Mr. HATCH. Mr. President, I rise to oppose amendment No. 847 offered by my friend from Kansas, Senator BROWNBACK.

This amendment purports to establish safeguards with respect to medical treatments that encompass therapies directed at genetic defects. The amendment would impose criminal sanctions, including imprisonment of up to 10 years, on those who violate the restrictions on modifying the human genetic structure.

Not only is this the wrong time to consider this amendment, it is also the wrong piece of legislation on which to consider this amendment. In all candor, I must tell my colleagues that in my view, based on my preliminary reading of this amendment, I greatly doubt there will ever be a right time for this proposal.

I have no doubt that this amendment is well-intentioned.

I have worked with Senator BROWNBACK many times in the past on many issues, including many important right-to-life issues, such as outlawing partial birth abortion. Both he and I are proud to call ourselves pro-life Senators.

But, as my colleagues are aware, Senator BROWNBACK and I happen to...
June 29, 2001

CONGRESSIONAL RECORD—SENATE 12431

be fully consulted on how the language of this measure will affect their interest.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

Hon. TRENT LOTT, U.S. Senate, Washington, DC.

DEAR SENATOR LOTT: On behalf of the Biotechnology Industry Organization (BIO), I am writing to express BIO’s opposition to an amendment that may be offered by Senator Brownback regarding germ line gene modification. This amendment may come up for a vote on the Senate floor as early as today during consideration of S. 1052—the McCain, Kennedy, Edwards Bipartisan Patient Protection Act. I urge you to vote against the Brownback amendment if it comes up for a vote.

BIO opposes germ line gene modification and we support the moratorium on germ line gene modification that has been in place for over a decade. This moratorium has allowed critical genomic research to continue while prohibiting unsafe and unethical work. To our knowledge, all scientists have complied with this moratorium.

Unfortunately, the Brownback amendment reaches far beyond germ line gene modification. It attempts to regulate genetic research—a complex and dynamic field—a science that holds great potential for patients with serious and often life-threatening illnesses. This proposal also could prohibit research on human pluripotent stem cells. Since these cells have been demonstrated to form any cell in the body they hold enormous therapeutic potential.

Let’s not cripple essential medical research for host of chronic and fatal diseases such as diabetes, Parkinson’s disease, Alzheimer’s disease, and various cancers. The patients and families who suffer from these diseases are looking to advances in medical research to develop cures and better treatments for them.

This argument must be considered by all members of the Senate.

The question of how in vitro fertilization relates to the normal process of sexual reproduction is a question of great importance because it appears to directly implicate the science of embryonic stem cell research.

Specifically, we need to know how language would treat research with human pluripotent stem cells.

We all know where Senator Brownback stands on this issue. While I generally agree with my friend from Kansas, I disagree with him on embryonic stem cell research.

This is an issue that deserves careful consideration by each Senator. I welcome this debate. But today is not the time. We simply need to know all the implications of the Brownback language before we even consider such legislation.

In my view, this Senate should go on record as supporting federal funding for embryonic stem cell research. And we certainly do not want to turn back the clock on the type of gene therapy research that has been conducted for over 20 years.

This is simply not the kind of measure that you try to slip into an unrelated bill.

All interested parties—patient groups, religious and advocacy organizations, scientists, health care providers, biotechnology firms—deserve to

DISAGREE ON THE ISSUE OF FEDERAL FUNDING FOR EMBRYONIC STEM CELL RESEARCH. I UNDERSTAND AND COMPLETELY RESPECT HIS VIEWS ON THIS ISSUE.

IN A NUTSHELL, THE BROWNBACK AMENDMENT ATTEMPTS TO REGULATE GENETIC RESEARCH. BUT I AM AFRAID THAT IT MIGHT REGULATE THIS CRITICAL AVENUE OF RESEARCH RIGHT OUT OF EXISTENCE.

THIS IS AN EXCEEDINGLY COMPLEX AND DYNAMIC FIELD OF SCIENCE.

IT IS CERTAINLY NOT THE TYPE OF LEGISLATION THAT WE WANT TO ATTACH TO A NON-GERMLINE MODIFICATION TO A BILL THAT DOES NOT DIRECTLY RELATE TO BIOMEDICAL RESEARCH.

MY GOODNESS, WE HAVE OUR HANDS FULL ENOUGH WITH HMOs AND THE PATIENTS’ BILL OF RIGHTS. WE DO NOT NEED TO FURTHER COMPlicate AN ALREADY COMPLEX BILL WITH THIS LANGUAGE.

WHY DO WE NEED TO TAKE FLOOR TIME ON THIS PROPOSAL? HAVE THERE BEEN HEARINGS ON THIS ISSUE? HAS THERE BEEN A COMMITTEE MARK-UP ON THIS BILL?

Isn’t the reason why we have committee hearings and committee mark-ups so that complex issues can be adequately aired by members of the critical committees before the full Senate debates an issue?

There is much virtue for letting legislation ripen and be scrutinized in committee before the entire body debates the merits of proposals such as this amendment.

I think we should defeat this amendment today so that the relevant committees can thoroughly review this legislation.

While I strongly believe that we should defeat this amendment on strictly procedural grounds, I do want to make a few comments on some initial problems that I have with respect to the language of the bill.

First, because there are over 300 diseases thought to be caused by a defect in a single gene, we must be extremely careful that we do not cut off or unduly impede research on such diseases.

As a co-sponsor of the Orphan Drug Act of 1984, I know very well how millions of American families must struggle each day with small population but highly debilitating diseases such as multiple sclerosis, AIDS, and Fragile X Syndrome.

The problem with the Brownback amendment is that it appears to thwart research on gene therapies that may lead one day to cures for many of these single-gene diseases. It would not be right for the Senate to hastily adopt language that derails research on such crippling diseases as Alzheimer’s or Parkinson’s.

I am concerned with what the definition of human germline gene modification in section 301 of the Brownback bill could do when it is read in context of section 302 of his legislation. The amendment’s definition of human germline modification is ambiguous.

As one attorney representing the biotechnology industry has characterized the reach of this definition:

Among other problems, which of the examples listed are forms* of human germline modification and why does it matter? Moreover, the sentence—and he is referring to the first definition in section 301 which describes human germline modification—ends by referring to “including DNA, and in any form, such as nuclei, chromosomes, nuclear, mitochondrial, and synthetic DNA.” To what part of the first sentence defines “human germline modification” is the language referring? Does the last sentence of the definition, “Nor does it include the change of DNA involved in the process of sexual reproduction” prohibit in vitro fertilization? Does any part of the amendment prohibit or allow in vitro fertilization? What genetic technologies does “normal” cover, if any?

Within objection, I would like to place in the RECORD a copy of a legal memorandum prepared by Edward Korweck of the law firm of Hogan & Hartson. As I understand it, this memorandum was written on behalf of BIO, the biotechnology industry association.

I also ask unanimous consent to place in the RECORD a copy of a letter from BIO to Senator LOTT opposing the Brownback amendment. This letter voices its opposition to the amendment by stating:

Let’s not cripple essential medical research for host of chronic and fatal diseases such as diabetes, Parkinson’s disease, Alzheimer’s disease, and various cancers. The patients and families who suffer from these diseases are looking to advances in medical research to develop cures and better treatments for them.

This argument must be considered by all members of the Senate.

The question of how in vitro fertilization relates to the normal process of sexual reproduction is a question of great importance because it appears to directly implicate the science of embryonic stem cell research.

Specifically, we need to know how language would treat research with human pluripotent stem cells.

We all know where Senator Brownback stands on this issue. While I generally agree with my friend from Kansas, I disagree with him on embryonic stem cell research.

This is an issue that deserves careful consideration by each Senator. I welcome this debate. But today is not the time. We simply need to know all the implications of the Brownback language before we even consider such legislation.

In my view, this Senate should go on record as supporting federal funding for embryonic stem cell research. And we certainly do not want to turn back the clock on the type of gene therapy research that has been conducted for over 20 years.

This is simply not the kind of measure that you try to slip into an unrelated bill.

All interested parties—patient groups, religious and advocacy organizations, scientists, health care providers, biotechnology firms—deserve to

be fully consulted on how the language of this measure will affect their interests.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

Hon. TRENT LOTT, U.S. Senate, Washington, DC.

DEAR SENATOR LOTT: On behalf of the Biotechnology Industry Organization (BIO), I am writing to express BIO’s opposition to an amendment that may be offered by Senator Brownback regarding germ line gene modification. This amendment may come up for a vote on the Senate floor as early as today during consideration of S. 1052—the McCain, Kennedy, Edwards Bipartisan Patient Protection Act. I urge you to vote against the Brownback amendment if it comes up for a vote.

BIO opposes germ line gene modification and we support the moratorium on germ line gene modification that has been in place for over a decade. This moratorium has allowed critical genomic research to continue while prohibiting unsafe and unethical work. To our knowledge, all scientists have complied with this moratorium.

Unfortunately, the Brownback amendment reaches far beyond germ line gene modification. It attempts to regulate genetic research—a complex and dynamic field—a science that holds great potential for patients with serious and often life-threatening illnesses. This proposal also could prohibit research on human pluripotent stem cells. Since these cells have been demonstrated to form any cell in the body they hold enormous therapeutic potential.

Let’s not cripple essential medical research for host of chronic and fatal diseases such as diabetes, Parkinson’s disease, Alzheimer’s disease and various cancers. The patients and families who suffer from these diseases are looking to advances in medical research to develop cures and better treatments for them.

Furthermore, to our knowledge there has been no consultation with the scientific community, researchers, physicians, or patient groups prior to the filing of the Brownback amendment. This is particularly troubling because the amendment calls for severe sanctions, including imprisonment of biotech researchers.

I urge you to vote against this amendment. If you have questions, please call me at 202-857-6244. Thank you for your consideration on this important matter.

Sincerely,

W. LEE RAWLS, Vice President, Government Relations.

MEMORANDUM

To: Michael Werner, Esquire, BIO Bioethics Counsel.

From: Edward L. Korwek, Ph.D., J.D.

Re: Some Initial Comments/Analysis of the Brownback Amendment

The Brownback Amendment is poorly worded and confusing as to its precise coverage. It uses a variety of scientific terms and other complex language both to prohibit and allow certain gene modification activities. Many of the sentences are composed of language that is incorrect or ambiguous from a scientific standpoint. A detailed examination needs to be made of what each sentence of the Amendment is intended to accomplish.
Mr. KENNEDY. Mr. President, today we are at the threshold of astonishing new successes in understanding the genomes and patterns in genetics and other areas of biomedical research will revolutionize the diagnosis and treatment of countless disorders. This astonishing potential to relieve suffering will be squandered if patients fear that their private genetic information will become the property of their insurance companies and their employers, where it can be used to deny people health care and deny workers their jobs. To protect all Americans against genetic discrimination in health insurance and employment, I am proud to support the important legislation that Senator DASCHLE has introduced on this issue. I commend my colleague, Senator Ensign, for bringing this basic issue to the floor of the Senate, and I look forward to working closely with him in the days to come.

However, Senator Ensign's amendment has several shortcomings that lead me to believe that it is not the right policy for us to adopt to end genetic discrimination. Yet in the interests of stimulating debate on this important issue and to speed the termination of debate on the Patients' Bill of Rights, I am prepared to accept it as an amendment to the bill. But next month, in our Committee, we will have a full and thoughtful discussion of this issue in our committee and a thorough debate on the Senate floor.

Senator Ensign's amendment fails to provide privacy essential. The amendment does not address the important issue of discrimination in the workplace. Genetic discrimination in employment is real and it's happening all across America. Effective legislation on this issue must include protections for workers.

We must realize that genetic information will be commonplace in medicine and we must ensure that our definitions adequately protect genetic information in all its forms. Unfortunately, the definitions of genetic information contained in the Ensign amendment do not properly protect genetic information. The definitions in this legislation allow employers and others to find dangerous loopholes in the protection offered by this legislation.

Finally, the remedies in the Ensign amendment do not provide adequate remedies for those whose rights have been violated. We should make sure that we take back those rights that have been violated to seek proper recourse.

Despite these and other flaws in the Ensign amendment, I am prepared to accept the measure as a spur to future debate on this important issue. We will start from a clean slate in our committee deliberations and we will give this important legislation the attention it deserves. I look forward to a fresh debate and to taking action on Senator Daschle's important legislation.

Mr. DASCHLE. Mr. President, in an effort to move forward and complete debate on the Patient's Bill of Rights, the Ensign amendment on genetic discrimination, along with several other proposals, were included in a managers' package without a full vote of the Senate. It must be clarified that there are several problems with the Ensign proposal as offered, and we do not support this approach for dealing with genetic discrimination.

First, the Ensign amendment does not comprehensively address the problem of genetic discrimination. This amendment only covers genetic discrimination in health insurance and is silent on discrimination in the workplace. Simply prohibiting genetic discrimination in health insurance, while allowing it to continue in employment, is no solution at all. Employers will simply weed out employees with a genetic marker. Additionally, the protections the amendment provides are so riddled with loopholes that health insurance providers would still have substantial access to individuals' private genetic information.

Recently, employees working at Burlington Northern Railroad were subjected to genetic testing without their knowledge or consent. The company was attempting to determine if any of the employees had a genetic predisposition for carpal tunnel syndrome—in an attempt to avoid covering any costs associated with the injury. Giving up your private genetic information will not be the price you pay for being employed.

The Ensign amendment also fails to comprehensively cover all of the insured. We must create protections for all Americans regardless of where an individual gets his or her health insurance coverage. It is unconscionable to allow genetic information to be used to discriminate against anyone—access must be limited appropriately to ensure that no American is left vulnerable.

Finally, the Ensign amendment does not create a private right action—leaving individuals without an adequate remedy. Clearly, providing protections without proper enforcement provisions makes any protection meaningless.

We've seen a revolution in our understanding of genetics—scientists have finished mapping our genetic code, and researchers are developing extraordinary new tests to determine if a person is at risk for a particular disease. But with increased understanding of the possibilities of the genome uncovers, comes increased responsibilities. We simply cannot take
June 29, 2001

CONGRESSIONAL RECORD—SENATE

12433

one step forward in science while tak-
ing two steps back in civil rights.

The HELP committee will move for-
ward with consideration of this issue this
summer. We welcome the oppor-
tunity to work with Senator Ensign
and other Republicans on a comprehen-
vative genetic non-discrimination bill
that can command bipartisan support.
It is our hope that we can bring up and
pass a bill later this summer.

Mr. GREGG. I now propound a uni-
animous consent request relative to the
order of the following amendments to
which we will be proceeding. The first
would be Senator SMITH for 30 minutes
equally divided. The second would be
Senator ALLARD, 30 minutes equally di-
vided. The third amendment would be
Senator NICKLES, 30 minutes equally di-
vided. The fourth would be Senator SANTORUM, 40 minutes
equally divided. And the fifth would be Senator CRAIG,
30 minutes equally divided.

The substance of the amendments or
the purposes of the amendments have
been presented to the other side. I can
run through those if Members wish to
hear them.

The PRESIDING OFFICER. Is there
objection?

The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, the
Senator has shared the substance.
Members will hear the explanations,
but the Smith amendment deals with
tax credits; the Allard amendment,
with exclusions for smaller businesses
in terms of the numbers of employees;
the Nickles amendment is an expansion
to other Federal health programs;
Santorum deals with punitive damages;
and the Craig amendment deals with
medical savings accounts. We are fa-
miliar with the subject matter. We have
no objection to that as an order,
and we believe the time recommended
will help us move this process along
and will be sufficient to evaluate the
amendments.

Mr. REID. Mr. President, we want to
just make sure that the vote is in rela-
tion to the amendments offered in the
usual form with no second-degree
amendments in order prior to the vote.
Mr. GREGG. That is acceptable—
Mr. REID. And also that the time
limit be as outlined and the time for
debate—there would be an opportunity
to file a motion prior to the vote in
relation to the amendment.

Mr. GREGG. Do you mean a motion to
table?

Mr. REID. Yes.

The PRESIDING OFFICER. The Sena-
tor so amends his request?

Mr. GREGG. Yes.

The PRESIDING OFFICER. Is there
objection?

Mr. GREGG. Mr. President, I inquire
of the Senator from Nevada whether or
not it would be possible to stack these
votes, or whether the jury is still out on
that?

Mr. REID. We should wait on that.
We have a number of people on this
side who want to vote after every amend-
ment. We will work on that.

Mr. REID. The PRESIDING OFFICER.
Mr. President, as I know and he knows, by not
stacking the votes we add a consider-
able amount of time to this exercise.
We are trying to move these amend-
ments in a prompt and reasonable fash-
ion. I think that has been shown in the
process throughout the weeks here. We
end up delaying if we don’t stack votes.

The PRESIDING OFFICER. Mr. REID.
The managers have worked so hard and the leaders have
conferred about this legislation. We
will work on that. We hope that the
Senator from New Hampshire will give
us a finite list of amendments. Once
that happens, I am sure we can quickly
arrive at a time to dispose of this and
the votes could be stacked.

The PRESIDING OFFICER. Without
objection, it is so ordered.

The Senator from Oregon is recog-
nized.

Mr. SMITH. Of Oregon, Mr. President,
I send a motion to the Public
The PRESIDING OFFICER. The clerk
will report.

The assistant legislative clerk read
as follows:

The Senator from Oregon (Mr. SMITH)
moves to commit the bill, S. 1092, as amend-
ed, to the Committee on Finance with in-
structions to report H.R. 3 back to the Sen-
ate forthwith with amendment.

Mr. SMITH of Oregon, Mr. President,
I ask unanimous consent that further
reading of the motion be dispensed
with.

The PRESIDING OFFICER. Without
objection, it is so ordered.

The motion is as follows:

Mr. SMITH of Oregon moves to commit
the bill S. 1092, as amended, to the Committee on
Finance with instructions to report H.R. 3
back to the Senate forthwith with amend-
ment that—

(1) strikes all after the enacting clause
and inserts the text enclosed in
brackets and

(2) makes the research and development
tax credit permanent and increases the rates
of the alternative incremental research and
development tax credit as provided in S. 41.

(3) provides that H.R. 3, as amended pursu-
ant to paragraphs (1) and (2), does not nega-
tively impact the social security trust funds
or result in an on-budget surplus that is less
than the medicare surplus account,

(4) provides that H.R. 3, as so amended, is
not subject to a budget point of order.

Mr. SMITH of Oregon, Mr. President,
for myself, Senator HATCH, Senator
ALLEN, and others, I have sent to the
desk a motion to commit S. 1052 to the
Finance Committee with instructions
to make permanent the research and
development tax credit. We are joined
in this also by Senators CRAPO, CRAIG,
BENNETT, BROWNBACK, BURNS, HUTCH-
INSON, ALLEN, and ENZI.

As a Member of the Senate high-tech
tax task force, I believe that the R&D tax
credit is essential to the technology
community and to the pharma-
cutical community.

This credit encourages investment in
basic research that, over the long term,
can lead to the development of new,
cheaper, and better technology prod-
ucts and services. The research and
development is certainly essential for
long-term economic growth.

Innovations in science and tech-
ology has fueled the massive eco-
nomic expansion we have witnessed
to date in the course of the 20th century.
These achievements have improved
the standard of living for nearly every
American. Simply put, the research tax
credit is an investment in economic
growth, new jobs, and the important
new products and processes that we
need in our lives.

The R&D tax credit must be made
permanent. This credit, which was
originally enacted in 1981, has only
been temporarily extended 10 times.
Permanent extension is long overdue.

Because this vital credit isn’t perma-
nent, it offers businesses less value
than it should. Businesses, unlike Con-
gress, must plan and budget in a multi-
year horizon. A tax credit that perma-
tently does not neatly fit into calendar
or fiscal years.

R&D development projects typically
take a number of years, and may even
last longer than a decade. As our busi-
ness leaders plan these projects, they
need to know whether or not they can
count on this tax credit.

The current uncertainty surrounding
the credit has induced businesses to
allocate significantly less to research
than they otherwise would if they
knew the tax credit would be available
in future years. This uncertainty
undermines the entire purpose of the
credit.

Investment in R&D is important be-
cause it spur innovation and economic
growth. Information technology, for
example, was responsible for more than
one-third of the real economic growth

Information technology industries
account for more than $500 billion of
the annual U.S. economy. R&D is wide-
ly seen as a cornerstone of techno-
logical innovations which, in turn,
serves as a primary engine of long-term
economic growth.

The tax credit will drive wages high-
er. Findings from a study, for example,
conducted by Coopers & Lybrand show
that workers in every State will ben-
fit from higher wages if the research
credit is made permanent.

Payroll increases as a result of gains
in productivity stemming from the
credit have been estimated to exceed
$60 billion over the next 12 years.

Furthermore, greater productivity
from additional research and develop-
ment will increase overall economic
growth in every state in the Union. Re-
search and development is essential for
long-term economic growth.

The tax credit is cost-effective. The
R&D tax credit appears to be a cost-
effective policy instrument for increas-
ing business R&D investment. Some re-
cent studies suggest that one dollar of

...
the credit’s revenue cost leads to a one dollar increase in business R&D spending. 

There is broad support among Republicans for the credit, and President Bush included the credit in the $1.6 trillion tax relief plan.

I urge my colleagues to support this amendment, and I thank Senator HATCH and Senator ALLEN, the chief cosponsors, for providing us with the opportunity of increasing the size of the tax cut to include this important priority but which, unfortunately, was left out of the tax bill that we recently passed.

Before I yield to Senator ALLEN for his comments, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second?
The yeas and nays were ordered.

Mr. SMITH. I yield the remainder of my time to Senator ALLEN.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. ALLEN. Mr. President, I rise in support of the amendment and very much thank Senator GORDON SMITH of Oregon for his leadership and for giving us the opportunity to vote on this very important amendment and principle and tax policy that is essential for the United States to compete and succeed in the future. I also commend the Senator from Utah, Mr. ORRIN HATCH, for all his work over the years, and especially this year, in advocating this measure.

As chairman of the high-tech task force on the Republican side of the Senate, we have endorsed this idea. We have been working on this idea. Unfortunately, as the Senator said, it was not included in the tax bill. But the reason that this is so important is that research and development into pharmaceuticals, the amount of research that goes into putting forward a drug before getting it to patent, to the market, and so forth, it is not just the research and the labs; there are clinical trials that go on year after year, and hopefully you will get a patent; and for a short period of time you will have a window of opportunity on that prescription drug, for example.

So this tax policy is very important so that businesses have certainty, that there is credibility, stability, predictability to devote the millions and, indeed, in some cases, billions of dollars to research and development and technology.

The issue is jobs and competition for the people of the United States. We, as Americans, need to lead in technological advances. The R&D tax credit is very important in microchips or semiconductor chips. It is important in communications research and development. It is important in life sciences and medical sciences and, obviously, that includes biotechnology and pharmaceuticals.

Making the R&D tax credit permanent, as Senator SMITH says, actually is cost effective. It makes a great deal of sense. Studies suggest every dollar of revenue cost leads to a $1 increase in business R&D spending. These are good jobs and it also allows us as a country to compete.

A permanent extension is long overdue. As Senator SMITH said, it has been extended even for a few years. Once in a while it lapses. Businesses cannot plan that way. They have to make sure it stays constant. Publicly traded companies have their quarterly reports, their shareholder reports, and the amount of investment they get in their companies based on how they are operating and managing that company.

If you have changing tax laws or lack of credible, predictable tax policies that fowl up that whole system, that makes them less likely to want to invest and take the risk of billions of dollars in research and development if they are not certain of the long term.

This amendment to make the research and development tax credit permanent will spur more American investment; it will create more American jobs—and they are good paying jobs—and that will lead us to better products, better devices, better systems, and better medicines.

I hope that we will work in a unified fashion on this amendment by Senator SMITH to make permanent the research and development tax credit so Americans get those good jobs, but, most importantly, allow America to compete and succeed and make sure America is in the lead on technological advances, whether they are in communications, in education, in manufacturing, or the medical or life sciences.

I again thank the Senator from Oregon, Mr. SMITH, for his great leadership, as well as that of ORRIN HATCH.

I yield back the time I have at this moment and reserve whatever time may remain on our side.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, this is a Patients’ Bill of Rights bill. This is not a defense bill. This is not a foreign aid bill. This is not an agriculture bill. This is not a tax bill. This is the Patients’ Bill of Rights amendment. It is a tax amendment. In fact, he would like to report out of the Finance Committee, by his amendment, a bill that is currently in the Senate Finance Committee, a tax bill. Tax legislation does not properly lie at this moment on this bill. Pure and simple. Full stop. That ends it.

I also say to my good friend from Oregon, I agree with permanent extension of the R&D tax credit. I daresay a majority of Senators agree. I cosponsored legislation in the past. The Finance Committee reported out a permanent extension, and the Senate-passed tax bill, that huge tax bill of $1.35 trillion, included permanent extension of the tax credit. Unfortunately, it did not survive in conference, but it is clear that the R&D tax credit has enormous support in this body.

Does anybody here think there is not going to be another tax bill? Of course, nobody here believes there will not be another tax bill. There will be tax legislation this year. That is clear. The appropriate time for this Senate to appropriately include considering permanent extension of the R&D tax credit is when the tax legislation comes up.

The current provision expires December 31, 2001, not December 31, 2002, not December 31, 2003; it expires December 31, 2004, over 3 years away. In all the years we have been extending the R&D tax credit, that is probably the longest extension that has existed.

I agree with my good friend; it should be permanent. This yo-yo, up-and-down, back-and-forth, on-again off-again application of the R&D tax credit by this body does not make good sense. It is wrong.

This is not a tax bill; this is a Patients’ Bill of Rights bill. There will be tax legislation. When there is tax legislation before this body, that is the time we can appropriately consider permanently extending the R&D tax credit.

I wish my good friend would withdraw his amendment because this is not the proper time and place for it. If he does not wish to withdraw it, I urge my colleagues to not support it because this is not the time and place. Were it to pass, the door would be open and we would be writing another tax bill. We have already passed a big tax bill. We passed a tax bill of 1.35 trillion bucks. That is a big tax bill. This is not the time and place.

Mr. REID. Will the Senator yield for a question?

Mr. BAUCUS. I yield to my good friend from Nevada.

Mr. REID. Mr. President, as chairman of the Finance Committee, the Senator from Montana made commitments to a number of people, including this Senator, that he is going to do everything in his power as chairman of the Finance Committee to make sure there are other tax vehicles this year; is that true?

Mr. BAUCUS. That is absolutely true. There are many Senators who
wanted to offer tax provisions to this bill but deferred, recognizing this is not the right time or place. It is Ecclesiastical. President. Essentially there is a time and place for everything. This is not the right time and place for tax legislation.

Mrs. BOXER. Will my colleague yield to me for a question?

Mr. BAUCUS. I ask how much time is remaining on both sides?

Mr. BAUCUS. I yield to my good friend from California.

Mrs. BOXER. I want to ask the distinguished chairman of the Finance Committee this question. As someone who comes from the largest State in the Union, on the cutting edge of high tech, I was working with Senator Grassley, could they not have put the extension of the R&D tax credit into the big tax bill that was brought to the Chamber?

Mr. BAUCUS. Mr. President, the Senator from California makes a very good point. Clearly, the President could have included a permanent extension of the R&D tax credit in his proposed tax legislation. The Senate was then controlled by the Republican Party, and it certainly could have put in the R&D tax credit, and it probably would have survived conference if they pushed it.

I say to my friend from California, this is a very important point, but that was not provided for because the current extension, the current provision is in place at least until December 31, 2004. So there is time for the R&D tax credit to take effect, and at a later date we can make it permanent.

Mrs. BOXER. I say to my friend, then that is the same comment we can make to our colleagues who are trying to put this on a Patients' Bill of Rights. The R&D tax credit is in effect until 2004. Let's get an appropriate vehicle where we can all walk together and support the R&D tax credit and not put it on the Patients' Bill of Rights.

I thank my friend for yielding.

The PRESIDING OFFICER. The Senator from Oregon. Mr. SMITH of Oregon. Mr. President, I say to my friend from Montana, I want to put this on whatever moves. I know it does not expire until 2004. I also know President Bush did include this in his original tax bill, but that was seven years then. It was unfortunate it was moved down.

I want to see us do it as quickly as we can for the simple reason that businesses need to make planning and expenditures that last an awful long time. The year 2004 does not fit with some of those plans that need to be made.

This is not unrelated to medicine and patients' health. Part of the technological development we are hoping to continue to provide to our people is in the pharmaceutical and biotechnological areas which do have a direct bearing on patients' health. The best right a patient can have is good health. This will facilitate that a great deal, perhaps as much as anything else in the bill.

I ask unanimous consent to send a modification of my motion to the desk.

Mr. BAUCUS. Reserving the right to object, could the Senator share with the Senate the contents of the modification; otherwise, I will be constrained to object.

Mr. SMITH of Oregon. It is simply to comply with the Parliamentarian's request to be consistent with Senate requirements.

Mr. BAUCUS. I do not object.

The PRESIDING OFFICER. Without objection, it is so ordered.

The motion, as modified, is as follows:

Mr. SMITH of Oregon moves to commit the bill S. 1052, as amended, to the Committee on Finance with instructions to report S. 1052 back to the Senate within 14 days with an amendment that—

(1) makes the research and development tax credit permanent and increases the rates of the alternative incremental research and development tax credit as provided in S. 41.

(2) provides that S. 1052, as amended pursuant to paragraph (1), does not negatively impact the social security trust funds or result in an on-budget surplus that is less than the Medicare surplus account, and

(3) provides that as so amended, is not subject to a budget point of order.

Mr. REID. Has everyone yielded back their time?

Mr. SMITH of Oregon. I yield 1 minute to the Senator from Virginia.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. ALLEN. To wrap up in response to some of the assertions and comments made in opposition to this amendment, the reason this amendment is necessary is, unfortunately, the other side of the aisle knocked out the amount of the tax cut we wanted and omitted small family farms and small businesses against the research and development tax credit. Senator HATCH was working mightily, with the support of many Members, to try to get this into the tax cut bill.

More important than all the procedure is the fact that our economy is going very slowly. I am trying to be positive at this moment. The technology sector is obviously going very slowly. In fact, it is in some regards frozen, especially in new investment. The research and development tax credit being made permanent now matters because now and in the next few quarters is when technology companies, pharmaceuticals, biotechs, all folks in tech, will be making decisions, and if they can make these decisions now, then they can create the jobs, get our economy going again, and improve our lives.

Mr. SMITH of Oregon. We yield back the remainder of our time.

The PRESIDING OFFICER. The Senator from Montana has 8 minutes 50 seconds.

Mr. BAUCUS. Mr. President, I yield back my time and I make a constitutional point of order against Senator SMITH's motion on the grounds that the motion would affect revenues on a bill that is not a House-originated revenue bill.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. REID. I ask permission to enter a request for unanimous consent with the Senator from New Hampshire. I ask that the vote on the motion made by the Senator from Montana be set aside and we next go, as has been already ordered, to the Allard amendment, the Nickles amendment, we debate the Allard and the Nickles amendment, and vote on those three amendments at the conclusion of debate.

Mr. GREGG. We have 2 minutes equally divided prior to the Allard amendment and Nickles amendment to explain.

The PRESIDING OFFICER. Does the Senator so amend his request?

Mr. REID. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Colorado is recognized.

AMENDMENT NO. 821

Mr. ALLARD. Mr. President, I call up amendment No. 821. The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Colorado (Mr. ALLARD), for himself, and Mr. GREGG, Mr. CRAIG, Mr. NICKLES, Mr. ALLEN, Mr. INHOFE, Mr. SMITH of New Hampshire, Mr. GRAMM, Ms. COLLINS, Mr. SESSIONS, Mr. ESZTI, and Mr. CAMPBELL, proposes an amendment numbered 821.

Mr. ALLARD. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To exempt small employers from causes of action under the Act)

On page 148, between lines 23 and 24, insert the following:

"(D) EXCLUSION OF SMALL EMPLOYERS.—

"(1) IN GENERAL.—Notwithstanding any other provision of this paragraph, in addition
to excluding certain physicians, other health care professionals, and certain hospitals from liability under paragraph (1), paragraph (1)(A) does not create any liability on the part of a small employer (or on the part of an employer within the scope of employment).

```
(ii) DEFINITION.—In clause (i), the term "small employer" means an employer—

(A) that, during the calendar year preceding the calendar year for which a determination under this subparagraph is being made, employed an average of at least 2 but not more than 15 employees on business days; and

(B) maintaining the plan involved that is acting, serving, or functioning as a fiduciary, trustee or plan administrator, including—

(aa) a small employer described in section 3(16)(B)(i) with respect to a plan maintained by a single employer; and

(bb) one or more small employers or employee organizations described in section 3(16)(B)(iii) in the case of a multi-employer plan.

(iii) APPLICATION OF CERTAIN RULES IN DETERMINATION OF EMPLOYER SIZE.—For purposes of this subparagraph:

(I) APPLICATION OF AGGREGATION RULE FOR EMPLOYERS.—All persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 of the Internal Revenue Code of 1986 shall be treated as 1 employer.

(II) PREDECESSORS.—Any reference in this paragraph to an employer shall include any predecessor of such employer.

On page 165, between lines 14 and 15, insert the following:

(D) EXCLUSION OF SMALL EMPLOYERS.—

(I) IN GENERAL.—Notwithstanding any other provision of this paragraph, in addition to excluding certain physicians, other health care professionals, and certain hospitals from liability under paragraph (1), paragraph (1)(A) does not create any liability on the part of a small employer (or on the part of an employee of such an employer acting within the scope of employment).

(ii) DEFINITION.—In clause (i), the term "small employer" means an employer—

(1) that, during the calendar year preceding the calendar year for which a determination under this subparagraph is being made, employed an average of at least 2 but not more than 15 employees on business days; and

(2) maintaining the plan involved that is acting, serving, or functioning as a fiduciary, trustee or plan administrator, including—

(aa) a small employer described in section 3(16)(B)(i) with respect to a plan maintained by a single employer; and

(bb) one or more small employers or employee organizations described in section 3(16)(B)(iii) in the case of a multi-employer plan.

(iii) APPLICATION OF CERTAIN RULES IN DETERMINATION OF EMPLOYER SIZE.—For purposes of this subparagraph:

(I) APPLICATION OF AGGREGATION RULE FOR EMPLOYERS.—All persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 of the Internal Revenue Code of 1986 shall be treated as 1 employer.

(II) maintaining the plan involved that is acting, serving, or functioning as a fiduciary, trustee or plan administrator, including—

(aa) a small employer described in section 3(16)(B)(i) with respect to a plan maintained by a single employer; and

(bb) one or more small employers or employee organizations described in section 3(16)(B)(iii) in the case of a multi-employer plan.

```

Mr. ALLARD. Mr. President, my amendment provides another opportunity for the Senate to protect the country's employees of small businesses. Yesterday, the Senate voted on an amendment I offered that would have protected employees of small businesses from losing their health care insurance.

I am offering another amendment that gives Members another chance to protect those employees. My amendment, cosponsored by 12 Senators, protects employees of small businesses from losing their health insurance. My amendment exempts employers with 15 or fewer employees from unnecessary and unwarranted lawsuit.

We must protect small business employees from losing their health care insurance. Small business represents over 90 percent of all employers in America. If the Kennedy bill passes in its current form, small business employees will be subjected to increased health care premiums and to the possibilities of losing their health care insurance altogether.

Based on studies from the Congressional Budget Office and the Lewin Group, the Kennedy bill will cause more than 1 million Americans to lose their health insurance. The White House estimates that 10 million people—of less than 500,000 as an indication of what a small employer might be as it applies to that statute. The Walsh-Healy Public Contracts Act, which contains minimum wage standards, exempts certain employers with minimum gross income—they did not use the number of employees—of less than $500,000 as an indication of what a small employer might be as it applies to that statute. The Fair Labor Standards Act, which established the minimum wage standards, exempts certain employers with minimum gross income—they did not use the number of employees—of less than 50 employees. The Fair Labor Standards Act, which established the minimum wage standards, exempts certain employers with minimum gross income—they did not use the number of employees—of less than 500,000 as an indication of what a small employer might be as it applies to that statute. The Walsh-Healy Public Contracts Act, which contains minimum wage and overtime for federally contracted employers, exempts employers that have Federal contracts for materials exceeding $10,000, which also is indicative of a small employer. The Age Discrimination and Employment Act of 1967 exempts employers of 19 or fewer workers.

These numerous employee protections are currently in place as Federal law. The Senate should extend similar protections to employees of small businesses. If we do not provide employers with the number of employees from frivolous lawsuits, more than a million—some estimate up to 9 million employees—will lose their health care insurance.

The least the Senate can do to protect small business employees from losing their health care insurance is to pass this amendment. We have had the opportunity to take advantage of the 50 employee exemptions. The Kennedy bill could cause 4 to 6 million Americans to lose their health care insurance.

I am offering another amendment to provide another chance to protect employees of small businesses from losing their health care insurance.

I inquire the time remaining on my side?
The fact is, yesterday, if there was any question about what this legislation was really all about, it was well debated today. The amendment that was in the amendment offered by Senator SNOWE of Maine and Senator DEWINE of Ohio. In their amendment, the Wall Street Journal says:

Employer protection makes gains. Senate passed time to shield companies from workers' health plan lawsuits.

It is very clear now that the only employers, large or small, that are going to be vulnerable are those that take an active involvement in disadvantaging their employees in health care and putting them at greater risk of death or serious injury. That is it. The rest of this has been worked out. We have done it with 100 employees, we have done it with 50, and now we are down to 15. It makes no more sense today. Those who would be adequately protected in these companies. I imagine, if the Senator is not successful with 15, we will be down to 10, we will be down to 5, and then we will be down to 3.

We have addressed this issue. Every Member of this body ought to know it. I think this is a redundant amendment, one that we have addressed. The arguments are familiar. I yield to the Senator from Nevada.

Mr. REID. Mr. President, this is clear filibuster by amendment. I have been here a long time. I have seen this happen. As the Senator from Massachusetts pointed out, we have been here; we have done that. Next, as the Senator from Massachusetts indicated, it will be 10 employees, 5 employees, 4 employees, 3 employees.

When the time has expired on this amendment, I will offer a motion to table. This amendment should not be discussed. It should not take up the serious time of the Senate that has been so well used these past 9 days.

Mr. ALLARD. Mr. President, let's just go back over what we are talking about this afternoon. First of all, the majority of small businessmen and women in this country are not involved in decisionmaking that affects the well-being of the employees. We know that. They basically are busy enough. It has been explained by Members that they are involved in running their businesses. This is really not an issue so much in terms of small business.

The only people who will be affected by this are the small businessmen or women who get hold of the HMO where they have the insurance and says, look, if any of my employees are going to run up a bill more than $25,000, call me up because I want to know. When that HMO calls up, the employer says: Don't give them the treatment. As a result of not giving that treatment, the child of an employee is put at risk, and perhaps dies, or the wife of an employee, who has breast cancer, is denied access into a clinical trial and may die as a result. This is only if you can demonstrate the employer is actively involved in denying the benefits to those employees. Are we going to say that all these employers, with 15 or fewer employees, are going to be completely immune from this when the only employer that has to worry about this is one who is going to be actively involved in making a decision that puts their employees at risk? We built in the protections with the SNOWE-DEWINE amendment. We built them in and we have supported them. But it seems to me that workers in these companies, which make up about 30 percent of the American workforce, ought to be given the same kinds of protections against the employers that are going to make that difference.

Make no mistake about it. The great majority of employers do not do that today. Only a very small group do. But if the small group that do do that are able to get away with it, there is an open invitation to other small businessmen and women, in order to keep their premiums down, to get involved in similar kinds of activities. This will offer carte blanche so that 30 percent of the American workforce will not be covered one bit with this legislation. It makes no sense. It didn't make any sense when it was first offered by Senator GRAMM; it didn't make any sense when it was offered previously by Senator ALLARD; and it makes no sense at the time.

The only people who have to worry are those employers that are going to connive, scheme, and plot in order to disadvantage their employees in ways that are going to bring irreparable harm, death, and injury to them. If you want to do that to 30 percent of the workforce and put them at that kind of risk, this is your amendment.

I do not think we should. I hope the amendment will be defeated.

The PRESIDING OFFICER (Mr. CARR). The Senator from Massachusetts has 9 minutes 23 seconds remaining. Who yields time?

Mr. ALLARD. Mr. President, I yield 3 minutes to the Senator from Oklahoma.

Mr. NICKLES. Mr. President, this amendment is vitally important for small business. This bill, the underlying bill, says employers beware, we are coming after you because we do not exempt employers.

Interestingly enough, we exempt Federal employees, we exempt Medicare, we exempt government plans, but we do not exempt private plans. Anybody who has a private plan, employers beware because they can sue you and they can sue the plan.

Oh, I know we came up with a little cover, and maybe you can put the liability under the form of a designated decisionmaker, and they can assume it. But guess what? They are going to charge the employer for every dime they think it is going to cost. And my guess is, the designated decisionmaker will want to have enough cover so they don't go bankrupt, so they are going to charge a little extra to make sure they
have enough to protect them from the liability and the costs that are associated with the payroll.

The cost of health care is exploding. Health care costs went up 12.3 percent nationally last year. They are supposed to go up more than that this year. That is not for small businesses. The cost of health care for small business is 20, 21, 22 percent, and that is without the cost of this bill.

CBO estimates the cost of this bill is 4.2 percent. But if you assume there is going to be a whole lot of defensive medicine, you can probably double that figure. And with the liability, you are probably looking at another 9 or 10 percent on top of the 20 percent for small business. Those are not figures I am just grabbing out of the air, I think they are the reality.

My friend and Colleague from Colorado, Senator ALLARD, is saying: Wait. A minute. Let’s exempt small employers, those people struggling to buy health care for the first time. Let’s protect them and make sure they won’t be held to the liability portions of this.

Federal employees are not able to sue the Federal Government. Why should we say: Oh, yes, you can have a field day on small employers. The only way to purely protect them—to purely protect them—is to adopt the Allard amendment. We urge our colleagues to vote in support of the Allard amendment to protect small businesses.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ALLARD. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Colorado has 4 minutes 25 seconds remaining.

What takes time?

Mr. ALLARD. Mr. President, I say to the majority I would like to be able to wrap up on my amendment, if I might.

Mr. KENNEDY. Why don’t you wrap up.

Mr. ALLARD. If you have finished, I will wrap up and then yield the time.

Mr. KENNEDY. Don’t get too provocative.

Mr. ALLARD. Don’t get too provocative? Maybe the Senator from Massachusetts would like to respond?

Mr. KENNEDY. That is all right.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ALLARD. Thank you, Mr. President.

Mr. President. I have had the experience of starting a business from scratch and having to meet payroll. As far as I am concerned, too few Members of the Senate have ever had the opportunity to be in business for themselves and had to meet the challenges of meeting a payroll. But I personally know how legislation such as this can affect your business. I have had to face those tough decisions. They are not pleasant.

There are a lot of small business employers all over this country who are sending letters to Members of this Senate about the very same concerns that have been expressed by the Senator from Oklahoma, the Senator from New Hampshire, and numerous other Senators, at least on this side of the aisle, about the impact of this particular piece of legislation on small business.

Let me take one example. There is a Mr. Terry Toler, for example, of Greeley, CO. I represent the State of Colorado. He runs a small construction business. He employs three workers. The health insurance he provides to his employees also helps take care of the needs of his family. Terry cannot afford the costs that would come with the Kennedy bill in its current form.

Last year, Terry’s company had a 65 percent increase in health insurance premiums and costs. This increase was on top of Terry’s other insurance costs, including equipment insurance, professional liability insurance, and general liability insurance. If liability insurance in its current form, the company’s health insurance rates will increase even further. As a result, he may have to drop the health insurance he provides for his employees and his family.

My amendment will protect Terry and his employees from losing their health insurance. Terry is one of hundreds of small employers in Colorado that would be forced to jeopardize their health care insurance. We need to protect hard-working employees from losing their health insurance.

Let me share some further concerns of this small businessman. Large employers can obtain health insurance at a much lower cost. As a result, small business employers cannot compete with larger companies. In a tight labor market, employers compete for the best employees. These are all competitive issues about which a small businessman is concerned. If even this kind of legislation moves forward, you can understand their concerns.

I have heard comments from another small businessman in Springfield, CO, who has expressed his concern. He writes:

Health care costs are already prohibitive. Adding the law-given right to sue for punitive damages can only increase costs. A patient bill of rights is important, but not at the price of Kennedy’s bill.

He further states:

... liability limits are a good way to help cap rising health care costs.

As an employer, he must evaluate the price tag that comes with paying for health care. He believes it is prohibitive.

According to a recent survey of some 600 national employers, 46 percent of employers would likely drop health care coverage for their workers if they were exposed to new health care lawsuits.

This is not a good bill for small business. The adoption of the Allard amendment would make it better. So I am asking my colleagues in the Senate to join me in protecting employees of small businesses from the costs of protecting the employees’ health care they currently enjoy. If the Kennedy bill passes in its current form, the health care protection of more than 1 million Americans will be jeopardized. Colleagues should support this amendment to protect employees’ health insurance and limit small employer liability.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Colorado has 3 seconds remaining.

Mr. ALLARD. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator’s time has expired.

Mr. KENNEDY. I yield to the Senator, I am going to make a brief statement, and then he can wind up. I will yield him 2 minutes after I make a brief statement.

The PRESIDING OFFICER. The Senator has 9 minutes.

Mr. KENNEDY. I yield myself 4 minutes.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, first of all, we acknowledge the burden that is placed upon small business and the costs of their insurance. The Senator is quite correct that they pay anywhere from 20 to 30 percent more. They are constantly having to look at newer kinds of companies as they are being knocked off the insurance rolls. We understand that. We are prepared to work with the Senator on this.

This is an important issue. I am amazed that small businesses in my State can really survive with the problems they have. We ought to be able to find ways to help and assist them; but this is not it.

We had $3.5 billion of profits last year from the industry. They have already asked for a 13 percent increase in their premiums this year. They were 12 percent last year. That is generally, without this.

We have been over this during the debate, that the cost of this is less than 1 percent a year over the next 5 years. We have also gone over this and found out that some of the wealthiest Americans are the heads of these HMOs. Mr. McGuire makes $54 million and got $350 million in stock value last year—$400 million. That has something to do with the premiums for those companies.

This is a very simple kind of question. He talks about protecting the employers. We are interested. They are protected unless they go out and change and manipulate their HMO to disadvantage the patients who are their employees and deny them the kinds of treatments that would be protected and with which we are all protected.
June 29, 2001

CONGRESSIONAL RECORD—SENATE

I am reminded, myself, that my son had cancer. I was able to get a specialist for him and to get into clinical trials. I want those employ-ees who are represented by the 15 not to be denied that same opportu-nity. I did not have someone who was riding over that and denying me that. But that is happening in America. It might not be happening in Colorado, but it is happening in America, where employers are calling up and saying: Don’t put them in those clinical trials. We are here to stand and say: We are going to protect them. We will work with you, with the small business, but let us protect the women who need that clinical trial for cancer and the children who need that specialist. Why deny them those protections? That is what this amendment is all about.

The Allard amendment is a good amendment. Mr. NICKLES. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To apply the patient protection standards to Federal health benefits programs)

On page 131, after line 20, insert the fol-low:

TITLE III—APPLICATION OF PATIENT PROTECTION STANDARDS TO FEDERAL HEALTH CARE PROGRAMS

SEC. 301. APPLICATION OF PATIENT PROTECTION STANDARDS TO FEDERAL HEALTH CARE PROGRAMS.

(a) APPLICATION OF STANDARDS.—(1) IN GENERAL.—Each Federal health care program shall comply with the patient protection requirements under title I, and such requirements shall be deemed to be incorporated into this section.

(b) CAUSE OF ACTION RELATING TO PROVISION OF HEALTH BENEFITS.—Any individual who receives a health care item or service under a Federal health care program shall have a cause of action against the Federal Government under sections 552(n) and 514(d) of the Employee Retirement Income Security Act of 1974, and the provisions of such sections shall be deemed to be incorporated into this section.

(3) RULES OF CONSTRUCTION.—For purposes of this subsection—

(A) each Federal health care program shall be deemed to be a group health plan;

(B) the Federal Government shall be deemed to be the plan sponsor of each Federal health care program; and

(C) each individual eligible for benefits under a Federal health care program shall be deemed to be a participant, beneficiary, or enrollee under that program.

(b) FEDERAL HEALTH CARE PROGRAM DEFINED.—In this section, the term “Federal health care program” has the meaning given that term under section 1128B(f) of the Social Security Act (42 U.S.C. 1395bb-7) except that, for purposes of this section, such term in-cludes the Federal employees health benefits program established under chapter 89 of title 5, United States Code.

Mr. NICKLES. Mr. President, this amendment expands the coverage of the bill basically to Federal programs. I have heard countless sponsors of the bill say we should cover everybody who needs basic protections. I have heard it time and time again. I have heard it on national TV shows, Sunday morning shows. We should make this apply to everybody. Some argue, shouldn’t these protections be reserved to the States because they have historically done it? But the legislation
before us says, no, the Federal Government will do it; we will do it for all private plans. Usually they don’t even say all private plans. They usually say for all plans.

The truth is, the legislation we have is a mandate on the private sector, but we have exempted the public sector.

It is amazing to me, almost hypocritical—I don’t want to use that word, impugning anybody’s motives—but it bothers me to think we are so smart and wise that we are going to mandate these patient protections on every plan in America, supersede State protections already present, and we don’t give them to a group of employees over whom we really have control. We do have control over the Federal employees health care plan. We can write that plan. We have control. We write the check for Federal employees pay about a fourth, but the Federal Government pays three-fourths. We have direct control over Federal employee plans, but they are not covered by this bill.

Federal employees in the State of Delaware or California or Oklahoma usually get their health care from Blue Cross or Aetna or whomever. They get it just like any other employee, but they are Federal employees. They don’t get the patient protections under this bill. They don’t have the appeals process under this bill. They don’t have the legal recourse that is under this bill. They don’t have the patient protections that are dictated in this bill. All other private sector employees will. Does that really make sense? Is that equitable? I am not sure.

My friend and colleague Senator Kennedy just talked about clinical trials, and maybe they help somebody. They don’t have the same expedited review process. Shouldn’t they be covered under this bill? They don’t have the same patient protections. Aren’t they covered by this bill? They don’t have the same patient protections.

Kennedy just talked about clinical trials. Not all do. We are getting ready to mandate something on the private sector that we forgot to do for the public sector.

It is almost the case all the way through the bill. For pediatrics under the McCain-Kennedy bill, we allow parents to designate a pediatrician for their children. That sounds fine. I don’t think that, it would be unanimous. That is not a dictate for Federal employees. Some plans may have it; some plans may not.

My point is, Federal employees don’t have these patient protections. We are getting ready to mandate something on the private sector that we forgot to do for the public sector.

What about our veterans? Our veterans are much more expansive than what we have in America. If all these patient protections that have been espoused are so important, shouldn’t we give those to senior citizens? Shouldn’t senior citizens have the same expedited review process, internal/external appeal process, as we are going to mandate on all the private sector? I would think so. We all love our senior citizens, our moms and dads and grandparents. Surely we should give them the same protections we are getting ready to mandate. They don’t have it. They can spend days in an appeals process and never get out of the appeals process.

What about Indian Health Service? What about our veterans? Our veterans aren’t covered by this bill. They don’t have the same patient protections. They don’t have the same expedited review process. Shouldn’t they be covered?

Granted, this amendment could cost a lot of money. But this bill will cost a lot of money. I have heard a lot of people say this bill costs a Big Mac a month, it is not all that expensive, it is only just a little bit. I disagree with that. I am also struck by the fact that we are quite willing to mandate this on every city, every State, every private employer, but we don’t mandate it on Federal employees. We don’t do it on Federal programs. We do it on State programs. We do it on city programs. We don’t have any objection to dictating how other governments have to do it. We will tell them how to do it. We just don’t think the Federal Government should do it. We don’t think the programs under Federal control should do it. I find that very inconsistent.

If this is that great of a program, and I have some reservations. I think this bill goes too far.

I think we are superseding State regulations, and I have stated that, I lost on that amendment. Maybe that external review can be fixed in some experience but for crying out loud, we should be consistent. I have heard proponents say time and time again that this bill is not at all expensive. If so, shouldn’t it apply to Federal employees? If we are going to mandate Blue Cross/Blue Shield in Virginia to provide this for all private sector plans, union plans, nonunion plans, and they also have governmental plans—the same Blue Cross—shouldn’t they apply to governmental plans? They have to do it for Virginia. Shouldn’t they have to do it for the Federal Government? That is my point.

There is some inconsistency here. If these are such great protections and they are not that expensive, we should make sure they apply to our employees as well. Senator Kennedy mentioned clinical trials, as if that was a mandate. Some of the Federal plans cover clinical trials. Not all do. We are getting ready to mandate them for every city, every State, every private employer. We don’t have any objection to dictating how other governments have to do it. We will tell them how to do it. We don’t do it on Federal employees as well—maybe for the sons and daughters of the staff members working here? Shouldn’t they have access to those just as the private sector will now have access to them?

The appeals process: This is one of the real keys. There have been hours of debate on the floor saying that on appeals every individual should have rights of internal review, and then the external review should be done by an independent entity not controlled by the employer. Guess what Federal employees have? If they are denied care, they can appeal. But to whom? They appeal to the Office of Personnel Management—to their employer. The employer might subcontract it, but basically it is the employer, the Federal Government. It is not totally independent when the Federal Government might be making that decision. Shouldn’t we give Federal employees that same independent external review?

My amendment would make this bill applying to the public sector include
Federal employees, Medicare, Medicaid, Indian health, veterans, and civil service, I think it would help show that if we are going to provide these protections for the private sector and, frankly, mandate them, they should apply to the public sector as well.

I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, I have listened closely. I will come to the substance of the Senator's amendment in just a minute. I listened to him very carefully about his great enthusiasm for the Federal employee program. It is a fact that 100 Members have that program here in the Senate. It is interesting because the taxpayers pay for 75 percent of it. So it is always interesting for those of us who have been trying to pay our way to get that health insurance program. I favored a single payer for years. I am glad to do it any way that we are able to do it.

But I am glad to hear from my good friend from Oklahoma how much he believes in the Federal employee program of which 75 percent is paid for every Member in here by the Federal Government. When any of us talk about trying to expand health insurance to try to include all Americans, oh, my goodness, we are going to have the Federal Government pay for any of these programs? My goodness. I welcome the fact that the Senator from Oklahoma is so enthusiastic about that concept, about having a uniform concept. It is interesting, you know, Mr. President. Many Americans probably don't know it. When you come in and sign on, there is a little checkoff when you become employed in the Senate. You check it and you are included in the Federal employee program. You have probably 30 or 35 different options. I wish the other American people had those kinds of options. No, we don't get any kind of support for trying to give the American people those kinds of options.

But do you know what, Mr. President? All these Senators who are always against any kind of health insurance for all Americans are down there checking that off as quick as can be to get premiums subsidized 75 percent by the Federal Government. And now they come up and say, well, they don't have all of the protections on it.

I want to say to the good Senator that I am very inclined to take the amendment. I would like to take the amendment. We are studying now the budget implications because I don't want to take it and then find out that we have the Senator from Oklahoma come over and say we have exceeded the budget limitations and then you have to go back and therefore the whole bill comes down. We know what is happening now. The basic protections of this legislation, according to the Congressional Research Service—

Mr. REID. Will the Senator yield?

Mr. KENNEDY. Yes.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. NICKLES. Mr. President, I need to do this right now. I wanted to compliment Senator Gregg and Senator Kennedy for their leadership on this bill and their leadership on the education bill because it is kind of unusual that we have two committee chairmen and two people who are responsible for moving two major pieces of legislation consecutively. So they combined and spent at least the last 2 months on the floor. That is not easy.

I have always enjoyed debating and working with the good Senator from Massachusetts, and we are good friends. Occasionally, we agree. We have had two or three amendments, and we have had great oratory and, occasionally, we still agree on amendment. I will say that I appreciated the Senator's amendment. We will have an opportunity to invite our side to your participation on these issues. We had some votes on the extension last year in terms of the parents on CHIP program and virtually every Republican voted against it. To the extent that we saw progress made with the good support of Senator Smith and Senator Wyden, we now have about $38 billion, $29 billion in the Finance Committee that can be used for the expansion of health care. We certainly want to utilize that. That is only a drop in the bucket. Our attempts in the past to get reserve funds out of the Finance Committee, which the Senator is on, so we could move ahead with a health insurance program have fallen on deaf ears.

I hope that all those—I will have a talk on that later on because I am taking all of those statements and comments made by our Republican friends over the period of the past days, all talking about health insurance, and we will give them a good opportunity. Hopefully, they won't have to eat their words. We will welcome some of their initiatives. We know what they are against. We want to know what they are for in terms of getting some health insurance protections, but they do not have near the protections we are getting ready to mandate on the private sector.

Medicare has some patient protections. They do not have near the patient protections that we will be mandating on the private sector. They do not have an appeals process that is as expedited as this. I do not have a clue whether Medicare can comply with this language. It takes, in many cases, hundreds of days to get an appeal completed in Medicare. We have a very expedited appeals process in this bill. I happen to support that appeals process, and it would be good if Medicare could have a very concise, complete, final appeals process and one, hopefully, that would be binding. We improved the appeals process in this bill today with the Thompson amendment, and I compliment Senator Thompson for his leadership on that bill.

I would be very troubled to go back to my State of Oklahoma and have a town meeting and tell employers they have to do this, this, and this;
Mr. NICKLES. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Alaska (Mr. MURKOWSKI) are necessarily absent.

The yeas and nays resulted—yeas 57, nays 41, as follows:

(Rollcall Vote No. 214 Leg.)

YEAS—57

NOT VOTING—2

Domenici (NM) Murkowski (AK)

The PRESIDING OFFICER (Mr. REID). Regular order, Mr. President.

Mr. NICKLES. Mr. President, I would ask for a recorded vote.

Mr. KENNEDY. Mr. President, if I might, I would like to give a brief explanation of what this amendment is all about. The Allard amendment says that if you are a small businessman—you have between 2 and 15 employees—you are exempt from the provisions of this bill. That means you do not have to face the increased burdens of having to face lawsuits. And it means you will not have to face the increased burdens of higher premium costs on your insurance.

So it is a very straightforward amendment. It is an amendment that is strongly supported by the small business community. Probably most of you have been getting calls into your

They have to have this in their plans; if things do not work out, they might be sued for unlimited damages, and have one of the ones over which we really have control. I would find it very troublesome. I was one of the principal sponsors of the Congressional Accountability Act a few years ago who said Congress should live under the rules like everybody else. I remember some of my colleagues saying: Don’t do that; if we make the Capitol comply with OSHA, it is going to be very expensive. If you walk into the basement of the Capitol today, you will find a lot of electrical wiring that would not pass an OSHA inspection.

It bothers me to think we are going to mandate on every private sector health care plan: You have to have this, this, and this, and all, very well-intentioned, but some of which will be pretty expensive. I would find it troubling if we mandate that on the private sector and say: Oops, we forgot to do it for Federal employees.

That is the purpose of my amendment. I appreciate the willingness of my colleagues from Massachusetts to accept the amendment.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I listened to the Senator talk about being in a town meeting and the questioner says: How in the world, Senator, can you apply all these provisions to our small business and you are not doing that to the Federal employees?

I would think at a town meeting in my State of Massachusetts someone might stand up and say: Senator, how come your health care premium is three-quarters paid by the taxpayers; why don’t you include me? That is what I would hear in my State of Massachusetts. That is what I hear.

Maybe they are going to ask you about the right to sue where hard-working people have difficulty putting together the resources to get the premiums and get the health care. They wonder if the Federal Government is paying for ours. If we are being consistent with that, I say to the Senator from Oklahoma, we ought to be out here fighting to make sure their health care coverage is going to be covered. I do not see how we can have a town meeting and miss that one.

It is interesting, as we get into the Federal employees, we have 34, 35 different choices. What other worker in America has that kind of choice? The people have no appeal; you can just go to another health care policy. We have that choice, but working Americans do not.
offices from small businesspeople concerned about how this is going to impact their small business. So it is an important small business vote.

I ask for a “nay” vote on the motion to table.

The PRESIDING OFFICER. Who seeks time?

The Senator from Massachusetts. Mr. KENNEDY. Mr. President, over the past several days, Members, in a bipartisan way, have worked very hard and successfully in shielding employers from frivolous suits. As the Wall Street Journal today points out: “Senate passes rule to shield companies from workers’ health plan lawsuits.”

When this bill is passed, the only employers that have to worry in this country are going to be those employers that call their HMOs and tell them to discontinue care when their workers run up a bill of more than $20,000 or $25,000. They are not going to let women into the clinical trials. They won’t let children get their specialty care. They will not let the other employees get the rights that they have.

Employers, today, overwhelmingly do not do that; but a few do. If we adopt this amendment, this is going to be an invitation to other employers. The ones that are violating the spirit of the law will get lower premiums, and that is an invitation to other employers.

Mr. MCCAIN. I move to table and ask unanimous consent that the order of the amendment be dispensed with. If there is any problem, we will reverse it. JUDD GREGG and I have spoken. If there is any problem, we will reverse it.

Mr. KENNEDY. Mr. President, I move to reconsider the vote.

Mrs. BOXER. I move to lay that motion on the table.

Mrs. BOXER. I move to lay that motion on the table.

The motion was agreed to. Mr. KENNEDY. Mr. President, I move to reconsider the vote.

The motion to table was agreed to. The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, we have an order that has been worked out by our friend and colleague. We are in the process now of working toward that. I think we go to Senator SANTORUM next, for 40 minutes, Senator CRAIG for 30 minutes after that, and then Senator BREAUX after that.

The general intention is to go to the Senator from Pennsylvania for 40 minutes equally divided, followed by Senator CRAIG. Mr. REID. If my friend from Massachusetts will yield for a brief inquiry, it is my understanding—Senator JUDD GREGG is not on the floor, but I think he has agreed to this. If there is a problem, I will be happy to reverse it—this matter. The way it would be that we would be Senator BREAUX’s amendment after Senator SANTORUM, with 1 hour evenly divided, followed by Senator CRAIG.

Mr. REID. Mr. President, if my friend from Massachusetts will yield for a brief inquiry, it is my understanding—Senator JUDD GREGG is not on the floor, but I think he has agreed to this. If there is a problem, I will be happy to reverse it—this matter. The way it would be that we would go to Senator BREAUX’s amendment after Senator SANTORUM, with 1 hour evenly divided. If there is any problem, we will reverse it. JUDD GREGG and I have spoken about that.

Mr. WARNER. Reserving the right to object, I had discussed with one of our managers the appropriate time at which we could consider the amendment which we have at the desk, in sequence, and the yeas and nays have been ordered. What would be a time that you could indicate to the Senator from Virginia it could be taken up?

Mr. REID. We can do it after Breaux. Mr. WARNER. Will the leader put that in, that it be taken in sequence after Senator BREAUX? Could it be amended so my amendment could be brought up after Senator BREAUX?

Mr. REID. We can do it after Breaux. Mr. WARNER. Will the leader put that in, that it be taken in sequence after Senator BREAUX? Could it be amended so my amendment could be brought up after Senator BREAUX?

Mr. REID. Reserving the right to object, it is my understanding that the Senator from Pennsylvania for a half hour.

Mr. WARNER. Equally divided.

Mr. REID. We have not seen the amendment of the Senator from Virginia, so maybe we should not agree on time but agree on the sequence.

Mr. WARNER. We can have it sequenced. I will submit the amendment and the Senator can establish a time.

Mr. KENNEDY. We are operating on good-faith agreements. We have done very well. This is the intention. We will wait to hear from the Senator.

I understand Senator CRAIG and Senator SANTORUM want to change the order. Senator CRAIG will be the next amendment, followed by Senator SANTORUM.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. Mr. President, I ask unanimous consent that the order of the Santorum amendment and the Craig amendment be switched and that the time allotted be the same. Senator SANTORUM is still perfecting a portion of his amendment.

Mr. REID. Mr. President, we were planning on the other order. The person who will be responding to the Senator from Idaho is not here.

Mr. KENNEDY. We prefer to go the other way. We announced the order, and this has changed. We will need to put in a quorum call to get the personnel who will be addressing this amendment.

Mr. CRAIG. I am sorry for this delay. Mr. KENNEDY. We are moving along, and we will do the best we can. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRAIG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 851

Mr. CRAIG. Mr. President, there was an agreement that the Santorum amendment would proceed and I would follow. We agreed we would switch those. I think that is the current agreement that has been accepted. I see the Senator from Montana is on the floor, the chairman of the Finance Committee, so with that, I send my amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk reads as follows: Mr. CRAIG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.
The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose of the Sense of the Senate regarding making medical savings accounts available to all Americans)

At the appropriate place insert the following:

SEC. 1. SENSE OF THE SENATE REGARDING FULL AVAILABILITY OF MEDICAL SAVINGS ACCOUNTS.

(a) FINDINGS.—The Senate finds:

(1) Medical savings accounts eliminate bureaucracy and put patients in control of their health care decisions.

(2) Medical savings accounts extend coverage to the uninsured. According to the Treasury Department, one-third of MSA purchasers previously had no health care coverage.

(3) The medical savings account demonstration program has been hampered with restrictions that put medical savings out of reach for millions of Americans.

(b) RECOMMENDATION.—It is the sense of the Senate that a patients' bill of rights should remove the restrictions on the private-sector medical savings account demonstration that makes medical savings accounts available to more Americans.

Mr. CRAIG. Mr. President, I had planned up until an hour ago to offer a detailed amendment on medical savings accounts that I think fits appropriately into any discussion about patients' rights in this country. The first and foremost right is access to health care, relatively unfettered access to health care. The problem with that under the current scenario on the floor is it would bring about a point of order and I do not want this issue to fall based on that.

Certainly it is appropriate we are here and we are taking the necessary and adequate time to debate patient's rights in American health care. I am proud to stand up for the rights of patients; that is the standard of health care in our society today, many of the uninsured, we cannot have free access. It is time we acknowledged that this Senate now express its will to a patients' Bill of Rights that creates the kind of stability, the kind of predictability that employers can continue to provide health care without the risk of being dragged into court because of a health care program that they may be a sponsor of, then he will veto it.

That is why I think it is important that this Senate now express its will and its desire to continue to support medical savings accounts. That is why I think it appropriately fits inside the broad discussion of a Patients' Bill of Rights.

I do not question any Senator's motive on the floor. Republican and Democrat alike want to make sure all Americans have access to health care.

We want a Patients' Bill of Rights that works. We have had a President say very clearly, unless you can provide us with a Patients' Bill of Rights that creates stability, that allows the kind of flexibility we need to assure that employers can continue to provide health care without the risk of being dragged into court because of a health care program that they may be a sponsor of, then he will veto it.

But here is a President who also supports maximizing choices in the marketplace.

How you maximize choices in the marketplace for the patient today is to allow open access to a medical savings account program that optimizes all the flexibility we have talked about. You reach out and bring in the third party, the government to take over our health care system, which would have largely let bureaucrats decide whether your family would get the medical care they need.

It was a Republican Congress that stood up for patients' rights by creating medical savings accounts for the first time. Medical savings accounts, in my opinion, are the ultimate in patient protection for they throw the lawyers, employers, and bureaucrats out of the examining room and leave decisions about your health between you and your doctor.

What has been most fascinating about the current medical savings account scenario in our country is that we have limited them to about 750,000 policies. Yet, a good many people have come to use them even though we have made it relatively restrictive and we have not opened it up to the full marketplace.

What is most fascinating about the use of medical savings accounts is the category that all Memos want to touch. We have only limited them to about 25% of the people. That is the large number in our country of uninsured. Since we offered up a few years ago this pilot program, 37 percent of those who chose to use it were the uninsured of America. In other words, it became one of the most attractive items to them because it offered them at a lower cost full access to the health care system.

It proves something many colleagues do not want proved: That given the opportunity, Americans can afford health care if the price is right and the strings are not attached and they can, in fact, become the directors of their own health care destiny. I think it is fascinating when you look at this chart. Under the scenario of over 100,000 MSA buyers, one-third were previously uninsured.

With medical savings accounts, you choose your own doctor. Also, if you believe you need a specialist, you have direct access to a specialist. You don't need an HMO or an insurance company working with or telling your doctor what you may or may not do. Of course, the debate for the last week has been all about that, all about the right of a patient to make the greater determination over his or her destiny and to have that one-on-one relationship with the health care provider. There is no question that if you are independent in your ability to insure or you have worked a relationship with your employer so you are independent through a medical savings account, then you can gain direct access to an OB/GYN. If your child is ill, you have direct access to a family pediatrician. With MSAs there are no gatekeepers; you are the gatekeeper. You make referrals; you are the one who makes the decision, you and your doctor. The only people involved in your personal decisions, once again: Your family, you, and the medical professional you have chosen or to whom your doctor has referred you. That is the phenomenon great independence to which we are arbitrarily deciding Americans cannot have free access.

I hoped to offer a much broader amendment that I knew it would have to face that tough test of dealing with the Senate rules and all of that because it would deal with taxes and it would deal with revenue. As a result, instead of making the changes in the law that ought to be made because even the program I am talking about that has been so accepted expires this year and it is the responsibility of this Congress to expand it and make it available, here instead we are still talking about the rights of lawyers, not the rights of the patient.

The rights of the patient are optimixed if you provide the full marketplace access to medical savings accounts. Since we introduced the limited pilot program, wonderful things have happened. The very people we hope to reach, the uninsured, are able to afford health coverage. And, in our society today, many of the uninsured are the children of working men and women who can't afford to add them as an extra beneficiary to their health care coverage because of the costs. Yet they found they were able to do that when their employer that allowed them to have a medical savings account.

Medical savings accounts combine low-cost insurance, and a tax-preferred savings account for routine medical expenses. The catastrophic insurance policy covers higher cost items beyond what the savings account covers.

I do not want this issue to fall based on that.
that time 100-percent deductibility on their health care plans.

At this time I said OK, then I will not support them unless we have some kind of narrowing—as I said, as many as three. That offer was rejected.

Here we are at 2 o'clock on Friday afternoon, after many days of debate, and we are talking about a sense-of-the-Senate resolution on medical savings accounts.

I am sorry. They should have taken advantage of the opportunity that I and the sponsors of this legislation would have provided to provide legisla
tive—not sense of the Senate—relief for small businessmen and women, for allowing to establish medical savings accounts, and perhaps another bill. That offer was rejected.

At this time I would then have to oppose this sense-of-the-Senate resolution, I yield the floor.

The PRESIDING OFFICER. Who yields time? The Senator from Monta
na.

Mr. BAUCUS. Madam President, I yield myself such time as I consume.

This is a Patients' Bill of Rights bill. This is not a tax bill. This is not a Depart
tment of Defense bill. This is not a agriculture bill. This is not a foreign policy bill. This is a Patients' Bill of Rights bill.

The amendment offered by my friend from Idaho is a Patients' Bill of Rights amendment; it is a tax amend
ment. We will have ample time this year to take up tax legislation. We will take up tax legislation at some time, even though we had a huge tax bill al
ready this year. When I say 'we,' I mean the Finance Committee. That is because the budget resolution provides $28 billion for health insurance benefits for Americans who are now uninsured.

I guess the committee will report out legislation this year which will include expansion of some benefits, perhaps under CHIP, but perhaps also some tax provisions. There are many Senators who have good ideas to encourage Americans to have more health insur-
ance—credits, deductions, and so forth. MSAs is just one way. MSAs, I might say, are actually, under the law, re
served for the most wealthy Ameri
cans. It is a particular kind of savings account which enjoys very lucrative, very beneficial status with respect to our tax laws; that is, contributions are not deductible, inside buildup is not taxed, withdrawals for medical pur
poses are not taxed, and only with
drawals for nonmedical purposes are, but not in the case when a person reaches the age 65. Essentially, they can be converted by wealthier people into a retirement account beyond a savings account.

They are just one way of, perhaps, providing health insurance for Ameri
cans. The main point being this is not a tax bill. The Finance Committee will take up health insurance legislation this year as provided under the budget resolution. At the time we consider MSAs, we will consider other appropriate ways to encourage Americans to have more health insurance. That is the appropriate time for this body to consider health insurance legislation. That is when the Finance Committee can consider all the various ideas and report out a bill to the Senate which, in a more orderly way, because it is a tax bill which is dealing with tax matters, particularly health insurance, will help more Americans.

I also say to my good friend from Arizona, it is now 2 o'clock Friday afternoon. We have been on this Pa
tients' Bill of Rights bill a long time. It is very good legislation. We are going to finally pass a Patients' Bill of Rights, after I don't know how many years, tonight. That is my guess.

We will not pass it tonight—who knows when we will ever get to finally pass it—if we start going down this road of adopting sense-of-the-Senate resolutions.

This is the first sense of the Senate. We have not had one before. This par
icular resolution says this bill should include expansion of medical savings accounts. If we are not going to add savings accounts here, we are, in effect, deciding we should not add medical savings accounts, a tax bill, on this bill.

I respectfully suggest to all my col
leagues, the proper vote here is to vote no because it is, in effect, a tax provi
sion. It is a sense of the Senate. We have not done that before. We are about ready to conclude passage of this bill and we will take up health insur-
ance, tax legislation, at an appropriate time later.

I reserve the remainder of my time.

Mr. GRASSLEY. Madam President, I would like to comment on the Craig amendment that it is the sense of the Senate that the Senate act to expand access to Medical Savings Accounts.

I commend Senator Craig for offer
ing this amendment. I support expand
ing access to MSAs. I recently intro
duced S. 1067, the Medical Savings Ac
count Availability Act of 2001, with my colleague from New Jersey, Senator TORICELLI. My support for MSAs is long standing. Senator TORICELLI and I introduced in the last Congress a comparable bill to expand access to Medical Savings Accounts. I think we will improve access to MSAs with the support of Senator Craig and many
because the Federal Government, through the Congress, opened up a limited window of opportunity for them to use a medical savings account to their advantage.

That is what that is all about. The House is looking to provide medical savings accounts in their Patients’ Bill of Rights. The President supports medical savings accounts. It is not an agricul
ture bill. It is not a bill for the Interior Department. It is a bill for Americans seeking health care in the system today.

Why shouldn’t we debate that right to have optimum access to the market on a Patients’ Bill of Rights? Because it doesn’t involve a lawyer? That is a good reason to debate it, because it doesn’t involve a lawyer and it doesn’t involve a Federal bureaucrat at HCFA, and it doesn’t involve an HMO or an insurance company. It involves the patient who holds that medical savings account and his or her doctor.

This is the issue. You darned well bet it is important that our Congress express to the American people that we should make medical savings accounts increasingly available.

I am pleased to hear the chairman of the Finance Committee speak about addressing that this year because this year it expires. We should not allow that to happen.

I retain the remainder of my time.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Madam President, I will make a couple of points.

If you read it, it makes clear that this is a sense-of-the-Senate tax provision. It says sense of the Senate, and the Patients’ Bill of Rights should remove the restrictions on the private sector medical savings account demonstration program to make medical savings accounts available to more Americans.

Medical savings accounts is a tax provision. This says remove restrictions to make it more available; to, in effect, change the tax law to make it more available.

It is clearly a sense-of-the-Senate tax bill.

Second, it has been asserted that it is for the working poor. I have a distribution chart furnished by the President which indicates what income groups of Americans utilize medical savings accounts. By far, the greatest income level to use medical savings accounts is that with adjusted gross income—the total gross is a lot more—of between $100,000 and $200,000. Those people are hardly the working poor. For those in the lowest category—those with adjusted gross incomes of under $5,000—you get 111 returns. For those in the earlier category that I mentioned—one between the $100,000 to $200,000 adjusted gross income—you get 9,400 returns.

It is not for the working poor. That is not the main point. The main point is that this is a sense-of-the-Senate tax provision.

We should not go down this road. We will do it at the appropriate time later this year in the Finance Committee work on a measure to protect and provide more health insurance for those who do not have health insurance and report that legislation at the appropriate time to the floor.

I yield the remainder of my time. If the Senator from Idaho will yield the remainder of his time, I will make a motion with respect to this amendment.

Mr. CRAIG. Madam President, I believe that we have the opportunity to express the will of the Senate. The Congress has moved slowly but grudgingly toward medical savings accounts and has created flexibility. We have a good opportunity to do so this year. Today, we have an opportunity to express our will to do that once again. I hope we will do so.

I yield the remainder of my time, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. BAUCUS. Madam President, I am going to move to table.

The PRESIDING OFFICER. There is a sufficient second.

The yeas and nays were ordered.

Mr. BAUCUS. I move to table the Craig amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The question is on agreeing to the motion. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Alaska (Mr. MURKOWSKI) are necessarily absent.

The PRESIDING OFFICER. The Senate is ready for the call of the roll.

The clerk will call the roll.

The PRESIDING OFFICER. The result was announced—yeas 53, nays 45, as follows:

[Rollcall Vote No. 216 Leg.]

Yielding a sufficient second?

Mr. NICKLES. The amendment is as follows:

[AMENDMENT NO. 841, AS MODIFIED]

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The amendment is as follows:

(Purpose: To dedicate 75 percent of any awards of civil monetary penalties allowed under this Act to a Federal trust fund to finance refundable tax credits for uninsured individuals and families)

At the end, add the following:

SEC. 1. REFUNDABLE TAX CREDITS FOR THE UNINSURED FINANCED WITH CERTAIN CIVIL MONETARY PENALTIES.

(a) PAYMENT OF CERTAIN PENALTIES TO SECRETARY OF THE TREASURY

(1) IN GENERAL.—Notwithstanding any other provision of law, 75 percent of any civil monetary penalty in any proceeding allowed under any provision of, or amendment made by, this Act may only be awarded to the Secretary of the Treasury.

(2) CIVIL MONETARY PENALTY.—For purposes of this section, the term ‘civil monetary penalty’ means damages awarded for the purpose of punishment or deterrence, and not solely for compensatory purposes. Such term includes exemplary and punitive damages or any similar damages which function as civil monetary penalties. Such term does not include either economic or non-economic losses. Such term does not include the portion of any award of damages that is not payable to a party or the attorney for a party pursuant to applicable State law.
provided health insurance. So this is an amendment that will take 75 percent of all punitive damage awards that occur as a result of actions provided for in this bill and create a trust fund which will be used to finance those who do not have employer-provided health insurance—in other words, the uninsured.

I think that is a way to ameliorate some of the damage caused by this legislation. The cost pulled out of the health care system through litigation, and through punitive damages in particular, will drive up the cost of health insurance. That money will go to lawyers, to a select few—principally the lawyers, but to a select few clients, patients, such as the gentleman from California who a couple of weeks ago hit the "lottery," with a $3 billion punitive damages award. If that kind of award occurs within the health care system, imagine the impact on all of the insured in this country. Imagine the cost that is going to have to be borne by the millions of people who receive some small fraction of this $3 billion punitive damages award. How much are your insurance rates going to go up if an award such as that is given? The least we can do is take the potential of a back-breaker award, or a series of back-breaker punitive damage awards, and put that back into the system in a way that helps those who do not have insurance.

So what I am suggesting is really a way to avoid some of the criticism that has been leveled against this bill, that this is full of litigation and costs, without any benefit coming back into the system. Remember, what we are concerned about here—yes, we are concerned about individual cases, obviously, but we are concerned about the greater picture, which is making sure the public generally has insurance and has quality health insurance.

As you can see from this chart, there is a real difference between the kind of health care people get when they are insured versus when they are not insured. This says "nonelderly adults with barriers to care by insurance status." In cases where they had procedures needed, but did not get the care for a serious problem, only 3 percent of the people who had insurance ended up in that category. So if they have insurance, if they have a serious problem and a prescribed solution, they basically get the care. But if they are not insured, 20 percent—almost seven times the number of the uninsured—do not get the care they need. This says "skipped recommended test or treatment." If they are insured, 13 percent of the people skip those tests. If you are not insured, almost 40 percent skip that.

Did not fill a prescription: 12 percent if you are insured; 30 percent if you are not insured.

SEC. 9511. HEALTH INSURANCE REFUNDABLE CREDITS TRUST FUND

"(a) Creation of Trust Fund.—There is hereby established in the Treasury of the United States a trust fund to be known as the "Health Insurance Refundable Credits Trust Fund," consisting of such amounts as may be—"

"(1) appropriated to such Trust Fund as provided in this section, or"

"(2) credited to such Trust Fund.

"(b) Transfer to Trust Fund of Amounts Equivalent to Certain Awards.—There are hereby transferred to the Health Insurance Refundable Credits Trust Fund amounts equivalent to the awards received by the Secretary of the Treasury under section 1324(b) of title 31, United States Code, with respect to assistance for uninsured individuals and families with the purchase of health insurance under this title."

"(c) Expenditures From Trust Fund.—Amounts in the Health Insurance Refundable Credits Trust Fund shall be available to fund the appropriations under paragraph (2) of section 1324(b) of title 31, United States Code, for assistance for uninsured individuals and families with the purchase of health insurance under this title."

"(d) Effective Date.—The amendments made by this section shall take effect on the date of the enactment of this Act."

Mr. SANTORUM. Madam President, one of the things I have repeatedly stated when I have spoken on this bill is that in S. 1352 there isn't any provision that provides for access to insurance. There is nothing that increases the number of insured. There are pages and pages and pages in this legislation that will decrease the number of insured and increase the rate of insurance in this country. If you would take a public poll, or take one in this Chamber, and were to ask people what is the biggest problem in the area of health care in this country, I think the overwhelming response would be the lack of insurance for 43 million Americans.

This is what we should be discussing how we are going to solve the biggest problem in the health care system, and that is providing some assistance for those who don't have employer-provided health insurance. We do not do that in this bill.

In fact, it has been stated over and over again that this bill will add to the ranks of the uninsured. That is not a positive step forward. We can talk about the positive things—and there are positive things in this legislation, which I have been historically in favor of—but in my mind they are counterbalanced—in fact, overwhelmed—by the increase in the uninsured that will happen as a result of several provisions of this act.

One of the provisions of the Health Insurance Refundable Credits Trust Fund that concerns me is that we are going to do with this amendment is I hope to take one of those negative provisions—that being unlimited punitive damages in State court and a $5 million cap on punitive damages in Federal courts—and channel some of that cost that is going to be borne by the insurance system and employers, and put that back into the system in the form of a trust fund for those who do not have employer-provided health insurance. So this is an amendment that will take 75 percent of all punitive damage awards that occur as a result of actions provided for in this bill and create a trust fund which will be used to finance those who do not have employer-provided health insurance—in other words, the uninsured.

I think that is a way to ameliorate some of the damage caused by this legislation. The cost pulled out of the health care system through litigation, and through punitive damages in particular, will drive up the cost of health insurance. That money will go to lawyers, to a select few—principally the lawyers, but to a select few clients, patients, such as the gentleman from California who a couple of weeks ago hit the "lottery," with a $3 billion punitive damages award. If that kind of award occurs within the health care system, imagine the impact on all of the insured in this country. Imagine the cost that is going to have to be borne by the millions of people who receive some small fraction of this $3 billion punitive damages award. How much are your insurance rates going to go up if an award such as that is given? The least we can do is take the potential of a back-breaker award, or a series of back-breaker punitive damages awards, and put that back into the system in a way that helps those who do not have insurance.

So what I am suggesting is really a way to avoid some of the criticism that has been leveled against this bill, that this is full of litigation and costs, without any benefit coming back into the system. Remember, what we are concerned about here—yes, we are concerned about individual cases, obviously, but we are concerned about the greater picture, which is making sure the public generally has insurance and has quality health insurance.

As you can see from this chart, there is a real difference between the kind of health care people get when they are insured versus when they are not insured. This says "nonelderly adults with barriers to care by insurance status." In cases where they had procedures needed, but did not get the care for a serious problem, only 3 percent of the people who had insurance ended up in that category. So if they have insurance, if they have a serious problem and a prescribed solution, they basically get the care. But if they are not insured, 20 percent—almost seven times the number of the uninsured—do not get the care they need. This says "skipped recommended test or treatment." If they are insured, 13 percent of the people skip those tests. If you are not insured, almost 40 percent skip that.

Did not fill a prescription: 12 percent if you are insured; 30 percent if you are not insured.

Had problems getting mental health care: 4 percent versus 13 percent.

If we are concerned about quality care, we must protect all everyone, then we have to address the issue of the uninsured. This bill just deals with those who have insurance. I remind people, this bill only deals with people who have insurance. The biggest problem with patient care is those who do not have insurance, and that is displayed on this chart. We all know that is the fact from our own lives, knowing people who do and do not have insurance.

We cannot walk out of here with our arms raised high saying we have a great victory for patients when we accomplish two things: No. 1, we provide a little bit of protection—and that is what we do, provide a little bit of protection—for those who have insurance because if they have insurance we allow those who have insurance to lose their insurance and end up with vastly inferior care. We provide a little bit of benefit for a lot, but we harm a lot of people profoundly in the process.

Again, this is a pretty minimal amendment. We allow for 25 percent of the punitive damages to stay with the lawyer—to stay with the client so they get a little piece of this pie. The lawyer gets paid, although if they have a big punitive damage award, they probably get a big settlement in a lot of other areas, too. In this $3 billion award, they get $5.5 million in compensatory damages. Nobody is going poor, from the lawyer's perspective, on filing this case.

When it comes to potential enormous awards for punitive damages, we need to plow some of this money back into the system. I am hopeful the Senate will take a step back and say this is one of the reasonable suggestions that can come about in order to take seriously this matter of providing quality health care, not just for those who have insurance but plowing that money back for those who do not.

Madam President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? The Senator from North Carolina.

Mr. EDWARDS. Madam President, I will first talk about what exactly the Senator from Pennsylvania is talking about when he talks about punitive damages. Punitive damages can only be awarded in a case where, in this context, an HMO or a health insurance company has engaged in virtual criminal conduct. They have to have acted maliciously, egregiously, outrageously for there to be a punitive damages award.

Now let's talk about it in the context of a real case. Let's suppose some young child needs treatment or a test and the insurance company executives meet and say: We are not paying for that test, and we do not care what the effect is. If something bad happens, so
be it. We will live with that, but we are not paying for it. Even though it is covered by our policy, even though we know we need to pay it, we refuse to pay it, period.

Let’s suppose because that child fails to get some treatment or test that they should have gotten, the child was paralyzed for life. Then a group of Americans sitting on a jury listens to the case, as they do in criminal cases every day in this country, and decides the HMO has engaged in criminal conduct and awards punitive damages on that basis.

First of all, I say to my friend from Pennsylvania, I doubt if the parents of that child crippled for life believe they have hit the lottery. That child’s life has been destroyed because of intentional criminal conduct on behalf of a defendant HMO and the health insurance company.

It is not abstract. This is conduct that was specifically aimed at that child. It is not abstract to the world. This is something that was aimed specifically at that child, that courtroom, and the jury found—in order for this to be possible, the court requires that the jury find that the HMO has engaged in outrageous, egregious conduct.

This is what this amendment does: It says we are going to take away 75 percent of that child’s punitive damages award. That is what it says. We are going to impose a 75-percent tax on that child.

That is a real case. This is not an abstract academic exercise. This is reality. I say to my colleague, if we are going to start taxing people around this country 75 percent of their money—that would be that child’s money—then having to pay 75 percent of people’s money, let’s not stop at that child. Why don’t we consider taking 75 percent of the $400 million that the CEO of one of these HMOs apparently made last year? That will help. We can go around the country and start picking all kinds of groups of people and put that money in a pot and do what we choose with it.

This is not a serious response to a serious problem. My friend from Pennsylvania and I agree that the uninsured are a very serious problem in this country. It is an issue we need to address, and we need to address it in a serious way. None of us suggest that what we are doing with this Patient Protection Act will solve that problem. It will not. We hope work left to do. There is no doubt about that. But we need to do that work in a serious, thoughtful, comprehensive way that will deal with the kids and the elderly in this country who do not have access to health insurance and who, as a result, do not have access to quality health care. The way to accomplish that is not by imposing a 75-percent tax on people, families who have been hurt by HMOs.

Mrs. BOXER. I ask the Senator to yield me 5 minutes.

The PRESIDING OFFICER. Who yields time?

Mr. EDWARDS. I yield 5 minutes to the Senator from California.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Mr. President, I thank Senator Edwards for using a hypothetical example of why this is a very cruel amendment which I hope will be voted down overwhelmingly. But I have a real case I can talk about in a moment to that child.

This morning—it seemed like a very long time ago, and it was—I voted for an amendment by Senator Santorum to protect infants, to say that infants who are born should have the protections of a child. I certainly agree that infants, children, and teenagers all the way up to the elderly, the most frail, should be covered by this bill.

What does my friend now suggest? A 75-percent tax on pain and suffering to go to the Federal Government for a Government program. This is unbelievable to me. A 75-percent tax on families who may be suffering because a child is permanently disabled, made blind, paralyzed, forever in a wheelchair, and then having to pay 75 percent of a punitive damage award that could go to help ease the pain of that child, that could hire people to take care of that child.

This is a cruel amendment. My friend always says he is for the children. This is not for the children. This is not for the families. This is not for the patients. This amendment will take the funds away from those families who are in desperate need of money to build a life for someone who may be suffering because a child has been injured. A person who has been injured is compensated for economic losses, and there is no cap on economic losses. They are compensated by pain and suffering. There are no caps on pain and suffering. Punitive damages have one purpose. That is to punish the person who has caused the injury. That is the only purpose for punitive damages, to say to a company or an HMO, your conduct has been so outrageous, so egregious, you will be punished. That has nothing to do with the compensation for the injured plaintiff or child. They have already been taken care of.

The concept of taking punitive damages and people who need those damages to help people who do not have insurance, is a novel idea. Other States have done it. It is a good approach. I think we should support it because it
CONGRESSIONAL RECORD—SENATE

June 29, 2001
12449

Mr. SANTORUM. I make clear a couple of issues. Eight States have already passed legislation that redirects punitive damages to specific purposes. I mentioned Georgia is one; Florida allocates money into the medical assistance trust fund; Illinois, into the department of rehabilitative services; Iowa puts money into the civil reparations trust fund; Kansas puts money directly in the State treasury; Missouri, to the tort victims compensation fund; Oregon—I mean the heavy hammer of compensation account; Utah, anything in excess of $20,000 in punitive damages goes to the State treasury.

This is not a brand new concept but a concept States have adopted because they understand, as the State of Georgia, that these are punitive damages, not compensatory damages. These are to punish people. We are saying, if you punish a guy who does a bad thing, who is a criminal, the crime is against everyone. Those who are not in the courtroom should be benefiting from this. That is the uninsured.

What will happen if those punitive damages are awarded to the individual or to the lawyer—because they get a big chunk? There will be more uninsured because the cost of health care will go up. This is punishing people who have insurance with higher premiums and higher rates. As the Senator from Louisiana said, we are already compensating the victim. They are getting unlimited compensation. There are no limits in State or Federal court for any compensation that is due this person. Who are we punishing here with punitive damages are the people who are going to lose their insurance because of high rates of insurance because of these punitive damages, and we will punish people who are going to keep their insurance and have to pay a lot more.

This is a modest amendment that tries to lessen the heavy hammer of cost that this bill puts in place. I am hopeful we get bipartisan support for it.

I reserve the remainder of my time.

Mr. EDWARDS. I will respond briefly to the Senator from Pennsylvania and the Senator from Louisiana.

First, I suggest to the Senator from Louisiana, when an HMO does something egregious, criminal, to a child, and in my example that child is crippled for life—there is not a State of Georgia all of us: it is against that child. It is that child who is in court. It is that child to whom the jury has awarded these damages. They didn’t award it to us or the people in the gallery; they award it to that child. When we go in and take 75 percent of that child’s money, no way you cut it.

We can talk around this and talk about it for the next 15 minutes or 15 hours. That money does not belong to us. It belongs to that child and that crime was committed against that child and that is whose money we are taking. It is a tax.

The PRESIDENT proclaims the Senator from Massachusetts—

Mr. KENNEDY. Mr. President, I yield myself 4½ minutes.

I have listened to my friend from Pennsylvania talk about the uninsured. But where was the Senator from Pennsylvania when President Bush asked for $80 billion to develop a program to cover the uninsured in this country and they reported back $1.6 trillion and wiped that program out? We could have had a real program for the uninsured, but I didn’t hear the Senator from Pennsylvania talk about that.

Where was he last year when we had the family care, $80 billion to cover 8 million Americans, the parents of the CHIP programs? The Senator from Pennsylvania opposed that.

So with all respect, to offer an amendment to try to help the children of this country with their health insurance has nothing to do with the voracity of the commitment of that side of the aisle in terms of trying to do something for the children of this country.

The record has not been there. To try to offer some amendment this afternoon and cry crocodile tears all over the floor about what we are doing for children when they basically have refused to address this issue in a serious way is something the American people see through.

We understand what is happening, even in this bill where you could have an important impact in terms of children who are covered. They have been supporting the attempts to water it down in terms of the HMOs.

That has been the record: Opposition to this HMO—the Patients’ Bill of Rights, to guarantee the children who do have health insurance are going to get protections. And they have been fighting tooth and nail to get that. Then they say: Oh, well, we are really interested in children because we are going to give them this refundable credit on it.

It does not carry any weight. The American people can see through this. Let’s get away from the business of passing a real Patients’ Bill of Rights and then let’s go out and try to pass a real health insurance bill that will do something about the remainder of the children who need the care and also the parents of those children who need it in a long-term family care. Let’s do something to look out after our fellow citizens.

I withhold the remainder of my time.

Mr. SANTORUM. I just want to remind the Senator from Massachusetts that the Smith-Wyden amendment that provided $28 billion for those who do not have insurance passed and that is now law. It was in the budget. So I have been a supporter of money and a substantial amount of money for those who do not have health insurance.

I have sponsored a piece of legislation, with Senator TORRICELLI, that is called Fair Care, which provides tax credits for the uninsured at the cost of around $20 billion a year.

So I suggest to the Senator from Massachusetts—

Mr. KENNEDY. Will the Senator yield on my time?

Mr. SANTORUM. One second—I just suggest to the Senator from Massachusetts, to impugn me personally and suggest I am disingenuous by proposing that we provide some money in punitive damages, not damages to compensate for injury but damages to punish someone who did a wrong—why should that go to an individual as opposed to society, which was wronged by that activity, as all criminal activity is. It is a crime against society. We do not compensate, as you know, when we prosecute someone criminally. The individual does not get benefit from that proceeding.

So punitive damages are there to punish, not to compensate. I know the Senator from North Carolina knows that. That is why they are called punitive—punish; compensatory—compensate. There is a difference. That language is not there for window dressing; it is there for substantive difference.

What I am suggesting is that these punitive—punishment—damages should not be given to people who have insurance because they are the ones ultimately to be punished. Several States have recognized this and have plowed this money coming out of the system of health insurance.

So I just suggest that my commitment here is sincere and my object here I think is worthy of support.

I reserve the remainder of my time.

The PRESIDENT OFFICER personally and suggest the Senator from North Carolina.

Mr. EDWARDS. First I say to my colleague, we can keep talking about this. The truth of the matter is the criminal...
Let me say I am one of the few Members on the floor of the Senate who practiced law before he was elected to Congress, who was in a courtroom, involved in a case which had a punitive damage verdict. That is very rare in American law. It happened to me. I was on the defense side. I was defending a railroad in a lawsuit brought by the survivors of an elderly man who was killed at a railroad crossing in November of 1970 near Springfield, Ill.

There was a row of cars, train cars, parked near this crossing. This elderly man, late at night, crept up on the crossing to see if he could get across. His car stalled in the crossing. He tried to get out, couldn't, and the train came through and killed him.

When the jury in Illinois sat down and looked at it, they said if you measure the value of an elderly man's life, there is not a lot of compensation. But when they looked at the railroad I was defending and found out we had done the same thing time and time and time again, they decided this railroad needed to get out, couldn't, and the train came through and killed him.

The Senator from Pennsylvania now wants us to say that three-fourths of the verdicts just like that should be taxed and taken by the Federal Government. He does not believe the family of the person who was killed at the crossing should get the money. He thinks the Federal Government should take the money.

He has some good purposes for the money to be spent. I don't question that. But this is a rather substantial tax which he said we should take to benefit the families of those who were killed at railroad crossings. Let's take it away from the families of children who were maimed, with permanent injuries they are going to face for a lifetime. He would not dare reach into the pockets of the executives of these health insurance companies.

Come to think of it, just 6 weeks ago we gave them a tax break here, didn't we?—a $1.6 trillion tax break for those executives. But a new tax on the family of those who come to court looking for compensation for real injuries and death in their own family?

We should reject this amendment. We know what it is all about. We are at close to passing a Patients' Bill of Rights with two fundamental principles, principles that say: First, doctors make medical decisions, not health insurance companies in America; and, second, when the health insurance companies do something wrong, they will be held accountable as every other business in America.

There are those on the other side of the aisle who hate those concepts just as the devil hates holy water. But I will tell you, families across America know they are sensible, sound values and principles. All of this fog and all of this smoke screen about taxing punitive damages for the good of America—why aren't you taxing the executives' salaries at the health insurance companies who are ripping off people across America? Instead, you are passing tax breaks for those very same people.

I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SANTORUM. Mr. President, I will be happy to work with the Senator from Pennsylvania, executives and lawyers who get big awards out of the health care system equally. If you would like to propose an amendment, I will work with you so all lawyers and all health executives who profit from the health care system will have that money plowed back in. I did not hear that. I don't think I heard that. I think I just heard one side of that argument. I will be happy to yield a minute to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Listening to all this screaming and hollering, obviously somebody has been stuck by this amendment. What does this amendment do? The bill before us, under the best set of circumstances, is going to cost 1.2 million people in America their health insurance by driving up the cost of health care. And one of the primary factors driving up that cost is litigation.

What the Senator from Pennsylvania has proposed is to take the part of these massive settlements that has nothing to do with compensating the person who has been injured—it has to do with punishing reckless and irresponsible lawyers who plow that money that is to punish the company?—a $1.6 trillion tax break for those executives. But a new tax on the family of those who come to court looking for compensation for real injuries and death in their own family?

We should reject this amendment. We know what it is all about. We are close to passing a Patients' Bill of Rights with two fundamental principles, principles that say: First, doctors make medical decisions, not health insurance companies in America; and, second, when the health insurance companies do something wrong, they will be held accountable as every other business in America.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. I thank the Senator from North Carolina for yielding 5 minutes.

Let me say I am one of the few Members on the floor of the Senate who practiced law before he was elected to Congress, who was in a courtroom, involved in a case which had a punitive damage verdict. That is very rare in American law. It happened to me. I was on the defense side. I was defending a railroad in a lawsuit brought by the survivors of an elderly man who was killed at a railroad crossing in November of 1970 near Springfield, Ill.

There was a row of cars, train cars, parked near this crossing. This elderly man, late at night, crept up on the crossing to see if he could get across. His car stalled in the crossing. He tried to get out, couldn't, and the train came through and killed him.

When the jury in Illinois sat down and looked at it, they said if you measure the value of an elderly man's life, there is not a lot of compensation. But when they looked at the railroad I was defending and found out we had done the same thing time and time and time again, they decided this railroad needed to get out, couldn't, and the train came through and killed him.

The Senator from Pennsylvania now wants us to say that three-fourths of the verdicts just like that should be taxed and taken by the Federal Government. He does not believe the family of the person who was killed at the crossing should get the money. He thinks the Federal Government should take the money.

