether you focus on
chemistry or physics or engineering, or
all of the technical and scientific pur-
suits, more than half are foreigners,
which means you have a problem in
terms of theoretical and scientific
know-how. When you come down to
the next level of technicians, there is a
great shortage. If you look at any area,
whether you are talking about auto
mechanics or sheet metal workers,
even carpenters, there is a tremendous
shortage of people who can do the ordi-
ary jobs in our society because those
jobs have become more and more com-
plex. They need more and more skills.

I visited a sheet metal training facil-
ity in Queens more than a year ago,
and I was surprised at the use of com-
puters. They make extensive use of
computers. They need more and more
skills. As for parents, 10 percent didn’t
do the homework.

We presently have a growing short-
age of teachers and educated super-
visors and administrators. That is the
most critical shortage. This will great-
ly hamper any meaningful education
reform. But similar shortages, as I said
before, are appearing among numerous
other categories of professionals.

Right now there is a great negotia-
tion taking place in New York City in
respect to teachers' salaries. It is seen
as a collective-bargaining problem, and
really it is far beyond a collective-barg-
gaining problem. The salaries of New
York City teachers is a major public
policy issue. The kingpin of the school
system is the leadership, the quality of
the teachers and the principals, the as-
sistant principals and the other per-
sonnel. If we do not get higher salaries
for the people who are running that
education system we should consider
that we are competing with salaries in all
the surrounding suburbs and cities
and towns who draw off the best personnel
from New York City, then the rapidity,
the speed with which we are losing the best teachers and administrators, will greatly handicap it will be very close to impossible to change the system. When you talk about meltdown, nothing will speed the meltdown of the system faster than the failure of the present negotiations to greatly increase the salaries of the teachers and the education personnel in New York City in order to allow it to keep pace with the personnel salaries in the surrounding areas.

We have pinpointed that one of the most important opportunity-to-learn factors, the provision of qualified and trained teachers. That is number one. Without the leadership, without qualified trained teachers, without principals and administrators, the system does not go anywhere. No study and experimentation will be necessary to understand what maximum opportunity to learn means. To provide an adequate and elementary and secondary education, we already know what works. There is no need for a great deal of discussion and controversy. There is a need for more resources. We need the money to pay the teachers decent salaries.

We need to raise the standards, raise the morale, stop thebrain drain and improve in all the other opportunity-to-learn areas, like the physical facilities, the equipment, the books, etc.

Before we begin to search for the most suitable pedagogical approaches, we must first put in place this set of opportunity-to-learn standards. The physical environment of the class, the building, the library, the cafeteria, laboratories and of these must be safe and conducive to learning. The first negative by-product of overcrowded classrooms and hallways is usually an exacerbated discipline problem. Constantly we hear complaints about discipline problems. There is no silver bullet for solutions for discipline problems; but one thing is certain, if you have overcrowded classrooms and overcrowded schools, the hallways, the cafeteria, the auditorium, then certainly you are going to have greater discipline problems. And, of course, you cannot honestly lower the pupil-teacher ratio unless you have more classrooms.

Right now we have a situation in New York City where we cannot honestly make use of the funds that were appropriated by the efforts of the last administration. We did get some movement in terms of funds to lower the pupil-teacher ratio in each class. But got as it was in the right direction, many teachers were employed; but the honest truth is that in New York City, instead of them having a lower pupil-to-teacher ratio in the classroom, they put another teacher in a crowded classroom because there were no classrooms.

If you do not build additional classrooms, then you cannot have a lower pupil-teacher ratio in the classroom. They added a teacher to a crowded classroom which is not what the legislators intended for any place. We have done some creative maneuvers to get the money and use the money; but actually the benefit sought, a classroom where you had fewer pupils per teacher in order to be able to maintain greater order and give more attention to the students at a younger age, that did not happen and it is not happening in many cases.

This is a self-evident requirement, that you have trained teachers and you have trained supporting personnel. We refuse to take our children to untrained, uncertified dentists or pediatricians, so why not pay and seek the best teachers? Why should any child be subjected to the efforts of an untrained teacher? We do not normally expect successful outcomes when unqualified staff are in charge. It is an unfortunate factor in big-city school systems that the substitute teacher who could not pass the test, who is not regularly on the rolls, who is not paid fully and who does not get full benefits, that substitute teacher becomes the teacher that children see the most often in the worst neighborhoods. In other words, in the poorest neighborhoods where other teachers do not want to teach, it is the substitute teacher, the unqualified teacher, that is usually brought in to fill the classrooms.

In one of my sections of my district, District 23, at one point they had more than half of the teachers who were not certified, who were substitutes, teaching in the same area, where the reading scores were very low and they needed the very best teachers.

What I am attempting to explain is summarized with shocking simplicity at the end of the court order just handed down by the New York State Supreme Court Judge DeGrasse in New York State. The New York State civil judge heard the case that was brought which challenged the fact that the State of New York had been short-changing the City of New York in terms of education funds. The court case went on for almost a year, testimony was heard, and the judge finally made a decision.

I will read just a few excerpts from that decision. Quote, and this is Judge Leland DeGrasse, New York State Supreme Court, this court has held that a sound basic education, mandated by the education article, that is the education article of the constitution, consists of the foundational skills that students need to become productive citizens capable of civic engagement and sustaining competitive employment. In order to ensure that public schools offer a sound basic education, the State must take steps to ensure at least the following resources which, as described in the body of this opinion, are, for the first time, available to children in New York City public school students.

Number one, sufficient numbers of qualified teachers, principals and other personnel; two, appropriate class sizes; three, adequate and accessible school buildings with sufficient space to ensure appropriate class size and implementation of a sound curriculum; four, sufficient and up-to-date books, supplies, libraries, educational technology and laboratories; five, suitable curricula including an expanded platform of programs to help at-risk students by giving them more time on task; six, adequate resources for students with extraordinary needs; and seven, a safe, orderly environment.

Now these items were laid out by Judge Leland DeGrasse, in the opinion of the New York State Supreme Court against the State of New York, accusing the State of not supplying these items, there is an exact parallel to the opportunity-to-learn standards, which I have been discussing. These are statements in another way of what opportunity to learn means. You are not provided sufficient teachers, qualified teachers and principals. You do not have appropriate class sizes. You do not have adequate school buildings. You do not have sufficient supply of up-to-date books, libraries, educational technology and laboratories, and as a result, your curriculum is not suitable. You do not have a safe, orderly environment. All of these are stated in the court decision.

I might add that the judge gave the State of New York until the first of June, I think, to come forward with some kind of plan to respond to his decision, that has not happened. I might also add that the Governor of New York appealed the decision of the court, and the Governor in essence stated what the lawyers had been arguing for the Governor all along, and that is that in New York City the children are too poor to learn. The poverty is the reason they cannot learn.

There is a condemnation out of which there can be no solution; that is to say, children cannot learn because they are too poor, and, therefore, we should not put resources in to try to teach children who are too poor to learn dooms the children forever. It is like condemning slaves for being illiterate, nonfunctional when they came out of slavery after having a series of laws in every confederate State which made it a crime to teach a slave to read. It is a crime to teach you to read. At the same time, of course, there was a big contradiction there because slaves were considered inferior, not quite human, and, therefore, why did they have to worry about teaching them to read? Evidently they were human enough, smart enough to learn how to
read, so much so that laws were made. In every Confederate State there was a law that said it is a crime to teach a slave to read.

Now we have a situation where a Governor of one of the most advanced States of the Union, the great Empire State of New York, is arguing that the problem of education in New York City is that the children are too poor to learn, and, therefore, do not expect the State to solve the problem by providing more resources because they are too poor to learn; more resources will not help the situation. It is a State where we spend $25,000 per year for an inmate to be kept in prison. In New York City we spend only $7,000 per year to educate each student. You can see the direction of the reasoning of the Governor. If you cannot educate them, and only do the best to fud up the children, they are going to cost far more later on, but I suppose there are some profits to be made in the prisons that we do not know about.

Anyway, I can think of no more confused or illogical reasoning than that of a Governor of a State to say we cannot solve the problem because the children are too poor to learn.

In the course of reforming the school finance system, a threshold task that must be performed by the State to the extent possible, the actual costs of providing a sound basic education in districts around the State has to be decided, but certainly you are going to have to ensure that every school district has resources necessary to provide opportunity for a sound basic education. Taking into account variations in local costs and all the other things, the State should be in a position to provide what is necessary.

The New York Daily News article does not pinpoint the Governor’s position, the fact that the Governor is now spending State funds to appeal the decision of the court, which called upon the Governor to provide more funding for New York City. The New York Daily News article does not finger that as one of the great reasons why we have the problem.

We have a meltdown in New York City schools. A meltdown is taking place right now, and the meltdown is primarily due to the fact that children are too poor to learn. If that was the case, then New York City would not have produced some of the greatest scholars in our Nation.

The City College, the city universities, would not have turned out so many Ph.Ds. They are spread all over the world. Poor youngsters who came out of the ghettos of New York in the past have learned and performed well. The poverty is not the problem. The problem, that the people in charge of the system have allowed the system to degenerate and not provide the opportunities to learn that should be provided.

One great controversy raging right now is around the opportunity-to-learn standard as reflected in school construction. Now the availability of the provision of adequate facilities is a major part of the problem. It is highly visible, and when you provide for adequate school facilities, you make a statement about the importance that you attach to education. If you refuse to provide for adequate facilities, you are also making a statement, and the continuing refusal to provide adequate schools is a statement that the people who are in power have made over the last 10 years. The Daily News recognizes the problem, but they do not pinpoint the fact that the mayor of the city of New York has been a major problem.

The decision-making process at city hall has been a major problem in the provision of adequate school facilities. We have a problem now where it is another Catch-22. They are saying that the high cost of construction in the year 2001 is so great that we cannot go ahead to begin to remedy the problem of overcrowded schools. We have to wait. We have run into a situation where the money projected to build schools would not go as far as anticipated because the cost has gone up. Some people are proposing that we call a halt and not build any more schools, not repair any more schools because the costs are too great.

Eight years ago there was a major confrontation between the present mayor and the chancellor of schools at that time because he proposed a $7 billion capital funding program. He proposed $7 billion, and the mayor said that was real, and there was such a clash until they drove that chancellor out of town.

A few years later a second chancellor proposed an $11 billion capital expenditure program, and there was a clash with the mayor, who said that was unreal, and the clash became so heated until that chancellor was forced to resign.

Now we are at a point where we are finding that because of all of these delays and all of the roadblocks that have been placed in the way of the decision-makers at the board of education in terms of moving forward with a meaningful capital expenditure program and building the schools at a time when it probably would have cost less, we now have a logjam, and the prices are going up.

The cost of construction has gone up. Well, is the cost of construction really up all over the Nation? Are we in a recession? Are we going toward a recession? Has the economy not slowed down? If they want to solve the problems of overcrowded New York City schools, and keep the costs from rising, can we not appeal for some Davis-Bacon unionized contractors from all over the country to come in? We have no problem if they are willing to abide by Davis-Bacon. They can come into New York City and take the contracts and help us build and not build more.

There are a dozen ways to solve the problem, yet there seems to be a willingness to point the finger at the board of education, at the current chancellor, and to play the kind of game that city hall has played all along; in other words, poor decision-making, incompetent decision-making, decision-making by people whose motives are questionable. After all, this is a mayor who has said that the school system, the board of education, should be blown up. The best way to get better education in New York City is to destroy the board of education. If you want to take that attitude, then it would be a contradiction for you to provide money for the board of education, at the current chancellor, and to play the kind of game that city hall has played all along; in other words, poor decision-making, incompetent decision-making, decision-making by people whose motives are questionable.

The mayor has been consistent. The question is why have the leaders of New York allowed him to be so consistent? Why have the members of the city council not challenged the mayor? This is the point that this point has. Just 3 years ago we had $3 billion in surplus. New York City had a $3 billion surplus. Not a single penny of the surplus funds were used to repair schools or build schools or to do anything else for education, for that matter.

So we have a situation again which has clearly been delineated by the Daily News. If you live in New York City and you are interested in education, for that matter. Thirteen percent of this year’s high school seniors, that is about 4,100 students, failed the math Regents test. More than 13,000 students from the class of 2000 dropped out between the 9th and the 12th grades. That is 15 percent of the class. Between 1996 and 1999, 30 percent of New York City students took Scholastic Aptitude Tests, a standardized exam for admission to most colleges. Seventy-three percent passed statewide and scored 40 to 50 points higher than the New York City students.

Sixty percent of elementary schools and 67 percent of high schools are overcrowded. Sixty percent of elementary schools and 67 percent of high schools are overcrowded. The board of education’s master plan for the year 2003 concedes that 85 percent of the schools need major repairs. Deterioration is occurring at a rate faster than we can
save the systems, the board documents revealed. I think that that physical deterioration is the best visible manifestation of what is happening in general. When you talk about meltdown, look at the physical deterioration. I quote: Deterioration in the actual school buildings is occurring at a rate faster than we can save systems, the board documents reveal. In recent years about half of public school students have completed high school in 4 years; 9 percent have graduated later, by the age of 21, and the rest have been lost completely. Is this an example, a model for where we dare go in terms of education in America? I am using the New York City school system because it is an example of where our big cities are. Now, there was a lot of hype and a lot of public relations, but underneath the improvements have been minimal, and the improvements have been minimal because, again, the opportunity-to-learn standards have not been addressed sufficiently. They have not provided the kinds of quality facilities, trained teachers, adequate supplies and equipment, laboratories for science, library books and libraries. It is so simple, the opportunity-to-learn standards have not been addressed sufficiently.

Yes, we have two new pieces of legislation, one in the Senate, one in the House, which are professing to be the last word on education reform. A lot of people are already applauding the legislation because it is finalized, and before the President signs it. It is not the final word, I hope. If that is the final word, we are in serious trouble.

The final word has to be dictated by the insistence of the American people out there, who have made education the number one priority for the last 5 or 6 years. When you ask the question, what is the most Federal dollars be used for, where is the most Federal assistance needed, education continues to score right up there with other concerns like crime and Medicare and Medicaid. Usually education is ahead of them all.

So the public is way ahead of the leadership. We must run to catch up with the leadership. What is happening right now gives us an opportunity to do that. As long as the bill is being held, as long as we do not go to conference, as long as we do not have a final signature by the President, then there is room for negotiation, as long as we are dealing with the appropriation process and it is understood that the glaring inadequacy of the present education legislation is in the area of resources, there is not enough money being guaranteed.

Oh, yes, the money is authorized. There is a reasonable amount authorized. If you are going to double the title I funding from the present $622 billion in 5 years, that is a great increase. That is an increase worth voting for. But at the same time the authorizing legislation says we can do that, the appropriation and budget process says there is no money.

I started by saying we have had two great legislative developments up to now in this session of Congress. One was the passage of the tax legislation, and the other was the passage of education legislation by both Houses, although the education legislation is not complete.

They do relate to each other. The passage of the tax legislation has put us in a situation where, despite the fact we have authorized more money for education, and the other body, the Senate bill authorizes even more than the House bill, we cannot actually get the money and the resources unless there is a change in the appropriation process.

Somehow between now and the end of this session, more money has to be found in that budget; some new device has to be developed to increase the revenue; some changes have to be made, decreases in expenditures and other areas that are less important. Somehow we have to continue to press forward and make the case that brain power is the number one need for this Nation at this time. Brain power and the pools of people produced to qualify to run a more and more complex society is the major resource we are going. Nothing else is going to move forward unless we have the appropriate brain power. Therefore, brain power should be number one.

If budget cuts have to be made somewhere else, we should make those budget cuts, or if we have to find some new source of revenue dedicated to education, then that has to be the case. We must save our schools, not only in New York City, from a growing meltdown; but we must understand that, the same process, the meltdown process, is occurring elsewhere, and only Federal funds can be utilized to stop it.

HMO REFORM

The SPEAKER pro tempore (Mr. LAHOOD). Under the Speaker’s announced policy of January 3, 2001, the gentleman from Iowa (Mr. GANSEK) is recognized for 60 minutes as the designated chairman and the chairman.

Mr. GANSEK. Mr. Speaker, I especially want to thank you for the time that you are spending in the Chair tonight, as you have many evenings with your spare time. The Members of this House of Representatives who come to the floor to give Special Orders are especially appreciated. But for the last few years, other Members have volunteered their time to sit in the Chair so that we could do our Special Orders.

This is the beginning of our July 4th recess, and I will try to make it somewhat briefer than the hour time that I am allotted for this.

Well, we have had, Mr. Speaker, a great debate going on in the Senate this week on the Patients’ Bill of Rights; and I have been watching this with great interest, because for the past 5 years I have been working on this issue, and I have been coming to the floor frequently, just about every week, in order to give a Special Order talk on the status of legislation to help protect patients from abuses by HMOs. I am looking forward to the day when we pass a strong Patients’ Bill of Rights piece of legislation on this floor to go along with what will be a strong Patients’ Bill of Rights coming out of the Senate, that we marry those two bills together, that we add some important access provisions, such as an expansion of medical savings accounts, tax deductibility for the self-employed, and we move that down to the President’s desk.

I strongly encourage the President to sign that, because there have been some significant compromises over the past few years on this legislation that I believe meet the President’s principles, and yet retains principles that he enunciated during the Presidential campaign, such as allowing for important State laws on patient protection to continue to function, laws like those in Texas, which appear to be working pretty well.

Mr. Speaker, why are we continuing to talk about this? Well, we have had a lot of news here in Washington for several years on this; and it has been a shame, because every day the HMOs make millions and millions of decisions that can significantly affect the well being of the patients they are supposed to be serving.

Remember a few years ago, there was a movie, “As Good as It Gets.” It had Helen Hunt, who had a child with asthma, talking to a friend, Jack Nicholson, in the movie, and her little boy was being denied needed treatment for his asthma, which prompted Ms. Hunt to run a string of expletives together about that HMO. And I saw something I never saw happen before in a movie that I saw or seen since: I saw people stand up and clap in agreement with Ms. Hunt on that.

Then we saw a few years ago a large number of jokes and cartoons about HMOs. You do not see it so much anymore because, you know what? Everybody knows that this is a problem. In order for something to be humorous, there needs to be some element of surprise. But it is not surprising anymore
that people have problems. You talk to your friends, family members, colleagues, and practically everyone can come up with a story about how their HMO has appropriately denied treatment to a patient.

Remember the problem that we had a few years ago when one of the HMOs said, well, you know what? We do not think you need to stay in the hospital if you deliver a baby. Our plan guidelines say outpatient deliveries.

So you had this type of cartoon. The maternity hospital, drive-through window: “Now only 6-minute stays for new moms.” The person at the window saying, “Congratulations, you will like fries with that,” as the mom holds a crying baby, and she looks more than a little frazzled.

Well, it was not so funny when you start to look at the newspapers around the country, like this one from the New York Post which said “What his parents didn’t know about HMOs may have killed this baby.” Or this headline from the New York Post that says “This woman was supposed to be able to read the tea leaves?”

Was she supposed to be able to read the tea leaves? Oh, and this was an issue. This was one of the first issues we talked about on HMOs. Back in 1995 I had a bill called the Patient Right to Know Act, because it became known that HMOs were requiring doctors to phone them in order to get permission to tell the patient about some of their medical treatments that might be possible. So you would have a situation, for instance, where a woman comes in to see a doctor; she has a lump in her breast. Before the doctor tells her three options, he says, “Oh, excuse me,” goes out in the hallway, gets on the phone and says, “HMO, can I tell this lady all about her treatment options?”

So here we have a doctor saying, “Your best option is cremation; $359, fully covered.” And the patient is saying, “This is one of those HMO gag rules, right?”

That HMO gag rule was not so funny to this woman. Her HMO tried to gag the doctors treating her. She needed treatment for breast cancer. She did not get it, and she died. And, do you know what? Under the current Federal law, if you receive your insurance from your employer and the HMO makes a decision like that, under Federal law, current Federal law, they are liable for nothing except the cost of care denied. And if the patient is dead, then they are not responsible for anything. Now this little girl and boy and the woman’s husband, they do not have their mom, because of what that HMO did.

Here is another cartoon. The doctor is taking care of a patient on the operating table. The doctor says “scalpel.” The HMO bean counter says “pocket knife.” The doctor says “suture.” The HMO bean counter says “band-aid.” The doctor says “treatment,” and the bean counter says, “Call a cab.”

Let me tell you about a real case that was sort of a call-a-cab response. Down in Texas, after they passed the patient protection bill down in Texas, there was a fellow named Mr. Palosika. He was suicidal. He was in the hospital. His doctor thought he needed to stay in the hospital because, if he left, he might commit suicide. But the HMO said, no, we do not think he needs to stay in the hospital because we are not going to pay for it. If he wants to stay, fine. The family can pay for it themselves.

Well, when an HMO says that to most families, they do not have the money to pay for it. It is from themselves, so they just took him home.

□ 1945

That night, Mr. Palosika drank half a gallon of antifreeze and committed suicide.

Now, under Federal law, that HMO was supposed to, if they disagreed with the treating doctor’s advice, they were supposed to go to an expedited, independent review panel, but they did not do that, they just ignored the law. And they did this at a time when we are dealing with patient protection legislation that we have a strong enforcement mechanism; not to create new lawsuits, but to prevent those lawsuits by making sure that the HMOs know that they will be responsible at the end of the day so they do not make decisions or so that they do not follow the rules, or, I should say, in order to ensure that they do follow the rules.

Here is another one of those cartoons. This is the HMO claims department. The claims reviewer is saying, “No, we don’t authorize that specialist; no, we don’t cover that operation; no, we don’t pay for that medication,” and then apparently somebody says something to the operator, and she says, “No, we don’t consider this assisted suicide.”

Mr. Speaker, I hope I do not have to talk about this case much longer. I hope we really do pass a strong Patients’ Bill of Rights, Dingell-Dingell bill, on this floor. This is a little boy that I know. He is now about 8 years old, but when he was 6 months old, he had a fever of about 104, and he was sick one night, and his mom phoned the HMO, a 1-800 number, probably thousands of miles away, and said, my baby is sick, we need to go to the emergency room. And the medical reviewer said, well, under our contract, I will only authorize you to take little James to this one emergency room. That is all we have a contract with. Mom and Dad lived way on the outside of Atlanta, Georgia. Mom said, well, where is it? This voice over the phone said, I don’t know, find a map. Made a medical decision, medical judgment, the reviewer did not authorize enough to withstand a very long drive through Atlanta and bypass three hospitals with emergency rooms.

So Mom and Dad wrap him up. It is the middle of the night. They start their trek, they pass those emergency rooms where they could have stopped if they had authorization, but they were not health care professionals, they did not know how sick little James was, but he then suffered a cardiac arrest. Fortunately, they were able to keep him going until they pulled into the emergency room. Mom leaped out of the car screaming, save my baby, save my baby, A nurse ran out. She started an IV, they started mouth-to-mouth resuscitation, they gave him medicines, they saved his life, but they did not save all of this little boy. Because of that cardiac arrest, he ended up with gangrene in both hands and both feet, and, consequently, both hands and both feet had to be amputated.

Under current Federal law, an employer health plan that makes that kind of medical judgment that results in that kind of injury to this patient is
Mr. Speaker, do you know what I say to those people? I say, you know what? If this little anecdote had a finger, and if you pricked it, it would bleed. I say, this anecdote has to pull his leg prostheses with his arm stumps every day. This anecdote needs help putting on those pieces to meet this little anecdote and look him in the eye and tell him that we do not need a Patients’ Bill of Rights.

I will tell my colleagues this: There are not just a few anecdotes around the country. I get phone calls and letters from people all over the country. Just recently in Des Moines, Iowa, a woman came up to me and she said, I tell you what. I am fed up with our HMO. I have breast cancer. I have been battling this for a while. The treatments have made me worn out. But my doctor told me that I needed a test to see if the cancer had come back, and the HMO would not authorize it. Other doctors said the same thing, but I told my colleagues, I want those people who write those opinions to put on my hand. He will never be able to play basketball. Now, he is a pretty well-adjusted kid, considering everything. He is a good kid. But I tell my colleagues, I want those people who write those opinions to meet this little anecdote and look him in the eye and tell him that we do not need a Patients’ Bill of Rights.

Mr. Speaker, there is a real need to pass this. People pay a lot of money and their employers contribute a lot of money for their health care. They work a lot of hours to earn that health care. When they finally get sick, it ought to mean something. They ought to be treated with justice and human compassion and not by green eyeshades looking at the bottom line and coming up with some arbitrary definition of medical necessity.

Mr. Speaker, under this Federal law I am talking about that passed 25 years ago, an employer health plan can define medical necessity as anything they want to. Some health plans have defined medical necessity as the cheapest, quote/unquote. Well, before coming to Congress, I was a reconstructive surgeon. I took care of children with cleft lips and palates. More than 50 percent of the surgeons in this country that do that kind of work in the last several years have had cases denied for kids with cleft lips and palates by the HMO saying, oh, that is not medically necessary. And under Federal law, they can define it any way they want.

That is why they had a big debate on this yesterday in the Senate, and they have managed to preserve language that says, if there is a dispute, an independent panel will make that decision and not be bound by the plan’s arbitrary denials. That is, if there is a denial of care, you get an honest-to-God chance that you will get the treatment you need.

I commend the Senators who voted to preserve that very, very important component to our legislation saying, oh, that financing themselves because it was not written into law. If an employer wants to purchase a plan where the plan says explicitly in the contract language, we do not provide heart-lung transplants, that is fine. It is not what I would recommend, but they can do that, and we do not change that. If a patient came along and needed that, then they would have to come up with that financing themselves because it has been made explicitly clear. But if it has not been made clear that is part of the package, and if the patient does need that and believe that they would get that under that type of agreement, then they should, they should.

We say in our bill, the Ganske-Dingell bill, the Bipartisan Patient Protection Act of 2001, we say that businesses are protected from liability. We have a standard in our bill that says, businesses will not be liable unless they enter into direct participation in the denial of care. And if the patient does need that and believes that they would get that under that type of agreement, then they should, they should.

We say in our bill, the Ganske-Dingell bill, the Bipartisan Patient Protection Act of 2001, we say that businesses are protected from liability. We have a standard in our bill that says, businesses will not be liable unless they enter into direct participation in the denial of care. And if the patient does need that and believes that they would get that under that type of agreement, then they should, they should.

I had a good friend who is a businesswoman from Des Moines, Iowa, phone me today, and he wanted to know whether he would be liable under our bill, and I said, well, we hire BlueCross BlueShield. We take one of their plans or another plan. I said, I am not involved in BlueCross BlueShield’s decisions? He said, oh, no. Oh, no. That is a matter of personal privacy for our employees. We do not want to know what is happening to their personal lives, and, quite frankly, they do not want us to know what is going on, and we do not want them to know what is going on, that maybe we would have an employee at some time that is not performing up to par, and we might have to let that employee go, and we do not want that employee coming in and saying, well, you just let me go because you know, I found out that I have diabetes or that I had to see a psychiatrist.

Under our bill, the Ganske-Dingell bill, employers are protected from liability, unless, unless they directly participate. Furthermore, there has been additional protective language now adopted on the Senate side on this issue, and we think that that is a positive. We just want to make sure, not that there will be a lawsuit at the end of the day, but that there is a dispute on care where the HMO says no, but the patient’s doctors say yes, that there is a mechanism for resolving that dispute before anyone is injured, if necessary, going to an independent panel where the decision would be binding on the health plan, an independent panel where the decision would be binding on the health plan.

In that circumstance, in the Ganske-Dingell bill, you know what? We give total punitive damages relief to the health plan. We say, if this dispute goes to an independent panel, and a health plan follows the decision, then they cannot be held liable at all for punitive damages. That has been one of the major concerns, large punitive damage awards by the business community.

Some people attack our bill by saying, oh, it is going to increase the costs for health insurance premiums. We hear that a lot in the debate that has been going on in the Senate. My answer to that is that is the Congressional Budget Office has looked at our bill, the McCain-Edwards bill is the companion bill that is being debated in the Senate, they have looked at our bill and they say that the total cost would be 4 percent increase in premiums over 5 years, so less than 1 percent per year. The alternative, Frist-Breaux bill, the GOP bill in the Senate, would increase premiums by about 3 percent over the same period of time. That is, if the decision on the liability would result in a total increase in premiums of only .8 percent over 5 years. That is less than two-tenths of a percent. The analysis of that would show in practical terms that the cost of our bill would be about the cost of a Big Mac meal per month per employee.

Mr. Speaker, the surveys around the country show that people think that that would be well worth it to know that they would be treated fairly.

Now, just this week there has been a big roll-out of an opposition bill to the Ganske-Dingell bill. It is called the Fletcher bill, the Fletcher-Thomas bill.
It is called the Fletcher bill, the Fletcher-Thomas bill. As a doctor, I know that you do not do a complete physical examination of the body under the clothing. So there were a lot of good words said by the opponents to our bill about the Fletcher bill, but I have looked at the body of that Fletcher bill.

I will tell my colleagues something, it is not pretty, except to the HMOs. When the Fletcher bill is stripped of its spine, the bones, and the sinews look like the old HMO protection bills that the opponents to real patient protection have tried to confuse the public with for several years.

For example, in the Fletcher bill, there are significant constraints on the independence of the medical reviewer. The standards of review would actually codify negli

The Fletcher bill’s designated decisionmaker language could be gamed by the HMO. They are working on designated decisionmaker language on the Senate side right now. Senator Snowe is working on that, and there is a way to write that language that is fine, it adds language that is protective for employers, but at the same time prevents that language from being used to deny patients the care they need.

Mr. Speaker, my friend, the gentleman from Georgia (Mr. NORWOOD) said. The Fletcher bill, imposed the responsibility of allowing a choice of the doctor on the patient, the employer and the HMO, and then it disqualifies the majority of employees from having the right to begin with. It contains nothing on adding prescription drug reform.

The list goes on and on so far, in fact, that patients would be better off with no bill than with the Fletcher bill, quote, unquote.

Mr. Speaker, my friend, the gentleman from Georgia, goes on in his press release and says the Fletcher bill further proposes that all suits over improperly denied care be removed to Federal court, with the exception of cases in which HMOs violate Federal law by refusing to comply with legally binding decisions of medical review panels.

If the injury or death of a patient occurred prior to the ruling or through the delay imposed by the ruling, the patient loses their legal rights under the Fletcher bill, even their current limited right to sue under State law gained through the recent fifth court decision, upholding a portion of the liability provisions in the Texas patient protection act.

The gentleman from Georgia continues in his press release, the new bill would according preemp

Let me give you five quick comparisons between the Ganske-Dingell bill and the Fletcher bill. Number one, the Ganske bill is a state rights bill. It continues in his press release, the new bill will preempt patient protection laws in Texas, Georgia, Arizona, California, Louisiana, Maine, Missouri, New Mexico, Oklahoma, Oregon, Washington, and West Virginia. Let me repeat that. My friend, the gentle

Here is what the gentleman from Georgia (Mr. NORWOOD) goes on and says any Member who supports this package, i.e., the Fletcher bill, does so for the exclusive benefit of the HMO lobby, quote, unquote.

Number two, the Ganske-Dingell bill ensures a fair review process. The Fletcher bill allows health plans to choose the reviewer at external review. Number three, the Fletcher bill forces the patient to get approval from an external reviewer before they can seek damages for injury in court. The Ganske-Dingell bill says that a reviewer’s decision must be considered as evidence, but does not create an absolute bar from damages.

Number four, the Fletcher bill will preempt 12 State laws that have been passed that allows HMOs to be held liable in State courts. The Ganske-Dingell bill protects those State laws, and

Number five, the Ganske-Dingell bill is working on that, and there is a way to write that language that is fine, it adds language that is protective for employers, but at the same time

Here is what is in the Ganske-Dingell-Norwood bill. Fletcher claims the plans face unlimited punitive damages in State court and $5 million punitive damages in Federal court, regardless of compliance with review process under the Ganske-Dingell bill. This bill, speaking about the Fletcher bill, imposes the responsibility of allowing a choice of the doctor on the patient, the employer and the HMO, and then it disqualifies the majority of employees from having the right to begin with. It contains nothing on adding prescription drug reform.

The list goes on and on so far, in fact, that patients would be better off with no bill than with the Fletcher bill, quote, unquote.

Mr. Speaker, my friend, the gentleman from Georgia (Mr. NORWOOD) said. The Fletcher bill, imposed the responsibility of allowing a choice of the doctor on the patient, the employer and the HMO, and then it disqualifies the majority of employees from having the right to begin with. It contains nothing on adding prescription drug reform.

The list goes on and on so far, in fact, that patients would be better off with no bill than with the Fletcher bill, quote, unquote.
that is exactly one of the principles that President Bush said was essential on HMO reform during the campaign.

Number two, the Ganske-Dingell bill allows cases regarding medical decisions to be heard in State courts. The Fletcher bill allows patients to go to State court when a plan does not follow external review and erroneously causes a medical decision. We call that breaking the law.

Further, the Fletcher bill allows the patient to forum shop, the Fletcher bill allows the patient to forum shop between Federal and State court, not the Ganske-Dingell bill.

These are some of the important differences that we are talking about between the Ganske-Dingell bill and the Fletcher bill.

That is why over 500 health groups, consumer groups, professional groups have endorsed the Ganske-Dingell bill and very few have said much about the Fletcher bill, other than in some cases, in some parts of the language, maybe it is okay. But if you look at the real patient protection bill is the Ganske-Dingell bill.

Mr. Speaker, I believe, we will see this in large part passed with the McCain-Edwards-Kennedy bill, which is the companion bill to our bill. I think in large part, it will pass in the Senate. I think with a pretty big vote.

Mr. Speaker, I applaud the hard work of the Senators who have worked on that and have shown a real concern for patient protections. I believe that will give us a big boost as we move into debate here on the House floor.

I am appreciative of the work that Senators like MIKE DEWINE and OLYMPIA SNOWE, LINCOLN CHAFEE, and others, who have put into this bipartisan bill, and the debate has moved forward. Those changes, as far as I have seen so far, look very acceptable to the gentleman from Georgia (Mr. NORWOOD) and myself and the gentleman from Michigan (Mr. DINGELL).

In the Senate, it would have been nice if they had added the expansion of medical savings accounts and the 100 percent deductibility for the self-insured. That is in our House bill, but under the rules in the Constitution, those types of provisions have to originate in the House so they did not debate those or pass those; but I believe they have wide bipartisan support.

Mr. Speaker, I think it showed that the Democrats were willing to move to a compromise on this bill. It is no secret, a lot of Democratic Members are not real keen on medical savings accounts, but under the Ganske-Dingell bill we expand those medical savings accounts. That is part of the compromised process. That is how you get things done in Washington.

I will tell you what, a purely partisan vote in this House will not pass. The Fletcher bill is a partisan bill. There is one Democrat that supports it, maybe two, but what we have is a real core of Republicans who have been stalwarts for patient protection, who have withstood the blows of the $150 million campaign by the HMOs in this country trying to beat them down.

They have shown independence and courage, and I salute them. I look forward to this debate when it comes to the House floor after the July 4th recess.

I know that the gentleman from Georgia (Mr. NORWOOD) is going to go off his diet and will eat a little bit of red meat steak before we hit the floor. I am looking forward to working with the gentleman from Michigan (Mr. DINGELL) as we work on this bill here on the floor.

I am convinced that, if the Members will truly look at the bills, look at the bones and the sinews and the muscles, not just the clothing and the nice words, they will see that there is a significant difference. They should listen to the National Consumer League, Medical Association, and they should look at all the other groups that have looked at these bills and have said in very strong words the real patient protection bill, the bill that will help prevent situations like happened to this poor little boy is the Ganske-Dingell bill.

I ask my colleagues over the July 4th recess to examine their consciences, to talk to some of the patients and the health care advocates and the health care professionals that have to deal with HMOs that make those types of arbitrary decisions that result in problems for patients.

Talk to them over the July 4th recess. Listen to them. They represent an awful lot of people in my colleagues' districts. I believe that if my colleagues do, they will come to the conclusion that it is time to get this off the congressional calendar. It is time to join the Senate, to pass a bipartisan and a bicameral bill.

Do not let it get hung up in committee, in a conference committee. Send it to the President's desk. I would love nothing better than for the President to look at the changes that we have done in the Senate debate and come to the conclusion that this bill, as I truly think it does, meets his principles and that he will sign it. That would be a very bright day for millions and millions of Americans.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. McNULTY) to revise and extend their remarks and include extraneous material:)

Mr. DEFAZIO, for 5 minutes, today.

Ms. NORTON, for 5 minutes, today.

Mr. FALLONE, for 5 minutes, today.

Mr. GUTKNECHT, for 5 minutes, today.

Mr. NUSSELE, for 5 minutes, today.

Mrs. MORELLA, for 5 minutes, today.

ADJOURNMENT TO TUESDAY, JULY 10, 2001

Mr. Ganske, Mr. Speaker, pursuant to House Concurrent Resolution 176, I move that the House do now adjourn.

The SPEAKER pro tempore. Pursuant to House Concurrent Resolution 176 of the 107th Congress, the House stands adjourned until 2 p.m. on Tuesday, July 10, 2001.

Thereupon (at 8 o'clock and 19 minutes p.m.), pursuant to House Concurrent Resolution 176, the House adjourned until Tuesday, July 10, 2001, at 2 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

2719. A communication from the President of the United States, transmitting requests for Fiscal Year 2002 budget amendments for the Department of Defense; (H. Doc. No. 107–92); to the Committee on Appropriations and ordered to be printed.

2721. A letter from the Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, transmitting the Office's final rule—Fiduciary Activities of National Banks; Bank Activities and Operations; Leasing (Docket No. 01–13) (RIN: 1557–AB94) received June 27, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2722. A letter from the Deputy Assistant Secretary for Policy, Planning and Innovation, Department of Education, transmitting Final Regulations—Federal Work Study Programs, Federal Supplemental Educational Opportunity Grant Program, and Special Leveraging Educational Assistance Partnership Program, pursuant to 20 U.S.C. 1232(f); to the Committee on Education and the Workforce.

2724. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule—Approval of section 112(d) Authority for Hazardous Air Pollutants; Chemical Accident Prevention Provisions; Risk
CONGRESSIONAL RECORD—HOUSE

June 28, 2001

12290

Mr. SENSENBRENNER: Committee on the Judiciary. H.R. 1407. A bill to amend title 49, United States Code, to provide for appeals for veterans by third parties in certain patent reexamination proceedings (Rept. 107–121). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. CALVERT (for himself, Mr. HERGER, Mrs. BONO, Mr. FOLEY, Mr. RADANOVICH, Mr. FAAR of California, Mr. THOMPSON of California, Mr. REINSCHMEITER of Texas, Mr. SHAYS (for himself and Mr. MEEHAN):

H.R. 2356. A bill to amend the Federal Election Campaign Act of 1971 to provide bipartisanship campaign reform; to the Committee on House Administration, and in addition to the Committees on Energy and Commerce, and the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as may fall within the jurisdiction of the committee concerned.

By Mr. JONES of North Carolina (for himself and Mr. HOSTETTLER):

H.R. 2357. A bill to amend the Internal Revenue Code of 1986 to allow for charitable contributions by Churches, Temples, and other houses of worship to engage in political campaigns; to the Committee on Ways and Means.

By Mr. BARTLETT of Maryland (for himself, Mr. UDALL of Colorado, Mr. BOHLERT, Ms. JACKSON-LEE of Texas, Mr. SMITH of Texas, Mr. SMITH of Michigan, Mrs. MOCHELIA, Mr. EHNLEIS, Mr. DELAHUNT, and Mr. WAMP):

H.R. 2358. A bill to authorize appropriations for environmental research and development, scientific and energy research, development, and demonstration, and commercial application of energy technology bioenergy programs, projects, and activities of the Department of Energy, and for other purposes; to the Committee on Science.

By Mr. Petri:
H.R. 2454. A bill for the relief of Mohamed Abshir Musse; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 7: Mr. Wolf.
H.R. 12: Mr. Kears.
H.R. 46: Ms. Baldwin and Mrs. Lowey.
H.R. 61: Mr. Brown of Ohio and Mr. Bonior.
H.R. 68: Ms. Hooley of Oregon, Mr. Traficant, Mr. Duncan, Mr. Caruso of Oklahoma, Mr. Largent, Mr. Ortiz, Mr. Peterson of California, Mr. Ryan of Kansas, Mr. Bryant, Mr. Cantor, Mr. DeFazio, Mr. Phillips, Mr. Mascara, and Ms. Ros-Lehtinen.
H.R. 97: Mr. Oberstar.
H.R. 122: Mr. Toomey, Mr. Wamp, Mr. Keller, Mr. Graham, Mr. Shimkus, Mr. Boucher, and Mr. Hoibon.
H.R. 123: Mr. LaHood, Mr. Souder, and Mr. Watkins.
H.R. 218: Mr. LaHood.
H.R. 228: Mr. Pascarell.
H.R. 236: Mr. Frelinghuysen.
H.R. 267: Ms. Kilpatrick, Mr. Hall of Texas, and Mr. Weldon of Florida.
H.R. 274: Mrs. Jones of Ohio.
H.R. 269: Mr. Myrick.
H.R. 393: Mrs. Jones of Ohio.
H.R. 439: Mr. Quinn.
H.R. 448: Mr. Lucas of Kentucky.
H.R. 510: Mr. Rangel, Mr. Pascarell, and Mr. Kears.
H.R. 526: Mr. Phillips.
H.R. 572: Mr. Gilman.
H.R. 609: Mrs. Northup, Mr. Tom Davis of Virginia, Mr. Matson, and Mr. Holt.
H.R. 612: Ms. Berkly, Mr. Meeks of New York, and Mr. Langevin.
H.R. 619: Mr. Bionor.
H.R. 684: Mr. Lee and Mr. Horn.
H.R. 688: Mr. Luehr.
H.R. 687: Ms. Waters.
H.R. 709: Mr. Bionor, Mr. Davis of Illinois, and Mr. Lantos.
H.R. 717: Mr. Brown of South Carolina and Ms. Baldwin.
CONGRESSIONAL RECORD—HOUSE

H.R. 2148: Mr. Filner, Mr. LaFalce, and Ms. McNulty, Mr. Roybal-Allard, Mrs. Napolitano, Ms. Lofgren, Mr. Farr, Mr. Pitts, Mr. Doggett, Mr. Moran of Virginia, Ms. Eddie Bernice Johnson of Texas, Mr. Matsui, Ms. Solis, and Mr. Hilliard.

H.R. 2149: Ms. Granger, Mr. Bachus, Mr. Forbes, Mr. Ehlers, and Mr. Grucci.

H.R. 2155: Mr. McNulty, Mr. McHugh, and Ms. Pelosi.

H.R. 2157: Mr. DeFazio, Mr. Blagojevich, Mr. Frost, Mr. Gibson, Mr. Baker, Mr. LaHood, Mr. Schaffner, Mr. Young of Alaska, Mr. Bryant, Mr. Cooksey, Mrs. Crenin, Mr. Osk, Mr. Walden of Oregon, and Mr. DeMint.

H.R. 2160: Mr. Horska and Mr. DeMint.

H.R. 2161: Mr. Shimkus, Mr. Wynn, Mr. Bonior, Mr. McGovern, Mr. Frost, Mr. Traficant, Ms. Lofgren, Ms. Eddie Bernice Johnson of Texas, Ms. Woolsey, and Mr. Lantos.

H.R. 2166: Ms. Velázquez, Mr. Jackson of Illinois, Mr. Barrett, and Ms. Waters.

H.R. 2167: Ms. DeLauro.

H.R. 2172: Mr. Stark.

H.R. 2173: Mr. Goode.

H.R. 2181: Mr. McDermott and Mr. Stupak.

H.R. 2182: Mr. Mascara and Ms. Hart.

H.R. 2185: Mr. Dicks.

H.R. 2189: Mr. Goode.

H.R. 2200: Mr. Sensenbrenner.

H.R. 2203: Ms. Tauscher, Mr. McGovern, Ms. DeLauro, Ms. Farkas, Ms. Falcón, Mr. Clement, and Mr. Frost.

H.R. 2211: Ms. McCaity of Missouri and Mr. Waxman.

H.R. 2212: Mr. Sessions, Mr. Kerns, and Mr. Hobson.

H.R. 2222: Mr. McGovern, Mr. McKinney, Mr. Frost, Mr. Rangel, and Mrs. Jones of Ohio.

H.R. 2235: Mr. Lampson.

H.R. 2240: Mr. Shaw.

H.R. 2242: Mr. Sensenbrenner.

H.R. 2246: Mr. Lucas of Kentucky.

H.R. 2258: Mr. Reyes.

H.R. 2281: Mr. Jackson of Illinois.

H.R. 2291: Mr. LaFalce, Mr. Kucinich, Mr. Payne, Mr. Rahall, Mr. Birman, and Mr. Gilman.

H.R. 2294: Mr. Brown of Ohio, Mr. McNulty, Ms. Rivera, and Mr. Baldacci.

H.R. 2308: Ms. LaFalce.

H.R. 2310: Mr. Moran of Virginia, Mr. Brady of Pennsylvania, Ms. Meek of Florida, Mr. do a, Ms. Davis of California, Mrs. Thurman, Mr. Rahall, Mr. Etheridge, Mr. Kennedy of Rhode Island, Mr. Clyburn, Mr. Rangel, Mr. Mollohan, Mr. Fattah, Mr. McNulty, Mr. Mascara, Mr. Filner, Mr. Andrews, Mr. Oliver, and Ms. McCollum.

H.R. 2315: Mr. Kolbe, Mr. Lentz, Mr. Taylor of North Carolina, Mr. Upton, Mr. Cox, and Mr. Wittfeld.

H.R. 2316: Mr. Crane, Mr. Ramstad, Mr. Hayworth, Mr. Hergen, Mr. Brady of Texas, Mr. Shay, Mr. Condit, Mr. Armey, Mrs. Johnson of Connecticut, Mr. Kerens, and Mr. Thornberry.

H.R. 2322: Mr. Ehlers.

H.R. 2329: Mr. Flatt, Mr. Shaw, Mr. Kind, and Mr. Smith of New Jersey.

H.R. 2335: Ms. Kilpatrick.

H.R. 2339: Mr. Rahall, Mr. Wamp, and Mr. Brady of Pennsylvania.

H.R. 2340: Mr. Runyan.

H.R. 2341: Mr. Riley.

H.J. Res. 20: Mr. English and Mr. Pence.

H.J. Con. Res. 17: Mrs. Tauscher and Mr. DeFazio.

H. Con. Res. 33: Mr. Weldon of Florida.

H. Con. Res. 77: Mr. Evans, Mr. Underwood, Mr. Abercrombie, Ms. McKinney, Mr. Crowley, Mr. W. C., Mr. Ackerman, Mr. Sheehan, Mr. Honda, Mr. Falcón, Mr. Kirk, Mr. Filner, Ms. Pelosi, Ms. Roybal-Allard, Mrs. Napolitano, Ms. Lofgren, Mr. Pitts, Mr. Doggett, Mr. Moran of Virginia, Ms. Eddie Bernice Johnson of Texas, Mr. Matsui, Ms. Solis, and Mr. Hilliard.

H. Con. Res. 89: Mr. Nethercutt and Mr. Hagedorn.

H. Con. Res. 97: Mr. English and Mr. Levin.

H. Con. Res. 144: Mr. Dingell, Mr. Stupak, Mr. Coyne, Mr. Davis of Illinois, Mr. Puckett, Mr. Rogers of Michigan, and Mr. McHugh.

H. Con. Res. 169: Mr. Dicks, Mrs. Christensen, Ms. Watson, Mr. Gephardt, Mr. Levin, Mr. Jefferson, Mr. Waxman, and Mr. Rush.

H. Con. Res. 173: Mr. Tierney, Mr. Larson of Connecticut, Ms. McKinney, Mr. Waxman, Mr. Capuano, and Mrs. Lowey.

H. Con. Res. 177: Mr. Farr of California, Mr. Sanders, Mr. Acevedo-Vilá, Mr. Tierney, Ms. Woolsey, Mr. Frost, Mr. Evans, Ms. Melon, and Ms. Eddie Bernice Johnson of Texas.

H. Res. 65: Mr. Kildee.

H. Res. 72: Mr. Blagojevich, Mr. Maloney of Connecticut, Mr. Pocan, Mr. Filner, Mr. Fossella, Mr. Boggs, and Mr. Garamendi.

H. Res. 152: Ms. Kilpatrick and Mr. Goode.

H. Res. 181: Mr. Lantos, Ms. Ros-Lehtinen, Mr. Kennedy of Rhode Island, and Mr. Payne.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1280: Mr. Simmons.

H.R. 2180: Mr. Ferguson.

DISCHARGE PETITIONS

Under clause 2 of rule XV, the following discharge petitions were filed:

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 2330

OFFERED BY: MR. BROWN OF OHIO

AMENDMENT No. 26: In title VI, in the item relating to "DEPARTMENT OF HEALTH AND HUMAN SERVICES—Food and Drug Administration—SALARIES and EXPENSES", insert before the period at the end of the first paragraph the following:

Provided further, That of the total amount appropriated, $5,000,000 is available for the purpose of carrying out the responsibilities of the Food and Drug Administration with respect to antibiotic drugs, in addition to other allocations for such purpose made from such total amount.

H.R. 2330

OFFERED BY: MR. BROWN OF OHIO

AMENDMENT No. 27: In title VI, in the item relating to "DEPARTMENT OF HEALTH AND HUMAN SERVICES—Food and Drug Administration—SALARIES and EXPENSES", insert before the period at the end of the first paragraph the following:

Provided further, That of the total amount appropriated, $5,000,000 is available for the purpose of carrying out the responsibilities of the Food and Drug Administration with respect to antibiotic drugs, in addition to other allocations for such purpose made from such total amount.

H.R. 2330

OFFERED BY: MR. BROWN OF OHIO

JUNE 28, 2001
In addition, for the Food Safety and Inspection Service to improve food safety and reduce the incidence of foodborne illnesses, $50,000,000: Provided, That such amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985: Provided further, That such amount shall be available only to the extent that an official budget request, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, is transmitted by the President to the Congress.

In title VI, in the item relating to “Food and Drug Administration—Salaries and Expenses”, insert at the end the following:

In addition, for the Food and Drug Administration to improve food safety and reduce the incidence of foodborne illnesses, $163,000,000: Provided, That such amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985: Provided further, That such amount shall be available only to the extent that an official budget request, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, is transmitted by the President to the Congress.

None of the funds appropriated or otherwise made available in this Act may be used to pay the salaries of personnel of the Department of Agriculture who permit the payment limitation specified in section 1001(2) of the Food Security Act of 1985 (7 U.S.C. 1308(2)) to be exceeded pursuant to any provision of law, except, in the case of a husband and wife, the total amount of the payments specified in section 1001(3) of that Act that they may receive during the 2001 crop year may not exceed $150,000.
The Senate met at 9:15 a.m. and was called to order by the Honorable HERB KOHL, a Senator from the State of Wisconsin.

PRAYER
The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Thank You, dear Father, for infusing Your nature in the Senators You have called to lead our beloved Nation. You have reproduced in them Your concern and caring for the health and healing of all of our people. Thank You for Your compassion expressed in the legislation for patient protection in America.

The Senators may differ on aspects of the implementation of this concern but are one in seeking unity on what is best for citizens across our land. Be with the Senators today as all aspects of this crucial legislation are focused and voted upon. Thank You for the managers on both sides of the aisle who have worked so long and tirelessly to review all possibilities for the best potential for all Americans.

Now as the Senators seek to complete debate and take conclusive votes, may they sense the unity of a common concern for a crucial cause of caring for our people. Place Your hand upon their shoulders and remind them that You are the magnetic center who draws them to unity for the welfare of our Nation. You are the healing power of the world who uses the medical professions to heal. Help the Senators to complete legislation that will assure the best care for the most people.

You, dear God, are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE
The Honorable HARRY REID, a Senator from the State of Nevada, led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE
The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,

To the Senate:
Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable HERB KOHL, a Senator from the State of Wisconsin, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. KOHL thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME
The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

BIPARTISAN PATIENT PROTECTION ACT
The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 1052, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 1052) to amend the Public Health and Welfare Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage.

Pending:
Thompson amendment No. 819, to require the exhaustion of administrative remedies before a claimant goes to court.
Collins amendment No. 826, to modify provisions relating to preemption and State flexibility.
Breaux amendment No. 830, to modify provisions relating to the standard with respect to the continued applicability of State law.

recogni{tion of the acting majority leader.

The ACTING PRESIDENT pro tempore. The Senate from Nevada is recognized.

Mr. REID. Mr. President, I ask that the time I use not be charged against either side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE
Mr. REID. Mr. President, we will resume consideration of the Patients’ Bill of Rights. We are going to have a vote at approximately 10 to 10. We have a unanimous-consent agreement in effect that will take us throughout the early afternoon, with votes scheduled throughout that period of time. We expect votes all evening. The leader would very much like to finish this bill today. Certainly the end is in sight. If not, we will work through the night—into the night, not through the night—we will come back tomorrow, and hopefully we don’t have to come back Saturday.

What the leader has said is that we are going to complete this legislation.

We are going to complete the legislation, plus the supplemental appropriations bill before we go home.

He said he would work Saturday, Sunday, Monday, and Tuesday and Wednesday, the 4th—take that off—and come back after that to complete our work. We are cooperating and doing our very best to meet the requests of Senators BYRD and STEVENS. Their last unanimous consent request has been cleared on this side as far as the filing of amendments. We applaud the four managers who have been working on this bill. We look forward to continuing to work today.

AMENDMENT NO. 826
The ACTING PRESIDENT pro tempore. Under the previous order, there will now be 30 minutes for debate to be equally divided between the Senator from Maine, Ms. COLLINS, and the Senator from Louisiana, Mr. BREAUX, prior to a vote on or in relation to the Collins amendment No. 826.

Who yields time? The Senator from Maine.

Ms. COLLINS. Mr. President, I ask unanimous consent that the Senator from Virginia, Mr. ALLEN, be added as a cosponsor of the Collins-Nelson amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Ms. COLLINS. I yield 6 minutes to the Senator from Kansas, Mr. ROBERTS.

The ACTING PRESIDENT pro tempore. The Senator from Kansas is recognized.

Mr. ROBERTS. Mr. President, here is the issue: The ability of States to determine what is best for themselves. That is the issue. Sure, the issue is the Patients’ Bill of Rights. But if Kansas or Nebraska or Maine or Massachusetts or Louisiana or Connecticut—as I look at Members in the Chamber—have an effective patient protection system that is working, why impose new Federal regulations that will force them to overhaul the system they have in place?

The Collins-Nelson-Roberts, and others, amendment would simply give the States the flexibility to provide patient protection required under this bill in a way that best fits each State. For example, last year in Kansas we implemented a new law that assists patients who get into a dispute with their insurance company over the refusal to pay for medical procedures. It is a long process, but the independent reviewer will make a decision and reply within 30 business days after an appeal procedure.

● This ‘bullet’ symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
According to Kathleen Sebelius, our very good Kansas State Department of Insurance Commissioner, there were 22 cases that had been filed with the Kansas Insurance Department. Simply put, our State commissioner, Kathleen Sebelius, and the Kansas State Department of Insurance are doing a good job looking out for the best interests of Kansans covered by HMOs.

So the question is, Why does the Federal Government need to tell our State we have to completely scrap what we are doing and put into place a Federal layer of new Washington-knows-best requirements? How good is this really for Kansans, or your State’s families? In fact, Kansas has a large number of patient protections that have been in place for years, and the list is impressive. The list includes a comprehensive bill of rights, the internal and external appeals I have already described, consumer grievance procedures, emergency room services, OB/GYN access, prompt payment, continuity of care, a ban on gag clauses and financial incentives, screening and breast reconstruction, prostate cancer screening, maternity stay, drug and alcohol abuse treatment, standing referral, and the list goes on and on and on.

Under the bill we are debating today, many of these effective consumer protections Kansas has in place will have to be thrown out and we will have to start all over.

Our Kansas State Insurance Commissioner, Kathleen Sebelius, also serves as the president of the National Association of Insurance Commissioners. Kathleen Sebelius has written a letter that clearly lays out the devastating effects the Washington one-size-fits-all plan will have on State insurance markets, and she warns—listen to this, colleagues—that this is going to be ad

I think she nailed it right on the head. I am an original cosponsor of the Collins-Nelson amendment because it is an amendment that are already doing well. If these standards are not met, only then would the Federal Government come in and impose its standards, and the State would then be required to meet a higher standard in order to be made eligible for the Patient Quality Enhancement Grant Program. Other amendments will have a stick; this is acarrot. I prefer a carrot; other Senators may prefer a stick.

Let me just say, in summing up, can any other Member of this body honestly tell me what is in this bill is better than what the State of Kansas already has in terms of patient protection? Do you know better than our commissioner, Kathleen Sebelius, or Governor Graves, and the Kansas State Legislature? The answer is no.

My colleagues, support this amendment and give States a chance to apply the standards they have currently in place, that are working. The external and internal appeals process is working. Don’t make us reinvent the Federal wheel.

I thank the Chair and my colleagues. The ACTION PRESIDENT pro tempore. Who yields time?

Mr. BREAUX. I yield myself 5 minutes.

Mr. President, I rise in strong support of the so-called Breaux-Jeffords compromise amendment. We are dealing with a question of how are we going to allow the States to continue to operate their own patient protection bills that many of them have already instituted. My own State of Louisiana has passed over 35 different patients’ bills of rights guarantees, and they are working fairly well. I think my colleague, Senator Jeffords, wants to continue to allow those States to have their State plans in effect when they are substantially complying with what we are trying to do here on a national level.

As Senator KENNEDY said last night, if you had the Collins amendment, there would be no guarantee that States would have a Patients’ Bill of Rights. They would not have to do anything if they so chose. A State could say they don’t need in guaranteeing patients within their borders any rights at all, period. We don’t think it is the right thing to do. We are not doing it. The only thing that they would suffer, if they decided to take that approach under the Collins-Nelson amendment, is that they would lose grant money that is being authorized in this legislation.

Well, I think that is unfortunate in the sense that we are talking about a national program to guarantee patients the rights they should have under this legislation. I think there is strong agreement nationwide that there is a need to have some kind of a national guarantee that covers all Americans, not just some Americans, not just a few Americans, not just a handful of Americans, but all Americans, in dealing with their health insurance program.

Our compromise amendment does accomplish that goal, and it does it in a way that gives the maximum ability of the States to do what they think is necessary in crafting their Patients’ Bill of Rights. The language that we have put forth says that State plans would not be superseded. They will continue to operate the way they do today, if they substantially comply with the patient protection requirements that we are instituting on a national level for all Americans.

That doesn’t mean their plan has to be exactly the same as the Federal requirements. It has to substantially comply. That is a legal term used in Congress on many other occasions. On the SCHIP program for providing insurance to children, which we have enacted nationally, the requirement is that a State can run their own program if it substantially complies with the Federal requirements for all Americans that were instituted by this Congress.

On the Medicare Program, folks here in Washington understand how to apply that terminology. It is working. My State of Louisiana runs its own plan. I am very confident that my State of Louisiana will continue to run the plan we have in place right now under the Breaux amendment because it clearly would, in my opinion, substantially comply with what we are talking about here.

There is a definition of what “substantially comply” means by saying a State law would have the same or similar features as the patient protection requirements and would have a similar effect. That is not an unbearable standard at all. It does not have to be exactly. It just has to have the same or similar features.

They can design those rights on States that will be tailored to the needs of that particular State, and the only requirement is that it have the same or similar features. That is not too strong a guideline to the States or a requirement on behalf of the States. I think it can work. Most of the States, if not every single State, that have adopted a Patients’ Bill of Rights will find their plans in their respective States will stay intact and will still be the State Patients’ Bill of Rights under that legislation.

If a State decides for some reason they do not care, they are not going to do anything, there should be the ability for us to make sure all Americans are guaranteed the rights we are talking about today; that they are enforceable; there is an opportunity to go to court to enforce them; and that there is an appeals process when they are being abused.
This is what the Breaux-Jeffords amendment will allow. That is why it is a realistic compromise compared to the extremes of my good friends, Senator Nelson and Senator Collins, with whom I have worked on many occasions and will continue to do so in areas such as health. They are trying to do the right thing. Their amendment will allow some States to do nothing. Potentially thousands of Americans will not have any coverage whatsoever if that is the decision of the State.

We are writing legislation for all Americans, and I suggest the Breaux-Jeffords bill is a proper compromise that can bring this about.

I yield the floor.

The Acting President pro tempore. The Senator's time has expired.

The Senator from Maine is recognized.

Ms. Collins. Mr. President, how much time is remaining on our side?

The Acting President pro tempore. Nine minutes.

Ms. Collins, I yield 5 minutes to the Senator from Nebraska.

The Acting President pro tempore. The Senator from Nebraska is recognized for 5 minutes.

Mr. Nelson of Nebraska. I thank Senator Collins for her strong support for this amendment, and I commend my colleague, Senator Breaux from Louisiana, for his strong support and consistent efforts to find a compromise.

Certainly, the effort is an improvement over where we had been. One area I want to point out I disagree with my friend from Louisiana is his suggestion that maybe the States will not do anything. If you take a look at the charts that maybe the States will not do any-thing. If you look at all the checks, I suggest the States have been doing something and they will continue to do something if the Federal Government does not come in and take away both the incentive and the opportunity by putting in what is termed affectionately “a floor,” a minimum.

The problem is these minimums very often become the ceiling or they become, if you will, the top of whatever is being done because the States will not have the same opportunity, nor will they have the same willingness with the Federal deregulation, of the federalization of the regulation of State insurance as it applies to these health plans.

Generally preemption occurs when the States have not acted. I cannot imagine we are now pre empting what the States have done on the basis of their own job that we were able to pick and choose from the best of those protections to create this bill and now we say to them: It’s a job well done; thank you very much, and, by the way, we will impose these on you and we will make sure your laws will have to be either substantially equivalent or consistent with, according to Frist-Breaux, or, with the compromise, sufficiently compliant. I can understand our desire to take over the role of the States in this area if the States have not done anything, but I cannot understand the desire to do it when the States have done such a good job that we have picked and chosen from the best of those efforts to comprise our bill.

It does not make sense to preempt under these circumstances. That is why many of us would like to see the States have the opportunity to opt out so we will have continuing experimentation under the Jefferson principle that the States are the laboratories of democracy. I am not against all pre-emptions, but I do have a question about this. If we allow the States to continue to make sense under the circumstances with the progress that the States have made.

The charts will show the States have been active. They have worked very hard, diligently and are continuing to do so. Delaware just last week enacted additional patient protection laws. What we need to do is make sure we continue to permit the States to experiment.

I am also worried that with the application of these standards to the States, we will not have further experimentation, we will not have further development of patient protections. I hate to think we are at a point where the status quo will be sufficient for today as well as for tomorrow. I worry this effort in having a floor will result in it becoming a ceiling.

If you look at the charts, you will see to one degree or another, whether it is emergency preemption or not; it is either the external appeals or the internal ap-peals, that nearly every State is doing it. Many States have decided not to do everything under every set of cir-cumstances. I do not think they ought to be penalized where they have made a conscious decision that that is not going to work within their State. We ought not to have, in my judgment, a one-size-fits-all approach. We have not found, if you will, the Holy Grail as it relates to what patient protection truly is. I believe if States continue to experiment, we will find that they will be innovative and they will come up with new methods of providing even better patient protections. After all, this is coming from the grassroots; this is coming from the bottom up.

I think we are making a mistake trying to drive it from the top down which will stifle and create the opportunity for stagnation rather than experimentation. I hope that will not be the case, but I do not see it really any other way.

The National Association of Insurance Commissioners, the president of the National Association of Insurance Commissioners, the National Council of State Legislators all agree with this approach.

The Acting President pro tempore. The Senator’s time has expired.

Who yields time?

Mr. Breaux. I yield 5 minutes to Senator Jeffords.

The Acting President pro tempore. The Senator from Vermont is recognized for 5 minutes.

Mr. Jeffords. Mr. President, I commend the Senator from Maine for keeping this issue alive. It is critically important that we defer as much as we can to the States because they are already set up for it. Why not let them do it?

On the other hand, this is a Federal Patients’ Bill of Rights. That means equal rights to everyone in this country, so I differ with that sentiment.

A lot has been said about HIPAA and using HIPAA as an example of bad policy. I think HIPAA was totally different. HIPAA dealt with portability of insurance in the case of people being laid off work.

They said, if you do not do it, HCFA will come in and do it, and five States said let HCFA do it, and it made a mess of it. This is different. We are talking about the enforcement of rights, an even enforcement across the country.

Yet we do recognize it is important for the States to do it themselves. Many, if not most of them, are already doing a legislative enforcement to require the appropriate and fair enforcement of the rights of individuals on health care.

This is an important difference. HIPAA was a mess, but this has nothing to do with HIPAA. This is quite different from HIPAA.

We all support the Patients’ Bill of Rights. The question is who ought to enforce it. We say, yes, let the States that want to do it do it. On the other hand, we need to make sure it is done fairly and uniformly across this country.

We do give the authority to the Secretary to review it, and we also say he should lean over backwards to make sure the States do it if at all possible. It is not a HIPAA-type situation; we ought to be different in that regard.

It is important that we also recognize that the compromise requires States to have protections that are “substantially compliant with” Federal protection and defines this standard as having the same or similar provisions and the same or similar effect.”

The Secretary must approve the State’s certification of compliance in a manner that is in deference to existing State laws. If he does not act on the State application within 90 days, it is automatically approved. States that have their certification disapproved may challenge that disapproval in court.
The amendment developed by Senator Breaux and myself requires States to provide additional flexibility to implement strong patient protections while guaranteeing a basic level of protection for all Americans in all health plans. Requiring the States to be in substantial compliance with the Federal law—not exact compliance but substantial compliance—provides States with the flexibility they need to implement strong patient protections while ensuring that all patients receive the Federal floor of protections. Under this amendment, States can keep their own laws as long as their basic intent is similar to the Federal standard and will have a similar effect.

The Secretary is required to be deferential to the States—give them every break you can but make sure that the bill of rights will be enforced. Give them every possible opportunity to do it themselves rather than having to go to court. However, this requirement does not infringe upon the Secretary’s authority to determine whether current State laws will provide the basic level of protection promised to all Americans in the health plans under the Patients’ Bill of Rights.

So HIPAA is just a totally different situation. It is a mess; we agree with the Patients’ Bill of Rights. The Secretary is required to be deferential to the States—give them every break you can but make sure that the bill of rights will be enforced. Give them every possible opportunity to do it themselves rather than having to go to court. However, this requirement does not infringe upon the Secretary’s authority to determine whether current State laws will provide the basic level of protection promised to all Americans in the health plans under the Patients’ Bill of Rights.

The amendment developed by Senators Collins and Nelson offers an alternative approach that allows States to keep their own laws while ensuring that all patients receive a basic level of protection. Under this amendment, States can keep their own laws as long as their basic intent is similar to the Federal standard and will have a similar effect. The amendment developed by Senator Breaux and myself requires States to provide additional flexibility to implement strong patient protections while guaranteeing a basic level of protection for all Americans in all health plans. Requiring the States to be in substantial compliance with the Federal law—not exact compliance but substantial compliance—provides States with the flexibility they need to implement strong patient protections while ensuring that all patients receive the Federal floor of protections. Government, and they are doing a good job with the protections they have put in place. They debated them in their State capitularies. Their insurance departments are doing a good job of enforcing those laws. The Breaux amendment and the underlying bill gets the States out of their role. We will have a dual system of enforcement—State insurance commissioners and HCFA. And I can tell you, anyone who knows anything about HCFA in terms of the responsibilities they have, knows they have a hard-enough time doing their job now. We should not get them involved in a system that is already working on the State level.

I beg my colleagues not to go along with federalizing this issue. Let's take care of the Federal people who have been exempted over the years because we haven't done the job we are supposed to do, and let the States continue to do the job they have been doing.

I thank the Chair. The ACTING PRESIDENT pro tem, Mr. BREAUX. I yield 2 1/2 minutes to my good friend, the Senator from Connecticut.

The ACTING PRESIDENT pro tem. The Senator from Connecticut is recognized.

Mr. DODD. Mr. President, I thank my colleague from Louisiana. I commend him and the Senator from Vermont for their compromise proposal we will be voting on shortly. I reluctantly oppose my friend from Maine, my fellow New Englander. I have joined with her on so many issues and have such great respect for her.

There is a title to this bill. It is not titled casually; it is called the Patients’ Bill of Rights. We take title from a bill of rights. Obviously we are all most familiar with our Constitution and the Bill of Rights we embrace and cherish so richly as American citizens. But if we are going to have a bill of rights when it comes to basic fundamental health care, as has been pointed out by the Senator from Louisiana and the Senator from Massachusetts and others, then there ought to be a floor that applies across the country to all 50 States. That is what we are really advocating.

If the Collins amendment is adopted, then what you are developing is a trapdoor in that basic floor that exists. Let me make the case just by pointing to one particular provision of this bill. That is the access to emergency room care, Mr. President.

I have this chart to make the point. In the States that are in red in this chart, they have laws that are weaker than the underlying bill when it comes to access to emergency rooms. We are not talking about some grandiose new plan. We are talking about a fundamental right that you can have access to the closest emergency room. In 27 States, they have a much weaker provision than is in this law. We are saying when it comes to a Patients’ Bill of Rights, to clinical trials, specialists, emergency rooms, this is the floor across the country. If you want to pass laws at the State level that are substantially in compliance with that, we welcome that. If you want to do something more than we are doing here, we welcome that. But if you are going to say that we are going to allow weaker laws to exist in the access to a gynecologist, to a pediatrician, to a clinical trial, to a specialist, or to an emergency room, then we don't think that is right.

If you are for the Collins amendment, in many ways you are going against this bill. I understand that. I appreciate the fact that people do not want to pass Patients’ Bill of Rights and just leave it up to each State to decide. But if you believe, as a majority of us do, and an overwhelming majority of the American public, that there ought to be a Patients’ Bill of Rights, a basic floor that provides those basic standards, then you must vote to adopt the Breaux-Jeffords compromise amendment and retain the integrity of this bill.

The ACTING PRESIDENT pro tem. The Senator’s time has expired. Who yields time?

Mr. KENNEDY. I imagine the Senator would like to close the debate, would she not?

I believe I have 2 1/2 minutes.

Mr. President, the issue is very simple and very basic and very fundamental. It is whether all Americans are going to be covered as included in this legislation. We do not believe it should depend upon where you live. We believe it should be mandated necessarily on where you work. If a child needs a specialist to treat cancer, he or she ought to be entitled to see the specialist and receive the treatment. If a woman needs to be enrolled in a clinical trial that could be lifesaving, she ought to be entitled to participate. If a breadwinner who is crippled with arthritis needs a specialty kind of drug from a formulation, he or she ought to be able to obtain it.

Now, our bill guarantees these kinds of protections, but with the Collins amendment it is a roll of the dice. President Bush believes that all Americans should be covered. Every Republican that was introduced and considered in the House of Representatives said all Americans are covered. She covers about 40 percent of them; 60 percent of Americans are left out. We believe if you are interested in assuring that all Americans be covered, you ought to support the Breaux-Jeffords amendment. That will be doing the right thing.

The ACTING PRESIDENT pro tem. The Senator from Maine is recognized.

Ms. COLLINS. Mr. President, one of the myths in this debate is that unless the Federal Government preempts State insurance laws, millions of Americans will be unprotected in their disputes with HMOs. That is simply untrue. Ironically, my friend from Connecticut makes the point on emergency room care. Forty-four States have enacted legislation guaranteeing access to the nearest emergency room. But they have crafted their laws in different ways depending on the needs of those States. Why should the Federal Government second-guess those laws, substitute its judgment for the judgment of State legislators and Governors’ offices all over this country? It does not make sense. The proposal of the Senator from Louisiana would be both burdensome to States and ineffective for consumers.

Does anyone really believe that a consumer with a problem with his or her insurance policy is better off calling the HCFA office in Baltimore than dealing with their own State bureau of insurance?

The States have more than 50 years of experience in regulating insurance. They have acted without any prod or mandate from Washington to enact good, strong patient protection laws. Let’s honor their work. Let’s build upon the good works of the States rather than preempting, second-guessing, and superseding their laws.

The ACTING PRESIDENT pro tem. Who yields time?

Mr. BREAUX. I yield back the remainder of my time if the other side is ready to yield back.

I ask for the yeas and nays on the amendment.

The ACTING PRESIDENT pro tem. All time is yielded back. Is there a sufficient second?

There is a sufficient second.

Mr. COLLINS. I yield back the remainder of my time if the other side is ready to yield back.

The yeas and nays were ordered.

Mr. REID. Mr. President, I move to table the Collins amendment and ask for the yeas and nays.

The ACTING PRESIDENT pro tem. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. REID. Mr. President, I move to table the Collins amendment and ask for the yeas and nays.

The ACTING PRESIDENT pro tem. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the amendment. The clerk will call the roll.

The legislative clerk called the roll.

Mr. REID. I announce that the Senator from Delaware (Mr. BIDEN) is necessarily absent.

Mr. NICKLES. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Alabama (Mr. SHELDY) are necessarily absent.

Mr. REED. The PRESIDING OFFICER (Mr. REED). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 53, nays 44, as follows:
Mr. President, I understand the need to compromise, and I think we are moving forward in a very positive way. I do want to point out for the record that what we are now saying is that a State need only be ‘substantially compliant’ with Federal protections as opposed to ‘substantially equivalent to.’ My big worry is that if you look at this amendment, we are also saying we need to give deference to the State’s interpretation of its own law and its compliance with Federal protections.

I say two things to colleagues. No. 1, I think, in the best of all worlds, consumers would also have a right to appeal if they believe the State is in error.

To be fair, we want to give deference to what States are doing, as long as we have strong consumer protections for everyone regardless of where they live. I also believe if we are going to do that, we have to make sure not only that the States are given their proper due but so are consumers.

This amendment weakens the bill somewhat as it relates to Senator Breaux. Frankly, more than anything, it would be helpful to have an ombudsman office or something such as that in every State, where people would know where to make a phone call, know what their rights are. There are ways we can strengthen this.

I do not believe this amendment takes us in a strong consumer direction. It is a good compromise in terms of where we are. I wanted to speak out and express my concerns.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. KYL. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have been ordered. The assistant legislative clerk will report.

Mr. BOND. Mr. President, I send an amendment.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOND. Mr. President, I send an amendment to the desk on behalf of myself, Mr. Roberts, and Mr. Helms, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. Bond], for himself, Mr. Roberts, and Mr. Helms, proposes an amendment numbered 831.

Mr. BOND. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To ensure that patients receive a minimum share of any settlement or award in a cause of action under this Act.)

On page 154, between lines 2 and 3, insert the following:

‘(11) Minimum share of settlement of award.—

‘(A) In general.—Except as provided in subparagraph (B), a participant or beneficiary (or the estate of such participant or beneficiary) shall receive not less than 85 percent of any award made as a result of a cause of action brought by the participant or beneficiary (or estate) under this subsection, after subtracting the amount of any attorney’s fees from the total amount of such award.

‘(B) Exception.—This paragraph shall not apply where the amount awarded as a result of a cause of action brought by a participant or beneficiary (or estate) under this subsection is less than $100,000.

The amendment (No. 830) was agreed to.

Mr. REID. I move to reconsider the vote.

Mr. DORGAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from New Hampshire, or his designee, is recognized to offer an amendment relative to liability on which there will be 1 hour of debate.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOND. Mr. President, I send an amendment to the desk on behalf of myself, Mr. Roberts, and Mr. Helms, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. Bond], for himself, Mr. Roberts, and Mr. Helms, proposes an amendment numbered 831.

Mr. BOND. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To ensure that patients receive a minimum share of any settlement or award in a cause of action under this Act.)

On page 154, between lines 2 and 3, insert the following:

‘(11) Minimum share of settlement of award.—

‘(A) In general.—Except as provided in subparagraph (B), a participant or beneficiary (or the estate of such participant or beneficiary) shall receive not less than 85 percent of any award made as a result of a cause of action brought by the participant or beneficiary (or estate) under this subsection, after subtracting the amount of any attorney’s fees from the total amount of such award.

‘(B) Exception.—This paragraph shall not apply where the amount awarded as a result of a cause of action brought by a participant or beneficiary (or estate) under this subsection is less than $100,000.
"(C) DEFINITIONS.—In this paragraph:

"(i) ATTORNEYS’ FEES.—The term ‘attorneys’ fees’ means any compensation for the direct or indirect representation or other legal work performed in connection with a cause of action brought under this subsection, including any monetary consideration provided for in any:

"(aa) final court decision;

"(bb) court order;

"(cc) settlement agreement;

"(dd) arbitration procedure; or

"(ee) alternative dispute resolution procedure (including mediation); less

"(ii) AWARD.—The term ‘award’ means the sum of—

"(I) any monetary consideration provided to a participant or beneficiary (or the estate of such participant or beneficiary) by a fiduciary of a group health plan, a health insurance issuer offering health insurance coverage in connection with a group health plan, or an agent of the plan, issuer, or plan sponsor in connection with a cause of action brought under this subsection, including any monetary consideration provided for in any—

"(aa) final court decision;

"(bb) court order;

"(cc) settlement agreement;

"(dd) arbitration procedure; or

"(ee) alternative dispute resolution procedure (including mediation); plus

"(II) any attorney’s fees awarded under subsection (g)(1) with respect to the participant or beneficiary (or the estate under this subsection).

"(I) any reimbursement for any expenses incurred in connection with direct or indirect representation or other legal work performed in connection with a cause of action under this subsection.

On page 169, between lines 12 and 13, insert the following:

"(II) MINIMUM SHARE OF SETTLEMENT OF AWARD.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), a participant or beneficiary (or the estate of such participant or beneficiary) shall receive not less than 85 percent of any award made as a result of a cause of action brought by the participant or beneficiary (or estate) under this subsection, after subtracting the amount of any attorneys’ fees from the total amount of such award.

"(B) EXCEPTION.—This paragraph shall not apply where the amount awarded as a result of a cause of action brought by a participant or beneficiary (or estate) under this subsection is less than $100,000.

"(C) DEFINITIONS.—In this paragraph:

"(i) ATTORNEYS’ FEES.—The term ‘attorneys’ fees’ means any compensation for the direct or indirect representation or other legal work performed in connection with a cause of action brought under this subsection. Such term shall not include reimbursements for any expenses incurred in connection with such representation or work.

"(ii) AWARD.—The term ‘award’ means the sum of—

"(I) any monetary consideration provided to a participant or beneficiary (or the estate of such participant or beneficiary) by a fiduciary of a group health plan, a health insurance issuer offering health insurance coverage in connection with a group health plan, or an agent of the plan, issuer, or plan sponsor in connection with a cause of action brought under this subsection, including any monetary consideration provided for in any—

"(aa) final court decision;

"(bb) court order;

"(cc) settlement agreement;

"(dd) arbitration procedure; or

"(ee) alternative dispute resolution procedure (including mediation); less

"(II) any reimbursement for any expenses incurred in connection with direct or indirect representation or other legal work performed in connection with a cause of action under this subsection.

Mr. BOND. Mr. President, several days ago in debate in this Chamber, I talked about how employees of small businesses might lose their health care coverage if the provisions of McCain-Kennedy went into effect unamended. The junior Senator from North Carolina indicated that I was interested only in protecting the businesses. Unfortunately, he misconstrued my arguments because we are concerned about patients. We hope the employees of small businesses will continue to get the benefit of health insurance coverage by their employers.

I spoke about employees, however, because if this bill is not significantly amended, there are not going to be patients covered by this bill; they are going to be thrown out of health care coverage. We are concerned about patients.

It is not only small businesses that should be worried about this bill, but employees of small businesses should also be worried about this bill.

This amendment I offer today provides additional protection to patients. It provides protection to patients from trial lawyers, so we will find out whether my colleagues are more interested in taking care of patients or ensuring that the rights to sue by trial lawyers are unabated.

There are a lot of words in the McCain-Kennedy bill, but there are also some heavy-duty new lawsuits that are authorized.

The Federal claim of action really begins on page 140. It starts off:

"IN GENERAL.—In any case in which

"(A) a person is a fiduciary of a group health plan, a health insurance issuer offering health insurance coverage in connection with the plan, or agent of the plan, issuer, or plan sponsor—

"(B) any cause of action starts off, No. 1, regarding whether an item of service is covered under the terms; No. 2, regarding in taking care of patients or ensuring that the rights to sue by trial lawyers are unabated.

There are tons of laws that are covered under this bill if it is not amended. The amendment effectively prohibits obscene contingency fees whose large judgments are won and the plaintiff’s attorney. I realize lawyers perform useful services when someone is harmed. They should be justly compensated.

However, this amendment says enough is enough. The amendment is very simple. Any patient who gets a monetary award through all the new lawsuits permitted in the McCain-Kennedy bill must get at least 85 percent of the award. If you are hurt, doesn’t it make sense to receive 85 percent of it? I can’t see that being objectionable. The amendment effectively prohibits

Some may say lawyers will not take the cases. When we talk about setting a patient minimum, we need to be cautious. Just as it doesn’t help to have a right to sue your HMO when your employer drops health care coverage, as would happen under this bill if it is not amended, it doesn’t help to have a minimum statute of time if it means no attorney will take your case. This amendment includes two strong protections to make sure access to attorneys is not threatened.
CONGRESSIONAL RECORD—SENATE 12305

June 28, 2001

First, before the patient minimum is applied, the amendment allows the attorney to be reimbursed for expenses incurred during the case. Only after expenses are deducted from the award will a patient minimum apply. In practice, this means an attorney can never lose money on a lawsuit that results in an award.

Second, we exempt certain lower level awards from the patient minimum requirement. This ensures that the simpler cases that don’t promise large awards can still be pursued and are not limited by the requirement that the patient gets 85 percent. We have set $100,000, which is above the median judgment normally entered in malpractice cases, as the limit.

I am not sure any State has taken the exact approach this amendment establishes. The Patient’s Bill of Rights, which 14 States have established caps on attorney fees. The strictest cap is in New York where lawyers are limited to 10 percent of awards over $1.25 million. That is the equivalent of a 90-percent patient minimum. California has the most well-known cap on attorney fees. In California, lawyers are limited to 15 percent of any award in excess of $500,000. When you add Florida and Indiana, which also have a 15-percent cap for the highest level awards, 4 of the 14 States that established caps on awards of attorney fees essentially require that plaintiffs get at least 85 percent of an award.

Have these caps served as a barrier for plaintiffs? Have they denied access to the courts? From the data we have, we conclude they definitely have not. The State with the toughest cap, New York, produces almost twice as many malpractice awards per capita and California’s rate is about the average. Indiana, with a 15-percent cap, falls below the national average.

It is hard to argue that the caps threaten access to the courts through attorneys. The patient minimum has existed for at least a decade. By not changing the law, the State legislature seems to have come to the same conclusion.

What do we take 85 percent? When you take out expenses and exempt lower level awards, patients should get the overwhelming amount of an award. For a patient who has been harmed, it is perfectly reasonable to ask that that patient get 85 percent. For States with similar requirements, there does not seem to be a barrier to finding attorneys and bringing a lawsuit if you believe you have been harmed. To my knowledge, none of these States has repealed their caps, demonstrating that at least the State legislatures think they are working. By choosing 85 percent, the lowest minimum amount to which a patient is entitled, this amendment simply reconciles Federal law with laws that seem to be working in four of the largest States in this country.

We know of the horror stories. We have heard too many horror stories. I point out an August 16, 2000, article in the Los Angeles Times about Rodney King, who was brutally beaten by Los Angeles police. He is taking a beating, and from his lawyers, he says. They made more money on his case than he has. By his reckoning, they cheated him out of more than $1 million. In a nutshell, the man whose 1991 videotaped beating made him an international symbol of police brutality and civil rights, who had a deal with his lawyer to pay them only 25 percent of the award but they wound up showing King’s lawyers received $2.3 million while he got only $1.9 million.

Another lawyer in California won a class action suit for police brutality. He says he thought he had a deal with his lawyer to pay them only 10 percent of the award but they wound up showing his lawyer received $19,800 as a contingency fee, and collected $378,000 in fees awarded by the trial court; the client received $310.

I have other examples. But one of my favorites is the Lawyers Weekly report that a growing number of lawyers are putting arbitration clauses in the fine print, shielding them from being sued by another trial lawyer if the clients say they botched a case. The lawyers themselves who are making the money off the large judgments prefer their disputes go to private arbitration because arbitration is faster, cheaper, decisions are made by other lawyers rather than juries, and there is no public record. So there are certain instances in which it does not make sense to allow unfettered access to the courts for people with a claim.

If a patient is harmed and wins an award through a lawsuit, it is perfectly reasonable to expect the patient will receive at least 85 percent of the money. Almost 180 pages of the bill protect patients from trial lawyers. I see the Senator from North Dakota is on the floor. I ask after the other Senator to see in a Congressional Research Service report No. 94-870-8. I commend anyone to that CRS report which describes these laws.

I have not found any Federal law on attorney’s fees that is as restrictive as is proposed in this amendment. I repeat, there isn’t any Federal law on attorney’s fees that is as restrictive as that proposed this morning on the Patient Protection Act.

Why, when we have this issue of managed care organizations not providing the care required for patients and we have the opportunity in this legislation to hold the managed care organization accountable, why is it that those who don’t like this Patient Protection Act try to carve the ground out from under patients once again with a restrictive proposal that almost certainly would diminish the opportunity of a patient to acquire access to an attorney to make that HMO accountable?

I find it also interesting that the concern behind this Bond amendment is apparently excessive attorney fees. There are striking excesses with respect to managed care organizations. Let me mention just a couple.

What about excessive salaries, excessive stock options? I don’t hear anyone coming to the floor of the Senate complaining about $50 million in compensation that the CEO of a managed care organization receives. I don’t hear anybody saying that is an excessive salary for an individual to receive. How is it these CEOs get to be rewarded in amounts a large as $50 million? By pinching on access to care that ought to be delivered to patients.

The opponents of our patients protection bill are not here on the floor saying that $50 million paid to the president of a managed care organization is excessive. We just hear them come out here to say we are worried about an excessive fee received by an attorney who is representing a patient trying to hold an HMO accountable.

Mr. REID. Will the Senator yield for a question?

Mr. DORGAN. I will be happy to yield, of course.
Mr. REID. Is the Senator aware that William McGuire of UnitedHealth Group held $41.1 million last year?

Mr. DORGAN. I am aware of that.

Mr. REID. Is the Senator aware that there were unexercised stock options worth an additional $88 million by various people with that company, but McGuire held the most stock options, worth $358 million? Is the Senator aware of that?

Mr. DORGAN. I am aware of published reports that say that, yes.

Mr. REID. Did I hear the Senator say he had not heard any debate on the Senate floor this past 10 days about this excessive, exorbitant amount of dollars to the people who run these companies and not helping the patients? I have not heard that; has the Senator?

Mr. DORGAN. The Senator from Nevada is correct. We have not heard one word from opponents to our patients protection bill about the salaries, stock options, and the compensation paid to those who run the managed care companies.

Let me go back to the intention of our Patients Bill of Rights, and then bring it to this amendment. The reason we are here in the first instance is because too many people in managed care organizations are not getting the care they need. Too many people do not get the care they need or expect from their health care plan, and they are not able to hold the health care plan accountable for it.

This legislation says there ought to be protections in place for patients. Patients ought to be able to know all their options for medical treatment, not just the cheapest option. That is a patient's right. That is what we say in this legislation.

Some people do not want that. The managed care group does not want that. The insurance companies do not want that. We say a patient ought to have a right to emergency room treatment when they have an emergency. That is a right that is in this bill that we are trying to get passed. I understand why the managed care groups don't want that. I understand why there are some who oppose it here in the Senate because they stand with the insurance companies and the managed care groups. We stand with the patients saying there ought to be basic protections in place.

This amendment is one more attempt, by our opponents, in a series of attempts just to undermine this bill, to say no, we don't stand with patients, we don't stand with patients in order to allow them to exercise the rights that are in this bill. What our opponents would like to do is chip away and carve away at the foundation of this bill so at the end of the day the patients do not have these protections and the patients do not have these rights.

This amendment, if it were genuine, if it were really concerned about fees, would not just address attorney's fees. They are trying to make the compensation paid to those who run these organizations, who make $50 million, $10 million, or $250 million in stock options. Is that excessive? We don't hear anyone on the floor of the Senate talking about that. Why? Because this is not about fees. It is about with whom do you stand. It is about people who really do not want this legislation to pass. They have been dragging their feet now, day after day after day, bringing out amendments to try to defeat the Patients Protection Act. In every case, in every circumstance, they have failed. This amendment is the latest attempt to do that. The amendment limits attorney's fees as, I understand it, to an amount below all other attorney's fees that are now written in Federal law. We have it in a number of places in Federal law. I have referenced the CRS report. All Senators can look at it.

This amendment proposes we limit attorney fees below all those other areas mandated by federal law. Why? Because here we are talking about patients. We are trying to advocate on behalf of patients. Why would anyone want to take away the patients' rights when they are confronting big organizations?

One of the interesting things is I hear all this talk about a patient who would hire an attorney to make a managed care organization accountable. I hear no discussion about the legion of attorneys who are hired by managed care organizations to deal with patients. Do you think the big insurance companies and big managed care organizations do not have a battalion of lawyers they pay? Of course they do. Maybe you want to limit their opportunity to use lawyers? I don't think so. I don't propose that.

Then why would you want to limit the opportunity of patients to use attorneys to make an HMO accountable? This just makes no sense on its face. It is one more step, one more attempt to try to defeat this bill. We have had it day after day after day, amendment after amendment. I hope my colleagues will understand the last thing we ought to do is weaken the ability of the American people, who as medical patients expected certain care but did not get it, to be able to hire an attorney and make that managed care organization accountable.

I would say one more thing. I would like those who offered this amendment, who are indeed concerned about "fees," to be concerned about all fees. If they are concerned about lawyer's fees, good for you. Then be also concerned about $50 million, and $250 million in compensation paid to a CEO who runs a managed care organization. Be concerned about those fees as well. You would be concerned, bring both amendments to the floor and let's debate both amendments.

I reserve the remainder of my time and yield the floor.

The PRESIDING OFFICER. The two leaders are on the floor. I think they are about ready to propose a unanimous consent request. If they are not now, would the Senator mind yielding when they are ready?

Mr. GRASSLEY. I would rather wait. Hopefully, they will do it right now.

Mr. REID. Madam President, I suggest the absence of a quorum and I ask unanimous consent that the time run equally on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Iowa.

Mr. GRASSLEY. Madam President, I support the Bond amendment and want to speak specifically to that point. It also deals with the point I have made in other speeches—that this is a very good bill. But during the process of considering giving patients a bill of rights against insurance companies, I think we always have to keep our eye focused upon the fact that we want to give treatment for patients and not tribute for lawyers.

This amendment takes a very good approach in fixing the Kennedy-McCain bill's provisions dealing with the liability parts of the bill, which, in my view, amount to nothing less than a trial lawyer's pot of gold.

I have always believed that medical malpractice liability laws should provide adequate compensation for those who are truly injured while reducing frivolous lawsuits.

I firmly believe that it is a principle of any case, including patients against insurance companies, that people who are harmed ought to be made economically whole. But there has to be a balance between frivolous lawsuits and making sure that people can be made whole if harmed.

I think the Kennedy-McCain bill fails to strike that very carefully needed balance and instead creates a lottery for trial lawyers, which not only inflates the cost of health insurance for all of us but also leads to more and more hard working Americans losing health coverage.

We shouldn't do anything in this bill that will cause people to lose their
June 28, 2001

CONGRESSIONAL RECORD—SENATE

12307

health insurance. We already have 42 million uninsured Americans. The best opportunity for affordable health insurance is at employer-related health insurance programs.

Don’t forget that we have over 50 million insured Americans under the self-insured plans that employers offer. The case is that most of these self-insured plans come from small business more so than large corporations. We should not be putting these employers and their employees in a situation where that employer, because of the threat of suit under this bill and losing a generation and a lifetime of savings in that family business, will not want to take a chance of losing his investment which has been built up through a family working together and investing everything they have into the business because of a threatened lawsuit. If that is a threat, then you can understand why the employer might just eliminate their self-insurance and in the process throw the employees into a situation of having no health insurance, resulting in increases in the number of 42 million people in this country who now do not have health insurance.

Here is how I believe this will inflate costs, and thus cause employers and employees to not have health insurance coverage. Except for the $5 million cap that is in this bill on punitive damages in Federal courts, the Kennedy-McCain bill sets absolutely no limits on what damages trial lawyers can collect.

When it comes to patients and those harmed because of lawsuits, it ought to be an axiom of all of our public policy that the people harmed, not lawyers, should get most of the money from a lawsuit.

Of course, the Bond amendment then makes this more true than under the existing practice. You have to consider that trial lawyers generally collect 40 percent of their clients’ recoveries. In fact, in many cases, you can have the lawyer’s fees plus other court costs work out to where the person harmed is getting less than 50 percent of what the jury might award.

Trial lawyers generally collect 40 percent of their clients’ recoveries. Incentives for bringing a case regardless of merit are then extremely high. It is a perverse incentive to go to court and to go to trial.

But the real jewel in the trial lawyer’s crown is this bill’s provision that allows the same suits for the same claims brought by the same trial lawyers, whether they proceed in State or Federal courts.

Even though this debate is supposed to be about patients, the Kennedy-McCain liability scheme isn’t about patients at all. It is about trial lawyers. In fact, as you can see, I call this the “trial lawyers lottery ticket.” I want to show where five out of six opportunities for monetary awards are virtually jackpots for lawyers.

Take a closer look. I would like to just scratch the trial lawyer’s lottery ticket and see what the lawyer gets. Let’s start with medical costs.

Peel off the lottery ticket top, both for State court and Federal courts, you will see “bingo”—no limit on what trial lawyers can collect in both State and Federal court. That is a jackpot that ought to make any lawyer happy. But why quit when you are ahead? Let’s take a look at what is in store on pain and suffering. Peel that lottery ticket, and you can see what you get on pain and suffering. It is another jackpot—unlimited damages in State and Federal courts.

The sky is the limit. That is where the trial lawyers are really winning big.

Now, for the trial lawyer’s favorite damages, punitive damages, they stand to reap tens of millions of dollars. Let’s see what this ticket offers the trial lawyers. So we pull off the punitive damage square. You can see unlimited damages in State court, and up to a $5 million cap in damages as far as the Federal courts are concerned.

This is another big win. Talk about good luck: unlimited punitive damages in State courts, and in the Federal courts almost unlimited—a $5 million cap. If you ask me, that is hardly any limit at all.

Mrs. BOXER. Will the Senator yield for a question?

Mr. GRASSLEY. No, I will not. I only have 10 minutes. And we lost some other time on this situation of waiting for the leader.

Mrs. BOXER. On my time. I would ask a question on my time.

Mr. GRASSLEY. Finally, if I could, let’s not forget about class action lawsuits where multimillion-dollar damages are the name of the game. So here again we peel off the lottery ticket. You can have class action lawsuits in State courts. You can have class action lawsuits in Federal court.

So bingo again. Kennedy-McCain has no limits on class action lawsuits. It even creates new grounds for bringing class action cases.

As you can see, everybody wins—every lawyer, that is—with the trial lawyers’ lottery ticket.

What we get back to then is that we are more concerned about treatment for trial lawyers, not treatment for patients. It seems ironic that the very individuals this bill claims to protect are the ones who lose. Despite what its sponsors say, the bill before us exposes employers to the constant threat of litigation, even for simple administrative tasks and clerical errors.

Mr. GRASSLEY. What is the ultimate result? What everybody says they do not want to happen. People lose coverage. When this sort of perverse incentive is put out there to threaten small business, particularly those that are self-insured—because they do not want to put in jeopardy their lifetime of work but the people that are the biggest losers in this bill are the people in this community, so they can have good workers and pay their workers well—and, most importantly, workers want good fringe benefits; and the No. 1 fringe benefit they want is health insurance—it puts it in jeopardy employer-based coverage. Then the ranks of the uninsured go up tremendously.

I yield myself more time.

Mrs. BOXER. Reserving the right to object, I would ask for 1 minute as well upon the conclusion of the Senator’s remarks.

Mr. GRASSLEY. I object to that. There is plenty of time on that side for the Senator to take her time. I am taking time off our side.

Madam President, how much time do I have left?

The PRESIDING OFFICER. There are 3½ minutes left for the sponsor.

Mr. GRASSLEY. I would like to take 1 minute of that 3½ minutes.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. So the ranks of the uninsured are going to go up. There are 42 million uninsured now. Do we want to increase that? No, nobody wants to increase that, but that is going to be the end result when these self-insured plans are dropped. Then, of course, the employees become the biggest losers in this lottery.

So I urge my colleagues to reject this lottery and to support the Bond amendment, which creates much needed patient minimums and ensures that patients, not lawyers, get fair compensation for their losses.

I reserve the remainder of the time and yield the floor.

The PRESIDING OFFICER. Who yields time?

The majority leader.

Mr. DASCHLE. Madam President, I will use my leader time and not take any time off the agreed-upon time allocated for the amendment.

Madam President, I would just say on the amendment, there is nothing in there that would limit the lawyers’ fees for the insurance industry. Those are unlimited. While they limit the legal fees for lawyers defending patients, there is nothing to limit the legal fees for lawyers defending HMOs and insurance companies. I find that quite ironic.

Mr. DASCHLE. Madam President, I want to propose a unanimous consent request. I will not do that at this time because I have been talking with the distinguished Republican leader. But I want to propose a request, as I had indicated, I would, to lock in the debate for the supplemental.

There are a number of amendments that have been suggested. I know the unanimous consent agreement has been
cleared on our side now for I think 3 days. We have been unable to get consent from our Republican colleagues for the last 3 days.

Now I am told they may object to even going to the supplemental, at least initially. If that happens, of course, I will be forced to file a motion to proceed. But I think it is important. There was a story in the Washington Times dated June 26, and I think for the RECORD it would be helpful if I just read it because I think it does capture the urgency with which we address the supplemental. So I will take just a moment to read it:

The U.S. military would be forced to curtail or cancel training exercises, facility repairs and equipment maintenance if Senate Majority Leader Tom Daschle holds up a pending emergency budget until late July, according to Pentagon projections.

The Pentagon provided a list of hardships at the request of Senate Minority Leader Trent Lott, R-Miss., used the list yesterday to criticize Mr. Daschle for threatening to delay action on a $6.5 billion supplemental budget bill until the Senate completes work on a contentious patients’ bill of rights. That delay would push approval of the fiscal 2001 defense legislation until late July or beyond.

“If we don’t get this bill completed by mid-July, we’re going to have canceling of base-property maintenance, and holding some of our deployed units where they are overseas until the end of the fiscal year,” Mr. Lott said. “So we’re really pushing the envelope when it comes to the needs of our military personnel in health as well as in training housing.”

Picking his first confrontation with Democrats since they took control of the Senate, Mr. Lott also accused Mr. Daschle of sacrificing the nation’s urgent energy needs in order to push through the health care bill.

Near the end of the bill’s funding goes for replenishing military training accounts depleted by peacekeeping missions in the Balkans and elsewhere. Without emergency funding soon, the military would be forced to:

Cut all nonessential operations such as pilot training, steaming hours, fleet exercises and air combat training maneuvers. The Air Force and Navy would ground some pilots and aircraft.

Perhaps hold deployed units overseas until the new fiscal year begins Oct. 1.

Cancel training for units getting ready to deploy for peacekeeping duties.

Stop or slow down maintenance of equipment at large regional depots.

“This will lead to the loss of jobs for many Americans,” Mr. Lott’s office said.

The Joint Chiefs of Staff originally wanted about $9 billion in emergency funding in January, but incoming Defense Secretary Donald Rumsfeld cut the request. The White House scrubbed the numbers and presented the $6.5 billion proposal. The House already has approved that number, as did the Senate Appropriations Committee.

Mr. Lott said he suggested the Senate OK the emergency defense bill by unanimous consent, since both chambers approved Mr. Bush’s list of spending requests without adding home-state projects, as was the practice

Madam President, I ask unanimous consent that the entire article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

From the Washington Times, June 26, 2001

DASCHLE DELAYS; MILITARY WAITS FOR EMERGENCY FUNDS

By Rowan Scarborough and Dave Boyer

The U.S. military would be forced to curtail or cancel training exercises, facility repairs and equipment maintenance if Senate Majority Leader Tom Daschle holds up a pending emergency budget bill late July, according to Pentagon projections.

The Pentagon provided a list of hardships at the request of Senate Minority Leader Trent Lott, R-Miss., used the list yesterday to criticize Mr. Daschle for threatening to delay action on a $6.5 billion supplemental budget bill until the Senate completes work on a contentious patients’ bill of rights. That delay would push approval of the fiscal 2001 defense legislation until late July or beyond.

“If we don’t get this bill completed by mid-July, we’re going to have canceling of base-property maintenance, and holding some of our deployed units where they are overseas until the end of the fiscal year (Sept. 30),” said Mr. Lott, “So we’re really pushing the envelope when it comes to the needs of our military personnel in health as well as in training housing.”

Picking his first confrontation with Democrats since they took control of the Senate, Mr. Lott also accused Mr. Daschle of sacrificing the nation’s urgent energy needs in order to push through the health care bill.

Near the end of the bill’s funding goes for replenishing military training accounts depleted by peacekeeping missions in the Balkans and elsewhere. Without emergency funding soon, the military would be forced to:

Cut all nonessential operations such as pilot training, steaming hours, fleet exercises and air combat training maneuvers. The Air Force and Navy would ground some pilots and aircraft.

Perhaps hold deployed units overseas until the new fiscal year begins Oct. 1.

Cancel training for units getting ready to deploy for peacekeeping duties.

Stop or slow down maintenance of equipment at large regional depots.

“This will lead to the loss of jobs for many Americans,” Mr. Lott’s office said.

The Joint Chiefs of Staff originally wanted about $9 billion in emergency funding in January, but incoming Defense Secretary Donald Rumsfeld cut the request. The White House scrubbed the numbers and presented the $6.5 billion proposal. The House already has approved that number, as did the Senate Appropriations Committee.

Mr. Lott said he suggested the Senate OK the emergency defense bill by unanimous consent, since both chambers approved Mr. Bush’s list of spending requests without adding home-state projects, as was the practice with supplemental bills the past few years. But Mr. Lott said Mr. Daschle, South Dakota Democrat, rejected that idea.

Mr. Daschle, despite earlier indications that he would allow a speedy vote on the spending bill, told colleagues Friday that he would not bring the floor to the floor until the Senate completes work on a patients’ bill of rights.

Republicans have been slowing down final passage of that legislation, raising concerns about employment and increasing premiums. Their tactics could derail Mr. Daschle’s stated goal of finishing the bill by Friday.

The fate of the health care bill is particularly sensitive for Mr. Daschle because it is his first test of his ability to move legislation since becoming majority leader. Senate committee reports take up new legislation due to prolonged negotiations between the parties on how to reorganize and whether to guarantee votes on Supreme Court nominees.

Daschle spokeswoman Molly Rowley said Mr. Daschle wants to complete the patients’ bill of rights, the spending bill and the reorganization before the Senate adjourns for the Fourth of July recess.

“We think all three of these things can be done this week before we leave,” she said.

Sen. Robert C. Byrd, West Virginia Demo- crat and chairman of the Appropriations Committee that approved the spending bill last week, said yesterday he was “not in a position to comment” on Mr. Daschle’s intentions.

“The leader has to balance a lot of things,” Mr. Byrd said, “I’m sure he’ll get to the [spending bill] when he thinks he can.”

Mr. Lott said Mr. Daschle rejected his suggestion to approve the spending bill by today, making it unlikely that a conference bill could be worked out before the House ad- journs Friday for a weekend Independence Day vacation.

“We need to get this defense and other emergency supplemental done as soon as possible because it is critical for nonessential operations like pilot training, steaming hours, fleet exercises,” Mr. Lott said, “I’m very worried by that by not approving the defense supplemental appropriations bill we’re asking for more delay and even more problems with our defense needs.”

Mr. Daschle has been threatening to cancel the Senate’s vacation to compel Republicans to finish work on the health care bill.

Republicans and Democrats have been sniping politely about legislative priorities ever since the power shift in the Senate. Re- publican lawmakers have been pressing for passage of President Bush’s energy plan, but Mr. Daschle has expressed more interest in the health-care legislation, as well as increas- ing the minimum wage and passing a hatecrimes bill.

Mr. Lott said yesterday that Democratic leaders do not intend to address the energy issue by the end of July.

Congress is in recess for the entire month of July, meaning the Senate would not take up the administration’s energy plan until September at the earliest.

House and Senate Republicans met with White House representatives yesterday and agreed to call attention to Democrats’ inaction on an energy plan over the recess next week. The meeting took place in the of- fice of House Majority Whip Tom DeLay, Texas Republican.

Mr. DASCHLE. Madam President, Senator STEVENS and Senator BYRD came to me a couple of weeks ago and asked for a special exemption from the understanding we have been working under here in the Senate that no offi- cial action can take place on any legis- lation until we have broken the im- passe on the organizing resolution and assigned each committee its full com- plement of members. I, of course, agreed, especially in the lousy state of urgency, to allow the Appropriations Committee to work its will and to finish this supple- mental, which is what it did. I applaud both of them for taking the action they did.

Mr. LOTT. The House, of course, has now acted. Now it is up to us. A couple of days ago the President called me and said: Above all, I hope that you will pass the supplemental before you leave. I gave
The President my personal assurance that we would pass the supplemental here in clearly—and forcefuly—the alternative to not acting is to risk what the Washington Times has reported, to wreak havoc with the military, to keep them from getting their job done, to actually endanger our military personnel in same ways. We are not going to be accused of endangering the military. We have to do what the President, the Commander in Chief, requested. That is what we are doing here.

We will offer the unanimous consent request to proceed. If that fails, I will file a cloture motion on the motion to proceed, and when it ripens we will have the vote. But we will have the vote.

Mr. DORGAN. Will the Senator from South Dakota yield?

Mr. DASCHLE. I am happy to yield.

Mr. DORGAN. I ask the majority leader to ask the case that the three issues that are outstanding—finally the Patients Protection Act, passing the supplemental, and the organizing resolution—could be done rather quickly? We have, after all, been debating the Patients Protection Act for some long while. We have gone through most of the major amendments. We started debating this issue 5 years ago. It has now been on the floor for some while. We have done most of the major amendments. If we could complete the Patient’s Bill of Rights later today we could move on to other business. I am a member of the Appropriations Committee. When we passed the supplemental bill, it was passed almost with no amendments in the House of Representatives; that bill is very important—we did it with very little debate in the full Appropriations Committee. The organizing resolution can be completed, I understand, with perhaps one vote.

It is the case, isn't it, that all of this could be done perhaps this evening if we had cooperation? Is that not the case?
right now to consider this very important supplemental appropriations resolution. I would like that to be considered.

Failing that, I think we are not going to object to agreeing to this unanimous consent request, but there are 35 amendments now—45 or 55. Some of them clearly are important to Senators involved on both sides of the aisle. Senator BOND has a couple of them. Senator BOXER has one, I think she probably feels very strongly about. Senators CLELAND, ROBERTS, and others have amendments with regard to the B–1 bomber. Senator CONRAD, I haven't talked to him, but he has one on Turtle Mountain Indians. As you look down the list, some of them are not just relevant, some of them are amendments about which Senators are going to care greatly and it is going to take us as long as we are talking about an extended period of time at this point to complete action on this legislation. I regret that.

If we could get an agreement to go to it now—I see Senator MCCAIN, I know he hasn't been here, I feel very strongly about—if we could do that now, maybe we could get some time agreements and move to completion.

I see the distinguished Senator from Alaska, the senior member of the Appropriations Committee on the Republican side, who wants to speak. I am glad to yield under my reservation, Madam President.

Mr. STEVENS. Madam President, I am here to urge that the Senate take the bill up now. I think if we took it up now, working with the people who have those amendments, we ought to be able to finish it today. I think if we finish today, the House will stay, and we could complete this before the recess. If we wait until Monday after the House goes home, it will be very difficult to get them back, even from the point of view of getting travel arrangements for the House to come back on Monday or Tuesday. I cannot speak for the chairman, but I can say that we both have sought for the last 2 weeks to try to have this bill become law in time to meet the needs of the armed services. Very clearly, they have been demonstrated now. There is no question that if we do not get this thing passed, there is going to be an impact on the armed services. I will commit myself to both leaders to work with all Members to see what we can work out, to constrict the time and finish it tonight, if we can take it up now. That might put pressure on the other bill, too.

I urge that the organization resolution get resolved. I personally say to both leaders, my Kenai Peninsula is on fire. That is where I want to go fishing next week, too. So there is a disaster and the urgent call of the pink salmon to respond to.

I pledge myself to work even harder than Senator REID does to find some way to constrict this time so we can vote on this and get it to the House and bring it back so we can all vote on the bill. I will urge the leaders to let us have the reins for a few hours and see what we can do. I think we can finish this bill tonight.

Mr. LOTT. Madam President, under my reservation, I will propound as an alternative unanimous consent agreement the same proposal the majority leader has made, except that in the first paragraph under consultation with the Republican leader, I would add “may proceed immediately to the consideration of Calendar No. 76, S. 1077.” I make that in the form of a unanimous consent request.

The PRESIDING OFFICER. Is there objection?

Mr. DASCHLE. Madam President, reserving the right to object, I have offered this to our Republican colleagues now for several days. I have said, give me a definitive list that will allow us to finish our work on the Patients' Bill of Rights. We will proceed immediately to the supplemental and then return to the Patients' Bill of Rights with the understanding that we will complete work on that as well.

Unfortunately, our Republican colleagues have been unable to do that. My offer still stands. Give me a definitive list that we can complete before we leave, and I will go immediately to the supplemental. I have offered it privately to Senator LOTT. I have offered it to our other colleagues. That offer still stands. Until we get that assurance, I will object.

Mr. LOTT. Under my reservation, I have one inquiry. I thought we had a definitive list. It may be big, but I thought we had a list of amendments still pending out there. Mr. HATCH, I have not seen it.

Mr. LOTT. We will work on that.

The PRESIDING OFFICER. Is there objection to the original request?

Mr. REID. While the two leaders are here, if I may chime in, first of all, Senator DASCHLE has read the importance of this supplemental. If it is as important as has been read into the RECORD, it would seem to me the House should hang around a little while longer.

I say to the Republican leader and our majority leader, I haven't seen a list of amendments. Everybody knows we have just a few important amendments to finish the Patients' Bill of Rights. If we are given a list of amendments that is large in number, I don't think that is in keeping with what I think should be the general agreement to finish the legislation. If we are given a list of 10, 20, 30, 50 amendments, I suggest to the majority leader, that is not the consensus of the legislation. We have a few amendments left to go.

Mr. LOTT. If Senator DASCHLE will yield to respond briefly, I thought you had been given a list. I am going to make sure you have it and then we can evaluate that and work on it.

Mr. DASCHLE. Madam President, I object to that. Obviously, I have to consult with the managers of the legislation on our side about the amendment list, which is very long, and I have it now, and about what is possible in terms of completing it. I don't think it is possible at all to set an arbitrary time, in view of the very serious amendments that are pending on the Patients' Bill of Rights. So I object to that request.

Mr. LOTT. Madam President, I object to that. Obviously, I have to consult with the managers of the legislation on our side about the amendment list, which is very long, and I have it now, and about what is possible in terms of completing it. I don't think it is possible at all to set an arbitrary time, in view of the very serious amendments that are pending on the Patients' Bill of Rights. So I object to that request.

Mr. STEVENS. Reserving the right to object, Madam President, I am constrained to say with due respect to the majority leader and the majority leader and majority whip, I find it very difficult to deal with the concept putting ahead of this supplemental the completion of two very controversial items. We know the House is going home, and having spent 8 years here on the floor as leader, I can tell you I have never seen the time when any Senate could dominate the House. We have a bipartisan agreement to go home. They have told me they will stay if we get this bill done and over there today.

I do believe that the interest of national defense should come ahead of concepts that are dealing with here in terms of whether it is the Patients' Bill of Rights or organization of the Senate. We know they told they cannot train in July and August unless we get this bill done this week. It is not something on which we have been dilatory. We have been trying for a long time.

I have great respect for the leader and the assistant leader, but I cannot stay silent and have a concept that because the leader has stated these things must be done, they must be done before the supplemental is brought up. That is unacceptable to this Senator. I think it is unacceptable to the Senate. I hope it is.

I say with great humility now that the needs of our people in the armed services must come ahead of concepts of scheduling or prerogatives here on the floor. These needs are very real. We have twice held hearings now where the chiefs have told us what is going to happen if this bill is not signed by the President before the Fourth of July.

Even the concept of taking up and putting it now and letting it wait for the House to come back is unacceptable to me because, again, we all travel and we know you can't let the House go home and expect they will come back
here on July 3 just before the Fourth of July. You can’t travel in this country that easy during that period.

So, Mr. President, let us proceed with this bill. We should put aside all other desires. There is no timeframe on the Patients’ Bill of Rights that matters to this country. It is a bill that must be passed, and I am going to vote for it. But it does not have the urgency of this supplemental.

This supplemental deals with more than that. It now deals with matters that are emergencies coming out of the disasters that have happened in this country this spring.

I hope the leader will accept my comment that I mean no offense to him. I have served under several leaders, and I admire both Senator DASCHEL and Senator REID for what they are doing. But this is an undue delay in terms of a request that has come on a bipartisan basis to put this bill aside for a few hours and pass a bill as important to the military of this country as is this supplemental.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DASCHEL. Madam President, I remind my dear friend and colleague, the Senator from Alaska, in 1999, we took up the Patients’ Bill of Rights under a unanimous consent request and passed it in 4 days, with 17 amendments. Now we are told we can’t do it in 2 weeks. While we may differ on whether the supplemental is more or less important than the Patients’ Bill of Rights, I would hope we could all agree that completing action before we leave on a supplemental dealing with the safety of our troops is a top priority. The Pentagon places an extraordinary priority on this legislation—so much so that the Commander in Chief called to make sure that it be done this week. Certainly we can agree it is more important than fishing or any other kind of vacation we could be taking next week. While there may be some differences on other issues, I would think there would be unanimity that getting the supplemental done is more important than taking a vacation.

So that is what the issue is. We are not going to take a vacation until we have completed action on the supplemental. We are not going to leave until this is done. This is something that not only has been requested by the Pentagon but by the Commander in Chief as well; I would hope if the President makes additional calls, he will call the House and say: Don’t leave until we get this done. You have heard the Pentagon. Don’t leave until this is done. Vacations are secondary to work. We have to get it done.

I yield the floor.

Mr. STEVENS. Reserving the right to object, that is a little bit of a cheap shot. I am not talking about a vacation. I am willing to stay here as long as any other Senator. I am talking about the realities of the House. Leader, I am not going to forget that. That was a cheap shot, and for the time being, I object to the request.

The PRESIDING OFFICER. Objection is heard.

The AMENDMENT NO. 83

The PRESIDING OFFICER. Who yields time on the amendment? The Senator from Missouri.

Mr. BOND. Madam President, I reserve the remainder of my time. I believe there is more time on the other side. I want to give the other side another 19 minutes, but I believe we only have 2 minutes. I reserve those 2 minutes for the end of the debate, and I do have a couple of minutes after they have had an opportunity to present their views.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Madam President, with the consent of Senator KENNEDY, I yield myself such time as I may consume recognizing the Senator from North Dakota wishes to be recognized. I will not take long.

Many years ago, before I came to Congress, I practiced law. I was a lawyer. I was a trial lawyer. I am very proud of that fact.

With that brief background, I received a call last night from a lifetime friend. I have not talked with him in a while, but we went to high school together. We played ball together. We were inseparable friends. He did not have my phone number. I had moved. He called my office and said it was urgent.

He called because his son was in trouble. Why? Because they had hired a cheap lawyer. His son was in trouble, and he hired the cheapest lawyer. The young man is now in jail.

My friend from Missouri is a lawyer, a fine lawyer, I am sure. I refer to the pending amendment as the “cheap lawyers amendment.” You cannot find decent lawyers to take a case for 15 percent. Almost 50 percent of the cases in our Federal court system take 4 years to litigate, with files stacked as high as my desk. People work to prepare those papers representing people who are injured, hurt, and need an attorney. That is why we have contingent fees. It is hard to find lawyers to take even a good contingent fee case because they have to consume so much time and effort.

Of course, there are some people who are paid too much. I am sure, because they put in the time and it is a contingent fee. I sold my home in Virginia within the past year. The woman who sold my home was a good realtor. I tried to pay her a cent. I signed a contract with her. She made a ton of money on my home. She worked about a week. I don’t know, but she probably took a lot of time off during that week.

My home sold in a week. She made a lot of money for the few hours she spent on my home, but that is the way America works.

If we have people who need help, we need to have the full panoply of lawyers available so they can get a good lawyer.

My friend from Iowa had a chart and pleaded off medical bills: These people are going to get their medical bills. Well isn’t that too bad. If someone does something wrong, should they not pay your medical bills? Do you need to have a lottery, as he says, a lottery to get your medical bills paid? I hope not.

We have heard mentioned several times, if we are concerned about attorney’s fees, how much are these attorneys for these big HMOs making to prevent people from getting medical care? Let’s talk about that.

We talk about these cases in the abstract, but the fact is that attorneys, whom everyone wants to hate, are necessary; they help. I am proud of the fact I was a lawyer. I have four sons. Everyone of them is a lawyer, and I am proud of the fact that they followed in the footsteps of their father. My daughter is a schoolteacher. She married a lawyer. I am very happy for that.

We do not have to be shameful, concerned, or embarrassed about some lawyers getting paid a contingent fee. That is how people who are injured and hurt are allowed to take those cases.

Fifteen percent will discourage representation by good lawyers. My friends on the other side of the aisle talk about the sanctity of contracts. Why do we want to step in and tell States what lawyers can be paid based on a contract they get?

This amendment is only to protect HMOs as all the amendments on the other side, to try to derail this legislation. This amendment is a frivolous amendment. It has nothing to do with the merits of this legislation.

Mr. DORGAN. Mr. President, will the Senate from Nevada yield?

Mr. REID. I will be happy to yield to my friend from North Dakota.

Mr. DORGAN. The Senator from Nevada and I had a brief discussion previously about this issue. He is correct that this amendment attempts to limit the liability of patients to hold HMOs accountable.

The discussion by those on the other side who have offered this amendment talks about lawyers in a pejorative way on behalf of patients. Does the Senator know of any attempts by those who have offered this amendment to limit HMOs, managed care organizations, from using attorneys, or is this just saying we will limit patients from using an attorney to go after a managed care organization that did not provide the care they promised, but we will not limit managed care organizations from using attorneys to do whatever they want to do?
Mr. REID. Madam President, I answer as follows: Of course, there is nothing in the way of amendment to limit what attorneys for these wealthy, big, sometimes brutal HMOs are paid. But remember, I say to my friend, that people who are seeking help from a lawyer are looking for a lawyer who will do it not on an hourly basis but who will do it on what is called a contingent-fee basis. They have no money to hire one of the big HMO lawyers, so they look around and find somebody who will take their case on a contingent-fee basis.

I say to my friend, a 15-percent contingent fee will not get a good lawyer. It will be like my dear friend who called me last night. In effect, the client will not wind up in jail but will end up with no compensation.

Mr. DORGAN. I ask my friend from Nevada to yield further for a question.

Mr. REID. I will be happy to yield to my friend for a question.

Mr. DORGAN. Is it not the case that this entire process, this debate on the Patient Protection Act, is an attempt to balance things a bit; that patients do not have the ability to confront a big managed care organization?

The Senator from Nevada knows the story we have talked about coming from his State: Christopher Roe, a circumstance where a 16-year-old boy was fighting cancer at the same time he was fighting his managed care organization for treatment and care he needed. That is not a fair fight, asking a young boy to fight an insurance company and fight for his life at the same time. That young boy lost his life on his 16th birthday.

The question is, Do those patients and their families have the right to get an attorney to hold the managed care organization accountable to deliver the care they promised? Do they have that right?

We have an amendment pending that says: No, we are going to limit the rights of the patients, we are going to limit the rights of citizens, but we are not interested in limiting the rights of the managed care organizations because we want to stand for them rather than standing for patients, and that is the issue.

Mr. REID. In answer to my friend, I have a CRS report that talks about awards of attorney's fees by Federal courts and Federal agencies. It is big. I know of no other Federal attorney fee statute that affects a State system.

This amendment is wrong. I appreciate very much my friend from North Dakota, who is not a lawyer, standing up and speaking for the injured people and the potentially injured people of America.

Mr. KENNEDY. Madam President, I ask for 3 minutes.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Madam President, I rise in opposition to the amendment that has been offered. We have seen the efforts of the HMOs to undermine this legislation in different ways over the last few days. We are unable to bring this matter up for consideration by the Senate and get full consideration of the bill when we wanted to. This happened even during the last term when a majority of the Members would have supported a good, tough, effective Pa- tients' Bill of Rights. We have seen over the past days constant efforts to undermine this legislation.

We see another effort to try to appeal to the Members about the excessive- ness of decisions made in the courts to reimburse individuals in terms of wrongdoing by other industries.

The fact is, as we are reminded by our colleagues, we have spent 3 days talking about the sanctity of the contract between the patient. We have had amendment after amendment saying, look, this is enormously important. We do not want to permit any changes in that contract. We want to stick with that contract. We want to stick with it. Not only with the Senator's amendment we are saying basically that we are going to ride roughshod over contracts that are decided, permitted, and authorized by law in the States between attorneys and their clients.

I have listened a great deal to talk about how Washington doesn't know best; how we don't want just one solution to solve all of our problems. We had that debate early this morning and last night. We now have one solution: to override States in terms of what decision the States make for compensation going to court.

The fact is, how many working families, and how many middle-income families are able to go out and hire lawyers? For the time it will take to get some kind of recovery after they have been wronged, how many are going to be able to do that and follow this through the State courts? How many will be able to do it after they have been hurt, after their child has been disabled, after a wife or husband has been killed? How many? Very few. The fact is, they are not going to be able to be compensated unless they are able to convince a jury they are right, that there has been wrongdoing.

Does that bother people in the Senate? Evidently it does. There are only a very few Americans who can afford the high-priced lawyers to go into court and pursue this. This amendment undermines it for the rest of the people. It undermines it for working families, undermines it for middle-income families. That is the record. That is what has been done.

It doesn't surprise me. We have seen the powerful special interests over turn ergonomic regulations which were there to protect working families. Then we have the undermining of funding for the enforcement for protecting our air. There has been undermining of funding for protecting OSHA, effect- ively cutting back on the protection for workers. We are undermining regula- tions to protect workers, undermining the enforcement mechanism to protect consumers, and now they want to take this right away from individuals who will be harmed because of HMOs.

It is a common pattern. It is all tar- geted by the major financial special inter- ests versus the consumer. That is what this is about. They don't like to hear about it. They keep offering amendments that are couched in other language about all the people that will be unemployed. However, it is the power of the HMOs against the little guy.

This amendment says the little guy will not be able to defend their inter- ests in court. That is what this is about.

Make no mistake. They can't deal with us in giving protections to the consumers. They are going to take them away by denying them the rights to hold them to force them. That is what this is about.

Expect that after we have this per- centage, it will go a little higher, and then try to go even higher. Every time it does, it is an insult to middle-income and working families and individuals who will be harmed. Make no mistake, it is another assault on the funda- mental protections of this act. That is what this amendment is about. I hope it will be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. BOND. How much time remains?

The PRESIDING OFFICER. The Senator from Missouri has 3 minutes.

Mr. BOND. I want to respond. Does the other side desire more time?

Mr. KENNEDY. I don't, no. It depends on what the Senator says. We don't intend to at this time.

Mr. BOND. How much time remains on the other side?

The PRESIDING OFFICER. Five and a half minutes.

Mr. BOND. I yield myself the remaining time. I think some of the things that have been said deserve to be an- swered.

Our efforts are not to undermine a bill but to deal with very bad provi- sions in the bill which skipped the committee, did not go through committee markup. We are marking up a bill now which we should have marked up in committee. It has come to the floor and we are a committee of the whole.

There are things that are in there that are very bad for patients, employ- ees, particularly of small business. Why are we inserting the Federal Gov- ernment into restricting attorney's fees? The States in this Nation have limited attorney's fees because they recognize the abuses of the trial law- yers. Under this bill, we are inserting
June 28, 2001

CONGRESSIONAL RECORD—SENATE

12313

the Federal Government into areas that the States have already acted on, and I do not want to risk them and provide limits on the amount that trial attorneys can take so the injured party can recover.

We have heard about the powers of special interests. Let me state who the special interests are that have a big stake in this, the four top trial lawyer PACs: Trial Lawyers Association of America; Williams & Bailey; Ness, Motley; and Angelos Law Offices, have given over $8 million, more money than all the HMOs together have given in politics.

If you want to talk about special interests, there are special interests on the other side, as well.

We believe the measures we brought forth are good for employees; for people who do not only want to be able to appeal the decision of an HMO, but they want to have health coverage.

Somebody suggests there have been problems with fee structures. They are not in this bill. We know from the State experiences that there can be a tremendous amount of wasted money.

I urge my colleagues to support this measure.

I yield to my distinguished colleague from Tennessee.

Mr. FRIST. Madam President, I rise in support of the Bond amendment. This is a Patients’ Bill of Rights and we should focus on the patient. We are talking about a patient who has been harmed or injured, gone through an appeal process and through the court. If there is a multimillion-dollar suit, it should be to help the patient, not to fund the pockets of the trial lawyers.

This is not a Patients’ Bill of Rights, not a trial lawyer bill of goods.

Mr. KENNEDY. Madam President, every time you pay the HMO lawyers, that comes out of patient protections. So the point raised is, if you put a limitation on the trial lawyers because they are going to get the benefits, why not put a limitation on the attorneys for the HMOs so it doesn’t come out of patient protections?

But they won’t do it. They won’t do it.

I yield the remainder of our time.

Mr. REID. What is the matter before the Senate now?

The PRESIDING OFFICER. Amendment No. 831.

Mr. REID. All time is yielded back?

The PRESIDING OFFICER. Time has been yielded back.

Mr. REID. I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second. The question is on agreeing to the motion.

The clerk will call the roll.

The legislative clerk called the roll.

The result was announced—yeas 62, nays 38, as follows:

[Rollcall Vote No. 204 Leg.]

YEAS — 62

Alaska        DeWine        Lincoln        McCaskill

Bacon         Dodd         Mikulski

Bayh          Domenici      Miller

Biden          Dorgan        Murray

Bingaman       Dunham        Nelson (FL)

Boxer          Edwards       Nelson (NE)

Breaux         Feingold       Reed

Byrd           Feinstein      Reid

Cantwell       Graham        Rockefeller

Carnahan       Karrin        Sarbanes

Carper         Hollings      Specter

Chafee         Inouye        Shelby

Cleland         Jefford       Snowe

Clinton        Johnson       Stabenow

Collins        Kennedy       Thompson

Conrad         Kohl          Torricelli

Corzine        Landrieu      Warner

Crapo          Leahy         Wyden

Daschle        Levin

Dayton         Lieberman

NAYS — 38

Allard         Gramm         Mankin

Allen          Grassley       Nickles

Bennett        Gregg         Roberts

Bond           Rangel        Santorum

Brownback      Reich        Sessions

Buning         Rehling       Smith (NH)

Burns          hatchett       Smith (OR)

Campbell       Harrison       Snowe

Craig           Inhofe        Stevens

Emminger        Kyl          Thomas

Enzi           Lott          Thurmond

Fitzgerald      Lugar         Voinovich

Frist          Borenoff      Wyden

Mr. REID. Madam President, I move to reconsider the vote and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WARNER. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

Mr. REID. The PRESIDING OFFICER. Objection is heard.

The clerk will continue the call of the roll.

The assistant legislative clerk continued the call of the roll.

Mr. WARNER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

AMENDMENT NO. 831

Mr. WARNER. Madam President, in consultation with the managers of the bill, it has been indicated to me this will be an appropriate time for this amendment to be raised. I send it to the desk as I believe it be given immediate consideration. However, we have to set aside, as I understand it, the standing order with regard to the Snowe amendment, I first ask unanimous consent that it be set aside.

The PRESIDING OFFICER. Is there objection?

Mr. REID. Madam President, reserving the right to object—and I will not object—we have been in consultation for the last hour or so. Senator Snowe of Maine is in the process of having her amendment drafted. She is a half hour away from being able to present something in writing that we can give to the Senator from New Hampshire. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER] proposes an amendment numbered 831.

Mr. WARNER. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To limit the amount of attorneys’ fees in a cause of action brought under this Act)

On page 154, between lines 2 and 3, insert the following:

‘‘(11) LIMITATION ON AWARD OF ATTORNEYS’ FEES.—

‘‘(II) IN GENERAL.—Subject to subparagraph (C), with respect to a participant or beneficiary (or the estate of such participant or beneficiary) who brings a cause of action under this subsection and prevails in that action, the amount of attorneys’ fees that a court may award to such participant, beneficiary, or estate under subsection (g)(1) (not including the reimbursement of actual out-of-pocket expenses of an attorney as approved by the court in such action) may not exceed the sum of the amounts described in subparagraph (B).

‘‘(B) AMOUNTS DESCRIBED.—For purposes of subparagraph (A), the amounts described in this subparagraph are as follows:

‘‘(i) With respect to a recovery in a cause of action described in subparagraph (A) that does not exceed $100,000, the amount of attorneys’ fees awarded may not exceed an amount equal to ¼ of the amount of the recovery.

‘‘(ii) With respect to a recovery in such a cause of action that exceeds $100,000 but does not exceed $500,000, the amount of attorneys’ fees awarded may not exceed an amount equal to 25 percent of such excess recovery above $100,000.

‘‘(iii) With respect to a recovery in such a cause of action that exceeds $500,000, the amount of the attorneys’ fees awarded may not exceed an amount equal to 15 percent of such excess recovery above $500,000.

‘‘(C) EQUITABLE DISCRETION.—A court in its discretion may adjust the amount of an award of attorneys’ fees required under subparagraph (A) as equity and the interests of justice may require.

On page 170, between lines 21 and 22, insert the following:

‘‘(9) LIMITATION ON ATTORNEYS’ FEES.—

‘‘(A) IN GENERAL.—Notwithstanding any other provision of law, or any arrangement, agreement, or contract regarding attorneys’ fees subject to subparagraph (B), a court shall limit the amount of attorneys’ fees that may be incurred for the representation of a participant or beneficiary (or the estate of such participant or beneficiary) who brings a cause of action under paragraph (1) to the amount of attorneys’ fees that may be awarded under section 502(n)(11).

‘‘(B) EQUITABLE DISCRETION.—A court in its discretion may adjust the amount of attorneys’ fees allowed under subparagraph (A) as...
CONGRESSIONAL RECORD—SENATE
June 28, 2001

Mr. WARNER. Madam President, I will do something unusual. I am actually going to read the amendment myself, because I think that colleagues and those observing floor operations from their offices can have a clearer understanding of exactly what is in the amendment.

Further, I do not desire to consume a great deal of time in the debate because we have just had a very thorough debate on the generic subject of attorney's fees. Therefore, the Senate has pretty well framed in their minds the parameters in which they will or will not accept an amendment that has the effect of, in my judgment, preserving a reasonable amount of attorney's fees and at the same time allowing such awards as those attorneys obtain for their clients to be given; again, with the thought that it is a Patients' Bill of Rights and they have a right to get a reasonable amount of such recovery as is obtained from them.

I shall read from the amendment—it is very short—I say a few words, and then rest my case.

On page 154, insert the following: Limitation on award of attorneys' fees—

(A) In general.—Subject to subparagraph (C), with respect to a participant or beneficiary who brings a cause of action under paragraph (1), the amount of attorneys' fees that a court may award to such participant, beneficiary, or estate under subsection (g)(1) (not including the reimbursement of actual out-of-pocket expenses of an attorney as approved by the court in such action)—

In other words, that would be awarded by the court without any restriction except to the court itself—may not exceed the sum of the amounts described in paragraph (2)

The sums I am about to recite, we carefully researched all types of actions similar to this to get a scale of attorney fees which I felt was clearly reasonable.

(B) Amounts Described.—For purposes of subparagraph (A), the amounts described in this subparagraph are as follows:

(i) With respect to a recovery in a cause of action described in subparagraph (A) that does not exceed $100,000, the amount of the attorneys' fees awarded may not exceed an amount equal to one-third of the amount of the recovery.

In years previous to coming to the Senate and on various jobs, I was actually a member of the bar and practiced law. I was assistant U.S. attorney in a modest trial practice myself. That has sort of been a standard for many years in the bar, the one-third.

(ii) With respect to recovery in such a cause of action that exceeds $500,000, the amount of the attorneys' fees awarded may not exceed an amount equal to 15 percent of such excess recovery above $500,000.

(C) Equitable discretion.—A court in its discretion may adjust the amount of an award of attorneys' fees required under subparagraph (A) as equity and the interests of justice may require.

In other words, a judge may look at this fee schedule and decide, this particular counsel has done a great deal of work and therefore, I believe I should raise his fee within the parameters of the section itself.

Further:

(9) Limitation on Attorneys' Fees.—

(A) In general.—Notwithstanding any other provision of law, or any arrangement, agreement, or contract regarding attorneys' fees, subject to subparagraph (B), a court shall limit the amount of attorneys' fees that may be awarded as the representation of a participant or beneficiary who brings a cause of action under paragraph (1) to the amount of the attorneys' fees that may be awarded under section 502(n)(11).

(B) Equitable discretion.—A court in its discretion may adjust the amount of attorneys' fees awarded as described in subparagraph (A) as equity and interests of justice may require.

This amendment simply sets, in my judgment, a reasonable category of fees. I have tried, as best I can, not to tread, by virtue of States rights, on the rights of the States to administrate its own bar and the like. I felt that discretion should be given to the trial judges, Federal and State, such as they can adjust that schedule of fees as they see fit.

The Senate, again, has, in a very thorough discussion under the Bond amendment, covered these issues and has in mind, again, its own framework wherein we can legislate on this matter by amendment or not legislate.

At this point, I yield the floor.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Madam President, thank the Senator from Virginia for his efforts. I think there is an agreement that there needs to be a cap on attorney's fees. It is my strong sense and belief that if we had a cap of 33.3 percent that applied to Federal and State courts, that would be accepted by the majority of this body.

What I worry about is we just going back and forth with escalating amendments. There are very few benefits of old age. One of them is to remember what happened in the past. When we were doing the tobacco bill, we had amendment after amendment, a series of amendments, on caps on lawyer's fees. It got a little ludicrous. We finally had a majority vote for $1,000 an hour. It was clearly not an effort at legislating, but it was an effort at some kind of political advantage. I know that is not the intention of the Senator from Virginia.

I hope that once this is debated and, if it is not accepted, that perhaps we could move to an amendment after Senator Snowe's amendment that would be around 33.3 percent, State, Federal court, and end it. That is going to please everybody, but I think it would be something that we could all support and then get this issue off the table and get to the very important issues such as resolution of exhaustion of appeals that Senators Thune and Edwards are working on. On liability issues, Senator Frist has some important amendments, again, on liability issues, which we are narrowing down.

Hopefully, we can move forward. I thank the Senator from Virginia for his input.

Mr. WARNER. Madam President, if I might reply to my friend and colleague, there was no intention of the Senator from Virginia to repeat what is an historically important case on tobacco. I studied that case very carefully. There were three votes. My recollection is it was $4,000 per hour, at which time the Senate finally accepted. I would not participate in such a process. I just struck the first for the lower amounts of the recovery and basically scaled it to 25 and the other percentage as the rate of recovery increase. I would be happy to work with colleagues.

It goes to the question of just how much will be eventually given to the recipients who need these funds.

Mr. REID. Will the Senator yield for a question?

Mr. WARNER. Yes, of course.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. The Senator from Arizona and the Senator from Virginia are on the right track.

This amendment, with all due respect to my dear friend from Virginia, is really—we have another 15-percent limitation in here above a certain amount. I think that the most expeditious thing to do would be to set this aside, for the time being, and get some of the lawyers and nonlawyers to sit down and see if they can work out something acceptable to the managers. I am sure if it were acceptable to the managers, we could accept this.

I ask my friend from Virginia, who believes he has talked enough on this, that we withdraw this amendment, for the time being, in anticipation of working something out that is clear and can be agreed upon.

Mr. WARNER. That is exemplified by the leadership the Senator shows time and time again on this floor. I don't view this as a partisan issue. This is an honest effort by the Members of the Senate to recognize that individuals should be given their rewards, but the attorneys should be given fair compensation. Therefore, Madam President, unless other Senators wish to speak at this time, I will—
Mr. McCAIN. If the Senator will yield, I say to my colleague from Virginia, the outcome of this amendment is not to the Senator's satisfaction, then I hope we can enter into negotiations that on a reasonable level—again, I just plucked 33 1/3 percent because it is in there in one category, across the board, simple, two lines, and perhaps move on.

I know the Senator from Virginia, as well as the rest of us, doesn't want to be hung up on a series of votes that are iterations over the same issue. It seems that we can sit down and come to some reasonable agreement, which the other side of the aisle would strongly resist applying to State court, and this side would resist it on Federal court. It is something to have a substantial majority vote for. I hope the Senator agrees to enter into those negotiations.

Mr. WARNER. Madam President, I ask for the yeas and nays before I take the action.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. REID. Madam President, if the Senator really wants a vote on this, we will be happy to give it to him right now. I don't think it is the right thing to do. I suggest to the manager and my friend from Virginia, why don't we set this aside for a few minutes to see if we can work something out to get the matter resolved. I think as the Senator from Arizona indicated—

Mr. WARNER. I am agreeable. I ask unanimous consent that this amendment be set aside.

The PRESIDING OFFICER. Without objection, the amendment is set aside.

The Senator from Nevada.

Mr. REID. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. CLINTON). Without objection, it is so ordered.

Mr. REID. Madam President, it is my understanding, under the order that is in effect, we will go to the Snowe amendment with the purpose of offering the amendment under a 4-hour time agreement.

The PRESIDING OFFICER. The Senator is correct.

The Senator from Maine.

AMENDMENT NO. 834

(Purpose: To modify provisions relating to causes of action against employers)

Ms. SNOWE. Madam President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine (Ms. SNOWE), for herself, Mrs. LINCOLN, Mr. DEWINE, Mr. NELSON, and Mr. McCAIN, proposes an amendment numbered 834.

Ms. SNOWE. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is located in today's RECORD under "Amendments Submitted.")

Ms. SNOWE. Madam President, I rise today to offer an amendment along with my colleagues Senator DeWINE, Senator LINCOLN, and Senator NELSON, who worked so hard, so diligently in crafting this compromise. Senator McCAIN and Senator SPECKER are co-authors of this amendment.

The amendment we are offering today is designed to bridge the gap that exists between the supporters of the McCain-Edwards-Kennedy approach to employer liability in the Breaux-Frist-Jeffords bill. I commend Senators McCAIN, EDWARDS, and KENNEDY for their willingness as well as their patience to work with us on resolving the many issues that are associated with employer liability.

Everyone involved has had the same goal essentially, and that is to protect employers from liability when they are not participating in making decisions concerning the health care of employee beneficiaries.

The discussion has really focused on how best to achieve that goal. This is an incredibly complex liability issue that has far-reaching consequences, and everyone who has been part of this discussion and this effort to reach this consensus recognizes that fact and has worked in good faith to arrive at a solution that we can live with and, more importantly, employers can live with and not denying care that patients rightly deserve.

This is an issue that is significant on a number of different levels. First of all, to what extent will employers that voluntarily offer health insurance be exposed to liability. To what extent will employers be involved in the decision-making process in terms of the provisions of health care for their employee beneficiaries, and perhaps more important, will patients have legal recourse should they have a grievance concerning the care they receive through their health care plan?

The goal we all share in designing and crafting this amendment to the McCain-Kennedy-Edwards legislation is how best to protect patients for their medical care without creating an expansive bureaucracy adding to the cost of providing that health care and generally creating an incentive to drive away employers from providing health care to their employees which, as I said earlier, they do so on a voluntary basis. We should be commending employers for providing these benefits, not penalizing them.

We should also take great care to write a provision under which employees remain insured through their employers while also protecting the employees' rights under their health insurance plans. What we do not want to do is create unintended consequences for employers by leaving legal questions open that can leave employers exposed to liability over matters in which they have no control and over matters in which they have not participated and having the resulting decision.

That is all the more significant when we realize there are more than 45 million Americans who remain without any insurance, and of those who have insurance, employers voluntarily provide health coverage to more than 172 million Americans. Obviously, what we do today is significant, and it will matter.

We cannot afford to have employers suddenly opting out of providing insurance to their employees because we do not want to create the unintended consequence that adds to the rolls of the uninsured in America. I think that is something on which we all can agree, and that is a very real risk. In fact, there was a recent poll taken of businesses in America, and it said that 57 percent of small businesses said they would drop coverage rather than risk a lawsuit.

As one businessman in my State wrote to me recently:

We're not an HMO or an insurance company. We are an employer. We cannot afford the time, expense, and aggravation of litigation. And, please, make no mistake, that is what this is about.

So we approach the issue of reconciling the differences between the two approaches by addressing the question: What language will deliver us to that mutual goal? We assess what was really the best qualities of the McCain-Edwards-Kennedy legislation, as well as the Breaux-Frist-Jeffords issues.

Ultimately, the solution we came to was a melding of the two approaches. The result was to provide employers with varying levels of liability protection depending on their involvement in the decisionmaking process but regardless, patients will have the legal recourse they deserve, no matter what.

There are many other issues that need to be resolved in this legislation. I realize this represents one facet, the liability question, that has been raised by others with respect to this legislation, and this is not intended to address all of those questions, but clearly it does address a most important issue when it comes to subjecting employers to litigation and liability.

Let me take a moment to explain the differences between the McCain-Edwards-Kennedy legislation and the Breaux-Frist-Jeffords approach and the approach we are taking in the amendment we have offered to S. 1052 and
how our amendment affects the underlying legislation and addresses the concerns that have been raised about the net legal impact on employers.

Essentially, there are several categories we are attempting to address today when it comes to employer-sponsored health care insurance.

First, there are employers that contract with an insurance company that, in turn, pays beneficiary claims and administers the plans and the benefits.

Second, there are employers that fund a plan but leave the actual administration of the plan to an outside entity, generally an insurance company.

Third, there are those who both self-insure and self-administer, in essence creating their own insurance company within their existing business.

The McCain-Edwards-Kennedy legislation as written allows a suit against any employer if it directly participates in a decision that harms or results in the death of a patient. Direct participation is defined as the actual making of a medical decision or the actual exercise of control in making such a decision or in the conduct constituting the failure.

The bill then goes on to offer specific circumstances that do not constitute direct participation, including any participation by the employer or other plan sponsor in the selection of the third party administrator or other agent, or any engagement by the employer or other plan sponsor in any cost-benefit analysis undertaken with the selection of or continued maintenance of the plan or coverage involved.

While the bill language does not provide an exhaustive list of exceptions, it does allow an employer to offer into evidence in their defense that they did not directly participate in decisions affecting the beneficiaries of the health care plan.

That suggests while employer protections would be provided under the legislation, an employer would still have to go to court to make its defense. As with any such legal language, direct participation obviously can be open to legal interpretation, and that precisely is the circumstance which we are seeking to avoid and prevent.

Under the Breaux-Frist-Jeffords legislation that was introduced, the language provides for a designated decisionmaker, or DDM, which in most cases would be the insurance company an employer contracted with to be the party to administer medical decisions and, therefore, the party could be subject to liability. In other words, the employer would designate the DDM as the responsible party to shield itself from that liability. If an employer chose not to designate a DDM, they would have no protection from that liability.

An argument that has been made against the Breaux-Frist-Jeffords legislation is if the DDM is a person designated within a company that self-insures, for example, they could under the existing law escape liability by claiming that ultimate decision came from the employer; that they, as a DDM, did not make a final decision on a particular beneficiary’s case. In an effort to improve the Breaux-Frist-Jeffords legislation, that when a contract is signed with the employer, the DDM cannot mount any such defense, that somehow they defer the liability, defer the suggestions that the employer somehow participated in making the decision.

In an effort to improve the employer liability provisions, we encompassed key provisions of both models in the legislation while addressing their inherent weaknesses so we can attain our shared goals.

First, our amendment allows employers that turn their health care coverage to outside insurance companies, that their insurance company will automatically be their designated decisionmaker unless they specifically choose not to have a DDM. This is built directly on the Breaux-Frist-Jeffords model in which the decisionmaking authority shifts to the DDM, which will in most cases be the insurance company. Under this approach, an employer would not have to take the extra steps to secure a designated decisionmaker and would not be required to go to court to file papers or to make defenses against any actions they may have taken. In other words, they would not have to do anything different than what they are doing today with a contract with an insurance company.

When they sign up with an insurance carrier that will provide benefits to their employees and administer the benefits, they are signing up with, essentially, a designated decisionmaker, and they are signing up as well for a safe harbor from liability in both medical as well as contractual decisions.

Where we depart from the existing Breaux-Frist language is we clarify since the DDM, which is also the insurance company, has assumed full responsibility at the time the employer and the insurance company signed a contract, the designated decisionmaker would be prevented from turning around and assigning the employer for some failure that resulted in a lawsuit from a beneficiary. In other words, the dedicated decisionmaker can’t transfer liability to the employer because of something the employer does or failed to do.

The legislation we have introduced today to modify the McCain-Edwards-Kennedy legislation delineates specifically the responsibility to the employer to assign liability to a dedicated decisionmaker which will, in all likelihood, be your insurance company when you sign your contract with your insurance company. There is
nothing more you need to do to protect your business from liability for the decisions that arise.

For those self-insured and for those who do not self-insure as an employer, you would still have the protections afforded under the underlying legislation if you don’t directly participate in those decisions. In other words, employers who contract out their health insurance have a clear choice under our amendment, although once again I stress that under this amendment patients will still have the legal recourse regarding questions over appropriate medical care and medical decisions related to the beneficiary’s plan, no matter which option the employer chooses.

The bottom line is we seek to protect employers from liability in cases where they are not making the medical decisions, and not that represents or result in death while still protecting parents rights, which after all is the goal of this legislation.

Finally, let me assure my colleagues, under this amendment, dedicated decisionmakers and policies are not required to demonstrate that they are financially capable of fulfilling their responsibilities as the party liable in causes of action. They could not be shell entities or sham individuals or organizations without the ability to actually pay the event of lawsuits.

The criteria the Secretary of Health and Human Services will require relating to the financial obligations of such an entity for liability should also include an insurance policy or other arrangements secured and maintained by the dedicated decisionmaker to effectively insure the DDM against losses arising from professional liability claims, including those arising from services provided by employees.

A DDM would have to show evidence of minimum capital and surplus levels that are maintained by an entity to cover any losses as a result of liability arising from its service as a designated decisionmaker. It would have to show that they themselves have coverage adequate to cover potential losses resulting from liability claims or evidence of minimum capital and surplus levels to cover any losses.

Once again, I think we have designed an amendment that represents a workable approach, that addresses some of the more serious and significant concerns that had arisen in the various pieces of legislation that had been introduced here in the Senate and with the underlying legislation we are seeking to amend today.

We try to meld the best of both approaches, to balance the concerns of businesses that do seek to voluntarily provide this most important, critical benefit to their employees. That is an incentive we want to maintain and re-inforce in every possible way. But we also understand there are going to be those circumstances in which the employee has received inappropriate care that has resulted in significant harm, injury, or even death, and that they would have to seek legal redress for that inappropriate care or denial of care. That is the kind of consideration we want to ensure in this legislation, without creating the unintended consequences or the disincentive for employers to say we just simply cannot afford to provide this health insurance for our employees anymore because we are going to be subject to litigation, to endless losses, and we do not want to put ourselves in the position of that kind of exposure.

I think this approach has been examined on both sides of the political aisle. More important, I think it has been embraced by this bipartisan group in the Senate, my colleague Senator Snowe, based on the premise I had laid out to Senator Lincoln whom I see on the floor, and Senator Nelson. They have worked very diligently on behalf of this amendment to assure that we address all facets, all potential implications and ramifications associated with this approach, to hopefully address it in a way that will ultimately yield the best effect for both the employer as well as the employees.

I yield the floor. I will be glad to yield time to my colleague.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. DEWINE. Madam President, let me thank my colleagues, Senator Snowe and Senator Lincoln, whom I see on the floor, and Senator Nelson, who have worked long and hard on this amendment.

The issue in front of us today is how do we help shield businessmen and businesswomen from liability at the very core of how they operate. It is to go to the courts for people to sue HMOs. Everyone I think agrees, one of the things we worry about as we deal with this legislation is that we will do something that would cause businesses in this country to decide not to insure employees. That would be a very bad unintended consequence, so we have to be very careful as we write this legislation.

The amendment in front of us today is really a compromise. It is a compromise on the Frist-McCain bills. It is a compromise on the issue of employer liability, how we best protect the employers while at the same time ensuring people their right in court. I think we have really blended these bills. I think we have the best of both worlds. The situation and the language are clarified and made simpler.

We started this debate with some basic principles on which everyone agreed. In both bills we agreed we wanted to try to protect businesses. But at the same time we wanted to allow suits in limited circumstances against HMOs. The President agreed to that principle, and the two underlying bills do as well. This amendment, I believe, achieves that. This amendment effectively takes out 1 percent of business providers that provides them great protection. When you compare our amendment versus the underlying bill, it helps and improves the situation for the other 99 percent. We will talk about that in a moment.

My colleague from Maine has talked about this concept of the designated decisionmaker. What do we mean by that? What we mean is let’s just make it simple and let’s make it plain; let’s have the employer say who is going to make those decisions and therefore who will be sued. In essence, what we are saying is once that decision is made, that employer is no longer going to be subject to suits; the designated decisionmaker will be.

How will this work in the real world? Let’s say we have a small hardware store in Greene County, Ohio. They say they employ 12 people, and let’s say what they do is they provide some health insurance and they do that by going out in the market, finding the best deal they can, and buying this group coverage for their 12 employees. Under this amendment, if they contracted with that insurance carrier, they would have automatically made that designated decisionmaker decision. They would have designated that automatically, that group as being the designated decisionmaker. They would have to do nothing. They cannot make a mistake. It takes no affirmative action on their part. That is going to improve the language we have in front of us.

The other way of doing it, the way the underlying bill did it, was to talk about direct participation. Frankly, I think the language in the bill was pretty good. But I think it needs to be improved. By having the designated decisionmaker, it is a lot more clear. What was open as a matter of law is this. As we all know, anybody can sue anybody. We cannot prevent suits, but we certainly can discourage them, and we certainly can provide when suits are filed against a business, the business has the ability to get out of that lawsuit very quickly. So by using the concept of the designated decisionmaker, as a practical matter, if a suit were brought against a businessperson, if a lawyer were foolish enough to file that suit, the business would simply have to go into court and file a copy of that designated decisionmaker decision and would be dismissed from the case. As a practical matter, this language significantly improves the underlying bill and will make a big difference.

Our amendment does build on the two bills in front of us, the two bills we have been talking about and have been considering, the Frist-Breaux bill and the underlying bill we have in front of us today, the McCain-Kennedy bill.
I believe our amendment would protect business owners from needless lawsuits as well as protect patients who rely on employer-sponsored health care plans for their medical needs. I believe this amendment brings together the best of all worlds by providing certainty, much-needed certainty to employers, employees, and, yes, to health care providers. That is why we know that is desperately needed in any patient protection bill.

Based on the designated decisionmaker concept in the Frist-Breaux-Jeffords bill, our amendment would automatically, as I have indicated, remove liability from small business owners and shift it to health care providers or other designated entities. In addition, our amendment stipulates this designated decisionmaker must follow strict designated decisionmaker rules in order to be liable for the liability coverage. This means the designated decisionmaker could not be a straw man, cannot be a sham that has no ability to pay a patient in the event a lawsuit is filed and that damages and be able to satisfy those losses. Our language ensures that the designated decisionmaker cannot be a straw man, cannot be a sham that has no ability to pay a patient in the event a lawsuit is filed and that damages and be able to satisfy those losses.

In creating the designated decisionmaker process, it makes it easier for employers that provide health insurance coverage to be protected. We think that is a major step forward for businesses, and especially for patients.

I say that because the fear of being sued often becomes so great that employers simply stop offering health care coverage. We don’t want that to happen under this bill. We simply can’t let that happen. The reality is in this country that already there are more than 42 million Americans, including 10 million children, who have no health care coverage. The last thing we want to do is add to this number.

Our amendment greatly diminishes the likelihood that employers will stop offering health care coverage. Again, we believe it is the best of both worlds as it allows patients the ability to sue the designated decisionmaker on liability for the liability for a lawsuit. But at the same time it protects employers from unnecessary and costly lawsuits.

Under our amendment, employees would have the comfort of certainty and the comfort of knowing that the designated decisionmaker is ultimately responsible for health care decisions and, therefore, that individual or that entity bears the liability for a lawsuit. In another effort to keep employees insured, our amendment also adds language to the underlying McCain-Kennedy bill to limit the liability of businesses to self-insure and self-administer their health care plans. The fact is that these employers are assuming additional by choices by not by administering health care coverage to employees. To that extent, I believe we must take our unique circumstances into consideration. This amendment does that.

Ultimately, our objective is to encourage employers to offer and to continue to offer their employees health care coverage. We don’t want to discourage them out of fear that they will be sued.

The reality is that these self-insured and self-administered plans are doing some very good things for their employees. We want them to continue to do these good things. Our amendment will help them keep their employees, their families, and their children insured. That is what the Patients’ Bill of Rights should be all about.

Further, our amendment improves the original Frist language by making it clear exactly who is liable. The amendment eliminates ambiguity because it would not allow the designated decisionmaker to be broken into sub-decisionmakers. One, and only one, entity would be the sole bearer of liability. We think that is an improvement.

Finally, our language would strike vague and ambiguous language in the underlying McCain-Kennedy bill that is of great concern to employers. This language is a catch-all section of the bill that could open employers to a flood of lawsuits simply because of the imprecise nature of the language.

Let me read the exact language currently in the McCain-Kennedy bill in regard to the cause of action relating to provisions of health benefits. There is (ii) section. This is what is in the definition section it draws union plans in, and they are being given a special status which is really higher than a self-employed plan is given. I am wondering why union plans are suddenly being raised to a special status under the amendment. Mr. DeWINE. I would be more than happy to answer the question.

In the original language that we have been working on this issue as well. It does not deal with the class action issue. I intend to have an amendment later today or tomorrow in regard to the class action issue.

We want to say what it does. It helps businesses do the right thing. It encourages people to continue to insure their employees. But there are many things it does not do.

I would be more than happy to yield to my colleague, Mr. GREGG. Madam President, I appreciate the Senator’s effort. I haven’t had a chance to digest all of it. I understand the intent and the thrust as described by the Senator from Ohio, which I think is appropriate and good.

As I look at the first section, I am wondering. It appears to me that under the definition section it draws union plans in, and they are being given a special status which is really higher than a self-employed plan is given. I am wondering why union plans are suddenly being raised to a special status under the amendment.

Mr. DeWINE. I would be more than happy to answer the question.

In the original language that we have been negotiating for the last few days, we could not figure out any way to really help the roughly 6 percent of businesses that self-insure and self-administer.

My colleague Senator LINCOLN has brought to our attention and businesses have brought to our attention the fact that this amendment as originally written really did not help those 6 percent. Why? Why originally didn’t it help? The basic problem is they do not have medical decisions. They are really effectively operating as their own HMO.

We thought about how to protect them and give them some help while at the same time preserving their employees’ rights to sue just as everybody else has. We came up with a compromise. My colleague Senator LINCOLN may want to get involved in this and explain it a little bit. But basically it
says for those self-insured, self-administered plans, we carve out a special exemption for them because of the special circumstances they are in. They are unions, and exempted from lawsuits brought in the Federal court on the nonmedical decisions based on the contract decisions. That is a break they are getting. We think it can be justified by what they do because we want to encourage them to continue to do what they do.

Why is the other group that you have mentioned included? They are included because they operate basically the same way the self-insured, self-administered businesses do. They basically take the risk. They basically make the medical decisions.

I appreciate the question, but I would disagree with my colleague the way he has categorized it. This is no special break to go out and get their health care, and then they come back and get their approval. And that exemption makes sense, but that exemption is not consistent with what unions do. So don’t come here and represent to this Senate that it is because it is not. You have raised the unions to a brand new level of independent liability protection. So please do not make that representation.

Mr. DeWINE. I will reclaim my time. I thank my colleague for his comments.

The intention of the language is to treat people equally. If a union does in fact make the medical decisions and if they are operating in the same way that the Wal-Marts of the world are, they ought to be treated the same way. But if they are operated one way, then they should not be treated the same.

Ms. SOWE, Will the Senator yield?

Mr. DeWINE. Yes. The PRESIDING OFFICER. The Senator from Maine.

Ms. SOWE. The Senator from Ohio is exactly correct. We are treating all employers the same. In this instance, in this particular category, it is those employers who do not have a designated decisionmaker. That is the intent of this particular provision: To treat them equally so they are not subjected to liability when it comes to contractual matters, whereas other employers are not who contract with insurance companies and have a designated decisionmaker. But we are helping them. We are not helping them, because we like very much more the designated-decision-maker model. I think the question I think the Senator from New Hampshire and I wish to ask you, because we have just seen the language for the union plans that you are self-insured and self-administered. That is the intent is of this legislation. It is to treat them all equally and to draw that bright line.

We could say, let’s not address the self-insured and self-administered programs. I do not think that is fair either because, obviously, they have a different kind of program, and we want to encourage that. We commend them for the kind of benefits they are providing to their employees. They happen to be large employers, and they want to design their own internal program. But we don’t want to subject them to litigation to which other employers are not going to be subjected. So that is the reason for the intent of this particular provision that happens to include union plans that are designed similarly.

Mr. FRIST. Will the Senator yield?

Mr. DeWINE. I am more than happy to yield to the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. FRIST. This is an important point, and therefore I think the colloquy is important so we can address it.

We have just seen the language for the first time a few minutes ago. The way I understand it, we have about 170 million people out there we are talking about in an employer-sponsored plan. There are about 6 million people who are in what are called self-insured, self-administered plans. Over the last 2 to 3 years, as we have tried to figure out how to treat these 6 million people in a fair way, we have struggled because it is hard. We have produced the designated-decision-maker model—which I am a great believer in—and I believe most people in this body, if they step back and look at it, are great believers in—but what you have in your bill is you have carved out those 6 million people who addressed the issue directly, but in addition to that, you carve out the unions.

The argument that was made is that the unions are self-insured, self-administered plans like the other 6 million; that these are union plans, and therefore they should be treated the same as self-insured, self-administered plans.

I think the Senator from New Hampshire and I would argue that the unions should not be carved out as well because—while a few may be self-insured and self-administered—the majority of union plans are not self-insured and self-administered. Therefore, why are you giving this privileged position to the unions that are not self-insured and self-administered like the 6 million whom you targeted initially? That is the question I think the Senator from New Hampshire and I wish to ask you, because we have just seen the language for the union plans that you are self-insured and self-administered plans?

Mr. DeWINE. If I could reclaim my time to answer the question.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. DeWINE. I can tell you what the intent was. And, as you know, we have been drafting the language, and it has been going on and on. I can only tell you what the intent was.

I am more than happy to take a minute and look at that language again with your comments in mind.

The intent was to treat people who operated one way equally. In regard to unions, the intent was we would cover union plans that were the same as the Wal-Marts of the world which are self-insured and self-administered. That was the intent. It was not the intent to go one inch beyond that or to cover one group or one plan beyond that.

I will bluntly say, if the language in here is not consistent with that intent, then we need to go back and look at the language. That was the intent of the four or five of us who were working on this issue. That was the specific intent, and that was the instruction that was given to staff. If the lawyers did not come back with that language, and I did not catch it when I read it, I apologize, and we will look at that. But it is going to take us a few minutes to get the language out.

My understanding of what my colleague has said is that if a union does in fact operate a plan, and they are in fact self-insured and self-administered, he believes they should be treated the same way; anybody who runs a plan with those two qualifications should be treated the same way. Is my understanding correct?

Mr. FRIST. We have to be very careful.

Mr. DeWINE. If those are the facts, then we are careful whom we carve out. And then whatever definition we use for the carve-out, we need to apply consistency to it.

Mr. DeWINE. I agree.
Mr. PRIST. I believe we should go back and look at the way the bill is written.

Mr. DEWINE. Let me suggest we take a look at that as we continue this debate. We have a little time to debate. Let us look at the language.

I again want to reiterate something, though. And I do not want any of my colleagues who are watching this back in their office or who are in this Chamber to misunderstand this. This is a limited carve-out. This is not a huge carve-out.

Basically, what this carve-out says is, because of the unique situation of the self-insured, self-administered plans, we are going to exempt them from lawsuits, based on contract, in Federal court—they are not going to be exempt from other lawsuits and in State courts, and based on medical decisions. So it is a limited carve-out. I do not want anybody who is watching this debate to think this is some huge carve-out. It is a carve-out on a limited basis. Our intent was to treat people equally who were in that unique circumstance.

I know my colleague from Tennessee has been wrestling with this for a couple years: How do you deal with these folks who have this unique problem?

I will say to my colleague from New Hampshire, this may not be perfect, but we think it improves the status quo. That is sort of what we are about today: Trying to improve the status quo.

Mr. GREGG. Will the Senator yield?

Mr. DEWINE. No, I will not yield yet.

We have had criticism of this amendment from people who say it does not solve all the problems. I came to this Chamber and said, no, it does not solve all the problems, but we are trying. And we are trying with this amendment. If we can improve the amendment, and if we can get the language more precise that does it, I will be more than happy to do it.

Yes, I yield to my colleague.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. GREGG. I think the language, as presently drafted, is in your definitional section of the amendment where you find "(ii) (II)." It says:

- a group health plan that is maintained by one or more employers or employee organizations described in this section.

That essentially encompasses all union plans. Very few union plans do not use a third-party administrator, very few. So I think you want to tighten up that definition to make it clear that you are applying it to the self-insured, self-funded, self-administered plans, and then you would be picking up the same people that you are picking up under the Wal-Mart exception.

Mr. DEWINE. Reclaiming my time, that was our intent. If that is not reflected in the language, we will change the language.

I yield to my colleague from Maine.

Ms. SNOWE. The Senator from Ohio is making exactly the same point. There is a particular provision was intended for those insurers, self-insured and self-administered plans, that obviously do not have a designated decisionmaker. I should further emphasize, all employers are treated equally when it comes to the idea that they participate in medical decisions on behalf of their employees. They are all treated the same. This particular area of the legislation is with respect to contractual decisions. We are attempting to craft out for self-administered, self-insured plans, and that includes union health plans that conform to that particular organization, that they would not be subjected to litigation that other employers would not be subjected to because they had designated decisionmakers.

We know self-insured, self-administered plans do not have designated decisionmakers. So we did not want to expose them to that kind of litigation in this particular section that delineates the causes of action. We were trying to treat all of the employers equally.

Mr. DEWINE. Madam President, I reclaim my time.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. DEWINE. Madam President, we have stated our intent. I think we ought to get about our business and come up with the language to do that, some possible language that we could use. It is always dangerous to try to draft language on the fly on the Senate floor.

I will at least throw this out for possible discussion. We could add "to the extent the Taft-Hartley Plan Act are self-insured, self-administered plans," something to that effect of basically qualifying so that you would get down to whatever the number is—I don't know what the number is—that are self-insured and self-administered. We certainly could do that, "There is no reason that cannot be done.

Mr. GREGG. Is the Senator suggesting that additional definition? Is the Senator suggesting that definition, that expansion of the definition, that expanded language be placed on the definition section?

Mr. DEWINE. We could do it that way. If the Senator has a suggestion of how better to do it, I would be more than happy to take the suggestion.

Mr. GREGG. That may well resolve the problem.

Mr. BREAUX. Will the Senator yield for a question?

Mr. DEWINE. I yield to my colleague from Louisiana.

Mr. BREAUX. I ask the Senator from Ohio, I think the discussion has been very helpful. Two points are important to have on the record. A self-insured and self-administered plan by this amendment would not relieve themselves of being subject to litigation for doctor mistakes based on medical necessity under the Patients’ Bill of Rights bill we are adopting.

Mr. DEWINE. The Senator is absolutely correct. We believe the language does reflect that, but that is clearly our intent.

Mr. BREAUX. If the Senator would further yield, the point made by the Senator from New Hampshire is absolutely correct in the sense that on page 3 of the Senator’s amendment, line 18, when he talked about that group health plan—basically the Taft-Hartley group health plans, as I understand it—you didn’t have that limitation of those that would also be self-insured and self-administered. I think if you added that to that definition, you would correct the problem. I think it would be in keeping with what the Senator wants to do and certainly something I could support.

Mr. DEWINE. I appreciate my colleague’s comments. I think they are well taken. We will get about the business of dealing with that. The point is very well taken.

I yield the floor.

The PRESIDING OFFICER. Who yields time? The Senator from Tennessee.

Mr. FRIST. Madam President, I yield myself approximately 15 minutes on the opposition time for the time being.

The PRESIDING OFFICER. The Senator from Maine has 7 minutes remaining in her time on the proponent’s side.

Mr. FRIST. Madam President, is this 4 hours evenly divided?

The PRESIDING OFFICER. There are four 1-hour segments. The Senator from Tennessee controls 1 hour of the 4-hour time. The Senator from Maine controls 1 hour. She has 7 minutes remaining on her hour. The Senator from New Hampshire controls 1 hour, and the Senator from Massachusetts controls 1 hour.

Mr. FRIST. Madam President, I ask unanimous consent that for the first hour, it be equally divided so we can continue the debate for those in opposition.

Mr. REID. Madam President, I am sorry. What was that request?

Mr. FRIST. For the first hour of the debate, which we are about, I guess, 20 or 30 minutes into the opposition has not had the opportunity to speak. I was saying for the first hour, in which about 25 minutes has been used, if we can have 30 minutes on either side.

The PRESIDING OFFICER. The debate has already consumed 53 minutes of the proponents’ time controlled by the Senator from Maine.

Mr. REID. The Senator from Tennessee has an hour. He can use it any way he wants.

Mr. FRIST. Madam President, I understand I have an hour on my side. I will use time off our side at this juncture. I yield myself such time as necessary.
The PRESIDING OFFICER. The Senator from Tennessee.

Mr. FRIST. Mr. President, first of all, let me put perspective on this because we have had the amendment introduced, and there are basically three points I want to make.

No. 1, I applaud the Senator from Ohio and the Senator from Maine because they have, for the first time in the debate, addressed this issue of suing employers—this issue of who is responsible, who gets sued, if there is harm or injury or cause of action. As one can tell from their earlier discussion, there has been a lot of debate in struggling with how best to address who you sue and when you sue them and what entity. There is not very much certainty out there. Do you sue the plan? Do you sue the employer? Do you sue the administrator? In the Senator from Maine’s amendment, which is very positive, in the exposure to these unlimited lawsuits for those sort of indications, you don’t have just compensation, and you are exposed to these unlimited lawsuits out there. So it is very positive, in the amendment that has been put on the floor by the Senators from Maine and Ohio, to take that cause of action out of the underlying bill.

The third point is that the Senator from Ohio made the point that this is not the answer to liability. Liability involves exhaustion of appeals. And we have an amendment pending on the floor addressing whether there should be caps; and that entire debate, once you get to courts, whether it is non-economic damages or punitive damages, involves whether you go to Federal court or State court and then this whole idea of who do you sue. Can the employer be sued? And that last point is what the designated decisionmaker selectively looks at, that sliver of the pie of liability.

So far in the debate, over the last 4 or 5 days has made it clear that you can sue the employers if they directly participate. And what has now been brought to the floor in a very positive way, I believe, is this concept of giving certainty to all that through a model that is called the designated-decision-maker.

Really all that means is that since somebody is going to be sued—and the way it is designed now, you don’t know who it is; that doesn’t give anybody certainty—the easiest thing to do is for an employer to walk away. It might be me that is sued. It might be the entity that is administering my plan. It might be an agent of that plan. That is so counter to so much risk out there, and you never know whether you are at risk or not, or somebody else, or who the lawyers will be going after. The designated-decision-maker says: We are going to all get in a room and say there is one entity responsible. If there is a lawsuit, you are going to go after that entity. That entity has to bear the risk, and also whatever value there is for that risk will have to be either purchased or sold. That gives certainty to the overall liability issue.

The second point—I will come back to this—that is very positive in the underlying amendment is this broad cause of action which is being struck from the underlying bill. That is where the underlying bill, when you go to the Federal level in the underlying bill, there is a cause of action called “duty under the plan.” Unfortunately, if you leave that cause of action in there, it sweeps in all sorts of things, whether it is the HIPAA regulations or the COBRA regulations, and all of a sudden for those sort of indications, you don’t have just compensation, but you are exposed to these unlimited lawsuits out there. So it is very positive, in the certainty to the employer and also certainty to the employee, at both levels. That is the way that proponents of there being an internal and external appeals process. Under the Frist-Breaux-Jeffords bill, you can’t opt out of that and go directly to the court as you can in the McCain-Edwards-Kennedy bill. We are trying to fix that through another bill.

In the Frist bill, once you go through the internal and external appeals and you go to court, you are going to end up going to Federal court. If there is a lawsuit in advance, prospectively—not after the fact—a designated-decision-maker has been identified. If there is a lawsuit, there is no question of whether you sue the employer or the HMO or the agent of the plan or the hospital or the doctor. Indeed, you sue one person. That is who you sue. The Senators from Maine and Ohio made that point. It is critically important to address. If you read the press on this, this decision-maker model will take care of the liability. But it does not answer the questions on the part of myself and many others.