He has some good purposes for the money to be spent. I don’t question that. But this is a rather substantial tax which he said we should take to benefit the families of those who were killed at railroad crossings. Let’s take it away from the families of children who were maimed, with permanent injuries they are going to face for a lifetime. He would not dare reach into the pockets of the executives of these health insurance companies.

Come to think of it, just 6 weeks ago we gave them a tax break here, didn’t we?—a $1.6 trillion tax break for those executives. But a new tax on the family of those who come to court looking for compensation for real injuries and death in their own family?

We should reject this amendment. We know what it is all about. We are close to passing a Patients' Bill of Rights with two fundamental principles, principles that say: First, doctors make medical decisions, not health insurance companies in America; and, second, when the health insurance companies do something wrong, they will be held accountable as every other business in America.

There are those on the other side of the aisle who hate those concepts just as the devil hates holy water. June 29, 2001

CONGRESSIONAL RECORD—SENATE 12451

I have listened to and have engaged in debates on victims' rights. Victims are sick and tired when criminal behavior is committed and they are not considered when the matters have come before the bar of justice. When an individual, a child, or an adult is found to be injured as a result of criminal conduct, that is what punitive damages are, I think they deserve to receive that award.

Mr. EDWARDS. Mr. President, the Senator from Connecticut is exactly right. When we have a victim, such as a child who has been injured by the criminal conduct of an HMO, it is fundamentally wrong to take 75 percent of that child’s money. And that is to whom it belongs. No matter what they say, and no matter how long we talk about it, it belongs to that child. To take 75 percent of that child’s money is wrong, and we should vote against this amendment.

I yield the remainder of my time.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SANTORUM. Mr. President, I yield to the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. THOMPSON. Mr. President, I have been listening to this debate, and I think some good points have been made on both sides. But is the standard for recovery of punitive damages in this case criminal conduct, or wanton misconduct, or intentional infliction of distress? I would be surprised if the standard for punitive damages is criminal conduct.

Is that the case?

Mr. SANTORUM. No. If it takes a long time to answer, I am not going to yield the rest of my time to define that answer.

Mr. EDWARDS. If the Senator will yield to me, I will be happy to answer that question. I can’t answer it yes or no.

The answer is reckless, intentional, outrageous conduct.

Mr. SANTORUM. Which is not criminal.

Mr. EDWARDS. Of course, it is criminal conduct.

Mr. THOMPSON. No, no, no. Reclaiming my time, let’s not gild the lily. I think you have some good points. Let’s not try to convince people that wanton misconduct and willful misconduct is the same as criminal misconduct. It is not.

Mr. SANTORUM. Mr. President, let me reclaim my time. It is quickly running out.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. EDWARDS. Will the Senator yield for a response to that question?

Mr. SANTORUM. Mr. President, I ask unanimous consent for an additional minute to finish this colloquy so it doesn’t impinge on my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EDWARDS. The language of the legislation is that reckless, intentional conduct is criminal conduct—all over America.

Mr. THOMPSON. No. It isn’t.

Mr. EDWARDS. I respectfully disagree. Somebody who engages in reckless conduct in the operation of an automobile has engaged in criminal conduct. Somebody who engages in reckless conduct that causes the death of another person has engaged in criminal conduct. I respectfully disagree with the Senator.

Mr. THOMPSON. If I could respond, conduct that is subject to civil litigation versus conduct that is subject to criminal litigation, the conduct that the Senator described may, in fact, turn out to be also in addition to having civil exposure having criminal exposure. We may not. But the conduct very well may be reckless, or even intentional, and constitutes conduct that is subject to punitive damages which can still not be criminal.

My only point is that it is not the same. It is not the same. The same conduct can in some cases be both, but in the civil context—

The PRESIDING OFFICER. The Senator’s time has expired.

Mr. THOMPSON. All right.

The PRESIDING OFFICER. The Senator from Pennsylvania has 1 minute.

Mr. SANTORUM. Mr. President, I reiterate that this amendment is about taking money. The concern of this bill is that excessive costs will drive up the rates for insurance. We are taking some of this excessive cost that is built into this bill and plowing it back into the system to make sure that we don’t have more uninsured if we don’t take care of it.

I wish to make one additional point. Back in 1992, the House sponsor of the McCain-Kennedy bill, John Dingell, proposed using 50 percent of punitive damage awards to help compensate people—in this case, to prevent medical injuries. This is not a punitive damage measure. This is a measure that understands that punitive damages should go to benefit those in society who could be hurt by their increased cost of insurance. That is what this amendment does.

I hope we can get some bipartisan support for it.

I ask for the yea and nays.

The PRESIDING OFFICER. All time has expired.

Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has expired.

Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the motion. The clerk will call the roll.
in the order we talked about, Senator WARNER; Senator ENSENZ on genetics, and I understand his pro bono amendment is being agreed to; and Senator THOMPSON, which I understand also has been agreed to.

Mr. THOMPSON. No. And then Senator Frist has a substitute.

Is there anybody else who has an amendment?

That appears to be our list.

Mr. DASCHLE. Mr. President, I ask unanimous consent that be deemed as the finite list of amendments to be offered to this bill.

Mr. CRAIG. Reserving the right to object.

Mr. DASCHLE. Mr. President, is there an objection?

Mr. NICKLES. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. I just tell the majority leader, we have not had a chance to run that by our colleagues. We have been shopping amendments, and the Senator from New Hampshire is to be congratulated that he has reduced the number of amendments substantially. We will need a few minutes at least to run this by the rest of our colleagues to make sure they know that if they have additional amendments to be considered, they need to get them on our list.

If the majority leader will please withhold the request, we will shop it around.

Mr. DASCHLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, while Senators are working out their amendments, I think there ought to be an Independence Day speech. I assume we are going home for the Fourth of July. So if there is no objection, I have a speech in hand. (Laughter.)

Mr. MCCAIN. Reserving the right to object. (Laughter.)

In admiration of the Senator's tie, how long is the speech?

Mr. BYRD. Well, now, in the face of that extraordinary compliment, I would say it is just half as long as it would have been otherwise. (Laughter.)

Mr. McCAIN. No objection.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

INDEPENDENCE DAY

Mr. BYRD. Mr. President, the Senate will shortly recess, hopefully, for the Independence Day holiday. Many Mem-

bers will return home to meet with their constituents. Some will perform a time-honored ritual and take part in hunting bugs. Independence Day parades, sweating and waving from the backs of convertibles somewhere in the line-up between the pretty festival queens, brightly polished antique cars, flashing fire engines, and, hopefully, ahead of the politicians, the equestrian groups. It is an American tradition as familiar as and as comforting as the fried chicken and the apple pie that everyone will enjoy. Families and friends will gather to watch the fireworks light the evening sky.

This first Independence Day of the new millennium calls to mind an earlier year two centuries ago. The year was 1801. Of course, then, as now, there had been a hotly contested election. Control passed from one party to another. It took a vote in the electoral college to decide the Presidency, and the House of Representatives put Thomas Jefferson into the White House instead of Aaron Burr. The first day of a new century came and went, and these strong words were uttered. Grudges were nursed, and we feel those same passions today, and with the recent change of party control in the Senate, some angry feelings have been fanned anew. It is, perhaps, a good time as we celebrate the 225th anniversary of our country's independence as a new nation, a new government created under God in as thoughtful and inspired a manner as man can devise, to recall these words from President Jefferson's inaugural address:

"During the contest of opinion through which we have passed the animation of discussions and of exertions has sometimes worn an aspect which might impose on strangers unused to think freely and to speak and write what they think; but this being now decided by the voice of the Nation, announced according to the rules of the Constitution, all will, of course, arrange themselves under the will of the law, and unite in common efforts for the common good. All too, will bear in mind this sacred principle, that though the will of the majority is in all cases to prevail, that will to be rightful must be reasonable; that the minority possesses their equal rights, which equal law must protect, and to violate would be oppression. Let us, then, fellow-citizens, unite with one heart and one mind. Let us restore to social intercourse the free and harmonious and affectionate spirit in which we have passed the animation of discussions, as we hear the martial music of the Nation, or in large cities, we may all be proud to be Americans first and foremost. Whatever other allegiances we might have, to party, church, state, or community, we are Americans first. Let us celebrate that and let us not forget it.

As you light your sparklers and fountains, as you hear the martial music of John Phillip Sousa, as you applaud the fireworks displays, as you eat the first sweet potatoes from the garden, look around you and feel proud. Be proud that 225 years ago, bold men risked their lives and their fortunes and their sacred honor to give us this wonderful system of States, this amazing governmental system, this land of the free, this home of the brave united as one nation under God and under the red, white, and blue flag of the United States of America. Feel glad that so many of your fellow citizens are standing at your shoulders watching the parade, or sitting nearby in the park - a family looking up at the sky ablaze with man-made stars. In these crowds is our hope for a long future as a people united still under Old Glory, and under the Constitution of the United States.

Mr. President, Thomas Jefferson spoke of our constitutional government as the "sheet anchor" of our peace and safety. He chose his nautical allusion fittingly. A sheet anchor, according to the Merriam-Webster Dictionary, is a noun that first appeared in the 15th Century. It is a large, strong anchor formerly carried in the waist of a ship and used as a spare in an emergency, but the phrase has also
June 29, 2001

CONGRESSIONAL RECORD—SENATE

12453

come to be used for something that constitutes a main support or depend-

ence, especially a ‘‘dead’’ danger. Truth, then, the Constitution is not just the organizing construct of our government, but also, as Jefferson saw it, the tool by which our Nation would preserve our liberties. It is fitting, then, to close with the words of the poet and senator, Edward Everett Longfellow, who wrote about the republic in ‘‘The Building of the Ship.’’

Thou, too, sail on, O Ship of State! Sail on, O Union, strong and great! Humanity with all its fears,

With all the hopes of future years, Is hanging breathless on thy fate! We know what Master laid thy keel, What Workmen wrought thy ribs of steel, Who made each mast, and saile, and rope, What anvils rang, what hammers beat, In what a forge and what a heat Were shaped the anchors of thy hope!

'Israel the sea, and fluction and shock, 'Tis but the wave and not the rock; 'Tis but the flapping of the sail, And not a rent made by the gale! In spite of rock and tempest's roar, In spite of false lights from the shore, Sail on, nor fear to breast the sea! Our hearts, our hopes, are all with thee.

Our hearts, our hopes, are all with thee, Our hearts, our hopes, our prayers, our tears.

Our faith triumphant o'er our fears, Are all with thee—are all with thee! Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I certainly join my colleagues in expressing our warm appreciation for our senior colleague, our President pro tempore, for addressing the Senate in such a stirring manner. It lifts the hearts of all of us in this late hour on a Friday afternoon, which has, I guess, a degree of uncertainty as to the manner in which we are going to proceed.

BIPARTISAN PATIENT PROTECTION ACT—Continued

AMENDMENT NO. 883, AS FURTHER MODIFIED

Mr. WARNER. Mr. President, I have an amendment which has been pending. I send to the desk a modification of that amendment.

The PRESIDING OFFICER. Without objection, the amendment is modified.

The amendment (No. 883) as further modified, is as follows:

On page 154, between lines 2 and 3, insert the following:

‘‘(11) LIMITATION ON ATTORNEYS’ FEES.—

‘‘(A) IN GENERAL.—Notwithstanding any other provision of law, or any arrangement, agreement or contract regarding an attorney’s fee, the amount of an attorney’s contingency fee allowable for a cause of action brought pursuant to this subsection shall not exceed 1⁄3 of the total amount of the plaintiff’s recovery (not including the reimbursement of actual out-of-pocket expenses of the attorney),

‘‘(B) DETERMINATION BY DISTRICT COURT.—The last Federal district court in which the action was pending upon the final disposition, including all appeals, of the action shall have jurisdiction to review the attorney’s fee in accordance with subparagraph (C) to ensure that the fee is a reasonable one and may decrease the amount of the fee in accordance with subparagraph (C).’’

On page 170, between lines 21 and 22, insert the following:

‘‘(9) LIMITATION ON ATTORNEYS’ FEES.—

‘‘(A) IN GENERAL.—Notwithstanding any other provision of law, or any arrangement, agreement, or contract regarding an attorney’s fee, subject to subparagraphs (C), (D), and (E), the amount of an attorney’s contingency fee allowable for a cause of action brought under paragraph (1) shall not exceed 1⁄3 of the total amount of the plaintiff’s recovery (not including the reimbursement of actual out-of-pocket expenses of the attorney),

‘‘(B) DETERMINATION BY COURT.—The last court in which the action was pending upon the final disposition, including all appeals, of the action may review the attorney’s fee to ensure that the fee is a reasonable one. In determining whether a fee is reasonable, the court may use the reasonableness factors set forth in section 502(n)(11)(C).’’

‘‘(C) EQUITABLE DISCRETION.—A court in its discretion may decrease the amount of an attorney’s fee determined under this paragraph as equity and the interests of justice may require.’’

‘‘(E) NO PREEMPTION OF STATE LAW.—Subparagraph (A) shall not apply with respect to a cause of action under paragraph (1) that is brought in a State that has a law or framework of laws with respect to the amount of an attorney’s contingency fee that may be incurred for the representation of a participant or beneficiary (or the estate of such participant or beneficiary) who brings such a cause of action.’’

Mr. WARNER. Mr. President, I want to comply with the wishes of the distinguished leaders.

Mr. DASCHLE. Mr. President, may we have order.

The PRESIDING OFFICER. The Senate is not in order. The Senate will suspend. Please take your conversations off the floor.

Mr. WARNER. Mr. President, I wish to accommodate the managers, but I am ready to proceed. I think I can describe my amendment in about 10 or 15 minutes or less. I urge colleagues to accept that offer to move ahead and give equal time to each side.

Mr. REID. I am sorry. I say to my friend, the distinguished Senator from Virginia, we have had trouble hearing over here.

The PRESIDING OFFICER. The Senate will be in order. The Senator from Virginia is entitled to be heard.

The Senator from Virginia.

Mr. WARNER. I say to my good friend, the distinguished majority whip, I am seeking now to address my amendment. It has been pending for some several days. I am perfectly willing to enter into a time agreement. I need but, say, 15 minutes.

Mr. REID. Say 30 minutes evenly divided?

Mr. WARNER. I am quite agreeable to 30 minutes equally divided.

Mr. REID. Our anticipation now—we will work this out, speaking with the managers of the bill—is to offer side by side with yours, or second degree, whatever your manager wishes to do, but you should go ahead and proceed. We are available during our 15 minutes to help.

Mr. WARNER. Mr. President, might I have clarification? If I understand it on the second-degree, in the event it seems we need some adjustment in the time agreement with which to address this?

Mr. REID. Why not take an hour evenly divided, and if we don’t need it, we will yield back the time?
Mr. GREGG. Mr. President, I am not sure what the Senator from Virginia wishes to do. I hope they will not offer a second-degree amendment but, rather, offer an amendment which would be a stand-alone, side-by-side amendment.

Mr. REID. I am sorry, did you say you wanted to offer it side by side? That is what we want to do.

Mr. WARNER. That is perfectly agreeable. Could my amendment be voted on first?

Mr. REID. Of course—well, let me not get my mouth ahead of my head.

In the past what we have done, Mr. President, is the second-degree amendment could be a second-degree amendment that appears to be the one we would ordinarily vote on first. Through all these proceedings, the stand-alone was the one we would vote on first. In other words, that could have been a second-degree. That is what we have done in the past.

Mr. GREGG. Actually, we did reverse the order on the Snowe amendment.

Mr. REID. It is not important whether it is first or second. Do you agree?

Mr. EDWARDS. We should go first.

Mr. REID. Through these entire proceedings—I don’t know how many votes it has been now, but certainly it is lots of them—the one that would have been the second-degree should be voted on first. We think we should do it in this instance.

Mr. WARNER. Mr. President, I believe I have the floor. I believe the amendment is up. We are simply discussing a time agreement. I am not prepared to yield the right that I believe I now have with respect to proceeding with this amendment. But I want to accommodate my distinguished friend. He has been most helpful for 6 or 7 days, as I have worked on this amendment.

Could you be more explicit exactly what you think you would like to have? I understand you have to consult with others.

Mr. REID. What we would like to do is offer an amendment that would be voted on, a companion to yours.

Mr. WARNER. Fine.

Mr. REID. The only question now, it seems, is which one would be voted on first. What we have done during these entire proceedings is that we have offered a second-degree amendment that was offered by the Senator from Maine, the one that would have been a second-degree is voted on first. We think we should follow that same order.

Mr. WARNER. I simply ask as a matter of courtesy—some 3 days I have been working with you—just allow mine to be voted first. Certainly we could have discussion on the one that is in sequence. I am confident Members will very quickly grasp the basic, elementary framework that I have in my amendment. And I presume any companion amendment you or others wish to introduce would likewise be very elementary. We could quickly make decisions, all Senators, on it and proceed with our business this afternoon.

Mr. REID. Mr. President from Virginia, I know some of our friends would rather we went first. We feel pretty confident of our vote, so we will go second.

Mr. WARNER. Mr. President, I like a man who is audacious, I accept that challenge. We will proceed on mine. I need only about 10 minutes to address it.

Mr. DASCHLE. Will the distinguished senior Senator from Virginia yield for a unanimous consent request.

Mr. WARNER. Oh, yes.

Mr. DASCHLE. We were able to reach this agreement with the cooperation of all our colleagues. I think we are now prepared to propound the agreement.

Mr. President, I ask unanimous consent that the following be the only first-degree amendments remaining in order to S. 1052, except the Warner and Ensign amendments which have been laid aside and which now are being debated that they be subject to relevant second-degree amendments; all amendments must be offered and disposed of by the close of business today; and that upon disposition of these amendments the bill be read a third time and a vote on final passage of the bill occur without any intervening action or debate:

Frist substitute; Frist, liability; Craig, long-term care; Craig, nuclear medicine; Kyl, alternative insurance; Santorum, unions; Nickles, liability; Bond, punitive; Thompson, regarding point of order; Kennedy, two relevant; Daschle, two relevant; Carper, relevant, to be offered and withdrawn.

The PRESIDING OFFICER. Is there objection?

Mr. GREGG. Reserving the right to object, I ask if the majority leader would be willing to adjust his unanimous consent so Senator Ensign could modify his amendment, which is pending, and also, because we have not seen the Kennedy, Daschle, or Carper amendments, we would want to reserve the right to have a second-degree amendment.

Mr. DASCHLE. The amendments are subject to second degrees, of course. I ask consent the Ensign amendment be allowed to be modified.

Mr. CRAIG. Reserving the right to object.

Mr. GREGG. Reserving the right to object.

Mr. THOMPSON. Reserving the right to object, a simple point: My amendment was listed as one having to do with a point of order. If we could correct that, it actually has to do with venue.

Mr. DASCHLE. I ask consent the clarification be made with regard to the Thompson amendment.

Mr. GREGG. I also ask that the Nickles amendment be defined as relevant, rather than liability, and, since the majority leader has asked to reserve two relevant amendments, the Republican leader be given two relevant amendments.

The PRESIDING OFFICER. Does the majority leader modify the request?

Mr. DASCHLE. I ask unanimous consent that the request be so modified.

The PRESIDING OFFICER. The request is modified.

The Senator from Idaho.

Mr. CRAIG. Mr. President, may I inquire of the majority leader, is it your intent to at least shape the field of amendments into a set number but there is no time tied to those? Is that correct?

Mr. DASCHLE. That is correct.

Mr. CRAIG. Thank you.

The PRESIDING OFFICER. Is there objection to the request. Without objection, it is so ordered.

Mr. DASCHLE. I thank our colleagues.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, if I may just proceed, my understanding is that we have 30 minutes equally divided under the time agreement. Is that correct?

The PRESIDING OFFICER. That has not been propounded.

Mr. WARNER. Mr. President, I suggest we just leave it open. I want to give adequate opportunity to those who wish to address this subject. I will proceed.

Mr. President, for some time I have followed this bill very carefully. I am, of course, quite aware of the name of it—the Patients’ Bill of Rights. I want to ask the Senate to give serious consideration to protecting the right of a patient to receive what I regard as a fair return on such awards as a court may approve, presumably, by a jury deciding the negligence case has merit and assigns an award figure.

The McClain-Kennedy-Edwards bill provides new rights. But there is nothing in there to give the patients the protection from what could well be perceived by many as an unfair allocation of that award between attorneys and patients. Therefore, I think there should be a framework of caps on the maximum amount of the award to be made.

May I explain it.

It is kind of complicated because we have a Federal court and a State court. While I don’t know the ultimate finality of this legislation, at this point the amendment provides for the treatment of caps in both courts, and they are somewhat different.

In addition, I believe very strongly that there is in rare instances and under extraordinary circumstances a case where an attorney would be entitled in excess of the one-third cap that I am proposing in both Federal and State courts. An allowance has to be made for the exceptional type of case.
I am proposing a framework of caps. It would be giving the court the right to only approve attorney’s fees in a case—on the third of the amount of damages. It could well be that the client may have struck an arrangement with his attorney for less than one-third. It recognizes that situation.

Having the one-third cap strengthens the ability of the patient—the client—to get a fee structure which is consistent with their receiving the majority of the ultimate one-third as the basic structure in both the Federal and the State court.

In addition, in both Federal and State court, we have exceptions in rare cases, and extraordinary facts, where the judge can go above the one-third with no cap.

We have reposed confidence in our judicial system. Indeed, we have reposed confidence in those members of the bar. Many years ago, I was privileged to be an active practitioner before the bar and had extensive trial experience as assistant U.S. attorney and some modest trial experience in other areas.

I recognize that the vast majority of the bar will work out a fee schedule with their client in such a way that there will be an equitable distribution. But there are instances where the patient could well be deserving of the award by the court and then prohibited from getting what I perceive as a fair and proportionate share by someone who does not follow the norm.

The norm in most cases does not exceed one-third. Contingent fees are usually one-third or less. Therefore, we put in the cap of the one-third.

I also want to make it clear that there is a good deal of expense to a lawyer associated with representing a client, not whether it is in the return of the jury in most instances; the experience and reputation of the particular attorney, and on it goes. But it is carefully worked out through many years of following these cases.

Therefore, I believe that we are giving protection to the patient. For rare and extraordinary cases, the court can go above it. In some instances, the court will decide that the one-third is not appropriate, and that it should be some fee less than a third, again protecting the interests of the patient.

I find this a very reasonable amendment. It certainly comports with the basic objectives of this law; namely, to give some benefits to those who have suffered the grievances which are designated in this law.

I also recognize the Federal-State law; that is, what we call States rights. I have been a strong proponent of that throughout my career in the Senate. I provide that in the case of a State court, if the State in which that court sits has a framework of laws which govern attorney fees, then this amendment does not apply.

I repeat that the State law would govern the return to the attorney of that amount to which he or she is entitled for their services—not this proposed amendment.

Mr. President, I see my colleague in the Chamber. I yield the floor for the moment.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I have a unanimous consent request I am going to propose in just a minute—or in even less than a minute.

Senator GREGG is in the Chamber, and I appreciate his listening.

Mr. President, I ask unanimous consent that I be recognized to offer an additional first-degree amendment, with 30 minutes for debate in relation to the Warner amendment and the Reid amendment to run concurrently prior to a vote in relation to the Warner amendment—which the Senator from Virginia indicated he wanted first—followed by a vote in relation to the Reid amendment, with no second-degree amendments in order prior to the vote.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

AMENDMENT NO. 832

Mr. REID. Mr. President, Senator WARNER and I have worked side by side all the time I have been in the Senate on the Environment and Public Works Committee. I have been his subcommittee chairman; he has been my subcommittee chairman. Twice I have been chairman of the full committee. I have been the ranking member of that committee.

There is no one I have worked with in the Senate who is more of a gentleman than the Senator from the Commonwealth of Virginia, Mr. WARNER. He has been a pleasure to work with. We tried this out on the attorney’s fees. We have been unable to do that. But his amendment is, in my opinion, very complicated. It is going to create litigation, not solve it.

We have a fair way to address this issue. Even though personally, as an attorney, I had done a great deal of defense work where I was paid by the hour and a significant amount of work where I was paid on a contingency fee basis many years before I came back here, I think contingent fees should be based upon whatever the States determine is appropriate.

But I am willing to go along with the basic concept of the Senator from Virginia; and that is we will go for a straight one-third, no complications. It is very simple: A straight one-third.

Senator WARNER’s proposal introduces a complex calculation in every case and ignores the agreements between injured patients and their lawyers. This proposal purports to tell State judges how to apply State law. We do not need to do that here in Washington.

This proposal ties only one side’s hands in litigation. HMOs can hire all the attorneys they want and plaintiffs cannot. There is no restriction on how much money the attorneys for the HMOs make. We are not going to get into that today. We could. It would be a very interesting issue to get into.

But what we are saying is, when you walk down in the well to vote on the amendments, we have a very simple proposal: It is one-third, period. Under Senator WARNER’s proposal, it is something; and we will figure it out later based on how many hours, and where you did it, and what kind of case it was. Ours is simple, direct, and to the point. It would only complicate things to support the amendment of my friend from Virginia.

Mr. President, at this time, after explaining my amendment, I call my amendment forward and ask for its immediate consideration.

The PRESIDING OFFICER. The bill clerk will report as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 832.

Mr. REID. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To limit the amount of attorneys’ fees in a cause of action brought under this Act)

On page 154, between lines 2 and 3, insert the following:

"(11) LIMITATION ON AWARD OF ATTORNEYS' FEES—

"(A) In general.—Subject to subparagraph (B), with respect to a participant or beneficiary (or the estate of such participant or
beneficiary) who brings a cause of action under this section and prevails in that action, the amount of attorneys’ contingency fees that a court may award to such participant, beneficiary, or estate under subparagraph (g)(1) (not including the reimbursement of actual out-of-pocket expenses of an attorney as approved by the court in such action) may not exceed an amount equal to $50,000, $100,000, and they are betting on the come. Some law firms actually risk their solvency on a case that they believe is worth pursuing.  

There is no time to come along and say: By the way—the fact, after the risk is taken on behalf of a client, where you may get absolutely nothing and you may end up in the hole, losing a lot of money, because I can tell you, major corporations do what they are entitled to do under this system. They have batteries of lawyers, and they just depose the devil out of you. It costs. For example, the person taking down my comments right now, the cost to the American tax-payer for that transcription is hundreds of thousands of dollars a year—millions of dollars a year. We need to have a record, and we do it.

The same thing happens in the depository area. America has certain rights. With a little machine like that and types away. So if I am the deep-pocket company and I want to run you out, all I do is I keep deposing you; I keep submitting interrogatories; and I run your cost up because you have to pay for that. I guess the only point I am trying to make is—and I don’t want to take the time because I am sure everybody’s mind is already made up on this thing—if you feel good about lawyer bashing, if you feel good about making the case that you should have to justify, on an hourly basis, exactly what you do, and all of these things, not calculate the risk, not calculate the cost, then fine, have at it.

But I don’t know; what is good for the goose isn’t good for the gander. If we do this with regard to attorney’s fees and we don’t do this with regard to health care costs and fees, what is the fundamental difference? Tell me the fundamental difference. I think it is a sudden burst of great interest of my friends to protect the poor, aggrieved plaintiff, who has been wronged by the insurance company. At any rate, I am as anxious to get out of here as everybody is. I wanted to make it clear: I think this is bad law, bad policy, a bad idea, and it is, in a literal sense, discriminatory.

Mr. REID. Mr. President, this legislation that is now before the body is not about attorney’s fees. It is about patient protection, making sure people in America have certain rights and that they have not been taken away from them. We want to reestablish something that is kind of old-fashioned in the minds of many—that is, when you go see your doctor, the doctor determines what kind of medicine you need and what kind of care you need. That is what this legislation is all about. It is not about attorney’s fees.

If the people on the other side were interested in saving money, one of the amendments they should have would address the compensation of some of these employees. There is a list, and you can go to the top 10. The first one, including stock options, made
$411,995,000 last year. That is just a little item they might be concerned about a little bit. We have a lot of money that isn’t necessarily needed.

This is not about how much money people make. What it is about is trying to pass a Patients’ Bill of Rights. I ask that we move forward as quickly as possible and vote and get on with the rest of the legislation.

The PRESIDING OFFICER. Who yields time?

Mr. REID. The Senator from Tennessee may have some of mine.

Mr. THOMPSON. A couple of minutes, if I may, Mr. President.

I have been listening to the debate. We are making it much more complicated than it needs to be. We are talking about whether or not this is a good idea. The sponsors of these two amendments are talking about some good ideas. I will not debate that these are possibly a couple of those good ideas.

I am afraid we are not permitted to get that far because not every good idea is constitutionally permissible. I simply do not see our authority, even if we want to do this under the Constitution, to say to a State court, having lifted the preemption that was there before, that in its deliberations and in its lawsuits it will be trying, that we have, in a government of enumerated powers, the authority to reach in and do that. This is not raising an army. This is not copyrights and patents. This is not interstate commerce. I simply see no basis of authority for the Congress to do this, whether it is a good idea or not in our system of enumerated powers.

If I am incorrect about that or there is something I am not thinking about, I will stand corrected. That is a concern of mine.

I yield the floor.

Mr. WARNER. Mr. President, if I could reply to my distinguished colleague, that very question I entertain because I take pride in my record of some 23 years in this body to protect State laws.

The first thing I did under my amendment was say, if there is a body of State law, then my amendment doesn’t apply to those decisions in State courts. So I think there is some dozen or so that have a statutory framework for the regulation of attorney fees. Those States are the one side. But we find authority that it is within the power of the Congress to regulate interstate commerce. We have a proposed bill giving new rights to litigants. We believe that comes within that clause. That is how I proceed to do it.

We are just very fearful, I say to my distinguished colleague, that patients will not be able to, without this authority of some cap, obtain a fair allocation of these proceeds in some few cases. I myself have a high confidence in the bar and the courts to exercise equity and fairness. In some instances, it might not prevail.

We have had cases here where some lawyers are getting $30,000 per hour, in some of these tobacco cases. Mind you, $30,000 per hour. I just think it is time that we, the Congress of the United States, do what we can within the framework of our constitutional law to exercise and put a cap on that.

I say to my good friend from Nevada, he has marked up an earlier version of my bill. And at least you started with a pretty good base here, but you took out the essence of it. We did remain with a one-third fee, but giving the court the right to raise or lower this fee without any guidance whatsoever, even without the guidance of the word ‘reasonableness’ put into the proposal by my friend. And not punitive.

It seems to me that, while we are apart, we could possibly bridge our differences, if I could have the assurance that a patient, as we now call them under this proposed legislation—plaintiffs in ordinary circumstances—is given reasonable protections. I have tried to give the court the flexibility in those instances where, for example, if a trial took 2 or 3 weeks and then, through no real fault of the attorney or anyone else, there somehow was a mistrial—I have tried them myself. Jurors get ill, sick. For whatever reason, the court pronounces a mistrial and the attorney has to go back and try the whole case over again—that begins to add up in time and expense, and so forth. That attorney should be fairly compensated, and his client has to recognize that in rare and extraordinary cases the court can adjust the fees above the one-third. I find in here no guidance whatsoever.

Under that Federal law, I laid down a formula which has been approved by the Supreme Court and is followed now in our Federal system.

I further point out to my distinguished colleague from Nevada that the ERISA framework of laws governs much of the action in Federal court. And there ERISA puts an affirmative duty on a judge to review that attorney’s fees. You are, in effect, modifying the framework of ERISA here, as I read it, and I say put into that affirmative duty on the court in the Federal system to review those attorney fees.

Mr. REID. Mr. President, I apologize to my friend. Did the Senator from Virginia ask me a question?

Mr. WARNER. Yes, I had been going on for some minutes now. I will go back over it again. I say to my good friend, you took an earlier version of my amendment, and in striking it out, No. 1, you left the one-third cap in, but you gave the court the ability to go up or down, with no guidelines by which that jurist goes up or down. In other words, there is no even standards of reasonableness. It could be implied, of course. But I looked upon the lodestar method, which is followed by the Federal courts in arriving at a fair award. We believe there is no guidance for the jurist in the proposal of my colleague.

Mr. REID. I say to the Senator from Virginia, in every State court in America, every day judges are called upon to determine attorney’s fees. In estate cases, where people are hire to represent indigent defendants, there are a multitude of cases in which judges every day use their discretion to make awards of attorney’s fees.

Here, as the Senator has given a number of examples, if the judge, in rare instances, would find that somebody has been paid too much under the contract, he can take a look at that. Or we have a law in Virginia, that there somehow was a misapprehension or appeal and maybe he would decide that there should be a little more there.

Tobacco has nothing to do with this. Mr. WARNER. I missed the word. What has nothing to do with this?

Mr. WARNER. Tobacco. I say the tobacco litigation. I say that has nothing to do with this matter now before the Senate because these attorney’s fees were very high, of course, and litigation results because these attorneys recovered not hundreds, thousands, millions, but billions of dollars. Tobacco attorneys were hired by State attorneys general. I don’t think there is anything that I can ever contemplate that would be the same in relation to tobacco and these HMO cases. I would say that we have pretty well formulated both of our positions.

I respectfully say that the Senator from Virginia is taking away the discretion the State judges have. It makes it very complicated to determine attorney’s fees. What we have to take into consideration is a process that is very specific, direct, and to the point, and leaves some discretion with State judges.

(Mr. NELSON of Florida assumed the chair.)

Mr. WARNER. I want to make it clear. I think it is clear in the amendment that the expenses are over and above the allocation of fees.

Mr. REID. I took that directly from your original amendment.

Mr. WARNER. I was also quite anxious to ensure that if a State has a framework of law regarding the award of attorney’s fees, this does not apply. I think it is important that we honor those States that have a framework and laws which set attorney’s fees, which is in my amendment. I am just trying to help you improve yours so that you prevail.

Mr. REID. Well, I guess there is some reason that could be done. That is only one of the complicated reasons why we are trying to give as much discretion as possible to State judges. I think they need that. I think one of the problems that I have with the Senator’s
original amendment is it takes away from State law, from what States can do. It seems interesting to me that we are so in tune with States rights around here all the time, unless it comes to something dealing with injured parties—whether it is product liability cases or whatever. We suddenly want to take away what the States have set aside for all these decades. I think my friend's amendment takes away a lot of what we have with our States.

Mr. WARNER. Mr. President, I will read to my friend section (E) of my amendment, page 6:

NO PREEMPTION OF STATE LAW.—Subparagraph (A) shall not apply with respect to a cause of action under paragraph (1) that is brought in a State that has a law or framework of laws with respect to the amount of an attorney’s contingency fee that may be incurred for the representation of a participan attorney's contingency fee that may be incurred for the representation of a participant attorney's contingency fee that may be incurred for the representation of a participant...

And so forth. In other words, if the State has a framework of State laws, we in the Congress should not be trying to amend them, as I fear you are doing through an omission in yours. I have protected it in mine.

Mr. REID. Well, I understand what the Senator’s intent is. When you are looking for intent, you want to be as precise and direct as possible. I respectfully say we should get on with the vote. I think we have said everything, but may not everyone has said it. You and I have.

Mr. WARNER. Let me point out one other thing. Again, there is a difference as to how these things are treated under Federal and State. As I said, ERISA gives certain protections that are involved in the Federal court. There Federal law requires relief grievance under ERISA and that is not found in my friend’s amendment. You say it is implicit in every court in the land; therefore, it is not needed to be expressed. Is that your point?

Mr. REID. The reason we took your basic amendment and made it directly to the point as to the one-third is it becomes too complicated for a court to determine attorney’s fees based on the complicated program you have set up. Ours is simple and direct. In rare instances, a judge can step in and raise a potentially better situation than what we are really dealing with is the

Mr. WARNER. I wanted to make sure those amendments to be laid aside if the Senator would agree to proceed with others.

Mr. REID. We have been laying aside things so long—

Mr. WARNER. If that is of no help, we need not do that.

Mr. REID. I have no problem having a quorum call and we can talk. I really think we have to move on. I am willing to take my chances, whatever they might be. Other people are waiting around to offer amendments. We should move on if we can.

Mr. THOMPSON. Mr. President, I am prepared to move forward with an amendment, if that is desired by my two colleagues, while you have your discussions. If you want to go into a quorum call, we will wait.

Mr. REID. I would be happy to set these two amendments aside and let my friend from Tennessee, who offered probably the best elucidation on attorney’s fees today—No. 1, he was concise and to the point. I think both of these are unconstitutional. I am willing to go forward.

I ask unanimous consent that the two amendments by Senators REID and WARNER be set aside and that the Senator from Tennessee be allowed to call up an amendment. The Senator's amendment is on the improved list, correct?

Mr. THOMPSON. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendments are laid aside.

The Senator from Tennessee is recognized.

AMENDMENT NO. 853

(Purpose: To clarify the law which applies in a State cause of action)

Mr. THOMPSON. I send to the desk an amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Tennessee [Mr. THOMPSON] proposes an amendment numbered 853.

On page 170, between lines 21 and 22, insert the following:

"(9) CHOICE OF LAW.—A cause of action brought under paragraph (1) shall be governed by the choice of law rules of the State in which the plaintiff resides.
"

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. THOMPSON. Mr. President, I let the amendment be read because it is probably the shortest amendment that will be considered tonight. It is very simple and straightforward. Basically, what it says is that in these lawsuits that we are dealing with, we apply the law of the State of residence and citizenship of the plaintiff in this case.

Let’s go back just a bit and understand the lawsuit scheme that we have created by this litigation. We have created a Federal cause of action in Federal court for matters that are essentially contract; and we have created a State cause of action in State court for matters that have to do with medically reviewable situations.

What that has left us with is the ability of a claimant to bring a State court claim in any State where the defendant is doing business. If you have a medical insurer and they are doing business in several States, even though you live in Tennessee, you could bring your lawsuit in any number of States where that insurer is doing business. That is simply known as forum shopping.

The reason people do that is different States have different laws in terms of limitations on recovery. They have different rules of evidence. Some allow punitive damages—most do. Some cap those punitive damages. We don’t allow punitive damages at all. So I don’t believe we want to create a situation where if we are going to have this liberal litigation scheme that we have set up, that we allow it to occur anywhere in the country, which might be the case with regard to some big defendants.

Now, employers in some cases are going to be defendants also, I believe it is quite clear. You not only have the insurance companies, but you also have the employers to look at and to see whether or not they are doing business in these various States and, if they are, then you could bring your lawsuit in according those States in which they are doing business. I don’t think that serves the purposes that we are trying to serve with this legislation.

Therefore, we have the authority, and I think it would be a wise exercise of our authority and discretion, to limit those lawsuits. If you are from the State of Tennessee and you have a legitimate claim and you want to bring a lawsuit, you ought to be bound by the law in the State from which you come. You should not be able to forum shop.

Now, there might be some Federal causes of action that are also of the medically reviewable kind. We have been talking in this debate for several days about State causes of action, but we are really dealing with the laws of those States. They are causes of action based on the laws of individual States. So if a person wants to bring his lawsuit, he can still bring it in Massachusetts if he lives in Tennessee and he is bound by the law of Tennessee.

If there is a diversity situation in Federal court, where the Federal court has jurisdiction and you have a doing-business requirement satisfied as far as the corporate defendant is concerned, for example, you have diversity. You still are bound by the law of your home State. So that would prevent forum jumping.

I believe this is desirable. I heard several expressions of agreement with the proposition we did not want to create a system of forum shopping in this litigation. We are going to have this law apply to all 50 States, there will be lawsuits produced in all 50 States, and all 50 States have laws that will be applicable in the suits wherever they are brought. A citizen ought to be bound by the laws of his or her State and not be able to shop all over the country for a potentially better situation than what they have in their State. It is a State cause of action. They should be bound by the laws of their home State.
That is the amendment. I hope my colleagues will see the wisdom of it and will agree to the amendment on it.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I say to my friend from Tennessee, his argument is persuasive enough that all the managers on our side left the floor, so I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call as the clerk.

Mr. AKAKA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. AKAKA. Mr. President, I ask unanimous consent that I may be permitted to speak as in morning business for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. AKAKA are located in today's RECORD under "Morning Business.")

Mr. KENNEDY. Mr. President, I express great appreciation also for the Senator's strong support for our Patients' Bill of Rights. This has been an issue in which he has taken a great personal interest. He has been one of the strong supporters of this legislation for many, many years. Although he has not been a member of our committee, this is a matter I know he cares deeply about. He has been a strong supporter of all the amendments that have protected patients, and I don't think there has been a member who has been a stronger advocate for the patients and their rights than our good friend, the Senator from Hawaii. I thank him very much for his statement and all the work he has done to help bring the bill to where it is.

Mr. President, I understand the Senator from Nevada will modify his amendment and we will have a voice vote, and the Senator from Tennessee will have an amendment agreed to, also. Hopefully, we can dispose of those two amendments right now.

The PRESIDING OFFICER. The Senator from Nevada.

AMENDMENT NO. 849, AS MODIFIED

Mr. ENSIGN. Mr. President, I call up amendment number 849 and I send a modification to the desk.

The PRESIDING OFFICER. Without objection, the pending amendment is laid aside.

The amendment will be so modified. The modification (No. 849), as modified, is as follows:

Subtitle C of title I is amended by adding at the end the following:

SEC. 122. GENETIC INFORMATION.

(a) Definitions.—In this section:

(1) the spouse of the individual;

(2) a dependent child of the individual, including a child who is born to or placed for adoption with the individual; and

(b) all other individuals related to the individual or child described in subparagraph (A) or (B).

(2) GENETIC INFORMATION.—The term "genetic information'' means information about the presence of genetic tests, as defined in paragraph (4); or

(b) the results of those tests, including the results of genetic tests of a family member of such individual); or

(c) genetic services, including genetic tests, provided to obtain, assess, or interpret genetic information for diagnostic and therapeutic purposes, and for genetic education and counseling.

(3) GENETIC TEST.—The term "genetic test'' means the analysis of human DNA, RNA, chromosomes, proteins, and certain metabolites, including analysis of genotypes, mutations, phenotypes, or karyotypes, for the purpose of predicting risk of disease in asymptomatic or undiagnosed individuals. Such tests include blood tests, physical tests, such as a chemical, blood, or urine analysis of an individual, including a cholesterol test, or a physical exam of the individual, in order to detect symptoms, clinical signs, or a diagnosis of disease.

(4) GROUP HEALTH PLAN, HEALTH INSURANCE INSURER.—Except as provided in paragraph (2), a group health plan, or a health insurance issuer offering health insurance coverage, shall not request or require predictive genetic information concerning an individual or a family member of the individual (including information about a request for or the receipt of genetic services by such individual or a family member of such individual).

(5) INFORMATION NEEDED FOR DIAGNOSIS, TREATMENT, OR PAYMENT.—(A) IN GENERAL.—Except as provided in paragraph (1), a group health plan, or a health insurance issuer offering health insurance coverage, that provides health care items and services to such individual or dependent may request (but may not require) that such individual or dependent disclose, or authorize the collection or disclosure of, predictive genetic information for purposes of diagnosis, treatment, or payment relating to the provision of health care items and services to such individual or dependent.

(b) NOTICE OF CONFIDENTIALITY PRACTICES AND DESCRIPTION OF SAFEGUARDS.—As part of a request under subparagraph (A), the group health plan, or health insurance issuer offering health insurance coverage, shall provide to the individual or dependent a description of the procedures in place to safeguard the confidentiality, as described in subsection (d), of such predictive genetic information.

(d) COMPLIANCE WITH CERTAIN STANDARDS.—

(1) NOTICE OF CONFIDENTIALITY PRACTICES.—A group health plan, or a health insurance issuer offering health insurance coverage, shall post or provide, in writing and in a clear and conspicuous manner, notice of the plan or issuer's confidentiality practices, that shall include—

(A) a description of an individual's rights with respect to predictive genetic information;

(B) the procedures established by the plan or issuer for the exercise of the individual's rights; and

(2) A description of the right to obtain a copy of the notice of confidentiality practices required under this subsection.

(3) ESTABLISHMENT OF SAFEGUARDS.—A group health plan, or a health insurance issuer offering health insurance coverage, shall establish and maintain appropriate administrative, technical, and physical safeguards to protect the confidentiality, security, accuracy, and integrity of predictive genetic information created, received, obtained, maintained, used, transmitted, or disclosed by such plan or issuer.

(4) COMPLIANCE WITH CERTAIN STANDARDS.—With respect to the establishment and maintenance of safeguards under this subsection, subsection (c)(2)(B), a group health plan, or a health insurance issuer offering health insurance coverage, shall be deemed to be in compliance with such subsections if such plan or issuer is in compliance with the standards promulgated by the Secretary of Health and Human Services under—

(A) part C of title XI of the Social Security Act (42 U.S.C. 1320a-6 et seq.); or

(B) section 2304(a) of the Health Insurance Portability and Accountability Act of 1996 (42 U.S.C. 1320d-2 note).
Mr. THOMPSON. I believe I am correct in saying my amendment has been accepted and it is agreeable to have a voice vote.

Mr. KENNEDY. The Senator is correct.

The PRESIDING OFFICER. The question is on agreeing to the Thompson amendment, No. 853.

The amendment (No. 853) was agreed to.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. WARNER. Reserving the right to object, should we lay out a full understanding of our agreement?

Mr. REID. I think we should just vote.

Mr. WARNER. Your amendment is withdrawn?

Mr. REID. Yes.

Mr. WARNER. I send a modification to the desk.

Mr. REID. This is the Warner substitute.

Mr. WARNER. Mr. President, my modification has been sent to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The amendment (No. 833), as further modified, is as follows:

''(A) IN GENERAL.—Notwithstanding any other provision of law, or any arrangement, agreement, or contract regarding an attorney's fee, the amount of an attorney's contingency fee allowable for a cause of action brought pursuant to this subsection shall not exceed 1⁄3 of the total amount of the plaintiff's recovery (not including the reimbursement of actual out-of-pocket expenses of the attorney).''

''(B) DETERMINATION BY COURT.—The last court in which the action was pending upon the disposition of all appeals, of the action may review the attorney's fee to ensure that the fee is a reasonable one.

''(E) NO PREEMPTION OF STATE LAW.—Subparagraph (A) shall not apply with respect to a cause of action under paragraph (1) that is brought in a State that has a law or framework of laws with respect to the amount of an attorney's contingency fee that may be required for the representation of a participant or beneficiary (or the estate of such participant or beneficiary) who brings such a cause of action.

Mr. WARNER. We have worked it out together. I ask that the yeas and nays be withdrawn.

The PRESIDING OFFICER. Without objection, the yeas and nays are vitiated.

Mr. WARNER. I understand we will proceed to a voice vote and the amendment of my distinguished colleague will be withdrawn.

The PRESIDING OFFICER. The question is on agreeing to the amendment (No. 833), as further modified.

The amendment (No. 833), as further modified, was agreed to.

Mr. REID. I ask unanimous consent my amendment be withdrawn.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. GREGG. As I understand it, we are down to two amendments on our side: Senator KYL's and Senator FRIST's, which will be the substitute. I hope we can get a time agreement on Senator KYL. How much time does the Senator need? He does not know. And Senator CARPER, on the other side, is going to make a statement and maybe offer an amendment.

Before they go, since people are a little confused, so they can get ready, we are heading toward the finish line. Before we get to the finish line, I want to mention that a lot of people do a lot of work around here. They are the staff. They are extraordinary. I especially want to thank my staff, Senator KENNEDY's staff, Senator FRIST's staff, who have worked so hard on this. I am sure there are many folks on the other side, but I specifically want to thank Stephanie Monroe of my staff, Colleen Cresanti, Steve Irizarry, Kim Monk, and Jessica Roberts for all they have done to make this process move smoothly for me and allow me to be successful. They really have put in extraordinary hours. I greatly appreciate...
it. They are exceptional people, and we thank them very much.

Now, I suspect the Senator from Arizona is probably ready.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. If I may say to my friend from Arizona, we have not seen his amendment. If we could see it? I wonder if, in the meantime, we could have the Senator from Delaware make a statement.

Mr. KYL. Might the Senator from Nevada yield? I have given a copy both to Senator McCain and also to Senator Gregg to give to you. I am sorry if you do not have it yet. Maybe Senator Kennedy has a copy.

Mr. KENNEDY. I just received this a minute ago. I am just reviewing it. We will be prepared to go ahead in a few moments, I know the Senator from Delaware has waited. I understand it is a short statement. Then I hope we go to the amendment and we will be prepared to enter a short time agreement or whatever limitation to which the Senator from Arizona will be agreeable.

Mr. REID. I ask the Senator from Delaware, through the Chair, how much time he wishes to take.

Mr. CARPER. No more than 15 minutes.

Mr. REID. The Senator from Delaware wishes to speak for up to 15 minutes. I ask unanimous consent he speak at this time.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered. The Senator from Delaware.

AMENDMENT NO. 855

Mr. CARPER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The legislative clerk read as follows: The Senator from Delaware [Mr. CARPER] proposes an amendment numbered 855.

Mr. CARPER. I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

(Purpose: To disallow punitive damages)

On page 153, strike line 9 and all that follows through page 154, line 2, and insert the following:

"(10) STATUTORY DAMAGES.—The remedies set forth in this subsection shall be the exclusive remedies for any cause of action brought under this subsection. Such remedies shall include economic and noneconomic damages, but shall not include any punitive damages.

Mr. CARPER. Mr. President, the amendment before us, which I will ask to be withdrawn in a few moments, is one Senator Landrieu and I offer, and I know has the support of a number of Members of this body from both sides of the aisle.

A great deal of effort has gone into crafting a compromise with respect to the appropriate venue, Federal or State, for bringing litigation in cases where an HMO has acted inappropriately.

As I have studied this issue over the last week or so, the way the underlying bill assigns venue for State action and for action that is more appropriate in the Federal courts, I have come to believe that the sponsors of the legislation figured it out just right. When it comes to determining damages that might be assigned in cases brought in Federal courts, I personally have concluded that there should not be a cap with respect to economic damages.

I further agree with the approach that is taken in the underlying bill, that in cases where noneconomic damages are sought in Federal courts, particularly in cases where children may not be working, who do not have a livelihood, or in cases where a spouse—perhaps a woman, but it could easily be a man—who is not in the workforce and stays at home with a family, we may not, if we cap noneconomic damages, be really fair to that young person or to the spouse who is working from the home.

However, with respect to damages at the Federal level, as they pertain to punitive claims, I am not comfortable with the approach that is embodied in the underlying bill. Senator Breaux and Senator Frist have offered an approach which I think is better in this regard, and I just want to mention it.

It deals with whether or not there should be punitive damages awarded on actions taken in Federal courts. I conclude they have it right and those punitive damages should not be allowed in the Federal courts.

Having said that, for actions that are brought in State courts, the laws and rules of the State shall prevail. If there are caps in the State courts, that is the business of the States, and that is appropriate. If there are no caps on punitive damages in actions brought before the State courts, that is appropriate as well.

As we try to find the compromise here, I believe the underlying bill has it right with the appropriate middle ground on caps and venue. I believe the underlying bill has it right with respect to punitive damages.

No caps on either economic or noneconomic damages. I also believe the underlying bill has it right with respect to the proper venue, State versus Federal.

I believe my friend from Louisiana and my friend from Tennessee have a better idea with respect to punitive damages and they simply should not be allowed in Federal court.

Senator Landrieu is probably on route to a compromise to say a few words with respect to the amendment. I do not see that she has arrived yet. If I may, I would like to just reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EDWARDS. Mr. President, I want to add a word from my colleague from Delaware. He and I have been working together on this legislation since it came to the floor and beforehand. He has a very well thought out position. Some of his positions I do not entirely share, but he has been very careful and very thoughtful about all these issues and has been working very vigorously with us on this legislation. He cares deeply about patient protection. He cares deeply about making sure that people all over this country have real patient’s rights. He cares deeply about the uninsured. This is an issue he and I have talked about many times. He has made enormous contributions to the legislation that is now on the floor.

I thank the Senator from Delaware for all of his work in this regard, and I yield the floor.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. CARPER. Let me say, too, to my friend from North Carolina, I thank him very much for his overstatement of my contribution. He is very generous.

I say back to you, you have been just a terrific manager and cosponsor of this legislation, and thank you for giving us the opportunity to work closely with you and your staff.

That having been said, I still do not see Senator Landrieu joining us on the floor. Were she here, she would speak in support of this amendment, but would go on to say some concerns she has with respect to capping noneconomic damages, particularly as they pertain, as I referred to earlier, to young people and spouses who may be staying at home and are not in the workforce.

Mr. EDWARDS. I thank my colleague.

AMENDMENT NO. 855 WITHDRAWN

Mr. CARPER. That having been said, Mr. President, I ask unanimous consent that the amendment be withdrawn, and I yield the remainder of my time.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

The Senator from New Hampshire.

Mr. GREGG. I rise to say I wish we were voting on the amendment of the Senator from Delaware. I believe the punitive damages issue in this bill is a major issue.

I understand the decision not to go forward. We know the probable outcome of the vote. But there is no question in my mind that his amendment would cause a movement in the right direction on the issue of punitive damages. This bill, as all of us have pointed out who have concerns about it, is going to be candy land for lawyers. One of the reasons it is going to be is because of the punitive damage language

CONGRESSIONAL RECORD—SENATE}
which allows forum shopping for the best punitive damage opportunities; whereas, under today's law, punitive damages are radially distributed, and should be because the purpose is to create quality health care, and punitive damage awards would drive up insurance costs. That is passed on to the consumer, which means fewer people can afford health care.

As a practical matter, I want to say that I think the Senator from Delaware is on the right track, and I hope the conference will listen to his comments.

Mr. CARPER. Mr. President, will the Senator yield? I say to my friend from New Hampshire that my fervent hope is that when the bill passes the Senate and later the House, and the conference committee is established, the conferees will see that we put this issue to rest. Our hope is that the final compromise will reflect this amendment.

I also want to express to the Senator from New Hampshire my heartfelt thanks that he leadership he has provided to the Republican side of the aisle on this issue, and my appreciation for a chance to work with him, as well as the Senator from Massachusetts.

Thank you.

Mr. GREGG. I thank the Senator from Delaware.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

AMENDMENT NO. 854

Mr. KYL. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The senior assistant bill clerk read as follows:

The Senator from Arizona [Mr. KYL] proposes an amendment numbered 854.

Mr. KYL. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To permit choices in costs and damages)

On page 156, between lines 15 and 16, insert the following:

“(17) DAMAGES options.—

(A) IN GENERAL.—In addition to plans or coverage that are subject to this Act, a plan or issuer may offer, and a participant or beneficiary may accept, a plan or coverage that provides for one or more of the following remedies, in which case the damages authorized by this section shall not apply:

(i) Equitable relief as provided for in subparagraph (A) of section 502(a)(1)(B).

(ii) Unlimited economic damages, including reasonable attorneys fees.

(B) PROTECTION OF THE REGULATION OF QUALITY OF MEDICAL CARE UNDER STATE LAW.—Nothing in this paragraph shall be construed to preclude any action under State law against a person or entity for liability or vicarious liability with respect to the delivery of medical care under any State law for purposes of this section. Any such claim shall be maintained exclusively under this section.

On page 170, between lines 21 and 22, insert the following:

“(9) DAMAGES options.—

(A) IN GENERAL.—In addition to plans or coverage that are subject to this Act, a plan or issuer may offer, and a participant or beneficiary may accept, a plan or coverage that provides for one or more of the following remedies, in which case the damages authorized by this section shall not apply:

(i) Equitable relief as provided for in section 502(a)(1)(B).

(ii) Unlimited economic damages, including reasonable attorneys fees.

(B) PROTECTION OF THE REGULATION OF QUALITY OF MEDICAL CARE UNDER STATE LAW.—Nothing in this paragraph shall be construed to preclude any action under State law against a person or entity for liability or vicarious liability with respect to the delivery of medical care under any State law for purposes of this section. Any such claim shall be maintained exclusively under section 502.”

Mr. KYL. Mr. President, it has been requested that the time agreement on this amendment be 30 minutes on my side and 10 minutes in opposition, with an up-or-down vote at the conclusion of the debate. I propound that unanimous consent request.

The PRESIDING OFFICER. Is there objection?

Mr. REID. Reserving the right to object, Mr. President, that is fine with no second degrees in order. Is that right?

Mr. KYL. That would be my understanding. I thank the Senator from Nevada.

The PRESIDING OFFICER. Does the Senator so modify his request?

Mr. KYL. I do indeed modify my unanimous consent request.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. KYL. Mr. President, I rise to introduce the consumer health care choice amendment. This amendment would amend section 302 of the underlying legislation to provide that employers and health plan issuers would not be free to offer, and participants and beneficiaries free to choose, health plans with two remedy options, in addition to the underlying plan: equitable relief—the benefit or value of the benefit; and unlimited economic damages.

The bill provides damages as provided under S. 1052 unlimited economic and non-economic, and up to $5 million in punitive damages.

This amendment applies only to the new remedies established by S. 1052 for Federal contract actions and state “medically reviewable” claims. It explicitly protects the regulation of medical care delivery under state law.

The problem: Increased premium costs lead to greater numbers of uninsured. The Congressional Budget Office predicts that S. 1052 could result in a 4.2 percent increase in premiums costs. This predicted increase is in addition to the 10–12 percent increase employers are already facing this year.

The CBO report illustrates the cold truth about a critical, but often overlooked, public policy issue: The irrefutable link between health-care premium increases and the number of Americans without insurance. As the Congress debates the various health-care proposals, we must keep this link in mind.

Supporters of S. 1052 are quick to claim that their bill will improve health care, but not so quick to admit that it will also raise costs and cause the number of uninsured to go up. We know this will happen, because cost increases will cause some employers to stop offering health-care coverage, making insurance unaffordable for more Americans. This fact is politically inconvenient. We should keep an important statistic in mind. According to the Lewin Group consulting firm, for each one percent premium increase, an additional 300,000 citizens lose their insurance.

As I mentioned, the Congressional Budget Office predicts that S. 1058 will increase premiums by 4.2 percent. A premium increase of this amount would cause about 1.3 million Americans to become uninsured as a result of S. 1052. The Office of Management and Budget recently predicted that between 4–6 million more Americans would become uninsured as a result of S. 1052.

How can we call this a Patients Bill of Rights when it will result in fewer patients?

I believe our first goal should be “do no harm”; or, at a minimum, to reduce the harm, as my amendment will do.

My amendment would allow employers or plans to offer two options for employees to voluntarily choose, in addition to the general plan covered by this bill, Option No. 1: A low premium policy with a remedy limited to the benefit, or the value of the benefit. Option No. 2: A mid level premium policy that would allow for full economic damages only.

There are in addition to the higher premium policy that would allow for the full range of damages provided under S. 1052.

This amendment should be appealing to employers and plans as a way to control their costs and appealing to employees as a way to hold down their premiums by voluntarily limiting their right to sue.

Data from the CBO and the Kaiser Family Foundation estimate that S. 1052 would cost a typical family with health coverage roughly $300 per year.
Certainly, we should promise not to pass legislation that would reduce or completely consume the $300 or $600 rebate that Americans will be receiving sometime this summer as a result of the tax-relief bill just signed into law by President Bush.

If adopted, this amendment would afford Americans a chance to recoup some of the loss imposed by S. 1052. Some have argued that so-called patients’ rights legislation that includes an unlimited right to sue is overwhelmingly popular with Americans. It is worth noting that a Kaiser Family Foundation/Harvard School of Public Health Survey from January 2001 asked the following question to voters: “Would you favor a law that would raise the cost of health plans and lead some companies to stop offering health care? If you favor such a law, then do you believe that the people who profit from the health care industry should have the right to choose that policy.”

We all know that policy is going to cost more money. The reason it is going to cost more money is because lawsuits drive up the cost of insurance, which drives up premiums, which means that fewer employers can pay for insurance, which means that fewer employees are insured. And that is what is concerning all of us.

This amendment makes it possible to offer, in addition to the higher-cost policy, a lower-cost policy that would say you can forego your rights to litigation. You can just receive the benefits that ERISA provides for today. Those benefits are health care that you contracted for—or the dollar value of that health care.

There is a second option in here. That is a limited one, which is you could also go to court and get unlimited economic damages, but no pain and suffering damages or punitive damages. Maybe some companies would write that kind of a policy, too. But either of those policies would have a lesser premium than the policy that would be offered as the underlying plan under this legislation.

To some who say there might be a case where there is a quality of care decision which just needs to go to court, and damages need to be collected, my amendment specifically protects all of the State court litigation that is currently developing about quality of care.

Even if an employee exercised an option to buy this lower-cost policy, that employee would still have all of the rights of litigation for damages in State court.

Some have said: Isn’t this a little bit similar to the Enzi amendment? The answer is no. The Enzi amendment said if a particular group of employees were merely offered a specific kind of policy, they wouldn’t be covered by the act. That is not my amendment. All employers are covered by the act under my amendment. It is just if they offer a plan to their employees, they may in addition to that plan offer this lower cost alternative.

Why do I offer this?

As we know, the Congressional Budget Office predicts that the underlying bill would result in a 4.2-percent increase in premium costs. This is in addition to the 10- or 12-percent increase that employers are already facing this year.

The Congressional Budget Office report illustrates the cold truth that has been overlooked in this debate; that is, the irrefutable link between health care premium increases and the number of Americans without insurance.

There is a study by the Lewin Group, a consulting firm, which says that for each 1 percent of premium increase, an additional 300,000 citizens lose their insurance. We have CBO’s estimate that the cost of premiums is going to increase 4.2 percent. We have a study that says every 1 percent, an additional 300,000 people lose their insurance.

I think this bill, more than a million Americans are going to lose their insurance if something isn’t done to keep the cost of those premiums down.

The Office of Management and Budget recently predicted that between 4 million and 6 million more Americans would become uninsured as a result of S. 1052.

That is where this amendment comes in. It is probably the best way to ensure that we can get premiums down over an alternative that doesn’t have as much risk for the insurer, and, therefore, won’t have to have as high a premium.

But I reiterate, it is not in lieu of the bills that we are proposing under this bill but, rather, in addition to. It is an option.

For this to occur, three voluntary decisions would have to be made.

First of all, some insurance companies would have to develop a product that they might offer employers or plans to sell for their lower cost option.

Second, employers would have to decide that in addition to the plan offered under the bill, they would offer one of these lower cost alternatives that is on the market.

Third, employees would have to decide to take advantage of that lower cost option.

It is all a matter of choice. Nobody is making anybody do anything. None of the benefits under the legislation go away at all, nor is the State court remedy.

It seems to me, since it is all voluntary, that there is nothing mandatory but it gives us one opportunity to reduce premium costs. We all ought to be supportive of this proposal.

I ask that the remaining time that I have not be yielded but, rather, see if there are any others who might wish to speak.

The PRESIDING OFFICER. The Republican leader.

Mr. LOTT. Mr. President, if Senator KENNEDY will allow me to speak at this point, let me say, first of all, that I think progress is being made. Senator REID has been working. Everybody has been trying to cooperate. I believe, after this very important amendment, we will have the substitute, and hopefully we will be ready to go to final passage.

I don’t want to usurp the majority’s role here, but I want people to realize that we are to the point where perhaps we can begin to wrap this up.

I thank Senator Kyl for agreeing to not have the lengthy debate. He feels very strongly about it, and this is certainly a very good and valuable alternative.

I heard Senator Bond of Missouri say repeatedly that when it comes to
health care, we should make it available, affordable, and safe. One of our greatest concerns about this bill in its present form is health insurance for patients, and what they have available through managed care is not going to be affordable. Rates are going to go up. They are going to lose coverage for a variety of reasons. So it is a question of availability and affordability.

This is a good, viable alternative. This provides a low-cost option that will, hopefully, result in more people keeping their coverage. But it is an option. It is not in place of; it is in addition to what will be available otherwise. It just gives plans the option of offering a low-cost alternative that forgoes lawsuit damages under the law. The State court would still have the "quality of care" damage available. Those limitations would still be there. You don't replace that.

I want to emphasize, it is not in lieu of but it is in addition to the plans offered under the bill. This really is about patients, and it really is about the freedom to have a choice, to have an option to choose to have this coverage but not going to lawsuits later on. By paying less, they will be able to afford it. That will give them an option. I think this would be a very attractive way to make sure it is available and affordable.

I would like to speak at greater length on this myself, but in the interest of time I yield the floor.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. MCCONNELL. Mr. President, I commend the Senator from Arizona, Mr. Ky., for his amendment, which is strikingly similar in concept—as he and I discussed off the floor earlier—to the Auto Choice proposal I have introduced that last two Congresses, cosponsored by Senator Moynihan and Senator Lieberman.

Essentially what is envisioned in these kinds of choice proposals is giving the consumer the option of opting out of the litigation lottery in return for a lower premium and lower cost.

I want to ask the Senator from Arizona if it is his view that this is similar in concept to the Auto Choice measure that I just described that we have discussed.

Mr. KYL. Mr. President, if I may answer the question of the Senator from Kentucky, I am remiss for not acknowledging that my idea for this amendment came exactly from the proposal the Senator has just discussed. It seemed to me that if it worked well in that context, it would also work well in this context. I should have mentioned that earlier. I know the Senator did not ask the question to get credit, but credit certainly is due him for this idea.

Mr. MCCONNELL. I cannot announce the support of others, but I wanted to mention that on the Auto Choice bill there was also the support of Michael Dukakis, Joe Lieberman, Pat Moynihan, the Democratic Leadership Council, the New York Times, and the Washington Post.

I cannot say for sure that they would support the amendment offered by the Senator from Arizona, but the concept he describes of giving the consumer the option—the consumer gets the option of leaving aside the litigation lottery in return for a lower premium and defined benefits provided for that lower premium. It does not really deny anybody. It does not deny them the right to sue. It does not put a cap on damages. It does not tell the lawyers what to charge. It simply says to the consumer: You have a choice.

What the Senator from Arizona is suggesting is to take what is a sound idea for the personal health insurance market, Auto Choice, and apply it to the health insurance market.

Under his amendment, employers would have the option of offering their employees up to two additional insurance options. I mean I have the additional cause of action permitted under this bill, I believe giving consumers the option not to participate in the personal injury litigation lottery is only appropriate.

It is important to note, just like my Auto Choice option, choosing Senator KYL's "Health Choice" option would be completely voluntary to both the employer and the employees. An employer who offers his employees health insurance would not be allowed to offer only the limited-litigation health policies. Nothing in the Kyl amendment would require the employer to offer the plans as envisioned in the Kennedy-McCain bill.

In Arizona the employer does not have to say anything, not that the employee would have to participate in the cost of their insurance plan. An employer would have to say anything, not that the employee would have to participate in the cost of their insurance plan. A lower cost health insurance option.

While we have made significant progress at improving this legislation, many of us on this side of the aisle have lingering concerns that this bill will dramatically increase the number of uninsured Americans. We ought do everything possible to minimize this impact and that is why I wholeheartedly endorse the proposal of the Senator from Arizona. Patients need more choices and should not be forced into a system of jackpot justice without their consent.

As the Senator from Arizona has pointed out, we hope not to have a greater number of uninsured when this is all over. One of the great fears many of us have who are going to be voting against this bill is that is that exactly what the result of it will be. But the Senator from Arizona has astutely offered an amendment that will certainly provide an opportunity for a number of people to receive lower premiums and thereby, hopefully, reducing the increase in the number of uninsureds which so many of us fear.

So I express my strong support for the Senator's Amendment. I tell him, I think it is a very good idea. I hope the Senate will support it. It seems to me it is entirely consistent with the theme of the underlying bill. I commend the Senator from Arizona for his fine amendment.

Mr. KYL. I thank the Senator.

Mr. MCCONNELL. Mr. President, as I listened to the proposal by the Senator from Arizona, the thought came to my mind about the right of an individual to waive rights. That is deeply ingrained as part of the law of the United States, so much so that when you talk about constitutional rights in a criminal case—where the rights are much more deep-seated, much more profound, based on the Constitution—that right to waive does exist.

In a sense, what the Senator from Arizona is proposing is that an individual who chooses health insurance would have the right to waive certain rights, which is recognized in law.

The keyword which I found persuasive in what the Senator from Arizona had to say as the word "voluntary." I would add to that—I think this is part of his concept—that it be a knowing waiver—a voluntary, knowing waiver. And I would expect that, as part of that, the individual would have counsel to understand his rights, because you cannot understand your rights for damages—the complexities—unless you know what they are, and whatever may be said about lawyers on this floor, you need a lawyer to tell you what your rights are. Then the individual would be in a position to evaluate the reduction in premiums, and thereby which savings would be passed on to him for what he was giving up.

In that context, I think the proposal passes muster.

Mr. KYL. I thank the Senator.

Mr. SPECTER. I yield the floor.

Mr. ENZI. Mr. President, I, too, thank the Senator from Arizona, Mr. KYL, for bringing this amendment to us.

This debate has been framed as though everybody had all of their insurance paid for by the company for which they work. I know that is not the case. Throughout America, most people participate in the cost of their insurance. So it is going to be very important for every individual who has to participate in the cost of their insurance to be searching, with their employer, for a lower cost way of doing it. This is one of those solutions. This is very innovative. It will fill a void we have left by doing the bill, particularly if the estimates are true on how much insurance is going to go up based on
Mr. KYL. I understand that Senator Frist would like to quickly proceed. There are several people who would like to speak in favor of my amendment. Therefore, what I would like to propose is that we lay my amendment aside, go to Senator Frist, and I take up the remainder of my time prior to the vote.

Mr. REID. I have no objection. The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The amendment is laid aside.

Mr. FRIST. Mr. President, I call up amendment No. 856 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The senior assistant bill clerk read as follows:

The amendment numbered 856.

This amendment is a comprehensive approach to the Patients' Bill of Rights. Essentially this bill is the Frist-Breaux-Jeffords bill which was introduced on May 15 of this year, modified with several of the amendments which we will speak to shortly in the introduction either now or, if we have an interruption, we will speak to them in the 15 minutes on this side.

What I wish to stress is that this amendment is a comprehensive replacement for the bill. It involves strong patient protections, access to specialists, access to emergency rooms, elimination of gag clauses, continuity of care.

It has a strong appeals process, internal and external appeals. It requires full exhaustion of the internal and external appeals process. If the external decision—again, that is an independent physician, unbiased, independent of the plan—overrides the plan, then only then does one go to court for the extraordinary damages. At any time during the appeals process you can go for what is called injunctive relief. Once you go for these damages, what are the economic damages? Noneconomic damages are $750,000 or three times economic damages. And that is a change from the underlying Frist-Breaux-Jeffords bill.

There are no punitive damages. In other words, if I mention that we require full exhaustion of the internal and external appeals process. We go to Federal court. We have not had much debate over the last week on the Federal
Mr. President, I rise to comment on the amendment of Senator BOND, with the 1 million uninsured, then the liability would be repealed, which passed on the floor, is also a part of our bill.

Secondly, we did raise the non-economic caps from $500,000 to $750,000 or three times economic damages. As a physician, as someone who has taken care of patients, as someone who recognizes that the purpose of a Patients' Bill of Rights is for patients to get the care they need, not extraordinary lawsuits, not frivolous lawsuits, and skyrocketing costs, all of which will be absorbed by the 170 million people, we believe this bill is the balanced, responsible way of delivering a strong enforceable Patients' Bill of Rights.

I yield to Senator BREAUX.

Mr. BREAUX. Mr. President, do we have a time agreement on this amendment?

The PRESIDING OFFICER. There is no time established on this amendment.

Mr. BREAUX. Let's try it without an agreement. We will see how it goes without any kind of agreement.

Mr. President, I rise to comment on the bill that is now before the Senate. It is the Frist-Breaux-Jeffords substitute bill.

Before doing so, while the Senator from Tennessee is still on the floor, I want to say something about how enjoyable it has been to work with him. While most of us are going to be leaving this Chamber tonight or tomorrow sometime to spend time with our family on vacation or have an enjoyable period of time that we can rest and relax, the Senator from Tennessee, because of what he does professionally and what he believes in, is going to be leaving on a flight tonight to go to Africa. He is going to Africa to do surgery on women and children and family who cannot afford health care on the continent of Africa.

I want to say how proud all of us can be of one of our colleagues who has that type of attitude. He not only serves his constituents in Tennessee in this body but also serves so much of humanity in various places in the world by volunteering at his own cost, on his time, with his medical expertise, serving people who have no health care. We are talking about a Patients' Bill of Rights on the floor of the Senate. He really, truly is practicing that by providing care to people who can't afford it in various parts of the world.

For those who are interested in getting a Patients' Bill of Rights enacted into law, let me make this clear: the amendment that we have offered, the bill will not become law because the President has clearly indicated he will veto a bill that does not contain some of the main principles that you can find in the Frist-Breaux-Jeffords substitute.

What I am talking about is not that complicated. The White House has said we are creating new Federal rights, and with the amendment of Senator BOND, with the 1 million uninsured, then the liability will be repealed, which passed on the floor, is also a part of our bill.

Secondly, we did raise the non-economic caps from $500,000 to $750,000 or three times economic damages. As a physician, as someone who has taken care of patients, as someone who recognizes that the purpose of a Patients' Bill of Rights is for patients to get the care they need, not extraordinary lawsuits, not frivolous lawsuits, and skyrocketing costs, all of which will be absorbed by the 170 million people, we believe this bill is the balanced, responsible way of delivering a strong enforceable Patients' Bill of Rights.

I yield, if I might, to the cosponsor, coauthor of the bill, Senator BREAUX.

Senator JEFFORDS will be speaking a little bit later. The three of us, as part of the Frist-Breaux-Jeffords amendment, have worked very hard over the last 2 years to put together this balanced bill, the only tripartisan bill in the history of the Senate, we could not figure out where we were, we were creating something that is as complex as the Egyptian hieroglyphics. If you had a flowchart on what we are suggesting in the bill now before the Senate, we could not figure out where you go and when you go to the different courts and for what rights. That is unacceptable. This thing needs a lot of work before it can become law because I am afraid that what we have created tonight in this bill is unmanageable and this recommendation makes it a great deal better.

I am under no illusions about what is going to happen, but I know I am also not under any illusions about what can
be signed into law and what cannot. I fear that what we have tonight cannot be signed into law without the recommendations we have made.

I yield the floor. I see my colleague from Vermont is also with us.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. President, for nearly 5 years, Congress has debated how best to enhance protections for patients enrolled in managed care plans without unduly increasing health care costs, imposing significant burdens on America’s employers, and adding to the ranks of the uninsured. Our debate over the last two weeks has given us ample opportunity to thoroughly discuss these critical issues.

Through the amendment process the McCain-Edward-Kennedy bill has been significantly improved. I particularly commend Senator SNowe for her amendment on employer liability and Senator Thompson for his amendment on exhausting the appeals process.

However, I believe the McCain-Edward-Kennedy bill is still fundamentally flawed in two critical areas. First, the bill would subject plans to excessive damages in the new federal cause of action. And second, by subjecting plans and employers to a new State cause of action, the bill destroys the current national uniformity for employers. The bill would subject employers or their designated agents to lawsuits in 50 different States.

The better alternative to the McCain-Edward-Kennedy bill is our amendment. It is based on the legislation that I introduced with Senator Frist and Senator Breaux. It has much in common with the McCain-Edward-Kennedy bill. They share 11 provisions that create new patient protections. Each provides for information to assist consumers in navigating the health care system. Most importantly, the bills provide for an internal and external independent review process with strong new remedies when the external review panel fails. Our primary area of disagreement lies in the degree that employers are protected from multiple causes of action in multiple venues and the provision of a reasonable cap on damages.

President Bush has made clear that our amendment meets the principles he has outlined for patient protection legislation that he would sign into law. This balanced legislation also is supported by a wide range of groups representing nearly 400,000 of America’s physicians and health professionals.

Our amendment protects all Americans in private health plans and at the same time, it gives deference to the states to allow them to continue enacting innovative care laws consistent with the new federal rules.

Under our amendment health plans that fail to comply with independent review decisions or that harm patients by delaying coverage will be held accountable through expanded federal court remedies, including unlimited economic damages. In addition, patients can go to court at any time to get the health benefits they need through injunctive relief if going through the internal or external review processes would cause them irreparable harm.

We hope that everyone who is committed to passing legislation that can become law this year will join us in supporting this amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. Edwards. Mr. President, over the course of the last 2 weeks, during the course of this debate, we have made great progress and consensus has been reached on many issues, beginning with the issue of scope, how many Americans would be covered by this patient protection legislation.

We have worked with Senators across the aisle and have been able to resolve that issue and resolve it in a way that all Americans are covered and there is a floor of protection for all Americans.

Second, we were able to resolve the issue of access to clinical trials, an issue on which there has been some disagreement in this body.

Third, we have been able to resolve the issue of employer liability in a way that protects employers from liability without completely eliminating the rights of patients. We have done it in a balanced way so that 94 percent—every small employer in America—100 percent protected.

We have also resolved the issue of exhaustive appeals so patients will go through the appeals process to get the care they need before they go to court.

Medical necessity is another issue resolved during this debate.

All of these issues are the issues of great work many days, many hours of compromise, negotiation, and consensus reached in the Chamber of the Senate. This substitute abandons a number of those consensus agreements, starting with the issue of scope.

On the issue of scope, the Senator from Louisiana and I were able to fashion a provision that provides a floor and protects all Americans. That provision was voted on and consensus was reached. That consensus provision is not in this substitute.

Second, on the issue of exhaustion, the Senator from Tennessee and I worked to fashion a provision that provides the patient the right to exhaust the appeals before they go to court in a way that does not prevent patients who have an extended appeal from being harmed by that extended appeal. In other words, if it goes on 31 days or 60 days, they can use court simultaneously with the appeal. That exhaustion provision on which there was a huge vote in favor of it in the Senate is not in this substitute.

Third, the independence of the review panels: I concede I have not seen the language, but assuming it is the same language that was originally in the Frist-Breaux bill, it has no provision specifically requiring the so-called independent review panel be, in fact, independent; nothing requiring that the panel be independent, not dictating who, in fact, is on the appeals panel. It is like the HMO being able to pick the judge and the jury. So there is not established to anyone’s satisfaction that, in fact, that appeals panel will be independent.

Finally, on the issue of going to Federal court versus State court, the American Bar Association, the Federal judiciary, the U.S. Supreme Court, the State attorneys general, all the objective, large legal bodies in this country have said that these cases should go to State court.

That is what our legislation provides. Unfortunately, under this substitute, the vast majority of cases would, indeed, go to Federal court.

Many Americans live hundreds of miles from the closest Federal courthouse. It would be much more difficult for these injured patients to get a lawyer to represent them in a Federal action, particularly one that might take place hundreds of miles away, and most important, and the reason so many of these objective bodies said these cases belong in State court, is that it will take so long to get the case heard.

There is such a backlog already, it makes no sense to send these cases to Federal court.

What we have done instead is say: You, HMO, if you are going to overrule doctors, if you are going to make health care decisions, we are going to treat you exactly as we treat the other health care providers. We treat them exactly the same. It is the reason this is a critical provision, the American Medical Association, to all the doctors groups across this country and to the consumer groups across America.

There are fundamental differences in our underlying legislation, as amended, and in the substitute, starting with the issue of scope, about which we have reached consensus, going to the issue of exhaustion of administrative remedies, which is not in this substitute; the required independence of the review panel is not in the substitute; the requirement that the cases that every objective body says should go to State court, including the U.S. Supreme Court, those cases go to Federal court instead under this provision.

We have made tremendous progress. I am very pleased with the work of all of our colleagues—Republicans, Democrats, and Independent—in this process. The work has been productive. We have done important work in the Senate, but it is not important to us. It is important for the people of this country, the families of this country who
deserve more control over their health care decisions, who deserve real rights, enforceable rights.

That is what we have been able to accomplish over the last 2 weeks. Unfortunately, in every respect in which this substitute is different from the underlying legislation, as amended, it favors the HMO versus the patient. In every respect, we favor the patient; they favor the HMO.

I say to my colleagues who sponsored this amendment, I know they are well-intentioned. I know they worked very hard on it. I respect every one of them, and I respect the work they have done, but I believe the work we have, in fact, done in this Chamber over the last 2 weeks is a much better product and, most importantly, will provide meaningful protections for the patients and families of this country who deserve finally to have the law on their side instead of having the law on the side of the big HMOs.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. There is no time limit.

Mr. KENNEDY. Mr. President, I thank my good friend, Dr. Frist. Senator Frist has been the chairman of our Public Health Subcommittee and he and I have worked on a lot of different health care issues together.

I thank Senator Jeffords who has been a strong ally on many health care issues over a long period of time.

I have also worked extensively with the Senator from Louisiana, Mr. Breaux, on many health care issues.

The fact is, when you have this combination of recognizing a strong recommendation, it is worthy for the Senate to give a true examination of their product and their recommendation this evening.

Having said all of that, it is worthwhile in the final minutes of this debate and before action that we give special consideration to the viewpoints of the doctors, the nurses, and the patients who have followed this issue and have really breathed life into this issue over a long time.

Tonight, at this time, there is only one matter that is before us that has the complete support of the medical profession, the nurses, the doctors, all of the groups that represent the children in this country, all the groups that represent the disability community, all of the groups that represent the Cancer Society, all the groups that represent the aged, all the groups that represent the special needs of people who have special medical challenges. They have had a chance to review each and every provision. They know every aspect of every page of the legislation and the amendments, and they come down virtually unanimously in support of the McCain-Edwards legislation.

Senator Edwards has already outlined and Senator McConnell will further outline the various concerns.

Let me mention matters we have focused on during this debate.

The clinical trials: We are in the century of life sciences, and we are putting resources into and investing in the NIH. We are never going to get the benefits of the research in the laboratory to the bedside unless we have effective clinical trials.

We have strong commitments on clinical trials; Breaux-Frist is short on that, and it will take up to 5 years to begin the clinical trials.

Specialty care: We guarantee specialty care. Any mother who brings in a child who has cancer will be able to get the specialty care. Breaux-Frist does not provide it. If it is not within that particular HMO, then it is not a medically reviewable decision. There are restrictions in the bill.

We have debated the issues of the appeals. Breaux-Frist still has provisions where the HMO will be selecting the appeal organization, which is effectively selecting the judge and jury in these appeals.

Liability: As has been pointed out, Breaux-Frist brings all the liability into the Federal system. Every patients group and every group that concerned itself about getting true accountability for patients understands the importance of keeping liability in the State court.

Even though the words are similar, although we have the issues of medical necessity, although we use the words of specialty care, although the words of appeals are used in both bills, there is a dramatic and significant difference. Those are the two choices before the Senate.

I thank our colleagues and friends on the other side. There really is only one true Patients’ Bill of Rights that is going to protect the patients in this country, the families, the children, the women, the workers in this Nation, and that is the McCain-Edwards bill. I hope we support that shortly.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. I ask unanimous consent action with respect to Ensign amendment #84, which vitiated and the Senate vote in relation to the amendment following the disposition of the Kyl amendment, with up to 10 minutes equally divided for debate prior to that vote.

Mr. LOTT. Reserving the right to object, I hope the Senator will withhold. I think a continued effort is underway, and if he will withhold at this point—I prefer not to object—let’s see if we can’t work it out.

Mr. ENSIGN. I withdraw my unanimous consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arizona.

Mr. MCCAIN. Mr. President, I thank Senators BREAUX and KENNEDY, point out some of the important changes in our legislation, and their recommendation this evening. I remind Members that the amendment does provide very limited relief in Federal court and would only allow a handful of cases to be addressed: only those patients who receive approval from the external medical review can go to court.

Numerous States, including my home State of Arizona, have enacted laws that permit injured patients to hold health plans legally responsible for their negligent medical decisions. I believe this substitute nullifies these laws. My colleagues may assert they do not preempt State law, but I respectfully disagree. Delaying and denying care by an HMO is not a contract issue for Federal court. Delaying and denying care is a medical malpractice and should be determined in State court.

As we know, this is a substitute. Over the last 2 weeks we have made some very important changes to this legislation, which is the appropriate way to legislate. We have made important changes on employer liability thanks to Senator SNOE and Senator DeWINE and others; exhausting administrative procedures thanks to Senator Thompson and Senator Edwards; limits on legal fees, an effort undertaken by Senator Warner; reasonable scope, protecting all Americans, limitations on class action, and prevention of forum shopping, in which Senator Thompson and others were involved.

Some of these have been included in the substitute, and some have not. I believe all of these changes that have been made through open and honest debate on this legislation should be included.

Again, we still have avoided the fundamental issue of State and Federal court. I believe that issue is not resolved to the satisfaction of the patient as opposed to the HMO.

I take an additional minute to thank a number of people including the White House staff, Josh Bolton and Anne Phelps; Senator Gregg’s stewardship on this side has been exemplary; Senators Frist and Breaux have obviously been very helpful; Senators SNOE, Lincoln, DeWINE, Nelson, and Thompson. I thank both leaders, Senator Daschle and Senator Lott, as well as Senator Reid and Senator Nickles, who have been involved in this issue for a long time, as well as Senator Edwards and Senator Kennedy.
Soon we will vote on this legislation. I believe we will prevail. I think this, like the campaign finance reform bill, has some honest, fair debate on which all sides have been heard, and I think, again, the Senate can be proud, no matter what the outcome, of the way we proceeded to address this issue which is important to so many millions of Americans.

This is an important issue to American citizens. This is an important issue to the person who cannot contribute a lot of money to American political campaigns. This is an important issue to average citizens whose voices are oftentimes drowned out in Washington, in my view, by the voices of the special interests, whether they be trial lawyers, insurance companies, HMOs, or others.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. I will make two or three comments. First, I compliment and congratulate Senator KENNEDY and Senator GAZZOO for their patience and leadership in managing this bill and also managing the education bill. Also, I congratulate Senator MCCAIN and Senator EDWARDS for their contribution because they are going to pass a bill, and Senator DASCHELLE, as well.

This has been a battle that some have been wrestling with for a long time. As a matter of fact, a year ago we passed legislation that was called Patients’ Bill of Rights Plus. In my opinion, the logic of the legislation we are getting ready to pass tonight. It was legislation that allowed every plan to have an appeal, internal and external, and it was binding—not binding by lawsuits, but if you did not comply with external appeal, you could be fined $10,000 a day—a different approach. I think it is far superior.

In looking at the language we have today and in the underlying bill, the so-called McCain-Edwards-Kennedy bill, maybe some modest improvements have been made. It is the bill that will finally pass, but it is a bill that the President will not sign and the President shouldn’t sign.

I hope we will pass good legislation but not pass legislation that will dramatically increase health care costs, as I am afraid it will. There has to be some reason that employers that voluntarily supply health care, purchase health care for their employees, that employers of all sizes are almost unanimously in their opposition. They are not compelled to buy health care for employees, but they want to. Now we are getting ready to threaten them with unlimited liability. We keep hearing about suing the HMOs, but suing the HMOs and/or employers and threatening them with unlimited liability. I am afraid of the non-economic damages, pain and suffering—there are costs included.

Somebody said we solve that because we have a designated decisionmaker. If there is a designated decisionmaker, the net result is, well, if you are going to hand off your liability to me, what am I protecting? What am I insuring? With contracts that can be abrogated or breached, an independent reviewer can say, you have to cover other things, and you have a lot of liability if things do not work out. The net result will be the independent reviewer will say, defensive medicine, we will pay for anything because they don’t want to be sued. They don’t want to be liable. Then the result is, because whatever the liability is, they don’t know how much it is or how expensive it is, and they will increase their rates. They don’t plan on losing money and they don’t want to go out of business, so there will be a lot of defensive medicine and they will charge extra premiums to the employer to make sure they don’t go out of business.

So the cost estimates, some people have said, are 4- or 5-percent per year increases on top of the already 19- or 20-percent increases built in, in increased costs for health care. They are probably much more. The costs of the bill could increase the cost of health care by 8 to 10 percent. We should know that.

Again, we should do no harm. We should not pass legislation that will not work, that will do harm. It will do harm if you increase the number of uninsured. It will do harm if you price insurance out of the realm of affordability for millions of Americans. I am afraid that is what we are doing.

There is one other issue that has not received maybe enough attention. Senator COLLINS and Senator NELSON raised that. That is the issue of scope: Should the Federal Government be taking over regulating that the States do? I am concerned about the language. It was modified modestly. It said the States have to be substantially compliant with these new Federal regulations. The language goes so far that really the States are going to have to adopt almost identical language to what we have put in this bill. The net result? If they don’t, HCFA takes over—the Health Care Financing Administration.

A couple of points: HCFA can’t do it. HHS can’t do it, the Department of Labor cannot do it. I want to make that point one final time.

We are ready to pass this mandate and send to the States: If you don’t do it, Federal Government, you do it. If the States don’t, you do it.

The Federal Government does not have the wherewithal to do it. Every State has hundreds of personnel involved in enforcing insurance regulation, and we are saying, you do it or we do it. This is one of the largest unfunded mandates ever proposed by Congress.

I am a little mad at myself for not being able to offer a point of order that this is an unfunded mandate. One of the reasons I cannot is that it was not reported out of committee.

The unfunded mandate bill, the Congressional Accountability Act, says we have a report that comes out with the committee report and we can raise a point of order if you have an unfunded mandate on cities, counties, States, and the private sector. We cannot do that because we don’t have a committee report because the bill was not reported out of committee. It was a year ago, but it is not now.

My point is this is an enormous unfunded mandate on counties and cities and States. We are mandating this on average employees. I know best, the Federal Government knows best. States, we know you have an emergency room procedure, but we are going to dictate a more expensive one.

I could go all the way down the list. My point is, even though we have done it, we cannot enforce it. You have non-enforceable provisions. There is no protection there. It may make us feel better, we may tell the American people we have provided the protections, but we cannot enforce it because the Federal Government cannot and should not take over State regulation of insurance. That is a mistake.

I am afraid the combination of the two, the expanded liability—you can sue employers and the providers for unlimited damages in State and/or Federal court for economic and non-economic, unlimited in both cases. You can jury shop. You can find a place that would work. You can scare employers. Employers beware, the bill we are passing tonight makes you liable. You are going to have to pay a lot more in health care costs as a result of the bill we are passing tonight.

Again, my compliments to the sponsors. They worked hard. The opponents worked hard. We will pass a bill tonight. But I hope it will be improved dramatically in conference so we will have a bill that is affordable, will not scare people away from insurance, will not increase the number of uninsured by millions. My prediction is this bill would increase the number of uninsured by millions and cost billions and billions of dollars. I hope that is not the case. I hope this is fixed and improved in conference and we will have a bill that President Bush can sign and become law and of which we will all be proud. Unfortunately, I think the underlying bill does not meet that test.

We great reluctance, I am going to be voting no on the underlying McCain-Kennedy-Edwards bill. I urge my colleagues to do likewise.
The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I regret deeply I will not be able to vote for this bill. My State does not have a problem with the HMOs that other people have expressed. Our State would be mandated by this bill to change its laws. The sensible amendment offered by Senator COLLINS was defeated. The Allard amendments that dealt with small business were defeated. The mandates in this bill will hamper our development of a sound health care delivery system for Alaska.

It is a vast area with a few people. We do not need the interference of the Federal Government. We need help. I think this bill will interfere with what we are doing. I hope by the time it comes out of conference I will be able to support the judgment rule. The Senate has tried, but this, the underlying bill, will not help our people; it will hurt them; and I cannot support it.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. GREGG. For the record, Mr. President, I think this bill is a lot better than when we started. There remains one area, of course, where we have substantial disagreement, and that has to do with the lawsuits going to be brought. The underlying bill still has a bifurcated system where some suits can be brought to State court and some in Federal court. I think that is the main thing the Frist-Breaux-Jeffords amendment tries to address.

We all can read the handwriting on the wall. I think we know how this is going to go. But it is very important our colleagues understand what we are doing. With regard to the underlying bill, there is a presupposition, apparently, that there will walk the lawyer's office with a tag around his neck saying, I'm a State suit, or, I'm a Federal suit. That will not be the case.

There will be many cases that are mixed. Some will have to do with coverage denial, some will have to do with medically reviewable claims, some will be more of a contract case, some will be more of a tort case. Arguably, it could go in either court. Some will go to Federal court and the defendant will object and say, no, you belong in State court, until the claim is over. Then there will be an appeal in that venue. Then that will be determined, and then it will go possibly to the opposite court. In other words, there will be litigation at one or more levels in order to determine where you are going to litigate.

Some, on the other hand, will go to State court, and there will be a fight there as to whether or not that belongs in State court. It may be remanded over to Federal court.

Some will come in with cases, parts of which will arguably be in Federal court and parts of the same case could arguably be in State court.

All I am suggesting is there is no easy solution to this. It has been point out that there are some down sides to bringing them in Federal court, too. They are overcrowded. We have heard examples of federally related lawyers and judges saying it ought to be in State court. If you took a poll among the State-related lawyers and judges, they would say just the opposite. But at least you avoid the problems I am talking about.

We are going into a system now where we are creating new law; we are creating new defendants. But wait, it is not just HMOs and employers. The independent decisionmakers are subject to liability, too. The independent medical reviewer is subject to liability, too. They have a higher standard. I believe it is an "gross or willful misconduct" standard. It is a higher standard, but they can be sued for settlement value or whatever.

We have a complicated liability framework, so you have different people, different law, different lawsuits. It is going to be extremely confusing for a long time, and it is going to result in much higher costs.

The tradeoffs may be there. The decisions were made that we adopted this in view of all of that. But I think it is very important that at a time when health care costs are already going up in double digits, we are doing something that quite clearly is going to result in much more litigation, much more confusion about that litigation.

Somebody ultimately has to pay for all that. It is going to ultimately result in higher costs to our citizens. I think it is important we understand that before we cast these votes. I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. DASCHLE. We are just about at the point now where I think we can begin voting on amendments. I ask unanimous consent that following the amendment—and then I believe we will start voting. This is the Presiding Officer. The Senator from Arizona.

AMENDMENT NO. 854

Mr. KYL. Mr. President, I ask unanimous consent Senate Nickles be shown as a cosponsor of amendment No. 854.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KYL. There are two people I know of who would like to speak briefly on my amendment. I would like to respond briefly to what Senator KENNEDY said and then summarize.

May I begin by congratulating the authors of the underlying legislation and expressing appreciation for all those who have worked with me. Especially I want to thank my colleague, JOHN MCCAIN, and congratulate him for his successful efforts in moving this legislation forward. It is not always easy when colleagues from the same State are not in total agreement on everything, but he let me know early on when I first came to the Senate he didn't expect to agree with me on every issue. He said he might even be in disagreement on some matters with me from time to time.

I appreciate his efforts and the efforts of all of those who have worked with me.

Just to summarize for those who were not here earlier, my amendment is very simple. It merely provides an option for employers that offer plans that are covered by this bill to also provide an alternative for their employees. That would allow the employees to have as their remedy the receipt of the health care or for the cost of that health care rather than going to court and getting damages as they are permitted to do under the bill. This should provide a lower cost alternative that could be made available to them. That, in turn, should provide a way for employers that might otherwise have to reduce the number of employees covered, or not have insurance for their employees at all, to continue to provide health care.

As I pointed out before, according to the Congressional Budget Office information, and the Lewin Group, probably over a million American citizens will lose their health care as a result of the increased expenses that could result from this legislation.

The effort that we have all tried to engage is to find ways to reduce those costs so premiums won't go up as much and so employers can continue to provide the care. The best way to do that is to allow them to provide a purely voluntary option for their employees to accept, which would not have the same lawsuit damage option but would
Mr. KENNEDY. Mr. President, I ask for 1 minute.

Mr. President, the option provided by Senator Kyl is not a loophole. It is an option. Under his plan, all policies that an employer would offer would provide the external and internal reviews that we have in all of the plans. The option to go to specialists, the gag rule protection that we have made a part of this bill—all of that would be in the plan.

It would simply give the employee an option, if he thought it would save him money and he or she didn’t intend to sue for malpractice, a policy that could be cheaper and simply not have certain lawsuit rights but, in fact, that offer for liability purposes under current law. It is no worse than current law. It is no better than current law.

That is an option that could save a working family money that they need for their budget.

For those who want all matters to be exactly the same, I don’t see why they would resist such an option. I think it is good for the employees.

I salute Senator Kyl. I also note that Senator Jeffords had a hearing recently on the uninsured in America. We know there are over 40 million uninsured and that every 1 percent increase in insurance costs causes 300,000 people to drop off the insurance rolls. I think it is a good move. I support it.

Mr. LOTT. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays are ordered.

Mr. KYL. Mr. President, there is nothing mandatory in this legislation. It is all voluntary. It is a simple choice for the employees. I hope my colleagues will support the amendment.

The PRESIDING OFFICER. Is all time yielded?

Mr. KYL. Mr. President, I yield all time on this subject, which is to say.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from New Mexico (Mr. Domenici), the Senator from Alaska (Mr. Murkowski), the Senator from Colorado (Mr. Campbell), and the Senator from Texas (Mr. Gramm) are necessarily absent.

The PRESIDING OFFICER (Mr. Akaka). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 42, nays 54, as follows:

[Rollcall Vote No. 218 Leg.]

YEAS—42

Allard  Allen  Bennett  Bond  Brownback  Burns  Collins  Craig  Craig  DeWine  Ensign  Enzi  Frist  Grassley  Gregg  Hagel  Hatch  Helms  Hutchinson  Inhofe  Kyl  Lott  Lugar  McConnell  Niki

NAYS—54

VOTE ON AMENDMENT NO. 856

The PRESIDING OFFICER. The question is on agreeing to the Frist-Breaux substitute amendment No. 856. Mr. EDWARDS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The Yeas and nays were ordered.

The motion to lay on the table was agreed to.
Title I of the Patients Bill of Rights would apply to individual and group health insurance other than “expected benefits” coverage. Mr. KENNEDY. The Senator is correct. It is the intent of the managers of the bill that the requirements of title I do not apply to insurance coverage consisting of “excepted benefits.”

Mr. CANTWELL. Mr. President, I rise today to speak in support of the bipartisan McCain-Edwards-Kennedy Bi- partisan Patient Protection Act. Managed care reform, particularly the enactment of a comprehensive Patients’ Bill of Rights, is one of the most important issues currently before either body of the U.S. Congress. After all the debate we have had on the floor in the last two weeks, I believe we are at the cusp of providing, true, meaningful protections for every American in every health care plan.

Unfortunately, while over 160 million Americans rely on managed care plans for their health insurance, HMOs can still restrict a doctor’s best advice based purely on financial costs. The fact is, we know that the great promise of managed care—lower costs and increased quality—has in all too many cases turned into an acute case of less freedom and greater bureaucracy.

I want to tell my colleagues about the Malone family from Everett, Washington. Their son, Ian, was born with brain damage that makes it very difficult for him to swallow. He’s fed through a tube in his stomach since he can’t swallow.

The doctors at Children’s Hospital in Seattle—one of the best pediatric care facilities in the world—said that Ian couldn’t leave the Intensive Care Unit but the Malone’s health insurance company told us to give Ian 16 hours of home nursing care a day for Ian. And while initially the company paid for this care, it decided to cut it off. Ian’s father says that “The company paid for this care, it decided to cut it off.”

The doctors at Children’s Hospital in Seattle—one of the best pediatric care institutions in the world—said that Ian couldn’t leave the Intensive Care Unit but the Malone’s health insurance company told us to give Ian 16 hours of home nursing care a day for Ian. And while initially the Malone’s health insurance company paid for this care, it decided to cut it off. Ian’s father says that “The company paid for this care, it decided to cut it off.”

The amendment (No. 856) was rejected. Mr. STEVENS. Mr. President, I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to. The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mrs. LINCOLN. Mr. President, I wish to enter into a colloquy with the distinguished manager of the bill to clarify the intent of the sponsors.

Section 202 of the bill amends the Public Health Service Act with a new section 2763 that applies all of the requirements of title I of the Patients Bill of Rights to each health insurance issuer in the individual market.

Current law, at section 2763 provides that none of the preceding requirements of the “individual market rules” apply to health insurance coverage consisting of “excepted benefits”.

Similar provisions exist in current law at section 2721 of the Public Health Service Act for the group insurance market. A parallel provision exists in ERISA at section 732 for “excepted benefits”.

Is it the intent of the managers of the bill that current law section 2763 and the parallel provisions for the group market in the Public Health Service Act and ERISA remain in full force notwithstanding the language of new section 2753?

In other words the requirements of title I of the Patients Bill of Rights to appeal decisions to an independent review board; and the ability to sue providers for damages if they are substantially harmed by a provider’s decisions.

I believe that States are the laboratories of democracy and I do not take lightly the possibility that any federal legislation would unduly preempt state law. I spent six years on the Health Care Committee in the State House of Representatives and just this last year Washington passed a comprehensive Patient’s Bill of Rights. In issues such as the one before us this week, it is paramount that federal legislation enhance state protections, not undermine them.

And that is what this bill does. The McCain-Edwards-Kennedy compromise explicitly preserves strong state patient protection laws that substantially comply with the protections in the Federal bill. This is an extremely important point. The standards for certifying state laws that meet or exceed the Federal minimalist standard ensure that only more protective State laws replace the Federal standards.

But I find it ironic that opponents of a strong, enforceable, Patients’ Bill of Rights have traditionally limited the scope of the patient protections in their managed care reform legislation to those individuals in self-insured plans, which are not regulated by the States, and assert that the States are responsible for the rest.

This approach denies Federal protections to millions of Americans—teachers, police officers, firefighters and nurses who work for State and local governments; most farmers and independent business owners who purchase their own coverage; most workers in small businesses who are covered by small group insurance policies, and millions more who are covered by a health maintenance organization. We need federal protections that all Americans are guaranteed basic rights.

In fact, no state has passed all the protections in the bipartisan McCain-Edwards-Kennedy Patients’ Bill of Rights. To fail to enact this bill would mean that neighbors, and sometimes workers in the same company, will have different protections under the law. The scope of this legislation simply ensures that all Americans in all health plans have the same basic level of patient protections.

Let me focus for a few minutes on what this bill does. This bill protects a patient’s right to hear the full range of treatment options from their doctors, and it prohibits financial incentives to limiting medical care.

This bill allows patients to go to the first available emergency room when they are facing an emergency—regardless of the Federal minimum standard. It is in their managed care network.

This bill allows women to go directly to the obstetrician or gynecologist...
June 29, 2001

CONGRESSIONAL RECORD—SENATE 12473

without going through a “gatekeeper,” and it allows parents to bring their children directly to pediatricians instead of having to go through primary care physicians.

This bill allows patients with life-threatening or serious illnesses, for whom standard treatments are ineffective, to participate in approved clinical trials.

This bill has laid out stringent, tough, enforceable internal and external review standards, and we have ensured that a truly independent body has the capability and authority to resolve disputes for cases denying access to medical care.

This bill promotes informed decision-making by patients, by requiring health plans and insurance companies to provide details about plan benefits, restrictions and exclusions, and other important information about coverage and rights under the legislation.

Finally, the Bipartisan Patient Protection Act holds insurers and HMOs accountable for their acts.

Two decades ago, very few Americans were in managed care plans. Since the early 1990s, however, insured workers’ enrollment in traditional fee-for-service plans has dropped from about 50 percent to under 25 percent. The broad shift to managed care has been driven, largely, by cost concerns. But in our need to control health care costs, it is imperative that we do not forget what we are supposed to be doing—providing health care.

There will be few issues more important in the 107th Congress than the one we are voting on today. Health care affects people personally, every day of their lives, and we have a real responsibility to ensure that any changes we make serve the patient’s interests first. That is what this bill does, and I proudly support the Bipartisan Patient Protection Act.

Mr. FEINGOLD. Mr. President, I was prepared to offer an amendment to S. 1062 concerning mandatory arbitration to ensure that HMOs are held accountable for their actions, which after all is one of the primary purposes of this bill. I have been asked not to offer that amendment, so I wanted to discuss it with the lead sponsors of the bill and ask them to clarify their intentions.

Some managed care organizations currently require patients to sign mandatory binding arbitration contracts before any dispute arises. These provisions effectively deny injured patients the right to take their HMO to court. Instead, they are forced to go into binding arbitration, which can be a stacked deck against patients. We have spent much of the past 10 days debating whether injured patients should be able to go to court to vindicate their rights. It is clear that a majority of the Senate supports such rights, otherwise we would not be about to pass this legislation. So I am asking my colleagues to clarify that it is the intent of the sponsors that injured patients are granted legal rights under this legislation that patients, state or federal court to pursue compensation and redress, notwithstanding a mandatory arbitration provision in an HMO contract. Can they further clarify that it is not the intent of the sponsors of this legislation that patients can lose the legal rights we are providing in this bill by being forced into mandatory binding arbitration? In these arbitrations, the HMO chooses the arbitrator, there are substantial up-front costs that the patient has to bear, there is limited discovery, no right to appeal, and no public record or pre-decisional value of the decision.

Mr. Mccain. I thank my friend from Wisconsin for raising this very important issue. I would also like to get on record the toll this is taking on patients, the despair that they are experiencing.

Mr. Kennedy. If the Senator would yield, I agree that our bill would be severely undermined if health insurers could avoid the protections we have tried to guarantee in this bill by inserting a clause in the fine print of the contract to require binding arbitration of disputes that might arise later.

Mr. Edwards. I agree with my distinguished colleagues that HMOs should not be permitted to revoke the protections we have worked so hard to provide in this bill through the use of mandatory binding arbitration provisions in their contracts. Patients have no ability to bargain over the fine print of the health insurance contracts. That is why we have had to provide federal standards in this bill, and it is to clarify the approach of this bill to allow a backdoor route for these standards and protections to be avoided.

Mr. Feingold. I thank my colleagues, the prime sponsors of this legislation for these clarifications. Based on these assurances, I will not offer my amendment. I yield the floor.

Mr. Rockefeller. Mr. President, during the past five years, we have debated the merits and faults of assorted patient rights legislation. We have offered statistics, we have shared stories, and we have reduced strong legislation—legislation that held the real possibility of protecting all Americans—to weaker law that protects a minority of the population. Our work at times spoke of this issue in the abstract, yet other times nothing about it. The 180 million Americans enrolled in health care plans have always understood exactly what it means to have insufficient coverage. However, they are not sitting on the edges of their seats, watching our heated arguments and waiting breathless for an outcome. Instead, they are engaged in the battles they have fought for far too long, and their disputes have far higher stakes. They are, quite literally, fighting with managed care organizations for their lives. The American people are tired, Mr. President, and deserve relief from these battles. They deserve good health and the peace of mind that comes with quality care. It is time we cast aside our partisan bickering and get Americans the right to health care, as well as the right to seek redress if denied quality health care. It is time to pass the Patients’ Bill of Rights.

Recognizing that 43 million Americans go without health insurance each day, and millions more partial to inadequate health coverage, I have worked with my colleagues both in committee and on the floor to deliver quality care that truly benefits patients. I am convinced that such health care coverage must include the right when needed care is denied, resulting in injury or death. Quality care must also include patients’ access to medical specialists, and an appeals and review process when such access is denied. The McCain-Edwards-Kennedy bill includes these stipulations and goes one step further. It ensures that, for the first time, all Americans enrolled in health plans will be given access to the care they need.

With this in mind, I would like to enthusiastically endorse the McCain-Edwards-Kennedy Patients’ Bill of Rights. A bipartisan effort in all regards, the legislation before us will ensure access to the quality of care that all Americans need—access which they deserve. First and foremost, it grants every individual with health coverage the same quality care. Under this McCain-Edwards-Kennedy legislation, for example, women, children, and the critically ill—often, the groups that are denied the care they need—will be given access to doctors who will determine their best medical interests.

If denied such care, patients will also be given the opportunity to immediately appeal decisions. By employing independent review boards, victims will be able to seek second opinions prior to the denial of care. The McCain-Edwards-Kennedy bill also ensures that patients have access to medical treatments, before it is too late. To date, thousands of patients have died as a result of decisions made by non-medical HMO personnel who
merely sought to reduce cost and increase profits. With this legislation, that need not happen ever again.

We have made agreements so that the pending legislation will allow employees to seek punitive damages only if their employers willfully and negligently deny medical care that results in injury or death. Though some might argue that this will increase the cost of health care and, by extension, increase the number of uninsured in America, studies in states that have implemented similar protections have shown that this just is not the case. This right serves as a check against irresponsible decision-making and is critical to the legislation before us.

Finally, the McCain-Edwards-Kennedy Patients' Bill of Rights provides hope for those suffering from chronic illness, who long and have endured too much. They deserve quality care— they deserve the Patients' Bill of Rights, and we must give it to them. I urge my colleagues to vote for the McCain-Edwards-Kennedy Patients' Bill of Rights.

Mr. KOHL. Mr. President, I rise today in support of S. 1052, the Bipartisan Patients Protection Act. After nearly 5 years of debate and partisan fighting, I am pleased that the Senate has stood up to a real, meaningful bipartisan Patients Bill of Rights. It is a step that is long overdue.

For many years, the growth of managed care arrangements helped to rein in the rapidly growing costs of health care. That benefits all patients across the Nation and helps to keep health care costs to the lowest possible levels. However, there is a real difference between making quality health care affordable and cutting corners on patient care. In Wisconsin, we are lucky that our health plans do a good job in keeping costs low and providing quality care. But too often across this nation, HMOs put too many obstacles between doctors and patients. In the name of saving a few bucks, too many patients must hurdle bureaucratic obstacles to get basic care. Even worse, too many patients are being denied essential treatment based on the bottom line rather than on what is best for them.

The Patients Bill of Rights will ensure that patients come first—not HMO profits or health plan bureaucrats. It makes sure that doctors, in consultation with patients, can decide what treatments are medically necessary. It gives patients access to information about all available treatments and not just the cheapest. Whether it's emergency care, pursuing treatment by an appropriate specialist, providing women with direct access to an OB-GYN, or giving a patient a chance to try an innovative new treatment that could save their life—these are rights that all Americans in health plans should have. And questions concerning these rights should be answered by caring physicians and concerned families—not by a calculator. This bill puts these decisions back in human hands where they belong.

This legislation will also make sure these rights are enforceable by allowing patients to hold health plans accountable for the decisions they make. First, all health plans must have an external appeals process in place, so that patients who challenge HMO decisions may take their case to an independent panel of medical experts. The External Reviewer must be independent from the plan, and they must be able to take valid medical evidence into account when deciding whether a treatment was inappropriately denied. The vast majority of disputes can and will be resolved using this external review process.

I was pleased that during the course of this debate, the Senate adopted an amendment that further clarified the rules of the external review process. I shared the concerns of Wisconsin employers and insurers that the original version could have potentially allowed an external reviewer to order coverage of a medical service that the health plan specifically disallowed in its plan. I strongly support the creation of a strong, independent, external review process to address disputes between a patient and their insurer over whether a service is medically necessary. At the same time, I believe employers who offer their employees health care coverage and enter into a contract with a health plan should have a level of certainty to their obligations that are not covered under the plan.

That is why I voted for the McCain-Bayh-Carper amendment, which preserves the sanctity of the contract and makes it crystal clear that a reviewer may not order coverage of any treatment that is specifically excluded or limited under the plan. At the same time, it still allows reviewers to order coverage of medically necessary services that are in dispute. In addition, if a health plan felt that a reviewer had a pattern of ordering care of questionable medical benefit, the plan could appeal to the secretary to have that reviewer decertified.

I recognize that some preferred the accountable—offered by Senators NELSON and KYL in addressing this issue. However, I opposed the Nelson-Kyl amendment because it went a step too far. By attempting to have the Federal Government create a national definition of "medical necessity," it would create a regulatory nightmare for patients and providers, and could potentially result in a definition that nobody supports and is too rigid to move with the advances in medical technology and treatment. The compromise amendment offered by Senator MCCAIN struck a more appropriate balance by protecting the sanctity of health plan contracts while allowing patients real recourse through an external appeal for medical necessity disputes.

Beyond the external review process, if a health plan's decision to deny or delay care results in death or injury to the patient, this bill ensures that the health plan can be held accountable for its actions. And this bill, as amended, includes clear protections for employers. I was pleased to support the amendment offered by Senators SNOWE and NELSON which further clarified the difficult issue of employer liability.

Let me make it clear that our main objective is to make sure that patients have access to the treatments they need and deserve, and that if a health plan wrongly delays or denies treatment that causes injury or death, that patients can hold their health plans accountable—just like they would hold their doctor accountable if their doctor's action caused injury or death. In other words, the patient should be able to hold accountable that entity who directly made the decision to deny care, and I think it's critical that we shield from liability all employers who had no hand in making that decision.

That is why I supported the amendment by Senators SNOWE and NELSON, which provides strong protections for employers from being sued by allowing them to choose a "designated decision-maker" to be in charge of making medical decisions and to take on all liability risk. In the case of an employer
who offers a fully insured health plan, the health insurance company which the employer contracts with is deemed to be the designated decisionmaker, and the employer is therefore protected from lawsuits. In the case of an employer that offers a self-insured health plan, that employer may contract with a third-party administrator to administer the benefits of the plan. That third-party administrator would agree to be the designated decisionmaker and the employer is shielded from lawsuits. Only those employers that act as insurers and directly make medical decisions for their employees can be held accountable. This group accounts for only approximately 5 percent of all employers in the country.

This bill now makes it clear that employers—who voluntarily provide health coverage to their employees—and the vast majority of which do not act as insurers by making medical decisions—are shielded from lawsuits. This is in total agreement with President Bush’s stated principles of a Patients Bill of Rights. I must point out, where he said, and I quote: “Only employers who retain responsibility for and make final medical decisions should be subject to suit.” That is exactly what this bill does. It is one of the main keys to making the rights in this bill enforceable, and I strongly urge that this right be retained in any bill that is sent to the President.

Most importantly, this bill gives all of these protections to ALL Americans in managed health care plans, not just a few. All 170 million Americans in managed health plans deserve the same protections—no matter what State they live in.

As someone who comes from a business background and understand the concerns of employers. Some of my colleagues on the other side have claimed that our bill will increase health care costs so much that it will make it impossible for employers and families to afford coverage. But the Congressional Budget Office reported that the patient protections in our bill will only increase premiums by 4.2 percent over 5 years. This translates into only $1.19 per month for the average employee. CBO also found that the provision to hold third-party administrators accountable—the provision the other side opposes the most and claim would cause health care costs to skyrocket—would only account for 40 cents of that amount. An independent study by Coopers and Lybrand indicates that the cost of the liability provisions is potentially less than that, estimating that premiums would increase between three and 13 cents a month per enrollee, or 0.03 percent.

This is a small price to pay to make sure that health plans and the health care services we all deserve.

I believe this bill meets the President’s principles for a real Patients Bill of Rights, and I hope that when the House passes its bill, we can come together and send a bill to the President he will sign. The time has come to end this gridlock and to protect patients. There is no reason whatsoever to continue to allow health plans to skim on quality in the name of saving profits. Patients have been in the waiting room long enough. It is time for the Senate to act and make sure they receive the health care they need, deserve, and pay for.

Mr. FEINGOLD. Mr. President, the lobbying on this bill has been intense. There’s been a great deal of coverage in recent weeks about the wealthy interests that have colluded over whether the nation should have a Patients’ Bill of Rights, and what that bill should look like.

I think even the media has had a tough time separating the two sides of this debate. No one side of this debate has the power of the “special interests” on their side. Some have said the money is on the side of the McCarran-Kenyedy-Edwards bill, since interests supporting the bill include the American Association of Health Plans, the Health Insurance Association of America, the National Retail Federation, and the National Restaurant Association, and the Food Marketing Institute, to name just a few. And of course whenever organizations like these join in legislative fights, they do so because they carry with them the collective clout of all the major political donors they represent.

The Health Insurance Association of America is an enormous coalition of the insurance industry. The insurance industry itself gave nearly $40.7 million in PAC, soft, and individual donations in the 2000 election cycle.

The American Association of Health Plans, the trade association for HMOs and PPOs, spent a total of nearly $2.5 million on lobbying in 1999 alone. According to a recent New York Times article, AAHP has budgeted $3 to $5 million to make their case against the Patients’ Bill of Rights, and they are weighing in against the Patients’ Bill of Rights, and whatever it takes,” unquote, to get the job done.

The Business Roundtable also has spent money on an ad campaign against the bill, and so has the Health Benefits Coalition itself.

Out of these expenditures, lobbying expenditures, soft money, PAC money and ad campaigns, from some of the biggest and most powerful organizations in Washington, hasn’t gone unnoticed. This is an all-out blitz.

And this bankroll wouldn’t be complete without a description of some of the interests giving their support to provisions in this bill: The American Medical Association, the Association of Trial Lawyers of America, and labor unions like AFSCME.

Others say that the special interests are weighing in against the Patients Bill of Rights, because of the powerful business and insurance coalitions fighting to defeat this legislation.

Who is right? Where is the money in this debate? The answer is simple, there are donors on both sides. Wealthy interests aren’t aligned exclusively on one side or the other. So for the information of my colleagues and the public, I thought I would take a moment to call the bankroll by examining the donations the interests on both sides have given in the last election cycle. I will start an effort to defeat this legislation, brought to us by a coalition of insurance and business interests that represent some of the most powerful donors in the campaign finance system today.

Opposition to McCarran-Kennedy is being spearheaded by the Health Benefits Coalition. An analysis by the Center for Responsive Politics puts the cumulative donations of the members of the Health Benefits Coalition at $12.3 million in the last election cycle. That figure includes soft money, PAC money and individual contributions made by the members of the Coalition.

The Coalition includes corporate members such as Blue Cross/Blue Shield, Aetna Inc., and Humana Inc. But perhaps more importantly, the Coalition also includes major business and insurance associations. These organizations include the Chamber of Commerce, the Business Roundtable, the American Association of Health Plans, the Health Insurance Association of America, the National Retail Federation, the National Restaurant Association, and the Food Marketing Institute, to name just a few. And of course whenever organizations like these join in legislative fights, they do so because they carry with them the collective clout of all the major political donors they represent.

The Health Insurance Association of America is an enormous coalition of the insurance industry. The insurance industry itself gave nearly $40.7 million in PAC, soft, and individual donations in the 2000 election cycle.

The American Association of Health Plans, the trade association for HMOs and PPOs, spent a total of nearly $2.5 million on lobbying in 1999 alone. And this bankroll wouldn’t be complete without a description of some of the interests giving their support to provisions in this bill: The American Medical Association, the Association of Trial Lawyers of America, and labor unions, including the American Federation of State, County and Municipal Employees.

According to the Center for Responsive Politics, AFSCME gave more than $3.1 million in PAC, soft and individual contributions in the last election cycle. The Association of Trial Lawyers of America gave more than $3.6 million in PAC, soft and individual contributions during that same period, and the AMA gave more than $2 million.

We don’t know yet whether the will of the people will be heard above the din of lobbying calls, TV ad blitzes and the cutting of soft money checks to the political parties. I hope we pass a strong Patients’ Bill of Rights. But whatever the outcome of this bill, we have to ask ourselves if this is the way we want to legislate, and the way we want our democracy to function. I think when the public hears that this debate pits wealthy interests against each other—in some kind of showdown at Gucci Gulch—they tune us out, because suddenly it’s no longer about them, it’s just another story about how big money rules American politics. And when that’s the case, all of us lose, no matter which side of this debate we’re on, because our legislative process is diminished, and the American people’s faith in us is diminished along with it. I thank the chair and I yield the floor.
Mr. LEAHY. Mr. President, today's passage of the Bipartisan Patient Protection Act marks a major—upward in the struggle for a meaningful Patients' Bill of Rights. I am hopeful that with the adoption of this landmark legislation, patients throughout the country can feel a sense of relief knowing their rights will now be protected.

Over the past two decades, our Nation's healthcare delivery system has seen a seismic transformation. Rapidly rising healthcare costs have encouraged the development and expansion of managed care organizations, specifically health maintenance organizations. Unfortunately, the zealous efforts of HMOs to contain these costs have ended up compromising patient care and stripping away much of the authority of doctors to make decisions about the best care for their patients.

During the past several years, many Vermonters have let me know about the problems they face when seeking proper healthcare for themselves and their families. Like most Americans, they want: greater access to specialists; the freedom to continue to be treated by their own doctors, even if they switch health plans; health care providers, not accounting clerks at HMOs, to make decisions about their care and treatment; HMOs to be held accountable for their negligence.

The Bipartisan Patient Protection Act is the solution that Americans have called for—patient protections that cover all Americans in all health plans by ensuring the medical needs of patients are not secondary to the bottom line of their HMO.

Too many times, I have heard from Vermonters who have faced difficulty in accessing the most appropriate healthcare professional to meet their needs. This legislation will solve that problem by giving Vermonters—and all Americans who suffer from life-threatening, degenerative and disabling conditions—the right to access standing referrals to specialists, so they do not have to make unnecessary visits to their primary care physician for repeated referrals. These patients will also be able to designate a specialist as their primary care physician, if that person is best able to coordinate their care.

This legislation makes important strides in allowing patients access to a health care provider outside of their plan when their own plan's network of physicians does not include a specialist that can provide them the care they need. This is especially important for rural areas, like many parts of Vermont, which tend to not have an excess of health care providers. Women will now be able to have direct access to their OB/GYN and pediatricians designated as primary care providers for children.

If an individual gets hurt and needs unexpected emergency medical care, the Bipartisan Patient Protection Act takes important steps to ensure access to emergency room care without a referral. If a woman suffering from breast cancer, this bill will protect her right to have the routine costs of participation in a potentially life-saving clinical trial covered by her plan. This bill puts into place a wide range of additional protections that are essential to allowing doctors to provide the best care they can and to allow patients to receive the services they deserve.

Many of our States have already adopted patient protection laws. My home State of Vermont is one state that currently has a comprehensive framework of protections in place. This Federal legislation will not prohibit Vermont or any other state from maintaining or further developing their own patient protections as the laws are comparable to the Federal standard. I am pleased that this bill will allow states like Vermont to maintain many of their innovative efforts, while also ensuring that patients in states that currently have no laws in place will receive the basic protections they deserve.

Each of the important protections I have highlighted will only be meaningful if HMOs are held accountable for their decisions. The key to enforcing these patient protections rests in strong liability provisions that complement an effective and responsive appeals process. The Bipartisan Patient Protection Act provides patients with the right to hold their HMO liable for decisions that result in irreparable harm or death. Managed care organizations are one of the very few parties in this country that are shielded from being held accountable for their bad decisions. The time has come for that to change. Opponents of patients' rights legislation have been vocal in suggesting that by allowing patients to hold HMOs liable in court, there will be an explosion of lawsuits, causing the costs of healthcare insurance to skyrocket. This has not been the case in states like Texas, that have already enacted strong patient protections. Rather, it has been shown that most cases are resolved through the external appeals process and that only a very small fraction reach the court room. Under this legislation, a patient must exhaust all internal and external appeals before going to court.

I have heard from many Vermonters concerned about the potential impact of new HMO liability provisions on employers. I am disappointed that the opponents of this legislation have exploited and misrepresented this part of the bill. Rather than attempting to alleviate concerns by explaining the liability provisions, they have instead resorted to a scare tactic strategy. If you listen to some opponents of this bill, you would think that any employer who offers health coverage will be sued. I would like to take this opportunity to clarify some of the facts.

The Bipartisan Patient Protection Act protects employers with a strong shield that only makes the employer accountable when he or she directly participates in health treatment decisions. The bill also clearly states that employers cannot be held responsible for the actions of managed care companies unless they actively make the decision to deny a health care service to a patient. This only occurs in about five percent of businesses—generally those employers large enough to run their own health plan. Those few companies that directly participate in the decision to deny a health care benefit to a patient, should accept legal responsibility for those decisions.

After nearly 5 years of debate in Congress, the closest emergency room—a Jupiter finally closing in on the patients' rights and protections they deserve. But there is still more work to be done. The House of Representatives must consider this important issue in a timely manner and, I hope, their bill will include provisions similar to the bipartisan patient protection legislation passed in the Senate. Most importantly, I am hopeful that President Bush will hear the voices of Americans and not those of the special interests and their well-financed lobbyists, and sign this important legislation into law. The American people have spoken; the time for enacting strong patient protections is long overdue.

Mr. KERRY. Mr. President, I am proud to support the bipartisan McCain-Kennedy Patients Bill of Rights. It is legislation that is long overdue. Time and again, we have heard the 180 million Americans enrolled in managed care demand patient rights. Time and again, Members of this Senate have promised to provide them those rights. Finally, with the Patients Bill of Rights legislation before us, we stand ready to deliver.

The McCain-Kennedy Patients Bill of Rights ensures Americans that they can receive the very health care they pay for. In exchange for their monthly premiums, patients deserve a guarantee that they can see their own doctor, visit a specialist, and go to the closest emergency room, if they are in need of a health care service. The McCain-Kennedy Patients Bill of Rights legislation before us guarantees all of those rights. Finally, with the Patients Bill of Rights legislation before us, we stand ready to deliver.

The McCain-Kennedy Patients Bill of Rights guarantees patients that they can hold their HMO liable for decisions that result in irreparable harm or death. In exchange for their monthly premiums, patients deserve a guarantee that they can see their own doctor, visit a specialist, and go to the closest emergency room, if they are in need of a health care service. The McCain-Kennedy Patients Bill of Rights legislation before us guarantees all of those rights.

When those rights are violated, and harm results from the delayed application or outright denial of treatment, the McCain-Kennedy bill guarantees patients that they can hold their HMO accountable for their negligence. That is what all of the rights to access care hinge upon—the ability to hold a health plan liable if access to care is denied.
We have spent days on the floor of the Senate debating the issue of liability. But, the argument here is simple. In this decision, an individual or corporation results in harm or death to a consumer, the decision-maker is held accountable. That holds true for every individual, and for every company except an HMO. HMOs, businesses who make countless decisions daily that affect the health of millions of Americans, do not face this same accountability. The number of patients who are suffering as a result is staggering.

Every day, 35,000 patients in managed care plans have necessary care delayed. Too many of these patients pay the ultimate price for the callousness displayed by these managed care plans. I would like to share the story of one woman who is my state'sMassachusetts who lost her life after being denied care by her HMO.

Mrs. White was diagnosed with leukemia in October 1997, and was unable to find a bone marrow match for transplant plans the 2 years of battling the disease she went into remission. She then learned that Massachusetts General Hospital was working with a newly-developed anti-rejection drug which would allow patients like herself, with less than perfectly-matched donors, to have bone marrow transplants. But, her HMO denied her care the day before she was due to be admitted to the hospital.

Six months later, Mrs. White enrolled in a new health plan which covered the costs of the transplant. However, during the 6-month impasse, Mrs. White fell out of remission, and her body was less able to sustain the new bone marrow. She died 3 months after the procedure was performed.

Recent stories like these demonstrate why HMOs must be held accountable for their decisions. Real people like Mrs. White are the reasons why there are liability provisions in the McCain-Kennedy Patients Bill of Rights—liability protections that allow patients to sue their health plans in state court when an HMO's decision to withhold or limit care results in injury or death. My colleagues on the other side of the aisle seek to misconstrue that point. But, let's be clear: this bill establishes a right to sue an HMO as a protection for America's patients, not as a reward to America's trial lawyers.

Opponents of the Kennedy-McCain Patients Bill of Rights have predicted that the liability language in the bill will cause a future flood of frivolous lawsuits against managed care companies. But, recent history paints a very different picture.

The President's home State of Texas enacted a comprehensive Bill of rights—which includes a provision to hold HMOs accountable—in 1997, albeit without the support of then-Governor Bush. Since that time, 17 lawsuits have been brought against managed care insurers in Texas. Let me repeat that—17 lawsuits in 4 years. That is a trickle, not a flood.

Mr. President, no one wants to encourage unnecessary lawsuits that increase the cost of providing health care. That is why the McCain-Kennedy bill sets out a comprehensive internal and external review process that seeks to remedy complaints before they reach a courtroom. Except in cases of irreparable harm or death, patients must exhaust this review process before pursuing a legal remedy.

But we must establish a legal remedy. A right without legal recourse fails to exist. The liability provision in this legislation simply establishes a mechanism by which to enforce the very patient protections it provides. Managed care providers that try avoid any liability, as long as they act responsibly and ensure that their patients receive the quality medical care prescribed for them by their physicians.

Let's be clear about another issue. As chairman of the Small Business Committee, I am well aware of the substantial challenges small businesses face in providing employee benefits while holding down costs. I understand the concerns small business owners have over the Kennedy-McCain bill's potential to expose them to liability for the sole, laudable initiative of offering health insurance coverage to their employees. But that is not the intent of this legislation.

The McCain-Kennedy bill only holds accountable those employers who directly participate in the medical decisions governing an employee's care if harm or injury occurs. The logic here is simple. In the case of HMOs, it is only fair that they be held to the same accountability standards. For employers who do not directly participate in these medical decision there should be no liability.

I understand that many businesses remain weary of the safeguards against employer liability that are included in the Kennedy-McCain legislation. Negotiations are underway to strike a compromise and strengthen these safeguards so that we may arrive at a Patient Bill of Rights that we all can support. I join all of my colleagues in hoping that those negotiations bear fruit.

Another attack on this Patients Bill of Rights legislation that we have heard—not just in this chamber but across the television airwaves—is that this bill will cause insurance premiums to increase dramatically. Nothing could be further from the truth. According to the most recent estimate from the Congressional Budget Office, this legislation will cause premiums to increase an average of 4.2 percent a year. For the average employee, that equates to $1.19 per month in additional premiums, a small price to pay for meaningful patients rights extended in this bill.

Many of my colleagues across the aisle argue that this minor increase will cause large numbers of Americans to become uninsured when, in fact, no evidence exists to support this. Nevertheless, I am encouraged by their concern for the uninsured in our country, the 43 million Americans—the 15 percent of our population—who have no health care coverage at all. I challenge my colleagues on both sides of the aisle to continue the discourse on this critical issue and look forward to working towards extending health coverage to every American once we have passed this bipartisan Patients Bill of Rights.

The McCain-Kennedy Patients' Bill of Rights legislation has widespread support from patients groups and health care providers—the two parties that we should really be focused on in this debate. To date, over 500 health care provider and patients' rights groups have endorsed our bill.

An April 2001 Kaiser Family Foundation poll found that 85 percent of Americans supported a comprehensive Patients' Bill of Rights that includes provisions to hold HMOs accountable. Mr. President, patients and health care providers have spoken loud and clear. They want expanded rights for patients now, rights that our legislation will provide. I urge all of my colleagues to pass the McCain-Kennedy Patients Bill of Rights.

Mr. CORZINE. Mr. President, I rise to talk specifically about how important the Patients' Bill of Rights is to improving the mental health care Americans receive.

For far too long, mental health consumers have been discriminated against in the health care system—subjected to discriminatory cost-sharing, limited access to specialists, and other barriers to needed services.

This is particularly true of the mental health care that children receive. More children suffer from psychiatric illness than from Leukemia, AIDS and diabetes combined. Yet, while we recognize the human costs of these physical illnesses, we often forget the cost of untreated psychiatric illness. For young people, these costs include lost occupational opportunities because of academic failure, increased substance abuse, more physical illness, and, unfortunately, increased likelihood of physical aggression to themselves or others.

That is why I am so pleased that McCaik-Edwards-Kennedy goes a long way towards addressing the inequities in mental health care and ensuring access to needed mental health care services.

Mr. President, no one wants to see a future flood of frivolous lawsuits against managed care companies. But, recent history paints a very different picture. The President's home State of Texas enacted a patients bill of rights—which includes a provision to hold HMOs accountable—in 1997, albeit without the support of then-Governor Bush. Mr. CORZINE. Mr. President, I rise to talk specifically about how important the Patients’ Bill of Rights is to improving the mental health care Americans receive.

For far too long, mental health consumers have been discriminated against in the health care system—subjected to discriminatory cost-sharing, limited access to specialists, and other barriers to needed services.

This is particularly true of the mental health care that children receive. More children suffer from psychiatric illness than from Leukemia, AIDS and diabetes combined. Yet, while we recognize the human costs of these physical illnesses, we often forget the cost of untreated psychiatric illness. For young people, these costs include lost occupational opportunities because of academic failure, increased substance abuse, more physical illness, and, unfortunately, increased likelihood of physical aggression to themselves or others.

This is why I am so pleased that McCaik-Edwards-Kennedy goes a long way towards addressing the inequities in mental health care and ensuring access to needed mental health care services.

For example, the proposal ensures access to critical prescription drugs.

We have made tremendous progress in developing medication to treat mental illnesses. Although medication is
often only one component of effective treatment for mental illnesses, access to the newest and most effective of these medications is crucial to successful treatment and recovery.

These new medications are more effective, have fewer side effects, and save money in the long run. Yet unfortunately, all too often managed care organizations prevent patients from accessing these life-saving drugs.

How? They use restrictive formularies that restrict access to preferred drugs—often the newer and more effective ones. The HMO’s are, in effect, undermining our own drug regulations and approval processes.

Fortunately, the bipartisan McCain-Edwards-Kennedy Patients’ Bill of Rights protects patients by providing exceptions from the formulary when medication is medically necessary. But it shouldn’t have to be like that for families. Doctors, not insurers, should decide what treatment a patient receives.

The McCain-Edwards-Kennedy proposal is also superior for mental health treatment plans. Breaux-Frist does not—continuing the discriminatory treatment of mental health treatments.

The McCain-Edwards-Kennedy proposal is also superior for mental health care because it ensures access to specialists. The bill allows standing referrals—so that primary care providers do not have to continue authorizing visits. It also requires plans to allow patient access to non-participating providers if the plan’s network is insufficient. So that patients can see the provider who can best meet their needs.

In the end, this can result in more costly treatment. And for some illnesses, the longer the duration or the greater the number of significant episodes, the harder to treat and more intractable the disease becomes.

Finally, the McCain-Edwards-Kennedy proposal, unlike Breaux-Frist, provides the right to a speedy and genuinely independent external review process when care is denied.

Let me tell you the personal story of a constituent of mine to illustrate the importance of these protections. Earlier this year, a mother in Gloucester County, NJ wrote to me about the need for treatment for her daughter. Her teenage daughter had attempted suicide, and been hospitalized for 8 days. She was diagnosed with depression and borderline personality disorder, and both her physician and therapist recommended intensive outpatient therapy, called “partial care” therapy. But the managed behavioral care organization determined that this treatment was not “medically necessary.” Instead of the intensive five and a half hour, twice a week therapy program, the insurance company would authorize a one hour week of therapy. This, despite the recommendation of her physician and therapist.

Like any loving parent would, the mother fought back, calling the company one time after another. The company was told to wait—even though, to quote her letter, her daughter “was self-mutilating and her behavior was becoming dangerous to herself and possibly others.” The mother finally enlisted the help of several people at the treatment program, who also wrangled with the company, and she even wrote to my office, and I wrote to the company on their behalf. Eventually, the company relented, and her daughter is now doing well in that intensive, 11 hour a week program.

Unfortunately, a study by the National Alliance for the Mentally Ill found that less than half of surveyed managed behavioral health care companies define suicide attempt as a medical emergency.

This year, 2,500 teenagers will commit suicide in the United States. Over 10 million children and adolescents have a diagnosable psychiatric illness that results in a academic failure, social isolation and increased difficulty functioning in adulthood. Only one out of five will get any care and even less will get the appropriate level of care they need and deserve.

So unless we provide critical patient protections, including the right to a fair and independent appeals process for review of medical necessity decisions, more families like my constituent will have to wonder if an insurance company will cover critical care that a doctor has prescribed for a loved one.

In sum, the McCain-Edwards-Kennedy bill will provide people access to the mental health care they need to lead healthy, productive lives. I am pleased to support it.

Mr. HARKIN. Mr. President, for too long American families have been left in the waiting room while HMOs refuse to provide the health care services that families need and deserve. The results have often been tragic.

CONGRESSIONAL RECORD—SENATE June 29, 2001

Now we are on the verge of a big victory for the American people—passing a meaningful Patient’s Bill of Rights. S. 1052 represents the culmination of five long years of bi-partisan work to ensure that patients in managed care get the medical services they need, deserve, and have paid for. We have debated this issue for years. Negotiated differences of opinion to find common ground, and worked across party lines to develop the best bill possible.

S. 1052 truly represents the best of all our collective ideas and most important, meets the needs of the American people.

Let me say that again. This bill—the McCain-Edwards-Kennedy bill—meets the needs of the American people. And when you cut through the rhetoric and political posturing, that is what this debate is all about—guaranteeing the American people basic and fundamental health care rights.

One of the cornerstones of a meaningful Patients’ Bill of Access is the right to quick access to a swift internal review and a fair and independent external appeals process. Without a strong review system in place—where real medical experts make the decisions and not the HMO actuaries—all the other protections would be compromised.

Our amendment would strengthen the review system to ensure the integrity of the appeals process and protect patients by requiring that the appropriate health care professional makes the medical decision. It ensures that health care professionals who can best assess the medical necessity, appropriateness, and standard of care, make determinations regarding coverage of a denied service.

As currently drafted, S. 1052 only requires that physicians participate in the review process. While the bill does not prohibit non-physician providers from participating at a physician’s discretion, it does not guarantee their involvement in relevant medical reviews.

I think we all agree that the intent of the appeals process is to put medical decisions in the hands of the best and most appropriate health care providers. In many cases, this will undoubtably be a physician. However, when the treatment denied is prescribed by a non-physician provider, it is critical that the case be reviewed by a provider with similar training and expertise.

For example, when a 59-year-old man fell in his home, he experienced increased swelling, decreased balance, decreased range of motion, decreased strength and increased pain in his right ankle and knee. A physical therapy treatment plan would have included specific exercises to increase strength, range of motion, and balance—enabling the patient to better perform activities of daily living and to prevent further deterioration of his health.

A reviewer who was not a licensed physical therapist, and did not have
June 29, 2001

CONGRESSIONAL RECORD—SENATE 12479

the expertise, background, or experience as a physical therapist, denied physical therapy coverage.

Without physical therapy intervention, the patient was severely limited in activity and spent significant time in bed. The time in bed resulted in further deterioration of the original problems and the development of wounds from the prolonged static position in bed.

A physical therapist reviewer would have recognized the importance of patient mobility while in bed to prevent bedsores and interventions to improve the patient's function with his right ankle and knee to enable him to independently walk.

Utilizing health care professionals with appropriate expertise and experience in the delivery of a service that has kept the patient in bed, a health plan guarantees beneficiaries the best possible review of their appeal.

My amendment is supported by a wide range of health care professionals, including:

- The American Association of Nurse Anesthetists,
- The American Chiropractic Association,
- The American College of Nurse Midwives,
- The American College of Nurse Practitioners,
- The American Occupational Therapy Association,
- The American Optometric Association,
- The American Pharmaceutical Association,
- The American Physical Therapy Association,
- The American Podiatric Medical Association,
- The American Society for Clinical Laboratory Science,
- The American Speech-Language-Hearing Association,
- The National Association of Orthopaedic Nurses,
- The National Association of Pediatric Nurse Practitioners,
- The National Association of Social Workers,
- And the Center for Patient Advocacy.

I do not believe that non-physician providers were deliberately excluded from the review process. In fact, just the opposite is true—I believe it was the intent of the bill's authors to develop the best possible review process. However, unless my amendment is adopted, I worry that we will fall short of our shared goal of giving patients access to the best and most appropriate health care services in every instance.

Mr. MCCONNELL, Mr. President, I rise today to discuss the patient protection legislation currently before the Senate. Over the past decade, as private health coverage has shifted from traditional insurance towards managed care, many consumers have expressed the fear they might be denied the health care they need by a health plan that focuses more on cost than on quality.

In response to these concerns, the Senate has considered several bills to provide sensible patient protections to Americans in managed care plans. During the last Congress, the Senate took at least 19 rollcall votes and passed two pieces of comprehensive patient protection legislation. Like many of my colleagues, I believe these items are in a large extent, in fact, a great deal of bipartisan agreement.

I believe that every American ought to have access to an emergency room. No parent should ever be forced to consider bypassing the nearest hospital for a desperately ill child in favor of one that is in their health plan's provider network. If you have what any normal person would consider an emergency, you should be able to go to the nearest hospital for treatment, period.

I believe that every American ought to be able to designate a pediatrician as their child's primary care physician. This common-sense reform would allow parents to reserve them with one of their plan's pediatricians without having to get a referral from their family's primary care physician.

I believe a doctor should be free to discuss treatment alternatives with a patient and to reserve them with the best medical advice, regardless of whether or not those treatment options are covered by the health plan. Gag clauses are contractual agreements between a doctor and an HMO that restrict the doctor's ability to discuss freely with the patient information about the patient's diagnosis, medical care, and treatment options. We all agree that this practice is wrong and have voted repeatedly to prohibit it.

I believe that consumers have a right to know important information about the products they are purchasing, and health insurance is no different. Health plans ought to provide their enrollees with Writing of the plan's benefits, cost sharing requirements, and definition of medical necessity. This will ensure that informed consumers can make the health care choices that are in their best interests and hopefully prevent disputes between patients and their plans.

In addition, the following examples highlight areas of bi-partisan agreement:

- Cancer Clinical Trials—Health plans ought to cover the routine costs of participating in clinical trials for patients with cancer.
- Point of Service Options—Health plans for large employers ought to offer a point of service plan so that patient's can go to a doctor outside their plan's network, even if it means paying a little more;
- Continuity of Care—We ought to ensure that pregnant and terminally ill patients aren't forced to switch doctor's in the middle of their treatment;
- Formulary Reform—Health plans ought to include the participation of doctors and pharmacists when developing their prescription drug plans, commonly known as formularies; and
- Self-Pay for Behavioral Health Services—Individuals who want to pay for mental health services out of their own pockets ought to be allowed to do so.

There is broad support among Democrats, Republicans, the White House, and most importantly, the American people. While their may not be unanimous agreement on every detail, I believe these disagreements could be resolved in relatively short order.

This may lead one to ask one very important question, "If these ideas are so popular, why haven't they already been enacted?" The answer is very simple, lawsuits. The Kennedy-McCain bill insists on vast new powers to sue. Leaping with abandon through the yellow pages under the word "attorney" is not what most Americans would call health care reform.

I do not believe that non-physician providers were deliberately excluded from the review process. In fact, just the opposite is true—I believe it was the intent of the bill's authors to develop the best possible review process. However, unless my amendment is adopted, I worry that we will fall short of our shared goal of giving patients access to the best and most appropriate health care services in every instance. The proponents of these costly new liability provisions contend that you can't hold plans accountable without expanding the right to sue employers and insurers. I couldn't disagree more. The proper way to ensure that plans are held accountable is to provide strong, independent external appeals procedures to ensure that patients receive the care they need. Far too many Americans are concerned that their health plan cannot deny them care. I believe that if a health plan denies a patient's claim, they have a right to an appeal.

As driving 1.26 million Americans out of the health insurance market wasn't reason enough to oppose the Kennedy-McCain bill, I am also strongly opposed to expanding liability because it exacerbates the problems in our already flawed medical malpractice system.
system. I might not be so passionate in my opposition to new medical malpractice lawsuits, if lawsuits were an efficient way for courts to identify patients who were truly harmed by negligent actions. Unfortunately, the data shows just the opposite. In 1996, researchers at the Harvard School of Public Health performed a study of 51 malpractice cases, which was published in the New England Journal of Medicine. In approximately half of those cases, the patient had not even been harmed, yet in many instances the doctor settled the matter out of court, presumably just to rid themselves of the nuisance and avoid lawyer’s fees and litigation costs. In the report’s conclusion, the researchers found that “there was no association between the occurrence of an adverse event due to negligence and the amount of ap- type and payment.” In everyday terms, this means that the patient’s injury had no relation to the amount of payment recieved or even whether or not payment was awarded.

The lawsuit拖 on for an average of 64 months—that is more than 5 years. Even if at the end of this 64 months, only 43 cents of every dollar spent on medical liability actually reaches the victims of malpractice, source: RAND Corporation, 1993. Most of the rest of the judgement goes to the lawyers. That is right, over half of the injured person’s damages are grabbed by the lawyers. Why would anyone want to expand this flawed system, which is so heavily skewed in favor of the personal injury lawyers?

Prior to the first extensive debate on this legislation in the Senate in 1999, The Washington Post said that “the threat of litigation is the wrong way to enforce a credible and mainly medical ap- pellate system short of the courts for adjudicating the denial of care”, source: The Washington Post 3/ 16/99, and that the Senate should enact an external appeals process “before subjecting an even greater share of medical practice to the vagaries of liti- gation…”, source: The Washington Post 7/13/99. More recently, the Post said that: “Our instinct has been, and re- mains, that increasing access to the courts should be a last resort that Con- gress should first try in this bill to create a credible and mainly medical ap- pellate system short of the courts for adjudicating the denial of care”, The Washington Post, 5/20/01. The Post is not alone in this view. My hometown paper, the Louisville Courier-Journal agreed when it stated that “there is good reason to be wary of giving pa- tients a broad right to sue.”

Over the past two weeks, the Senate has had numerous opportunities to im- prove this legislation. Unfortunately, the vote was far too close among them. In particular, we missed an op- portunity to improve Kennedy-McCain bill when the Senate rejected Mr. Frist’s Amendment, which would have established a more responsible mecha- nism for holding HMO’s accountable in court and ensuring that patient’s re- ceive immediate needed care. As I noted earlier, I support a major- ity of the patient protections included in this bill. That is why I take no joy in voting against this legislation. How- ever, my concern for the 21,000 Ken- tuckians who will lose insurance be- cause of the vast expansion of liability included in this bill prevents me from being able to support it. My colleague from Kentucky, Dr. ERNIE FLETCHER, has developed a compromise proposal in the House of Representatives which represents an improvement over the bill the Senate just passed. Therefore, I am hopeful that the House of Repre- sentatives will improve this product and that the Conference Committee will ratify Senate legislation that I can support, and that the President can sign into law.

Mr. HATCH. Mr. President, this is an important bill.

I want to see a Patients’ Bill of Rights signed into law, but I am afraid some of my colleagues here, on the other side of the aisle, have rejected any efforts to move the reasonable Frist-Breaux-Jeffords bipartisan, or I should say tri-partisan bill. They have put lawyers and litigation ahead of pa- tients and medical care. I would like to say a few words on the liability provisions of this legislation.

We all recognize that the liability provisions of this legislation are crit- ical. These elements are key to pro- viding patients with quality health care instead of extended court time. When I refer to the liability provi- sions, of course I am talking about a family of issues, including: exhaustion of appeals, liability caps on damages, and class action lawsuits. Each of these is important, and indeed critical to patient care and health care delivery, and needs to be addressed and corrected before the President can sign a bill.

With regard to the provision on ex- haustion of appeals, I believe the Thompson amendment, which we just approved is certainly a big improve- ment over the McCain-Kennedy lan- guage. The amendment will make cer- tain that any legal proceedings com- mence prior to patients exhausting all of the internal and external review mechanisms. This is purely a common sense amendment, which properly maintains emphasis on speedy resolu- tion of patient problems without lengthy and costly court proceedings. I want to emphasize that nothing in the amendment prohibits patients from having their day in court. Nor does this amendment prevent them from receiv- ing immediate, needed care. It just re- quires them to go through the internal and external review process before going to court for damages. The amendment still allows for those pa-
when I say this could result in employees losing health coverage. Employers will not want to chose between offering health insurance to their employees and opening themselves up to liability and huge court costs.

I find it ironic that my colleagues on the other side of the aisle, who always claim they are trying to find ways to lower the uninsured population, are actually pressing for legislation that will dramatically increase the uninsured population.

And if you don’t believe me, talk to any expert who is not a trial lawyer because the message is loud and clear that unless the bill is improved, health coverage will be severely jeopardized, and employees will lose their insurance. Is this the result that we want, especially in legislation that claims to be a Patients’ Bill of Rights? I think not.

As far as damage caps are concerned, the Frist-Breaux-Jeffords legislation is a step in the right direction. The McCain-Kennedy language is not.

The problem with the current McCain-Kennedy legislation is that it allows patients to go both to federal and state court to collect damages. For federal causes of action, economic and non-economic damages are unlimited. And even though the bill’s proponents claim there are no punitive damages provisions, as a former medical malpractice attorney, I know punitive damages when I see them.

Supporters of the McCain-Kennedy approach claim their bill doesn’t allow punitive damages in federal court. That is absolutely not true. Under their bill, a defendant in federal court can be hit with up to $5 million in “civil assessment” damages. Let’s call it what it is. The purpose of the civil assessment is to punish providers, plain and simple. The bill includes no limits on state law damages. It is very apparent to everyone in this chamber that the trial lawyers have been principally involved in drafting these liability provisions and they have done so with their own interests in mind. This provision is simply not in the best interest of the American people.

The McCain-Kennedy language allowing for unlimited damages is unworkable. Economic and non-economic damages are uncapped. In my opinion, non-economic damages should be capped.

Another issue that is extremely important is class action. The McCain-Kennedy language had no restrictions on class actions in its newly permitted state causes of action nor for its newly created federal causes of action for damages. Fortunately, the DeWine language attempts to restrict the litigation nightmare that would have resulted from the McCain-Kennedy language.

Finding common ground on these issues—exhaustion of appeals, employer liability, caps on damages and class action is crucial to the success of the Patients’ Bill of Rights legislation. It is incumbent upon us to do this right and do what is in the best interest of patients, not trial attorneys. I am confident that if we are all willing, we can make these provisions legally sound. We have spent far too many years on this issue not to do it right. We have an incredible opportunity to make meaningful patients’ rights legislation. Let’s not squander this opportunity by acting expeditiously.

Mr. CORZINE. Mr. President, I rise to speak about an issue that has been touched upon by many people during this debate on the Patients’ Bill of Rights, the problem of the uninsured.

Let me first say that I am very pleased that today we are passing a strong, enforceable Patients’ Bill of Rights.

I commend the bill’s authors, Senators McCAIN, EDWARDS and KENNEDY, for the tremendous job they have done in crafting a bipartisan bill that will provide strong patient protections and curb insurance company abuses.

This legislation is an example of how, working together, we can improve the health care Americans receive. But it is just the first of many steps we should be taking to ensure that all Americans receive quality health care.

During the debate on the Patients’ Bill of Rights I have heard many Senators argue that this legislation will lead to more uninsured Americans. Indeed, some of my colleagues have faulted supporters of the bill for not doing anything to help the uninsured.

As someone who have been talking about this issue for several years, I am thrilled to hear that my colleagues are concerned about the problem of the uninsured.

It is a national disgrace that 42 million Americans do not have health insurance.

Who are the uninsured? They are 17.5 percent of our nonelderly population. A shameful 25 percent are children. The majority—83 percent—are in working families.

The consequences of our Nation’s significant uninsured population are devastating. The uninsured are significantly more likely to delay or forego needed care. The uninsured are less likely to receive preventive care. Delaying or not receiving treatment can lead to more serious illness and avoidable health problems. This in turn results in unnecessary and costly hospitalizations. Indeed, my own state of New Jersey struggles to deal with the costs of charity care provided to the uninsured.

In 1999, for the first time in a decade we saw a slight decrease in the uninsured. But we still have so far to go. I believe that health care is a fundamental right, and neither the Government nor the private sector is doing enough to secure that right for everyone.

We ignore the issue of the uninsured at our peril and at a great cost to the quality of life—and to the very life—of our fellow Americans.

That is why I am developing legislation that will provide universal access to health care for all Americans.

My legislation will have several main components:

Large employers would be required to provide health coverage for all their workers. The private sector must do its part—a minimum wage in America should include with it minimum benefits, among them health insurance. But unfortunately, the current system puts the responsible employer who provides health insurance at a disadvantage relative to the employers who do not.

Small businesses, the self-employed and unemployed would be able to buy in the Federal Employee Health Benefit Program. If it is good enough for Senators, it is good enough for America.

Those who are between the ages of 55 and 64 would be able to buy-in to Medicare.

And we would provide help to small businesses and to low-income workers.

But although I am passionate about universal access to health care, I realize we can’t get there yet. Not because the popular will is not there, but because the political will isn’t.

So I support incremental changes, starting with the most vulnerable populations, and building on Medicaid and CHIP, success public programs.

I am working on a proposal that would expand Medicaid to cover all persons up to 200 percent of the Federal poverty level—an efficient way to reach nearly two-thirds of the uninsured.

I am also a strong supporter of the Family Care proposal, which would cover the parents of children already enrolled in the CHIP program. My own state of New Jersey is in fact leading the way on the issue of enrolling parents with their kids.

Finally, I was pleased to be an original cosponsor of Senator BINGAMAN’s bipartisan legislation, the Start Healthy, Stay Healthy Act, which would expand coverage for children and pregnant women. It is based on the common sense principal that children deserve to start healthy and stay healthy.

I often say that we are not a nation of equal outcomes, but we should be a nation of equal beginnings.

Until we give all Americans access to health care, however, we cannot live up to that promise.

But although we cannot get to universal access this year, I believe we can and should be doing all that we can to make incremental progress.

In conclusion, I am heartened that in this debate on the Patient’s Bill of Rights so many of my colleagues have expressed concern about the problem of
the uninsured. Indeed, I am hopeful that we have turned a corner on this critical issue.

As we move forward, I welcome the opportunity to work with any of my colleagues, on either side of the aisle, to find ways to significantly address the problem of the uninsured. There can be no greater purpose to our work in this Senate.

Mr. LIEBERMAN. Mr. President, I rise to speak about the McCain-Edwards-Kennedy Patients’ Bill of Rights. It has been 4 years since the first managed care reform bill was introduced in Congress. After years of unfailing and unproductive debate, we came together this week to find common ground for the common good, and pass a bill that will significantly improve the quality of medical treatments for nearly 90 million American families. We have worked very hard to get to this day, and with the unflagging commitment of my colleagues on both sides, we have produced a bill that I am very proud to support.

This bill does more than just provide new assurances to patients. It will provide a whole new framework for the delivery of health care in this country, helping to transform our managed care system from one in which health plans are immune for the life and death decisions they make every day to a more fair and accountable system for America’s families.

The purpose of this legislation has broad—and I emphasize broad—bipartisan support. According to a CBS news poll from 6/20/01, 90 percent of Americans support a Patients’ Bill of Rights.

Two years ago, 68 Republicans in the House of Representatives voted for the Norwood-Dingell Patients’ Bill of Rights that allowed patients to sue HMOs if they are denied a medical benefit that they need. The Ganske-Dingell bill in the House of Representatives currently has strong support from both Democrats and Republicans. I urge my colleagues in the House to take up the Ganske-Dingell Patients’ Bill of Rights and pass it without delay so that we can send a bill to the president for signature.

We need to enact a patients’ bill of rights now. Every day that goes by, nearly 90 million American people with private insurance have benefits delayed or denied by their health plans. These critical decisions made by health plans impact thousands of families at times of great stress and worry. Our most fundamental well-being depends on our health. Anyone who has had a sick family member can tell you of the anxiety they experience during a medical emergency or prolonged illness. It is our obligation and within our ability to make it easier for these families. This bill will do just that.

Opponents of this legislation express concern that if this bill is signed into law, we will see a flood of lawsuits. I would like to point out that in the 4 years since Texas enacted legislation allowing patients to hold their health insurers accountable, there have been very few lawsuits filed. Four million people in Texas are covered by that State’s patient protection law. Only 17 lawsuits have been filed.

The appeals process in this bill is fair and binding. With a strong and swift appeals process, patients should be able to receive the care they need, when they need it. The need for recourse in court should be minimal.

It was never the intent of this legislation to encourage more lawsuits. The sole purpose for this bill is to deliver health care to the people who need it. I remain hopeful that as it is the case in Texas, there will be very few lawsuits once this bill becomes law.

Rather, the Senate’s Bill of Rights, patients will get the care they need and deserve with less delay and less dispute. No longer will a cancer patient have to worry about access to clinical trials for new treatments. No longer will a family with a sick child have to worry about access to a pediatric specialist. No longer will a pregnant woman have to worry about switching doctors mid-pregnancy if her doctor is dropped from a plan.

Doctors will be able to prescribe the care they feel is necessary without feeling pressured to make cost-efficient decisions. And managed care companies will be held responsible when their denials of care threaten the lives of patients.

In sum, under this legislation, our health care system will better reflect and respect our values, putting patients first and the power to make medical decisions back in the hands of doctors and other health care professionals.

We can all be proud of this outcome and the path we followed to get here. The Senate worked through a lot of complicated issues and problems, reconciling legitimate policy differences, and reached principled compromise where we could. The result is real reform, and a bill of rights that is right for America.

Mr. LEVIN. Mr. President, I support the strong, enforceable Patients’ Bill of Rights which the Senate is finally going to vote on today. After years of consideration, and a hard legislative battle over the last few weeks, the bipartisan vote which this bill is about to receive on final passage reflects the overwhelming support the bill has from the American people.

The Patients’ Bill of Rights assures that medical decisions will be made by doctors, nurses and hospitals, not by someone in an insurance office somewhere with no personal knowledge of the patient and no professional background to make medical judgments. It guarantees access to needed health care specialists. It requires continuity of care protections so that patients will not have to change doctors in the middle of their treatment. And, the bill provides access to a fair, unbiased and timely internal and independent external appeals process to address denials of needed health care. This legislation will hold HMOs accountable for their decisions like everyone else in the United States. The Patients’ Bill of Rights also assures that doctors and patients can openly discuss treatment options and includes an enforcement mechanism that ensures these rights are real.

We have taken a big step forward today on comprehensive managed care reform for 190 million Americans. I am hopeful that the House of Representatives will again pass a real Patients’ Bill of Rights and that the President will sign it.

Mr. McCAIN. Mr. President, I thank all my colleagues, both supporters and opponents of our legislation, for their patience, their courtesy, and their commitment to a fair and fair debate on the many difficult issues involved in restoring to doctors and HMO patients the right to make the critical decisions that will determine the length and quality of their lives.

I think we are all agreed on this one premise, that the care provided by HMOs has been inadequate in far too many instances. This failure is attributable to the fact that virtually all the authority to make life and death decisions has been transferred from the people most capable of making medical decisions to those people most capable of making business decisions. I do not begrudge a corporation maximizing its profits, exercising due diligence regarding its fiduciary responsibility to its shareholders. The bottom line is their primary responsibility, and I respect that. But that is why, we should not grant them another, competing responsibility, especially when that secondary responsibility is the life and health of our constituents. I know that even the opponents of our legislation are agreed on returning more authority to doctors and their patients, and addressing many of the most distressing failures of managed health care reconsider his stated intention to veto the legislation.
June 29, 2001

CONGRESSIONAL RECORD—SENATE

12483

Mr. DASCHLE. Mr. President, it has been more than 5 years since we began this effort to make sure that Americans who have health insurance get the medical care they have paid for. It has been more than three years since the first bipartisan Patients’ Bill of Rights was introduced in the House . . . and nearly 2 years since the last time we debated a real Patients’ Bill of Rights in the Senate.

Today—at long last—the Senate is doing what the American people want us to do. Today—at long last—we are standing up for America’s families.

Today—at long last—we are telling HMOs they are going to have to keep their promises and provide their policyholders with the health care they’ve paid for.

The bill we are about to vote on provides comprehensive protections to all Americans in all health plans. It is a good bill—and a remarkable example of what we can achieve in this Senate when we search together in good faith for a principled, workable compromise.

Over the past 10 days, we have stood together—Republicans and Democrats—and rejected amendments that would have made this bill unworkable. And we have accepted amendments that made it better.

Thanks to the hard work of Senators SNOWE, DEWINE, LINCOLN and NELSON, we provided additional protections for employers who offer health insurance.

With help from Senators BREAUX and JEFFORDS, we agreed that states can continue to use their own standards for patient protection.

With Senator BAYH and Senator CARPER’s help, we strengthened the external review process to ensure the sanctity of health plan contracts.

At the same time, we turned back an array of amendments designed to weaken the protections in this bill.

We live in an amazing time. Some of the most remarkable advances in health care in all of human history are occurring right now. Polio and other once-feared childhood diseases have been all but wiped out in our lifetimes because of increased immunization rates. We are seeing organ transplants, bio-engineered drugs, and promising new therapies for repairing human genes.

But medical advances are useless if your health plan arbitrarily refuses to pay for them—or even to let your doctor tell you about them.

This bill guarantees that people who have health insurance can get the care their doctors say they need and deserve.

It ensures that doctors, not insurance companies, make medical decisions.

It guarantees patients the right to hear of all their treatment options, not just the cheapest ones.

It says you have the right to go to the closest emergency room, and the right to see a specialist.

It guarantees that parents can choose a pediatrician as their child’s primary care provider.

It allows families and individuals to challenge an HMO’s treatment decisions if they disagree with them.

And, it gives families a way to hold HMOs accountable for their decisions because serious injury or death—because rights without remedies are no rights at all.

This bill achieves every goal we set for it over the past 5 years, and we owe that to the stewardship and commitment of Senators MCCAIN, EDWARDS, and KENNEDY.

During these last 10 days, they have shown a seemingly limitless ability to find the workable middle ground without sacrificing people’s basic rights. They have put the Nation’s interests ahead of their own partisan interests. I thank them for their service to this Senate, and to our Nation.

I also want to thank Senators NICKLES and GREGG for being honest with us about their disagreements with this bill, and fair in the way they handled those disagreements.

This is the way the Senate should work. A Senate that brings up important bills and allows meaningful debate on them is a tribute to us all.

One final reason I found this debate so encouraging is the great concern we heard expressed by many opponents of this bill for the growing number of Americans who have no health insurance. We agree that this is a serious problem, and look forward to working with those Senators to address it as soon as possible.

I am proud to pass a Patients’ Bill of Rights now returns to the House.

Last year, 68 House Republicans joined Democrats to pass a strong patient protection bill very much like
CONGRESSIONAL RECORD—SENATE  

Mr. REID. I ask unanimous consent that the Senate proceed to the consideration of H. R. 1668, which is now at the desk; that the bill be read three times; and the motion to reconsider be laid upon the table with no intervening action.

Mr. NICKLES. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. NICKLES. Reserving the right to object, I will object on behalf of other Members. This bill has not yet been referred to committee. I personally have no objection to the bill, and I expect I will be supportive of it, but it should be referred to the committee so interested Members who have an interest in this particular issue can vet it, maybe improve it, maybe we can pass it. I hope we can pass it as expeditiously as possible.

At this time I object.

Mr. REID. I say to my friend, the distinguished Republican whip, I regret this, especially in that I have just completed reading John Adams, the new book out. It is a wonderful book. I recommend it to my friend.

I regret there is an objection to clearing this legislation. This bill, as my friend indicated, authorizes the Adams Memorial Foundation to establish a commemorative work on Federal land in the District of Columbia and its environs to honor former President John Adams and his legacy.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. NICKLES. Mr. President, I share my colleague’s enthusiasm, both for President Adams and also for David McCullough’s book. He is a great historian. I have not finished it. I started it. I look forward to completing it and learning a little bit more about the history of one of America’s great Presidents, one of our real founding patriots.

Again, this is going to be referred to the Energy Committee where I and others, I think, will try to be very supportive in a very quick and timely fashion so the entire Senate can, hopefully, vote on this resolution.

SHINE SOME LIGHT ON THE BLUE SLIP PROCESS

Mrs. FEINSTEIN. Madam President, we are all waiting for the majority leader to come to the floor and deliver the reorganization message. As part of that, I believe he is going to announce that Senator LEAHY, the chairman of the Judiciary Committee, is going to make public the blue slip process.

As a member of that committee, I would like to take a few moments and make a few comments about my experience with the blue slip—in essence, what I think about it.

For those who do not know what the blue slip is, it is a process by which a Member can essentially blackball a judge from his or her State when that Member has some reason to do so.

Why would I object so much? I object so much because there is a history of this kind of thing. Historically, many private clubs and organizations have enabled their board of directors to deliver what is called a blackball to keep out someone they don’t want in their club or organization. We all know it has happened. For some of us, it has even happened to us.

The usual practice was, and still is in instances, to prevent someone of a different race or religion from gaining access to that organization or club. This is essentially what the blue slip process is all about.

The U.S. Senate is not a private institution. We are a public democracy. I have come to believe the blue slip should hold no place in this body. At the very least, the use of a blue slip to stop a nominee, to prevent a hearing and therefore prevent a confirmation, should be made public. I am pleased to support my chairman, PAT LEAHY, and the Judiciary Committee in that regard.

Under our current procedure, though, any Member of this Senate, by returning a negative blue slip on a home State nominee, or simply by not returning the blue slip at all, can stop a nomination dead in its tracks. No reason need be given, no public statement need be made, no one would even know whom to blame. With a secret whisper or a backroom deal, the nomination...
June 29, 2001

CONGRESSIONAL RECORD—SENATE 12485

simply dies without even a hearing. This is just plain wrong.

I have watched the painful process over the last 9 years. During 6 of those years, the blue slip itself contained the words, "no further proceedings on this nominee will be scheduled until both blue slips have been returned by the nominee to the home State Senators." As a result, I saw nominees waiting 1, 2, 3, even 4 years, often without as much as a hearing or even an explanation as to why the action was taken. These nominees put their lives on hold. Yet they never have a chance to discuss the concerns that may have been raised about them. These concerns remain secret and the nomination goes nowhere.

As a member of the Judiciary Committee, I believe our duty is either to confirm or reject a nominee based on an informed judgment that he or she is either fit or not fit to serve; to listen to concerns and responses, to examine the evidence presented at a hearing, and to make a rationale for determining whether or not that individual nominee should serve as a district court judge or circuit court judge or even a U.S. Supreme Court Justice. That duty, in my view, leaves no room for a secret process.

I believe that the blue slip process as it now stands undermines the quality and consistency of our nominations process. In the April 1, 2001 edition of the Washington Post, MacKenzie wrote:

"The blue slip process as it now stands is open to abuse. Before I conclude, I want to read from a recent opinion piece by G. Cal Mackenzie, a professor at Colby College and an expert on the appointment process. In the April 1, 2001 edition of the Washington Post, MacKenzie wrote:

"The nomination system is a national disgrace. It encourages bullies and emboldens demagogues, silences the voices of responsibility, and undermines the highest forms of partisan combat. It uses innocent citizens as pawns in politicians' petty games and stains the reputations of good people. It routinely violates fundamental democratic principles, undermines the quality and consistency of public management, and breaches simple decency.""

An individual graduate college with honors, finishes law school at the top of the class; he or she may even clerk for a prestigious judge or join a large law firm, or maybe practice public interest law or even serve as staff of the Judiciary Committee. In fact, a nominee can spend years of his or her life honing skills and developing a reputation among peers, a reputation that is shared with the Judiciary Committee. In fact, a nominee will be scheduled until both blue slips have been returned by the nominee to the home State Senators—without hearing or down vote will ever be held. But at least the nominee will have the chance to see who has the problem, and what that problem is. In many cases, a nominee may choose to withdraw. In others, perhaps a misunderstanding can be cleared up. Either way, the process will be in the open, and we will know the reasons.

I believe that many members of this Senate did not even realize they held the power of the blue slip until just recently. In my view, the rationale behind the blue slip process is faulty. The process was designed to allow home state Senators—who may in some instances know the nominee better than the rest of the Senate—to have a larger say in whether the nominee moves forward. More often than not, however, this power is and will be used to stop nominees for political or other reasons having nothing to do with qualifications. As a matter of fact, the Member who uses the blue slip, who doesn't send it in, or sends it in negatively, may never have even met the nominee.

If legitimate reasons to defeat a nominee do exist, those reasons can be shared with the Judiciary Committee in confidence, and decisions can be made based on that information—by the entire Committee. The blue slip process as it now stands is open to abuse. I would join with those—I am hopeful there are now those—on the Judiciary Committee who would move to abolish the blue slip.
the MIS immediately come to mind. Less known but equally deserving of recognition are the sacrifices of the civilian misis on the homeland, who continued to support the war effort while enduring the prejudice of fellow citizens as well as the wholesale violation of their civil rights by the U.S. Government.

This new memorial honors the valor and sacrifice of the hundreds of brave men who fought and died for their country, and it also speaks to the faith and perseverance of 120,000 Japanese Americans and nationals, who solely on the basis of race, regardless of citizenship or loyalty, without proof or justification, were denied their civil rights in what history will record as one of our Nation’s most shameful acts. This memorial commemorates the responsibility to defend the civil rights confronted by Japanese Americans. The crane sculpture by Nina Akamu, a Hawaii-born artist, speaks to the prejudice and injustice confronted by Japanese Americans, and in a larger context speaks to the resiliency of the human spirit of adversity. The bell created by Paul Matisse encourages reflection, its toll marking the struggle and sacrifice of Japanese Americans in our Nation’s history and reminding us of our shared responsibility to defend the civil rights and liberties of all Americans.

I would also like to congratulate our friend and colleague, the senior Senator from Hawaii [Mr. INOUYE] and my friend, Secretary of Transportation Norm Mineta, a former Member of Congress, for their leadership in gaining Congressional authorization for the memorial and their support for the work of the National Japanese American Memorial Foundation.

For many of this Memorial to Patriotism by the National Japanese American Memorial Foundation in the Nation’s capital is a timely and necessary endeavor, for it reminds us and future generations of Americans that courage, honor, and loyalty transcend race, culture, and ethnicity.

JUSTICE FOR U.S. PRISONERS OF WAR

Mr. HATCH. Mr. President, as we move into recess for our annual Independence Day celebration, I wish to offer my deepest gratitude for all veterans of this country who took the call for arms in silent and noble duty and sacrificed more than we can ever repay. From the Revolutionary War to the Persian Gulf War, American men and women have always answered the call to secure and preserve independence and freedom both here and abroad. We are forever in their debt.

I also want to take this occasion to recognize and honor a special group of brave, indeed extraordinary, soldiers who served this country so gallantly in WWII. I want to pay special tribute to those who served in the Pacific, were taken prisoner, and then enslaved, and then forced into labor without pay, under horrific conditions by Japanese companies.

While I in no way wish to suggest that other American troops did not suffer equally horrific hardships or served with any less courage, the situation faced by this particular group of veterans was unique. As recognized in a unanimous joint resolution last year, all members of Congress stated their strong support for these brave Americans. As with many of our colleagues here today, I am committed to supporting these veterans in every way possible in their fight for justice.

This weekend the Prime Minister of Japan will be meeting with the President of the United States. I cannot praise this President enough for his thoughtfulness in hosting this event for the leader of Japan.

On this Independence Day, as we honor and appreciate America’s freedom, we cannot help but think of those who served our country. Freedom, indeed, is not free. The price is immeasurable. I hope the Prime Minister will understand, as I know he does, the value we place upon our veterans—the very people who fought and paid the price.

Our country appreciates the decades of friendship the United States and Japan have shared. Often, we probably do not recognize as we should the value of our bilateral relationship with Japan. On many occasions, we get bogged down in trade disputes. But ultimately we have found ways to resolve past trade differences, and I am confident we can address all current and future trade issues.

It is with this sincere hope and appreciation that I raise the memory of injustices perpetrated by private companies in Japan against American servicemen, and I hope that we can find a resolution to this problem. There is no more appropriate time to open the door to this long overdue dialogue between the United States and Japan. This is a moral issue that will not go away. We can work with Japan to close this sad chapter in history. In so doing, we will fortify and continue our bilateral relationship with Japan.

In closing, I urge all Americans, during this next week as we celebrate our freedom and our great history, to thank our soldiers who gave their lives and their freedom to fight for our nation. I thank them and express my support that they will be helped and protected. I will fight for them as they fought for me, my children, and all other Americans.

RETIREMENT OF VICE ADMIRAL JAMES F. AMERAULT

Mr. LOTT. Mr. President, it is with great pleasure that I rise to take this opportunity to recognize the exemplary service and career of an outstanding naval officer, Vice Admiral James F. Amerault, upon his retirement from the United States Navy at the conclusion of more than 36 years of honorable and distinguished service. It is my privilege to commend him for outstanding service to the Navy and our great nation.

Vice Admiral Amerault embarked on his naval career thirty-six years ago, on the 28th of June 1965. In the years since that day, he has devoted great energy and talent to the Navy and protecting our national security interests. It would be hard to calculate the innumerable hours this man has stood watch to keep our nation safe. He has been steadfast in his commitment to the ideals and values that our country embodies and holds dear.

Following his commissioning at the United States Naval Academy, he embarked on the first of many ships that would benefit from his leadership and expertise. Vice Admiral Amerault served at-sea as Gunnery Officer and First Lieutenant on board USS Massey (DD 778). He then served as Officer in Charge, Patrol Craft Fast 52 in Vietnam, a challenging and dangerous assignment that kept him in harm’s way. His courage and commitment to our nation was more than evident during these tumultuous years as he conducted more than 90 combat patrols in hostile waters off the coast of South Vietnam. One example of his valor and heroism is quoted from Commander Coastal Division Fourteen on 21 December 1967. “On the night of 4 August 1967 the patrol craft in the area adjacent to the one you were patrolling came under enemy fire. Disregarding your own safety, you directed your patrol craft to within 300 yards of the beach and bombarded the enemy position with intense .50 caliber and 81mm mortar fire. During this exchange your
patrol craft was narrowly missed by a barrage of recoilless rifle fire.” Again, his valor and heroism was established early in his career. He was awarded the Bronze Star Medal with Combat V and the Navy Combat Action Ribbon for his service.

Vice Admiral Amerault’s follow-on sea tours demonstrated the tactical brilliance that would become his trademark. His next tour was on board USS Taylor (DD 468) as Engineer Officer. During this tour he earned a coveted Shellback certificate for crossing the equator. He then reported as Chief Engineer on board USS Benner (DD 801) where he earned his first of three Navy Commendation Medals.

Several sea tours followed in steady progression. He was Executive Officer in USS Dupont (DD 941). He also was Executive Officer USS Carney (FFG 47) and Commanding Officer of USS Samuel Gompers (AD 37). It is difficult to convey the challenges and hardships that were faced by this officer and his family during these many and arduous sea tours.

As Vice Admiral Amerault progressed in the Navy he served as Staff Combat Information Center Officer for Commander, Cruiser Destroyer Group TWO; and Commander Destroyer Squadron SIX, Amphibious Group FOUR, and the Western Hemisphere Group. Again, these were all difficult tours of tremendous responsibility that required an incredible commitment to duty and country.

Vice Admiral Amerault’s shore assignments have included Director, Navy Program Resource Appraisal Division and Executive Assistant to the Director, Surface Warfare Division on the staff of the Chief of Naval Operations.

His flag assignments have included Director, Operations Division, Office of Budget and Reports, Navy Comptroller; Director, Office of Navy Budget; and Director, Fiscal Management Division in the office of the Chief of Naval Operations.

His final tour in the Navy served as Deputy Chief of Naval Operations (Fleet Readiness and Logistics) in the office of the Chief of Naval Operations.

As a scholar as well, VADM Amerault is a graduate of the Naval Postgraduate School and the University of Utah (MA Middle East Affairs and Arabic), and was the Navy’s 1986–87 Federal Executive Fellow at the RAND Corporation, Santa Monica, California.

As he ascended to the highest echelons of leadership in the Navy, Vice Admiral Amerault garnered many commendations that further highlight his stellar career. They include the Distinguished Service Medal; Legion of Merit (seven awards); the Bronze Star with V; the Joint Service Commendation Medal; the Navy Commendation Medal (three awards); and Vietnam, Desert Storm, and numerous other campaign medals.

Vice Admiral Amerault also has the distinction of being the Navy’s “Old Salt”—the active duty officer who has been qualified as an officer of the deck underway the longest.

Standing beside this officer throughout his superb career has been his wife Cathy, a lady to whom he owes much. She has been his key supporter, devoting her life to her husband, to her family, and to the men and women of the Navy family. She has traveled by his side for these many years. They are the epitome of the Navy family team.

From the start of his career at the Naval Academy, through Vietnam, the Gulf War, Kosovo and beyond—thirty-six years—Vice Admiral Amerault has served with such uncommon valor. He is indeed an individual of rare character and professionalism—a true Sailor’s Sailor! I am proud, Mr. President, to thank him on behalf of the United States of America for his honorable and most distinguished career in the United States Navy, and to wish him “fair winds and following seas”.

RECOGNIZING VOLUNTEER REFEREES FOR THE 2001 SIGMA NU CHARITY BOWL

Mr. LOTT. Mr. President, recently the Epsilon Xi Chapter of Sigma Nu at the University of Mississippi celebrated the eleventh anniversary of the Sigma Nu Charity Bowl. Founded in 1989, the Sigma Nu Charity Bowl has helped many unfortunate men and women, who from accidents or injuries have been permanently paralyzed. Since 1990, over $500,000 has been raised to help these individuals.

Throughout the years, the Epsilon Xi Sigma Nu Charity Bowl has become one of the largest college philanthropy events in the nation. Every year, Sigma Nu competes in a football game against another fraternity from Ole Miss or another university. It has become an annual event that the citizens of Oxford, the parents of the players, and the Ole Miss community enjoy each year. This year’s recipient was a very deserving young man named James Havard, who enjoyed watching Sigma Nu defeat Phi Delta Theta 18–13.

I would like to recognize some very special men who generously gave their time and talents in order to make the Charity Bowl a great success. Steve Bourbon, Michael Hooper, Kevin Roberts, Scott Steenson, and Michael Woodard are to be commended and honored for their efforts in serving as volunteer referees for the charity bowl football game. They graciously took time out of their busy schedules in order to make the game more enjoyable for the players and the fans, but more importantly they gave James Havard an opportunity to enjoy a better life.

These men belong to the Professional Football Referees Association, Charities, PFRA. The PFRA is also very involved in helping other charitable organizations such as the Make-A-Wish Foundation. This distinguished organization has been very helpful in getting aid to individuals like James, and they have given many people a chance to have a better life.

These men and the PFRA are to be commended for a job well done, and for their continued efforts in improving the lives of others.

THE ELECTRONIC SIGNATURES IN GLOBAL AND NATIONAL COMMERCE ACT

Mr. LEAHY. Mr. President, one of the most significant accomplishments of the 106th Congress was the Electronic Signatures in Global and National Commerce Act, commonly known as “ESIGN.” This landmark legislation establishes a Federal framework for the use of electronic signatures, contracts, and records, while preserving essential safeguards protecting the Nation’s consumers. It passed both houses of Congress by an overwhelming majority, and went into effect in October 2000.

I helped to craft the Senate version of the bill, which passed unanimously in November 1999, and I was honored to serve as a conferee and help develop the conference report. I am proud of what we achieved and the bipartisan manner in which we achieved it. It was an example of legislators legislating rather than politicians posturing and unnecessarily politicizing important matters of public policy.

Much of the negotiations over ESIGN concerned the consumer protection language in section 101(c), which was designed to ensure effective consumer consent to the replacement of paper notices with electronic notices. We managed in the end to strike a constructive balance that advanced electronic commerce without terminating or managing the basic rights of consumers.

In particular, ESIGN requires use of a “technological check” in obtaining consumer consent. The critical language in section 101(c) is designed to ensure effective consumer consent to the replacement of paper notices with electronic notices. We managed in the end to strike a constructive balance that advanced electronic commerce without terminating or managing the basic rights of consumers.

Mr. LEAHY. Mr. President, one of the most significant accomplishments of the 106th Congress was the Electronic Signatures in Global and National Commerce Act, commonly known as “ESIGN.” This landmark legislation establishes a Federal framework for the use of electronic signatures, contracts, and records, while preserving essential safeguards protecting the Nation’s consumers. It passed both houses of Congress by an overwhelming majority, and went into effect in October 2000.

I helped to craft the Senate version of the bill, which passed unanimously in November 1999, and I was honored to serve as a conferee and help develop the conference report. I am proud of what we achieved and the bipartisan manner in which we achieved it. It was an example of legislators legislating rather than politicians posturing and unnecessarily politicizing important matters of public policy.

Much of the negotiations over ESIGN concerned the consumer protection language in section 101(c), which was designed to ensure effective consumer consent to the replacement of paper notices with electronic notices. We managed in the end to strike a constructive balance that advanced electronic commerce without terminating or managing the basic rights of consumers.

In particular, ESIGN requires use of a “technological check” in obtaining consumer consent. The critical language in section 101(c) is designed to ensure effective consumer consent to the replacement of paper notices with electronic notices. We managed in the end to strike a constructive balance that advanced electronic commerce without terminating or managing the basic rights of consumers.
the benefits of a one-time technological check would far outweigh any possible burden on e-commerce. I also predicted that this provision would increase consumer confidence in the electronic marketplace.

One year later, the Federal Trade Commission and the Department of Commerce have issued a report on the impact of ESIGN’s consumer consent provision. In preparing the report, these agencies conducted extensive outreach to the on-line business community, technology developers, consumer groups, law enforcement, and academia. The report concludes:

"Thus far, the benefits of the consumer consent provision of ESIGN outweigh the burdens of its implementation on electronic commerce. The provision facilitates e-commerce and the use of electronic records and signatures while enhancing consumer confidence. It preserves the right of consumers to receive written information required by state and federal law. The provision also encourages deception and fraud by those who might fail to provide consumers with information the law requires that they receive.

Significantly, the consumer consent provision is benefitting businesses as well as consumers. The report states that businesses that have implemented this provision are reporting several benefits, including “protection from liability, increased revenues resulting from increased consumer confidence, and the opportunity to engage in additional dialogue with consumers about the transactions.” The technological check has not been significantly burdensome, and “[t]he technology-neutral language of the provision encourages creativity in the structure of business systems that interface with consumers, and provides an opportunity for the business and the consumer to choose the form of communication for the transaction.

The report also finds that ESIGN’s consumer safeguards are helping to prevent deception and fraud, which is critical to maintaining consumer confidence in the electronic marketplace.

ESIGN is a product of bipartisanship cooperation, and it is working well for the country. We should learn from experience as we take up new legislative challenges.

IN MEMORY OF OLIVER POWERS

Mr. NICKLES. Mr. President, I rise today to inform my colleagues of the passing of Oliver Bennett Powers, a Senior Broadcast Engineering Technician for the Senate, and native of Chickasha, Oklahoma.

Oliver passed away suddenly while vacationing with friends and family near Norfolk, Virginia on June 23, 2001. He was a respected, well-liked, and dedicated member of the Senate Recording Studio staff. He is survived by his wife of 28 years, Anita; two sons, Isaiah and Lucas; his mother, Ella Belle Powers of Chickasha, Oklahoma, and brother, Roy Powers, of Norman. Our hearts go out to them.

Oliver was born in Chickasha, Oklahoma, where he graduated from high school in 1971. He was also a graduate of the University of Science and Arts of Oklahoma, also located in Chickasha, and went on to earn a Master’s Degree in Journalism from the University of Oklahoma. Oliver began his service to the U.S. Senate in 1986, when he became director of audio and lighting for the Senate.

Oliver will be missed by all of those who knew him through his community, his church, and his work here in the Senate. Oliver embodied the best of what we’ve come to expect from Oklahomans. He was hard working, yet soft-spoken and gentle; highly professional, yet humble, and always kind and respectful to the representatives of so many staff here that work tirelessly and anonymously on behalf of the Senate.

On behalf of the United States Senate, let me say thank you to Anita, Isaiah, Lucas and the other members of the Powers family for sharing him with us these many years. He will be missed.

EXTRACTION OF SLOBODAN MILOSEVIC TO THE U.N. ICTY

Mr. LIEBERMAN. Mr. President, I rise today to commend the authorities of Serbia for, at long last, handing over Slobodan Milosevic to the International Criminal Tribunal. It is ironical, and perhaps fitting, that his arrest and transfer to the international court took place on June 28—one of the most noted dates in Serb history, when in 1389 the Serbs were defeated at the battle of Kosovo Polje, ushering in a period of Ottoman Turkish rule. It is my hope that future generations of Serbs will remember June 28, 2001 with the same sense of historic importance and as the beginning of true and long-lasting democracy and respect for the rule of law.

Mr. Milosevic has been charged by an independent, impartial, international criminal tribunal with crimes against humanity and violations of the laws or customs of war against the ethnic Albanian population of Kosovo. And according to the Prosecutor of the Tribunal, we can expect more indictments against him for earlier crimes in Croatia and Bosnia.

His extradition to the Hague is historic, if long overdue. As a former head of state, there were many who believed that he would never be made to answer for the charges against him. That this has happened is a victory for justice.

Our hearts go out to them.

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator Kennedy in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.
I would like to describe a terrible crime that occurred November 6, 1998 in Seattle, Washington. A gay man was severely beaten with rocks and broken bottles in his neighborhood by a gang of youths shouting “faggot.” The victim sustained a broken nose and swollen jaw. When he reported the incident to police two days later, the officer refused to take the report.

I believe that government’s first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

CELEBRATION OF CAPE VERDE INDEPENDENCE DAY

Mr. REED. Mr. President, I rise today to join Cape Verdeans in the July 5th celebration of Cape Verde Independence Day.

Every country is rich with its own history and unique story of how it achieved democracy, and Cape Verde is no exception. In 1462, Portuguese settlers arrived at Santiago and founded Ribeira Grande, now Cidade Velha, the first permanent European settlement city in the tropics. After almost three centuries as a colony, in 1951 Portugal changed Cape Verde’s status to an overseas province. Then in December 1974, an agreement was signed which provided for a transitional government composed of Portuguese and Cape Verdeans. In 1975, Cape Verdeans elected a National Assembly, which received the instruments of independence from Portugal.

For the first fifteen years of independence, Cape Verde was ruled by one party. Then in 1990 opposition groups came together to form the Movement for Democracy, now the Movement for Democracy, which provided for a transitional government composed of Portuguese and Cape Verdeans. In 1975, Cape Verdeans elected a National Assembly, which received the instruments of independence from Portugal.

Cape Verde now enjoys a stable democratic government. It is an example to other States as to what can be accomplished. These democratic changes have meant better global integration as the government has pursued market-oriented economic policies and welcomed foreign investors. Tourism, light manufacturing and fisheries have flourished. Cape Verde has made the difficult transition from a colony to a successful independent and democratic State.

Today, there are close to 350,000 Cape Verdean-Americans living in the United States, almost equal to the population of Cape Verde itself. These Americans hold a special right since the Cape Verde Constitution formally considers all Cape Verdeans at home and abroad as citizens and voters. Thus, July 5th is a day of independence for all Cape Verdean-Americans as well as those in Cape Verde.

As we approach the independence day of our own country and reflect on freedom and democracy, it is especially fitting that we remember and celebrate those special independence days of other peaceful democracies, such as Cape Verde. Join with me in wishing all those with direct and ancestral ties to Cape Verde a happy independence day.

HEALTH CARE FOR THE GUARD AND RESERVE

Mr. JOHNSON. Mr. President, I rise today in support of S. 1119, a bill that would require the Secretary of Defense to conduct a study of the health care coverage of the military’s Selected Reserve.

Most South Dakotans know at least one of the 4,500 current members of the South Dakota Guard and Reserve—the so-called Selected Reserve—or the thousands of former Guardsmen and Reservists. Sometimes, the connection is even more direct. Before joining the Army, my oldest son was a member of the South Dakota Army Guard in Yankton. South Dakota’s Guard and Reserve members have supported overseas operations, including those in Central America, the Middle East, Europe and Asia. Members of the South Dakota Air Guard are currently preparing for its mission later this year, where it will patrol the “No-Fly Zone” in Iraq. South Dakota’s Guard and Reserve units consistently rank in the highest percentile of readiness and quality of its recruits. But keeping and recruiting the best of the best in the South Dakota National Guard and Reserves is becoming more of a challenge as our military’s operations tempo has remained high while the number of active duty military forces has decreased. This tempo places significant pressures on the members of the reserve component, and has exposed possible health care deficiencies.

Many deploying members and their families have experienced tremendous turbulence moving back-and-forth between their civilian health insurance plans and TRICARE Prime, the military’s health care system. Some junior reservists have no health insurance at all. Some figures, for example, have shown that upward of 200,000 Selected Reservists nationwide do not possess adequate insurance. The exact nature of these disturbances and the broader shortfalls of this system are unclear because examinations have not completed.

I am pleased to join with my colleagues in introducing this legislation, which will take a step towards understanding this problem and giving Congress direction on how to solve it. I know how poor health care and broken promises can reduce morale within our military and their families. A poor “quality of life” among our reserve component and active duty personnel has a direct impact on recruitment and retention of the best and brightest in our Armed Services. I will continue to do all I can to ensure our men and women in the military, veterans, and military retirees have the health care they deserve.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Thursday, June 28, 2001, the Federal debt stood at $5,663,970,968,775.88. Five trillion, six hundred sixty-three billion, nine hundred seventy million, eighty-eight thousand, seven hundred seventy-five dollars and eighty-eight cents.

One year ago, June 28, 2000, the Federal debt stood at $5,549,147,000,000. Five trillion, six hundred forty-nine billion, one hundred forty-seven million.

Five years ago, June 28, 1996, the Federal debt stood at $5,118,683,000,000. Five trillion, one hundred eighteen billion, six hundred eighty-three million.

Ten years ago, June 28, 1991, the Federal debt stood at $3,537,988,000,000. Three trillion, five hundred thirty-seven billion, nine hundred eighty-eight million.

Twenty-five years ago, June 28, 1976, the Federal debt stood at $610,417,000,000. Six hundred ten billion, four hundred seventeen million, which reflects a debt increase of more than $5 trillion, $5,053,553,068,775.88. Five trillion, fifty-three billion, five hundred fifty-three million, sixty-eight thousand, seven hundred seventy-five dollars and eighty-eight cents during the past 25 years.

ADDITIONAL STATEMENTS

TRIBUTE TO ABE SILVERSTEIN

Mr. DeWINE. Mr. President, I rise today to recognize a man who employed his knowledge and vision to take America into Space. I am speaking of Cleveland resident, Abe Silverstein, who just passed away this month at 92 years of age, leaving a legacy of invention and innovation in the field of Space Flight.

Abe Silverstein played a part in a number of “space firsts,” and received many prestigious honors for his work. In the company of Orville Wright, William Boeing, and Charles Lindbergh, Abe won the Guggenheim Award for the advancement of flight.

Abe Silverstein designed, tested, and operated the world’s first supersonic wind tunnel. It was the largest, fastest, and most powerful in the world. The research that was conducted with the tunnel allowed the highest powered combat airplanes in World War II. This tunnel now resides in the NASA Glenn Space Research Facility in Cleveland, which Abe directed from 1961–1969.
He was also the first director of NASA Space Flight Operations and worked on the Mercury, Gemini, Apollo, and Centaur projects. The Centaur project involved the launching vehicles that propelled spacecraft to Mars, Jupiter, Saturn, Uranus, and Neptune.

Serving his country in World War II by producing new technology and helping his country achieve its goals in Space was not enough for Abe Silverstein. After retiring from NASA, Abe went on to work for Republic Steel Corporation, where he developed pollution controls to help keep our air cleaner for future generations.

Abe Silverstein always was contributing to his country, whether it be through wind-tunnel research or in serving as a Trustee at Cleveland State University. He was a man of great personal virtue and strength of character. I am grateful to have known this man today, who his NASA colleagues once described as “a man of vision and conviction, [a man who] contributed to the ultimate success of America’s unmanned and human space programs.” “A man of innovative, pioneering spirit lives on in the work we do today.”

I thank Mr. Silverstein for all his hard work and sacrifice, and I hope that my colleagues will join me in my gratitude.

TRIBUTE TO LES AND MARYLIN GORDON

Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Les and Marilyn Gordon, owners of The Candlelite Inn in Bradford, NH, on being named as Inn of the Year by the Complete Guide to Elegant & Breakfast Inns and Guesthouses in the United States, Canada and Worldwide.

Built in 1897, The Candlelite Inn has provided a relaxing atmosphere for visiting guests for over 100 years. The Gordons purchased the Inn in 1993, and have successfully continued the tradition of accommodating the needs of discriminating travelers touring the Lake Sunapee Region.

Throughout the year The Candlelite Inn hosts special weeks for their guests to enjoy including: Currier & Ives Maple Sugar Weekend in March, Old Glory Heritage Tours in July, August and September, Folage Midweek Getaways in September and October, and Murder Mystery Parties throughout the year.

I commend Les and Marilyn for the economic contributions they have made to the hospitality and tourism industries in our state. The citizens of Bradford, and New Hampshire, have benefited from their dedication to quality and service at The Candlelite Inn. It is truly an honor and a privilege to represent them in the United States Senate.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States and nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ADDITIONAL COSPONSORS

S. 170

At the request of Mr. REID, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 170, a bill to amend title 10, United States Code, to permit retired members of the Armed Forces who have a service-connected disability to receive both military retired pay by reason of their years of military service and disability compensation from the Department of Veterans Affairs for their disability.

S. 351

At the request of Ms. COLLINS, the name of the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of S. 351, a bill to amend the Solid Waste Disposal Act to reduce the quantity of mercury in the environment by limiting use of mercury fever thermometers and improving collection, recycling, and disposal of mercury, and for other purposes.

S. 496

At the request of Mr. LEAHY, the name of the Senator from Rhode Island (Mr. REED) was added as a cosponsor of S. 496, a bill to reduce the risk that innocent persons may be executed, and for other purposes.

S. 499

At the request of Mr. GREGG, the name of the Senator from Arkansas (Mr. HUTCHINSON) was added as a cosponsor of S. 499, a bill to amend the Family and Medical Leave Act of 1993 to clarify the Act, and for other purposes.

S. 497

At the request of Mr. LEAHY, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S. 497, a bill to express the sense of Congress that the Department of Defense should field currently available weapons, other alternatives, and operational concepts that provide suitable alternatives to anti-personnel mines and mixed anti-tank mine systems and that the United States should end its use of such mines and join the Convention on the Prohibition of Anti-Personnel Mines as soon as possible, to expand support for mine action programs including mine victim assistance, and for other purposes.

S. 530

At the request of Mr. GRASSLEY, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 530, a bill to amend the Internal Revenue Code of 1986 to provide a 5-year extension of the credit for producing electricity from wind.

S. 532

At the request of Mr. DORGAN, the name of the Senator from Minnesota (Mr. DAYTON) was added as a cosponsor of S. 532, a bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act to permit a State to register a Canadian pesticide for distribution and use within that State.

S. 562

At the request of Mr. REID, the name of the Senator from Nevada (Mr. ENSIGN) was added as a cosponsor of S. 562, a bill to amend the Immigration and Nationality Act with respect to the record of admission for permanent residence in the case of certain aliens.

S. 611

At the request of Ms. MIKULSKI, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 611, a bill to amend title II of the Social Security Act to provide that the reduction in social security benefits which are required in the case of spouses and surviving spouses who are also receiving certain Government pensions shall be equal to the amount by which two-thirds of the total amount of the combined monthly benefits (before reduction) and monthly pension exceeds $1,200, adjusted for inflation.

S. 624

At the request of Mr. GREGG, the name of the Senator from Arkansas (Mr. HUTCHINSON) was added as a cosponsor of S. 624, a bill to amend the Fair Labor Standards Act of 1938 to provide to private sector employees the same opportunities for time-and-a-half compensatory time off and biweekly work programs as Federal employees currently enjoy to help balance the demands and needs of work and family, to clarify the provisions relating to exemptions of certain professionals from minimum wage and overtime requirements of the Fair Labor Standards Act of 1938, and for other purposes.

S. 799

At the request of Mr. DODD, his name was added as a cosponsor of S. 799, a bill to prohibit the use of racial and other discriminatory profiling in connection with searches and detentions of individuals by the United States Customs Service personnel, and for other purposes.

S. 847

At the request of Mr. DAYTON, the names of the Senator from Georgia (Mr. CLELAND) and the Senator from Georgia (Mr. MILLER) were added as cosponsors of S. 847, a bill to impose tariff-rate quotas on certain casein and milk protein concentrates.

S. 860

At the request of Mr. GRASSLEY, the name of the Senator from Georgia (Mr. CLELAND) was added as a cosponsor of S. 860, a bill to amend the Internal...
Revenue Code of 1986 to provide for the treatment of certain expenses of rural letter carriers.

At the request of Mr. Reid, the names of the Senator from Ohio (Mr. DeWine) and the Senator from Arkansas (Mrs. Lincoln) were added as cosponsors of S. 866, a bill to amend the Public Health Service Act to provide for a national media campaign to reduce and prevent underage drinking in the United States.

At the request of Mr. Gregg, the name of the Senator from Georgia (Mr. Cleland) was added as a cosponsor of S. 952, a bill to provide collective bargaining rights for public safety officers employed by States or their political subdivisions.

At the request of Mr. Feingold, the name of the Senator from Maryland (Ms. Mikulski) was added as a cosponsor of S. 999, a bill to prohibit racial profiling. At the request of Mr. Dodd, his name was added as a cosponsor of S. 989, supra.

At the request of Mr. Dodd, his name was added as a cosponsor of S. 989, supra.

At the request of Mr. Bingaman, the names of the Senator from New Hampshire (Mr. Smith) and the Senator from Colorado (Mr. Allard) were added as cosponsors of S. 999, a bill to amend title 10, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

At the request of Mr. Dodd, the name of the Senator from Minnesota (Mr. Dayton) was added as a cosponsor of S. 1017, a bill to provide the people of Cuba with access to food and medicines from the United States, to ease restrictions on travel to Cuba, to provide scholarships for certain Cuban nationals, and for other purposes.

At the request of Mr. Conrad, the name of the Senator from Maine (Ms. Snowe) was added as a cosponsor of S. 1030, a bill to improve health care in rural areas by amending title XVIII of the Social Security Act and the Public Health Service Act, and for other purposes.

At the request of Mrs. Hutchison, the name of the Senator from Mississippi (Mr. Lottt) was added as a cosponsor of S. 1037, a bill to amend title 10, United States Code, to authorize disability retirement to be granted posthumously for members of the Armed Forces who die in the line of duty while on active duty, and for other purposes.

At the request of Mr. Johnson, his name was added as a cosponsor of S. 1109, a bill to establish objectives for negotiating, and procedures for, implementing certain trade agreements.

At the request of Mr. Liederman, the name of the Senator from New Mexico (Mr. Domениchini) was added as a cosponsor of S. 1134, a bill to amend the Internal Revenue Code of 1986 to modify the rules applicable to qualified small business stock.

At the request of Mr. Hatch, the name of the Senator from Colorado (Mr. Campbell) was added as a cosponsor of S. J.Res. 7, a joint resolution proposing an amendment to the Constitution of the United States authorizing Congress to prohibit the physical desecration of the flag of the United States.

At the request of Mr. Harkin, the names of the Senator from Connecticut (Mr. Dodd) and the Senator from North Dakota (Mr. Conrad) were added as cosponsors of S. Res. 71, a resolution expressing the sense of the Senate regarding the need to preserve six day mail delivery.