The history of the designated-decision-maker model is interesting as well. It is in the Frist-Breaux-Jeffords bill. The amendment on the floor is very similar to what is in the Frist-Breaux-Jeffords bill in that you give certainty; you have to name an entity to be the designated-decision-maker. That is who you sue. The Frist-Breaux-Jeffords bill bailed that on what already passed the Senate about a year and a half ago. A designated-decision-maker amendment passed this body. That amendment came from the conference between Demo- crats and Republicans sitting around a table addressing how to come up with a system that best addresses this problem of having employers being sued out here when you really want to go after HMOs. How do you delink employers versus HMOs?

Basically, you make one entity responsible. It could be the employer, if they meet certain financial criteria; it could be the HMO; or the HMO might contract with another entity. But some somebody has the risk. They have to have the financial wherewithal that equals that risk or the potential of that risk. So I love the designated-decision-maker model. It is clearly need ed and necessary.

Let me take a minute. We keep drawing references to the Frist-Breaux-Jeffords bill and the way that worked, because whether or not I can actually end up supporting the amendment of the Senators from Maine and Ohio really depends on how close in my own mind we get to the underlying model that is in the Frist-Breaux-Jeffords bill. I believe that gives the most certainty—
Portability and Accountability Act, which we passed in this body several years ago, and COBRA, whereby employers allow administrative duties, under those laws, to anyone else, by law. You can’t. So the liability for those administrative duties, because you can’t delegate, would fall on the employer, thus allowing the employer to be sued. So that is very positive, I think. It was addressed directly in the amendment, and I commend them for that.

Third is that we need to understand throughout this debate, as we hopefully can refine this amendment and pass it if we can resolve some of the specific issues in the language. We need to be crystal clear again that addressing the designated-decision-maker addresses the employer aspect of liability but does not address the other factors of liability, which I think we have a responsibility to address on this floor, since this bill never went through committee and, in truth, we are marking up and writing this bill for the first time on this floor. We need to talk about Federal versus State courts, class action suits, whether or not there should be caps in a noneconomic damage or should there be punitive damages. All of those other issues have not yet been addressed. Now I am quite pleased we are addressing the designated-decision-maker aspect of employers being sued.

Several quick examples. There need to be clear and effective limits, I believe, on class action lawsuits. There need to be firm requirements that we fully exhaust internal and external reviews before initiating any lawsuits. There are a lot of broad exceptions. We talked about some of them as the Thompson amendment was on the floor, and we rejected it. There need to have complete exhaustion as we go through.

Second, if an independent external medical reviewer, who is a doctor, which is in the Frist-Breaux-Jeffords plan, as well as in the McCain-Edward-Kennedy plan, upholds the plan’s denial, then the plan should not be subject to liability. We need to discuss that on the floor. In the underlying McCain-Edward-Kennedy bill, a patient with even though that independent medical reviewer, a physician with age-appropriate expertise, has decided that the plan made the right decision in internal and external appeals and the physician says everything was right going through. I believe the Frist-Breaux-Jeffords bill says, no, you can sue for care, injunctive relief, but not for extraordinary rewards. That has to be addressed.

Also, the underlying McCain-Edward-Kennedy bill would allow the independent reviewer to “modify”—I believe that is the word used—the plan’s denial. And this is just as a physician. What it means is that in a paper review you never see the patient. You read records and hope they are complete, and the reviewer is going to have to talk to the thousands of these, maybe hundreds, maybe 10. I don’t know. I was with a doctor a few minutes ago who has done thousands of these reviews.

The point is that you never see the patient. You never get the subtleties of clinical diagnosis, which all of us know is science, but there is also art to it. You are asking somebody to look at this paper and review it and say, yes, it was right or, no, it was wrong.

With the information written on that paper, you are allowed to come in and modify the treatment of that patient. I can say as a physician the fact that on that paper review, a reviewer could require that the plan cover treatment that the current treating physician nor the plan ever contemplated or ever recommended, this reviewer who maybe over the telephone is reading it, is going to be able to modify it bothers me.

It bothers me because it becomes binding, and we all know it becomes binding. When it becomes binding and you have not had that direct experiential observation, to me it is not right. It needs to be corrected.

I will give another example: The employer in the plan would be subject to simultaneous litigation in Federal and State court. Again, speaking to the underlying bill, we have to address that because we all know when we have lawsuits which result in—take a $120 million damage award such as there was 2 years ago. A $120 million award is a large award. Some will say it is too much; some will say it is too little. But a $120 million damage award results in total premiums being paid for about 55,000 enrollees, $2,000 for each enrollee who could go out and buy insurance.

I do not want to correlate the two, but $120 million is a lot of money, and, at least in my mind, I come back to the uninsured and the number of enrollees who could go out and buy insurance.

We need to be careful about encouraging shopping between the Federal courts and State courts, and once you get to the State courts, from State to State. Maybe tomorrow, Saturday, Sunday, or Monday we will come back to that and talk about it. Clearly, if you are an attorney, for a single event, you have multiple causes of action, you can question that, but in addition to that, you have multiple venues: the Federal court, the State court, or from State to State to State. That is our interpretation. That is our attorneys’ interpretation. It has to be fixed.

In closing, I support the designated-decision-maker model. The Senators from Maine and Ohio are to be congratulated in this Chamber addressing in a sophisticated, appropriate way how to clarify the uncertainty about suing employers versus suing HMOs.

I support the model. It is in the underlying Frist-Breaux-Jeffords bill. We are looking at the language, as we have to, the issue of waivers, and why they are specifically carved out. That needs to be addressed. We hope to have factual information. We will read the language, and I look forward to working aggressively with the authors of this amendment so we can all rally around it.

Mr. DeWINE. Will the Senator yield? Mr. FRIST. Yes.

Mr. DeWINE. If I can respond to the Senator’s comments about why we crafted the bill, it was to give the employer a choice as to whether or not they would go under the designated decisionmaker or under the language of the other bill, which is direct participation.

Frankly, I do not think this is a huge deal. The reality is that the vast majority of businesses will go under designated decisionmaker, and, in fact, we provide in the bill that it is automatic. That will just happen unless they make a decision to say: We do not want to go under the designated decisionmaker; we want to go under the direct participation language.

We are in an unknown area, and I do not think anyone knows how this is going to play out entirely in the real world and what decisions they are going to make. Some people come up with some scenarios under which they would not want to designate someone as a designated decisionmaker. The vast majority are. We wanted to provide this as a fallback position, more options.

I do not think it is going to make it more ambiguous or less definite because we provide automatically it is going to be designated decisionmaker unless they make an action and say: No, we do not want designated decisionmaker; we want to go with our model because for some reason it works that way. We can look at the language and talk about it.

In explanation to our colleague from Tennessee, that is what our thinking was. We do not know where the world is going with this new language, and we wanted to give as many options to businesses as we could. That is why we did it.

Mr. FRIST. Mr. President, I claim my time.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. FRIST. I guess this decision of certainty—I usually like choice coming through, and it appeals to me. I am a 50-person convenience store operator and have three or four convenience stores in the area, and I have people barely scraping by, working minimum wage, and I recognize giving people some insurance goes a long way. Some people say it does not matter; you still have your care. If you have insurance, you end up getting better care in the
The PRESIDING OFFICER. The Senator from Tennessee has consumed about 22 minutes.

Mr. FRIST. How much has the other side used since we have been on the amendment?

The PRESIDING OFFICER. The other side has used 53 minutes.

Mr. FRIST. They have used 53 minutes, and we have used 22 minutes.

Mr. KENNEDY. How much have we used?

The PRESIDING OFFICER. The Senator from Massachusetts has used none.

Mr. FRIST. I was speaking in opposition to the amendment.

Mr. KENNEDY. I think the presenters ought to be entitled to whatever time they have remaining. I am a strong believer in that. I would like to make for purposes of clarification, a written word.

The PRESIDING OFFICER. The Senator from Tennessee still has the floor.

Mr. FRIST. Thank you, Mr. President. A matter of clarification, in speaking in opposition to the amendment, pursuant to Senator Gregg, we have used how much time?

The PRESIDING OFFICER. Twenty-three minutes.

Mr. FRIST. Twenty-three minutes since we have been on the amendment. Clarification: The proponents have used how much?

The PRESIDING OFFICER. Fifty-three minutes.

Mr. FRIST. I will be happy to yield the floor in a moment. Clarification on the designated decision-maker model: We would not necessarily assume the insurance company is the designated decision maker. You would have to designate that, and that is part of our Frist-Breaux legislation, just to clarify that.

Ms. SNOWE. Will the Senator yield? The PRESIDING OFFICER. Who yields time?

Ms. SNOWE. Will the Senator yield on that point?

Mr. FRIST. I will be happy to.

Ms. SNOWE. It is important to emphasize in this amendment as we have drafted it includes a provision that starts out with automatic designation: That a health insurance issuer shall be deemed to be a designated decision maker. The purpose of this amendment is to be able to provide additional rights and opportunities for insurance. This does it.

Specifically, this amendment narrows it down to not being brought into Federal courts. It does not give any sort of liability to the health care providers. And it also makes it clear that employers are not involved in litigation.

Specifically, this amendment narrows it down to not being brought into Federal courts. It does not give any sort of liability to the health care providers. And it also makes it clear that employers are not involved in litigation.

Specifically, this amendment narrows it down to not being brought into Federal courts. It does not give any sort of liability to the health care providers. And it also makes it clear that employers are not involved in litigation.
I applaud the work of my colleagues. I have enjoyed working with them. I appreciate everyone's patience and encourage everyone to do their best to move this process along. We are hoping to be very inclusive, to bring others in to make sure this language is exactly that: It is giving the protection and the comfort level to the employers of this Nation that are doing an excellent job in providing health care to their employees.

I also ask unanimous consent that Senator BAUCUS be added as a cosponsor to this amendment, and I yield.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Massachusetts.

Mr. KENNEDY. I yield the Senator from Michigan 5 minutes.

Ms. STABENOW. Mr. President, I rise first of all to ask unanimous consent to add my name as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. STABENOW. Mr. President, I thank my colleagues on both sides of the aisle for their hard work and the innovative language that is put together in this amendment. For those of us who are sponsors of the Patients' Bill of Rights, we have said since the beginning this was in no way intended to allow lawsuits to be brought against employers, this was about making sure those who make medical decisions were held accountable for those medical decisions.

As we said so many times on the floor, it is really about closing a loophole in the law as well. We have indicated over and over again, when you have only two groups of people in this country who are not held accountable for their behavior and their decisions, one being foreign diplomats, the other being HMOs, it doesn't make any sense. We know this was a loophole that was created by the outgrowth of HMOs and development of new ways of managing health care, and basically the Patients' Bill of Rights is meant to clarify that and make sure those who are making medical decisions are held accountable for the outcomes of those medical decisions, just as are doctors and nurses and other medical professionals.

What I think is important about this amendment is it very clearly states to each and every employer, large and small, that in fact we will make sure if they are not making medical decisions—and in the vast majority of times an employer is not making a medical decision—the intent of the Patients' Bill of Rights is meant to clarify that and make sure those who are making medical decisions are held accountable for their behavior and their decisions.

I yield my colleagues from both sides of the aisle who have put in
a tremendous amount of work on this amendment. There has been a wonderful job done clarifying this. I hope we have now been able to put to rest what was unfortunately a common misperception, something said over and over again to employers of this country, that somehow this opens them up to lawsuit. It never was the intent. This amendment clarifies that and reiterates it.

I hope this will allow us to move forward, to pass this very strong Patient Protection Act that says to each and every family: When you have insurance you can have the confidence, whether it is in the emergency room or the doctor’s office or the hospital, that you will have the care available that your family needs.

I will yield the floor.

The PRESIDING OFFICER. Who yields time?

The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I yield myself 3 minutes.

Both the Snowe amendment and the Frist amendment attempt to protect lawyers using the designated decisionmaker language. However, the fact that they use similar names can’t mask the dramatic differences between these two amendments. Senator Snowe’s amendment helps employers without hurting patients.

There are two important differences between the designated decisionmaker language in the Snowe amendment and the Frist amendment. Senator Snowe’s amendment ensures that the person an employer designates as responsible and will be liable for all damages caused by any wrongful benefit determinations the patient gets under our bill. This is exactly what employers want and deserve, a clear way under the law to protect themselves.

The Snowe amendment allows employers to name an HMO or health insurer or plan administrator as their designated decisionmaker and not have to worry anymore about being sued. That is what President Bush wants, and that is what we want. If employers give up all control over medical decisions in individual cases such as this, Senator Snowe’s language helps guarantee employers will not be sued, period.

Senator Frist’s designated decisionmaker language is much weaker. Under his proposal, the only entity that can be sued is the designated decisionmaker. While the designated decisionmaker is supposed to have exclusive authority to make benefit determinations, a court or jury remains free to find in fact another person or company influenced the decision that caused the harm. People who are not designated decisionmakers may in fact influence decisions and share liability. But the Frist language leaves victims no way to hold these outsiders accountable. That is because, unlike the amendment of Senator Snowe, the Frist amendment never deems the designated decisionmaker liable for the acts or omissions of parties who affect benefit determinations. This is the most critical difference between the two proposals.

The other important difference is that under Senator Snowe’s amendment, only employers can name designated decisionmakers; HMOs cannot. After all, the entire point of having designated decisionmakers is to ensure employers have a clear, easy way to avoid all possibility of being sued, not to protect HMOs.

Of course, the effect of allowing HMOs to have a designated decisionmaker is to enable them to escape liability for part or all of their actions. Under the Frist-Breaux amendment, if a judge finds someone in an HMO harmed a patient and that person working for the HMO was not a designated decisionmaker, the HMO escapes liability.

I think the amendment is sound. I think it has been a matter of discussion and debate. I think those of us who were involved in the development of the initial legislation sought to achieve what this amendment does enormously fairly. It also treats the various Taft-Hartley aspects equally with the other parts, so we have equality for one and equality for the other.

Another important feature of Senator Snowe’s amendment is that it protects employers and Taft-Hartley plans which self-insure and self-administer claims. The Frist alternative contained in S.889 fails to address this issue. The Taft-Hartley plans have a long history of providing quality health care for their members. In their unique structure, employee advocates comprise half the management board. The record shows that this has been an excellent protection even for beneficiaries who have extraordinary health care needs. In structuring this legislation, we wanted to be certain that we didn’t impose any inappropriate burdens on these plans.

I commend the Senators. They spent a great deal of time on this amendment. One would think it would be easy in the drafting of it, but I know they have been challenged with it. I commend them for really advancing this whole issue in a very positive, constructive way, a way which really reflects what this President has enunciated and a way which we had hoped to include in our legislation. There was a significant question about it. Legitimate issues were raised. I think this is one of the important contributions in helping move this process. I commend all those on both sides who were very much involved in its development.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I yield 5 minutes.
means the small employers that we have talked about are 100-percent protected. They cannot have liability under the current law of this appeals process, which is crucial. It is a goal and a principle that we have all shared from the beginning but, again, couldn’t have been done without their work. They have also managed to do it in a creative and innovative way that, while protecting employers, does not leave the patients and the families high and dry, which is exactly what needed to be done.

Honestly, it is a very difficult task, but they have worked doggedly on this issue. All of them managed to reach a bipartisan agreement.

The most important thing from the perspective of the overall legislation is that this is another in a series of obstacles language—we have now been able to reach some consensus.

They have followed sort of one by one by one, starting with the issue of scope, which Senator Breaux, Senator Jeffords, I, and others worked on, reaching a crucial compromise going to the issue of independence of medical panel to make sure that those panels are, in fact, independent.

We have reached a resolution of that issue. On the issue of medical necessity, the Presiding Officer from Delaware, along with my friend, the Senator from Indiana, were crucial in being able to reach a resolution that shows proper respect for the sanctity of the contract and the specific language of the contract but some flexibility, where necessary, for the independent review panel with respect to patients, keeping in mind the interest of patients on the one hand, which I know you care about deeply, and the importance of the contract in keeping costs under control.

Without your work and Senator Bayh’s work, that would not have been achieved.

The Senator from Tennessee and I, as we speak, are attempting to finalize an agreement on the exhaustion of appeal. Both of us believe, as do most Members of this body, that it is a sensible thing to have a patient go through the internal and external appeal before any case goes to court. We have tightened up that language, working together on it. We know it is important.

The Senator from Tennessee, Mr. Thompson, and I are resolving this issue of the exhaustion of appeal. All of us believe that the appeals process is crucial to getting patients the care they need.

If this bill works the way Senator McCain and Senator Kennedy and I believe it should, the ultimate goal will be achieved if there were never a lawsuit involved. What would happen is the appeals process would have worked and the patients would have received the care they needed. That is what this is about.

We want patients to use this appeals process. The Senator from Tennessee and I are finalizing an agreement on exhaust of appeal, which is crucial.

I also want to thank our colleagues on this specific amendment because that is another crucial obstacle. Scope, independence of the panel, protecting employers, medical necessity, and exhaustion of appeals are crucial issues in this legislation about which we have been able to reach consensus.

As I said earlier, the important result is not what is happening within this Chamber but that the families of this country will have more control over their health care, and we will actually have a more realistic possibility of getting the legislation they so desperately need passed.

I thank all of my colleagues for all of their hard work. Without them, this could not have been achieved.

I yield the floor.

The Presiding Officer. The Senator from New Hampshire.

Mr. Gregg. Mr. President, let me begin by saying that this amendment is moving in the right direction. I believe, with some of the changes which we have discussed with the Senator from Ohio and the Senator from Maine, that we can make real progress on improving it. Unfortunately, the amendment came late. It is complicated. The issues involved are considerable. But before getting into the specifics of the amendment and how it may or may not play out in a positive way relative to producing a quality bill, let me make the point that this amendment addresses an important but not a broad part of the issue.

This amendment doesn’t, for example, address some very real and significant issues of area of liability. It doesn’t address the issues of the 56 million people who are in self-insured plans.

It does not, therefore, solve the overall liability question, which if you were to rate the five issues that I think the Senator from North Carolina has appropriately highlighted, although I am not sure he mentioned liability—he probably wasn’t thinking in those terms, but he certainly hit the floor if you put liability on the table—liability is probably the most important for a lot of people in this Chamber.

Issues such as forum shopping, class action, damages, punitive versus compensatory damages, are major issues that we still have to address. I think we recognize that there is still a fair amount of distance to go in the liability area.

But this amendment takes up the designated decisionmaker language. It takes a portion of the Frist-Jeffords-Breaux bill in this area and tries to basically grant that on to what is the McCain-Kennedy bill—a good and appropriate attempt, although I must admit that with just a quick reading of it I think there is going to be some real confusion on the part of employers between what they can do as a designated decisionmaker and direct participation. I had hoped that the language would have a firewall in there. But as a practical matter, at least the movement is in the right direction to give some insulation for designated decisionmakers and people who use designated decisionmakers.

As to the issue of union liability, there has been a lot of talk around here about making businesses liable. And they are liable. Small businesses and large businesses are all liable—and making HMOs liable.

If you are a union employee and have a union plan, and your union tells you can’t get some sort of treatment that you need and should get, unfortunately, the amendment, as originally drafted, you would not have been able to sue that union plan, any more than if you had been employed by a company, and the company had sponsored your plan, and you would be able to sue them with a union. But ironically the unions ended up, under the original draft, of being completely taken out of the picture.

The Senator from Ohio and the Senator from Maine made clear that was not their intent. I understand they are going to adjust some language so union plans, which are in the same basic position as those plans which are self-funded and self-administered, will be the ones which are taken out of the liability picture. That is reasonable. That is the way it should be. We look forward to that modification.

Another issue that this bill raised, which has not been really talked about at all, is the fact that it basically has Federal usurpation of what has been a very traditional State responsibility of determining the liability of the insurance agency, whether the insurance agency has adequate financial strength to cover the projected losses which may occur. This has been something on which States have spent a huge amount of time. It is a real specialty. It is an art form to look at these insurance companies and determine whether or not they have the depth and the ability to cover the costs if they get hit with a whole series of claims.

I would hate to see the Federal Government step into this arena where the States have been responsible and suddenly take it over. But under this amendment, as originally drafted, that would be the case; the Federal Government would now basically take all that responsibility away from the States.

We discussed this with the Senator from Maine and the Senator from Ohio and their staffs to try to straighten this out. They reconceived the issue.

I think the Frist model in this area is the right model. It essentially says: Where the States have responsibility, where they are the insurer, then they
Mr. GREGG. I believe there is still approximately an hour and a half left on the amendment. I would hope that once we reach an agreement, and we have the language from Senator Snowe and Senator DeWine relative to the issue of coverage for union plans and liability. There is one other responsibility for reviewing the adequacy of liability, and there is one other issue—one we have that language, I personally would think we could start yielding back time and go to a vote. I think it would be hard to get to a vote before 4 o'clock because of other commitments. It would be my hope we could vote at around 4 o'clock on this amendment.

The PRESIDING OFFICER. The Senator from Wyoming.
Mr. ENZI. Mr. President, this bill is really a strange one for me to be working on at all. Wyoming has one HMO. It is owned by some doctors. So far as I know, there are not any complaints on it. But there are some basic problems here that people in Wyoming are asking about.

Because of Wyoming's makeup, I usually talk about small companies, because under the Federal definition of "500 employees or less," we do not have a single company headquartered in Wyoming that would be considered "big business." But on this amendment I have to talk about big business.

I have been hearing from the accountants of a number of these companies. They are a little bit concerned about what is going to happen to their health care. They work for those companies. They can see what the costs are going to be on their companies. I have to say that this amendment before us now does not address the problem. I would like to think that it did.

I would like to be able to pass this. I would like to not have to talk about a big company. There are the Caterpillars and Motorolas and the Packards. There are about a dozen of these big companies in the United States.

Again, none of them is headquartered in Wyoming. I am pretty sure that none of them operates in Wyoming. They do partly because they have employees who they have, who are more concerned about their ability to sue than they are about the current benefits that they have, would have a choice. In exchange for that choice, this company would not have to hire a designated liability holder because that is what a designated decision-maker would be.

For most of the firms that have the Cadillacs of the industry, most of them will have to change to a designated decision-maker. That additional cost will be considerably more than the 5 percent they are currently paying to handle administration, that 5 percent that they do partly because they have employee committees that get involved in the decisions. And those employee committees are not going to want to be sued, so they are going to need some relief. I am here in the uncomfortable position of speaking up for the companies that are in your States, not mine, to protect the kind of health insurance they have at the present time and not drive up the cost, forcing them to go to a lower benefit plan with a designated decision-maker.

This is not the solution. I hope you will pay attention to the solution when that amendment comes forward.

Mr. DEWINE. Will the Senator yield for a moment?
Mr. ENZI. I will yield on the time from the Senator from Ohio. I was just given pretty limited time.

The PRESIDING OFFICER (Mrs. Lincoln). Who yields time? The Senator from Wyoming still has the floor.
Mr. ENZI. I yield the floor and reserve the remainder of my time.

Mr. REID. OBJECTION. Who yields time? The Senator from Maine has approximately 7 minutes remaining.

Ms. SNOWE. Madam President, we are awaiting modifications to the underlining amendment. Unless there are any other speakers on the floor, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Ms. SNOWE. I ask unanimous consent that the time not be taken from either side at this point.

The PRESIDING OFFICER. Is there objection?

Mr. REID. I object. We have to move this thing along.

The PRESIDING OFFICER. Objection is sustained.

Ms. SNOWE. I yield the floor.

The PRESIDING OFFICER. The Chair notes, if no one yields time, time is charged equally to all sides of the debate.

The PRESIDING OFFICER (Mr. DAYTON). The Senator from New York is recognized.

(The remarks of Mrs. CLINTON pertaining to the introduction of S. Res. 117 are located in today’s RECORD under “Submission of Concurrent and Senate Resolutions.”)

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GREGG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GREGG. Mr. President, I ask unanimous consent the Senator from Wyoming be recognized to offer an amendment and that debate that for up to 30 minutes with the time equally divided and no second-degree; that thereafter, we go to an amendment from Senator GRAMM, which I understand is agreed to, and that debate will be up to 10 minutes; then we go to an amendment from Senator SPECTER.

Mr. REID. Reserving the right to object, we have been told the Gramm amendment is substantially agreed to and that two other people have to look at it first. I am sure that will work out fine.

Mr. GREGG. I didn’t say it was agreed to; I just said they had 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is temporarily set aside, and the Senator from Wyoming is recognized.

Mr. ENZI. Mr. President, I ask unanimous consent of the amendment No. 840.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk reads as follows:

The Senator from Wyoming [Mr. ENZI] proposes an amendment numbered 840.

Mr. ENZI. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(A) Purpose: To provide immunity to certain self-insured group health plans that provide health insurance options.

On page 317, between lines 15 and 16, insert the following:

SEC. 304. IMMUNITY FROM LIABILITY FOR PROVISION OF INSURANCE OPTIONS.

(a) In general.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by section 302, is further amended by adding at the end the following:

``(p) IMMUNITY FROM LIABILITY FOR PROVISION OF INSURANCE OPTIONS.—

(1) In general.—No liability shall arise under subsection (n) with respect to a participant or beneficiary against a group health plan described in paragraph (4) if such plan offers the participant or beneficiary the coverage option described in paragraph (2).

(2) Coverage option.—The coverage option described in this paragraph is one under which the group health plan, at the time of enrollment or as provided for in paragraph (3), provides the participant or beneficiary with the option to—

(A) enroll for coverage under a fully insured health plan; or

(B) receive an individual benefit payment, in an amount equal to the amount that

(p) IMMUNITY FROM LIABILITY FOR PROVISION OF INSURANCE OPTIONS.

(a) In general.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by section 302, is further amended by adding at the end the following:

``(p) IMMUNITY FROM LIABILITY FOR PROVISION OF INSURANCE OPTIONS.—

(1) In general.—No liability shall arise under subsection (n) with respect to a participant or beneficiary against a group health plan described in paragraph (4) if such plan offers the participant or beneficiary the coverage option described in paragraph (2).

(2) Coverage option.—The coverage option described in this paragraph is one under which the group health plan, at the time of enrollment or as provided for in paragraph (3), provides the participant or beneficiary with the option to—

(A) enroll for coverage under a fully insured health plan; or

(B) receive an individual benefit payment, in an amount equal to the amount that

June 28, 2001

CONGRESSIONAL RECORD—SENATE

would be contributed on behalf of the participant by the plan sponsor for enrollment in the group health plan (as determined by the plan actuary, including factors relating to participant or beneficiary's age and health status), for use by the participant in obtaining health insurance coverage in the individual market.

(3) **TIME OF OFFERING OF OPTION.**—The coverage option described in paragraph (2) shall be offered to a participant or beneficiary—

(a) during the first period in which the individual is eligible to enroll under the group health plan; or

(b) during any special enrollment period provided by the group health plan after the date of enactment of the Patients' Bill of Rights Plus Act for purposes of offering such coverage option.

(4) **GROUP HEALTH PLAN DESCRIBED.**—A group health plan described in this paragraph is a group health plan that is self-insured and self-administered prior to the general effective date described in section 401(a)(1) of the Bipartisan Patient Protection Act.

(b) **AMENDMENTS TO INTERNAL REVENUE CODE.**—

(1) **EXCLUSION FROM INCOME.**—Section 106 of the Internal Revenue Code of 1986 (relating to contributions by employer to accident and health plans) is amended by adding at the end the following:

```
(2) the receipt by the individual of an individual benefit payment described in section 502(o)(2) of the Employee Retirement Income Security Act of 1974, or
```

(2) **NONDISCRIMINATION RULES.**—Section 100(h) of such Code (relating to self-insured medical expense reimbursement plans) is amended by adding at the end the following:

```
(1) TREATMENT OF CERTAIN COVERAGE OPTIONS UNDER SELF-INSURED PLANS.—No amount shall be included in the gross income of an individual by reason of—

(11) **Individual's right to elect a coverage option described in section 502(o)(2) of the Employee Retirement Income Security Act of 1974, or**

(2) the receipt by the individual of an individual benefit payment described in section 502(o)(2)(A) of such Act.
```

(d) **TREATMENT OF CERTAIN COVERAGE OPTIONS UNDER SELF-INSURED PLANS.**—The Employee Retirement Income Security Act of 1974, as amended, is further amended by adding at the end the following:

```
(1) EXCLUSION FROM INCOME.—Section 106 of the Internal Revenue Code of 1986 (relating to contributions by employer to accident and health plans) is amended by adding at the end the following:

```
(2) the receipt by the individual of an individual benefit payment described in section 502(o)(2) of the Employee Retirement Income Security Act of 1974, or
```

(2) **NONDISCRIMINATION RULES.**—Section 100(h) of such Code (relating to self-insured medical expense reimbursement plans) is amended by adding at the end the following:

```
(1) TREATMENT OF CERTAIN COVERAGE OPTIONS UNDER SELF-INSURED PLANS.—No amount shall be included in the gross income of an individual by reason of—

(11) **Individual's right to elect a coverage option described in section 502(o)(2) of the Employee Retirement Income Security Act of 1974, or**

(2) the receipt by the individual of an individual benefit payment described in section 502(o)(2)(A) of such Act.
```

We can reasonably expect the fully insured employer plan to be able to designate the final decision on a claim for benefit because that is generally how they function now, having the insurance company administer the plan, with the employer participation ranging from full plan design to advocating for a sick employee. That is not the way the self-administered plan operates. So none of the proposals protects them.

My fear is that none of the proposals even preserves that kind of a plan. Let me explain why that is a problem. There are many self-administered plans. They don't have to be insured, so they can design a wide, often unique range of benefits that are providing health care coverage to frivulous lawsuits needs to be

```
fixed. The Senators are now talking about how we protect the good actors. Those are employers that are doing right, offering comprehensive health coverage but not playing a role in denying medical care to which their employees are entitled under the insurance contract.
```

My hope is that in the course of these discussions everyone will settle on a comprehensive liability fix that includes the designated decisionmaker model presented in the Frist-Breaux-Jeffords bill. As many of my colleagues have said, that certainly seems to do the job. I agree it certainly seems to. In fact, I agree that the designated decisionmaker mechanism must be part of an amendment to successfully resolve the problems in the underlying bill.

However, while the designated decisionmaker model does present itself as the most reliable proposal for protecting most employers, there remains a small segment of the market that will continue to go unprotected. Ironically, this segment of employers could argue that the ERISA plans may represent the best of the best. These are the plans that we all should envy. They are plans better than we have in the Senate. They are referred to as the self-insured, self-administered employer plans. They comprise roughly 5 percent of the entire ERISA market.

Five percent is not a small number because that is still 6 million people, but the problem under the Kennedy-McCain direct participation model and even a designated decisionmaker model as we have been debating in the last few minutes is that these employers will have to dramatically alter their health plan because they do the plan administration in-house. That means they are participating in everything, and it means they cannot just designate their third party administration insurance company because they don't currently contract with such entities for the purpose of processing claims. That is the difference between the self-administered and the fully insured employer plan.

We can reasonably expect the fully insured employer plan to be able to designate the final decision on a claim for benefit because that is generally how they function now, having the insurance company administer the plan, with the employer participation ranging from full plan design to advocating for a sick employee. That is not the way the self-administered plan operates. So none of the proposals protects them.

My fear is that none of the proposals even preserves that kind of a plan. Let me explain why that is a problem. There are many self-administered plans. They don't have to be insured, so they can design a wide, often unique range of benefits that are providing health care coverage to frivulous lawsuits needs to be
Under the amendment, self-administered, self-insured employers would be required to offer at least one of the following options. The first would be a fully insured product, under which an employee could exercise the cause of action in this bill against the insurance company administering the health plan; or, the employer would provide a self-administered plan; or, the employer would provide a self-administered plan in the form of an “individual health benefit,” the amount of their employer’s annual premium contribution under the self-administered employer plan. This would have to be used to buy health care, which is done in the State regulated individual market. They have the right to sue.

If an employer offers one or both of these choices to employees, then the employer would not be subject to the new law that provide the self-insured, under the Patients’ Bill of Rights. Any new civil monetary penalties would apply to these employers for violations of the act, and the external appeals determination would be binding on the employer, but enrollees would not be able to pursue damage awards against the employer under the new cause of action. As under the Frist-Breaux-Jeffords bill, this provision would not preempt any medical malpractice action currently available in state court.

It would not do that. This is very clear. An employee makes the choice to either keep the caliber of benefits under the self-administered plan, or to choose a plan specifically for the right to sue. Those employees that choose the fully insured product will be able to hold their plan accountable under the new cause of action. And, those employees that choose to purchase their own plan through the “individual health benefit” are similarly able to hold their plan accountable under state law.

The argument has always been that ERISA is unfair because it “traps” employees in the employer sponsored plan, affording that option alone, where damage lawsuits aren’t available. This proposal solves that dilemma without jeopardizing access to top-notch employer sponsored health care for those employees. Have any of you been hearing from the major companies that provide the self-insured, self-administered employer plan? No, you have not. They have not been asking for that right to sue. They like the range of benefits they have, they like the personal way it is handled.

The arguments you will hear against the amendment, I believe, actually make the case for it. It is very simple. It will be argued that employees will never be able to get the rich benefit packages that their employer’s self-administered plan has. They will opt into the individual market by taking the “individual benefit,” and, while it may be better than the individual market under the fully insured option, surely it won’t compare to the self-administered option.

There is another right. If they spend the same amount of money and add a liability part to it, you do not get as much insurance. I am trying to preserve their insurance, not the right to sue, by giving them the flexibility. Any employer that ever had a bad actor incident in their company would have all of their people go out into the individual market under this plan.

This bill would eliminate the best employer plans out there because we feel compelled to sue them instead of making the decision to eliminate self-administered plans by a lawsuit from Washington. Why don’t we let the employees make the choice for themselves? Every time a window of choice comes open they can opt into this other plan if they think it is a good way to go.

But I will tell you why the businesses cannot do what is being mandated under this bill. If they have to have a designated decisionmaker, they are hiring somebody to take the liability risk. They are not just hiring somebody to administer the plan. That is only a 5-percent cost. This will drive their prices up dramatically if we do not give this option, and people who are receiving the best care in the United States at the present time will have to settle for something else.

I believe we have made a concerted effort through the amendment. It is one we talked about a lot last year in the Patients’ Bill of Rights conference committee. We made an attempt to amend the process, to remedy the problems of the entire liability section under the underlying bill, including protecting employers and including protecting small employers.

It is not the small ones; this is worry about the big ones who are providing the best of the best. I do not believe we will be doing a good job unless we include this amendment.

I yield the floor and reserve the remainder of my time.

The PRESIDING OFFICER. If no one yields time, time will be charged against both sides.

The Senator from North Carolina.

Mr. EDWARDS. Mr. President, I understand what my friend from Wyoming is trying to do. We appreciate his work on this issue. This is a subject matter that was covered previously by the Snowe-Nelson-DeWine-Lincoln amendment on which we reached consensus on the floor a few hours ago. That amendment was specifically designed to strike the proper balance between protecting employers on the one hand and making sure we also protected the rights of employees. So this is a follow-up to that amendment and the provision from covered, about which there has already been great discussion, work, and compromise across party lines, Democrats and Republicans, and about which we are soon to have a vote. It is an issue about which we already have consensus. We have widespread support for that consensus.

The reason for that widespread support is we have protected employers while at the same time kept alive the rights of employees and patients. We have sought in a very creative way a solution to that problem.

This specific amendment has at least two major problems. No. 1, what it does is take away the rights of employees, patients, and families, to hold anybody accountable if one of two things occurs. The problem with that concept is that it is in violation of the President’s principle, which we have talked about at great length on the floor of the Senate, which is that employers be protected but that somebody be held accountable if the employee, the patient, is injured as a result of a medically reviewable decision. The President specifically said that in his principle. That principle is completely complied with in this amendment. That is the Snowe-Nelson amendment because in that amendment we create a situation where we protect the employees right to recover if, in fact, they are injured by a medically reviewable decision, while at the same time providing protection for employers. So that is the reason that consensus was reached. That is the reason both Democrats and Republicans support it across party lines, and that consensus is consistent with the President’s principle.

This is an issue about which we have already talked and an issue about which we have reached some agreement.

In addition to that, there are at least two other problems with this specific amendment.

No. 1, it provides the employees with a false option. It says for self-insured, self-administered plans if either of two things occurs, the employee, the family, and the patient lose their right to hold anybody accountable. One of those options is that they go out, get a voucher, and buy their own health insurance. But there is absolutely no requirement that the voucher be adequate to buy quality health insurance plans.

Second, they may provide a comparable plan. But there is nothing to require that the benefits of that plan be equal to the benefits the employee would otherwise have.

The bottom line is there are no protections that require that under these options the employee or the patient end up with the same quality health care plan. In many regards, it is a false option that is being provided to them.

Another fundamental problem is that there is a provision in the amendment—this is the B-1 exclusion from income—which says section 106 of the Internal Revenue Code of 1986 is amended by adding at the end the following. Of course, an amendment to
the Internal Revenue Code creates a blue slip problem. This issue has to originate in the House, which means, if adopted, this entire legislation could be sent back to the Senate from the House.

We have a number of problems. I understand what my colleague is trying to do. I think his purpose is very well intentioned. But I say to my colleagues, No. 1, this is an issue about which we have already reached consensus in the Snowe-DeWine-Nelson amendment. We have reached that consensus for an important reason. We have complied with the President's principle. We have complied with the fundamental principle, with which many of us on both sides of the aisle agree, which is we need to protect employers and provide the maximum protection for employees. The third way, is that if employed employees love their plan, and they want to keep it and agree to not require Wal-Mart to be liable to be sued, and if Wal-Mart gives them the option of going into a fully-insured plan with liability so that they do not have to be in the Wal-Mart self-insured plan, they can choose to remain in it, and Wal-Mart will not be forced by liability costs to cancel their plan. This is an important issue that addresses a very real shortcoming in this bill. The incredible paradox is that this bill will do the most damage to the best health care plans in America—plans that are self-insured—plans that are large—and that provide terrific coverage. Under this bill, there is no question about the fact that the employee is liable. That liability fear will end up forcing them out of these plans.

The Senator has offered us a third way. The third way is if every employee is offered an alternative plan, and Wal-Mart employees love their plan, then those who choose to stay in their health plan and say, I love my Wal-Mart plan and I don't want to sue Wal-Mart, would have a right to do it. That is what the Senator’s amendment does. All of the rest of these arguments have nothing to do with the amendment.

Do you want to destroy the best health care systems in America? If you do, you want to vote against the Enzi amendment. If you do not, vote for the Enzi amendment which guarantees that a Wal-Mart employee will have an option of another health care plan where everybody is liable. But if they choose a better plan with fewer lawsuits, aren’t they just better off by definition by choosing?

The Senator has offered us a third way. The third way is if every employee is offered an alternative plan, and Wal-Mart employees love their plan, then those who choose to stay in their health plan and say, I love my Wal-Mart plan and I don't want to sue Wal-Mart, would have a right to do it. Mr. EDWARDS. Mr. President, let me respond briefly to a couple of the comments that were made about the Enzi amendment.

First of all, no argument was made that I heard about the blue-slip problem, so I presume there is agreement that if this amendment is included, it would require the entire Patient Protection Act to be sent back.

Second, I say to my friend from Wyoming, I actually did listen to his comments in the debate. And not only that, I sat in hours of meetings with Senators SNOWE and DEWINE, and others, working out the language of the Snowe-DeWine-Nelson amendment.

The Senator is factually incorrect about one thing; that is, that what Snowe-DeWine-Nelson does is, No. 1, provides this country in the Snowe amendment for 94 percent of the employers in the country. Almost every small employer is totally protected. But we left in place for patients. The employers are completely protected.

For the self-insured, self-administered employers, we have also provided specific protections in this amendment, which we have been working on for several days now. No. 1, they are completely carved out. Self-insured, self-administered plans are totally carved out of the Federal cause of action in the Bipartisan Patient Protection Act. They cannot be held responsible for contractual, administrative responsibilities, period. They are out.

Second, we have provided that if they choose to do so, they can pick a third party designated decisionmaker and send all liability to that decisionmaker by which they are completely protected.

And finally, we have provided that if they have what many of these large employers have, which is a system where they simply make a decision, yes or no, on paying the claim after the treatment has already been provided—that the patient goes and gets the treatment; then they decide whether they are going to pay for it or not—they cannot be held responsible.

So I say to my friend and colleagues, what we have done is provide complete protection for 94 percent of the employers and the Snowe amendment, while at the same time not removing the rights and protections of patients.

For the self-insured, self-administered employers, we provided three protections: No. 1, they are completely out on the Federal cause of action, which is contracts, administrative issues.

No. 2, we have specifically said they can use a designated third party decisionmaker and remove all liability by doing that if they so choose.

No. 3, we have said if they operate the plan by saying: we decide after the treatment just simply whether we are going to pay for it or we are not going to pay for it, they are completely protected.

So after lots of work, and many hours, I say to my colleagues, we believe we struck the right balance in both cases—for providing maximum protection for the employers and keeping in place the rights of patients, employees, and families.

So in addition to the blue-slip problem, which in and of itself would be enormous, we believe that we have dealt with this issue. We have dealt with it in a proper and adequate fashion. And we have addressed the concerns of the self-insured, self-administered plans, and the issues raised by small employers around the country who will be completely protected by this amendment.

I yield the floor.

The PRESIDING OFFICER. Who yields time on this amendment?

The Senator from Wyoming.

Mr. ENZI. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. It is my understanding that the managers of the bill, including Senator Feist, would ask that this vote be put over until a later time. So I ask unanimous consent that be the case.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Chair advises the Senator from North Carolina he has 4 minutes remaining in opposition to this amendment.

The Senator from Texas.

Mr. GRAMM. Mr. President, under the previous unanimous consent agreement, I believe I had 10 minutes to offer an amendment with Senator Mccain, but he is not here. I am waiting for him to come back. So I would just like to suggest that perhaps we could modify the unanimous consent agreement so that when he does come back, whoever is speaking at that point, whenever they are finished, we would be recognized to do the amendment. But there is no reason we cannot conduct other business while we are sitting here.

Mr. KENNEDY. Why not talk now?

Mr. GRAMM. I am offering this with Senator McCain. I think he wants to be here as well. It is my understanding he is on his way.

Let me just suggest we let Senator Nickles speak, if he would like to speak. We could all learn something from listening to him. And then, when he is finished, hopefully Senator McCain will be back, and we will do this long-awaited amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oklahoma is recognized.

Mr. NICKLES. Mr. President, I just appreciate my friend and colleague from Texas. I will be very brief. I understand the Senator from Pennsylvania wants to come and speak on his amendment. I would just like to make a couple general comments.

Just for the information of our colleagues, I believe at 6:30 we will have three votes. So people should be cognizant of the fact we are going to have two or three votes—three votes, I believe—at around 6:30.

One, I wish to compliment the Senator from Wyoming, Mr. Enzi, for his enrollee choice proposal. I think it is an outstanding proposal. I urge my colleagues to be in favor of it.

I would also like to make a couple comments and speak of the designated decision maker. Some people are acting like this is a grand compromise, that this is going to save employers: Employers are going to be exempt now because we are going to give this decision to a third party.

When I ran a company, Nickles Machine Corporation, we had a third party administrator. They handled all the administrative claims. They did a decent job. So I didn’t have to do it, our company didn’t have to do it. We hired them to pay the benefits, to harass the providers, to make sure that benefits were paid or weren’t paid. They paid the right benefits, didn’t pay the right benefits. They were hired guns to run the plan, to make the decisions, to negotiate with the hospitals, negotiate with the doctors—all those kinds of things. That is what third party administrators do.

Now we are talking about saying: They have that responsibility, and now they have liability, too. That’s what this amendment does. Some people said: It is going to hold employers harmless. It will not. I will tell you, the net result is third party administrators are going to say: What am I liable for? Under the McCain-Kennedy-Edwards proposal, they are liable for anything and everything. They are liable for unlimited economic damages. They are liable for unlimited noneconomic damages, pain and suffering. They are liable for punitive damages—up to a cap of $5 million—in Federal courts. They are liable for unlimited economic and noneconomic damages in State courts.

It has never been said that State court limitations for doctors and so on would apply to the plans and/or to the States. So now we are saying to a third-party administrator, we want you to assume the liability but the extent of the liability is not defined. It is unlimited. One good lawsuit and they are going to have to write a great big check. What are they going to do? They are going to have to charge a lot of money. They are going to have to
The PRESIDING OFFICER. The amendment is as follows:

AMENDMENT NO. 843

The PRESIDING OFFICER. Under a previous order, the Senator from Texas is recognized for 5 minutes.

Mr. GRAMM. Mr. President, I send to the desk and ask for its immediate consideration.

Mr. GRAMM. Mr. President, I send to the desk and ask for its immediate consideration.

The legislative clerk read as follows:

The amendment is as follows:

(Purpose: To ensure the sanctity of the health plan contract)

Insert at the appropriate place:

Notwithstanding any other provision of this Act, any exclusion of an exact medical procedure, any exact time limit on the duration or frequency of coverage, and any exact dollar limit on the amount of coverage that is specifically enumerated and defined (in the plain language of the plan or coverage) under the plan or coverage offered by a group health plan or health insurance issuer offering health insurance coverage and that is disclosed under section 204(b)(1) shall be considered to govern the liability of the party administrator which is usually designated decision maker with no liability, unlimited noneconomic, unlimited economic.

The net result is that this designated decision maker that some people think is going to exonerate employers will show that this is a very expensive provision, and the cost of this bill, the cost of this bill, the operation of health care and, therefore, ultimately the number of uninsured will rise dramatically as a result of this bill and because of this provision.

I urge my colleagues to vote no on the underlying amendment that deals with this provision.

I want to mention—I hope it gets fixed—I think it is outrageous we could exempt union plans from this provision. I hope it is fixed.

I yield the floor.

Mr. REID. That the Senator from Texas will withhold, and no time will be charged against him. I would propose an unanimous consent request.

Mr. President, I ask unanimous consent that Senator SPECTER be recognized to offer an amendment regarding Federal courts with an hour for debate equally divided in the usual form; further, that Senator SPECTER be permitted to modify her amendment; further, that the Senate vote in relation to the other amendments in order prior to the vote: further, that following disposition of the Snowe amendment, there be 2 minutes for debate prior to a vote in relation to the Enzi amendment with no second-degree amendments in order prior to the vote: further, following disposition of the Enzi amendment, there be 2 minutes for debate prior to a vote in relation to the Spector amendment with no second-degree amendment in order prior to the vote.

The PRESIDING OFFICER. Is there objection?

Mr. SPECTER. Mr. President, I reserve the right to object. I entered the Chamber and I heard my name mentioned. I would ask that the unanimous consent be repeated.

Mr. REID. That the Senator from Pennsylvania would have one hour evenly divided in the usual form.

Mr. SPECTER. Mr. President, I do object to that. I was asked if I thought I could do it in an hour, and I said I would do my best. This is a complicated bill. I am not prepared to enter into a unanimous consent request which limits my presentation to 20 minutes.

Mr. REID. Will the Senator from Pennsylvania agree to have 45 minutes for him and 15 for us? We have Members who want to know when they are going to vote.

Mr. SPECTER. That is not satisfactory. I am being importuned over here about what a good deal it is. This amendment, Mr. President, involves a question of whether there will be both Federal jurisdiction and State jurisdiction. It is a matter I have discussed with the managers of the bill again this morning and with Senator Edwards. I believe there is going to have to be some discussion. There are going to have to be some issues raised and
some questions answered. It simply does not lend itself to that kind of time constraint.

Mr. REID. If I could say to the Senator from Pennsylvania, how about if he has an hour and we have 20 minutes?

Mr. SPECTER. Mr. President, I am prepared to start the debate and to make it as expeditious as possible. But I am not prepared to negotiate time to an hour and 20 minutes total. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Texas is recognized for 5 minutes on his amendment.

Mr. GRAMM. Mr. President, I have sent an amendment to the desk. The amendment has been read.

Let me explain to my colleagues what the amendment does, why it is important, and then I will thank our distinguished Arizona senator for his amendment.

Under the bill that is now before us, under the language of the current bill on page 35, the bill says that contracts are binding. But then it makes those contracts binding unless they are subject to mutual consent or medical facts and they are subject to medical review.

This creates an extraordinary ambiguity and, for all practical purposes, makes the contract not binding. That creates a situation where every health insurance company in America will realize that these outside medical reviewers, based on medical necessity, could invalidate every health insurance contract in America and, as a result, put everybody under the high option plan whether they pay for it or not. The net result would be an explosion in health care costs. In fact, if this provision is not fixed, it is at least as explosive in potential cost as the liability section, which we have talked about very much in recent days.

The amendment I have offered makes the contract binding, and it provides language that says the contract is binding as long as the contract does not violate the language of the bill. Let me explain very briefly what that means. If, as we do under the bill, we say that if you provide emergency room coverage, you have to have a prudent layperson standard for that emergency room coverage, so you have to do that if you provide the coverage no matter what this amendment says; or if we say under the bill that if the plan has pediatric care for children, that can be the primary physician, then it would have to be the law that would govern.

Within that very limited proviso, this amendment makes the contract binding. I think it is a dramatic improvement in the bill.

I thank our distinguished colleague and my old and dear friend from Arizona for helping me work this provision out. It is something I have worried about. I do think it improves the bill, and it certainly would not have happened without the reasonableness of our dear colleague from Arizona. I thank him for that.

I yield.

Mr. MCCAIN. Mr. President, I thank the Senator from Texas for causing this amendment to happen. It really is to ensure the sanctity of the health care contract. Concerns were raised that under the pending McCain-Kennedy legislation, independent medical reviewers can order a health plan to provide items and services that are specifically excluded by the plan.

That was not the intention of the law. The Senator from Texas pointed out that it could have been interpreted in another way, and clearly this amendment I think tightens that language to the point where it is clarified that the bill doesn’t do this and its specific limitations and exclusions on coverage must be honored by the external reviewers.

There are numerous safeguards already in the bill to ensure that external reviewers cannot order a group health plan or health insurer to cover items or services that are specifically excluded or expressly limited in the plain language of the plan document and that do not require medical judgment to understand.

So I think this language is important in its clarification. I understand Senator Gramm’s concerns. I know this will not bring him to the point where he is willing to vote for the bill, but I do hope it satisfies many of his concerns, and we will continue to work with him to try to satisfy additional concerns. I appreciate his cooperation and that of his staff. I believe my friend from Texas would agree this is probably the 35th draft we have of this maybe 9-line amendment, but each word is important nowadays as we work our way through this bill. I believe the appropriate place is on page 36, line 5.

By the way, I thank Senator Kennedy and Senator Edwards and their staffs for agreeing to this amendment. I share the opinion of the Senator from Texas that it is an important amendment.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, I urge that we accept this amendment. As in other areas, there has been a desire to provide clarification to the language we had in the bill. One of the issues that has been debated is the power and authority of the review medical officer in the review process. It was never the intention to include benefits that were not outlined in the contract. It was going to be limited to the contract, but it was also going to give discretion in terms of medical necessity. So this is a clarification of that, and I think it is a useful and valuable clarification. I hope the Senate will accept it.

Mr. GRAMM. Mr. President, I seek only to do good, not to have it recorded through a recorded vote. So I ask unanimous consent that the amendment be adopted.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The amendment (No. 843) was agreed to.

Mr. MCCAIN. The amendment that I offered today with Senator Gramm helps to clarify the intent of how this bill deals with medically reviewable decisions.

Mr. KENNEDY. The Senate should understand that the language in the McCain-Edwards-Kennedy bill is based on language from a bipartisan compromise between John Dingell and Charlie Norwood. Every member of our conference signed off on our approach the last Congress, from Donnelly through Phil Gramm to John Dingell and me.

Our approach is based on a very important concept. It assures that the external reviewer cannot be bound by the HMO’s definition of medical necessity. That does not mean that the reviewer cannot sign off on anything that is explicitly excluded by the health plan. If the plan covers 30 days in the hospital the reviewer cannot approve 100 days. However, where a coverage decision requires medical judgment to determine whether of not what the patient is requesting is the type of treatment or services that is explicitly excluded, we intend for that determination to be eligible for independent review.

Mr. MCCAIN. The amendment we are drafting here—that merely restates what is in the underlying bill—is not intended to change our fundamental approach, just to clarify our intent.

Our overall bill still clearly states that coverage decisions that are subject to interpretation or that are based on applying, medical facts and judgment should be reviewed. This includes those decisions that require the application of plan definitions that require that interpretation.

Mr. KENNEDY. Absolutely—the reviewer should be looking at those cases. The amendment is intended to clarify that we never meant to have the independent reviewer approving a benefit that is explicitly excluded in all cases. However, in the case where there is some dispute about whether it is a medically reviewable benefit, we do want the case reviewed.

Mr. MCCAIN. Right, just as in the case we have heard about a child with a cleft palate. The plan says they do not cover cosmetic surgery, but the doctor argues that there is specific health risks for not having this surgery. That is something the independent reviewer would look at to determine if it is covered in this case.

Mr. KENNEDY. Under the bill the external review process is first designed to determine whether a denial by the plan or issuer is based on a particular

CONGRESSIONAL RECORD—SENATE

June 28, 2001

On page 156, strike lines 15 and 16 and insert the following:

```
(1) LIMITATION ON CLASS ACTION LITIGATION.

(A) In general.—Any claim or cause of action that is maintained under this section in connection with a group health plan, or health insurance coverage issued in connection with a group health plan, as a class action, derivative action, or as an action on behalf of any group of 2 or more claimants, may be maintained only if the class, derivative action, or group of claimants is limited to the participants, beneficiaries, or enrollees with respect to a group health plan established by only 1 plan sponsor or with respect to coverage provided by only 1 issuer. No action maintained by such class, such derivative action claimant, or such group of claimants may be joined in the same proceeding with any action maintained by another class, derivative action claimant, or group of claimants or consolidated for any purpose with any other proceeding.

(B) Definitions.—In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

(2) EFFECTIVE DATE.—Paragraph (1) shall apply to all actions that are pending and have not been finally determined by judgment or settlement prior to the date of enactment of the Bipartisan Patient Protection Act, and all actions that are filed not earlier than 180 days after such date.

(3) RACKETEERING INFLUENCED AND CORRUPT ORGANIZATIONS ACT.—Section 1962(i)(c) of title 18, United States Code, is amended—

(A) by inserting '(1) after the subsection designation; and

(B) by adding at the end the following:

'(2) No action may be brought under this subsection, or alleging any violation of section 1962, if the action seeks relief concerning the manner in which any person has marketed, provided information concerning, established, administered, or otherwise operated or provided a group health plan, or health insurance coverage issued in connection with a group health plan. Any such action shall be brought under the Employee Retirement Income Security Act of 1974.

'(3) In this subparagraph, the terms 'group health plan' and 'health insurance issuer' have the meanings given such terms in section 733 of the Employee Retirement Income Security Act of 1974.

(4) CONFORMING AMENDMENT.—Section 1513 of the Employee Retirement Income Security Act of 1974 is amended by striking 'and' before the period at the end of subsection (c) and inserting a semicolon.',
```
Bauman v. U.S. Healthcare, 1 F. Supp. 2d 420, a case which was heard in the United States District Court for the District of New Jersey in 1998. In that case, and this illustrates the kind of an issue I am referring to, the HMO plan had policies which encouraged the discharge of a mother and a newborn within 24 hours after birth. Mrs. Bauman was discharged after that time elapsed, and the next day the Baumann’s daughter fell ill.

The Baumanns contacted the HMO and requested a home visit by a nurse. The HMO refused to send a nurse, and the daughter died of meningitis the same day. On appeal, the United States Court of Appeals for the Third Circuit in a case called Bauman v. U.S. Healthcare, 1 F. Supp. 2d 420, reversed the district court on one liability count and remanded the case to the district court.

That is legalese, obviously, and very hard to present in the course of a floor statement in a Senate debate on this subject, but it is illustrative of a point that where you have a situation where an HMO covers certain kinds of treatments for medical illness and you have a question of malpractice, under the McCaig bill that claim would go to the Federal court, but if there is a claim on malpractice, failure of the doctor to exercise ordinary care, that case would go to the State court.

There is no doubt that with the long history which the Federal courts have had on interpreting ERISA that there is going to be the first line of jurisdiction, and appropriately so, in the Federal court.

My amendment would provide that the Federal court would have exclusive jurisdiction over all of the claims. In a situation where the HMO would have its case heard in the Federal court, the Federal courts frequently will retain jurisdiction over the doctors, the nurses, and the hospital, and the other parties where the matter would ordinarily go to State court on what is called pendent or supplemental jurisdiction.

Again, it is very complicated. It does not lend itself to a short time agreement, but the upshot of it is that if you have the provisions of the McCaig bill which give jurisdiction to the Federal courts on contract interpretation or “quantity of care” and jurisdictions in the State court on malpractice or “quantity of care”, a plaintiff is going to have to go to two courts to get both of the claims adjudicated which is, as I say, a procedural quagmire.

The amendment which I have proposed would not be a complete deference to State law by providing that it would be the law of the State where the incident occurred which would govern the lawsuit. That is to say that the damages would be determined by State law and damages vary among the 50 States.

Also, if the State had a cap or a limit on the amount which could be collected, that would be determinative when the case is brought in the Federal court.

This is very much like the diversity cases where jurisdiction resides in the Federal court, where the plaintiff is a resident of one State and the defendant is a resident of another State. A simple illustration would be if a patient from Camden, NJ, is treated in a Philadelphia hospital, and there is a billing dispute with anesthesiologist. If the physician and there is an allegation of malpractice, negligence on the part of the physician and the hospital, then the case is going to be the State court of Pennsylvania with requisite jurisdictional amount, but it would be the law of Pennsylvania which would govern, or the plaintiff could sue in the State court of Pennsylvania. State courts would have jurisdiction.

Once you bring the HMO into the picture and you have what is traditionally under ERISA, it has to start out in the Federal court at least as the contract interpretation and “quantity of care.” That is why it is my point, and legal judgment, that it is necessary to avoid the procedural quagmire to have the Federal court have jurisdiction over the entire matter.

The question has been raised as to choice of law and venue, the question raised by my distinguished colleague from Tennessee, and I specified in the legislation that it would be the place of the incident which would determine the applicable law. Again, liability varies from State to State and venue has an important place. We want to avoid the potential of judge shopping so that the choice of law and the determination of venue would be where the incident occurred.

There is another important aspect to the litigation in the Federal court because of a feeling of a greater confidence in the Federal judicial system than in some State court judicial systems. This is a touchy point, but it is one which the Judiciary Committee examined in some detail last year in considering the question of amending diversity jurisdiction in class action cases. Class action is when plaintiffs join to sue a defendant. In order to have a class action, all you have to do to avoid diversity in a class action is to avoid diversity in a class action case and had the class action certified.

Diversity jurisdiction is easily defeated in a class action matter because if you have many plaintiffs, as you do in a class action, and a single defendant, all you have to do to avoid diversity is to have one of the plaintiffs a resident of the same State as the defendant. In order to have a diversity jurisdiction in the Federal court, all the plaintiffs have to be from the State other than the resident of a defendant.

In the Judiciary Committee report on this subject, the following facts of findings were made:

Some State court judges are less careful than their Federal court counterparts about applying the procedural requirements that govern class actions.
CONGRESSIONAL RECORD—SENATE
12373

June 28, 2001

That appears on page 16 of the report of the Judiciary Committee reporting this bill in its amended form. On the next page, page 17, appears the following statement:

A second abuse that is common in State court class actions is the use of the class device as "judicial blackmail." That is a fairly strong condemnation in citing that criticism of the State courts. I do not suggest the impugning of all State court judges everywhere. But there is a considerable difference in quality of justice in the courts where you have electoral process in many States, contrasted with the Federal system of life tenure, where I believe it is fair to say that generally the caliber of the Federal courts is better, at least as a generalization.

There has been a great deal of concern expressed by some about the unlimited potential liability that would be present in a Patients' Bill of Rights in exposing defendants, HMOs, and employers to very high verdicts which would increase the cost of health care. So there is some assurance, I think fairly stated, by having the cases brought in the Federal courts.

I think it is useful to cite a couple of other illustrations about the underlying concern which I have about the procedural quagmire which occurs. One of the two cases I intend to cite additionally—but I shall not cite many of the other cases, and there are many illustrative of this proposition—is the case of Pryzbowski v. U.S. Healthcare, Inc., 245 F.3d 266, decided by the Court of Appeals for the Third Circuit earlier this year. The plaintiff had back problems, sought surgical treatment, the HMO delayed a decision for months, the plaintiff went to State court, suing the HMO for medical complications occurring by having the cases brought in the Federal courts.

I am a cosponsor of the bill and I, too, intend to support the bill. But I do not intend to litigate a case out of the same occurrence, which in my understanding of the case, the facts we have to date with that particular issue, following the Supreme Court holdings in the Pegram case, this would be tried in the State court.

Mr. SPECTER. Madam President, I would press the question as to the interpretation of the insurance contract, which defined the rights of the parties under the contract. Isn't it true that under his bill a claim which calls for interpretation of covered benefits, such as so-called "quantity of care" would be brought in the Federal court, and a claim which might—would that not, under his bill, be brought under the State court?

Mr. KENNEDY. I say to the Senator, it is my understanding of the case, the facts have to date with that particular issue, following the Supreme Court holdings in the Pegram case, this would be tried in the State court.

Mr. SPECTER. Madam President, I suggest that is at variance with the provisions of the Senator's bill. I will cite the exact citation here.

At page 140, if I might call it to the attention of the Senator from Massachusetts, section 502 of ERISA, which is brought in the Federal court, and at the bottom, line 24, (1) regarding whether an item of service is covered under the terms and conditions of the plan or coverage.

So that is a section where you have Federal court jurisdiction, and that
would be the issue, as to interpretation of a contract to determine coverage.

I asked the Senator from Massachusetts if that is not an accurate citation of the Senator’s bill?

Mr. KENNEDY. No. No, it is not. The Senator would be reading it out of context.

Cause of action must not involve a medically reviewable decision.

The Federal cause of action excludes the medically reviewable decision. That is on page 142, line 6.

Mr. SPECTER. If I might have the attention of the Senator from Massachusetts, on the preceding page, 139, section 302 talks about the “availability of civil remedies.”

(a) Availability of Federal Civil Remedies
In Cases Not Involving Medically Reviewable Decisions

Mr. KENNEDY. Yes.

Mr. SPECTER. Going on to 140.

Mr. KENNEDY. The Senator is correct, and that is consistent with my earlier remarks.

Mr. SPECTER. If I may be permitted to finish my sentence, since I do have the floor——

Mr. KENNEDY. If the Senator wants a response, I am trying to respond to those highly technical questions the best way we can.

Mr. SPECTER. I do want a response, but not in the middle of my sentence of the middle of my question.

But to go forward here on the availability of Federal civil remedies in cases not involving medically reviewable decisions, this covers, line 24–25: regarding whether an item of service is covered under the terms and conditions of the plan or coverage,[

My question to the Senator from Massachusetts: Isn’t that an explicit conclusive statement that, if it is a matter for a contract, to what extent a contract applies to what service is covered under the terms and conditions of the plan or coverage, that is a Federal remedy? That is what it says in black and white, doesn’t it? I ask Senator KEN

Mr. KENNEDY. The Senator is wrong. That is taking it out of context. The fair way is to read the complete paragraph and go on to the next page.

Mr. SPECTER. Madam President, if the Senator cares to read the next paragraph, where he makes a claim of being taken out of context, I would be interested in hearing him read any such paragraph.

Mr. KENNEDY. I have referred to that earlier, page 142, line 6. The coverage decision depends on a medically reviewable issue. On the matters dealing with the medically reviewable issue, the Supreme Court has indicated that it would be decided in the State courts. That is essentially what we have included in this language.

Mr. SPECTER. Madam President, I agree with the general delineation that it was a medically reviewable decision.

That is called “quality of care,” as I have said before, and is a malpractice issue. But the question which I have directed to the Senator from Massachusetts is a much narrower question.

To repeat, is this not a question on the interpretation of the contracts, specifically where an item of service is covered under the terms and conditions of the plan for coverage? That is the Senator’s question. The interpretation of “an item of service is covered under the terms and conditions of the plan for coverage” is a matter for the Federal court.

I believe it is plain from the language on 139 to 141 that it is a Federal matter. But if you move to an interpretation of what is medical malpractice or a breach of duty by a doctor on what is a medically reviewable decision, then that is not a matter which goes to the State courts. And this legislation does not continue the preemption of existing law.

If I might have the attention of the Senator from North Carolina, Madam President, this is an issue which my distinguished colleague from North Carolina and I have been discussing for several days. And this morning in my hideaway we discussed the complications at least as I saw them, on having the provisions of the pending bill which deal with this complex dichotomy of an interpretation of contract coverage, which is set forth at line 24, 25 on page 140 over to lines 1 and 2 on 141. The comment regarding an item of service covered under the terms and conditions of the plan for coverage which comes under the category of availability for Federal civil remedies. Then if you move over to a medically reviewable decision on medical malpractice, there is the different.

Is my interpretation correct that the legislation provides for cause of action in different courts, No. 1? It is the coverage of the contract, or what the courts have called “quantity” malpractice and what the courts have called “quality.”

Mr. EDWARDS. If the Senator would repeat the question, it is difficult for me to hear.

Mr. SPECTER. I would be glad to repeat the question. As the Senator and I were talking this morning, isn’t it accurate that the courts have made a distinction in ERISA, section 502, on what is contract coverage or “quantity” with complete preemption under existing law?

Mr. EDWARDS. My understanding is—as the Senator said, we talked about this earlier today—that has traditionally been the case. I think there has been, I think, some erosion on that during the last few years. I think the courts are still correct. There have been a number of court rulings in that respect.

Mr. SPECTER. Madam President, I agree with the Senator from North Carolina. There has been erosion on the preemption of 514 where the courts have really seen the inequities of denying injured parties relief and instead of being under 502 with “quantity,” they have tried to move the cases into “quality” with the broader interpretation where some relief has been granted.

I am a cosponsor of the amendment. As I said earlier, one of the concerns that I candidly expressed a decade ago was my surprise over the reach of the preemption of ERISA. It seemed to me to be unfair to deny injured plaintiffs redress in the courts because of the preemptions which were really designed originally under other kinds of benefit plans and not under health maintenance organization plans. When the HMOs came into being, they took some benefit of the same kind of preemption.

But in this legislation you have the dichotomy where some cases are heard in the Federal courts as they relate to “quantity care” or interpretation of the contract, and the same case or the same issue on the same court as it relates to a medical malpractice or the “quality of care.”

My question to the Senator is, isn’t that an accurate statement?

Mr. EDWARDS. Again, I am having a little trouble hearing you. If the Senator said that the separation under our legislation between the contract causes of action, which have traditionally been considered ERISA causes of action, go to Federal court and in the case of the medically reviewable decision to the State court, would that be accurate?

Mr. SPECTER. The concern I have, having gotten an understanding on the dichotomy of the statute which the Senator and I are in agreement with, is, how is it going to work? I characterized it, while the Senator was off the floor, as a procedural quagmire.

If you have a case—and I cited a couple of them—where a child is born, and the mother has an HMO which encourages release from the hospital within 12 hours, and the child, unfortunately, dies—and I cited a specific case—and then you have a series of claims which were brought by the plaintiff and one of the claims involves interpretation of the contract, is that care covered by the contract?

Then if there are other claims for negligence on the part of the doctor or hospital, that would then fall under the amendment of the Senator from North Carolina under State court jurisdiction.

I cited another case where you had a woman who was suicidal, she was released from the hospital, the doctor refused to put the HMO wouldn’t let him do that. She committed suicide. A suit was brought and the HMO defended it on the ground that it wasn’t covered. That went from
June 28, 2001

CONGRESSIONAL RECORD—SENATE

I ask the Senator, through the Presiding Officer, then in your bill what do you do if the situation where you have Federal factors—"whether an item or service is covered under the terms and conditions of the plan or coverage" and other aspects of the same set of facts are covered under medically reviewable factors?

Mr. GREGG. Madam President, will the Senator yield for a question?

Mr. SPECTER. I would be glad to yield as soon as I get this answer.

Mr. GREGG. It is just a technical question. The answer might be better if he has time to think about it.

Mr. SPECTER. Well, it is too late now to retain the continuity without yielding, so I do yield.

Mr. GREGG. I thank the Senator and apologize for my question. After your amendment is completed, we will have three votes lined up. I wonder if we could agree that we would begin the vote on those amendments at sometime around 6:45.

Mr. SPECTER. Madam President, I am not able to specify when because the Senator from North Carolina and I are in the midst of what I consider to be an important colloquy. But I will try to keep it as brief as possible.

Mr. GREGG. I thank the Senator.

Mr. SPECTER. The question, Madam President, that I ask the distinguished Senator from North Carolina is, in taking his conclusion that there are some cases which would involve contract interpretation, and the same case would involve medical malpractice determination, what do you do when the contract interpretation has jurisdiction in the Federal court and the medical malpractice has jurisdiction in the State court?

Mr. EDWARDS. Madam President, I would say, in answering my colleague's question, that in fact I am having difficulty imagining a case right now. The vast majority of cases similar to what we have just been discussing would fall under the examples that occur to me as I stand here, those cases would all end up in State court.

So it seems to me it is very hard for my colleague from North Carolina to argue that it is not a commonplace occurrence to have specific cases arise which under his bill they would go to different courts. And then the express language of the Edwards bill has a delineation between medically reviewable decisions on medical malpractice and a category—"whether an item or service is covered under the terms and conditions of the plan or coverage."

So I would direct perhaps only two more questions to my colleague from North Carolina—and I say perhaps.

The first question is—maybe I address this question through the Chair—isn't it conclusive where the Edwards bill has language which distinguishes "whether an item or service is covered under the terms and conditions of the plan or coverage," as distinguished from medically reviewable decisions, that the Edwards bill contemplates these two categories, which under the Edwards bill are going to go to two different courts?
Mr. EDWARDS. Again, if I correctly understand the Senator’s question—
Mr. SPECTER. I can understand the difficulty, Madam President, when people are whispering to him all the time. That is why I keep my people off the floor.
Mr. EDWARDS. I am trying very hard to listen to the Senator.
Madam President, if I may respond to the Senator’s question, the answer to the question is: I really think there is a fundamental question that the Senator and I may have some disagreement about, which is contract interpretations that involve medically reviewable facts under our legislation go to State court. I believe that all of the examples the Senator has mentioned and all the examples I can think of would fall in that category.
Specifically as related to his concern about the possibility of there being two separate courts with jurisdiction, I think, in fact, that is not only highly unlikely, but I can’t think of a fact situation, as I stand here now, that would meet that criteria.
What we have done is to have a principle, and we have designed this bill around that principle. The Senator knows very well that this is the principle that was discussed in the Pegram case, a U.S. Supreme Court case, principle supported by the State attorneys general, the American Bar Association, this separation. It is a concept that makes sense in this context.
No legislation is perfect. We certainly can’t eliminate the possibility that there may be in a hypothetical case some joint jurisdiction, but I can’t think of such an example.
Mr. SPECTER. Madam President, I will direct this question to my colleague from North Carolina: How do you account for the many, many cases which have been litigated and distinguishing between contract coverage, where really the language in the Edwards bill “whether an item for service is covered under the terms and conditions of the plan,” and a medically reviewable decision, where so many courts on so many cases labored with those distinctions, if, in fact, there aren’t many cases where they are going to end up in different courts under the Edwards bill?
Mr. EDWARDS. Madam President, if I may respond to the Senator’s question briefly, I believe it is because we have created a presumption that if the contract interpretation involves a medically reviewable fact, which is going to be the majority of cases—all the cases I can think of, as I stand here—those cases go to State court.
Those are the kinds of cases to which I believe the Senator is referring. I don’t think the problem the Senator is addressing is one that is likely to occur in real life. We have specifically dealt with the issue of when there is a question, if it involves a medically reviewable fact, those cases go to State court.
Mr. SPECTER. Madam President, if it is unlikely, even with the brilliance and conceptual imagination of the Senator, or any other Senate—I can’t think of one—to occur in real life, why put this jurisdictional provision in the bill?
Mr. EDWARDS. Because there are two separate categories, if I may answer the Senator’s question. There are two potential causes of action. If it involves any issue relating to medical care, specific medical fact, those cases go to State court. We treat the HMOs just as the doctor because they are engaging in the practice of medicine. If, on the other hand, the issue is one of whether they covered for 60 days as the contract provided, do they meet some other specific contractual requirement, those are purely contractual issues that have been decided in Federal court for many years under ERISA. So we left those cases where they have traditionally been decided, which I think is the appropriate place to leave them.
Mr. SPECTER. Madam President, if you do have those contract decisions, isn’t it entirely possible that there may be a factual situation arise where there is a matter of malpractice or a medically reviewable decision involved in the same occurrence?
Mr. EDWARDS. I would answer my colleague’s question exactly the way I have before, which is, absent a presumption in our bill that if there is an involvement of a medically reviewable fact, I think the Senator’s concern would be one that I would share. But we have dealt with that issue by specifically saying where the contract interpretation involves a medically reviewable fact, those cases go to State court. Those, in my experience and in my judgment, I believe will be the same cases that the Senator is describing as cases. I think he used the term, of medical malpractice.
Mr. SPECTER. Madam President, as they say in Oklahoma, we have gone about as far as we can go on this colloquy. I would advise the managers of the bill that I will be prepared to conclude my argument by 6:45.
The PRESIDING OFFICER. The Senator from New Hampshire.
Mr. GREGG. Madam President, I ask unanimous consent that if the other side does not require any additional debate, we begin the votes on the three pending amendments, which would be, in order, the Snowe amendment, the Enzi amendment, and the Specter amendment, beginning at 6:45.
The PRESIDING OFFICER. Is there objection?
Mr. REID. Madam President, reserving the right to object, we need Senator Snowe to have 10 minutes, and she needs to conclude her presentation.
Mr. GREGG. We also need to have 2 minutes on Senator Enzi’s amendment prior to his vote. So we would have 10 minutes prior to the Snowe amendment and 2 minutes prior to the Enzi amendment. And Senator Snowe would have the right to modify her amendment.
Mr. REID. I accept that as a unanimous consent agreement in line with what we previously offered except for the time.
Mr. GREGG. I would have to add that it is my understanding Senator Enzi may divide the question on his amendment. That is his right, as I understand it; is that correct?
The PRESIDING OFFICER. The Senator is correct.
Mr. REID. If the Senator desires to divide his amendment, he may so do.
The PRESIDING OFFICER. Does the Senator wish the 10 minutes dedicated to Senator Snowe to start at 6:45 or to begin now?
Mr. GREGG. It should begin prior to the vote.
Mr. REID. We are going to vote on the Specter amendment at 6:45.
Mr. GREGG. We are going to vote on the Specter amendment.
Mr. REID. At 6:45.
Mr. GREGG. We are going to vote on Snowe and then Enzi and then Specter.
Mr. REID. We do need Senator Snowe here.
Mr. GREGG. She will be here. So 10 minutes on the Snowe amendment would begin at 6:45.
Mr. REID. Or when she arrives.
Mr. GREGG. Or when she arrives.
And the votes would begin thereafter.
The PRESIDING OFFICER. Without objection, it is so ordered.
Mr. REID. Madam President, these are on or in relation to the amendments as per the previous oral agreement?
Mr. GREGG. Right.
Mr. REID. I think the Chair. The Senator from Pennsylvania has the floor.
The PRESIDING OFFICER. The Senator from Pennsylvania.
Mr. SPECTER. Madam President, I believe the colloquies with the Senator from Massachusetts and the Senator from North Carolina have made my point. That point is that there is jurisdiction created under the McCain-Edward-Kennedy bill in two courts. There really is no doubt about that because section 302 provides for the availability of Federal civil remedies, and that covers whether an item of service is covered under the terms and plans and conditions, and later there are medically reviewable decisions in State courts.
Although there can be an inconclusive colloquy, as there is no confession or admission on the floor of the U.S. Senate, I think it is pretty plain that there are cases—and I have cited a whole series of specific cases in my presentation. Bauman, Pryzbowsi, Lazorko, and Corcoran—where you had factual situations where you have an interpretation of a plan which would
come under Federal jurisdiction—such as the mother’s stay covered for more than 21 hours, the suicidal woman’s coverage extended for hospitalization under that circumstance—then a combination of failure to have a plan coverage and also medical malpractice. And you have both claims brought. And under the McCain-Kennedy-Edward bill, it is plain that those two claims would be brought in separate courts beyond any question. It is not a matter of what the distinguished Senator can imagine. You have case after case which have had these interpretations, contract interpretation and ‘quantity of care,’ and that goes to the Federal court. And then you have ‘quality of care,’ and that goes to the State court.

I am not unaware of the realities of voting in this Chamber where a coalition has been formed, and there is a mindset. But I do hope that the managers of this bill will revisit this situation after this vote and when the bill goes to conference because having both these courts liable is going to double the burden on plaintiffs who are injured—to make a contract interpretation claim in the Federal court and to go to the State court to make a medical malpractice claim—and it is going to require double expenses by the HMOs, by the doctors, and by the hospitals—although you might have the doctors and hospitals eliminated from the Federal litigation, but the HMOs will certainly be there; and that is highly undesirable.

I have a grave concern about the speed of passage of this bill. Now, it is true we have been considering the Patients’ Bill of Rights for a long time—many years. Too long. But this bill has come without the benefit of committee action, without the benefit of a markup; and what there has been is sort of a moving target markup of this bill on the floor by the committee of the whole, as we have gone through many amendments. But it simply cannot be denied that there are two sections of this bill, one conferring Federal jurisdiction and one conferring State jurisdiction, and the same factual situation would raise questions under both court systems, and this bill would require litigation in two courts. That is very wasteful and very confusing. To call it a procedural quagmire is not an overstatement. The answer is fundamental, and that is to provide for exclusive Federal court jurisdiction, which I have in this legislation. You might argue that it could go to the State court and that would be an improvement rather than have both State and Federal courts. But it is very hard to move exclusively to the State court except you lose the long arm of law built up under ERISA as to what is a plan’s coverage. So given the fact that you are going to inevitably end up in the Federal court, the Federal court ought to be exclusive jurisdiction. And as the amendment provides, the damages will be determined by State law. No more Federal caps, but whatever State caps there were would be in effect.

I see my colleague from Illinois on the floor. He commented to me that he agreed with the provision that there ought to be unitary jurisdiction, but thought it ought to be in the State court. I will yield to the Senator from Illinois if he cares to use the limited time remaining.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. FITZGERALD. Madam President, I did want to, in part, agree with my colleague from Pennsylvania. I think he has identified an important problem that exists in the underlying bill. I have long favored creating liability for HMOs that harm someone because of their negligence. Right now, HMOs are protected. They are immune from liability, and that is a protection that almost no other individual or corporation has in this country, and I don’t think it is defensible.

For the last 2 years, I have been voting regularly to make HMOs liable where they have been negligent. But I do think we have a problem in this bill in that we create State court tort liability by repealing the ERISA immunity in one part of the bill. That is on page 157, I believe. But then, at the same time, we create also tort liability, as well as more contract liability, and there already is contract liability under ERISA in Federal court.

The problem I see is that there are tort causes of action authorized in this bill both in State court and in Federal court. I have always thought the playing field was tilted in favor of HMOs, and that playing field needs to be level. But I am concerned now that if this effect in the underlying bill is not remedied, the playing field will be tilted in the opposite direction.

The PRESIDING OFFICER. The hour of 6:45 having arrived, under the previous order, the Senator from Maine is to be recognized.

AMENDMENT NO. 834, AS MODIFIED

Ms. SNOWE. Madam President, I ask unanimous consent to modify the amendment that has been offered by Senator DeWINE, Senator LINCOLN, and Senator NELSON and send a modification to the desk.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The amendment is so modified.

The amendment (No. 834), as modified, is as follows:
(Purpose: To make technical corrections concerning the application of Federal causes of action to certain plans)

On page 2 of the amendment, between lines 9 and 10, insert the following:
On page 144, lines 7 and 8, strike ‘‘or under part 6 or 7’’.
CONGRESSIONAL RECORD—SENATE

June 28, 2001

Mr. GREGG. Madam President, unless somebody else is seeking that time, I will speak. I congratulate the Senator from Maine and the Senator from Ohio for adjusting this amendment. The changes they made in this amendment are very positive. The amendment moves in the right direction.

However, it must be made clear this amendment targets one narrow aspect of the concerns of this bill, and, in fact, there are still some issues in that aspect. Specifically, employers are going to have a very difficult problem figuring out whether they are a direct participant or whether they fall under the designated decisionmaker safe harbor.

There are issues within this narrow issue that are very significant. The greater issues on the question of liability still remain very viable. It is of serious concern to those of us who look at this as extremely expensive legislation in the sense it will drive up health care costs and result in a lot of people losing their health insurance. Employers will drop the health insurance because of the liability aspects being thrown at employers in this bill and the costs employers simply are not going to bear. They will drop health insurance or reduce the quality of health insurance.

The estimates of CBO are in the range of 3.1 million, and OMB estimates are in the range of 1 million to 4 million people will lose health care. I think it will be literally tens of millions of people who will see the quality of their health care insurance degraded as their employers start to adjust.

As to this specific amendment, which is a narrow amendment, not an expansive amendment, the movement by the Senators from Ohio is to be congratulated. I thank them for it.

I yield back my time, and I yield the floor.

The PRESIDING OFFICER. Time is called.

The result was announced—yeas 96, nays 4, as follows:

YEAS—96

Akaka
Allen
Baucus
Bennett
Biden
Bingaman
Bond
Boxer
Brownback
Burns
Byrd
Chafee
Collins
Conrad
Craig
Cox
Cox

The amendment (No. 834), as modified, was agreed to.

Mr. GREGG. Madam President, I move to reconsider the vote.

Mr. REID. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Ms. STABENOW). There are now 2 minutes equally divided on the Enzi amendment.

The Senator from Wyoming is recognized.

AMENDMENT NO. 840

Mr. ENZI. Madam President, under the amendment we just agreed to, we made some progress on handling liability. But there is a group of businesses that were left out. You will never hear me in this Chamber talk about big businesses. I always talk about the small ones. None of these is headquartered in Wyoming. But I am compelled to put in an amendment that will take care of a major problem which will take care of health care at the level they know it for 6 million people in the U.S. who work for the big, self-insured, self-administered companies, such as Hewlett-Packard, Caterpillar, Wal-Mart, and Pitney Bowes. None of those is in my State.

This provides an option to allow one of two ways of providing insurance to their people so individuals can get the right to sue if they want that right or they can stay with the plan which they presently get all the benefits from without any difficulty. This provides that option for them.

This is providing an option so that the company can avoid liability by providing a liability option for their people.

I ask for your support on this amendment to clear up what the people in your State need.

I also believe it is my right to divide the amendment on page 3, line 13.

The PRESIDING OFFICER. The amendment is so divided.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Madam President, let me mention what this amendment is all about.

If an employer gives options to any employee, it can offer a program that
is very inferior or it can provide a voucher that is inferior. You can’t buy a good health insurance policy. If it offers those two options to an em-
ployee, and that employee denies it, then the employee who stays with that
company is virtually excluded from bringing any action against the em-
ployer, no matter how involved the em-
ployer is in making medical decisions that can cause adverse reaction to that
employee—either death or injury.

That is a lousy choice. This is an op-
tion many companies will take. It will be at the expense of the employees.
Their can get two inferior options. If they reject it and stay with the com-
pany, they are excluded from the bene-
fits and the protections of this bill. It is going to open up a great exclusion
for millions of hard-working Ameri-
cans and their families. It should be re-
jected.

Mr. ENZI. Madam President, I ask for the yeas and nays.
The PRESIDING OFFICER. The yeas
and nays have already been ordered.
The question occurs on division I.
The Senator from Nevada.
Mr. REID. Madam President, I move to table the whole amendment, and I ask for the yeas and nays.
The PRESIDING OFFICER. The yeas
and nays have been ordered.
Mr. GREGG. Madam President, parl-
liamentary inquiry: As I understand it, the question was divided. Is this a mo-
tion to table on the first part?
Mr. REID. Yes. That is true.
The PRESIDING OFFICER. That is
correct.
Mr. GREGG. I thank the Chair.
The PRESIDING OFFICER. The question is on the motion to table divi-
sion I.
The yeas and nays have been ordered, and the clerk will call the roll.
The assistant legislative clerk called the roll.
The result was announced—yeas 55, nays 45, as follows:

[Rollcall Vote No. 206 Leg.]

The amendment (No. 844) was re-
jected.

Mr. KENNEDY. I move to reconsider
the vote.
Mr. SANTORUM. I move to lay that
motion on the table.

The motion to lay on the table was agreed to.

(Mr. DURBIN assumed the chair.)
Mr. KENNEDY. Mr. President, in just a few moments, I believe there will be a consent requested by the minority floor leader to outline a series of amendments to consider and outline the order in which to take them up this evening, with disposition of those on the morrow.

Mr. WARNER. Mr. President, we are not prepared to say that until we have an opportunity to see those amendments. We are trying to work through the amendments at the present time. I hope perhaps we can get started on the discussion, and then in a few moments time when we have a chance to see each of the amendments, we can come back with the leadership proposal for an agreement on time and order this evening.

Mr. Grassley. Mr. President, we are ready to enter into an agreement relative to time and reserve the issue of second-degree amendments until the Democratic leader has had the opportunity to review the amendments. If we can get times locked in, that will be very helpful.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, parliamentary inquiry: Does the Senator from Virginia have an amendment pending that I do not see?

The PRESIDING OFFICER. The Senator is correct.

AMENDMENT NO. 833, AS MODIFIED

Mr. WARNER. Mr. President, I send to the desk a modification to that amendment.

The PRESIDING OFFICER. The amendment is so modified.

The amendment (No. 833), as modified, is as follows:

On page 154, between lines 2 and 3, insert the following:

```
(II) NUMEROUS HOURS.—The court shall determine the number of hours reasonably expended by each attorney.