At the request of Mr. Reid, the name of the Senator from Delaware (Mr. Biden) was added as a cosponsor of S. Res. 109, a resolution designating the second Sunday in the month of December as “National Children’s Memorial Day” and the last Friday in the month of April as “Children’s Memorial Flag Day.”

At the request of Mr. Fitzgerald, the name of the Senator from Iowa (Mr. Harkin) was added as a cosponsor of S. Con. Res. 45, a concurrent resolution expressing the sense of Congress that the Humane Methods of Slaughter Act of 1958 should be fully enforced so as to prevent needless suffering of animals.

At the request of Mr. Johnson, his name was added as a cosponsor of S. Con. Res. 53, concurrent resolution encouraging the development of strategies to reduce hunger, and to promote free market economies and democratic institutions, in sub-Saharan Africa.

At the request of Mr. Hagel, the names of the Senator from Minnesota (Mr. Wellstone), the Senator from Michigan (Ms. Stabenow), the Senator from Maryland (Mr. Sarbanes) and the Senator from Nebraska (Mr. Nelson) were added as cosponsors of S. Con. Res. 53, supra.

At the request of Mr. Hagel, the names of the Senator from Minnesota (Mr. Wellstone), the Senator from Maryland (Ms. Stabenow) and the Senator from Nebraska (Mr. Nelson) were added as cosponsors of S. Con. Res. 53, supra.

AMENDMENT NO. 821

By Mr. Hatch (for himself, Mr. Feingold, Mr. Grassley, Mr. Leahy, Mr. Breaux, Mr. Burns, Mr. Reid, Mr. Craig, Mr. Torricelli, Mr. Bennett, Ms. Snowe, Mr. DeWine, Mr. Thomas, and Mr. Hutchinson), a bill to amend chapter 1 of title 9, United States Code, to provide for greater fairness in the arbitration process relating to motor vehicle franchise contracts; to the Committee on the Judiciary.

Mr. Hatch. Mr. President, I rise today to introduce S. 1140, “The Motor Vehicle Franchise Contract Arbitration Fairness Act of 2001.” I am pleased to be joined in cosponsorship of this legislation by Senators Feingold, Grassley, Leahy, Warner, Breaux, Burns, Reid, Craig, Torricelli, Bennett, Snowe, DeWine, Thomas, and Hutchinson. Our bill is intended to allow automobile dealers their day in court when they have disputes with the manufacturers.

As automobile dealers throughout Utah have pointed out to me, the
motor vehicle dealer contract often includes mandatory arbitration clauses, and they also point out their unequal bargaining power. This is usually the result of various factors, including the manufacturers’ discretion to allocate vehicle inventory and control on the timing of delivery. Manufacturers can, thus, determine the dealer’s financial future with the allocation of the best-selling models. Manufacturers can also exercise leverage over the flow of revenue to dealers, such as warranty payments. Manufacturers can limit dealers’ rights to transfer ownership or control of the business, even to family members. And manufacturers have tried, arbitrarily, to take businesses away from dealers without cause.

I recognize the efficiencies of mandatory arbitration clauses in general, but the specific circumstances in the manufacturer-dealer relationship were not the basis of this widely-supported bipartisan proposal. It is worthy to note that Congress in 1956 enacted the Automobile Dealer Day in Court Act, which provided a small business dealer in limited circumstances the right to proceed in Federal court when faced with abuses by manufacturers. And State legislatures have enacted significant protections for auto dealers.

S. 1140 amends Title 9 of the U.S. Code and make arbitration of disputes in motor vehicle franchise contracts optional. This would allow dealers to opt voluntarily for arbitration or use procedures and remedies available under State law, such as State-established administrative boards specifically established to resolve dealer-manufacturer disputes. I must note that this legislation is extremely narrow and affects only the unique relationship between small business auto dealers and motor vehicle manufacturers, which is strictly governed by State law. This legislation is necessary to respect the State’s interest in regulating the motor vehicle dealer-manufacturer relationship.

All States, except for Alaska, have enacted laws specifically designed to regulate the economic relationship between motor vehicle dealers and manufacturers to prevent unfair manufacturer contract terms and practices. In most States, including my home State of Utah, effective State administrative forums already exist to handle dealer/manufacturer disputes outside of the court system. Indeed, in the majority of States, a special State agency or forum is charged with administering and enforcing motor vehicle franchise law. These State forums provide an inexpensive, speedy, and non-judicial resolution of disputes.

I urge my colleagues to support this worthwhile legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.
be elected. But it is essential for public policy reasons and basic fairness that both parties to this type of contract have the freedom to make their own decisions based on the circumstances of the case.

I urge my colleagues to join me in supporting this legislation to address this unfair franchise practice.

Mr. President, I rise today to introduce, with my distinguished colleague from Utah, Senator Hatch, the Motor Vehicle Franchise Contract Arbitration Fairness Act of 2001. I want to recognize the efforts of the Senator from Iowa, Senator Grassley, in advancing this legislation in the last Congress, and note how pleased I am that the distinguished ranking member and former chairman of the Judiciary Committee has decided to take action, and I applaud him. By the time the 106th Congress concluded, we had the support of 56 Senators for this bill. So I believe we have an excellent opportunity to pass this bill this year, and I look forward to working with the Senator from Utah to make that happen.

While alternative methods of dispute resolution such as arbitration can serve a useful purpose in resolving disputes between parties, I am extremely concerned about the increasing trend of stronger parties to a contract forcing weaker parties to waive their rights and agree to arbitrate any future disputes that may arise. In every Congress since 1994, I have introduced the Civil Rights Procedures Protection Act, which amends certain civil rights statutes to prevent the involuntary imposition of arbitration to claims that arise from unlawful employment discrimination and sexual harassment. A few years ago, it came to my attention that the automobile and truck manufacturers, which often present dealers with “take it or leave it” contracts, are increasingly including mandatory and binding arbitration clauses as a condition of entering into or maintaining an auto or truck franchise. This practice forces dealers to submit their disputes with manufacturers to arbitration. As a result, dealers are required to waive access to judicial or administrative forums, substantive contract law, and the ability to seek protection. In short, this practice clearly violates the dealers’ fundamental due process rights and runs directly counter to basic principles of fairness.

Franchise agreements for auto and truck dealerships are typically not negotiable between the manufacturer and the dealer. The dealer accepts the terms offered by the manufacturer, or it loses the dealership, plain and simple. Dealers have been forced to rely on the States to pass laws designed to balance the manufacturers’ far greater bargaining power and to safeguard the rights of dealers.

The first State automobile statute was enacted in my home State of Wisconsin in 1937 to protect citizens from injury and to ensure that auto and truck distributors induced a Wisconsin citizen to invest considerable sums of money in dealership facilities, and then canceled the dealership without cause. Since then, all States except Alaska have enacted substantive laws to balance the enormous bargaining power enjoyed by manufacturers over dealers and to safeguard small business dealers from unfair automobile and truck manufacturer practices.

A little known fact is that under the Federal Arbitration Act, FAA, arbitrators are not required to apply the particular Federal or State law that would be applied by a court. That enables the stronger party, in this case the auto or formalCourt supervised discovery process often necessary to learn facts and provide factual or legal discussion of the decision in a written opinion; and 4. arbitration often does not allow for procedural due process. In short, this practice exists often necessary to learn facts and gain documents; 2. an arbitrator need not follow the rules of evidence; 3. arbitrators generally have no obligation to provide factual or legal discussion of the decision in a written opinion; and 4. arbitration often does not allow for judicial review.

The most troubling problem with this sort of mandatory binding arbitration is the absence of judicial review. We have seen dealers forced to rely on the States to pass laws designed to balance the manufacturers’ far greater bargaining power and to safeguard the rights of dealers.

The legislative history of the FAA indicates that Congress never intended to have the Act used by a stronger party to force a weaker party into binding arbitration. Congress certainly did not intend the FAA to be used as a tool to coerce parties to relinquish important protections and rights that would have been afforded them by the judicial system. Unfortunately, this is precisely the current situation.

Although contract law is generally the province of the States, the Supreme Court’s decision in Southland Corp. has in effect made any State action on this issue moot. Therefore, along with Senator Hatch, I am introducing this bill today to ensure that dealers are not coerced into waiving their rights. Our bill, the Motor Vehicle Franchise Contract Arbitration Fairness Act of 2001, would simply provide that each party to an auto or truck franchise contract has the option of selecting arbitration, but cannot be forced to do so.

The bill would not prohibit arbitration. On the contrary, the bill would encourage arbitration by making it a fair choice that both parties to a franchise contract may willingly and knowingly select. In short, this bill would ensure that the decision to arbitrate is truly voluntary and that the rights and remedies provided for by our judicial system are not waived under coercion.

In effect, if small business owners today want to obtain or keep their auto or truck franchise, they may be able to do so only by relinquishing their legal rights and foregoing the opportunity to use the courts or administrative forums. I cannot say this more strongly, this is unacceptable; this is

CONGRESSIONAL RECORD—SENATE

12497

wrong. It is at great odds with our tradition of fair play and elementary notions of justice. I therefore urge my colleagues to join in this bipartisan effort to put an end to this invidious practice.

By Mr. LIEBERMAN:

S. 1142. A bill to amend the Internal Revenue Code of 1986 to repeal the minimum tax preference for exclusion for incentive stock options; to the Committee on Finance.

Mr. LIEBERMAN. Mr. President, today I am reintroducing a proposal with regard to the perverse impact of the Alternative Minimum Tax, AMT, on Incentive Stock Options, ISOs. I previously introduced this proposal on April 30, 2001, as Section 5 of S. 798, the Productivity, Opportunity, and Prosperity Act of 2001. I am reintroducing this proposal as a separate bill to highlight the importance of this issue.

Incentive stock options and the AMT did not exist when Franz Kafka's 'The Castle' was published in 1926. The book describes how a young, innocent tax collector finds himself trapped, and punished or threatened with punishment before they even have offended the authorities.

The AMT/ISO interaction would be one that Kafka would appreciate. In the case of ISOs an employee who receives ISOs as an incentive can be taxed on the phantom paper gains the tax code deems to exist when he or she exercises an option, and be required to pay the AMT tax on these "gains" even if the "gains" do not, in fact, exist when the tax is paid. This means the taxpayer may have no gains, no profits or assets, with which to pay the AMT and might even have to borrow funds to pay the tax or even go into default on his or her ISO liability.

This Kafkaesque situation is unfair. It is not fair to impose tax on "income" or "gains" unless the income or gains exist. With the AMT tax on ISOs, it is not relevant if the "gains" exist in a financial sense. That they exist on paper is sufficient to trigger the tax.

This situation is also inconsistent with many well-established Federal Government policies. For example, our country favors stock options as an incentive for hard-working and productive employees of entrepreneurial companies. In most cases, entrepreneurs take enormous risks, receive less compensation than employees working for established companies, and have no company-sponsored pension plan. In addition, our country favors employee ownership of firms. This ownership gives these employees a huge stake in the success of the company and motivates them to dedicate themselves to the firm's success. Finally, our country also favors long-term investments that generate growth. We know that growth is more likely when entrepreneurs take risks over the long-term and build fundamental value for their companies and shareholders and owners. The policy favoring long-term investments is reflected in the fact that capital gains incentives are available only if an investment is held for at least one year. An investment sold before the end of this "holding period" receives no capital gains benefit. The application of the AMT to ISOs is inconsistent with all three of these public policies.

Let me explain the difference between ISOs and NSOs. Incentive stock options are sanctioned by the Internal Revenue code. Under current law the employer pays the employee on or after he exercises the option and buys the company's shares at the stock option price. The company receives no tax deduction on the spread, the difference between the option price and the market price of the stock. The holder must hold the stock for two years after the grant of the option and one year after the exercise of the option, he or she pays the capital gains tax on the difference between ISOs and NSOs. ISOs are "non-qualifying stock options." With NSOs the employee is taxed immediately when the option is exercised on the spread between the grant and exercised price. This forces an employee to sell stock as soon as he or she exercise their option, he or she pays the capital gains tax on the difference between the exercise and sale price on the sale of the stock. The tax payment is deferred until the stock is sold and the tax is paid on the real gains that are realized from the sale.

ISOs are stock options that do not satisfy the tax code requirements for ISOs. They are "non-qualifying stock options" or NSOs. With NSOs the employee is taxed immediately when the option is exercised on the spread between the grant and exercised price. This forces an employee to sell stock as soon as he or she exercise their option, he or she pays the capital gains tax on the difference between the exercise and sale price on the sale of the stock. This is a zero sum game for the employee, selling the stock he or she has just bought to pay a tax on the spread. Even worse, because the stock is not "held" for one year, this tax is paid at the ordinary income tax rates, not the preferential capital gains tax rates. The company receives a business expense deduction on the spread. If this were the whole story, it is clear that companies would tend to offer ISOs rather than NSOs to their employees. Employees would be encouraged to hold their shares for at least a year after the option is exercised, which helps to bind them to the company. They would then qualify for capital gains tax rates on the realized gains.

The problem is that ISOs come with a major liability, the application of the Alternative Minimum Tax, AMT, to the spread at the time of exercise. This tax is imposed on the exercise price of the stock minus the spread at the time the option is exercised. This tax at the time of exercise defeats the purpose of ISOs, forces employees to sell their stock, to pay the AMT tax, before the end of the holding period, and pay ordinary income tax rates. The difference between ordinary income tax rates and capital gains tax rates can be 15 percent or more.

The AMT tax is imposed on the spread at the time the option is exercised and it is irrelevant if the stock price at the time when the AMT tax is paid or when the stock is sold is a fraction of this price. The "gains" at the time of exercise are what count, not real gains in a financial sense when the investment is finally sold.

The application of the AMT at the time of exercise to ISOs is a major disincentive for companies to offer ISOs to their employees. The purpose of the ISO law when it was enacted by Congress back in 1981 was to encourage long-term holding of ISOs. This purpose is defeated by the AMT application at the time of exercise. Even if firms could educate their employees about the AMT liability, the fact that this tax is imposed at the time of exercise on phantom gains would remain a major disincentive for them to offer ISOs. The risks are too great that the employee will have no real gains with which to pay the tax, that employee will have to sell stock immediately at ordinary income tax rates to make sure that funds are available to pay the tax when it is due, or take the risk of holding the stock.

My understanding is that the firms that are most likely to grant ISOs are those firms that have no ability to use the corporate deduction that is available for NSOs. These are small firms with no tax liability for which the deduction is simply a tax loss carryforward with no current year value. With these firms the ISO held out the possibility of the employees receiving capital gains tax treatment of their gains. It is particularly sad that it is these firms and these employees which are feeling the brunt of the AMT/ISO problem.

The application of the AMT to ISOs is strange because long-term holdings of stock, as required by the ISO law, are classic capital gains transactions and we do not apply the AMT to the capital gains tax rate. They are classic capital gains transactions and we do not apply the AMT to the capital gains tax. Under the AMT only "tax preference items" enumerated in the AMT are included when the AMT calculation is made. The capital gains differential, the difference between the capital gains tax rate and the lower capital gains rate, is a tax benefit but that differential is not included in the AMT. Given all the problems we are now seeing with the AMT
the capital gains differential should not be included as a preference item. But, by an act of Congress, we have enacted a conforming amendment removing the AMT applied to ISOs. This makes no sense and it is an anomaly in the tax code. When the Congress restored the capital gains differential, it did not include it as an AMT tax preference item. This is why we need to set the record straight and do more.

With the AMT applied to ISOs, taxpayers are caught in a Catch-22 situation. If they hold the stock for the required year, they can qualify for capital gains treatment on the eventual sale of the stock. But, in doing so they are taking a huge risk that the AMT tax bill will exceed the value of the stock when the AMT is paid. If the tax is too low, they may have to sell their stock before the capital gains holding period has run and pay ordinary income tax rates on any gains. This is a form of lottery that serves no public policy.

The idea was created to ensure the rich cannot use tax shelters to avoid paying their “fair share.” Taxpayers are supposed to calculate both their regular tax and the AMT bill, then pay whichever is higher. The AMT is likely to snare 1.5 million taxpayers this year and nearly 36 million by 2010. But the case with ISOs is one where the taxpayers may never see the “gains,” and none of these tax them. Whatever the merits might be for the AMT for taxpayers with real gains, they have no bearing on taxpayers who may never see the gains. It is simply unfair to impose a tax on gains that exist only on paper. If the employee does realize gains, they should in fact pay tax on them, but only if and when the gains are realized.

Of course, with the recent huge drop in values for some stocks, many entrepreneurs are now being hit with immense AMT tax bills on the paper gains on stocks that are now worth a fraction of the price at the time of exercise. At a townhall meeting held in California by Representative Lofgren, Representative Bob Matsui, Kathy Swartz, a Mountain View woman, six months pregnant and soon to sell her “dream house” because she and her husband Karl owe $2.4 million in AMT, asked, “How many victims do you need before you say it’s horrible?” We are talking about taxpayers who in fact owe five- to seven-figure tax bills on gains they never realized.

My bill would change those tax rules so that the AMT no longer applies to ISOs and no tax is owed at the time when the entrepreneur exercises the option. This change would eliminate the unfair tax on paper gains on ISOs. This would encourage long-term holdings of stock, not immediate sale of the stock as a hedge against AMT tax liability. It would do nothing to exempt entrepreneurs from paying tax on their real gains when they eventually sell the stock.

My bill would solve this problem going forward. It would not, as drafted, provide relief to the taxpayers who already have been hit with AMT taxes on phantom gains. There is a bipartisan group in the House and Senate focusing on this group of taxpayers. This group has a strong claim for relief based on the inherent unfairness of the AMT as applied to ISOs. The unfairness of this law leads me to call for reform going forward should be remedied for current, as well as future taxpayers.

Let me be clear about the cost and budget implications of my bill. The Joint Tax Committee on Taxation has found that my proposal would reduce government tax revenues by $12.412 billion. This is explained by both this estimate, but there is no way for me to appeal it. The JTC does not provide explanations for its estimates, but I would assume that this estimate is based on the likelihood that there would be fewer tax payments at the time options are exercised as firms move from NSOs to ISOs, those employees with ISOs would not be paying the AMT, and there will be more employees who hold the stock and pay capital gains tax rates. Offsetting this, there will be fewer companies taking the deduction for NSOs. The revenue loss year-by-year is as follows: $1.821 billion (2002), $1.126 (2003), $858 (2004), $825 (2005), $941 (2006), $1.106 (2007), $1.341 (2009), $1.620 (2010), and $1.910 (2011). The loss during the 2002-2006 period is $5.494 billion. I will not propose to enact my bill unless this sum is financed and will have no impact on the Federal budget.

I am pleased that Rep. Zoe Lofgren (D-CA) has introduced legislation on AMT/ISO in the other body (H.R. 1497). Her bill has attracted a bipartisan group of cosponsors. I look forward to working with her and other Members to remedy this inequity in the tax code and to do so with regard to current as well as future taxpayers.

Let me note that I have proposed in S. 798 to provide a special capital gains tax rate, in fact to set a zero tax rate, for stock purchased by employees in stock option plans, by investors in Initial Public Offerings, and similar purchases of company treasury stock. This zero rate would be effective, however, only if the shares are held for at least three years, so the AMT gamble would be even more dramatic. During the first year of that holding period, the AMT would have to be paid and during the remaining period the value of the stock could well dive from the exercise price creating an even more invidious trap.

Kafka “The Castle” should remain as magnificent fiction. We have no place for taxes on phantom income and paper gains. Our taxpayers should be able to communicate effectively with the castle, not be caught in a bureaucratic nightmare that makes no sense and serves no policy.

By Mr. CAMPBELL:
S. 1143. A bill to require the Secretary of the Treasury to mint coins in commemoration of former President Ronald Reagan; to the Committee on Banking, Housing, and Urban Affairs.
Mr. CAMPBELL. Mr. President, today I introduce the “Ronald Reagan Commemorative Coin Act of 2001.”

The bill I am introducing today would accomplish two worthy goals. First, it would help Ronald Reagan, the 40th President of the United States. Second, it would also help raise much needed resources to help families across the United States provide care for their loved ones who have been stricken by Alzheimer’s disease.

I believe that a commemorative coin program would honor Ronald Reagan’s life and contributions to our Nation, while also raising funds to help American families in their day to day struggle against this terrible disease.

This legislation’s worthiness and timeliness were underscored just last night when ABC televised a powerful program in which Diane Sawyer interviewed Nancy Reagan. Watching Mrs. Reagan as she so openly and eloquently shared touching insights about their ongoing struggle with Alzheimer’s disease was moving. There is no doubt about the truly deep bonds that unite Ronald and Nancy Reagan and that we need to do what we can to fight the disease that has slowly taken its terrible toll on the Reagans and so many other American families.

Ronald Reagan has worn many hats in his life, including endeavors as a sports announcer, actor, governor and President of the United States. He was first elected president in 1980 and served two terms, becoming the first president to serve two full terms since Dwight Eisenhower.

Ronald Reagan’s boundless optimism and deep-seated belief in the people of the United States and the American Dream helped restore our Nation’s pride in itself and brought about a new “Morning in America.” His challenge to Gorbachev to “tear down this wall,” his successful revival of our economic power, his determination to rebuild our armed forces in order to contain the spread of communism, and his international summity skills are as seen at Reykjavik. Iceland, combined to help bring an end to the Cold War. Ronald Reagan left our Nation in much better shape than it was when he took office.

As Alzheimer’s sets in, brain cells gradually deteriorate and die. People afflicted by the disease gradually lose their cognitive ability. Patients eventually become completely helpless and dependent on those around them for...
even the most basic daily needs. Each of the millions of Americans who is now affected will eventually, barring new therapeutic advances in treatment, lose their ability to remember recent and past events, family and friends, even simple things like how to take a bath or turn on lights. Ronald Reagan, one of the most courageous and optimistic Presidents in American history, is no exception.

Shortly after being shot in an assassination attempt, Ronald Reagan's courage and good humor in the face of a life threatening situation were evident when he famously apologized to his wife Nancy saying "Sorry honey. I forgot to duck." Unfortunately, once Alzheimer's disease takes hold, it delivers a slow mind destroying bullet that none of us can duck to avoid. As Ronald Reagan wrote in his book "An American Journey," learning of his diagnosis "I only wish there was some way I could spare Nancy from this painful experience." From the moment of diagnosis, it's "a truly long, long, goodbye," Nancy Reagan said.

Fortunately, funding for Alzheimer's research has increased significantly over the past several years. Ronald Reagan's courage in coming forward and publicly announcing his condition played an important role in raising public awareness of Alzheimer's and paved the way for the recent increases in research funding. This bill would complement these efforts.

Once again, the legislation I am introducing today authorizes the U.S. Mint to produce commemorative coins honoring Ronald Reagan while raising funds to help families care for their family members suffering from Alzheimer's disease. I urge my colleagues to support passage of this legislation.

Ronald Reagan's eternal optimism and deep seated belief in an even better future for our Nation was underscored when he said, "I know that for America, there will always be a bright future ahead." This bill, in keeping with this quote's spirit, will help provide for a better future for many American families.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE.
This Act may be cited as the "Ronald Reagan Commemorative Coin Act of 2001".

SEC. 2. COIN SPECIFICATIONS.
(a) DESIGN REQUIREMENTS.—
(1) In general.—The design for the coins minted under this Act shall—
(A) be emblematic of the presidency and life of former President Ronald Reagan;
(B) bear the likeness of former President Ronald Reagan on the obverse side; and
(C) inscriptions of the words "Liberty", "E Pluribus Unum", "United States of America", and "Platinum Unum".

(b) DESIGN SELECTION.—The design for the coins minted under this Act shall be selected by the Citizens Coin Advisory Committee after consultation with the Commission of Fine Arts; and

(c) reviewed by the Citizens Commemorative Coin Advisory Committee.

SEC. 3. SOURCES OF BULLION.
(a) LATINUM AND GOLD.—The Secretary shall obtain platinum and gold for minting coins under this Act from available sources.
(b) PLATINUM.—The Secretary shall obtain platinum for minting coins under this Act from stockpiles established under the Strategic and Critical Materials Stock Piling Act and from other available sources.

SEC. 4. DESIGN OF COINS.
(a) DESIGN REQUIREMENTS.—
(1) In general.—The design of the coins minted under this Act shall—
(A) be emblematic of the presidency and life of former President Ronald Reagan;
(B) bear the likeness of former President Ronald Reagan on the obverse side; and
(C) inscriptions of the words "Liberty", "E Pluribus Unum", "United States of America", and "Platinum Unum".

(b) DESIGN SELECTION.—The design for the coins minted under this Act shall be selected by the Citizens Coin Advisory Committee after consultation with the Commission of Fine Arts; and

(c) reviewed by the Citizens Commemorative Coin Advisory Committee.

SEC. 5. ISSUANCE OF COINS.
(a) QUALITY OF COINS.—Coins minted under this Act shall be issued in uncirculated and proof qualities.
(b) MINT FACILITY.—Only one facility of the United States Mint may be used to strike any particular combination of denominations and quality of the coins minted under this Act.

SEC. 6. SALE OF COINS.
(a) SALE PRICE.—The coins issued under this Act shall be sold by the Secretary at a price equal to the sum of—
(1) the face value of the coins;
(2) the surcharge provided in subsection (d) with respect to such coins; and
(3) the cost of designing and issuing the coins (including labor, materials, dies, use of machinery, overhead expenses, marketing, and shipping).

(b) BULK SALES.—The Secretary shall make bulk sales of the coins issued under this Act at a reasonable discount.
(c) PREPAID ORDERS.—
(1) IN GENERAL.—The Secretary shall accept prepaid orders for the coins minted under this Act before the issuance of such coins.

(d) DISCOUNT.—Sale prices with respect to prepaid orders under paragraph (1) shall be at a reasonable discount.
(e) SURCHARGES.—All sales of coins issued under this Act shall include a surcharge established by the Secretary, in an amount equal to not more than—
CONGRESSIONAL RECORD—SENATE
June 29, 2001

12500

(1) $50 per coin for the $10 coin or $35 per coin for the $5 coin; and
(2) $10 per coin for the $1 coin.

SEC. 7. DISTRIBUTION OF SURCHARGES.
(a) In General.—Subject to section 5139(f) of title 31, United States Code, the proceeds from the sale of coins issued under this Act shall be subject to the audit requirements of Health and Human Services under subsection (2) of title 31, United States Code, who are trying to feed and shelter their population but also to working people who are trying to feed and shelter their family at entry-level wages. Services supplemented by the EFS funding, such as food bank and emergency rent/util-

ity assistance programs, are especially helpful to families with big responsibilities but small paychecks.

One of the things that distinguishes the EFS program is the extent to which it relies on non-profit organiza-
tions. Local boards in counties, parishes, and municipalities across the country advertise the availability of funds, decide on non-profit and local government agencies to be funded, and monitor the recipient agencies. The local boards, like the program’s National Board, are made up of charitable organizations including the National Council of Churches, the United Jewish Communities, Catholic Charities, USA, the Salvation Army, and the American Red Cross. By relying on community participation, the program keeps ad-

ministrative overhead to an unusually low amount, less than 3 percent.

The EFS program is operated without authorization since 1994 but has been sustained by annual appropria-
tions. The proposed bill will re-authorize the program for the next three years. It will also authorize modest funding increases over the amounts appropri-
at ed in recent years. A similar bill introduced by Senator Thompson and me in the last Congress, S. 1516, passed the Senate by Unanimous Con-

sent.

In summary, FEMA’s Emergency Food and Shelter Program is a highly efficient example of the government re-
ylying on the country’s non-profit orga-
nizations to help people in innovative ways. The EFS program aids the home-

less and the hungry in a majority of the Nation’s counties and in all fifty States, and I ask my colleagues to sup-
port this program and our re-author-
ing legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1144

Be it enacted by the Senate and House of Repre-
sentatives of the United States of America in Congress assembled.

SECTION 1. AUTHORIZATION OF APPROPRIA-
TIONS.

Section 322 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11332) is amended to read as follows:

SEC. 322. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this title $150,000,000 for fiscal year 2002, $160,000,000 for fiscal year 2003, and $170,000,000 for fiscal year 2004.

SEC. 2. NAMING REQUIREMENTS FOR NOMINATING ORGANIZATION.

Section 301(b) of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11331(b)) is amended—

(5) United Jewish Communities.

SEC. 3. PARTICIPATION OF HOMELESS INDIVIDUALS IN CREDIT.

Section 316(a) of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11346(a) is amended by striking paragraph (6) and inser-
ting the following:

(6) guidelines requiring each local board to include in their membership not less than 1 homeless individual, former homeless indi-

vidual, homeless advocate, or recipient of shelter services, except that such guidelines may waive such requirement for any board unable to meet such requirement due to its size or other circumstances.

By Mrs. BOXER:

S. 1145. A bill to amend the Internal Revenue Code of 1986 to extend the work opportunity credit to encourage the hiring of certain veterans, and for other purposes; to the Committee on Finance.

Mrs. BOXER. Mr. President, I am in-

troducing legislation to help the esti-

mated 1.5 million veterans who are now living in poverty by giving a tax credit to those employers who hire them and put them on the road to financial inde-

pendence. This idea was proposed and is supported by the National Coalition for Homeless Veterans and the Non-
Commissioned Officers Association.

This legislation is based upon the current tax credit offered for employ-

ers who hire those coming off welfare. Veterans groups tell me that the current tax credit is underutilized by vet-

ers because many are not receiving food stamps or are not on welfare. Be-

cause the bill I am introducing today bases eligibility on the poverty level, more veterans will be able to benefit from this credit.

My bill would allow employers to re-

ceive a hiring tax credit of 50 percent of the veteran’s first year wages and a retention credit of 25 percent of the veteran’s second year wages. Only the first $20,000 of wages per year will count toward the credit.

I offered this legislation as an am-

endment to the tax bill. While my amendment failed on a procedural vote, 49–50, opponents indicated that enacting this legislation would be a good thing to do. This being the case, I am hopeful that the Senate will take up and pass the bill I am introducing today in a bipartisan manner. It is the least we can do for our veterans who so bravely served our Nation and deserve our help.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1145

Be it enacted by the Senate and House of Repre-
sentatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE.

This Act may be cited as the “Veterans Opportunity to Work Act.”

SEC. 2. EXPANSION OF WORK OPPORTUNITY TAX CREDIT.
(a) In General.—Section 51(d)(1) of the Internal Revenue Code of 1986 (relating to
members of targeted groups) is amended by striking paragraph (H) and inserting "or", and by adding at the end the following:

"(I) a qualified low-income veteran."

(b) QUALIFIED LOW-INCOME VETERAN.—Section 51(d) of the Internal Revenue Code of 1986 (relating to members of targeted groups) is amended by adding the following to paragraph (10) thereof as paragraphs (11) through (13), respectively, and by inserting after paragraph (9) the following:

"(10) QUALIFIED LOW-INCOME VETERAN.—

"(A) IN GENERAL.—The term 'qualified low-income veteran' means any veteran whose gross income for the taxable year preceding the taxable year including the hiring date, was below the poverty line (as defined by the Office of Management and Budget) for such preceding taxable year.

"(B) VETERAN.—The term 'veteran' has the meaning given such term by paragraph (3)(B).

(c) SPECIAL RULES FOR DETERMINING AMOUNT OF CREDIT.—For purposes of applying this subpart to wages paid or incurred to any qualified low-income veteran—

"(i) subsection (a) shall be applied by substituting in paragraph (1)(B) and (G) of the qualified first-year wages and 25 percent of the qualified second-year wages for '40 percent of the qualified first-year wages', and

"(ii) in lieu of paragraphs (2) and (3) of subsection (b), the following definitions and special rule shall apply:

"(I) QUALIFIED FIRST-YEAR WAGES.—The term 'qualified first-year wages' means, with respect to any individual, qualified wages attributable to service rendered during the 1-year period beginning with the day the individual begins work for the employer.

"(II) QUALIFIED SECOND-YEAR WAGES.—The term 'qualified second-year wages' means, with respect to any individual, qualified wages attributable to service rendered during the 1-year period beginning on the day after the last day of the 1-year period with respect to such individual determined under subclause (I).

"(III) ONLY FIRST $20,000 OF WAGES PER YEAR TAKEN INTO ACCOUNT.—The amount of the qualified first-year wages which may be taken into account with respect to any individual shall not exceed $20,000 per year.

(d) PERMANENCE OF CREDIT.—Section 51(c)(4) of the Internal Revenue Code of 1986 (relating to termination) is amended by inserting "(except for wages paid to a qualified low-income veteran)" after "individual".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to individuals who begin work for the employer after the date of the enactment of this Act.

By Mr. ALLARD:

S. 1146. A bill to amend the Act of March 3, 1875, to permit the State of Colorado to use land held in trust by the State as open space; to the Committee on Energy and Natural Resources.

Mr. ALLARD. Mr. President, today I am introducing legislation to fulfill the wishes of my fellow Coloradans to allow the State to protect 300,000 acres of State land as open space.

The amendment was introduced on the floor of the House of Representatives on March 1, 1997, by Representative Nickles. It was passed by the House on March 12, 1997, and sent to the Senate. The bill was referred to the Committee on Energy and Natural Resources. The bill was reported on May 23, 1997, with amendments. The amendments were approved by the Senate on May 30, 1997. The bill was then sent to the House of Representatives. The House of Representatives passed the bill on June 25, 1997. The bill was then sent to the President of the United States. The President signed the bill into law on July 1, 1997.

The Colorado State Land Board has a clear mission for implementing the Stewardship Trust: to protect the crown jewels of the State's trust lands and ensure that these lands receive special protection from sale or development.

It is also clear that Colorado voters wanted to set aside 300,000 acres from potential development. I want to help the State fulfill these goals. This is a unique bill and ensures the state's flexibility in managing the trust lands. It does not change the intent of the Stewardship Trust, just ensures that the Enabling Act and the State Constitution are consistent.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

With no objection, the bill was ordered to be printed in the RECORD as follows:

S. 1146

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. COLORADO TRUST LAND.

Section 7 of the Act of March 3, 1875 (18 Stat. 475, chapter 139) (commonly known as the Colorado Enabling Act), is amended by inserting before the period at the end the following: "and for use for open space, wildlife habitat, scenic value, or other natural value, regardless of whether the land generates income for the common schools as described under section 14, except that the amount of land used for natural value shall not exceed 300,000 acres."
more than 600 Residential Properties is expected to be substantially complete by the end of this year. Decommissioning of the facility site, with the exception of groundwater, is expected to conclude in 2004. Cleanup requirements at Kress Creek have not been determined, and until those are established, the costs associated with the cleanup of that vicinity property cannot be accurately projected.

The significant costs associated with the West Chicago cleanup are a result, in large part, of extensive government use of the facility during the development of our country's nuclear defense program, including the Manhattan project. With the exception of Kress Creek and groundwater, total cleanup costs at the factory site and all vicinity properties can now be estimated with reasonable certainty. The $122 million authorized by this bill will permit the government to begin reimbursing the amount it is already in arrears to the thorium licensee. It also will provide the authorization necessary for the government to pay its share of costs, excluding costs for Kress Creek and for groundwater, that will be incurred by the licensee through completion of West Chicago cleanup.

Funding for this reauthorization would come from the General Treasury. Thus, this legislation will diminish the availability of funds in the DOE's Decontamination and Decommissioning Fund, from which both Title X uranium licensees and the DOE's gaseous diffusion plants receive funding.

I ask unanimous consent that the text of the bill be printed in the RECORD. There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1147

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REAUTHORIZATION OF THORIUM REIMBURSEMENT.

(a) Section 1001(b)(2)(C) of the Energy Policy Act of 1992 (42 U.S.C. 2296a) is amended by striking "$140,000,000" and inserting "$263,000,000".

(b) Section 1003(a) of such Act (42 U.S.C. 2296a) is amended by striking "$490,000,000" and inserting "$613,000,000".

(c) Section 1003(a) of the Atomic Energy Act of 1954 (42 U.S.C. 2297f-1) is amended by striking "$685,333,333" and inserting "$805,833,333".

By Mr. BURNS:

S. 1148. A bill to convey the Lower Yellowstone Irrigation Project, the Savage Unit of the Pick-Sloan Missouri Basin Program, and the Intake Irrigation Project to the appurtenant irrigation districts; to the Committee on Energy and Natural Resources.

Mr. BURNS. Mr. President, I rise today to introduce a piece of legislation that helps a large number of family farmers on the border of Montana and North Dakota. The Lower Yellowstone Irrigation Projects Title Transfer moves ownership of these irrigation projects from Federal control to local control. Both the Bureau of Reclamation and those relying on the projects for their livelihood agree there is little value in having the Federal Government retain ownership.

I introduced this legislation in the last Congress, and continue to believe it helps us to achieve the long term goals of Montana irrigators, and the mission of the Bureau of Reclamation. Just this week I attended the confirmation hearing of John W. Keys, III, who is the designate for Commissioner of the Bureau of Reclamation. I asked his position on title transfers of irrigation projects like the Lower Yellowstone, where local irrigation districts have seized control of the Federal properties, and where the Bureau has encouraged the transfer of title to the Districts. His response to me was very encouraging. He stated this type of title transfer "makes sense and is an opportunity to move facilities from Federal ownership to more appropriate control." He has promised to work with me and the Irrigation District to make this a reality, and I look forward to it.

The history of these projects dates to the early 1900's with the original Lower Yellowstone project being built by the Bureau of Reclamation between 1906 and 1910. The Savage Unit was added in 1947-48. The end result was the creation of fertile, irrigated land to help spur economic development in the area. To this day, agriculture is the number one industry in the area.

The local impact of the projects is measurable in numbers, but the greatest impacts can only be seen by visiting the area. The 500 family farms rely on these projects for economic substance, and the entire area relies on them to create stability in the local economy. In an area that has seen booms and busts in oil, gas, and other commodities, these irrigated lands continue producing and offering a foundation for the businesses in the area.

As we all know, the agricultural economy is not as strong as we'd like it to be, but these irrigated lands offer a reasonable return on time and are the foundation for strong communities based upon the ideals that have made this country successful. The 500 families impacted are hard working, honest producers, and I can think of no better people to manage their own irrigation projects.

Every day, we see an example of where the Federal Government is taking on a new task. We can debate the merits of these efforts on an individual basis, but I think we can all agree that while the government gets involved in new projects there are many that we can safely pass on to state or local control. The Lower Yellowstone Projects are a prime example of such an opportunity, and I ask my colleagues to join me in seeing this legislation passed as quickly as possible.

By Mr. SMITH of New Hampshire:

S. 1150. A bill to waive tolls on the Interstate System during peak holiday travel periods; to the Committee on Environment and Public Works.

Mr. SMITH of New Hampshire. Mr. President, I rise to introduce the Interstate Highway System Toll-Free Holiday Act.

As we move into this Fourth of July holiday to celebrate our nation's 225th birthday, many will do so in true American fashion by loading up the kids and the dog in the family car and heading out for a fun-filled vacation. Unfortunately, many of those family trips will quickly turn into frustration. Just as you get on the road and begin that family outing, you are greeted by a screeching halt, faced with what seems to be an endless line that is not moving. Soon, the kids will grow restless and angry. You've just reached the end of the line of the first toll booth and the delay and frustration begins. Of course, when you do finally make it to the booth, they take your money. Every holiday, no exception, I want to help make those holiday driving vacations more enjoyable by removing that toll booth frustration. My legislation will provide the much deserved relief from all of that holiday grief.

The Interstate Highway System Toll-Free Holiday Act provides that no tolls will be collected and no vehicles will be stopped at toll booths on the Interstate System during peak holiday travel periods. The exact duration of the toll waivers will be left to the States to determine, but will include, at a minimum, the entire 24 hour period of each legal Federal holiday. The bill will also authorize the Secretary of Transportation to reimburse the State, at the State's request, for lost toll revenues out of the Highway Trust Fund, which is funded by the tax that we all pay when we purchase gas for our cars. I want to keep the State highway funds whole, and, at the same time, provide relief to all those who simply want a hassle-free holiday trip.

There are currently some 2,200 miles of toll facilities on the 42,800 mile Interstate System. On peak holiday travel days, traffic increases up to 50 percent over a typical weekday. In New Hampshire last year, the I-95 Hampton toll booth had a 10 percent average increase in traffic over the four-day Fourth of July weekend compared to the previous weekend. That is equivalent to an additional 8,000 vehicles passing through this one toll booth every day. That increase in volume at the toll sites is not only an inconvenience in time and money, but also adds to safety concerns and, because vehicle
June 29, 2001

CONGRESSIONAL RECORD—SENATE

emissions are higher when idling, air quality suffers. I am pleased that this bill will alleviate congestion headaches and problems associated with increased toll booth traffic on holidays.

This is just one of what will be a series of bills that I will be introducing, as the Ranking Member of the Environment and Public Works Committee, to address transportation needs in New Hampshire and across the Nation, as we prepare for the reauthorization of the next major comprehensive highway bill in 2003.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1130

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Interstate Highway System Toll-Free Holiday Act.”

SEC. 2. WAIVER OF TOLLS ON THE INTERSTATE SYSTEM DURING PEAK HOLIDAY TRAVEL PERIODS.

(a) DEFINITIONS.—In this section, the terms “ Interstate System”, “public authority”, “Secretary”, “State”, and “State transportation department” have the meanings given the terms in section 101(a) of title 23, United States Code.

(b) WAIVER.—

(1) IN GENERAL.—No tolls shall be collected, and no vehicle shall be required to stop at a toll booth, for any toll highway, bridge, or tunnel on the Interstate System during any peak holiday travel period determined under paragraph (2).

(2) PEAK HOLIDAY TRAVEL PERIODS.—For the purposes of paragraph (1), the State transportation department or the public authority having control over the toll highway, bridge, or tunnel shall determine the number and duration of peak holiday travel periods, which shall include, at a minimum, the 24-hour period of each legal public holiday specified in section 6103(a) of title 5, United States Code.

(c) FEDERAL REIMBURSEMENT.—

(1) IN GENERAL.—For each fiscal year, upon request by a State or public authority and approval by the Secretary, the Secretary shall reimburse the State or public authority for the amount of toll revenue not collected by reason of subsection (b).

(2) REQUESTS FOR REIMBURSEMENT.—On or before September 30 of each fiscal year, each State or public authority that desires a reimbursement fund described in paragraph (1) shall submit to the Secretary a request for reimbursement, based on actual traffic data, for the amount of toll revenue not collected by reason of subsection (b) during the fiscal year.

(d) USE OF REIMBURSED FUNDS.—A request for reimbursement under paragraph (2) shall include a certification by the State or public authority that the amount of the reimbursement will be used only for debt service or for operation and maintenance of the toll facility, including reconstruction, re-facing, restoration, and rehabilitation.

(4) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated from the Highway Trust Fund (other than the Mass Transit Account) such sums as are necessary to carry out this subsection.

By Mr. REID (for himself and Mr. ENSSIGN):

S. 1130 was introduced to amend the method for achieving quiet technology specified in the National Parks Air Tour Management Act of 2000; to the Committee on Commerce, Science, and Transportation.

Mr. REID. Mr. President, I rise today along with my good friend and colleague from Nevada, Senator Enson because I am deeply concerned that the Federal Aviation Administration has failed to develop the incentives for quiet technology aircraft.

The bill we are introducing today, the “Grand Canyon Quiet Technology Implementation Act,” completes the Congressional mandates contained in the National Park Air Tour Management Act of 2000 which called for the implementation of “reasonably achievable” quiet technology standards for the Grand Canyon air tour operators.

Key provisions of the Act called for the Federal Aviation Administration, by April 5th of this year, to: 1. Designate reasonable achievable standards for fixed-wing and helicopter aircraft necessary for such aircraft to be considered as employing quiet aircraft technology; and 2. Establish corridors for commercial air tour operations by fixed-wing and helicopter aircraft that employ quiet aircraft technology, or explain to Congress why they can’t. The agency has failed to comply with any of these provisions.

The Act also provides that operators employing quiet technology shall be exempted from operational flight caps. This relief is essential to the very survival of many of these air tour companies. By not complying with these Congressional mandates, the Federal Aviation Administration places the viability of the Grand Canyon air tour industry in jeopardy.

While Senator Ensign and I along with the air tour community have sought to work with the Federal agencies in a cooperative manner, our repeated overtures have been summarily ignored, which forces us to take further legislative action.

Our bill simply requires the Federal Aviation Administration to do its job. It identifies “reasonably achievable” quiet technology and provides relief for air tour operators who have spent many years and millions of dollars of their money voluntarily transitioning to quieter aircraft to help restore natural quiet to the Grand Canyon.

I would like to compliment my good friend from Arizona, Senator John McCain for his vision and leadership in the Senate in recognizing that quieter aircraft was the key to restoring natural quiet to the Grand Canyon. During his tenure as chairman of the Senate Commerce Committee, it was Senator McCain who insisted on the quiet technology provisions contained in the National Park Air Tour Management Act of 2000. It was Senator McCain who wanted to ensure that these air tour companies which have made huge investments in current technology quiet aircraft modifications were rewarded for their initiative. It was Senator McCain, an advocate for restoring natural quiet to the Grand Canyon, who took the lead in seeking to ensure that the elderly, disabled and time-constrained visitor still would be able to enjoy the magnificence of the Grand Canyon by air. The legislation we are introducing today, supports Senator McCain’s vision.

The National Park Air Tour Management Act of 2000 is clear. It calls for the implementation of “reasonably achievable” quiet technology incentives. Our Grand Canyon Quiet Technology Implementation legislation is based on today’s best aircraft technology.

Some may ask what is “reasonably achievable”? It constitutes the following: replacing smaller aircraft with larger and quieter aircraft with more seating capacity, reducing the number of passenger needed to carry the same number of passengers; adding propellers on turbine-powered airplanes and main rotor blades on helicopters which reduces prop tip speeds by reducing engine RPMs; modifying engine exhaust systems with high-tech mufflers to absorb engine noise; modifying helicopter tail rotors with high-tech components for quieter operation.

These modifications typically reduce the sound produced by these aircraft by more than 50 percent.

This is what is “reasonably achievable” in aviation technology. In the year 2001, this is essentially all that can be done to make aircraft quieter. Operators which have spent millions of dollars to make these modifications, in our view, have complied with the intent of the law and deserve relief.

Let us not forget the original intent of this legislation to help restore natural quiet to the Grand Canyon and, as the 1916 Organic Act directs, to provide for the enjoyment of our national parks “in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.”

Air touring is consistent with the Park Service mission.

Based on current air tour restrictions, more than 1.7 million tourists will be denied access to the Grand Canyon during the next decade at a cost to air tour operators conservatively estimated at $250 million.

Senator Ensign and I agree that, to the extent possible and practical, the quieter these air tour aircraft can be made to be, the better for everyone.

That’s why it is so important that the Grand Canyon Quiet Technology Implementation Act become the law.
CONGRESSIONAL RECORD—SENATE
June 29, 2001

I ask unanimous consent that the text of the Grand Canyon Quiet Technology Implementation Act be printed in the Record.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1151

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be referred to as the “Grand Canyon Quiet Technology Implementation Act”.

SECTION 2. AMENDMENTS TO QUIET AIRCRAFT TECHNOLOGY ACT.

(a) In GENERAL.—Section 804 of the National Parks Air Tour Management Act of 2000 (49 U.S.C. 40128 note) is amended by adding at the end the following new subsection:

“(f) ALTERNATIVE QUIET AIRCRAFT TECHNOLOGY.—

“(1) GENERAL RULE.—Notwithstanding any other provision of law, an air tour operator based in Clark County, Nevada or at the Grand Canyon National Park shall be treated as satisfying the requirements for quiet aircraft technology that apply with respect to commercial air tour operations for tours described in subsection (b), if the air tour operator has met the following requirements:

“(A) The aircraft used by the air tour operator for such tours—

“(i) meet the requirements designated under subsection (a); or

“(ii) if not previously powered by turbine engines, have been modified to be powered by turbine engines and, after the conversion—

“(I) have a higher number of propellers (in the case of fixed-wing aircraft) or main rotor blades (in the case of helicopters) than the aircraft had before the conversion, thereby resulting in a reduction in prop or blade tip speeds and engine revolutions per minute;

“(II) have current technology engine exhaust mufflers;

“(III) in the case of helicopters, have current technology quietier tail rotors; or

“(IV) other modifications, approved by the Federal Aviation Administration, that significantly reduce the aircraft’s sound;

“(B) The air tour operator has replaced, for use for the tours, smaller aircraft with larger aircraft that have more seating capacity, thereby reducing the number of flights needed to transport the same number of passengers;

“(C) The air tour operator can safely demonstrate, through flight testing administered by the Federal Aviation Administration that applies a sound measurement methodology accepted as standard, that the tour operator can fly existing aircraft in a manner that achieves a sound signature in the same noise range or having the same or similar sound effect as the aircraft that satisfy the requirements of subparagraphs (A) or (B);

“(2) EXEMPTION FROM FLIGHT CAPS.—Any air tour operator that meets the requirements described in paragraph (1) shall be—

“(A) exempt from the operational flight altitudes referred to in subsection (c) and from flight curfews and any other requirement not imposed solely for reasons of aviation safety; and

“(B) granted air tour routes that are preferred for the quality of the scenic views for—

“(i) tours from Clark County, Nevada to the Grand Canyon National Park Airport; and

“(ii) ‘local loop’ tours referred to in subsection (b)(2),

“(b) RESTATEMENT OF CERTAIN AIR TOUR ROUTES.—Any air tour route from Clark County, Nevada, to the Grand Canyon National Park, Tusayan, Arizona, that was eliminated by regulation or by action by the Federal Aviation Administration, on or after January 1, 2001, and before the date of enactment of this Act shall be reinstated effective as of such date of enactment and no further changes, modifications, or elimination of any other air tour route by an air tour company based in Clark County, Nevada or at the Grand Canyon National Park Airport, Tusayan, Arizona may be made after such date of enactment without the approval of Congress.

By Mr. CRAIG (for himself and Mrs. FEINSTEIN):

S. 1153.

I ask unanimous consent that the Food Security Act of 1985 to establish a grassland reserve program to assist owners in restoring and protecting grassland; to the Committee on Agriculture, Nutrition, and Forestry.

Mr. CRAIG. Mr. President, I rise today to introduce the “Grassland Reserve Act”, a bill to authorize a voluntary program to purchase permanent or 30 year easement from willing producers in exchange for protection of grasslands, ranchlands, and lands of high resource value. I am pleased that Senators FINGOLD, and THOMAS, have joined as original cosponsors.

Grasslands provided critical habitat for complex plant and animal communities throughout much of North America. However, many of these lands have been, and are under pressure to be converted to other uses, threatening and eliminating plant and animal communities unique to this continent. A significant portion of the remaining lands are working ranches. Ranchland provides important open-space buffers for animal and plant habitat. Moreover, ranching forms the economic backbone for much of rural western United States. Loss of this economic activity will invariably lead to the loss of the open space that is indispensable for plant and animal communities and for citizens who love the western style of life.

As a rancher from a rural community in Idaho, I have noticed the changes taking place in some parts of my State where, for a number of reasons, working ranchers have been sold into ranchettes leaving the landscape divided by fences and homes where cattle and wildlife once roamed. Currently, no Federal programs exist to conserve grasslands, ranches, and other lands of high resource values, other than wetlands, on a national scale. I believe the United States needs a voluntary program to conserve these lands, and the Grasslands Reserve Act does just that.

Specifically, this bill establishes the Grasslands Reserve program through the Natural Resources Conservation Service to assist owners in restoring and conserving eligible land. To be eligible to participate in the program an owner must enroll no contiguous acres of land west of the 90th meridian, or 50 contiguous acres of land east of the 90th meridian. A maximum of 1,000,000 acres may be enrolled in the program in the form of a permanent or a 30-year easement. The program includes: native grasslands, working ranches, other areas that contain animal or plant populations of significant ecological value, and land that is necessary for the efficient administration of the easement.

The terms of the easements allow for grazing in a manner consistent with maintaining the viability of native grass species. All uses other than grazing, such as hay production, may be implemented according to terms of a written agreement between the landowner and easement holder. Easements prohibit the production of row crops, and other activities that disturb the surface of the land covered by the easement. The Secretary will work with the State technical committee to establish criteria to evaluate and rank applications for easements which will emphasize support for grazing operations, plant and animal biodiversity, and native grass and shrubland under the greatest threat of conversion. The Secretary may prescribe terms to the easement outlining how the land shall be restored including duties of the landowner and the Secretary. If the easement is violated, the Secretary may require the owner to refund all or part of the payments including interest. The Secretary may also conduct periodic inspections, after providing notice to the owner, to determine that the landowner is in compliance with the terms of the easement. The easement may be held and enforced by a private conservation, land trust organization, or a State agency in lieu of the Secretary, if the Secretary determines that granting such permission will promote grassland protection and the landowner agrees.

This legislation requires the Secretary to make payments for permanent easements based on the fair market value of the land less the grazing value of the land encumbered by the easement, and for 30 year easements the payment will be 30 percent of the fair market value of the land less the grazing value of the land encumbered by the easement. Payments may be made in one lump sum or over a 10 year period. Landowners may also choose to enroll their land in a 30-year rental agreement instead of a 30-year easement where the Secretary would make thirty annual payments which approximate the value of a lump sum payment the owner would receive under a 30-year easement. The Secretary is required to assess the payment schedule every five years to make sure that the payments do approximate the value of
a 30-year easement. USDA is also required to cover up to 75 percent of the cost of restoration and provide owners with technical assistance to execute the easement and restore the land.

I believe this legislation fills a need we have in our agriculture policy and I look forward to working with other members to include the Grasslands Reserve program in a responsible and balanced farm bill.

Mrs. FEINSTEIN. Mr. President, today I am pleased to join my colleagues to introduce legislation that provides fair compensation to producers and other landowners who maintain open spaces for plants and animals to thrive.

This bill creates a voluntary program authorizing the United States Department of Agriculture, USDA, to obtain either 30-year or permanent easements from landowners in exchange for a cash payment. Easements allow for grazing while maintaining the viability of native grass species. Moreover, these uses must only occur upon the conclusion of the local bird nesting season.

Vast amounts of grassland are being lost to urban development every year in large part because of economic pressures faced by ranchers, livestock producers, and other grassland owners.

Currently, there are no long-term programs to protect grasslands on a national scale. The Grassland Reserve Act provides real options to financially-strapped land owners of grasslands who wish to keep their lands in a natural state. There is a need for this bill because existing programs to protect lands, such as the Forest Legacy program, target forested lands only.

This legislation represents a win-win situation for both the environment and people who make their livelihood on grasslands. The loss of grassland is a serious problem for preserving wildlife habitat and a rural way of life. This bill is a step in the right direction to protect these lands from future development.

I have always felt that protecting our Nation’s unique natural areas, including grasslands, should be one of our highest priorities. I invite my colleagues to join Senator Craig and me in supporting this legislation.

By Mr. LEVIN (for himself and Mr. WARNER) (by request):

S. 1155. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “National Defense Authorization Act for Fiscal Year 2002”.

SEC. 2. TABLE OF CONTENTS.

The table of contents for this Act is as follows:

TITLE I—PROCUREMENT

Authorization of Appropriations

Sec. 101. Army.
Sec. 102. Navy and Marine Corps.
Sec. 103. Air Force.
Sec. 104. Defense-Wide Activities.
Sec. 106. Defense Health Program.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Sec. 201. Authorization of Appropriations.

TITLE III—OPERATION AND MAINTENANCE

Subtitle A—Authorization of Appropriations

Sec. 301. Operation and Maintenance Fund.
Sec. 302. National Guard and Reserve.
Sec. 303. Armed Forces Retirement Home.
Sec. 304. Acquisition of Logistical Support Equipment.

Subtitle B—Environmental Provisions

Sec. 310. Reimburse EPA for Certain Costs in Connection with the Hooper Sands Site, in South Berwick, Maine.

Sec. 311. Extension of Pilot Program for the Sale of Air Pollution Emission Reduction Incentives.
Sec. 312. Elimination of Report on Contractor Reimbursement Costs.

Sec. 313. Costs Payable to the Department of Defense and Other Federal Agencies for Services Provided to the Defense Commissary Agency.
Sec. 314. Reimbursement for Non-Commissary Use of Commissary Facilities.
Sec. 315. Commissary Contracts and Other Agreements and Instrumentalities.
Sec. 316. Operation of Commissary Stores.

Subtitle C—Commissary and Other Agencies and Instrumentalities

Sec. 320. Reimbursement, for Reserve Intelligence.

TITLE IV—MILITARY PERSONNEL AUTHORIZATIONS

Subtitle A—Active Forces

Sec. 401. End Strengths for Active Forces.
Sec. 402. Reserve Forces.

Sec. 403. End Strengths for Selected Reserve.
Sec. 404. End Strengths for Reserves on Active Duty in Support of the Reserves.
Sec. 405. End Strengths for Military Technicians (Dual Status).
Sec. 406. Fiscal Year 2002 Limitation on Number of Non-Dual Status Technicians.

Sec. 499. Authorized Strengths: Reserve Officers and Non-Commissioned Members on Active Duty or Full-time National Guard Duty for Administration of the Reserves or National Guard.

Sec. 410. Increase in Authorized Strengths for Air Force Officers on Active Duty in the Grade of Major.

TITLE V—MILITARY PERSONNEL POLICY

Subtitle A—Officer Personnel Policy

Sec. 501. Elimination of Certain Medical and Dental Requirements for Army Early-Depleters.
Sec. 502. Medical Deferment of Mandatory Retirement or Separation.
Sec. 503. Officer in Charge; United States Navy Band.
Sec. 504. Removal of Requirement for Certification for Certain Flag Officers to Retire in Their Highest Grade.

Subtitle B—Reserve Component Personnel Policy

Sec. 510. Retirement of Reserve Personnel.
Sec. 511. Amendment to Reserve PERS-TEMPO Definition.
Sec. 512. Individual Ready Reserve Physical Examination Requirement.
Sec. 513. Benefits and Protections for Members in a Funeral Honors Duty Status.
Sec. 514. Funeral Honors Duty Performed by Members of the National Guard.
Sec. 515. Strength and Grade Ceiling Accounting for Reserve Component Members on Active Duty in Support of a Contingency Operation.
Sec. 516. Reserve Health Professionals Stipend Program Expansion.
Sec. 517. Reserve Officers on Active Duty for a Period of Three Years or Less.
Sec. 518. Active Duty End Strength Exemption for National Guard and Reserve Personnel Performing National Guard or Reserve Component Duties.
Sec. 519. Clarification of Functions That May Be Assigned to Active Guard and Reserve Personnel on Full-Time National Guard Duty.
Sec. 520. Authority for Temporary Waiver of the Requirement for a Baccalaureate Degree for Promotion of Certain Reserve Officers of the Army.
Sec. 521. Authority of the President to Suspend Certain Laws Relating to Promotion, Retirement and Separation; Duties.

Subtitle C—Education and Training

Sec. 522. Authority for the Marine Corps University to Award the Degree of Master of Strategic Studies.
Sec. 523. Reserve Component Distributed Learning.
Sec. 524. Repeal of Limitation on Number of Junior Reserve Officers’ Training Corps (JROTC) Units.
CONGRESSIONAL RECORD—SENATE
June 29, 2001

Sec. 534. Modification of the Nurse Officer Candidate Accession Program
Restriction on Students Attending Civilian Educational Institutions with Senior Reserve Officers’ Training Programs.

Sec. 535. Defense Language Institute Foreign Language Center.

Subtitle D—Decorations, Awards, and Commendations

Sec. 541. Authority for Award of the Medal of Honor to Humbert R. Versace for Valor During the Vietnam War.

Sec. 542. Issuance of Duplicate Medal of Honor.

Sec. 543. Repeal of Limitation on Award of Bronze Star to Members in Receipt of Special Pay.

Subtitle E—Uniform Code of Military Justice

Sec. 551. Revision of Punitive UCMJ Article Regarding Drunk Driving Operation of Vehicle, Aircraft, or Vessel.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

Subtitle A—Pay and Allowances

Sec. 601. Increase in basic pay for fiscal year 2002.

Sec. 603. Funeral Honors Duty Allowance for Retirees.

Sec. 604. Basic Pay Rate for Certain Reserve Commissioned Officers with Prior Service as an Enlisted Member or Warrant Officer.

Sec. 605. Family Separation Allowance.

Sec. 606. Housing Allowance for the Chaplain for the Corps of Cadets, United States Military Academy.

Sec. 607. Clarifying Amendment that Space-Required Travel for Annual Training Reserve Duty Not Obligate Transportation Allowances.

Subtitle B—Bonuses and Special and Incentive Pays

Sec. 611. Authorize the Secretary of the Navy to Prescribe Submarine Duty Incentive Pay Rates.

Sec. 612. Extension of Authorities Relating to Payment of Other Bonuses and Special Pays.

Sec. 613. Extension of Certain Bonuses and Special Pay Authorities for Nurse Officer Candidates, Registered Nurses, Nurse Anesthetists, and Dental Officers.

Sec. 614. Extension of Authorities Relating to Nuclear Officer Special Pays.

Sec. 615. Extension of Special and Incentive Pays.

Sec. 616. Accession Bonus for Officers in Critical Skills.

Sec. 617. Critical Wartime Skill Requirement for Eligibility for the Individual Ready Reserve Bonus.

Sec. 618. Hazardous Duty Incentive Pay: Maritime Board and Search.

Subtitle C—Travel and Transportation Allowances

Sec. 621. Funded Student Travel: Exchange Programs.

Sec. 622. Payment of Vehicle Storage Costs in Advance.

Sec. 623. Travel and Transportation Allowances for Family Members to Attend the Burial of a Deceased Member of the Armed Forces.

Sec. 624. Shipment of Privately Owned Vehicles When Executing CONUS Permanent Change of Station Moves.

Subtitle D—Other

Sec. 631. Montgomery GI Bill—Selected Reserve Eligibility Period.

Sec. 632. Improved Disability Benefits for Certain Reserve Component Members.

Sec. 633. Acceptance of Scholarships by Officers Participating in the Funded Legal Education Program.

TITLE VII—ACQUISITION POLICY AND ACQUISITION MANAGEMENT

Subtitle A—Acquisition Policy

Sec. 701. Acquisition Milestone Changes.

Sec. 702. Clarification of Inapplicability of the Requirement for Core Logistics Capabilities Standards to the Nuclear Redundancy of an Aircraft Carrier.

Sec. 703. Depot Maintenance Utilization Waiver.

Subtitle B—Acquisition Workforce

Sec. 705. Acquisition Workforce Qualifications.

Sec. 706. Tenure Requirement for Critical Acquisition Positions.

Subtitle C—General Contracting Procedures and Limitations

Sec. 710. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 711. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 713. One-Year Extension of Commercial Items Test Program.

Sec. 714. Modification of Limitation on Retirement or Dismantlement of Strategic Nuclear Delivery Systems.

Subtitle D—Military Construction General Provisions

Sec. 715. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Military Construction and Family Housing Construction Projects.

Sec. 716. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 717. Leasebacks of Base Closure Property.

Sec. 718. Alternative Authority For Acquisition and Improvement of Military Housing.

Sec. 719. Annual Report to Congress on Design and Construction.

TITLE VIII—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

Subtitle A—Department of Defense Organizations and Positions

Sec. 801. Organizational Alignment Change for Director for Expeditionary Warfare.

Sec. 802. Consolidation of Authorities Relating to Department of Defense Regional Centers for Security Studies.

Sec. 803. Change of Name for Air Mobility Command.

Sec. 804. Transfer of Intelligence Positions in Support of the National Imagery and Mapping Agency.

Subtitle B—Reports

Sec. 811. Amendment to National Guard and Reserve Component Equipment: Annual Report to Congress.

Sec. 812. Elimination of Triennial Report on the Roles and Missions of the Armed Forces.

Sec. 813. Change in Due Date of Commercial Activities Report.

Subtitle C—Other Matters

Sec. 821. Documents, Historical Artifacts, and Obsolete or Surplus Material: Loan, Donation, or Exchange.

Sec. 822. Charter Air Transportation of Members of the Armed Forces.

TITLE IX—GENERAL PROVISIONS

Subtitle A—Matters Relating to Other Nations

Sec. 901. Test and Evaluation Initiatives.

Sec. 902. Cooperative Research and Development Projects: Allied Countries.

Sec. 903. Recognition of Assistance from Foreign Nationals.

Sec. 904. Personal Service Contracts in Foreign Areas.

Subtitle B—Department of Defense Civilian Personnel

Sec. 912. Authority for Designated Civilian Employees Abroad to Act as a Notary.

Sec. 913. Inapplicability of Requirement for Studies and Reports When All Directly Affected Department of Defense Civilian Employees Are Reassigned to Comparable Federal Positions.

Sec. 914. Preservation of Civil Service Rights for Employees of the Former Defense Mapping Agency.

Sec. 915. Financial Assistance to Certain Employees in Acquisition of Critical Skills.

Sec. 916. Pilot Program for Payment of Retraining Expenses.

Subtitle C—Other Matters

Sec. 921. Authority to Ensure Demilitarization of Significant Military Equipment Formerly Owned by the Department of Defense.

Sec. 922. Motor Vehicles: Documentary Requirements for Transportation for Military Personnel and Federal Employees on Change of Permanent Station.

Sec. 923. Department of Defense Gift Initiatives.

Sec. 924. Repeal of the Joint Requirements Oversight Council Semi-Annual Report.

Sec. 925. Access to Sensitive Unclassified Information.

Sec. 927. Repeal of Requirement For Separate Budget Request For Procurement of Reserve Equipment.

Sec. 928. Repeal of Requirement For Two-Year Budget Cycle for the Department of Defense.

TITLE I—PROCUREMENT

Authorization of Appropriations

Sec. 101. Army.
TITLE III—OPERATION AND MAINTENANCE

Subtitle A—Authorization of Appropriations

Sec. 301. Operation and Maintenance Fundings.
Sec. 302. Working Capital Funds.
Sec. 303. Armed Forces Retirement Home.
Sec. 304. Acquisition of Logistical Support for Security Forces.

Sec. 5 of the National Defense Sealift Fund and Observers Participation Resolution (Public Law 97-132; 95 Stat. 1695; 22 U.S.C. 3424) is amended by adding at the end the following new subsection:

"(d) The United States may use contractors or other means to provide logistical support to the Multinational Force and Observers under this section in lieu of providing such support through a logistical support unit comprised of members of the armed forces. Notwithstanding subsections (a) and (b) and section 7(b), support by a contractor or other means under this subsection may be provided without reimbursement, whenever the President determines that such action enhances or supports the national security interests of the United States."

Sec. 305. CONTRACT AUTHORITY FOR DEFENSE WORKING CAPITAL FUNDS.

Contract authority in the amount of $427,100,000, to remain available until September 30, 2002, is hereby authorized and appropriated to the Defense Working Capital Fund for the procurement, lease-purchase with substantial private sector risk, capital or operating multiple-year lease, of a capital equipment, multiple-year lease, of a commercial craft or vessel and associated services.

Subtitle B—Environmental Provisions

Sec. 310. Reimburse EPA for Certain Costs in Connection with Hooper Sands Site, in South Berwick, Maine.

Sec. 311. Extension of Pilot Program for the Sale of Air Pollution Emission Reduction Incentives.

Sec. 312. Elimination of Report on Contractor Reimbursement Costs.

Sec. 313. Reimburse EPA for Certain Costs in Connection with Hooper Sands Site, in South Berwick, Maine.

(a) AUTHORITY TO REIMBURSE EPA.—Using funds described in subsection (b), the Secretary of the Navy, $1,026,000 to the Hooper Sands Special Account within the Hazardous Substance Superfund established by section 9507 of the Internal Revenue Code of 1986, reimburses the Environmental Protection Agency in full for the remaining Past Response Costs incurred by the agency for actions taken pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (42 U.S.C. 9601, et seq.) at the Hooper Sands site in South Berwick, Maine, pursuant to an Interagency Agreement entered into by the Department of the Navy and the Environmental Protection Agency in January 2001.

(b) SOURCE OF FUNDS.—Any payment under subsection (a) shall be made using the amounts authorized to be appropriated by paragraph (15) of title 10, United States Code.

Sec. 311. EXTENSION OF PILOT PROGRAM FOR THE SALE OF AIR POLLUTION EMISSION REDUCTION INCENTIVES

Section 351(a) of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105-85; 111 Stat. 1629, 1692) is amended to read as follows:

"(2) The Secretary may carry out the pilot program during the period beginning on the date of enactment of this Act through September 30, 2003."
SEC. 316. REIMBURSEMENT FOR NON-COMMISSARY USE OF COMMISSARY FACILITIES.

(a) In General.—Chapter 147 of title 10, United States Code, is amended by inserting at the beginning of the chapter the following new section:

"§ 2481. Reimbursement for non-commissary use of commissary facilities.

"If a commissary facility acquired, constructed, or improved in whole or in part with commissary surcharge revenues is used for non-commissary purposes, the Secretary of the military department concerned shall reimburse the commissary surcharge revenues for the commissary's share of the depreciable value of the facility.".

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 147 is amended by inserting before the item relating to section 2482 the following new item:

"2481. Reimbursement for non-commissary use of commissary facilities."

SEC. 317. COMMISSARY CONTRACTS AND OTHER AGENCIES AND INSTRUMENTALITIES.

Section 2482(b) of title 10, United States Code, is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by inserting after paragraph (1) the following new paragraph (2):

"(2) Where the Secretary of Defense authorizes the Defense Commissary Agency to sell limited exchange merchandise as commissary store inventory under section 2486(b)(11) of this title, the Defense Commissary Agency may enter into a contract or other agreement to obtain such merchandise from the Armed Service Exchanges, provided that such merchandise shall be obtained at a price no more than the exchange retail price less the amount of commissary surcharge authorized to be collected by section 2486 of this title. If such sales provide intelligence, including countercointelligence, support to Combatant Commands, Defense Agencies and Joint Intelligence Activities, including the activities and programs included within the National Foreign Intelligence Program, the Joint Military Intelligence Program, and the Tactical Intelligence and Related Activities aggregate, the Secretary of Defense or the Secretary of the Army, as the Secretary determines, may authorize deviant from established Reserve and National Guard personnel and training procedures.

SEC. 320. REIMBURSEMENT FOR RESERVE INTELLIGENCE SUPPORT.

SEC. 329. REIMBURSEMENT FOR RESERVE INTELLIGENCE SUPPORT.

(a) Appraisements available to the Department of Defense for operations and maintenance may be used to reimburse National Guard and Reserve units or organizations for the pay, allowances, and other expenses which are incurred by National Guard and Reserve units or organizations when members of the National Guard or Reserve provide intelligence, including countercointelligence, support to Combatant Commands, Defense Agencies and Joint Intelligence Activities, including the activities and programs included within the National Foreign Intelligence Program, the Joint Military Intelligence Program, and the Tactical Intelligence and Related Activities aggregate.

(b) The authority to reimburse such agencies deviates from established Reserve and National Guard personnel and training procedures.

SEC. 321. DISPOSAL OF OBSOLETE AND EXCESS MATERIALS ACQUIRED IN THE NATIONAL DEFENSE STOCKPILE.

Subject to the conditions specified in section 10(c) of the Strategic and Critical Materials Control Act (50 U.S.C. §488–490(c)), the President may dispose of the following obsolete and excess materials contained in the National Defense Stockpile in the following quantities:

TITLE IV—MILITARY PERSONNEL AUTHORIZATIONS

Subtitle A—Active Forces

Sec. 401. End Strengths for Active Forces.

SEC. 402. END STRENGTHS FOR ACTIVE FORCES.

The Armed Forces are authorized strengths for Active Reserves of any reserve component shall be proportionately reduced by—

(1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at the end of the fiscal year; and

(2) the number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at the end of the fiscal year.

Whenever such units or such individual members are released from active duty during any fiscal year, the end strength prescribed for such fiscal year for the Selected Reserve of such reserve component shall be increased proportionately by the total authorized strengths of such units and by the total number of such individual members.

SEC. 406. END STRENGTHS FOR RESERVES ON ACTIVE DUTY IN SUPPORT OF THE RESERVE.

Within the end strength prescribed in section 411(a), the reserve components of the Armed Forces are authorized, as of September 30, 2002, the following number of Reserves to be serving on full-time active duty or, in the case of members of the National Guard, full-time National Guard duty for the purposes of organizing, administering, recruiting, instructing, or training the reserve components:

(2) The Air Force Reserve, 74,700.

(3) The Coast Guard Reserve, 8,000.

(4) The Marine Corps Reserve, 39,558.

(5) The Air National Guard of the United States, 350,000.

(6) The Army Reserve, 205,000.

(7) The Naval Reserve, 87,000.

(8) The Air Force Reserve, 67,000.

(9) The Marine Corps Reserve, 39,558.

The Reserve Components of the Army and the Air Force are authorized strengths for military technicians (dual status) as of September 30, 2002, as follows:

**TITLE V—MILITARY PERSONNEL POLICY**

Subtitle A—Officer Personnel Policy

Sec. 501. Elimination of Certain Medical and Dental Requirements for Army Early-Deployers.

Sec. 502. Medical Deferral of Mandatory Retirement or Separation.

Sec. 503. Officer in Charge; United States Navy Band.

Sec. 504. Removal of Requirement for Certification for Certain Flag Officers to Retire in Their Highest Grade.

**SEC. 501. ELIMINATION OF CERTAIN MEDICAL AND DENTAL REQUIREMENTS FOR ARMY EARLY-DEPLOYERS.**

Section 1074a of title 10, United States Code, is amended——

(1) by striking subsection (d); and

(2) by redesignating subsection (e) as subsection (d).

**SEC. 502. MEDICAL DEFERMENT OF MANDATORY RETIREMENT OR SEPARATION.**

Section 640 of title 10, United States Code, is amended——

(1) by inserting “(a)” at the beginning of the paragraph;

(2) by striking “cannot” and inserting “may not”; and

(3) by adding at the end the following new subparagraph (b):

“(b) An officer whose mandatory retirement or separation under this chapter or chapter 63 of this title is subject to deferral under this section, may be extended for a period not to exceed 30 days following completion of the evaluation requiring hospitalization or medical observation.”.

**SEC. 503. OFFICER IN CHARGE; UNITED STATES NAVY BAND.**

(a) DETAIL AND GRADE.—Chapter 565 of title 10, United States Code, is amended by inserting after section 6221 the following new section:

<table>

</tbody>
</table>

**SEC. 504. REMOVAL OF REQUIREMENT FOR CERTIFICATION FOR CERTAIN FLAG OFFICERS TO RETIRE IN THEIR HIGHEST GRADE.**

Section 1370a(a)(1) of title 10, United States Code, is amended——

(1) by striking “certifies in writing to the President and Congress” and inserting “determines in writing”; and

(2) by adding at the end of the paragraph the following new sentence:

“The Secretary of Defense shall issue regulations to implement this paragraph.”

**SEC. 505. THREE-YEAR EXTENSION OF CERTAIN FORCE DRAWDOWN TRANSITION AUTHORITIES RELATING TO PERSONNEL MANAGEMENT AND BENEFITS.**

(a) EXTENSION OF EARLY RETIREMENT AUTHORITY FOR ACTIVE DUTY MEMBERS.—Section 4403(l) of the National Defense Authorization Act for Fiscal Year 1993 (10 U.S.C. 1290 note) is amended by striking “October 1, 2001” and inserting “October 1, 2004”.

(b) EXTENSION OF AUTHORITY FOR SPECIAL SEPARATION BENEFIT AND VOLUNTARY EARLY RETIREMENT.—Section 1174a(h)(1) of title 10, United States Code, is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(c) EXTENSION OF AUTHORITY FOR SELECTIVE EARLY RETIREMENT BOARDS.—Section 63 8a(a) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(d) TIMING IN-GRADE REQUIREMENT FOR RETENTION OF GRADE UPON VOLUNTARY RETIREMENT.—(1) Section 1370a(a)(2)(A)(i) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(2) Section 1370(a)(5) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(e) MINIMUM COMMISSIONED SERVICE FOR VOLUNTARY RETIREMENT AS AN OFFICER.—(1) Section 3901(b) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(2) NAVY.—Section 6323(a)(2) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(3) AIR FORCE.—Section 8911(b) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(4) TRAVEL, TRANSPORTATION, AND STORAGE BENEFITS.—(1) Section 406(c)(1)(C) of title 37, United States Code, is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(2) Section 406(b)(2)(B)(v) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(3) Section 406(a)(2)(B)(v) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

(4) Section 406(c)(1) of such title is amended by striking “December 31, 2001” and inserting “September 30, 2004”.

**CONGRESSIONAL RECORD—SENATE**

June 29, 2001
SEC. 506. REVIEW OF ACTIONS OF SELECTION BOARD.—(a) IN GENERAL.—Chapter 79 of title 10, United States Code, is amended by adding at the end of the chapter the following new sections:—

*(g) EXISTING JURISDICTION.—(1) Nothing in this section limits the jurisdiction of any court of the United States under any provision of law to determine the validity of any statute, regulation, or policy relating to selection boards, except that, in the event that any such statute, regulation, or policy is held invalid, the remedies prescribed in this section shall be the sole and exclusive remedies available to any person challenging the constitutionality of a special board on the basis of the invalidity.

*(h) TIMELINESS OF ACTION.—(1) For the purposes of subsection (e)—

*(j) REGULATIONS.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(k) CONTINUED ENROLLMENT OF DEPENDENTS.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(l) TRANSITIONAL COMMISSARY AND EXCHANGE BENEFITS.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(m) TEMPORARY SPECIAL AUTHORITY FOR FORCE REDUCTION PERIOD RETIREMENTS.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(n) RETIRED PAY FOR NON-REGULAR SERVICE.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(o) AFFILIATION WITH GUARD AND RESERVE UNITS.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(p) RESERVE MONTGOMERY GI BILL.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(q) AUTHORIZATION ACT FOR FISCAL YEAR 1993.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(r) RECOVERY OF BENEFITS.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(s) WORKER-ARMED FORCES PROGRAM.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(t) COMPENSATION, PAY, AND ALLOWANCES.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(u) SELECTING FOR MODERATE DUTY.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(v) MODERATE DUTY.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(w) MODERATE DUTY.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(x) MODERATE DUTY.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(y) MODERATE DUTY.—(1) The Secretary concerned may prescribe regulations to carry out this section.

*(z) MODERATE DUTY.—(1) The Secretary concerned may prescribe regulations to carry out this section.
board nor denied consideration by a special board, the Secretary shall be deemed to have been denied such consideration.

“(B) If, not later than one year after the convening of a special board, the Secretary concerned shall not have taken final action on the report of such board, the Secretary shall be deemed to have denied relief to the person applying for consideration by the board.

“(2) Under regulations prescribed in accordance with subsection (d), the Secretary concerned may delegate an individual application from the time limits prescribed in this subsection if the Secretary determines that the application warrants a longer period of consideration.

“A military department under this paragraph may not be delegated.

“(c) does not include a promotion special selection board convened under section 628 or 14052 of this title.

“(2) The term ‘selection board’—

“(A) means a selection board convened under any authority to consider any claim based to any extent on the records of that person for consideration by a previously convened selection board which considered or should have considered that person:

“(B) includes a board for the correction of military or naval records convened under section 1552 of this title, if designated as a special board by the Secretary concerned; and

“(C) does not include a promotion special selection board convened under section 628 or 14052 of this title.

“(3) The term ‘selection board’—

“(A) means a selection board convened under section 573(c), 580, 580a, 581, 611(b), 637, 638, 638a, 14101(b), 14701, 14704, or 14705 of this title, and any other board convened by the Secretary concerned under any authority to recommend persons for appointment, enlistment, reenlistment, assignment, promotion, retention, separation, re- tirement, or transfer to inactive status in a reserve component of the armed forces for the purpose of reducing the number of persons serving in the armed forces; and

“(B) does not include—

“(i) a special selection board convened under section 573(f), 611(a), or 14101(a) of this title;

“(ii) a special selection board convened under section 628 of such title;

“(iii) a special selection board convened under section 573(f), 611(a), or 14101(a) of this title;

“(iv) a board for the correction of military records convened under section 1552 of this title.

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 1407 of title 10 is amended—

“(1) in paragraph (1), by striking ‘and apply for transfer’ and inserting ‘has re- quested not to be transferred to the Retired Reserve’ before the semicolon; and

“(2) in paragraph (2), by striking ‘and applies’ and inserting ‘unless the officer re- quests not to be transferred to the Retired Reserve’ after ‘is not qualified or’.

Title 10 is amended—

“(2) The table of sections at the beginning of chapter 1407 of such title 10 is amended by striking the item relating to section 14513 and inserting the following new item:

“14513. Separation or retirement for failure of selection for promotion.’.

(c) RETIREMENT FOR YEARS OF SERVICE OR AFTER SELECTION FOR EARLY REMOVAL.—Sec- tion 14514 of such title 10 is amended—

“(1) in paragraph (1), by striking ‘and applies’ and inserting ‘unless the officer re- quests not to be transferred to the Retired Reserve’ before the semicolon; and

“(2) in paragraph (2), by striking ‘and applies’ and inserting ‘unless the officer re- quests not to be transferred to the Retired Reserve’ after ‘is not qualified or’,

“d) RETIREMENT FOR AGE.—Section 14515 of such title 10 is amended—

“(1) in paragraph (1), by striking ‘and applies’ and inserting ‘unless the officer re- quests not to be transferred to the Retired Reserve’ before the semicolon; and

“(2) in paragraph (2), by striking ‘does not apply for such transfer’ and inserting ‘has requested not to be transferred to the Re- tired Reserve’ after ‘is not qualified or’.

“e) DISCHARGE OR RETIREMENT OF WARRANT OFFICERS FOR YEARS OF SERVICE OR AGE.—(1) Chapter 1207 of such title 10 is amended by adding at the end the following new section:

“12244. Warrant officers: discharge or retire- ment for years of service or for age.

‘Each warrant officer of the Army, Navy, Air Force, or Marine Corps who is in an active status and has reached the max- imum years of service or age prescribed by the Secretary concerned shall—

“(1) be transferred to the Retired Reserve, if the warrant officer is so qualified for such transfer, unless the warrant officer requests not to be transferred to the Retired Reserve; or
"(2) if the warrant officer is not qualified for such transfer or requests not to be transferred to the Retired Reserve, be discharged.".

(2) The table of sections at the beginning of such title 10 of such United States Code is amended by adding at the end the following new item: "12244. Warrant officers: discharge or retirement for years of service or for age.".

(D) DISCHARGE, OR RETIREMENT OF ENLISTED MEMBERS FOR YEARS OF SERVICE OR AGE.—(1) Chapter 121 of title 10 of such United States Code is amended by adding, at the end of the following new section:

12108. Enlisted members: discharge or retirement for years of service or for age.

Each reserve enlisted member of the Army, Navy, Air Force, or Marine Corps who is in an active status and has reached the maximum years of service or age prescribed by the Secretary concerned shall—

(2) by transferring to the Retired Reserve, if the member is so qualified for such transfer, unless the member requests not to be transferred to the Retired Reserve; or

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item: "12108. Enlisted members: discharge or retirement for years of service or for age.".

SEC. 512. AMENDMENT TO RESERVE PERSTEMPO DUTY STATUS.

Section 101(b) of title 10, United States Code, is amended—

(1) in paragraph (1), by inserting "active" before "service" and adding at the end the following new sentence:

"For the purpose of this definition, the housing in which a member of a reserve component resides is either the housing the member normally occupies when on garrison duty or the member's permanent civilian residence.";

(2) by striking paragraph (2);

(3) by redesignating paragraphs (3) and (4) as paragraphs (2) and (3) respectively; and

(4) in paragraph (3) (as redesignated, by striking subparagraph (A) and (B)."

SEC. 513. INDIVIDUAL READY RESERVE PHYSICAL EXAMINATION REQUIREMENT.

Section 101(b) of title 10, United States Code, is amended—

(1) in subsection (a), by striking "Ready Reserve" and inserting "Selected Reserve";

(2) by designating subsection (b) as subsection (c); and

(3) by inserting after subsection (a) the following new subsection:

(b) As determined by the Secretary concerned, each member of the Individual Ready Reserve or Inactive National Guard shall be provided a physical examination, if required—

(1) to determine the member's fitness for military duty; or

(2) for promotion, attendance at a military school or other career progression requirements.".

SEC. 514. BENEFITS AND PROTECTIONS FOR MEMBERS IN FLIGHT CREW DUTY STATUS.

(a) PERSONS SUBJECT TO THE UNIFORMED CODE OF MILITARY JUSTICE.—Section 602 of title 10, United States Code, is amended—

(1) in subsection (a)(3), by inserting "or in a funeral honors duty status" after "in inactive-duty training"; and

(2) in subsection (b)(2), by inserting "or in a funeral honors duty status" after "in inactive-duty training".

(b) BENEFITS FOR DEPENDENTS OF A DECEASED RESERVE COMPONENT MEMBER.—Section 1061 of such title 10 is amended—

(1) in subsection (b)(1), by striking "or" the first time it appears and inserting "or funeral honors duty" before the semicolon; and

(2) in subsection (b)(2), by striking "or" the first time it appears and inserting "or funeral honors duty" before the period.

(c) PAYMENT OF A DEATH GRATUITY.—(1) Section 175(a) of such title 10 is amended—

(A) by redesigning paragraphs (3), (4) and (5) as paragraphs (4), (5) and (6), respectively;

(B) by inserting after paragraph (2) the following new paragraph:

(3) a Reserve of an armed force who dies while performing funeral honors duty; and

(C) in paragraph (4) (as redesignated in subsection (c)(1))—

(i) striking "or" both time it appears;

(ii) inserting "or funeral honors duty" after "Public Health Service";

(iii) inserting a comma before and after "inactive duty training" the second time it appears in the paragraph; and

(iv) inserting "or funeral honors duty" before the semicolon.

(2) Section 176(a) of such title 10 is amended—

(A) in paragraph (1)(A), by striking "or";

(B) in paragraph (1)(B), by striking the period and inserting "; or;

(C) by adding at the end of paragraph (1) the following new subparagraph:

"(C) funeral honors duty; and"

(D) in paragraph (2)(A), by striking "or" the first time it appears and inserting "or funeral honors duty" after "inactive-duty training".

(d) MILITARY AUTHORITY FOR MEMBERS OF THE COAST GUARD RESERVE.—Section 104 of title 10, United States Code, is amended by—

(1) striking "or" the first time it appears in the second sentence; and

(2) inserting "; or", and funeral honors duty after "inactive-duty training".

(e) BENEFITS FOR MEMBERS OF THE COAST GUARD RESERVE.—Section 704 of such title 10, United States Code, is amended by—

(1) striking "or" the first time it appears and inserting "or funeral honors duty" after "inactive-duty training".

(2) by redesigning paragraphs (3), (4) and (5) as paragraphs (2) and (3) respectively; and

(3) by inserting in "paragraph (1)"—

(1) the first time it appears and inserting "; or" after "inactive-duty training".

SEC. 515. FUNERAL HONORS DUTY PERFORMED BY MEMBERS OF THE NATIONAL GUARD.

(a) DEFENSE.—Section 1491(b) of title 10, United States Code, is amended in subsection (b) in support of a contingency operation as defined in section 12301(d) of this title in support of a contingency operation as defined in section 101(a)(13) of this title.

(b) INCREASE IN AUTHORIZED DAILY AVERAGE.—Section 12301(d) of this title in support of a contingency operation as defined in section 101(a)(13) of this title.

(c) INCREASE IN AUTHORIZED DAILY AVERAGE FOR COMMISSIONED OFFICERS IN PAY GRADES O-4, O-5 AND O-6 ON ACTIVE DUTY UNDER CERTAIN CIRCUMSTANCES.—Section 520 of title 10, United States Code, is amended—

(1) in paragraphs (a)(1) and (a)(2), by striking "subsection (c)" and inserting subsections (c) and (d)"; and

(2) by adding at the end the following new subsection:

"(e) The Secretary of Defense may increase the authorized daily average number of commissioned officers on active duty in an armed force in pay grades O-4, O-5 and O-6 on active duty under certain circumstances.

(1) the Secretary of Defense may increase the authorized number of commissioned officers on active duty in an armed force in pay grades O-4, O-5 and O-6 on active duty under certain circumstances.

(3) the following "limitation"—

(3) redesignating paragraphs (1), (2) and (4) as subparagraphs (A), (B), (C) and (D) respectively; and

(4) inserting after subparagraph (D) as redesignated by section (a)(3) the following new paragraph:

(3) A member of the Army National Guard of the United States who serves as a member of a funeral honors detail in a duty status authorized under state law shall be considered to be a member of the armed forces for the purpose of fulfilling the two member funeral honors detail requirement in paragraph (2)."

SEC. 516. STRENGTH AND GRADE CEILING ACCOUNTING FOR RESERVE COMPONENT MEMBERS ON ACTIVE DUTY IN SUPPORT OF A CONTINGENCY OPERATION.

(a) ACTIVE DUTY STRENGTH ACCOUNTING.—Section 115(c) of title 10, United States Code is amended—

(1) in subparagraph (1), by striking "and" at the end of the subparagraph; and

(2) in subparagraph (2), by striking the period and adding "; and" at the end of the sub-paragraph; and

(3) by adding the following new subparagraph:

"(3) increase the end strength authorized pursuant to subsection (a)(1)(A) for a fiscal year for any of the armed forces by a number equal to the number of members of the reserve components on active duty under section 12301(d) of this title in support of a contingency operation as defined in section 101(a)(13) of this title.

(b) INCREASE IN AUTHORIZED DAILY AVERAGE.—Section 12301(d) of this title in support of a contingency operation as defined in section 101(a)(13) of this title.

(c) INCREASE IN AUTHORIZED DAILY AVERAGE FOR COMMISSIONED OFFICERS IN PAY GRADES O-4, O-5 AND O-6 ON ACTIVE DUTY UNDER CERTAIN CIRCUMSTANCES.—Section 520 of such title 10 is amended—

(1) in paragraphs (a)(1) and (a)(2), by striking "subsection (c)" and inserting subsections (c) and (d)"; and

(2) by adding at the end the following new subsection:

"(e) The Secretary of Defense may increase the authorized total number of commissioned officers serving on active duty at the end of any fiscal year pursuant to subsection (a) by the number of commissioned officers of a reserve component of the Army, Navy, Air Force, or Marine Corps on active duty under section 12301(d) of this title in support of a contingency operation as defined in section 101(a)(13) of this title.

(d) INCREASE, IN AUTHORIZED STRENGTHS FOR GENERAL AND FLAG OFFICERS ON ACTIVE DUTY UNDER CERTAIN CIRCUMSTANCES.—Section 530 of such title 10 is amended—

(1) in paragraphs (a)(1) and (a)(2), by striking "subsection (c)" and inserting subsections (c) and (d)"; and

(2) by adding at the end the following new subsection:

"(e) The Secretary of Defense may increase the authorized total number of commissioned officers serving on active duty at the end of any fiscal year pursuant to subsection (a) by the number of commissioned officers of a reserve component of the Army, Navy, Air Force, or Marine Corps on active duty under section 12301(d) of this title in support of a contingency operation as defined in section 101(a)(13) of this title.

"(2) by inserting "(e) Except as provided in paragraph (2), the following "Limitations"—

(3) redesignating paragraphs (1), (2) and (4) as subparagraphs (A), (B), (C) and (D) respectively; and

(4) inserting after subparagraph (D) as redesignated by section (d)(3) the following new paragraph:

(3) A member of the Army National Guard of the United States who serves as a member of a funeral honors detail in a duty status authorized under state law shall be considered to be a member of the armed forces for the purpose of fulfilling the two member funeral honors detail requirement in paragraph (2)."

CONGRESSIONAL RECORD—SENATE

June 29, 2001

12513
SECTION 517. RESERVE HEALTH PROFESSIONALS STUDENT TRAINING PROGRAM EXPANDED.—(a) PURPOSE OF PROGRAM.—Section 16201(a) of title 10, United States Code, is amended to read as follows:

"(a) Purpose of Program.—For the purpose of obtaining adequate numbers of commissioned officers in the reserve component who are qualified in health professions, the Secretary of each military department may establish and maintain a program to provide financial assistance under this chapter to persons engaged in training that leads to a degree or certificate in medical or dental hygiene and to a health professions specialty critically needed in wartime. Under such a program, the Secretary concerned may agree to pay a financial stipend to persons engaged in health care education and training in return for a commitment to subsequent service in the Ready Reserve.

(b) MEDICAL AND DENTAL STUDENT STIPEND.—Section 16201 of such title 10 is amended by—

(1) redesignating subsections (b), (c), (d) and (e) (as redesignated by section (b));

(2) inserting the following new subsection:

"(b) MEDICAL AND DENTAL SCHOOL STUDENTS.—(1) Under the stipend program under this chapter, the Secretary of the military department concerned may enter into an agreement with a person who—

(A) is eligible to be appointed as an officer in a Reserve component;

(B) is enrolled or has been accepted for enrollment in an institution in a course of study that results in a degree in medicine or dentistry;

(C) signs an agreement that, unless sooner separated, the person will—

(i) complete the educational phase of the program;

(ii) accept a reappointment or redesignation within his reserve component, if tenured, based upon his health profession, following satisfactory completion of the educational and intern programs; and

(iii) participate in a residency program; and

(D) if required by regulations prescribed by the Secretary of Defense, agrees to apply for, if eligible, and accept, if offered, residency training in a health profession skill which has been designated by the Secretary of Defense as a critically needed wartime skill.

(2) Under the agreement—

(A) the Secretary of the military department concerned shall agree to pay the participant a stipend, in the amount determined under subsection (f), for the period or the remainder of the period the student is satisfactorily progressing toward a degree in medicine or dentistry while enrolled in an accredited medical or dental school;

(B) the participant shall not be eligible to receive such stipend before appointment, designation, or assignment as an officer for service in the Ready Reserve;

(C) the participant shall be subject to such active duty as may be specified in the agreement and to active duty in time of war or national emergency as provided by law for members of the Ready Reserve; and

(D) the participant shall agree to serve, upon successful completion of the program, one year in the Selected Reserve for each six months, or part thereof, for which the stipend was paid while enrolled in medical or dental school.

"(c) WARTIME CRITICAL SKILLS.—Section 16201(c), (as redesignated by section (b)), is amended—

(1) by inserting "WARTIME" following "CRITICAL" in the heading; and

(2) in paragraph (a), by inserting "or has been appointed as a medical or dental officer in the Reserve of the armed force concerned" before the semicolon at the end of the paragraph.

(d) SERVICE OBLIGATION REQUIREMENT.—Subparagraph (2)(D) of subsection (c), as redesignated by section (b), and subparagraph (2)(D) of subsection (d), as redesignated by section (b), are amended by striking "two years in the Ready Reserve for each year," and inserting "three years in the Ready Reserve for each six months."

(e) CLERICAL AMENDMENTS.—Subparagraphs (2)(A), (2)(B), (2)(C), (2)(D), (as redesignated by section (b)), are amended by striking "subsection (e)" and inserting "subsection (f)

SECTION 518. RESTRICTION ON ACTIVE DUTY FOR A PERIOD OF THREE YEARS OR LESS.—(a) CLARIFICATION OF EXEMPTION.—Section 614(d)(1) of title 10, United States Code, is amended to read as follows:

"(D) on active duty under section 12002(d) of this title, provided that such active duty does not exceed a period of three years or less and continued placement on the reserve active-status list under section 641(1)(D), as amended by section 1251 or sections 632–637 of title 10, as amended by section 1231 of the National Defense Authorization Act for Fiscal Year 1999 (Public Law 105–261; 112 Stat. 2020, 2008) is amended to read as follows:

"(1) in subsection (a), by striking "(a) Waiver Authority for Army OCS Graduates..." and inserting "(a) Waiver Authority for Army OCS Graduates—The Secretary of the Army may authorize for one person per year, or part thereof, for which the stipend was paid while enrolled in medical or dental school, to perform critical wartime functions..."

"(b) in subsection (b), by striking "2000" and inserting "2003".

SEC. 519. ACTIVE DUTY END STRENGTH EXEMPTION.—This act shall become effective on the date of enactment of this Act, provided they other- wise meet the conditions specified in section 614(d)(1) as amended by this Act.

SEC. 520. CLARIFICATION OF FUNCTIONS THAT MAY BE ASSIGNED TO ACTIVE GUARD AND RESERVE PERSONNEL ON FULL-TIME NATIONAL GUARD DUTY UNDER SECTION 502(f) OF TITLE 32 IN CONNECTION WITH FUNCTIONS REFERRED TO IN SUBSECTION (A), AFTER "ON ACTIVE DUTY AS DESCRIBED IN SUBSECTION (A)":

"(c) Duty of the President to Provide a Degree of Master of Strategic Studies...";

"(b) Regulation.—The Secretary of the Navy shall promulgate regulations under which the Director of the faculty of the Marine Corps War College of the Marine Corps University may confer the degree of master of strategic studies upon graduates of the college who fulfill the requirements for the degree.

"(a) Authority for the Marine Corps University to Award the Degree of Master of Strategic Studies.—

"(1) AUTHORITY TO CONFER DEGREE.—Upon the recommendation of the Director and faculty of the Marine Corps War College of the Marine Corps University, the President of the Marine Corps University may confer the degree of master of strategic studies upon graduates of the college who fulfill the requirements for the degree.

"(b) Regulation.—The Secretary of the Navy shall promulgate regulations under which the Director of the faculty of the Marine Corps War College of the Marine Corps University shall administer the authority in subsection (a).

"(c) Effective Date.—The authority to award degrees by subsection (a) shall become effective on the date on which the Secretary of Education determines that the requirements established by the Marine Corps War College of the Marine Corps University for the degree of master of strategic studies are in accordance with generally applicable requirements for a degree of master of arts.
SEC. 532. RESERVE COMPONENT DISTRIBUTED LEARNING.

(a) COMPENSATION FOR DISTRIBUTED LEARNING.—Section 206(d) of title 37, United States Code, is amended to read as follows:

"(d) A Reserve Component may be paid compensation under this section for the successful completion of courses of instruction undertaken by electronic, paper-based, or other distributed learning. Distributed learning is structured learning that takes place without requiring the physical presence of an instructor. To be compensable, the course must be required by law, Department of Defense policy, or service regulation and may be accomplished either independently or as part of a group."

(b) DEFINITION OF INACTIVE-DUTY TRAINING.—Section 101(22) of title 37, United States Code, is amended by striking "", but does not include work or study in connection with a correspondence course of a uniformed service"".

SEC. 533. REPEAL OF LIMITATION ON NUMBER OF LEADERSHIP RESERVE OFFICERS' TRAINING CORPS (JROTC) UNITS.

Section 2631(a)(1) of title 10, United States Code, is amended by striking the second sentence.

SEC. 534. MODIFICATION OF THE NURSE OFFICER CANDIDATE ACCESION PROGRAM REQUIRING ENROLLMENT ON STUDENTS CONTENDING CIVILIAN EDUCATIONAL INSTITUTIONS WITH SENIOR RESERVE OFFICERS' TRAINING PROGRAMS.

Section 2130a of title 10, United States Code, is amended—

(1) in paragraph (a)(2), by striking "that does not have a Senior Reserve Officers' Training Program established under section 2102 of this title," and

(2) by adding at the end "or that has a Senior Reserve Officers' Training Program for which the student is ineligible.".

SEC. 535. DEFENSE LANGUAGE INSTITUTE FOREIGN LANGUAGE CENTER.

(a) Subject to subsection (b), the Commandant of the Defense Language Institute Foreign Language Center may confer an Associate of Arts degree in Foreign Language upon graduates of the Institute who fulfill the requirements for the degree.

(b) The degree may be conferred upon any student under this section unless the Proctor certifies to the Commandant of the Institute that the student has satisfied all the requirements prescribed for such degree.

(c) The authority provided by subsection (a) shall be exercised under regulations prescribed by the Secretary of Defense.

Subtitle D—Decorations, Awards, and Commendations

Sec. 541. Authority for Award of the Medal of Honor to Humbert R. Versace for Valor During the Vietnam War.

Sec. 542. Issuance of Duplicate Medal of Honor.

Sec. 543. Repeal of Limitation on Award of Bronze Star to Members in Receipt of Special Pay.

SEC. 541. AUTHORITY FOR AWARD OF THE MEDAL OF HONOR TO HUMBERT R. VERSACE FOR VALOR DURING THE VIETNAM WAR.

(a) WAIVER OF TIME LIMITATIONS.—Notwithstanding the time limitations specified in section 3744 of title 10, United States Code, or any other time limitation with respect to the awarding of certain medals to persons serving in the military service, the President may award the Medal of Honor under section 3741 of that title to Humbert R. Versace for the acts of valor referred to in subsection (b).

(b) ACTION DESCRIBED.—The acts of valor referred to in subsection (a) are the actions of Humbert R. Versace between October 29, 1963, and September 29, 1965, while interned as a prisoner of war by the Communist National Liberation Front (Viet Cong) in the Republic of Vietnam.

SEC. 542. ISSUANCE OF DUPLICATE MEDAL OF HONOR.

(a) Section 3747 of title 10, United States Code, is amended—

(1) in the section heading, by adding at the end "issues of duplicate medal of honor;"

(2) by striking "Any medal of honor" and inserting "(a) REPLACEMENT OF MEDALS.—Any medal of honor;"

(3) by inserting "stolen," before "lost or destroyed," and

(4) by adding at the end the following new subsection:

"(b) ISSUANCE OF DUPLICATE MEDAL OF HONOR.—Upon written application by a person to whom a medal of honor has been awarded under this chapter, the Army may issue such person, without charge, one duplicate medal of honor, with ribbons and appurtenances. Such duplicate shall be marked, in a manner the Secretary may determine, as a duplicate or for display purposes only. The issuance of a duplicate medal of honor under the authority of this subsection shall not constitute the award of more than one medal of honor with the meaning of section 3744(a) of this title.".

(b) Section 6233 of such title is amended—

(1) in the section heading, by adding at the end "issues of duplicate medal of honor;"

(2) by striking "The Secretary of the Navy may replace" and inserting "(a) REPLACEMENT OF MEDALS.—The Secretary of the Navy may replace;"

(3) by inserting "stolen," before "lost or destroyed," and

(4) by adding at the end the following new subsection:

"(b) ISSUANCE OF DUPLICATE MEDAL OF HONOR.—Upon written application by a person to whom a medal of honor has been awarded under this chapter, the Secretary of the Navy may issue such person, without charge, one duplicate medal of honor, with ribbons and appurtenances. Such duplicate shall be marked, in a manner the Secretary may determine, as a duplicate or for display purposes only. The issuance of a duplicate medal of honor under the authority of this subsection shall not constitute the award of more than one medal of honor with the meaning of section 3744(a) of this title.".

(c) Section 6247 of such title is amended—

(1) in the section heading, by adding at the end "issues of duplicate medal of honor;"

(2) by striking "Any medal of honor" and inserting "(a) REPLACEMENT OF MEDALS.—Any medal of honor;"

(3) by inserting "stolen," before "lost or destroyed," and

(4) by adding at the end the following new subsection:

"(b) ISSUANCE OF DUPLICATE MEDAL OF HONOR.—Upon written application by a person to whom a medal of honor has been awarded under this chapter, the Secretary of the Army may issue such person, without charge, one duplicate medal of honor, with ribbons and appurtenances. Such duplicate shall be marked, in a manner the Secretary may determine, as a duplicate or for display purposes only. The issuance of a duplicate medal of honor under the authority of this subsection shall not constitute the award of more than one medal of honor with the meaning of section 3744(a) of this title.".

(d) EFFICACY DATE.—The amendments made by subsection (a) shall take effect on the date of the enactment of this Act and shall apply to offenses committed on or after that date.

SEC. 543. REPEAL OF LIMITATION ON AWARD OF BRONZE STAR TO MEMBERS IN RECEIPT OF SPECIAL PAY.

Section 1123 of title 10, United States Code, is repealed.

Subtitle E—Uniform Code of Military Justice

Sec. 551. Revision of Punitive UCMJ Article Regarding Drunken Operation of Vehicle, Aircraft, or Vessel.

Sec. 551. Revision of Punitive UCMJ Article Regarding Drunken Operation of Vehicle, Aircraft, or Vessel.

(a) STANDARD FOR DRUNKEN OPERATION OF VEHICLE, AIRCRAFT, OR VESSEL.—Paragraph (2) of section 911 of title 10, United States Code (article III of the Uniform Code of Military Justice), is amended by striking "0.10 grams or more of alcohol" and inserting "0.08 grams or more of alcohol" both places such term appears.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect on the date of the enactment of this Act and shall apply to offenses committed on or after that date.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

Subtitle A—Pay and Allowances

Sec. 601. Increase in Basic Pay for Fiscal Year 2002.

Sec. 603. Funeral Honors Duty, Allowance for Retirees.

Sec. 604. Basic Pay Rate for Certain Reserve Commissioned Officers with Prior Service as an Enlisted Member or Warrant Officer.

Sec. 605. Family Separation Allowance.

Sec. 606. Housing Allowance for the Chaplain for the Corps of Cadets, United States Military Academy.

Sec. 607. Clarify Amendment that Space-Required Travel for Annual Training Reserve Duty Does Not Obviate Transportation Allowances.

Sec. 601. INCREASE IN BASIC PAY FOR FISCAL YEAR 2002.

(a) WAIVER OF SECTION 1009 ADJUSTMENT.—The adjustment to become effective during fiscal year 2002 required by section 1009 of title 37, United States Code, in the rates of monthly basic pay authorized members of the uniformed services shall not be made.
SEC. 602. PARTIAL DISLOCATION ALLOWANCE AUTHORIZED UNDER CERTAIN CIRCUMSTANCES.

(a) Authorization of Partial Dislocation Allowance.—Section 407 of title 37, United States Code is amended—

(1) by redesignating subsections (c) through (g) as subsections (d) through (h), respectively;

(2) in subsections (a)(1) and (b)(1), by striking “subsection (c)” and inserting “subsection (d)”;

(3) by inserting after subsection (b) the following new subsection:

“(c) Partial Dislocation Allowance.—(1) Under regulations prescribed by the Secretary concerned, a member ordered to occupy or to vacate Government family housing for the convenience of the Government (including pursuant to the privatization or renovation of housing), and not pursuant to a permanent change of station, may be paid a partial dislocation allowance of $500.

“(2) Effective on the same date that the monthly rates of basic pay for members are increased for a subsequent calendar year, the Secretary of Defense shall adjust the rate for the partial dislocation allowance for that calendar year by the percentage equal to the percentage increase in the rate of basic pay for that calendar year.

“(3) Payments made under this subsection are not subject to the fiscal year limitations in subsection (e); and

“(4) in subsection (d)(1) as redesignated by paragraph (1) by striking at the beginning “The amount” and inserting “Except as provided in subsection (c), the amount”;

(b) Effective Date.—The amendments made by this section shall take effect on October 1, 2001.

SEC. 603. FUNERAL HONORS DUTY ALLOWANCE FOR RETIREES.

Section 435 of title 37, United States Code, is amended—

(1) in subsection (a), by inserting before the period at the end “or a retired member of the armed forces who performs at least two hours of duty preparing for or performing honors at the funeral of a veteran”;

(2) by adding at the end the following new section:

“(d) Concurrent Payment.—Notwithstanding any other provision of law, the allowance paid to a retired member of the armed forces under subsection (a) shall be in
addition to any other compensation authorized under title 37, and title 38 to which the retired member may be entitled.

SEC. 604. BASIC PAY RATE FOR CERTAIN RESERVE COMMISSIONED OFFICERS WITH EIGHT YEARS' SERVICE AND MEDICALLY ENLISTED MEMBER OR WARRANT OFFICER.

Section 323 of title 37, United States Code, is amended by inserting ‘‘or who earns a total of more than 1,460 points credited under section 12738(a)(2) of title 10 while serving as a warrant officer or as a warrant officer on active duty under this chapter following ‘or as a warrant officer and enlisted member’’.

SEC. 605. FAMILY SEPARATION ALLOWANCE.

Section 427(c) of title 37, United States Code, is amended by striking the first sentence to read as follows:

“(a) A member who elects to serve an unaccompanied tour of duty because dependent movement to the permanent station is denied for certified medical reasons is entitled to an allowance under subsection (a)(1)(A).

(b) A member who elects to serve a tour under subsection (a) following ‘‘or as a warrant officer and enlisted member’’.

SEC. 606. HOUSING ALLOWANCE FOR THE CHAPLAIN FOR THE CORPS OF CADETS, UNITED STATES MILITARY ACADEMY.

Section 4337 of title 10, United States Code, is amended by striking the second sentence and inserting ‘‘Notwithstanding any other provision of law, the chaplain is entitled to the same basic allowance for housing allowed to an officer colonel, and to fuel and light for quarters in kind.’’

SEC. 607. CLARIFYING AMENDMENT THAT SPACE-REQUIRED TRAVEL FOR ANNUAL TRAINING RESERVE DUTY DOES NOT OBLIGATE TRANSPORTATION ALLOWANCES.

Section 4233 of title 10, United States Code, is amended by striking ‘‘annual training duty or’’ each time such term appears.

Subtitle B—Bonuses and Special and Incentive Pays

Sec. 611. Authorize the Secretary of the Navy to Prescribe Submarine Duty Incentive Pay Rates.

Sec. 612. Extension of Authorities Relating to Payment of Other Bonuses and Special Pays.

Sec. 613. Extension of Certain Bonuses and Special Pay Authorities for Nurse Officer Candidates, Registered Nurses, Nurse Anesthetists, and Dental Officers.

Sec. 614. Extension of Authorities Relating to Nuclear Officer Special Pay.

Sec. 615. Extension of Special and Incentive Pays.

Sec. 616. Accession Bonus for Officers in Critical Skills.

Sec. 617. Critical Skills Training Requirement for Eligibility for the Individual Ready Reserve Bonus.

Sec. 618. Hazardous Duty Incentive Pay: Navy and Special and Incentive Pay: Naval Special Warfare.

Sec. 611. AUTHORIZE THE SECRETARY OF THE NAVY TO PRESCRIBE SUBMARINE DUTY INCENTIVE PAY RATES.

(a) In General.—Section 301(c) of title 37, United States Code, is amended by striking subsection (b) and inserting the following:

(b) A member who meets the requirements prescribed by the Secretary of the Navy, but not more than $1,000 per month, may be entitled to an amount prescribed by the Secretary of the Navy, but not more than $1,000 per month, by striking ‘‘or as a warrant officer and enlisted member’’.
SEC. 622. PAYMENT OF VEHICLE STORAGE COSTS IN ADVANCE.

Section 238(h)(1) of title 10, United States Code, is amended—

(1) by striking ''a combat or combat support skill of''; and

(2) by inserting —

(A) the surviving spouse (including a remarried surviving spouse) of the deceased member; and

(B) by adding at the end following new paragraph:

(3) If a deceased member is interred in a common grave in a national cemetery, the parents (as defined in section 401(a)(2)) of the deceased member; and

(C) if no person described in subparagraph (A) is paid travel and transportation allowances under this section, then—

(i) if otherwise authorized under applicable regulations; or

(ii) if otherwise authorized under applicable regulations.

SEC. 623. TRAVEL AND TRANSPORTATION ALLOWANCES FOR FAMILY MEMBERS TO ATTEND THE BURIAL OF A DECEASED MEMBER OF THE ARMED FORCES.

(a) CONSOLIDATION OF AUTHORITIES.—Section 411f of title 37, United States Code, is amended—

(1) in subsection (a)—

(A) by inserting —

(1) because of—

(i) age;

(ii) physical condition; or

(iii) other justifiable reason, as determined under uniform regulations prescribed by the Secretary concerned, as defined in section 1076(a)(2)(C) of such title 10, or if otherwise authorized under applicable regulations;

(2) if a dependent of a deceased member who is authorized travel and transportation allowances under this section is unable to travel unassisted to and attending the burial ceremonies of the deceased member—

(A) because of—

(i) age;

(ii) physical condition; or

(iii) other justifiable reason, as determined under uniform regulations prescribed by the Secretary concerned, as defined in section 1076(a)(2)(C) of such title 10, or if otherwise authorized under applicable regulations;

(3) Section 1076(a)(2)(C) of such title 10 is amended by inserting before the period: —

(iii) the children of the deceased member; and

(iv) the grandchildren of the deceased member; and

(b) LIMITATION ON ALLOWANCES.—(l) Except as provided in paragraphs (2) and (3) and—

(2) by adding at the end of subsection (b) the following new paragraph:

(3) If a deceased member is interred in a common grave in a national cemetery, the parents (as defined in section 401(a)(2)) of the deceased member; and

(4) if otherwise authorized under applicable regulations; or

(5) if otherwise authorized under applicable regulations.

(c) DEFINITIONS.—(1) In this section, the term—

(A) the surviving spouse (including a remarried surviving spouse) of the deceased member; and

(B) if no person described in subparagraph (A) is paid travel and transportation allowances under this section, then—

(i) the person who directs the disposition of the remains of the deceased member under section 1482(e)(2) of such title 10, United States Code, and two additional persons selected by that person who are closely related to the deceased member; or

(ii) the person who directs the disposition of the remains of the deceased member whose remains are commingled and buried in a common grave in a national cemetery, the person who would have been designated under section 1482(e)(2) of such title 10, United States Code, by inserting after the semicolon: —

(iii) or if otherwise authorized under applicable regulations.

(d) ELIGIBILITY FOR DISABILITY RETIREMENT OR SEPARATION.—(1) Section 1206(2)(B)(ii) of such title 10 is amended by inserting before the semicolon: —

(ii) or if otherwise authorized under applicable regulations.

(2) Section 1206(c)(2) of such title 10 is amended by inserting before the semicolon: —

(ii) or if otherwise authorized under applicable regulations.

(e) ELIGIBILITY FOR PAY.—(1) Section 294 of title 37, United States Code, is amended by inserting before the period: —

(ii) or if otherwise authorized under applicable regulations.

(2) Section 294(h)(1) of such title 37 is amended by inserting before the period: —

(ii) or if otherwise authorized under applicable regulations.
if otherwise authorized under applicable regulations.

(f) COMPENSATION FOR INACTIVE-DUTY TRAINING.—Section 260(a)(3)(C) of such title 37 is amended by inserting before the period: "or, if otherwise authorized under applicable regulations".

SEC. 633. ACCEPTANCE OF SCHOLARSHIPS BY OFFICERS PARTICIPATING IN THE FUNDED LEGAL EDUCATION PROGRAM.

(a) ACCEPTANCE OF SCHOLARSHIP.—Section 2603 of such title 10, United States Code, is amended by adding at the end the following new subsection:

"(g) An officer detailed at a law school under this section also may accept a fellowship, scholarship, or grant under section 2603 of this title, Any service obligation incurred under section 2603 shall be served consecutively with the service obligation incurred under subsection (b)(2)(C).

(b) CONFORMING AMENDMENT.—Section 2603 of such title 10 is amended by adding at the end the following new subsection:

"(c) A member who accepts a fellowship, scholarship, or grant under subsection (b) of this section is also required under subsection (a) also may be detailed at a law school under section 2604 of this title, Any service obligation incurred under section 2604 shall be served consecutively with the service obligation incurred under subsection (b)."

TITLE VII—ACQUISITION POLICY AND ACQUISITION MANAGEMENT

SUBTITLE A—Acquisition Policy

Sec. 701. Acquisition Milestone Changes.

Sec. 702. Clarification of Inapplicability of the Requirement for Core Logistics Capabilities Standards to the Nuclear Refueling of an Aircraft Carrier.

Sec. 703. Depot Maintenance Utilization Waiver.

Sec. 704. Clarification of Inapplicability of the Requirement for Core Logistics Capabilities Standards to other Nuclear Refueling of an Aircraft Carrier.

Sec. 705. Acquisition Workforce Qualifications.

Sec. 706. Tenure Requirement for Critical Acquisition Positions.

SUBTITLE B—Acquisition Workforce

Sec. 707. Acquisition Workforce Qualifications.

Sec. 708. Acquisition Workforce Qualifications.

(2) in subsection (c)(1), by striking "demilitarization and validation" and inserting "system development and demonstration.";

(3) in subsection (c)(2) by striking "engineering and manufacturing development" and inserting "production and deployment.";

(4) in subsection (c)(3) by striking "production and deployment" and inserting "full rate production.";

(5) MILESTONE DESIGNATORS.—Section 8102(b) of Public Law 106-259 is amended—

"(1) by striking "milestone I" and inserting "milestone I";

"(2) by striking "milestone II" and inserting "milestone C";

"(3) by striking "milestone III" and inserting "full rate production";

"(g) MILESTONE DESIGNATORS.—Section 811(c) of Public Law 106-388 is amended—

"(1) by striking "milestone I" and inserting "milestone I";

"(2) by striking "milestone II" and inserting "milestone I";

"(3) by striking "milestone III" and inserting "full rate production".

"(i) TRAINING.—Section 206(a)(3)(C) of such title 10 is amended by striking "Milestone C."

"(j) The Secretary of Defense shall establish qualification requirements for such Contingency Contracting Force, to include—

"(A) completion of at least 24 semester credit hours, or the equivalent, of study from an accredited institution of higher education, or similar educational institution as determined by the Secretary, in any of the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, and organization and management.

"(B) passing an examination considered by the Secretary of Defense to demonstrate skills, knowledge, or abilities comparable to those required to be an individual certified as an acquisition manager by the Association for the Advancement of Cost Engineering, or similar educational institution as determined by the Secretary.

"(C) such additional education and experience requirements as the Secretary may prescribe.

"(k) DEVELOPMENTAL OPPORTUNITIES.—Not withstanding other provisions of law, the Secretary of Defense may establish one or more programs for the purpose of selecting, appointing, educating, qualifying, and developing the careers of personnel to meet the requirements of subsections (a) and (b) of section 2489(c) of title 10, United States Code, above for contracting positions in the Department of Defense covered by this section; may appoint individuals to developmental positions in those programs; and may separate from the civil service any person appointed under this subsection who, as determined by the Secretary, fails to complete satisfactorily any program developed pursuant to this subsection. To qualify for any developmental program under this subsection, an individual must have met one of the following requirements:

"(1) Been awarded a baccalaureate degree from an accredited educational institution authorized to grant baccalaureate degrees,

"(2) Completed at least 24 semester credit hours (or the equivalent) of study from an accredited institution of higher education in any of the disciplines of accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, and organization and management.

"(e) EXCEPTION.—(1) The requirements imposed under subsection (a) or (b) shall not apply to an employee or member who—

"(A) served as a contracting officer with authority to award or administer contracts in excess of the simplified acquisition threshold in the Executive agency on or before September 30, 2000;

"(B) served, on or before September 30, 2000, in a position in an Executive agency either as an employee in the GS-1102 series or as a member of the acquisition force in similar occupational specialty; or

"(C) is determined by the Secretary of Defense to be a member of the Contingency Contracting Force.

"(2) The requirements imposed under subsection (a) or (b) of this section shall not apply to an employee or member who—

"(A) served in the area of operations of the United Nations after September 11, 2001.

"(B) served, on or before September 30, 2000, in a position in an Executive agency either as an employee in the GS-1102 series or as a member of the acquisition force in similar occupational specialty; or

"(C) is determined by the Secretary of Defense to be a member of the Contingency Contracting Force.
apply to an employee for purposes of qualifying for a position in which the employee was serving on October 1, 1993, or any other position in the same or lower grade and involving the same or lower level of responsibility as the position in which the employee was serving on such date.

(3) To qualify for the exceptions in subparagraphs (A) or (B) of paragraph (1) of this subsection, a civilian employee must have met one of the following requirements, or have been granted a waiver under subsection (f), on or before September 30, 2000—

(A) have received a baccalaureate degree from an accredited educational institution authorized to grant baccalaureate degrees;

(B) completed at least 24 semester credit hours, or the equivalent, of study from an accredited institution of higher education in any of the following disciplines: accounting, business finance, law, contracts, purchasing, economics, industrial management, marketing, quantitative methods, and organization and management;

(C) passed an examination as considered by the Secretary of Defense to demonstrate skills, knowledge, or abilities comparable to that of an individual who has completed at least the equivalent of 4 years of full-time study in any of the disciplines listed in subparagraph (B); or

(D) on October 1, 1991, had at least 10 years of experience in acquisition positions, in comparable positions in other government agencies or the private sector, or in similar positions in which an individual obtains experience directly relevant to the field of contracting.

(4) Waiver.—The acquisition career program director may waive any of the requirements of subsections (a) and (b) with respect to an individual if the board certifies that the individual possesses significant potential for advancement to levels of greater responsibility and authority, based on demonstrated job performance and qualifying experience. With respect to each waiver granted under this subsection, the board shall set forth in a written document the rationale for its decision to waive such requirement and the document shall be submitted to and retained by the Director of Acquisition Education, Training, and Career Development.

(b) CLERICAL AMENDMENT.—Section 1732(c)(2) of such title 10 is amended by inserting a comma between “business” and “finance.”

SEC. 706. TENURE REQUIREMENT FOR CRITICAL ACQUISITION POSITIONS.

Section 7319 of title 10, United States Code, is amended—

(1) in paragraph (a)(1), by inserting “as a program manager, deputy program manager, or senior contracting official of a major system, or as that term is defined in section 2302(5) of this title,” after “an employee”;

(2) by striking subsection (a) and inserting—

(A) provisions.

Sec. 711. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 712. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.

Sec. 713. One-Year Extension of Commercial Items Test Program.

Sec. 714. Modification of Limitation on Remediation, Provided That Such Remediation Requirements Could Not Be Reasonably Anticipated at the Time of Budget Submission.

Sec. 715. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 716. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 717. Leasebacks of Base Closure Property.

Sec. 718. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 719. Annual Report to Congress on Defense Construction and Acquisition.

Sec. 720. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 721. Streamlining of Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 722. Modification of Limitation on Remediation, Provided That Such Remediation Requirements Could Not Be Reasonably Anticipated at the Time of Budget Submission.

Sec. 723. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 724. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 725. Leasebacks of Base Closure Property.

Sec. 726. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 727. Annual Report to Congress on Defense Construction and Acquisition.

Sec. 728. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 730. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.

Sec. 731. One-Year Extension of Commercial Items Test Program.

Sec. 732. Modification of Limitation on Remediation, Provided That Such Remediation Requirements Could Not Be Reasonably Anticipated at the Time of Budget Submission.

Sec. 733. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 734. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 735. Leasebacks of Base Closure Property.

Sec. 736. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 737. Annual Report to Congress on Defense Construction and Acquisition.

Sec. 738. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 739. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 740. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.

Sec. 741. One-Year Extension of Commercial Items Test Program.

Sec. 742. Modification of Limitation on Remediation, Provided That Such Remediation Requirements Could Not Be Reasonably Anticipated at the Time of Budget Submission.

Sec. 743. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 744. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 745. Leasebacks of Base Closure Property.

Sec. 746. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 748. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 749. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 750. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.

Sec. 751. One-Year Extension of Commercial Items Test Program.

Sec. 752. Modification of Limitation on Remediation, Provided That Such Remediation Requirements Could Not Be Reasonably Anticipated at the Time of Budget Submission.

Sec. 753. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 754. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 755. Leasebacks of Base Closure Property.

Sec. 756. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 757. Annual Report to Congress on Defense Construction and Acquisition.

Sec. 758. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 759. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 760. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.

Sec. 761. One-Year Extension of Commercial Items Test Program.

Sec. 765. Leasebacks of Base Closure Property.

Sec. 766. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 767. Annual Report to Congress on Defense Construction and Acquisition.

Sec. 768. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 769. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 770. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.

Sec. 771. One-Year Extension of Commercial Items Test Program.

Sec. 772. Modification of Limitation on Remediation, Provided That Such Remediation Requirements Could Not Be Reasonably Anticipated at the Time of Budget Submission.

Sec. 773. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 774. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 775. Leasebacks of Base Closure Property.

Sec. 776. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 777. Annual Report to Congress on Defense Construction and Acquisition.

Sec. 778. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 779. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 780. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.

Sec. 781. One-Year Extension of Commercial Items Test Program.

Sec. 782. Modification of Limitation on Remediation, Provided That Such Remediation Requirements Could Not Be Reasonably Anticipated at the Time of Budget Submission.

Sec. 783. Exclusion of Unforeseen Environmental Hazard Remediation from the Limitation on Cost Increases for Construction and Family Housing Construction Projects.

Sec. 784. Increase of Overseas Minor Construction Threshold Using Operations and Maintenance Funds.

Sec. 785. Leasebacks of Base Closure Property.

Sec. 786. Alternative Authority For Acquisition of Missile Defense, Field and Family Housing Con- construction and Family Housing Construction Projects.

Sec. 787. Annual Report to Congress on Defense Construction and Acquisition.

Sec. 788. Amendment of Law Applicable to Contracts for Architectural and Engineering Services and Construction Design.

Sec. 789. Streamlining Procedures for the Purchase of Certain Goods.

Sec. 790. Repeat of the Requirement for the Limitations on the Use of Air Force Civil Engineering Supply Function Contracts.
the term by the department or agency concerned.

“(iii) Except as provided in clause (v) below, a lease under clause (i) may not require rental payments by the United States.

“(iv) A lease under clause (i) shall include a provision specifying that if the department or agency concerned ceases requiring the use of the leased property before the expiration of the term of the lease, the remainder of the lease term may be satisfied by the same or another department or agency of the Federal Government using the property for a use similar to or related to the use for which under the lease. Exercising of the authority provided by this clause shall be made in consultation with the redevelopment authority concerned.

“(v) Notwithstanding clause (iii) or chapter 137 of title 10, United States Code, where the department or agency concerned leases a substantial portion of the installment, the department or agency that may obtain, at a rate no higher than that charged to non-Federal tenants, facility services and common area maintenance from the redevelopment authority's assignee as a provision of a lease under clause (i). Facility services and common area maintenance shall not include municipal services that the state or local government is required by law to provide to all landowners in its jurisdiction without direct charge, or firefighting or security-guard functions.”

SEC. 718. ALTERNATIVE AUTHORITY FOR ACQUISITION AND IMPROVEMENT OF MILITARY HOUSING.

(a) In General.—Subchapter IV of Chapter 169 of title 10, United States Code, is amended by adding at the end the following new section:

“§2886. Reimbursement of funds related to the execution of military family housing privatization projects

“The Secretary of Defense may, during the first year of an initiative under this Subchapter, transfer funds from appropriations available for the operation and maintenance of family housing to appropriations available for the pay of military personnel in such amount as the Secretary determines necessary to offset additional housing allowance costs incurred as a result of such initiative.”.

(b) Clerical Amendment.—The table of sections at the beginning of such subchapter IV of chapter 169 of title 10 is amended by inserting after the item relating to section 2865 the following:

“§2886. Reimbursement of funds related to the execution of military family housing privatization projects.”

SEC. 719. ANNUAL REPORT TO CONGRESS ON DESIGN AND CONSTRUCTION.

(a) In General.—Section 2861 of title 10, United States Code is repealed.

(b) Clerical Amendment.—The table of sections at the beginning of such chapter 169 of such title 10 is amended by striking the item referring to section 2861.

TITLE VIII—DEPARTMENT OF DEFENSE ORGANIZATIONS AND POSITIONS

Subtitle A—Department of Defense Organizations and Positions

Sec. 801. Organizational Alignment Change for Director for Expeditionary Warfare Systems.

Sec. 802. Consolidation of Authorities Relating to Department of Defense Regional Centers for Security Cooperation.

Sec. 803. Change of Name for Air Mobility Command.

Sec. 804. Transfer of Intelligence Positions and Responsibilities to National Imagery and Mapping Agency.

SEC. 801. ORGANIZATIONAL ALIGNMENT CHANGE FOR DIRECTOR FOR EXPEDITIONARY WARFARE SYSTEMS

Section 4302(a) of title 10, United States Code, is amended by striking “Office of the Deputy Chief of Naval Operations for Requirements, Warfare Requirements, and Assessments” and inserting “Office of the Deputy Chief of Naval Operations for Warfare Requirements and Programs.”

SEC. 802. CONSOLIDATION OF AUTHORITIES RELATING TO DEPARTMENT OF DEFENSE REGIONAL CENTERS FOR SECURITY COOPERATION

(a) In General.—Chapter 6 of title 10, United States Code, is amended by adding at the end the following new section:

“§169. Regional centers for security studies

“(a) AUTHORITY TO ESTABLISH, OPERATE AND TERMINATE REGIONAL CENTERS.—The Secretary of Defense may establish, operate and terminate regional centers for security studies to serve as forums for bilateral and multilateral military and civilian exchanges. Such regional centers shall use professional military education, civilian defense education, and related academic and other activities, as the Secretary deems appropriate, to pursue such communication and exchanges. The Secretary of Defense, in writing, shall evaluate the performance and value to the United States of each such regional center and determine whether to continue to operate such regional centers.

“(b) ACCEPTANCE OF GIFTS AND CONTRIBUTIONS.—(1) The Secretary may accept, hold, administer, and use gifts and contributions of funds, materials (including research materials), property, and services for the purpose of defraying the costs or enhancing the operations of one or more of the Regional Centers, and may pay all reasonable expenses in connection with the conveyance or transfer of any such gifts. Contributions of money and proceeds from the sale of property accepted by the Secretary under this subsection shall be credited to funds available for the operation or support of the Center or Centers intended to benefit from such contributions, and shall remain available until expended. No gift or contribution may be accepted under this subsection from a foreign state, or instrumentality or national thereof, or organization domiciled therein, nor anyone acting on behalf of any of them.

“(c) LIMITATION.—The Secretary may not accept a gift or donation under subsection (b) if the acceptance of the gift or donation would compromise or appear to compromise—

“(1) the ability of the Department of Defense, any employee of the Department or members of the armed forces to carry out the responsibilities or duty of the Department in a fair and objective manner; or

“(2) the integrity of any program of the Department of Defense or any person involved in such a program.

“(d) ADMINISTRATION.—(1) The Secretary may take appropriate action to ensure that the mission of Regional Centers operated under this section:

“(A) EMPLOYMENT AND COMPENSATION FOR FACILITY PERSONNEL.—Notwithstanding the provisions of title 5, United States Code, regarding appointment, pay and classification, the Secretary may employ such civilian directors, faculty, and staff members for Regional Centers operated under this section as the Secretary determines necessary.

“(2) PAYMENT OF EXPENSES.—In addition to waiver of reimbursement of costs described in paragraph (2), the Secretary of Defense may pay the travel, subsistence, and similar personal expenses of foreign participants in connection with the attendance of such personnel at conferences, seminars, courses of instruction, or similar educational activities of such Regional Centers if the Secretary determines that payment of such expenses is in the national security interest of the United States.”

“(e) REPORT TO CONGRESS.—The Secretary shall report annually to the appropriate committees of Congress on the status, operations, and foreign participation of the Regional Centers.

“(f) DEFINITIONS.—In this section:

“(1) ‘Terrorism’ means the term ‘Terrorism’ as defined in section 1381 of the United States Code.

“(2) ‘Terrorist’ means the term ‘Terrorist’ as defined in section 1381 of the United States Code.

“(4) ‘Terrorist act’ means the term ‘Terrorist act’ as defined in section 1381 of the United States Code.”

“(b) CONFORMING AMENDMENTS.—(1) Section 1036 of the National Defense Authorization Act for Fiscal Year 1995, (Public Law 103–337; 107 Stat. 2929) is repealed.

“(2) Section 1065 of the National Defense Authorization Act for Fiscal Year 1997, (Public Law 104–201; 110 Stat. 2633) is amended as follows:

“(A) by striking subsections (a) and (b); and

“(B) by striking the subsection designation ‘(c)’.

“(3) Section 1595 of title 10, United States Code, is amended as follows:

“(A) in subsection (c), by striking paragraphs (3) and (5); and

“(B) by redesignating subparagraph (c)(4) as subparagraph (c)(3); and

“(C) by striking subsection (e).

“(4) Section 2611 of title 10, United States Code, is repealed.

“(c) CLERICAL AMENDMENTS.—(1) The table of sections at the beginning of chapter 155 of such title 10 is amended by striking the item relating to section 2611; and

“(2) The table of sections at the beginning of chapter 6 of such title 10 is amended, by adding at the end the following new item:

“169. Regional Centers for Security Studies.”

SEC. 803. CHANGE OF NAME FOR AIR MOBILITY COMMAND.

(a) Section 2544(d) of title 10, United States Code, is amended by striking “Air Mobility Command” and inserting “Air Mobility Command”.

(b) Section 2543(a) of such title 10 is amended by striking “Military Airlift Command” and inserting “Air Mobility Command”.

(c) Section 8074 of such title 10 is amended by striking subsection (c).

(d) Section 430(b) of title 37, United States Code, is amended by striking “Military Airlift Command” and inserting “Air Mobility Command”.

(e) Section 432(b) of such title 37 is amended by striking “Military Airlift Command” and inserting “Air Mobility Command”.

CONGRESSIONAL RECORD—SENATE 12521

June 29, 2001

“(2) WAIVER OF COSTS.—The Secretary may waive reimbursement of the cost of conferences, seminars, courses of instruction or similar educational activities of such Regional Centers for foreign participants if the Secretary determines that attendance of such personnel with the reimbursement is in the national security interests of the United States.”
CONGRESSIONAL RECORD—SENATE

June 29, 2001

SEC. 804. TRANSFER OF INTELLIGENCE POSITIONS.

Section 1066 of title 10, United States Code, is amended by striking "§ 117" and inserting "§ 118a".

Subtitle B—Reports

Sec. 811. Amendment to National Guard and Reserve Component Equipment: Annual Report to Congress.

Sec. 811. Amendment to National Guard and Reserve Component Equipment: Annual Report to Congress.

Sec. 812. Elimination of Triennial Report on the Roles and Missions of the Armed Forces.

Sec. 813. Change in Due Date of Commercial Activities Report.

Sec. 811. Amended—

(a) REPEAL OF REQUIREMENT FOR REPORT ON ASSIGNMENTS AND MISSES.

(b) ROLES AND MISSIONS AS PART OF DIRECTIONS ON NATIONAL SECURITY.

Sec. 111b(e) of such title 10 is amended by inserting after the first sentence the following two new sentences: "The Chairman shall also include his assessment of the assignment of functions (or roles and missions) to the Armed Forces and recommendations for change the Chairman considers necessary to achieve the maximum efficiency of the Armed Forces. This roles and missions assessment should consider the unnecessary duplication of effort among the armed forces and changes in technology that can be applied effectively to warfare.".

Sec. 812. Amendment to National Guard and Reserve Component Equipment: Annual Report to Congress.

Section 1064i of title 10, United States Code, is amended to read as follows:

"(a) The Secretary of Defense shall submit to the Congress each year, not later than March 1, a written report concerning the equipment of the National Guard and the Reserve components of the armed forces, to include the U.S. Coast Guard Reserve. This report shall cover the current fiscal year and three succeeding years. The focus should be on major items of equipment which address large-dollar-requirement, critical Reserve component shortages and major procurement items. Specific major items of equipment shall include ships, aircraft, combat vehicles and key combat support equipment.

"(b) Each annual report under this section should include the following:

"(1) Major items of equipment required and on-hand in the inventories of each Reserve component.

"(2) Major items of equipment which are expected to be procured from commercial sources or transferred from the Active component to the Reserve components of each Service.

"(3) Major items of equipment in the inventories of each Reserve component which are substitutes for a required major item of equipment.

"(4) A narrative explanation of the plan of the Secretary concerned to equip each Reserve component, including an explanation of the plan to equip units of the Reserve components that are short major items of equipment, to support the out-of-war or a contingency operation.

"(5) A narrative discussing the current status of the compatibility and interoperability of equipment between the Reserve components and the active forces, the effect of that level of compatibility or interoperability on combat effectiveness, and a plan to achieve full equipment compatibility and interoperability.

"(6) A narrative discussing modernization shortfalls and maintenance backlogs within the Reserve components and the effect of those shortfalls on combat effectiveness.

"(7) A narrative discussing the overall age and condition of equipment currently in the inventories of Reserve component.

"(c) Each report under this section shall be expressed in the same format and with the same level of detail of the information presented in the Future Years Defense Program Procurement Annex prepared by the Department of Defense.

Sec. 812. ELIMINATION OF TRIENNIAL REPORT ON THE ROLES AND MISSIONS OF THE ARMED FORCES.

(a) REPEAL OF REQUIREMENT FOR REPORT ON ASSIGNMENTS AND MISSIONS.

Sec. 153 of title 10, United States Code, is amended—

(1) in subsection (a), by striking the catch-line and section heading "PLANNING: ADVISE; POLICY FORMULATION.--": and

(2) by striking subsection (b).

(b) ROLES AND MISSIONS AS PART OF DIRECTIONS ON NATIONAL SECURITY.

Subsection 111b(e) of title 10 is amended by striking after the first sentence the following two new sentences: "The Chairman shall also include his assessment of the assignment of functions (or roles and missions) to the Armed Forces and recommendations for change the Chairman considers necessary to achieve the maximum efficiency of the Armed Forces. This roles and missions assessment should consider the unnecessary duplication of effort among the armed forces and changes in technology that can be applied effectively to warfare.".

Sec. 901. TEST AND EVALUATION INITIATIVES.

(a) AUTHORITY TO ENGAGE IN COOPERATIVE TESTS AND EVALUATION AT U.S. AND FOREIGN RANGES AND OTHER FACILITIES WHERE TESTING MAY BE CONDUCTED.

(1) Direct cost means any item of cost that is easily and readily identified to a specific unit of work or output within the range or facility where such testing and evaluation occurred, that would not have been incurred if such testing and evaluation had not taken place. Direct cost may include labor, materials, facilities, utilities, equipment, supplies, and any other resources of the range or facility where such testing and evaluation occurred, that is consumed or damaged during such test and evaluation, or maintained for the recipient country or international organization.

(2) The recipient country or international organization may be charged for the direct costs related to the use of the range or other facility where testing may be conducted only as specified in the memorandum of understanding or other formal agreement.

(3) RETENTION OF FUNDS COLLECTED FROM ELIGIBLE COUNTRIES AND INTERNATIONAL ORGANIZATIONS.

Amounts collected under subsection (b)(6) from eligible countries and international organization shall be credited to the appropriation accounts under which such costs were incurred.

(4) definitions.

"(1) Direct cost means any item of cost that is easily and readily identified to a specific unit of work or output within the range or facility where such testing and evaluation occurred, that would not have been incurred if such testing and evaluation had not taken place. Direct cost may include labor, material, facilities, utilities, equipment, supplies, and any other resources of the range or facility where such test and evaluation occurred, that is consumed or damaged during such test and evaluation, or maintained for the recipient country or international organization.

(2) Indirect costs means any item of cost that cannot readily, or directly, be identified to a specific unit of work or output. Indirect costs may include general and administrative expenses, costs for the support of the range, such as manufacturing expenses, supervision, office supplies, utility, costs, etc. Such costs are accumulated in a cost pool and allocated to customers appropriately.

(3) DELEGATION OF AUTHORITY.

The Secretary may delegate to the Deputy Secretary...

(4) Approval of Reciprocal Use of Ranges and Other Facilities Where Testing May Be Conducted.

(5) Approval of Reciprocal Use of Ranges and Other Facilities Where Testing May Be Conducted.

(6) Declaration of Authority.

The Secretary may delegate to the Deputy Secretary...
of Defense and to the head of one designated office in the Department of Defense to determine the appropriateness of the amount of indirect costs included in such charges.”.5

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 57 of title 10, United States Code, is amended by adding at the end the following new item:

“Sec. 5725. Agreements for the cooperative use of ranges and other facilities and services involving the joint use of ranges and other facilities and services by the United States, NATO, and other nations.”

(c) AUTHORITY TO USE MAJOR RANGE AND TEST FACILITY INSTALLATIONS OF THE MILITARY FOR THE USE OF A NON-NATO ALLY.—Section 2681(c) of title 10, United States Code, is amended—

(1) by inserting “(1)” after “(c)”;

(2) by striking “the Secretary so determines.” and inserting “the Secretary”;

(3) by striking “the Secretary shall” in the first sentence and inserting “the Secretary, if he so determines.”; and

(4) by striking “and” at the end of the second sentence and inserting “and, if he so determines.”.

SEC. 904. PERSONAL SERVICE CONTRACTS IN FOREIGN AREAS.

Under such regulations as the Secretary of State, with the concurrence of the Secretary of Defense, may prescribe, the Department of State shall use authority available to the Department of State to enter into personal service contracts with individuals to perform services in support of the Department of Defense in foreign countries.

Subtitle B—Department of Defense Civilian Personnel

Sec. 912. Authority for Designated Civilian Employees Abroad to Act as a Notary.

Sec. 913. Inapplicability of Requirement for Studies and Reports When All Directly Affected Department of Defense Civilian Employees Are Reassigned to Comparable Civilian Positions.

Sec. 914. Preservation of Civil Service Rights for Employees of the Former Defense Mapping Agency.

Sec. 915. Financial Assistance to Certain Employees in Acquisition of Critical Skills.

Sec. 916. Pilot Program for Payment of Reimbursement Expenses.

Sec. 918. Removal of Limits on the Use of Voluntary Early Retirement Authority and Voluntary Separation Incentive Pay for Fiscal Years 2002 and 2003.

Sec. 923. Amendments to the Uniformed Services Employment and Reemployment Rights Act of 1994.

Section 2303a of title 10, United States Code, is amended as follows:

(1) in the title for Section 2303a—by striking “allied” and inserting “NATO ally, major non-NATO ally, other friendly foreign country, or NATO organization”; and

(2) in paragraph (a), by striking “(1)” and inserting “(1)”.

(3) in paragraphs (b) and (c), by striking “NATO ally” and inserting “NATO ally, major non-NATO ally, other friendly foreign country, or NATO organization”.

(4) in paragraphs (d)(1), (e)(1), (f)(1), and (g)(1), by striking “major allied” and inserting “NATO ally, major non-NATO ally, other friendly foreign country, or NATO organization”.

(5) in paragraphs (d)(2), (e)(2), (f)(2), and (g)(2), by striking “allied” and inserting “NATO ally, major non-NATO ally, other friendly foreign country, or NATO organization”.

(6) in paragraph (d)(3), by striking “NATO ally, major non-NATO ally, other friendly foreign country, or NATO organization” and inserting “NATO ally, major non-NATO ally, other friendly foreign country, or NATO organization”.

(7) in paragraph (e)(1)(B)(2)(A), by striking “one or more of the major allies of the United States,” and inserting “a NATO ally, a major non-NATO ally or other friendly foreign country or NATO organization”.

(8) in paragraph (e)(1)(B)(2)(B), by striking “one or more major allies of the United States or NATO organizations” and inserting “a NATO ally, a major non-NATO ally or other friendly foreign country or NATO organization”.

SEC. 902. RECOGNITION OF ASSISTANCE FROM FOREIGN NATIONS.

(a) IN GENERAL.—Chapter 7 of title 10, United States Code, is amended by inserting after section 1133 the following:

“§1134. Recognition of assistance from foreign nationals.

“1134. Recognition of assistance from foreign nationals.

“The Secretary of Defense may issue regulations, with the concurrence of the Secretary of State, authorizing members of the armed forces of foreign nations, commercial organizations, individuals, or other sources to act as compensation for services rendered in support of the United States armed forces, to be recognized by the United States as having provided assistance to the United States.”

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 7 of title 10, United States Code, is amended by inserting after the item relating to section 1133 the following new item:

“§1134. Recognition of assistance from foreign nationals.”

(1) by striking “major allied” and inserting “a NATO ally, major non-NATO ally, or other friendly foreign country or NATO organization”.

(2) by striking “shall not apply when all directly affected Department of Defense civilian employees serving on permanent appointments

(3) by striking “major allied” and inserting “a NATO ally, major non-NATO ally, or other friendly foreign country or NATO organization.”
SEC. 914. PRESERVATION OF CIVIL SERVICE RIGHTS FOR EMPLOYEES OF THE FORMER DEFENSE MAPPING AGENCY.

Notwithstanding section 1612 of title 10, United States Code, the provisions of subchapters II and IV (sections 7511 through 7514 and sections 7531 through 7535, respectively) of chapter 75 of title 5, United States Code, continue to apply, for as long as the employee continues to serve as a Department of Defense employee in the National Imagery and Mapping Agency without a break in service, to each of those former Defense Mapping Agency employees who occupied positions established under title 5, United States Code, and who on October 1, 1996, became employees of the National Imagery and Mapping Agency under paragraph 1601(a)(3) of title 10, United States Code pursuant to Title XI of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104–20 1; 110 Stat. 2675, et seq.) and for whom the provisions, content of chapter 75 of title 5, United States Code, applied before October 1, 1996. Each such employee, at any time, may elect in writing to waive the provisions of this section. In all cases, however, shall be permanent as to that employee.

SEC. 915. FINANCIAL ASSISTANCE TO CERTAIN EMPLOYEES IN ACQUISITION OF CRITICAL SKILLS.

The Secretary of Defense may provide the Director, National Imagery and Mapping Agency, the authority to establish an undergraduate training program with respect to civilian employees of the National Imagery and Mapping Agency that is similar in purpose, content, and administration to the program which the Secretary of Defense is authorized to establish for civilian employees of the National Security Agency under section 16 of the National Security Agency Act of 1959 (50 U.S.C. 402 note).

SEC. 916. PILOT PROGRAM FOR PAYMENT OF RE-TRAINING EXPENSES.

(a) IN GENERAL.—Chapter 141 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 2410o. Pilot program for payment of re-training expenses.

(1) Authority.—The Secretary of Defense may establish a pilot program for the payment of retraining expenses in accordance with this section to facilitate the reemployment of eligible employees of the Department of Defense who are involuntarily separated due to a reduction-in-force or due to relocation resulting from transfer of function, realignment, or change of duty station. Under the pilot program, the Secretary may pay retraining incentives to encourage non-Federal employers to hire and retain such employees.

(2) Eligible employers.—For purposes of this section, an eligible employee is an employee of the Department of Defense, serving under a covered assignment, without time limitation, who has been employed by the Department of Defense for a continuous period of at least 12 months and who has been given notice of a reduction-in-force or a reorganization, without time limitation, that such term does not include—

(1) a re-employed annuitant under subchapter III of chapter 83 of title 5, United States Code, chapter 84 of such title, or another retirement system for employees of the Government;

(2) an employee who, upon separation from Federal service, is eligible for an immediate annuity under subchapter III of chapter 83 of title 5, United States Code, or subchapter II of chapter 84 of such title; or

(3) an employee who is eligible for disability retirement under any of the retirement systems referred to in paragraph (1).

(3) Retraining Incentive.—(1) Under the pilot program, the Secretary may enter into an agreement with a non-Federal employer under which the non-Federal employer agrees—

(A) to employ an eligible person referred to in subsection (a) for at least 12 months for a salary that is mutually agreeable to the employer and such person; and

(B) to cover the cost of any necessary training with the employment by that employer.

(2) The Secretary may pay a retraining incentive to the non-Federal employer upon the employee's completion of 12 months of continuous employment with that employer. Subject to this section, the Secretary shall prescribe the amount of the incentive.

(3) The Secretary may pay a prorated amount of the retraining incentive to the non-Federal employer for an employee who does not remain employed by the non-Federal employer for at least 12 months.

(4) In no event may the amount of the retraining incentive paid for the training of any one person under the pilot program exceed the amount certified for that person under paragraph (1) or $10,000, whichever is greater.

(5) Duration.—No incentive may be paid under the pilot program for training commenced after September 30, 2005.

(e) Definitions.—The following definitions apply in this section:

(1) The term "non-Federal employer" means an employer that is not an Executive agency, as defined in section 105 of title 5, United States Code, or the legislative or judicial branch of the Federal Government.

(2) "Reduction-in-force" and "transfer of function" shall have the same meaning as in chapter 95 of title 5, United States Code.

(b) CERIAL AMENDMENT.—The table of sections at the beginning of such Chapter 141 is amended by adding at the end the following new section:

"2410o. Pilot program for payment of re-training expenses.".

Subtitle C—Other Matters

Sec. 921. Authority to Ensure Demilitarization of Significant Military Equipment Formerly Owned by the Department of Defense.

Sec. 922. Motor Vehicles: Documentary Requirements.

Sec. 923. Department of Defense Gift Initiatives.

Sec. 924. Repeal of the Joint Requirements Oversight Council Semi-Annual Report.

Sec. 925. Access to Sensitive Unclassified Information.

Sec. 926. Water Rights Conveyance, Andersen AFB, Guam.

Sec. 927. Repeal of Requirement For Separate Budget Request For Procurement of Reserve Equipment.

Sec. 928. Repeal of Requirement for Two-Year Budget Cycle for the Department of Defense.
SEC. 922. MOTOR VEHICLES: DOCUMENTARY REQUIREMENTS FOR TRANSFERTION FOR MILITARY PERSONNEL AND FEDERAL EMPLOYEES ON BEHALF OF THE DEPARTMENT OF DEFENSE.

(a) Military Personnel.—Section 2634 of title 10, United States Code, is amended as follows:

(1) by redesignating subsections (f), (g) and (h) as subsections (g), (h), and (i) respectively; and

(2) by inserting after subsection (e) the following new subsection:

``(f) Motor vehicles transported under this section are not subject to the provisions of the Anti Car Theft Act of 1992, as amended, or any implementing regulations. The Secretary of Defense (and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a Service in the Navy) will prescribe regulations designed to ensure members do not present for shipment stolen vehicles.''.

(b) Civilian Employees.—Section 5727 of title 5, United States Code, is amended as follows:

(1) by redesignating subsection (f) as subsection (g); and

(2) by inserting after subsection (e) the following new subsection:

``(f) Motor vehicles transported under this section are not subject to the provisions of the Anti Car Theft Act of 1992, as amended, or any implementing regulations. Regulations prescribed under section 5738 of this title shall be intended only to ensure employees do not present for shipment stolen motor vehicles under subsection (b) of this section.''

SEC. 923. DEPARTMENT OF DEFENSE GIFT INITIATIVES.

(a) Loan or Gift of Obsolete Material and Articles of Historical Interest.—Section 7546 of title 10, United States Code, is amended—

(1) in subsection (a)—

(A) by inserting the following catchline after the subsection designator: “ADDITIONAL ITEMS TO BE DONATED BY THE SECRETARY OF THE NAVY.”;

(B) by striking “books, manuscripts, works of art, drawings,” and all that follows to the dash and inserting “obsolete combat or shipboard material not needed by the Department of the Navy,”;

(C) in paragraph (5), by striking “World War I or World War II” and inserting “a foreign war’’;

(D) in paragraph (6), by striking “soldiers” and inserting “servicemen”;

(E) in paragraph (8), by inserting “or memorial” after “a museum”;

(2) in subsection (b), by inserting the following after the subsection designator: “MAINTENANCE OF THE RECORDS OF THE GOVERNMENT.”;

(3) in subsection (c), by inserting the following after the subsection designator: “SECRETARIAL AUTHORITY TO MAKE GIFTS OR LOANS.”;

(4) by adding at the end the following new subsection:

``(g) AUTHORITY TO TRANSFER A PORTION OF A VESSEL.—The Secretary may lend, give or transfer any portion of the hull or superstructure of any vessel, including the Naval Vessel Register and designated for scrapping to a qualified organization listed under subsection (a). The terms and conditions of any agreement for the transfer of any portion of a vessel under this section shall include a requirement that the transferee will maintain the material contained in a condition that will enhance its historical or physical value of the material or bring discredit upon the Navy.”

(b) Loan, Gift, or Exchange of Documents, Historical Artifacts, and Confiscated or Obsolete Combat Material.—Section 2572(a)(1) of such title 10 is amended by inserting the period after “Municipal corporations” and inserting county or other political subdivision of a state.”.

SEC. 924. REPEAL OF THE JOINT REQUIREMENTS OVERSIGHT COUNCIL SEMI-ANNUAL REPORT.

SEC. 925. ACCESS TO SENSITIVE UNCLASSIFIED INFORMATION.

(a) In General.—Chapter 137 of title 10, United States Code, is amended by adding at the end the following new section:

``2332. Limited access to sensitive unclassified information by administrative support contractors

“(a) AUTHORITY.—Notwithstanding sections 552a of title 5, 2321 of title 10, and 1905 of title 18, United States Code, the Secretary of Defense may provide administrative support contractors with limited access to, and use of, sensitive unclassified information, provided that—

``(1) such disclosure is not otherwise prohibited by law;

``(2) access shall be limited to sensitive unclassified information that is necessary for the administrative support contractor to perform contractual duties;

``(3) administrative support contractors shall be subject to the same restrictions on storing, modifying, distributing, displaying, releasing or disclosing such sensitive unclassified information as are applicable to employees of the United States; and

``(4) administrative support contractors shall be subject to the same civil and criminal penalties for unauthorized disclosure or use of such sensitive unclassified information as are applicable to employees of the United States.

“(b) DEFINITIONS.—The following definitions apply to this section:

``(1) The term ‘sensitive unclassified information’ means all unclassified information for which disclosure to an administrative support contractor is prohibited by the Privacy Act (5 U.S.C. §552a); section 2321 of this title; or the Trade Secrets Act (18 U.S.C. §1837).

``(2) The term ‘administrative support contractor’ means an employee of a contractor or subcontractor who performs any of the following for or on behalf of the Department of Defense: secretarial or clerical work; filling routine or miscellaneous support; data entry; document reproduction, scanning, or imaging; operation, management, or maintenance of paper-based or electronic information; installation, operation, management, or maintenance of Internet or intranet systems, networks, or computer systems; and facilities or information security.”.

SEC. 926. WATER RIGHTS CONVEYANCE, ANDERSEN AIR FORCE BASE.

(a) Authority To Convey.—In conjunction with the conveyance of a utility system under the authority of section 2388 of title 10, United States Code, and in accordance with all the requirements of that section, the Secretary of the Air Force may convey all right, title, and interest of the United States, or such lesser estate as the Secretary considers appropriate to serve the interests of the United States, in the water rights related to Andy South (also known as the Andersen Administrative Annex, MARBO (Marianas Bonis Base Command), and the Andersen Water Supply Annex (also known as the Tumon Water Well or the Tumon Maui Well)), Air Force properties located in the water rights related to Andersen Air Force Base, the Secretary may exercise the authority contained in subsection (a) only if the Secretary has determined that there exists adequate supplies of potable groundwater under Andersen Air Force Base that are sufficient to meet the current and long-term requirements of the installation for water;

(b) Additional Requirements.—The Secretary may exercise the authority contained in subsection (a) only if—

(i) the Secretary determines that it is in the best interests of the United States to transfer title to the water rights and utility systems at Andy South and Andersen Water Supply Annex prior to placing into service a new replacement water system and well field on Andersen Air Force Base, the Secretary may require that the United States have the primary right to all water produced from Andy South and Andersen Annex until such new replacement water system and well field is placed into service and operates to the satisfaction of the Secretary. In exercising the authority of this subsection, the Secretary may retain a reversionary interest in the water rights and utility systems at Andy South and Andersen Water Supply Annex until such time as the new replacement water system and well field is placed into service and operates to the satisfaction of the Secretary.

(d) Sale of Excess Water Authorized.—(1) If the Secretary exercises the authority contained in subsection (a), he may provide in any such conveyance that the conveyee of the water system and well field on private entities such water from Andersen Air Force Base as the Secretary determines to be excess to the needs of the United States. In the event the Secretary authorizes the conveyee to resell water, the Secretary shall negotiate a reasonable return to the United States of the value of such excess water sold by the conveyee. Any conveyee of water that may receive in the form of reduced charges for utility services provided by the conveyee.

(2) If the Secretary cannot meet the requirements of subsection (a), the Secretary determines to proceed with a water utility system conveyance under section 2388
Multinational Force and Observers (MFO) for the year 2002. The budget authority included in the President’s Budget for fiscal year 2002 for the Armed Forces Retirement Home, including the United States Soldiers’ and Airmen’s Home and the United States Naval Home in amounts equal to the budget authority included in the President’s Budget for fiscal year 2002.

SEC. 927. REPEAL OF REQUIREMENT FOR SEPARATE BUDGET FOR PRO-CUREMENT OF RESERVE EQUIP-MENT. Section 1104 of title 10, United States Code, is repealed.

SECTIONAL ANALYSIS

Sections 101 through 106 provide procure- ment authority for the Military Depart- ments and for Defense-wide appropriations in amounts equal to the budget authority in- cluded in the President’s Budget for fiscal year 2002.

Section 201 provides for the authorization of early retirement of active-duty military personal and of reservists and evaluation appropriations for the Mili- tary Departments and the Defense Agencies in amounts equal to the budget authority included in the President’s Budget for fiscal year 2002.

Section 301 provides for authorization of the operation and maintenance appropri- ations of the Military Departments and De- fense-wide activities in amounts equal to the budget authority included in the President’s Budget for fiscal year 2002.

Section 302 authorizes appropriations for the Working Capital Funds and the National Defense Sealift Fund in amounts equal to the budget authority included in the President’s Budget for fiscal year 2002.

Section 303 authorizes appropriations for fiscal year 2002 for the Armed Forces Retire- ment Home Trust Fund for the Armed Forces Retirement Home, including the United States Soldiers’ and Airmen’s Home and the United States Naval Home in amounts equal to the budget authority included in the President’s Budget for fiscal year 2002.

Section 304 would amend section 5(a) of the Multinational Force and Observers (MFO) Partition and Reconstitution, to authorize the President to approve contracting out logistical support functions in support of the MFO that are currently performed by U.S. military personnel and equipment. The resolution was adopted December 1981, in order to authorize the United States to de- ploy peacekeepers and observers to Sinai, Egypt to assist in the fulfillment of the Camp David Accord. It is also should be noted that section 5(a) authorizes any agency of the United States to provide administrative and logistical support and services to the MFO without reimbursement when the provision of such support or services would not result in significant incre- ments of real costs to the United States. Administrative and technical support is provided under section 5(a) by the U.S. Army’s 1st Support Battalion pursuant to international agreements with the Arab Rep- ublic of Egypt, the State of Israel, and the MFO. These agreements stipulate the types of unit functions required to be performed and the amounts equal to the budget authority included in the President’s Budget for fiscal year 2002. If these contracts were required to be annual contracts, there could be significant oper- ational degradation and excessive demand on the DoD's working capital fund and on onload requirements at potentially annual periods.

The commercial market standard is for multiple year charter periods and there are savings to DoD by negotiating multiple year leases, consistent with commercial practices. In ad- dition, DoD would not be able to effectively compete for annual contracts because foreign flag carriers are not interested in com- peting for short-term contracts due to the costs they incur to re-flag the vessels and to modify ships to meet DoD's needs. Past experience indicates that the costs to DoD would be significantly higher if com- petition were limited to currently U.S.-flag vessels on an annual basis.

If the legislation is not enacted, MSC will be required to negotiate the contracts on an annual basis, resulting in increased costs and possible disruptions of services.

Section 310. The Navy and the U.S. Envi- ronmental Protection Agency (EPA) entered into an agreement in January 2001 for pay- ing for a Superfund site at the 138 acres of the Sands Site, South Berwick, Maine for EPA’s remaining past response costs incurred by the agency for the period from May 12, 1992 through July 31, 2000. Activities of the Navy are liable under the Comprehensive Environ- mental Response, Compensation and Liabil- ity Act of 1980 as generators who arranged for disposal of the hazardous substances that ended up at the site, and there are no other viable responsible parties. Under the agree- ment, the Navy would pay for EPA’s final re- response actions that were undertaken to pro- tect human health and the environment at this site. The agreement also stipulated that the Navy would seek authorization from Congress in the FY02 legislative program for payment of costs previously incurred by EPA at the site. Should Congress approve this legis- lative proposal, the Navy would pay EPA up to two years from the date of enactment. Section 325 of the National Defense Authorization Act for Fiscal
June 29, 2001

Year 2000 (Public Law 106-65; 113 Stat. 512) extended the two-year deadline an additional two years.

The initial extension was requested because the Department of Defense implementation guidance, required by the statute, has not been released. The two-year extension is necessary to fulfill the purpose of the legislation and adequately assess the feasibility and admissibility of the sale of economic incentives, the pilot program was extended another two years from its original deadline. We are requesting an additional two-year extension to allow another opportunity for the Department to assess the feasibility of the program. States have been slower to develop emission-trading programs than initially anticipated and more time is desired to allow military installations to become familiar with the benefits of economic incentive programs.

Section 351 also provides authority to the Department of Defense (DoD) to retain proceeds from the sale of Clean Air Act emission reduction credits, allowances, offsets, or other limited-use credits that are generated through activities that are exempt from the purview of Federal law and regulations generally require proceeds from the sale of government property to be deposited in the U.S. Treasury. These include amounts appropriated to the DoD to keep the funds generated by reducing air emissions and selling the credits as does private industry. This inhibits the reinvestment of those funds to purchase other credits needed in other areas and eliminates any incentive for installations to spend the money required to generate the credits in order to sell them.

The Clean Air Act (CAA) mandates that states establish state implementation plans (SIPs) to attain and maintain the national ambient air quality standards derived from health based standards established for certain criteria air pollutants, e.g., ozone, particulate matter, carbon monoxide. To further this mandate, the 1990 Clean Air Act Amendments provided language encouraging the states to include "economic incentive" programs in their SIPs. Such programs encourage further reductions in air pollutants by offering monetary incentives for the reduction of emissions of criteria air pollutants.

A significant and growing number of state and local air quality districts have established various types of emission trading systems. Absent the proposed legislation, the military services would be required to remit any proceeds from the sale of economic incentives to the U.S. Treasury. The proposed legislation grants military installations authority to sell the economic incentives and to retain the proceeds in order to create a local economic incentive to reduce air pollution above and beyond legal requirements. Retention and use of proceeds at the installation level is a key component of the pilot program.

Section 312 would remove the requirement for the Department of Defense to submit an annual report to Congress on its reimbursement of environmental response action costs for the top 20 defense contractors, as well as on the amount and status of any pending requests for such reimbursement by those same firms. This reporting requirement was slated to end in December 1999 pursuant to section 4(b) of the Federal Real Property Releas- nation and Sunset Act of 1995, Pub. L. 104-66; however, it was reinstated by section 1831 of the National Defense Authorization Act for Fiscal Year 1999, Pub. L. 106-55.

The Department strongly recommends removal of this statutory reporting requirement because the data collected are not necessary to make determinations allowing environmental response action costs on Government contracts. Moreover, the Department does not routinely collect data on the other categories of contractor overhead costs.

This reporting requirement is very burdensome on both the Department and contractors, diverting limited resources for data collection efforts that do not benefit the procurement process. Not only are there 20 different firms involved, but for most of these firms, the selling price for multiple locations in order to get an accurate company-wide total. In many cases the data must be derived from company records because it is not normally maintained in contractor accounting systems. After the data is collected, Department contracting officers must review, assemble, and forward the data through their respective chains of command to the Defense Contract Audit Agency for validation. After validation, the data is provided to the Department's staff for consolidation into the summary report provided to Congress.

In addition, the summary data provided to Congress in the annual report to Congress have shown that the Department is not expending large sums of money to reimburse contractors for such costs. The Department's share of such costs in FY99 was approximately $11 million. In the preceding years the costs were, $13 million in FY98, $17 million for FY97, and $4 million for FY96. Section 315 would amend section 2482(b)(1) of title 10, to extend its reach to all Defense working capital fund activities that provide the Defense Commissary Agency services, and allow them to recover those administrative and handling costs the Defense Commissary Agency would be required to pay for acquiring such services.

Currently, section 2482(b)(1) restricts the amount that the United States Transportation Command could charge to the Defense Commissary Agency for such services to the price at which the service could be obtained through full and open competition, as section 4(b) of the Office of Federal Procure- ment Policy (41 U.S.C. 3304(b)) defines such prices. The Proposed section would expand the definition of competitive pricing so that the Defense Commissary Agency would be able to acquire such services.

If enacted, the proposed amendment would end this inequity, by applying a single cost-effective guideline for such charges to all Defense working capital fund activities. It should also be noted that the last sentence of the proposed amendment continues the current policy of not allowing costs associated with mobilization requirements, maintenance of readiness, or establishment or maintenance of the infrastructure to support mobilization or readiness requirements, are not passed on to the customers of the Defense Commissary Agency.

This proposal will not increase the budgetary requirements of the Department of Defense.

Section 316 requires that the Defense Com- missary Agency surcharge account be reim- burshed to make unique contributions to the in- tegration and reintegration programs of active and reserve military personnel; and to be used for non-commisary related purposes.

Section 317 would permit the Defense Com- missary Agency (DECA) to limit the exchange merchandise at locations where no exchange facility is operated by an Armed Service Exchange. Under Section 2486(b) of title 10, United States Code, the Secretary of Defense can purchase and sell and commissary store inventory as a limited line of exchange merchandise. This amendment is required to obtain the necessary authority for DECA to procure the exchange merchandise items from the Armed Service Exchange. The Armed Service Exchange (ASX) will allow the DECA to procure items that would not exceed the normal exchange retail cost less the amount of the commissary surcharge, so that the amount paid by the patron would be the same. If the Exchange cannot supply the items authorized to be sold by DECA, DECA may procure them from any authorized source subject to the limitations of section 2486(e) of title 10 (i.e., that such items are only exempt from competitive procurement if they comply with the brand name sale requirements of being sold in the same terms as the brand which from whom such items are procured, they must be sold in commissaries at cost plus the amount of the surcharge.

Section 318 would amend a portion of section 2482 of title 10 that is entitled "Private Operation" to delete overly restrictive language. The current section authorizes Commissary stores operated by private persons under a contract, but prohibits the contractor from carrying out functions for the procurement of products to be sold in the store, or from engaging in transactions related to the actual management of the store. Consequently, the Department is precluded from realizing the potential benefits of consolidating, optimizing, and streamlining the operation and management of the stores. By deleting this language a private contractor selected to operate Commissary stores would be allowed to apply best commercial prac- tices in both store operations and supply chain management, and to achieve economy of scale savings in procurement, distribution, and enabling infrastructure, so that the items procured could be sold in the Commissary stores. This change will allow the Department to initiate pilot programs to test these potential benefits at selected Commissary stores.

Section 320 would establish permanent au- thority for active Department of Defense units and organizations to reimburse Na- tional Guard and Reserve units and organiza- tions for the expenses incurred when Guard and Reserve personnel provide them intel- ligence and counterintelligence support. For the last five years, Congress has authorized such reimbursement in each year's defense appropriations act. See e.g., section 8059 of the Department of Defense Appropriations Act, 2001 (Public Law 106-55; 114 Stat. 656, 687). For the past several years the language of these annual provisions has remained un- changed, and the Department proposes to estab- lish authority for such reimbursement on a permanent basis.

Such reimbursement constitutes an excep- tion to the general principle that funds on for active DoD organizations cannot be expended to pay the expenses of Guard and Re- serve units, and vice versa. By their training and experience, reserve intelligence per- sonnel are uniquely positioned to contribute to the intelligence and counterintelligence programs of active DoD units and organizations. They also provide invaluable surveillance capability to national defense intelligence agencies. Guard and Reserve units do not program funds for such support of active DoD units
and organizations, which makes it essential that the units and organizations authorized to receive or signifi-
cant changes in legislation when the size of the Active Guard and Reserve force changes. The methodology would be com-
ments for the expenses they occur in providing support.

provide for a non-static method of author-
izations for active duty Air Force officers in the grade of major. This would continue progress toward achieving an appropriate distribution of officers within the Air Force. An appro-
ate distribution may be achieved by in-
creasing the authorized strengths of commis-
Secton 504 would repeal subsections 632, 637 of this Act, which requires certain health care for Selected Re-
serve members of the Army assigned to units scheduled to deploy within 75 days after mo-
bilitation. Section 632, 637 are hereby terminated, the Department has implemented several programs to ensure Reserve component members are medically ready.

The Armed Forces have adopted a program called FEDS–HEAL, which is an alliance of the Department of Veterans Affairs (DVA) and the Department of Health and Human Services (DHHS) that allows Army Reserve and National Guard members to complete physical examinations, receive in-
oculations and complete other medical re-
equirements in DVA and DHHS healthcare fa-
cilities across the country. This significantly enhances access for Reserve component members of the Army to meet medical and dental readiness requirements in a timely manner. DoD policy now requires an annual dental examination. To track Reserve component dental readiness, the Department has developed a standard dental examination form that can be completed by a member's personal civilian dentist. Moreover, the re-
cently expanded TRICARE Dental Program provides Reserve component members with an affordable means of completing dental ex-
aminations and receiving dental care through a much larger provider network.

The current statutory requirement to con-
duct a full physical examination every two years for members over the age of 40 and dental care identified during the annual den-
tal examination is an important health information for a select population that is very fluid with a relatively high turnover of individuals each year. Those Reserve Component units and in-
donors identified as early-deploying change frequently. The annual cost to the Department to meet this requirement would be $15 million per year. The budgetary impact of this proposal on Air Force Military Personnel appropriation budget requirements would be a net increase of $310 million, phased in, and a net increase of approxi-
mately $20 million per year thereafter.

Secton 505 would repeal subsection 1251 of this Act, which requires the Army Reserve and National Guard members to complete physical examinations, receive imm-
oculations and complete other medical re-
equirements. Section 1251 is hereby terminated. The Navy has one Limited Duty Officer captain (0–6) Bandmaster (6430) billet—the position of Officer in Charge of the United States Navy Band. While so serving, an officer who holds a

The Secretary of Defense report to Congress on the means of improving medical and dental care for Reserve Component members, which Secretary Cohen sent to Congress on November 5, 1999.

Section 502 would amend section 640 of title 10, United States Code, to afford mem-
ers whose mandatory deployment or retirement were delayed due to medical deferment, a period of time to transition to civilian life following termination of medical deferment. It would afford active duty mem-
ers whose mandatory separations or retire-
ments had been in Chapter 9 or Chapter 63 of the title, a period of time to transition, not to exceed 30 days, following termination of suspensions made under section 640, to transition to civil-
ian life. As currently written, section 640 requires immediate separation or retirement of those medically deferred members who would have been subject to mandatory separation or re-

terminations of a medical deferment, could cause undue hardship on those whose planned departure to civilian life was unex-

technical skill required of the incumbent; to provide proper recognition and compensation for the skills required as the Band's leader; and to elevate and maintain this organization's status at an appropriate level.

Army, Marine Corps, and Air Force premilitary and precommissioning Officers/Commanders are also 0-4 billets and selection for those positions is accomplished in a manner different from that used by the U.S. Navy Band. Upon assignment to these positions, leaders of the Army, Marine Corps, and Air Force bands are specifically "selected" to 0-4. That is, they are considered in the same manner as an Officer-in-Charge/Leader of the U.S. Navy Band because selection for and appointment to this position is limited to the Limited Duty Officer Community. As such, those selected for this special appointment are generally officers with 28-32 years of total active service at the time of selection and appointment as Officer-in-Charge/Leader, U.S. Navy Band. However, the established career path of Limited Duty Officers typically results in selection for this position while serving as a senior officer of lieutenants commander (0-4) or commander (0-5) and flow points normally do not provide an opportunity for promotion to 0-6 prior to statutory retirement.

Section 504, General/flag officers serving above the grade of 0-6 serve in a temporary grade that is authorized by the position. Such officers generally hold a permanent grade of 0-8. Under current law, for the officer to retire in a grade above 0-8, the Secretary of Defense must determine and then certify to the President and the Congress that such officer served satisfactorily on active duty in the higher grade. Most officers who serve in grades above 0-8 are approved for retirement at age and service above 0-8. Section 504 would retain the requirement for the Secretary of Defense to certify that the service of an officer on active duty in a grade above 0-8 was satisfactory in order for the officer to be retired in the grade above 0-8, but would do away with the requirement for the Secretary of Defense to provide that certification to the President and the Congress. Further, Section 504 would require the Secretary of Defense to issue written regulations to implement these procedures.

Section 505, The Secretary of Defense is authorized to issue regulations to extend temporary military drawdown authorities through 2024, and to issue interim regulations. Congress. Further, Section 504 would require the Secretary of Defense to issue written regulations to implement these procedures.

Section 506, Subsection (a) adds a new section 1558 to the end of chapter 79 of title 10: "Military Officers Special Appointments." Time in commission on the Special Appointments Board, retroactive to the date of the original board.

Section 1558(b) provides that, in the case of a person chal- lenged for a selection board's recommendation, or if a special board, it will be deemed a denial of the requested relief. The Secretary, acting personally, may extend these time limits in appropriate cases, but may not delegate the authority to do so.

Section 1558(c) provides that if section 1558 does not apply to the Coast Guard when it is not operating as a service in the Navy.

Section 1558(d) defines "special board" to encompass any board, other than a special selection board convened under section 629 or 14502 of title 10, convened by the Secretary concerned to consider a person for appointment, enlistment, reinstatement, assignment, promotion, retention, separation, retirement, or transfer to inactive status in a reserve component, in place of consideration by a prior selection board that considered or should have considered the person. A board for correction of military or naval records under section 1552 of title 10 may be a special board if so designated by the Secretary concerned.

Section 1558(e) provides that a special board outcome unfavorable to the person considered confirms the action of the original board, retroactive to the date of the original board.

Section 1558(f) provides that the remedies provided in section 1558 are the exclusive remedies available to a person challenging the action or recommendation of a selection board, as that term is defined in section 1558(i).

Section 1558(g) provides that section 1558 does not limit the existing jurisdiction of any federal court to determine the validity of rules, regulations, or policies relating to selection boards, but limits relief in such cases to that provided for in section 1558.

Section 1558(h) contains time limits for action by the Secretary concerned on a request for consideration by a special board (six months) and on the recommendation of a special board (one year after convening the board). If the board does not act, its will be deemed a denial of the requested relief. The Secretary, acting personally, may extend these time limits in appropriate cases, but may not delegate the authority to do so.

Section 1558(i) provides that section 1558 does not apply to the Coast Guard when it is not operating as a service in the Navy.

Section 1558(j)(1) defines "special board" to encompass any board, other than a special selection board convened under section 629 or 14502 of title 10, convened by the Secretary concerned to consider a person for appointment, enlistment, reinstatement, assignment, promotion, retention, separation, retirement, or transfer to inactive status in a reserve component, in place of consideration by a prior selection board that considered or should have considered the person. A board for correction of military or naval records under section 1552 of title 10 may be a special board if so designated by the Secretary concerned.

Section 1558(j)(2) defines "selection board," for the purposes of section 1558, as encompassing existing statutorily established selection boards, (except a promotion selection board convened under section 14011 (a) of title 10), and any other board convened by the Secretary concerned to recommend persons for appointment, enlistment, reinstatement, assignment, promotion, or retention in the armed forces, or for separation, retirement, or transfer to inactive
status in a reserve component for the purpose of reducing the number of persons serving in the armed forces.

Subsection (b) adds new subsections (g), (h) and (i) to section 628 of title 10, the section authorizing special selection boards for promotion of active duty list commissioned and warrant officers (redesignating existing subsection (g) as subsection (j). New subsections (g) and (h) correspond exactly to subsections (g) and (h) of section 14502 of title 10, the RPMFA authorization providing special selection boards for promotion of reserve active status list commissioned and warrant officers.

New subsection (g) provides that no court or official of the United States shall have power or jurisdiction over any claim by an officer or former officer based on his or her failure to be selected for promotion unless the officer has first been considered by a special selection board, or his claim has been rejected by the Secretary concerned without consideration by a special selection board. In addition, this subsection precludes any official or court from granting relief on a claim for promotion if the officer has been selected for promotion by a special selection board.

Subsection (h) permits judicial review of a decision of a selection board. A court may overturn such a decision and remand to the Secretary concerned to convene a special selection board if it finds that decision to be arbitrary, capricious, not based on substantial evidence, or otherwise contrary to law. The term "concerned" is intended to encompass con-stitutions as well as statutory provisions.

Subsection (i) provides that if a court finds that the action of a special selection board was contrary to law or involved material error, it shall remand to the Secretary concerned for a new special selection board. No other form of judicial relief is authorized.

Subsection (i) provides that nothing in this legislation limits the existing jurisdiction of any court to determine the validity of any statute, regulation or policy relating to selection boards. This subsection limits relief in cases to that provided for in this legislation, and (2) that nothing in this legislation limits the existing authority of the Secretary of a military department to correct a military record under section 1552 of title 10.

Subsection (c) provides that the amendments made by this legislation are retroactive in effect, except that they do not apply to any judicial proceeding commenced in a federal court before the date of enactment.

Section 511 would allow the Service Secretaries to routinely transfer Reserve officers to the Retired Reserve—without requiring that the officer request such a transfer—for those officers who are required by statute to be removed from the reserve active status list because of failure of selection for promotion, length of service, or age. This section would add a similar authority with respect to warrant officers and enlisted members who have reached the maximum age or years of service as prescribed by the Secretary concerned. This authority would allow these members to request discharge or, in some cases, transfer to an inactive status list in lieu of transfer to the Retired Reserve. Giving the Service Secretaries this authority would also help protect those members who entered military service after September 7, 1980. Members who entered military service after that date are not charged after qualifying for a non-renewal retirement (former members) remain eligible to receive retired pay, but that pay is calculated on the pay scale in effect when discharged, rather than the pay scale in effect when they retired. This is significant since the retired pay for a former member in most cases, is significantly higher than the pay for a member of the Retired Reserve because of the pay scale used to determine the amount of retired pay. This amendment would require reservists to make a positive election to be discharged with the full understanding of the possible economic consequences of that decision.

Section 512 would provide that with respect to Reserve component members was added as section 991(b)(2) of title 10, United States Code, by the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398). The purpose of this definition was to ensure consistent treatment of Active and Reserve component members serving under comparable circumstances and preclude Reserve component members from being credited with deployed days when they could spend off-duty time in their homes.

As provided in the National Defense Authorization Act for Fiscal Year 2001, the active component will count "home station training" as training whenever the member is unable to spend off-duty hours in the housing in which he or she resides while on garrison duty at his or her permanent duty station or homeport. Absent the proposed change in Section 512, an active duty member who is not able to spend off-duty time in the housing in which he or she resides while in a funeral honor duty status, or homeport, because the member is performing home station training, will be credited with a day of deployment, while a Reserve component member serving under comparable circumstances, will not because they will be within the 100-mile or three-hour limit. This amendment would correct this inconsistency between Active and Reserve component members, the definition of deployment with respect to Reserve component members must be amended.

Section 513 would provide that any judicial proceeding commenced in a federal court before the date of enactment for Reserve component members, which was separated from or died after the effective date of Section 513, would be subject to the jurisdiction of the Uniformed Court of Military Justice. Section 513 would specify that this Reserve Component Court to the Uniform Code of Military Justice while performing funeral honors duty under 10 U.S.C. 12903.

Section 514 would amend titles 10, 14 and 38, United States Code (U.S.C.), to provide the same benefits and protections for Reserve Component members while in a funeral honors duty status as provided when RC members perform inactive duty training (IDT) or traveling to or from IDT. Sections to be amended are:

1. 10 U.S.C. 802—persons subject to the Uniform Code of Military Justice. Section 514 would specify that a Reserve Component member would be subject to the Uniform Code of Military Justice 6131—eligibility for commissary and exchange benefits for dependents of a deceased Reserve Component member. Section 514 would specify that the dependents of a Reserve Component member who died while in a funeral honor duty status, or while traveling to or from such duty would be eligible for commissary and exchange benefits as the surviving dependents of an active duty member.

2. 10 U.S.C. 1476 and 1476—payment of a death gratuity. Section 514 would authorize payment of a death gratuity of a Reserve Component member who died while in a funeral honor duty status, or while traveling to or from such duty.

3. 10 U.S.C. 704—authority of members of the Coast Guard Reserve. Section 514 would specify that a member of the Coast Guard Reserve would have the same authority, rights and privileges as a member of the Regular Coast Guard of a corresponding grade or rating when the member is in a funeral honors duty status.

4. 14 U.S.C. 705—benefits for members of the Coast Guard Reserve. Section 514 would specify that a member of the Coast Guard Reserve would have the same benefits as a member of the Naval Reserve of a corresponding grade, rating and length of service when the member is in a funeral honors duty status.

5. 38 U.S.C. 101—definitions. Section 514 would add the term "funeral honors duty" and define that term, and then include that term in the definitions of statutory provisions.

Amending the various statutes to add funeral honors duty as a duty status in which these benefits are provided is important to ensure a viable program of rendering honors at the funerals of our veterans.

Section 515 would specify that the performance of funeral honors by members of the Army National Guard of the United States or Air National Guard of the United States, while in a state status, satisfies the two-person funeral honors detail requirement. While members of the National Guard would meet this requirement when called to duty under section 515 of title 32, United States Code (U.S.C.), they are not in a federal status when performing duty in a state military duty status, and therefore the Department is not entitled to be reimbursed for performing funeral honors when in a state status. Amending section 515 of title 10 or title 32, United States Code (U.S.C.), to provide for a federal status when performing duty in a state military duty status, and therefore would be entitled to reimbursement for performing funeral honors when in a state status.

Section 516 would permit National Guard members to fulfills this requirement when called to duty under section 515 of title 32, United States Code (U.S.C.), to permit National Guard members to fulfill this requirement when called to duty under section 515 of title 32, United States Code (U.S.C.), to be eligible to receive the funeral honors pay authorized under section 515 of title 32, United States Code (U.S.C.), and to be eligible to be reimbursed for providing funeral honors when in a state status.
Section 516 would authorize Reserve Component members who are involuntarily called to active duty to serve component officers serving on active duty in support of a contingency operation.

Currently, Reserve Component members who are involuntarily called to active duty are exempt from the strength limitations in sections 115, 517 and 523 of title 10. Just as the Services involuntarily call Reserve Component members to support a contingency operation under title 10 U.S.C. 12304, to meet the operational requirements to support a contingency, the Services also use volunteers from their Reserve components to meet the operational requirements of a contingency operation. These volunteers are called to active duty under 10 U.S.C. 12301(d). Regardless of the authority under which a volunteer is called to active duty, the additional manpower represents an unplanned expansion of the force to meet operational requirements. The authority to increase the end strength limits and grade ceilings would permit the Services to meet contingency operation requirements without removing the support from the programs for other national security objectives. Finally, absent such an authority, the Services have an incentive to use non-volunteers to support these operations to avoid adversely affecting their end strength. This authority to expand the force by the number of Reserve Component members serving under title 10 U.S.C. 12301(d) would encourage the Services to use volunteers to meet these mission requirements.

Section 517 would authorize payment of the financial assistance provided under 10 U.S.C. 16281 to a student who has been accepted into an accredited medical or dental school. Section 517 would further amend section 16281 to authorize payment of subsequent financial assistance to an officer who received financial assistance under this section while a student enrolled in medical or dental school and has now graduated and enters residency training in a healthcare professional wartime skill designated by the Secretary of Defense as critically short. When such a student agrees to financial assistance for residency training, the two-for-one service commitment previously incurred for financial assistance while attending medical or dental school may be reduced to one year for each year for each year, or part thereof, of financial assistance previously provided. However, the service obligation incurred for residency training would remain at two-for-one. Finally, Section 517 would authorize the service obligation incurred for financial assistance to be incurred for six-month increments for those agreements that require a two-for-one pay back. Thus, for every six months, or part thereof, of benefits paid the last six months of the residency training that will be obligated for one year of service in the Selected Reserve. Currently, two years of service obligation is incurred for each partial year of financial assistance provided, regardless of the number of months in that partial year.

These amendments would provide a more robust incentive program that recruiters and other personnel could use to entice professionals in order to entice them into joining the Guard or Reserve. The current medical recruiting incentives, which originated in the early to mid 1980s, must be updated to enable reserve recruiters to compete with hospitals, HMOs and communities who offer financial incentives. Thus, section 518 would allow Reserve recruiters to extend the period of time in which they may return for a commitment to work for them once they become a qualified physician or dentist. As an example, both the Army Reserve and the Army National Guard, which account for 65 percent of Army medical requirements, have not been able to achieve medical recruiting goals and are experiencing serious medical end strength shortfalls.

In summary, Section 517 would enhance the recruiting incentives targeted at student medical and dental school students in four ways: (1) allow medical and dental school students to receive a stipend, (2) allow subsequent financial assistance for officers who are called to active duty to attend dental school and enter residency training in a critically short wartime skill, (3) allow the service obligation to be reduced to one-for-one when a physician or dentist accepts the financial assistance for residency training, and (4) allow those service obligations which require a two-for-one pay back to be incurred in six-month increments.

Section 518. Section 521 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398) amended section 641(1)(D) of the United States Code (U.S.C.), to exclude certain reserve component officers serving on active duty for periods of three years or less from the active duty list for promotion purposes. These officers, however, should compete for selection for promotion with their contemporaries not serving on active duty in the same manner as their contemporaries not serving on active duty. Reserve component general/flag officers would, under service regulations, be retained on the reserve active-status list and authorized to serve on active duty for a period of three years or less under the provisions of 10 U.S.C. 526(b)(2).

Finally, Section 518 would allow the Services to conscript any student to the reserve active status list who otherwise met the criteria of this exemption, but for the fact that the officer was on active duty already before being placed on the active duty list at the time section 641(1)(D), as amended by Public Law 106-398, was enacted.

Section 519 would permit Reserve component members on active duty and members of the National Guard on full-time National Guard duty to prepare for and perform funeral honors for veterans as required by section 1491 of title 10, United States Code, without counting against active duty end strength. The delivery of funeral honors to veterans is a continuous peacetime mission that has escalated from its recent inception and mandate in Public Law 105-261. Further, funeral honors mission requirements are projected to continue their expansive growth in the out years. Section 519 would allow the Department of Defense to use National Guard personnel to fulfill the funeral honors mission without adversely impacting readiness and affecting the end strength needed to meet their wartime missions. For the Department to meet the requirements of the law regarding the provision of funeral honors for veterans, it is critical to have Reserve component participation in this Total Force mission. Additionally, the end strength needed to remove an impediment to greater Reserve component participation in funeral honors, provide greater latitude in manpower application, and greatly assist the Department in meeting the expanding requirements of the veterans’ funeral honors law.

Section 520. Section 555 of the National Defense Authorization Act for Fiscal Year 2000 amended section 12310(b) of title 10, United States Code, to expand the duties that may be assigned to Reserve, who are on active duty in connection with administering, recruiting, instructing, or training the reserve components. While the apparent intent of the amendment was to expand the possible activities of the Guard and Reserve (AGR) personnel, practically, the amendment applies only to AGR personnel performing active duty under section 12301(d) of title 10 and does not include AGR personnel performing full-time National Guard duty under title 32 of the United States Code. Therefore, Section 520 seeks to clarify the current law, aligning the current practices in these missions with the legislative authority governing them. This change is necessary because, effectively, there are few distinctions between the roles of AGR personnel serving on active duty and the roles of reservists performing full-time National Guard duty, outside of the different chains of command that each respective group must report to.

This section would amend section 12310(b) by inserting language that clearly would make the section applicable to Reserves who are on active duty in connection with serving on full-time National Guard duty under section 502(f) of title 32 in connection with organizing, administering, recruiting, instructing, or training the reserve components. It would ensure that National Guard AGR personnel are treated in the same manner as
Section 521 would amend section 516 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105–261) to provide that the Secretary of the Army may waive the applicability of section 12205(a) of title 10, United States Code, to reserve officers commissioned through the Army Officer Candidate School. Section 12205(a) provides that no person may be appointed to a grade above the grade of first lieutenant in the Army Reserve, Air Force Reserve, or Marine Corps Reserve or to a grade above the grade of lieutenant (junior grade) in the Naval Reserve, or be federally recognized in a grade above the grade of lieutenant as a member of the Army National Guard or Air National Guard, unless that person has been awarded a baccalaureate degree and serves in an active duty component. Section 12205(a) also provides that any waiver of the applicability of section 12205(a) to any officer who before the enactment of Public Law 105–261 was commissioned through the Army’s Officer Candidate School. The waiver may continue in effect for for no more than two years. A waiver under the section may not be granted after September 30, 2000.

Section 521 would amend section 516 to permit the Secretary of the Army to waive the applicability of section 12205(a) to any officer who was commissioned through the Army’s Officer Candidate School without regard to the date of commission. The Secretary of the Army may provide an exception to the statutory requirement of a baccalaureate degree during the relatively short period before they are eligible for promotion to captain and during times when they may be engaged in intensive training or deployments for long periods.

Section 522 would amend section 12305 of title 10, United States Code, to afford members whose mandatory dates of separation or retirement were delayed due to stop loss action, a period of time to transition to civilian life following termination of stop loss action. Specifically, section 522 would add subsection (c) to afford active duty members whose mandatory separations or retirements incident to sections 1251 or 632–637 are delayed due to stop loss action, a period of time to transition to civilian life following termination of stop loss.

As currently written, section 12305 requires immediate separation or retirement of those affected by stop loss, who, without stop loss, would have been entitled to separation or retirement under this title for age (section 1251), length of service (sections 633–636), or promotion (sections 632, 637). An abrupt termination of stop loss would result in undue hardship for those whose planned departure to civilian life was unexpectedly interrupted and now must be resumed post haste. For example, the Air Force invoked stop loss in support of Operation Allied Force in 1998. Following the termination of stop loss on 22 June 1998, eight officers with less than a year of promotion were required to retire upon their original date of separation (1 July 1998); another three officers were required to separate/retire by 1 August 1998. On the other hand, members with a date of separation set by policy were given the option of either extending their dates of separation up to 6 months or withdrawing them. Some leeway must also be provided for members with dates of separation established by law to reschedule the many details incident to final departure from military life.

Section 531. The Marine Corps War College seeks Congressional authority and regional accreditation to issue a master’s degree in Military Strategy. That authority to begin this process is vested in the Commanding General of the Marine Corps Combat Developments Command and was authorized on 1 June 1996. In June 1998, the Marine Corps University achieved a seven-year goal by being accredited by the Southern Association of Colleges and schools to award a master’s degree in Military Strategy. While this accreditation was awarded to the Marine Corps University, it specifically addressed only the degree awarded by the Command and Staff College. The Marine Corps War College now seeks similar authority.

The uniqueness of the Marine Corps War College’s curriculum and program of study is unparalleled by other civilian universities or Federal War Colleges. Most of the Marine graduates of the Marine Corps War College become faculty members of the Command and Staff College. The Command and Staff College already awards a master’s degree, it would be very beneficial for these future faculty members to possess the required academic training when arriving at their new positions at the Command and Staff College.

A master’s degree program would enhance the professional reputation and prestige of the Marine Corps War College. This would facilitate the Marine Corps War College’s efforts to sustain and recruit a world class faculty and demonstrate a high level of faculty competence as first rate scholars and speakers. Section 531 is intended only as a technical amendment to the existing legislation. Enactment of this section would not result in an increase in the budgetary requirements of the Marine Corps.

Section 532. Section 206(d) of title 37, United States Code, states that “[t]his section does not authorize compensation for work or study by a member of a reserve component in connection with correspondence courses if the study is similar to the limitation in the definition of “inactive-duty training” found in 37 U.S.C. 101(22), which states inactive-duty training “does not include an activity performed by a member of the Reserve component with a correspondence course of a uniformed service.” Since the correspondence course restrictions were enacted more than 50 years ago, technological advances affecting instructional methodology have made these restrict-
rmajette on PROD1PC67 with BOUND RECORD

June 29, 2001

than 2,900 secondary schools. The statutory
mission for JROTC is to instill in students
the value of citizenship, service to the
United States, personal responsibility, and a
sense of accomplishment. Surveys of JROTC
cadets indicate that about 40 percent of the
graduating high school seniors with more
than two years participation in the JROTC
program are interested in some type of military affiliation (active duty enlistment, officer program participation, or service in the
Reserve or Guard). Translating this to hard
recruiting numbers, in Fiscal Years (FY)
1996–2000, about 9,000 new recruits per year
entered active duty after completing two
years of JROTC. The proportion of JROTC
graduates who enter the military following
completion of high school is roughly five
times greater than the proportion of nonJROTC students. Therefore, the program
pays off in citizenship as well as recruiting.
Recognizing the merits of the JROTC program, the Military Services have undertaken
an aggressive expansion program and are
committed to reach the statutory maximum
of 3,500 by FY 2006. As a result of this
planned growth, the Military Services have
witnessed a marked increase in the number
of schools seeking establishment of JROTC
units. We now face the real potential that
DoD and a waiting school might both wish to
proceed with an activation, yet face a legislative cap that prevents execution of such a
mutually-desirable course of action. Enactment of Section 533 would permit DoD to be
responsive to mutually agreeable school
needs which might exceed the present 3,500–
unit cap set in law.
Section 534 would extend eligibility for the
Nurse Officer Candidate Accession Program
to students enrolled at civilian educational
institutions with a Senior Reserve Officers’
Training Program (SROTP) who are not eligible for Senior Reserve Officers’ Training
Programs.
The Nurse Officer Candidate Accession
Program (NCP) is a primary accession source
of new nurse officers and provides a hedge
against difficulty in the direct procurement
market. It provides financial assistance to
students enrolled in a baccalaureate nursing
program in exchange for an active duty commitment upon graduation.
Market projections indicate increasing difficulty in recruiting students for the NCP
due to an increase in civilian career opportunities and declining nursing school enrollment. Evidence from nursing journals and
employment industry statistics confirm that
a tightening job market for nurses is expected over the next few years.
Section 2130a of title 10, United States
Code, currently restricts eligibility for the
NCP to students enrolled in a nursing program at a civilian educational institution
‘‘that does not have a Senior Reserve Officers’ Training Program.’’
Eligibility requirements for the SROTP
limit age to 27 years. SROTP scholarships
for junior or senior level students are limited
to a few quotas each year only to replace
students lost through attrition. The NCP age
limit is up to 34 years and only bars those
within six months of graduation. Recruiters
report considerable interest in the NCP program by SROTP-ineligible students.
Extending NCP eligibility to SROTP-ineligible students would expand the potential
applicant pool and demonstrate strong Congressional support and commitment to providing future nurse officers with the necessary skills to meet our healthcare mission
around the world.
Section 535. The Defense Language Institute Foreign Language Center serves as the

VerDate Aug 31 2005

15:12 Feb 22, 2007

12533

CONGRESSIONAL RECORD—SENATE

Jkt 089102

Defense Department’s primary foreign language teaching and resource center. The Institute has been accredited by the Accrediting Commission for Community and Junior
Colleges of the Western Association of
Schools and Colleges (Commission) since
1979. The Commission has recommended that
the Institute obtain degree-granting status
to maintain its accreditation. The Secretary
of Education has endorsed that recommendation. Section 535 would provide the authority
for the Institute to grant an Associate of
Arts degree. There are no resource implications other than the routine administrative
requirements to produce a diploma suitable
for presentation upon graduation.
Section 541 is pursuant to the provisions
and procedures of section 1130 of title 10,
United States Code. The Honorable Sherrod
Brown of the House of Representatives requested the Secretary of the Army, the appropriate official under section 1130, to review the circumstance of this case. Section
541 follows the determination made under
section 1130(b)(2) that the award of the decoration warrants approval. It further recommends a waiver of the specified time restrictions prescribed by law. The Secretary
of the Army and the Chairman of the Joint
Chiefs of Staff both agree and recommend
that Humbert R. Versace be awarded the
Medal of Honor. Section 541 would waive the
period of time limitations under Section 3744
of title 10 to authorize the President to
award Humbert R. Versace the Medal of
Honor.
Section 541 would authorize the President
to award the Medal of Honor to Humbert R.
Versace, who served in the United States
Army during the Vietnam War and who was
assigned as a Captain with A Detachment,
5th Special Forces Group. It would waive the
specific provisions of section 3744 of title 10
that the award be made within three years of
the date of the act upon which the award is
based. The acts of then-Captain Humbert R.
Versace clearly distinguish him conspicuously by gallantry and intrepidity at the
risk of his life above and beyond the call of
duty, as required by section 3741 of title 10 to
merit this legislation and the award.
Section 542 would amend sections 3747, 6253
and 8747 of title 10, United States Code, to
provide clear authority for the Secretaries of
the military departments to replace certain
medals if stolen and to issue medal of honor
recipients one duplicate medal of honor, with
ribbons and appurtenances.
Sections 3747, 6253 and 8747 currently authorize free replacement of any medal of
honor, distinguished service cross, distinguished service medal, silver star, Navy
cross, Navy and Marine Corps medal, or Air
Force cross that is lost or destroyed or becomes unfit for use without the fault or neglect of the recipient. Enactment of Section
542 would also clarify the intent of these sections to authorize specifically the replacement of medals that are stolen, subject to
the limitation that the theft was without
the fault or neglect of the recipient.
If enacted, Section 542 would also authorize the Service Secretaries to issue each
medal of honor recipient one duplicate medal
free of charge. There is no provision in title
10 that authorizes issuance of a duplicate
medal of honor so that the recipient can donate the original medal or otherwise safeguard it and wear the duplicate to functions
and events. In fact, sections 3747, 6253 and
8747 of title 10, in conjunction with sections
3744(a), 6247 and 8744(a) of such title, may be
construed to prohibit the issuance of a duplicate medal of honor.