(III) HOURLY RATE.—The court shall determine a reasonable hourly rate for each attorney, taking into consideration the actual fee that would be charged by each such attorney and what the court determines is the prevailing rate for other similarly situated attorneys.

(iv) CONSIDERATION OF OTHER FACTORS.—A court may increase or decrease the product determined under clause (i) by taking into consideration any or all of the following factors:

(I) The time and labor involved.

(II) The novelty and difficulty of the questions involved.

(III) The skill required to perform the legal service properly.

(iv) The preclusion of other employment of the attorney due to the acceptance of the cause of action.

(v) The customary fee of the attorney.

(vi) Whether the original fee arrangement is a fixed or contingent fee arrangement.

(vii) The time limitations imposed by the attorney’s professional relationship with the client.

(viii) The amounts recovered and attorney’s fees awarded in similar cases.
```

The amendment as modified has been read. It is now the desire of the Yeas to proceed with the Santorum amendment. I therefore order that amendment until we see the amendments, and we are going to operate on a good faith measure.

We are thankful for the leadership of the Senator from New Hampshire proceeding with those first two.

There are some others we might be able to get a time agreement on, as well, if the Senator wants to mention them.

Mr. GREGG. Of course, at this time we cannot proceed past the Santorum amendment until we get an agreement on that. At least I renew my request subject to the reservations of the Senator from Massachusetts, to which I have no objection.

The PRESIDING OFFICER. Is there objection to the unanimous consent request, as modified, for consideration of the amendments of Senators DeWine and Grassley?

Without objection, it is so ordered.

AMENDMENT NO. 82

(Purpose: To limit class actions to a single plan)

Mr. DEWINE. Mr. President, I have an amendment at the desk.

The yeas and nays were ordered.

Mr. WARNER. Mr. President, it will be voted on whenever the managers desire.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. GREGG. Mr. President, I ask unanimous consent that the following Members be recognized this evening:

-- Senator DeWine, 15 minutes, with the time equally divided, on class actions; Senator Grassley for 30 minutes, with the time equally divided, on customs fees and other matters; Senator Santorum for 30 minutes, with the time equally divided, on the Born Alive Infant Protection Act; Senator Brownback, 1 hour equally divided on a germinal genetic amendment.

Mrs. BOXER. I ask my friend to repeat the Santorum amendment.

Mr. GREGG. Born Alive Infant Protection Act.

Mrs. BOXER. The Born Alive Equal Protection Amendment.

Mr. GREGG. Born Alive Infant Protection Act.

I presume it passed the House. Mr. KENNEDY. On that there will be an objection to a time limit.

The PRESIDING OFFICER. Objection is heard.

Mr. GREGG. Why don’t we begin with the DeWine amendment for 15 minutes, followed by the Grassley amendment for 30 minutes, and we will work on the rest.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. Reserving the right to object, and I do not intend to object, I appreciate what the Senator from New Hampshire is attempting to do. We have every inclination to support that proposal up to this point, but we reserve possible second-degree amendments and a tabling motion. We do not intend at this time to exercise those until we see the amendments, but we are going to operate on a good faith measure.

We are thankful for the leadership of the Senator from New Hampshire proceeding with those first two.

There are some others we might be able to get a time agreement on, as well, if the Senator wants to mention them.

Mr. GREGG. Of course, at this time we cannot proceed past the Santorum amendment until we get an agreement on that. At least I renew my request subject to the reservations of the Senator from Massachusetts, to which I have no objection.

The PRESIDING OFFICER. Is there objection to the unanimous consent request, as modified, for consideration of the amendments of Senators DeWine and Grassley?

Without objection, it is so ordered.
June 28, 2001

The PRESIDING OFFICER. The clerk will report. The legislation the clerk read as follows:

The Senator from Ohio (Mr. DeWine) proposes an amendment numbered 842.

Mr. DEWINES. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 171, between lines 14 and 15, insert the following:

SEC. 303. LIMITATION ON CERTAIN CLASS ACTION

DESIGNATION.

(a) ERISA.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by section 302, is further amended by adding at the end the following:

“(o) LIMITATION ON CLASS ACTION LITIGATION.—

(1) IN GENERAL.—Any claim or cause of action that is maintained under this section in connection with a group health plan, or health insurance coverage issued in connection with such plan, as a class action, derivative action, or as an action on behalf of any group of 2 or more claimants, may be maintained only if the class, the derivative claimant, or the group of claimants is limited to the participants or beneficiaries of a group health plan established by only 1 plan sponsor. No action maintained by such class, derivative claimant, or such group of claimants may be joined in the same proceeding with any action maintained by another class, derivative claimant, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms ‘group health plan’ and ‘health insurance coverage’ have the meanings given such terms in section 733 of the Employee Retirement Income Security Act of 1974.

“(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.”.

(b) RICO.—Section 1964(c) of title 18, United States Code, is amended—

(1) by inserting “(1)” after the subsection designation;

(2) by inserting at the end the following:

“(2)(A) No private action may be brought under this subsection, or alleging any violation of section 1962, where the action seeks relief in a manner in which any person has marketed, provided information concerning, established, administered, or otherwise operated a group health plan, or health insurance coverage in connection with a group health plan. Any such action shall only be brought under the Employee Retirement Income Security Act of 1974. In this paragraph, the terms ‘group health plan’ and ‘health insurance issuer’ shall have the meanings given such terms in section 733 of the Employee Retirement Income Security Act of 1974.

“(B) Subparagraph (A) shall apply to private civil actions that are filed on or after January 1, 2002.”.

Mr. DEWINES. Mr. President, I allowed the clerk to read because I wanted my colleagues to hear the essence of the amendment. It is a very simple amendment.

My amendment in a very rational way would strike class action suits that could be filed as a result of this bill. The goal of the patient protection legislation under consideration, both the McCain-Kennedy bill and the Frist-Breaux-Jef-

fords bill, is, of course, to protect patients. We cannot be unmindful of the cost. Obviously, we have to be concerned about the cost, and we have to worry if any parts of this bill do in fact drive up the cost because ultimately this will impact how many employers do in fact offer health insurance. It is something with which we have to be concerned.

I believe my amendment offers a very simple way to curtail some of these increased costs. The problem is that the underlying bill will increase the cost of health care because the bill currently contains no language to limit the scope of class action lawsuits. This very possibility could lead to increases in the filing of onerous, burdensome, costly class action suits.

My amendment ensures that class action lawsuits that are filed in a responsible way. I think my colleagues would agree that class actions can be very effective and can be efficient and can be a valuable tool to achieve justice.

As we also know, unfortunately, these suits sometimes are subject to abuse. That is why I believe we need to limit the target of these class actions. That is what our amendment does.

The reality is that within every company there exists unique relationships between the company, the employees, and the health care plans. Because of that, it is impossible to compare different companies that happen to offer similar health care plans. The fact is that every company negotiates every contract differently. There may be similarities. Every situation is, obviously, different.

Now, at the same time, employees within the same company, with the same health care plan, who suffer the same way as a result of being denied entitled benefits, should have the right to band together to form a class and to file suit. This amendment would recognize class actions within one company against one plan.

Our language essentially says this: One employer, one health care plan, one class action suit. It is that simple. Here is how our amendment works if adopted. Suppose Ford Motor Company offers its employees the hypothetical Aetna Health Care Plan A. General Motors has this plan. Assume, also, that Chrysler has the same plan. Now, if employees at Ford or General Motors band together in a class action against Aetna because they all believe they suffered harm because of the same denial in entitled benefits, they can go ahead under our amendment and do that. Similarly, if employees at GM or Chrysler also believe they have suffered a result of denial of the same benefits, GM and Chrysler employees can file their own class actions against Aetna. But employees at Ford, GM, and Chrysler can’t join together in one suit against the health care provider.

This means class actions would be limited to employees within one company against one health care plan. Ultimately, we need this because abuse of class action lawsuits is not a road to assuring access to quality health care. If we want the bill before the Senate not to add unnecessary litigation and costs, I encourage my colleagues to adopt this amendment.

I reserve the remainder of my time. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. McCAIN. I repeat the request for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. REID. If the Senator from Ohio wishes the yeas and nays, we would be happy to give those to him with the agreement that we will vote tomorrow.

Mr. DEWINES. I renew my request for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Are Senators prepared to yield back time on the amendment?

Mr. DEWINES. I believe we have an understanding to reserve several minutes tomorrow morning for summation.

Mr. EDWARDS. Mr. President, there are a couple of issues and I have just seen this amendment—a couple of issues raised immediately.

One, the entire Patients’ Bill of Rights is about treating everybody the same. This, of course, carved out a special treatment for HMOs on the issue of accountability.

Second, this amendment makes a special exception under RICO for HMOs and under rules of procedure.

Third, it has been some time since I looked at the rules, I confess. But I seem to recall under class action law, rule 23 of the Federal Rules of Civil Procedure, there is a numerosity requirement, that you have to have a sufficient number of employees involved to justify the class action requirement, and I am not sure under the language the Senator has drafted that would be possible because I believe, if I understand the Senator’s amendment correctly, he has limited it to one employer for purposes of class actions.

Mr. DEWINES. Obviously, the amendment does not change what the rules say as far as the number of people required for a class action. The Senator
is correct; it does limit it to one company.

Mr. EDWARDS. I thank the Senator for his answer.

There is at least a serious question about that and we would need to go back and look. Under the Class Action Rules of Civil Procedure, it is my recollection there is a numerosity requirement that means a class has to be of sufficient size to be able to be certified as a class action, and I am not certain, if you limit the actions to one employer, that you don’t effectively eliminate the possibility of a class action because that requirement cannot be met.

I confess to the Senator, that is from memory, and I will have to go back and look to be certain.

I have concerns about the fundamental principle that the principle of this legislation is that we treat HMOs, for accountability purposes, as everybody else. And the notion of doing something specifically to protect them from class actions and to limit class actions and to carve out civil RICO, I believe it is correct in saying there are some State medical societies that have pending actions against them, civil RICO actions against HMOs, where they believe, obviously, the requirements of that statute have been met and there have been improper and illegal activities by the HMOs. Particularly as we go forward, if any State medical society believes those problems continue to exist, they may want to avail themselves of the civil RICO statute, a law that exists in part for that purpose.

Again, what you would be doing is we are carving out special treatment for HMOs. Having said that, I do not disagree with the fundamental principle that is part of this process; it is public policymaking. We hope to balance the interests on both sides. I think that notion makes sense. My concern is we are not carving out the HMOs from this particular statute when we are not carving anyone else out from this particular statute.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. DEWINE. Just to respond to my colleague—and I do appreciate his comments about RICO—again it is a balancing question each Member is going to have to decide.

Just to clarify things, I want to make it clear, the way this is drafted, we do not affect any pending issues, so those suits would not in any way be affected.

I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EDWARDS. Mr. President, I yield my time.

Mr. DEWINE. I wonder if I may inquire, how much time remains?

The PRESIDING OFFICER. The Senator has 2 minutes remaining.

Mr. DEWINE. I will respond to my colleague and I appreciate his comments. He is closer to the courtroom in time than I am, and it has been many years since I have practiced law.

What this comes down to is that we are creating new opportunities for lawsuits to come in this bill. Whether we are about is a balancing test, a balancing question. It is a matter of public policy. We have to decide. As we create new causes of action, new opportunities to file lawsuits, I think it is legitimate to look around and say: How expansive do we want to allow class actions to be under this new cause of action?

It seems to me language we have included, which is basically—basically, I say—what was in the Frist bill originally, is a rational way to do it. It doesn’t ban class actions but basically says we are going to limit them. I think it is a balancing test and Members are going to have to make their own decision whether they think it is worth providing people with the opportunity to have nationwide class actions. Candidly, with the tremendous cost this is probably going to incur, that ultimately is going to be paid and ultimately going to drive up health care costs. I think Members have to make that decision.

I yield the remainder of my time.

The PRESIDING OFFICER. The Senator from Ohio yields the remainder of his time. The Senator from North Carolina has 10 minutes 48 second.

Mr. EDWARDS. If I may respond briefly to the comments of my colleague, the one issue he did not address, at least in his last answer—he may have discussed it earlier—is the issue of civil RICO, I believe I am correct in saying there are some State medical societies that have pending actions against them, civil RICO actions against HMOs, where they believe, obviously, the requirements of that statute have been met and there have been improper and illegal activities by the HMOs. Particularly as we go forward, if any State medical society believes those problems continue to exist, they may want to avail themselves of the civil RICO statute, a law that exists in part for that purpose.

Again, what you would be doing is we are carving out special treatment for HMOs. Having said that, I do not disagree with the fundamental principle that is part of this process; it is public policymaking. We hope to balance the interests on both sides. I think that notion makes sense. My concern is we are not carving out the HMOs from this particular statute when we are not carving anyone else out from this particular statute.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. DEWINE. I wonder if I may inquire, whether or not there was an unanimous consent agreement.

Mr. REID. That is right.

Mr. DEWINE. I yield the floor and thank my colleague from Nevada.

Mr. EDWARDS. We yield the remainder of our time.

The PRESIDING OFFICER. All time has been yielded back. Under the unanimous consent agreement, the Senator from Iowa, Mr. GRASSLEY, is recognized.

Mr. GRASSLEY. Mr. President, I yield myself such time as I might consume.

The PRESIDING OFFICER. The Senator sending an amendment to the desk?

AMENDMENT NO. 845

Mr. GRASSLEY. I send an amendment to the desk and ask for its immediate consideration.

The legislative clerk read as follows:

The Senator from Iowa (Mr. GRASSLEY) proposes an amendment agreed to.

Mr. GRASSLEY. I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is in the record.

(Purpose: To strike provisions relating to customs user fees and Medicare payment delay)

On page 179, strike lines 1 through 14.

Mr. GRASSLEY. Mr. President, I think three times during the debate on this bill I have been trying to make the point that bringing this bill to the floor usurped the consideration of the Senate Finance Committee of two provisions that are in the bill and another provision that ought to be in the bill that is not in the bill. My amendment today deals with striking sections 502 and 503. It is another way of my saying, as I tried to in an amendment 2 days ago on this legislation, to the Finance Committee, that people writing this legislation ought to keep their hands off subject matter that comes within the jurisdiction of the Senate Finance Committee. If people are writing a piece of legislation that comes out of Health, Education, Labor, they ought to find sources of revenue out of programs within their own jurisdiction to fund bills that they think up, rather than robbing another committee. That is basically what has happened.

I am opposed to both provisions on jurisdictional grounds because they are within the control of the Finance Committee, not the Health, Education, Labor, and Pensions Committee. But I also want to make it very clear it is not just jurisdictional, I also have concerns about what it does to policy, dealing with customs on the one hand and Medicare on the other hand. I want to review each of these in turn.

Section 502 of the bill extends the jurisdiction of the Senate Finance Committee to review each of these in turn. It is another way of my saying, as I tried to in an amendment 2 days ago on this legislation, to the Finance Committee, that people writing this legislation ought to keep their hands off subject matter that comes within the jurisdiction of the Senate Finance Committee. If people are writing a piece of legislation that comes out of Health, Education, Labor, they ought to find sources of revenue out of programs within their own jurisdiction to fund bills that they think up, rather than robbing another committee. That is basically what has happened.

I am opposed to both provisions on jurisdictional grounds because they are within the control of the Finance Committee, not the Health, Education, Labor, and Pensions Committee. But I also want to make it very clear it is not just jurisdictional, I also have concerns about what it does to policy, dealing with customs on the one hand and Medicare on the other hand. I want to review each of these in turn.

Section 502 of the bill extends the customs user fees from the year 2003 to 2006. Mr. Chairman, I want to find sources of revenue out of programs within their own jurisdiction to fund bills that they think up, rather than robbing another committee. That is basically what has happened.
June 28, 2001

CONGRESSIONAL RECORD—SENATE

to underline the costs of customs commercial operations. But today in this bill, the fees are not being used for customs. They are being used to offset the cost of the Patients’ Bill of Rights to the tune of $7 billion. I think this is unacceptable and violates the comity that one committee ought to have towards the other.

It is unacceptable because when you have constituents who pay customs user fees for the purpose of having an efficient and effective operation of the Customs Service, so you can enter this country in an expeditious way, for those fees not to be used for what they were intended—for expedited entry to the country, to police illegal entry to the country, to police illegal drugs coming into the country, generally to make the customs agency’s personnel more efficient and better able to do their job so the United States can be a sovereign nation protecting its borders the way it should—if these fees are extended, and I want to emphasize the word ‘‘if,’’ they should be extended in a thoughtful way, not as some budget trick to make the costs of this bill fit within the confines of the Federal budget.

I am not the only one who thinks so. I have received numerous letters from companies, from associations that are very concerned about this—Liz Claiborne, Inc., the National Association of Foreign Trade Zones, the Joint Industry Group, the National Retail Federation, the American Electronics Association, and also a memo from the U.S. Customs Service. They are all raising concerns because these are folks who pay this customs user fee, a fee that is meant to pay for bringing things into the country, for those fees not to be used for the improvements in the customs operation that were anticipated when these fees were put in place. I ask unanimous consent these letters and memos be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LIZ CLAIBORNE INC.

Hon. Charles E. Grassley,
U.S. Senate, Hart Senate Office Building, Washington, DC.

DEAR SENATOR GRASSLEY: We write in opposition to a provision in the Patients’ Bill of Rights (S. 1052) that would extend the merchandise processing fee, or ‘‘mpf,’’ for eight additional years. This is a trade-related measure, a user fee levied against importers like ourselves, that has no place in this debate.

It is completely inconceivable that the U.S. Customs Service, so you can enter this country in an expeditious way, for those fees not to be used for what they were intended—for expedited entry to the country, to police illegal entry to the country, to police illegal drugs coming into the country, generally to make the customs agency’s personnel more efficient and better able to do their job so the United States can be a sovereign nation protecting its borders the way it should—if these fees are extended, and I want to emphasize the word ‘‘if,’’ they should be extended in a thoughtful way, not as some budget trick to make the costs of this bill fit within the confines of the Federal budget.

I am not the only one who thinks so. I have received numerous letters from companies, from associations that are very concerned about this—Liz Claiborne, Inc., the National Association of Foreign Trade Zones, the Joint Industry Group, the National Retail Federation, the American Electronics Association, and also a memo from the U.S. Customs Service. They are all raising concerns because these are folks who pay this customs user fee, a fee that is meant to pay for bringing things into the country, for those fees not to be used for the improvements in the customs operation that were anticipated when these fees were put in place. I ask unanimous consent these letters and memos be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LIZ CLAIBORNE INC.

Hon. Charles E. Grassley,
U.S. Senate, Hart Senate Office Building, Washington, DC.

DEAR SENATOR GRASSLEY: We write in opposition to a provision in the Patients’ Bill of Rights (S. 1052) that would extend the merchandise processing fee, or ‘‘mpf,’’ for eight additional years. This is a trade-related measure, a user fee levied against importers like ourselves, that has no place in this legislation. We ask you to support efforts to delete the provision entirely.

This legislation was experienced a serious deficit, the reasons for its passage have since disappeared. Now, it is simply a tax on American citizens who buy imported products, whose price is the mpf. It is unconscionable to continue to tax Americans in this manner and we intend to seek repeal in the appropriate committee jurisdiction.

In the meantime, we ask that you assist us in removing the mpf funding from the Patients’ Bill of Rights. The merchandise processing fee has no place in this debate. The fee will not be viewed on the merits in these proceedings, but is instead being used—cynically—as a ‘‘pay-for’’ a totally unrelated program.

Sincerely,

FRANK KELLY,
Vice President, International Trade Compliance and Government Affairs.

NATIONAL ASSOCIATION OF FOREIGN-TRADE ZONES,

Hon. Charles Grassley,
Hart Senate Office Building, Washington, DC.

DEAR SENATOR GRASSLEY: The National Association of Foreign Trade Zones (NAFTZ) has learned that S. 872, Sec. 602 the ‘‘Bipartisan Patient Protection Act’’ provides for the extension of the Merchandise Processing Fee (MPF) beyond the date that is currently scheduled for 2003. Congress established the fee to offset the cost of the commercial operations of the U.S. Customs Service. Not only does the proposed legislation continue the practice of allocating the MPF to the general fund of the U.S. Treasury with no relationship to the purpose of the fee, it completely eliminates the relationship of the fee to the Customs Service. We have serious reservations as to whether this is permissible through the General Agreement of Tariffs and Trade, and the World Trade Organization.

The NAFTZ is not opposed to the imposition of a fee for services rendered. We do believe, however, that any such fee must correlate to a discernible cost associated with the service provided. We are concerned that at a time when Congress is struggling to find the necessary funding to cover the cost of new and improved programs, that funding is already designated by Congress for that purpose and is being diverted.

Since the purpose of the MPF, as established on the importance of the U.S. Customs Service, we are strongly opposed to any extension of the MPF without designating the revenue to that purpose. If Congress accordingly requests that you drop the merchandise processing fee extension from S. 872.

Thank you for your attention and consideration of our views. If you have any questions, please feel free to contact me.

Sincerely,

RANDY P. CAMPBELL,
Executive Director.

JOINT INDUSTRY GROUP,
June 20, 2001, Washington, DC.

Hon. John McCain,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR MCCAIN: The Joint Industry Group (JIG) expresses its opposition to a provision in the Bipartisan Patient Protection Act (S. 1052) that would automatically extend the U.S. Customs user fee from 2003 to 2011 (Sec. 502). This 8-year extension would represent an unacceptable and violates the comity in the appropriate committee jurisdiction.

In the meantime, we ask that you assist us in removing the mpf funding from the Patients’ Bill of Rights. The merchandise processing fee has no place in this debate. The fee will not be viewed on the merits in these proceedings, but is instead being used—cynically—as a ‘‘pay-for’’ a totally unrelated program.

Sincerely,

FRANK KELLY,
Vice President, International Trade Compliance and Government Affairs.

NATIONAL ASSOCIATION OF FOREIGN-TRADE ZONES,

Hon. Charles Grassley,
Hart Senate Office Building, Washington, DC.

DEAR SENATOR GRASSLEY: The National Association of Foreign Trade Zones (NAFTZ) has learned that S. 872, Sec. 602 the ‘‘Bipartisan Patient Protection Act’’ provides for the extension of the Merchandise Processing Fee (MPF) beyond the date that is currently scheduled for 2003. Congress established the fee to offset the cost of the commercial operations of the U.S. Customs Service. Not only does the proposed legislation continue the practice of allocating the MPF to the general fund of the U.S. Treasury with no relationship to the purpose of the fee, it completely eliminates the relationship of the fee to the Customs Service. We have serious reservations as to whether this is permissible through the General Agreement of Tariffs and Trade, and the World Trade Organization.

The NAFTZ is not opposed to the imposition of a fee for services rendered. We do believe, however, that any such fee must correlate to a discernible cost associated with the service provided. We are concerned that at a time when Congress is struggling to find the necessary funding to cover the cost of new and improved programs, that funding is already designated by Congress for that purpose and is being diverted.

Since the purpose of the MPF, as established on the importance of the U.S. Customs Service, we are strongly opposed to any extension of the MPF without designating the revenue to that purpose. If Congress accordingly requests that you drop the merchandise processing fee extension from S. 872.

Thank you for your attention and consideration of our views. If you have any questions, please feel free to contact me.

Sincerely,

RANDY P. CAMPBELL,
Executive Director.
S. 1052 violates the WTO provisions to which the United States is a signatory.

We therefore urge that the user fee extension be removed from S. 1052. We need the opportunity to debate the merits of this fee when it comes up for renewal in 2003. If you have any questions about our views on this issue or wish to discuss the matter further, please contact Alan Atkinson at (202) 466–4580. Thank you for your consideration.

Sincerely,

RONALD SCHOOF, Chairman, Joint Industry Group.

NATIONAL RETAIL FEDERATION,
Liberty Place,

Hon. CHUCK GRASSLEY,
Ranking Member, U.S. Senate Committee on Finance, Dirksen Bldg., Washington, DC.

DEAR SENATOR GRASSLEY, The National Retail Federation (NRF) is surprised to learn that section 502 of the Bipartisan Patient Protection Act (S. 1052) contains an eight-year extension of the Customs Merchandise Processing Fee (MPF). The MPF is an administrative fee levied on imports into the United States, through which U.S. retailers and other importers pay hundreds of millions of dollars per year.

NRF and the U.S. retail industry object most strongly to inclusion of this provision and, for the following reasons, we urge that the provision be stricken from the bill.

The Senate Finance Committee, which has jurisdiction over the MPF and other customs issues, was not consulted about this provision in S. 1052, and has had no opportunity to consider the merits of extending the fee as currently structured.

The MFPS was created to offset the administrative costs of U.S. Customs services' commercial operations, and any attempt to use it for other purposes, as this bill would do, is against the rules of the World Trade Organization.

The Finance and Ways and Means Committees have been working for some time with Customs and the importing community on mechanisms to restructure the MPF program to make sure it is used for its proper and intended function—for commercial operations, including customs modernization funding.

It is critical that the reauthorization of the MPF be moved into a health bill without the approval of the Committee of Jurisdiction or the knowledge of those in the private sector that will be most directly affected as a result. At the same time, we are struggling to provide Customs Service with sufficient funds for a new computer system to allow Customs to modernize its operations and protect our nation's borders. If this provision in S. 1052 is allowed to stand, it will be impossible for the Senate Finance Committee to restructure the MPF program in the way it was intended—to finance the costs of Customs' operations. Accordingly, we ask for your help in insisting on the removal of this provision when S. 1052 comes to the full Senate for consideration.

The National Retail Federation (NRF) is the world's largest retail trade association representing retailers across all formats and channels of distribution including department, specialty, discount, catalog, Internet and independent stores. NRF members represent industry that encompasses more than 1.4 million U.S. retail establishments, employs more than 20 million people—about 1 in 5 American workers—and registered 2000 sales of $1.1 trillion. NRF's international members operate stores in more than 50 nations. In its role as the retail industry's umbrella group, NRF also represents 22 national and 50 state associations representing retailers abroad.

Sincerely,

STEVE PFISTER,
Senior Vice President, Government Relations.

AEA,

Hon. CHUCK GRASSLEY,
Hart Senate Office Building,
Washington, DC.

DEAR SENATOR GRASSLEY, AEA, the nation's largest high-tech trade association, is opposed to the provision (section 502) in the Bipartisan Patient Protection Act (S. 1052) that would extend the application of the U.S. Customs user fee from September 30, 2003, to September 30, 2011.

The U.S. importing community currently has full expectation that this import tax will expire as scheduled in 2003. As the leading U.S. importing sector, the U.S. high-tech sector would be particularly impacted by such a tax. The companies we represent already pay tens of millions of dollars annually in customs user fees. In addition, there are additional administrative costs associated with this fee, since Customs authorities impose complex reporting and accounting requirements on importers in the course of collecting the user fee payments. An unexpected, eight-year extension of the user fee, with its associated administrative costs, would be an unwelcome and unnecessary additional cost burden on our industry.

While section 502 of S. 1052 does not earmark user fees for health care purposes, it does use the fee as de facto justification for the revenue neutrality of the bill. We believe that this provision introduces the potential that the U.S. Customs user fee will again be found contrary to U.S. international obligations under the WTO. In the late 1980's, a GATT panel found that the user fee was GATT-illegal because it was being collected in amounts exceeding the cost of customs services rendered, and that it contravened the WTO's requirement that fees be used only for customs services rendered. A recent U.S. Customs Service study addressed problem by placing certain caps on the fee, it was clear from the panel finding that linkage of the fee to the cost of customs services is of seminal importance to the question of GATT legality. If our trading partners believe customs user fees are being used to achieve health care related goals, the GATT challenge could well surface in the WTO.

For the reasons stated, AEA urges you to remove the customs user fee extension from S. 1052. This Patient Protection Act is an appropriate forum for any consideration of extending the customs user fee. If you have any questions about our views on this issue or wish to discuss the matter further, please contact me at 202-682-4423.

Sincerely,

TIM BENNETT,
AEA Senior Vice President Governmental Affairs.

[From the Executive Office of the President,
Office of Management and Budget, June 21, 2001]

STATEMENT OF ADMINISTRATION POLICY

(This statement has been coordinated by OMB with the concerned agencies.)

S. 1052—Bipartisan Patient Protection Act. (Sen. Frist [R], Sen. Breaux [D] MA, En¬wards [D] NC) The President strongly sup¬ports passage of a patients' bill of rights this year and has been working with members of both parties in the Administration to forge a compromise. Con¬gress has been divided on this issue for far too long at the expense of patients and their families. The President believes that it is important for Congress to pass a strong patients' bill of rights this year that provides meaningful protec¬tions for patients, not a windfall for trial lawyers or a threat to Americans' ability to obtain and afford quality care. On February 7, 2001, the President transmitted to Congress his principles for a bipartisan patients' bill of rights and urged Congress to move quickly on this important issue.

The President's principles called for pas¬sage of a patients' bill of rights that ensures Americans enjoy protec¬tions, including: access to emergency room and specialty care; direct access to obstetri¬cians, gynecologists, and pediatricians; ac¬cess to needed prescription drugs and ap¬proved clinical trials; access to health plan information; a prohibition of "gag clauses"; consumer choice provisions; and continuity of care protections. The President also rec¬ognizes, however, that many States have passed strong patient protection laws al¬ready, some of which have been in force for over a decade. The President firmly be¬lieves that Senators Frist, Breaux, and Jervis, to develop a common sense compromise that forges a middle ground on this issue and meets the Presi¬dent's principles.

The President is encouraged by efforts in the Senate, like those of Senators Frist, Breaux, and Jervis, to develop a common sense compromise that forges a middle ground on this issue and meets the Presi¬dent's principles.

The President strongly supports a comprehensive and enforceable patients' bill of rights and has been working with mem¬bers of both parties to enact legislation this year that provides protections that do not encourage costly and unnecessary litigation that would seriously jeopardize the ability of many Americans to afford health care cov¬erage.

The President objects to the liability pro¬visions of S. 1052. The President will veto the
bill unless significant changes are made to address my concerns. In particular, the serious flaws in S. 1052 include:

— S. 1052 circumvents the independent medical review process in favor of litigation. The President believes that patients should be given the right to sue in state court, and that the federalization should be the last resort. Patients should exhaust the medical review process first, allowing doctors, trial lawyers, to make decisions about medical care.

— S. 1052 jeopardizes health care coverage for workers and their families by failing to avoid increasing premiums. S. 1052 overturns more than 25 years of Federal law that provides uniformity and certainty for employers who voluntarily offer health care benefits for millions of Americans across the country. The liability provisions of S. 1052 would force employers and unions to at least 50 different, inconsistent State law standards. The result will inevitably be that employers and unions will be forced to pay for different benefits from State to State, even within a particular State, based on various legal mess in State courts and leading to inconsistent standards of care for patients. Further, S. 1052 imposes no limitations on State court damages, and it is not at all clear that the caps which would apply to the broad, new causes of action in State courts that S. 1052 creates.

S. 1052 also would allow causes of action in Federal court for a violation of any duty under the claim, creating open-ended and unpredictable lawsuits against employers for administrative errors. These new federal claims do not have time limitations on the amount of noneconomic damages, creating virtually unrestrained damage awards that are limited only by an excessive $5 million cap, thus anything.

Moreover, S. 1052 would subject employers and unions to frequent litigation in Federal court under the vague “direct participation” standard, which would require employers and unions to defend themselves in court in virtually every case against allegations that they “directly participated” in a decision to take $7 billion out of Customs to do this. He wrote on June 20, this year:

I would like to raise one other issue, and that is it is not at all clear that using Customs user fees to offset revenue is consistent with the World Trade Organization rules.

Think about that. We are making a decision to take $7 billion out of Customs user fees under the jurisdiction of the Senate Finance Committee, and we may be doing this in a way that does not meet our obligation under the World Trade Organization. Under that organization, Customs fees are to be used as payments for Customs services, not as a source of general revenue to the Federal Government.

In a sense, as we would say to our constituents back home, you pay a gas tax, and you pay for border protection, to build highways. When people pay Customs fees, they pay those Customs fees for facilitating entry of product into the country and Customs modernization is a very important priority.

My point is that there are important Customs modernization issues that should no longer be ignored. Let’s not have a rush to pay for this Patients’ Bill of Rights today and blind us towards the real public policy questions we have on the Customs Service and their problems tomorrow.

Are you concerned about drugs at our borders? Are you concerned about illegal transshipment of textiles, import restrictions on steel and lumber, and backup of trucks at our borders? If you vote for extending fees, there will be no public debate or committee consideration if Customs is using the fees for these or other Congressional priorities.

I would like to tell you that extending these fees will definitely have an adverse impact on the activities of the Customs Service and its operations around the borders of our country, even in the interior of the country where we have Customs operations.

I would like to read what the acting Customs Commissioner had to say about this. He wrote on June 20, this year:

Any scoring which would limit in any way the ability to fund or offset Customs activities would likely cause a critical funding shortfall for the Customs Service.

Section 502 of the bill states: Section 13031(j)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (U.S.C. 56c(j)(3)) is amended by striking “2003 and incurring damage, expenses may not be charged under paragraphs (9) and (10) of such subsection after March 31, 2006”.

The COBRA fees collected by Customs are used here to reimburse Customs appropriations for certain costs, such as overtime compensation, and to offset a portion of the Customs Service Salaries and Expenses Appropriation (54.0). As an example, our FY 2001 collections will offset approximately $1 billion or almost 50 percent of Customs appropriation this year. Authorizing a COBRA extension to offset costs for something other than the Customs Service could negatively impact our available funding. Additionally, the Merchandise Processing Fee authorized in the Customs modernization acts could aid importers for the processing of merchandise by the Customs Service. Directing the funds collected from this fee for something other than Customs operations could pose GATT interpretation issues.

While Customs supports the extension of the COBRA fees, we also acknowledge that changes are warranted with the manner in which we collect those fees. We intend to review this issue in the near term.

Mr. GRASSLEY. I want to speak specifically to what one company wrote:

The merchandise processing fee has no place in this debate. The fee will not be viewed on the merits in this proceeding, but is instead being used—cynically—as a “pay-for” for a totally unrelated program.

Obviously, the totally unrelated program is the Patients’ Bill of Rights that is before us.

Our experience today—in other words, how we handle this issue of customs user fees today—will only hurt us in our deliberation of what ought to be done to make our ports more efficient and secure to the transient entry into our country. It is going to hurt us when that policy debate comes up sometime down the road—weeks, months, but sometime.

Extraneous User Fee Provision. The Administration objects to inclusion in S. 1052 to an extraneous-user fee provision (section 502), which extends for multiple years Customs charges on transportation, passengers, and merchandise arriving in the country.

PAY-AS-YOU-GO SCORING

S. 1052 would affect direct spending; therefore, it is subject to the pay-as-you-go requirement of the Omnibus Budget Reconciliation Act of 1990, OMB’s preliminary scoring estimate of the bill is under development.

U.S. CUSTOMS SERVICE,
Memorandum from: John R. Sloan, Acting Under Secretary (Enforcement).
From: Acting Commissioner
Subject: Pay-go Offset for the Patient Bill of Rights

Congress will soon consider passage of the Patient Bill of Rights. The Customs Service offers no opinion of the legislation. However, we have concerns with the bill’s potential impact on future Customs appropriations.

Section 502 of the bill would extend our collection of COBRA fees from 2003 to 2011, but would use the revenue to offset the cost of implementing this new legislation. Although we support extending the collection of COBRA fees, any scoring of the COBRA extension, which is an option, the ability to fund or offset Customs activities would likely cause a critical funding shortfall for the Customs Service.

Section 502 of the bill states: Section 13031(j)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (U.S.C. 56c(j)(3)) is amended by striking “2003 and incurring damage, expenses may not be charged under paragraphs (9) and (10) of such subsection after March 31, 2006”.

The COBRA fees collected by Customs are used here to reimburse Customs appropriations for certain costs, such as overtime compensation, and to offset a portion of the Customs Service Salaries and Expenses Appropriation (54.0). As an example, our FY 2001 collections will offset approximately $1 billion or almost 50 percent of Customs appropriation this year. Authorizing a COBRA extension to offset costs for something other than the Customs Service could negatively impact our available funding. Additionally, the Merchandise Processing Fee authorized in the Customs modernization acts could aid importers for the processing of merchandise by the Customs Service. Directing the funds collected from this fee for something other than Customs operations could pose GATT interpretation issues.

While Customs supports the extension of the COBRA fees, we also acknowledge that changes are warranted with the manner in which we collect those fees. We intend to review this issue in the near term.

Mr. GRASSLEY. I want to speak specifically to what one company wrote:

The merchandise processing fee has no place in this debate. The fee will not be viewed on the merits in this proceeding, but is instead being used—cynically—as a “pay-for” for a totally unrelated program.

Obviously, the totally unrelated program is the Patients’ Bill of Rights that is before us.

Our experience today—in other words, how we handle this issue of customs user fees today—will only hurt us in our deliberation of what ought to be done to make our ports more efficient and secure to the transient entry into our country. It is going to hurt us when that policy debate comes up sometime down the road—weeks, months, but sometime.
the policing of that entry of product into the country. A fee levied for a certain purpose ought to be used for that purpose or it might violate the WTO because it should not be a source of general revenue any more than taking money from the gas tax and putting it into the general fund of the United States.

Here is what the Customs Service writes on this issue.

The merchandise processing fee is a fee that is paid by importers for the processing of merchandise by the Customs Service. Displacing the funds collected from the fee for something other than Customs’ operations could pose GATT interpretation issues.

While it is not clear that a WTO case would arise or that a challenge would be successful, it seems to me that this is a warning bell that should certainly be heard.

No Senator should vote against this motion to strike unless they are prepared to face the possibility of a WTO challenge and take responsibility accordingly.

We could strike this provision from the bill. Before blindly supporting section 502, we should have time to consider its broader implications.

I urge my colleagues to support this amendment to strike.

Turning to the other provision of their bill that my amendment strikes, section 503, that would delay payments to Medicare contractors by one day thereby shifting $235 million in Medicare part B spending from fiscal year 2002 to fiscal year 2003 is simply a budget gimmick.

I am troubled by this provision because it comes within the jurisdiction of the Senate Finance Committee and also because we are trying to work to make Medicare a better program, not do things to harm it.

First, I point out to my colleagues that again, the Finance Committee has jurisdiction, not the Committee on Health, Education, Labor and Pension. It is the Finance Committee that authorizes and oversees the Medicare Program and the Federal agency that runs it, now known as the Center for Medicare Services.

It is the Finance Committee and not the Health, Education, Labor, and Pension Committee that is in the best position to know how changes in the Medicare Program, such as this one-day payment delay in section 503 of the bill that will affect our senior citizens, will affect our health care providers and will affect the integrity of the Medicare trust fund.

With all due respect, when it comes to Medicare and Medicaid and other Federal entitlement programs, it seems terribly ridiculous to ignore the committee that has the very expertise in these programs, meaning the Senate Finance Committee.

The second reason that I am proposing to strike the Medicare payment delay in section 503 of the bill is that the delay itself, which may not seem serious to some, could actually have serious consequences for Medicare contractors and providers.

Delaying payments by one day and moving them into the next fiscal year just to finance this bill is fuzzy math, to say the least. But it unfairly subjects the already fragile Medicare Program and its health care contractors to accounting disruptions and to administrative uncertainties.

Medicare providers already have it hard enough just dealing with the Medicare Program in the first place. They are overwhelmed by paperwork, confused by conflicting regulations, and frequently left hearing that “the check is in the mail.”

Can you imagine the Federal Government saying “the check is in the mail” when it comes to timely payments of their reimbursements?

Subjecting those providers to any additional delay, even if just for a short period of time, is simply unfair. We need to make Medicare a better business for providers to do business with Medicare.

Think about it. No one wants to do business with late payers, and health care providers are no exception.

Think about it for a minute. No one wants to do business with late payers, and health care providers are no exception. We should not be giving Medicare an additional opportunity to delay for one minute—let alone a longer period of time—their obligations to promptly pay providers.

For the last 3 months, Senator Baucus and I have been working hard to develop a Medicare reform proposal that strengthens and improves the program by adding prescription drug coverage and making the entire benefit package more cohesive.

Part of this bipartisan effort also includes an initiative to make Medicare more responsive and accountable to both seniors and providers. We want to send a message to providers that they will be treated fairly and professionally by Medicare.

Unfortunately, the delay provision in section 503 does exactly the opposite. It sends an entirely wrong message and undercuts our bipartisan effort to make Medicare a better business partner for today’s providers.

For these reasons, I cannot support the inclusion of section 503 in this bill. Neither 502 nor 503 belong in this bill. They are both outside the jurisdiction of the Health, Education, Labor Committee and a long way away from the subject of this debate, which is patients’ rights. Both sections should be stricken from this bill entirely.

Consequently, I urge my colleagues to support my amendment:

The PRESIDING OFFICER. The time of the Senator has expired.

Who yields time in opposition? The Senator from Massachusetts.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KENNEDY. Mr. President, I will take just a few moments of the Senator’s time.

The fact is, this provision, as stated on page 179, does not even go into effect until the year 2003. There is plenty of time for the Finance Committee to work it out if this isn’t a satisfactory way of dealing with this issue. It is basically a bookkeeping issue. There is a judgment that is made by CBO that the value of a wage package is “X,” and if you are going to guarantee additional kinds of benefits in terms of health care, then the wages are going to go down, which is going to mean less money in terms of Social Security.

This is actually a balance from the Budget Committee’s point of view to make sure that the bookkeeping will be balanced.

To the time we will hear from the chairman of the Finance Committee who will describe this and, at the appropriate time, make the point of order.

I point out, though, that it is my understanding that this has no impact or effect on the Customs Service. They will still receive the money. If they want to go through with their modernization, they will still be able to do that. But it basically ensures that this is going to conform to the budget consideration. That is the reason that this was put in there. There will be sufficient time for the Finance Committee to make any other kinds of adjustments and changes.

To make it very clear, the resources that are collected in this are not to pay for the bill. It is basically a bookkeeping offset to what will be anticipated to be the shortfall in terms of the payments under the CBO estimate of the wage package because of the enhanced value, which I think ought to be encouraging for workers of their health benefits. So we will hear more from the Budget Committee tomorrow. At that time, the chairman of the Budget Committee will make a further comment speaking for the Budget Committee. They are in support of our position.

Mr. GREGG. Is the Senator yielding back his time?

Mr. KENNEDY. I am glad to yield back the time.

The PRESIDING OFFICER. The Senator from Massachusetts yields back the remaining time on the Grassley amendment.

Mr. GRASSLEY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. GREGG. I ask unanimous consent that this amendment and all amendments that have the yeas and nays ordered tonight be stacked for a vote tomorrow morning, with the appropriate time of 2 minutes to each
side, or whatever is agreed to, before each amendment is voted on.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. GREGG. Mr. President, at this time I would like to outline the remainder of the evening, if acceptable to the parties, relative to our side, which would be that Senator SANTORUM would go next with his amendment. He would have 10 minutes; the Senator from California, Mrs. BOXER, would have 10 minutes. Then we would go to Senator NICKLES. He would have 10 minutes; and 10 minutes to whoever is in opposition. Senator BROWNBACK would come next. He would have an hour divided, as is traditional. And Senator ENSIGN would then follow with two amendments, the physician pro bono amendment, and the genetic discrimination testing amendment.

I believe the Democratic membership has all these amendments. I would hope we could also agree there would be no second degree.

Mr. KENNEDY. The Ensign amendment we have just received. I have no objection to the earlier request. I am sure we will agree with this, but we would like for that, as far as it being locked in terms of no second-degree amendments, just to have an opportunity to—

Mr. GREGG. I would reserve my request on the second degrees relative to the Ensign amendments but ask unanimous consent that the unanimous consent agreement include that there be no second degrees on DeWine, Grassley, Nickles, Santorum, or Brownback.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The Senator from Pennsylvania is recognized.

AMENDMENT NO. 814

Mr. SANTORUM. Mr. President, I have amendment No. 814 at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SANTORUM], for himself, Mr. SMITH of New Hampshire, and Mr. DeWine, proposes an amendment numbered 814.

Mr. SANTORUM. I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To protect infants who are born alive)

On page 179, after line 14, add the following:

SEC. 1. DEFINITION OF BORN-ALIVE INFANT.
(a) In GENERAL—Chapter 1 of title 1, United States Code, is amended by adding at the end the following:

(a) In determining the meaning of any Act of Congress, or of any ruling, regulation, or interpretation of the various administrative bureaus and agencies of the United States, the words ‘person’, ‘human being’, ‘child’, and ‘individual’, shall include every infant member of the species homo sapiens who is born alive at any stage of development.

(b) As used in this section, the term ‘born alive’, with respect to a member of the species homo sapiens, means the complete expulsion or extraction from his or her mother of that member, at any stage of development, who after such expulsion or extraction breathes or has a beating heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, regardless of whether the umbilical cord has been cut, and regardless of whether the expulsion or extraction occurs as a result of natural or induced labor, caesarean section, or induced abortion.

(c) Nothing in this section shall be construed to affirm, deny, expand, or contract any legal right applicable to any member of the species homo sapiens at any point prior to being born alive as defined in this section.

(b) CEREMONIAL—The table of sections at the beginning of chapter 1 of title 1, United States Code, is amended by adding at the end the following new item: ‘8. ‘Person’, ‘human being’, ‘child’, and ‘individual’ as including born-alive infant.’.

The PRESIDING OFFICER. Under the unanimous consent agreement, the Senator from Pennsylvania is recognized for 10 minutes.

Mr. SANTORUM. Mr. President, this is an amendment that I think really goes to the heart of this bill: Patient protection. This bill is purported to deal with trying to take care of patients. What this amendment does is make sure that every living human being is protected by this act as well as all other acts of Congress.

This is a very simple amendment that says—I am quoting from the amendment—

In determining the meaning of any Act of Congress, or of any ruling, regulation, or interpretation of the various administrative bureaus and agencies of the United States, the words ‘person’, ‘human being’, ‘child’, and ‘individual’, shall include every infant member of the species homo sapiens who is born alive at any stage of development.

That is a rather simple amendment. Obviously, I think it is an amendment that should be broadly accepted.

The reason I offer this amendment is really twofold. No. 1 is the concern about how certain little children—little infants—are treated. Particularly those who are born alive after an abortion, an abortion that was not successful in the sense that the child was not killed before the child was delivered outside of the mother’s womb.

So what we want to do is make sure those children in particular, as well as others, are treated with the same dignity and are covered by the same laws as all other people in America.

There are, unfortunately, many disturbing examples of how these little children are not treated the same and are not given the proper respect that is required under the laws that we have passed in this Congress.

I am going to use a couple of examples that were given by nurses in congressional testimony.

Last year, we had testimony from Alison Baker, who is a registered nurse, who witnessed three induced abortion survivor incidents. For one of them, she says:

I happened to walk into a ‘soiled utility room’ and saw, lying on the metal counter, a fetus, naked, exposed and breathing, moving its arms and legs. The fetus was visibly alive, and was gasping for breath. I left to find the nurse who was caring for the patient and this fetus. When I asked her about the fetus, she said that she was so busy with the mother that she did not have time to wrap and place the [baby] in the warmer, and she asked if I would do that for her. Later I found out that the fetus was 22 weeks old, and had undergone a therapeutic abortion because it had been diagnosed with Down’s Syndrome. I did wrap the fetus and place him in a warmer and for 2½ hours he maintained a heartbeat, and then finally expired.

The second incident involved a 20-week-old fetus with spina bifida who lived for an hour and 40 minutes until she died.

She continued:

The third case occurred when a nurse with whom I was working was taking care of a mother waiting to deliver her 16 week Down’s Syndrome fetus. Again, I walked into the soiled utility room and the fetus was fully exposed, lying on the baby scale. I went to find the nurse who was caring for this mother and fetus, and she asked if I could help her by measuring and weighing the fetus. I took the chart and the baby. When I went back into the soiled utility room, the fetus was moving its arms and legs. I then listened for a heartbeat, and found that the fetus still was alive. I wrapped the fetus and in 45 minutes the fetus finally expired.

We have other stories, disturbing stories of cases where children were born alive and basically discarded as trash in soiled utility closets or laying on tables fully exposed at a very tender age.

This is a story from Jill Stanek, another registered nurse:

One night, a nursing co-worker was taking an aborted Down’s Syndrome baby who was born alive to our Soiled Utility Room because his parents did not want to hold him, and she did not have time to hold him. I couldn’t bear the thought of this suffering child lying alone in a Soiled Utility Room, so I cradled and rocked him for the 45 minutes that he lived. He was 21 to 22 weeks old, probably about ½ pound, and was about 10 inches long. He was too weak to move and very much expending any energy he had to breathe.

This is the current problem, and this is the reason we are introducing this legislation. Frankly, I have concerns that this may be even more of a problem in the future based on court decisions. The court decision I refer to is
clearly draw the line, if that is called
or appellate court might do.

Mrs. BOXER. Mr. President, my col-

in his discussion of this amend-

does attack the landmark case of

v. Wade which simply said, in the

women have had the right since then—that in the early stages of

a pregnancy, the government should

play no role in the very personal, pri-

vate, medical, and moral decision a woman and her family and her doctor and her God

would make without the interference of
government. But his amendment
certainly does not attack Roe in any

His amendment makes it very clear

nothing in this amendment gives

any rights that are not yet afforded to

a fetus. Therefore, I, as being a pro-

choice Senator on this side, repre-

specting my colleagues here, have no

problem whatsoever with this amend-

ment. I feel good about that. I feel good

that we can, in fact, vote for this to-

together. It is very rare that we can.

Simply put, this amendment says it

all in its purpose: 'To protect infants

who are born alive.'' Of course, of

course. My colleague goes on to say

that simple statement, which is very

important, is in fact, he said, the heart

of this bill. I think the heart of this

bill is even more than that. The heart

of this bill is yes, protecting infants: it

is also protecting children, protecting

teenagers, protecting people as they

get older, until they are very old and

very frail and are fighting for their life.

So this bill really should protect us

all at every stage of our life, from the-

earliest days until the final days. I

hope that my colleague will join with

us in supporting this Patients' Bill of

Rights because it does, in fact, protect

all of us. And it will, in fact, give all of

us the protections that we need against HMOs that often-
times put dollar signs ahead of our vital signs. That is wrong to do. Some

infants, very young infants, are born alive. They are an elderly person who is fighting

and struggling against illness.

If 100 people vote for this amend-

ment, which I think will be the case,

then 100 people should vote for the Pa-

tients' Bill of Rights because it will af-

ford the families of those vulnerable infants and all of us the protections

that we need against HMOs that often-
times put dollar signs ahead of our vital signs. That is wrong to do. Some

infants, very young infants, are born alive. They are an elderly person who is fighting

and struggling against illness.

I heard my colleagues on the other

side—some of them against this bill—

say: We can't legislate by anecdote.

Well, I have to tell you, when you hear

one story, and then another and an-

other, from people you never heard of,

and you hold hearings and the people

come out and tell the stories, then we

know there is a need to pass this Pa-

tients' Bill of Rights. So I would vote

the recent decision by the U.S. Su-

preme Court in the Nebraska partia-
birth case. In that case, in a concuring

opinion, two Justices said two things:

One, Justice Stevens with Justice

Ginsburg concurring, and the other,

Justice Ginsburg with Justice Stevens

concurring. I am going to quote two

things that should send a chill down the

spine of those people here when it comes

to what the future could have in store

for us if we do not pass legislation such

as this.

This is what Justice Stevens said in

this decision:

The holding [of Roe]—that the word "lib-

erity" in the 14th Amendment includes a

woman's right to make this difficult and ex-

tremely personal decision—makes it impos-

sible for me to understand how a State has

any legitimate interest in requiring a doctor to

follow any procedure other than the one

he or she reasonably believes will best pro-

tect the woman in her exercise of this con-

stitutional liberty.

For the notion that either of these two equally grumin [abortion] procedures

former, this latter act of gestation is more akin to infanticide than the other, or that

the State furthers any legitimate interest by

banning one or not the other, is simply irratio-

nal.

What that says very clearly is, ac-

tording to these two Justices, that any

procedure that the doctor determines

is in the best "health interest of the

mother" can be used without question.

So it gives the best way to safely perform this abortion is to de-

liver a live baby and then subsequently

kill it because it is the safest way for

the mother's health to have that done,

under this rationale, under this rea-

soning, that would be legitimate. I

think we have to make it very clear

that is not legitimate; that after

delivering a baby, once the baby is out-

side the mother, it is no longer legiti-

mate to consider that child just a piece

of property, of disposal of, or mass-

sive cells to be disposed of when it is a

living, breathing individual.

Justice Ginsburg's opinion says the

following:

Such an obstacle [to abortion] exists if the

State stops a woman from choosing the pro-

cedure her doctor "reasonably believes will

protect the woman in [the] exercise of [her]

constitutional liberty.''

Again, it is an open door to whatever

procedure the doctor wants to use, irre-

spective of the baby, which again

leaves the door open certainly for the
doctor to say that he or she reasonably

believes that the mother's health will be

served if the baby is delivered and then

decides that is the best way.

This was not the majority opin-

ion, thankfully, of the Court, but it

does show that there is a possibility,
at least, out there for this kind of ruling

within our court systems at the high-
est level, much less what some district

or appellate court might do.

I think it is important for us to

clearly draw the line, if that is called

drawing the line, that once a child is

born, it is no longer a health threat to

the mother, and that we have a legiti-

mate interest in protecting this child

from being killed at that point or, shall

we say, treat that child within the con-
text of the law as we would treat any

other child or any other person in

America.

With that, I reserve the remainder of

my time.

WHO. The PRESIDING OFFICER. Who

yields time in opposition?

The Senator from California.

Mrs. BOXER. Mr. President, my col-

league, in his discussion of this amend-

ment, does attack the landmark case of

v. Wade which simply said, in the

1970s—and women have had the right

since then—that in the early stages of

a pregnancy, the government should

play no role in the very personal, pri-

vate, medical, and moral decision a woman and her family and her doctor and her God

would make without the interference of
government. But his amendment
certainly does not attack Roe in any

way.

His amendment makes it very clear

nothing in this amendment gives

any rights that are not yet afforded to

a fetus. Therefore, I, as being a pro-

choice Senator on this side, repre-

senting my colleagues here, have no

problem whatsoever with this amend-

ment. I feel good about that. I feel good

that we can, in fact, vote for this to-

together. It is very rare that we can.

Simply put, this amendment says it

all in its purpose: 'To protect infants

who are born alive.'' Of course, of

course. My colleague goes on to say

that simple statement, which is very

important, is in fact, he said, the heart

of this bill. I think the heart of this

bill is even more than that. The heart

of this bill is yes, protecting infants: it

is also protecting children, protecting

teenagers, protecting people as they

get older, until they are very old and

very frail and are fighting for their life.

So this bill really should protect us

all at every stage of our life, from the-

earliest days until the final days. I

hope that my colleague will join with

us in supporting this Patients' Bill of

Rights because it does, in fact, protect

all of us. And it will, in fact, give all of

us the protections that we need against HMOs that often-
times put dollar signs ahead of our vital signs. That is wrong to do. Some

infants, very young infants, are born alive. They are an elderly person who is fighting

and struggling against illness.

If 100 people vote for this amend-

ment, which I think will be the case,

then 100 people should vote for the Pa-

tients' Bill of Rights because it will a-

ford the families of those vulnerable infants and all of us the protections

that we need against HMOs that often-
times put dollar signs ahead of our vital signs. That is wrong to do. Some

infants, very young infants, are born alive. They are an elderly person who is fighting

and struggling against illness.

I heard my colleagues on the other

side—some of them against this bill—

say: We can't legislate by anecdote.

Well, I have to tell you, when you hear

one story, and then another and an-

other, from people you never heard of,

and you hold hearings and the people

come out and tell the stories, then we

know there is a need to pass this Pa-

tients' Bill of Rights. So I would vote
for this to protect the infants, and then I will vote to protect everyone in this country because everyone deserves protection. Those HMOs who put these bottom line ahead of people’s health.

The PRESIDING OFFICER (Mrs. Feinstein). The Senator from Massachusetts is recognized.

Mr. Kennedy. Madam President, I am going to urge the Senate to accept the amendment tomorrow. I think we have had a good discussion about it. I hope that we will move ahead and accept it. I am prepared, when the Senators yield the time or use the time, to do that.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. Santorum. Madam President, I thank the Senator from California for her comments and support of this amendment. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. The amendment is as follows:

The assistant legislative clerk read the amendment as follows:

Mr. Nickles. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

Amendment No. 866

Mr. Nickles. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Nickles. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Nickles. Madam President, I will be brief. I hope this amendment can be accepted. In the underlying bill on page 173, it has “effective dates” for implementation of the legislation. The effective date for everybody, all plans in America, is by October 1, 2002. So that is when all the plans in America will have to comply with this bill. They will have to have the patient protections in line, the appeals process, the liability sections—all are mandated to be effective by October 1 next year. That is about 14 months from now.

If you continue reading on page 173, you find out that the plans that are covered by collective bargaining agreements are exempt. They are exempt from the legislation. It says they “shall not apply to plan years beginning before the later of—(A) the date on which the last collective bargaining agreements relating to the plan terminate.”

Some of these plans may not terminate for months. Some may not terminate for years. As a matter of fact, looking at a couple of examples, one is the Plumbers and Pipefitters Union, with 2,000 employees, has a 126-month contract. It doesn’t expire until 2010.

The point is that there are about 30 million lives that would be exempt from this bill for years. If we are going to make it apply to everybody else in the private sector, I think we should make it apply for collective bargaining plans as well.

There is also something else that is troubling to me. It says it would not apply until the plan terminates, and then the language says if they adopt these patient protections, that still doesn’t count as a plan termination, a collective bargaining agreement termination. So, in effect, even though a plan adopts it, it hasn’t terminated and, therefore, it is still not covered or enforced by the terms of this bill. I find that troubling. I also am troubled by the fact that when it says “relating to the plan terminates,” a lot of plans or contracts don’t terminate. They are renegotiated. So they never get to termination. They are actually renegotiated contracts that is well and good. That means there is peace and harmony and no labor shortages and so on.

My point is that it is very important for us not to be exempting 30 million workers who happen to be in collective bargaining agreements from the protections in these plans. If we are going to give these protections to 170 million workers in the private sector, in that 170 million are included 30 million who happen to be members of a collective bargaining unit. We should have the patient protections that Congress is in the process of determining which are so vital for everybody else in the private sector. They should not be exempt because they happen to be members of a collective bargaining unit. We are asking every other plan in America to comply by October 1.

Why would we not ask members of collective bargaining agreements to also comply? Why should we have these protections that have different expiration dates, some of which might be 5, 10 years, or even longer? Maybe this is an oversight, a mistake from a previous drafting; but, clearly, if these are such valued protections that we want to extend them to the private sector, we should certainly extend them to members of collective bargaining agreements as well.

I urge my colleagues to support this amendment.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. Kennedy. I direct my colleagues’ attention to the lines 15 and 16 on page 173. They talk about “for plan years.” That is an art of words that applies to insurance companies, and it says, “beginning on or after” plan years. As we know, the insurance starts generally at the first of every year. So with regard to insurance companies, the Senator is completely correct. The insurance companies have different expiration dates, some are longer and they will be respected in that way just as we do regarding collective bargaining. I hope this amendment will not be accepted.
Mr. NICKLES. Madam President, I appreciate my colleague’s statement, but I totally disagree. Some of us have argued for bargaining agreements, but we haven’t been totally successful. I might add. Almost all those contracts would begin, if not by October 1, certainly by January 1 of the year 2003. So maybe there are a few more months. But under no circumstances should we not apply to Federal file bargaining agreements, if you read the language on page 174, it is not until the contract or the agreement terminates. And then the second part of it says that even if they comply, it shall not count as a termination.

You could have collective bargaining agreements exempt under this provision indefinitely for 12 years. They may never terminate the agreement. They may continue rolling it over, so it is 10 years, but in five we are going to renegotiate it; it might be renegotiated; but it is never terminated. Are we going to take 30 million Americans and say: You are not covered by these patient protections?

Some of these contracts will last 10 years, 15 years. The average contract I was looking at had a schedule of 5 to 6 years. One I mentioned does not expire until the year 2010. If they renegotiate it between now and next year, the duration of the contract will be exempt. We are telling everybody else in the private sector: Get your act in order, and by the end of next year you have to have these new patient protections, oh, unless you are a member of a collective bargaining agreement.

This is not the only exemption we found. We did not cover Federal employees. Maybe I will have an amendment dealing with Federal employees. All these great patient protections do not apply to Federal employees. They do not apply to Medicare. They do not apply to Indians in our hospitals. They do not apply to veterans.

These are patient protections that are so important for the country, but we do not give them to publicly funded plans; we only do it for private sector plans.

What about unfunded mandates? What about union plans, collective bargaining? We leave them out. We leave out Government plans; we leave out union plans; but it is five we are going to hit the private sector. Unions, this does not apply for the duration of your collective bargaining agreement, and if it does not terminate, you are never covered.

I think that is a serious mistake, so I urge my colleagues to support the amendment.

I thank my friend and colleague from Nevada for his support of the amendment as well.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Madam President, the Senator ought to read page 174 because this language is very clear, precise, and exact. It does not permit what he just said it permitted, and that is the rollovers. It just does not permit it. The Senator can state it, and he can misrepresent it, which he just has, but it is not the fact. On line 5, it says: “relating to the plan terminates,” and that is when it ends. That is when it has to be implemented.

This idea that it can roll over and over, for 10, 15 years, is not what the legislation says. The fact is, with insurance, many start in January, many others start in July. We have tried to say when that contract plan year, which is a term of art that refers to when that insurance transitions, we will implement it at that time, and the same should be true with the collective bargaining agreements.

I would think the overwhelming majority of the workers and employers would be eager to get these protections. We are going to find out many will work out arrangements so they get the protections.

The PRESIDING OFFICER. Who yields time?

Mr. NICKLES. I yield to the Senator from Nevada such time as he desires.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. ENSIGN. Madam President, I have a story that was told by the junior Senator from North Dakota on the Senate floor the other day. It is about a young man named Christopher Roe, who is from Nevada. He was attending Durango High School and was diagnosed with acute lymphocytic leukemia. As anybody who has had a child with that terrible disease knows, sometimes the treatments are not very successful.

During the course of his treatment, the doctors were recommending a certain type of experimental treatment, and throughout this bill, sometimes that experimental treatment has to be had at a certain time of treatment, and waiting for its approval sometimes leads to that treatment not being able to be given to that patient. That is exactly what happened to Christopher Thomas Roe. He was not able to receive this type of a treatment in a timely manner.

His father is a school district employee in the State of Nevada. He is not a teacher, but he is an employee of the school district. There is an employee trust fund that has been set up to provide health insurance to school district employees. Based on our discussions with the Department of Labor, it appears that because of the way it was set up, would not be covered under the provisions of this bill.

Similarly, the 30 million people Senator Nickles is talking about who deal with collective bargaining agreements are not covered under this bill. If we are going to say to other people that they deserve these rights, we believe that people who are in unions deserve the same patient protections.

These patient protections right now do not just deal with lawsuits, they deal with provisions that everybody should be on the right side of a woman to choose an OB-GYN as her primary doctor; the right of a family to say their children’s primary care doctor is a pediatrician; the right to a reasonable layman’s interpretation of whether emergency room care should be paid for when they have an emergency.

These patient protections we believe are very important to give not only to the 170 million people who are covered by the underlying bill, but also those who are covered in collective bargaining agreements.

If there is tweaking of the language that needs to happen with this amendment, then let’s tweak the language. That is what Congress is for. That is why we have some of the legal experts look at the bill, collective bargaining agreements would supersede and not allow union workers who are covered under those collective bargaining agreements to be covered under this Patients’ Bill of Rights.

I urge our colleagues to work with us and to make sure those union workers get the same protections as other people in America are going to receive.

I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Madam President, how much time do I have?

The PRESIDING OFFICER. Six minutes.

Mr. KENNEDY. I did not understand, did the Senator say that public employees were not covered? Does he understand that to be the case?

Mr. NICKLES. The Senator is correct. Federal employees are not covered by the underlying McCain-Kennedy bill.

Mr. KENNEDY. I understand he was talking about teachers in Nevada; public employees is the example he gave. I find this enormously interesting because both Senators voted for the Collins amendment that excluded 139 million Americans. They only included 56 million. They were going to have the protections. The others were going to be dependent upon whether the States actually moved ahead and passed the various protections.

Mr. NICKLES. Right.

Mr. KENNEDY. One of the groups that was left out of the Collins amendment was public employees, such as firefighters, schoolteachers, and others. We resisted that. No one has fought harder to make sure
we are going to have comprehensive coverage since day 1 of this program. Now, they are being flyspecked because somehow the States who, under certain circumstances, are going to come into these protections on a different calendar.

Madam President, we have tried to include people who are going to have coverage from insurance. We are going to respect the contract. When those insurance contracts expire, whether it is in January, whether in July, the protections go into effect. The same is true of the collective bargaining agreement. We have done that in other times. It has worked, and worked effectively. As I say, I believe the consumers, as well as employers—the employers from whom we have heard, and we have had many examples—indicate they want to wait to get these protections in place. It isn't that people will delay getting in; it will be because they want to get in and get in more quickly.

The PRESIDING OFFICER. Leader time has expired.

Mr. NICKLES. I ask unanimous consent for 2 additional minutes.

Mr. KENNEDY. Then I ask for 4, 2 each side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. A couple comments. The average length of collective bargaining agreements: 66 percent of collective bargaining agreements with over 1,000 employees—that is over 1,200 collective bargaining agreements—the average length is 3 to 5 years; 28 percent are 2 to 6 years; an additional 7 percent are 6 to 8 years.

My point is these things last for years. People renegotiate their health care plan. Federal employees do this every year. Nobody does it every day. So for the health care plan for everybody else in the private sector, you have to comply by next October, 12 months from now, maybe even January of next year; you will have to comply. But if you are in a collective bargaining plan, you wait until the plan terminates. We asked the Department of Labor, does the plan terminate if renegotiated and rolled over? Not necessarily.

In collective bargaining, you are talking about 30 million Americans who will not receive the so-called benefits under this bill. That is a fact.

Another fact: My colleague said we supported an amendment by Senator Collins that said let the States use their State protections. I strongly agree with that. That is a reason we will vote against the underlying bill, because I don't think we should preempt States as the Kennedy-McCain bill does. I believe in that strongly. I know my colleagues from Massachusetts have a different belief. We could debate that for hours.

My point is, if the patient protections are so good—and I heard many sponsors say we should cover all Americans—the bill does not cover all Americans. As a result of the language we have among collectively bargaining agreements are exempt for years. The bill we are debating now does not cover public plans; it does not cover Medicaid; it does not cover Medicare; it does not cover public employers; it does not cover military; it does not cover veterans; it does not cover Federal employees.

We have control over Federal employees. If the patient protections are so good for the private sector, why not for collective bargaining plans as well?

Mr. KENNEDY. Madam President, it is interesting to listen to my friend and colleague. The fact is, the last President, President Clinton, put those into Executive orders to cover those delays of the Republican leadership in letting us get through this bill over the last 5 years. So rather than wait and wait and wait, we had a Democratic President put them into effect.

Now if a collective bargaining unit or contract expires on October 2, they go in prior to the time of the insurance coverage. They will go in months ahead of the insurance. If the contract expires on October 5, that goes in before July of the next year. So they get more protections than those being covered by the insurance.

This is just a way of saying if the contracts are out there, we are going to respect the termination of those contracts, whether it is in the insurance or in collective bargaining. Evidently, the Senator wants to use this as a device to punish some of their enemies, the unions in this case, to try to use the legislative process to do so. I hope we will reject that.

Mr. NICKLES. I yield myself 5 minutes off the leader time.

The PRESIDING OFFICER. The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. I thank my friend, Senator BROWNBACK. I am the third Senator from Kansas. I think you have shown great patience. I will be brief.

My colleague from Massachusetts said President Clinton gave these protections to Federal employees because he could not wait for the Republican Congress to pass them.

The facts are, Federal employees do not have patient protections that are nearly as expensive, as aggressive, as intrusive as we are getting ready to impose on the rest of the private sector. I may have an amendment tomorrow to address that so we can save that for tomorrow's debate.

The patient protection that President Clinton passed is not nearly as big. It cannot be rolled over. When they have an appeal process, they do not go to an independent party; they go to OPM, Office of Personnel Management; they go to their employer. We do not do that in this bill. Maybe we will debate that tomorrow.

Finally, he said in collective bargaining plans, they have to be covered when the plan terminates. My point is the plan can be renegotiated. You are talking years. Sixty-six percent of collective bargaining plans are 3 to 5 years.

Then it says if they go ahead and implement it, it is not counted as a plan termination; therefore, it is not effective. Let's give union members the same protections we give all other private sector employees.

I thank my colleagues and my colleague from Massachusetts and particularly my colleague from Kansas for his patience in allowing us to go forward.

Mr. KENNEDY. I am prepared to yield back the time.

The PRESIDING OFFICER. All time is yielded back.

Mr. NICKLES. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Kansas.

AMENDMENT NO. 87

Mr. BROWNBACK. I send an amendment to the desk for immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. BROWNBACK] proposes an amendment numbered 87.

Mr. BROWNBACK. I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To prohibit human germline gene modification)

At the end of the bill, add the following:

TITLe—HUMAN-GERMLINE GENE MODIFICATION

SEC. 01. SHORT TITLE.

This title may be cited as the "Human Germline Gene Modification Prohibition Act of 2001".

SEC. 02. FINDINGS.

Congress makes the following findings:

(1) Human Germline gene modification is not needed to save lives, or alleviate suffering, of existing people. Its target population is "prospective people" who have not been conceived.

(2) The cultural impact of treating humans as biologically perfectible artifacts would be entirely negative. People who fall short of some technically achievable ideal would be seen as "damaged goods"; while the standards for what is genetically desirable will be those of the society's economically and politically dominant groups. This will only increase prejudices and discrimination in a society where too many such prejudices already exist.

(3) There is no way to be accountable to those in future generations who are harmed
or stigmatized by wrongful or unsuccessful human germline modifications of themselves or their ancestors.

(4) The negative effects of human germline manipulation would not be fully known for generations, if ever, meaning that countless people will have been exposed to harm probably often fatal as the result of only a few instances of germline manipulations.

(5) No one has the right to have been conceived, gestated, and born without genetic modification.

SEC. 3. PROHIBITION ON HUMAN GERMLINE GENE MODIFICATION

(a) IN GENERAL.—Title 18, United States Code, is amended by inserting after chapter 15, the following:

"CHAPTER 16—GERMLINE GENE MODIFICATION"

"Sec.

"301. Definitions

"(a) IN GENERAL.—It shall be unlawful for any person or entity, public or private, in or affecting interstate commerce—

"(1) to perform or attempt to perform human germline gene manipulation; or

"(2) to intentionally participate in an attempt to perform human germline gene manipulation; or

"(b) IMPORTATION.—It shall be unlawful for any person, public or private, to import the product of human germline gene modification for any purpose.

"(c) PENALTIES.—Any person or entity that is convicted of violating any provision of this section shall be fined under this section or imprisoned not more than 10 years, or both.

"(2) CIVIL PENALTY.—Any person or entity that is convicted of violating any provision of this section shall be subject to, in the case of a violation of a provision relating to the derivation of a pecuniary gain, a civil penalty of not less than $1,000,000 and not more than an amount equal to the amount of the gross gain multiplied by 2, if that amount is greater than $1,000,000.

"(b) CLERICAL AMENDMENT.—The table of chapters for part I of title 18, United States Code, is amended—after the item relating to chapter 15, the following:

"16 Germline Gene Modification ......... 301":

Mr. BROWNBACK. Madam President, I rise today to offer an amendment to the Patients’ Bill of Rights. This amendment is about human germline gene modification. That is a long way of saying—and I will go into this for a period of time—stopping people from attempting to modify the human species with outside genetic material. It may seem strange. It happens in livestock, genetically modified organisms. Some people are researching and discussing doing this within the human species to create better people. I think it should be stopped, prohibited, removed.

I looked for a better vehicle for this amendment, for another bill that was a closer fit. It is a medical issue on the medical front. If we get an agreement that I will do it that way. Having not been able to do that, we offer it as an amendment now.

My amendment prohibits human germline gene modification. What is that? Technically, it is the process by which the DNA of an individual is permanently changed in such a way that it permanently affects his or her offspring. Normally this is a DNA modification either the egg or the sperm within the human species, so when they are transferred outside the human species to create better people. I think it should be stopped, prohibited, removed.

This is not about genetic therapy; it is not about stem cell research; it is not about human cloning. All those are other issues for another day that do need to be considered but not here. My amendment in no way hinders genetic therapy or other medical interventions that treat patients suffering from diseases.

My amendment is about eugenics. For those not familiar, that is the process or means of race improvement previously tried by many diabolical methods or schemes, generally looked at as restrictions of mating, of so-called superior people together, and now being attempted, talked about, pressed forward by adding genetic material of humans from outside the species.

This is ugly stuff, and it should be stopped. It is about what we as a society are willing to allow and not to allow. The issue of germline genetic modification is about our ability to change design by changing eye color, height, or IQ. I offer this amendment, well aware that many of my colleagues understandably may be unaware of these so-called advances being made in the field of biotechnology and the impact those advances will inevitably have on the human race.

I come from an agricultural background. I used to be a Secretary of Agriculture in Kansas. These are things we commonly do now in plants, and we are having research done extensively in animals. People are talking about bringing some of the same technology to humans. It has to be stopped and should be stopped.

Many of the advances promise great achievement for mankind and a betterment of human conditions. Some of the advances in biotechnology do not. Human germline gene manipulation is one of those. It is one of those advances discussed mostly in theoretical terms until recently. More disturbingly, it is the realization of the age-old quest to design better people. Germline gene manipulation is the summit of the eugenics movement. One of the groups we have consulted with prior to preparing this amendment is a group chaired by Claire Nader, the sister of former Presidential candidate Ralph Nader. It is a group she has been associated with, the Council for Responsible Genetics. They are unequivocally opposed to human germline gene modification.

The Council states this:

We strongly oppose the use of germline gene modifications in humans.

They continue:

Today, public discussion in favor of influencing the genetic constitution of future generations has gained new respectability with increased popular intervention. Although it is once again espoused by individuals with a variety of political perspectives, modern eugenic programs are now designed in an effort to fit the needs of a free choice. But the doctrine of social advancement through biological perfectibility underlying the new eugenics is even more potent than the older version. Its supporting data seem more scientifically sophisticated and the alignment between the state, through its support of the market and the individual expression so-called free choice, is unprecedented.

The Council goes on to state further:

These considerations make the social and ethical problems raised by germline gene modification very different from those raised by human gene manipulations, that target certain nonreproductive deficiencies in organs of patients, again in somatic cell gene modification.

As the Council states in very clear terms:

The underlying political philosophy of those who support germline gene modification has been sanitized with new terms, but is in reality the same old eugenic message which the 20th century was designed and directly targeted. In numerous conversations that I have had with Dr. Francis Collins, who
heads the National Human Genome Research Institute in Washington, who has had a fantastic report that was out last year on the Human Genome Project, reported out a beautiful array of the complexity of the genetic structure in every one of our 10 trillion cells and if we printed out that genetic structure and had it in front of us, it would be a stack of paper 100 feet taller than the Washington monument.

We have talked about the beauty of the human genome and also talked about the potential for problems in its manipulation, as that could be carried onto future humans.

Madam President, human germline gene modification is not needed to save lives or alleviate suffering of existing people. Its target population is prospective people who have not been conceived. The cultural impact of treating humans as biologically perfectible artifacts would be entirely negative. People who fall short of some technically achievable ideal would be seen as damned goods, while the standards for what is genetically desirable would be those of the society’s economically and politically dominant group. We have heard these themes before. This will only increase prejudices and discrimination in a society which already has too many of these.

There is no way to be accountable to those in the future generations who are going to be harmed or stigmatized by the wrongful or unsuccessful human germline gene modification of their ancestors. The negative effects of human germline modification would not be fully known for generations, if ever, meaning that countless people will have been exposed to harm, probably often fatal, as a result of only a few instances of germline manipulation.

All people have the right to be conceived, gestated, and born without genetic manipulation. Human germline gene manipulation will only serve to turn human beings into commodities with attributes that are determined by technicians, and parents who want to exert genetic tyranny over their offspring. This is a step too far. This is grossly unethical for it to happen. I urge the Senate to adopt my amendment to prohibit it once and for all.

Again I put forward, in layman’s terms, what this is about. This is about getting and adding outside genetic material into the human species, whether getting and adding outside genetic material into the human genome and also talked about genetic manipulation.

I think everybody would look at this and say that is not a road we want to go down. Yet some people today are contemplating doing this. I want to add a couple of other points. The European Council on Biomedics has stated its opposition to this human germline gene modification. I think the civilized world really needs to step up right now, before people get going and that is forward saying: We could make people taller. We could make people live longer by this modification. We found a gene line in trees that we could put in earlier, to the human species, and cause this to happen. We have a way to manipulate or change this—without knowing in any way down in future generations what this impact is.

We can send a strong, clear signal at this point in time that we want nothing to do with this, that this is wrong, this is eugenics, this is the height of eugenics, and it should not take place. The Europeans are moving that way. We should as well as much of the rest of the civilized world, and say we want nothing to do with that with a clear, I hope unanimous, vote of the Senate, saying this is wrong.

I know people differ on some of these other biotechnology issues, such as cloning, but I think that the public knows this amendment serves a thoughtful and measured response to the sweeping prohibitions that the Brownback amendment would impose. A recent study funded by the NIH conducted by the University of Michigan found that 65 percent of the public opposed a ban on prenatal gene therapy, and only one in five of those support such a ban.

The European people do not support the sweeping prohibitions that the Brownback amendment would impose. The Brownback amendment is opposed by a wide range of organizations representing patients, doctors, scientists, and the biotechnology industry. They know this amendment would have a chilling effect on the biomedical research that gives hope to millions of Americans at risk for genetic diseases.

The amendment is so broad that it will criminalize several promising areas of biomedical research, even including gene therapy in adults.

This important, complex topic deserves a thoughtful and measured response, and not the indiscriminate prohibition that the Brownback amendment proposes.

The American people do not support the sweeping prohibitions that the Brownback amendment would impose.

The amendment is so broad that it will criminalize several promising areas of biomedical research, even including gene therapy in adults.

This important, complex topic deserves a thoughtful and measured response, and not the indiscriminate prohibition that the Brownback amendment proposes.

The American people do not support the sweeping prohibitions that the Brownback amendment would impose.

This important, complex topic deserves a thoughtful and measured response, and not the indiscriminate prohibition that the Brownback amendment proposes.

The American people do not support the sweeping prohibitions that the Brownback amendment would impose.

This important, complex topic deserves a thoughtful and measured response, and not the indiscriminate prohibition that the Brownback amendment proposes.
We can easily understand where the language that is included may not be the purpose of the Senator, but certainly this language is sufficiently vague as to prohibit some promising research. At this time, I think this is a matter of enormous importance. I don’t think we really ought to be dealing with this issue on this bill. I can understand the Senator’s frustration in not being able to have the debate in the Senate and to hear the different views on this issue. But I believe we ought to defeat the amendment for now, have additional review and study and hearings, and that we ought to then consider the various public policy issues and the ethical issues that surround it.

Mr. REID. Madam President, will the Senator yield?

Mr. KENNEDY. Yes.

Mr. REID. I would like to ask the Senator a question. A couple of years ago when I was chairman of the Democratic Policy Committee, one of the issues that took time was cloning, for lack of a better description. We had a luncheon at the Democratic Policy Committee. This may not be directly in point, but it points up what the Senator is saying. This is a very complex issue. We need more time and medical expertise to respond to this.

But the Senator will remember that we had a hematology professor from Harvard. We had the leading expert on gene therapy at NIH. The Senator will recall a number of things. The thing that is so vivid in my mind is the Harvard professor, who was of course a practicing physician, gave an example of how progress is being made in the medical field and in the areas that need more study.

He recorded that a young woman with leukemia was referred to him. I do not know the scientific name nor the type of leukemia. He did the examination and looked at the information he had been given.

The Senator will recall that the doctor asked this young lady if she had a brother or sister. She said no. He said that right then he knew she was in big trouble. She probably couldn’t make it and would die.

The next day, the Senator will recall, another teenager came in with leukemia. It was the same process. He asked this young man if he had a brother or sister. He said no, and paused for a second. He said: I am a twin. The doctor said that he knew right then that the young man was going to live as long as anybody in this room because they could do a bone marrow transplant and regenerate those cells.

I do not fully understand what the Senator from Kansas is advocating with his amendment. I know he is candid and is well placed. I know after having listened to the woman from NIH and the professor from Harvard that I have great hope progress is being made on some of the most dreaded diseases that face especially children in America today.

The Senator from Massachusetts and I know how well-intentioned the Senator from Kansas is. I think we should defeat this amendment and wait for a later day so we can have more opportunity to examine this more closely.

The Senator remembers that meeting in the room right down the hall here?

Mr. KENNEDY. I do remember. All of us as Members of this body get a chance to go out to NIH and visit with the researchers and listen, watch, and hear about those extraordinary, dedicated men and women who are dealing with so much of the cutting edge research.

I think we want to make sure that we are very careful in the steps we are going to take that in some way would inhibit research. There are obviously strong ethical issues which we constantly have to examine and consider.

But I am very much concerned about the kind of prohibition that this type of amendment would include.

I want to make it clear that the amendment that the Senator from Kansas puts forward does not ban cloning, but it would ban similar cutting edge research.

That is what our concern is and why we will oppose it tomorrow.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. BROWNBACK. Madam President, I would like to correct some miscalculation with the Senator from Massachusetts. I want to read from the amendment because he represented a couple of examples that we specifically state in the bill we are not prohibiting.

On page 4 of the amendment under ‘‘construction,’’ it states specifically that:

Nothing in this Act is intended to limit somatic cell gene therapy, or to effect research involving human pluripotent stem cells.

This somatic cell gene therapy is what you are talking about where you have already the sperm and egg, and you have a full chromosome. That is where you may want to make changes, and that is where the research is focused. Now they can deal with some of the most dreaded diseases the Senator from Massachusetts says we should rightly try to deal with. I agree that we should.

We specifically added that. We covered that point the Senator raised and about which he has concern because we don’t want to impact that area. We talk about this on page 3. It says:

The term ‘‘human germ line gene modification’’ means the intentional modification of DNA in any human cell for the purpose of producing a genetic change which can be passed on to future individuals.

In this amendment we are saying: Do we really want to change the human species without knowing what the impact is going to be down the road? Maybe we have a shot at changing this bill through to passage—I appreciate both his work and the work of the Senator from Nevada on just continuing to press forward. They have done a very good job. But I point out to them that we have significant limitations on doing this to animals. Right now, if you wanted to take a fish and put a tomato germline in it, or something from a tomato gene—actually this is being done—this is a heavily regulated area by FDA, and the USDA, as well it could be that a tomato could swim and do things and take over a whole area of species? They are actually concerned. It may sound scientific, like this is just off the wall. But this is happening today.

We have these deep concerns within our society. You do not have to listen to me. The Senator from California knows what is taking place this week in southern California. People are deeply concerned about this being done with animals and plants.

All I am talking about with this amendment is to say, the careful thing for us to do right now is to prohibit it in humans.

As the Senator from Massachusetts knows, in any future legislative session we can remove that prohibition. We could do that next year. But wouldn’t the careful, thoughtful thing be to say right now: ‘‘We don’t want to modify the human species’’? It has no regulation. We just limit the review on it today. People are out there doing these things.

Wouldn’t the really thoughtful position be that we should stop this because we don’t know its impact down the road—stop this now—and then, if the researchers really convince us this is the right thing to do, we can open it back up? I think we open up an incredible Pandora’s box if we allow this unregulated area of human experimentation to continue at this time. And that is what is being defended here.

I think this should give us some thoughtful consideration. This is limited in its drafting. We have worked with a number of groups on its drafting. It is very specific. This has to do with it being passed down to future generations. This is something that we should prohibit at this time.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Madam President, there are several organizations that draw different conclusions about the Senator’s amendment. You have the
Biotechnology Industry Organization that says:

Unfortunately, the Brownback amendment reaches far beyond germ line modification. It attempts to regulate genetic research—a complex and dynamic field of science that holds great potential for patients with serious and often life-threatening illnesses.

And from the Association of American Medical Colleges:

Much more troubling, however, the amendment extends to all human germ line activity. Taken on its face, the amendment would prohibit other areas of research into gene therapy as well.

I ask unanimous consent an analysis be printed in the Record.

There being no objection, the material was ordered to be printed in the Record, as follows:

MEMORANDUM

To: Michael Werner, Esquire, BIO Bioethics Counsel.

From: Edward L. Korwek, Ph.D., J.D.

Re: Some Initial Comments/Analysis of the Brownback Amendment.

The Brownback Amendment is poorly worded and confusing as to its precise coverage. It uses a variety of scientific terms and other complex language both to prohibit and allow certain genetic modification activities. Many of the sentences are composed of language that is incorrect or ambiguous from a scientific standpoint. A determination needs to be made of what each sentence of the Amendment is intended to accomplish.

As to a few of the important definitions, the term “somatic cell” is defined in proposed section 301(i) of Chapter 15, “as a diploid cell (having two sets of the chromosomes of almost all body cells) obtained or derived from a living or deceased human body at any stage of development.” What does “of almost all body cells” mean? Is this an oblique reference to the haploid nature of human sex cells, i.e., sperm and eggs? Also, why is it important to describe in such confusing detail from where the cells are derived?

The term “genetic modification” is defined as “a process, procedure, or practice by which genetic change which can be passed on to future individuals . . .” That ought to be a matter of concern to parents because that is an area of very great potential in terms of parents who have the gene—in terms of transgenic livestock or in creating transgenic livestock—trying to impact that kind of DNA so that they will not pass this on. Yet this is talking about restricting the research for “producing a genetic change which can be passed on to future individuals . . .” That area is a matter of enormous importance and consequence.

I know the Senator has given this a lot of thought. It is enormously important. I respect him for it. I know that he revisits these issues continuously. We will look forward to continuing to work with him. I know he is incredibly concerned about the broad areas of ethical issues. In those areas of ethical concern, we need to have modern, thoughtful and one of the most productive Members of this body, probably in the history of this body. But I would really seriously ask him to look at this area, is this something we want to do in this society? This is not only technologically or theoretically feasible today; it can be done today. It has been done in the animal line for years now. This has been going on for 10 years-plus, 15 years in animals. The genetic lineage in animal versus human is not that much different. Totally unregulated, no limitations—go ahead and do it in humans, not in cattle.

I think we should balance the question of the impact of this on patients. That is another concern in opposing this. This is a serious matter. We have more and more people in the streets protesting about this very thing.

This is a matter of seriousness. We have more and more people in the streets protesting about this very thing.
Mr. KENNEDY. I will include the regulations which are in existence now. I ask unanimous consent they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Pages 90–92—NIH Guidelines for Research Involving Recombinant DNA Molecules]

Appendix K–VII–K. Pathogen. A pathogen is any microbiological agent or eukaryotic cell containing sufficient genetic information, which upon expression of such information, poses a threat to human health in healthy people, plants, or animals.

Appendix K–VII–L. Physical Barrier. A physical barrier is considered any equipment and/or interest that is directly applicable to a specific gene therapy research issue.

At least one member of RAC will serve as Co-chair of each GTPC and report the findings of each meeting to the NIH Director, who will convene a GTPC in conjunction with a RAC meeting. GTPCs will be administered by NIH/OBA. Conference participation will not involve a standing committee membership but rather will offer the unique advantage of assembling numerous participants who possess significant scientific, ethical, and legal expertise in relevant areas.

In order to enhance the depth and value of public discussion relevant to scientific, safety, social, and ethical implications of gene therapy research, the NIH Director will convene GTPCs at regular intervals. As appropriate, the NIH Director may convene a GTPC in conjunction with a RAC meeting. GTPCs will be administered by NIH/OBA. Conference participation will not involve a standing committee membership but rather will offer the unique advantage of assembling numerous participants who possess significant scientific, ethical, and legal expertise in relevant areas.

Appendix L. Gene Therapy Policy Conferences (GTPCs)

RAC continues to explore the issues raised by the potential of in utero gene transfer, and concludes that, at present, it is premature to undertake any in utero gene transfer clinical trial. Significant additional preclinical and clinical studies addressing vector transduction efficacy, biodistribution, and toxicity are required before a human in utero gene transfer protocol can proceed. In addition, a thorough understanding of the development of human organ systems, such as the immune and nervous systems, is needed to better define the potential efficacy and risks of human in utero gene transfer. Requirements for considering any specific human in utero gene transfer procedure include an understanding of the pathophysiology of the candidate disease and a demonstrable advantage to the in utero approach. Once the above criteria are met, the RAC would be willing to consider proposals involving somatic cell gene transfer. The purpose of somatic cell gene therapy is to treat an individual patient, e.g., by inserting a properly functioning gene into the subject's somatic cells. Gert line alteration involves a specific attempt to introduce genetic changes into the germ (reproductive) cells of an individual, with the aim of changing the genes passed on to the individual's offspring.

The RAC continues to explore the issues raised by the potential of in utero gene transfer. However, the RAC concludes that, at present, it is premature to undertake any in utero gene transfer clinical trial. Significant additional preclinical and clinical studies addressing vector transduction efficacy, biodistribution, and toxicity are required before a human in utero gene transfer protocol can proceed. In addition, a thorough understanding of the development of human organ systems, such as the immune and nervous systems, is needed to better define the potential efficacy and risks of human in utero gene transfer. Requirements for considering any specific human in utero gene transfer procedure include an understanding of the pathophysiology of the candidate disease and a demonstrable advantage to the in utero approach. Once the above criteria are met, the RAC would be willing to consider proposals involving somatic cell gene transfer. The purpose of somatic cell gene therapy is to treat an individual patient, e.g., by inserting a properly functioning gene into the subject's somatic cells. Gert line alteration involves a specific attempt to introduce genetic changes into the germ (reproductive) cells of an individual, with the aim of changing the genes passed on to the individual's offspring.

The RAC continues to explore the issues raised by the potential of in utero gene transfer. However, the RAC concludes that, at present, it is premature to undertake any in utero gene transfer clinical trial. Significant additional preclinical and clinical studies addressing vector transduction efficacy, biodistribution, and toxicity are required before a human in utero gene transfer protocol can proceed. In addition, a thorough understanding of the development of human organ systems, such as the immune and nervous systems, is needed to better define the potential efficacy and risks of human in utero gene transfer. Requirements for considering any specific human in utero gene transfer procedure include an understanding of the pathophysiology of the candidate disease and a demonstrable advantage to the in utero approach. Once the above criteria are met, the RAC would be willing to consider proposals involving somatic cell gene transfer. The purpose of somatic cell gene therapy is to treat an individual patient, e.g., by inserting a properly functioning gene into the subject's somatic cells. Gert line alteration involves a specific attempt to introduce genetic changes into the germ (reproductive) cells of an individual, with the aim of changing the genes passed on to the individual's offspring.

mr. kennedy. finally, the reason there is a sign of such experiments is there isn’t reason to believe that this kind of re-
search is safe today. but it may very well be safe tomorrow or the next day. and the possibilities, as i say, are un-
limited. the action of the senator may
effectively close that window, close that
door. i do not think that we ought to be in the position of doing that. so i have included the current state of the regulations that are in effect now in
nih and the reasons for those regula-
tions.

unless there is someone else who wants to speak on this

the presiding officer. the senator from kansas.

mr. brownback. madam president, i would like to respond on this point as well. the fda is saying they have au-
hority over this. one of the groups they are seeking to regulate is saying they do not have authority, and they are going to sue them to keep the fda from regulating them. so we can put those on forward.

the fact is, this has not been dealt
with, and it is of utmost importance to
people in this country and around the
world, and it should be. this should not
happen again.

the presiding officer. does the senator yield the remainder of his time?

mr. brownback. madam president, i ask for the yeas and nays

the presiding officer. the yeas and nays have been requested.

mr. brownback. madam president, i yield back the remainder of my time.

the presiding officer. does the senator from massachusetts yield back his time?

mr. kennedy. i yield back the re-
mainder of my time.

the presiding officer. who seeks recognition? the senator from nevada is recognized.

amendment no. 849

(purpose: to provide for genetic information nondiscrimination)

mr. ensignon. madam president, i call up amendment no. 849 and ask for its immediate consideration.

the presiding officer. the clerk will report.

the senior assistant bill clerk read as follows:

the senator from nevada [mr. ensignon] proposes an amendment numbered 849.

mr. ensignon. madam president, i ask unanimous consent that reading of the amendment be dispensed with.

the presiding officer. without objection, it is so ordered.

(see the text of the amendment is printed in today’s record under “amendments submitted.”)

mr. ensignon. madam president, the amendment that i have proposed really is entitled the “protection against ge-
netic discrimination act.” the senator from massachusetts is one of the co-
sponsors of a bill that contains this particular amendment, along with 22 other senators.

amending the genome of the human genome is one of the most amazing scientific
breakthroughs in recent history. inform-
ation that is embedded in the genome
holds the key to understanding the ill-
nesses and diseases that affect millions of
people across the world every day.

i would like to note, this has nothing
to do with the amendment that sen-
ator brownback just proposed. we
want to keep the controversies sepa-
rate. what our amendment deals with
is whether you can take this genetic
information and use it to determine
whether or not to provide health insur-
ance coverage.

when the map of the human genome is
completed, we will have all of the in-
formation that is contained in the 23
pairs of chromosomes in the human
body. this information will be instru-
mental for finding the cure for diseases
such as breast cancer, cystic fibrosis,
alzheimer’s disease, and hundreds of
other debilitating illnesses.

however, this breakthrough also car-
ger great dangers. current law does not
provide any protections for individ-
uals to keep their own genetic informa-
tion private. currently there is no law
prohibiting a health plan from requir-
ing an applicant to provide genetic in-
formation prior to the approval for
insurance. in other words, any individual with a genetic marker for a specific
disease would most likely not be able
to receive health insurance coverage for the treatment of that disease.

a joint report by the department of labor, department of health and human services, the equal employ-
ment opportunity commission, and the department of justice summarized the
various studies on discrimination based on genetic information and argued for the
enactment of federal legislation.

the report stated that:

genetic predisposition or conditions can
lead to work force discrimination, even in
cases where workers are healthy and un-
lucky to develop disease, or where the ge-
netic condition has no effect on the ability
to perform work.
Because an individual's genetic information has implications for his or her family members and future generations, misuse of genetic information could have intergenerational effects that are broader than any individual incident of misuse.

Dr. Francis Collins, the director of the National Human Genome Research Institute, has stated:

While genetic information and genetic technology hold great promise for improving human health, they can always be used in ways that are fundamentally unjust. Genetic information can be used as the basis for insidious discrimination.

The misuse of genetic information has the potential to be, and is, a very serious problem both in terms of people's access to employment and health insurance and the continued ability to undertake important genetic research.

This amendment takes the first step toward providing individuals with the protections they need for their individual genetic information.

This amendment, as I mentioned before, is part of a larger bill that Senator DASCHLE has introduced on this very same subject. Simply put, this amendment prohibits health insurance companies from using genetic information when deciding whether or not to provide health insurance for an individual.

Insurance companies would not be able to use genetic information to deny an individual's application for coverage or charge excessive premiums.

Think about diseases such as Tay-Sachs, sickle-cell anemia, breast cancer, colon cancer, cystic fibrosis, and other diseases in which we have identified genes that predispose people to these diseases. Just think about how many Americans this affects now and will affect in the future as we discover new genes that predispose people to certain diseases. It is because of this that we must include this amendment if we are truly going to call this bill a Patients' Bill of Rights.

Madam President, my wife and I helped co-found the Breast Cancer Coalition of Nevada. Many of the women who are actively involved in this wonderful organization are breast cancer survivors or family members of women who have died from breast cancer. A wonderful friend of my wife and I, one of the most incredible women I have ever met, died in my wife's arms several years ago. She died of breast cancer.

To think about women such as her who have had a gene identified, or maybe her daughter the same, to think about someday being discriminated against getting health insurance is just unconscionable. I encourage all of my Senate colleagues, including the sponsors of the bill, to accept this amendment. It is the right thing to do. I urge its adoption.

I yield the floor.

The PRESIDING OFFICER (Mr. CARPER). The Senator from North Carolina.

Mr. EDWARDS. Mr. President, we yield back the remainder of our time.

Mr. ENNSIGN. Mr. President, I ask that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To provide that health care professionals who provide pro bono medical services to medically underserved or indigent individuals are immune from liability for malpractice. And sometimes it is something the doctor had nothing to do with, yet they can still be taken to court.

Our amendment says that if health care professionals are going to do this, we want to protect those people from lawsuits.

It seems to me that if somebody is providing something out of the goodness of their heart on a pro bono basis, they could not be sued. In fact, I would support a similar proposal that granted lawyers the same protection.

Mr. ENNSIGN. Mr. President, I ask that this amendment be dispensed with.

The amendment is as follows:

(A) IN GENERAL.—Notwithstanding any other provision of law, no health care professional shall be liable for the performance of, or the failure of duty in providing pro bono medical services to medically underserved or indigent individuals are immune from liability for malpractice.

(B) DEFINITIONS.—In this section:

(i) HEALTH CARE PROFESSIONAL.—The term "health care professional" means any medical practitioner of any person licensed, registered, or certified to practice medicine or human medicine, veterinary medicine, or to __________.

(ii) MEDICALLY UNDERSERVED OR INDIGENT INDIVIDUAL.—The term "medically underserved or indigent individual" means an individual that does not have health care coverage under a group health plan, health insurance, or any other health care coverage program, who is unable to pay for the health care services that are provided to the individual.
Mr. President, I don’t know if anybody is going to oppose this amendment. I can’t understand why they would oppose this amendment. It is my view that we have the privilege of engaging in a debate on this if anybody has a problem with it.

I yield the floor at this time.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. EDWARDS. First, I say to the Senator from Nevada that Senator Coverdell had a bill that he passed called the Volunteer Protection Act of 1997. It specifically provides protection for volunteers, including physicians, who provide pro bono services. So I suggest to my colleague, I don’t know if he thinks there is a problem with that law or the way it is written. There is no way for me to know that based on this amendment. But a specific law already covers this subject matter.

It was passed by the Senate and signed into law in 1997. So, first, I suggest that my colleague look at that law and make sure what he is concerned about is not covered by it.

Second, the bipartisan Patient Protection Act is about HMO reform. It is not about physician liability or the lack thereof—either of those. We would certainly have a problem with adding an amendment to this legislation that is not related to the issue of HMO reform.

So I say to my colleague, again, understanding that we are just seeing his amendment, in fairness, I will be happy to talk with him about it, but those were my immediate concerns. There appears to be a law that already covers this subject matter. We would always be concerned, of course, even under those circumstances, about a health care provider who acted recklessly. I don’t know whether his amendment covers that.

Third, the general issue of adding these kinds of provisions to an HMO reform bill, which is what this bill is about, would also be a concern.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. First of all, physicians I have spoken to do not think the bill the Senator is talking about adequately covers them. That is why they still have to carry malpractice insurance, similar to what Senator Frist has to carry. My amendment would help lower the cost of this type of coverage, so we think this bill is necessary. I don’t understand—if this is already covered in law, why would it be a problem to include it to make sure we are saying to the courts that we absolutely want to cover people who are providing pro bono services to the needy.

Mr. EDWARDS. I say to my colleague that if there is already a law in place that covers this issue, it seems as a matter of procedure that the appropriate thing to do would be to amend the already existing law that covers the subject matter, as opposed to adding this measure to an HMO reform piece of legislation.

So I guess, just as a matter of orderly process, that would make sense to me. Mr. ENSIGN. We have been looking for a vehicle to include this in. We have wanted to deal with this for some time. This is a Patient’s Bill of Rights, and I know it deals mostly with HMOs, but we are looking at our health care system and providing rights to patients. This is part of the health care bill that I think appropriately should have an amendment such as this, simply because I don’t think there is any question that we are driving up health care costs in this country. If anything can help drive down, even a small amount, the cost of health care, I think we should do it.

If between now and tomorrow morning, if there is other language the Senator thinks we need to massage into our amendment, I would be more than happy to work with the Senator from North Carolina. But it stands, we think this is an important amendment.

Mr. EDWARDS. Mr. President, I say to my colleague, I appreciate his comments. He and I are friends, and I would like to find a way to work on this. I will be happy to talk to him about this when we adjourn.

Having said that, I continue to have a significant concern about raising an issue on the HMO reform bill that is not related to HMO reform. We have pretty consistently throughout this debate opposed and defeated amendments unrelated to the coverage of this bill.

There are obviously many subject matters that are related to the general area of health reform and health care. If we start adding amendments on all sorts of subjects we would never get this legislation completed and passed. I continue to have that concern.

I am happy to work with my colleague and listen to his concerns and work on language, although at this moment this is an amendment we would be compelled to oppose. Mr. ENSIGN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

Mr. REID. Mr. President, I ask unanimous consent that the order for the yeas and nays be ordered.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. REID. Mr. President, I suggest that any other language in it be stricken.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I indicated earlier in this debate that I would complete reading into the RECORD the names and titles of organizations that support the Patient Protection Act. Therefore the following is the final list:

Gateway; Gateways for Youth and Families in WA; George Junior Republic in Indiana; Gibrailt; Girls and Town in NE; Goodwill Industry for Boys; Greenbrier Children’s Center; Growing Home in St. Paul, MN; Haddasah; Heart of America Family Services; Hemochromatosis Foundation; Hereditary Colon Cancer Association; Highfields, Inc. in Onondaga, MI; Holy Family Institute of Pittsburgh, PA; Home on the Range in Sentinel Butte in Sentinel Butte, SD; Hubert H. Humphry, III—Former Minnesota Attorney General; Human Services, Inc.; IARCA An Association of Children.

Idaho Youth Ranch; Indian United Methodist Children; Infectious Disease Society of America; International Association of Psychosocial Rehabilitation Services; Jackson Feild Homes in VA; Jane Addams Hull House Association; Jeffrey Modell Foundation; Jewish Board of Family & Children in New York, NY; Jewish Community Services of South Florida; Jewish Family & Career Services; Jewish Family Service of Chicago; Jewish Family and Children’s Service in Minnetonka, MN; Jewish Family and Children’s Services; Jewish Family and Children’s Service; Jewish Family and Communitarian Service; Jewish Family Service of Providence, RI; Jewish Family Service in Teen neck, NJ; Jewish Family Service in TX; Jewish Family Service of Akron, OH; Jewish Family Services of Los Angeles; Julia Dyckman Andrus Memorial Children’s Center in NY; June Burnett Institute; Kemmerer Village; Kentucky United Methodist Homes; KidsPeace National Centers, Inc. in PA; Lakeside, Kalamazoo, MI; Lakeside School, Inc. in Albany, NY; League of Women Voters; Leake and Watts Services, Inc. in Yonkers, NY; Learning Disabilities of America; Lee and Beulah Moor Children’s Home in TX; Lupus Foundation of America; Lutheran Child & Family Services in Bay City, MI; Lutheran Child & Family Services; Lutheran Social Services of Wisconsin; Manisses Communications Group in RI; Maryland Coalition for Children; Maryland Coalition for Youth Services; Maryland Council on Mental Health; Maris Mental Health AMERICA, Inc.; Methodist Children’s Home in TX; Metropolitan Family Services of Portland, OR; Metropolitan Family Services of Chicago.

Michigan Federation of Private Child & Family Agencies; Mid-South Chapter of the
Mrs. FEINSTEIN. Mr. President, I rise today in support of the Bipartisan Patient Protection Act of 2001. Put simply, I believe this is a good bill.

If the Senate approves this bill, we could expect to lift the lid of protection on all 190 million Americans in private health plans within a week. It's that simple.

Congress has a duty to pass a comprehensive Patients' Bill of Rights, to make the medical system work better and to ensure less HMO interference with medical decision making. We need to ensure, for example, access to emergency rooms, specialists, and clinical trials. Patients should be able to go to the emergency room closest to their home in the event of a medical emergency. This bill does that.

Each day, 10,000 physicians see patients harmed because a health plan has refused services. Patients and doctors feel that getting quality care is a constant battle. It is time for this to stop. And the time is now.

Each day we wait to approve a comprehensive Patients' Bill of Rights, 35,000 patients are denied access to the speciality care they need to manage or diagnose their illness.

I want to read to you a heart-wrenching letter I received from a California mother who has had difficulty getting her health plan to approve medically necessary services for her disabled daughter.

I believe this letter really highlights the humane reasons Congress must enact a strong Patients' Bill of Rights this year. This mother writes:

My daughter is a total-care patient. She was in a terrible car accident approximately 14 years ago and sustained severe injuries and is a quadriplegic. I chose to keep her at home. Her licensed care coverage is to be 24 hours a day. In the past two years, her insurance company has unilaterally cut back on her nursing care to 5.5 hours a day.

This is one of many unilateral decisions the insurance provider has made regarding her care—disregarding her doctor's and other medical providers' assessments.

I, as her mother and conservator, who is not trained in medical practices or care, am expected to cover the remainder of the 18.5 hours a day. This has caused me to quit my job, file bankruptcy, and most importantly, it has seriously affected my health.

I am a senior citizen and am not supposed to lift, however, because of the practices of the insurance company, I have no choice. I cannot tell you when I last had a full night's sleep in the past several years.

I commend this mother for her commitment to providing her daughter with the best care available.

I received a letter from her current insurer stating the patient was not a candidate to be a normal employee and in August of 2001 all the aforementioned items would be stopped.

This is not based on my daughter's current doctor's orders nor her needs. This is not based on an assessment from an independent medical establishment or by an experienced, licensed nurse that was conducted by the insurance company for a complete assessment which supported the necessity of 24-hour nursing care.

The decision is being made unilaterally by the insurance company officials. Is this what our patients harm because a health plan has refused services. Patients and doctors feel that getting quality care is a constant battle. It is time for this to stop. And the time is now.

I strongly believe that doctors should be making the medical decisions. This
At the same time, this bill protects employers. If an employer does not make medical decisions, the employer can’t be held liable. It is that simple. This bill does not overturn or preempt existing State liability laws. It specifically exempts doctors and hospitals from new causes of action. These are reasonable provisions. In States like California that have strong patient protections there has not been an explosion of lawsuits.

In fact, since the inception of California’s right-to-sue law in January 2001 and the unlimited damage it provides for, there has not been a single lawsuit filed.

Instead, HMOs appear to be deferring more to patients’ requests for treatment, according to the first data to emerge from the State’s HMO regulator.

California has the longest history in managed care and the highest number of insured people in HMOs nationwide. Over 70 percent of Californians are enrolled in either a commercial HMO or a preferred provider organization. PPOs. Approximately 20 million non-elderly Californians have access to health insurance through their job or privately purchase coverage.

So for California, these protections are critical.

Due in part to the high penetration of managed care, California’s health care system is on the verge of collapse. Resources are stretched to the limit and patients, as a result, are not getting the services they need.

For example, California’s capitation rate, the rate paid to doctors for treatment, is one of the lowest in the Nation. The average capitation rate in California reached its peak in 1993 at $45 per month. Last year, the rate dropped to $29 (PriceWaterhouse Coope rs).

These low reimbursement rates undoubtedly impact quality of care and access to services.

Many California hospitals and other health care providers have been forced to limit hours of operation and discontinue services. The burden to provide care is put on those that have remained open, and many of these facilities are now facing financial problems of their own.

I know that California’s health care system is not unlike other systems across the country. The bottom line is that patients should not be the one’s made to suffer at the hands of a failing health care system.

People pay monthly premiums. They expect their health insurance to be there when they need it. That is what insurance is. It insures against loss from an unforeseen illness or injury.

But without HMOs to pay, the certainty of good health care is being seriously eroded. Many people feel that every time they need care, it is a tremendous hassle.

The bottom line is that people feel they have to fight to get the quality care they have paid for. Americans are trapped in a game of musical hoops to get good care.

People should not have to fight for their health care. They pay for it out of their monthly paycheck. It should be there for them when they need it.

I would like to close with a very tragic story about a young, 16 year old girl from Irvine, California who did not get the care she needed from her HMO in a timely manner. I think her story provides a poignant summary of the problem with managed care providers. Unfortunately, her story does not have a happy ending.

Serenity Silen was diagnosed with acute myeloid leukemia, or AML, in late February 1998. She had gone to her HMO four times, to four different HMO doctors, since the beginning of 1998. Each time she complained of the exact same symptoms, all of which could indicate leukemia.

Over the course of the four visits, Serenity’s condition was never diagnosed. Finally, in the middle of February 1998, Serenity was taken to the emergency room of an out-of-network hospital because her mother was so frustrated with the care at their HMO.

The emergency room doctor was the first doctor, in the five weeks since the symptoms arose, to order a complete blood count test. The blood count test indicated a dangerously high white blood cell count that was symptomatic of leukemia. With a much delayed diagnosis, Serenity’s leukemia was now going to be much more difficult to treat.

Fed up with the HMO, Serenity’s parents sought a second opinion from a highly recognized oncologist at an out-of-network hospital. Serenity was transferred to that hospital to be under the oncologist’s care. After being at the new hospital only a few days, Serenity explained to her parents that she did not realize how much pain she was in until the new hospital helped to take it away. After 2 1/2 months at the new hospital, Serenity died. The disease had not been diagnosed in time.

I urge my colleagues to support this bill. Support this bill for the children like Serenity in your State. The constituents who battle with their HMOs daily to get the quality care they need and deserve. Many of these patients are too sick to fight with their HMOs to get access to the services necessary to treat their illnesses. How many more lives are we going to have to lose to the HMO battle before Congress wises up and passes a Patients’ Bill of Rights that protects the patient?

This bill has been a long time in the making. Let’s get it done this session.
HONORING NEW YORK FIREFIGHTERS—JOHN J. DOWNING, BRIAN FAHEY, AND HARRY FORD, WHO LOST THEIR LIVES IN THE LINE OF DUTY

Mrs. CLINTON. Mr. President, let me state for the RECORD that the request I am about to make has been cleared on the Republican side. I ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. Res. 117 and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title. The assistant legislative clerk read as follows:

A resolution (S. Res. 117) honoring John J. Downing, Brian Fahey, and Harry Ford, who lost their lives in the course of duty as firefighters.

There being no objection, the Senate proceeded to consider the resolution.

Mrs. CLINTON. Mr. President, I rise today to introduce a resolution honoring John J. Downing, Brian Fahey, and Harry Ford, who gave their lives this past Father's Day while protecting the lives of others. Together, these brave men left behind three widows and eight children whom we also honor today for their sacrifice.

On June 17, as a treacherous five-alarm blaze at the Long Island General Supply Company in Queens, NY, without hesitation, as they have done countless times before, nearly 350 firefighters and numerous police officers responded to the call for help. Two civilians and dozens of firefighters and police officers were injured. And three courageous fathers lost their lives. It was the last time their children would be able to spend Father's Day with them.

John Downing was 40 years old, an 11-year veteran of the New York Fire Department when he responded to the five-alarm blaze. He was a valiant public servant who had been recognized for his bravery. John left behind his wife Anne, his 7-year-old daughter Joanne, and his three-year-old son Michael.

Brian Fahey, 46 years old, and a 14-year veteran of the department from East Rockaway, NY, was also a husband and father of three. His years of service to his community were made proud by his courage. He is survived by his wife Mary and their three sons: Brendan, 8; and twins, Patrick and James, 3’s years old.

Harry Ford, age 50, gave nearly three decades of service to the New York City Fire Department. During his exemplary career, he received nine bravery citations. He is survived by his wife Denise; his daughter Janna O'Brien, age 24; and two sons, Harry, 12, and George.

Mr. President, I paid a call on the two firehouses early Sunday morning who had lost these brave patriots, and I spent time talking to the men who go to work every day not knowing what is going to be asked of them, who sometimes go for, thankfully, days, or was months and months without ever having to put themselves in danger. But when the call comes, they are ready. And whether it is a call to respond to an emergency need because of an illness, an accident, or a huge raging fire that is about to get out of control, they represent the very best we have in our society.

We live in a society that seems to be in perpetual search for heroes, whether in the form of sports figures or screen idols. But to find true heroes, sometimes we don't have to look so very far from home. We certainly don't have to look any farther than the brave men we are honoring today.

The unmistakable courage and the incredible heroism that these fires and their families have made for the good of their neighbors and their community are the kinds of virtues and values that should be held up to our children and ourselves as something we should all aspire to.

Finally, in so honoring these men, we honor the hundreds of thousands of public safety officers across this country that, every single day, risk their lives and put them and their families at risk to keep us safe from harm. Their strong tradition of bravery and sacrifice keeps our communities safe and fills our hearts with pride for their selfless acts of courage for others.

I hope that next year when Father's Day comes around, the children who have lost their fathers in this fire and those who have lost fathers and mothers because they were serving us will know how grateful we are for their sacrifice. I hope all of my colleagues will join me in supporting this resolution.

I yield back the remainder of my time.

Mr. DODD. Mr. President, I rise in support of Senator CLINTON's resolution honoring the fallen firefighters of New York and to join with her in acknowledging the bravery and commitment of Harry Ford, Brian Fahey, and John Downing. These men were firefighters—firefighters who risked their lives and gave their lives to protect the public. These men died on Sunday, June 17th, while fighting a fire in Queens, New York. The price they paid on our behalf was as great a price as any citizen can pay. We owe these men our deepest appreciation and respect.

On Sunday, the 17th—Father's Day—firefighters Ford, Fahey and Downing worked quickly to fight a fire in a local hardware store. Thirty minutes after leaving the fire station, responding to what they thought was a routine call, an explosion buried the men under a pile of rubble. Dozens of firefighters worked to rescue the men, but they could not be reached in time.

These men were husbands and fathers. Harry Ford leaves behind his...
wife, Denise and two sons, Harry, age 12, and Gerard, age 10. Brian Fahey leaves behind his wife, Mary and three sons: Brendan, who is 8 years old, and 3-year-old twins, Patrick and James. John Downing is survived by his wife Anne, his daughter Joanne, age 7, and his son Michael, who is 3. My thoughts and prayers are with these families.

I am humbled by their devotion to public service. Their deaths represent the ultimate sacrifice a person can make for his or her fellow human beings. They died while fighting a fire and it is not hyperbole to say that they died while making America a safer place to live.

I am always saddened to realize that it takes a tragedy like this to bring attention to the needs of fire departments and firefighters nationwide. I hope the funds we appropriate will help mend the damage of traffic accidents and construction accidents. When a natural or man-made calamity strikes—from hurricanes to school shootings to bombings—firefighters are there without fail, restoring order and saving lives.

Unfortunately, fire departments across the Nation struggle to find resources to help keep our communities safe. As the demands placed on fire departments have grown in volume and magnitude, the ability of local residents to support them has been put to a severe test. As a result, towns and cities throughout the country are struggling mightily to provide the fire departments with the resources they require.

For these reasons I have strongly supported helping localities meet their critical objectives. Communities need more firefighters and community firefighters need the resources to ensure that they have the training and equipment to protect themselves and the public.

Last year we passed an important piece of legislation called the Firefighter Investment and Response Enhancement Act which authorized the Federal Emergency Management Agency to provide grants to local firefighters so they could purchase the equipment they need. Congress appropriated $100 for the program last year and the FEMA has just completed the first grant competition under the program. The demand is extraordinary. FEMA received nearly $3 billion worth of grant applications—that’s 30 times more in requests that is currently available. No amount of funding can bring back Firefighters Ford, Fahey, and Downing. New fire trucks or better training programs or even more firefighters cannot even begin to compensate for the loss suffered by the people of Queens and the families of these brave men. For their lives, we are forever indebted, and the members of this chamber to say that these men and their families shall not be forgotten. They have sacrificed their lives for us, and for this they deserve no less than the highest degree of honor and respect. We here today cannot compare our own deeds to those of Harry Ford, Brian Fahey, and John Downing, but we can bring honor to ourselves and justice to their memories by keeping them and the needs of the fire service in mind as we perform our own duties.

Mrs. CLINTON. Mr. President, I ask unanimous consent that the resolution and preamble be agreed to en bloc, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 117) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. Res. 117

Whereas on June 17, 2001, 350 firefighters and numerous police officers responded to a 911 call that sent them to Long Island General Supply Company in Queens, New York; Whereas a fire and an explosion in a 2-story building had turned the 128-year-old, family-owned store into a heap of broken bricks, twisted metal, and shattered glass; Whereas all who responded to the scene served without reservation and with their personal safety on the line; Whereas 2 civilians and dozens of firefighters were injured, including firefighters Joseph Vossila and Brendan Manning who were severely injured; Whereas John J. Downing of Ladder Company 163, an 11-year veteran of the department and resident of Port Jefferson Station, and a husband and father of 2, lost his life in the fire; Whereas Brian Fahey of Rescue Company 4, a 14-year veteran of the department and resident of East Rockaway, and a husband and father of 3, lost his life in the fire; and Whereas Harry Ford of Rescue Company 4, a 27-year veteran of the department from Long Beach, and a husband and father of 3, lost his life in the fire: Now, therefore, be it

Resolved—That the Senate
(1) honors John J. Downing, Brian Fahey, and Harry Ford, who lost their lives in the course of duty as firefighters, and recognizes them for their bravery and sacrifice;
(2) extends its deepest sympathy to the families of these 3 brave heroes; and
(3) pledges its support and to continue to work on behalf of all of the Nation’s firefighters who risk their lives every day to ensure the safety of all Americans.

A CALL FOR ACTION

Mr. LEVIN. Mr. President, a new poll conducted by the Opinion Research Corporation International and released by the Brady Campaign to Prevent Gun Violence confirms once again that the American people support sensible gun safety legislation. Eighty-three percent of those polled said they support criminal background checks on all gun purchases at gun shows. Nearly four out of five respondents voiced support for preventing gun dealers from selling guns to anyone who has not passed a background check, even if it takes more than 3 days to complete the check. And more than 8 out of every 10 people polled believe that all guns should be sold with childproof safety locks.

The message here is clear. People are fed up with the reports of gun violence that dominate the front page and the evening news. America wants a solution.

The Brady Campaign’s poll and countless other studies demonstrate our mandate. The incidents of gun violence that plague our neighborhoods and endanger our children confirm our moral obligation.

We should ignore neither. We cannot let another Congress go by without action. Let’s close the loopholes in our gun laws and remember the 107th Congress as a time when we made America a safer place for our children and our grandchildren.

GENERAL ACCOUNTING OFFICE REPORT ON DISADVANTAGED BUSINESS ENTERPRISES PROGRAM

Mr. MCCONNELL. Mr. President, when the 107th Congress passed the Transportation Equity Act for the 21st Century, TEA–21, there was a vigorous and close debate about whether to convert the Disadvantaged Business Enterprise Program into a race neutral program helping all small disadvantaged business. It troubles many members of both Houses that we lacked basic information about the characteristics of DBEs and non-DBEs and about alleged discrimination in the transportation industry. Consequently, I introduced, with widespread bi-partisan support, an amendment to TEA–21, requiring the GAO to gather the information Congress was missing that is essential to understanding the DBE program. As Congressman SHUSTER, Chair of the House Committee on Transportation and Infrastructure and the floor manager for the transportation bill, emphasized during the House debate, the Act “also requires a GAO study that would examine whether there is continued evidence of discrimination against small business owned and controlled by socially and economically disadvantaged individuals. I believe such a study will lay the groundwork for future reform.”

Three years later, the GAO has produced a comprehensive report on the questions Congress asked it to investigate. This objective, impartial report...
entitled, “Disadvantaged Business Enterprises: Critical Information is needed to understand program impact.” GAO Report GAO-01-586, June 2001, is highly significant to the continuing legislative and judicial debate over the DBE program. Professor George R. La Noue, one of the distinguished scholars in this field, has analyzed the GAO’s report. He notes that the “DBE program has been continuously subject to litigation during its almost two decades of existence.” Professor La Noue concludes that “the picture of the DBE program that emerges from the GAO report is one of essential information that is missing, or if available, does not support any finding of a national pattern of discrimination against DBEs.” I am pleased to provide Professor La Noue’s analysis of the GAO report, and I request that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AN ANALYSIS OF “DISADVANTAGED BUSINESS ENTERPRISES: CRITICAL INFORMATION IS NEEDED TO UNDERSTAND PROGRAM IMPACT” GAO Report [GAO–01–586 June 2001] (By George R. La Noue, Professor of Political Science) DIRECTION, PROJECT ON CIVIL RIGHTS AND PUBLIC CONTRACTS, UNIVERSITY OF MARYLAND, BALTIMORE

During the 1998 consideration of the Transportation Equity Act for the 21st Century (TEA–21), there was extensive debate in both Houses about whether to make the DBE program race-neutral. In the end, a compromise was reached to retain a race conscious DBE program, while requiring the General Accounting Office to make a three year study of the characteristics of the DBEs and non-DBEs participating in federal transportation programs and to gather existing evidence of discrimination. The study was intended to provide a solid basis of facts for courts, legislators, and others grappling with the complex issues of the constitutionality of the DBE program.

The report has been released and its conclusions are highly significant. GAO performed its three year study by obtaining data from 52 state DOT recipients (including the District of Columbia and Puerto Rico) and 31 of the largest (accounting for two-thirds of transit grant funds obligated in 1999) transportation districts in the country. In addition GAO staff interviewed representatives of interest groups on both sides of the DBE question and analyzed the results of 14 transportation related disparity studies. Following are GAO’s major conclusions.

1. DISCRIMINATION COMPLAINTS

GAO conducted a survey of discrimination complaints received by USDOT and recipients. GAO found that, while USDOT sometimes referred complaints of alleged discrimination, the agency does not compile or analyze the information in those complaints. GAO could not supply information on the number of complaints filed, investigations launched, or their outcomes. (p. 33) GAO also asked state and local transit recipients about complaints they received and they had better results. While about a third of the recipients had no complaints, while a total of 31 complaints were received by the other recipients. Of these, 28 were investigated and mediation/evaluation were made only 4 times across the nation.

The report concluded: Other factors may also limit the ability of DBEs to compete for larger contracts. The majority of states and transit districts we surveyed had not conducted any kind of analysis to identify these factors. Using anecdotal information or informal data, factors or barriers, such as a lack of working capital and limited access to bonding, that may limit DBEs’ ability to compete for larger contracts are little agreement among the officials we contacted on whether these factors were attributable to discrimination. (p. 7)

In fact GAO reported there were few if any studies by government agencies or industry groups regarding barriers to DBE contracting. “USDOT officials, however, stated that they believe contract bundling is one of the largest barriers for DBEs in competing for transportation contracts.” (p. 35) That, of course, is not a problem caused by discrimination.

2. DISPARITY STUDIES

GAO also reviewed 14 transportation-specific disparity studies completed between 1996 and 1998 as part of its three year study. Because they might be a source of evidence about discrimination against DBEs and because these studies do not use disparity studies to set annual goals and to determine the level of discrimination these goals purportedly are remedying. GAO found that about one third of the recipients surveyed used disparity studies to set their FY 2000 goals. (p. 29)

GAO found that: the limited data used to calculate and find disparities, limitations to use disparity studies to set annual goals, and the methodological weaknesses, create uncertainties about the studies findings. While not all studies suffered from every problem, each suffered enough problems to make its findings questionable. We recognize there are difficulties inherent in conducting disparity studies and that such limitations are common to social science research; however, the studies we reviewed did not sufficiently address such problems or disclose their limitations.

GAO then detailed disparity study problems, particularly in calculating DBE availability. These problems are important not only because of the weakness of the disparity studies involved, but because these same problems exist in the regulations USDOT issued regarding annual goal setting. USDOT as a practical matter permits recipients to use a wide variety of sources to measure availability on which goals are then based.

GAO made other specific criticisms of the studies. For example, the studies did not have information on firm qualifications or capabilities; they failed to analyze both the dollar and contract awarded and sometimes did not have subcontracting data. This was important: Because MBE/WBEs are more likely to be underutilized when the focus is on the DBE share of subcontracting only in dollars, not contracts, and annual goals are set based on total dollars rather than on the DBE share of subcontracting only in dollars.

Finally GAO notes that although USDOT advised recipients that disparity studies should be “reliable,” USDOT provided no guidance on what would be “reliable.” USDOT concluded that: USDOT’s guidance does not, for example, caution against using studies that contain the types of data and methodological problems identified above. Without explicit guidance on what makes a disparity study reliable, states and transit districts may not provide accurate information in setting DBE goals. (p. 32)

GAO’s finding about the unreliability of disparity studies is consistent with the findings of every court that has examined the merits of such studies after discovery and trial.

3. DISCONTINUING PROGRAMS

One of the arguments used in the TEA–21 debates and defendant’s trial briefs is the assertion, often anecdotal, that without goals, DBE participation would decline precipitously. The difficulty, even if true, is that the decline in DBE participation may be the result of previous overutilization caused by goals set too high or because when a program is struck down DBEs may have little incentive to seek or maintain certification.

Is the basic assertion true? It turned out that 10 of 12 recipients with discontinued programs did not know what the DBE participation result was. For instance, although Michigan was cited by DBE proponents in the congressional debate as an example of DBE utilization decline after Michigan Road Builders Assn. v. Millikin (1987) struck down the state highway MBE program, GAO reports: Michigan could not provide us with minority and women owned business participation data in state highway contracting for the years immediately before and after it discontinued its program. Furthermore, Michigan officials stated that the analysis showing the decline that is often cited was a one-time analysis and that data is no longer available. Consequently we can not verify the number cited during the debate. (p.37)

4. MISSING INFORMATION

Much of the above criticisms GAO cast in terms of a lack of information, but there were other key items missing as well. GAO had planned to survey all transit authorities receiving federal funds, but FTA does not have a complete list. (p. 74) When the 83 state and transit recipients were surveyed, only 40% or less of the respondents could report the gross revenues of the DBEs that won contracts. Less than 25% of the respondents could report the gross revenues of the DBEs that did not win contracts. (pp. 52-55) Only about a third of the agencies could report dollars and type of personal net worth of DBE owners, although TEA–21 regulations require that such owners net worth not exceed $750,000.

Only a handful of respondents could respond to data on the gross revenues or owner net worth characteristics of non-DBE firms. (p. 68) While 79 respondents could report data on the personal net worth of DBE owners, only 6 respondents could report similar data for non-DBEs. That means that most respondents did not regard comparing DBE and non-DBE owners net worth in setting goals or in determining whether discrimination exists.

GAO’s conclusion here is significant because the USDOT regulations measure utilization only in dollars, not contracts, and annual goals are set based on total dollars rather than on the DBE share of subcontracting. (p. 51)
Nor are respondents acquiring relevant information, nor are they conducting study determining if awarding prime or sub contracts to DBEs affects contract costs; 67.5% no study on discrimination against DBE firms; 94.2% no study of discrimination against DBEs by financial credit, insurance or bond markets; 79.5% no study of factors making it difficult for DBEs to compete; and 92.8% no study on the impact of the DBE program on competition and the creation of jobs. (pp. 66-68). Only 26.5% of the respondents have developed and implemented use of a bids list, although the regulations require such.

The DBE program has been continuously subject to litigation during its almost two decades of existence. Overall, the picture of the DBE program that emerges from the GAO report is one of essential information that is missing, or if available, does not portray any finding of a national pattern of discrimination against DBEs.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred April 18, 1998 in New York City. A man who used anti-gay epithets allegedly slashed a gay man in the face with a knife. Mr. Rodriguez, 22, was charged with attempted murder, assault, and criminal possession of a weapon.

I believe that government’s first duty is to defend its citizens, to defend them against whatever harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

RAILROAD CROSSING DELAY REDUCTION ACT

Mr. DURBIN. Mr. President, earlier this month I introduced the Railroad Crossing Delay Reduction Act, S. 1015, with my colleagues, Senators LEVIN and STABENOW.

This legislation would accelerate efforts at the U.S. Department of Transportation to address the issue of rail safety by requiring the Secretary of Transportation to issue specific regulations establishing maximum times that block automobile traffic at railroad crossings. Currently, there are no Federal limits on how long trains can block crossings. The Railroad Crossing Delay Reduction Act would simply minimize automobile traffic delays caused by trains blocking traffic at railroad grade crossings.

In northeastern Illinois, there are frequent blockages at rail crossings. These blocked crossings prevent emergency vehicles, such as fire trucks, police cars, ambulances, and other related vehicles from getting to their destinations in the times of need. This is a serious problem and one I hope to address by passage of this important legislation.

Blocked rail crossings also delay drivers by preventing them from getting to their destinations. Motorists, knowing they will have to wait for a train to move at blocked crossings, sometimes try to beat the train or ignore signals completely. This is a threat to public safety, and one that must stop. Motorists must act responsibly, but we can reduce the temptation by reducing delays.

Trains stopped for long periods of time also tempt pedestrians to cross between the train cars. I’ve heard from local mayors in my State that children, in order to get from school, cross between the rail cars. This is a terrible invitation to tragedy.

Trains blocking crossings cause traffic problems, congestion, and delay. These issues are very real. They are serious. And more importantly, they are a threat to public safety. To address these problems, I’ve introduced with my colleagues the Railroad Crossing Delay Reduction Act. I’m hopeful this legislation will provide for a safer Illinois and a safer Nation. I urge my colleagues to join the effort to reduce blocked rail-grade crossings by cosponsoring and supporting S. 1015.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Wednesday, June 27, the Federal debt stood at $5,655,167,264,852.88. Five trillion, six hundred fifty-five billion, one hundred forty-two million, one hundred sixty-four thousand, eight hundred eighty-eight cents.

One year ago, June 27, 2000, the Federal debt stood at $5,650,720,000,000, Five trillion, six hundred fifty billion, seven hundred twenty million.

Five years ago, June 27, 1996, the Federal debt stood at $5,118,104,000,000, Five trillion, one hundred eighteen billion, one hundred four million.

Ten years ago, June 27, 1991, the Federal debt stood at $3,502,028,000,000, Three trillion, five hundred twenty-eight billion, two hundred eighteen million.

Fifteen years ago, June 27, 1986, the Federal debt stood at $2,040,977,000,000, Two trillion, forty billion, nine hundred forty-seven million, seven hundred eighty-twelve million.

Twenty years ago, June 27, 1981, the Federal debt stood at $502,615,000,000, Five hundred billion, six hundred fifteen million.

The Federal debt has increased at a staggering rate during the past fifteen years. These blockages prevent the ability of the school to maintain the citizens in Michigan, Dr. Richard W. McDowell. Today, many people will gather to pay tribute to Dr. McDowell for his service as President of Schoolcraft College, in Livonia, MI, for the past twenty years.

Dr. McDowell has dedicated his life, both professionally and personally, to the service of his community. Dr. McDowell has served capably and honorably as the President of Schoolcraft College during a period of incredible growth for this institution. He has presided over programs and projects that have reshaped the campus, and enhanced its ability to meet the needs of students at Schoolcraft College.

During his tenure as President, Dr. McDowell has presided over the construction of numerous structures including additions to the Campus Center, the Child Care Center and the student center that bears his name. In addition to enhancing the physical facilities, he has greatly enhanced the economic structure of the campus by forming the Schoolcraft Development Authority, and by expanding the endowment of the campus. These efforts will secure the ability of the school to maintain a world-class campus while providing students with access to an affordable education.

In addition to these activities, Dr. McDowell is a leader in his profession and in numerous civic institutions. His love of academia and education translated into his desire to serve the educational community with large...
McDowell has served as President of the Michigan Community College Association, and he has been a member of the Michigan Educational Trust Board, the National Advisory Panel for the Community College Program at the University of Michigan, the American Association of Community Colleges and the North Central Association of Colloquey and Schools.

He has further assisted his community by serving on the board of Wayne County Private Industry Corporation, St. Mary Mercy Hospital and the City of Livonia Ethics Board. This selfless leadership has been recognized by many organizations, including his alma maters—Indiana University of Pennsylvania and Purdue University. Both of these institutions awarded him their distinguished alumni awards. In addition, he was selected one of the top fifty college community presidents in the United States by the Community College Leadership Program at the University of Texas at Austin.

I hope my Senate colleagues will join me in saluting Mr. McDowell for his career of public service, particularly the commitment to education which he has exhibited for the last two decades.

CONCRETE CANOE COMPETITION

Mr. SESSIONS. Mr. President, I join with my colleagues in support of the Concrete Canoe Competition.

Civil Engineers design the backbone of our Nation’s infrastructure. By designing, building, and maintaining our infrastructure, these engineers have quietly helped to shape the history of our Nation and its communities. Civil Engineers contribute daily to our standard of living through their designing, building, and maintaining our transportation, clean water, and power generation systems.

A great example of civil engineering ingenuity is manifested through the National Concrete Canoe Competition. The Concrete Canoe Competition provides college and university students an opportunity to use the engineering principles learned in the classroom, and apply them in a competitive environment where they further learn important team and project management skills.

I am very pleased to announce that on June 16, 2001, the University of Alabama at Huntsville won an unprecedented fifth national Championship in the Concrete Canoe Competition.

RETIREMENT OF JOHN C. HOY AS PRESIDENT OF THE NEW ENGLAND BOARD OF HIGHER EDUCATION

Mr. KENNEDY. Mr. President, it is an honor today to recognize the outstanding accomplishments of John C. Hoy, president of the New England Board of Higher Education, who is retiring this month. Mr. Hoy has dedicated the past twenty-three years to serving the higher education institutions of New England, and his leadership will be greatly missed.

Since he became president of the Board in 1978, Mr. Hoy has led the effort to provide an accessible and affordable education for every New Englander. To accomplish this goal, he established reforms in his own organization, and he also involved individuals and businesses throughout New England in effective partnerships that served students and institutions alike.

Among his primary achievements was the publication of numerous important books, including studies on the relationship between higher education and economic well-being in New England, the links between U.S. competitiveness and international aspects of higher education, and the effects of legal education on the New England economy.

In addition, John Hoy offered much-needed support to minority communities. He entered into partnership by Blacks and Hispanics in higher education, and he worked effectively to increase the number of ethnic minorities completing PhD programs. He also created a scholarship program for Black South African students at South Africa’s open universities under apartheid.

John Hoy also cared deeply about the way technology was changing higher education in New England and around the country. Under his initiative, the Board explored the promise of biotech industries and manufacturing in New England, and worked to improve technical education, with the help of both professional educators and the private sector. In addition, he worked with the national boards of higher education to coordinate telecommunications among higher educational institutions.

John C. Hoy deserves great credit for all he has done to enhance higher education in New England. His accomplishments are deeply appreciated by all of us who know him, and I welcome this opportunity to wish him a long and happy retirement.

HONORING DR. BERNARD MEYERS

Mr. CRAPO. Mr. President, I rise today to say thank you to Dr. Bernard “Bernie” Meyers, President and General Manager of Bechtel BWXT Idaho, LLC (BBWI). BBWI manages the Idaho National Engineering and Environmental Laboratory (INEEL) for the United States Department of Energy.

The INEEL is the third largest employer in the state of Idaho and the largest employer in the hometown of Idaho Falls. For the past 2 years Bernie’s professional and personal skills have helped lead the INEEL in its mission to be an enduring national resource that delivers science and engineered solutions to the world’s environmental, energy and security challenges.

On August 1, 2001, Bernie will retire as President of BBWI and assume additional duties on behalf of Bechtel. In addition to his duties as President of BBWI, Bernie is also Senior Vice President in the 30,000 employee worldwide Bechtel organization.

Bernie’s 39-year professional career includes 26 years spent with Bechtel, where he has risen through the nuclear engineering ranks while serving as an Engineer, Supervisor, Project Manager, Vice President, and finally as Senior Vice President.

Bernie’s stewardship of Bechtel BWXT Idaho represents a strong demonstration of Bechtel’s commitment to provide customer satisfaction and operational excellence for the eastern Idaho community. In addition to being a Senior Vice President, Bernie has in the past directed major Bechtel companies, managed North American operations, headed up the firm’s Engineering and Construction operations, managed Bechtel’s nuclear business line and served as an “in-the-trenches” project manager for some $30 billion worth of nuclear power jobs.

During that same time, Bernie gained INEEL-applicable experience in integrating safety through diverse workforces and in serving as a leader in nuclear technologies and nuclear operations. Over the years, he has managed large, complex and highly technical entities; overseen research and development organizations, and helped expand new and existing business lines into both national and international markets. He also has integrated technical, management and business systems across multiple offices, companies, sites, and disciplines.

Bernie is a Fellow in the American Society of Civil Engineers and the American Concrete Institute, and has authored a textbook, as well as more than 60 professional papers. He holds a master’s degree in civil engineering from the University of Missouri and a doctor’s degree in civil engineering from Cornell University.

During his time in Idaho, Bernie Meyers has provided sound thinking, decisive leadership and an intelligent vision for the future of the INEEL. He has provided honest and frequent communications about INEEL activities with Idaho’s Congressional delegation, Idaho elected officials, key stakeholders, business and community leaders and the site’s employees.

Under Bernie leadership, BBWI has proven to be a solid corporate neighbor throughout the state of Idaho. His advocacy for science education has helped to firmly establish the JASON Science Education program in the state, creating an awareness of science
and technology careers for Idaho's elementary and secondary school students. His support of art, cultural and civic causes have contributed to the financial well being of many of organizations in Idaho.

On behalf of the people of Idaho, I want to say thank you to Bernie Meyers for a job well done. I want to wish Bernie and his wife Rita all the best as they tackle new challenges in the years ahead.

WE THE PEOPLE COMPETITION

• Mr. MILLER. Mr. President, I would like to congratulate the following students for their outstanding performance in the national finals of the 'We the People: The Citizen and the Constitution' contest in Washington, D.C. on April 21-23, 2001.

Joey Angel, David Connor, Darrell Davis, Eric Eloise, Jesse Gelbaum, Lindsey Green, Kyle Hale, Matthew Hall, Charles Jones, David Lee, Jennie Long, Greer Pasmanick, Benjamin Riddick, Emily Rubinson, Matthew Snyder, Sanjay Tamhane, Jordan Tritt, and Scott Visser.

The leaders of this exceptional group of students are: Celeste Boemker, Teacher, Parker Davis, State Coordinator, and John Carr, District Coordinator.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer referred the Senate messages from the President of the United States submitting sundry nominations where were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT OF THE CORPORATION FOR PUBLIC BROADCASTING FOR FISCAL YEAR 2000—MESSAGE FROM THE PRESIDENT—PM 32

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Energy and Natural Resources.

To the Congress of the United States:

One of the first actions I took when I became President in January was to create the National Energy Policy Development Group to examine America's energy needs and to develop a policy to put our Nation's energy future on sound footing.

I am happy transmitting to the Congress proposals contained in the National Energy Policy report that require legislative action. In conjunction with executive actions that my Administration is already undertaking, these legislative initiatives will help address the underlying causes of the energy challenges that Americans face now and in the years to come. Energy has enormous implications for our economy, our environment, and our national security. We cannot let another year go by without addressing these issues together in a comprehensive and balanced package.

These important legislative initiatives, combined with regulatory and administrative actions, comprise a comprehensive and forward-looking plan that utilizes 21st century technology to allow us to promote conservation and diversify our energy supply. These actions will increase the quality of life of Americans by providing reliable energy and protecting the environment.

Our policy will modernize and increase conservation by ensuring that energy is used as efficiently as possible. In addition, the National Energy Policy will modernize and expand our energy infrastructure, creating a new high-tech energy delivery network that increases the reliability of our energy supply. Further, it will diversify our energy supply by encouraging renewable and alternative sources of energy, as well as the latest technologies to increase environmentally friendly exploration and production of domestic energy resources.

Importantly, our energy policy improves and accelerates environmental protection. By utilizing the latest in pollution control technologies to cut harmful emissions we can integrate our desire for a cleaner environment and a sufficient supply of energy for the future. We will also strengthen America's energy security. We will do so by reducing our dependence on foreign sources of oil, and by protecting low-income Americans from soaring energy prices and supply shortages through programs like the Low Income Housing Energy Assistance Program.

My Administration stands ready to work with the Congress to enact comprehensive energy legislation this year.

GEORGE W. BUSH.

REPORT ON THE EMERGENCY REGARDING THE PROLIFERATION OF WEAPONS OF MASS DESTRUCTION—MESSAGE FROM THE PRESIDENT—PM 34

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing and Urban Development.

To the Congress of the United States:

Enclosed is a report to the Congress on Executive Order 12938, as required by section 204 of the International Emergency Economic Powers Act (50 U.S.C. 1703(c)) and section 401(c) of the National Emergencies Act (50 U.S.C. 1841(c)).

GEORGE W. BUSH.

MESSAGES FROM THE HOUSE

At 10:21 a.m., message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 691. An act to extend the authorization of funding for child passenger protection education grants through fiscal year 2003.

H.R. 2113. An act to establish a commission for the purpose of encouraging and providing for the commemoration of the 50th anniversary of the Supreme Court decision in Brown v. Board of Education.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 176. Concurrent resolution providing for a conditional adjournment of the House of Representatives and a conditional recess or adjournment of the Senate.

At 5:59 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2311. An act making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes.

The message also announced that pursuant to section 201(b) of the International Religious Freedom Act of 1998 (22 U.S.C. 6431), as amended by Public Law 104-135, and upon the recommendation of the Minority Leaders, the Speaker appoints the following members on the part of the House of Representatives to the Commission on
CONGRESSIONAL RECORD—SENATE
June 28, 2001

International Religious Freedom to fill the existing vacancies thereon, for terms to expire May 14, 2003: Ms. Leilah Sadat of St. Louis, Missouri and Ms. Felice Gaer of Paramus, New Jersey.

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 691. An act to extend the authorization of funding for child passenger protection education grants through fiscal year 2003; to the Committee on Commerce, Science, and Transportation.

H.R. 2133. An act to establish a commission for the purpose of encouraging and providing for the commemoration of the 50th anniversary of the Supreme Court decision in Brown v. Board of Education; to the Committee on the Judiciary.

H.R. 2261. An act making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes; to the Committee on Appropriations.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, June 28, 2001, he had presented to the President of the United States the following enrolled bill:

S. 657. An act to authorize funding for the National 4-H Program Centennial Initiative.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-123. A concurrent resolution adopted by the Senate of the Legislature of the State of Louisiana relative to the Interstate highway system; to the Committee on Environment and Public Works.

SENATE CONCURRENT RESOLUTION NO. 106

Whereas, safety rest areas located on the rights of way of the Interstate highway system provide necessary services for Louisiana motorists, as well as visitors to Louisiana; and

Whereas, there are currently thirty-four rest areas along interstate highways in Louisiana; and

Whereas, the annual cost of upkeep and maintenance of these rest areas is approximately three and one-half million dollars; and

Whereas, the state is required by federal law to maintain these rest areas; and

Whereas, the Louisiana Department of Transportation and Development has scheduled approximately fifteen of these rest areas for closure; and

Whereas, these rest areas scheduled for closure could remain open if private entities were charged with the responsibility of maintenance and upkeep; and

Whereas, Federal law currently prohibits privatization of safety rest areas located on the rights of way of the Interstate highway system. Therefore be it

Resolved, That the Legislature of Louisiana memorializes the Congress of the United States to allow states to privatize safety rest areas located on the rights of way of the Interstate highway system. Be it further

Resolved, That a copy of this Resolution shall be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana delegation to the United States Congress.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

Mr. LEVIN. Mr. President, for the Committee on Armed Services.

The following named officers for appointment in the United States Air Force to the grade indicated under title 10, U.S.C., section 624:

To be major general
Brig. Gen. Dale W. Meyerrose, 0000
Brig. Gen. Wilbert D. Pearson, Jr., 0000

The following Air National Guard of the United States officers for appointment in the Reserve of the United States Air Force to the grade indicated under title 10, U.S.C., section 62203:

To be brigadier general
Col. Rex W. Tanberg Jr., 0000

The following named officers for appointment in the United States Army to the grade indicated under assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be lieutenant general
Lt. Gen. John A. Van Antwerp

The following named officers for appointment in the Reserve of the Army to the grade indicated under title 10, U.S.C., section 12203:

To be major general
Brig. Gen. James P. Collins, 0000

The following Army National Guard of the United States officer for appointment in the Reserve of the Army to the grade indicated under title 10, U.S.C., section 12203:

To be major general
Brig. Gen. Edward L. Correa Jr., 0000

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be lieutenant general
Lt. Gen. James C. Riley, 0000

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be lieutenant general
Maj. Gen. William S. Wallace, 0000

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be lieutenant general
Maj. Gen. Erneston S. Griffin, 0000

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be lieutenant general
Lt. Gen. Leon J. LaPorte, 0000

The following named officer for appointment as Chief of the Bureau of Medicine and Surgery and Surgeon General and for appointment to grade indicated under title 10, U.S.C., sections 601 and 5137:

Rear Adm. Michael L. Cowan, 0000

The following named officer for appointment in the United States Navy to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be vice admiral
Vice Adm. Patricia A. Tracey, 0000

Maj. Gen. Edward Hanlon Jr., 0000

(The above nominations were reported with the commendation that they be confirmed.)

Mr. LEVIN. Mr. President, for the Committee on Armed Services, I report favorably the following nominations listed which were printed in the RECORDS of the dates indicated, and ask unanimous consent, to save the expense of reprinting on the Executive Calendar that these nominations lie at the Secretary’s desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

Air Force nominations beginning STEVEN L. ADAMS and ending JANNETTE YOUNG, which nominations were received by the Senate and appeared in the Congressional Record on June 18, 2001.

Army nominations beginning KEITH S. ALBERTSON and ending ROBERT K. ZUEHLKE, which nominations were received by the Senate and appeared in the Congressional Record on January 3, 2001.

Army nominations beginning ERIC D. ADAMS and ending DAVID S. ZUMBRU, which nominations were received by the Senate and appeared in the Congressional Record May 21, 2001.

Army nominations beginning GREGORY R. CLUFF and ending STEVEN W. VINSON, which nominations were received by the Senate and appeared in the Congressional Record May 21, 2001.

Army nominations beginning GILL P. BECK and ending MARGO D. SHERIDAN, which nominations were received by the Senate and appeared in the Congressional Record on June 5, 2001.

Army nominations beginning CYNTHIA J. ABBADINI and ending THOMAS R. YARBER, which nominations were received by the Senate and appeared in the Congressional Record on June 5, 2001.

Army nominations beginning JAMES E. GELETA and ending GARY S. OWENS, which nominations were received by the Senate and appeared in the Congressional Record on June 12, 2001.

Army nominations beginning FLOYD E. BARBER and ending STEVEN N. WICKSTROM, which nominations were received by the Senate and appeared in the Congressional Record on June 12, 2001.

Army nominations beginning ROBERT E. ELLIOTT and ending PETER G. SMITH, which nominations were received by the Senate and appeared in the Congressional Record on June 18, 2001.

Army nominations beginning BRUCE M. BENNETT and ending GRANT E. ZACHARY

CONGRESSIONAL RECORD—SENATE 12373

JUNE 28, 2001

Jr., which nominations were received by the Senate and appeared in the Congressional Record on June 18, 2001.

Navy nomination of William J. Diehl, which was received by the Senate and appeared in the Congressional Record on May 21, 2001.

Navy nominations beginning James W. Adkisson III and ending Mike Zimmer-MAN, which nominations were received by the Senate and appeared in the Congressional Record on June 21, 2001.

Navy nominations of Christopher M. Rodriquez, which nominations were received by the Senate and appeared in the Congressional Record on June 12, 2001.

Navy nominations beginning Robert T. Banks and ending Carl Zeigler, which nominations were received by the Senate and appeared in the Congressional Record on June 12, 2001.

Maritime Corps nominations of Donald E. Gray Jr., which was received by the Senate and appeared in the Congressional Record on June 12, 2001.

Maritime Corps nominations beginning Jésica L. Acosta and ending Joseph J. Zwiller, which nominations were received by the Senate and appeared in the Congressional Record on June 12, 2001.

By Mr. Inouye for the Committee on Indian Affairs.

Neal A. McCaleb, of Oklahoma, to be an Assistant Secretary of the Interior.

(The above nomination was reported with the recommendation that it be confirmed subject to the nominee’s commitment to respond to the requests to appear and testify before any duly constituted committee on the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. Bingaman (for himself and Mr. Enzi): S. 1118. A bill to amend the Interalmodal Surface Transportation Efficiency Act of 1991 to identify certain routes in New Mexico as part of the Ports-to-Plains Corridor, a high priority corridor on the National Highway System; to the Committee on Commerce, Science, and Transportation.

By Mr. Leahy (for himself), Mr. DeWine, Mr. Daschle, Mr. Cochran, Mrs. Carnahan, Ms. Snowe, and Mr. Johnson: S. 1121. A bill to suspend temporarily the duty on certain R-core transformers; to the Committee on Finance.

By Mr. Torricelli: S. 1122. A bill to amend the Internal Revenue Code of 1986 to provide a refundable credit against tax with respect to education and training of developmentally disabled children; to the Committee on Finance.

By Mr. Feingold (for himself, Mr. Craig, and Mr. Kohl): S. 1123. A bill to amend the Dairy Production Stabilization Act of 1983 to ensure that all participants in the dairy production and research program contribute to the cost of the program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. Thompson: S. 1124. A bill to amend section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 to provide for a user fee to cover the cost of customs inspections at express courier facilities; to the Committee on Finance.

By Mr. McConnell (for himself, Mr. Akaka, Mr. Allard, Mr. Bayh, Mr. Bingaman, Mr. Cleland, Mr. Cochran, Mr. Edwards, Mr. Fitzgerald, Mr. Frank, Mr. Graham, Mr. Helms, Mr. Inhofe, Mr. Jeffords, Mr. Kennedy, Mr. Kerry, Mr. Kohl, Mr. Kyl, Mr. Leahy, Mr. Levin, Mr. Reed, Mr. Smith of Oregon, Mr. Smith of New Hampshire, Mr. Specter, Mr. Torricelli, and Mr. Wyden): S. 1125. A bill to conserve global bear populations by prohibiting the importation, exportation, and interstate trade of bear viscera and items, products, or substances containing, or labeled or advertised as containing, the provision of coverage of outpatient services by prohibiting the importation, exportation, and interstate trade of bear viscera and items, products, or substances containing, or labeled or advertised as containing, bear viscera, and for other purposes; to the Committee on Environment and Public Works.

By Mr. Brownback (for himself and Mr. Enzi): S. 1126. A bill to facilitate the deployment of broadband telecommunications services, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. Brownback (for himself and Mr. Enzi): S. 1127. A bill to stimulate the deployment of advanced telecommunications services in rural areas, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mrs. Clinton: S. 1128. A bill to provide grants for FHA-insured hospitals; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. Warner: S. 1129. A bill to increase the rate of pay for certain offices and positions within the executive and judicial branches of the Government, respectively, and for other purposes; to the Committee on Governmental Affairs.

By Mr. Craig (for himself, Mrs. Feinstein, and Mr. Corzine): S. 1130. A bill to require the Secretary of Energy to develop a plan for a magnetic fusion burning plasma experiment for the purposes of accelerating the scientific understanding and development of fusion as a long term energy source, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. Leahy: S. 1131. A bill to promote economically sound modernization of electric power generation capacity in the United States, to establish requirements to improve the combustion heat rate efficiency of fossil fuel-fired electric utility generating units, to reduce emissions of mercury, carbon dioxide, nitrogen, oxides, and sulfur dioxide, to require that all fossil fuel-fired electric utility generating units operating in the United States meet new sources review requirements, to promote the use of clean coal technologies, and to promote alternative energy and clean energy sources such as solar, wind, biomass, and fuel cells; to the Committee on Finance.

By Mr. Craig: S. 1132. A bill to amend the Federal Food, Drug, and Cosmetic Act relating to the distribution chain of prescription drugs; to the Committee on Health, Education, Labor, and Pensions.

By Mrs. Boxer (for herself, Mrs. Carnahan, and Mr. Bond): S. 1133. A bill to amend title 49, United States Code, to preserve nonstop air service to and from Ronald Reagan Washington National Airport for certain communities in case of airline bankruptcy; to the Committee on Commerce, Science, and Transportation.

By Mr. Lieberman (for himself and Mr. Hatch): S. 1134. A bill to amend the Internal Revenue Code of 1986 to modify the rules applicable to qualified small business stock; to the Committee on Finance.

By Mr. Graham (for himself, Mr. Chafee, Mr. Conrad, Mrs. Lincoln, Mr. Miller, Mr. Rockefeller, Mr. Bingaman, Mr. Kerry, and Mr. Carper): S. 1135. A bill to amend title XVIII of the Social Security Act to provide comprehensive reform of the medicare program, including the provision of coverage of outpatient prescription drugs under such program; to the Committee on Finance.

By Mr. Sarbanes (for himself, Mr. Baucus, Mr. Bayh, Mr. Cleland, Mr. Corzine, Mr. Dodd, Mrs. Feinstein, Mr. Reid, Mr. Schumer, Ms. Snowe, Ms. Stabenow, Mr. Thompson, and Mr. Wyden): S. 1136. A bill to provide for mass transportation in certain Federally owned or managed areas that are open to the general public; to the Committee on Energy and Natural Resources.

By Mr. Harkin (for himself and Mr. Grassley): S. 1137. A bill to direct the Secretary of the Army to convey the military supply storage allocation in Rathbun Lake, Iowa, to the Rathbun Regional Water Association; to the Committee on Environment and Public Works.

ADDITIONAL COSPONSORS

S. 1122

At the request of Mr. Bingaman, the name of the Senator from Arkansas (Mrs. Lincoln) was added as a cosponsor of S. 155, a bill to amend title 5, United States Code, to eliminate an inequity in the applicability of early retirement eligibility requirements to military reserve technicians.

S. 1132

At the request of Mr. Campbell, the name of the Senator from California (Mrs. Feinstein) was added as a cosponsor of S. 212, a bill to amend the Rural Health Care Improvement Act to revise and extend such Act.

S. 280

At the request of Mr. Johnson, the name of the Senator from Michigan
(Mr. LEVIN) was added as a cosponsor of S. 280, a bill to amend the Agriculture Marketing Act of 1966 to require retailers of branded pork, and perishable agricultural commodities to inform consumers, at the final point of sale to consumers, of the country of origin of the commodities.

At the request of Mr. SANTORUM, the name of the Senator from California (Mrs. FEINSTEIN) was added as a cosponsor of S. 592, a bill to amend the Internal Revenue Code of 1986 to create Individual Development Accounts, and for other purposes.

At the request of Ms. COLLINS, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 634, a bill to amend section 2007 of the Social Security Act to provide grant funding for additional Enterprise Communities, and for other purposes.

At the request of Mr. THOMPSON, the names of the Senator from Mississippi (Mr. COCHRAN) and the Senator from Nebraska (Mr. HAGEL) were added as cosponsors of S. 661, a bill to amend the Internal Revenue Code of 1986 to repeal the 4.3-cent motor fuel excise taxes on railroads and inland waterway transportation which remain in the general fund of the Treasury.

At the request of Mr. HATCH, the name of the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 677, a bill to amend the Internal Revenue Code of 1986 to repeal the required use of certain principal repayments on mortgage subsidy bond financing to redeem bonds, to modify the purchase price limitation under mortgage subsidy bond rules based on median family income, and for other purposes.

At the request of Mrs. LINCOLN, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 775, a bill to amend title XVIII of the Social Security Act to permit expansion of medical residency training programs in geriatric medicine and to provide for reimbursement of care coordination and assessment services provided under the Medicare program.

At the request of Mr. HAGEL, the name of the Senator from California (Mrs. FEINSTEIN) was added as a cosponsor of S. 778, a bill to expand the class of beneficiaries who may apply for adjustment of status under section 245(i) of the Immigration and Nationality Act by extending the deadline for classification petition and labor certification filings.

At the request of Mr. DODD, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 814, a bill to establish the Child Care Provider Retention and Development Grant Program and the Child Care Provider Scholarship Program.

At the request of Mr. HATCH, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 818, a bill to amend the Internal Revenue Code of 1986 to provide a long-term capital gains exclusion for individuals, and to reduce the holding period for long-term capital gain treatment to 6 months, and for other purposes.

At the request of Ms. SNOWE, the names of the Senator from Delaware (Mr. CARPER), the Senator from Maryland (Mr. SARBANES), and the Senator from Colorado (Mr. GILLIBRAND) were added as cosponsors of S. 913, a bill to amend title XVIII of the Social Security Act to provide for coverage under the Medicare program of all oral anticancer drugs.

At the request of Mr. DODD, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S. 940, a bill to leave no child behind.

At the request of Mr. NICKLES, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 992, a bill to amend the Internal Revenue Code of 1986 to repeal the provision taxing policy holder dividends of mutual life insurance companies and to repeal the policyholders surplus account provisions.

At the request of Mr. FRIST, the names of the Senator from Utah (Mr. HATCH) and the Senator from Ohio (Mr. DEWINE) were added as cosponsors of S. 1032, a bill to expand assistance to countries seriously affected by HIV/AIDS, malaria, and tuberculosis.

At the request of Mr. HUTCHISON, the names of the Senator from Alaska (Mr. MUKOWSKI) and the Senator from Connecticut (Mr. LIEBERMAN) were added as cosponsors of S. 1037, a bill to amend title 10, United States Code, to authorize disability retirement to be granted posthumously for members of the Armed Forces who die in the line of duty while on active duty, and for other purposes.

At the request of Mr. JEFFORDS, the names of the Senator from Idaho (Mr. CRAIG) and the Senator from Colorado (Mr. ALLARD) were added as cosponsors of S. 1038, a bill to amend the Internal Revenue Code of 1986 to improve access to tax-exempt debt for small nonprofit health care and educational institutions.

At the request of Mr. JOHNSON, his name was added as a cosponsor of S. 1075, a bill to extend and modify the Drug-Free Communities Support Program, to authorize a National Community Drug-Free Coalition Institute, and for other purposes.

At the request of Mr. CONRAD, the names of the Senator from Texas (Mr. GRAMM) and the Senator from Georgia (Mr. MILLER) were added as cosponsors of S. 1087, a bill to amend the Internal Revenue Code of 1986 to provide a shorter recovery period of the depreciation of certain leasehold improvements.

At the request of Mr. HARKIN, the names of the Senator from Florida (Mr. GRAHAM), the Senator from Florida (Mr. NELSON), and the Senator from California (Mrs. BOXER) were added as cosponsors of S. Res. 71, a resolution expressing the sense of the Senate regarding the need to preserve six day mail delivery.

At the request of Mr. CAMPBELL, the names of the Senator from Mississippi (Mr. COCHRAN), the Senator from New Jersey (Mr. CORZINE), the Senator from North Dakota (Mr. DORGAN), the Senator from Illinois (Mr. FITZGERALD), and the Senator from Wyoming (Mr. THOMAS) were added as cosponsors of S. Res. 99, a resolution supporting the goals and ideals of the Olympics.

At the request of Mr. FITZGERALD, the name of the Senator from Georgia (Mr. CLELAND) was added as a cosponsor of S. Con. Res. 45, a concurrent resolution expressing the sense of Congress that the Humane Methods of Slaughter Act of 1958 should be fully enforced so as to prevent needless suffering of animals.

At the request of Mr. CORZINE, the name of the Senator from Hawaii (Mr. AKAKA) was added as a cosponsor of S. Con. Res. 52, a concurrent resolution expressing the sense of Congress that reducing crime in public housing should be a priority, and that the successful Public Housing Drug Elimination Program should be fully funded.

At the request of Mr. SANTORUM, the names of the Senator from New Hampshire (Mr. SMITH) and the Senator from Ohio (Mr. DEWINE) were added as cosponsors of amendment No. 814 proposed to S. 1052, a bill to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage.

At the request of Ms. COLLINS, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of amendment No. 826 proposed to S. 1052, a bill to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage.
In 1998 Congress identified the corridor from the border with Mexico to Denver, CO, as a High Priority Corridor on the National Highway System. Last year, a comprehensive study was undertaken to determine the feasibility of creating a four-lane highway along the corridor. The New Mexico alignment would serve a population of nearly 2 million persons, compared to 1.5 million for the alternative.

The traffic volume in 2025 would be 150 percent higher on the New Mexico corridor than on the alternative, including 25 percent more trucks.

The benefit-to-cost ratio of the New Mexico route was 75 percent better than for the route bypassing New Mexico.

The alternative route had a very slight advantage over the New Mexico alignment only in economic development benefits.

With the feasibility study results now complete, The New Mexico Highway Commission last week voted unanimously to support the designation of the southern leg in the Omnibus Appropriations Act of 2001, though the Congressional designation of the southern route was enacted long before we had the results of the feasibility study. The Texas Transportation Commission is voting today to confirm Congress’ designation of the southern leg.

The studies have now been completed. The results are in. The route south of Amarillo has been set. Congress should now complete the designation of the final leg of the Ports-to-Plains Trade Corridor by passing our bill.

The time to act is now. Once the route is established the States can move forward with their regional and statewide transportation plans, environmental studies, design work, acquisition of rights of way, and initial construction of the most critical segments.

I thank Senator DOMENICI for cosponsoring the bill, and I hope all senators will join us in support of this important legislation.

I ask unanimous consent that a copy of the New Mexico State Highway Commission’s resolution and the text of the bill be printed in the RECORD.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

S. 1118

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. IDENTIFICATION OF PORTS-TO-PLAINS HIGH PRIORITY CORRIDOR ROUTES IN NEW MEXICO AND COLORADO.

Section 1105(c)(38) of the Intermodal Surface Transportation Efficiency Act of 1991
CONGRESSIONAL RECORD—SENATE
June 28, 2001

S. 1119. A bill to require the Secretary of Defense to carry out a study of the extent to the coverage of members of the Selected Reserve of the Ready Reserve of the Armed Forces under health benefits plans and to submit a report on the study of Congress, and for other purposes; to the Committee on Armed Services.

Mr. LEAHY. Mr. President, I rise today to introduce important legislation that will impact the health and readiness of the Selected Reserve. The Selected Reserves includes over 900,000 dedicated men and women divided between the National Guard and the Reserves. Over the past ten years, this force has become increasingly critical to carrying out our Nation’s defense, whether deploying to far-flung regions of the globe or backfilling for other units making those deployments.
The country simply cannot meet its commitments without these proud citizen-soldiers. It follows, then, that steps to increase the readiness of the Selected Reserves will have a positive effect on the readiness of the entire force. It was this goal in mind that I introduce the Health Care for Selected Reserve Act.

This legislation will ensure that all members of the drilling reserves have adequate health insurance. The legislation acknowledges our reserves' continuing contributions to the defense of the Nation and expresses the need for full medical coverage. The legislation will commission an independent study on the extent of insurance shortfalls and examine the feasibility of extending the TRICARE or FEHB program to the reserves.

Currently, when a member of the Selected Reserve goes on active duty over 60 days, they are provided full coverage under the TRICARE Prime program conducted through the active military's medical treatment facilities. But when reservists are not on active duty, they are left to gain insurance through their civilian employers. Like the rest of society, most gain adequate coverage through their employers like the rest of society, but, mirroring broader shortfalls in the wider population, many go without any health coverage at all. This shortfall has an even more noticeable affect on the country because it affects military readiness.

There is also an underlying issue of fairness here. It seems wrong to me that one week someone can be patrolling the skies over Iraq with full coverage and the next week they can have no health coverage at all. That situation gives the impression that the National Guard and the Reserves are the poor relations of the military. We cannot let this continue. If we really believe in the Total Force, we cannot let the members of the Selected Reserve and their families have health care benefits that are adequate—

SEC. 3. STUDY OF HEALTH CARE BENEFITS COVERAGE FOR MEMBERS OF THE SELECTED RESERVE.

(a) REQUIREMENT FOR STUDY.—The Secretary of Defense shall enter into a contract with a federally funded research and development center to carry out a study of the needs of members of the Selected Reserve of the Ready Reserve of the Armed Forces and the member's family for health care benefits and that it can relieve some of the burdens faced today by National Guard

(b) Report.—(1) Not later than March 1, 2002, the Secretary shall submit a report on the results of the study to Congress.

(2) The report shall include the following matters:

(A) Descriptions, and an analysis, of how members of the Selected Reserve and their dependents currently obtain coverage for health care benefits, together with statistics on enrollments in health care benefits plans and covered under each option.

(B) At least three recommended options for Congress to consider. Each should be accompanied by an estimate of the costs of individual coverage and family coverage under each option.

(c) Funding.—The Secretary shall consider an expansion of the TRICARE program or the Federal Employees Health Benefits program to cover the members of the Selected Reserve and their families.

(d) Mr. DASCHLE. Mr. President, today I have presented to Congress a bill that can improve and that can improve readiness; that it can help service members and their families, especially in coping with mobilization; and that it can relieve some of the burdens faced today by National Guard
Congressional Record—Senate
June 28, 2001

12378

employers, particularly small businesses.

This bill lays the groundwork for a solution. S. 1119 would authorize a study by a non-government research center to explore the extent of the problem and recommend at least three cost-effective solutions, including the possibility of opening the TRICARE program or the Federal Employees Health Benefits Program to reservists and their families. The study would look at disruptions to health coverage caused by mobilizations and analyze the likely impact of enhanced health care on recruitment and retention.