PO 00000

Frm 00110

Fmt 0686

Sfmt 0634

If Section 542 is enacted, medal of honor
recipients would have to make written application to the Secretary concerned for the
issuance of a duplicate medal, which would
be marked, as determined by the Secretary
concerned, as a duplicate or for display purposes only. The issuance of a duplicate medal
under this new authority would not constitute the award of ‘‘more than one’’ medal
of honor to the same person. Sections 3744(a),
6247 and 8744(a) of title 10 prohibit the award
of ‘‘more than one’’ medal of honor to a person.
Issuance of a duplicate medal of honor for
display purposes would allow recipients to
place their original medals in safekeeping or
donate them to institutions for permanent
display while retaining the duplicate to wear
at events. Medal of honor recipients are expected to wear their medals at many of the
events to which they are invited. According
to the Congressional Medal of Honor Society,
many of the 152 living recipients would like
to donate or otherwise safeguard their original medals because the value of the medals
on the ‘‘black market’’ has made them an attractive target for theft. Medals marked as
duplicates, by contrast, would presumably
have little or no ‘‘black market’’ value and
would be less attractive targets for theft.
The cost of issuing duplicate medals of
honor would be minimal. The current cost of
a medal of honor is approximately eightyfive dollars. If every living recipient requested a duplicate, the cost would not exceed $15,000, including shipping.
Section 543. Section 541 of the Floyd D.
Spence National Defense Authorization Act
(U.S.C.), that restricts eligibility for the
Bronze Star Medal to members of the Armed
Forces who are in receipt of special pay
under section 310 of title 37, U.S.C., at the
time of the events for which the decoration
is to be awarded or who receive such pay as
a result of those events. ‘‘Special pay’’ under
section 310 includes both hostile fire pay
(HFP) and imminent danger pay (IDP). The
reason for the change stemmed from the belief that someone whose duties never took
them away from home did not perform the
same kind of service as someone who was in
the combat zone. The perception was that
most people who received IDP or HFP served
in a combat zone.
Currently, military personnel serve in 43
areas which qualify for IDP or HFP, but only
two areas are further designated ‘‘combat
zones’’—Yugoslavia (Serbia, Kosovo, Albania, the Adriatic Sea, the Ionian Sea above
the 39th parallel, and the airspace above
these areas) and the Persian Gulf. Service
members qualify for IDP not only in wartime
conditions, but also if they are subject to
physical harm or imminent danger due to
terrorism, civil insurrection, or civil war.
HFP is awarded when a service member is
subject to hostile fire or explosion of hostile
mines; on duty in an area in which he is in
imminent danger of being exposed to hostile
fire or explosion of hostile mines; or is
killed, injured, or wounded by hostile fire,
explosion of a hostile mine, or any other hostile action. The decision to declare an area
eligible for receipt of IDP or HFP is not immediate. A recommendation is made by the
regional commander in chief, endorsed by
the Joint Chiefs of Staff, and then approved
by DoD Force Management Policy.
No other higher-level valor award, e.g., the
Medal of Honor, Service Cross, Silver Star,
or Distinguished Flying Cross, has similar
eligibility criteria. Historically, the Bronze

E:\BR01\S29JN1.004

S29JN1


Star Medal has been awarded outside of combat among the Korean conflict when it was approved for personnel stationed in Okinawa for meritorious service in connection with military operations against North Korea, limitingeligibility for the Bronze Star Medal to only those members serving in an area where imminent danger pay is authorized or to those receiving pay. This would exclude any number of deserving members of the Armed Forces.

Awarding of the Bronze Star Medal should be discontinued and any requirement for IDP or HFP and should instead stand alone. The revolution in military warfare has changed the U.S. view on traditional force application and the decorations, many of whose origins recognized traditional ground combat operations, must also keep up and recognize the changes in the way the U.S. conducts warfare.

Section 551 would amend the Uniform Code of Military Justice to lower the blood alcohol concentration (BAC) limit of established drunken operation of a motor vehicle from 0.1 to 0.08 grams or more of alcohol per 100 milliliters of blood or 0.08 grams per 210 liters of breath. The change would bring military practice in line with the recently enacted nationwide drunk driving standard found in section 351 of the Department of Transportation and Related Agencies Appropriations Act for Fiscal Year 2001, Public Law 106-346, 114 Stat. 3563-34.

On March 3, 1998, President Clinton directed the Secretary of Transportation to develop a plan to promote a .08 BAC legal limit, which would include “setting a .08 BAC standard on Federal property, including . . . on Department of Defense installations, and ensuring strong enforcement and publicity of this standard. . . .”

Consistent with this planning effort, DoD legislation was proposed in its omnibus legislation package in the spring of 1999 to amend the Uniform Code of Military Justice to reduce the blood and breath alcohol levels for the offense of drunken operation of a vehicle, aircraft, or vessel from 0.10 to 0.08 grams. The U.S. Senate adopted section 562 of S. 158, corresponding changes to the United States Code. H.R. 1401, as adopted by the U.S. House of Representatives, contained no similar provision. The Conference Report to S. 1589, National Defense Authorization Act for Fiscal Year 2000, requested the Secretary of the United States Department of Defense Committees “on the Department’s efforts to reduce alcohol-related disciplinary infractions, traffic accidents, and other such incidents. The report should include the Secretary’s recommendation regarding any appropriate changes.” The Conference Report noted that a recent General Accounting Office (GAO) study concluded that statutory reductions, by themselves, did not appear sufficient to reduce the number and severity of alcohol-related accidents.

The GAO study cited by the Conference Report found that “. . . BAC laws in combination with other drunk driving laws as well as sustained public education and information efforts and strong enforcement can be effective, [but] the evidence does not conclusively establish that. . . BAC laws in combination with other drunk driving laws as well as sustained public education and information efforts and strong enforcement can be effective, but the evidence does not conclusively establish that. . . BAC laws by themselves result in reductions in the number and severity of crashes involving alcohol.” GAO Report at 22-23.

The GAO report further found that “it is not the effectiveness of the laws that would save if all states passed .08 BAC laws. The effect of a .08 BAC law depends on a number of factors, including the degree to which the law is publicized; how well it is enforced; other existing drunk driving laws in effect; and the unique culture of each state, particularly public attitudes concerning alcohol.” GAO Report at 23. “. . . BAC law can be an important component of a state’s overall highway safety program, but a .08 BAC law is not a ‘silver bullet’. . . .” The GAO report noted that “the best countermeasure against drunk driving is a combination of laws, sustained public education, and vigorous enforcement.” GAO Report at 23.

Since 1983, DoD has pursued a “comprehensive approach” to reduce drunk driving, believing that the best countermeasure against drunk driving is a combination of laws, public education, and enforcement. This comprehensive range of programs currently includes: a .10 BAC alcohol concentration (BAC) statute enforceable by court-martial; strong policies to achieve a reduction in impaired driving; a system for preliminary and mandatory suspension of licenses in cases of impaired driving; education and training programs; and a screening program for identifying alcohol dependent individuals; a process to notify State driver’s license agencies regarding licenses suspended for impaired driving; a local awards program for successful impaired driving programs; and a system to monitor and ensure quality control for impaired driving programs.

Together, these programs have resulted in a reduction in alcohol-related traffic accidents for DoD personnel which compares favorably to analogous statistics from the National Highway Traffic Safety Administration (NHTSA) for the 50 states and the District of Columbia.

DoD recommends that the effectiveness of the existing DoD programs be further enhanced through the amendment of Article 111(2) of the Uniform Code of Military Justice, 10 U.S.C. § 9111(c), to reduce the enforceable BAC level to 0.08.

Reducing the BAC level to 0.08 would be consistent with statutes or administrative policies already in effect in 19 States, the District of Columbia, and Puerto Rico. Six additional States currently have under consideration legislation to change to the 0.08 BAC level. If enacted, DoD believes the 0.08 BAC limit would be an important component of our overall traffic safety program and support a significant reduction in the annual number of alcohol-related fatal and non-fatal crashes involving DoD personnel, with corresponding human and economic savings.

Section 601 The primary purpose of military compensation is to provide a force structure that can support defense manpower requirements and policies. To ensure that the uniformed services can recruit and retain a force of sufficient numbers and quality to support the military, strategic and operational plans of this nation, military compensation must be adequate. Comparison of military members with their civilian counterparts suggests that without some adjustment to both the level and structure of basic pay, the military will continue to face difficulties in both recruiting and retaining.

The results of the military and civilian earnings profile comparisons and the life-cycle cost analysis of the 9th Quadrennial Review of Military Compensation (9th QRMC) lead to several recommendations that both raise the level of pay and alter the structure of the pay table as well. The structural modifications include targeting pay raises to the enlisted mid-grade ranks that will better match their earnings profile, over a career, with that of similarly-educated civilian counterparts and provide a sufficient incentive for these members to complete a military career. Recommended adjustments:

Target large basic pay increases for enlisted members serving in the E-5 to E-7 grades with 6-20 years of service. This would eliminate the BAC structure and thus the shape of the earnings profile, increasing the slope of the earnings profile for midgrade enlisted members to partially achieve the levels suggested by the 9th QRMC.

Raise basic pay for grades E-8 and E-9, to maintain incentives throughout the enlisted career and prevent pay inversion.

Provide a modest increase in basic pay for junior enlisted members. This increase reflects the importance of preventing further deterioration in the percentage of high quality enlistments.

Provide for structural changes in selected pay cells for E3, E4, and E5 to motivate members to seek early promotion in the junior grades.

Raise basic pay for grades O-3 and O-4 to provide increased retention incentives.

Provide a modest increase for other officers to recognize their contribution to the defense effort.

Subsection (a) waives the adjustment in basic pay that is prescribed in section 1009 of title 37, United States Code. Subsection (b) provides a pay table describing the changes in basic pay. These increases are summarized in the table on the following page:

<table>

The following pay cells are increased by a different percentage for structural purposes:

E-4 <2: 13.0; E-4 >6 (through >26): 6.0
E-5 <2: 12.0; E-6 <2: 8.0
E-6 <2: 10.0
E-6 >25: 7.0
W-1 <2: 7.5; W-1 >25: 14.0
W-2 <2: 6.0; W-2 >25: 11.0; W-2 >4: 11.0

Section 602 would amend section 407 of title 37, United States Code, to authorize payment of a partial dislocation allowance of $500 to members who are ordered, for the convenience of the Government (including pursuant to the privatization or renovation of housing), to move into or out of military family housing. Section 601 would allow members to receive a partial dislocation allowance for a government-directed move at the current permanent duty station. Currently, a member directed to move due to privatization or renovation of government housing does so at the member’s expense. In line with the current dislocation allowance authority, the member is making an authorized move; however, there is no authority to provide the member a dislocation allowance. Section 601 would limit payment in these circumstances to $500 initially. Adjustments would be made annually in a manner...
June 29, 2001

consistent with the full dislocation allow-
ance. However, this would require status con-
pent members to incur additional training and
pay, and any other compensation. Section 602
not only would reduce the administrative
burden placed on the Defense Finance and
Accoun-
tability. It also would provide an incentive to retirees who, in the vast
majority of cases, would otherwise actually receive less compensation than that provided
by the retiree pay because of other compen-
sation provided under titles 10, 37 and 38. This rec-
ognizes that military retirees are a valuable
personnel resource that can be employed to
meet the funeral honors mission. By using
retirees to perform this mission, it would
allow active duty and reserve personnel to
continue to train for and perform other vital
military missions. It also recognizes that
this minimal level of compensation could be
used to encourage retirees to volunteer to
perform this mission. Finally, by not requir-
ing a retiree to serve in the lower pay
grade or O-1, O-2 or O-3 who are not on ac-
tive duty, but have accumulated a minimum of
1,460 points (the equivalent of four years of active
duty service) as a warrant officer or an enlisting
member, to be paid at the O-1E, O-2E or O-
3E rate. Currently, a company grade officer
with at least four years of prior active duty
service as a warrant officer or as an enlisted
member is entitled to be paid at a slightly
higher rate. The increase in pay recognizes the
additional experience these officers have gained
by serving in the lower pay grade or as an enlisted
member and rewards them ac-
cordingly. A Reserve commissioned officer
who has accumulated at least 1,460 points
(equivalent to four years of active
duty service) has gained significant military experience similar
to that of a member who qualifies for
this increase in pay because of prior active
duty service. Moreover, because of the part-
time nature of their service, these officers
have gained that experience over a longer pe-
riod of time and are generally more mature.
Allowing these officers to receive this in-
crease in pay recognizes and rewards that ex-
perience on the same basis as officers who
have gathered their experience purely through
active-duty service.

Section 605 would modify section 427 of
title 10, United States Code, to authorize a
housing allowance for the chaplain for the
Corps of Cadets at the United States Mili-
tary Academy. The chaplain, who is a civil-
ian employee of the Academy, would receive
the same allowance for housing as is allowed
for a lieutenant colonel. The chaplain would
also receive fuel and light for quarters in
kind.

Currently, section 4337 reads as follows:

"There shall be a chaplain at the Academy,
who must be a clergyman, appointed by
the President for a term of four years. The chap-
lain is entitled to the same allowances for
public quarters as are allowed to a captain,
and to fuel and light for quarters in kind.
The chaplain may be reappointed." Although
section 4337 specifically provides for a quarters
allowance for the chaplain at the Academy with
fuel and light in kind, the Comptroller General has determined that
this part of the section has been effectively
repealed.
The source statute for section 4337 was en-
acted in 1896 and codified as part of title 10
on August 10, 1906. The Comptroller General
issued an opinion on August 28, 1959, which
held that Congress intended the Classifica-
tion Act of 1949 to supersede the source stat-
ute for section 4337. The purpose of the Clas-
sification Act was to ensure that Federal
employees in like positions received equal
pay. The Comptroller General concluded that
the pay allowances for the academy chaplain were closely
related to compensation and, therefore, the reenactment of the quarters provision as part of active duty pay was unnecessary. Ms. J. A. McCullough, Comp Gen., B-140003. Consequently, the mili-
tary academy chaplain, although charged
rent for quarters, has not received a quarters
allowance, despite the plain language of sec-
tion 4337.

This situation has, over time, undermined the Army’s ability to attract, hire and retain
appointees for the position of chaplain at the
Academy, a position mandated by section
4337. The source statute for section 4337 was en-
acted in 1896 and codified as part of title 10
on August 10, 1906. The Comptroller General
issued an opinion on August 28, 1959, which
held that Congress intended the Classifica-
tion Act of 1949 to supersede the source stat-
ute for section 4337. The purpose of the Clas-
sification Act was to ensure that Federal

allowance, despite the plain language of sec-
tion 4337.
now, nominal retention rates must improve. The case of the Nuclear Officer Incentive Pay demonstrates Congressional commitment to ensuring that adequate staffing is provided for hard-to-retain and critical skills in the nuclear power industry, due to their education, experience, and recognition of their importance to our national security posture. Maintaining this unparalleled coverage Secretaries to recruit officers with critical skills. This is intended to preclude the possibility of insufficient training of commissioned officers who have chosen to reap the rewards of higher levels of potential earnings and without the arduous supervisory assignments. Eventually, many of these remaining officers find the sacrifice of personal time to ensure the maximum officer payment rate at mid grade enlisted pay grades—mid grade enlisted Sailors and junior to mid grade officers. This would increase the maximum enlisted pay rate from $355 to $425, but would maintain the maximum officer payment rate at $595. Therefore, the budgetary impact of Section 611 would be a net increase of approximately $14.5 million per year thereafter through FY 2007. Section 612 would extend the authority to employ accessions and retention incentives to support staffing for nurse and dentist billets which have been chronically undersubscribed. Experience shows that retention in those skills would be unacceptable low without these incentives, which in turn would generate the substantially greater costs associated with recruiting and developing a replacement. The Department and the Congress have long recognized the cost-effectiveness of financial incentives in supporting effective staffing in critical military skills.

Section 613 would extend the authority to employ accessions and retention incentives to support staffing for nurse and dentist billets which have been chronically undersubscribed. Experience shows that retention in those skills would be unacceptable low without these incentives, which in turn would generate the substantially greater costs associated with recruiting and developing a replacement. The Department and the Congress have long recognized the cost-effectiveness of these incentives in supporting effective personnel levels within these fields.

Section 614 would extend the authority to deploy accessions and retention incentives, ensuring adequate manning is provided for hard-to-retain skills, including occupations that are arduous or feature extremely high training costs. Experience shows retention in those skills would be unacceptable low without these incentives, which in turn would generate the substantially greater costs associated with recruiting and developing a replacement. The Department and the Congress have long recognized the cost-effectiveness of these incentives in supporting effective staffing in these occupations. In the case of the Nuclear Officer Incentive Pay Program, a two-year extension demonstrates support to career-oriented officers.

Nuclear officer accessions and retention continues to be a challenge below that required to sustain the post-drawdown force structure. Fiscal Year (FY) 1999 retention for submarine officers was 30 percent (required 29 percent). For trained Surface Warfare Officers (SWO(N)e) it was 20 percent (required 21 percent). FY 2000 retention for submarine officers was 28 percent (required 24 percent) and for trained Surface Warfare Officers (SWO(N)e) it was 20 percent (required 21 percent). Although adequate for now, nominal retention rates must improve by FY 2001 to 38 percent for submarine officers to adequately meet growing manning requirements. Likewise, current accession production must improve. Although nuclear accessions exceeded the first time meeting submarine officer accessions since FY 1991, FY 2001 nuclear officer accession goals have increased to meet the manning requirements for an increased force size.

Inadequate accessions in previous years and continued poor retention only compound the manning requirements for remaining, as demanding and stressful sea tours are lengthened to meet safety and readiness. Shortfall of offcers due to both effects is sufficiently severe, the entire sea/shore rotation plan becomes unbalanced, and officers eventually must rotate directly from one sea tour to the next. This was the case in the 1960s and 1970s when many officers spent as many as 16 or more of their first 20 years in sea duty and nuclear warfare had not begun, and the Navy had no means of replacing this trained military asset in the Total Force. The prior service enlistment bonus offers an incentive to those individuals with prior military service to transition to the Selected Reserve.

The Reserve components have historically found it challenging to meet the required manning in the health care professions. The incentive that targets those healthcare professionals who possess a skill that has been identified as critically short is essential if the Reserve components can meet the manning requirements. Moreover, the special pay for enlisted members assigned to certain high priority units provides the Services with an incentive to meet prioritized manning shortfalls in critical undermanned units.

The expanded role of the Reserve components requires not only a robust Selected Reserve force, but also a robust manpower pools—the Individual Ready Reserve. Extending the Individual Ready Reserve bonus authority would allow the Reserve component to target this bonus at individuals who possess skills that are under-subscribed, but are critical in the event of mobilization. Combined, the Reserve component bonuses and special pays provide meaningful incentives that are necessary if the Reserve components are to meet manning requirements. Extending these authorities would ensure continuity of these programs. Since these incentive programs are recurring Service budget items, there is no additional cost for extending these authorities.

Section 616 would amend title 37, United States Code, by establishing a broad authority for an Officer Critical Skill Accession Bonus to provide needed flexibility for Service Secretaries to recruit officers with critical skills. This is intended to preclude the need to add future individual statutory bonus provisions for specific officer career categories experiencing an accession shortfall. Over the past several years, officers with certain critical skills have separated from the uniformed services at higher than historical rates, and recruitment of officers into these critical specialties has declined. This, in large measure, likely a result of higher compensa- tion and benefits being offered for these skills in the private sector. Recruitment shortages among officer skills can be expected to further erode absent enactment of certain authorities for recruitment bonuses that can be utilized to offset the pull on these critical specialties from the civilian.
marketplace. Examples of specialties currently in demand include interior design, graphic design, and marketing. These professions are expected to grow by 20% and 30%, respectively, by 2023.

2. Educational credentials contribute to a successful career. Graduates with a bachelor’s degree in business administration or information technology have a 22% higher starting salary than those with a high school diploma. Additionally, a master’s degree in finance can lead to an average salary increase of 67%.

3. Networking opportunities are crucial. Joining professional organizations, attending industry events, and maintaining a strong online presence can open doors to potential employers. According to the National Society of Professional Engineers, networking is one of the most effective ways to find job opportunities.

4. Demonstrating a commitment to professional development is essential. Pursuing certifications, attending workshops, and taking courses can enhance skills and expand career prospects. According to the American Society for Engineering Education, 72% of engineers who have completed professional development programs report a higher level of job satisfaction.

5. Being flexible and adaptable is key. As the job market evolves, the ability to adapt to new technologies and changing job responsibilities is crucial. This flexibility can also open doors to new career opportunities.

In conclusion, combining a strong educational background, networking skills, professional development, and adaptability can lead to a successful and rewarding career in the engineering profession.
The Funeral Transportation and Living Expense Benefits Act of 1974, section 411f(b), restricts the time necessary for travel and transportation allowances to attend the burial of deceased family members. The Act, enacted in 1974, authorizes the payment of travel and transportation allowances for a period limited to two days and the time necessary for travel.

Section 411f would be amended by adding a new subsection (d) to define burial transportation allowances to include "the deceased's widow, children, stepchildren, mother, father, stepfather and stepmother." If none of the family members in the preceding sentence "desire to be granted such benefits," then the benefits may be granted to the deceased's brothers, sisters, half-brother, and half-sisters.

For members of the armed forces serving during World War II and the Korean War whose remains have recently been recovered and identified, there may be no surviving spouse or child, and other expenses for travel and transportation allowances to attend the burial. As noted above, under section 411f, dependents who may receive travel and transportation allowances include the spouse of a deceased soldier and certain unmarried children, primarily those under age 21, who are not surviving spouse or qualifying child. However, in the case of surviving spouse and parents, the surviving spouse may be deceased and no child may qualify because of their age. Section 623 would amend section 411f and add a new provision similar to the provision in section 1482(d) of title 10, concerning the burial of remains that are commingled and cannot be identified. Under Section 623, if there is surviving spouse and qualified child or parent, the person designated to direct disposition of the remains could receive travel and transportation allowances along with two additional persons closely related to the deceased member selected by the person who directs disposition of the remains.

In many cases, this would likely include an adult child or children of the deceased member.

Section 623 would also amend section 411f to authorize the payment of travel and transportation allowances for a person to accompany a family member who qualifies for travel and transportation allowances but who is unable to travel alone to the burial ceremonies because of age, physical condition, or other justifiable reason as determined under uniform regulations prescribed by the Secretary concerned.

Sections 2004 of title 10, United States Code, authorizes the Secretary of a Military Department to detail selected commissioned officers at accredited law schools to serve on active duty following commencement in any single year. Officers detailed for legal training must agree to serve Component members, which was sent to Congress on November 5, 1999, recognized this shortcoming and recommended that the law be amended to provide medical coverage when the member remains overnight between successive training periods, even if they reside within reasonable commuting distance.

Section 633. Section 2004 of title 10, United States Code, authorizes the Secretary of a Military Department to detail selected commissioned officers at accredited law schools for training leading to the degree of bachelor of laws or juris doctor. No more than 25 officers from each Military Department may commence such training in any single year. Officers detailed for legal training must agree to serve on active duty following completion of the training for a period of two years each for each year of legal training. This service obligation is in addition to any service obligation incurred by the officer under any other provision of law or agreement.

Section 626 would extend the maximum period that a member of the Selected Reserve has to use the educational benefits provided under the Montgomery GI Bill–Selected Reserve (MGIB–SR) from the current 10-year limit to 14 years. With the increased use of the Reserve component, members of the Selected Reserve are facing increased unscheduled leave. The additional time spent performing military service reduces the amount of time they have available for other activities—be it work, school, or other leisure activities, or civilian education. Balancing a full-time civilian career and a military career is becoming increasingly more challenging. One area that is likely to suffer the greatest result of civilian education. Increasing the number of years that a member of the Selected Reserve has to use this benefit will allow them to reorganize their schedule to support their military service and provide them with an extended opportunity to use this benefit. Additionally, since membership in the Selected Reserve is voluntary, the MGIB–SR educational benefit, it would also serve as a retention incentive for those who have not been able to use the benefit by the current 10-year limiting period.

Section 622 would add overnight health care coverage when authorized by regulations for Reserve Component members who, although they may reside within a reasonable commuting distance, have a selective reserve duty training site, are required to remain overnight between successive drills at that training site because of mission requirements when it is not feasible for members to return to their residence impractical. On those occasions when it is not feasible for members who live in the area to return to their residence between successive drills because of mission requirements, they are currently not protected should they become injured or ill during the overnight period. A Military Defense report to Congress on the means of improving medical and dental care for Reserve Component members, which was sent to Congress on November 5, 1999, recognized this shortcoming and recommended that the law be amended to provide medical coverage when the member remains overnight between successive training periods, even if they reside within reasonable commuting distance.

Section 633. Section 2004 of title 10, United States Code, authorizes the Secretary of a Military Department to detail selected commissioned officers at accredited law schools to serve on active duty following commencement in any single year. Officers detailed for legal training must agree to serve on active duty following completion of the training for a period of two years each for each year of legal training. This service obligation is in addition to any service obligation incurred by the officer under any other provision of law or agreement.

Section 620 of title 10, United States Code, authorizes the Secretary of a Military Department to detail selected commissioned officers at accredited law schools to serve on active duty following commencement in any single year. Officers detailed for legal training must agree to serve on active duty following completion of the training for a period of two years each for each year of legal training. This service obligation is in addition to any service obligation incurred by the officer under any other provision of law or agreement.
obtain education or training under the section
of the acquisition with the approval of the States
The purpose of this proposed legislation is
to make changes in current statutes, which was based on the old milestone 0/II/III model, so that they correspond to similar milestones in the new model. There is no intent to diminish con
gressional oversight or to change the con
tent or amount of reporting requirements to the Congress, although the timing of some reports will change.
Under the new milestone A/B/C model, pro
gram initiation would be under the old milestone 0/II/III model. The reason for this is that the new model anticipates more extensive technology development before committing to a new program using those
technologies, while the old model completed technology development after program initi
ation. Approval to begin analysis of alter
natives that previously occurred at Milestone
0 (that now corresponds to Milestone A) will continue to be done in Concept and Technology Development. Work that was previously done in the Technology Development phase (Program Development and Risk Reduction) is split around Milestone B with the technology development work being done before Milestone B and the system proto
typing and engineering and manufacturing development being done in System Develop
ment and Demonstration phase, intended to apply to an initi
ation program, are changed to be required at Milestone A/B/C prior to System Development and Demonstration. Likewise, requirements identified in law for Milestone II or prior to the Engineering and Manufacturing Develop
ment, intended to apply to system engineer
ing work, are changed to be required at Mile
stone B or prior to System Development and Demonstration, both of which encompasses this work effort. All requirements identified in the law for Milestone III or prior to pro
duction would be required at the full rate production phase. Sections 2366, 2400, 2432 and 2434, are essen
tially unchanged in reporting requirements.
Section 2435 of Title 10 requires an acquisi
tion program baseline for Low-Rate Initial Production prior to entering work following each of the mile
stone I, II, and III decisions. In the case of the acquisition program baseline, a new baseline description will be generated at pro
gram initiation, and at each major transi
tion point (from system development and demonstration to low-rate production, and from low-rate production to full-rate produc
tion). The first and second program baselines will be completed later than baselines gener
ated under current statute. The first baseline
will continue to describe the system concept at program initiation and will also serve to describe the program through engi
neering development. The second baseline will describe the system as engineered prior
to beginning production. There will be no change in the description for the third base
line.
Section 802(b) of Public Law 106-259 and Section 811 (c) of Public Law 106-398 require Information Technology certification at each major decision point (i.e., milestone). These certifications will differ as always been translated from the milestones III/III of the old model to milestones A/B/C of the new model.
Section 702 conforms the nuclear aircraft carrier to current practice by specifying that the exclusion from maintaining core logistics capabilities, with respect to nuclear aircraft carriers currently under design and development, is established in section 2603 to authorize an officer detailed to law school under section 2603 to authorize an officer detailed to law school and attending a school that will grant in-state tuition rates to out-of-state students. This effectively pro
hibits officers from seeking admission to many other in-state tuition rates in the United States. If an officer could accept a scholarship to cover all or part of the costs of attending law school, it may be unneces
sary for an officer to attend law school at which the officer qualifies for in-state tuition rates.
Section 633 would amend sections 2004 and 2603 to authorize an officer detailed to law school for legal training under section 2004 to accept a scholarship from the school or other entity under section 2603, with the services covered under both sec
tions to be covered consecutively.
Section 701. As a result of studies done in response to direction in Section 912 of the National Defense Authorization Act for Fiscal Year 1998 (Pub. L. 105-85), Defense Science Board reports, and General Accounting Office reports, as well as a desire to im
prove industrial base capabilities, the Depart
ment rewrote its acquisition policy doc
uments. The purpose of the rewrite was to fo
cus on providing proven technology to the warfighter faster, reducing total ownership cost, and emphasizing affordability, supportability, and interoperability. As part of the rewrite, the Department created a new model of the acquisition process that separ
ates technology development from system integration, allows multiple entry points into the acquisition process, and requires demonstration of utility, supportability, and interoperability prior to making a commit
ment to production. As part of the new model, milestone names were changed to Milestone A (approval to begin analysis of alter
natives), Milestone B (approval to begin in
tegrated system development and demon
stration), and Milestone C (approval to begin low-rate production). The phases of ac
quisition were changed to Concept and Tech
ology Development (in which alternative concepts are considered and technology de
velopment is conducted), System Develop
ment and Demonstration (in which compo
nents are integrated into a system and the system is demonstrated), and Production and De
ployment (in which the system is produced and introduced at a low-rate to allow for initial oper
ational test and evaluation, creation of a production base, efficient ramp-up of produc
tion, and deployment). The Integration of the Production and Deployment phase is the Full-Rate Production Decision Review at

12539
applicable to military members in similar occupations employed by the Department of Defense for which
they would need to increase the threshold to $85,000. This would be so disproportionate to the $85,000 statutory threshold that it is more appro-
propriate to seek a legislative change.

DOD would continually readjust the threshold over time to reflect changes in small business participation. For example, in fiscal year 1999, DOD achieved a small business A&E participation rate of 40 percent, significantly below the 40 percent goal established by the Demonstration Pro-
history. Historically, approximately 30 percent of A&E service contracts were awarded to small busi-
nesses. Continual adjustments to the threshold to reflect such changes in small business participation would be impractical and con-
fusing to both contracting officials and small businesses.

Repealing section 2855(b) will eliminate the $85,000 threshold. As a result, A&E contracts for small business construction and military fam-
ily housing projects could be set aside exclu-
sive for small businesses to achieve the small business competitiveness demonstration A&E goal mandated by 15 U.S.C. 644. Ac-
cordingly, this proposal would eliminate conflicting statutory provisions that cur-
rently are making it unnecessarily difficult for DOD to achieve the small business goal for A&E contracts.

Section 711. Section 2384 of title 10, United States Code provides that ball and roller bearing contracts must be awarded to small business con-
cerns. This proposal would do away with this requirement.

Further, DOD would need to continually readjust the statutory threshold that it is more appro-
priate to seek a legislative change.

fusing to both contracting officials and small businesses.
CONGRESSIONAL RECORD—SENATE

June 29, 2001

The committee also directed the Secretary of the Air Force to change the procurement operation of any CACAOs, or to permit any combinations of supply and services functions in upcoming procurement, that would violate the tenets of the existing CACAOs contract agreement. The Committee had similar language in its report on the 1997 Defense Authorization Act (and directed the Secretary of the Army and the Secretary of the Navy to consider the application of the CACAOs program as a means to further reduce the cost of essentially the same functions).

FY 99 Defense Authorization Act

Congressional concerns over CACAOs led to an amendment that formed the CACAOs-style operation. With the proposed combined competition or contract, the agency has to explain why a combined competition or contract is the best method to obtain supplies and services. The Comptroller General reviews the report and submits to Congress a briefing regarding whether the cost savings and efficiencies identified in the report are achieved.

The CACAOs law was based upon the assumption that the government would be running an inefficient supply operation for materials to be used in Government operations. The environment today is entirely different. Due to A-76 emphasis, Civil Engineering (CE) is a viable source; Home Depot and super stores and the International Merchant Purchase Authorization Card (IMPACT) make it unnecessary to maintain supply inventories; and greater competition is obtained when the supply function is included in the CE effort. CACAOs was designed to replace inefficient government management of commercial inventories. As we contract out CE and other base support functions, the users of these supplies will be dependent on the contractor to provide these materials. The Department will end up creating situations where the CE contractor, or the Most Efficient Organization (MEO), will be required to obtain supplies from the CAO contractor in order to do their work. These common commercial items would become Government Furnished Property (GFP) under the contract and the CE contractor cannot be held fully responsible for all aspects of project completion. If CACAOs fails to provide suitable materials on schedule, the CE contractor could be entitled to an equitable adjustment for late or defective GFP.

As a general rule, the Department should only provide GFP when the government owns an identifiable piece of property and supplies from commercial inventories. As we contract out CE and other base support functions, the users of these supplies will be dependent on the contractor to provide these materials. The Department will end up creating situations where the CE contractor, or the Most Efficient Organization (MEO), will be required to obtain supplies from the CAO contractor in order to do their work. These common commercial items would become Government Furnished Property (GFP) under the contract and the CE contractor cannot be held fully responsible for all aspects of project completion. If CACAOs fails to provide suitable materials on schedule, the CE contractor could be entitled to an equitable adjustment for late or defective GFP.

Section 435(b)(6) states that “Ninety-five percent of the cost savings through the use of contractor-operated civil engineering supply stores is due to savings in the actual cost of procuring supplies.” This statement means no longer accurate and seems to apply to Form 9 processing costs, not IMPACT card costs.

Section 2301(g) of title 10, United States Code, and sections 2303(g) and 427 of title 41, United States Code, permit the use of special simplified procedures for purchases of property and services for amounts not greater than the simplified acquisition threshold (SAT). SAT Section 4202 of the Clinger-Cohen Act.

Section 457. The proposed legislation seeks to modify section 4202 of the Clinger-Cohen Act. Applying the test program to Certain Commercial Items, extended the authority to use special simplified procedures to purchases for amounts greater than the SAT but not to exceed the simplified acquisition threshold. The purpose of this test program is to vest contracting officers with additional procedural discretion and flexibility, so that commercial item acquisitions in this dollar range may be solicited, offered, evaluated, and awarded in a simplified manner that maximizes efficiency and economy and minimizes burden and administration costs for both Government and industry.

The test program was enacted into law on February 10, 1996. Final changes to the Federal Acquisition Regulation (FAR) to implement the test program were issued on the statutory deadline of January 1, 1997. The due date for the Comptroller General report does not provide time to process a legislative proposal that would prevent the test program from expiring once the Comptroller General has submitted the report. This provision creates a potential test program authority to January 1, 2003, to provide sufficient time to assess this potentially valuable acquisition reform authority based on the GAO’s findings and, if warranted, seek to make this authority permanent.

Section 714 eliminates the prohibition on using funds to retire or dismantle Peacekeeper intercontinental ballistic missiles below certain levels. This provision is in specific support of the amended budget and will result in considerable savings.

Section 101. The proposed change would provide the Services the flexibility to proceed with construction contracts without disruption or delay by excluding the cost associated with unforeseen environmental hazard remediation from the limitation on cost increases. Unforeseen environmental hazard remediation refers to asbestos removal, radon abatement, and any other environmental remediation that the contractor could not be reasonably anticipated at the time of contract award. The threshold on unspecified minor construction projects is increased to $750,000 for general projects (from $500,000) and to $1,500,000 for projects involving life safety issues (from $1,000,000). The O&M unspecified minor construction thresholds were last raised in 1997.

The current threshold limits the Services’ ability to complete projects in areas with high costs of construction, such as overseas and in Alaska and Hawaii. The reality is $500,000 does not buy much construction, even in “normal” cost areas, at a time when the average regular military construction (MicCon) project costs $12 million. On these small construction projects, labor costs cut heavily into the amount of tangible “brick and mortar” which any project must deliver to make a facility usable to its customer. Without this relief, there may be a two or three year delay in completing needed small construction projects if MicCon appropriations are not used, as unspecified minor construction funds within this appropriation are very limited and regular MicCon projects must be individually authorized and appropriated in advance.

Section 717. The proposed legislation seeks authority for Federal tenants to obtain facility services and common area maintenance funds from the Federal Acquisition Regu- lator (FARA) or the LRA’s assignee as part of the leaseback arrangement rather than procure such services competitively in compliance with Federal procurement laws and regulations. This authority to pay the LRA or LRA’s assignee for such services under this authority would be allowed only when the Federal tenant leases a substantial portion of the installation; only so long as the facility services or the specific type of common area maintenance are not of the type that a state or local government is obligated by state law to provide to all landowners in its jurisdiction for no individual cost; and only when the rate charged to the Federal tenant is no higher than that charged to non-Federal entities. The proposed legislation also expands the availability of using leaseback authority for property on bases approved for closure in BRAC 1988.

A leaseback is when the Department of Defense transfers surplus facilities base closure to a state or local government, by deed or through a lease in furtherance of conveyance to an LRA. The transfer requires the LRA to lease the property back to the Federal Department or Agency at a Federal tenant’s request to satisfy a Federal need for the property.

Current leaseback legislation does not exempt Federal tenants from Federal procure- ment laws and regulations. Therefore, Federal tenants attempt to obtain facility services and common area maintenance, such as janitorial,
Much of the same information as required in current law, etc., provides Congress with budget submission, budget testimony and reporting requirements, etc., to create a comprehensive budgetary overview of Federal operations and allow Congress to assess the effectiveness.

In addition, this report was recommended for termination in 1995 based on survey data collected under the Paperwork Reduction Act, with estimated cost savings of at least $50,000 per year.

Section 802 amends chapter 6 of title 10, United States Code, by adding a new section 109 to consolidate the various existing legal authorities governing the DoD Regional Centers to ensure each of the Regional Centers can operate under the same set of authorities, which will ensure they can operate effectively.

The Department of Defense Regional Centers for Security Studies are an important national security initiative developed by the Secretary of Defense, William Perry. These Centers, which serve as essential institutions for bilateral and multilateral communication and military and civil matters, exchanges, now exist for each major region—Europe, Asia, Latin America, Africa and most recently for the Middle East.

The Regional Centers are very important tools for achieving U.S. foreign and security policy objectives, both for the Secretary of Defense and for the regional CINCs. The Centers allow the Secretary and the CINCs to bring together in a comprehensive manner with other militaries and defense establishments around the world to lower regional tensions, strengthen civil-military relations in developing nations and address critical regional challenges. The Department has had extremely good results with the Centers in each region. For example, more than twenty Marshall and Asia-Pacific Center for Strategic Studies (also known as the Asia-Pacific Center for Strategic Studies) are currently charged with providing balance, shared regional leadership from developed nations, whose contributions provide balance, shared regional leadership and non-U.S. perspectives, pay for their own travel, lodging, meals and expenses in connection with Center activities, and invite participants from defense-related government agencies and non-governmental organizations to bring together participants from across the spectrum of the national security establishment in their respective countries.

Broadening this pool to include participants from non-governmental organizations and legislative institutions will further strengthen the quality of discussion at the Centers and help establish additional important professional relationships among participants from the various regions.

Finally, enactment of section 802 would confirm the authority of the Secretary of Defense to manage all the Centers effectively. The Military and civilian authorities and unique organizational structures have made effective management and oversight of the Centers quite challenging. Defense to manage all the Centers effectively.

The proposal reflects that organizational change.
apply them to all of the Centers will further improve the management structure at the Regional Centers, and I am sure that the Regional Centers are thoroughly in-corporated into the Department's broader engagement strategy and funded appropri-ately.

This proposal provides no new spending au-thority. No additional resources are needed to implement these changes and as the exist-ing departmental management structure mat-tures, the Department expects to realize greater efficiencies in the management of the Regional Centers.

Second, we will amend all references to the former "Military Airlift Command" con-tained in title 10 and title 37 to refer to the command by its current designation as the "Air Mobility Command." By Special Order AMC GA–1, 1 June 1992, Air Mobility Com-mand replaced the Military Airlift Command as a United States Air Force Major Com-mand. This change was previously recognized to a certain extent in title 10, United States Code 130a (Management headquarters and headquarters support activities personnel; limited duration) (b) (Military Airlift Command Headquarters and Headquarters Support Personnel Assigned to United States Transportation Command), which specifi-cally designated the Air Mobility Command as a component command of United States Trans-portation Command. That provision in section 130a was deleted by section 921 of Public Law 106–65, 5 October 1999. As Military Airlift Command no longer exists and Air Mobil-ity Command is not referenced in any stat-ute, updating the listed provisions of the United States Code is appropriate.

Section 801 would amend section 1066 of title 10, United States Code, to increase the number of Defense Intelligence Senior Exec-utive Service (DISES) positions to 566, within the Defense Civilian Intelligence Per-sonnel System (DCIPS) from 517 to 544. En-actment of the proposed amendment would enable the Secretary of Defense to allocate the 27 additional DISES positions to the Na-tional Imagery and Mapping Agency (NIMA), as the Director of Central Intelligence (DCI) simulated in section 1113 of title 10, United States Code, 104–201, 110 Stat. 2745, 2747) the number of DISES po-sitions was set at 492. This ceiling, however, was raised to 517 positions by section 1142 of the Floyd D. Spence National Defense Authoriza-tion Act for Fiscal Year 2001 (Public Law 106–398, 114 Stat. 1654).

The conference report accompanying the conference report a more meaningful and up-to-date projections into the report, thus making the time to incorporate the President's budget pro-jections into the report, thus making the report more meaningful and up-to-date re-quire the implementation of a legislative process. This would also officially require data from the U.S. Coast Guard Reserve, which has been provided in past years but is not re-quired by law.

Subsection (b) would eliminate the re-quirement for data that is no longer viable, such as the full wartime requirement of equipment over successive 30-day periods and non-deployable personnel. It would also expand the requirement for the current status of equipment compatibility to all Reserve Components, instead of just for the Army. Overall, the revised subsection (b) is written to expand the scope and remove the restrictive nature of the language. This would provide the Reserve the ability to present a clearer and more com-plete picture of the Reserve Component equipment needs.

Section 112 would repeal subsection 153(b) of title 10 and amend section 118(e) to con-solidate redundant reporting requirements related to the assessment of service roles and missions. Subsection 153(b) requires the Chairman to submit to the Secretary of De-fense, a review of the assignment of roles and missions to the armed forces. The review must be prepared once every three years, or upon the request of the President or the Secre-tary.

Section 118 of title 10 established a perma-num requirement for the Secretary to con-duct a Quadrennial Defense Review (QDR) in conjunction with the Chairman. The Depart-ment of Defense has designed the QDR to be a fundamental and comprehensive examina-tion of America's defense needs from 1997–2015, to include assessments of potential threats, strategy, force structure, readiness posture, military modernization programs, defense infrastructure, and other elements of the defense program. Amending subsection 118(e) would explicitly require the Chair-man's review of the QDR to include an as-sessment of service roles and missions and recommendations for change that would maximize force efficiency.

Simultaneously preparing the QDR and the roles and missions study requires the con-centrated efforts of many Joint Staff action officers for a period of eighteen months. Eliminating this duplication of ef-fort, however, will significantly enhance the Joint Staff's ability to meet an expanding list of congressionally or Department of De-fense mandated reporting requirements on a wide variety of sensitive defense topics. These topics include joint experimentation, training, and, integration of the armed forces, examination of new force structures, operational concepts, and joint doctrine; global information operations; and homeland defense, particularly with regard to man-aging the consequences of the use of weapons of mass destruction within the United States, its territories and possessions.

Section 811 would amend section 10841 of title 10 concerning the annual report to Con-gress on National Guard and Reserve Compo-nent equipment. During the preparation of the budget year 2000 National Guard and Re-serve Component Equipment Report, it be-came clear that changes were needed to both the report and process in order to make the report more relevant to Congress. As a re-sult, a joint working group was commis-sioned from the Office of the Assistant Sec-retry of Defense for Reserve Affairs to ana-lyze the report and process. Key changes to the report and process are as follows:

1. Incorporating all Reserve Components, instead of just for the Army.
2. Expanding the requirement for data that is no longer viable, such as the full wartime requirement of equipment over successive 30-day periods and non-deployable personnel. It would also fold the legislative process.
3. Officially require data from the US Coast Guard Reserve.

June 29, 2001

CONGRESSIONAL RECORD—SENATE 12543
Section 821 would amend section 2572 of title 10, United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. However, there are exceptions to these standards for cases where national interests require the use of condemned materiel. This amendment would codify these exceptions and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 822(1) of the proposal would authorize the Secretary of Defense to exchange ''condemned combat materiel'' with foreign air carriers. This provision would allow the Department of Defense to exchange ''condemned combat materiel'' with foreign air carriers to reduce the cost of disposal. This exchange is consistent with the United States obligations under international law and would benefit foreign allies.

Section 822(2) would require ''check-rides'' to be conducted for the Department of Defense. This provision would ensure that military personnel are adequately trained before conducting test and evaluation activities. The Secretary of Defense would be authorized to conduct check-rides for military personnel, and the results of these check-rides would be used to improve the training program.

Section 822(3) of the proposal would require ''technical changes'' to be made in the Department of Defense's policies. This provision would allow the Secretary of Defense to make changes to policies to improve the effectiveness of test and evaluation activities. The amendment would also require the Secretary of Defense to consult with the test organization when making these changes.

Section 822(4) of the proposal would authorize the Secretary of Defense to require ''reciprocal use'' of test and evaluation facilities. This provision would allow the Department of Defense to share test and evaluation facilities with other countries to improve U.S. interoperability. The Secretary of Defense would be authorized to enter into reciprocal agreements with foreign governments or international organizations.

Section 822(5) would amend subsection (i) of section 2640 title 10 United States Code. This provision would require the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 823 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 824 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 825 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 826 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 827 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 828 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 829 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 830 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 831 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 832 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 833 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 834 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 835 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 836 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 837 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 838 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 839 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 840 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 841 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 842 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 843 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 844 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 845 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 846 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 847 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 848 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 849 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 850 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.

Section 851 would amend section 23501 of title 10 United States Code. This section requires the Department of Defense to establish uniform standards for handling condemned materiel. This amendment would codify these standards and authorize the Secretary of Defense to determine if the estimated value of condemned materiel justifies the expense of disposal.
In the past, MRTFB Installations did not charge defense contractors a fully burdened rate to use their facilities when conducting test in association with a defense contract. A Service audit finding opined that the MRTFB installations had misspent the law and charged defense contractor’s costs to be commercial users, thereby requiring them to be charged the fully burdened rate. However, weapons programs have prepared their budget under the assumption that the fully burdened rate would not be charged to the defense contractors acting on their program’s behalf. The amended subsection (c) of this proposal would make MRTFB test and evaluation services available to defense contractors under the same access and user charge policies as applied to the sponsoring Department of Defense component. This would assure that the MRTFB is able to perform its fundamental role of support to defense acquisition programs under the same policies as existed prior to section 2681, while continuing to leave the choice of “where to test” to the defense contractors. The amendment proposed in subsection (c) of this proposal would extend this concept to the contractors of other U.S. government agencies. If section 1003(c) is never enacted, there may be a need to increase to specific research and development programs.

Section 902 would amend 10 U.S.C. §2350a to improve the department’s ability to enter into cooperative research and development projects with other countries. This amendment would incorporate references to the terms “Major non-NATO ally” to allow countries like Australia, South Korea or Japan to be recognized, not just as other friendly foreign countries, but as major allies.

Section 913 would amend chapter 53 of title 10, United States Code, to provide the Secretary of Defense the authority to recognize superior noncombat achievements or performance by members of friendly foreign forces and other foreign nationals that significantly enhance or support the National Security Strategy of the United States.

Currently, the department has authority to recognize superior achievements and performance by foreign nationals is limited to awarding military decorations to military attaches, and only to very few, individual acts of heroism, extraordinary achievement or meritorious achievement, when such acts have been of significant benefit to the United States or materially contributed to the successful prosecution of a military campaign of the Armed Forces of the United States. Section 913, as included, would provide authority to DoD to recognize superior achievements and performance by members of friendly foreign forces and other foreign nationals that significantly enhance or support the National Security Strategy of the United States.

Section 912 would amend 10 U.S.C. §2350a to improve the department’s ability to enter into cooperative research and development projects with other countries. This amendment would incorporate references to the terms “Major non-NATO ally” to allow countries like Australia, South Korea or Japan to be recognized, not just as other friendly foreign countries, but as major allies.

Section 913 would amend chapter 53 of title 10, United States Code, to provide the Secretary of Defense the authority to recognize superior noncombat achievements or performance by members of friendly foreign forces and other foreign nationals that significantly enhance or support the National Security Strategy of the United States.

Currently, the department has authority to recognize superior achievements and performance by foreign nationals is limited to awarding military decorations to military attaches, and only to very few, individual acts of heroism, extraordinary achievement or meritorious achievement, when such acts have been of significant benefit to the United States or materially contributed to the successful prosecution of a military campaign of the Armed Forces of the United States. Section 913, as included, would provide authority to DoD to recognize superior achievements and performance by members of friendly foreign forces and other foreign nationals that significantly enhance or support the National Security Strategy of the United States.

One of many examples of how this gap in legislative authority adversely impacts on American servicemembers is the experience of the United States Army Special Forces Command (Airlborne). Since the first Special Forces unit was activated on June 19, 1902, Special Forces personnel have routinely de-

The program, which may be created at the discretion of DoD, would involve censuses on permitting a company to recoup the costs it incurs in training an employee for a job with that company. The purpose of this incentive is to encourage non-federal em- 
ployees to hire and retain employees whose employment with DoD is terminated. To be eligible for the reimbursement, a company must have employed the former DoD em- 
ployee for at least 12 months. In short, this proposal allows for training for a specific job; it is not designed towards ge-

Section 913 clarifies that former Defense Imagery and Mapping Agency personnel transferred into the National Imagery and Mapping Agency pursuant to the National Defense Authorization Act for Fiscal Year 1997, Public Law 104- 
201, retain third party appeal rights under chapter 75 for such time as they remain De- 
artment of Defense employees employed without a break in service in the National Imagery and Mapping Agency. The section also permits the employees so affected to waive the provisions of this section. How- 
ever, by doing so, the employee forfeits his or her rights under this section. 

Questions on the amount of compensation due a possessor of these materials have aris- 
ened in the determination of what has been permitted. This proposal, if enacted, would provide needed clarification on several 

Motor vehicles shipped under the authority of sections 2634 of title 10 and section 5727 of title 5 are owned or leased by members of the armed forces or federal employees and are being transported out of the country pursuant to the member’s or employee’s change of permanent station orders. The vast majority of motor vehicles shipped under these two provisions of law belong to Department of Defense personnel, and are for personal use by the member or employee. In the vast majority of cases in which a stolen vehicle has been shipped overseas by a military member or federal employee, the Customs Act does not authorize the Secretary of Defense to provide the Director, NIMA, the authority to set up a critical skills under-

CONGRESSIONAL RECORD—SENATE

The proposal will not increase the budgetary requirements of the Depart- 
ment of Defense or other federal agencies,
and may result in savings from not having to store or manage potentially environmentally harmful materials.

Section 923 concerns Department of Defense gift initiatives. The amendments would clarify items which may be loaned or given under section 7545 of title 10, United States Code. Amendments to section 7545(a) of title 10 would clarify that the Secretary may donate either obsolete ordinance material or obsolete combat material to qualified organizations under section 10 U.S.C. 2572, a statute which is similar, but not identical, to section 7545. Addition of the term “obsolete shipboard material” covers items such as anchors and ship propellers, which are frequently sought from the Navy for use as display items.

The deletion of “World War I or World War II” and the island of the USS America would allow coverage of other wars, such as the Korean, Vietnam, and Persian Gulf wars as well as any future war. The deletion of “soldiers” and the term “men’s” would clarify that associations related to any branch of military service are qualified organizations.

A new subsection (d) is added because currently no federal statute expressly addresses the loan or gift of a major portion of the hull or superstructure of a Navy submarine or surface combatant. The Navy has received two requests for large portions of vessels currently slated for scrapping. These requests pertain to the sail of a Navy submarine currently slated for scrapping. These requests pertaining to the sail of a Navy submarine currently slated for scrapping. These requests pertaining to the sail of a Navy submarine currently slated for scrapping.

The Secretary of the Navy has existing authority under title 10 U.S.C. § 7306 to donate material and historical artifacts described in 10 U.S.C. 2572 and 7545. A new subsection (e) adds to the authority granted in section 129a of title 10, United States Code, the Secretary of Defense has promulgated personnel policies and procedures promoting the downsizing and outsourcing of administrative support (e.g., secretarial or clerical services, mail room operation, and management of computer or network resources). By employing such measures, the Department has realized substantial savings, often contracting out these services in the least costly way to perform them consistent with military requirements and the needs of the Department. In many cases, however, additional savings must be forgone, because such duties may not be transferred to the civilian sector. But this is contingent on there being adequate potable groundwater on Andersen AFB.

The CJCS has directed the JROC to refocus on Emerging Threats and Capabilities on the west side of the Island about 4 miles wide and 2–4 miles long (24.5 square miles). The Army has directed the JROC to refocus on Emerging Threats and Capabilities on the west side of the Island about 4 miles wide and 2–4 miles long (24.5 square miles). The Army has directed the JROC to refocus on Emerging Threats and Capabilities on the west side of the Island about 4 miles wide and 2–4 miles long (24.5 square miles). The Army has directed the JROC to refocus on Emerging Threats and Capabilities on the west side of the Island about 4 miles wide and 2–4 miles long (24.5 square miles). The Army has directed the JROC to refocus on Emerging Threats and Capabilities on the west side of the Island about 4 miles wide and 2–4 miles long (24.5 square miles).
The base system needs to be built due to the advancing age (35-50+ years) and corrosive environment that has deteriorated the system components. The logistics involved in performance of maintenance and repair work off-base make it difficult for the mechanics to control the deterioration. As a result, more pipes, valves, and pumps are failing. In 2013, the tank leaked at a rate of 200-250 gallons per minute and was repaired under pressure. The tank isolation valves are so old they are not used because of the potential for break major to the transmission line or the 50-year-old Santa Rosa Tank could leave the Main Base with only 250,000 gallons of available water (less than 15% of the average daily demand). This amount is insufficient for fire protection and normal operations.

The base estimates it costs about $800,000 per year for electricity just to produce and transmit water to the Main Base from the off-base wells. Savings of 20-40% are expected in the short run but the long-term value of wells on Andersen AFB, either the Main Base or Northwest Field, and repair the existing systems on the base.

By Mr. SMITH of Oregon
S. 1156. A bill to amend the Consumer Product Safety Act to provide that low-speed electric bicycles are consumer products subject to such Act; to the Committee on Commerce, Science, and Transportation.

Mr. SMITH of Oregon. Mr. President, today I introduce the Electric Bike Safety Act of 2001. This bill will encourage and provide more opportunities for Americans to enjoy the leisure and health benefits of riding bicycles. This legislation would amend the Consumer Product Safety Act CPSA, to provide that low-speed electric bicycles are consumer products subject to such Act. As the CPSA is now written, low-speed electric bicycles are not considered consumer products, but rather a motorized vehicle subject to all regulations set by the National Transportation Safety Administration, NHTSA, which regulates automobiles and motorcycles.

As a result of low-speed electric bicycles being treated as motorcycles, they are required to meet burdensome and unnecessary standards, making low-speed electric bicycles much more costly than they need to be. Subjecting electric bicycles to motor vehicle requirements would mean the addition of a large array of costly and unnecessary requirements. This legislation would amend the Columbia Grade headlights, and rearview mirrors.

Making electric bicycles accessible for more Americans will benefit the lives of thousands of Americans. Electric bicycles provide disabled riders the freedom of mobility without the cost or stigma of an electric wheelchair. Electric bicycles provide older riders with increased lifestyle flexibility due to increased mobility that electric bicycles allow them. Electric bicycles provide a practical way to patrol neighborhoods and towns in a manner consistent with the highly successful emphasis on “Community Policing”. Electric bicycles provide short and medium distance, and health benefits of riding bicycles.

In my home State of Oregon, there are thousands of people who ride bicycles each day, whether as a means of transportation, exercise, or recreation. The City of Corvallis has thousands of miles of bike lanes and paths and as a result has a very high number of people who commute to work on their bicycles. Area companies such as Hewlett-Packard and CHEM-Hill even offer changing areas and showers to a work incentive to encourage their employees to ride bicycles to work. The Corvallis Police Department is also able to utilize electric bikes as a community friendly way to patrol the city.

I believe that placing bicycle electric under the regulation of the Consumer Product Safety Commission will not only ensure the safety of electric bicycles, but will promote their use by making electric bicycles an affordable alternative form of transportation to millions of Americans.

By Mr. SPECTER (for himself, Ms. LANDRIEU, Ms. COLLINS, Mr. SCHUMER, Ms. SNOWE, Mr. LEAHY, Mr. COCHRAN, Mr. BREAX, Mr. ALLEN, Mr. BIDEN, Mr. BOND, Mrs. CARNAHAN, Mr. CARPER, Mr. CHAFEE, Mr. CLELAND, Mrs. CLINTON, Mr. DODD, Mr. EDWARDS, Mr. FIST, Mr. GREGG, Mr. HEMS, Mr. HOLLINGS, Mr. JEFFORDS, Mr. KENNEDY, Mr. KERRY, Mr. LIEBERMAN, Ms. LINCOLN, Ms. MIKULSKI, Mr. MILLER, Mr. REED, Mr. ROGUE, Mr. SARBANES, Mr. SESSIONS, Mr. SHELBY, Mr. SMITH of New Hampshire, Mr. THOMPSON, Mr. THURMOND, Mr. TORRICE and Mr. WARNER)

S. 1157. A bill to reauthorize the consent of Congress to the Northeast Interstate Dairy Compact and to grant the consent of Congress to the Southern Dairy Compact, a Pacific North West Dairy Compact, and an Interstate Dairy Compact; to the Committee on the Judiciary.

Mr. SPECTER. Mr. President, I join my colleagues in introducing legislation authorizing Interstate dairy compacts. Members of the U.S. House of Representatives have introduced similar legislation with 162 cosponsors, including 17 members of the Pennsylvania delegation.

This legislation will create a much needed safety net for dairy farmers in the Northeast and other regions and will bring greater stability to the prices paid to farmers. The bill authorizes the Interstate Dairy Commission to take such steps as necessary to assure consumers of an adequate local supply of fresh fluid milk and to assure the continued viability of dairy farming within the compact region. Specifically, states that choose to join a compact would enter into a voluntary agreement to create a minimum farm price for milk within the compact region to form a safety net for dairy...
farmers when farm milk prices fall below the established compact price. This price would take into account the regional differences in the cost of production for milk, thereby providing dairy farmers with a fair and equitable price for their product.

Specifically, the bill would authorize Pennsylvania, New Jersey, Delaware, New York, Maryland, and Ohio to join the existing Northeast Interstate Dairy Compact, which has been in operation since July 1997. Most of these States have already agreed to join the Compact with strong support from their governors and legislatures. In the Commonwealth of Pennsylvania, Governor Ridge has been a very strong supporter and advocate of the Compact. The Pennsylvania Senate and House of Representatives have sent a clear signal to Congress by voting with overwhelming majorities of 44 to 6 and 181 to 20, respectively, to authorize the Commonwealth’s participation in the Northeast Dairy Compact.

In addition to expanding the current Northeast Interstate Dairy Compact, the bill would authorize southern States to form a similar compact to provide price stability in their region. I am pleased to join so many of my colleagues from the South in introducing this legislation. Finally, the legislation would allow formation of other compacts in the Pacific Northwest and Intermountain region within three years. We have included language in this bill to recognize the efforts in these States to support dairy compacts and to avoid their exclusion if these efforts lead to passage of compact legislation by their State governments.

In total, twenty-five States have already approved dairy compact legislation. The bill would also mandate that States that are attempting to meet the needs of dairy farmers, producers, consumers and other citizens concerned with the future of their milk supply. These States recognize the many positive aspects of dairy compacts. The benefits include providing dairy farmers with a fairer and more stable price structure; providing consumers with price stability and a steady, reliable source of local milk for their consumption; enhancement of conservation efforts; providing technical assistance; and maintenance of rural economies that have been suffering for quite some time from the loss of income-generating farmers.

Over the last several years, I have worked closely with my colleagues in the Senate in order to provide a more equitable price for our nation’s milk producers. I supported amendments to the Farm Bills of 1981 and 1985, the Emergency Supplemental Appropriations Act of 1996, the Balanced Budget Resolution of 1995 and the most recent Farm Bill in 1996 in an effort to ensure that dairy farmers receive a fair price. As a member of the U.S. Senate Agriculture Appropriations Subcommittee, I have worked to ensure that dairy programs have received the maximum possible funding. Funding for dairy research conducted at Penn State University. I have also been a leading supporter of the Dairy Export Incentive Program which facilitates the development of an international market for United States dairy products. In recent years, however, dairy farmers have faced low prices for dairy products. Prices have fluctuated greatly over the past several years, thereby making any long-term planning impossible for farmers. These economic conditions have placed our Nation’s dairy farmers in an all but impossible position and this is borne out in dairy farmers’ declining ranks.

Our Nation’s farmers are some of the hardest working and most dedicated individuals in America. During my tenure as a United States Senator, I have visited numerous small dairy farms in Pennsylvania. I have seen these hard working men and women who have dedicated their lives to their farms. The downward trend in dairy prices is an issue that directly affects all of us. We have a duty to ensure that our Nation’s dairy farmers receive a fair price for their milk. If we do nothing, many small dairy farmers will be forced to sell their farms and leave the agriculture industry. This will not only impact the lives of these farmers, but will also have a significant negative impact on the rural economies that depend on the dairy industry for support. Further, the large-scale departure of small dairy farmers from agriculture could place our nation’s steady supply of fresh fluid milk in jeopardy, thereby affecting every American.

We must recognize the importance of this problem and take prompt action. Twenty-five States have asked us to pass this legislation and provide a necessary tool for their dairy farmers. I urge my colleagues to cosponsor and support this legislation as we continue to work in Congress to bring greater stability to our Nation’s dairy industry.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

S. 1137

SECTION 1. SHORT TITLE. This Act may be cited as the “Dairy Consumers and Producers Protection Act of 2001.”

SEC. 2. NORTHEAST INTERSTATE DAIRY COMPACT. Section 147 of the Agricultural Market Transition Act (7 U.S.C. 7356) is amended—

(1) in the matter preceding paragraph (1), by striking “States” and all that follows through “Vermont” and inserting “States of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont”;

(2) by striking paragraphs (1), (3), and (7) and inserting the following:

“(1) in the matter preceding paragraph (A), inserting “Class III-A” and inserting “Class IV”;

(4) by striking paragraph (4) and inserting the following:

“SECTION 3. SOUTHERN DAIRY COMPACT.

SEC. 1. In General.—Congress consents to the Southern Dairy Compact entered into among the States of Alabama, Arkansas, Georgia, Kansas, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia, subject to the following conditions:

(1) LIMITATION OF MANUFACTURING PRICE REGULATION.—The Southern Dairy Compact Commission may not regulate Class II, Class III, or Class IV milk used for manufacturing purposes or any other milk, other than Class I fluid milk, as defined by a Federal milk marketing order issued under section 8 of the Agricultural Adjustment Act (7 U.S.C. 608c), reenacted with amendments by the Agricultural Marketing Act of 1987 (referred to in this section as a “Federal milk marketing order”) unless Congress has first consented to and approved such authority by a law enacted after the date of enactment of this joint resolution.

(2) ADDITIONAL STATES.—Florida, Nebraska, and Texas are the only additional States that may join the Southern Dairy Compact, individually or otherwise.

(3) COMPENSATION OF COMMODITY CREDIT CORPORATION.—(a) APPROPRIATIONS.—The Southern Dairy Compact Corporation may not purchase milk and milk products by the Corporation that result from the operation of the Federal milk marketing order during the fiscal year, as determined by the Secretary (in consultation with the Commission) using notice and comment procedures provided in section 533 of title 7, United States Code.

(4) MILK MARKETING ORDER ADMINISTRATOR.—At the request of the Southern Dairy Compact Commission, the Administrator of the applicable Federal milk marketing order shall provide technical assistance to the Southern Dairy Compact Corporation for the purpose of carrying out the provisions of this Act as authorized by the Southern Dairy Compact Commission.

“ARTICLE I. STATEMENT OF PURPOSE.

FINDINGS AND DECLARATION OF POLICY

1. Statement of purpose, findings and declaration of policy

“1. Purpose of this compact is to recognize the interstate character of the southern dairy industry and the prerogatives of the States under the United States Constitution to act in an interstate manner for the southern region. The mission of the commission is to take such steps as are necessary to
assure the continued viability of dairy farming in the south, and to assure consumers of an adequate, local supply of pure and wholesome milk.

"The participating states find and declare that milk is an essential component of the agricultural activity of the south. Dairy farms, and associated suppliers, marketers, processors and retailers are an integral component of the state's economy. Their ability to provide a stable, local supply of pure, wholesome milk is a matter of great importance to the health and welfare of the region.

The participating states find and declare that dairy farms are essential and they are an integral part of the region's rural communities. The farms preserve land for agricultural purposes and provide needed economic stimuli for rural communities.

"In establishing their constitutional regulatory authority over the region's fluid milk market by this compact, the participating states declare their purpose that this compact neither displace the federal order system nor encourage the merging of federal orders. The compact itself set forth this basic principle.

"Designed as a flexible mechanism able to adjust to a regulated marketplace, the compact also contains a contingency provision should the federal order system be discontinued. In that event, the interstate commission is authorized to regulate the marketplace in replacement of the order system. This contingent authority does not anticipate such a change, however, and should not be so construed. It is only provided should developments in the market other than establishment of this compact result in discontinuance of the order system. By so doing, all the participating states affirm that their ability to regulate the price which southern dairy farmers receive for their product is essential to the public interest. Assurance of a fair and equitable price for dairy farmers ensures their ability to provide milk to the market and the vitality of the southern dairy industry, which is an integral part of the south. Dairy farms, some milk.

Recent, dramatic price fluctuations, with a pronounced downward trend, threaten the viability and stability of the southern dairy region. Individual state regulatory action had been an effective emergency remedy available to farmers confronting a distressed market. The federal order system, established by the Agricultural Marketing Agreement Act of 1937, establishes only minimum prices paid to producers for raw milk, without preemption of the power of states to regulate milk prices above the minimum levels so established.

"In today's regional dairy marketplace, cooperative, rather than individual state action is needed to more effectively address the market disarray. Under our constitutional system, properly authorized state actions may exercise more power to regulate interstate commerce than they may assert individually without such authority. For this reason, the participating states invoke their authority to act in common agreement, with the consent of Congress, under the compact clause of the Constitution.

**ARTICLE II. DEFINITIONS AND RULES OF CONSTRUCTION**

**§ 2. Definitions**

"For the purposes of this compact, and of any supplemental or concurring legislation enacted pursuant thereto, except as may be otherwise provided in the context:

"(1) 'Class I milk' means milk disposed of in fluid form or as a fluid milk product, subject to further definition in accordance with the principles expressed in subdivision (b) of section 9. The term 'milk' means only skim, butterfat, or any supplemental or concurring legislation otherwise required by the context:

"(2) 'Commission' means the Southern Dairy Compact Commission established by this compact.

"(3) 'Commission marketing order' means regulations adopted by the commission pursuant to sections nine and ten of this compact in place of a terminated federal marketing order or state dairy regulation. Such order may apply throughout the region or in any part or parts thereof as defined in the regulations adopted by the commission. The regulations may establish lower or exempt from the price established in federal marketing orders or by state farm price regulations plantings in any area. Such orders may apply throughout the region or in any part or parts thereof as defined in the regulations of the commission.

"(4) 'Compact' means this interstate compact.

"(5) 'Compact over-order price' means a minimum price required to be paid to producers for Class I milk established by the commission in regulations adopted pursuant to sections nine and ten of this compact, which is above the price established in federal marketing orders or by state farm price regulations in any area. Such orders may apply throughout the region or in any part or parts thereof as defined in the regulations of the commission.

"(6) 'Milk' means the lactose secretion of cows and includes all skim, butterfat, or other constituents obtained from separation or any other process. The term is used in its broadest sense and may be further defined by the commission for regulatory purposes.

"(7) 'Partially regulated plant' means a milk plant not located in a regulated area but having operations within such area. The commission may exempt plants having such distribution or receipts in amounts less than the limits defined therein.

"(8) 'Participating state' means a state which has become a party to this compact by the enactment of concurring legislation.

"(9) 'Pool plant' means any milk plant located in a regulated area.

"(10) 'Region' means the territorial limits of the states which are parties to this compact.

"(11) 'Regulated area' means any area within the region governed by and defined in regulations establishing a compact over-order price or commission marketing order.

"(12) 'Region full price' means any state regulation of dairy prices, and associated assessments, whether by statute, marketing order or otherwise.

**§ 3. Rules of construction**

"(a) This compact shall not be construed to displace existing federal milk marketing orders or state dairy regulation in the region but to supplement them. In the event some or all federal orders in the region are discontinued, the compact shall be construed to provide the commission the option to replace them with one or more commission marketing orders pursuant to this compact.

"(b) The compact shall be construed liberally in order to achieve the purposes and intent enumerated in section one. It is the intent of this compact to establish a basic structure by which the commission may achieve those purposes through the application, adoption, and promulgation of the regulations and other techniques historically associated with milk marketing and to afford the commission broad flexibility to devise regulatory mechanisms to serve the purposes of this compact. In accordance with this intent, the technical terms which are associated with market order regulation and which are commonly understood general meanings are not defined herein but the commission may further define the terms used in this compact and develop additional concepts and definitions as it deems appropriate to achieve its purposes.

**ARTICLE III. COMMISSION ESTABLISHED**

**§ 4. Commission established**

"There is hereby created a commission to administer the compact, composed of delegations of the participating states. The commission shall be known as the Southern Dairy Compact Commission. A delegation shall include not less than three nor more than five persons. Each delegation shall include at least one dairy farmer who is engaged in the production of milk at the time of appointment or reappointment, and one representative of the participating states by submitting copies to the governor, both houses of the legislature, and
the head of the state department having re-
sponsibility for agriculture.

(d) In addition to the powers and duties elsewhere prescribed in this compact, the commission shall have the power:

(1) To sue and be sued in any state or fed-
eral court;

(2) To have a seal and alter the same at its
pleasure;

(3) To acquire, hold, and dispose of real and personal property by gift, purchase, 
lease, license, or other similar manner, for its
educational purposes;

(4) To borrow money and issue notes, to
provide for the rights of the holders thereof
and to pledge the revenue of the commission
as security therefor, subject to the provi-
sions of section eighteen of this compact;

(5) To appoint such officers, agents, and
employees as it may deem necessary, pre-
scribe their powers, duties and qualifica-
tions; and

(6) To create and abolish such offices, em-
ployments and positions as it deems nec-
essary for the purposes of the compact and
provide for the salaries, term, tenure, com-
 pense, fringe benefits, pension, and re-
tirement rights of its officers and employees.
The commission may also retain personal
services on a contract basis.

§ 7. Rulemaking power

In addition to the power to promulgate a
compact over-order price or commission
marketing orders as provided by this com-
pact, the commission is further empowered
to make and enforce such additional rules and
regulations as it deems necessary to im-
plement any provisions of this compact, or
to exercise in any other respect the pur-
poses of this compact.

ARTICLE IV. POWERS OF THE COMMISSION

§ 8. Powers to promote regulatory uni-
formity, simplicity, and interstate coopera-
tion

The commission is hereby empowered to:

(1) Investigate or provide for investiga-
tions or research projects designed to re-
view the effects of the present and past re-
quirements of the participating states, to con-
side rations for the administration of the dairy mar-
ket ing laws and regulations and to prepare
estimates of cost savings and benefits of
such programs.

(3) Encourage the harmonious relation-
ships between the various elements in the in-
dustry for the solution of their material
problems. Conduct symposia or conferences
designed to improve industry relations, or a
better understanding of problems.

(4) Prepare and release periodic reports on
activities and results of the commission’s ef-
corts to the participating states.

(5) Review the existing marketing system
for milk and milk products and recommend
changes in the existing structure for assem-
bl y and distribution of milk which may as-
sist, improve or promote more efficient as-
sembly and distribution of milk.

(6) Investigate costs and charges for pro-
duction, handling, processing, dis-
 tributing and for all other services performed
with respect to milk.

(7) Examine current economic forces af-
fecting the present and probable changes in pro-
duction and consumption, the level of dairy
farm prices in relation to costs, the financial
conditions of dairy farmers, and the need for
an emergency order to relieve critical condi-
tions on dairies.

§ 9. Equitable farm prices

(a) The powers granted in this section and
text section ten shall apply only to the establish-
ment of a compact over-order price, so long as the
compact over-order price is in effect in the region.
In the event that any or all such orders are terminated, this article shall
apply to all or any part thereof as defined in the order.

(b) A compact over-order price estab-
lished pursuant to this section shall apply only to
Class I milk. Such compact over-
order price shall not exceed one dollar and
fifty cents per gallon at Atlanta, Ga., how-
ever, this compact over-order price shall be
adjusted upward or downward at other loca-
tions in the region to reflect differences in
minimum such order prices. Beginning in
nineteen hundred ninety, and using that year
as a base, the foregoing one dollar fifty cents
per gallon maximum shall be adjusted annu-
ally by the rate of change in the Consumer
Price Index as reported by the Bureau of
Labor Statistics of the United States De-
partment of Labor. For purposes of the pool-
ing and equalization of an over-order price,
the value of milk used in other use classi-
 fications shall be calculated at the appro-
priate class price established pursuant to the
appropriate federal order or state dairy regu-
lation and the value of unregulated milk shall
be calculated in relation to the nearest
prevailing class price in accordance with and
subject to such adjustments as the commis-
sion may prescribe.

(c) A commission marketing order shall ap-
ply to all classes and uses of milk.

(d) The commission is hereby empowered
to establish a compact over-order price for
milk to be paid by pool plants and partially
regulated plants. The commission is also em-
powered to establish a compact over-order
price to be paid by all other handlers receiv-
ing milk from producers located in a regu-
lated area and not established ei-
er or as a compact over-order price or by one
or more commission marketing orders. When-
such a price has been established or
established shall be determined
by the terms and purpose of the regu-
lation without regard to the situs of the
transfer of title, possession or any other fac-
tors not related to the purposes of the regu-
lation and the compact. Producer-handlers
as defined in an applicable federal market
marketing order shall not be subject to a compact over-
order price. The commission shall provide
for similar treatment of producer-handlers
under commission marketing orders.

(e) In determining the price, the commis-
sion shall consider the balance between pro-
duction and consumption of milk and milk
products in the regulated area, the costs of
production, the shipment of milk regulated
to the price of feed, the cost of labor including
the reasonable value of the producer’s own labor
and management, machinery expense, and
minimum federal order prices. The price for
milk outside the regulated area, the pur-
chasing power of the public and the price
necessary to yield a reasonable return to the
producer shall be determined.

(f) When establishing a compact over-
order price, the commission shall take such
other action as is necessary and feasible to
help ensure that the price does not
cause or compensate producers so as to
gen eral local production of milk in excess
of those quantities necessary to assure con-
sumers of an adequate supply for fluid pur-
poses.

(g) The commission shall whenever pos-
sible enter into agreements with state or fed-
eral agencies for exchange of information or
services for the purpose of reducing the regu-
larly burden and cost of administering the
compact. The commission may reimburse
other agencies for the reasonable cost of pro-
viding these services.

§ 10. Optional provisions for pricing order

"Regulations establishing a compact over-
order price or a commission marketing order
may contain, but shall not be limited to any
of the following:

(1) Provisions classifying milk in accord-
ance with the form in which or purpose
for which it is used, or creating a flat pricing
program.

(2) With respect to a commission mar-
keting order only, provisions establishing or
providing a method for establishing separate
minimum prices for each use classification
by the commission for a single
minimum price for milk purchased from pro-
ducers or associations of producers.

(3) With respect to an over-order mini-
mum price, provisions establishing or pro-
viding a method for establishing such mini-
imum price for Class I milk.

(4) Provisions for establishing either an
over-order price or a commission marketing
order may make use of any reasonable meth-
for establishing such price or prices in-
cluding flat pricing and formula pricing.

(5) Provision may also be made for location
adjustments, zone differentials and for com-
petitive credits with respect to regulated
handlers who market outside the regulated area.

(6) Provisions for the payment to all pro-
ducers and associations of producers deliv-
ering milk to all handlers of uniform prices
for all milk so delivered, irrespective of the
uses made of such milk by the individual
handler to whom it is delivered, or for the
payment of producers delivering milk to the
solo or wholly included within any such
marketing area.

(7) With respect to any commission mar-
keting order, as defined in section two, sub-
division three, which replaces one or more
terminated federal orders or state dairy reg-
ulations, the marketing area of now separate
state or federal orders shall not be merged
without the affirmative consent of each
state, voting through its delegation, which is
partly or wholly included within any such
new marketing area.

(8) Provisions requiring persons who bring
Classes I milk into the regulated area to make
compensatory payments with respect to all
such milk to the extent necessary to equal-
ize the cost of milk purchased by handlers
subject to a compact over-order price or com-
mission marketing order. No such provi-
sions shall discriminate against milk pro-
ducers outside the regulated area. The provi-
sions for compensatory payments may re-
quire payment of amounts based on the
Class I price required to be paid for such
milk in the state of production by a federal
milk marketing order or state dairy regu-
lation. The Class I price established by the
compact over-order price or commission
marketing order.
§13. Producer referendum

(a) For the purpose of ascertaining whether the public interest will be served by the establishment of a compact over-order price or a commission marketing order, including any provision with respect to milk supply under subsection (4) hereof, or amendment thereof, as provided in Article IV, the commission shall conduct a referendum among producers. The referendum shall be held in a timely manner, as determined by the commission, and the terms and conditions of the proposed order or amendment shall be described by the commission in the formal rulemaking proceeding. The nature, content, or extent of such description shall not be a basis for attacking the legality of the order or any action relating thereto.

(b) An order or amendment shall be deemed approved by producers if the commission determines that it is approved by at least two-thirds of the voting producers who, during a representative period determined by the commission, have been engaged in the production of milk the price of which is regulated by such order; but producers may, with respect to such order or amendment, refer any allegation of a violation of this compact to the commission for action in the manner prescribed by section four of the Federal Administrative Procedure Act, as amended (5 U.S.C. § 553).

§14. Termination of over-order price or marketing order

(a) The commission shall terminate any regulations establishing an over-order price or commission marketing order issued under this article whenever it finds that such termination is favored by a majority of the producers who, during a representative period determined by the commission, have been engaged in the production of milk the price of which is regulated by such order; but termination may be ordered only if it is announced on or before such date as may be specified in such marketing agreement or order.

(b) The termination or suspension of any order or provision thereof, shall not be considered an order within the meaning of this article and shall require no hearing, but shall comply with the requirements for informal rulemaking prescribed by section four of the Federal Administrative Procedure Act, as amended (5 U.S.C. § 553).

ARTICLE VI. ENFORCEMENT

§15. Records; reports; access to premises

(a) The commission may by rule prescribe record keeping and reporting requirements for all regulated persons. For purposes of the administration and enforcement of this compact, the commission is authorized to examine the books and records of any regulated person relating to his or her milk business and for that purpose, the commission's properly designated officers, employees, or agents shall have full access during normal business hours to the premises and records of all regulated persons.

(b) Information furnished to or acquired by the commission, employees, or its agents pursuant to this section shall be confidential and shall not be excepted from the extent to which the commission deems disclosure to be necessary in any administrative or judicial proceeding involving the administration or enforcement of this compact, an over-order price, a compact marketing order, or other regulations of the commission. The commission may promulgate regulations further defining the confidentiality of information pursuant to this section. Nothing in this section shall be deemed to prohibit (i) the issuance of general statements as to whether and how it intends to cast a block vote shall, before submitting its ap-

(c) No officer, employee, or agent of the commission shall intentionally disclose information, by inference or otherwise, which is made confidential pursuant to this section. Any person violating the provisions of this section shall, upon conviction, be subject to a fine of not more than one thousand dollars or to imprisonment for not more than one year, or to both.

§16. Subpoena; hearings and judicial review

(a) The commission is hereby authorized and empowered by its members and its properly designated officers to administer oaths and issue subpoenas throughout all signa-

(b) Any handler subject to an order may file a written petition with the commission stating that any such order or any provision
of any such order or any obligation imposed in connection therewith is not in accordance with law and praying for a modification thereof or to be exempted therefrom. He shall thereupon be given an opportunity for a hearing upon such petition, in accordance with regulations made by the commission. After such hearing, the commission shall make a ruling upon the prayer of such petition which shall be final, if in accordance with law.

"(C) The district courts of the United States in any district in which such handler is an inhabitant, or has his principal place of business, are hereby vested with jurisdiction to review such ruling, provided a complaint for that purpose is filed within thirty days from the entry of such ruling. Service of process in such proceedings may be had upon the commission by delivering to it a copy of the complaint. If the court determines that the commission is not in accordance with law, it shall remand such proceedings to the commission with directions either (1) to make such ruling as the court shall determine to be in accordance with law, or (2) to take such further proceedings as, in its opinion, the law requires. The pendency of proceedings instituted pursuant to this subdivision shall not hinder, or prevent the commission from obtaining relief pursuant to section seventeen. Any proceedings brought pursuant to section seventeen, except that the manner of commencing such proceedings in institutions pursuant to this section, shall abate whenever a final decree has been rendered in proceedings between the same parties, and involving the same subject matter, instituted pursuant to this section.

§ 17. Enforcement with respect to handlers

(a) Any violation by a handler of the provisions of regulations establishing an over-order price or a commission marketing order, or other regulations adopted pursuant to this compact shall:

(1) constitute a violation of the laws of each of the signatory states. Such violation shall render the violator subject to a civil penalty in an amount as may be prescribed by the laws of any state or states, recoverable in any state or federal court of competent jurisdiction. Each day such violation continues shall constitute a separate violation.

(2) constitute grounds for the revocation of license or permit to engage in the milk business under the applicable laws of the participating states.

(b) With respect to handlers, the commission shall enforce the provisions of this compact, regulations establishing an over-order price, or a commission marketing order, or other regulations adopted pursuant to this compact shall:

(1) Commencing an action for legal or equitable relief brought in the name of the commission of any state or federal court of competent jurisdiction; or

(2) Refer to the state agency for enforcement by judicial or administrative remedy with the agreement of the appropriate state agency of a participating state.

(c) With respect to handlers, the commission may bring an action for injunction to enforce the provisions of this compact, and regulations adopted thereunder without being compelled to allege or prove that an adequate remedy of law does not exist.

"ARTICLE VII. FINANCE

§ 18. Finance of start-up and regular costs

(a) To provide for its start-up costs, the commission may borrow money pursuant to its general power under section six, subdivision (d), paragraph (6), to finance the costs of administration and enforcement of this compact, including payback of start-up costs, the commission is hereby empowered to collect an assessment from each handler, the assessment to be based on the number of handler sales of milk from producers within the region. If imposed, this assessment shall be collected on a monthly basis for up to two months from the date the commission convenes, in an amount not to exceed $0.05 per hundredweight of milk purchased from producers during the period of the assessment. Such assessment may apply to the projected purchases of handlers for the two-month period following the date the commission convenes. In addition, if regulations establishing an over-order price or a compact marketing order are adopted, they may include an assessment for the specific purpose of their administration. These regulations shall provide for establishment of a reserve for the commission’s ongoing operating expenses.

(b) The commission shall not pledge the credit of any participating state or of the United States. Notes issued by the commission and all other financial obligations incurred by it, shall be its sole responsibility and shall be neither chargeable to a participating state nor to the United States and shall be liable therefor.

§ 19. Audit and accounts

(a) The commission shall keep accurate accounts of all receipts and disbursements, which shall be subject to the audit and accounting procedures established under its rules. In addition, all receipts and disbursements of funds handled by the commission shall be audited by a qualified public accountant and the report of the audit shall be included in and become part of the annual report of the commission.

(b) The accounts of the commission shall be open at any reasonable time for inspection by duly constituted officers of the participating states and by any persons authorized by the commission.

(c) Nothing contained in this article shall be construed to prevent commission compliance with laws relating to audit or inspection.

ARTICLE VIII. ENTRY INTO FORCE; ADDITIONAL MEMBERS AND WITHDRAWAL

§ 20. Entry into force; additional members

The compact shall enter into effect when enacted into law by any three states of the group of states composed of Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia and West Virginia and when the consent of Congress has been obtained.

§ 21. Withdrawal from compact

Any participating state may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect until one year after notice in writing of the withdrawal is given to the commission and the governors of all other participating states. No withdrawal shall affect any liability already incurred by or chargeable to a participating state prior to the time of such withdrawal.

§ 22. Severability

If any part or provision of this compact is adjudged invalid by any court, such judgment shall be confined in its operation to the part or provision of the controversy in which such judgment shall have been rendered and shall not affect or impair the validity of the remainder of this compact.

In the event Congress consents to this compact subject to conditions, said conditions shall not impair the validity of this compact when said conditions are accepted by three or more compacting states. A compacting state may accept the conditions of Congress by implementation of this compact.

SEC. 4. PACIFIC NORTHWEST DAIRY COMPACT.

Congress consents to a Pacific Northwest Dairy Compact proposed for the States of California, Oregon, and Washington, subject to the following conditions:

(1) TEXT.—The text of the Pacific Northwest Dairy Compact shall be identical to the text of the Southern Dairy Compact, except as follows:

(A) References to “south”, “southern”, and “Southern” shall be changed to “Pacific Northwest”.

(B) In section 9(b), the reference to “Atlanta, Georgia” shall be changed to “Seattle, Washington.”

(C) In section 20, the reference to “any three” and all that follows shall be changed to “California, Oregon, and Washington.”

(2) LIMITATION OF FORWARD PRICE REGULATION.—The Dairy Compact Commission established to administer the Pacific Northwest Dairy Compact (referred to in this section as the “Commission”) may regulate Class II, Class III, or Class IV milk used for manufacturing purposes or any other milk, other than Class I, or fluid milk, as defined herein, by Federal milk marketing order issued under section 8c of the Agricultural Adjustment Act of 1938 (7 U.S.C. 608c), reenacted with amendments by the Agricultural Marketing Act of 1997 (7 U.S.C. 1671, as reenacted by the Federal Milk Marketing Order Act of 1997 as a “Federal milk marketing order”).

(3) EFFECTIVE DATE.—Congressional consent under this section takes effect on the date (not later than 3 years after the date of enactment of this Act) on which the Pacific Northwest Dairy Compact is entered into by the second of the 3 States specified in the matter preceding paragraph (1).

(4) COMPENSATION OF COMMODITY CREDIT CORPORATION.—Before the end of each fiscal year after the adoption of the price regulations under the Pacific Northwest Dairy Compact, the Commission shall compensate the Commodity Credit Corporation for the cost of any purchases of milk and milk products by the Corporation that relate to the operation of the Compact price regulation during the fiscal year, as determined by the Secretary (in consultation with the Commissions) using notice and comment procedures provided in section 553 of title 5, United States Code.

(5) MILK MARKETING ORDER ADMINISTRATOR.—At the request of the Commission, the Administrator of the applicable Federal milk marketing order shall provide technical assistance to the Commission and be compensated for that assistance.

SEC. 5. INTERMOUNTAIN DAIRY COMPACT.

Congress consents to an Intermountain Dairy Compact proposed for the States of Colorado, Nevada, and Utah, subject to the following conditions:

(1) TEXT.—The text of the Intermountain Dairy Compact shall be identical to the text of the Southern Dairy Compact, except as follows:

(A) In section 1, the references to “south” and “southern” shall be changed to “Intermountain” and “Intermountain region”, respectively.

(B) References to “Southern” shall be changed to “Intermountain”.

(C) Tennessee, Texas, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia and West Virginia and when the consent of Congress has been obtained.
CONGRESSIONAL RECORD—SENATE
June 29, 2001

12554

(C) In section 9(b), the reference to “Atlanta, Georgia” shall be changed to “Salt Lake City, Utah”.
(D) In section 20, the reference to ‘any three’ and all that follows shall be changed to “Colorado, Nevada, and Utah’.

(2) MANUFACTURING PRICE REGULATION.—The Dairy Compact Commission established to administer the Intermountain Dairy Compact (referred to in this section as the ‘Commission’) may not regulate Class II, Class III, or Class IV milk used for manufacturing purposes or any other milk, I, II, or fluid milk confined by a Federal milk marketing order issued under section 8c of the Agricultural Adjustment Act (7 U.S.C. 668c), reenacted as the “Federal milk marketing order’’.

(3) EFFECTIVE DATE.—Congressional consent under this section takes effect on the date (not later than 3 years after the date of enactment of this Act) on which the Intermountain Dairy Compact is entered into by the States, which is granted the authority to set a minimum farm price for Class I (fluid) milk. The difference between the compact price and the Federal milk order price, or the “over-order obligation,” is paid to the commission by the processors. The commission then redistributes these funds to farmers in each State based on the volume of milk sold by the farmer within the region.

The success of the Northeast Dairy Compact in promoting the viability of dairy farming and sustaining rural communities in New England has not gone unnoticed. Nineteen additional State legislatures have overwhelmingly passed compact legislation. Our legislation recognizes this strong support for compacts on the state level and provides Congressional consent for these States to join the Northeast compact or form compacts of their own.

For all that the Compact accomplishes for farmers in the Northeast, one might think that it puts farmers face to face with competitive disadvantage. However, this is not the case. The Compact Commission has instituted safeguards, as required by the authorizing legislation, that prevents the overproduction of milk. Incentive payments are provided to farmers who do not increase production and have actually led to a decrease of 0.6 percent in the amount of milk produced in the region. Consequently, we can be sure that surplus milk from the Northeast is not impacting milk markets in other regions of the country. It is important to note that our legislation includes the overproduction protections included in the original Dairy Compact legislation.

The Northeast Dairy Compact is set to expire on September 30, 2001. While the saying goes that all good things must come to an end, I do not believe that ought to be the case with the Compact. Dairy farmers in my State and many more are in danger of shutting down unless we authorize the return of milk pricing power back to the States. Had Louisiana been a member of a Southern Dairy Compact last year, its 458 dairy farms would have received $11.9 million in compact payments, increasing income for the average Louisianan dairy farmer by nearly thirteen percent. This, at a time when dairy farmers are faced with depressed prices not seen in the last 25 years.

There are those in Congress who have opposed dairy compacts on the day the idea was introduced. However, dairy compacts are not antitrade, do not increase milk production and milk from outside the compact region is not excluded from sale in the compact region. Over the past five years, New England’s dairy farmers have put into practice the compact’s promise of providing stable prices for farmers and consumers, strengthening rural communities and preserving our environment. It is time to allow the States the opportunity to provide their farmers the stability they so desperately need.

Ms. LANDRIEU. Mr. President, today I rise, along with thirty-eight of my colleagues, to introduce legislation which would reauthorize the Northwest Dairy Compact Act, the Southern, Pacific and Intermountain Compacts.

State officials and dairy producers across the country are concerned that the current Federal milk marketing order pricing system does not fully account for regional differences in the costs of producing milk. As a result, 25 States, including my State of Louisiana, have passed legislation requesting that Congress approve their right to form regional compacts. The compact, when ratified by Congress, authorizes creation of an interstate compact commission which would guide the pricing of fluid milk sold in the region. Consumers, processors, and producers, State officials, and the public all participate in determining Class I fluid milk prices.

The Northeast Dairy Compact, enacted in 1996, and due to expire this year, has proven extremely successful in balancing the interests of consumers, dairy farmers, processors and retailers by maintaining milk price stability and doing so at no cost to taxpayers.
of such uncertainty, the current Federal price support system was designed to provide basic levels of assistance to dairy farmers. Unfortunately, the support provided, while helpful, is often inadequate. Many dairy farmers in New York and elsewhere are unable to operate at a profit. As a remedy, the Dairy Compact was designed to provide producers with supplemental support, through assessments to processors, when the Marketing Order price is low. Most importantly, the price stability afforded by the Compact is especially important to farmers as a planning tool.

As originally implemented, the Dairy Compact did not include New York. The Bill that has been introduced would allow New York State and other States in the Northeast, Southeast and elsewhere to expand the Compact. The New York Legislature, like 25 other State Legislatures, has voted to join the Compact. Why? Because over the 4 years that the Compact has been in existence it has made the difference for many families by allowing them to survive as a dairy producer or selling their land for development which is slowly decimating our rural landscape. It has helped us maintain a local supply of affordable milk for consumers including women and children throughout the Compact region at no cost to the government and without placing an undue burden on consumers.

New York is an important dairy producing and consuming State. As of the year 2000, we had about 7,200 dairy herds and produced 11.9 billion pounds of milk. That year, New York ranked third behind California and Wisconsin in both the number of milk cows and total milk produced. The viability of dairy farms is very important to my State. If New York had not been a member of compact that year when dairy prices were at rock bottom, they would have received an average payment per farm of $18,200. While that size payment will not lead to prosperity, it will help keep the farm going. Several New York dairy farms sell milk to the Compact, and thus receive some of these benefits. I want to ensure that all dairy farms are in the State can participate, and the only way to do that is to expand the Compact.

Opponents of the Compact claim that if it were to be expanded, farmers in the Compact region would overproduce fluid milk thus driving prices down in other parts of the country. This is not the case. The Compact legislation that we propose today specifically acts to prevent such an over production through a supply management feature that rewards dairy producers in the Compact who maintain relatively stable levels of production. If necessary, this tool could be used to control over-production from an expanded Compact and thus minimize negative impacts elsewhere.

Other important features of the Compact that are important to remember include the following: It has been fully reviewed and found to be legal. It includes a feature to protect disadvantaged women, infant and children, and in fact, in the year 2000, the Compact paid the WIC program close to $1.8 million to reimburse WIC for any extra expense the program incurred under the Compact. Approximately 1 percent of Compact payments are similarly set aside to reimburse school lunch programs.

I am concerned about the move towards consolidation in the dairy industry. While some concentration is to be expected, recent trends indicate that a few very large dairy operations and processing plants are grabbing up more and more. Many dairy operations are also succumbing to sprawl. By helping small at-risk farms stay afloat, the Compact is a hedge against unhealthy amounts of consolidation. It also helps to preserve the rural lifestyle, the countryside settings with open spaces, and the economic core of communities that are so important to my New York and so many others.

In sum, the Dairy Compact is an effective way for States, New York and others, to obtain from Congress the regulatory authority over the region’s interstate markets for milk. It offers a price stability that is incredibly helpful, and it helps to slow the demise of a tradition that our country holds dear, the family farm.

Ms. SNOWE. Mr. President, I rise today to join Senator SPECTER of Pennsylvania in support of the Dairy Consumers and Producers Protection Act of 2001. We are joined by 37 of our colleagues from New England and throughout the Mid-Atlantic and the Southern New England Compact.

This legislation reauthorizes the very successful Northeast Interstate Dairy Compact, which allows the producers of milk to, as a dairy farmer from York Country, ME, recently said, set a little higher bottom for the price of locally produced fresh milk. The current Compact only adds a small incremental cost to the current Federal milk marketing order system that already sets a floor price for fluid milk in New England. The bill also gives approval for States contiguous to the participating New England States to join, in this case, Pennsylvania, New York, New Jersey, Delaware, and Maryland.

The legislation also grants Congressional approval for a new Southern Dairy Compact, made up of 14 States: Alabama, Arkansas, Georgia, Kansas, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Virginia, and West Virginia.

This issue is really a State rights issue more than anything else, Mr. President, as the only action the Senate needs to take is to give its congressional consent under the Compact Clause of the United States Constitution, Article I, section 10, clause 3, to enable the 25 States to join with their two independent compacts.

All of the legislatures in these twenty-five States have ratified legislation that allows their individual States to join a Compact, and the Governor of every State has signed a compact bill into law. Half of the States in this country, await our Congressional approval to address farm insecurity by stabilizing the price of fresh fluid milk on grocery shelves and to protect consumers against volatile price swings.

All of the Northeast and Southern Compact States together make up about 28 percent of the Nation’s fluid milk market—New England production is only about 31.2 percent of this. This Dairy Compact originated as Minnesota and Wisconsin which together make up to 24 percent of the fluid milk market. California makes up another 20 percent.

Over ninety-seven percent of the fluid milk market in New England is contained within the area, and fluid milk markets are local due to the demand for freshness and because of high transportation costs, so any complaints raised in other areas about unfair competition simply does not hold water. The existence of the Northeast Dairy Compact does not threaten or financially harm any other dairy farmer in the country. Nor is there one penny of Federal funds involved—not one cent.

Only the consumers and the processors in the New England region pay to support the minimum price to provide for a fairer return to the area’s family dairy farmers and to protect the delightful way of life important to the people of the Northeast. Importantly, under the Compact, New England retail milk prices have been among the lowest and the most stable in the country. No wonder other States want to follow our lead.

When Congress wants to try something new, it often sets up a pilot program to test out an idea in a particular locality or region, and then appraises the outcome to see if the project was successful. This is how the Northeast Dairy Compact got its start in 1993, and was included in the 1996 Farm Bill as a three year pilot program—to sunset on April 4, 1999—at the same time as the adoption of the required consolidation of Federal milk marketing orders. The milk marketing orders were extended until October 1, 1999 in the Omnibus Appropriations of FY 1999, which also automatically extended the Compact until October 1, 1999.

Because of efforts by myself and other Compact supporters, we fought to receive a two-year extension of the Northeast Compact, which was incorporated in the Omnibus spending bill funding several government agencies
for FY 2000. The Compact will expire on September 30 of this year if no further action is taken by this body.

I wish to make it clear to my colleagues how important the continuation of the Northeast Dairy Compact is to me and the dairy farmers and consumers in Maine. I stand here not with my hand outstretched for federal farm dollars for Maine—of all income received by farmers in my State, only about 9 percent comes from Federal funding, unlike other States whose income received through Federal dollars is well over 75 percent—rather to urge you to support a very successful program that does not cost the federal government one penny—not one cent, and is supported by the very people who are affected by it.

I plan to use every avenue open to me to maintain fluid milk prices high enough to operate as, once the Compact Commission is shut down even temporarily, it cannot magically be brought back to life again. It would take many months if not a year to restore the successful process that is in place. I will not gamble with the livelihoods of the dairy farmers of Maine in that irresponsible fashion.

All during the time of the Northeast Compact, fluid milk prices in New England have been among the lowest and have reflected great price stability. The consumers of New England have been spending a few extra pennies for fresh fluid milk—a recent University of Connecticut report recently estimated no more than 4.5 cents a gallon—to ensure a safety net for dairy farmers so that they can continue a historic way of life that is helpful to the regional economy.

I have been pleasantly surprised that, while many dairy farmers are not content when gasoline prices rise by pennies, I have not received any swell of outrage from consumer complaints about milk prices over the last 3 1/2 years that the Compact has been in place. The reality is that the initial pilot Compact project we so thoughtfully created has been a huge success.

In 2000, dairy farmers in Maine received on average, $10,500 per dairy farm from the Compact Commission, the governing body set up to keep overproduction of fluid milk in check, and operate as, once the Compact Commission is shut down even temporarily, it cannot magically be brought back to life again. It would take many months if not a year to restore the successful process that is in place. I will not gamble with the livelihoods of the dairy farmers of Maine in that irresponsible fashion.

Dairy Compact opponents. No other region of the United States has been as fortunate to have the Northeast Dairy Compact. It is now known that, throughout New England, there has been a decline in the number of dairy farmers going out of business. In Maine, for instance, the loss of dairy farms was 16 percent from 1993 to 1997. The Compact then went into effect and from that time until now, the loss of dairy farms has dropped to 9 percent.

The Compact has given dairy farmers a measure of confidence in the near term for the price of their milk so they have been willing to reinvest in their operations by upgrading and modernizing facilities, acquiring more efficient equipment, purchasing additional cropland and improving the genetic base of their herds. Without the Compact, farmers have not had the courage to do these things and their lenders would not have had the willingness to meet their capital needs.

The Compact has also protected future generations by helping local milk processors place their products and preventing a dependence on milk a single source of milk that can lead to higher milk prices through increased transportation costs and increased vulnerability to natural catastrophes.

The bottom line is, the Compact has helped the economies of the New England States. The presence of farms are protecting open spaces critical to every State’s recreational, environmental and conservation interests. These open spaces also serve as a buffer to urban sprawl and boost tourism so important to my home state of Maine.

Through its bylaws, the Compact has also preserved State sovereignty by adopting the principle of “one state—one vote” and providing that any pricing change be approved by two-thirds of the participating states in the Compact.