We have developed this bill in consultation with the Military Coalition and several of its members. I appreciate their concern for this problem and their work to help develop a solution.

I would particularly like to acknowledge the role of the Enlisted Association of the National Guard of the United States, the Reserve Officers Association, the National Guard Association of the United States, and the Retired Officers Association.

I hope and believe that today's bill introduction can be an important step toward providing adequate health care for members of the South Dakota National Guard and other reservists around the Nation, who do so much on behalf of their communities, their States, and this Nation.

By Mrs. BOXER (for herself and Mr. SMITH of Oregon):

S. 1120. A bill to amend the Foreign Assistance Act of 1961 to increase the authorization of appropriations for fiscal year 2002, and to authorize appropriations for fiscal year 2003, to combat HIV/AIDS and, for other purposes; to the Committee on Foreign Relations.

Mrs. BOXER. Mr. President, this week, as the United Nations meets to prepare a global strategy to combat the growing worldwide HIV-AIDS crisis, I am proud to introduce legislation aimed at ensuring that the United States continues to be a leader in the fight against this deadly disease.

I am pleased to once again join my good friend and colleague from Oregon, Senator SMITH, in support of this bill.

Last year, we teamed up to offer the Global AIDS Prevention Act that doubled funding for the United States Agency for International Development's HIV-AIDS programs. Not only was this legislation included in broader international health legislation which became law, it was also fully funded for the current fiscal year. This year, we are looking to build upon last year's success by again doubling the amount USAID spends on fighting the global HIV-AIDS epidemic.

The Global AIDS Research and Relief Act would authorize $600 million in each of the next two fiscal years. It is designed to complement international HIV-AIDS relief efforts so that a truly global response can be implemented in sub-Saharan Africa, Latin America, Southeast Asia, Russia, and all places where people are suffering from this epidemic.

In the 20 years since AIDS was first recognized, 22 million people worldwide have died from the disease, and 36 million more are living with HIV or AIDS today. Of those living with the disease, 95 percent live in the developing world where advanced technology to combat AIDS is not readily available. It is predicted that AIDS will soon become the deadliest infectious epidemic in world history, surpassing the Plague, which killed an estimated 25 million people.

This new chapter in the AIDS epidemic is especially tragic because its growth is preventable. While there is no cure for this horrible disease, progress is being made. New medical breakthroughs afford HIV-positive people a much greater life expectancy than they had 20 years ago. Unfortunately, these efforts are not reaching the Nations whose people need the help the most. By increasing authorization for USAID to establish and expand these valuable initiatives in developing countries, our bill helps to remedy this disparity in the quality of care.

Specifically, the bill addresses the need for increased voluntary testing and counseling, so that we can educate people and keep its spread in check.

With this funding authorization, the USAID will be able to provide more for the most vulnerable constituencies, children and young adults. The money will be used for drugs like nevirapine, which is given to expectant HIV-positive mothers to prevent the spread of the infection to their unborn children. The United States is a trendsetter in efforts to address the pandemic of HIV-AIDS. Through the work of USAID, we have invested prevention, care, and treatment programs in some of the hardest-hit countries in sub-Saharan Africa. The Centers for Disease Control and Prevention has worked with partners in other countries to expand treatment programs; the Department of Labor, the Department of Agriculture and the Department of Defense are contributing to the effort to end the spread of AIDS.

But far more remains to be done.

I urge my colleagues to support this measure and ask unanimous consent that the text of the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 1120

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Global AIDS Research and Relief Act of 2001".

SEC. 2. DEFINITIONS.

In this Act:

(1) AIDS.—The term "AIDS" means the acquired immunodeficiency syndrome.

(2) Association.—The term "Association" means the International Development Association.

(3) Bank.—The term "Bank" or "World Bank" means the International Bank for Reconstruction and Development.

(4) HIV.—The term "HIV" means the human immunodeficiency virus, the pathogen, which causes AIDS.

(5) HIV/AIDS.—The term "HIV/AIDS" means, with respect to an individual, an individual who is infected with HIV or living with AIDS.

SEC. 3. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress makes the following findings:

(1) According to the Surgeon General of the United States, the epidemic of human immunodeficiency virus/acquired immune deficiency syndrome (HIV/AIDS) will soon become the worst epidemic of infectious disease in recorded history, eclipsing both the bubonic plague of the 1300s and the influenza epidemic of 1918-1919 which killed more than 20,000,000 people worldwide.

According to the United Nations Programme on HIV/AIDS (UNAIDS), more than 36,100,000 people in the world today are living with HIV/AIDS, of which approximately 95 percent live in the developing world.

(3) UNAIDS data shows that among children age 15 and under worldwide, more than 4,300,000 have died from AIDS, more than 1,400,000 are living with the disease; and in 1 year alone—2000—an estimated 600,000 became infected, of which over 90 percent were babies born to HIV-positive women.

(4) Although sub-Saharan Africa has only 10 percent of the world's population, it is home to more than 25,300,000—roughly 70 percent—of the world's HIV/AIDS cases.

(5) Worldwide, there have already been an estimated 21,800,000 deaths because of HIV/AIDS, of which more than 80 percent occur in sub-Saharan Africa, and are thus considered AIDS orphans.

(6) According to UNAIDS, by the end of 1999, 13,200,000 children have lost at least one parent to AIDS, including 12,100,000 children in sub-Saharan Africa, and are thus considered AIDS orphans.

(7) At current infection and growth rates for HIV/AIDS, the National Intelligence Council estimates that the number of AIDS orphans worldwide will increase dramatically, potentially increasing threefold or more in the next 10 years, contributing to economic decay, social fragmentation, and political destabilization in already volatile and strained societies. Children without care or hope are often drawn into prostitution, crime, substance abuse, or child soldiers.

(8) The discovery of a relatively simple and inexpensive means of interrupting the transmission of HIV from an infected mother to the unborn child—namely with nevirapine (NVP), which costs $4 a tablet—has created a great opportunity for an unprecedented partnership between the United States Government and the government of African, and Latin American countries to reduce mother-to-child transmission (also known as "vertical transmission") of HIV.

According to UNAIDS, if implemented this strategy will decrease the proportion of orphans that are HIV-infected and decrease infant and child mortality rates in these developing regions.

(10) A mother-to-child antiretroviral drug program can increase access for members of the South Dakota National Guard and other reservists around the Nation, who do so much on behalf of their communities, their States, and this Nation.

By Mrs. BOXER (for herself and Mr. SMITH of Oregon):

S. 1120. A bill to amend the Foreign Assistance Act of 1961 to increase the authorization of appropriations for fiscal year 2002, and to authorize appropriations for fiscal year 2003, to combat HIV/AIDS, and for other purposes; to the Committee on Foreign Relations.

Mrs. BOXER. Mr. President, this week, as the United Nations meets to prepare a global strategy to combat the growing worldwide HIV-AIDS crisis, I am proud to introduce legislation aimed at ensuring that the United States continues to be a leader in the fight against this deadly disease.

I am pleased to once again join my good friend and colleague from Oregon, Senator SMITH, in support of this bill.

Last year, we teamed up to offer the Global AIDS Prevention Act that doubled funding for the United States Agency for International Development's HIV-AIDS programs. Not only was this legislation included in broader international health legislation which became law, it was also fully funded for the current fiscal year. This year, we are looking to build upon last year's success by again doubling the amount USAID spends on fighting the global HIV-AIDS epidemic.

The Global AIDS Research and Relief Act would authorize $600 million in each of the next two fiscal years. It is designed to complement international HIV-AIDS relief efforts so that a truly global response can be implemented in sub-Saharan Africa, Latin America, Southeast Asia, Russia, and all places where people are suffering from this epidemic.

In the 20 years since AIDS was first recognized, 22 million people worldwide have died from the disease, and 36 million more are living with HIV or AIDS today. Of those living with the disease, 95 percent live in the developing world where advanced technology to combat AIDS is not readily available. It is predicted that AIDS will soon become the deadliest infectious epidemic in world history, surpassing the Plague, which killed an estimated 25 million people.

This new chapter in the AIDS epidemic is especially tragic because its growth is preventable. While there is no cure for this horrible disease, progress is being made. New medical breakthroughs afford HIV-positive people a much greater life expectancy than they had 20 years ago. Unfortunately, these efforts are not reaching the Nations whose people need the help the most. By increasing authorization for USAID to establish and expand these valuable initiatives in developing countries, our bill helps to remedy this disparity in the quality of care.

Specifically, the bill addresses the need for increased voluntary testing and counseling, so that we can educate people and keep its spread in check.

With this funding authorization, the USAID will be able to provide more for the most vulnerable constituencies, children and young adults. The money will be used for drugs like nevirapine, which is given to expectant HIV-positive mothers to prevent the spread of the infection to their unborn children. The United States is a trendsetter in efforts to address the pandemic of HIV-AIDS. Through the work of USAID, we have invested prevention, care, and treatment programs in some of the hardest-hit countries in sub-Saharan Africa. The Centers for Disease Control and Prevention has worked with partners in other countries to expand treatment programs; the Department of Labor, the Department of Agriculture and the Department of Defense are contributing to the effort to end the spread of AIDS.

But far more remains to be done.

I urge my colleagues to support this measure and ask unanimous consent that the text of the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 1120

Be it enacted by the Senate and House of Representaives of the United States of America in Congress assembled,
providing the opportunity and impetus needed to understand the profound stigma associated with HIV-infection and the AIDS disease. Strengthening the health infrastructure to combat the epidemic in developing regions is essential.

(11) A January 2000 United States National Intelligence Estimate (NIE) report on the global infectious disease threat concluded that the economic costs of infectious diseases—especially HIV/AIDS—are already significant and could reduce GDP by as much as 20 percent or more by 2010 in some sub-Saharan African nations.

(12) The HIV/AIDS epidemic is of increasing concern in other regions of the world, with UNAIDS estimating that there are more than 5,800,000 cases in South and Southeast Asia, that the rate of HIV infection in the Caribbean is second only to sub-Saharan Africa, and that the rate in Eastern Europe has doubled in just 2 years in the former Soviet Union.

(13) Russia is the new "hot spot" for the pandemic, as Russian officials are expected to be diagnosed with HIV/AIDS by the end of 2001 than all cases from previous years combined.

(14) Despite the discouraging statistics on the spread of HIV/AIDS, some developing nations—such as Uganda, Senegal, and Thailand—have implemented prevention programs that have substantially reduced the rate of HIV infection.

(15) Accordingly, United States financial support for medical research, education, and disease prevention in developing nations as a global strategy has beneficial ramifications for millions of Americans and their families who are affected by this disease, and the entire population, which is potentially susceptible.

(b) PURPOSES.—The purposes of this Act are to—

(1) help prevent human suffering through the prevention, diagnosis, and treatment of HIV/AIDS; and

(2) help ensure the viability of economic development and stability, and national security in the developing world by advancing research to—

(A) understand the causes associated with HIV/AIDS in developing countries; and

(B) assist in the development of an AIDS vaccine.

SEC. 3. ADDITIONAL ASSISTANCE AUTHORITIES TO COMBAT HIV AND AIDS.

Paragraphs (4) through (6) of section 106(c) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)) are amended to read as follows:

"(4)(A) Congress recognizes the growing international dilemma of children with the human immunodeficiency virus (HIV) and the merits of intervention programs aimed at this problem. Congress further recognizes that mother-to-child transmission prevention strategies can serve as a major force for change in developing regions, and it is, therefore, a major objective of the foreign assistance program to control the acquired immunodeficiency syndrome (AIDS) epidemic.

(B) The agency primarily responsible for administering this part shall—

(i) coordinate with UNAIDS, UNICEF, WHO, national and local governments, other organizations, and other Federal agencies to develop and implement effective programs to prevent transmission of HIV; and

(ii) coordinate with those organizations to increase intervention programs and introduce voluntary counseling and testing, antiretroviral drugs, replacement feeding, and other strategies.

"(6)(A) Congress expects the agency primarily responsible for administering this part to—

(i) provide technical assistance to the states to develop national immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) programs—

(1) that have suffered an increase in the spread of HIV/AIDS; and

(2) that have established programs to address other epidemics—especially HIV/AIDS—such as Uganda, Senegal, and Thailand.

(ii) coordinate with those organizations to increase intervention programs and introduce voluntary counseling and testing, antiretroviral drugs, replacement feeding, and other strategies.

"(B) Assistance described in subparagraph (A) shall include help providing—

(1) information and education;

(2) voluntary testing and counseling;

(3) medications to prevent the transmission of HIV from mother to child;

(4) programs to strengthen and broaden health care systems infrastructure and the capacity of health care systems in developing countries to deliver HIV/AIDS pharmaceuticals, prevention, and treatment to those affected with HIV/AIDS; and

(5) care for those living with HIV or AIDS.

"(6)(A) In addition to amounts otherwise available for such purpose, there is authorized to be appropriated to the President for family planning purposes—

(i) programs to strengthen the capacity of developing countries to deliver comprehensive, coordinated efforts to combat HIV and AIDS.

(iii) medications to prevent the transmission of HIV from mother to child;

(iv) programs to strengthen and broaden health care systems infrastructure and the capacity of health care systems in developing countries to deliver HIV/AIDS pharmaceuticals, prevention, and treatment to those affected with HIV/AIDS; and

(v) care for those living with HIV or AIDS.

"(7)(A) Assistance under this subsection, and assistance made available pursuant to this part of this Act in support of activities described in paragraphs (4) and (5), may be made available to—

(A) direct assistance programs that have been coordinated and approved by the agency primarily responsible for administering this part;

(B) organizations that have applied for and received Federal assistance under this Act to provide care for children who have lost their parents to AIDS orphans and other vulnerable children, and prevention strategies for vertical transmission of HIV/AIDS; and

(C) medical facilities.

"(8)(A) Congress expects the agency primarily responsible for administering this part to make the human immunodeficiency virus (HIV) and the acquired immune deficiency syndrome (AIDS) epidemic a priority in the foreign assistance program and to undertake a comprehensive, coordinated effort to combat HIV and AIDS.

"(9)(A) The agency primarily responsible for administering this Act shall—

(i) provide appropriate training and education on HIV/AIDS to the personnel of the United States government.

(ii) publish a list of approved organizations and programs, including private and voluntary organizations, for-profit organizations, religious affiliated organizations, educational institutions, and research facilities.

(iii) give priority to programs that address the special needs of children, women, and other vulnerable populations.

(iv) programs to strengthen the capacity of developing countries to deliver HIV/AIDS pharmaceuticals, prevention, and treatment to those affected with HIV/AIDS; and

(v) care for those living with HIV or AIDS.

"(10)(A) The United States government and its agencies and instrumentalities shall provide—

(i) the necessary tools, information, and other resources needed to address the problem of children orphaned by AIDS,

(ii) the necessary tools, information, and other resources needed to address the problem of children orphaned by other civil wars and other regions of conflict, and

(iii) the necessary tools, information, and other resources needed to address the problem of children orphaned by civil wars and other regions of conflict.

"(11) A January 2000 United States National Intelligence Estimate (NIE) report on the global infectious disease threat concluded that the economic costs of infectious diseases—especially HIV/AIDS—are already significant and could reduce GDP by as much as 20 percent or more by 2010 in some sub-Saharan African nations.

(12) The HIV/AIDS epidemic is of increasing concern in other regions of the world, with UNAIDS estimating that there are more than 5,800,000 cases in South and Southeast Asia, that the rate of HIV infection in the Caribbean is second only to sub-Saharan Africa, and that the rate in Eastern Europe has doubled in just 2 years in the former Soviet Union.

(13) Russia is the new "hot spot" for the pandemic, as Russian officials are expected to be diagnosed with HIV/AIDS by the end of 2001 than all cases from previous years combined.

(14) Despite the discouraging statistics on the spread of HIV/AIDS, some developing nations—such as Uganda, Senegal, and Thailand—have implemented prevention programs that have substantially reduced the rate of HIV infection.

(15) Accordingly, United States financial support for medical research, education, and disease prevention in developing nations as a global strategy has beneficial ramifications for millions of Americans and their families who are affected by this disease, and the entire population, which is potentially susceptible.

(b) PURPOSES.—The purposes of this Act are to—

(1) help prevent human suffering through the prevention, diagnosis, and treatment of HIV/AIDS; and

(2) help ensure the viability of economic development, stability, and national security in the developing world by advancing research to—

(A) understand the causes associated with HIV/AIDS in developing countries; and

(B) assist in the development of an AIDS vaccine.
The prevalence of HIV/AIDS in the young will have a significant impact on the economies of the world. The pandemic is contributing to economic decay, social fragmentation, and political destabilization in already strained and volatile societies. These factors are of particular concern in South and Southeast Asia, the Caribbean, Eastern Europe, and the former Soviet Union where the pandemic is just beginning to become a problem. It is estimated that there are more than 5.8 million cases in South and Southeast Asia and the rate of HIV infection in the Caribbean is second only to sub-Saharan Africa. Russia is the new “hot spot” for HIV/AIDS. More Russians are expected to be diagnosed with HIV/AIDS by the end of 2001 than all cases from previous years combined. Many of these countries do not yet have prevention, treatment and care programs in place and we must equip our federal agencies with the resources and flexibility needed to address the pandemic in all of these areas.

The United States is seen as a leader in efforts to address the epidemic. We contributed almost $500 million to fight HIV/AIDS in fiscal year 2001. Through programs at the U.S. Agency for International Development, we have instituted prevention, care and treatment programs in some of the worst hit countries in sub-Saharan Africa. At the Centers for Disease Control and Prevention, we have worked with partners in other countries to expand treatment and home-based care programs. Other agencies, including the Department of Labor, the Department of Defense, and the Department of Agriculture, have contributed in their areas of expertise.

This legislation recognizes the growing problems encountered by children around the world and instructs USAID to make it a priority to prevent mother-to-child transmission and orphan programs a major objective of their program. Through coordination with UN agencies, national and local governments, non-governmental organizations and foundations, the U.S. government shall implement effective strategies to prevent vertical transmission of HIV. Further, the bill states that the agency must strengthen and expand all of its primary prevention and education programs.

This bill also calls on USAID to continue to provide support to research that will help the world to understand the causes associated with HIV/AIDS in developing countries and assist in the development of an effective AIDS vaccine.

I believe the “Global AIDS Research and Relief Act of 2001” can make a profound difference in the lives of millions of people facing the HIV/AIDS epidemic. I ask all my colleagues to join us and support this legislation at this critical moment in the spread of the disease.
CONGRESSIONAL RECORD—SENATE

June 28, 2001

SEC. 1. SHORT TITLE.

This Act may be cited as the "Bear Protection Act of 2001.""}

SEC. 2. FINDINGS.

Congress finds that—

(1) all 8 extant species of bear—Asian black bear, brown bear, polar bear, American black bear, spectacled bear, giant panda, sun bear, and sloth bear—are listed on Appendix I of II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (27 UST 1087; TIAS 8249); (2) Article XIV of CITES provides that Parties to CITES may adopt stricter domestic measures regarding the conditions for trade, taking, possession, or transport of species listed on Appendix I or II; and (B) the wild Asian bear population has declined significantly in recent years as a result of habitat loss and poaching due to a strong demand for bear viscera used in traditional medicines and cosmetics; (4) Federal and State undercover operations have revealed that Asian bears have been poached for their viscera; (5) while most American black bear populations are generally stable or increasing, commercial trade could stimulate poaching and threaten certain populations if the demand for bear viscera increases; and (6) prohibitions against the importation into the United States and exportation from the United States, as well as prohibitions against the interstate trade, of bear viscera and products containing, or labeled or advertised as containing, bear viscera will assist in ensuring that the United States does not contribute to the decline of any bear population as a result of the commercial trade in bear viscera.

SEC. 3. PURPOSES.

The purpose of this Act is to ensure the long-term viability of the world’s 8 bear species—by—

(1) prohibiting interstate and international trade in bear viscera and products containing, or labeled or advertised as containing, bear viscera; and (2) encouraging bilateral and multilateral efforts to eliminate such trade; and

I continue to believe that these types of targeted, bipartisan conservation efforts that are rooted in consensus building efforts rather than conflicting politics, can, in the end, make the most noticeable strides toward protecting our national wildlife and environmental treasures.

I ask unanimous consent that the text of the bill be printed in the RECORD, and I further ask unanimous consent that the RECORD include letters of support from the Humane Society of the United States, the Society for Animal Protective Legislation, and the American Zoo and Aquarium Association.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1125

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Bear Protection Act of 2001.""
(3) ensuring that adequate Federal legislation is in place to prevent the spreading of diseases and parasites to domestic or wild bears and other wild animals, and the prevention of illegal trade in bear viscera and products containing, or labeled or advertised as containing, bear viscera.

SEC. 4. DEFINITIONS.

In this Act:

(1) BEAR VISCERA.—The term "bear viscera" means the body fluids or internal organs, including the gallbladder and its contents that are not including the blood or brains, of a species of bear.

(3) IMPORT.—The term "import" means to land, bring into, or introduce into any place subject to the jurisdiction of the United States, regardless of whether the landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(4) PERSON.—The term "person" means—

(A) an individual, corporation, partnership, trust, estate, or other legal or commercial entity;

(B) an officer, employee, agent, department, or instrumentality of—

(i) the Federal Government;

(ii) any State or political subdivision of a State; or

(iii) any foreign government; and

(C) any other entity subject to the jurisdiction of the United States.

(5) SECRETARY.—The term "Secretary" means the Secretary of the Interior.

(6) STATE.—The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, American Samoa, and any possession, territory, commonwealth, or possession of the United States.

(7) TRANSPORT.—The term "transport" means to move, convey, carry, or ship by any means, or to deliver or receive for the purpose of movement, conveyance, carriage, or shipment.

SEC. 5. PROHIBITED ACTS.

(a) In General.—Except as provided in subsection (b), a person shall not—

(1) import into, or export from, the United States bear viscera or any product, item, or substance containing, or labeled or advertised as containing, bear viscera; or

(2) sell or barter, offer to sell or barter, purchase, possess, transport, deliver, or receive, in interstate or foreign commerce, bear viscera or any product, item, or substance containing, or labeled or advertised as containing, bear viscera.

(b) EXCEPTION FOR WILDLIFE LAW ENFORCEMENT PURPOSES.—A person described in section 4(4)(B) may import into, or export from, the United States, or transport between States, bear viscera or any product, item, or substance containing, or labeled or advertised as containing, bear viscera if the importation, exportation, or transportation—

(1) is solely for the purpose of enforcing laws relating to the protection of wildlife; and

(2) is authorized by a valid permit issued under subtitle I or II of CITES in any case in which such a permit is required under CITES.

SEC. 6. PENALTIES AND ENFORCEMENT.

(a) Penalties.—A person that knowingly violates section 5 shall be fined under title 18, United States Code, imprisoned not more than 1 year, or both.

(b) Seizure and forfeiture.—(1) AMOUNT.—A person that knowingly violates section 5 may be assessed a civil penalty by the Secretary of not more than $5,000 for each violation.

(2) MANNER OF ASSESSMENT AND COLLECTION.—A civil penalty under this subsection shall be assessed, and may be collected, in the manner in which a civil penalty under the Internal Revenue Code of 1986 may be assessed and collected under section 6651(a) of that Act (26 U.S.C. 6651(a)).

(3) SIZING AND FORFEITURE.—Any bear viscera or any product, item, or substance imported, exported, sold, bartered, attempted to be imported, exported, sold, or bartered, is a bear, purchased, possessed, transported, delivered, or received in violation of this section (including any regulation issued under this section) shall be seized and forfeited to the United States.

(4) REGULATIONS.—After consultation with the Secretary of the Treasury and the United States Trade Representative, the Secretary shall issue such regulations as are necessary to carry out this section.

(e) PENALTY.—A person that knowingly violates section 5 shall be fined not more than $25,000 for each violation.

(f) USE OF PENALTY AMOUNTS.—Amounts received as penalties, fines, or forfeiture of property under this section shall be used in accordance with section 6(d) of the Lacey Act Amendments of 1981 (16 U.S.C. 3755(d)).

SEC. 7. DISCUSSIONS CONCERNING BEAR CONSERVATION AND THE BEAR PARTS TRADE.

In order to work to establish coordinated efforts with other countries to protect bears, the Secretary shall continue discussions concerning trade in bear viscera with—

(1) the appropriate representatives of Parties to CITES; and

(2) the appropriate representatives of countries that are not parties to CITES and that are determined by the Secretary and the United States Trade Representative to be the leading importers, exporters, or consumers of bear viscera.

SEC. 8. CERTAIN PROVISIONS NOT AFFECTED.

Except as provided in section 5, nothing in this Act affects—

(1) the regulation by any State of the bear population of the State; or

(2) any hunting of bears that is lawful under applicable State law (including regulations).

HSUS STATEMENT IN SUPPORT OF THE BEAR PROTECTION ACT

The Humane Society of the United States, the nation’s largest animal protection organization with over seven million members and constituents, strongly supports Senator McConnell’s Bear Protection Act.

The Bear Protection Act would eliminate the problem of importing illegal bear products into the United States by prohibiting the import, export, and interstate commerce in bear gallbladders and bile. Bears are targeted for their internal organs, which fetch enormous prices on the black market, some kill bears for the profits, and the merchants who sell their organs for use in traditional medicine remain untainted.

The inescapable, growing demand for bear viscera contributed mightily to the decimation of the Asiatic black bear and may do the same to the stable population of American black bears if a law is not passed to eliminate the United States’ role in supplying this devastating bear parts trade.

This is a price on the head of every bear in this country and Senator Mitch McConnell deserves high praise for introducing proactive legislation protecting bears from the growing threat of bear parts trade.

The current patchwork of state laws addressing the trade in bear gallbladders and state laws, replacing it with one national law prohibiting import, export, and interstate commerce in bear viscera.

Bear viscera, particularly the gallbladder and bile, have been traditionally used in Asian medicines to treat a variety of illnesses, from diabetes to heart disease. Today, bear viscera is also used in cosmetics and shampoos. Asian demand for bear viscera and products has grown with lowering human populations and increased wealth. Bear gallbladders in South Korea are worth more than their weight in gold, potentially yielding a price of about $10,000 each.

While demand for bear viscera and products has grown, Asian bear populations have dwindled. Seven of the eight extant species of bears are threatened by poaching to supply the increasing market demand for bear viscera and products. Most species of bears, and all Asian bear species, are afforded the highest level of protection under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES has noted that the continued illegal trade in bear parts and derivatives of bear parts undermines the effectiveness of the Convention and that if CITES parties do not take action to eliminate poaching may cause declines of wild bears that could lead to the extirpation of certain populations or even species.

Dwindling Asian bear populations have caused poachers to look to American bears to meet market demand for bear parts and products. While each year nearly 40,000 American black bears are legally hunted in thirty-six states and Canada, it is estimated that roughly the same number are illegally poached each year, according to a former chief law enforcement officer with the U.S. Fish and Wildlife Service.

The U.S. Senate passed this legislation in the 106th Congress and we hope swift action will be taken again this year. We also hope that the House will follow the Senate’s wise lead and act to protect bears across the globe before it’s too late. The Humane Society of the United States applauds Senator McConnell and the quarter of the United States Senate that has signed onto the Bear Protection Act once again. This bill would end the United States’ involvement in the trade of bear viscera by prohibiting the import, export, and interstate commerce in bear gallbladders and bile. Bears are targeted for their internal organs, which fetch enormous prices on the black market, some kill bears for the profits, and the merchants who sell their organs for use in traditional medicine remain untainted.

BEAR PROTECTION ACT IS URGENTLY NEEDED

The Society for Animal Protective Legislation strongly supports Senator Mitch McConnell in his effort to pass the Bear Protection Act once again. This bill would end the United States’ involvement in the trade of bear viscera by prohibiting the import, export, and interstate commerce in bear gallbladders and bile. Bears are targeted for their internal organs, which fetch enormous prices on the black market, some kill bears for the profits, and the merchants who sell their organs for use in traditional medicine remain untainted.

The inescapable, growing demand for bear viscera contributed mightily to the decimation of the Asiatic black bear and may do the same to the stable population of American black bears if a law is not passed to eliminate the United States’ role in supplying this devastating bear parts trade.

This is a price on the head of every bear in this country and Senator Mitch McConnell deserves high praise for introducing proactive legislation protecting bears from the growing threat of bear parts trade.

The current patchwork of state laws addressing the trade in bear gallbladders and
bile allows an illegal trade to flourish. It is important to recognize that the associated gallbladder of one state’s black bear from another. This enables smugglers to acquire gallbladders illegally in one state, transport them to a second state, where a speciﬁcation that bears in the illegal and immoral activity.

Enactment of Senator McConnell’s Bear Protection Act will ensure that those who seek to proﬁt by the reckless destruction of America’s bears can be punished appropriately for their illegal and immoral activity.

Mr. McConnell’s bill does not impact a state’s ability to manage its resident bear population or a lawful hunter’s ability to hunt bears in accordance with applicable state laws and regulations. The Bear Protection Act is not about bear hunting—it’s about ending bear poaching. This is a laudable goal that all Americans should support.

Mr. McConnell’s bill does not impact a state’s ability to manage its resident bear population or a lawful hunter’s ability to hunt bears in accordance with applicable state laws and regulations. The Bear Protection Act is not about bear hunting—it’s about ending bear poaching. This is a laudable goal that all Americans should support.

American citizens should not sit by helplessly while bears are slaughtered, their gallbladders ripped out and the carcasses unceremoniously left to rot. It’s time to take a stand against bear poachers and profiteers. Congratulations to Senator McConnell for taking up the charge.

DEAR SENATOR MCCONNELL: I am writing on behalf of the 196 accredited members of the American Zoo and Aquarium Association (AZA) in support of your proposed Bear Protection Act of 2001.

AZA institutions draw over 135 million visitors annually and have more than 5 million zoo and aquarium members who provide almost $100 million in support. Collectively, these zoos and aquariums provide more than 1.3 million education programs each year in living classrooms, dedicate over $50 million annually to education programs, invest over $50 million annually to science and support over 1,300 ﬁeld conservation and research projects in 90 countries.

In addition, AZA member institutions have established the Species Survival Plan (SSP) program—a long-term plan involving genetically diverse breeding, habitat preservation, public education, ﬁeld conservation and support research to ensure survival for many threatened and endangered species. Currently, AZA member institutions are involved in 96 different SSP programs throughout the world, including four species of bear—sloth, sun, spectacled and the giant panda.

It is in this context that AZA expresses its support for the Bear Protection Act. There is little question that most populations of the world’s eight bear species have experienced signiﬁcant declines during this century, particularly in Europe and Asia. Habitat loss has been the major reason for this decline, although overhunting and poaching have also been factors in some cases, especially in Asia. In recent years, the commercial trade of bear body parts, in particular gallbladders and bile, for use in traditional Asian medicines has been implicated as the driving force behind the illegal hunting of some bear populations. Analyses by the US Fish and Wildlife Service (USFWS), TRAF-

Congressional Record—Senate 12383

Senators McConnell (for himself and Mr. Enzi):

S. 1126. A bill to facilitate the deployment of broadband telecommunications services, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BROWNBACK (for himself and Mr. Enzi):

S. 1127. A bill to stimulate the deployment of advanced telecommunications services in rural areas, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BROWNBACK, Mr. President, next week our nation will celebrate Independence Day. Yet, as we celebrate the land of opportunity that is America, we must keep in mind those who, even in this great nation, do not have the same access as everyone else. In rural communities across the nation, an entire segment of our population does not have the opportunity to access powerful broadband communications services representing the high-speed, high-capacity on-ramps to the information super highway. Why? Because for all intents and purposes broadband does not exist in most of rural America.

Broadband is increasing the speeds and capacity with which consumers access the Internet, and opening up a whole new world of information, e-commerce, real-time high quality telemedicine, distance learning, and entertainment. The power of broadband will level the playing field between rural and urban communities in a global economy.

Today I rise to introduce the Rural Broadband Deployment Act of 2001 and the Broadband Deployment and Competition Enhancement Act of 2001. Two bills designed to ensure that all Americans have access to the advantages of broadband connections. I would like to thank my colleague from Wyoming, Senator Enzi, for his cosponsorship and support. These two bills, together or individually, will ensure broadband deployment in our nation’s rural areas, and will enable us to renew our longstanding commitment that rural communities have access to the same telecommunications resources as urban communities.

My singular objective, in both bills, is high-speed Internet access for everybody in America by 2007.

This is a bipartisan objective. The Democratic Party has announced its intention to ensure universal access to broadband by the end of this decade. I commend my colleagues on the other side of the aisle for their recognition of the importance of broadband and I look forward to working with them to achieve our common goal.

New approaches will be needed to achieve universal broadband availability. Some of my colleagues have introduced legislation consisting of tax incentives or loan subsidies. Programs such as these can help to deliver on the commitment to make broadband universally available, but these proposals alone will not achieve that goal. Deregulation has a key role to play in this effort.

Deregulation has been the driver of broadband deployment to date: cable companies, largely deregulated by the 1996 Telecommunications Act, have invested almost 50 billion dollars in upgrades to their networks. These upgrades have in turn enabled them to deploy broadband, and cable companies now serve 70 percent of the broadband market. Satellite companies, also regulated in the broadband market, are deploying one-way high-speed Internet access and are working to deploy two-way broadband services. Some companies are utilizing wireless cable licenses to deploy broadband, and they too are deregulated in the broadband market.

Deregulation is a powerful motivator for the deployment of new technologies and services. Unregulated small cable companies, and all but unregulated rural and small telephone companies are taking advantage of their regulatory status to deliver broadband to rural consumers.
The broadband market, distinct from the local telephone market, is new. Yet, federal and State regulators are placing tremendous economic incentives on broadband-specific facilities deployed by incumbent local exchange carriers. ILECs, the only regulated broadband service providers, as if they were part and parcel of their local telephone service. This is simply not the case. The local telephone market is not synonymous with the broadband market. The disparate regulatory treatment of phone companies deploying broadband and all other broadband service providers is serving to deny broadband to many rural communities.

Broadband facilities being deployed by ILECs throughout our cities and towns require billions of dollars of capital in new infrastructure that must be added to the existing telephone network. The sparse populations of rural communities already diminish the return on infrastructure investment so that, when combined with local market regulations, ILEC broadband deployment has not proven to be cost effective.

As a result, rural telephone exchanges owned by regulated telephone companies are not being upgraded for broadband services even while unregulated companies seem to be capable of making that substantial investment. In Wellington, Kansas, a rural community with around 10,000 residents, a small unregulated cable company called Sumner Cable has deployed broadband service. Yet, Southwestern Bell, the local regulated telephone company and a Bell operating company, is not deploying broadband. Different regulatory treatments of these companies under the incumbent local exchange carrier approach make it easier for one to deploy broadband, but not the other. This is being seen throughout our nation’s rural communities, and is particularly disappointing. The Bell operating companies serve approximately 65 percent of rural telephone lines like those found in Wellington.

Broadband is certainly being deployed at a much faster rate in urban markets than rural markets. But that does not mean all is well in our nation’s cities. Today, broadband deployment in urban markets is being characterized by the market dominance of the cable TV industry, unregulated in the broadband market, which serves approximately 70 percent of all broadband subscribers. This is good for consumers. Cable companies have taken full advantage of their deregulated status, and the inherent economic incentives, to deploy new technologies and provide new services to consumers. But while the cable industry finishes rebuilding its entire infrastructure with digital technology that permits it to offer broadband, ILECs are, in many instances, not making the same investment to rebuild their infrastructure.

The Rural Broadband Deployment Act of 2001 is a more geographically limited approach to spurring broadband deployment. It includes broader deregulation of ILEC broadband services, but limits that deregulation only to rural communities. By ramping up the deregulation, yet restricting the size of the market where that deregulation is applied, it is my intention to create the same balance of requirements that I previously mentioned.

I realize that introducing two pieces of legislation on the same issue on the same day is a bit unorthodox. But given the clear need and importance of universal broadband, I feel it is my duty to do anything I can to move this debate forward. Providing alternatives to the limited approach of my colleagues is part of this process.

I urge my colleagues to give consideration to either of these bills, and I urge your cosponsorship.

Mr. ENZI. Mr. President, I rise as an original cosponsor of Senator BROWNBACK’s Broadband Deployment and Competition Enhancement Act of 2001. I thank my colleague from Kansas for drafting this innovative legislation to help solve the problem of the lack of availability of advanced telecommunications services in rural areas.

Telecommunications has come a long way from the days of the party line and operator assisted calls. Telecommunications services have allowed entrepreneurs to start businesses anywhere they can get a dial tone and have helped to bring jobs to rural America. I have been working to encourage more infrastructure development as a way of creating a business environment that will attract new jobs to the places that need them.

The 20th Century has seen the economy of the United States and the world change from an industrial economy to an information economy. We are only at the beginning of the “Information Revolution” and now is the best time for private industry and government to take a pro-active role in helping to create the business and regulatory conditions necessary to encourage the widespread deployment of advanced telecommunications services.

Since 1995, the State of Wyoming has been attempting to create a competitive local phone market that would have a multitude of competitors and lower rates. Providing service in Wyoming is significantly higher than in other areas of the Nation due to our low population and long distances between towns. This has caused many companies to pass Wyoming by in search of easier profits in urban areas and leave many of our towns with only one choice for broadband service, if they have a provider at all.

One of the reasons why advanced services have been slowly deployed is that Wyoming’s rural areas make the telecommunications needs of our residents very different than people in urban areas. The economic model of the industry is to serve areas with a high population density in order to keep costs low. In the West, it’s harder to make that model work, but the independent telephone companies, Qwest and the cable companies are working hard to offer their customers a full complement of services at a reasonable price. The urban telephone customers take for granted. High speed Internet access has been delayed for two reasons, cost and availability. Advanced telecommunications...
services can help to build Wyoming’s economy. Companies are beginning to realize that our State has a ready work force and the lower costs of doing business are making companies choose Wyoming. Many existing businesses are taking advantage of the Internet to bring their products and services to the world. Where once a store was limited to only being able to serve those within driving distance of it, now it can bring Wyoming to the world. This cannot take place without the continued roll out of broadband business services.

Wyoming has for many years been promoting the benefits of telecommuting. People living around the State have been able to connect to their office via computer and remain in contact with clients. Telecommuting now requires high speed access and that is available and economical throughout the entire State. In other areas, the only data access is via a regular dial-up modem. There are companies that are deploying digital subscriber lines and cable modems, but those locations are limited and the price is too high to be adopted by a majority of Wyoming residents. Over time that price will come down, but this is not a call for public subsidies or government mandates, but a call for more competition and deregulation. Competition will bring lower prices and greater deployment of services to even the smallest of towns.

That is why I am an original cosponsor of Senator Brownback’s bill. His bill creates a deregulatory regime that is backed by specific performance requirements and strong enforcement provisions.

The bill requires Incumbent Local Exchange Carriers, ILEC’s, to be able to provide advanced services to all of its customers within 5 years of the enactment of this legislation in order to receive the benefits of deregulation. This ensures that companies will bring advanced services and competition to rural areas by giving a hard deadline for companies to complete their buildout.

Advanced services would be deregulated by exempting them from the requirements that ILECs make packet switching and fiber available to competitors at below cost rates. This would specifically exempt interstate services that makes it possible to provide advanced services over traditional phone lines. The bill also exempts fiber optic lines owned by ILECs from below cost pricing if the fiber is deployed either to the home or in areas that never had telephone infrastructure before. I believe that this will be key to making the economics of rural advanced services more favorable for companies wanting to invest in rural broadband deployment.

The bill would also give ILECs the necessary pricing flexibility for their broadband services. I believe that we should not hamstring a new technology in a very competitive marketplace with outdated regulations on price. It is important that Congress ensure that in addition to the wholesale pricing relief contained in this legislation, it also includes retail pricing flexibility to further make the economics more favorable.

The bill does not change the requirements that ILECs allow competitors to collocate their equipment in an ILEC facility. Collocation is very important since it ensures that competitors have access to the network and do not have to build distant links or other connections to the ILEC network.

The bill also does not eliminate the requirement that ILECs give competitors access to local loops. In fact, if an ILEC does not grant a competitor access to local lines the bill gives states the right to strip the ILEC of the deregulatory benefits contained in the bill.

The bill’s enforcement provisions are very strong and explicit. If a company does not meet the build-out requirements or cannot collocate and/or grant competitors access to local loops, state regulators have the authority to return an ILEC to the old regulatory regime. Deregulation without proper enforcement mechanisms does not benefit consumers and competitors. It is important that we hold ILECs accountable if they are granted relief from the pricing requirements.

I have been working with my colleagues to create a mix of deregulation and incentives to encourage private infrastructure development. Government cannot force private firms to make unprofitable investments, but government can work to make investments in rural infrastructure more favorable.

The Broadband Deployment and Competition Investment Act helps to make investment in advanced services in rural areas possible.

The great strides made by both Qwest, the smaller phone companies and the cooperatives show that rural areas can support fiber optic based services. The Wyoming Equality Network, the fiber based network linking all of Wyoming’s high schools, has been a great advancement for education and I applaud the State’s foresight for undertaking such a far reaching project. The WEN has had the added effect of showing other companies that it is possible to link rural areas with fiber, bringing high speed data services and other advanced services to homes and businesses.

I am pleased to see that Qwest and several smaller companies have worked together to close the inter-office fiber loop, linking all local phone exchanges with a fiber optic connection. This will allow for greater capacity and new services like DSL and other high speed broadband services. This connection will help many areas of Wyoming overcome many of the service problems they have been experiencing for the last several years.

The objective of telecommunications policy should be to bring as many players into the marketplace and allow them to compete in the marketplace. Congress should not tie a company’s hands in a continually changing and competitive marketplace. We should ensure that all parties are on a level playing field and that all services are regulated in the same manner regardless of the company that is offering the service or the technology they are using. This legislation will help bring some needed consistency to the regulation of advanced services and I urge my colleagues to support this vital legislation.

By Mr. WARNER:

S. 1129. A bill to increase the rate of pay for certain offices and positions within the executive and judicial branches of the Government, respectively, and for other purposes; to the Committee on Governmental Affairs.

Mr. WARNER. Mr. President, I am pleased to introduce legislation today to provide relief from the pay compression affecting career Federal employees serving in the Senior Executive Service, SES. It is nearing a decade since Senior Executive Service members have seen a meaningful adjustment in pay.

The salaries earned by these employees are, on average, well below those earned by their peers in private industry. Pay caps for the Senior Executive Service and certain other positions in the government are tied to the Executive Schedule which includes senior level officials as well as Members. Pay finishes at a position just above the Senior Executive Service. The Executive Schedule in five of the past eight years has resulted in pay compression so severe that 60 percent of the entire executive corps earns essentially the same salary despite differences in obligation and executive level. Over the past eight years, pay increases for these executives would average 1 percent per year. There is not much of an incentive to accept a higher position with added responsibilities and increased work hours for little or no increase in pay.

Many senior executives leave Federal service to begin second careers in the private sector because of the salary compression. Others find that retirement is a more sensible option, whereas Federal annuitants receive an average two and a half percent cost of living adjustment every year compared to the average one percent per year pay increase a senior executive may receive if she or he remained in Federal service.

I have heard from many SES employees relating their own stories as to how the problem of pay compression has affected them. I would like to share a few of these personal accounts.
From an ES-6 with the Department of Defense: “My pay has been capped and I have not been receiving raises for years. This year I received a surprise. I turned 55 and I subsequently experienced a $115.16 decrease in pay in January because my life insurance increased considerably, along with the contribution to retirement increase. Age 55 is not old! I expect to work a few more years and I expect my pay to increase so that I can enjoy my retired years with a reasonable retirement income that has not been eroded by the pay cap.”

A Senior Executive at the Department of Health and Human Services: “The highest career Deputy General Counsel position in my agency became vacant, and I was called by the General Counsel to seriously consider taking it. Aside from the many family issues involved, career, where I am fairly compensated for my efforts, an overriding aspect is the fact that I am already at the pay cap. Thus, a move into a position with more responsibility would provide no financial incentive. Although I’m obviously not in government for any huge financial rewards, I don’t want to go backward financially. Thus, I have decided to forgo this very challenging opportunity that would be a fitting pinnacle to my career with the Federal Government.”

Private Contractor, Department of Defense: “I turned down a job at the US Nuclear Command and Control System Support Staff, where I’d been stationed on active duty as a Regular Air Force Officer. I retired from the NSSS four years ago after over 23 years in the Air Force, and was honored to get offered a Civil Service position back at the office. Instead, I reluctantly turned down the job. The reason was primarily money. I wanted to take it, but would have been necessary to give up part of my Air Force retirement pay because I retired as a regular officer. To make matters worse, my pay would have been capped. The bottom line is I would have taken a pay cut with no prospect of a pay raise in the foreseeable future. My family and I were asked to sacrifice pay and time together which we willingly did for over 23 years. Instead, I’m supporting the government in the role of a private contractor, where I’m fairly compensated for my expertise.”

These are just a few examples which illustrate how the freeze on executive pay and resulting pay compression have seriously eroded the government’s ability to attract and retain the most highly-competent career executives. This is a very timely issue for the Federal Government, seventy percent of the SES corps is eligible to retire over the next four years and almost half are expected to retire upon eligibility. Agencies are being forced to make special requests to increase salaries for their managers and supervisors. They recognize that when someone leaves Federal service, their knowledge and experience goes with them.

The legislation I am introducing increases base pay for Senior Executives from Executive Level IV to Executive Level III, extends locality pay to the Executive Schedule, increases the locality cap from Executive Level III to Executive Level III plus an additional pay, and increases the overall limit on compensation that can be received in a single year by career executives from Executive Level I to the Vice-Presidential level. The bill also includes certain positions in the Federal judiciary which have been impacted by the pay caps. The actual raises career executives would receive would continue to be determined at the President’s discretion. The legislation does not, in and of itself, raise senior executive pay and does not affect the salaries of Members of Congress.

It is also my intention to ensure that this issue remains a priority for the incoming Director at the Office of Personnel Management. During the confirmation hearing before the Senate Governmental Affairs Committee last week for Mrs. Kay Coles James, President Bush’s nominee to head the Office of Personnel Management, Mrs. James indicated her willingness to work with Members to address the problem of pay compression.

Pay compression within the Senior Executives Service is one of the more pressing issues facing the Federal employee workforce and must be addressed as the situation will only get worse. The only means to alleviate pay compression for the Senior Executives at this time is through legislation. Therefore, I encourage my Senate colleagues to support the bill.

I ask you to understand that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1129
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PROVISIONS RELATING TO CERTAIN OFFICES AND POSITIONS WITHIN THE EXECUTIVE BRANCH.
(a) EXECUTIVE SCHEDULE PAY RATES.—(1) In general.—Section 5318 of title 5, United States Code, is amended—

(A) by redesignating subsection (a) as subsection (a)(1) and subsection (b) as paragraph (2); and

(B) by adding at the end the following:

“(b)(1) Effective at the beginning of the first applicable pay period commencing on or after the first day of the month in which an adjustment takes effect under section 5303 in the rates of basic pay under the General Schedule, each rate of basic pay for contract appeals board members shall be adjusted by an amount determined by the President to be appropriate.”

(2) LIMITATION ON CERTAIN PAYMENTS.—Section 5372a of title 5, United States Code, is amended—

(A) in subsection (b)(2) by striking “97 percent of the rate under paragraph (1)” and inserting “less than 97 percent of the rate under paragraph (1)”;

(B) in subsection (b)(3) by striking “94 percent of the rate under paragraph (1)” and inserting “less than 94 percent of the rate under paragraph (1)”;

(C) by adding at the end the following:

“(d) Subject to subsection (a) effective at the beginning of the first applicable pay period commencing on or after the first day of the month in which an adjustment takes effect under section 5303 in the rates of basic pay under the General Schedule, each rate of basic pay for contract appeals board members shall be adjusted by an amount determined by the President to be appropriate.”

(3) CONFORMING AMENDMENTS.—Section 5318 of title 5, United States Code, is amended—

(A) in the first sentence of subsection (a)(1) and (a)(2) by inserting—

(i) by striking “Subject to subsection (b),”;

(ii) by inserting “Subject to paragraph (2);”;

and

(B) by inserting “exclusive of any previous adjustment under subsection (b)” after “Executive Schedule”; and

(C) in subsection (a)(2) as redesignated by striking “subject to subsection (a)” and inserting “paragraph (1)”; and

(b) AMENDMENTS RELATING TO CERTAIN LIMITATION AND OTHER PROVISIONS.

(1) PROVISIONS TO BE APPLIED BY EXCLUDING EXECUTIVE SCHEDULE COMPAREABILITY ADJUSTMENT.—Sections 5303(f), 5304(h)(1)(F), 5306(e), and 5372a of title 5, United States Code, are each amended by inserting “exclusive of any adjustment under section 5318(b)” after “Executive Schedule”.

(2) LIMITATION ON CERTAIN PAYMENTS.—Section 5303(f)(7)(A) of title 5, United States Code, is amended by adding at the end the following:

“(3) In the case of an employee who is receiving basic pay under section 5372a, 5376, or 5382, paragraph (1) shall apply substituting ‘the rate of salary of the Vice President of the United States’ for the ‘annual rate of basic pay payable for level 1 of the Executive Schedule’; and paragraph (2) may extend the application of the preceding sentence to other equivalent categories of employees.”

CONGRESSIONAL RECORD—SENATE June 28, 2001
United States Code, are each amended by striking “level IV” each place it appears and inserting “level III”.

SEC. 2. PROVISIONS RELATING TO CERTAIN OFFICES AND POSITIONS WITHIN THE UNITED STATES COURTS.

(a) INCREASE IN MAXIMUM RATES OF BASIC PAY ALLOWABLE.—

(1) FOR POSITIONS COVERED BY SECTION 603(a)(1) OF TITLE 28, UNITED STATES CODE.—Section 606(a)(5) of title 28, United States Code, is amended by striking “by law” and inserting “by law (except that the rate of basic pay for an employee in a judicial branch position may not exceed the rate for level IV of the Executive Schedule)”.

(b) SALARY OF THE DIRECTOR OF THE ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS.—

(A) IN GENERAL.—Section 332(b)(1) of title 28, United States Code, is amended by striking “level IV of the Executive Schedule pay rates under section 5315” and inserting “level III of the Executive Schedule pay rates under section 5314”.

(c) FOR PERSONNEL OF THE ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS.—

(A) IN GENERAL.—Section 606 of title 28, United States Code, is amended by striking “level IV of the Executive Schedule under section 5315” and inserting “level III of the Executive Schedule under section 5314”.

(B) SALARY OF THE DIRECTOR OF THE ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS.—Section 603 of title 28, United States Code, is amended by striking “level IV” each place it appears and inserting “level III”.

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall be effective on and after the date of enactment of this Act.

By Mr. CRAIG (for himself, Mrs. FEINSTEIN, and Mr. CORZINE):

S. 1130. A bill to require the Secretary of Energy to develop a plan for a magnetic fusion burning plasma experiment for the purpose of accelerating the scientific understanding and development of fusion as a long-term energy source, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. CRAIG. Mr. President, today I am introducing a bill of great significance to our energy future, the Fusion Energy Sciences Act of 2001. I am especially pleased that my colleague from California, Senator FEINSTEIN, is joining me as the primary cosponsor of this legislation. This bill is designed to strengthen the fusion program at the Department of Energy and to accelerate planning for the next major step in fusion energy science development.

In recent months, the news has been dominated by energy concerns. Although there may be differences of opinion about the causes of our current energy problems and what the appropriate solutions might be, there is general agreement that energy forms a vital link to our economic prosperity and provides the means by which the conduct of our daily lives is made easier and more comfortable. While we grapple with these ideas, we need to stay focused on long term investment in those endeavors which have the potential to help secure our energy future. I believe that fusion energy has that potential.

Fusion is the natural process that powers the sun and the stars. At its most basic, it is the combining or fusion of two small atoms into a larger atom. When two atomic nuclei fuse, tremendous amounts of energy are released. If we can achieve this joining of atoms, and successfully contain and harness the energy produced, fusion will be close to an ideal energy source. It produces no air pollutants because the byproduct of the reaction is helium. It is safe, hydrogen, is practically unlimited and easily obtained.

In the technical community, the debate over the scientific feasibility of fusion energy is now over. During the past decade, significant advances in fusion science have been made in the laboratory setting. I am proud to note that some of this underlying scientific work has been conducted at the Idaho National Engineering and Environmental Laboratory in my State, which has been selected by the Department of Energy to lead efforts on fusion safety.

Although certain scientific questions remain, the primary outstanding issue about fusion energy at this point is whether fusion energy can make the challenging step from the laboratory into a practical energy resource. Achieving this goal will require high quality science, innovative research and international collaboration. It may be possible to accelerate this process. In addition to these steps, continued investment in a strong underlying program of fusion science and plasma physics will still be necessary.

Therefore, this bill instructs the Secretary of Energy to transmit to the Congress by July 1, 2001 a plan for a “burning plasma” experiment, which is the next necessary step towards the eventual realization of practical fusion energy. At a minimum, the Secretary must submit a plan for a domestic U.S. experiment, but may also submit a plan for U.S. involvement in an international burning plasma experiment if such involvement is cost effective and has equivalent scientific benefits to a domestic experiment. The bill also requires that within six months of the enactment, the Secretary of Energy shall submit a plan to Congress to ensure a strong scientific base for the fusion energy sciences program. Finally, for ongoing activities in the Department of Energy’s fusion energy sciences program and for the purpose of preparing the plans called for, the bill authorizes $320,000,000 in fiscal year 2002 and $335,000,000 in fiscal year 2003.

As we suffer through near term challenges in the energy sector and meeting our immediate needs, it is more crucial than ever that we invest in those items that hold the promise for long term solutions. Recent accomplishments in the laboratory demonstrate that fusion energy has this potential.

The Congress finds that—

(1) economic prosperity is closely linked to an affordable and ample energy supply;

(2) environmental quality is closely linked to energy production;

(3) population, worldwide economic development, energy consumption, and stress on the environment are all expected to increase substantially in the coming decades;

(4) the few energy options with the potential to meet economic and environmental needs for the long-term future must be pursued aggressively now, as part of a balanced national energy plan;

(5) fusion energy is a long-term energy solution that is expected to be environmentally benign, safe, and economical, and to use a fuel source that is practically unlimited;

(6) the National Academy of Sciences, the President’s Committee of Advisors on Science and Technology, and the Secretary of Energy Advisory Board have recently reviewed the Fusion Energy Sciences Program and each strongly supports the fundamental science and creative innovation of the program, and has confirmed that progress toward the goal of producing practical fusion energy has been excellent;

(7) each of these reviews stressed the need for the Fusion Energy Sciences Program to move forward to a magnetic fusion burning plasma experiment with the potential of producing substantial fusion power output and providing key information for the advancement of fusion science;

(8) the National Academy of Sciences has also called for a broadening of the Fusion Energy Sciences Program research base as a...
means to more fully integrate the fusion science community into the broader scientific community; and

(9) the Fusion Energy Sciences Program budget is inadequate to support the necessary infrastructure for the present generation of experiments, and cannot accommodate the cost of a burning plasma experiment constructed by the United States, or even the cost of key participation by the United States in an international effort.

SEC. 3. PLAN FOR FUSION EXPERIMENT.

(a) PLAN FOR UNITED STATES FUSION EXPERIMENT.—In consultation with FESAC, the Secretary shall develop and transmit to the Congress a plan for the purpose of ensuring a strong scientific base for the fusion energy research and development described in subsection (a) shall prescribe in subsection (a) shall—

(1) address key burning plasma physics issues; and

(2) include specific information on the scientific capabilities of the proposed experiment, the relevance of these capabilities to the goal of practical fusion energy, and the overall design of the experiment including its estimated cost and potential construction sites.

(b) REQUIREMENTS OF PLAN.—The plan described in subsection (a) shall—

(1) address key burning plasma physics issues; and

(2) include specific information on the scientific capabilities of the proposed experiment, the relevance of these capabilities to the goal of practical fusion energy, and the overall design of the experiment including its estimated cost and potential construction sites.

(c) UNITED STATES PARTICIPATION IN AN INTERNATIONAL EXPERIMENT.—(1) Address key burning plasma physics issues; and

(2) include specific information on the scientific capabilities of the proposed experiment, the relevance of these capabilities to the goal of practical fusion energy, and the overall design of the experiment including its estimated cost and potential construction sites.

SEC. 5. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary for the development and review of the plans described in this Act and for activities of the Fusion Energy Sciences Program $320,000,000 for fiscal year 2002 and $355,000,000 for fiscal year 2003.

Mrs. FEINSTEIN. Mr. President, I rise today to join my colleague, Senator Larry Craig, in introducing this legislation to accelerate the development of fusion energy as a practical and realistic alternative to fossil fuels for our nation's energy needs.

I would also like to commend my colleagues, Senator John Ensign, and Representative GOLDFERN, who introduced the “Fusion Energy Sciences Act of 2001” on the House side as H.R. 1781.

Since the beginning of the Manhattan Project, scientists have been trying to harness energy from fusion to produce electricity. This legislation will help the scientific community expedite the development of fusion as a viable option for our energy needs.

To help fusion science move from the lab to the grid, this bill fast-tracks a key experimental fusion project. This bill also authorizes $320 million for Fiscal Year 2002 and $335 million for Fiscal Year 2003 to speed up fusion's current estimated 45-year implementation timetable.

I have spoken frequently to my colleagues on California's current energy situation.

Last week the Department of Energy predicted the State will suffer from around 110 hours of rolling blackouts this summer. Experts say $21.8 billion of economic output will be lost and over 135,000 workers will lose their jobs because of this summer's blackouts.

I will continue to try to help California and the rest of the West in the short-term using blackouts, blackouts are less frequent, lowering electricity costs on the wholesale market, keeping natural gas prices reasonable, and bringing in new supplies of power online are the key objectives I have been working toward to bring stability to the Western Electric Market.

While I work on the short-term problems in California, I join my colleague from Idaho on this bill to develop a key long-term solution to our current energy problems.

As world populations grow, it is no secret that fossil fuels are finite and polluting. Beyond expanding renewable energy sources, the energy from the sun and the wind, fusion holds a great deal of potential to expand our nation's energy supply.

Fusion is a safe, almost inexhaustible energy source with major environmental advantages. As a co-sponsor of this legislation, I hope to see fusion move quickly from an experiment in the lab to a reality for our homes and businesses.

We have already succeeded in using scientific advancements to harness energy occurring elsewhere on our planet. Solar panels collect the sun's rays to heat pools and power homes. Windmills transfer nature's gusts into electrical currents. Water running from mountain tops to the sea can produce significant amounts of hydroelectric power.

And now, with fusion energy, we will be able to harness the power of the stars to create an almost unlimited and clean form of energy.

Fusion energy is the result of two small hydrogen atoms combining into a larger atom. The energy released from this fusion of the atoms can be harnessed to generate electricity.

Unlike nuclear power, which uses radioactive materials for fuel, fusion uses hydrogen from water. Unlike fossil fuels, which pollute the air when burned, the only byproduct in a hydrogen fusion reaction is helium, an element already plentiful in the air.

Besides being environmentally benign, fusion is a practically unlimited fuel source. In fact, scientists predict that using 1 gallon of sea water, fusion can yield the energy produced from 300 gallons of gasoline. And with fusion, 50 cups of sea water can be the energy equivalent of 2 tons of coal.

Fusion energy has proven to be a practical energy endeavor, worthy of more investment for research and development. So just where do we go from here? How do we harness the power of the stars?

A 1999 review by the Department of Energy's task force on Fusion Energy concluded: one, substantial scientific progress has been made in the science of fusion energy; two, the budget for fusion research needs to grow; and three, a burning plasma experiment needs to be carried out.

To expedite the use of fusion to meet our energy needs, we need to strengthen the efforts already underway in fusion research and development and create new programs financed by the government.

Scientists agree that at current funding levels, fusion is approximately 45 years away from entering the market place as a viable energy source.

This timeline is a three step process in which the scientific community can: first, carry out a burning plasma experiment; second, build a fusion energy test facility; and third,
establish a fusion demonstration plant to generate electricity.

Since practical fusion energy generation technology remains elusive from real implementation, the first thing we can do is fund the development of a burning plasma experiment.

This legislation will ensure this project will happen soon, carried out either by the scientific community in the United States, or in collaboration with an international effort. The bill requires the Secretary of Energy to develop a plan by 2004 for a magnetic fusion burning plasma experiment.

It is important to point out that this bill adds the burning plasma experiment in addition to, and not at the expense of, other ongoing projects.

The goal of fusion energy is to create a continually burning fuel like a fire refueling itself. Developing a magnetic fusion plasma experiment will help the scientific community demonstrate how the heat from the fusion reaction can maintain the reaction as a self-generating fuel. Strong magnetic fields allow the plasma to be heated to high temperatures for fusion.

This legislation will help the scientific community overcome the key stumbling block to fusion development. By authorizing $320 million for Fiscal Year 2002 and $335 for Fiscal Year 2003 the fusion plasma experiment will be carried out and fusion funding that peaked in the 1970s, but has since tapered off, will be restored.

Let me just take a moment to mention where this funding is going, because it is particularly important for me to point this out.

Annual Federal funding for fusion energy has averaged around $230 million in the last few years. In Fiscal Year 2001, Congress appropriated $218.49 million for fusion.

This money has provided approximately 1,100 jobs in California at the following U.S. Fusion Program Participant locations: UC Davis, UC Berkeley, Stanford, UCLA, UC Santa Barbara, Cal Tech, UC San Diego, UC Irvine, Occidental College, Lawrence Livermore National Lab, Sandia National Lab, Stanford Linear Accelerator Center, Lawrence Berkeley National Lab, TSI Research Inc. and General Atomics.

Despite all of these expenditures at these facilities and others, the Fusion Energy Science Advisory Committee has concluded that lack of funding is hindering the technological advance towards fusion energy development. And the Department of Energy’s task force on Fusion Energy has concluded that, “In light of the promise of fusion,” funding remains “subcritical.”

Currently, the international community is outpacing us on the road to realizing the impressive benefits of this new energy resource. The Japanese budget for this type of research is about 1.5 times that of the U.S., and the European budget is about 3 times greater.

It is critical that we be the leader in the renewable energy resources sector. I urge my colleagues to join Senator Clinton Clinton and me in supporting fusion energy as a clean, safe, and abundant energy source for our Nation’s long-term energy supply.

By Mr. LEAHY:
S. 1131. A bill to promote economically sound modernization of electric power generation capacity in the United States, to establish requirements to improve the combustion heat rate efficiency of fossil fuel-fired electric utility generating units, to reduce emissions of mercury, carbon dioxide, nitrogen, oxides, and sulfur dioxide, to require that all fossil fuel-fired electric utility generating units operating in the United States meet access review requirements, to promote the use of clean coal technologies, and to promote alternative energy and clean energy sources such as solar, wind, biomass, and fuel cells; to the Committee on Finance.

Mr. LEAHY. Mr. President, the Administration finally released its National Energy Policy last month. As I noted at the time, I have serious concerns about several of its recommendations, not the least of which was its proposal to build 1,500 to 1,900 new electric power plants many of them burning relatively dirty fossil fuels, while, at the same time, questioning the enforcement of clean air laws that protect the public from excess power plant emissions.

Today, fossil fuel-fired power plants constitute the largest source of air pollution in the United States. Every year, they collectively emit approximately 2.2 billion tons of carbon dioxide, 13 million tons of acid rain-producing sulfur dioxide, 7 million tons of acid rain- and smog-producing nitrogen oxides, and 43 tons of highly toxic mercury.

How could pollutants still be dumped into our atmosphere at this scale? One reason that cannot be ignored is that more than 75 percent of the fossil-fuel fired power plants in the United States are still “grandfathered,” or exempt from modern Clean Air Act standards. When the Clean Air Act and its amendments were passed, Congress assumed that old, 1950’s era power plants would be retired over time and replaced by newer, cleaner plants within 30 years. They were not. Unfortunately, utilities have kept these inefficient, pollution-prone power plants on line because they are inexpensive. These grandfathered plants continue to burn cheap fuel and refuse to invest in emissions control technologies that protect air quality.

The continuing harm to our atmosphere, lands, waters, State economies, and public health by excess power plant emissions is well documented. In my home state of Vermont, acid deposition caused by emissions of sulfur dioxide and nitrogen oxide has scarred our forests and poisoned our streams. Migrating for Vermont the acid deposition that nationwide advisories against fish consumption are necessary to protect citizens. Emissions of greenhouse gas threaten to negatively change the climate, the source of Vermont maple syrup and other economic Vermont crops. And despite Vermont’s tough air laws and small population, out-of-state particulates and smog lower our air quality, endanger our health, and ruin views of our Green Mountains.

Earlier this year, I co-sponsored bipartisan legislation, the “Clean Power Act of 2001,” that strictly capped national power plant emissions and ended by more than 1 million tons. To promote rapid and reliable changes in the utility industry, that legislation also gave utilities the regulatory tools needed to make those changes with incentives for free market trading of emissions credits, a so-called “cap-and-trade” mechanism. I remain a supporter of the Clean Power Act of 2001 and hope it becomes key to energy policy negotiations in Congress. However, I believe we can do even more.

So today I am introducing a second piece of legislation covering power plant emissions that I also intend to promote during the energy debate. The “Clean Power Plant and Modernization Act of 2001” again strictly caps emissions and ends the “grandfather” loophole on old plants. Instead of providing utilities the incentive of free market trading, however, my bill creates strong financial incentives, in the form of accelerated tax depreciation, for older utilities that cut emissions and, in the case of their plants to 50 percent efficiency. With current average energy efficiency of U.S. power plants at only 33 percent, this bill is another proposal that protects the environment and public health while providing the energy industry with a comprehensive and predictable set of long-term regulatory requirements.

Under this bill, mercury emissions would be cut by 90 percent, annual emissions of sulfur dioxide would be cut by more than 10 million tons, and Phase II Clean Air Act Amendments requirements, and nitrogen oxide emissions would be cut by more than 3 million tons per year beyond Phase II requirements. This bill would also prevent at least 650 million tons of carbon dioxide emissions per year.

And this bill goes beyond emissions caps and transition incentives to recognize the emergence of energy technologies that are more environmentally friendly. It provides substantial funding for research, development, and commercial demonstrations of renewable and clean energy technologies such as solar, wind, biomass,
CONGRESSIONAL RECORD—SENATE  June 28, 2001

S. 1131

Be it enacted by the Senate and House of Representa-
tives of the United States of America in Congress assembled,

SEC. 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Clean Power Plant and Modernization Act of 2001." (b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

Sec. 1. Title; table of contents.
Sec. 2. Definitions.
Sec. 5. Air emission standards for fossil fuel-fired generating units.
Sec. 8. Clean Air Trust Fund.
Sec. 9. Accelerated depreciation for inves-
tor-owned generating units.
Sec. 10. Grants for publicly owned gener-
ating units.
Sec. 11. Recognition of permanent emission reduc-
tions in future climate change implementation pro-
grams.
Sec. 12. Renewable and clean power genera-
cation.
Sec. 13. Clean coal, advanced gas turbine, and combined heat and power demonstration program.
Sec. 15. Assistance for workers adversely af-
fected by reduced consumption of coal.
Sec. 16. Community economic development incentives for communities ad-
versely affected by reduced con-
sumption of coal.
Sec. 17. Carbon sequestration.
Sec. 18. Atmospheric monitoring.

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) the United States is relying increas-
ingly on old, needlessly inefficient, and high-
ly polluting power plants to provide elec-
tricity; and
(2) the pollution from those power plants causes a wide range of health and environ-
mental damage, including—

(A) fine particulate matter that is associ-
ated with the deaths of approximately 50,000 Americans annually;
(B) urban ozone, commonly known as "smog," that impairs normal respiratory functions and is of special concern to indi-
viduals afflicted with asthma, emphysema, and other respiratory ailments;
(C) acid deposition that damages estuaries, lakes, rivers, and streams (and the plants and animals that depend on them for sur-
vival) and leaches heavy metals from the soil;
(E) mercury and heavy metal contamina-
tion that renders fish unsafe to eat, with es-
pecially serious consequences for pregnant women and their fetuses;
(F) eutrophication of estuaries, lakes, riv-
ers, and streams; and
(G) global climate change that may funda-
mentally and irreversibly alter human, anima-
and plant life;

(3) tax laws and environmental laws—

(b) SEC. 17. Carbon sequestration.

(1) economic development incentives for communities ad-
versely affected by reduced consumption of coal.
(2) study to assess the potential for carbon sequestration in the United States.

(2) found that—

(1) the United States is relying increas-
ingly on old, needlessly inefficient, and high-
ly polluting power plants to provide elec-
tricity; and
(2) the pollution from those power plants causes a wide range of health and environ-
mental damage, including—

(A) fine particulate matter that is associ-
ated with the deaths of approximately 50,000 Americans annually;
(B) urban ozone, commonly known as "smog, that impairs normal respiratory functions and is of special concern to indi-
viduals afflicted with asthma, emphysema, and other respiratory ailments;
(C) acid deposition that damages estuaries, lakes, rivers, and streams (and the plants and animals that depend on them for sur-
vival) and leaches heavy metals from the soil;
CONGRESSIONAL RECORD—SENATE

June 28, 2001

(A) ingestion of breast milk;
(B) ingestion of drinking water, and foods other than fish, that are contaminated with methylmercury; and
(C) dermal uptake through contact with soil and water;
(15) the report entitled “Mercury Study Report to Congress” and submitted by the Environmental Protection Agency under section 122(b)(1)(B) of the Clean Air Act (42 U.S.C. 7412(n)(1)(B)), in conjunction with other scientific knowledge, supports a plausible link between mercury emissions from combustion of coal and other fossil fuels and mercury concentrations in air, soil, water, and sediments;
(16)(A) the Environmental Protection Agency report described in paragraph (15) supports a plausible link between mercury emissions from combustion of coal and other fossil fuels and methylmercury concentrations in freshwater fish;
(B) in 2000, 41 States issued health advisories that warned the public about consuming methylated fish, as compared to 27 States that issued such advisories in 1993; and
(C) the number of mercury advisories nationwide increased from 899 in 1993 to 2,242 in 2000, an increase of 149 percent;
(17) pollution from power plants can be reduced through adoption of modern technologies and practices, including—
(A) methods ofcombusting coal that are intrinsically more efficient and less polluting, such as pressurized fluidized bed combustion and an integrated gasification combined cycle system;
(B) methods ofcombusting cleaner fuels, such as gases from fossil and biological resources, and combined cycle turbines;
(C) treating flue gases through application of pollution controls;
(D) methods ofextracting energy from natural, renewable resources of energy, such as solar and wind resources;
(E) methods ofproducing electricity and thermal energy from fuels without conventional combustion, such as fuel cells; and
(F) combined heat and power methods ofextracting and using heat that would otherwise be wasted, for the purpose of heating or cooling office buildings, providing steam to processing facilities, or otherwise increasing total efficiency;
(18) installing the technologies and practices described in paragraph (17) would increase competitiveness and productivity, secure employment, save lives, and preserve the future;
(19) accurate, long-term, nationwide monitoring of atmospheric acid and mercury deposition is essential for—
(A) determining deposition trends;
(B) evaluating the local and regional transport of emissions; and
(C) assessing the impact of emission reductions.
(b) PURPOSES.—The purposes of this Act are—
(1) to protect and preserve the environment while safeguarding health by ensuring that each fossil fuel-fired generating unit minimizes air pollution to levels that are technologically feasible through modernization and application of pollution controls;
(2) to greatly reduce the quantities ofmercury, carbon dioxide, sulfur dioxide, and nitrogen oxides entering the environment from combustion of fossil fuels;
(3) to permanently reduce emissions of those pollutants by increasing the combustion heat rate efficiency of fossil fuel-fired generating units to levels achievable through—
(A) use ofcommercially available combustor technologies, including clean coal technologies such as pressurized fluidized bed combustion and an integrated gasification combined cycle system;
(B) installation ofpollution controls;
(C) increasing the use of renewable and clean energy sources such as biomass, geothermal, solar, wind, and fuel cells; and
(D) promotion of application of combined heat and power technologies;
(4)(A) to achieve and maintain, at all operating levels, a combustion heat rate efficiency of not less than 90 percent (based on the higher heating value of the fuel),
(B) FUTURE GENERATING UNITS.—Each fossil fuel-fired generating unit that commences operation more than 10 years after the date of enactment of this Act shall achieve and maintain, at all operating levels, a combustion heat rate efficiency of not less than 50 percent (based on the higher heating value of the fuel), unless granted a waiver under subsection (d).
(b) TEST METHODS.—Not later than 2 years after the date of enactment of this Act, the Administrator, in consultation with the Secretary of Energy, shall promulgate methods for determining initial and continuing compliance with this section.
(c) PERMIT REQUIREMENT.—Not later than 10 years after the date of enactment of this Act, each generating unit shall have a permit issued under title V of the Clean Air Act (42 U.S.C. 7661 et seq.) that requires compliance with this section.
(d) WAIVER OF COMBUSTION HEAT RATE EFFICIENCY STANDARD.—
(1) APPLICATION.—The owner or operator of a generating unit that commences operation more than 10 years after the date of enactment of this Act may apply to the Administrator for a waiver of the combustion heat rate efficiency standard specified in subsection (a)(2) that is applicable to that type of generating unit.
(2) ISSUANCE.—The Administrator may grant the waiver only if—
(A)(i) the owner or operator of the generating unit demonstrates that the technology to meet the combustion heat rate efficiency standard is not commercially available at the time of the request; or
(ii) the owner or operator of the generating unit demonstrates that, despite best technical efforts and willingness to make the necessary level of financial commitment, the combustion heat rate efficiency standard is not achievable at the generating unit; and
(B) the owner or operator of the generating unit enters into an agreement with the Administrator to offset by a factor of 1.5 to 1, using a method approved by the Administrator, the emission reductions that the generating unit does not achieve because of the failure to achieve the combustion heat rate efficiency standard specified in subsection (a)(2).
(e) EFFECT OF WAIVER.—If the Administrator grants a waiver under paragraph (1), the generating unit shall be required to achieve and maintain, at all operating levels, the combustion heat rate efficiency standard specified in subsection (a)(1).

SEC. 5. AIR EMISSION STANDARDS FOR FOSSIL FUEL-FIRED GENERATING UNITS.

(a) ALL FOSSIL FUEL-FIRED GENERATING UNITS.—
(1) IN GENERAL.—Not later than 10 years after the date of enactment of this Act, each fossil fuel-fired generating unit, regardless of its date of construction, or commencement of operation, shall be subject to, and operating in physical and operational compliance with, the new source review requirements under section 111 of the Clean Air Act (42 U.S.C. 7411).
(b) EMISSION RATES FOR SOURCES REQUIRED TO ACHIEVE 50 PERCENT EMISSION reductions.—Not later than 10 years after the date of enactment of this Act, each fossil fuel-fired generating unit subject to section 4(a)(1) shall be in compliance with the following emission limitations:
(1) MERCURY.—Each coal-fired or fuel oil-fired generating unit shall be required to reduce the maximum concentration of the mercury contained in the fuel, calculated in accordance with subsection (e).
(2) Carbon dioxide.—
   (A) Domestic—Fossil fuel-fired generating units.—Each natural gas-fired generating unit shall be required to achieve an emission rate of not more than 0.9 pounds of carbon dioxide per kilowatt hour of net electric power output.
   (B) Fuel oil-fired generating units.—Each fuel oil-fired generating unit shall be required to achieve an emission rate of not more than 1.3 pounds of carbon dioxide per kilowatt hour of net electric power output.
   (C) Coal-fired generating units.—Each coal-fired generating unit shall be required to achieve an emission rate of not more than 1.5 pounds of carbon dioxide per kilowatt hour of net electric power output.

(3) Sulfur dioxide.—Each fossil fuel-fired generating unit shall be required—
   (A) to remove 95 percent of the sulfur dioxide that would otherwise be present in the flue gas; and
   (B) to achieve an emission rate of not more than 0.3 pounds of sulfur dioxide per million British thermal units of fuel consumed.

(4) Nitrogen oxides.—Each fossil fuel-fired generating unit shall be required—
   (A) to remove 90 percent of nitrogen oxides that would otherwise be present in the flue gas; and
   (B) to achieve an emission rate of not more than 0.15 pounds of nitrogen oxides per million British thermal units of fuel consumed.

(5) Particulate matter.—Each coal-fired generating unit shall be required—
   (A) to remove 95 percent of the particulate matter that would otherwise be present in the flue gas; and
   (B) to achieve an emission rate of not more than 0.3 pounds of particulate matter per million British thermal units of fuel consumed.

(f) Disposal of mercury captured or recovered through emission controls.—
   (1) IN GENERAL.—The Administrator shall promulgate regulations to ensure that mercury that is captured or recovered from a generating unit is disposed of in a manner that ensures that—
      (A) the contents from mercury are not transferred from 1 environmental medium to another; and
      (B) there is no release of mercury into the environment.
   (2) MERCURY-CONTAINING SLUDGES AND WASTES.—The regulations promulgated by the Administrator under paragraph (1) shall ensure that mercury-containing sludges and wastes are handled and disposed of in accordance with all applicable Federal and State laws (including regulations).
   (3) PUBLIC REPORTING OF FACILITY-SPECIFIC EMISSION DATA.—
      (A) IN GENERAL.—The Administrator shall annually make available to the public, through 1 or more published reports and the Internet, facility-specific emission data for each generating unit and for each pollutant covered by section 111 of the Clean Air Act (42 U.S.C. 7411). The public data shall be made available in a manner that ensures that—
         (i) each owner or operator of each covered fossil fuel-fired generating unit which—
           (I) is powered by fossil fuels;
           (II) has a generating capacity of 5 or more megawatts; and
           (III) because of the date on which the generating unit commenced commercial operation, is not subject to all regulations promulgated under section 111 of the Clean Air Act (42 U.S.C. 7411); or
         (ii) who shall certify the accuracy of the report.
      (B) IN GENERAL.—Not less often than quarterly, the responsible official of the generating unit, on a regular basis (but not less often than once every 3 years), shall submit to the Secretary, in consultation with the Administrator, a report concerning the level of emissions by the generating unit for each pollutant covered by this section and for each pollutant covered by section 111 of the Clean Air Act (42 U.S.C. 7411).
   (4) DISPOSAL OF MERCURY CAPTURED OR RECOVERED THROUGH EMISSION CONTROLS.—
      (1) CAPTURED OR RECOVERED MERCURY.—Not later than 2 years after the date of enactment of this Act, the Administrator shall promulgate regulations to ensure that mercury that is captured or recovered from a generating unit is disposed of in a manner that ensures that—
         (i) the contents from mercury are not transferred from 1 environmental medium to another; and
         (ii) there is no release of mercury into the environment.
      (2) SOURCES OF DATA.—The data collected under subsection (e) shall be used by the Administrator, in consultation with the Secretary, to calculate the tax imposed under subsection (f).

(g) Adjustment of rates.—Not less often than once every 2 years beginning after December 31, 2005, the Secretary shall evaluate the rate of the tax imposed under subsection (f) and its application, and adjust such rate (if necessary) for any succeeding calendar year to ensure that the Clean Air Trust Fund established by section 9511 has sufficient amounts to fully fund the activities described in section 9511(c).

(h) Payment of tax.—The tax imposed by this section shall be paid quarterly by the owner or operator of each covered fossil fuel-fired generating unit.

(i) Covered fossil fuel-fired generating unit.—The term ‘covered fossil fuel-fired generating unit’ means an electric utility generating unit which—
   (1) is powered by fossil fuels;
   (2) has a generating capacity of 5 or more megawatts; and
   (3) because of the date on which the generating unit commenced commercial operation, is not subject to all regulations promulgated under section 111 of the Clean Air Act (42 U.S.C. 7411).
SEC. 8. CLEAN AIR TRUST FUND.
(a) In General.—Section 8 of chapter A of chapter 98 of the Internal Revenue Code of 1986 (relating to unit trusts) is amended by inserting the following at the end of such section:

"SEC. 901. CLEAN AIR TRUST FUND.
"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Clean Air Trust Fund' consisting of amounts appropriated or credited to the Trust Fund as provided in this Act or section 6709A(a) of such Act."

(b) TRANSFERS TO TRUST FUND.—There are hereby appropriated to the Trust Fund amounts equivalent to the taxes received in the Treasury under section 6709A of the Internal Revenue Code of 1986.

(c) EXPENDITURES FROM TRUST FUND.—Amounts in the Trust Fund shall be available, without further Act of appropriation, upon request from the head of the appropriate Federal agency in such amounts as the agency head determines are necessary—

(1) for transfers to the program established under section 13 of the Energy Policy Act of 2001, as in effect on the date of enactment of this section;

(2) for transfers to the demonstration program under section 15 of such Act, as so in effect;

(3) to provide assistance under section 15 of such Act, as so in effect;

(4) to provide assistance under section 16 of such Act, as so in effect;

(5) to provide funding under section 17 of such Act, as so in effect.

(d) RECORDING AMENDMENT.—The table of sections for such subchapter A is amended by adding at the end the following:

"Sec. 901. Clean Air Trust Fund."

SEC. 9. ACCELERATED DEPRECIATION FOR INVESTMENT IN 50-PERCENT EFFICIENT GENERATING UNITS.
(a) In General.—Section 166(c)(3) of the Internal Revenue Code of 1986 (relating to definition of certain property) is amended—

(1) in subparagraph (E) (relating to 15-year property), by striking "and" at the end of the clause and inserting "and", and by adding at the end of such clause—

"(ii) any 45 percent efficient fossil fuel-fired generating unit;

(2) by adding at the end the following:

"(F) 12-YEAR PROPERTY.—The term '12-year property' includes any 50 percent efficient fossil-fueled generating unit."

(b) DEFINITIONS.—Section 166(h) of the Internal Revenue Code of 1986 (relating to definitions and special rules) is amended by adding at the end the following:

"(15) Fossil fuel-fired generating units.—

(A) 50 PERCENT EFFICIENT Fossil FUEL-FIRED GENERATING UNITS.—The term '50 percent efficient fossil fuel-fired generating unit' means any property used in an investor-owned fossil-fueled generating unit pursuant to a plan approved by the Secretary, in consultation with the Administrator of the Environmental Protection Agency, to place into service such a unit which is in compliance with sections 4(a)(1) and 5(b) of such Act, as so in effect.

(B) CONFORMING AMENDMENT.—The table contained in section 168(c) of the Internal Revenue Code of 1986 (relating to applicable percentage) is amended by inserting after the item relating to 10-year property the following:

"12-year property .......... 12%.

(c) EFFECTIVE DATE.—The amendments made by this section apply to property used after the date of enactment of this Act.

SEC. 10. GRANTS FOR PUBLICLY OWNED GENERATING UNITS.
Any capital expenditure made after the date of enactment of this Act to purchase, install, and bring into commercial operation any new publicly owned generating unit that—

(1) is in compliance with sections 4(a)(1) and 5(b) for a 15-year period, be eligible for partial reimbursement through annual grants made by the Secretary of the Treasury, in consultation with the Administrator, in an amount equal to the monetary value of the depreciation deduction that would be realized by a taxpayer by virtue of section 168(c)(2) of the Internal Revenue Code of 1986 by a similarly-situated investor-owned generating unit over that period; and

(2) is in compliance with sections 4(a)(2) and 5(c) for a 12-year period, be eligible for partial reimbursement through annual grants made by the Secretary of the Treasury, in consultation with the Administrator, in an amount equal to the monetary value of the depreciation deduction that would be realized by reason of section 168(c)(3) of such Code by a similarly-situated investor-owned generating unit over that period.

SEC. 11. RECOGNITION OF PERMANENT EMISSION REDUCTIONS IN FUTURE CLIMATE CHANGE IMPLEMENTATION PROGRAMS.
It is the sense of Congress that—

(1) permanent reductions in emissions of carbon dioxide and nitrogen oxides that are accomplished through the retirement of old generating units and replacement by new generating units that meet the combustion heat rate efficiency and emission standards specified in this Act, or through replacement of old generating units with noncoincident renewable power generation technologies, should be credited to the utility sector, and to the owner or operator that retires or replaces the old generating unit, in any climate change implementation program enacted by Congress;

(2) the base year for calculating reductions under a program described in paragraph (1) should be the calendar year preceding the calendar year in which this Act is enacted; and

(3) a reasonable portion of any monetary value that may accrue from the crediting described in paragraph (1) should be passed on to utility customers.

SEC. 12. RENEWABLE AND CLEAN POWER GENERATION TECHNOLOGIES.
(a) In General.—Under the Renewable Energy and Energy Efficiency Act of 1989 (22 U.S.C. 12001 et seq.), the Secretary of Energy shall fund research and development programs and commercial demonstration projects and partnerships to demonstrate the technical, financial, and environmental benefits of solar power generation from—

(1) biomass (excluding unsequestered municipal solid waste), geothermal, solar, and wind technologies; and

(2) fuel cells.

(b) TYPES OF PROJECTS.—Demonstration projects may include solar power tower plants, solar dishes and engines, co-firing of biomass with coal, biomass modular systems, next-generation wind turbines and wind farms, next-generation combined gasification and fuel cells.