There are compensation procedures that are implemented by the New England Dairy Commission specifically to protect against increased production of fresh milk. The Compact requires that the Compact Commission take such action as necessary to ensure that a minimum price set by the commission for the region over the Federal milk marketing order floor price does not create an incentive for producers to generate additional supplies of milk. When there has been a rise in the Federal floor price for Class I fluid milk, the Compact has automatically shut itself off from the pricing process. Since there is no incentive to overproduce, there has been no rush to increase milk production in the Northeast as was feared by Compact opponents. No other region should feel threatened by a dairy compact for fluid milk produced and sold mainly at home.

The consumers in the Northeast Compact area, the now in the Mid-Atlantic area and the Southeast area, have shown their willingness to pay a few pennies more for their milk if the additional money is going directly to the dairy farmer. Environmental organizations have also supported dairy compacting as Compacts help to preserve dwindling agricultural land and open spaces.

I urge my colleague not to look success in the face and turn the other way, but to support us in passing this legislation that half of our states have requested.

Mrs. CLINTON. Mr. President. I am pleased to join with my colleagues today as an original cosponsor of the Dairy Consumers and Producers Protection Act of 2001. This legislation is vitally important to New York dairy farmers, New York’s economy, and rural communities around the country.

In addition, New York farmers, from Glen Falls to Ithaca and Jamestown, NY farmers and New York farms are an invaluable part of our State’s economy and its landscape. Agriculture is one of New York’s top industries. What is grown in our State makes its way to homes and kitchen tables across the country, and around the world.

In particular, the dairy industry is a pillar of New York’s economy. Milk is New York’s leading agricultural product, creating almost $2 billion in receipts. And New York ranks third in the country in terms of the value of dairy products sold, surpassed only by California and Wisconsin.

Yet, as I travel throughout New York State, I meet dairy farmers who are working harder, but still struggling to make ends meet. Volatile milk prices make it very difficult for New York dairy farmers to negotiate loans, to invest in expansion, and to plan for the future with any certainty.

That is why it is so important that we join with our colleagues from other States to expand the Northeast Dairy Compact to include New York. If New York had been a member of the Northeast Dairy Compact last year, the over 7,000 dairy farms in New York would have received an estimated $132.6 million in payments, an average of $18,200 for each farm, thereby increasing income for the average New York dairy farm by approximately eight percent.

In addition, New York cropland and farms have become prime land for development and sprawl. We must make sure that farmers all across New York and around the country get the help that they need to hold onto their farms, and to preserve our fields and open spaces. They are an important part of what makes New York so unique and so beautiful.

Helping to preserve New York’s dairy farms by expanding the Northeast Dairy Compact is the right thing to do. Not only does it ensure the security of our dairy farmers in New York and in other parts of the country, it guarantees an adequate supply of fresh milk.
June 29, 2001

Mr. President, today, I rise today to express my support for the Dairy Consumers and Producers Protection Act of 2001, important legislation that would re-authorize and expand the Northeast Dairy Compact, and ratify a Southern Compact. Growing support and recognition of the effectiveness and ingenuity of the Northeast Dairy Compact has led twenty-five States to enact compact legislation. These States now look to Congress to grant them the right to join the Northeast Compact, or to form a Southern Compact.

It is critical that we keep pace with the demands of State governments, and provide them with the authority to develop a regional pricing mechanism for Class I (fluid) milk. Using a formal process, States, including producers, processors, retailers and consumer representatives, will be able to establish a price level that is appropriate for producers, processors, retailers, and consumers.

The Northeast Dairy Compact was originally authorized as a three-year pilot program in the 1996 Farm Bill. Since July of 1997, when the Compact Commission first set the Class I over-order price at $16.94, the Northeast Dairy Compact has proven to be a great success, providing farmers with a fair price for their milk, protecting consumers from price spikes, reducing market dependency upon milk from a single source, controlling excess supply, and helping to preserve rural landscapes by strengthening farm communities. And, unlike so many of our country's remaining rural programs, the benefits of the dairy compact are realized at no cost to the Federal Government.

The Northeast Dairy Compact is managed by the Compact Commission. The Commission, comprised of 26 delegates from the six New England states, includes producers, processors, retailers and consumer representatives. Each State governor appoints three or five delegates to represent their State's vote on the Commission. The Commission meets monthly to evaluate and establish the current Compact over-order price for Class I (fluid) milk. Using a formal rule-making process, the Commission hears testimony to establish a price that takes into account the purchasing power of the public, and the price necessary to yield a reasonable return to producers and distributors. Any price change proposed by the Commission is subject to a two-thirds vote by the State delegations as well as a producer referendum.

The Compact Commission's price regulation works in conjunction with the Federal Government's pricing program, which establishes minimum prices paid to dairy farmers for their raw milk. Under the Compact, processors pay the difference between the Compact over-order price for fluid milk, currently $16.94, and the price established monthly by federal regulation for the same milk. The over-order premium is paid on class I (fluid) milk, and is only paid when the Compact over-order price is higher than the price set by the Federal milk marketing orders. Processors purchasing milk for other dairy products such as cheese or ice cream are not subject to the Compact's pricing regulations, although all farmers producing milk in the region, for any purpose, share equally in the Compact's benefits.

In order to protect low-income consumers from any increases in cost caused by the Compact, the Compact legislation imposes regulations on the Commission requiring that the Women, Infants and Children, WIC program, as well as School Lunch Programs, must be reimbursed for any additional costs they may incur as a result of compact activity. Three percent of the pooled proceeds are set aside to fulfill these obligations.

Compact legislation also contains a clause that holds the Commission responsible for any purchases of milk or milk products by the Commodity Credit Corporation, CCC, that result from the operation of the Compact. The Secretary of Agriculture has the authority to determine those costs and ensure that the Commission honors its obligations.

After money is withheld for the WIC and School Lunch programs, as well as the CCC, the Compact Commission makes disbursements to farmer cooperatives, partnerships and firms. These entities then make payments to individual farmers based on their level of production. These payments are only made when the Federal market order price falls below the price set by the Compact Commission, effectively creating a floor for milk prices. This, in turn, decreases price volatility in the region.

The stability created by the Compact pricing mechanism is important for farmers, as it guarantees farmers a fair price for their product and allows them to plan for the future. Farmers, knowing that they can count on a fair price, can allocate money to purchase and repair machinery, improve farming practices, and above all, stay in business.

Throughout our great Nation, the family farm continues to be a vital part of our rural community and agricultural infrastructure. In New England and across our country, farms continue to support our rural economies. Farms create economic stability by supporting local businesses such as feed stores, farm equipment suppliers and local banks. The continuing disappearance of small farms is making life very difficult for agribusinesses and for the overall rural economic infrastructure.

The importance of the family farm extends well beyond the rural economy, however. Preservation of the family farm has important environmental consequences as well. Numerous environmental organizations have expressed their support for dairy compacts. They recognize the ability of compacts to protect our farms and preserve our dairy industry. These organizations include the Sierra Club, the Conservation Law Foundation and the National Trust for Historic Preservation. These groups, as well as numerous other environmentally conscious organizations, recognize farmers as good stewards of the land, and value the ability of farms to sustain productive use of the land, while preserving open space.

Even though compacts enjoy widespread support across much of our country, opponents have worked tirelessly to discredit the merits of dairy compacts. These critics, however, must contend with the strong record of success that the Northeast Dairy Compact has put forth.

During its first four years, the Northeast Compact has stood up to numerous legal challenges. Courts have ruled in favor of the Compact on every level, including the U.S. Supreme Court. The courts have recognized the Compact as a proper and constitutional grant of congressional authority, permitted under the Commerce and Compact clauses of the U.S. Constitution. These decisions have upheld the Commission's authority to regulate milk within the region, as well as milk produced outside the region.

Concerns have also been raised about the Compact's effect on interstate trade. Opponents of the Northeast Compact argue that compacts restrict the movement of milk between States that are in the Compact, and States that lie outside the Compact. Compacts, however, do not restrict the movement of milk into the region. For example, producers in eastern New York State benefit from the Northeast Compact. By shipping their milk into the region, farmers are eligible to receive the Compact price for their products.

Another common misconception is that the Compact leads to overproduction. The Northeast Dairy Compact, however, has not led to overproduction during its first four years. In fact, during 2000, the Northeast Dairy Compact states produced 4.7 billion pounds of milk, a 0.6 percent reduction from 1999. Since the Northeast Dairy Compact was established, milk production in the region has risen by just 2.2 percent. Nationally, milk production rose 7.4 percent from 1997 to 2000. Over this same period, California, the largest...
Finally, opponents argue that compacts are harmful to consumers, especially low-income consumers. The facts show that this is not the case. On May 2, 2001, an independent study out of the University of Connecticut’s Food Marketing Policy Center offers new evidence regarding the impact of the Northeast Dairy Compact on consumer prices. The Food Marketing Policy Center performed a four-year analysis of retail milk prices using supermarket scanner data from 18 months prior to Compact implementation, up through July of 2000. This period of time captured the volatile prices preceding Compact implementation, as well as the pricing behavior that followed. The study found that the Northeast Dairy Compact was responsible for only 4.5 cents of the 29-cent increase in retail prices following Compact implementation. The study concludes that wider profit margins by processors and retailers account for 11 cents of the 29-cent increase. Since the Compact went into effect, these wider profit margins have drawn nearly $50 million out of the pockets of New England consumers.

The study suggests that retail stores and processors have used the Compact to lock in wider profit margins. The study states: “Leading firms in the supermarket-marketing channel have used their dominant market positions to lock in wider profit margins. Despite these wider profit margins, we maintain the safety and continuity of our milk supply, protecting the rights of states to form a unified pricing mechanism. By supporting the rights of states to form dairy compacts, we maintain the safety and continuity of our milk supply, protecting consumers from volatile milk prices, and conserve open land.”

Tillison continues by examining the reasons why consumers support the Compact. These include decreases in retail price volatility and the need for fresh milk. Tillison states, “Consumers like the idea of milk for their kids. It has a different mystique. It has a different mystique. It is because of consumers’ desire for (and the availability of) fresh milk.” At this time, I would ask unanimous consent that Jim Tillison’s article, “Let’s Talk About Compacts” be submitted for the RECORD.

Under our legal system, individual states have the authority to establish their own dairy pricing mechanism. Because of the nature and size of the dairy industries in the Northeast and South, states in these regions are better served by coming together to form a unified pricing mechanism. By supporting the rights of states to form dairy compacts, we maintain the safety and continuity of our milk supply, protect consumers from volatile milk prices, and conserve open land.

Originally created as a three-year pilot program, the Northeast Dairy Compact has been extremely successful in demonstrating the merits of compacts. We no longer need to speculate about the potential effects of compacts. We now have the hard evidence, from consumers, and good for the environment.

I ask that the Senate recognize this by extending and expanding the Northeast Dairy Compact, and ratifying a Southern Compact.

In closing, I urge the Senate to support this important legislation. Our States have come to us, and asked us to grant them the right to regulate the minimum farm price of milk, the right to save their family farms. We must grant them that right.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

From the Cheese Market News, May 11, 2001

Lift’s Talk About Compacts

(By Jim Tillison)

Here we go again. The issue of dairy compacts is “heating up” once again. Studies have been done and to now one’s surprise they are biased depending on which aide you are on. Let’s go back to the rhetoric to what is causing all the stir and discuss the stir that is being caused.

First, let us review the process involved in putting a dairy compact in place.

Essentially, the compact process result in negotiating interstate commerce laws. In other words, it allows the dairy producers in a number of states to regulate the price of milk paid by fluid processors in those states. Any milk brought into the state for fluid purposes is subject to the compact. Any milk brought into the state for fluid purposes is subject to the compact. Any milk brought into the state for fluid purposes is subject to the compact. The fact is that more money hasn’t brought on more milk in the one compact area currently in existence. Only one of the Northeast compact states, Vermont, is in the top 20 milk-producing states. And, the total area has not seen milk production rise faster than the national average.

Here we go again. The issue of dairy compacts is “heating up” once again. Studies have been done and to now one’s surprise they are biased depending on which aide you are on. Let’s go back to the rhetoric to what is causing all the stir and discuss the stir that is being caused.

vote on the compact on its own. It was only supposed to be a transition program while federal order reform was taking place. Secretary of Agriculture Dan Glickman didn’t have to implement it. Doremus didn’t have to respond to those kind of comments. What hearing was ever held or separate vote taken on forward contracting? I don’t recall any serious discussion of the portion of a recent budget bill that exempted one county in Nevada from federal order Class I differentials. Of course Glickman had to implement it . . . and the pet project of a Vermont Democratic senior senator in an election year. Think about it.

The dairy industry has many more important issues to spend political capital on. Issues that really are having, or will have, an impact on it. Instead of fighting over compacts, it should be working together to improve our potential for growth in world markets with really pushing for fair trade, dealing with environmental and food safety issues and developing programs that will allow all segments of the industry to continue into the 21st century.

The views expressed by CMN’s guest columnists are their own opinions and do not necessarily reflect those of Cheese Market News.

STATEMENTS ON SUBMITTED RESOLUTIONS

SENATE RESOLUTION 118—TO DESIGNATE THE MONTH OF NOVEMBER 2001 AS “NATIONAL AMERICAN INDIAN HERITAGE MONTH”

Mr. CAMPBELL. Mr. President, along with thirty of my colleagues today I am pleased to introduce a resolution to recoup the many contributions American Indians and Alaska Natives have made to this great Nation and to designate November, 2001, as “National American Indian Heritage Month” as Congress has done for nearly a decade.

American Indians and Alaska Natives have left an indelible imprint on many aspects of our everyday life that most Americans often take for granted. The arts, education, science, the armed forces, medicine, industry, and government are a few of the areas that have been influenced by American Indian and Alaska Native people over the last 500 years. In the medical field, many of the healing remedies that we use today have been borrowed from Native Americans and are still utilized today in conjunction with western medicine.

Many of the basic principles of democracy in our Constitution can be traced to practices and customs already in use by American Indian tribal governments including the doctrines of freedom of speech and separation of powers.

The respect of Native people for the preservation of natural resources, reverence for elders, and adherence to tradition, mirrors our own values which we developed in part, through the contact with American Indians and Alaska Natives. These values and customs are deeply interwoven and thrive with generation after generation of Native people.

From the difficult days of Valley Forge through our peace keeping efforts around the world today, American Indians and Alaska Native people have proudly served and dedicated their lives in the military readiness and defense of our country in wartime and in peace.

It is a fact that on a per capita basis, Native participation rate in the Armed Forces far exceeds that of every other group in this Nation. Many American Indian men made the ultimate sacrifice in the defense of this Nation, some even before they were granted citizenship in 1924. Many of the words in our language have been borrowed from Native languages, including many of the names of the rivers, cities, and States across our Nation. Indian arts and crafts have also made a distinct impression on our heritage.

It is my hope that by designating the month of November 2001, as “National American Indian Heritage Month,” we will continue to encourage self-esteem, pride, and self-awareness amongst American Indians and Alaska Natives of all ages.

November is a special time in the history of the United States: we celebrate the Thanksgiving holiday by remembering the Indians of the Northeast and English settlers as they enjoyed the bounty of their harvest and the promise of new kinships.

By recognizing the many Native contributions to the arts, governance, and culture of our Nation, we will honor their past and ensure a place in America for Native people for generations to come. I ask for the support of my colleagues on both sides of the aisle for this resolution, and urge the Senate to pass this important matter.

SENATE RESOLUTION 119—COMBATING THE GLOBAL AIDS PANDEMIC

Mr. BAYH (for himself, Mr. SMITH of Oregon, Mr. DASCHLE, Mr. LEAHY, Mr. BINGAMAN, Mr. LUHAR, Mrs. FEINSTEIN, Mr. DORGAN, Mr. KERRY, Mr. KENNEDY, Mr. BINGAMAN, Mr. JOHN, Mr. BINGAMAN, Mr. JOHN, Mr. BINGAMAN, Mr. JOHN, Mr. BINGAMAN, Mr. JOHN, Mr. BINGAMAN, Mr. JOHN) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 119

Whereas the international AIDS pandemic is of grave proportions and is growing;

Whereas the epicenter of the AIDS pandemic is sub-Saharan Africa, and incidences of contraction of HIV, AIDS, and related diseases are growing in the Caribbean basin, Russia, China, Southeast Asia, and India at alarming rates;

Whereas AIDS pandemic-related statistics are especially staggering in sub-Saharan Africa:

(1) the infection rate is 8 times higher than the rest of the world;

(2) in the region, over 17,000,000 people have already lost their lives to AIDS or AIDS-related illnesses, with another 24,000,000 living with AIDS, according to the World Health Organization and Joint United Nations Program on HIV/AIDS;

(3) in many countries in the region, life expectancy will drop by 50 percent over the next decade;
Whereas the United States has joined the international community in addressing the AIDS pandemic and related illnesses; and

Whereas in today’s globalized environment, goods, services, people—and disease—are moving at the fastest pace in world history;

Whereas we cannot insulate our citizenry from the global AIDS pandemic and related opportunistic disease, and we must provide leadership if we are to reverse global infection rates;

Whereas the AIDS pandemic is perhaps the most serious and challenging transnational issue facing the world in the post-Cold War era;

Whereas the AIDS pandemic is decimating local skilled workforces, straining fragile governments, diverting national resources, and undermining states’ ability to provide for their national defense or international peacekeeping forces.

Whereas United Nations Secretary General, Kofi Annan, asserts that between $7,000,000,000 and $10,000,000,000 is needed annually to address the AIDS pandemic, yet current international assistance efforts total roughly a little more than $1,000,000,000 per annum;

Whereas the United States has joined the call from the United Nations Secretary General, Kofi Annan, and others in support of a global fund to assist national governments, international organizations, and nongovernmental organizations in the prevention, care, and treatment of AIDS and AIDS-related illnesses; and

Whereas the United Nations Special Session on AIDS, taking place in June 2001, and the Group of Eight Industrialized Nations meeting in July 2001, are key opportunities for more states, governments, international organizations, the private sector, and civil society to donate assistance to the global fund: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the tragedy of the AIDS pandemic in human terms, as well as its devastating impact on national economies, infrastructures, political systems, and all sectors of society;

(2) strongly supports the formation of a Global AIDS and Health Fund;

(3) calls for the United States to remain open to providing greater sums of money to the global fund as other donors join in supporting this endeavor;

(4) calls on other nations, international organizations, foundations, the private sector, and civil society to join in providing assistance to the global fund;

(5) urges all national leaders in every part of the world to go beyond to their people about how to avoid contracting or transmitting the HIV virus;

(6) calls for the United States to continue to invest heavily in AIDS treatment, prevention, and research;

(7) urges international assistance programs to continue to emphasize science-based best practices and prevention in the context of a comprehensive program of care and treatment;

(8) encourages international health care infrastructures to better prepare themselves for the successful provision of AIDS care and treatment, including the administration of AIDS drugs;

(9) urges the Administration of President George W. Bush to encourage participants at the United Nations General Assembly Special Session on AIDS in June, and the Group of Eight Industrialized Nations meeting in July, to contribute to the global fund; and

(10) calls for United States representatives at the United Nations General Assembly on Industrialized Nations meeting to emphasize the need to maintain focus on science-based best practices and prevention in the context of a comprehensive program of care and treatment, combating mother-to-child transmission of the HIV virus, defeating opportunistic infections, and improving infrastructure and environments where treatment medicines are available, and seek additional resources to support the millions of AIDS orphans worldwide.

S. RES. 121—ORGANIZATION OF THE SENATE

Mr. DASCHLE (for himself and Mr. LOTT) submitted the following resolution; which was considered and agreed to—

S. Res. 120

Resolved, That the Majority Party of the Senate for the 107th Congress shall have a one seat majority on every committee of the Senate, except that the Select Committee on Ethics shall continue to be composed equally.

SEC. 2 Notwithstanding the provisions of Rule XXV the Majority and Minority Leaders of the Senate are hereby authorized to appoint their respective committees consistent with this resolution.

SEC. 3 Subject to the authority of the Standing Rules of the Senate, any agreements entered into regarding committee funding and space prior to June 5, 2001, between the Chairman and Ranking member of each committee shall remain in effect, unless modified by subsequent agreement between the Chairman and Ranking member.

SEC. 4 The provisions of this resolution shall cease to be effective, except for Sec. 3, if the ratio in the full Senate on the date of adoption of this resolution changes.

S. RESOLUTION 121—EX-PRESSING THE SENSE OF THE SENATE REGARDING THE POLICY OF THE UNITED STATES AT THE 53RD ANNUAL MEETING OF THE INTERNATIONAL WHALING COMMISSION

Mr. KERRY (for himself, Ms. SNOWE, Mr. HOLLINGS, Mr. MCCAIN, Mr. BIDEN, Mr. SARBANES, Mrs. BOXER, Mr. KENNY, and Mr. FEINGOLD) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. Res. 121

Whereas whales have very low reproductive rates, making whale populations extremely vulnerable to pressure from commercial whaling;

Whereas whales migrate throughout the world’s oceans and international cooperation is required to successfully conserve and protect whale stocks;

Whereas in 1946 the nations of the world adopted the International Convention for the Regulation of Whaling, which established the International Whaling Commission to provide for the proper conservation of the whale stocks;

Whereas the Commission adopted a moratorium on commercial whaling in 1982 in order to conserve and promote the recovery of the whale stocks;

Whereas the Commission has designated the Antarctic Ocean and the ocean waters around Antarctica as whale sanctuaries to further enhance the recovery of whale stocks;

Whereas many nations of the world have designated waters under their jurisdiction as whale sanctuaries where commercial whaling is prohibited, and additional regional whale sanctuaries have been established by nations that are members of the Commission;

Whereas several member nations of the Commission have taken reservations to the Commission’s moratorium on commercial whaling and 1 member nation is currently conducting commercial whaling operations in spite of the moratorium and the protests of other nations;

Whereas the Commission has adopted several resolutions at recent meetings asking member nations to abandon plans to initiate or continue commercial whaling activities conducted under reservation to the moratorium;

Whereas another member nation of the Commission has taken a reservation to the Commission’s Southern Ocean Sanctuary and continues to conduct unnecessary lethal scientific whaling in the waters of that sanctuary;

Whereas the Commission’s Scientific Committee has repeatedly expressed serious concerns about the scientific need for such lethal whaling;

Whereas scientific information on whales can readily be obtained through non-lethal means;

Whereas the lethal take of whales under reservations to the Commission’s policies have been increasing annually;

Whereas there continue to be indications that whale meat is being traded on the international market despite a ban on such trade under the Convention on International Trade in Endangered Species (CITES), and that meat may be originating in one of the member nations of the Commission;

Whereas engaging in unauthorized commercial whaling and lethal scientific whaling undermines the conservation program of the Commission; Now, therefore, be it,

Resolved, That it is the sense of the Senate that—

(1) at the 53rd Annual Meeting the International Whaling Commission the United States should—

(A) remain firmly opposed to commercial whaling;

(B) initiate and support efforts to ensure that all activities conducted under reservations to the Commission’s moratorium or sanctuaries are ceased;

(C) oppose the lethal taking of whales for scientific purposes unless such lethal taking

(2) calls on other nations to remain open to providing greater sums of money to the Commission as other donors join in supporting this endeavor;

(3) calls on nations to support the formation of a Global Whaling Fund;

(4) calls for the United States to remain open to providing greater sums of money to the global fund as other donors join in supporting this endeavor;

(5) urges all national leaders in every part of the world to go beyond to their people about how to avoid contracting or transmitting the HIV virus;

(6) calls for the United States to continue to invest heavily in AIDS treatment, prevention, and research;

(7) urges international assistance programs to continue to emphasize science-based best practices and prevention in the context of a comprehensive program of care and treatment;

(8) encourages international health care infrastructures to better prepare themselves for the successful provision of AIDS care and treatment, including the administration of AIDS drugs;

(9) urges the Administration of President George W. Bush to encourage participants at the United Nations General Assembly Special Session on AIDS in June, and the Group of Eight Industrialized Nations meeting in July, to contribute to the global fund; and

(10) calls for United States representatives at the United Nations General Assembly on Industrialized Nations meeting to emphasize the need to maintain focus on science-based best practices and prevention in the context of a comprehensive program of care and treatment, combating mother-to-child transmission of the HIV virus, defeating opportunistic infections, and improving infrastructure and environments where treatment medicines are available, and seek additional resources to support the millions of AIDS orphans worldwide.

(3) resolutions to the Commission’s moratorium or sanctuaries are ceased;

(4) calls on nations to support the formation of a Global Whaling Fund;

(5) calls for the United States to remain open to providing greater sums of money to the global fund as other donors join in supporting this endeavor;

(6) urges all national leaders in every part of the world to go beyond to their people about how to avoid contracting or transmitting the HIV virus;
CONGRESSIONAL RECORD—SENATE

is specifically authorized by the Scientific Committee; and
(D) seek the Commission’s support for speci-
cific efforts by member nations to end illegal
trade in whale meat; and
(E) support the permanent protection of
whale populations through the establish-
ment of whale sanctuaries in which commer-
cial whaling is prohibited;
(2) at the 12th Conference of the Parties to
the Convention on International Trade in
Endangered Species, the United States should
oppose all efforts to reopen inter-
national trade in whale meat or downlist any
whale population; and
(3) the United States should make full use
of all appropriate diplomatic mechanisms, re-
levant international laws and agreements, and
other appropriate mechanisms to imple-
ment the goals set forth in paragraphs (1) and
(2).

Mr. KERRY. Mr. President, as Chair-
man of the Oceans and Fisheries Sub-
committee, I rise today to submit a res-
olution regarding the policy of the
United States at the upcoming 53rd An-
nual Meeting of the International Whaling
Commission, IWC. I wish to thank the Ranking Member of the
committee, Ms. SNOWE, for co-spon-
soring this resolution. I wish to also
thank my colleagues Mr. HOLLINGS, Mr.
McCAIN, Mr. BIDEN, Mrs. BOXER, Mr.
SARBANES, Mr. KENNEDY and Mr. FEIN-
GOLD for co-sponsoring as well.

The IWC will meet in London from
July 23-27th. Despite an IWC morato-
rium on commercial whaling since 1985,
Japan and Norway have harvested over
1000 minke whales since the morato-
rium was put in place. Whales are al-
ready under enormous pressure world
wide from collisions with ships, entan-
glement in fishing gear, coastal pollu-
tion, noise emanating from surface ves-
sels and other sources. The need to con-
serve and protect these magnificent
mammals is clear.

The IWC was formed in 1946 in rec-
ognition of the fact that whales are
highly migratory and that they do not
belong to any one Nation. In 1982, the
IWC agreed on an indefinite morato-
rium on all commercial whaling begin-
ning in 1985. Unfortunately, Japan has
been using a loophole that allows coun-
tries to issue themselves special per-
mits for whaling under scientific pur-
poses. The IWC Scientific Committee
has not requested any of the informa-
tion obtained by killing these whales
and has stated that Japan’s scientific
whaling data is not required for man-
agement. Norway, on the other hand,
objects to the moratorium on whaling and
openly pursues a commercial fish-
ery for whales.

This resolution calls for the U.S. del-
egation to the IWC to remain firmly
opposed to commercial whaling. In ad-
dition, this resolution calls for the U.S.
 to oppose the lethal taking of whales for
scientific purposes unless such le-
thal taking is specifically authorized by
the Scientific Committee of the
Commission. The resolution calls for
the U.S. delegation to support an end

to the illegal trade of whale meat and
to support the permanent protection of
whale populations through the estab-
lishment of whale sanctuaries in which
commercial whaling is prohibited.

I ask unanimous consent to insert
into the RECORD a statement from the
World Wildlife Fund, WWF, concerning
the upcoming meeting of the IWC and
the protection of whales.

There being no objection, the ma-
terial was ordered to be printed in the
RECORD, as follows:

STATEMENT OF WORLD WILDLIFE FUND

Today, populations of nearly all the
whales are at depressed levels, a legacy
of unsustainable whaling during the last
two centuries. Some, such as the North
Atlantic right and Antarctic blue whales,
survive as a few hundred, individuals at the brink of ex-
tinction, having failed to rebound from past
exploitation. Others are believed to be
returning to healthy levels. While direct
human impacts are clearly the greatest,
other more diffuse threats may ultimately
exact a greater toll. Rapid climate warming
in the next few decades is expected to disrupt
whale migration, and could reduce
whaling support. And accumulation of DDT,
PCBs, and other toxic contaminants in the
marine food chain is already affecting some
whales and may en-
danger their future reproduc-
tion. Such broad-based threats to the
environment are difficult to address in
ways that will alleviate harm to whales
specifically, and make it all the more impor-
tant that whales are not also threatened by
uncontrolled commercial whaling.

The International Whaling Commission,
IWC, was formed at the 1946 Inter-
national Convention for the Regulation
of Whaling, and is the sole international regu-
latory body charged with the management of
cetaceans. International regulation of whal-
ing was recognized by the UN Convention
on the Law of the Sea, and reaffirmed by Agen-
da 21 as essential for these highly migratory
species.

Despite the global moratorium on
commercial whaling put in place by the IWC in 1986,
over 1000 Northern and Southern minke
whales are harvested each year. Within the IWC, Japan continues to catch
hundreds of whales (many in the Southern
Ocean which is designated as an IWC
whale sanctuary) using a loophole for scientific re-
search, while Norway pursues an openly
commercial hunt under a legal “objection”
to the moratorium. For over a decade, both
countries have proceeded without IWC ap-
proval and instead in the face of repeated cens-
sure by the Commission. Norway is currently
moving to re-open international trade in
whale products despite a ban under CITES.
Japan and Just has extensively its scientific
whaling to include sperm and Bryde’s whales
in addition to the two species of minke.

Japan and Norway’s insistence on hunting
whales despite the moratorium has brought
IWC to a dangerous impasse. No sound man-
gerane scheme currently exists to ensure
the sustainability of whaling, although a Re-
vised Management Scheme, RMS, that could
help to do so has been under discussion in
the IWC for several years.

Japan and Norway have long said they
viewed completion of the RMS as a turning
point in their efforts to lift the whaling mor-
atatorium, and both countries have harshly
criticized the IWC’s approach to the
RMS. In recent IWC talks, however, the
great majority of countries present
sought to include crucial safeguards on the
Convention and conditions on the
RMS. They did so over the strengths and re-
peated objections of Japan and Norway, who
seemed unwilling to agree to safeguards that
would ensure that commercial whaling does not
threaten whale populations.

In addition, Japan and Norway are sup-
ported in the IWC by the votes of a loyal
group of countries, small is-
land states that receive significant assist-
ance from Japan. This gives the whalers a
blocking minority of votes and has exacer-
bated the IWC’s deadlocks.

Because a tiny minority of countries in
the IWC refuses to cease commercial whaling, it
is imperative that new safeguards (including
highly precautionary catch limits and provi-
sions on monitoring, surveillance, and con-
trol such as DNA sampling of all whales
cought, a diagnostic DNA register, and sanc-
tions for non-compliance) be agreed that will
contain their activities and bring them back
under full IWC control at the earliest pos-
sible date. An RMS could advance this goal by
containing rigorous safeguards, including
a Revised Management Plan that sets all catch limits at zero unless oth-
wise calculated and approved. Such an RMS would replace the now obsolete
1974 management scheme.

The IWC 53rd Conference of Parties meets
this year. The Hammersmith meeting must
make progress in resolving the impasse
in the IWC, bringing whaling by Norway and
Japan under international control as a mat-
ter of urgency, and ensuring that any discus-
sion on the RMS incorporate rigorous safe-
guards to rein in current and potential whal-
ing abuses.

The IWC’s mandate requires first and fore-
most that it prevent the return of uncon-
trolled large-scale commercial whaling. This
is the near-term agenda by which it will be
judged and is currently the main contribu-
tion it has to offer conservation of cetaceans
more broadly. For the IWC to remain rel-
evant over the long term, however, it must
expand its scope of engagement to address
the other human activities which threaten
whales and focus action on ensuring the sur-
vi
l
 Of the most endangered species.

Ms. SNOWE, Mr. President, the reso-
lution that Senator KERRY and I are
submitting is very timely and impor-
tant. As we work here in the Senate
today, representatives of nations from
around the globe are preparing for the
53rd Annual Meeting of the Inter-
national Whaling Commission to be
held in London July 23-27, 2001. At this
meeting, the IWC will determine the
fate of the world’s whales through con-
sideration of proposals to end the cur-
cent global moratorium on commercial
whaling. The adoption of any such pro-
posals by the IWC would mark a major
setback in whale conservation. It is
imperative that the United States remain
opposed to any proposal to resume commer-
cial whaling and that we, as a nation, continue to speak
out passionately against this practice.

It is also time to close one of the
loopholes used by nations to continue
whaling without regard to the morato-
rium or established whale sanctuaries.
The practice of unnecessary lethal sci-
entific whaling is outdated and the
value of the data of such research has

June 29, 2001

12561
been called into question by an international array of scientists who study the same population dynamics questions raised by whaling in the name of science. This same whale meat is then processed and sold in the marketplace. These sentiments have been echoed by the Scientific Committee of the IWC which has repeatedly passed resolutions calling for the cessation of lethal scientific whaling, particularly that occurring in designated whale sanctuaries. They have offered to work with all interested parties to design research protocols that will not require scientists to harm or kill whales.

Last year, Japan expanded their scientific whaling program over the IWC’s objections. The resolution that we are offering expresses the sense of the Senate to the IWC that as long as whales continue to remain firmly opposed to any resumption of commercial whaling and oppose, at the upcoming IWC meeting, the non-necessary lethal taking of whales for scientific purposes.

Commercial whaling has been prohibited for many species for more than sixty years. In 1982, the continued decline of commercially targeted stocks led the IWC to declare a global moratorium on all commercial whaling which went into effect in 1986. The United States was a leader in the effort to establish the moratorium, and since then we have consistently provided a strong voice against commercial whaling and have worked to uphold the moratorium. This resolution reaffirms the United States’ strong support for a ban on commercial whaling at a time when our negotiations at the IWC must need that support. Norway, Japan, and other countries have made it clear that they intend to push for the elimination of the moratorium, and for a return to the days when whales were treated as commodities.

The resolution would reiterate the U.S. objection to activities being conducted under reservations to the IWC’s moratorium. The resolution would also oppose all efforts made at the Convention on International Trade in Endangered Species, CITES, to reopen international trade in whale meat or to downlist any whale population. In addition, the Senate resolution should note that the United States has established whale sanctuaries that would prevent whaling in specified areas even if the moratorium were to be lifted. Despite these efforts to give whale stocks a chance to rebuild, the number of whales harvested has increased in recent years, tripling since the implementation of the global moratorium in 1986. This is a dangerous trend that does not show signs of stopping.

Domestically, we work very hard to protect whales in U.S. waters, particularly those considered threatened or endangered. Our own laws and regulations are designed to give whales one of the highest standards of protection in the world, and as a result, our own citizens are subject to rules designed to protect against even the accidental taking of whales. Commercial whaling is, of course, strictly prohibited. Given what is asked of our citizens to protect against even accidental injury to whales here in the United States it would be grossly unfair if we retreated in any way from our position opposing commercial, intentional whaling by other countries. Whales migrate throughout the world’s oceans, and as we protect whales in our own waters, so should we act to protect them internationally.

Whales are among the most intelligent animals on Earth, and they play an important role in the marine ecosystem. Yet, there is still much about them that we do not know. Resuming the intentional harvest of whales is irresponsible, and it could have ecological consequences that we cannot prevent. Furthermore, in some cases the threat to even consider easing conservation measures.

The right policy is to protect whales across the globe, and to oppose the resumption of commercial whaling. I urge my colleagues to support swift passage of this resolution.

SENATE RESOLUTION 122—RELATING TO THE TRANSFER OF SLOBODAN MILOSEVIC TO THE INTERNATIONAL CRIMINAL TRIBUNAL FOR YUGOSLAVIA, AND FOR OTHER PURPOSES

Mr. MCCONNELL (for himself and Mr. LEAHY) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. Res. 122

Whereas Slobodan Milosevic has been transferred to the International Criminal Tribunal for Yugoslavia to face charges of crimes against humanity; Whereas the transfer of Slobodan Milosevic and other indicted war criminals is a triumph of international justice and the rule of law in Serbia; Whereas corruption and warfare under the Milosevic regime caused Yugoslavia extensive economic damage, including an estimated $29,400,000,000 in lost output and a foreign debt that exceeds $12,200,000,000; and Whereas democrats and reformers in the Federal Republic of Yugoslavia deserve the support and encouragement of the United States; Now, therefore, be it

Resolved, That (a) the Senate hereby—

(1) recognizes the courage of Serbian democrats, in particular, Serbian Prime Minister Zoran Djindjic, in facilitating the transfer of Slobodan Milosevic to the International Criminal Tribunal; and

(2) calls for the continued transfer of indicted war criminals to the International Criminal Tribunal for Yugoslavia and the release of all political prisoners held in Serbian prisons.

(b) It is the sense of the Senate that the United States should remain committed to supporting efforts to support the success of economic, political, and legal reforms in the Federal Republic of Yugoslavia.

Mr. MCCONNELL. Mr. President, Senator LEAHY and I welcome the news that the transfer yesterday of Slobodan Milosevic and other indicted war criminals to the International Criminal Tribunal for Yugoslavia, ICTY. Last year, we worked to include language in the fiscal year 2001 Foreign Operations Appropriations bill to condition assistance to Serbia on, among other things, full cooperation by the President that the government is cooperating with the ICTY on the ‘‘surrender and transfer’’ of war criminals to The Hague.

While our efforts to secure justice for the victims of Milosevic’s atrocities through Section 504 of P.L. 106–429 contributed to dramatic events in early April, when Milosevic was first arrested and, again yesterday, the real credit for facilitating the transfer belongs to economic reconstruction in Serbia, in particular Prime Minister Zoran Djindjic. I am pleased that they recognize the importance of forward progress on the issue of war crimes, and I think it bodes well for the country’s overall prospects for successful economic, political, and legal reforms.

The resolution we submit today recognizes the courage of Serbian democrats and reaffirms our commitment to providing U.S. foreign assistance to support much needed reforms in the Federal Republic of Yugoslavia (FRY). We hope that Prime Minister Djindjic, and other reformers, continue to demonstrate courageous leadership, such as they did yesterday. Other indicted war criminals should be transferred to The Hague and all political prisoners in Serbian jails should be immediately released.

There is no victory sweeter than justice. It is now up to the ICTY to deliver justice to the victims and the survivors of atrocities committed in Kosovo, Bosnia, and Croatia.

Mr. LEAHY. Mr. President, last year, when Senator MCCONNELL and I included language in the fiscal year 2001 Foreign Operations bill to condition United States assistance to Serbia on the Federal Republic of Yugoslavia’s cooperation with the War Crimes Tribunal, we could not predict what the effect of our provision would be. While we both wanted to support democracy and economic reconstruction in Serbia, we also felt strongly that if Serbia’s leaders wanted our assistance they should fulfill their international responsibility to apprehend and surrender indicted war criminals to The Hague.

I am very grateful for the way Senator MCCONNELL and his staff have worked closely with me and my staff on this. It has been a classic case of how conditioning our assistance and our cooperation to the administration, can achieve a result that significantly advances the cause of international justice. Milosevic’s transfer to the War Crimes Tribunal should bring
hope to millions of people throughout the former Yugoslavia.

Above all, as Senator MCCONNELL has already noted, we should congratulate Prime Minister Djindjic and other Serb leaders who have risked their lives and their careers for their country’s future. It is a legacy that few people in history can claim. Those who have criticized Prime Minister Djindjic for surrendering Milosevic should be aware that for the United States there is no alternative. We will not support a Serb Government that does not cooperate with the War Crimes Tribunal. We expect the apprehension and transfer to The Hague of the other publicly indicted war criminals who remain at large in Serb territory, and the release of the remaining political prisoners in Serbia’s jails.

I also want to recognize the Serb people who suffered terribly under Milosevic’s disastrous policies, and who increasingly saw that in order to rebuild their country and establish democracy and the rule of law on a solid footing, it was necessary to bring to justice the people who devastated the former Yugoslavia in their names. We submit this resolution on their behalf, and on behalf of Milosevic’s other victims, dead and alive, in Kosovo, Bosnia, and Croatia.

SENATE RESOLUTION 123—AMENDING THE STANDING RULES OF THE SENATE TO CHANGE THE NAME OF THE COMMITTEE ON SMALL BUSINESS TO THE “COMMITTEE ON SMALL BUSINESS AND ENTREPRENEURSHIP”

Mr. KERRY (for himself and Mr. BOND) submitted the following resolution; which was considered and agreed to:

Resolved, That the Standing Rules of the Senate are amended—

(1) by striking “Business, to and inserting “Business and Entrepreneurship, to”; and

(2) by inserting “and Entrepreneurship” after “Committee on Small Business” each place that term appears;

(3) in paragraph (3)(a) of rule XXV, by inserting “and Entrepreneurship” after “Committee on Small Business”; and

(4) by deleting “and Entrepreneurship” after “Committee on Small Business” each place that term appears.

SENATE CONCURRENT RESOLUTION 57—RECOGNIZING THE HEBREW IMMIGRANT AID SOCIETY

Mr. KENNEDY (for himself and Mr. BROWNBACK) submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

Whereas the United States has always been a country of immigrants and was built on

the hard work and dedication of generations of those immigrants who have gathered on our shores;

Whereas, over the past 120 years, the Hebrew Immigrant Aid Society (HIAS), the oldest international migration and refugee resettlement agency of the United States, has assisted more than 4,500,000 migrants of all faiths to immigrate to the United States, Israel, and other safe havens around the world;

Whereas, since the 1970s, HIAS has resettled more than 400,000 refugees from more than 50 countries and has provided high quality resettlement services through a network of local Jewish community social service agencies;

Whereas HIAS has helped bring to the United States such outstanding individuals as former Secretary of State Henry Kissinger, artist Marc Chagall, Olympic gold medalist Lenny Kravitz, poet and Nobel Laureate Joseph Brodsky, and author and restaurateur George Lang;

Whereas HIAS has assisted with United States refugee programs, often through joint voluntary agency, providing refugee processing, cultural orientation, and other services in Moscow, Vienna, Kiev, Tel Aviv, Rome, and Geneva;

Whereas through publications, public meetings, and radio and television broadcasts, HIAS is a crucial provider of information, counseling, legal assistance, and other services, including outreach programs for the Russian-speaking immigrant communities, to immigrants and asylum seekers in the United States;

Whereas HIAS plays a vital role in serving the needs of refugees, immigrants, and asylum seekers, and continues to work in areas of conflict and instability, seeking to rescue those who are fleeing from danger and persecution;

Whereas on September 9, 2001, HIAS will celebrate the 120th anniversary of its founding; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That (a) Congress—

(1) recognizes the Hebrew Immigrant Aid Society (HIAS), and the immigrants and refugees that HIAS has served, for the contributions they have made to the United States; and

(2) congratulates HIAS on the 120th anniversary of its founding;

(b) It is the sense of Congress that the President should issue a proclamation recognizing September 9, 2001, as the 120th anniversary of the founding of the Hebrew Immigrant Aid Society, and calling on the people of the United States to conduct appropriate ceremonies, activities, and programs to demonstrate appreciation for the contributions made by HIAS to the United States.

Mr. KENNEDY. Mr. President, I am proud to submit a resolution honoring the 120th anniversary of the founding of the Hebrew Immigrant Aid Society. During its distinguished history, the Society has helped more than 4,5 million immigrants of all faiths who have come to the United States, Israel, and other safe havens around the world. Since 1970, the Society has assisted more than 400,000 refugees from more than 50 countries in resettling in the United States, and these individuals have provided indispensable contributions to this country.

I also commend the Hebrew Immigrant Aid Society for its continuing efforts to remind this country of the importance of a wise policy on refugees. As refugees continue to arrive from every corner of the world, the Society has helped ensure that the United States has an effective and humane response to each human tragedy. By maintaining a vigorous refugee resettlement program, we set an example for other nations to follow.

The Hebrew Immigrant Aid Society continues to have a vital role in serving the needs of refugees, immigrants, and asylum seekers. Our country owes it an enormous debt of gratitude, and I urge the Senate to agree to this well-deserved tribute.

SENATE CONCURRENT RESOLUTION 58—EXPRESSING SUPPORT FOR THE TENTH ANNUAL MEETING OF THE ASIA PACIFIC PARLIAMENTARY FORUM

Mr. AKAKA (for himself and Mr. INOUYE) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

Resolved by the Senate (the House of Representatives concurring), That

(a) in recognition of the Asia Pacific Parliamentary Forum established by former Japanese Prime Minister Yasuhiro Nakasone in 1993, the Tokyo Declaration, signed by 59 parliamentarians from 15 countries, entered into force as the founding charter of the forum on January 14 and 15, 1993, establishing the basic structure of the forum as an inter-parliamentary organization;

(b) the forum, originally 15 members, one of which was the United States, has increased to 27 member countries;

(c) the forum serves to provide regional identification and cooperation through discussion of matters of common concern to all member states and serves, to a great extent, as the legislative arm of the Asia-Pacific Economic Cooperation;

(d) the forum lies in resolving political, economic, environmental, security, law and order, human rights, education, and cultural issues;

(e) the forum will hold its tenth annual meeting on January 6 through 9, 2002, which will be the first meeting of the forum hosted by the United States;

(f) approximately 270 parliamentarians from 27 countries in the Asia Pacific region will attend this meeting;

(g) the Secretariat of the meeting will be the Center for Cultural and Technical Exchange Between East and West in Honolulu, Hawaii;

(h) the East-West Center is an internationally recognized education and research organization established by the United States Congress in 1960 largely through the efforts of the Eisenhower administration and the Congress;

(i) the mission of the East-West Center is to strengthen understanding and relations between the United States and the Asia Pacific region and to help promote the establishment of a stable, peaceful and prosperous Asia Pacific community in which the United States is a natural, valued and leading partner;

(j) whereas it is the agenda of this meeting to advance democracy, peace, and prosperity in the Asia Pacific region;

(k) therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress—
well the spirit of Aloha.

leaders on both sides of the Pacific for

AMENDMENTS SUBMITTED AND

PROPOSED

SA 850. Mr. NICKLES proposed an amendment

to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage.

SA 851. Mr. CRAIG proposed an amendment

to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage, as follows:

At the appropriate place insert the fol-

lowing:

SEC. . SENSE OF THE SENATE REGARDING FULL

AVAILABILITY OF MEDICAL SAVINGS ACCOUNTS.

(a) FINDINGS.—The Senate finds:

(1) Medical savings accounts eliminate bu-

reacracy and put patients in control of

their health care decisions.

(2) Medical savings accounts extend cov-

erage to the uninsured. According to the

Treasury Department, one-third of MSA pur-

chasers previously had no health care cov-

erage.

(3) The medical savings account demo-

stration program has been hampered with

restrictions that put medical savings ac-

counts out of reach for millions of Ameri-

cans.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that a patients' bill of rights should remove the restrictions on the pri-

vate-sector medical savings account dem-

stration program to make medical savings accounts available to more Americans.

SA 852. Mr. REID proposed an amendment

to the bill S. 1052, to amend the Public Health Service Act and the Em-

ployee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 154, between lines 2 and 3, insert the fol-

lowing:

(II) LIMITATION ON AWARD OF ATTORNEYS' FEES.—

(A) IN GENERAL.—Subject to subparagraph (B), with respect to a participant or bene-

ficiary (or the estate of such participant or beneficiary) who brings a cause of action under this subsection and prevails in that ac-

tion, the amount of attorneys' contingency fees that a court may award to such partici-

pant or beneficiary, or any arrangement, or any arrangement, (or any arrangement, (or any arrangement, or any arrangement, (or any arrangement, or any arrangement, (or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrangement, or any arrange-
SA 853. Mr. THOMPSON proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 170, between lines 21 and 22, insert the following:

"(9) DAMAGES OPTIONS.—In addition to plans or coverage that are subject to this Act, a plan or issuer may offer, and a participant or beneficiary may accept, a plan or coverage that provides for one or more of the following remedies, in which case the damages authorized by this section shall not apply:

"(i) Equitable relief as provided for in subsections (a)(1)(B).

"(ii) Unlimited economic damages, including reasonable attorneys fees.

"(B) PROTECTION OF THE REGULATION OF QUALITY OF MEDICAL CARE UNDER STATE LAW.—Nothing in this paragraph shall be construed to preclude any action under State law against a person or entity for liability or vicarious liability with respect to the delivery of medical care. A claim that is based on or otherwise relates to a group health plan's administration or determination of a claim for benefits (notwithstanding the definition contained in paragraph (2)) shall not be deemed to be the delivery of medical care under any State law for purposes of this section. A health claim shall be maintained exclusively under this section."

On page 170, between lines 21 and 22, insert the following:

"(9) DAMAGES OPTIONS.—

"(A) IN GENERAL.—In addition to plans or coverage that are subject to this Act, a plan or issuer may offer, and a participant or beneficiary may accept, a plan or coverage that provides for one or more of the following remedies, in which case the damages authorized by this section shall not apply:

"(i) Equitable relief as provided for in subsections (a)(1)(B).

"(ii) Unlimited economic damages, including reasonable attorneys fees.

"(B) PROTECTION OF THE REGULATION OF QUALITY OF MEDICAL CARE UNDER STATE LAW.—Nothing in this paragraph shall be construed to preclude any action under State law against a person or entity for liability or vicarious liability with respect to the delivery of medical care. A claim that is based on or otherwise relates to a group health plan's administration or determination of a claim for benefits (notwithstanding the definition contained in section 502(n)(2)) shall not be deemed to be the delivery of medical care under any State law for purposes of this section. Any such claim shall be maintained exclusively under section 502.

SA 855. Mr. CARPER proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 153, strike line 9 and all that follows through page 154, line 2, and insert the following:

"(10) STATUTORY DAMAGES.—The remedies set forth in this subsection shall be the exclusive remedies for any cause of action brought under this Act. Such remedies shall include economic and noneconomic damages, but shall not include any punitive damages.

SA 856. Mr. FRIST (for himself and Mr. BREAUX) proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Bipartisan Patients' Bill of Rights Act of 2001."

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 101—Patients' Bill of Rights.

Subtitle V—Effectiveness Date

Sec. 501—Effective date and related rules.

Sec. 502—Severability.

Sec. 503—Annual review.
(1) IN GENERAL.—In the case of medically necessary and appropriate items or services related to the emergency medical condition that may be provided to a participant, beneficiary, or enrollee by a nonparticipating provider after the participant, beneficiary, or enrollee is stabilized, the nonparticipating provider shall contact the plan or issuer as soon as practicable, but not later than 1 hour after stabilization occurs, with respect to whether—

(A) the provision of items or services is approved;

(B) the participant, beneficiary, or enrollee will be transferred; or

(C) other arrangements will be made concerning the care and treatment of the participant, beneficiary, or enrollee.

(2) FAILURE TO RESPOND AND MAKE ARRANGEMENTS.—If a group health plan, and a health insurance issuer that offers health insurance coverage, fails to respond and make arrangements within 1 hour of being contacted in accordance with paragraph (1), then the plan or issuer shall be responsible for the cost of any additional items or services furnished to or by the nonparticipating provider if—

(A) coverage for items or services of the type furnished by the nonparticipating provider is available under the plan or coverage;

(B) the items or services are medically necessary and appropriate and related to the emergency medical condition involved; and

(C) the timely provision of the items or services is medically necessary and appropriate.

(3) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed to prohibit a group health plan, and a health insurance issuer that offers health insurance coverage, to provide reimbursement to a nonparticipating provider under this section.

(b) AUTHORITY.—The authority of a group health plan, and a health insurance issuer that offers health insurance coverage, to provide coverage for—

(A) the transfer or discharge of the participant, beneficiary, or enrollee (or, with respect to a pregnant woman, the obstetrical and gynecological care, and the ordering of related obstetrical and gynecological items and services, pursuant to the direct access designation of a participating health care professional described in subsection (b)(2) in the case of a female participant, beneficiary, or enrollee who seeks coverage for obstetrical or gynecological items and services provided by a participating physician who specializes in obstetrics or gynecology;

(B) obstetrical and gynecological care; and

(C) any items or services that are provided, authorized, ordered, or otherwise authorized under subsection (a)(2) by a physician unless such items or services are related to obstetric or gynecologic care.

(c) REQUIREMENT.—If a group health plan, and a health insurance issuer that offers health insurance coverage, described in subsection (b) may not require authorization or refer a participant for the exercise of a point-of-service option other than that of a participating health care professional, the plan shall offer the participant the exercise of a point-of-service option.

(d) REIMBURSEMENT TO A NONPARTICIPATING PROVIDER.—In the case of a nonparticipating provider who seeks coverage for obstetrical or gynecological care, and the ordering of related obstetrical and gynecological items and services, pursuant to the direct access designation of a participating health care professional described in subsection (b)(2) in the case of a female participant, beneficiary, or enrollee who seeks coverage for obstetrical or gynecological care provided by a participating physician who specializes in obstetrics or gynecology, the plan shall—

(1) provide coverage for obstetric or gynecologic care; and

(2) require the designation by a participating physician who specializes in obstetrics or gynecology of a health plan provider other than a physician who specializes in obstetrics or gynecology.

(1) REQUIREMENT.—If a group health plan provides coverage for benefits only through a participating health care professional, the plan shall offer the participant the option to purchase point-of-service coverage (as defined in subsection (b)) for all such benefits for which coverage is otherwise so limited. Such option shall be made available to the participant at the time of enrollment under the plan and at such other times as the plan offers the participant a choice of coverage options.

(b) POINT-OF-SERVICE COVERAGE DEFINED.—In this section, the term ‘point-of-service coverage’ means, with respect to benefits covered under a group health plan coverage of such benefits when provided by a nonparticipating health care professional.

(c) RULING OF CONSTRUCTION.—Nothing in this section shall be construed to require—

(1) that a group health plan or a health insurance issuer approve or provide coverage for—

(A) any items or services that are not covered under the terms and conditions of the plan or coverage;

(B) any items or services that are not medically necessary and appropriate; or

(C) any items or services that are provided, authorized, ordered, or otherwise authorized under subsection (a)(2) by a physician unless such items or services are related to obstetric or gynecologic care;

(2) to preclude a group health plan or health insurance issuer from requiring that the plan provider that offers health insurance coverage, described in subsection (b)(2), notify the designated primary care professional or case manager of treatment decisions in

(12566)
according to a process implemented by the plan or issuer consistent with the applicable State licensure, credentialing, and scope of practice laws and regulations.

(5) to preclude the participant, beneficiary, or enrollee from designating a health care professional other than a physician as a primary care provider if such designation is permitted by the plan, or issuer and the treatment by such professional is consistent with State licensure, credentialing, and scope of practice laws and regulations; or

(b) PROVIDER TERMINATION.—If a participant, beneficiary, or enrollee from requiring that a participant, beneficiary, or enrollee obtain specialty care from a participating specialist is not available to provide such care to the participant, beneficiary, or enrollee, the plan or issuer shall provide for coverage of such care by a non-participating specialist.

(II) TREATMENT OF NONPARTICIPATING PROVIDERS.—If a group health plan, or a health insurance issuer that offers health insurance coverage, determines that a participating specialist is not available to provide specialty care referred to the participant, beneficiary, or enrollee, the plan or issuer shall provide for coverage of such specialty care by a non-participating specialist.

(III) IN GENERAL.—With respect to specialty care under this section, if a group health plan, or a health insurance issuer that offers health insurance coverage, determines that a participating specialist is not available to provide such specialty care referred to the participant, beneficiary, or enrollee, the plan or issuer shall provide for coverage of such specialty care by a non-participating specialist.

(IV) REQUIREMENT.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from requiring that a participant, beneficiary, or enrollee obtain specialty care from a participating specialist if such specialist is not available to provide such care to the participant, beneficiary, or enrollee.

(b) RULES OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from requiring that a participant, beneficiary, or enrollee obtain specialty care from a participating specialist if such specialist is not available to provide such care to the participant, beneficiary, or enrollee.

(2) IN GENERAL.—With respect to specialty care under this section, if a group health plan, or a health insurance issuer that offers health insurance coverage, determines that a participating specialist is not available to provide such specialty care referred to the participant, beneficiary, or enrollee, the plan or issuer shall provide for coverage of such specialty care by a non-participating specialist.

(b) RULES OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from requiring that a participant, beneficiary, or enrollee obtain specialty care from a participating specialist if such specialist is not available to provide such care to the participant, beneficiary, or enrollee.

(3) INSTITUTIONAL OR INPATIENT CARE.—The 90 day limitation described in subparagraph (B) shall extend until the earlier of—

(c) TREATMENT PLANS.—

(1) IN GENERAL.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from requiring that specialty care be provided pursuant to a treatment plan so long as the treatment plan is—

(A) developed by the specialist, in consultation with the case manager or primary care provider, and the participant, beneficiary, or enrollee;

(B) if the plan or issuer requires such approval, approved in a timely manner by the plan or issuer consistent with the applicable quality assurance and Utilization review standards of the plan or issuer.

(2) NOTIFICATION.—Nothing in this paragraph (1) shall be construed as prohibiting a plan or issuer from requiring the specialist to provide the plan or issuer with regular updates on the specialty care provided, as well as all other necessary medical information.

(d) SPECIALIST DEFINED.—For purposes of this section, the term ‘‘specialist’’ means, with respect to the medical condition of the participant, beneficiary, or enrollee, any health care professional, facility, or center (such as a center of excellence) that has the appropriate expertise (including age-appropriate expertise) to provide appropriate treatment and experience.

SEC. 106. CONTINUITY OF CARE.

(a) TERMINATION OF PROVIDER.—If a contract between a group health plan, and a health insurance issuer that offers health insurance coverage, and a treating health care provider is terminated (as defined in paragraph (e)(4)), or benefits or coverage provided by a health care provider are terminated because of a change in the terms of provider participation in such plan or coverage, and an individual who is a participant, beneficiary, or enrollee under such plan or coverage, from requiring the provider at the time the plan or issuer receives or provides notice of such termination, the plan or issuer shall—

(1) notify the individual, or arrange to have the individual notified pursuant to subsection (d)(2), on a timely basis of such termination;

(2) provide the individual with an opportunity to notify the plan or issuer of the individual’s need for transitional care; and

(3) subject to subsection (c), permit the individual to elect to continue to be covered with respect to the active course of treatment with the provider’s consent during a transitional period (as provided for under subsection (b)).

(b) TRANSITIONAL PERIOD.—

(1) SERIOUS AND COMPLEX CONDITIONS.—The transitional period under this section with respect to a serious and complex condition shall extend for up to 90 days from the date of the notice described in subsection (a)(1) of the provider’s termination.

(2) INSTITUTIONAL OR INPATIENT CARE.—

(A) IN GENERAL.—The transitional period under this section for institutional or inpatient care of a provider shall extend until the earlier of—

(i) the expiration of the 90-day period beginning on the date on which the notice described in subsection (a)(1) of the provider’s termination is provided; or

(ii) the date of discharge of the individual from such care or the termination of the person’s institutional care.

(B) SCHEDULED CARE.—The 90 day limitation described in subparagraph (A)(1) shall...
include post-surgical follow-up care relating to a participant, beneficiary, or enrollee who the provider believes is eligible for the treatment of the terminal illness.

(4) TERMINAL ILLNESS.—If—

(A) a participant, beneficiary, or enrollee was determined to be terminally ill (as determined under paragraph (1) of section 1861(dd)(3)(A) of the Social Security Act) at the time of a provider’s terminal of participation; and

(B) the provider was treating the terminal illness before the date of termination;

the transitional period under this subsection with respect to a provider’s terminal of participation shall extend through the provision of post-partum care directly related to the delivery.

4. TERMINAL ILLNESS.—If—

(A) a participant, beneficiary, or enrollee was determined to be terminally ill (as determined under paragraph (1) of section 1861(dd)(3)(A) of the Social Security Act) at the time of a provider’s terminal of participation; and

(B) the provider was treating the terminal illness before the date of termination;

the transitional period under this subsection shall extend for the remainder of the individual’s life for care that is directly related to the treatment of the terminal illness.

(c) PROVIDER'S TREATMENT OF TERMINAL ILLNESS.—A group health plan, and a health insurance issuer that offers health insurance coverage, may condition coverage of continued treatment at a provider under this section upon the provider agreeing to the following terms and conditions:

(1) The treating health care provider agrees to accept reimbursement at rates applicable to such plan’s or coverage’s terms and conditions of the plan or coverage for services rendered by the provider agreeing to the following terms and conditions of the plan or coverage.

(2) Either—

(A) the referring physician is a participating provider with respect to the individual in an amount that would exceed the cost-sharing that could have been imposed if the contract referred to in this section had not been terminated; or

(B) the provider agrees otherwise to adhere to such plan’s or coverage’s terms and conditions of the plan or coverage.

(d) RULES OF CONSTRUCTION.—Nothing in this section shall be construed as requiring a group health plan from requiring that the health care professional and has constituted—

(1) provide that the coverage of benefits which would not have been covered if the provider involved remained a participating provider; or

(2) with respect to the termination of a contract under subsection (a) to prevent a group health plan or health insurance issuer from requiring that the health care professional and has constituted—

(A) notify participants, beneficiaries, or enrollees of their rights under this section; or

(B) provide the plan or issuer with the name of each participant, beneficiary, or enrollee who the provider believes is eligible for transitional care under this section.

(e) CONTRACT.—The term ‘contract between a group health plan, and a health insurance issuer that offers health insurance coverage that requires a health care professional and has constituted—

(1) ensure that the participation of physicians and pharmacists in developing and reviewing such formulary; and

(2) in accordance with the applicable quality assurance and utilization standards of the plan or issuer provide for exceptions from the formulary limitation when a non-formulary alternative is medically necessary and appropriate.

(b) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from excluding coverage for a specific drug or class of drugs if such drugs or class of drugs is expressly excluded under the terms and conditions of the plan or coverage.

SEC. 109. COVERAGE FOR INDIVIDUALS PARTICIPATING IN APPROVED CLINICAL TRIALS.

(a) COVERAGE.—

(1) IN GENERAL.—If a group health plan, and a health insurance issuer that offers health insurance coverage, provides coverage to a qualified individual (as defined in subsection (b)), the plan or issuer—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) subject to subsections (c), (d), and (e) may not defer the amount that would exceed the cost-sharing that could have been imposed if the contract referred to in this section had not been terminated.

(2) EXCLUSION OF CERTAIN COSTS.—For purposes of paragraph (1), routine patient costs do not include the cost of the tests or measurements conducted primarily for the purpose of the clinical trial involved.

(3) USE OF IN-NETWORK PROVIDERS.—If one or more participating providers is participating in a clinical trial, nothing in paragraph (1) shall be construed as preventing a plan or issuer from requiring that a qualified individual participate in the trial through such a participating provider if the provider will accept the individual as a participant in the trial.

(b) QUALIFIED INDIVIDUAL DEFINED.—For purposes of subsection (a), the term “qualified individual” means an individual who is a participant, beneficiary, or enrollee on the basis of the participant’s, beneficiary’s, or enrollee’s participation in such trial.

(1) IN GENERAL.—Subject to subsection (b), a group health plan, and a health insurance issuer that offers health insurance coverage, including, in the case of a health care professional and has constituted—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) may not prohibit or otherwise restrict a health care professional and has constituted—

(1) ensure the participation of physicians and pharmacists in developing and reviewing such formulary; and

(2) in accordance with the applicable quality assurance and utilization standards of the plan or issuer provide for exceptions from the formulary limitation when a non-formulary alternative is medically necessary and appropriate.

(b) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from excluding coverage for a specific drug or class of drugs if such drugs or class of drugs is expressly excluded under the terms and conditions of the plan or coverage.

SEC. 108. PATIENT'S RIGHT TO PRESCRIPTION DRUGS.

(a) IN GENERAL.—Subject to subsection (b), a group health plan, and a health insurance issuer that offers health insurance coverage, including, in the case of a health care professional and has constituted—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) may not prohibit or otherwise restrict a health care professional and has constituted—

(1) ensure the participation of physicians and pharmacists in developing and reviewing such formulary; and

(2) in accordance with the applicable quality assurance and utilization standards of the plan or issuer provide for exceptions from the formulary limitation when a non-formulary alternative is medically necessary and appropriate.

(b) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from excluding coverage for a specific drug or class of drugs if such drugs or class of drugs is expressly excluded under the terms and conditions of the plan or coverage.

SEC. 109. COVERAGE FOR INDIVIDUALS PARTICIPATING IN APPROVED CLINICAL TRIALS.

(a) COVERAGE.—

(1) IN GENERAL.—If a group health plan, and a health insurance issuer that offers health insurance coverage, provides coverage to a qualified individual (as defined in subsection (b)), the plan or issuer—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) subject to subsections (c), (d), and (e) may not defer the amount that would exceed the cost-sharing that could have been imposed if the contract referred to in this section had not been terminated.

(2) EXCLUSION OF CERTAIN COSTS.—For purposes of paragraph (1), routine patient costs do not include the cost of the tests or measurements conducted primarily for the purpose of the clinical trial involved.

(3) USE OF IN-NETWORK PROVIDERS.—If one or more participating providers is participating in a clinical trial, nothing in paragraph (1) shall be construed as preventing a plan or issuer from requiring that a qualified individual participate in the trial through such a participating provider if the provider will accept the individual as a participant in the trial.

(b) QUALIFIED INDIVIDUAL DEFINED.—For purposes of subsection (a), the term “qualified individual” means an individual who is a participant, beneficiary, or enrollee on the basis of the participant’s, beneficiary’s, or enrollee’s participation in such trial.

(1) IN GENERAL.—Subject to subsection (b), a group health plan, and a health insurance issuer that offers health insurance coverage, including, in the case of a health care professional and has constituted—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) may not prohibit or otherwise restrict a health care professional and has constituted—

(1) ensure the participation of physicians and pharmacists in developing and reviewing such formulary; and

(2) in accordance with the applicable quality assurance and utilization standards of the plan or issuer provide for exceptions from the formulary limitation when a non-formulary alternative is medically necessary and appropriate.

(b) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from excluding coverage for a specific drug or class of drugs if such drugs or class of drugs is expressly excluded under the terms and conditions of the plan or coverage.

SEC. 108. PATIENT'S RIGHT TO PRESCRIPTION DRUGS.

(a) IN GENERAL.—Subject to subsection (b), a group health plan, and a health insurance issuer that offers health insurance coverage, including, in the case of a health care professional and has constituted—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) may not prohibit or otherwise restrict a health care professional and has constituted—

(1) ensure the participation of physicians and pharmacists in developing and reviewing such formulary; and

(2) in accordance with the applicable quality assurance and utilization standards of the plan or issuer provide for exceptions from the formulary limitation when a non-formulary alternative is medically necessary and appropriate.

(b) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a group health plan, or a health insurance issuer that offers health insurance coverage, from excluding coverage for a specific drug or class of drugs if such drugs or class of drugs is expressly excluded under the terms and conditions of the plan or coverage.

SEC. 109. COVERAGE FOR INDIVIDUALS PARTICIPATING IN APPROVED CLINICAL TRIALS.

(a) COVERAGE.—

(1) IN GENERAL.—If a group health plan, and a health insurance issuer that offers health insurance coverage, provides coverage to a qualified individual (as defined in subsection (b)), the plan or issuer—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) subject to subsections (c), (d), and (e) may not defer the amount that would exceed the cost-sharing that could have been imposed if the contract referred to in this section had not been terminated.

(2) EXCLUSION OF CERTAIN COSTS.—For purposes of paragraph (1), routine patient costs do not include the cost of the tests or measurements conducted primarily for the purpose of the clinical trial involved.

(3) USE OF IN-NETWORK PROVIDERS.—If one or more participating providers is participating in a clinical trial, nothing in paragraph (1) shall be construed as preventing a plan or issuer from requiring that a qualified individual participate in the trial through such a participating provider if the provider will accept the individual as a participant in the trial.

(b) QUALIFIED INDIVIDUAL DEFINED.—For purposes of subsection (a), the term “qualified individual” means an individual who is a participant, beneficiary, or enrollee on the basis of the participant’s, beneficiary’s, or enrollee’s participation in such trial.

(1) IN GENERAL.—Subject to subsection (b), a group health plan, and a health insurance issuer that offers health insurance coverage, including, in the case of a health care professional and has constituted—

(A) may not deny the individual participation in the clinical trial referred to in subsection (b); and

(B) may not prohibit or otherwise restrict a health care professional and has constituted—

(1) ensure the participation of physicians and pharmacists in developing and reviewing such formulary; and

(2) in accordance with the applicable quality assurance and utilization standards of the plan or issuer provide for exceptions from the formulary limitation when a non-formulary alternative is medically necessary and appropriate.
CONGRESSIONAL RECORD—SENATE

June 29, 2001

12569

provide for payment for routine patient costs described in subparagraph (a), but is not required to pay for costs of items and services that are reasonably expected to be paid for by the sponsors of an approved clinical trial.

(2) TERMINATION OF DETERMINATION OF PATIENT COSTS ASSOCIATED WITH CLINICAL TRIAL PARTICIPATION.—

(A) IN GENERAL.—The Secretary shall, in accordance with this paragraph, establish standards relating to the coverage of routine patient costs for individuals participating in clinical trials that group health plans and health insurance issuers must meet under this section.

(B) FACTORS.—In establishing routine patient cost standards under subparagraph (A), the Secretary shall consult with interested parties and take into account—

(i) quality of patient care;

(ii) routine patient care costs versus costs associated with the conduct of clinical trials, including unanticipated patient care costs as a result of participation in clinical trials;

(iii) previous and on-going studies relating to patient care costs associated with participation in clinical trials.

(C) APPOINTMENT OF MEETINGS OF NEGOTIATED RULEMAKING COMMITTEE.—

(i) PUBLICATION OF NOTICE.—Not later than November 15, 2002, the Secretary shall publish notice of the establishment of a negotiated rulemaking committee, as provided for under section 566(a) of title 5, United States Code, to develop the standards described in subparagraph (A), which shall include—

(I) the proposed scope of the committee;

(II) the interests that may be impacted by the standards;

(III) a list of the proposed membership of the committee;

(IV) the proposed meeting schedule of the committee;

(V) a solicitation for public comment on the committee; and

(VI) the procedures under which an individual may apply for membership on the committee.

(ii) COMMENT PERIOD.—Notwithstanding section 583 of title 5, United States Code, the Secretary shall provide for a period, beginning on the date on which the notice is published under clause (i) and ending on November 30, 2002, for submission of written comments on the committee under this subparagraph.

(iii) APPOINTMENT OF COMMITTEE.—Not later than December 30, 2002, the Secretary shall appoint the members of the negotiated rulemaking committee under this subparagraph.

(iv) FACILITATOR.—Not later than January 10, 2003, the negotiated rulemaking committee shall nominate a facilitator under section 566(c) of title 5, United States Code, to carry out the activities described in subsection (d) of such section.

(v) MEETINGS.—During the period beginning on the date on which the facilitator is nominated under clause (iv) and ending on March 30, 2003, the negotiated rulemaking committee shall meet to develop the standards described in subparagraph (A).

(D) PRELIMINARY COMMITTEE REPORT.—

(i) IN GENERAL.—The negotiated rulemaking committee appointed under subparagraph (c) shall report to the Secretary, by not later than March 30, 2003, regarding the committee’s progress on achieving a consensus with regard to the rulemaking proceedings. Such a report is not necessary if the committee has achieved such consensus by the target date described in subsection (f).

(ii) TERMINATION OF PROCESS AND PUBLICATION OF RULE.—If the committee reports under clause (i) that the committee has failed to make significant progress towards such consensus or is unlikely to make such consensus by the target date described in the section, the Secretary shall terminate such process and provide for the publication in the Federal Register, by not later than June 30, 2003, of a rule under this paragraph through such other methods as the Secretary may provide.

(E) FINAL COMMITTEE REPORT AND PUBLICATION OF RULE.—

(i) IN GENERAL.—If the rulemaking committee is not terminated under subparagraph (D)(i), the committee shall submit to the Secretary, by not later than May 30, 2003, a report containing a proposed rule.

(ii) PUBLICATION OF RULE.—If the Secretary receives a report under clause (i), the Secretary shall provide for the publication in the Federal Register, by not later than June 30, 2003, of the proposed rule.

(iii) TARGET DATE FOR PUBLICATION OF RULE.—From the date the rule is published under subparagraph (C)(i), and for purposes of this paragraph, the “target date for publication” (referred to in section 566(a)(5) of title 5, United States Code) shall be June 30, 2003.

(iv) EFFECTIVE DATE.—The provisions of this paragraph shall apply to group health plans and health insurance issuers that offer health insurance coverage for inpatient hospital stay for the treatment of breast cancer provided for a period of time as is determined by the attending physician, in consultation with the patient, to be medically necessary and appropriate following—

(A) a mastectomy;

(B) a lumpectomy; or

(C) a lymph node dissection for the treatment of breast cancer.

(2) EXCEPTION.—Nothing in this section shall be construed as requiring the provision of any treatment, other than the treatment described in clause (i), that is medically appropriate.

(b) INPATIENT CARE.—A group health plan, and a health insurance issuer that offers health insurance coverage, that provides medical and surgical benefits shall ensure that inpatient hospital stay for the treatment of breast cancer is provided for a period of time as is determined by the attending physician, in consultation with the patient, to be medically necessary and appropriate following—

(A) a mastectomy;

(B) a lumpectomy; or

(C) a lymph node dissection for the treatment of breast cancer.

(c) SECONDARY CONSULTATIONS.—In implementing the requirements of this section, a group health plan, and a health insurance issuer that offers health insurance coverage, may not modify the terms and conditions of coverage based on the determination by a participant, beneficiary, or enrollee to request less than the minimum coverage required under subsection (a).

(d) STUDY AND REPORT.—

(1) STUDY.—The Secretary shall study the impact on group health plans and health insurance issuers for covering patient care costs for individuals who are entitled to benefits under this section and who are enrolled in an approved clinical trial program.

(2) REPORT TO CONGRESS.—Not later than January 1, 2006, the Secretary shall submit a report to Congress that contains an assessment of—

(A) any incremental cost to group health plans and health insurance issuers resulting from the provisions of this section;

(B) a projection of expenditures to such plans and issuers resulting from this section; and

(C) any impact on premiums resulting from this section.
are not sufficiently available from specialists or the plan or issuer with respect to whose services coverage is otherwise provided under such plan or by such issuer, such plan or issuer shall ensure that no price is provided with respect to the services necessary for the secondary consultation with any other specialist selected by the attending physician for such purpose at no cost to the individual beyond that which the individual would have paid if the specialist was participating in the network of the plan or issuer:

(2) PRECERTIFICATION.—Nothing in paragraph (1) shall be construed as requiring the provision of secondary consultations where the patient determines not to seek such a consultation.

(d) PROHIBITION ON PENALTIES OR INCENTIVES.—A group health plan, and a health insurance issuer that offers health insurance coverage, shall not discriminate with respect to participation or indemnification as to any provider who is acting within the scope of the provider’s license or certification under applicable State law, solely on the basis of such license or certification.

SEC. 112. GENERALLY APPLICABLE PROVISION.

(a) In General.—A group health plan, and a health insurance issuer that offers health insurance coverage, shall not discriminate with respect to participation or indemnification as to any provider who is acting within the scope of the provider’s license or certification under applicable State law, solely on the basis of such license or certification.

(b) Construction.—Subsection (a) shall not be construed—

(1) as requiring the coverage under a group health plan or health insurance coverage, of a particular benefit or service or to prohibit a plan or issuer from including, providers only to the extent necessary to meet the needs of the plan’s or issuer’s participants, beneficiaries, or enrollees or from establishing any measure designed to maintain quality and control costs consistent with the responsibilities of the plan or issuer;

(2) to override any State licensure or scope-of-practice law; or

(3) as requiring a plan or issuer that offers network coverage to include for participation every willing provider who meets the terms and conditions of the plan or coverage.

SEC. 113. PROHIBITION OF DISCRIMINATION AGAINST PROVIDERS BASED ON LICENSE OR CERTIFICATION.

(a) In General.—A group health plan, and a health insurance issuer that offers health insurance coverage, shall not discriminate with respect to participation or indemnification as to any provider who is acting within the scope of the provider’s license or certification under applicable State law, solely on the basis of such license or certification.

(b) Construction.—Subsection (a) shall not be construed—

(1) as requiring the coverage under a group health plan or health insurance coverage, of a particular benefit or service or to prohibit a plan or issuer from including, providers only to the extent necessary to meet the needs of the plan’s or issuer’s participants, beneficiaries, or enrollees or from establishing any measure designed to maintain quality and control costs consistent with the responsibilities of the plan or issuer;

(2) to override any State licensure or scope-of-practice law; or

(3) as requiring a plan or issuer that offers network coverage to include for participation every willing provider who meets the terms and conditions of the plan or coverage.

SEC. 114. PROHIBITION OF DISCRIMINATION AGAINST PROVIDERS BASED ON LICENSE OR CERTIFICATION.

(a) In General.—A group health plan, and a health insurance issuer that offers health insurance coverage, shall not discriminate with respect to participation or indemnification as to any provider who is acting within the scope of the provider’s license or certification under applicable State law, solely on the basis of such license or certification.

(b) Construction.—Subsection (a) shall not be construed—

(1) as requiring the coverage under a group health plan or health insurance coverage, of a particular benefit or service or to prohibit a plan or issuer from including, providers only to the extent necessary to meet the needs of the plan’s or issuer’s participants, beneficiaries, or enrollees or from establishing any measure designed to maintain quality and control costs consistent with the responsibilities of the plan or issuer;

(2) to override any State licensure or scope-of-practice law; or

(3) as requiring a plan or issuer that offers network coverage to include for participation every willing provider who meets the terms and conditions of the plan or coverage.

(b) Provision of Information.—Information shall be provided to participants, beneficiaries, and enrollees under this section at the last known address maintained by the plan or issuer with respect to such participants, beneficiaries, or enrollees, to the extent that such information is provided to participants, beneficiaries, or enrollees via the United States Postal Service or other private delivery service.

(b) Required Information.—The information materials to be distributed under this section shall include for each option available under the group health plan or health insurance coverage the following:

(1) Benefits.—A description of the covered benefits, including—

(A) any in- and out-of-network benefits;

(B) specific preventative services covered under the plan or coverage when such services are covered;

(C) any benefit limitations, including any payment limits or caps, the terms and conditions for the length of stay, length of stay for hospitalization, the number of visits, days, or services, and any specific coverage exclusions; and

(D) any definition of medical necessity used in making the coverage determination by the plan, issuer, or claims administrator.

(2) Cost Sharing.—A description of any cost-sharing requirements, including—

(A) any deductible, coinsurance, copayment amounts, and liability for balance billing above any reasonable and customary charges, for which the participant, beneficiary, or enrollee will be responsible under each option available under the plan;

(B) any maximum out-of-pocket expense for any participant, beneficiary, or enrollee may be liable;

(C) any cost-sharing requirements for out-of-network benefits or services received from nonparticipating providers; and

(3) Additional Payments.—A description of any payments, such as copayments, coinsurance, and deductibles, required under the plan or coverage for benefits and services that are furnished without meeting applicable plan or coverage requirements, such as prior authorization or precertification.

(3) SERVICE AREA.—A description of the plan or issuer’s service area, including the provision of any out-of-area coverage.

(4) Precertification.—A directory of participating providers (to the extent a plan or issuer provides coverage through a network of providers) that includes, at a minimum, the name and address of each participating provider, and information about how to inquire whether a participating provider is currently accepting new patients.

(5) CHOICE OF PRIMARY CARE PROVIDER.—A description of any requirements and procedures to be used by participants, beneficiaries, or enrollees in selecting, changing, or replacing their primary care provider, including providers both within and outside of the network (if the plan or issuer permits network service providers), to select a pediatrician as a primary care provider under section 104 for a participant, beneficiary, or enrollee who is a child at such time as applies.

(6) PREAUTHORIZATION REQUIREMENTS.—A description of the requirements and procedures to be used to obtain preauthorization for health services, if such preauthorization is required.

(7) EXPERIMENTAL AND INVESTIGATIONAL TREATMENTS.—A description of the process for determining whether a particular item, service, or treatment is considered experimental or investigational, and the circumstances under which such treatments are covered by the plan or issuer.

(8) SPECIALTY CARE.—A description of the requirements and procedures to be used by participants, beneficiaries, and enrollees in accessing specialty care and obtaining referrals to participating and nonparticipating specialists, including the right to timely coverage for access to specialists care under section 105 if such section applies.

(9) CLINICAL TRIALS.—A description of the circumstances and conditions under which participation in clinical trials is covered under the terms and conditions of the plan or coverage, and the right to obtain coverage for approved cancer clinical trials under section 109 if such section applies.

(10) PRESCRIPTION DRUGS.—To the extent the plan or issuer provides coverage for prescription drugs, a statement of whether such coverage is limited to drugs included in a formulary, a description of any provisions and cost-sharing required for obtaining on- and off-formulary medications, and a description of the rights of participants, beneficiaries, and enrollees in obtaining access to prescription drugs under section 107 if such section applies.

(11) EMERGENCY SERVICES.—A summary of the rules and procedures for accessing emergency services, including the rights of a participant, beneficiary, or enrollee to obtain emergency services under the prudent layperson standard under section 101, if such section applies, and any educational information that the plan or issuer may provide regarding the appropriate use of emergency services.
(i) all types of compensation arrangements, including financial incentives, risk-sharing arrangements, and arrangements that do not contain such incentives and risk sharing, that reflect the complexity of organizational relationships between health plans and medical providers, and
(ii) arrangements that are based on factors such as utilization management, cost control, quality improvement, and patient or enrollee satisfaction; and
(iii) arrangements between the plan or issuer and provider, as well as down-stream arrangements among providers and subcontracted providers;

(B) an analysis of the effect of such differing arrangements on physician behavior with respect to the provision of medical care to patients, including whether and how such arrangements affect the quality of patient care and the ability of physicians to provide care that is medically necessary and appropriate.

(3) Study design.—The Secretary shall consult with the Director of the Agency for Healthcare Research and Quality in preparing the scope of work and study design with respect to the contract under paragraph (1).

(4) Report.—Not later than 24 months after the date of enactment of this Act, the Secretary shall forward to the appropriate committees of Congress a copy of the report and study conducted under subsection (a).

(b) Research.—

(I) IN GENERAL.—The Secretary, acting through the Director of the Agency for Healthcare Research and Quality, shall conduct and support research to develop scientific evidence regarding the effects of differing physician compensation methods on physician behavior with respect to the provision of medical care to patients, particularly issues relating to the quality of patient care and whether patients receive medically necessary and appropriate care.

(2) Authorization of appropriations.—For purposes of carrying out this section, there are authorized to be appropriated such sums as may be necessary.

Subtitle C—Right to Hold Health Plans Accountable

SEC. 131. AMENDMENTS TO EMPLOYEE RETIREMENT Income SECURITY ACT OF 1974.

(a) In general.—Part 5 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended by inserting after section 501 (29 U.S.C. 1133) the following:

"SEC. 503A. CLAIMS AND INTERNAL APPEALS PROCEDURES FOR GROUP HEALTH PLANS.

"(a) Initial claim for benefits under group health plans.—

"(1) Procedures.—

"(A) In general.—A group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, shall maintain procedures to ensure that a determination on a claim for benefits is made within 30 business days of the date on which the plan or issuer receives information that is reasonably necessary to enable the plan or issuer to make a determination on the claim, in no case shall such determination be made later than 30 business days after the receipt of the claim for benefits.

"(B) Right to appeal.—A group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, may require that the participant or beneficiary (or authorized representative) provide written confirmation of such request in a timely manner.

"(2) Timeliness for making determinations.—

"(A) Prior authorization determination.—

"(i) In general.—A group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, shall maintain procedures to ensure that a prior authorization determination on a claim for benefits is made within 14 business days of the date on which the plan or issuer receives information that is reasonably necessary to enable the plan or issuer to make a determination on the request for prior authorization, but in no case shall such determination be made later than 28 business days after the receipt of the claim for benefits.

"(ii) Expedited determination.—Notwithstanding clause (i), a group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, may require that the participant or beneficiary (or authorized representative) provide written confirmation of such request in a timely manner and that any time during the process for making a determination and the treating health care professional substantiates, with the request, that a determination under the procedures described in clause (i) would seriously jeopardize the life or health of the participant or beneficiary. Such determination shall be made within 72 hours after a request is received by the plan or issuer under this clause.

"(iii) Concurrent determinations.—A group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, shall maintain procedures for expediting a prior authorization determination on a claim for benefits described in such clause when a request for such an expedited determination is made by a participant or beneficiary (or authorized representative) at any time during the process for making a determination and the treating health care professional substantiates, with the request, that a determination under the procedures described in clause (i) would seriously jeopardize the life or health of the participant or beneficiary. Such determination shall be made within 72 hours after a request is received by the plan or issuer under this clause.

"(B) Failure to act.—The failure of a plan or issuer to make a determination on a request for prior authorization is grounds for appeal under subsection (a) within the applicable timeline established for such a determination under such subsection shall be treated as a denial of a claim for benefits for purposes of proceeding to external review under this subsection.

"(3) Notice of a denial of a claim for benefits.—A group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, may require that the participant or beneficiary (or authorized representative) provide written confirmation of such request in a timely manner.

(b) Internal appeal of a denial of a claim for benefits.—

"(1) Right to internal appeal.—

"(A) In general.—A participant or beneficiary may file a written request for an internal appeal of any denial of a claim for benefits under subsection (a) in accordance with instructions on how to initiate an appeal in accordance with subsection (b).

"(B) Time for appeal.—A group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, shall ensure that a participant or beneficiary (or authorized representative) has a period of not less than 60 days beginning on the date of a denial of a claim for benefits under subsection (a) in which to appeal such denial under this subsection.

"(C) Failure to act.—The failure of a plan or issuer to issue a determination on a request for an internal appeal is grounds for appeal under subsection (a) within the applicable timeline established for such a determination under such subsection and shall be treated as a denial of a claim for benefits for purposes of proceeding to external review under this subsection.

"(D) Plan waiver of external review.—A group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, may waive the internal review process under this subsection and permit a participant or beneficiary (or authorized representative) to proceed directly to external review under section 503B.

"(2) Timelines for making determinations.—

"(A) Oral requests.—In the case of an appeal of a denial of a claim for benefits under subsection (b) of this section and permit a participant or beneficiary (or authorized representative) to proceed directly to external review under section 503B.
"(B) ACCESS TO INFORMATION.—With respect to a claim for benefits under this subsection, the plan or issuer shall provide the participant or beneficiary (or authorized representative) and the treating health care professional (if any) shall provide the participant or beneficiary (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative) and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involved (or authorized representative), the participant or beneficiary involved (or authorized representative), and the treating health care professional (if any) shall provide the participant or beneficiary involvement requested by the external review entity that is necessary to conduct a review under this
section, as determined by the entity, not later than 30 days after the date on which a request is referred to the qualified external review entity under paragraph (1), or earlier as determined appropriate by the entity to meet the applicable timelines under clauses (i) and (ii) of subsection (e)(1)(A).

(3) SCREENING OF REQUESTS BY QUALIFIED EXTERNAL REVIEW ENTITIES.—

(A) IN GENERAL.—With respect to a request referred to a qualified external review entity under paragraph (1) relating to a denial of a claim for benefits, the entity shall refer such request for the conduct of an independent medical review unless the entity determines that—

(i) any of the conditions described in subsection (b)(2)(A) have not been met;

(ii) the thresholds described in subparagraph (B) have not been met;

(iii) the denial of the claim for benefits does not involve a medically reviewable decision under subsection (d)(2); or

(iv) the denial of the claim for benefits is a decision as to the application of a specific exclusion or limitation on the amount, duration, or scope of coverage of items or services under the terms and conditions of the plan or coverage unless the decision is a denial described in subsection (d)(2).

Upon making a determination that any of clauses (i) through (iv) applies with respect to the request, the determining entity shall determine that the denial of a claim for benefits involved is not eligible for independent medical review under subsection (d), and shall provide notice in accordance with subparagraph (D).

(B) THRESHOLDS.—

(i) IN GENERAL.—The thresholds described in this subparagraph are that—

(A) the total amount payable under the plan or coverage for the item or service that was the subject of such denial exceeds $100; or

(B) a physician has asserted in writing that there is a significant risk of placing the life, health, or development of the participant or beneficiary in jeopardy if the denial of the claim for benefits is sustained.

(ii)c) NOT APPLIED.—The thresholds described in this subparagraph shall not apply if the plan or issuer involved waives the internal appeals process with respect to the denial of a claim for benefits involved under section 503A(b)(1)(D).

(C) PROCESS FOR MAKING DETERMINATIONS.—

(i) NO DEFECTION TO PRIOR DETERMINATIONS.—In making determinations under subparagraph (A), there shall be no deference to prior determinations made by the plan or issuer under section 503A or the recommendation of a treating health care professional (if any).

(ii) APPLICABLE PERSONNEL.—A qualified external review entity shall use appropriately qualified personnel to make determinations under this section.

(D) U.S. FEDERAL TIMELINES FOR DETERMINATION.—

(i) NOTICE IN CASE OF DENIAL OF REFERRAL.—If the entity under this paragraph does not make a referral to an independent medical reviewer, the entity shall provide notice to the plan or issuer, the participant or beneficiary (or authorized representative), or treating health care professional, as appropriate based on the context, of the reason why no referral is being made.

(ii) DENIALS BASED ON MEDICAL NECESSITY AND APPROPRIATENESS.—A determination of medical necessity and appropriateness of the item or service is an independent medical review decision and shall be based on the medical condition of the participant or beneficiary (or authorized representative), and the valid, relevant scientific evidence and clinical evidence, including peer-reviewed medical literature or findings and establishing expert consensus.

(iii) NO COVERAGE FOR EXCLUDED BENEFITS.—Nothing in this subsection shall be construed to permit an independent medical reviewer to require the plan, issuer, participant or beneficiary (or authorized representative), or group health plan, insurance coverage in connection with a health care professional that offers health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage that are not covered regardless of any determination relating to medical necessity and appropriateness, experimental or investigational nature of the treatment, or an evaluation of the medical facts in the case involved.

(E) EVIDENCE AND INFORMATION TO BE USED IN MEDICAL REVIEWS.—In making a determination under this subsection, the independent medical reviewer shall also consider appropriate and available evidence and information, including the following:

(A) The determination made by the plan or issuer, participant or beneficiary (or authorized representative), or group health plan, insurance coverage in connection with a health care professional that offers health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage; and

(B) The plan or coverage document.

(ii) INDEPENDENT DETERMINATION.—In making the determination, the independent medical reviewer shall—

(A) consider the claim under review within the timeframes set forth in subsection (c), prepare a written determination to uphold or reverse the denial under review and, in the case of a reversal, the timeframe within which the plan or issuer shall authorize coverage to comply with the determination. Such written determination shall include the specific reasons of the reviewer for such determination, including a summary of the clinical or scientific-evidence based rationale used in making the determination. The reviewer may provide the plan or issuer and the treating health care professional with additional recommendations in connection with such a determination, but any such recommendations shall not be treated as part of the determination.

(B) TIMELINES AND NOTIFICATIONS.—

(i) IN GENERAL.—The independent medical reviewer (or reviewers) shall make a determination on an independent denial of a claim for benefits that is referred to the reviewer under subsection (c)(3) not later than 14 business days after receipt of all relevant evidence and information necessary to make an informed decision as to whether or not the denial satisfies the criteria set forth in subsection (b)(1)(A).

(ii) FINDINGS AND CONCLUSIONS.—A determination shall include findings and conclusions of the independent medical reviewer that are based on the information and evidence available to the independent medical reviewer.

(iii) NO DEFERENCE TO PRIOR DETERMINATIONS.—If the entity did not make a referral to an independent medical reviewer, the entity shall make the determination in accordance with the timeliness and notice requirements applicable under this section.

(iii) NOTICE.—The independent medical reviewer shall provide a written determination to the plan, issuer, participant or beneficiary (or authorized representative), or group health plan, insurance coverage in connection with a health care professional that offers health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage that are not covered regardless of any determination relating to medical necessity and appropriateness, experimental or investigational nature of the treatment, or an evaluation of the medical facts in the case involved.

(iv) DENIALS BASED ON MEDICAL NECESSITY AND APPROPRIATENESS.—A determination of medical necessity and appropriateness of the item or service is an independent medical review decision and shall be based on the medical condition of the participant or beneficiary (or authorized representative), and the valid, relevant scientific evidence and clinical evidence, including peer-reviewed medical literature or findings and establishing expert consensus.

(v) NO COVERAGE FOR EXCLUDED BENEFITS.—Nothing in this subsection shall be construed to permit an independent medical reviewer to require the plan, issuer, participant or beneficiary (or authorized representative), or group health plan, insurance coverage in connection with a health care professional that offers health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage that are not covered regardless of any determination relating to medical necessity and appropriateness, experimental or investigational nature of the treatment, or an evaluation of the medical facts in the case involved.

(iv) EVIDENCE AND INFORMATION TO BE USED IN MEDICAL REVIEWS.—In making a determination under this subsection, the independent medical reviewer shall also consider appropriate and available evidence and information, including the following:

(A) The determination made by the plan or issuer, participant or beneficiary (or authorized representative), or group health plan, insurance coverage in connection with a health care professional that offers health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage; and

(B) The plan or coverage document.

(v) INDEPENDENT DETERMINATION.—In making the determination, the independent medical reviewer shall—

(A) consider the claim under review within the timeframes set forth in subsection (c), prepare a written determination to uphold or reverse the denial under review and, in the case of a reversal, the timeframe within which the plan or issuer shall authorize coverage to comply with the determination. Such written determination shall include the specific reasons of the reviewer for such determination, including a summary of the clinical or scientific-evidence based rationale used in making the determination. The reviewer may provide the plan or issuer and the treating health care professional with additional recommendations in connection with such a determination, but any such recommendations shall not be treated as part of the determination.

(B) TIMELINES AND NOTIFICATIONS.—

(i) IN GENERAL.—The independent medical reviewer (or reviewers) shall make a determination on an independent denial of a claim for benefits that is referred to the reviewer under subsection (c)(3) not later than 14 business days after receipt of all relevant evidence and information necessary to make an informed decision as to whether or not the denial satisfies the criteria set forth in subsection (b)(1)(A).

(ii) FINDINGS AND CONCLUSIONS.—A determination shall include findings and conclusions of the independent medical reviewer that are based on the information and evidence available to the independent medical reviewer.

(iii) NO DEFERENCE TO PRIOR DETERMINATIONS.—If the entity did not make a referral to an independent medical reviewer, the entity shall make the determination in accordance with the timeliness and notice requirements applicable under this section.

(iv) NOTICE.—The independent medical reviewer shall provide a written determination to the plan, issuer, participant or beneficiary (or authorized representative), or group health plan, insurance coverage in connection with a health care professional that offers health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage that are not covered regardless of any determination relating to medical necessity and appropriateness, experimental or investigational nature of the treatment, or an evaluation of the medical facts in the case involved.
after the receipt of information under subsection (c), the plan or issuer shall provide for reimbursement of the costs of such items or services. Such reimbursement shall be made only to a physician for such independent medical reviewer in connection with a review of treatment that is recommended or provided by a physician, such referral may be made only to a physician for such independent medical review.

(4) COMPLIANCE. —

(A) IN GENERAL. — Subject to subparagraph (B), each independent medical reviewer in a case shall—

(i) not provide a referral to a physician for such independent medical reviewer in connection with a review of treatment that is recommended or provided by a physician, such referral may be made only to a physician for such independent medical review.

(B) EXCEPTION. — Nothing in this subparagraph (A) shall be construed to—

(i) prohibit an individual, solely on the basis of affiliation with the plan or issuer, from serving as an independent medical reviewer if—

(A) the individual is not a related party (as defined in paragraph (7));

(ii) prohibit an individual who has staff privileges at the institution where the treatment referred to in paragraph (1) is to be provided from serving as an independent medical reviewer if the referral is to a physician who has staff privileges at the institution where the treatment referred to in paragraph (1) is to be provided; and

(iii) not otherwise have a conflict of interest with such a party (as determined under regulations).

(5) AGE-APPROPRIATE EXPERTISE. — The independent medical reviewer shall have expertise under paragraph (2) that is age-appropriate for the individual involved.

(6) LIMITATIONS ON REVIEWER COMPENSATION. — Compensation provided by a qualified external review entity for an independent medical reviewer in connection with a review under this section shall—

(A) be fair and reasonable for the services performed; and

(B) not be greater than the median compensation paid to the reviewer for services performed in the geographic area in which the services were rendered.
(A) not exceed a reasonable level; and
(B) be consistent with the standards the Secretary shall establish to assure that the selection process among qualified external review entities will not create any incentives for external review entities to make a decision in a biased manner.

(B) STATE AUTHORITY WITH RESPECT TO QUALIFIED EXTERNAL REVIEW ENTITIES FOR HEALTH INSURANCE ISSUERS.—With respect to health insurance issuers offering health insurance coverage in a State, the State may provide for the designation or selection of qualified external review entities in a manner determined by the State to assure an unbiased determination in conducting external review activities. In conducting reviews under this section, an entity designated or selected under this subparagraph shall comply with provisions of this section.

(2) CONTRACT WITH QUALIFIED EXTERNAL REVIEW ENTITIES.—As provided in paragraph (1)(B), the external review process of a plan or issuer under this section shall be conducted under a contract between the plan or issuer and 1 or more qualified external review entities (as defined in paragraph (4)(A)).

(3) TERMS AND CONDITIONS OF CONTRACT.—The terms and conditions of a contract under paragraph (2) shall—

(A) be consistent with the standards the Secretary shall establish to assure there is no real or apparent conflict of interest in the conduct of external review activities; and
(B) provide that the costs of the external review process shall be borne by the plan or issuer.

Subparagraph (B) shall not be construed as requiring the imposition of a filing fee under subsection (b)(2)(A)(iv) or costs incurred by the participant or beneficiary (or authorized representative) or treating health care professional (if any) in support of the review, including the provision of additional evidence or information.

(4) QUALIFICATIONS.—

(A) IN GENERAL.—In this section, the term ‘qualified external review entity’ means, in relation to a plan or issuer, an entity that is initially certified (or recertified) under subparagraph (C) as meeting the following requirements:

(I) The entity has (directly or through contracts) sufficient medical, legal, and other expertise and sufficient staffing to carry out duties of a qualified external review entity under this section on a timely basis, including making decisions on recertification (as defined in paragraph (1)(B)) and providing for independent medical reviews under subsection (d).

(II) The entity is not a plan or issuer or an affiliate or a subsidiary of a plan or issuer, and is not an affiliate or subsidiary of a professional or trade association of plans or issuers.

(III) The entity has provided assurances that it will conduct external review activities consistent with the applicable requirements of this section and standards specified in subparagraph (C), including that it will not conduct any external review activities in a case unless the independence requirements of subparagraph (B) are met with respect to a case.

(IV) The entity has provided assurances that it will provide information in a timely manner upon request.

(V) The entity meets such other requirements as the Secretary provides by regulation.

(B) INDEPENDENCE REQUIREMENTS.—

(I) IN GENERAL.—Subject to clause (ii), an entity meets the independence requirements of this subparagraph with respect to any case if the entity—

(1) is not a related party (as defined in subsection (g)(7));

(2) does not have a material familial, financial, or professional relationship with such a party; and

(3) does not otherwise have a conflict of interest with such a party (as determined under paragraph (3)).