(c) AUTHORIZATION OF APPROPRIATIONS.—In addition to amounts made available under other laws, there is authorized to be appropriated to carry out this section $675,000,000 for each of fiscal years 2003 through 2012.

SEC. 13. CLEAN COAL, ADVANCED GAS TURBINE, AND COMBINED HEAT AND POWER DEMONSTRATION PROGRAM.
(a) In General.—Under subtitle B of title XXI of the Energy Policy Act of 1992 (42 U.S.C. 13471 et seq.), the Department of Energy shall create a program to fund projects and demonstration projects and partnerships designed to demonstrate the efficiency and environmental benefits of electric power generation from—

(1) clean coal technologies, such as pressurized fluidized bed combustion and integrated gasification combined cycle system;

(2) advanced gas turbine technologies, such as flexible fueled gas turbines and base-load utility scale application;

(3) combined heat and power technologies.

(b) SELECTION CRITERIA.—(1) In General.—Not more than 1 year after the date of enactment of this Act, the Secretary of Energy shall promulgate criteria and procedures for selection of demonstration projects and partnerships to be funded under subsection (a).

(2) REQUIRED CRITERIA.—At a minimum, the selection criteria shall include—

(A) the potential of a proposed demonstration project or partnership to reduce or avoid emissions of pollutants covered by section 5 and air pollutants covered by section 111 of the Clean Air Act (42 U.S.C. 7411); and

(B) the potential commercial viability of the proposed demonstration project or partnership.

(c) AUTHORIZATION OF APPROPRIATIONS.—(1) In General.—In addition to amounts made available under any other law, there is authorized to be appropriated to carry out this section $75,000,000 for each of fiscal years 2003 through 2012.

(2) DISTRIBUTION.—The Secretary shall make reasonable efforts to ensure that, under a program established under this section, the same amount of funding is provided for demonstration projects and partnerships under each of paragraphs (1), (2), and (3) of subsection (a).

SEC. 14. EVALUATION OF IMPLEMENTATION OF THIS ACT AND OTHER STATUTES.
(a) In General.—Not later than 2 years after the date of enactment of this Act, the Secretary of Energy, in consultation with the Chairman of the Federal Energy Regulatory Commission, and the Administrator, shall submit to Congress a report on the implementation of this Act.

(c) RECOMMENDATIONS.—The report shall include recommendations from the Secretary of Energy, the Chairman of the Federal Energy Regulatory Commission, and the

CONGRESSIONAL RECORD—SENATE

12393
Administrator for legislative or administrative measures to harmonize and streamline the statutes specified in subsection (b) and the regulations implementing those statutes.

SEC. 15. ASSISTANCE FOR WORKERS ADVERSELY AFFECTED BY REDUCED CONSUMPTION OF COAL.

In addition to amounts made available under any other law, there is authorized to be appropriated $75,000,000 for each of fiscal years 2003 through 2015 to provide assistance, under the economic dislocation and worker adjustment assistance program of the Department of Labor authorized by title III of the Job Training Partnership Act (29 U.S.C. 1651 et seq.), to coal industry workers who are terminated from employment as a result of reduced consumption of coal by the electric power generation industry.

SEC. 16. COMMUNITY ECONOMIC DEVELOPMENT INCENTIVES FOR COMMUNITIES ADVERSELY AFFECTED BY REDUCED CONSUMPTION OF COAL.

In addition to amounts made available under any other law, there is authorized to be appropriated $30,000,000 to carry out soil restoration, tree planting, wetland protection, and other development activities in basic and applied research projects.

SEC. 17. CARBON SEQUESTRATION.

(a) CARBON SEQUESTRATION STRATEGY.—In addition to amounts made available under any other law, there is authorized to be appropriated $400,000 to the Environmental Protection Agency and the Department of Energy for each of fiscal years 2003 through 2005 a total of $15,000,000 to conduct research and development activities in basic and applied science in support of development by September 30, 2005, of a carbon sequestration strategy that is designed to offset all growth in carbon dioxide emissions in the United States after 2010.

(b) METHODS FOR BIOLOGICALLY SEQUES- TRATING DIOXIDE.—In addition to amounts made available under any other law, there is authorized to be appropriated $400,000 to the United States Geological Survey and $100,000 to the National Oceanic and Atmospheric Administration for each of fiscal years 2003 through 2005 to conduct research and development of processes for the immobilization of carbon dioxide.

(c) LIMITATION.—A project carried out using funds made available under this section shall not be used to offset any emission reduction required under any other provision of this Act.

SEC. 18. ATMOSPHERIC MONITORING.

(a) ORGANIZATIONAL SUPPORT.—In addition to amounts made available under any other law, there is authorized to be appropriated $30,000,000 to the National Oceanic and Atmospheric Administration for each of fiscal years 2003 through 2005 to conduct research and development of processes under Section 111 of the Clean Air Act.

(b) METHODS FOR BIOLOGICALLY SEQUES- TRATING DIOXIDE.—In addition to amounts made available under any other law, there is authorized to be appropriated $100,000 to the Department of Labor authorized by title III of the Job Training Partnership Act (29 U.S.C. 1651 et seq.), to coal industry workers who are terminated from employment as a result of reduced consumption of coal by the electric power generation industry.

Trends Network—Atmospheric Deposition Program National Trends Network $2,500,000 to the Environmental Protection Agency; and

(b) MODERNIZATION.—In addition to amounts made available under any other law, there are authorized to be appropriated—

(1) for equipment and site modernization of the National Atmospheric Deposition Program National Trends Network $5,000,000 to the Environmental Protection Agency;

(2) for equipment modernization and network expansion of the National Atmospheric Deposition Program Mercury Deposition Network $2,000,000 to the Environmental Protection Agency;

(3) for equipment and site modernization and network expansion of the National Atmospheric Deposition Program Atmospheric Integrated Research Monitoring Network $1,000,000 to the National Oceanic and Atmospheric Administration; and

(4) for equipment and site modernization and network expansion of the National Atmospheric Deposition Program Atmospheric Power Plant and Modernization Act of 2001

WHAT WILL THE CLEAN POWER PLANT AND MODERNIZATION ACT OF 2001 DO?

The Clean Power Plant and Modernization Act of 2001 has three main objectives: it is designed to be a balanced and comprehensive strategy to reduce carbon dioxide emissions, accelerate the use of renewable energy, and encourage energy efficiency improvements.

The bill includes a number of incentives to encourage the use of renewable energy sources, such as wind, solar, and biomass, and carbon sequestration projects.

Section 6. Extension of Renewable Energy Production Credit

Section 6(c) of the Internal Revenue Code of 1986 is amended to extend the production tax credit for renewable energy production through 2015. This credit is currently set to expire in 2007.

Section 7. Megawatt-Hour Generation Fees and Section 8, Clean Air Trust Fund

To offset the impact to the Treasury of the incentives in Sections 9 and 10, the bill establishes the Clean Air Trust Fund. The Trust Fund is similar to other Superfund Trust Funds created during the period.

The Trust Fund will also be used to pay for actions that are adversely affected by reduced consumption of coal, as well as research and development for renewable power generation technologies (e.g., wind, solar, and biomass), and carbon sequestration projects.

Section 9. Accelerated Depreciation for Investor-Owned Generating Units

Under the Internal Revenue Code of 1986, utilities can depreciate their generating units placed in service over a period of 20 years. Section 9 amends Section 168 of the Internal Revenue Code of 1986 to allow for depreciation over a 15 year period for units meeting the 45% efficiency level, and over a 20 year period for units meeting the 50% efficiency level.
June 28, 2001

Congressional Record—Senate

12395

Section 10. Grants for Publicly Owned Generating Units

No federal taxes are paid on publicly-owned generating units. To provide publicly-owned generating units with comparable incentives to modernize, Section 10 provides for annual grants in an amount equal to the monetary value of the depreciation deduction that would be allowed by a similarly situated investor-owned generating unit under Section 9. Units meeting the 45% efficiency level and the emission standards in Section 5(b) would receive annual grants over a 15 year period and units meeting the 50% efficiency level and the emission standards in Section 5(c) would receive annual grants over a 12 year period.

Section 11. Recognition of Permanent Emission Reductions in Future Climate Change Implementation Programs

This section expresses the sense of Congress that reductions in emissions of carbon dioxide and nitrogen oxides that are accomplished through the retirement of old generating units and replacement with new generating units that meet the efficiency and emission standards in the bill, or through replacement with non-polluting renewable power generation technologies, should be credited to the utility sector and to the owner/operator in any climate change implementation program enacted by Congress.

Section 12. Renewable and Clean Power Generation Technologies

This section provides a total of $750 million over 10 years to fund research and development programs and commercial demonstration projects and partnerships to demonstrate the commercial viability and environmental benefits of electric power generation from biomass, geothermal, solar, and wind technologies. Types of projects may include solar power tower plants, solar dishes and dishes, co-firing biomass with coal, biomass modular systems, next-generation wind turbines, and wind verification projects, and geothermal energy conversion.

Section 13. Clean Coal, Advanced Gas Turbine, and Combined Heat and Power Demonstration Program

This section provides a total of $750 million over 10 years to fund research and development programs and commercial demonstration projects and partnerships to demonstrate the commercial viability and environmental benefits of electric power generation from clean coal technologies, advanced gas turbine technologies, and combined heat and power technologies.

Section 14. Evaluation and Implementation of the Act and Other Statutes

Not later than 2 years after enactment, DOE, in consultation with EPA and FERC, shall report to Congress on the implementation of the Clean Power Plant and Modernization Act. The report shall identify any provisions of other laws that conflict with the efficient implementation of the Clean Power Plant and Modernization Act. The report shall include recommendations for legislative or administrative measures to harmonize and streamline these other statutes.

Section 15. Assistance for Workers Adversely Affected by Reduced Consumption of Coal

Beginning 3 years after enactment, this section provides a total of $975 million over 13 years to provide assistance to coal industry workers who are adversely affected as a result of reduced consumption of coal by the electric power generation industry. The funds will be administered under the economic dislocation and worker adjustment assistance program that is authorized by Title III of the Job Training Partnership Act.

Section 16. Community Economic Development Incentives for Communities Adversely Affected by Reduced Consumption of Coal

Beginning 3 years after enactment, this section provides a total of $975 million over 13 years to provide assistance to communities adversely affected as a result of reduced consumption of coal by the electric power generation industry. The funds will be administered under the economic adjustment program of the Department of Commerce authorized by the Public Works and Economic Development Act of 1965.

Section 17. Carbon Sequestration

This section authorizes $45 million over 3 years for forest and woodland restoration, demonstration projects such as soil restoration, tree planting, wetlands protection, and other ways of biologically sequestering carbon.

Section 18. Atmospheric Monitoring

This section authorizes $13.6 million over 10 years to support the operation of existing instrument networks that monitor the deposition of sulfates, nitrates, mercury, and other pollutants, as well as the effects of these pollutants of ecosystem health. This section also authorizes a one-time expenditure of $13.6 million for equipment modernization for these instrument networks.

By Mr. CRAPO:

S. 1132. A bill to amend the Federal Food, Drug, and Cosmetic Act relating to the distribution chain of prescription drugs; to the Committee on Health, Education, Labor, and Pension.

Mr. CRAPO. Mr. President, I rise today to introduce a bill designed to prevent a serious disruption in the distribution of prescription drugs across America. Unless changed by this legislation, or modified by the agency itself, a regulation issued by the Food and Drug Administration will drive out of business thousands of small and medium-sized drug wholesalers. Tens of thousands of small nursing homes, clinics, doctor's offices, drug stores, and veterinary practices, especially in rural areas, would be forced to find new suppliers of prescription drugs, who would almost certainly charge higher prices. Consumers, especially the sick and the least able to pay, would be even further hard-pressed to afford the prescription drugs they need to maintain their health.

There is no real health or safety reason behind the FDA’s action, which is simply a lack of understanding of how the wholesale distribution of drugs actually works. The agency’s regulation would complete the implementation of the Prescription Drug Marketing Act, which was enacted in April 1988. That statute, which was designed to stop the misuse of drug samples, prevent various types of resale fraud, stop the improvement of counterfeit drugs, and establish minimum national standards for the storage and handling of drugs by wholesalers, has worked well.

However, the FDA’s regulation, which will go into effect on April 1, threatens two thousand wholesalers, neither of which were present when the agency issued its initial policy guidance on the statute in 1988. The first problem relates to the sales history of drug products which wholesalers must provide their customers. A wholesaler who does not purchase directly from a manufacturer must provide their customer with a detailed history of all prior sales of that product back to the wholesaler who did purchase the drugs from the manufacturer. Whenever the drug is purchased directly from a manufacturer, the drug had to be purchased by the wholesaler who purchased directly from the manufacturer. This wholesaler is known as an authorized distributor.

Notwithstanding the fact that this system has produced a drug distribution system of exceptional quality, the FDA has changed its mind as to what the statute required and proposed that a reseller now be required to trace back the product history all the way back to the manufacturer. At the same time, however, the agency also concluded that the statute does not require either the manufacturer or the authorized distributor to provide sales history to secondary resellers. Without this very detailed sales history, it will be illegal for the secondary wholesaler to resell products. Since it is economically and logistically impractical for manufacturers or authorized distributors to keep track of the huge volume of product in the extreme detail required by the FDA rule, thousands of secondary wholesalers will be forced to cease business.

Fortunately, there is a simple solution. In 1990, the FDA finalized a regulation implementing another part of the PDMA, which requires wholesalers to keep very detailed records of all purchases, sales, or other dispositions of the drugs they obtain. These records, which are very similar to the detailed sales history the FDA is demanding of wholesalers, are also subject to audit by the agency, by state regulators, and must be made available to law enforcement agencies if needed. Thus, there is really no need for a secondary wholesaler to try and assemble the detailed and virtually unobtainable sales history now demanded by the FDA and to pass it on to their customers. Instead, the bill I am introducing today requires only
that secondary wholesalers provide a written statement to their customers that the drug products were first purchased from manufacturers or authorized distributors. Substituting the written statement would prevent a serious disruption in the wholesale drug sector while preserving the original intent of the PDMA, which was to guard the network of licensed and inspected wholesalers from counterfeiters or drugs from questionable sources. It would be a simple matter for a secondary wholesaler to determine that a shipment of drugs was first purchased by an authorized wholesaler, and the written statement would be subject to criminal penalties if falsified under existing law. Substituting the written statement for the paper trail requirement would also reduce selling costs, which could be passed on to the consumer.

This is an expansion to H.R. 68, introduced on January 3, 2001, by Representatives Jo Ann Emerson and Marion Berry. That bill now has 45 co-sponsors who represent an especially diverse geographical and ideological cross-section of the House and is supported by nine major trade and professional organizations representing most companies that wholesale or retail prescription drugs in the U.S. I invite my colleagues in the Senate to add their names to this commonsense measure.

By Mrs. BOXER (for herself, Mrs. Carnahan, and Mr. Bond):
S. 1193. A bill to amend title 49, United States Code, to preserve nonstop air service to and from Ronald Reagan Washington National Airport for certain communities in case of airline bankruptcy; to the Committee on Commerce, Science, and Transportation.

Mrs. BOXER. Mr. President, last week the Bush Administration eliminated the only nonstop air service between Los Angeles International Airport, LAX, and National Airport, DCA, in Washington, DC. The elimination of the flight makes Los Angeles the largest U.S. city without nonstop air service to this vital airport in the Nation's capital.

Since the DCA to lax flight began 10 months ago, 45,000 passengers have taken the flight. Not only is it popular, but many small and mid-sized communities throughout the state, including Bakersfield, Fresno, Monterey, and San Luis Obispo, rely on this flight. They have connecting flights into LAX and are able to continue the nonstop service. In exchange, however, the air carrier must give up one of its several slots that it uses to fly to its hub airport.

In this way, my bill would not create any additional flights to National Airport. Nor would it take away any of the long-distance nonstop Flights now in operation, including to the city that just received the slot originally granted to Los Angeles. But, it would allow the very popular nonstop air service between LAX and DCA to continue.

It seems to me that this is a fair compromise to ensure that service between National Airport and Los Angeles continues. I look forward to working with my colleagues to address this problem before the end of the summer.

By Mr. LIEBERMAN (for himself and Mr. HATCH):
S. 1134. A bill to amend the Internal Revenue Code of 1986 to modify the rules applicable to qualified small business stock; to the Committee on Finance.

Mr. LIEBERMAN. Mr. President, I rise today to introduce legislation to provide an incentive for capital formation for entrepreneurs.

This incentive is tailor-made to form capital for entrepreneurial firms so they can spur economic growth, create jobs, and make America competitive into the 21st Century. It focuses on equity investments as this is the only form of capital most entrepreneurial firms secure to fund research and development; most such firms are unable to secure debt capital. Because this incentive applies to founders stock and employee stock options, and not just stock offered to outsider investors, it provides a powerful incentive for the human infrastructure and culture that drives and grows our nation's entrepreneurial firms.

This legislation could not be more timely given the drought we see in equity capital for entrepreneurs. Nationwide we saw 650 Initial Public Offerings of stock, IPOs, in 1996, 610 in 1997, 302 in 1998, 501 in 1999, and 379 in 2000. So far in 2001 we have seen only 50. The total value of these offerings was $47 billion in 1996, $39 billion in 1997, $37 billion in 1998, $33 billion in 1999, and $54 billion in 2000. In 2001 we have seen only $20 billion. Entrepreneurs are starved for capital and this incentive is tailor made to provide an incentive to investors to provide it to them.

This was an unfortunate decision, and one that was both unnecessary and unjustified. Therefore, today, I am introducing legislation to reinstate the service. It is narrowly crafted to address the unique situation we have here.

My bill only applies in cases where a community loses service to DCA because the airline operating the flight went bankrupt. In those cases, the air carrier that purchases the assets of the bankrupt airlines has a right to continue the nonstop service. In exchange, however, the air carrier must give up one of its several slots that it uses to fly to its hub airport.

In this way, my bill would not create any additional flights to National Airport. Nor would it take away any of the long-distance nonstop flights now in operation, including to the city that just received the slot originally granted to Los Angeles. But, it would allow the very popular nonstop air service between LAX and DCA to continue.

It seems to me that this is a fair compromise to ensure that service between National Airport and Los Angeles continues. I look forward to working with my colleagues to address this problem before the end of the summer.

This incentive applies to founder's stock and employee stock options, and not just stock offered to outsider investors, it provides a powerful incentive for the human infrastructure and culture that drives and grows our nation's entrepreneurial firms.

This legislation could not be more timely given the drought we see in equity capital for entrepreneurs. Nationwide we saw 650 Initial Public Offerings of stock, IPOs, in 1996, 610 in 1997, 302 in 1998, 501 in 1999, and 379 in 2000. So far in 2001 we have seen only 50. The total value of these offerings was $47 billion in 1996, $39 billion in 1997, $37 billion in 1998, $33 billion in 1999, and $54 billion in 2000. In 2001 we have seen only $20 billion. Entrepreneurs are starved for capital and this incentive is tailor made to provide an incentive to investors to provide it to them.

The details of our proposal are straightforward. They call for a 100 percent exclusion, a zero capital gains tax rate, for new, direct, long-term investments in the stock of a small corporation. “New” means that the stock must be offered after the effective date of the bill and does not apply to sale of previously acquired equity shares. “Direct” means the stock must have been acquired from the firm and not in secondary markets, so it includes founders stock, stock options, venture capital placements, IPOs, and subsequent public stock offerings. “Long-term” means the stock must be held for three years. “Stock” includes any type of stock, including convertible preferred shares. “Small corporation” means a corporation with $300 million or less in capitalization (not valuation, but paid-in capital). The incentive that I led, 25 percent for individual and corporate taxpayers. And the excluded gains are not a preference item for the Alternative Minimum Tax.

I am pleased that Senator HATCH has agreed to serve as the lead cosponsor of the legislation. He and I worked closely together from 1995 through 1997 to restore the capital gains incentive. There were many Members involved with that effort, but Senator HATCH and I were pleased to be the leaders of the legislative coalition that proved to be so effective. Our work now on this venture capital gains legislation is a continuation of that long and successful partnership.

I am pleased that Representatives JENNIFER DUNN and ROBERT MATSU are introducing the same bill in the other body.

I have long championed this approach to capital gains incentives. Most recently, this proposal was included as Section 4 of S. 798, the Productivity, Opportunity, and Prosperity Act of 2001. The first proposal on this subject was introduced on April 7, 1987 in the 100th Congress by Senator Dale Bumpers as S. 932. I was an early supporter of this proposal and I cosponsored a version of this proposal introduced in 1991 by Senator Bumpers as S.1932. A version of that bill was enacted as part of the 1993 tax bill, Section 1202, but it was laden with technical requirements that limited its effectiveness. In the 104th Congress sent amendments to strengthen Section 1202 to President Clinton in the tax bill vetoed he vetoed in 1996. In the 105th Congress these amendments were included in all of the key capital gains, including S. 2 (Roth), S. 20 (DASCHLE), S. 66 (HATCH-LIEBERMAN), S. 501 (Mack), and S. 745 (Bumpers). These amendments were sent to the conference on that bill but did not emerge from it. A broad-based capital gains incentive, which I supported, was enacted into law and a rollover provision was enacted with regard to Section 1202 stock. In the 106th Congress, amendments to strengthen
Section 1202 were introduced in the House by Representatives Jennifer Dunn and Bob Matsui, H. R. 2331. Then I introduced the Senate bill, Senator Hatch and I, and they pass in the form of S. 798 and we are today introducing it again as a stand-alone bill. Today I am pleased to cosponsor S. 818, the capital gains proposal introduced by Senator Hatch and Torricelli and others. That proposal calls for a reduction in the current 20 percent capital gains tax rate for a broad class of investments, simplifies the capital gains tax, and provides special benefits to low income taxpayers. This bill and the bill we introduce today are complementary and should both be enacted. I recognize that the Joint Committee on Taxation, which determines the "cost" of all tax proposals, will determine the "cost" of these proposals as well. However, I feel that the economic benefits of these incentives will have on entrepreneurs and therefore on economic growth, but there is no way to adequately these determinations. There is no revenue remaining available under the budget resolution to tap to finance these proposals. Accordingly, I fully accept the obligation to find a way to pay for these other tax proposals, an offset, so that we do not adversely affect the deficit. The reasons for setting a special capital gains rate for venture capital are compelling. Entrepreneurial firms are the ones which can dramatically change our whole health care system, clean up our environment, link us in international telecommunications networks, and increase our capacity to understand our world. The firms are founded by dreamers, adventurers, and risk-takers who embody the best we have to offer in our free-enterprise economy. Entrepreneurship drives growth and small, emerging companies need capital investment to innovate, create jobs, and create wealth. According to the National Commission on Entrepreneurship, a small subset of entrepreneurial firms that comprise only 5-15 percent of all U.S. businesses created about two-thirds of new jobs between 1993-96. Although venture capital is critical to the transition from a fledgling company to a growth company, only a small share of it is associated with small and new firms. In addition, we are currently experiencing a venture capital slow down that makes it even more difficult for small and new firms to attract capital. According to the National Venture Capital Association, NCVA, investment in the fourth quarter of last year slowed by more than 30 percent from the previous quarter. The primary goal of the Productivity, Opportunity, and Prosperity Act and this venture capital incentive is to protect, stimulate and expand economic growth. Government’s role is not to create jobs but to help create the environment in which the private sector will do these jobs. This legislation helps to create the right context for private sector growth by providing incentives for investment in training, technology, and small entrepreneurial firms. These investments are critical to economic growth and the creation of jobs and wealth. The Productivity, Opportunity, and Prosperity Act of 2001, including this venture capital proposal, is a tax plan with a purpose. And that purpose is, above all else, to stimulate private sector economic growth, to raise the tide that lifts the lot of all Americans. In the spirit of the "New Economy," where the fundamentals of our economy have changed through entrepreneurship and innovation, this package includes business tax incentives that will spur the real drivers of growth: innovation, investment, a skilled workforce, and productivity.

Ten years from now we will be judged by the economic decisions we make today. People will ask, did we fully understand the awesome changes taking place in our economy and in our society? Did we give our industry and workers the environment and the tools they need to seize the opportunities that an innovation economy offers? I believe that a true Prosperity Agenda is within our grasp. Never before has America been in a stronger position, economically, socially, or politically, to shape our future. But it will take strong and focused leadership. I am confident that if we in the public sector in Washington work in partnership with the private sector throughout our country, we can truly say of America's future that the best is yet to come. I believe that productivity, Opportunity, and Prosperity Act and this venture capital incentive are an important step toward that future. Mr. President, I ask unanimous consent that the text of the bill and section analysis be printed in the Record. There being no objection the material was ordered to be printed in the Record as follows:

S. 1334

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, SECTION 1. SHORT TITLE. This Act may be cited as the “Venture Capital Gains and Growth Act of 2001.”

SEC. 2. MODIFICATIONS APPLICABLE TO QUALIFIED SMALL BUSINESS STOCK. (a) REPEAL OF MINIMUM TAX PREFERENCE.— (1) IN GENERAL.—Subsection (a) of section 57 of the Internal Revenue Code of 1986 (relating to items of tax preference) is amended by striking paragraph (7).

(b) INCREASE IN ROLLOVER PERIOD FOR QUALIFIED SMALL BUSINESS STOCK.—Subsections (a)(1) and (b)(3) of section 1045 of the Internal Revenue Code of 1986 (relating to rollover of gain from repositioning of qualified small business stock) are each amended by striking “60-day” and inserting “180-day.”

(c) REDUCTION IN HOLDING PERIOD.— (1) IN GENERAL.—Subsection (a) of section 1202 of the Internal Revenue Code of 1986 (relating to partial exclusion for gains from certain small business stock) is amended by striking “5 years” and inserting “3 years.”

(2) CONFORMING AMENDMENT.—Subsections (g)(2)(A) and (j)(1)(A) of section 1202 of such Code are each amended by striking “5 years” and inserting “3 years.”

(d) REPEAL OF PER-ISSUER LIMITATION.— Section 1202(b) of the Internal Revenue Code of 1986 (relating to per-issuer limitations on taxpayer’s eligible gain) is repealed.

(e) QUALIFIED TRADE OR BUSINESS.—Section 1202(e)(3) of the Internal Revenue Code of 1986 (relating to qualified trade or business) is amended by deleting at the end the following new sub-paragraph: (A) by striking “2 years” and inserting “5 years”.

(2) EXCEPTION FROM REDEMPTION RULES WHERE BUSINESS PURPOSE.—Section 1202(c)(3) of such Code (relating to certain purchases by corporation of its own stock) is amended by striking “50 percent” and inserting “100 percent.”

(2) CONFORMING AMENDMENTS.— (A) Subparagraph (A) of section 1(h)(5) of such Code is amended to read as follows: “(A) collectibles gain, over”.

(b) INCREASED EXCLUSION.— (1) IN GENERAL.—Subsection (a) of section 1202 of the Internal Revenue Code of 1986 (relating to 50-percent exclusion for gain from certain small business stock) is amended by striking “50 percent” and inserting “100 percent.”

(2) CONFORMING AMENDMENTS.— (A) Paragraph 9 of such Code is amended by redesignating paragraphs (8) (as amended by subparagraph (C), (10), (11), and (12) as paragraphs (8), (9), (10), and (11), respectively.

(b) The heading for section 1202 of such Code is amended by striking “PARTIAL” and inserting “100 PERCENT.”

The table of sections for part I of subchapter P of chapter 1 of such Code is amended by striking “PARTIAL” in the item relating to section 1202 and inserting “100 PERCENT.”

(2) TECHNICAL AMENDMENT.—Subsection (c) of section 1202 of such Code is amended by...
(4) **Stock held among members of controlled group not eligible.**—Stock of a member of a parent-subsidiary controlled group (as defined in subsection (b)(1)) shall not be treated as qualified small business stock while held by another member of such group.

(1) **Stock of larger businesses eligible for exclusion.**—

(1) In general.—Paragraph (1) of section 1202(d) of the Internal Revenue Code of 1986 (defining qualified small business) is amended by striking "$50,000,000" each place it appears and inserting "$300,000,000".

(2) **Inflation adjustment.**—Section 1202(d) of such Code (defining qualified small business) is amended by adding at the end the following:

(4) **Inflation adjustment of asset limitation.**—In the case of stock issued in any calendar year after 2002, the $300,000,000 amount contained in paragraph (1) shall be increased by an amount equal to—

(A) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins, determined by substituting 'calendar year 2001' in subparagraph (B) thereof. If any amount as adjusted under the preceding sentence is not a multiple of $10,000, such amount shall be rounded to the nearest multiple of $10,000.

(B) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year 1992 in subparagraph (B) thereof.

(5) **Effective date.**—The amendments made by this subsection shall apply to stock issued after the date of enactment of this Act.

**Description of Venture Capital Gains Incentive**

Section 1202 enacted in 1993:

50% capital gains exclusion for new investments—not sale of previously acquired assets—new investments made after effective date, August 1993.

Only if investments made directly in stock—not secondary trading, founders stock, stock options, venture capital, public offerings, common, preferred, convertible preferred.

Only if made in stock of a "small corporation"—defined as corporation with $50 million or less in capitalization—indexed for inflation.

Only if investment held for five years.

Only if investment made by an individual taxpayer—not by a corporate taxpayer.

50% of the excluded gains not covered by the Alternative Minimum Tax (AMT).

Limit on benefits per taxpayer of "10 times basis or $10 million, whichever is greater".

Technical problems—redemption of stock, "spending speed-up" provision.

Section 1945 enacted in 1997.

Permits investors in Section 1202 stock to roll over their investments in a new Section 1202 investment without "realizing" gains and paying taxes within 60 days.

Nine proposed amendments to Section 1202 and Section 1945:

(1) Sets a zero capital gains rate, compared to the 20 percent rate for other capital gains.

(2) Only new investments—same.

(3) Only if direct investments—same.

(4) Only if investment in stock—same.

(5) Only if investment held for three years—reduction from five years.

(6) Delete "10 times or $10 million" limitation.

(7) Extend coverage of Section 1202 to additional corporations.

(8) Fix technical problems—modify redemptions of stock, "spending speed-up" provision.

By Mr. GRAHAM (for himself, Mr. CHAFFEE, Mr. CONRAD, Mrs. LINCOLN, Mr. MILLER, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. KERRY, and Mr. CARPER):

S. 1135. A bill to amend title XVII of the Social Security Act to provide comprehensive reform of the Medicare program, including the provision of prescription drug benefits under such program; to the Committee on Finance.

Mr. GRAHAM. Mr. President, I rise today joined by my colleagues to introduce the Medicare Reform Act of 2001.

Today we are in the midst of a major health-care debate on the Patients’ Bill of Rights. This crucial bill should be the beginning, not end, of reform in the health care system. Now we need to take this momentum and turn to Medicare reform.

Reform is not a word to be tossed around lightly. When we bat around the term Medicare reform, this is what we need to be talking about, ideas that go to the very heart of the existing Medicare program and reform it.

The Medicare Reform Act offers several ideas. It keeps what is best about Medicare intact. Under this bill the program will remain, as it has always been, reliable and affordable. But the Medicare Reform Act also does just what it says. It reforms the program to reflect new realities both scientific and economic, that the program’s creators could not possibly have planned for in 1965.

One of these realities is that prescription drugs are a crucial part of any modern health care regime. In fact it is unthinkable that prescription drugs will not be included as part of this type of system. And we know that we can pass all the laws we want, but we can’t make private companies take on Medicare patients.

Rather than foreign the private sector to attempt to do something they do not want to do, we take advantage of the fact that we already have an efficient, workable mechanism in place. That mechanism is the pharmacy benefit manager of PBMs. These businesses operate successfully today in every ZIP code of the country. They are in a perfect position to manage the Medicare prescription drug benefit—and to offer seniors a choice.

The Medicare Reform Act would allow multiple PBMs in each geographic region to administer, manage and deliver the prescription drug benefit. They would be allowed to use all of the methods they use currently in the private sector to provide benefits economically, including the use of formularies, preferred pharmacy networks, and generic drug substitution. Additionally, PBMs would be allowed to use mechanisms to encourage beneficiaries to select cost-effective drugs.
CONGRESSIONAL RECORD—SENATE  12399

June 28, 2001

including the use of disease management and therapeutic interchange programs.

Beneficiaries in every part of the country would have access to coverage provided by PBMs that would not assume full insurance risk for drug costs. In this way, adverse selection and inappropriate incentives would be avoided.

However, to ensure that PBMs pursue and are held accountable for high quality beneficiary services, improved health outcomes, and managing costs, we require PBMs to put a substantial portion of their management fees at risk for their performance. Performance goals would include price discounts and generic substitution rates, timely action with regard to appeals, sustained pharmacy network access and notifications to avoid adverse drug reactions.

Although all PBMs would be required to offer the standard benefit at a minimum, payments received on the basis of their performance could be used to reduce beneficiary cost-sharing or to waive the deductible for generic drugs.

Requiring PBMs to share risk provides a middle ground between proposals that have included no risk being assumed by the private sector, and proposals that have required the assumption of insurance and selection risk for the cost of drugs.

This arrangement would bring us the benefits of private sector competition without the instabilities that would be associated with a full risk-bearing model. It would take advantage of the fact that the private sector has provided an efficient, workable, stable system for the delivery of prescription drugs, and the management of drug costs, and would allow beneficiaries to choose between multiple vendors.

Proposals on drugs are not all that is missing from Medicare.

We live in a world of near miracles. We can stop disease in its track. We can keep a health problem from becoming a health crisis. We can make the lives of our seniors better. We can make their bodies stronger. We have the technology.

It’s time to let our seniors have it as well.

The “Medicare Reform Act” would shift the focus of Medicare from simply treating illness to promoting wellness.

Several proven-effective preventive benefits, like cholesterol screening and smoking cessation counseling, would be added to package. These benefits could save lives.

We also provide a new process for changes to the preventive benefit package. As a member of the Finance Committee, I have sat through hours-long discussions on coverage of screening for colon cancer. I’ve heard debates on the relative benefits of barium x-rays v. colonoscopies in minute details. I’m not qualified to make these decisions. A new “fast-track” process would move members of Congress out of the picture of making decisions about the clinical and scientific merits of different approaches and move the doctors and scientists in.

The Medicare Reform Act is not just about adding benefits. It’s also about changing the way we do business.

We’ve looked to the private sector for lessons on how to run the fee-for-service program. We allow Medicare to use the same competitive tools insurance companies have in place to control costs. This will save the Medicare program money, in contrast to some other competition proposals.

We’ve looked to the private sector and learned that to serve seniors and providers better, we need to make an investment in the program, and provide additional administrative funds. Our bill would require the agencies responsible for these programs the money to truly serve their clients, our seniors.

We’ve turned again to the medical and scientific experts. We’ve taken the decision about what Medicare should and should not cover out of the hands of bureaucrats and given it to independent medical, clinical and scientific experts who have the skills to assess new technologies and procedures.

We also need to prepare for the future. The Medicare program is in the best shape it has been in over a quarter century. But, the baby-boomers are going to be joining the program soon.

We need to begin to fortify the program now, so that we are ready for them. Our bill takes modest steps in that direction by indexing the Part B deductible to inflation, and providing the Part B premium subsidy on a sliding scale basis.

While I think we need to spend the lion’s share on reforming the part of the program with the lion’s share of the beneficiaries, we also need to take a close look at the Medicare+Choice program. There are several different proposals on the table to replace the current payment system with one based on competitive bidding, and we face a lot of questions regarding which of the proposals would work best.

In 1997, Senators Breaux and Mack proposed a Medicare Competitive Pricing Demonstration Project; the Project was included in the Balanced Budget Act. The purpose of the demonstration project was to test a new method of paying plans based on a competitive market approach. It has not yet been implemented.

This demonstration project is exactly what we need to learn how to design and implement a competitive system. It is not sound to undertake a wholesale restructuring of the Medicare+Choice system without knowing what would, and would not, work.

The “Medicare Reform Act of 2001” would lay the groundwork for a sound, workable, competitive system by moving forward with the Demonstration project in the state of Florida.

The time is now. The money is there. The plan exists. Our seniors are waiting.

By Mr. SARBANES (for himself, Mr. BAUCUS, Mr. BAYH, Mr. CLELAND, Mr. CORZINE, Mr. DODD, Mrs. FEINSTEIN, Mr. REID, Mr. SCHUMER, Ms. SNOWE, Ms. STABENOW, Mr. THOMPSON, and Mr. WYDEN):

S. 1136. A bill to provide for mass transportation in certain Federally owned or managed areas that are open to the general public; to the Committee on Energy and Natural Resources:

Mr. SARBANES. Mr. President, I rise today to introduce legislation to help protect our nation’s natural resources and improve the visitor experience in our National Parks and Wildlife Refuges. The Transit in Parks Act, or “TRIP,” will establish a new Federal transit grant initiative to support the development of mass transit and alternative transportation services for our national parks, wildlife refuges, Federal recreational areas, and other public lands.

I am pleased to be joined by Senators BAUCUS, BAYH, CLELAND, CORZINE, DODD, FEINSTEIN, REID, SCHUMER, SNOWE, STABENOW, THOMPSON, and WYDEN, who are cosponsors of this legislation.

Let me begin with a little history. When the National parks first opened in the second half of the nineteenth century, visitors arrived by stagecoach along dirt roads. Travel through parklands, such as Yosemite or Yellowstone, was long, difficult, and costly.

Not many people could afford or endure such a trip. The introduction of the automobile gave every American greater mobility and freedom, which included the freedom to travel and see some of our Nation’s great natural wonders. Early in this century, landscape architects from the National Park Service and highway engineers from the U.S. Bureau of Public Roads collaborated to produce many feats of road engineering that opened the National park lands to millions of Americans.

Yet greater mobility and easier access now threaten the very environments that the National Park Service is mandated to protect. The ongoing tension between preservation and access has always been a challenge for our national park system.

Today, record numbers of visitors and cars has resulted in increasing damage to our
parks. The Grand Canyon alone has almost five million visitors a year. As many as 6,000 vehicles arrive in a single summer week. They compete for 3,400 parking spaces. Between 32,000 and 35,000 tour buses go to the park each year. During the peak summer season, the entrance route becomes a giant parking lot.

In 1975, the total number of visitors to America’s national parks was 190 million. By 1999, that number has risen to 287 million annual visitors, almost equal to one visit by every man, woman, and child in this country. This dramatic increase in visitation has created an overwhelming demand on these areas, resulting in severe traffic congestion, visitor restrictions, and in some instances vacationers being shut out of the parks altogether. The environment for private automobiles at the Grand Canyon is visible at many other parks: Yosemite, which has more than four million visitors a year; Yellowstone, which has more than three million visitors a year and experiences such severe traffic congestion that access has to be restricted; Zion; Acadia; Bryce; and many others. We need to solve these problems now or risk permanent harm to our nation’s natural, cultural, and historical heritage.

Access to the parks is vital not only to the parks themselves, but to the economic health of their gateway communities. For example, visitors to Yosemite infuse $3 billion a year into the local economy of the surrounding area. At Yellowstone, tourists spend $725 million annually in adjacent communities. Wildlife-related tourism generates an estimated $60 billion a year nationwide. If the parks are forced to close their gates to visitors due to congestion, the economic vitality of the surrounding region would be jeopardized.

The challenge for park management has always been twofold: to conserve and protect the Nation’s natural, historical, and cultural resources, while at the same time ensuring visitor access and enjoyment of these sensitive environments. Until now, the principal transportation systems that the Federal Government has developed to provide access into our national parks are roadways purely for private automobile access. The TRIP legislation recognizes that we need to do more than simply build roads; we must invest in alternative transportation solutions before our national parks are damaged beyond repair.

In developing solutions to the parks’ transportation needs, this legislation builds upon the 1997 Memorandum of Understanding between Secretary of Transportation Rodney Slater and Secretary of the Interior Bruce Babbitt in which the two Departments agreed to work together to address transportation and resource management needs in and around National Parks. The findings in the MOU are especially revealing: Congestion in and approaching many National Parks is causing damage to park resources and buildings that substantially detract from the visitor experience. Visitors find that many of the National Parks contain significant noise and air pollution, and traffic congestion similar to that found in the cities they left behind. In many of our National Park units, the capacity of parking facilities at interpretive or scenic areas is well below demand. As a result, visitors park along roadsides, damaging park resources and subjecting people to hazardous safety conditions as they walk near busy roads to access visitor use areas. On occasion, National Park units must close their gates during high visitation periods and turn away the public because the existing transportation systems are at, or beyond, the capacity for which they were designed.

In addition, the TRIP legislation is designed to implement the recommendations from a comprehensive study of alternative transportation needs in public lands that I was able to include in the Transportation Equity Act for the 21st Century, TEA–21, as section 3039. The study is nearing completion, and is expected to confirm what those of us who have visited our National parks already know: there is a significant and well-documented need for alternative transportation solutions in the national parks to prevent lasting damage to these incomparable natural treasures.

The Transit in Parks Act will go far toward meeting this goal. The bill’s objectives are to develop new and expanded mass transit services throughout the national parks and other public lands to protect fragile natural, cultural, and historical resources and wildlife habitats, to prevent or mitigate adverse impact on those resources and habitats, and to reduce pollution and congestion, while at the same time facilitating appropriate visitor access and improving the visitor experience.

The new Federal transit grant program will provide funding to the Federal land management agencies that manage the 379 various sites within the National Park System, the National Wildlife Refuges, Federal recreational areas, and other public lands, including National Forest System lands, and to their state and local partners. The program will provide capital funds for transit projects, including rail or clean fuel bus projects, joint development activities, pedestrian and bike paths, or park waterway access, within or adjacent to national parks and other public lands. The bill authorizes $65 million for the new program for each of the fiscal years 2002 through 2007. It is anticipated that other resources, both public and private, will be available to augment these amounts.

The bill formalizes the cooperative arrangement in the 1997 MOU between the Secretary of Transportation and the Secretary of the Interior to exchange technical assistance and to develop procedures relating to the planning, selection and funding of transit projects in national park lands. The bill further provides funds for planning, research, and technical assistance that can supplement other financial resources available to the Federal land management agencies. The projects eligible for funding would be developed through the TEA–21 planning process and prioritized for funding by the Secretary of the Interior in consultation and cooperation with the Secretary of Transportation. It is anticipated that the Secretary of the Interior would select projects that are diverse in location and size. While major National parks such as the Grand Canyon and Yellowstone are clearly appropriate candidates for significant transit projects under this section, there are numerous small urban and rural Federal park lands that can benefit enormously from small projects, such as bike paths or improved connections with an urban or regional public transit system. No single project will receive more than 12 percent of the total amount available in any given year. This ensures a diversified portfolio of projects.

In addition, I firmly believe that this program will create new opportunities for the Federal land management agencies to partner with local transit agencies in gateway communities adjacent to the parks, both through the TEA–12 planning process and in developing integrated transportation systems. This will spur new economic development within these communities, as they develop transportation centers for park visitors to connect to transit links into the national parks and other public lands.

The ongoing tension between preservation and access has always been a challenge for the National Park Service. Today, that challenge has new dimensions, with overcrowding, pollution, congestion, and resource degradation increasing at many of our national parks. This legislation—the Transit in Parks Act—will give our Federal land management agencies important new tools to improve both preservation and access. Just as we have found in metropolitan areas, transit is essential to moving large numbers of people in our national parks—quickly, efficiently, at low cost, and without adverse impact. At the same time, transit can enhance the economic development potential of our gateway communities.

As we begin a new millennium, I cannot think of a more worthy endeavor to help our environment and preserve our national parks, wildlife refuges, and Federal recreational areas than by encouraging alternative transportation...
SEC. 2. FEDERAL LAND TRANSIT PROGRAM.

This Act may be cited as the "Transit in Parks Act" or the "TRIP Act".

(Part) 

SEC. 1. SHORT TITLE.

This Act may be cited as the "Transit in Parks Act" or the "TRIP Act".

(Part) 

SEC. 3. FEDERAL LAND MANAGEMENT AGENCY.

(a) In General.—Chapter 53 of title 49, United States Code, is amended by inserting after section 5309 the following:

"§ 5316. Federal land transit program

"(a) FINDINGS AND PURPOSES.—

"(1) FINDINGS.—Congress finds that—

"(A) section 3039 of the Transportation Equity Act for the 21st Century (23 U.S.C. 138 note; Public Law 105-178) required a comprehensive study, to be conducted by the Secretary of Transportation, in coordination with the Secretary of the Interior, of alternative transportation needs in national parks and related public lands in order to—

"(i) identify the transportation strategies that can enhance the management of national parks and related public lands;

"(ii) identify national parks and related public lands that have existing and potential problems of adverse impact, high congestion, and pollution, or that can otherwise benefit from alternative transportation modes;

"(iii) assess the feasibility of alternative transportation modes; and

"(iv) identify and estimate the costs of those alternative transportation modes;

"(B) many national parks are experiencing increased visitation and congestion and degradation of the natural, historical, and cultural resources;

"(C) there is a growing need for new and expanded mass transportation services throughout national parks to conserve and protect fragile natural, historical, and cultural resources, prevent adverse impact on those resources, and reduce pollution and congestion while facilitating appropriate visitor mobility and accessibility and improving the visitor experience;

"(D) Federal Employees Transportation can assist the Federal land management agencies through financial support and technical assistance and further the achievement of national park purposes; and

"(E) the Federal land management agencies and State and local governmental authorities that provide for—

"(i) the development of procedures and criteria relating to the planning, selection, and funding of qualified projects and the implementation and oversight of the program of projects in accordance with this section;

"(ii) a unit of the National Park Service; and

"(iii) a unit of the National Wildlife Refuge System;

"(2) TYPE OF ASSISTANCE.—The Secretary may enter into a contract, grant, cooperative agreement, interagency agreement, intra-agency agreement, or other agreement to carry out a qualified project under this section.

"(3) MESS TRANSPORTATION.—

"(A) IN GENERAL.—The term "mass transportation" means transportation by bus, rail, or any other publicly or privately owned mode that provides service to the public generally or special service on a regular basis.

"(B) INCLUSIONS.—The term "mass transportation" includes sightseeing service.

"(C) QUALIFIED PARTICIPANT.—The term "qualified participant" means—

"(A) a Federal land management agency or agency of the United States to encourage and promote the development of transportation systems for the betterment of eligible areas to meet the goals described in clauses (i) through (vi) of subparagraph (A) of this subsection;

"(B) a State or local governmental authority with jurisdiction over land in the vicinity of an eligible area acting with the consent of the Federal land management agency or agency of the United States to encourage and promote the development of transportation systems for the betterment of eligible areas to meet the goals described in clauses (i) through (vi) of subparagraph (A) of this subsection;

"(C) a public or nongovernmental participant.

"(4) OTHER USES.—A grant, cooperative agreement, interagency agreement, intra-
agency agreement, or other agreement for a qualified project under this section, may be available to finance the leasing of equipment and facilities for use in mass transportation, subject to any regulation that the Secretary may prescribe limiting the grant or agreement and any regulations that are more cost-effective than purchase or construction.

(e) LIMITATION ON USE OF AVAILABLE AMOUNTS.—

(1) IN GENERAL.—The Secretary may allocate not more than 5 percent of the amount made available for a fiscal year under section 5309 of this title to the qualified participant and the Secretary, in carrying out the planning, research, and technical assistance under this section, including the development of technology appropriate for use in a qualified project.

(2) AMOUNTS FOR PLANNING, RESEARCH, AND TECHNICAL ASSISTANCE.—Amounts made available under this subsection are in addition to amounts otherwise available for planning, research, and technical assistance under this title or any other provision of law.

(3) AMOUNTS FOR QUALIFIED PROJECTS.—No qualified project shall receive more than 12 percent of the total amount made available under section 5308(b) for any fiscal year.

(4) PLANNING PROCESS.—In undertaking a qualified project under this section—

(a) if the qualified participant is a Federal land management agency—

(i) the Secretary, in cooperation with the Secretary of the Interior, shall develop transportation planning procedures that are consistent with—

(A) the metropolitan planning provisions under sections 5303 through 5305;

(B) the statewide planning provisions under section 135 of title 23; and

(C) the planning, participation requirements under section 5307(c); and

(b) in the case of a qualified project that is at a unit of the National Park system, the planning process shall be consistent with the general management plans of the unit of the National Park system; and

(c) if the qualified participant is a State or local governmental authority in more than 1 State or local governmental authority in more than 1 State, the qualified participant shall—

(i) comply with sections 5303 through 5305;

(ii) comply with the statewide planning provisions under section 135 of title 23; and

(iii) consult with the appropriate Federal land management agency during the planning process.

(g) COST SHARING.—

(1) DEPARTMENTAL SHARE.—The Secretary, in cooperation with the Secretary of the Interior, shall establish the share of assistance to be provided under this section to a qualified participant.

(2) CONSIDERATIONS.—In establishing the departmental share of the net project cost of a qualified project, the Secretary shall consider—

(A) visitation levels and the revenue derived from user fees in the eligible area in which the qualified project is carried out;

(B) the extent to which the qualified participant coordinates with a public or private mass transportation authority in the eligible area;

(C) private investment in the qualified project, including the provision of contract services, joint development activities, and the use of any financing mechanisms; and

(D) the clear and direct benefit to the qualified participant; and

(E) any other matters that the Secretary considers appropriate to carry out this section.

(iii) the extent to which the qualified project would conserve resources, prevent or mitigate adverse impact, and enhance the environment;

(F) the location of the qualified project, to ensure that the selected qualified projects—

(i) are geographically diverse nationwide; and

(ii) include qualified projects in eligible areas located in both urban areas and rural areas;

(G) the size of the qualified project, to ensure that there is a balanced distribution;

(H) the historical and cultural significance of a qualified project;

(I) safety;

(J) the extent to which the qualified project would—

(i) enhance livable communities;

(ii) reduce pollution (including noise pollution, air pollution, and visual pollution);

(iii) reduce congestion; and

(iv) improve the mobility of people in the most efficient manner; and

(K) any other matters that the Secretary considers appropriate to carry out this section, including—

(i) visitation levels;

(ii) the use of innovative financing or joint development agreements;

(iii) coordination with gateway communities.

(i) QUALIFIED PROJECTS CARRIED OUT IN ADVANCE.—

(1) IN GENERAL.—When a qualified participant carries out any part of a qualified project without assistance under this section in accordance with all applicable procedures and requirements, the Secretary may pay the departmental share of the net project cost of a qualified project if it meets the requirements and provisions of the requirements and provisions of section 5309(g); and

(B) the qualified participant applies for the payment; and

(C) before carrying out that part of the qualified project, the qualified participant applies for the payment; and

(D) the Secretary approves the payment; and

(E) the Secretary approves the payment; and

(F) before carrying out that part of the qualified project, the Secretary approves the payment; and

(G) any other matters that the Secretary considers appropriate to carry out this section.

(ii) NONDEPARTMENTAL SHARE.—Notwithstanding any other provision of law, Federal loans and grants appropriated to any Federal land management agency may be counted toward the nondepartmental share of the cost of a qualified project.

(B) SELECTION OF QUALIFIED PROJECTS.—

(1) IN GENERAL.—The Secretary of the Interior, after consultation with and in cooperation with the qualified participant, shall determine by the selection and funding of an annual program of qualified projects in accordance with this section.

(2) CONSIDERATIONS.—In determining whether to include a project in the annual program of qualified projects, the Secretary of the Interior shall consider—

(A) the justification for the qualified project, including the extent to which the qualified project would conserve resources, prevent or mitigate adverse impact, and enhance the environment;

(B) the location of the qualified project, to ensure that the selected qualified projects—

(i) are geographically diverse nationwide; and

(ii) include qualified projects in eligible areas located in both urban areas and rural areas;

(C) the size of the qualified project, to ensure that there is a balanced distribution;

(D) the historical and cultural significance of a qualified project;

(E) safety;

(F) the extent to which the qualified project would—

(i) enhance livable communities;

(ii) reduce pollution (including noise pollution, air pollution, and visual pollution);

(iii) reduce congestion; and

(iv) improve the mobility of people in the most efficient manner; and

(G) any other matters that the Secretary considers appropriate to carry out this section, including—

(i) visitation levels;

(ii) the use of innovative financing or joint development agreements;

(iii) coordination with gateway communities.

(i) RELATIONSHIP TO OTHER LAWS.—Qualified participants shall be subject to—

(1) the requirements of section 5333;

(2) the extent to which the Secretary determines may be appropriate requirements consistent with those under subsections (d) and (i) of section 5307; and

(3) any other terms, conditions, requirements, and provisions that any agency determines to be appropriate to carry out this section, including requirements for the distribution of proceeds on disposition of real property and equipment acquired from a qualified project assisted under this section.

(2) INNOVATIVE FINANCING.—A qualified project assisted under this section shall be eligible for funding through a State Infrastructure Bank or other innovative financing mechanism otherwise available to finance an eligible project under this chapter.

(k) RELATION TO OTHER LAWS.—Qualified participants shall be subject to—

(1) the requirements of section 5333;

(2) the extent to which the Secretary determines may be appropriate requirements consistent with those under subsections (d) and (i) of section 5307; and

(3) any other terms, conditions, requirements, and provisions that any agency determines to be appropriate to carry out this section, including requirements for the distribution of proceeds on disposition of real property and equipment acquired from a qualified project assisted under this section.

(l) COORDINATION OF RESEARCH AND DEPLOYMENT OF NEW TECHNOLOGIES.—

(1) IN GENERAL.—The Secretary, in cooperation with the Secretary of the Interior, may undertake, or make grants or contracts (including agreements with departments, agencies, and instrumentalities of the Federal Government) or other agreements for research, development, and deployment of new technologies in eligible areas that will—

(A) conserve resources;

(B) prevent or mitigate adverse environmental impact;

(C) improve visitor mobility, accessibility, and enjoyment; and

(D) reduce pollution (including noise pollution and visual pollution).

(m) ACCESS TO INFORMATION.—The Secretary may request and receive appropriate information from any source.

(n) FUNDING.—Grants and contracts under paragraph (1) shall be awarded from amounts available under section 5307.

(o) REPORT.—

(1) IN GENERAL.—The Secretary, in consultation with the Secretary of the Interior, shall annually submit to the Committee on Transportation and Infrastructure of the House of Representatives and to the Committee on Banking, Housing, and Urban Affairs of the Senate a report on the allocation of amounts of amounts to be made available to assist the qualified projects under this section.

(2) ANNUAL AND SUPPLEMENTAL REPORTS.—A report required under paragraph (1) shall be included in the report submitted under section 5307(b).
CONGRESSIONAL RECORD—SENATE
12403

June 28, 2001

(b) AUTHORIZATIONS.—Section 5338 of title 49, United States Code, is amended by adding at the end the following:

"(j) SECTION 5316.—

(1) IN GENERAL.—There is authorized to be appropriated to carry out section 5316 $65,000,000 for each of fiscal years 2002 through 2007.

(2) AVAILABILITY.—Amounts made available under this subsection for any fiscal year shall remain available for obligation until the last day of the third fiscal year commencing after the last day of the fiscal year for which appropriations were initially made available under this subsection.

(c) CONFORMING AMENDMENTS.—

(1) TABLE OF SECTIONS.—The table of sections for chapter 53 of title 49, United States Code, is amended by inserting after the item relating to section 5315 the following:

"5316. Federal land transit program.

(2) PROJECT MANAGEMENT OVERSIGHT.—Section 5339 of title 49, United States Code, is amended in the first sentence—

(A) by striking "or 5311" and inserting "5311, or 5316"; and

(B) by striking "5311 or 5316" and inserting "5311, 5316, or";

(d) TECHNICAL AMENDMENTS.—Chapter 53 of title 49, United States Code, is amended—

(1) in section 5309—

(A) by redesignating subsection (p) as subsection (q); and

(B) by redesigning the second subsection designated as subsection (o) (as added by section 3009(i) of the Federal Transit Act of 1998 (112 Stat. 356)) as subsection (p);

(2) in section 5328(a)(4), by striking "5309" and inserting "5309(1)";

(3) in section 5337, by redesigning the second subsection designated as subsection (e) (as added by section 302(b) of the Federal Transit Act of 1998 (112 Stat. 367)) as subsection (f).

TRANSPORT IN PARKS ACT—SECTION-BY-SECTION
Section 1: Short title
The Transit in Parks (TRIP) Act.

Section 2: In general
Amends Federal transit laws by adding new section 5316, “Federal Land Transit Program.”

Section 3: Findings and purposes
The purpose of this Act is to promote the planning and establishment of alternative transportation systems within, and in the vicinity of, the national parks and other public lands to protect and conserve natural, historical, and cultural resources, mitigate adverse impact on those resources, relieve congestion, minimize transportation fuel consumption, reduce pollution, and enhance visitor mobility and accessibility and the visitor experience. The Act responds to the need for alternative transportation systems in the national parks and other public lands identified for transportation by the Department of Transportation pursuant to section 3039 of TEA-21, by establishing Federal assistance to finance mass transportation projects within and in the vicinity of the national parks and other public lands, to increase coordination with gateway communities, Federal, State, and public-private partnerships, and to assist in the research and deployment of improved mass transportation equipment and methods.

Section 4: Definitions
This section defines eligible projects and eligible participants in the program. A "qualified participant" is a Federal land management agency, or a State or local governmental authority acting with the consent and a Federal land management agency. A "project" is a proposal for a project. A "qualified project" is a planning or capital mass transportation project, including rail projects, clean fuel vehicles, joint development and establishment of criteria for planning, selection, and funding of projects under this section.

Section 5: Federal Agency cooperative arrangements
This section implements the 1997 Memorandum of Understanding between the Director of the National Park Service and the Interior for the exchange of technical assistance in mass transportation, the development of mass transportation plans, and the establishment of criteria for planning, selection, and funding of projects under this section.

Section 6: Types of assistance
This section gives the Secretary of Transportation authority to provide Federal assistance through grants, cooperative agreements, inter- or intra-agency agreements, or other agreements, including leasing under certain conditions, for a qualified project under this section.

Section 7: Limitation on use of available amounts
This section specifies that the Secretary may not use more than 5% of the amounts available under this section for planning, research, and technical assistance, these amounts may be supplemented from other sources. In addition, to ensure a broad distribution of funds, no project can receive more than 12% of the total amount available under this section in any given year.

Section 8: Planning process
This section requires the Secretaries of Transportation and the Interior to cooperatively develop an agreement with TEA-21 for qualified participants which are Federal land management agencies. If the qualified participant is a State or local government authority, the qualified participant shall comply with the TEA-21 planning process and consult with the appropriate Federal land management agency during the planning process.

Section 9: Department’s share of the costs
This section requires that in determining the Department’s share of the project costs, the Secretary of Transportation, in cooperation with the Secretary of the Interior, must consider certain factors, including visitation levels and user fee revenues, coordination in mass transportation projects with public and private transit provider, private investment, and whether there is a clear and direct financial benefit to the qualified participant. The intention is to establish criteria for a sliding scale of assistance, with a lower Departmental share for projects that can attract outside investment, and a higher Departmental share for projects that do not qualify for such outside resources. In addition, this section specifies that funds from the Federal land management agencies can be counted toward the local cost.

Section 10: Selection of qualified projects
This section provides that the Secretary of the Interior, in cooperation with the Secretary of Transportation, shall prioritize the qualified projects for funding in an annual report of program of projects according to the following criteria: (1) project justification, including the extent to which the project conserves and protects Federal resources, prevents or mitigates adverse impact, and enhances the environment; (2) project location to ensure geographic diversity and both rural and urban projects; (3) project size for a balanced distribution; (4) historical and cultural significance; (5) safety; (6) the extent to which the project would enhance livable communities, reduce pollution, protect and conserve natural, historical, and cultural sites of people in the most efficient manner; and (7) any other considerations the Secretary deems appropriate, including visitation levels, the use of innovative financing or joint development strategies, and coordination with gateway communities.

Section 11: Undertaking projects in advance
This provision applies current transit law to projects funded under this section, allowing projects to advance prior to receiving Federal funding, but allowing the advance activities to be counted toward the local share as long as certain conditions are met.

Section 12: Full funding agreement; project management plan
This section provides that large projects require a project management plan, and shall be carried out through a full funding agreement to the extent the Secretary considers appropriate.

Section 13: Relationship to Other Laws
This provision applies certain transit laws to projects funded under this section, and permits the Secretary to apply any other terms or conditions he or she deems appropriate.

Section 14: Innovative financing
This section provides that a project assisted under this Act can also use funding from a State Infrastructure Bank or other innovative financing mechanism that is available to fund other eligible transit projects.

Section 15: Asset management
This provision permits the Secretary of Transportation to transfer control over a transit asset, acquired with Federal funds under this Act, to a qualified participant in accordance with certain Federal property management rules.

Section 16: Coordination of research and deployment of new technologies
This provision allows the Secretary, in cooperation with the Secretary of the Interior, to enter into grants or other agreements for research and deployment of new technologies to meet the special needs of eligible areas under this Act.

Section 17: Report
This section requires the Secretary of Transportation to submit a report on projects funded under this Act to the House Transportation and Infrastructure Committee and the Senate Banking, Housing, and Urban Affairs Committee, to be included in the Department’s annual project report.

Section 18: Authorization
$65,000,000 is authorized to be appropriated for the Secretary to carry out the program for each of the fiscal years 2002 through 2007.

Section 19: Conforming amendments
Confirming amendments to the transit title, including an amendment to allow 0.5% of the funds made available under this Act to be used for project management oversight.
CONGRESSIONAL RECORD—SENATE

Section 20: Technical amendments

American Public Transportation Association,
Chairman, Committee on Banking, Housing,
and Urban Affairs,

Dear Senator Sarbanes:

Thank you for sharing with us a copy of the Transit in Parks Act. Of this system, would amend the federal transit law at chapter 58, title 49 U.S.C.

The Act would authorize federal assistance to certain federal agencies and state and local entities to finance mass transportation projects generally for the purpose of addressing transportation congestion and mobility issues at national parks and other eligible areas. In addition, the legislation would encourage enhanced cooperation between the Departments of Transportation and Interior regarding the use of federal agencies to encourage the use of public transportation at national parks.

I am pleased to support your efforts to improve mobility in our national parks. Public transportation clearly has much to offer citizen who visit these national treasures, where congestion and pollution are significant—and growing—problems. Moreover, this legislation should broaden the base of support for public transportation, a key principle APTA has been advocating for many years. It is my view that we will review your bill with APTA’s legislative leadership.

I applaud you for writing the legislation, and look forward to continuing to work with you and your staff. Let us know what we can do to help your initiative!

Sincerely yours,

William W. Millar,
President.

National Parks Conservation Association,

Dear Senator Sarbanes:

On behalf of the National Parks Conservation Association (NPCA) and its over 400,000 members, I want to thank you for proposing the Transit in Parks Act that will enhance transit systems for access to and within our national parks. NPCA applauds your leadership and foresight in recognizing the critical role that mass transit can play in protecting our parks and improving the visitor experience.

Visitation to America’s national parks has skyrocketed during the past two decades, from 190 million visitors in 1975 to approximately 286 million visitors last year. Increased public interest in these special places has placed substantial burdens on the very resources that draw people to the parks. As more and more individuals crowd into our national parks—typically by automobile—fragile habitat, endangered plants and animals, unique cultural treasures, and spectacular natural resources and vistas are being degraded by air and water pollution, noise intrusion, and inappropriate use.

Your innovative legislation would establish a program within the Department of Transportation dedicated to enhancing transit options and accessibility to the national parks. This is of vital importance for the future of our national parks. Your initiative will boost the role of alternative transportation systems. As such, the proposed legislation essentially defines those most heavily impacted by visitation such as Yellowstone-Grand Teton, Yosemite, Grand Canyon, Acadia, and the Great Smoky Mountains national parks.

The benefit of such systems has already been demonstrated in a number of parks such as Zion and Cape Cod.

Equally important, the legislation will provide an excellent opportunity for the National Park Service (NPS) to enter into public-private partnerships with states, localities, and the private sector, providing a wider range of transportation options than exist today. These pair and water leverage of funding that NPS currently has great difficulty accessing.

NPCA wholeheartedly endorses your bill as a creative new mechanism to fulfill the promise for the national parks. The NPCA system: “to conserve the scenery and the natural and historic objects and the wildlife therein, and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.”

We look forward to working with you to move this legislation to enactment.

Sincerely,

Thomas C. Kibran,
President.

Friends of the Earth,

Dear Senator Sarbanes:

On behalf of Friends of the Earth, I want to thank you for proposing the Transit in Parks Act. This important bill will enhance transit options for access to and within our national parks. Your leadership in this matter is greatly appreciated.

Americans are visiting our national parks at an unprecedented rate, with visitation growing from 265 million visitors in 1975 to approximately 286 million visitors last year. With increased visitation comes an increased burden on the parks. As more and more individuals take their cars into our national parks, fragile habitat, endangered plants and animals, unique cultural treasures, and spectacular natural resources and vistas are being degraded by air and water pollution, noise intrusion, and inappropriate use.

Your innovative legislation would establish a program within the Department of Transportation dedicated to enhancing transit options and accessibility to the national parks. This is of vital importance for the future of our national parks. Your initiative will boost the role of alternative transportation systems. As such, the proposed legislation essentially defines those most heavily impacted by visitation.

For instance, development of transportation centers and auto parking lots outside the parks, complements the use of buses, vans, or rail systems, and/or bicycle and pedestrian pathways would provide much more efficient means of handling the crush of visitation.

The benefit of such systems has already been demonstrated in a number of parks such as Zion and Cape Cod.

We look forward to working with you to move this legislation to enactment.

Sincerely,

David Hirsch,
Transportation Policy Coordinator.

Environmental Defense,

Dear Senator Sarbanes:

I am writing on behalf of the Environmental Defense Fund and our 200,000 members to express support for your bill, the Transit in Parks Act, which will provide dedicated funding for transit projects in our national parks. To many of our parks suffer from the consequences of poor transportation systems; traffic congestion, air and water pollution, and disturbance of natural ecosystems.

Increased funding for attractive and effective transit services to and within our national parks is essential to mitigating these growing problems. A good working transit system in a number of our national parks will make the park experience not only more enjoyable, but also more effective for those who travel there. It will help improve environmental conditions. Air pollutants that exacerbate respiratory health problems, damage vegetation, and contribute to haze which too often obliterates the views at our parks, will be abated by decreasing the number of cars and congestion levels in the parks. Improved transit related to our parks is key to diversifying transportation choices and access for the benefit of all who wish to visit our national park system.

It is also vital in assuring equal access for all citizens to our parks, including those without cars.

We appreciate your leadership on this issue and your dedication to the health of our national parks and expanded choices in our transportation systems. We look forward to working with you to move your legislation forward.

Sincerely,

Community Transportation Association,

Dear Senator Sarbanes:

On behalf of community transportation services in many of the smaller communities that border these national parks, monuments, and recreational areas, and our association has members actively involved in providing public transportation services at several national parks.

All of us know the danger that congestion and increased traffic pose for the future of these sites and locations. Your continued sponsorship of the Transit in Parks Act is an important step in helping to ensure that America’s natural beauty remains a continuous part of our nation’s future.

We have members throughout the country whose experiences support the principle that alternative transportation systems in and near our national parks and public lands can improve mobility, support the economic vitality of these parks’ “gateway communities,” and provide a dramatic improvement in the experiences of park visitors, employees, and community residents alike.
As an illustration of this point, enclosed is an article recently published in our Community Transportation magazine that discusses public transportation as part of the solution to traffic congestion and mobility issues in Acadia, Yosemite and Zion National Parks. These success stories could be replicated in many other communities under your Transit in Parks proposal.

We appreciate your dedicated efforts and initiative in this regard, and look forward to helping you advance this important piece of legislation.

Sincerely,

Dale J. Marsico
Executive Director.

AMENDMENTS SUBMITTED AND PROPOSED

SA 831. Mr. BOND (for himself, Mr. Roberts, and Mr. Helms) proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table.

SA 832. Mr. FRIST (for himself, Mr. Breaux, and Mr. Jeffords) submitted an amendment intended to be proposed by him to the bill S. 1052, supra.

SA 833. Mr. WARNER proposed an amendment to the bill S. 1052, supra.

SA 834. Ms. SNOWE (for herself, Mrs. LINCOLN, Mr. DWYER, Mr. NELSON, of Nebraska, Mr. SPECTER, Mr. MCCAIN, Mr. BAUCUS, Ms. STABENOW, and Mr. GRAHAM) proposed an amendment to the bill S. 1052, supra.

SA 835. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 1052, supra; which was ordered to lie on the table.

SA 836. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 1052, supra; which was ordered to lie on the table.

SA 837. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 1052, supra; which was ordered to lie on the table.

SA 838. Mrs. HUTCHISON submitted an amendment intended to be proposed by her to the bill S. 1052, supra; which was ordered to lie on the table.

SA 839. Mrs. HUTCHISON (for herself and Mrs. CLINTON) submitted an amendment intended to be proposed by her to the bill S. 1052, supra.

SA 840. Mr. ENZI proposed an amendment to the bill S. 1052, supra.

SA 841. Mr. SANTORUM submitted an amendment intended to be proposed by him to the bill S. 1052, supra; which was ordered to lie on the table.

SA 842. Mr. DWYER submitted an amendment intended to be proposed by him to the bill S. 1052, supra.

SA 843. Mr. GRAMM (for himself and Mr. MCCAIN) proposed an amendment to the bill S. 1052, supra.

SA 844. Mr. SPECTER proposed an amendment to the bill S. 1052, supra.

SA 845. Mr. GRASSLEY proposed an amendment to the bill S. 1052, supra.

SA 846. Mr. NICKLES (for himself and Mr. ENZI) proposed an amendment to the bill S. 1052, supra.

SA 847. Mr. BROWNBACK proposed an amendment to the bill S. 1052, supra.

SA 848. Mr. ENZI proposed an amendment to the bill S. 1052, supra.

SA 849. Mr. ENZI proposed an amendment to the bill S. 1052, supra.

TEXT OF AMENDMENTS

SA 831. Mr. BOND (for himself, Mr. ROBERTS, and Mr. HELMS) proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 154, between lines 2 and 3, insert the following:

"(11) MINIMUM SHARE OF SETTLEMENT OF AWARD.—''(A) IN GENERAL.—Except as provided in subparagraph (B), a participant or beneficiary (or the estate of such participant or beneficiary) shall receive not less than 85 percent of any award made as a result of a cause of action brought by the participant or beneficiary (or estate) under this subsection, after subtracting the amount of any attorneys' fees from the total amount of such award.

''(B) EXCEPTION.—This paragraph shall not apply where the amount awarded as a result of a cause of action brought by the participant or beneficiary (or estate) under this subsection is less than $100,000.

''(C) DEFINITIONS.—In this paragraph:

''(i) AWARD.—The term 'award' means the sum of—

''(I) any monetary consideration provided to a participant or beneficiary (or the estate of such participant or beneficiary) by a fiduciary of a group health plan, a health insurance issuer offering health insurance coverage in connection with a group health plan, or an agent of the plan, issuer, or plan sponsor in connection with a cause of action brought under this subsection, including any monetary consideration provided for in any—

''(aa) final court decision;

''(bb) court order;

''(cc) settlement agreement;

''(dd) arbitration procedure; or

''(ee) alternative dispute resolution procedure (including mediation); less

''(II) any reimbursement for any expenses incurred in connection with such representation or work.

''(ii) the failure described in clause (i) is

''(A) FAILURE TO COMPLY WITH EXTERNAL REVIEW.—Section 502 of the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

On page 156, line 2, after "treatment" insert the following: "The name of the designated decision-maker (or decision-makers) appointed under section 522(n)(2) of the Employee Retirement Income Security Act of 1974 for purposes of making final determinations under section 103 and approving coverage pursuant to the written determination of an independent medical reviewer under section 104."

Beginning on page 139, strike line 21 and all that follows through line 14 on page 171, and insert the following:

SEC. 302. AVAILABILITY OF CURE REMEDIES.

(a) IN GENERAL.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132) is amended by adding at the end the following:

"(c) CAUSE OF ACTION RELATING TO DENIAL OF A CLAIM FOR HEALTH BENEFITS.—

"(1) IN GENERAL.—"(A) FAILURE TO COMPLY WITH EXTERNAL MEDICAL REVIEW.—With respect to an action commenced by a participant or beneficiary in connection with a claim for benefits under a group health plan, if—

"(i) a designated decision-maker described in subparagraph (B) fails to exercise ordinary care in approving coverage pursuant to the written determination of an independent medical reviewer under section 104(d)(3)(F) of the Employee Retirement Income Security Act that reverses a denial of the claim for benefits; and

"(ii) the failure described in clause (i) is the proximate cause of substantial harm (as defined in paragraph (10)(G)) to the participant or beneficiary;
such designated decision-maker shall be liable to the participant or beneficiary (or the estate) for economic and noneconomic damages in connection with such failure and such injury or death (subject to paragraph (4)).

"(B) WRONGFUL DETERMINATION RESULTING IN DELAY IN PROVIDING BENEFITS.—With respect to an action commenced by a participant or beneficiary (or the estate of the participant or beneficiary) in connection with a claim for benefits under a group health plan, if—

(i) a designated decision-maker described in paragraph (2)—

"(i) fails to exercise ordinary care in making a determination denying the claim for benefits under section 102 of the Bipartisan Patient Protection Act (relating to an initial claim for benefits); or

"(ii) the denial described in clause (i) is reversed by an independent medical reviewer under section 102 of the Bipartisan Patient Protection Act; or

(ii) the determination of the reviewer under section 102 of the Bipartisan Patient Protection Act shall have the exclusive authority under the group health plan—

(i) to make determinations with respect to a claim for benefits under section 102 of the Bipartisan Patient Protection Act (relating to an initial claim for benefits); and

(ii) to make final determinations under section 103 of such Act (relating to an internal appeal); or

(iii) to approve coverage pursuant to the written determination of an independent medical reviewer under section 102 of the Bipartisan Patient Protection Act.

(2) DESIGNATED DECISION-MAKER.—

(iii) the delay attributable to the failure described in clause (i) is the proximate cause of such injury or death, or the wrongful death of, the participant or beneficiary; such designated decision-maker shall be liable to the participant or beneficiary (or the estate) for economic and noneconomic damages in connection with such failure and such injury or death (subject to paragraph (4)).

(4) PLAN DOCUMENTS.—The designated decision-maker shall be specifically designated as such in the written instruments of the plan (under section 103 of such Act as required under section 121(b)(14) of the Bipartisan Patient Protection Act).

(5) AUTHORITY.—A designated decision-maker described in clause (A) shall have the exclusive authority under the group health plan—

(i) to make determinations with respect to a claim for benefits under section 102 of the Bipartisan Patient Protection Act (relating to an initial claim for benefits); and

(ii) to make final determinations under section 103 of such Act (relating to an internal appeal); or

(iii) to approve coverage pursuant to the written determination of independent medical reviewers under section 102 of such Act.

(6) ALLOCATION OF RESPONSIBILITY.—Responsibility may be allocated among different designated decision-makers with respect to—

(i) for purposes of paragraph (1)(A), the approval of coverage under section 104 of the Bipartisan Patient Protection Act; and

(ii) for purposes of paragraph (1)(B), making determinations on a claim for benefits under section 102 of such Act (relating to an initial claim for benefits); and

(iii) for purposes of paragraph (1)(B), making final determinations on claims for benefits under section 103 of such Act (relating to internal appeals), except that not more than one designated decision-maker may be appointed with respect to each level of review under clauses (i), (ii), and (iii). Where such an allocation is made, the liability under a cause of action under paragraph (1) shall be assessed against the appropriate designated decision-maker.

(7) QUALIFICATIONS.—

(i) CERTIFICATION OF ABILITY.—To be appointed as a designated decision-maker under this paragraph, a person shall provide to the plan sponsor or named fiduciary, or any other person or group of persons to whom the plan sponsor or named fiduciary is accountable, a certification of such person's ability to meet the requirements of clause (ii) relating to financial obligation for liability under this subsection. Such certification shall be provided upon appointment and not less frequently than annually thereafter, or if the designation is pursuant to a multi-year contract, in connection with the renewal of the contract, but in no case less than once every 3 years.

(ii) OTHER REQUIREMENTS RELATING TO FINANCIAL OBLIGATIONS.—For purposes of clause (i), requirements relating to financial obligation for liability shall include evidence of—

(I) coverage of the person under insurance policies or other arrangements, secured and maintained by the person, to insure the person against losses arising from professional liability claims, including those arising from being designated as a designated decision-maker under this paragraph; or

(II) minimum capital and surplus levels that are maintained by the person to cover any losses as a result of liability arising from being designated as a designated decision-maker under this paragraph.

The appropriate amounts of liability insurance shall be determined by an actuary using sound actuarial principles and accounting practices pursuant to the guidelines established by the National Academy of Actuaries and shall be maintained throughout the course of the contract in which such person is designated as a designated decision-maker.

(8) FLEXIBILITY IN ADMINISTRATION.—A group health plan, or health insurance issuer offering health insurance coverage in connection with a group health plan, may provide—

(i) that any person or group of persons may serve in more than one capacity with respect to the plan or coverage (including service as a designated decision-maker, administrator, and named fiduciary); or

(ii) that a designated decision-maker may employ one or more persons to direct the advice with respect to any responsibility of such decision-maker under the plan or coverage.

(9) FAILURE TO APPOINT.—

(i) IN GENERAL.—With respect to any cause of action under paragraph (1) relating to a denial of a claim for benefits where a designated decision-maker has not been appointed in accordance with this paragraph, the plan sponsor or named fiduciary responsible for the plan shall be deemed to be the designated decision-maker.

(ii) LIMITATION ON APPOINTMENT.—A treatment or patient service that is the subject of an action under this subsection may not be designated as a designated decision-maker under this paragraph unless the professional—

(I) is a person or entity that may be appointed in accordance with subparagraph (A); and

(II) specifically agrees to accept such appointment in accordance with the requirements under this subsection.

(10) REQUIREMENT OF EXHAUSTION OF INDEPENDENT MEDICAL REVIEW.—

(A) IN GENERAL.—Paragraph (1) shall apply only if a final determination denying a claim for benefits under section 102 of the Bipartisan Patient Protection Act has been referred to an independent medical reviewer under section 104(d) of such Act and a written determination by an independent medical reviewer to reverse such final determination has been issued with respect to such review or where the coverage for the benefit involved is approved after the denial is referred to the independent medical reviewer but prior to the determination of the reviewer under section 102.

(B) EXCEPTION TO EXHAUSTION FOR NEEDED CARE.—A participant or beneficiary may seek relief under subsection 502(a)(1)(B) prior to the exhaustion of administrative remedies under section 103 or 104 of the Bipartisan Patient Protection Act (as required under subsection 502(a)(1)(B)) if it is demonstrated to the court, by a preponderance of the evidence, that the exhaustion of such remedies would cause irreparable harm to the health of the participant or beneficiary. Any determination that already have been made under section 102, 103, or 104 of such Act in such case, or that are made in such case while an action under this subparagraph is pending, shall be given due consideration by the court in any action under this subsection in such case. Notwithstanding the awarding of relief under subsection 502(a)(1)(B) pursuant to this subparagraph, no relief shall be available under subparagraph (B).

(11) SUBMISSION.—

(i) paragraph (1), with respect to a participant or beneficiary, unless the requirements of subparagraph (A) are met; or

(ii) subsection (q) unless the requirements of such subsection are met.

(12) LIMITATIONS ON RECOVERY OF DAMAGES.—
has increased or decreased from the such September of the preceding calendar year published by the Bureau of Labor Statistics, for consumers (United States city average), pub-

lished by the Bureau of Labor Statistics, for September of the preceding calendar year has increased or decreased from the such Index for September of 2002.

(C) SEVERAL LIABILITY.—In the case of any action commenced pursuant to para-

graph (1), the designated decision-maker shall be liable only for the amount of non-

economic damages attributable to such des-

ignated decision-maker in direct proportion to such decision-maker’s share of fault or re-

sponsibility for the injury suffered by such partici-

pant or beneficiary. In all such cases, the liability of a designated decision-maker for noneconomic damages shall be several and not joint.

(D) TREATMENT OF COLLATERAL SOURCE PAYMENTS.—

(i) IN GENERAL.—In the case of any action commenced pursuant to paragraph (1), the total amount of damages received by a partici-

pant or beneficiary under such action shall be reduced, in accordance with clause (ii), by any other payment that has been, or will be, made to such participant or bene-

ficiary, pursuant to an order or judgment of another court, to compensate such partici-

pant or beneficiary for the injury that was the subject of such action.

(ii) AMOUNT OF REDUCTION.—The amount by which an award of damages to a partici-

pant or beneficiary for an injury shall be re-

duced under clause (i) shall be—

(I) the total amount of any payments (other than such award) that have been made or that could be made to such participant or benefici-

ary to pay costs of or compensate such participant or beneficiary for the injury that was the subject of the action; less

(II) any other payment that has been, or will be, made to such participant or benefici-

ary (or by the spouse, parent, or legal guardian of such participant or benefici-

ary) to secure the payments described in subclause (I).

(iii) DETERMINATION OF AMOUNTS FROM COLLATERAL SOURCES.—The reduction re-

quired under clause (ii) shall be determined by the court in a pretrial proceeding. At the subsequent trial no evidence shall be admitted as to the amount of any charge, pay-

ments, or damage for which a participant or benefici-

ary has received payment from a collateral source or the obligation for which has been assured by a third party; or other evidence, significant or otherwise, will be received from a collateral source or the obligation for which has been assured by a third party.

(iv) AWARD OF PUNITIVE DAMAGES.—Notwithstanding any other provi-

sion of law, in the case of any action com-

menced pursuant to paragraph (1), the court may reduce the amount of punitive, exemplary, or similar damages against a defendant.

(v) AFFIRMATIVE DEFENSES.—In the case of any cause of action under paragraph (1), it shall be an affirmative defense that—

(A) the designated decision-maker of a group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, involved in the failure to provide or authorize medical care did not receive from the participant or ben-

eficiary (or authorized representative) or the treating health care professional (if any), the information requested by the plan or issuer to enable it to determine the eligibility of the par-

ticipant or beneficiary that was necessary to make a determination on a claim for bene-

fits under section 102 of the Bipartisan Pa-

tient Protection Act or a final determination on a claim for benefits under section 103 of such Act;

(B) the participant or beneficiary (or au-

thorized representative) that—

(I) was in possession of facts that were sufficient to enable the participant or ben-

eficiary (or authorized representative) to know that an expedited review under section 102, 103, or 104 of such Act would have pre-

vented the harm that is the subject of the action; and

(II) failed to notify the plan or issuer of the need for such an expedited review;

(C) the qualified external review entity or an independent medical reviewer failed to meet the timeliness standards under section 104 of such Act, or a period of time elapsed after coverage has been authorized.

Nothing in this paragraph shall be construed to limit the application of any other affirma-

tive defense that is applicable to the cause of action involved.

(vi) WAIVER OF INTERNAL REVIEW.—In the case of any cause of action under paragraph (1), the waiver of internal re-

view under section 103(a)(4) of the Bipartisan Patient Protection Act by the group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, shall not be used in determining liability.

(7) LIMITATIONS ON ACTIONS.—Paragraph (1) shall not apply in connection with any action that is commenced more than 3 years before the date on which the failure described in paragraph (1) occurred.

(8) PROTECTION OF THE REGULATION OF QUALITY OF CARE UNDER STATE LAW.—Nothing in this subsection shall be construed to preclude any action under State law against a person or entity for liability for failure to provide an item or service that is specifically excluded under the plan or coverage.

(9) CONSTRUCTION.—Nothing in this sub-

section shall be construed as authorizing a cause of action under paragraph (1) for the failure of a group health plan or health insur-

ance issuer to provide an item or service that is specifically excluded under the plan or coverage.

(10) DEFINITIONS.—In this subsection:

(A) AUTHORIZED REPRESENTATIVE.—The term ‘authorized representative’ has the meaning given such term in section 102(e)(1) of the Bipartisan Patient Protection Act; and

(B) CLAIM FOR BENEFITS.—Except as pro-

vided for in paragraph (8), the term ‘claim for benefits’ shall have the meaning given such term in section 102(e)(1) of the Bipar-

tisan Patient Protection Act; and

(C) GROUP HEALTH PLAN.—The term ‘group health plan’ shall have the meaning given such term in section 733(b)(1).

(D) HEALTH INSURANCE COVERAGE.—The term ‘health insurance coverage’ has the meaning given such term in section 733(b)(2).

(E) HEALTH INSURER.—The term ‘health insurance issuer’ has the meaning given such term in section 733(b)(2).

Any such claim shall be maintained ex-

clusively under section 502(b)(3)(A).

All such claims shall be maintained ex-

clusively under section 502(b)(1).

(1) ERISA.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by subsections (a) and (b), is further amended by adding at the end the following:

(p) AUTHORITY TO IMPOSE CIVIL PENALTIES FOR FAILURE TO PROVIDE A PLAN BENEFIT NOT ELIGIBLE FOR MEDICAL REVIEW.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by subsection (a), is further amended by adding after subsection (a)(3)(B) the following:

(2) AUTHORITY TO IMPOSE CIVIL PENALTIES FOR FAILURE TO PROVIDE A PLAN BENEFIT NOT ELIGIBLE FOR MEDICAL REVIEW.—In con-

nection with any action commenced pursuant to section 502(m)(2) of a group health plan or a health insurance issuer (that offers health insurance coverage in connection with a group health plan) not to exceed $100,000 where—

(1) in its final determination under section 103(d)(2) of the Bipartisan Patient Pro-

tect Act, the designated decision-maker fails to provide, or authorize coverage of, a benefit to which a participant or beneficiary is entitled under the terms and conditions of the plan;

(2) the participant or beneficiary has ap-

pealed such determination under section 104 of such Act and such determination is not subject to independent medical review as de-

termined by a qualified external review entity under section 104(c)(3)(A) of such Act;

(3) the plan has failed to exercise ordinary care in making a final determination under section 103(d)(2) of such Act denying a claim for benefits under the plan; and

(4) that denial is the proximate cause of substantial harm (as described in subsection (n)(10)(G)) the participant or beneficiary.

(c) LIMITATION ON CERTAIN CLASS ACTION LITIGATION.—

(1) ERISA.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by subsections (a) and (b), is further amended by adding at the end the following:

(3) LIMITATION ON CLASS ACTION LITIGATION.—

(i) IN GENERAL.—Any claim or cause of action that is maintained under this section in connection with a group health plan, or health insurance coverage issued in connec-

tion with a group health plan, or group health plan, or group insurance contract, derivative action, or as an action on behalf of any group of 2 or more claimants,
may be maintained only if the class, the derivative of such decision or action is limited to the participants or beneficiaries of a group health plan established by only 1 plan sponsor. No action maintained by such class, such derivative claimant, or such group of claimants may be joined in the same proceeding with any action maintained by another class, derivative claimant, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms ‘group health plan’ and ‘health insurance coverage’ have the meanings given such terms in section 733."

(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after the date of enactment of the Bipartisan Patient Protection Act. This subsection shall apply to civil actions that are pending and have not been finally determined by judgment or settlement prior to such date of enactment.

(b) Amounts described.—For purposes of subparagraph (A), the amounts described in this subparagraph are as follows:

(1) With respect to a recovery in a cause of action described in subparagraph (A) that does not exceed $100,000, the amount of attorneys’ fees awarded may not exceed an amount equal to 1/2 of the amount of the recovery.

(2) With respect to a recovery in such a cause of action that exceeds $100,000 but does not exceed $500,000, the amount of the attorneys’ fees awarded may not exceed an amount equal to 10 percent of such excess recovery above $100,000.

(3) With respect to a recovery in such a cause of action that exceeds $500,000, the amount of the attorneys’ fees awarded may not exceed an amount equal to 15 percent of such excess recovery above $500,000.

(c) Equitable discretion.—A court in its discretion may adjust the amount of any award of attorneys’ fees required under subparagraph (A) as equity and the interests of justice may require.

On page 170, between lines 21 and 22, insert the following:

(9) LIMITATION ON ATTORNEYS’ FEES.—

(A) IN GENERAL.—Notwithstanding any other provision of law, any arrangement, agreement, or contract regarding attorneys’ fees, subject to subparagraph (B), a court shall limit the amount of attorneys’ fees that may be awarded under subparagraph (A) in an action by or on behalf of a participant or beneficiary (or the estate of such participant or beneficiary) who brings a cause of action under paragraph (1) to the amount of attorneys’ fees allowed under subparagraph (A) as equity and the interests of justice may require.

SA 834. Ms. SNOE (for herself, Mrs. LINCOLN, Mr. DEWINE, Mr. NELSON of Nebraska, Mr. SPECTER, Mr. MCCAIN, Mr. BAUCUS, Ms. STABENOW, and Mr. CHAFEE) proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 106, between lines 16 and 17, insert the following:

(19) DESIGNATED DECISIONMAKERS.—A description of the participants and beneficiaries with respect to whom each designated decisionmaker under the plan has assumed liability under section 502(a)(1)(A) of the Employee Retirement Income Security Act of 1974 and all actions commenced on or after such date.

(d) CONFORMING AMENDMENT.—Section 502(a)(1)(A) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132(a)(1)(A)) is amended by inserting “(or)” after “or” and before “and”.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to acts and omissions (from which a cause of action arises) occurring on or after October 1, 2002.

SA 833. Mr. WARNER proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 154, between lines 2 and 3, insert the following:

(11) LIMITATION ON AWARD OF ATTORNEYS’ FEES.—

(A) IN GENERAL.—Subject to subparagraph (C), with respect to a participant or beneficiary (or, if a participant or beneficiary who brings a cause of action under this subsection and prevails in that action, the amount of attorneys’ fees that a court may award to such participant, beneficiary, or estate under subsection (g)(1) (not including the reimbursement of actual out-of-pocket expenses of an attorney as approved in such action) may not exceed the sum of the amounts described in subparagraph (B).
CONGRESSIONAL RECORD—SENATE

“(ii) prohibit a cause of action under para- graph (1) relating to quality of care; or

“(iii) limit liability that otherwise would arise from the provision of the item or serv- ices or the performance of a medical proce- dure.

“(19) EXEMPTION FROM PERSONAL LIABILITY FOR INDIVIDUAL MEMBERS OF BOARDS OF DIREC- TORS, JOINT BOARDS OF TRUSTEES, ETC.—Any individ- ual who

“(A) a member of a board of directors of an employer or plan sponsor; or

“(B) a member of an association, com- mittee or other group of repre- sentatives of the entities that are the plan sponsor of plan maintained by two or more employers and one or more employee organi- zations;

shall not be personally liable under this sub- section for conduct that is within the scope of employment of the individuals unless the individual acts in a fraudulent manner for personal enrichment.

“(o) REQUIREMENTS FOR DESIGNATED DECISIONMAKERS OF GROUP HEALTH PLANS.—

“(1) IN GENERAL.—For purposes of subsection (n)(17) and section 514(d)(9), a des- ignated decisionmaker meets the require- ments of paragraph (2) with respect to any participant or beneficiary if—

“(A) such designation is in such form as may be prescribed in regulations of the Sec- retary.

“(B) the designated decisionmaker—

“(i) meets the requirements of paragraph (2).”

“(2) (ii) assumes unconditionally all liability of the employer or plan sponsor involved (and any employee thereof acting within the scope of employment) either arising under subsection (n) or arising in a cause of action permitted under section 514(d) in connection with actions (and failures to act) of the em- ployer or plan sponsor (or employee) occur- ring during the period in which the designa- tion under subsection (n)(17) or section 514(d)(9) is in effect relating to such partici- pant or beneficiary.

“(iii) agrees to be substituted for the em- ployer or plan sponsor (or employee) in the action and not to raise any defense with re- spect to such liability that the employer or plan sponsor (or employee) may not raise, and

“(iv) where paragraph (2)(B) applies, as- sumes unconditionally all liability under the group health plan to make medically reviewable decisions under the plan with respect to such participant or beneficiary.

“(C) the designated decisionmaker and the participants and beneficiaries for whom the decisionmaker has assumed liability are identified in the written instrument required under section 402(a) and as required under section 121(b)(19) of the Bipartisan Patient Protection Act.

Any liability assumed by a designated dec- isionmaker relating to a group health plan shall be in addition to any liability that it may otherwise have under applicable law.

“(2) QUALIFICATIONS FOR DESIGNATED DECISIONMAKERS.—

“(A) IN GENERAL.—Subject to subparagraph (B), an entity is qualified under this sub- section to serve as a designated decisionmaker with respect to a group health plan if the en- tity has the ability to assume the liability described in paragraph (1) with respect to participants and beneficiaries under such plan, and the arrangements relating to the financial obligation for timely satisfying the assumed liability, and maintains with the

plan sponsor and the Secretary certification of such ability. Such certification shall be pro- vided to the plan sponsor or named fidu- ciary and to the Secretary upon designation under subsection (n)(17)(B) or section 514(d)(9)(B) and not more frequently than an- nually thereafter, or if such designation consti- tutes a multiyear arrangement, in con- junction with the renewal of the arrange- ment.

“(B) SPECIAL QUALIFICATION IN THE CASE OF CERTAIN REVIEWABLE DECISIONS.—In the case of a group health plan that provides benefits consisting of a participant or beneficiary only through health insurance coverage offered by a single health insurance issue, such issuer is the only entity that may fulfill the requirements of this paragraph to serve as a designated decisionmaker with respect to such participant or beneficiary, and shall serve as the designated decisionmaker unless the employer or plan sponsor acts af- firmatively to prevent such service.

“(3) REQUIREMENTS RELATING TO FINANCIAL OBLIGATIONS.—For purposes of paragraph (2) and as required under section 402(a) and as required under section 502(o)(1) with respect to such participant or beneficiary. Such subsection (n) or section 514(d)(9) is in effect relating to such participant or beneficiary, and

“(B) automatic designation.—A health in- surance issuer shall be deemed to be a des- ignated decisionmaker for purposes of sub- paragraph (A) with respect to the partici- pants and beneficiaries of an employer or plan sponsor, whether or not the employer or plan sponsor makes such a designation, and shall be deemed to have assumed uncondi- tionally all liability of the employer or plan sponsor under such designation in accord- ance with subsection (o), unless the em- ployer or plan sponsor affirmatively enters into a contract to prevent the service of the designated decisionmaker.

“(10) PREVIOUSLY PROVIDED SERVICES.—

“(A) IN GENERAL.—Except as provided in this paragraph, a cause of action shall not arise under paragraph (1) where the denial involved relates to an item or service that has already been fully provided to the partici- pant or beneficiary under the plan or cov- erage and the claim relates solely to the sub- strates or denial of payment for the provision of such item or service.

“(B) EXCEPTION.—Nothing in subparagraph (A) shall be construed to preclude a cause of action under para- graph (1) where the nonpayment involved re- sults in the participant or beneficiary being unable to receive further items or services that the participant or beneficiary directly relates to such service involved in the denial referred to in sub- paragraph (A) or that are part of a con- tinuing treatment or series of procedures;

“(ii) prohibit a cause of action under para- graph (1) relating to quality of care; or

“(iii) limit liability that otherwise would arise from the provision of the item or serv- ices or the performance of a medical proce- dure.

“(11) EXEMPTION FROM PERSONAL LIABILITY FOR INDIVIDUAL MEMBERS OF BOARDS OF DIREC- TORS, JOINT BOARDS OF TRUSTEES, ETC.—Any individ- ual who is

“(A) a member of a board of directors of an employer or plan sponsor; or

“(B) a member of an association, com- mittee, employee organization, joint board of trustees, or other similar group of repre- sentatives of the entities that are the plan sponsor of plan maintained by more employers and one or more employee organi- zations;

shall not be personally liable under this sub- section for conduct that is within the scope of employment of the individuals unless the individual acts in a fraudulent manner for personal enrichment.
SA 835. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

SEC. 136. PRESERVATION OF THE HIPPOCRATIC OATH.
(a) In General.—The provisions of any contract or agreement, or the operation of any contract or agreement, between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a physician (or group of physicians) shall require that such physician—
(1) provide notice to each participant, beneficiary, or enrollee that the physician treats of whether or not the physician has taken or will take an action that does uphold the Oath. The plan or issuer involved shall permit a notice under subsection (a) that a physician (or group of physicians) shall require that such physician—
(1) provide notice to each participant, beneficiary, or enrollee that the physician does not hold the Hippocratic Oath, the group health plan or other health insurance issuer meets the requirements of this subsection if—
(a) any penalty assessed that is not awarded to the aggrieved participant or beneficiary; and
(b) any non-economic or punitive damages awarded in excess of $2,000,000.
(b) STATE REQUIREMENTS.—
(1) STATE HEALTH INSURANCE TRUST FUND.—A State that desires to receive payments under subsection (a) shall establish a State health insurance trust fund.
(2) REFUNDABLE TAX CREDIT.—
(A) IN GENERAL.—The refundable tax credit described in subsection (a)(1) shall—
(i) be available to any resident of a State who—
(I) is without access to adequate health insurance through the resident’s employer; or
(II) is from a family with an income that is less than 220 percent of the poverty line, is not eligible for benefits under the medicaid program under title XIX of the Social Security Act, is not eligible for veteran’s health benefits, and is younger than 65 years of age; and
(ii) be used to provide a benefit for private insurance that includes, at a minimum, catastrophic coverage.
(B) TIME PERIOD.—
(i) IN GENERAL.—A State shall have in place a refundable tax credit as described in subsection (a)(1), not later than 2 years after the date of enactment of the Bipartisan Patient Protection Act.
(ii) TRANSITION.—A State that fails to have a refundable tax credit in place as required by clause (i) shall transfer any funds described in subsection (a)(2) to the National Institutes of Health.

SA 837. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

SEC. 303. DEDICATION OF PUNITIVE DAMAGES FROM PLAN OR ISSUER OF HEALTH INSURANCE COVERAGE.
(a) AWARD OF PORTION OF DAMAGES.—
(1) IN GENERAL.—If any penalty is assessed, or non-economic or punitive damages are awarded with respect to a cause of action under section 502(a) or 514(d) of the Employee Retirement Income Security Act of 1974 (as added by section 302), the court shall award the amount described in paragraph (2) to the State health insurance trust fund established under subsection (b) for the State in which the claim was filed to enable the State to provide refundable tax credits to eligible individuals in the State to purchase health insurance coverage.
(2) AMOUNT.—The amount awarded to a State under paragraph (1) shall consist of—
(A) any penalty assessed that is not awarded to the aggrieved participant or beneficiary; and
(B) any non-economic or punitive damages awarded in excess of $2,000,000.
(b) STATE REQUIREMENTS.—
(1) STATE HEALTH INSURANCE TRUST FUND.—A State that desires to receive payments under subsection (a) shall establish a State health insurance trust fund.
(2) REFUNDABLE TAX CREDIT.—
(A) IN GENERAL.—The refundable tax credit described in subsection (a)(1) shall—
(i) be available to any resident of a State who—
(I) is without access to adequate health insurance through the resident’s employer; or
(II) is from a family with an income that is less than 220 percent of the poverty line, is not eligible for veteran’s health benefits, and is younger than 65 years of age; and
(ii) be used to provide a benefit for private insurance that includes, at a minimum, catastrophic coverage.
(B) TIME PERIOD.—
(i) IN GENERAL.—A State shall have in place a refundable tax credit as described in subsection (a)(1), not later than 2 years after the date of enactment of the Bipartisan Patient Protection Act.
(ii) TRANSITION.—A State that fails to have a refundable tax credit in place as required by clause (i) shall transfer any funds described in subsection (a)(2) to the National Institutes of Health.
(B) does not have a material familial, financial, or professional relationship with such party; and
(C) does not otherwise have a conflict of interest with such a party (as determined under regulations).

(2) EXCEPTION FOR REASONABLE COMPENSATION.—Nothing in paragraph (1) shall be construed to prohibit receipt by a trustee of the separate trust created under subsection (a)(1) for the conduct of the trustee’s duties, except that any such compensation—

(A) may not exceed a reasonable level; and
(B) may not be contingent on any decision rendered by the trustee in the exercise of the trustee’s duties.

(3) RELATED PARTY.—For purposes of this subsection, the term ‘related party’ means, in connection with a separate trust forming a part of the plan or the arrangement for such coverage, the plan, the plan sponsor, any health insurance issuer offering the coverage involved, or any fiduciary (except as provided in subsection (c)(2)), officer, director, or employee of such plan, plan sponsor, or issuer.

(e) RULES OF CONSTRUCTION.—

(1) ADDITIONAL EMPLOYEE CONTRIBUTIONS PERMITTED.—The requirements of this section shall not be treated as not met solely because a participant, beneficiary, or enrollee under such a plan or arrangement for coverage for purposes of acquiring health insurance coverage, in order to acquire such coverage.

(2) EXCEPTIONS FOR ORDER PARTIES UNAFFECTED.—Nothing in this section shall be construed to affect any cause of action in connection with the health insurance coverage referred to in subsection (a)(1) against the plan sponsor or health insurance issuer providing such coverage or any other party (other than the employer).

(f) REGULATIONS.—The Secretary of Health and Human Services, the Secretary of Labor, and the Secretary of the Treasury shall, to the extent necessary, carry out the provisions of this section. Such regulations shall be issued consistent with section 104 of the Health Insurance Portability and Accountability Act of 1996 (42 U.S.C. 300gg–92 note).

SA 838. Mrs. HUTCHISON submitted an amendment intended to be proposed by her to the bill S. 1052, to amend the Medicare Access and CHIP Reauthorization Act of 2015 to provide for precertification.

TREATMENTS.—A description of the process by which the participant, beneficiary, or enrollee may be liable;

(2) BENEFITS.—A description of the covered benefits, including—

(A) any in-and out-of-network benefits;

(B) any benefits if services covered under the plan or coverage if such services are covered;

(C) any specific exclusions or express limitations or benefits described in section 112(b)(2)(C);

(D) any other benefit limitations, including any annual or lifetime benefit limits and any monetary limits or limits on the number of visits, days, or services, and any specific coverage exclusions; and

(E) any definition of medical necessity used in making coverage determinations by the plan, issuer, or claims administrator.

(3) COST-SHARING.—A description of any cost-sharing requirements, including:

(A) any premiums, deductibles, coinsurance, copayment amounts, and liability for balance billing, for which the participant, beneficiary, or enrollee will be responsible under each option available under the plan;

(B) any maximum out-of-pocket expense for which the participant, beneficiary, or enrollee may be liable;

(C) any additional cost-sharing or charges for health care services not payable under the terms and conditions of the plan or coverage, and the right to obtain coverage for approved clinical trials under section 119 if such section applies.

(4) PREAUTHORIZATION REQUIREMENTS.—A description of any preauthorization and procedures to be used by participants, beneficiaries, and enrollees in accessing specialty care and obtaining referrals to participating and nonparticipating specialists, including any limitations on choice of health care professionals referred to in section 112(b)(2) and the right to timely access to specialists care under section 114 if such section applies.

(5) CLINICAL TRIALS.—A description of the circumstances and conditions under which participation in clinical trials is covered under the terms and conditions of the plan or coverage, and the right to obtain coverage for approved clinical trials under section 119 if such section applies.

6. PRESCRIPTION DRUGS.—To the extent the plan or issuer provides coverage for prescription drugs, a statement of whether such coverage is limited to drugs included in a formulary, the procedures for determining which drugs are covered, and the right to appeal an initial determination that the plan does not cover a drug, and a description of the appeal process available to participants, beneficiaries, and enrollees in obtaining access to treatment for nonformulary drugs under section 118 if such section applies.
SA 839. Mrs. HUTCHISON (for herself and Mrs. CLINTON) submitted an amendment intended to be proposed by her to the bill S. 1052, to amend the Employee Retirement Income Security Act of 1974 to protect consumers in the selection of a health plan or health insurance coverage; as follows:

(a) the disclosure of such information in such form, and
(b) the recipient retains an ongoing right to receive paper disclosure of such information to view information so disclosed, and
(c) the plan administrator appropriately ensures that the intended recipient is receiving the information so disclosed and provides the information in printed form if the information is not received.

SA 840. Mr. ENZI proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

(a) in section 118, if such plan offers the participant or beneficiary the coverage option described in paragraph (2), the plan administrator appropriately ensures that the intended recipient is receiving the information so disclosed and provides the information in printed form if the information is not received.

SA 841. Mr. SANTORUM submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

SEC. 304. IMMUNITY FROM LIABILITY FOR PROVIDING INSURANCE OPTIONS.—
Congressional Record—Senate

SEC. 1431.

REFUNDABLE TAX CREDITS FOR THE UNINSURED FINANCED WITH CERTAIN CIVIL MONETARY PENALTIES.

(a) PAYMENT OF CERTAIN PENALTIES TO S CRETARY OF THE TREASURY.—

(1) IN GENERAL.—Notwithstanding any other provision of law, 75 percent of any civil monetary penalty in any proceeding allowed under any provision of law pursuant to the amendment made by this Act may only be awarded to the Secretary of the Treasury.

(2) CIVIL MONETARY PENALTY.—For purposes of the amendment intended to be proposed by this Act, the term "civil monetary penalty" means damages awarded for the purpose of punishment or deterrence, and not solely for compensatory purposes. Such term includes exemplary and punitive damages or any similar damages which function as civil monetary penalties. Such term does not include either economic or non-economic losses. Such term does not include the portion of any award of damages that is not payable to a party or the attorney for a party pursuant to applicable State law.

(b) TAX FUND ON TRUST FUND.—

(1) IN GENERAL.—Subchapter A of chapter 96 of the Internal Revenue Code of 1986 (relating to trust fund code) is amended by adding at the end the following new section:

"SEC. 9511. HEALTH INSURANCE REFUNDABLE CREDITS TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is hereby established in the Treasury of the United States a trust fund to be known as the 'Health Insurance Refundable Credits Trust Fund', consisting of such amounts as may be—

"(1) appropriated to such Trust Fund as provided in this section, or

"(2) credited to such Trust Fund as provided in section 9602(b).

"(b) TRANSFER TO TRUST FUND OF AMOUNTS EQUIVALENT TO CERTAIN AWARDS.—There are hereby appropriated to the Health Insurance Refundable Credits Trust Fund amounts equivalent to the awards received by the Secretary of the Treasury under section (a) of the Bipartisan Patient Protection Act.

"(c) EXPENDITURES FROM TRUST FUN D.—Amounts from the Health Insurance Refundable Credits Trust Fund shall be available to fund the appropriations under paragraph (2) of section 132(b) of title 31, United States Code.

"(d) TAX CREDIT.—Any refundable tax credit to assist uninsured individuals and families with the purchase of health insurance under this title.

"(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.

"(b) EQUITABLE AND PUBLIC INTEREST ACTIONS.—

"(1) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(2) EFFECTIVE DATE.—This subsection shall apply to actions that are filed on or after January 1, 2002.

"(A) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance issuer' shall have the meanings given such terms in section 733.

"(B) ACTION IN FEDERAL COURT.—A cause or class of actions that are brought or maintained only in the Federal district court for the district in the State in which the alleged injury or death occurred shall be construed to require a State to enact legislation imposing limits on damages in actions against group health plans and insurers. Nothing in this section shall be construed to require a State to enact legislation imposing limits on damages in actions against group health plans and insurers.

"(o) LIMITATION ON CLASS ACTION LITIGATION.—

"(1) LIMITATION.—

"(A) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.

"(B) DEFINITIONS.—In this paragraph, the term "health insurance issuer" means a person who has marketed, provided information concerning, established, administered, or otherwise operated a group health plan, or health insurance coverage in connection with a group health plan, and the Employee Retirement Income Security Act of 1974.

"(c) ACTIONS IN FEDERAL COURT.—A cause or class of actions that are brought or maintained only in the Federal district court for the district in the State in which the alleged injury or death occurred shall be construed to require a State to enact legislation imposing limits on damages in actions against group health plans and insurers.

"(1) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(o) LIMITATION ON CLASS ACTION LITIGATION.—

"(1) LIMITATION.—

"(A) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.

"(1) LIMITATION.—

"(A) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.

"(c) ACTIONS IN FEDERAL COURT.—A cause or class of actions that are brought or maintained only in the Federal district court for the district in the State in which the alleged injury or death occurred shall be construed to require a State to enact legislation imposing limits on damages in actions against group health plans and insurers.

"(o) LIMITATION ON CLASS ACTION LITIGATION.—

"(1) LIMITATION.—

"(A) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.

"(1) LIMITATION.—

"(A) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.

"(c) ACTIONS IN FEDERAL COURT.—A cause or class of actions that are brought or maintained only in the Federal district court for the district in the State in which the alleged injury or death occurred shall be construed to require a State to enact legislation imposing limits on damages in actions against group health plans and insurers.

"(o) LIMITATION ON CLASS ACTION LITIGATION.—

"(1) LIMITATION.—

"(A) IN GENERAL.—Any claim or cause of action that is brought under this subsection, or alleging any violation of section 1962, where the action seeks reimbursement of claims, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the terms 'group health plan' and 'health insurance coverage' have the meanings given such terms in section 733.

"(2) EFFECTIVE DATE.—This subsection shall apply to all civil actions that are filed on or after January 1, 2002.

"(c) ACTIONS IN FEDERAL COURT.—A cause or class of actions that are brought or maintained only in the Federal district court for the district in the State in which the alleged injury or death occurred shall be construed to require a State to enact legislation imposing limits on damages in actions against group health plans and insurers.
SEC. 01. SHORT TITLE.

This title may be cited as the "Human Germline Gene Modification Prevention Act of 2001":

SEC. 02. FINDINGS.

Congress makes the following findings:

(1) Human Germline gene modification is not needed to save lives, or alleviate suffering, of existing people. Its target population is "prospective people" who have not been conceived.

(2) The cultural impact of treating humans as biologically perfectible artifacts would be entirely negative. People who fail short of some technically achievable ideal would be seen as "genetic rejects", while the standards for what is genetically desirable will be those of the society’s economically and politically dominant groups. This will only increase prejudices and discrimination in a society where too many such prejudices already exist.

(3) There is no way to accountable to those in future generations who are harmed or stigmatized by wrongful or unsuccessful human germline modifications of themselves or their ancestors.

(4) The negative effects of human germline manipulation would not be fully known for generations, if ever, meaning that countless people will have been exposed to harm probably often fatal as the result of only a few instances of germline manipulations.

(5) All people have the right to have been conceived, gestated, and born without genetic manipulation.

SEC. 03. PROHIBITION ON HUMAN GERMLINE GENE MODIFICATION

(a) In General.—Title 18, United States Code, is amended by inserting after chapter 15, the following:

"Chapter 16—Germline Gene Modification

Sec. 301. Definitions

Sec. 302. Prohibition on germline gene modification.

§ 301 Definitions

In this chapter:

(1) HUMAN GERMLINE GENE MODIFICATION.—The term ‘human germline modification’ means the intentional modification of DNA in any human cell (including human eggs, sperm, fertilized eggs, zygotes, blastocysts, embryos, or any precursor cells that will divide, differentiate into gametes or can be manipulated to do so) for the purpose of producing a genetic change which can be passed on to future individuals, including inserting, deleting, or altering DNA from any source, and in any form, such as nuclei, chromosomes, nuclear, mitochondrial, and synthetic DNA.

The term does not include any modification of cells that are not a part of and will not be used to create human embryos. Nor does it include the change of DNA involved in the normal processes of conception.

(2) HUMAN HAPLOID CELL.—The term ‘haploid cell’ means a cell that contains only a single copy of each of the human chromosomes, such as eggs, sperm, and their precursors.

(3) SOMATIC CELL.—The term ‘somatic cell’ means a diploid cell (having two sets of the chromosomes of almost all body cells) obtained or derived from a living or deceased human body at any stage of development.

Somatic cells are diploid cells that are not either eggs or sperm. A genetic modification of somatic cells is therefore not germline genetic modification.

Rule of construction: Nothing in this Act is intended to affect cell gene therapy, or to effect research involving human pluripotent stem cells.

§ 302. Prohibition on germline gene modification.

(a) In General.—It shall be unlawful for any person or entity, public or private, or in affecting interstate commerce—

(1) to perform or attempt to perform human germline gene modification;

(2) to intentionally participate in an attempt to perform human germline gene modification;

(3) to ship or receive the product of human germline gene modification for any purpose.

(b) Importation.—It shall be unlawful for any person or entity, public or private, to import the product of human germline gene modification for any purpose.

(c) Penalties.—

(1) In General.—Any person or entity that is convicted of violating any provision of this section shall be fined under this section or imprisoned not more than 10 years, or both.

(2) Civil Penalty.—Any person or entity that is convicted of violating any provision of this section shall be subject to, in the case of a pecuniary gain, a civil penalty of not less than $1,000,000 and not more than an amount equal to the amount of the gross gain multiplied by 2, if that amount is greater than $1,000,000.

(d) Clerical Amendment.—The table of chapters for part I of title 18, United States Code, is amended by inserting after the item relating to chapter 15 the following:

"16. Germline Gene Modification ...... 301".

SA 845. Mr. GRASSLEY proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 179, strike lines 1 through 14.

SA 846. Mr. NICKLES (for himself and Mr. ENSIGN) proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

Beginning on page 173, strike line 19 and all that follows through line 14 on page 174, and insert the following:

(2) TREATMENT OF COLLECTIVE BARGAINING AGREEMENTS.—The amendments made by sections 201(a), 301, 302, and 303 (and title I insofar as it relates to such sections) shall apply to group health plans maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers beginning on the general effective date.

SA 847. Mr. BROWNBACK proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

At the end of the bill, add the following:

TITLE —HUMAN—GERMLINE GENE MODIFICATION

SEC. 01. SHORT TITLE.

This title may be cited as the "Human Germline Gene Modification Prevention Act of 2001":

SEC. 02. FINDINGS.

Congress makes the following findings:

CONGRESSIONAL RECORD—SENATE

June 28, 2001

12415

Section 2721(b)(2) of the Public Health Service Act (42 U. S. C. 300gg-2(2)(b)(2)) is amended—

(a) by striking paragraph (A), by striking “If the plan sponsor” and inserting “Except as provided in subparagraph (D), if the plan sponsor”; and

(b) by adding at the end the following:

“(D) Election not applicable to requirements concerning genetic information.—The election described in subparagraph (A) shall not be available with respect to the provisions of subsections (b), (c), and (d) of section 122 of the Bipartisan Patient Protection Act and the provisions of section 2722 of the Employee Retirement Income Security Act and the provisions of section 2702 of the Public Health Service Act as amended—

(1) to provide for genetic services by a health plan or a health insurance issuer offering health insurance coverage (including any request for or on behalf of such plan or issuer) alleging a violation of subsection (b), (c), (d), (e), (f), or 2761 of the Public Health Service Act (42 U. S. C. 2638b-1), or

(2) to establish, implement, or continue in effect a standard, requirement, or exception that more completely—

(A) provides for genetic services by a health plan or a health insurance issuer offering health insurance coverage (including any request for or on behalf of such plan or issuer) alleging a violation of subsection (b), (c), (d), (e), (f), or 2761 of the Public Health Service Act (42 U. S. C. 2638b-1), or

(B) permits a group health plan or health insurance issuer offering health insurance coverage, shall not establish rules for the payment of a claim.

(C) prohibits discrimination on the basis of genetic information (including information about a request for or the receipt of genetic services by an individual or a family member of such individual) or the privacy of an individual or the coordination of benefits, a group health plan, or a health insurance issuer offering health insurance coverage, may require that the individual or the family member of the individual involved provide evidence of the performance of such services pursuant to a request by the plan or issuer in accordance with such paragraph.

(D) inform the Secretary of the absence of such services.

(E) any other person the Secretary may specify in regulations.

(f) Violation of genetic discrimination or genetic disclosure provisions.—A group health plan, or a health insurance issuer offering health insurance coverage, shall not require that such individual or family member undergo genetic testing.

(2) Disclosure for health care treatment.—Nothing in this section shall be construed to limit or restrict the disclosure of predictive genetic information from a health plan or a health insurance issuer offering health insurance coverage for the purpose of providing health care treatment to the individual involved.

(3) Violation of genetic discrimination or genetic disclosure provisions.—

(A) In general.—In any action under a covered provision against any administrator of a group health plan, or a health insurance issuer offering health insurance coverage (including any request for or on behalf of such plan or issuer) alleging a violation of subsection (b), (c), (d), (e), (f), or 2761 of the Public Health Service Act (42 U. S. C. 2638b-1), this section shall apply to genetic information (including information about a request for or the receipt of genetic services by a health plan or a health insurance issuer offering health insurance coverage (including any request for or on behalf of such plan or issuer) alleging a violation of subsection (b), (c), (d), (e), (f), or 2761 of the Public Health Service Act (42 U. S. C. 2638b-1), or

(B) General relief.—This section shall be applied in any action under a covered provision against any administrator of a group health plan, or a health insurance issuer offering health insurance coverage (including any request for or on behalf of such plan or issuer) alleging a violation of subsection (b), (c), (d), (e), (f), or 2761 of the Public Health Service Act (42 U. S. C. 2638b-1), or

(C) Additional relief.—Such relief may include a requirement for the payment of attorney’s fees and costs, including the costs of expert witnesses.

(2) Definition.—In this subsection, the term “covered provision” means section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132) or section 2722 or 2761 of the Public Health Service Act (42 U. S. C. 300gg-2, 300gg-11).

Penalty.—The monetary provisions of section 308(b)(2)(C) of Public Law 101–386 (42 U.S.C. 12188(b)(2)(C)) shall apply to any provisions of the Secretary enforcing the provisions referred to in subsection (f), except that any such relief awarded shall be paid only into the general fund of the Treasury.

(h) Special rule in case of genetic information.—With respect to health insurance coverage offered by a health insurance issuer, the provisions of this section relating to genetic information (including information about a request for or the receipt of genetic services by an individual or a family member of such individual) shall not be construed to supersede any provision of State law that establishes, implements, or continues in effect a standard, requirement, or exception that more completely—

(1) protects the confidentiality of genetic information (including information about a request for or the receipt of genetic services by an individual or a family member of such individual) or

(2) prohibits discrimination on the basis of genetic information (including information about a request for or the receipt of genetic services by an individual or a family member of such individual); or

(i) amendments made by section 201(b) of the Genetic Information Nondiscrimination Act of 2008 (42 U. S. C. 300gg-901 et seq.).

(ii) by striking “group health plan” and “health insurance issuer” each place it appears and inserting “group health plan, health insurance issuer, employer health plan, or health insurance issuer” each place it appears.
genetic services by an individual or a family member of the individual.

SEC. 204. APPLICATION OF GENETIC NON-DISCRIMINATION REQUIREMENTS TO MEDIGAP PLANS.

(a) NONDISCRIMINATION.—Section 1882(s)(2) of the Social Security Act (42 U.S.C. 1395ss(s)(2)) is amended by adding at the end the following:

"(E) Each issuer of a medicare supplemental policy, and each such policy offered by such issuer, shall comply with the requirements under section 122 of the Bipartisan Patient Protection Act.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to each issuer of a medicare supplemental policy and each such policy for policy years beginning after October 1, 2002.

(c) TRANSITION PROVISIONS.—

(1) IN GENERAL.—If the Secretary of Health and Human Services identifies a State as requiring a change to its statutes or regulations incorporating the modifications shall be considered to be out of compliance with the requirements of section 122 of the Social Security Act (42 U.S.C. 1395ss) due solely to failure to make such change until the date specified in paragraph (4).

(2) SYMPTOMATIC.—If, not later than June 30, 2002, the National Association of Insurance Commissioners (in this subsection referred to as the "NAIC") modifies its NAIC Model Regulation relating to section 122 of the Social Security Act (referred to in such section as the 1991 NAIC Model Regulation, as subsequently modified) to conform to the amendment made by subsection (a), such revised regulation incorporating the modifications shall be considered to be the applicable NAIC model regulation (including the revised NAIC model regulation and the 1991 NAIC Model Regulation) for the purposes of such section.

(3) SECRETARY STANDARDS.—If the NAIC does not make the modifications described in paragraph (2) within the period specified in such paragraph, the Secretary of Health and Human Services shall, not later than October 1, 2002, make such modifications described in such paragraph and such revised regulation incorporating the modifications shall be considered to be the appropriate regulation for the purposes of this section.

(4) DATE SPECIFIED.—

(A) IN GENERAL.—Subject to subparagraph (B), the date specified in this paragraph for a State is the earlier of—

(i) the date the State changes its statutes or regulations to conform its regulatory program to the changes made by this section; or

(B) ADDITIONAL LEGISLATIVE ACTION REQUIRED.—In the case of a State which the Secretary identifies as—

(i) requiring State legislation (other than legislation appropriating funds) to conform its regulatory program to the amendment made by subsection (a); or

(ii) having legislation which is not scheduled to meet in 2002 in a legislative session in which such legislation may be considered, the date specified in this paragraph is the first day of the first calendar quarter beginning after the close of the first legislative session of the State legislature that begins on or after July 1, 2002. For purposes of the previous sentence, in the case of a State that has a two-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

SEC. 205. APPLICATION TO GROUP HEALTH PLANS AND GROUP HEALTH INSURANCE COVERAGE UNDER THE INTERNAL REVENUE CODE OF 1986.

(a) IN GENERAL.—Section 9821(a)(1) of the Internal Revenue Code of 1986 is amended—

(1) by redesignating subsection C as subchapter D; and

(2) by inserting after subchapter B the following:

"SUBCHAPTER C—PATIENT PROTECTION STANDARDS.

"SEC. 9821. PATIENT PROTECTION STANDARDS. Each group health plan shall comply with patient protection requirements under title I of the Bipartisan Patient Protection Act, and each health insurance issuer shall comply with patient protection requirements under such title with respect to group health insurance coverage it offers, and such requirements shall be deemed to be incorporated into this section.

(b) APPLICATION TO EMPLOYERS WITH FEWER THAN 2 EMPLOYEES.—Section 724(a) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132(a)) is amended by striking "this chapter" and inserting "this subsection", and inserting "sections 711 and 719 (with respect to the application of section 122 of the Bipartisan Patient Protection Act)."

(2) by inserting after subchapter B the following:

"SUBCHAPTER A. APPLICATION TO EMPLOYERS WITH FEWER THAN 2 EMPLOYEES."

SEC. 301A. APPLICATION TO EMPLOYERS WITH FEWER THAN 2 EMPLOYEES.

Section 724(a) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132(a)) is amended by striking "this chapter" and inserting "this subsection", and inserting "sections 711 and 719 (with respect to the application of section 122 of the Bipartisan Patient Protection Act)."

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURAL, NUTRITION, AND FORESTRY

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, June 28, 2001. The purpose of this hearing will be to discuss the next Federal farm bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, June 28, 2001, at 2:30 p.m., in open session to receive testimony on the fiscal year 2002 budget amendment, in review of the Defense authorization request for fiscal year 2002 and the Future Years Defense Program.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RANKING, HOUSING, AND URBAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet Thursday, June 28, 2001, at 9:30 am for a hearing regarding "The Impact of Electric Industry Restructuring on System Reliability."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Thursday, June 28, 2001, at 10 a.m., to receive testimony from Members of the House of Representatives on election reform.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Veterans' Affairs be authorized to meet during the session of the Senate on Thursday, June 28, 2001, at 10 a.m., in room 418 of the Russell Senate Office Building, for a hearing on pending veterans' benefits legislation as follows: S. 1090: Cost-of-living adjustment for veterans' benefits. Sponsor: Senator ROCKEFELLER.

S. 1089: U.S. Court of Appeals for Veterans Claims (CAVC) succession plan to address judges retiring in 2004/2005. Repeals the NOD as a jurisdictional threshold for appearing before the Court. Sponsor: Senator ROCKEFELLER.

S. 1091: (1) Eliminates the 30-year limit on manifestation from time of exposure for the presumption of service connection for Agent Orange-related respiratory cancer or non-Hodgkin lymphoma. (2) Extends VA presumption, eliminated by a Court decision, that in-country Vietnam veterans were exposed to Agent Orange; (3) tasks the National Academy of Sciences to continue reporting on Agent Orange and its association with...
June 28, 2001

UNANIMOUS CONSENT
AGREEMENT—S. 1077
Mr. REID. Mr. President, I ask unanimous consent that the bill be considered under the calendar, with no intervening action or debate; that the bill be advanced to third reading and the Senate then vote on passage of the bill, with no intervening action or debate; finally, I ask unanimous consent that S. 1077 be returned to the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

The list of amendments is as follows:

Biden amendment re: Relevant,
Bond amendment re: Department of Defense,
Bond amendment re: Corp of Engineers,

ORDERS FOR FRIDAY, JUNE 29, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business tonight, it adjourn until the hour of 9 a.m. tomorrow, Friday, June 29. I further ask consent that on Friday, immediately following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the Patients’ Bill of Rights.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, on behalf of Senator DASCHLE, I announce that tomorrow we will convene at 9 a.m. and that shortly thereafter, as soon as the prayer and pledge are completed, we will resume consideration of the Patients’ Bill of Rights, with the votes as outlined previously in the unanimous consent request.

ADJOURNMENT UNTIL 9 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 10:30 p.m., adjourned until Friday, June 29, 2001, at 9 a.m.

NOMINATIONS
EXECUTIVE NOMINATIONS RECEIVED BY THE SENATE JUNE 28, 2001:

DEPARTMENT OF COMMERCE
LINDA MYSLIWY CONLIN, OF NEW JERSEY, TO BE AN ASSISTANT SECRETARY OF COMMERCE, VICE MICHAEL J. COFFS, RESIGNED.

DEPARTMENT OF ENERGY
DAN B. BROUILLETTE, OF LOUISIANA, TO BE AN ASSISTANT SECRETARY OF ENERGY (CONGRESSIONAL AND INTERGOVERNMENTAL AFFAIRS), VICE JOHN C. ANGELL, RESIGNED.

ENVIRONMENTAL PROTECTION AGENCY
DONALD R. SCHREGARDUS, OF OHIO, TO BE AN ADMINISTRATOR OF THE ENVIRONMENTAL PROTECTION AGENCY, VICE STEVEN ALAN HERMAN, RESIGNED.

DEPARTMENT OF STATE
STUART A. BERNSTEIN, OF THE DISTRICT OF COLUMBIA, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO DENMARK.

CHARLES A. HEMBOLD, JR., OF CONNECTICUT, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO SWEDEN.

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT
CAROLE BROOKINS, OF INDIANA, TO BE UNITED STATES EXECUTIVE DIRECTOR OF THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT FOR A TERM OF TWO YEARS, VICE JAN F:RSEY, TERM EXPIRED.

DEPARTMENT OF DEFENSE
H. T. JOHNSON, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF THE NAVY, VICE ROBERT B. FINK, JR., RESIGNED.

IN THE AIR FORCE
THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES AIR FORCE TO THE GRADE INDICATED WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, U.S.C., SECTION 601:

To be lieutenant general
LT. GEN. PAUL V. BIRSTER, 0000

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES AIR FORCE TO THE GRADE INDICATED WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, U.S.C., SECTION 601:

To be lieutenant general
MAJ. GEN. PAUL L. SMITH, 0000

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES AIR FORCE TO THE GRADE INDICATED WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, U.S.C., SECTION 601:

To be lieutenant general
MAJ. GEN. THOMAS C. WASKOW, 0000
Mr. GILMAN. Mr. Speaker, I rise today to honor a wonderful woman, Sophie Heimbach who will be 100 years old on August 10, 2001. As is the case with most Jews born in the early twentieth century, Sophie’s life began very peacefully, and happily. She was born on August 10, 1901 in Ochtrup, Germany. In 1938, with the rising strength of the Nazi party, Sophie was forced to flee Germany. While at first she was able to make a new home in Belgium, the outbreak of World War Two forced her to flee again, this time for France, Spain, Portugal, and finally Casablanca. As if being uprooted from one’s home and having a death marking on one’s chest were not bad enough, Sophie was also separated from her family for a very painful period of time. We have all heard tales of the horrors for the Jews during World War Two, but this woman lived them, and she did it not knowing what would become of her family.

Sophie was reunited with her husband and family in Casablanca, and from that point slowly began to rebuild the small joys in life, even amidst pain. Casablanca led Sophie and her family to Cuba, and then eventually to the United States in 1942. They moved to Gates, New York where Sophie earned her U.S. citizenship in 1947. Sophie and her husband worked diligently and humbly in their first months in the United States. She worked as a housekeeper for a wealthy landowner, and her husband Arthur as a farm hand. After a mere nine months, Sophie and Arthur had the resources to fulfill their American dream enabling them to purchase the family farm in Walkill, New York. The Heimbach family flourished during their time in Walkill, and succeeded in developing their farm to over 400 acres.

Arthur is now deceased, but he and Sophie are followed by two children, Charlotte and Louis, five grandchildren, and six great-grandchildren.

Sophie is a woman of great devotion and dedication to her temple, her home and her family. She has lived a full life with as much grief as joy, hardship as luck. I invite my colleagues to join me in honoring her on her millstone 100th birthday.
coup attempt in 1992, Gutiérrez adopted a populist slogan much like Chávez’s own. The presence of such Marrons on Chávez’s hemisphere report card has been troubling to Washington.

THREATS TO U.S. INTERESTS

Chávez’s recent association with such U.S. “enemies” as Saddam Hussein and Fidel Castro, has heightened the State Department’s anxiety over his intentions. In particular, his evolving friendship with Castro puts the U.S. in a quandary, given that Venezuela is the third largest foreign supplier of crude oil to this country. Chávez flouted U.S. efforts to isolate Havana in devising a five-year deal with the Cuban leader to provide the island with oil to compensate for Cuba’s lost Soviet aid. Venezuela will supply Cuba with 3,000 barrels of oil a day, at an annual market price of $3 billion. By granting cheap credits and a barter system, the cost to Cuba will be substantially less. Increased oil revenues from growing U.S. imports that fill Chávez’s coffers will further subsidize Cuba’s own consumption. Before his visit to Cuba, Chávez suggested, “We have no choice but to form an ‘axis of power,’” challenging U.S.-hemispheric dominance. Chávez’s declared objective is to generate good will for Venezuela throughout the region by offering similar preferential oil deals to many other Caribbean countries.

Despite climbing oil prices in the past two years, Chávez also expanded his presidential powers to undermine the independent power of the judiciary, legislature, media and civic offices, all of which were known for their corruption under previous regimes. Up to this point, Washington has restrained itself, implicitly adjusting to Chávez’s style of rule, a difficult position to maintain in light of the growing tempo of his socialist rhetoric and recent controversial policy proposals.

POTENTIAL U.S. ACTION

While the Clinton administration overlooked Chávez’s political maneuvers in Latin America to maintain a semblance of amicable relations, some of his outrages evoked the wrath of pro-Americans wishing to punish him for pro-Castro activism. This is likely to build up the pressure on the Bush administration to “get tough on Chávez.” Observers in Caracas assert that he has never concealed his goal of a unified Latin America distanced from Washington. It is doubtful whether a tougher response form Washington would hinder Chávez’s defense of such a union. Former State Department official, Bernard Aronson, is already claiming that any disruption of oil agreements with Venezuela could weaken the U.S. economy. Due to economic difficulties and heightened crime, Chávez’s promises of jobs and increased security have had to be delayed. However, it is noteworthy to note that he has been in office a relatively short period, and appears to have factored in U.S. scorn while seeking his public sector reforms. Whether Washington can long maintain its positive engagement policy towards Chávez’s actions remains to be seen. It is a certainty that he will continue to champion his messianic vision for Venezuela and Latin America.

EXTENSIONS OF REMARKS

FEDERAL PHOTOVOLTAIC UTILIZATION ACT

HON. JAMES L. OBERSTAR
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. OBERTAR. Mr. Speaker, the recent increase in oil prices has focused national attention on the benefits we could achieve by reducing our dependence on fossil fuels by meeting more of our energy needs from renewable sources, such as solar, wind, biomass and geothermal energy. Today, I am introducing legislation to promote one of the most promising of these technologies, solar photovoltaics.

Quite simple, a photovoltaic, or PV, system converts light energy into electricity. The term “photo” is a stem word from the Greek “phos” which means light. “Volt” is named for Alessandro Volta, a pioneer in the study of electricity. Photovoltaic literally means “light electricity.”

PV generated power offers distinct advantages over diesel generators, primary batteries, and in some instances, over conventional utility power lines. PV systems are highly reliable, and have no moving parts, so the need for maintenance is virtually non-existent. This is one of the main reasons they are used in satellites today, for which maintenance is both costly and time consuming. In addition, PV cells use sunlight to produce electricity—and sunlight is free!

The potential for photovoltaics is boundless. By way of illustration, solar panels in 1% of the Mojave Desert would provide enough energy to meet California’s expected electric shortfall. The electricity needs of the entire United States could be met by panels in a 100 by 100 mile area in the South-Western United States.

PV cells are ideal for supplying power to remote communication stations, such as those in our National Park system, and on navigational buoys. Because they burn no fuel and have no moving parts, PV systems are clean and silent. Compared to the alternative of burning kerosene and diesel fuels that contribute to global warming, this quiet, clean source of power becomes even more attractive.

Another important feature of PV systems is their modularity—they can easily be adapted to any size, based on energy consumption. Homeowners can add modules as their needs expand, and ranchers, for example, can use mobile stations to produce electricity for pumps to water cattle as the animals are rotated to different grazing areas. After Hurricane Andrew in 1993 the Florida Solar Energy Center deployed several PV emergency systems right at the disaster locations where the energy was needed.

Because a PV system can be placed closer to the user, shorter power lines can be used if power were brought in from a grid. Shorter lines, lower construction costs, and reduced paper work make PV systems especially attractive. Transmission and distribution upgrades are kept to a minimum, which is especially important in urban areas. PV systems can be sized, sited, and installed faster than traditional energy systems.

I have had a longstanding interest in promoting the development of this technology. In June 1971 I introduced H.R. 7629, which established a program for the Federal government to encourage the development of PV technology by using it in federal facilities. At that time, photovoltaic technology was in its early developmental stage, and produced energy at a cost of more than $10 per watt hour, compared to less than $1.10 a hour for energy from fossil fuels. In these circumstances, there is a “chicken and egg” problem: because the technology is expensive, consumers will not purchase it, but, unless there are purchases, the producers will not be able to make the investments and engage in the large-scale production needed to being the cost down.

The Federal government, which purchases billions of dollars of energy each year, is in a unique position of facilitating a breakthrough for photovoltaics. Under my 1977 bill, the Federal government would have purchased substantial quantities of photovoltaic technology. These purchases would have given industry the research and development needed to make photovoltaics competitive. My 1977 bill became part of a larger bill to establish a comprehensive national energy policy, PL 95-619. Most unfortunately, the Reagan administration chose not to fund the bill, resulting in not only a lackluster renewable energy program but also a serious deterioration of national focus.

The collapse of the oil cartel and the return of lower gas prices in the early 1980’s had a chilling effect on federal renewable energy programs. Despite Congress’ consistent support for a broader, more aggressive renewable energy program than either the Reagan or George H.W. Bush administrations supported, federal spending fell steadily through 1996. Funding for renewable energy from R&D grew from less than $1 million on the early 1970’s to over $1.3 billion in FY 1997, but then nose-dived during the Reagan and Bush administrations. Funding steadily declined during the 1990’s to $136 million in FY 1998. The trend was reversed during the Clinton administration. In June 1997 President Clinton announced the Million Solar Roofs Initiative. The program called for the installation of one million solar energy systems on homes and other buildings by 2010. In October 1997, President Clinton committed to placing 20,000 solar energy systems on Federal Buildings. So far the results have been encouraging—over 2000 solar systems have been installed in federal facilities through the year 2000. For example, the U.S. Coast Guard Air Station in San Francisco developed a solar hot water heating project, which qualified as part of the Federal commitment. The project was completed easily and quickly, cost less than $10,000 and has energy savings of $1,100 per year, which means that has a 9-year payback period.

Just across the Anacostia River, here in the Nation’s Capitol, at the Suitland Federal Center, the General Services Administration has installed a large PV system to supply electricity for the Federal center. From the Presidio in San Francisco to Fort Dix in New Jersey, the Federal government has installed numerous effective PV systems. Solar power is used
extensively for diverse purposes in our National Park and National Forests—supplying lighting to Tonto National Forest in Arizona and drinking water to hikers in the Rocks National Park in Lakeshore Michigan. The isolated research facilities at Farallon National Wildlife Refuge, California are powered by PV systems.

During disaster relief activities solar power systems step in quickly to supply efficient, easy to install, mobile power sources. In addition to solar power in federal buildings, national parks, communications, and disaster relief activities, solar power is used extensively in transportation support—bus stop lighting, parking lot lights, railroad signal lights, traffic monitoring and control, Coast Guard light-houses, beacons and buoys. Furthermore, the government is leading the way with innovative technologies for solar powered vehicles. The Department of Energy is the chief sponsor of the American Solar Challenge. The Department of Energy officials announced that more than 100,000 solar energy systems had been installed in the U.S. since the beginning of the solar roof initiative. Under the Clinton administration, the Department of Energy had organized 51 partnerships from coast to coast—dedicated to working on

Through the efforts of the solar industry, with the support of the federal government, solar technology has made substantial progress in recent years. The cost has been reduced to $20 per kilowatt hour, and further reductions are expected. As a result, sales are increasing at a dramatic rate. Sales of photovoltaics within the United States has been growing at a rate of 25% a year. The United States photovoltaics industry is a strong export, with almost 70% of U.S. production going to export sales. There is room for growth in our exports. Currently, the U.S. has about 20% of the world market and Germany and Japan each has a larger market share than our country.

I believe that we need to continue the Federal government’s role in promoting the development of this technology. The Federal government should continue to be a major customer, and help the technology reach its full potential. My bill will express Congressional support for the type of program established by the Clinton administration, and provide the necessary funding. My bill establishes a goal for the Federal government during the next five years to acquire photovoltaic systems for Federal buildings which will produce at least 150 megawatts of electricity. This will accomplish the goal of the 20,000 solar roof initiative. The bill authorizes appropriations of $210 million a year for the next five years, the level of funding needed to purchase approximately 18,000 photovoltaic systems. The bill also establishes a program for evaluation of the systems used in Federal facilities to ensure that the government is encouraging development of the most advanced technology.

Mr. Speaker, using Federal government procurements to “jump start” a technology is not without precedent. In fact, photovoltaic technology itself is a product of space technology, and was advanced by NASA in the Hubble space station program. As a result, photovoltaic systems power nearly every satellite today as they circle the earth. Similarly, in the early days of the computer era the cost of microchips was prohibitive. Large-scale purchases by the government (NASA and DOE) helped bring the costs down to commercially competitive levels. As another example, the General Services Administration, using its FTS 2000 telecommunications contact, was also successful in promoting advancements and enhancements in telecommunications.

Mr. Speaker, I believe that the program established by my bill can make a major contribution to energy efficiency, protection of the environment and reduced dependence on foreign energy. I will be working to incorporate this program in any energy legislation passed in this Congress.

AMERICA HAS EARNED OUR RESPECT AND ALLEGIANCE EVERY DAY

HON. ROSCOE G. BARTLETT
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. BARTLETT of Maryland. Mr. Speaker, on July 4, our nation will commemorate the 225th Anniversary of the signing of the Declaration of Independence—an astounding historic achievement for liberty and freedom. It’s sad that in 2001, political correctness has replaced patriotism and respect for America’s achievements with cynicism and even disrespect.

James Merna, Past Maryland Commandant of the Marine Corps League brought this example to my attention during his speech entitled, “Heroes and Role Models for Today and Tomorrow,” at the Elk’s Club Flag Day Observance in Frederick, Maryland on June 10.

In May, Mr. Fran Parry, a track coach from Gaithersburg High School in Maryland was suspended for 12 days. Why? He confronted and reprimanded a student who was disrespectful during the Pledge of Allegiance. The student replied that he wasn’t American and didn’t have to be respectful during the Pledge.

It took support and pressure from other students, parents and the community after the incident became public before Coach Parry was reinstated.

America has earned our respect and allegiance every day.

I submit Mr. Merna’s entire speech for the Record and I urge my colleagues and all Americans to read it.

REMARKS OF JAMES E. MERNA, PAST MARYLAND STATE COMMANDANT, MARINE CORPS LEAGUE, AT THE ELKS CLUB FLAG DAY OBSERVANCE, FREDERICK, MD, JUNE 10, 2001

“HEROES AND ROLE MODELS FOR TODAY AND TOMORROW”

Thank you for inviting me. I am honored to speak to the Elk’s, one of America’s largest and most influential fraternal organizations.

At the outset, allow me to extend my congratulations to the Frederick community, for in the celebration of your 100th anniversary this year. This is an accomplishment of which you should be justifiably proud, for a century of service to each other, to your community, and to the nation. I wish you many more years of good fellowship and service.

I have a number of ties to the Frederick community, forged in years of friendship and admiration. Let me mention just three.

(1) The Shangri-La Detachment Marine Corps League. This great organization was originally formed here in Frederick, I believe, in 1948. After many years of service, it became somewhat inactive. A few of us came here in 1968, helped reissue its charter and get it reinvigorated, and today it flourishes as one of the most active detachments in the entire League. I made many good friends here, including Terry, Grunwell, Ken Bartgis, and the late Charlie Horn.

(2) Mr. George Wright, your football coach here at Governor Thomas Johnson High School. Earlier in his career, before he coached your Patriots, he coached three of my four sons when I was the head football coach at Roosevelt High School, in Greenbelt. He’s a true winner in every respect, athletically and morally.

(3) My son John Merna, Major, U.S. Marine Corps. Two summers ago, John commanded a reinforced Marine rifle company (Echo 2–5) on a five month cruise in the South China Sea. The float was part of the Seventh Fleet whose purpose, besides being a good will mission for the U.S., was to conduct amphibious exercises and training with designated Asian forces.

Nonetheless, let me offer a few of my observations on the current fervor, or the lack thereof, for patriotism in America today, and what needs to be done, if anything, particularly with regard to our youth.

We can start by asking ourselves, who still observes Flag Day today? We may see a few houses in our neighborhoods who will fly their flags on their porches or in their front yards. But, increasingly, we no longer feel compelled to honor the flag, and the patriotic display is steadily be regarded as old-fashioned or tedious. Contrast today to a little more than 100 years ago when Flag Day in 1892 drew some 800,000 people to Chicago alone. Unfortunately, powerful forces in our society, popular culture, and political circles oftentimes emphasize our cultural differences, rather than our unity as Americans.

Let me mention a recent incident that occurred only two and half weeks ago, just down the 270 Pike from here, in Gaithersburg, Maryland, which should give us cause for concern. Many of you may already know the story. It was in the Washington Post on May 23rd. It involves a local high school track coach from Gaithersburg High School who was suspended for 32 days for confronting a student who was disrespectful during the school’s reciting of the Pledge of Allegiance.

I was incensed as soon as I heard of this incident. How we have a 23 year old veteran of the Montgomery County school system, a highly successful track coach who has won three state and 15 regional titles, suspended from his teaching and coaching jobs only because he attempted to get a student to show respect while the Pledge of Allegiance was being recited in the school.

The coach’s name is Coach Parry. He lives a stones throw from here, in nearby Clarksburg. I called and spoke to Coach Parry.
Tuesday, just five days ago. He told me that it was a tough day, that he had told the coach who was a football player and who was on the track team, rushed past the coach who asked him to stop while the Pledge of Allegiance was being sung. Student and studentamilied that he wasn’t an American and didn’t have to. The coach told him that was a bad attitude and that he had relatives who died for the very freedoms that the student en-
joys. The student just laughed at Coach Parry and said “So what.” The coach told him he didn’t think too much of the incident until the student was suspended from the assistant principal’s office and told he was being suspended from his duties and placed on adminis-
trative leave.

There’s more to this story, as I found out later. Coach Parry told me 80 percent of his track team is African-American and they backed the coach 100 percent. There was not one dissenting voice among them. The coach met with the student’s par-
tests, expressed regret over the incident but told them he wouldn’t change his message. He was in the Department of Veteran’s Affairs and the student was surprised when he was summoned to the principal’s office and told he was being reinstated.

So here’s a case of a student who shows blatant disrespect for the symbol of our free-
dom and the American way of life. He is a leader—teachers have praised him. She is a leader—she has been a leader in the student council. He is a leader—his skills are exceeded on the football field. That’s the type of man Coach Jim Faulk was—always caring, inspiring, encouraging and motivating St. Agnes men to excel and achieve. And many St. Agnes graduates have told us about his influence on their lives. Let me mention some of them.

St. Agnes had as many as 600 kids fighting in World War II. Over 40 were killed, hun-
dreds wounded, and thousands more wounded. It was a time when you had to be a man. It was a time when you had to be a patriot as “one who loves his country and the American way of life, who respects the symbol of our free-
lance and the American flag. If I were you I would make sure that you didn’t lose your way.”

So here’s a case of a student who shows blatant disrespect for the symbol of our free-
dom and the American way of life. He is a leader—teachers have praised him. She is a leader—she has been a leader in the student council. He is a leader—his skills are exceeded on the football field. That’s the type of man Coach Jim Faulk was—always caring, inspiring, encouraging and motivating St. Agnes men to excel and achieve. And many St. Agnes graduates have told us about his influence on their lives. Let me mention some of them.

St. Agnes had as many as 600 kids fighting in World War II. Over 40 were killed, hun-
dreds wounded, and thousands more wounded. It was a time when you had to be a man. It was a time when you had to be a patriot as “one who loves his country and the American way of life, who respects the symbol of our free-
lance and the American flag. If I were you I would make sure that you didn’t lose your way.”

So here’s a case of a student who shows blatant disrespect for the symbol of our free-
dom and the American way of life. He is a leader—teachers have praised him. She is a leader—she has been a leader in the student council. He is a leader—his skills are exceeded on the football field. That’s the type of man Coach Jim Faulk was—always caring, inspiring, encouraging and motivating St. Agnes men to excel and achieve. And many St. Agnes graduates have told us about his influence on their lives. Let me mention some of them.

St. Agnes had as many as 600 kids fighting in World War II. Over 40 were killed, hun-
dreds wounded, and thousands more wounded. It was a time when you had to be a man. It was a time when you had to be a patriot as “one who loves his country and the American way of life, who respects the symbol of our free-
lance and the American flag. If I were you I would make sure that you didn’t lose your way.”
raising families who can truly say—my father came up the hard way.'

Now you can see why I said earlier that someone like Coach Faulk was the greatest coach that I have ever known. Our nation needs strong coaches like Coach Faulk, Coach Parry, and Ben Wright, because they are doing as much to build the character of our future leaders as any other group of men or women.

One last final thought. Our nation is in the midst of a huge nostalgia fest with the Second World War. A number of ‘Greatest Generation’ books have been written, the best by Tom Brokaw of NBC News, box-office attendance records have been set for the new blockbuster movies like ‘Saving Private Ryan’ and now ‘Pearl Harbor.’ There has also been significant publicity about the World War II Memorial now finally approved for the Mall in Washington, D.C.

Let us build on this momentum. We have elections coming up next year, and another Presidential election in 2004. As George Will pointed out recently, during the last administration, at times, we had a president, a CIA director, a Secretary of Defense, a Secretary of State, and a National Security Advisor, none of whom had any military experience. It’s almost as appalling in the Congress. According to the National Association for Uniformed Services, in 1965, 82% of the members of Congress and 80% of the staff had military experience. Now less than ½ of Congress and 5% of their staff have had any military experience. And on the civilian side, only 6% today of Americans younger than 65 have ever served in uniform.

Those numbers by themselves are not alarming because it’s recognized that we are not at war and we have at present an all-volunteer military. We just need to be sure that we elect public officials who have a greater understanding and a strong commitment to support our national security and defense by deeds, not mere words. We need their solid support, as well as from local school board officials, for military recruiters who were denied access to high school campuses 19,228 times in 1999.

Thank you for inviting me to participate in your Flag Day celebration today. As members of the Benevolent and Protective Order of Elks, you have long set an example the rest of us must try to follow if we are going to preserve for our future generations the same priceless treasures of liberty and freedom which our forebears passed on to us.
The Senate met at 9:00 a.m. and was called to order by the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska.

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Almighty God, reign supreme as sovereign Lord in this Chamber today. Enter the minds and hearts of all the Senators. May they be given supernatural insight and wisdom to discern Your guidance each step of the way through this crucial day. Break deadlocks, enable creative compromises, and inspire a spirit of unity. Overcome the weariness of the hard work of this past week. Give these men and women a second wind to finish the race of completing the legislative responsibilities before them.

Where there is nowhere else to turn, we turn to You. When we fail to work things out, we must ask You to work out things. When our burdens make us downcast, we cast our burdens on You. If You could create the universe and uphold it with Your providential care, We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place up our things. When our burdens make us downcast, we cast our burdens on You. If You could create the universe and uphold it with Your providential care, We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place We turn to You. When we fail to work things out, we must ask You to work out things. When our burdens make us downcast, we cast our burdens on You. If You could create the universe and uphold it with Your providential care, We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place We turn to You. When we fail to work things out, we must ask You to work out things. When our burdens make us downcast, we cast our burdens on You. If You could create the universe and uphold it with Your providential care, We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place We turn to You. When we fail to work things out, we must ask You to work out things. When our burdens make us downcast, we cast our burdens on You. If You could create the universe and uphold it with Your providential care, We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place You can solve our most complex problems. We trust You, Father, and place

PLEDGE OF ALLEGIANCE

The Honorable E. BENJAMIN NELSON led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. NELSON of Nebraska thereupon assumed the chair as Acting President pro tempore.
So I think it is important for us to draw a line at least here. I am hopeful we will have unanimous support for this amendment. It is one that seems obvious on its face, but because of the courts and because of the practice in abortion clinics, it is necessary to make this statement again on the floor of the Senate.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. KENNEDY. We yield 2 minutes to the Senator from California.

Mr. BOXER, Mr. President, it is nice to see you in the Chair. I say to my friend from Pennsylvania, our side has no disagreement with this whatsoever. Of course, we believe everyone born should deserve the protections of this bill. The Senator, in his amendment, mentions infants who are born early and that they deserve the protections of this bill. Of course they deserve the protections of this bill. Who could be more vulnerable than a newborn baby? So, of course, we agree with that.

But we go further. We believe everyone deserves the protection of this bill: babies, infants, children, families, all the way up until you are fighting for your life because you may have a dreaded disease; you may be elderly. Everyone deserves the HMOs to act in the right way and to put your vital signs ahead of their dollar signs. That is key.

Maybe in the spirit of our Chaplain who called for unity this morning we start off this morning together, saying everyone who is born deserves the protections of this bill. We all know that, regardless of what age, we have heard stories of patients who are really disregarded in the name of the bottom line.

During times when we see CEOs in these HMOs drawing down hundreds of millions of dollars, we see little children and elderly people and those in between denied the needed care, denied the kinds of prescriptions they need.

We join with an ‘aye’ vote on this. I hope it will, in fact, be unanimous. I also hope the underlying bill will get a very strong vote and we will say that all of our people deserve protection, from the very tiniest infant to the most elderly among us.

I urge an ‘aye’ vote.

The ACTING PRESIDENT pro tempore. The time on the amendment has expired. The Senator from Nevada.

Mr. REID. Mr. President, during this vote, I will be conferring with the manager of the bill on the Republican side to determine what are the next two amendments after this series of votes.

I also plead with Members—the first vote is 15 minutes; the others 10 minutes—will stay where they are supposed to be, we can speed right through these votes. Senator DASCHLE has advised me and everyone here that we are going to try to maintain as close to the time for the votes as possible. So there might be some people missing votes. Everyone should know now that we are not going to keep these votes open for a long period of time.

The ACTING PRESIDENT pro tempore. The question is on agreeing to Santorum amendment No. 814. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll. Mr. NICKLES. I announce that the Senator from Alabama (Mr. MURKOWSKI) and the Senator from New Mexico (Mr. DOMENICI) are necessarily absent.

The ACTING PRESIDENT pro tempore. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 98, nays 0, as follows:

[Rollcall Vote No. 208 Leg.]

YEAS—98

Alaska—Begich  Alaska—Durbin
Allen—McConnell  Allen—McConnell
Baucus—Feinstein  Baucus—Feinstein
Byrd—Feinstein  Byrd—Feinstein
Biden—Fitzgerald  Biden—Fitzgerald
Bingaman—Frank  Bingaman—Frank
Bond—Graham  Bond—Graham
Boxer—Graum  Boxer—Graum
Breaux—Gregg  Breaux—Gregg
Brownback—Hagel  Brownback—Hagel
Burns—Hagel  Burns—Hagel
Byrd—Hatch  Byrd—Hatch
Campbell—Hunts  Campbell—Hunts
Cantwell—Inhofe  Cantwell—Inhofe
Carnahan—Inhofe  Carnahan—Inhofe
Carper—Jeffords  Carper—Jeffords

Dayton—Levin  Dayton—Levin
DeWine—Lott  DeWine—Lott
Dodd—Lincoln  Dodd—Lincoln
Durbin—Lott  Durbin—Lott

NOT VOTING—2

Domenici—Murkowski

The amendment (No. 814) was agreed to.

Mr. KENNEDY. I move to reconsider the vote, and I move to lay that motion on the table.

The motion to table was agreed to.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, we have a series of votes coming up. We anticipate eight votes. We are trying to move the process along.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.
Mr. President, I reserve the remainder
of my time.

The ACTING PRESIDENT pro tem-
pore, the Senator from North Carolina.

Mr. EDWARDS. Mr. President, we ap-
preciate very much the work done by
the Senator from Ohio. We appreciate him
working with us. This is another example
of what can be accomplished when we
work together. We will be sup-
porting this amendment.

I yield the remainder of my time
to the Senator from North Dakota.

Mr. DORGAN. Mr. President, I rise
only to say that in previous debate, a
story was referenced about a young pa-
tient named Christopher Roe, who
tragically died on his 16th birthday. It
was alleged that this had nothing to do
with the Patients' Bill of Rights. That,
of course, is not true. Nevada, where
Christopher Roe died, does not have clini-
cal trial provisions, and this boy
would have clearly benefitted from
such provisions. This would have given
him another chance for survival with
the help of experimental treatments.

When this Patients' Bill of Rights is
enacted, either Nevada would have to
enact a substantially compliant clin-
cal trial provision or the provisions in
this bill would apply. I don't want peo-
ple misrepresenting the notion of what
is happening to some of these patients
who deserve and ought to be able to ex-
pect to receive the protections under
this legislation.

Young Christopher Roe died at age 16
because he was required to fight both
cancer and the managed care organiza-
tion at the same time. That is not a
fair fight, and it should not happen in
the future. If we pass this legislation,
it will not happen in the future.

The ACTING PRESIDENT pro tem-
pore. Who yields time?

Mr. DORBING. Mr. President, I rise
to lay that motion on the table.

The motion to lay on the table was agreed
to.

Mr. KENNEDY. I move to reconsider
the vote by which the amendment was
agreed to.

Mr. BROWNBACK. I move to lay that
motion on the table.

The motion to lay on the table was agreed
to.

Mr. GRASSLEY. I yield myself 1
minute.

A point was made last night that ex-
tending the user fees in section 502 has
no impact on the U.S. Customs Service
budget. That is baloney. If it has no
impact, why is it in the bill in the first
place? Obviously, it is in the bill be-
cause it has an impact on budget scor-
ing. Once CBO scores these funds
against the Patients' Bill of Rights,
these funds cannot be used by the U.S.
Customs Service for customs mod-
erization. These fees then are no
longer available to offset the costs of
customs modernization. We will have
to find funds somewhere else; perhaps
we can get them from the Health, Edu-
cation, Labor, and Pensions Com-
mittee.

The U.S. Customs Service recognizes
this problem: Any scoring which would
limit in any way the ability to fund or
offset customs activity would likely
cause a critical funding shortfall in the
Customs Service. I think it is not clear.

Mr. KENNEDY. I yield 2 minutes
to the Senator from North Dakota.

Mr. CONRAD. Has all time been
yielded back on the other side?

The ACTING PRESIDENT pro tem-
pore. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, there
will be a point of order made. If a point
of order is made, I am obviously going
to waive it. I make clear my motion to
strike would essentially allow us to re-
place the revenues taken from the Fi-
cance Committee's jurisdiction with
general funds that are still available in
the off-budget surplus. All Finance
Committee members, Republicans and
Democrats alike, including my re-
pected chairman of the Senate Budget
Committee, a senior member of the
Senate Finance Committee, should be-
ware, a vote against my motion is a
vote for weakening the Finance Com-
mitee's jurisdiction. If your mem-
bership on the Finance Committee means
anything, you need to vote in favor of
my motion to strike.

Mr. CONRAD. Mr. President, this
goes beyond the question of jurisdic-
tion. This is the first test of fiscal dis-
cipline in this Chamber. Do we adhere
to the Budget Act or do we abandon fis-
cal discipline? That is the question on
this vote. Are we going to spend money
that is not offset and thereby violate
the allocation that has been made to
this committee and exceed the alloca-
tion that has been made to this com-
mittee? I hope this body will stick with
fiscal discipline and require we offset
spending that is over and above the al-
location to this committee. Spending,
after all, is actually a transfer of funds

Mr. GRASSLEY. I know the chair-
man is going to raise a point of order,
and I want 1 minute to respond to the
point of order.

Mr. KENNEDY. I ask consent that
both sides yield back the time and the
Senator be permitted to make a point
of order and each side have 2 minutes
to explain the point of order and 2 min-
utes to respond to that.

The ACTING PRESIDENT pro tem-
pore. Without objection, it is so or-
dered.

The Senator from North Dakota.

Mr. CONRAD. Mr. President, sections
502 and 503 of the bill help to ensure
that the Social Security surplus is not
affected by the costs associated with
providing expanded patient protection.

The bill extends customs user fees be-
Yielding.

The yeas and nays have been ordered
after all, is actually a transfer of funds
to protect the Social Security trust fund.

Mr. President, I bring, therefore, a point of order that the pending amendment violates section 302(f) of the Congressional Budget Act of 1974.

The ACTING PRESIDENT pro tempore, Senator from Iowa.

Mr. GRASSLEY. I move to waive the point of order under section 901 of the Budget Act. I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second? There is a sufficient second.

The question is on agreeing to the motion. The clerk will call the roll.

The legislative clerk called the roll.

The PRESIDING OFFICER (Ms. MURKOWSKI). Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 46, nays 52, as follows:

[Rollcall Vote No. 210 Leg.]

YEAS—46

ALLARD, Cassie Fitzgerald.

Allen, First, Robert E.

Bennett, Gramm, Santorum.

Bond, Grassley, Sessions.

Brownback, Craig, Shelby.

Bunning, Hagel, Smith (NH).

Burns, Hatch, Smith (OK).

Campbell, Helms, Snowe.

Chafee, Hutchison, Stevens.

Cooper, Hatchison, Thomas.

Craig, Jeffords, Thompson.

Crafo, Kari, Thurmond.

DeWine, Lott, Voinovich.

Ensign, Lagard, Warner.

Enzi, McConnell.

NAYS—52

Akaka, Dorog, McCaskie.

Baucus, Darby, Mikuleksa.

Bayh, Edwards, Miller.

Biden, Feingold, Murray.

Bingaman, Feinstein, Nelson (FL).

Boxer, Graham, Nelson (NH).

Brease, Hagel, Reed.

Byrd, Hollings, Reed.

Cantwell, Incouye, Rockefeller.

Carmahan, Jackson, Sarbanes.

Cleland, Kerry, Schumer.

Clinton, Kehl, Specter.

Conrad, Landrieu, Stabenow.

Corzine, Leahy, Torricelli.

Daschle, Levin, Welstone.

Dayton, Lieberman, Wyden.

Dodd, Lincoln.

NOT VOTING—2

Domenici, Murkowski.

The PRESIDING OFFICER. On this vote, the yeas are 46, the nays are 52.

Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected. The point of order is sustained and the amendment falls.

Mr. KENNEDY. I move to reconsider the vote.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 86

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate prior to the vote in relation to the Nickles amendment No. 86.

The Senator from Oklahoma.

Mr. NICKLES. Madam President, the amendment we have before us now says this should apply to all private-sector plans, including union plans. For the private-sector plans, the effective date is October 1, 2002. But for collective bargaining plans, there is a little section on page 174 that says it shall not apply until the collective bargaining agreement terminates. In many cases, collective bargaining agreements do not terminate for years and years, or they may be renegotiated.

My point is, we should make these protections apply, and hope they will apply—if they are so positive—to all Americans, including union members. Union members should have these protections.

My colleague from Massachusetts asked: Was the Senator trying to punish the unions? I am not trying to punish anybody. Shouldn’t union members have the same appeals process? Shouldn’t they have the same patient protections we have for all private-sector plans?

To say we are going to exempt them for the duration of their collective bargaining agreements I think is a mistake, especially when some of these agreements may not terminate for years—maybe 10 years or more. We should make this apply for all plans at the same time.

Madam President, I yield the remainder of my time to the Senator from Nevada.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. Madam President, the motion of the Senator from North Dakota got up and spoke about a young man by the name of Chris Roe from my State. He said this young man’s parents would have been covered under this bill. But according to the Department of Labor, the protections in this bill do not apply to collective bargaining agreements. Because Chris Roe’s parents were under a collective bargaining agreement—as a matter of fact, that collective bargaining agreement does not expire until years from now—the Roe’s would not be covered.

Chris Roe is no longer with us, but people in the future like him should be able to be covered under the same patient protections as everybody else under this bill.

I urge the adoption of this amendment.

The PRESIDING OFFICER. The Senator’s time has expired.

The Senator from Massachusetts.

Mr. KENNEDY. Madam President, this is language on page 173. It is basically boilerplate language, which means we have used identical language in the HIPAA program and also in OBRA, the pension reform. It is basically out of respect for contracts. If you read the language it says “for plans beginning on or after October 1.”

“For plans” refers to insurance. Most of the insurance, 60 percent of insurance plans start in January; 40 percent go over until the next year. So this will apply at the first opportunity when those plans expire and also when collective bargaining expires.

That is our purpose, to do it in a timely way. I hope the Nickles amendment will be defeated. I will offer an amendment that will say irrespective of collective bargaining, it will have to be done within 2 years, and rollovers will not be permitted. That is the best way to do it. That respects the contracts. It was really done with the support of the insurance industry. It has been boilerplate language that has been used in a number of different bills as a way of addressing respect for contracts.

I hope the Nickles amendment will be defeated. We give assurance to the membership that the follow-on amendment will say that every contract has to be done within 2 years and that there is no possibility, even within that period of time, for a rollover agreement.

Madam President, I move to table the Nickles amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be.

The question is on agreeing to the motion. The clerk will call the roll.

The legislative clerk called the roll.
Who yields time? The Senator from Nevada.

Mr. ENSIGN. Madam President, I am going to ask unanimous consent in a moment to temporarily lay this amendment aside so we can work out the language. There seems to be support on both sides of the aisle for this amendment. There is just slight disagreement on the language.

I ask unanimous consent that my amendment No. 849 be temporarily laid aside to recur at the concurrence of the bill managers.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate in relation to the Brownback amendment No. 847.

Who yields time?

The Senator from Kansas.

Mr. BURNS. I move to lay that motion on the table.

The motion to table was agreed to.

AMENDMENT NO. 848, WITHDRAWN

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate on amendment No. 848 by the Senator from Nevada.

Mr. ENSIGN. Madam President, we can actually have a vote on this amendment. This amendment is about protecting health care providers who voluntarily give of themselves, giving of their services, and this amendment will protect them from being sued.

Last night in the debate, the Senator from North Carolina mentioned the Volunteer Protection Act of 1997 already takes care of the health care providers. In fact, it does not. It defines a volunteer as "an individual performing services for a nonprofit organization or governmental entity who does not receive compensation or any other thing of value in lieu of compensation." I was speaking to one of my neighbors. He is a general surgeon. He was just in an emergency room last week. He saw a patient who did not have health insurance, could not afford to pay, and he voluntarily saw this patient. I do not think it would be right for people to volunteer and then be sued.

My amendment says if, out of the goodness of your heart, you work at a clinic, such as Dr. Chanderraj, a friend of mine who is a cardiologist in Las Vegas—he takes care of the poor on the weekends, and yet he has to carry malpractice insurance.

Many doctors and health care providers who volunteer their services for the poor should be encouraged, not discouraged, to give their services. I urge the adoption of this amendment. It is the right thing to do, just as the Good Samaritan Act and the Volunteer Protection Act of 1997 were the right things to do.

The PRESIDING OFFICER. Time has expired. Who yields time in opposition?

The Senator from Ohio.

Mr. ENSIGN. Madam President, I am going to ask unanimous consent in a moment to temporarily lay this amendment aside so we can work out the language. There seems to be support on both sides of the aisle for this amendment.

I ask unanimous consent that my amendment No. 849 be temporarily laid aside to recur at the concurrence of the bill managers.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate in relation to the Ensign amendment No. 849.

State laws can remain in effect and States are given wide latitude to opt out and enact their own legislation on this issue. There is no such provision in this amendment.

Legislation, offered by Senator Coverdell and passed in 1997, covers this issue. If the Senator wants to attempt to amend that legislation, that would be the appropriate vehicle, not this vehicle. This legislation we are debating today is the Bipartisan Patient Protection Act. It is about HMO accountability and HMO reform. These issues that are not directly related to HMO reform and HMO accountability do not belong on this legislation. For that reason, we oppose this particular amendment.

I yield the floor. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. EDWARDS. I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion. The clerk will call the roll.

The senior assistant bill clerk called the roll.

Mr. NICKLES. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Alaska (Mr. MUKOWSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—youas 52, nays 46, as follows:

[Rollcall Vote No. 212 Leg.]

Mr. ENSIGN. Madam President, theloo of you, heart, you move to reconsider the vote.

Mr. BURNS. I move to lay that motion on the table.

The motion to table was agreed to.

AMENDMENT NO. 847, WITHDRAWN

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate in relation to the Brownback amendment No. 847.

Who yields time?

The Senator from Kansas.

Mr. BURNS. I move to lay that motion on the table.

The motion to table was agreed to.

AMENDMENT NO. 848, WITHDRAWN

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate on amendment No. 848 by the Senator from Nevada.

Mr. ENSIGN. Madam President, I want to say that I will not be requiring a vote on this amendment. At the end of a short statement, I will ask unanimous consent that the vote be vitiated and that the amendment be vitiated and that the amendment be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate in relation to the Ensign amendment No. 849.
Mr. KENNEDY. Mr. President, I ask unanimous consent that on the Thompson amendment we have 4 minutes equally divided. I ask unanimous consent it be in order to consider the yeas and nays for a vote.

The PRESIDING OFFICER. The amendment is now pending. Is there a sufficient second? There appears to be.

The yeas and nays were ordered.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. The amendment is now pending. Is there a sufficient second? There appears to be.

The yeas and nays were ordered.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. The amendment is so modified.

Mr. THOMPSON. I call up amendment No. 819 and I send a modification to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment is so modified.

Amendment (No. 819), as modified, is as follows:

On page 150, strike line 17 and all that follows through page 153, line 8, and insert the following:

(9) REQUIREMENT OF EXHAUSTION.—

(A) IN GENERAL.—A cause of action may not be brought under paragraph (1) in connection with any denial of a claim for benefits of any individual until all administrative processes under sections 102, 103, and 104 of the Bipartisan Patient Protection Act of 2001 (if applicable) have been exhausted.

(B) EXCEPTION FOR NEEDED CARE.—A participant or beneficiary may seek relief exclusively in Federal court under subsection 502(a)(1)(B) in connection with the denial of a claim for benefits of any individual until all administrative processes under sections 102, 103, or 104 of the Bipartisan Patient Protection Act (as required under subparagraph (A)) have been exhausted.

(C) REQUIREMENT OF EXHAUSTION OF ADMINISTRATIVE REMEDIES.—If it is demonstrated to the court that the exhaustion of such remedies would cause irreparable harm to the health of the participant or beneficiary, the court shall, unless the requirements of subparagraph (A) are met, order the administrative remedies to be exhausted and shall not prohibit the court from issuing such relief as it deems necessary to prevent actual, irreparable harm to the health of the participant or beneficiary.

(D) FAILURE TO REVIEW.—

(1) IN GENERAL.—If the external review entity fails to make a determination within the time required under section 10(e)(1)(A)(ii), a participant or beneficiary may bring an action under section 514(d) of the Federal Arbitration Act on or after the date on which such time period has expired and the filing of such action shall not affect the duty of the independent medical reviewer (or reviewers) to make a determination pursuant to section 10(e)(1)(A)(ii).

(2) EXPEDITED DETERMINATION.—If the external review entity fails to make a determination within the time required under section 10(e)(1)(A)(ii), a participant or beneficiary may bring an action under section 514(d) of the Federal Arbitration Act on or after the date on which such time period has expired and the filing of such an action shall not affect the duty of the independent medical reviewer (or reviewers) to make a determination pursuant to section 10(e)(1)(A)(ii).

Mr. KENNEDY. Can we have order, Mr. President? We have had great cooperation of the Members. We have made good progress during the morning. We thank Senator GREGG for outlining the series of amendments and the time that will be necessary. We are moving along with consideration of the legislation. The Senator from Tennessee is entitled to be heard. Can we have order in the Senate?

The PRESIDING OFFICER. The Senate cannot proceed until there is order in the Senate. The Senator from Tennessee.

Mr. THOMPSON. Mr. President, this amendment has to do with the exhaustion of administrative remedies. As stated the other day, we have in this underlying legislation quite an elaborate procedure for administrative review so independent entities, at least two different levels, have an opportunity to make a determination on a claim. Then the underlying bill allows a claimant to go to court if they are not satisfied. The problem we saw in the underlying bill is in many cases there was not a determination that that administrative process be gone through, that very easily you could jump right to the court.

I think no one really wants to do that. We have set up this administrative appeal process, which is a good one, and we want to use it.
What we seek to do in this amendment is to basically require the exhaustion of administrative review, administrative remedies, before a claimant goes to court.

We had a good discussion with the other side. The concern was expressed that the modification should recognize an interest for which a claim has been denied might later become more serious, after the timeframe for exhausting external review has expired.

That is a legitimate concern. If someone has a later-developed injury that did not manifest itself early on, there should be a provision so they are not deemed to not have exhausted administrative review so they could never go to court. So we have addressed that in this modification.

The other concern was what if the external entity simply sits on the matter and doesn’t come within the 21 days allowed under the bill to make its determination. We say in this modification, if the external entity takes longer than that, we give them another 10 days and then we allow the claimant to go to court.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. THOMPSON. I ask for an additional 20 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THOMPSON. Under those circumstances, the claimant would still have to exhaust their administrative appeal, but they could go ahead and file the lawsuit in the meantime under, I think what are very rare circumstances. So with that modification I think we have a good process set up so this elaborate administrative process we have established in the bill will actually be utilized.

I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EDWARDS. I thank the Senator from Tennessee. This is another example of what can be done when we tackle these problems together and try to find solutions. As the issue of scope and employer liability, with a number of Senators on both sides of the aisle, now we are doing it on the issue of exhaustion of administrative remedies, exhaustion of appeals.

This amendment meets the very principle by which we began this legislatively drafted, which is we want patients to get the care they need. The most effective way to do that is to have an effective appeals process.

What we have done in this process is, No. 1, require that the patient, the claimant, go through the appeal before going to court, exhausting those appeals. That is the easiest way and the most efficient way to get them the care they need.

The second thing we do is provide an outlet in case the appeals process drags on and it does not operate the way it should. If it is longer than 31 days, then the patient will be able to go to court.

But, as the Senator from Tennessee points out, they will have to simultaneously exhaust the administrative appeal.

Third, we have now provided specifically that the result of the administrative appeal will be admissible in any court proceeding, which is another important element of this amendment.

I thank my friend from Tennessee. I thank him for working with us on this issue. I think we have an issue about which we now have consensus and we are pleased to be there.

I yield the remainder of my time.

Mr. NICKLES. Were the yeas and nays?

Mr. NICKLES. Mr. President, I ask unanimous consent the yeas and nays be vitiolated on the amendment and they be ordered on the modification.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Is there a sufficient second? There is a sufficient second. The question is on agreeing to the Thompson amendment No. 819, as modified.

The clerk will call the roll.

Mr. NICKLES. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Alaska (Mr. MURKOWSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 98, nays 0, as follows:

[Rollcall Vote No. 213 Leg.]

YEAS—98

Akaka   Durbin   Lugar
            Edwards   McCain
            Allen   McConnell
            Baucus   Mikulski
            Bayh   Miller
            Bennett   Murray

            Dayton   Wyden
            DeWine   Wyden

NOT VOTING—2

Domenici   Murkowski

The amendment (No. 819), as modified, was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote.

Mr. THOMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KENNEDY. Mr. President, how long did that vote take?

The PRESIDING OFFICER. Fifteen and a half minutes.

Mr. KENNEDY. I thank the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Mr. President, I thank the Senator from Tennessee and the Senator from North Carolina. The last amendment was an important amendment, was a step forward. That amendment, along with the Snowe amendment and several others that have passed, has immeasurably helped this legislation.

I thank the Senator from Tennessee and the Senator from North Carolina.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. GREGG. Mr. President, I join with the comments of the Senator from Arizona. In the trades, that was "a biggie." It was a very positive action to make sure that the exhaustion of the appeals process is a true exhaustion of the appeals process and we don’t go straight to the court system. I congratulate the Senators from North Carolina and Tennessee for achieving that resolution.

AMENDMENT NO. 847