(ii) EXCEPTION FOR REASONABLE COMPENSATION.—Nothing in clause (i) shall be construed to prohibit receipt by a qualified external review entity of compensation from a plan or issuer for the conduct of external review activities under this section if the compensation is provided consistent with clause (iii).

(iii) LIMITATIONS ON ENTITY COMPENSATION.—Compensation provided by a plan or issuer to a qualified external review entity in connection with reviews under this section shall—

(I) not exceed a reasonable level; and

(II) not be contingent on the decision rendered by the entity or by any independent medical reviewer.

(C) CERTIFICATION AND RECERTIFICATION.—

(I) IN GENERAL.—The initial certification and recertification of a qualified external review entity shall be made—

(I) under a process that is recognized or approved by the Secretary; or

(II) by a qualified private standard-setting organization that is approved by the Secretary under clause (iii).

(ii) PROCESS.—The Secretary shall not recognize or approve a process under clause (i) unless the process applies standards (as promulgated in regulations) that ensure that a qualified external review entity—

(I) will carry out (and has carried out, in the case of recertification) the responsibilities of such an entity in accordance with this section, including meeting applicable deadlines;

(II) will meet (and has met, in the case of recertification) appropriate indicators of fiscal integrity;

(III) will maintain (and has maintained, in the case of recertification) appropriate confidentiality with respect to individually identifiable health information obtained in the course of conducting external review activities; and

(IV) in the case of recertification, shall review the matters described in clauses (I) and (II).

(iii) APPROVAL OF QUALIFIED PRIVATE STANDARD-SETTING ORGANIZATIONS.—For purposes of clause (i)(II), the Secretary may approve a qualified private standard-setting organization if the Secretary finds that the organization only certifies (or recertifies) external review entities that meet at least the requirements required for the certification (or recertification) of external review entities under clause (i).

(iv) CONSIDERATIONS IN RECertiFICATION.—In conducting recertification of a qualified external review entity under this paragraph, the Secretary or organization conducting the recertification shall review compliance of the entity with the requirements for conducting external review activities under this section, including the following:

(I) Provision of information under subparagraph (D).

(II) Adherence to applicable deadlines (both by the entity and independent medical reviewers it refers to).

(III) Compliance with limitations on compensation (with respect to both the entity and independent medical reviewers it refers to).

(IV) Compliance with applicable independence requirements.

(v) PERIOD OF CERTIFICATION OR RECertiFICATION.—A certification or recertification provided under this paragraph shall extend for a period not to exceed 5 years.

(vi) REVOCATION.—A certification or recertification under this paragraph may be revoked by the Secretary or by the organization providing such certification upon a showing of cause.

(D) PROVISION OF INFORMATION.—

(I) IN GENERAL.—A qualified external review entity shall provide to the Secretary, in such manner and at such times as the Secretary may require, such information (relating to the denial which has been referred to the entity for the conduct of external review under this section) as the Secretary determines appropriate to assure compliance with the independence and other requirements of this section and to assess the quality of its external review activities and lack of bias in making determinations. Such information shall include information described in clause (ii) but shall not include individually identifiable medical information.

(ii) INFORMATION TO BE INCLUDED.—The information described in this subclause with respect to an entity is as follows:

(I) The number and types of denials for which a request for review has been received by the entity.

(II) The disposition by the entity of such denials, including the number referred to an independent medical reviewer and the reasons for such dispositions (including the application of exclusions), on a plan or issuer-specific basis and on a health care specialty-specific basis.

(III) The length of time in making determinations with respect to such denials.

(IV) Updated information on the information required to be submitted as a condition of certification with respect to the entity’s performance of external review activities.

(iii) INFORMATION TO BE PROVIDED TO CERTIFIED ORGANIZATION.—
subject to authorization of coverage or utilization review. (ii) For eligibility, or for payment in whole or in part, for medical care or services under a group health plan or health insurance coverage offered by a health insurance issuer in connection with a group health plan.

(3) GROUP HEALTH PLAN.—The term ‘group health plan’ shall have the meaning given such term in section 733(b)(1). In applying this paragraph, excepted benefits described in section 733(c) shall not be treated as benefits consisting of medical care.

(4) HEALTH INSURANCE COVERAGE.—The term ‘health insurance coverage’ has the meaning given such term in section 733(b)(1). In applying this paragraph, excepted benefits described in section 733(c) shall not be treated as benefits consisting of medical care.

(5) HEALTH INSURANCE ISSUER.—The term ‘health insurance issuer’ has the meaning given such term in section 733(b)(2).

(6) PRIOR AUTHORIZATION DETERMINATION.—The term ‘prior authorization determination’ means a determination by the group health plan, health insurance issuer, or group health plan’s designee, after a determination of coverage of the items and services as a condition of coverage of the items and services under the terms and conditions of the plan or coverage.

(7) TREATING HEALTH CARE PROFESSIONAL.—The term ‘treating health care professional’ with respect to a group health plan, health insurance issuer or provider sponsored organization means a physician (as defined in paragraph (13)(G)) or other health care practitioner who is acting within the scope of his or her State licensure or certification for the delivery of health care services and who is primarily responsible for delivering those services to the participant or beneficiary.

(8) UTILIZATION REVIEW.—The term ‘utilization review’ with respect to a group health plan or health insurance coverage means procedures used in the determination of coverage for a participant or beneficiary, such as procedures to evaluate the medical necessity, appropriateness, efficacy, quality, or efficiency of health care services, procedures or settings, and includes prospective review, concurrent review, retrospective review, medical management, case management, discharge planning, or retroreview.

(9) CONFLICTING AMENDMENT.—The table of contents in section 1 of the Employee Retirement Income Security Act of 1974 is amended by adding after the item relating to section 503B the following:

```
Sec. 503A. Claims and internal appeals procedures for group health plans.

Sec. 503B. Independent external appeals procedures for group health plans.
```

SEC. 132. ENFORCEMENT.

Section 502(c) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132(c)) is amended by adding at the end the following:

```
(8) The Secretary may assess a civil penalty against the plan and the plan shall pay such penalty to the participant or beneficiary involved.
```

SEC. 141. AVAILABILITY OF COURT REMEDIES.

SEC. 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132) is amended by adding at the end the following:

```
(i) A person or entity shall provide the organization with the information provided to the Secretary under clause (1).

(ii) ADDITIONAL INFORMATION.—Nothing in this subparagraph shall be construed as preventing such an organization from requiring additional information as a condition of certification or recertification of an entity.

(iii) USE OF INFORMATION.—

(A) IN GENERAL.—Information provided under this subparagraph may be used by the Secretary and qualified private standard-setting organizations to conduct oversight of qualified external review entities, including recertification of such entities, and shall be made available to the public in an appropriate manner.

(B) REPORT TO CONGRESS.—Not later than 2 years after the date on which the Bipartisan Patients’ Bill of Rights Act of 2001 takes effect under section 501 of such Act, and every 2 years thereafter, the Secretary, in consultation with the Secretary of Health and Human Services, shall prepare and submit to the appropriate committees of Congress, a report that contains—

(1) a description of the information provided to the Secretary under clause (ii);

(2) a description of the effect that the appeals process established under this section and section 503A had on the access of individuals to health insurance and health care;

(3) a description of the effect on health care services and who is primarily responsible for delivering those services to the participant or beneficiary (or authorized representative) of the information provided under item (1); and

(4) a description of the quality and consistency of determinations by qualified external review entities.

(III) RECOMMENDATIONS.—The Secretary may from time to time submit recommendations to Congress with respect to proposed modifications to the appeals process based on the reports submitted under subsection (II).

(II) CONFORMING AMENDMENT.—The table of contents in section 1 of the Employee Retirement Income Security Act of 1974 is amended by adding at the end the following:

```
Sec. 503A. Claims and internal appeals procedures for group health plans.

Sec. 503B. Independent external appeals procedures for group health plans.
```

```
(C) RELIEF FROM LIABILITY FOR EMPLOYER OR OTHER PLAN SPONSOR BY MEANS OF DESIGNATED DECISIONMAKER.—

(i) IN GENERAL.—Notwithstanding the direct participation (as defined in paragraph (3)(C)(i)) of an employer or plan sponsor, in any case in which there is deemed to be a designated decisionmaker described in clause (ii) that meets the requirements of paragraph (2)(A) for an employer or other plan sponsor,

(ii) all liability of such employer or plan sponsor (and any employer thereof acting within the scope of employment) under this subsection in connection with any participation or beneficiary shall be transferred to, and assumed by, the designated decisionmaker, and

 jakiwajikj

```

(iii) RELIEF FROM LIABILITY FOR EMPLOYER OR OTHER PLAN SPONSOR BY MEANS OF DESIGNATED DECISIONMAKER.—

(i) IN GENERAL.—Notwithstanding the direct participation (as defined in paragraph (3)(C)(i)) of an employer or plan sponsor, in any case in which there is deemed to be a designated decisionmaker described in clause (ii) that meets the requirements of paragraph (2)(A) for an employer or other plan sponsor,

(ii) all liability of such employer or plan sponsor (and any employer thereof acting within the scope of employment) under this subsection in connection with any participation or beneficiary shall be transferred to, and assumed by, the designated decisionmaker, and

jwiwajikj

```

```
(II) with respect to such liability, the designated decisionmaker shall be subject to all applicable provisions of paragraph (1), the actual making of such decision or the actual exercise of control in making such decision.

(b) Requirements for Designated Decisionmaker of Group Health Plans—

(1) In general.—For purposes of subparagraph (B)(ii), the requirements relating to the financial obligation of an entity for liability under such subsection shall not apply in the case of a group health plan if the entity has the ability to assume the liability described in paragraph (1), the actual making of such decision or the actual exercise of control in making such decision.

(2) Requirements for designated decisionmaker of group health plans—

(A) In general.—For purposes of this subsection and section 514(c)(3), a designated decisionmaker meets the requirements of this subparagraph with respect to any participant or beneficiary if—

(i) such designation is in such form as may be prescribed in regulations of the Secretary;

(ii) the designated decisionmaker—

(I) serves as a designated decisionmaker with respect to a group health plan if the entity has the ability to assume the liability described in paragraph (1), the actual making of such decision or the actual exercise of control in making such decision;

(III) any participation by the employer or other plan sponsor (or employee) in the plan or the benefits provided under the plan; and

(IV) any participation by the employer or other plan sponsor (or employee) in the process of creating, continuing, modifying, or terminating the plan or any benefit under the plan, if such process was not substantially focused solely on the particular situation of the participant or beneficiary referred to in paragraph (1); and

(2) The Secretary may prescribe and shall be maintained throughout the term for which the designation is in effect.

The appropriate amounts of liability insurance, minimum capital and surplus levels that are maintained by such entity to effectively insure such entity against losses arising from professional liability claims, including those arising from its service as a designated decisionmaker under this paragraph—

(i) coverage of such entity under an insurance policy or other arrangement, secured and maintained by such entity, to effectively insulate such entity against losses arising from professional liability claims, including those arising from its service as a designated decisionmaker under this paragraph; and

(ii) evidence of minimum capital and surplus levels that are maintained by such entity to cover any losses as a result of liability arising from its service as a designated decisionmaker under this paragraph.

(C) Qualifications for designated decisionmaker of group health plans—

(1) In general.—Subject to clause (i), an entity may be designated as a designated decisionmaker for purposes of section 514(c) if the entity has the ability to assume the liability described in section 514(c)(3) in effect relating to such participant and beneficiary.

(2) Requirements for designated decisionmaker of group health plans—

(A) Causes of action against employers and plan sponsors precluded.—Subject to subparagraph (B), paragraph (1) does not authorize a cause of action against an employer or other plan sponsor relating to such plan or (against an employee of such an employer or sponsor acting within the scope of employment).

(B) Limitation on appointment of treating physicians.—A treating physician who directly delivered the care, treatment, or services for which the patient is a subject of a cause of action by a participant or beneficiary under this subsection or section 514(c) may not be designated as a designated decisionmaker under this paragraph with respect to such participant or beneficiary.

(C) Exclusion of employers and other plan sponsors.—

(A) Causes of action against employers and plan sponsors precluded.—Subject to subparagraph (B), paragraph (1) does not authorize a cause of action against an employer or other plan sponsor relating to such plan, or (against an employee of such an employer or sponsor acting within the scope of employment).
(II) any provision that may have been made for or plan established for benefits which are not covered under the terms and conditions of the plan for that or any other participant or beneficiary (or any group of participants or beneficiaries).

(d) Requirement of Exhaustion of Independent Medical Review.—

(1) In General.—Paragraph (1) shall apply only if a final determination denying a claim for benefits under section 503A has been referred for independent medical review under section 503B of such Act and a written determination referred to an independent medical reviewer to reverse such final determination has been issued with respect to such review or where the coverage for the benefit at issue is referred to the independent medical reviewer but prior to the determination of the reviewer under section 503B, or a period of time elapsing after the denial is referred to the independent medical reviewer.

(2) Exception to Exhaustion for Needed Care.—A participant or beneficiary may seek relief under subsection (2)(a)(1)(B) prior to the decision of the independent medical reviewer under sections 503A or 503B (as required under subparagraph (A)) if it is demonstrated to the court, by a preponderance of the evidence, that there are extraordinary circumstances in the situation that would cause irreparable harm to the health of the participant or beneficiary.

(3) Limitations on Recovery of Damages.—

(A) Maximum Award of Noneconomic Damages.—The aggregate amount of liability for noneconomic loss in an action under paragraph (1) may not exceed the greater of—

(i) $750,000; or

(ii) an amount equal to 3 times the amount awarded for economic loss.

(B) Increase in Amount.—The amount referred to in subparagraph (A)(i) shall be increased by the consumer price index for urban consumers (as published by the Bureau of Labor Statistics, for September of the preceding calendar year that ends after December 31, 2002, by the same percentage as the percentage by which the Consumer Price Index for All Urban Consumers (United States city average), published by the Bureau of Labor Statistics, for September of the preceding calendar year has increased or decreased from the Index for September of 2002.

(C) Severe Liability.—In the case of any action commenced pursuant to paragraph (1), the designated decision-maker may not award any noneconomic damages attributable to such designated decision-maker in direct proportion to such decision-maker's share of fault or responsibility for the injury suffered by the participant or beneficiary. In all such cases, the liability of a designated decision-maker for noneconomic damages shall be several and not joint.

(D) Treatment of Collateral Source Payments.—

(i) In General.—In the case of any action commenced pursuant to paragraph (1), the total amount of damages received by a participant or beneficiary under such action shall be reduced by the amount of any award of noneconomic damages that was the subject of the action.

(ii) Limitation on Reduction.—The amount by which an award of damages to a participant or beneficiary for an injury shall be reduced under clause (i) shall be—

(I) the total amount of any payments (other than such award) that have been made or that will be made to such participant or beneficiary to pay costs of or compensate such participant or beneficiary for the injury that was the subject of the action; less

(II) the amount paid by such participant or beneficiary (or by the spouse, parent, or legal guardian of such participant or beneficiary) to secure the payments described in clause (I).

(E) Determination of Amounts from Collateral Source Payments.—The amount required under clause (ii) shall be determined by the court in a pretrial proceeding. At the conclusion of such proceeding, no evidence shall be admitted as to the amount of any charge, payments, or damage for which a participant or beneficiary—

(i) has received payment from a collateral source for the injury sustained, or a representative which has been assured by a third party; or

(ii) is, or with reasonable certainty, will be eligible to receive from a collateral source which will, with reasonable certainty, be assigned to a third party.

(F) Prohibition of Award of Punitive Damages.—Notwithstanding any other provision of law, in the case of any action commenced pursuant to paragraph (1), the court may not award any punitive, exemplary, or similar damages against a defendant.

(G) Affirmative Defenses.—In the case of any cause of action under paragraph (1), it shall be an affirmative defense that—

(A) the designated decision-maker of a group health plan, or health insurance issuer that offers health insurance coverage in connection with a group health plan, involved did not receive from the participant or beneficiary (or authorized representative) the information required by the plan or issuer regarding the medical condition of the participant or beneficiary that was necessary to make a determination of benefits under section 503B or a final determination on a claim for benefits under section 503A.

(B) the participant or beneficiary (or authorized representative) had—

(i) was in possession of facts that were sufficient to enable the participant or beneficiary (or authorized representative) to know that an expedited review under sections 503A or 503B would have prevented the harm that is the subject of the action; and

(ii) failed to notify the plan or issuer of the need for such an expedited review.

(C) the qualified external medical reviewer failed to meet the timelines applicable under section 503B, or a period of time elapsing after coverage has been authorized.

Nothing in this paragraph shall be construed to limit the application of any other affirmative defense that may be applicable to the cause of action in question.

(7) Waiver of Internal Review.—In the case of any cause of action under paragraph (1), the waiver or nonwaiver of internal review under section 503B, or a period of time elapsing after the date on which the failure described in paragraph (1) occurred.

(8) Limitations on Actions.—Paragraph (1) shall not apply in connection with any action that is commenced more than 3 years after the date on which the failure described in paragraph (1) occurred.

(9) Protection of the Regulation of Quality of Medical Care Under State Law.—Nothing in this subsection shall be construed to preclude any action under State law against a person or entity for liability or vicarious liability with respect to the delivery of medical care. A claim that is based on or otherwise relates to a group health plan's administration or determination of a claim for benefits (as such term is defined in section 502A and notwithstanding the definitions contained in section 502A) shall not be deemed to be the delivery of medical care under any State law for purposes of this section.

(10) Construction.—Nothing in this subsection shall be construed as authorizing a plan or group health plan to impose a penalty or make a refusal to pay for the failure of a group health plan or health insurance issuer to provide an item or service for which there is a written determination under section 503B, or a period of time elapsing after the denial is referred to the independent medical reviewer. Nothing in this subsection shall be construed to preclude any action under State law against a person or entity for liability or vicarious liability with respect to the delivery of medical care. A claim that is based on or otherwise relates to a group health plan's administration or determination of a claim for benefits (as such term is defined in section 502A and notwithstanding the definitions contained in section 502A) shall not be deemed to be the delivery of medical care under any State law for purposes of this section.

(11) Construction.—Nothing in this subsection shall be construed as authorizing a plan or group health plan to impose a penalty or make a refusal to pay for the failure of a group health plan or health insurance issuer to provide an item or service for which there is a written determination under section 503B, or a period of time elapsing after the denial is referred to the independent medical reviewer. Nothing in this subsection shall be construed to preclude any action under State law against a person or entity for liability or vicarious liability with respect to the delivery of medical care. A claim that is based on or otherwise relates to a group health plan's administration or determination of a claim for benefits (as such term is defined in section 502A and notwithstanding the definitions contained in section 502A) shall not be deemed to be the delivery of medical care under any State law for purposes of this section.
that is specifically excluded under the plan or coverage. A group health plan shall only be brought under the Employee Retirement Income Security Act of 1974. In this paragraph, the terms ‘group health plan’ and ‘health insurance coverage’ have the meanings given such terms in section 733 of the Employee Retirement Income Security Act of 1974.

(b) AUTHORITY TO IMPOSE CIVIL PENALTIES FOR NONCOMPLIANCE.—In connection with a group health plan, any such action shall only be brought under the Employee Retirement Income Security Act of 1974.

§151. PREEMPTION; STATE FLEXIBILITY; CONSTRUCTION

(a) LIMITATION ON PREEMPTION OF STATE LAW WITH RESPECT TO HEALTH INSURANCE ISSUERS.—

(1) IN GENERAL.—Subject to paragraph (2), any such action by a State law shall apply in connection with a group health plan. Any such action shall not be construed to supersede any provision of State law which establishes, implements, or continues in effect any standard or requirement relating to health insurance issuers (in connection with group health plans or individual health insurance coverage) and non-Federal governmental plans except to the extent that such standard or requirement prevents the application of a requirement of such subtleties; and
(b) The amendments made by this section shall apply to acts and omissions (from which a cause of action arises) on or after October 1, 2002.

Subtitle E—State Flexibility

SECTION 151. PREEMPTION; STATE FLEXIBILITY; CONSTRUCTION

(a) LIMITATION ON PREEMPTION OF STATE LAW WITH RESPECT TO HEALTH INSURANCE ISSUERS.—

(1) IN GENERAL.—Subject to paragraph (2), any such action by a State law shall apply in connection with a group health plan. Any such action shall not be construed to supersede any provision of State law which establishes, implements, or continues in effect any standard or requirement relating to health insurance issuers (in connection with group health plans or individual health insurance coverage) and non-Federal governmental plans except to the extent that such standard or requirement prevents the application of a requirement of such subtleties; and
(b) The amendments made by this section shall apply to acts and omissions (from which a cause of action arises) on or after October 1, 2002.

Subtitle E—State Flexibility

§151. PREEMPTION; STATE FLEXIBILITY; CONSTRUCTION

(a) LIMITATION ON PREEMPTION OF STATE LAW WITH RESPECT TO HEALTH INSURANCE ISSUERS.—

(1) IN GENERAL.—Subject to paragraph (2), any such action by a State law shall apply in connection with a group health plan. Any such action shall not be construed to supersede any provision of State law which establishes, implements, or continues in effect any standard or requirement relating to health insurance issuers (in connection with group health plans or individual health insurance coverage) and non-Federal governmental plans except to the extent that such standard or requirement prevents the application of a requirement of such subtleties; and
(b) The amendments made by this section shall apply to acts and omissions (from which a cause of action arises) on or after October 1, 2002.

(b) The amendments made by this section shall apply to acts and omissions (from which a cause of action arises) on or after October 1, 2002.
CONGRESSIONAL RECORD—SENATE

JUNE 29, 2001

(B) STATE LAW DESCRIBED.—A State law described in this subparagraph is a State law that imposes, with respect to health insurance issuers in connection with group health plans or individual health insurance coverage) and to non-Federal governmental plans, an obligation to permit the Board to make the determination described in paragraph (3) (as defined in subsection (b)(3)) that are covered under the law for which the State is seeking a certification. Such certification shall be accompanied by such information as may be required to permit the Board to make the determination described in paragraph (3), as applicable.

(A) IN GENERAL.—The Board shall promptly review a certification submitted under paragraph (1) with respect to a State law to make the determination described in paragraph (3) with respect to the certification.

(B) APPROVAL DEADLINES.—(i) INITIAL REVIEW.—Not later than 60 days after the date on which the Board receives a certification under paragraph (1), the Board shall—

(I) notify the State involved that specified additional information is needed to make the determination described in paragraph (3); or

(ii) submit a recommendation to the Secretary (through a certification under subsection (c)(4)) as being consistent with a patient protection requirement (as defined in paragraph (3)).

(C) DETERMINATIONS WITH RESPECT TO CERTIFICATIONS.—

(1) IN GENERAL.—For purposes of the continued application of certain State laws under subsection (b)(1), a State may, on or after May 1, 2002, submit to the Board established under subsection (d) a certification that the State law involved is consistent with the patient protection requirements (as defined in subsection (b)(3)) that are covered under the law for which the State is seeking a certification. Such certification shall be accompanied by such information as may be required to permit the Board to make the determination described in paragraph (3), as applicable.

(2) DUTIES.—(A) IN GENERAL.—The Board shall promptly review a certification submitted under paragraph (1) with respect to a State law to make the determination described in paragraph (3) with respect to the certification.

(B) APPROVAL DEADLINES.—(i) INITIAL REVIEW.—Not later than 60 days after the date on which the Board receives a certification under paragraph (1), the Board shall—

(I) notify the State involved that specified additional information is needed to make the determination described in paragraph (3); or

(ii) submit a recommendation to the Secretary through a certification under paragraph (3) with respect to a State law to make the determination described in paragraph (3).
(1) BOARD.—The term ‘‘Board’’ means the Patient Protection and Affordable Care Act established under subsection (d).
(2) STATE, STATE LAW.—The terms ‘‘State’’ and ‘‘State law’’ shall have the meanings given such terms in section 2722(d) of the Public Health Service Act (42 U.S.C. 300gg–23(d)).

Subtitle F—Miscellaneous Provisions

SEC. 161. DEFINITIONS.

(a) INCORPORATION OF GENERAL DEFINITIONS.—Except as otherwise provided, the provisions of section 2791 of the Public Health Service Act shall apply for purposes of this title in the same manner as they apply for purposes of title XXVII of such Act.

(b) SECRETARY.—Except as otherwise provided, the term ‘‘Secretary’’ means the Secretary of Health and Human Services, in consultation with the Secretary of Labor.

(c) ADDITIONAL DEFINITIONS.—For purposes of this title—

(1) ENROLLEE.—The term ‘‘enrollee’’ means, with respect to health insurance coverage offered by a health insurance issuer, an individual enrolled with the issuer to receive such coverage.

(2) HEALTH CARE PROFESSIONAL.—The term ‘‘health care professional’’ means an individual who is licensed, accredited, or certified under State law to provide specified health care services and who is operating within the scope of such licensure, accreditation, or certification.

(3) HEALTH CARE PROVIDER.—The term ‘‘health care provider’’ includes a physician or other health care professional, as well as an institutional or other facility or agency that provides health care services and that is licensed, accredited, or certified to provide health care items and services under applicable State law.

(4) NETWORK.—The term ‘‘network’’ means, with respect to a group health plan or health insurance issuer offering health insurance coverage granting health care professionals and providers through which the plan or issuer provides health care items and services to a participant, beneficiary, or enrollee.

(5) NONPARTICIPATING.—The term ‘‘nonparticipating’’ means, with respect to a health care provider that provides health care items and services to a participant, beneficiary, or enrollee under group health plan or health insurance coverage, a health care provider that is not a participating health care provider with respect to such items and services.

(6) PARTICIPATING.—The term ‘‘participating’’ means, with respect to a health care provider, the provision of health care items and services to a participant, beneficiary, or enrollee under group health plan or health insurance coverage offered by a health insurance issuer, a health care provider that furnishes such items and services under a contract or other arrangement with the plan or issuer.

(7) PRIOR AUTHORIZATION.—The term ‘‘prior authorization’’ means the process of obtaining prior approval from a health insurance issuer or group health plan for the provision or coverage of medical services.

(8) TERMS AND CONDITIONS.—The term ‘‘terms and conditions’’ includes, with respect to a group health plan or health insurance coverage, any requirements imposed under this title with respect to the plan or coverage.

TITLE II—AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT

SEC. 201. APPLICATION TO CERTAIN HEALTH INSURANCE COVERAGE.

(a) IN GENERAL.—Subpart 2 of part A of title XXVII of the Public Health Service Act (42 U.S.C. 300gg–4 et seq.) is amended by adding at the end the following:

‘‘SEC. 2707. PATIENT PROTECTION STANDARDS AND ACCOUNTABILITY.

‘‘(a) IN GENERAL.—Each health insurance issuer shall comply with the patient protection requirements under title I of the Bipartisan Patients’ Bill of Rights Act of 2001 with respect to non-Federal governmental group health insurance coverage offered by such issuers, and such requirements shall be deemed to be incorporated into this section.

‘‘(b) ACCOUNTABILITY.—The provisions of sections 503 through 503B of the Employee Retirement Income Security Act of 1974 (as in effect as of the date after the date of enactment of the Bipartisan Patients’ Bill of Rights Act of 2001) shall apply to non-Federal governmental group health insurance coverage offered by health insurance issuers with respect to an enrollee in the same manner as they apply to health insurance coverage offered by a participant or beneficiary in connection with a group health plan and the requirements referred to in such sections shall be deemed to be incorporated into this section. For purposes of this subsection, references in such sections 503 through 503B to the Secretary shall be deemed to be references to the Secretary of Health and Human Services.’’.

(b) CONFORMING AMENDMENT.—Section 2721(b)(2)(A) of such Act (42 U.S.C. 300gg–21(b)(2)(A)) is amended by inserting ‘‘other than section 2707’’ after ‘‘requirements of such subparts’’.

SEC. 202. APPLICATION TO INDIVIDUAL HEALTH INSURANCE COVERAGE.

Part B of title XXVII of the Public Health Service Act (42 U.S.C. 300gg–41 et seq.) is amended—

(1) by redesignating the first subparagraph (3 relating to other requirements) as subparagraph (2); and

(2) by inserting after section 2752 the following:

‘‘SEC. 2753. PATIENT PROTECTION STANDARDS AND ACCOUNTABILITY.

‘‘(a) IN GENERAL.—Each health insurance issuer shall comply with the patient protection requirements under subparts A and B of title I of the Bipartisan Patients’ Bill of Rights Act of 2001 with respect to individual health insurance coverage it offers, and such requirements shall be deemed to be incorporated into this section.

‘‘(b) ACCOUNTABILITY.—The provisions of sections 503 through 503B of the Employee Retirement Income Security Act of 1974 (as in effect as of the date of enactment of the Bipartisan Patients’ Bill of Rights Act of 2001) shall apply to individual health insurance coverage offered by a health insurance issuer, and such requirements shall be deemed to be incorporated into this section.

SEC. 203. LIMITATION ON AUTHORITY OF THE SECRETARY OF HEALTH AND HUMAN SERVICES WITH RESPECT TO NON-FEDERAL GOVERNMENTAL PLANS.

Section 2722(b) of the Public Health Service Act (42 U.S.C. 300gg–22(b)) is amended—

(1) in paragraph (1), by striking ‘‘only—’’ and all that follows through the period and inserting ‘‘only as provided under subsection (a)(2);’’; and

(2) in paragraph (2)—

(A) in subparagraph (A), by striking ‘‘any’’ non-Federal governmental plan that is a group health plan and ‘‘; and

(B) in subparagraph (B), by striking ‘‘by—’’ and all that follows through the period and inserting ‘‘by a health insurance issuer, the issuer is liable for such penalty.’’.

SEC. 204. COOPERATION BETWEEN FEDERAL AND STATE AUTHORITIES.

Part C of title XXVII of the Public Health Service Act (42 U.S.C. 300gg–91 et seq.) is amended by adding at the end the following:

‘‘SEC. 2783. COOPERATION BETWEEN FEDERAL AND STATE AUTHORITIES.

‘‘(a) AGREEMENT WITH STATES.—A State may enter into an agreement with the Secretary for the delegation to the State of any or all of the Secretary’s authority under this title to enforce the requirements applicable under title I of the Bipartisan Patients’s Bill of Rights Act of 2001 to health insurance issuers in connection with non-Federal governmental plans and individual health insurance coverage.

‘‘(b) DELEGATIONS.—Any department, agency, or instrumentality of a State to which authority is delegated pursuant to an agreement entered into under this section may, if authorized under State law and to the extent consistent with such agreement, exercise the powers of the Secretary under this title which relate to such authority.’’.

TITLE III—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

SEC. 201. APPLICATION OF PATIENT PROTECTION STANDARDS TO GROUP HEALTH PLANS AND GROUP HEALTH INSURANCE COVERAGE IN CONNECTION WITH A GROUP HEALTH PLAN.

Subpart 2 of part 7 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1185 et seq.) is further amended by adding at the end the following new section:

‘‘SEC. 714. PATIENT PROTECTION STANDARDS.

‘‘(a) IN GENERAL.—Subject to subsection (b), a group health plan (and a health insurance issuer offering health insurance coverage in connection with a group health plan) shall comply with the requirements of title I of the Bipartisan Patients’ Bill of Rights Act of 2001 (as in effect as of the date of the enactment of such Act), and such requirements shall be deemed to be incorporated into this subsection.

‘‘(b) PLAN SATISFACTION OF CERTAIN REQUIREMENTS.—

‘‘(1) SATISFACTION OF CERTAIN REQUIREMENTS THROUGH INSURANCE.—For purposes of subsection (a), in so far as a group health plan provides benefits in the form of health insurance coverage through a health insurance issuer, the plan shall be treated as meeting the following requirements of title I of the Bipartisan Patients’ Bill of Rights Act of 2001 with respect to such benefits and not be considered as failing to meet such requirements because of a failure of the issuer to comply with such requirements as long as the plan sponsor or its representatives did not cause such failure by the issuer:

CONGRESSIONAL RECORD—SENATE June 29, 2001
"(A) Section 101 (relating to access to emergency care)."

"(B) Section 102 (relating to consumer choice option)."

"(C) Section 103 (relating to patient access to obstetrical and gynecological care)."

"(D) Section 104 (relating to access to pediatric care)."

"(E) Section 105 (relating to timely access to specialists)."

"(F) Section 106 (relating to continuity of care), but only as given as a replacement issuer assumes the obligation for continuity of care.

"(G) Section 108 (relating to access to needed prescription drugs)."

"(H) Section 109 (relating to coverage for individuals participating in approved clinical trials)."

"(1) Section 110 (relating to required coverage for minimum hospital stay for mastectomies and lymph node dissections for the treatment of breast cancer and coverage for secondary consultations)."

"(J) Section 121 (relating to the provision of information).

"(2) APPLICATION TO PROHIBITIONS.—Pursuant to rules of the Secretary, if a health insurance issuer offering health insurance coverage with a group health plan takes an action in violation of any of the following sections of the Bipartisan Patients' Bill of Rights Act of 2001, the group health plan shall not be liable for such violation unless the plan caused such violation:

"(A) Section 107 (relating to prohibition of discrimination based on beneficiary race)."

"(B) Section 111 (relating to prohibition of discrimination based on beneficiary sex)."

"(3) CONSTRUCTION.—Nothing in this subsection shall be construed to affect or modify the responsibilities of the fiduciaries of a group health plan under part 4 of subtitle B.

"(4) TREATMENT OF CONSISTENT STATE LAWS.—For purposes of applying this subsection, a health insurance issuer offering coverage in connection with a group health plan shall be deemed to be in compliance with one or more of the patient protection requirements of the Bipartisan Patients' Bill of Rights Act of 2001 and the amendments made by such Act that are otherwise applicable to such issuer (or plan) under section 714 unless the issuer (or plan) shall be deemed to be in violation of any of the following provisions of that Act:

"(A) the issuer (or plan) is in compliance with a State law, with respect to the patient protection requirements involved, that has been certified in accordance with section 151(c) of such Act; or

"(B) the issuer (or plan) is in compliance with a State law, with respect to the patient protection requirements involved, that has been determined by the Secretary as not preventing the application of the patient protection requirements involved, in accordance with section 151(c)(8)(B) of such Act.

"(c) CONFORMING REGULATIONS.—The Secretary shall issue regulations to coordinate the requirements on group health plans and health insurance issuers under this section with the requirements imposed under the other provisions of this title.

"(d) SATISFACTION OF ERISA CLAIMS PROCEDURE REQUIREMENT.—Section 503 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132(b)) is amended—

"(1) by inserting "‘(a)’ after "‘(Sec. 503.’’); and

"(2) by adding at the end the following:

"(B) A participant, beneficiary, plan fiduciary, or the Secretary may not bring an action to enforce the requirements of section 714 against a group health plan (or such group health plan) where the patient protection requirements of the Bipartisan Patients' Bill of Rights Act of 2001 (as defined in section 151(b)(3) of such Act) otherwise applicable to such issuer (or plan) under section 714 do not apply because the issuer (or plan) is in compliance with a State law, with respect to the patient protection requirements involved, that has been certified or a determination made in accordance with section 151(c)."

"(e) CONFORMING AMENDMENTS.—

"(1) Section 732(a) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132(a)) is amended by striking "‘section 711’" and inserting "‘sections 711 and 714’.

"(2) The table of contents in section 1 of the Employee Retirement Income Security Act of 1974 is amended by inserting after the item relating to section 713 the following new item:

"‘Sec. 714. Patient protection standards.’.

"(f) SEC. 502(b)(3) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132(b)(3)) is amended by inserting "‘(other than section 135(b))’ after "‘part 7’.

"(g) SEC. 302. COOPERATION BETWEEN FEDERAL AND STATE AUTHORITIES.

"Section 506 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1136) is amended by adding at the end the following:

"‘(c) RESPONSIBILITY OF STATE WITH RESPECT TO HEALTH INSURANCE ISSUERS.—(1) AGREEMENTS.—A State may enter into an agreement with the Secretary for the delegation to the State of some or all of the Secretary's authority under section 1110 of title 26, or 504 to enforce the requirements applicable under title I of the Bipartisan Patients' Bill of Rights Act of 2001 to health insurance issuers in connection with a group health plan.

"(2) DELEGATIONS.—Any department, agency, or instrumentality of a State to which authority is delegated pursuant to an agreement entered into under this subsection may, if authorized under State law and to the extent consistent with such agreement, exercise the powers of the Secretary under this title which relate to such authority.''

TITLE IV—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1986

SEC. 401. APPLICATION TO GROUP HEALTH PLANS UNDER THE INTERNAL REVENUE CODE OF 1986

Subchapter B of chapter 100 of the Internal Revenue Code of 1986 is amended—

"(1) in the table of sections, by inserting after the item relating to section 9812 the following new item:

"‘Sec. 9813. Standard relating to patients' bill of rights.’;

"and (2) by inserting after section 9812 the following:

"SEC. 9813. STANDARD RELATING TO PATIENTS' BILL OF RIGHTS.

"A group health plan shall comply with the requirements of title I of the Bipartisan Patients' Bill of Rights Act of 2001 (as in effect as of the date of the enactment of such Act), and such requirements shall be deemed to be incorporated into this section.'"
request that the Institute of Medicine of the National Academy of Sciences prepare and submit to the appropriate committees of Congress a report concerning the impact of this Act, and the amendments made by this Act, on the number of individuals in the United States with health insurance coverage.

(b) LIMITATION WITH RESPECT TO CERTAIN PLANS.—If the Secretary, in any report submitted under subsection (a), determines that more than 1,000,000 individuals in the United States have lost their health insurance coverage as a result of the enactment of this Act, as compared to the number of individuals with health insurance coverage in the 12-month period preceding the date of enactment of this Act, section 141 and the amendments made by such section shall be repealed effective on the date that is 12 month after the date on which the report is submitted, and the submission of any further reports under subsection (a) shall not be required.

(c) FUNDING.—From funds appropriated to the Department of Health and Human Services for fiscal years 2003 and 2004, the Secretary of Health and Human Services shall provide for such funding as the Secretary determines necessary for the conduct of the study by the National Academy of Sciences under this section.

SA 857. Mr. ENSIGN submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

On page 179, after line 14, add the following:

SEC. 1. IMMUNITY FOR HEALTH CARE PROFESSIONALS.

Section 6(6) of the Volunteer Protection Act of 1997 (42 U.S.C. 14506(6)) is amended by adding at the end the following flush sentence:

"Such term includes a health care professional (as defined in section 151 of the Bipartisan Patient Protection Act) who is providing medical services and who meets the requirements of subparagraphs (A) and (B) with respect to the provision of such services including compensation from any source."
SEC. 304. SENSE OF THE SENATE CONCERNING The Average Offered by a Health Insurance Issuer under a Group Health Plan or Health Insurance Coverage of a Participant, Beneficiary, or Enrollee or Their Personal Representative.

SEC. 305. REQUIREMENTS FOR INSURANCE ISSUERS WITH RESPECT TO THE FEDERAL HEALTH CARE CONSUMER ASSISTANCE OFFICE.

(a) Definitions.—In this section—

(i) the term "health care consumer assistance office" means a health care consumer assistance office established by the Secretary as provided by this section;

(ii) the term "participant, beneficiary, or enrollee" means, with respect to a group health plan—

(A) any individual who is or has been covered by the plan, including an individual for whom the plan provides health care benefits;

(B) any individual who may become a participant, beneficiary, or enrollee through an election by another participant, beneficiary, or enrollee; and

(C) any participant, beneficiary, or enrollee of a health plan of a group health plan covered by this section;

(iii) the term "Federal health care consumer assistance office" means the office established under this section; and

(iv) the term "Secretary" means the Secretary of Health and Human Services.

(b) Sense of the Senate.—It is the sense of the Senate that the court should consider the loss of a non-wage earning spouse or parent as an economic loss for the purposes of this section. Furthermore, the court should define the compensation for the loss not as minimum services, but, rather, in terms that fully compensate for the true and whole replacement value.

(c) Minimum Amount.—In no case shall the amount provided to a State under this subsection for a fiscal year be less than an amount equal to 0.5 percent of the amount appropriated for such fiscal year to carry out this section.

(d) Prohibition on Discrimination.—The Secretary shall ensure that no such information is used by the office, or released or disclosed to State agencies or outside persons or entities without the prior written authorization (in accordance with section 164.508 of title 45, Code of Federal Regulations) of the individual or personal representative. The office may, consistent with applicable Federal and State confidentiality laws, collect, use or disclose aggregate information that is not individually identifiable (as defined in section 164.501 of title 45, Code of Federal Regulations).

(1) General.—From amounts provided under a grant awarded under this subsection, the Federal health care consumer assistance office shall, directly or through a contract with an independent, nonprofit entity with demonstrated experience in serving the needs of health care consumers (including individuals covered under a group health plan or health insurance coverage of a participant, beneficiary, or enrollee or their personal representative), provide support for activities directly or by contract with an entity that otherwise meets the requirements of this section.

(d) Prohibition on Discrimination.—The Secretary shall ensure that no such information is used by the office, or released or disclosed to State agencies or outside persons or entities without the prior written authorization (in accordance with section 164.508 of title 45, Code of Federal Regulations) of the individual or personal representative. The office may, consistent with applicable Federal and State confidentiality laws, collect, use or disclose aggregate information that is not individually identifiable (as defined in section 164.501 of title 45, Code of Federal Regulations).

(1) General.—From amounts provided under a grant awarded under this subsection, the Federal health care consumer assistance office shall, directly or through a contract with an independent, nonprofit entity with demonstrated experience in serving the needs of health care consumers (including individuals covered under a group health plan or health insurance coverage of a participant, beneficiary, or enrollee or their personal representative), provide support for activities directly or by contract with an entity that otherwise meets the requirements of this section.

(e) Use of Funds.—(1) By State.—A State shall use amounts provided under a grant awarded under this section to carry out consumer assistance activities directly or by contract with an independent, nonprofit organization. An eligible entity may use some reasonable amount of such grant to ensure the adequate training of its personnel in serving the needs of health care consumers (including individuals covered under a group health plan or health insurance coverage of a participant, beneficiary, or enrollee or their personal representative). The Federal health care consumer assistance office shall ensure that no such information is used by the office, or released or disclosed to State agencies or outside persons or entities without the prior written authorization (in accordance with section 164.508 of title 45, Code of Federal Regulations) of the individual or personal representative. The office may, consistent with applicable Federal and State confidentiality laws, collect, use or disclose aggregate information that is not individually identifiable (as defined in section 164.501 of title 45, Code of Federal Regulations).

(2) Designation of Responsibilities.—(A) In General.—If the health care consumer assistance office of a State is located within an existing State regulatory agency or office of an elected State official, the Secretary shall ensure that—

(i) there is a separate delineation of the funding, activities, and responsibilities of the office as compared to the other funding, activities, and responsibilities of the agency; and

(ii) the office establishes and implements procedures and protocols to ensure the confidentiality of all information shared by a participant, beneficiary, or enrollee or their personal representative and their health care providers, group health plans, or health insurance issuers with the office and to ensure that no such information is used by the office, or released or disclosed to State agencies or outside persons or entities without the prior written authorization (in accordance with section 164.508 of title 45, Code of Federal Regulations) of the individual or personal representative.

(B) Contract Entity.—In the case of an entity that enters into a contract with a State that, through contract, establishes a health care consumer assistance office, such office shall establish and implement procedures and protocols, consistent with applicable Federal and State laws, to ensure the confidentiality of all information shared by a participant, beneficiary, or enrollee or their personal representative and their health care providers, group health plans, or health insurance issuers with the office and to ensure that no such information is used by the office, or released or disclosed to State agencies or outside persons or entities without the prior written authorization (in accordance with section 164.508 of title 45, Code of Federal Regulations) of the individual or personal representative.
Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that the Committee on Energy and Natural Resources has scheduled a hearing to receive testimony on legislative proposals related to energy efficiency, including S. 352, the Energy Emergency Response Act of 2001; title XIII of S. 597, the Comprehensive and Balanced Energy Policy Act of 2001, sections 602-606 of S. 388, the National Energy Security Act of 2001; S. 95, the Federal Energy Bank Act; S.J. Res. 15, providing for congressional disapproval of the rule submitted by the Department of Energy relating to the postponement of the effective date of energy conservation standards for central air conditioners.

The hearing will take place on Friday, July 13, at 9:30 a.m. in room 366 of the Dirksen Senate Office Building. Those wishing to submit written statements on the legislation should address them to the Committee on Energy and Natural Resources, Attn: Shirley Neff, U.S. Senate, Washington, DC 20510.

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that the Committee on Energy and Natural Resources has scheduled a hearing to receive testimony on energy and security Act of 2001. titles VIII, XI and Division E of S. 597, the Comprehensive and Balanced Energy Policy Act of 2001; sections 111, 122, 123, 125, 127, 201, 205, title IV and title V of S. 472, the Nuclear Energy Electricity Supply Assurance Act of 2001; and S. 90, the Department of Energy Nanoscale Science and Engineering Research Act; S. 193, the Department of Energy Advanced Scientific Computing Act; S. 242, the Department of Energy University Nuclear Science and Engineering Act of 2001; S. 269, the Nuclear Industry Partnerships Improvement Act of 2001; and S. 636, a bill to direct the Secretary of Energy to establish a decommissioning pilot program to decommission and decontaminate the sodium-cooled fast breeder experimental test reactor located in northwest Arkansas.

The hearing will take place on Wednesday, July 18, at 9:30 a.m., in room 366 of the Dirksen Senate Office Building. Those wishing to submit written statements on the legislation should address them to the Committee on Energy and Natural Resources, Attn: Robert Simon, U.S. Senate, Washington, DC 20510.

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that the Committee on Energy and Natural Resources has scheduled a hearing to receive testimony on legislative proposals related to removing barriers to distributed generation, renewable energy, and other advanced technologies in electricity generation and transmission, including section 301 and title VI of S. 597, the Comprehensive and Balanced Energy Policy Act of 2001; sections 110, 111, 710, and 711 of S. 388, the National Energy Security Act of 2001; and S. 933, the Combined Heat and Power Advancement Act of 2001. In addition, the hearing will consider proposals relating to the hydroelectric relicensing procedures of the Federal Energy Regulatory Commission, including title VII of S. 388, title VII of S. 597; and S. 71, the Hydroelectric Licensing Process Improvement Act of 2001.
The hearing will take place on Thursday, July 19, 2001, at 9:30 a.m., in room SD–335, of the Dirksen Senate Office Building in Washington, DC.

Those wishing to submit written statements on the legislation should address them to the Committee on Energy and Natural Resources, Attn: Deborah Estes, U.S. Senate, Washington, DC 20510.

For further information, please contact Deborah Estes at (202) 224–5360 or Mary Katherine Ishee at (202) 224–7865.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. DASCHLE. Madam President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: No. 166, Nos. 168 through 181, including the nominations on the Secretary’s desk; that the nominations be confirmed en bloc, the motions to reconsider be laid on the table en bloc, the President be immediately notified of the Senate’s action, and the Senate then return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations were considered and confirmed as follows:

AIR FORCE

The following named officers for appointment in the United States Air Force to the grade indicated under title 10, U.S.C., section 624:

To be major general

To be colonel of the Air Force

Neal A. McCaleb, of Oklahoma, to be an Assistant Secretary of the Interior.

NAVY

The following named officers for appointment in the United States Navy to the grade indicated under title 10, U.S.C., section 624:

To be major general

To be major general

The following Air National Guard of the United States officers for appointment in the Reserve of the Air Force to the grades indicated under title 10, U.S.C., section 12203:

To be brigadier general

Col. Tex W. Tanberg, Jr., 0000.

To be major general

ARMY

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be lieutenant general

To be major general

To be colonel of the Army

The following Army National Guard of the United States officer for appointment in the Reserve of the Army to the grade indicated under title 10, U.S.C., section 12203:

To be major general

To be lieutenant general

PRIVILEGE OF THE FLOOR

Mr. REID. Mr. President, I ask unanimous consent that Krisann Kleibacker, a fellow in Senator Daschle’s office, be granted the privilege of the floor during debate on S. 1052.

The PRESIDING OFFICER. Without objection, it is so ordered.

To be lieutenant general

To be lieutenant general

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be lieutenant general

NAVY

The following named officer for appointment as Chief of the Bureau of Medicine and Surgery and Surgeon General and for appointment to the grade indicated under title 10, U.S.C., sections 601 and 5137:

To be vice admiral

Rear Adm. Michael L. Cowan, 0000.

To be vice admiral

Vice Adm. Patricia A. Tracey, 0000.

ARMY

PN536 Air Force nominations (59) beginning STEVEN L. ADAMS, and ending JANNETTE YOUNG, which nominations were received by the Senate and appeared in the Congressional Record of June 18, 2001

PN29 Army nominations (108) beginning KEITH S. * ALBERTSON, and ending ROBERT V. ZUEHLKE, which nominations were received by the Senate and appeared in the Congressional Record of January 3, 2001

PN484 Army nominations (169) beginning ERIC D. * ADAMS, and ending DAVID S. ZUMBRO, which nominations were received by the Senate and appeared in the Congressional Record of May 21, 2001

PN435 Army nominations (8) beginning GREGGORY R. CLUFF, and ending STEVEN W. VINSON, which nominations were received by the Senate and appeared in the Congressional Record of May 21, 2001

PN485 Army nominations (16) beginning GILL P. BECK, and ending MARGO D SHERIDAN, which nominations were received by the Senate and appeared in the Congressional Record of June 5, 2001

PN486 Army nominations (179) beginning CYNTHIA J ABRADINI, and ending THOMAS R * YARBROUGH, which nominations were received by the Senate and appeared in the Congressional Record of June 5, 2001

PN517 Army nominations (3) beginning JAMES E. GELETA, and ending GARY S OWENS, which nominations were received by the Senate and appeared in the Congressional Record of June 12, 2001

PN518 Army nominations (6) beginning FLOYD E BELL, JR., and ending STEVEN N. WICKSTROM, which nominations were received by the Senate and appeared in the Congressional Record of June 12, 2001
DEAR COLLEAGUE: We write as Chairman and Ranking Republican Member of the Judiciary Committee to inform you that we are prepared to examine carefully and assess such presidential nominations. We both believe that such openness in the nomination process shall no longer be designated or treated as Committee confidential.

Sincerely,

PATRICK J. LEAHY, Chairman.

ORRIN G. HATCH, Ranking Republican Member.

DEAR COLLEAGUE: On June 29, 2001, the Senate passed the organizing resolution which states, in part, that subject to the authority of the Standing Rules of the Senate, any agreements entered into regarding committee funding and space prior to June 5, 2001, be consistent with this resolution. We both recognize and have every intention of following the practices and precedents of the Committee and the Senate when considering Supreme Court nominees.

Sincerely,

PATRICK J. LEAHY, Chairman.

ORRIN G. HATCH, Ranking Republican Member.

DEAR COLLEAGUE: We write as Chairman and Ranking Republican Member of the Judiciary Committee to inform you of a change in Committee practice with respect to nominations. The “blue slips” that the Committee has traditionally sent to home State Senators to ask their views on nominees to be U.S. Attorneys, U.S. Marshals and federal judges, will be treated as public information. We both believe that such openness in the confirmation process will benefit the Judiciary Committee and the Senate as a whole. Further, it is our intention that this policy openness with regard to “blue slips” and the blue slip process continue in the future, regardless of who is Chairman or which party is in the majority in the Senate. Therefore, we write to inform you that the Chairman of the Judiciary Committee, with the full support of the former Chairman and Ranking Republican Member, is exercising the authority of the Senate for the 107th Congress with respect to Supreme Court nominations. It is the intent of the Committee on Rules and Administration to continue such practice.

Sincerely,

CHRISTOPHER J. DODD, Chairman.

MITCH McCONNELL, Ranking Member.

Mr. DASCHLE. Madam President, I ask unanimous consent that the resolution be agreed to and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. 120) was agreed to, as follows:

S. Res. 120
Resolved, That the Majority Party of the Senate for the 107th Congress shall have a one seat majority on every committee of the Senate, except that the Select Committee on Ethics shall continue to be composed of equal members from both parties. No Senator shall lose his or her current committee assignments by virtue of this resolution.

Notwithstanding the provisions of Rule XXV the Majority and Minority Leaders of the Senate are hereby authorized to appoint their members of the committees consistent with this resolution.

Sec. 3 Subject to the authority of the Standing Rules of the Senate, any agreements entered into regarding committee funding and space prior to June 5, 2001, between the Chairman and Ranking member of each committee shall remain in effect, unless modified by subsequent agreement between the Chairman and Ranking member.

Sec. 4 The provisions of this resolution shall cease to be effective, except for Sec. 3, if the ratio in the full Senate on the date of adoption of this resolution changes.

Mr. DASCHLE. Madam President, the resolution we have just adopted is one that provides for the reorganization of the U.S. Senate.

This is a unique time of transition for the Senate, and I understand that it is a difficult time for many of my Republican colleagues.

If there is one thing that supercedes the status of any Senator or any party, it is our desire to do the work we were sent here to do. That, of course, requires getting the Senate organized to do it.

By passing this resolution, our colleagues can retake their rightful places on committees, committees can take action on legislation, and importantly, we can move forward with Presidential nominations.

This organizing resolution is the result of thorough bipartisan negotiations over the last several weeks.

Many people deserve credit. First and foremost, I thank Senator LOTT. Senator LOTT and I have been through many challenges together. Each of those challenges has strengthened our friendship, and our unique relationship, and this is no exception.

I also thank Senators McCONNELL, DOMENICI, GRANN, HATCH, and SPECTER. Their good faith in the negotiating process, and their patience as the process played out, has been instrumental in helping us reach this point.

This resolution provides for a one-seat margin on Senate committees,
which is consistent with Senate precedent.

It clarifies that—subject to the standing rules of the Senate—the agreements on funding and space that were made between chairman and ranking members early in this Congress will remain in effect for the duration of this Congress.

This resolution also makes it clear that all of these provisions will sunset if the ratio in the Senate changes during this Congress.

I especially commend Senator LEAHY. Senator LEAHY, in his typically fair and wise way, played a critical role in solving the most difficult questions we faced in these negotiations: those involving Supreme Court and other Presidential nominees.

Together, he and Senator HATCH were able to find a constructive solution to the way in which we handle “blue slips,” and the way in which we consider nominees to the Supreme Court.

On the subject of blue slips, Senators LEAHY and HATCH have agreed that these forms—traditionally sent to home-state Senators to ask their views on nominees to be U.S. Attorneys, U.S. Marshals, and federal judges—will now be treated as public information.

I share their belief that this new policy of openness will benefit not only the Judiciary Committee, but the Senate as a whole. I also share their hope that this policy will continue in the future, regardless of which party is in the majority.

In the course of our negotiations, a number of our Republican colleagues also raised concerns about how Democrats would deal with potential Supreme Court nominations, should that need arise.

In a letter to Thomas Jefferson, James Madison explained that the Constitution’s Framers considered the Senate to be the great “anchor” of the Government.

For 212 years, that anchor has held steady. The Senate has withstood Civil War and constitutional crises. In each generation, it has been buffeted by the winds and tides of political and social change.

Today I believe we are proving that this great anchor of democracy can withstand the forces of unprecedented internal changes as well.

I am confident that this resolution is the right way to keep the Senate working. I am appreciative of the support given by my colleagues today as we now adopt it.

If I may, I will say one other thing about this particular resolution. There is a member of my staff whose name is Mark Childress; our colleagues know him for many good reasons, as I am to all of my staff. But no one deserves more credit and more praise for the job done in reaching this successful conclusion than Mark Childress. Publicly, I acknowledge his contribution, his incredible work and effort. I thank him from the bottom of my heart for what he has done to make this possible.

Mr. LOTT. Madam President, I ask unanimous consent to insert in the RECORD a memo from the Congressional Reference Service. As this memo makes clear, the Senate has a long record of allowing the Supreme Court nominees of the President to be given a vote on the floor of the Senate. No matter what the vote in committee on a Supreme Court nominee, it is the precedent of the Senate that the individual nominated is given a vote by the whole Senate.

The letter inserted in the RECORD as a part of the agreement accompanying the organization resolution refers to the “traditional” practice of reporting Supreme Court nominees for a vote on the floor. This memo from CRS shows that since 1881, there is only one case where the nominee was not given a floor vote. In that case, there was no opening on the Court for the nominee to fill and thus the nominee was withdrawn. So this precedent is even purer than the “99 and 44/100ths” soap test.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL RESEARCH SERVICE

Senate Consideration of Supreme Court Nominations prior to 1880

Hon. TRENT LOTT,
Senate Republican Leader.

This memorandum is in response to your request, made during our telephone conversation earlier today, for a short written answer to the specific question, “Is it the case that since 1880 all Supreme Court nominations, irrespective of Judiciary Committee recommendation, have received consideration by, and a vote of, the full Senate?”

Research by CRS has found that from President James A. Garfield’s nomination of Stanley Matthews on to the present, every person nominated to the Supreme Court except one has received Senate consideration and a vote on his or her nomination. Nonetheless, it should be noted, during the time frame of 1880 to the present, there have also been two other instances, besides the already mentioned exception, in which Supreme Court nominations failed to receive consideration; in both cases, however, the individuals in question were re-nominated shortly thereafter, with one receiving Senate confirmation and the other Senate rejection.

The one instance when the Senate did not consider and vote on an individual nomination was a Supreme Court Justice involved President Lyndon B. Johnson’s nomination of federal appellate judge Homer Thornberry in 1968. Judge Thornberry was nominated to be an associate justice of the Supreme Court on June 26, 1968, the same day on which President Johnson nominated then-Associate Justice Abe Fortas to be Chief Justice. Judge Thornberry’s nomination to the Associate Justice vacancy that was to be created upon Justice Fortas’s confirmation as Chief Justice. However, after being favorably reported by the Judiciary Committee, the Fortas nomination failed to gain Senate confirmation. On October 1, 1968, the fourth day of Senate consideration of the Fortas nomination, motion to call the nomination failed by a 45–43 vote. Three days later, on October 4, 1968, President Johnson withdrew both the Fortas and Thornberry nominations.

Prior to Senate action on the Fortas nomination, the Judiciary Committee held hearings simultaneously on Fortas and Thornberry, but upon conclusion of the hearings released only one nomination. One detailed history of the Fortas nomination reported that it was apparent “that the committee would take no action on Thornberry until the Fortas nomination was settled.”

As noted in the second paragraph of this memorandum, there also have been two instances in which Supreme Court nominations failed to receive Senate consideration, only to be followed by the individuals in question being re-nominated shortly thereafter and then receiving Senate consideration. The earlier of these instances involved President Rutherford B. Hayes’s nomination of Stanley Matthews on January 26, 1881 in the final days of the 46th Congress. According to one historical account, the nomination did not enjoy majority support in the Senate Judiciary Committee and was not reported out by the Committee or considered by the full Senate before the end of the Congress. However, Matthews was renominated by Hayes’s successor, President Garfield, on March 14, 1881. Although the second nomination was reported with an adverse recommendation by the Judiciary Committee, it was considered by the full Senate and confirmed on May 12, 1881.

A second instance in which a Supreme Court nomination failed to receive Senate consideration, only to have the individual in question be re-nominated, involved Grover Cleveland’s nomination of William Hornblower in 1893. Hornblower was first nominated on September 19, 1893, with no record
of any Judiciary Committee action or Senate consideration of the nomination indicated in Journal of the Executive Proceedings of the Senate volume for that (the 53rd) Congress. Hornblower was re-nominated by President Cleveland on December 6, 1893. After his second nomination was reported adversely by the Judiciary Committee on January 8, 1894, Hornblower was rejected by the Senate on January 15, 1894 by a 24-30 vote.

I trust the above information is responsive to your request. If I may be of further assistance please contact me at 7-7162.

Specialist in American National Government

CHANGING THE NAME OF THE COMMITTEE ON SMALL BUSINESS TO “COMMITTEE ON SMALL BUSINESS AND ENTREPRENEURSHIP”

Mr. DASCHLE. Madam President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 123, submitted earlier today by Senators KERRY and BOND.

The PRESIDING OFFICER. The Clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 123) amending the Standing Rules of the Senate to change the name of the Committee on Small Business to the “Committee on Small Business and Entrepreneurship.”

There being no objection, the Senate proceeded to consider the resolution.

Mr. KERRY. Madam President, I would like to take a few minutes to explain the historic importance of the Resolution I am putting forward with Senator BOND to change the name of the Senate Committee on Small Business to the Senate Committee on Small Business and Entrepreneurship. This is the first piece of legislation I am putting forward as the new Chairman of the Small Business Committee. I am pleased that it is a bipartisan Resolution, continuing the tradition of the Committee.

I would like to thank Senator BOND for cosponsoring this Resolution, and the Majority Leader and Republican Leader for their cooperation and support in bringing it to the floor of the Senate so quickly.

As many of my colleagues may know, the needs and circumstances of today’s entrepreneurial companies differ from those of traditional small businesses. For instance, entrepreneurial companies are much more likely to depend on investment capital rather than loan capital. Additionally, although they represent less than five percent of all businesses, entrepreneurial companies create a substantial number of all new jobs and are responsible for developing a significant portion of technological innovations, both of which have substantial benefits for our economy.

Taken together, an unshakable determination to grow and improved productivity lie at the heart of what distinguishes fast growth or entrepreneurial companies from more traditional, albeit successful, small businesses. Early on, it is critical to someone to distinguish a small business from an entrepreneurial company. Only when a company starts to grow fast and make fundamental changes in a market do the differences come into play. Policies that support entrepreneurship become critical during this phase of the business cycle.

Our public policies can only play a significant role during this critical phase if we understand the needs of entrepreneurial companies and are prepared to respond appropriately.

I believe that adding “Entrepreneurship” to the Committee on Small Business’s name will more accurately reflect the Committee’s valuable role in helping to foster and promote economic development and entrepreneurial companies and the spirit of entrepreneurship in the United States.

I urge my colleagues to support this Resolution. Thank you.

Mr. DASCHLE. Madam President, I ask unanimous consent that the resolution be agreed to, the motion to reconsider be laid upon the table, that any statements relating thereto be printed in the Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 123) was agreed to.

The (resolution is located in today’s RECORD under “Statements on Submitted Resolutions.”)

COMPLIMENTING SENATORS

Mr. DASCHLE. Madam President, let me just say this before I make my final comments. Senator KENNEDY is on the floor today. I talked to him a couple of weeks ago as we completed our work on the education bill, a historic and landmark piece of legislation, and I am grateful to him for his extraordinary contribution to that bill.

So on behalf of all of our caucus, I daresay on behalf of the Senate, I thank Senator KENNEDY, our chairman, for the role he has played.

I also acknowledge and thank our colleague from North Carolina, Senator JOHN EDWARDS. Senator EDWARDS has done a remarkable job. In a very short period of time, he has demonstrated his capabilities for senatorial leadership. He came to the Senate without the experience of public service, but in a very brief period of time he has demonstrated his enormous ability to adapt to the Senate and elevate himself to a true leader. I am grateful to him for his extraordinary contribution to this bill.

Let me also thank Senator JOHN MCCAIN. This bill is truly bipartisan in many ways, but it is personified in that bipartisanship with the role played by Senator MCCAIN, not unlike other bills in which he has participated. I will mention especially the campaign finance reform bill.

Senator MCCAIN has been the key in bringing about the bipartisan consensus that we reached again today. On a vote of 59-36, we showed the bipartisanship that can be displayed even as we take on these critical and difficult issues. That would not have been possible were it not for his effort.

Let me thank, as well, Senator JUDD GREGG and many of our colleagues on the Republican side for their participation. They fought a hard fight; they made a good case; they argued their amendments extremely well; and they were prepared to bring this debate to closure tonight. I am grateful to them for their willingness to do so.

Finally, I thank Senator HARRY REID. He wasn’t officially a part of the committee, but Senator REID has made a contribution once again to this bill, as he has on so many other bills, that cannot be replicated. What did not happen were it not for his remarkable—and I would say incredible—efforts on the Senate floor each and every day. He is a dear friend. He is someone unlike anyone I think we have seen in recent times. He cares deeply for this body and has worked diligently to bring about a successful conclusion to this bill. We thank him.

Having thanked our colleagues, let me also thank our staff—our floor staff, my personal staff, the leadership staff, the staff of the committee. Were it not for them, we simply could not have done our work. I am extraordinary grateful to them as well.

ORDERS FOR MONDAY, JULY 9, 2001

Mr. DASCHLE. Madam President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 12 noon, Monday, July 9. I further ask consent that on Monday, July 9, immediately following the prayer and the pledge, the
Journal of proceedings is approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and there be a period for morning business until 1 p.m., with Senators permitted to speak for up to 10 minutes each, with the following exceptions: Senator DURBIN, or his designee, from 12 to 12:30 p.m.; Senator THOMAS, or his designee, 12:30 p.m. to 1 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PRINTING OF S. 1052
Mr. DASCHLE, Madam President, I ask unanimous consent that S. 1052, as passed by the Senate, be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT
Mr. DASCHLE, Madam President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the provisions of H. Con. Res. 176, following the conclusion of the remarks of Senator Kennedy.

The PRESIDING OFFICER. Without objection, it is so ordered.

The distinguished senior Senator from Massachusetts.

PASSAGE OF THE BIPARTISAN PATIENT PROTECTION ACT
Mr. KENNEDY. Madam President, I want to take a brief moment to thank some very special people who were absolutely instrumental in bringing us to the point of the passage of the legislation which gives so much hope—and should give so much hope—to millions of American families who now are going to be treated by the doctors in whom they have confidence, by the health care staff from whom they are going to get true recommendations, and not have judgments and decisions overridden by their HMOs. We have not finished the job, but this is a giant step forward.

I want to, as others have done—I feel strongly about it —first thank some special Members of this body. We just heard our leader, Senator DASCHLE. I can remember when Senator DASCHLE was asked after he assumed the leadership role in the majority leader in the Senate, what was going to be his first priority, and he mentioned the Patients’ Bill of Rights. For 5 years—for 5 years—we have waited for this moment this evening. For 5 years we have waited for that short time he has assumed the leadership of the Senate, in a closely divided Senate, he has been able to develop the broad support evidenced in vote after vote, bipartisan in such important public policy areas.

I thank my good friend, JOHN EDWARDS, whose leadership at critical times during this debate and during very important moments was absolutely indispensable and essential. He was extremely effective in his quiet and soft-spoken way, and the strength that is reflected in his great passion on so many of the issues which are in his soul. He has made an enormous difference in making sure we reached this point tonight.

I thank Senator MCCAin. Senator MCCAin, as he has said many times, traveled this country as a Presidential candidate and saw the importance of this legislation. He came back and wanted to know how he could play a role in making sure it came to fruition. He was willing, as he has on so many issues, to take on tough challenges and stay the course, but he has been an absolutely extraordinary leader on this issue, as on many others. It has been a great pleasure to work with him closely on this matter.

As has been mentioned, JOHN EDWARDS has provided extraordinary leadership on this issue. He was indispensable in so many different aspects of the development of the legislation, likely all of which deal with accountability. We know the importance of the relationship between accountability and patient protections in this bill. He was always a steadying force, a strong force, a tireless voice for patients and has made an extraordinary mark on this legislation for which we are grateful. This has been a historic team, and I am grateful for them.

I have great appreciation for HARRY REID. I listened the other evening when my good friend Senator BYRD, mentioned that he had been a deputy leader. He said Senator BYRD was really one of the best. Having been a deputy leader myself many years ago, it truly can be said he is the best I have seen in all the time I have been in the Senate. He is a tireless worker and always there to find common ground.

He has this incredible ability to say no and make you feel good, which is very difficult but challenging at best for any leader, and he does it on a regular basis, repeatedly, and still Members of this body know he is a selfless devotee to this institution and to the issues in which he is involved. He has made such an extraordinary difference in this legislation as well.

I want to thank Senator DASCHLE, and I see chairing tonight my good friend, DEBBIE STABENOW. All of us, as we have been working on this legislation, know this has been such a motivating force in her public life experience. She has been an extraordinary resource and supporter for this legislation. No one in this body cares more deeply about this issue than Senator STABENOW. She reminds us all of that wonderful child, Jessica, of whom she has spoken. She continues to be a presence in this Senate on this issue.

I thank a number of our colleagues who were involved, and I will not be able to mention them all, but I think of Senator SNOWE and Senator BAWIN who worked across the aisle to fashion a very important amendment that helped clarify some important provisions that we had not felt needed further clarification, but they pointed out the reasons for it in a constructive way in working through it.

I thank my friend, Dr. FRIST, who has been the chairman of our Public Health Subcommittee and with whom I have worked on many different issues. We differed on this issue, but we worked closely on many other issues. I have great respect for him.

I thank JUDD GREGG who has been a worthy adversary as well as an ally on different public policy issues this year. I enjoy working with him.

Some Senators I had not expected to be as involved as they have been and yet were enormously helpful are Senator NELSON, Senator LANTORE, Senator LINCOLN, and Senator BAYH. Senator Jeffords spent a lot of time on this issue previously and worked with us and knows the issue carefully.

I have listened to him in small meetings including at the White House with the President, explaining the importance of this legislation enormously effectively as he does. He has been a wonderful help generally. We didn’t always agree on some of these issues, but nonetheless I value both his friendship and his views.

Senator BREAUX has been very much involved with health policy issues and was very involved in this.

Tom HARKIN has been a champion on the Patients’ Bill of Rights from the beginning. He has been there every time we needed a strong voice. He knows this issue. He speaks passionately about it. He understands the significance of the importance not only in the areas of disability protections and health standards and medical necessity, but he also understands the nuances and the standards which were used and how that impacts broad numbers of our populations. He was absolutely invaluable throughout this process.

I thank particularly the staff members. These issues are complex. It is
difficult to always be able to anticipate the interrelationship between these issues. The importance of what we are doing and how it affects other legislation we have passed, what the impact will be with States and local communities, the impact with the business community, consumers, and others. We have been very, very well served across the board by the staff who have worked tirelessly on this issue just as they did on the education issue. There are an incredible number of very capable men and women who have devoted an extraordinary amount of time and effort and who have made an extraordinary mark on this legislation.

I thank all of them: For Senator McCain, Sonya Sotak, Jean Bumpus, Cassandra Wood and Mark Busee; for Senator Edwards, Jeff Lane, Miles Lackey, Kyle Kinner, Hunter Pruett, and Lisa Zeldner. I want to thank the staff of Senator Daschle and Senator Reid, all of the floor staff and the clerks, including Marty Paone, Lula Davis, Gary Myrick, and also in particular Elizabeth Hargrave and Deborah Adler. I thank them very much. Senator Daschle has mentioned Mark Childress and Mark Patterson. They are leaders of a very capable and able team that works very closely with Senator Daschle. They are not only fiercely loyal and committed to him but they are enormous sources of help and assistance to all Members in our caucus. We are all very grateful to all of them. For Senator Gregg, Stephanie Monroe, and Steve Irrigary, and Kim Monk.

Now to my own staff, to whom I am incredibly grateful. No one has worked longer or harder, has been more committed or with greater success in terms of legislative achievement than David Nexon, the head of my health care team. Dave has been an invaluable resource, and I remember very clearly when I interviewed him for the job and asked him to write an essay about health care. I still remember his strong commitment in that essay to universal coverage, comprehensive coverage, quality at a price people can afford. He has never let up on that ideal. It is one of the reasons I admire him so much. I am incredibly grateful to him. I will mention others in no particular order. I thank Michael Myers who is our chief of staff for our whole committee and takes on the broad responsibilities in health, education, and all the matters of that committee. Michael and I go back a long time, initially working together on refugee issues, and he is a master of what he does. He is tireless and effective and helpful in our efforts in that cause. And now, he has been good enough to stay the course with me and has just been an extraordinary leader for our committee. I am grateful to him for his friendship and leadership on the committee.

I thank Jeff Teitz who is a master of many complicated aspects of the bill. If you have a complex issue that needs to be mastered, call Jeff Teitz. Sarah Bianchi has full energy and intelligence and has had a distinguished career in working with former Vice President Gore. She has been a great addition to our team. Jerry Wesevich, I thank him so much for his presence on the Hill, strongly committed to improving our society, and I regret losing him. I know that though he will be involved in making a better community.

Janie Oates is the master of all trades and knows every TRIO program, every program that reaches out to the most needy in our country and society, and has been enormously helpful to me in this endeavor as well. I also thank Stacey Sachs who was here day in and day out and always seemed to have the answer. I remember the debate on the questions on the standard of medical necessity and the points being made about the standard we used in the Federal employers health plan. Stacey knew, yes, that was true but in the appeal provision a different standard was used. She knew the details of it, which was a key point. She is an extraordinary reservoir of good common sense and knowledge.

Jim Manley has been a great help and a good friend and has helped so much in terms of being able to communicate these issues and this whole policy area effectively. Jim has been tireless. Elizabeth Field, Marty Walsh, so many others worked not just here on the floor but outside, as well, in terms of working with various groups and helping to bring what is happening at the grass roots here to the Senate floor. Amelia Dungan and Jackie Gran. I thank David Bowen very much. He is a great master in understanding so much of the new research and what is happening in the outer edges of biomedical research. We had debate on some of those issues, and we will have more later. These are complex ethical issues and questions. Dave is a master of all of them. Beth Cameron and Paul Kim also deserve thanks. Paul joined our staff and has been enormously valuable and helpful, as he was in the House of Representatives.

Thanks also go out to our many dedicated interns, Dan Miano, Madhu Chugh, Tarak Shah, Nina Dutta, Nicole Salazar-Austin, Abby Moncrieff, Eddie Santos, Kent Mitchel, Haris Hardaway, Nirav Shah, Charita Sinha, Les Chun and Wyley Proctor. Their energy and dedication certainly helped us along the way.

I appreciate our Presiding Officer and our Senate staff for their patience this evening while we make sure that the history of tonight will include so many who did so much to make tonight a very important step toward helping our fellow American citizens get better quality health care.

ADJOURNMENT UNTIL MONDAY, JULY 9, 2001

The PRESIDING OFFICER. Under the previous order, the Senate stands in adjournment until 12 noon, Monday, July 9, 2001.

Thereupon, the Senate, at 8:59 p.m., adjourned until Monday, July 9, 2001, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate June 29, 2001:

DEPARTMENT OF THE TREASURY

HARRIETTA HOLSMAN FORE, OF NEVADA, TO BE DIRECTOR, DEPARTMENT OF THE TREASURY FOR A TERM OF FIVE YEARS, VICE JAY JOHNSON, RESIGNED.

IN THE AIR FORCE

IN THE ARMY

THE ABOVE NOMINATION WAS APPROVED SUBJECT TO THE NOMINEE'S COMMITMENT TO RESPOND TO QUESTIONS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.
HONORING THE LATE JIMMIE ICARDO

HON. WILLIAM M. THOMAS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. THOMAS. Mr. Speaker, I am sad to report that Kern County, California lost one of its most prominent and successful farmers when Jimmie Icardo passed away. Few can or will match commitment to his family, his church and to Kern County.

The businesses Jimmie developed are going to be models for young Californians for years to come. He built strong family farm operations that produced quality melons, tomatoes, peppers and other crops. He was active in the oil and gas, banking and real estate industries. Jimmie made his own successes through honest dealings with his neighbors and a tremendous amount of hard work. He was equally committed to his community.

Jimmie Icardo will also be remembered for the tremendous support he has given the California State University at Bakersfield over the years, in particular the University's athletic programs. Jimmie ran barbecues to raise money for athletic scholarships, established a trust to benefit the program and supported the school in other ways. His strong support over several decades helped build CSU Bakersfield into the school it is today. The school's decision to re dedicate its athletic center as the Jimmie and Marjorie Icardo Activities Center is only a start toward acknowledging how hard Jimmie worked over the years to support an important educational resource for Kern County.

Jimmie Icardo was a person you asked for help to get things done. His strengths and sense of commitment to our community are going to be missed by those who now have to measure up to his example.

REMOTE SENSING APPLICATION ACT OF 2001

HON. MARK UDALL
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. UDALL of Colorado. Mr. Speaker, today I am introducing the Remote Sensing Applications Act of 2001. This bill would help communities grow more smartly by giving them powerful informational planning resources to the table.

One new space-age tool is the use of satellites to provide images of the Earth's surface. We now have technology using geospatial data from satellites—that can produce very accurate maps that show information about vegetation, wildlife habitat, flood plains, transportation corridors, soil types, and many other things. Satellite imagery and remote sensing, when combined with Geographic Information System (GIS) and Global Positioning Satellite (GPS) system information, can be invaluable tools for use in such areas as land-use planning, transportation, emergency response planning, and environmental planning. Getting this integrated geospatial data to local communities would give planners important information they could use to avoid problems and help communities grow more smartly.

As a member of the House Science Committee and the Space and Aeronautics Subcommittee, I have learned about the technological opportunities available from federal agency activities and capabilities. The bill I am introducing would establish a program that will demonstrate the effectiveness of the use of integrated geospatial data to other governmental sectors.

The bill would establish in NASA a program of grants for competitively awarded pilot projects to explore the integrated use of geospatial and other geospatial information to address state, local, regional, and tribal agency needs. This proposed legislation would build on and complement an applications program that NASA's Office of Earth Science announced earlier this year. Like NASA's program, the Remote Sensing Applications Act would seek to translate scientific and technical capabilities in Earth science into practical tools to help public and private sector decisionmakers solve practical problems at the state and local levels.

The Remote Sensing Applications Act has the potential to begin to bridge the gap between established and emerging technology solutions and the problems and challenges that state and local communities face regarding growth management and other issues. I look forward to working with Rep. GREENWOOD and other Members of the House to move forward with this important initiative.

IN HONOR OF DOCTOR OFEM AJAH

HON. EDOLPHUS AJAH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. TOWNS. Mr. Speaker, I rise in honor of Doctor Ofem Ajah for his dedication to the field of medicine and health education.

Doctor Ajah, born in Nigeria, was faced with many obstacles throughout his education. Born to peasant farmers, Ofem was required to help on the farm while he attended school. His family was further impoverished and his education interrupted when war broke out in Nigeria. He continued with his secondary education on an academic scholarship. His academic excellence propelled him to the University of Ilorin in Nigeria for both his undergraduate and medical degrees.

Ofem is and always has been involved in community affairs. In high school, he was editor-in-chief of the school magazine. His involvement continued into medical school where he served as Secretary of the Medical Students Union as well as Chief Organizer of the Nigerian Medical Students' Games. After completing his medical degree, Ofem taught mathematics in a high school in Nigeria.

It was only after Ofem finished his medical internship that Ofem immigrated to the United States. As a distinguished physician, Ofem continued his medical training at the Interfaith Medical Center in Brooklyn where he became Chief Resident. Pursuing his inner quest for knowledge, Ofem obtained a specialty in gastroenterology.

For Ofem Ajah, being an accomplished doctor has enabled him to give of his free time. Dr. Ajah regularly donates his time and energy to educating everyone about colon cancer. He is also currently working on his second novel.

Ofem devotes himself to the love of his life, Francine Smalls-Ajah. Together, they have one daughter, Achayen, and two sons, Anijah and Tuniche.

Mr. Speaker, Doctor Ofem Ajah has devoted his life to serving his community through his excellent knowledge of medicine. As such, he is more than worthy of receiving our recognition today. I hope that all of my colleagues will join me in honoring this truly remarkable man.
Susan Chasson’s dedication and perseverance in breaking through the silence of child abuse reminds us that one person’s idea can make all the difference in the world. While it is disappointing that child abuse remains an issue in the 21st Century, Susan Chasson’s vision and endeavors must be commended. She is truly a hero for us all.

THE NURSING CRISIS

HON. DANNY K. DAVIS
OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. DAVIS of Illinois. Mr. Speaker, I rise today to call your attention to a growing crisis—the shortage of nurses in health care facilities. This problem is literally across the nation. Nurses are an absolutely essential component of our health care system—no piece of medical equipment will ever replace the around-the-clock surveillance provided by our Nation’s nurses. There is simply no substitute for the element of humanity that nurses bring to medicine. Therefore, I find it extremely alarming that one in five nurses plans to quit the profession within five years due to unsatisfactory working conditions. By the year 2008, the Bureau of Labor Statistics projects that we will need 450,000 additional registered nurses in order to meet present demands. This projection nears the fact that around that same time, 78 million baby boomers will start becoming eligible for Medicare.

How did we end up in this situation? Imagine for a moment, if you will, that you are one of the millions of young people across the country trying to decide upon a career. Suppose nursing is a profession that sincerely interests you. Would you still be interested upon discovering that nurses can expect to work nights, weekends, and holidays? Would you still be interested after learning that nurses routinely work 16-hour shifts or longer, and can be forced under threat of dismissal to work mandatory overtime? Would you still be interested after realizing that nurses receive lower salaries, less vacation, and less retirement benefits than their classmates who chose other professions? Would you still be interested after finding out that, with the advent of managed care, nurses now have to spend almost as much time scrambling to fill out paperwork as they do caring for patients? Would you still be interested when you learn that the very real possibility exists that you may be the only hospital staff member available to supervise the well-being of an entire floor of critically-ill patients? It doesn’t take a great deal of insight to realize that no matter how passionate your intentions, the disadvantages of the nursing profession have become increasingly prohibitive.

Yet, as bad as the nursing crisis is for nurses, its worst consequences will be felt by patients. Last year, an investigative report by the Chicago Tribune revealed that since 1995, at least 1,720 hospital patients have been accidentally killed, and 9,654 others injured as a result of the actions of registered nurses across the country. Interestingly enough, instead of attacking the Tribune report, nurses applauded it because it proved to the American public what they had known for a long time—our nation’s nursing corps is being stretched too thin, in part due to reckless penny-pinching by managed care companies, and in part due to government underfunding of hospitals.

How bad is the crisis? In the mid-90’s, short-sighted budget cuts, both by the government and by managed care companies, forced many hospitals that were staffed entirely by registered nurses to rely on lesser-trained practical nurses and nurse aides instead. Nurse aides, many of whom are not required to have high school diplomas, now constitute over one-third of nursing staffs in many hospitals. In my hometown of Chicago, the situation is so dire that housekeeping staff hired to clean rooms have been pressed into duty as aides to dispense medicine. Hospitals now routinely order nurses to care for 15 patients or more at a time, almost double the recommended patient load. Overworked nurses are being forced to juggle more tasks than any single person can be expected to handle, and are being asked to do procedures that they haven’t been adequately trained for.

Our nurses have reached the end of their rope. To quote Kim Cloninger, a registered nurse from Illinois: “I wake up every day and hope I don’t kill someone today. Every day I pray: God protect me. Let me make it out of there with my patients alive.” Or perhaps more tellingly, Tricia Hunter, executive director of the California branch of the American Nurses Association states: “I don’t know a nurse who would leave anyone they love in a hospital alone.”

Mr. Speaker, this is the face of nursing today. The nursing profession needs our help. As a profession, nurses have a rich history of doing whatever it takes to provide adequate patient care. Nurses generally don’t make a big fuss over working conditions. The fact that they are tells me that something is seriously wrong with our health care system today. Therefore, I support legislation that recommends upwardly adjustable nurse staffing ratios as a condition of participation in Medicare and Medicaid, and I support legislation banning mandatory overtime. I also support the Patients’ Bill of Rights introduced by Mr. McCaskill, Mr. Edwards, and Mr. Kennedy in the Senate, and by Mr. Ganske and Mr. Dingell in the House because it includes a provision that protects health care professionals from retaliation when they speak out for their patients. Lastly, I support the Nurse Reinvestment Act, H.R. 1436, because it addresses the need to attract more people into the nursing profession. I support all of these measures because if we don’t act to solve our current nursing crisis, we will all pay the price at some point down the line.

IN HONOR OF ANDREW KIM

HON. EDOPHOLUS TOWNS
OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. TOWNS. Mr. Speaker, I rise in honor of Andrew Kim on the occasion of his installation

EXTENSIONS OF REMARKS

HON. BOB BARR
OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. BARR of Georgia. Mr. Speaker, this summer, the City of Emerson will move into a new City Hall facility. In honor of this occasion, I would like to recognize some of the unique historical facts underlying the development of this small and growing town in Bartow County, Georgia.

The history of Emerson, at least for human purposes, begins with its settlement by native Americans. At the time the first European settlers arrived, it was inhabited primarily by Cherokee Indian tribes, whose artifacts still line the shores of the Etowah River. Following its settlement, Emerson began to grow into a community built on nearby rail lines; rich agricultural lands; and near iron, graphite, and gold deposits. During the Civil War, the area in and around Emerson was crossed by numerous military forces as Sherman began his infamous drive toward the sea.

Returning war veterans found their homes near Emerson in desolation. Fortunately, the people had a spirit that could not be conquered. They began working to rebuild their town, and succeeded in having it incorporated in 1889.

That spirit of community and growth continues in Emerson today, as the town continues to expand to accommodate growth near metro Atlanta, while retaining its picturesque small town character. I join the citizens of Emerson in saluting their city as it passes an important milestone and moves into a new City Hall.

CONGRATULATIONS TO SUSAN CHASSON

HON. CHRIS CANNON
OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. CANNON. Mr. Speaker, I would like to congratulate Susan Chasson, a woman of great compassion. This afternoon Ms. Chasson will be awarded the Robert Wood Johnson Foundation Community Leadership Program Award. As a nurse and a victims’ advocate, Ms. Chasson was able to supervise the well-being of an entire floor of critically ill patients. Last year, an investigative report by the Chicago Tribune revealed that since 1995, at least 1,720 hospital patients have been accidentally killed, and 9,654 others injured as a result of the actions of registered nurses across the country. Interestingly enough, instead of attacking the Tribune report, nurses applauded it because it proved to the American public what they had known for a long time—our nation’s nursing corps is being stretched too thin, in part due to reckless penny-pinching by managed care companies, and in part due to government underfunding of hospitals.

IN HONOR OF ANDREW KIM

HON. EDOPHOLUS TOWNS
OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. TOWNS. Mr. Speaker, I rise in honor of Andrew Kim on the occasion of his installation
as president of the almost half million member Korean American Association of Greater New York and the obstacles that he had to overcome to attain such a prestigious position. Mr. Kim has overcome many personal obstacles that others might have stumbled upon. Contracting Polio in his native Republic of South Korea, Mr. Kim was stigmatized and labeled as "unlucky." In fact, Mr. Kim is self-educated because he chose to cut short his formal education as he saw it as a burden to his parents. Mr. Kim was also denied employment because of his disability and therefore found himself with a unique opportunity to found his own electronic repair shop. Mr. Kim, fascinated with America, studied for a test that would allow him to immigrate and have a job.

Mr. Kim is a firm believer in the American dream. America offered Andrew Kim a fresh start away from the cultural attitudes of South Korea. Mr. Kim marked his way up in New York going from job to job. Mr. Kim is also a devoted husband and father. He married his wife Theresa two years after coming to America. Together they have three children.

Mr. Kim's biggest business success has come in the form of his Lisa Page store, a leading cell phone and pager retailer. Working in a diverse neighborhood has encouraged Mr. Kim to learn the numerous languages of his customers, which has led to him being a major community resource. Mr. Kim has donated uniforms for a softball team in his neighborhood and all the kids on the team respect Mr. Kim for his involvement and mentoring. In fact, after they won a trophy, the presented it to Mr. Kim as a token of their appreciation for all that he does in the community.

Mr. Kim has enjoyed growing recognition throughout the community, which has led him to become more involved in the community. He served as president of the Korean American Association of Mid-Queens. He recently found himself in a tough election campaign for president of the Korean American Association of Greater New York, where he was once found himself in a tough election campaign for the Korean American Association of Greater New York, where he was once

Mr. Kim's biggest business success has come in the form of his Lisa Page store, a leading cell phone and pager retailer. In fact, after they won a trophy, the presented it to Mr. Kim as a token of their appreciation for all that he does in the community.

Mr. Kim has enjoyed growing recognition throughout the community, which has led him to become more involved in the community. He served as president of the Korean American Association of Mid-Queens. He recently found himself in a tough election campaign for president of the Korean American Association of Greater New York, where he was once again faced with many of the stigmas that he had left South Korea to escape. Nonetheless, Mr. Kim was able to overcome and win the prestigious post.

Mr. Speaker, Andrew Kim has overcome many obstacles in his life to become the president of a half million-member organization. For these achievements, he is more than worthy of receiving our recognition today as he is awarded a truly hard-earned honor. I hope that all of my colleagues will join me in honoring this truly remarkable man.

RECOGNIZING THE CHIEFTAIN’S MUSEUM, ROME, GEORGIA

HON. BOB BARR
OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. BARR of Georgia. Mr. Speaker, it has been written that “Cherokee tradition held that anywhere three rivers met was holy, and Head of Coosa is just that.” The Oostanaula, Etowah and Coosa Rivers meet in the center of Rome, Georgia, which is noted as one of the top small cities in the country.

A leader in the Cherokee Nation, Chief Ridge chose to settle in the 1800’s with his wife, Susannah, on the banks of the Oostanaula near the point where the three rivers meet. The home was called “the Chief- tain.” Chief Ridge, who had been given the title “Major” by Andrew Jackson, agreed to sign the Treaty of New Echota in 1835 and left his home in Rome a year before “The Trail of Tears.” The museum tells the story of Major Ridge and his son for signing the treaty.

After Major Ridge left his home, “the Chief- tain,” was passed through a number of hands, and eventually was donated to the Junior League of Rome. The museum remains open to the public because of the Chieftains Museum Association, a non-profit organization. Members of the organization continue to search for pieces of history with regard to “the Chieftain” and the Cherokee people.

The museum, built by Monovian and Cherokee craftsmen, is open to the public. A large collection of books on Major Ridge and the Cherokee Nation in Georgia are available at the museum. The period furniture and many artifacts, some found on the site as a result of ar- cheological digs, are on display at the museum. The museum is also aware of the culture of the people who were forced to sacrifice their “Enchanted Land.”

IN MEMORY OF MR. ROBERT L. DILLARD, JR.

HON. RALPH M. HALL
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. HALL of Texas. Mr. Speaker, I rise to pay tribute to an outstanding citizen of the State of Texas, the late Robert L. Dillard, Jr. of Dallas, who died at the end of November, 2000. Mr. Dillard was an active and beloved member of his community—and he will be dearly missed.

Robert was born on September 30, 1913, the son of an independent oilman. He followed in his father’s footsteps as a young man working in the oil fields of Texas to finance his education. His hard work paid off when he received his law degree from Southern Methodist University in 1935 and an LLM from Harvard in 1936. After receiving his degrees, Robert served as Assistant City Attorney for the City of Dallas from 1941-1945. From 1945 until his retirement in 1978, he worked in an executive capacity for Southland Life Insurance Company of Dallas, retiring as Executive Vice President.

Robert volunteered much of his time and talents to many civic endeavors. He served as president of The Board of Education of the Dallas Independent School District from 1961-1962, chairman of the Board of Trustees of Methodist Medical Center, chairman of the National Board of Directors of Camp Fire Girls, chairman of Region 10 Education Service Center, and a member of the Board of Directors of The C.C. Young Retirement Home. He was also active in local and state government and in Highland Park United Methodist Church, where he served as a lay leader and a long-time Sunday School teacher.

A special part of Robert’s life, fifty-six years total, was devoted to membership in the Dallas Scottish Rite of Freemasonry. He was initiated in 1938 into Dallas Lodge No. 760 and held numerous leadership positions within the organization, including being a co-founder of a new Lodge in Dallas, serving as president of the Board of Directors of the Masonic Home and School of Texas and vice-chairman of the Board of Trustees of Texas Scottish Rite Hospital for Children. In 1953 he became a Thirty-Third Degree Inspectors General Honorary, in 1961 was a Grand Master of Masons in Texas, and in 1977 served as the Venerable Master of the Dallas Lodge of Perfection. As the culmination of his lifetime of dedication to the Freemasons, in 1995 Robert became one of only eight men in Texas in the past one hundred years to receive the highest honor the Supreme Council of the Scottish Rite can bestow, the Grand Cross of Honor.

Robert left behind a loving family, including his wonderful wife of 63 years, Dundee, a son, two daughters, 13 grandchildren, and three great grandchildren. He was devoted to his family, his community and his Fraternity of Freemasons—and he leaves behind a legacy of dedication and service that will be remembered by many.

Mr. Speaker, Robert was one of a kind—and we will miss him. As we adjourn today, let us do so in memory of a great American and friend, Mr. Robert L. Dillard, Jr.

IN RECOGNITION OF DANIEL LEVIN

HON. DANNY K. DAVIS
OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. DAVIS of Illinois. Mr. Speaker, I rise today to recognize one of Chicago’s finest citizens, Mr. Daniel Levin, who last week was named the American Jewish Committee’s 2001 Human Rights Medallion Award recipient.

Since 1963, the Human Rights Medallion has been awarded annually to leading Chicago citizens who have stood for the goals that have shaped the American Jewish Committee since it was established in 1906: human rights and equal opportunity for all, and constructive relations between America’s many religious, ethnic and racial communities.

Chairman of The Habitat Company, Dan Levin has been a real estate developer since 1957. He has been active in development and management activities involving in excess of
20,000 residential units, and has been principally responsible for the financing, structuring and equity syndication of the development. In 1987, Dan Levin, with The Habitat Company, was appointed Receiver of The Chicago Housing Authority family housing development program by the U.S. District Court in Chicago. He is also the managing general partner of the East Bank Club, which is considered the finest physical fitness and social facility of its kind in the country.

Dan Levin's first major Chicago development, in partnership with James P. McHugh of McHugh Levin Associates, was South Commons, a 30-acre urban renewal site between 26th and 31st Street on the south side of the City. During his career, he has also developed a wide variety of subsidized and non-subsidized housing including, on the South Side, Quadrangle House and Long Grove House. Dan Levin also developed Wheaton Center, a 28-acre urban renewal development in downtown Wheaton. On Chicago's Gold Coast, he has developed, among other properties, Newberry Plaza, Huron Plaza, Aspen Plaza, Columbus Plaza and the Residences of Cityfront Center.

The largest urban redevelopment in which Dan Levin has been involved is the Presidential Towers complex located on a two square block area in the near west loop constructed in 1983. The land on which Presidential Towers was developed had become a skid row district of deteriorating residential hotels and industrial properties. Presidential Towers was considered to be a major factor in the revitalization of the area.

Dan Levin graduated from the University of Chicago with a B.A. and J.D. degree. He is a member of the Visiting Committee of the University of Chicago School of Public Policy, a Trustee of WTTW, a member of the IIT College of Architecture Board of Overseers, a member of the Board of Trustees for the Jewish Reconstructionist Rabbinical College, a Director of the American Jewish Committee, a Director of the Environmental Law and Policy Center, a Director of the Multi-Family Housing Development Corporation, and is active in other community and professional organizations.

Dan Levin has proven that he is a man to emulate in both business and in public service. He has helped to create homes, jobs and other opportunities for people in need of a helping hand, and he has played a major role in the economic growth and development of Chicago. It is with great pleasure that I commend Dan Levin for his years of service and congratulate him on being named this year's Human Rights Medallion awardee. Mr. Speaker, I ask that you join our colleagues, Dan's friends, his wife Fay and the rest of his family, the American Jewish Committee, and me in recognizing Dan Levin's outstanding and invaluable service to the Chicago community.

In Honor of The Reverend Doctor Glyser G. Beach

HON. EDOLPHUS TOWNS
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. TOWNS. Mr. Speaker, I rise in honor of Reverend Doctor Glyser G. Beach, Senior Pastor of Vanderveer Park United Methodist Church, in recognition of his service to his community.

Reverend Beach is a lifetime learner, always taking on new challenges. He holds an A.A. from Lon Moris College as well as a B.A. and M.A. in Behavioral Science from Scarlett College. Rev. Beach also earned a Masters of Divinity as well as a Doctorate of Ministry from Drew University. He also holds a D.Th from the California Graduate School of Theology in addition to his D.D. from Teamer School of Religion.

His devotion to ministry began while he served in the United States Army. He is the Deputy Chaplain of the 77th Regional Support Command. Graduating Officer Basic and Officer Advance Courses and also the U.S. Army's Command and General Staff College, Dr. Beach holds the rank of L.T.C.

For the last 23 years, Glyser Beach has dedicated himself to the United Methodist Church. He has pastored churches in the Bronx, Queens, Manhattan and Brooklyn. Rev. Beach has special training in many areas including Critical Incident Debriefings, Suicide Awareness and Prevention Counseling, Family Restructuring, Marriage Enrichment, and Youth Counseling.

Rev. Beach's activism is apparent throughout the entire New York area. He was instrumental in electing a fellow pastor to office. He also helps thousands of immigrants become citizens. He was a member of the Board of Directors of Harlem Congregations for Community Improvement, which under his tenure developed over 1000 units of housing. The Reverend also served as the Executive Director of Metropolitan Community Young Adult Training Program, which houses and give guidance to young adults who are homeless, drug free, and in need of higher education. He is actively involved in helping war veterans receive the benefits and services due to them.

Mr. Speaker, Reverend Doctor Glyser G. Beach has devoted his life to serving his community, his church and his people. As such, he is more than worthy of receiving our recognition today. I hope that all of my colleagues will join me in honoring this truly remarkable man.

Recognizing the Honorable Tom Price, M.D.—State Senator, Georgia

HON. BOB BARR
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. BARR of Georgia. Mr. Speaker, it is in doing what is right that a man encounters the essential challenges of life. Oftentimes the most difficult part of this challenge is the perception of what precisely is the "right" thing to do. The Honorable Dr. Tom Price is being honored for having done the right thing respecting the health of others. His service to others has been truly outstanding. He has always shown an intense concern for the physical well being of the people entrusted to his representation and medical practice. Coming from a profession whose traditional oath was to "first do no harm," he has been well-educated according to the principles on which the protection of public health must be grounded. The man who lives for these principles as these is truly honorable and ought to be awarded with the honors and the respect of the people.

Currently in his third term in the Georgia Senate, Dr. Price has made a name for himself by taking on several difficult issues; measures to insure the safety of our childcare centers, to strengthen the prevention of drunk driving, and to provide greater patient choice. Life in a society must be mutually beneficial and comfortable to the citizenry. In order for this life to be possible, the public health must be protected. Dr. Tom Price has made this his primary legislative concern and it is for this that on July 17, 2001 he is to be given the Dr. Nathan Davis Award for Outstanding Government Service by the American Medical Association. I join in saluting Dr. Tom Price for his heroic dedication to the public health of the State of Georgia.

In Honor of Our Emery County Public Lands Council

HON. CHRIS CANNON
OF UTAH
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. CANNON. Mr. Speaker, throughout the prosperous history of this great state, our ancestors valued harmony between community growth and preservation of resources. We are encircled by beautiful landscapes and enjoy the ability to find escape and solace in the vast mountains, meandering rivers, or immense desert lands. Utah's natural beauty and rich resources demand a careful balance between protection and growth of competing interests.

The Emery County Commissioners, along with the citizens of Emery County, responded to the need for a thoughtful, responsible, and cooperative effort in planning wise land management policy within the county. In an effort to provide a forum for all interested parties to voice their concerns and influence policy, an invitation was extended to elected representatives, federal and state land management agencies, county citizens, and individuals representing various recreational land user and environmental groups to establish the Emery County Public Lands Council. Their charge was to find the best possible solution for managing lands within Emery County’s boundaries, while setting aside their differences to become a united and cohesive voice.

The Emery County Public Lands Council soon learned that it agrees on more issues than earlier anticipated. All groups express an earnest aspiration to safeguard the San Rafael Swell. As so ably spoken by County Commissioner Randy Johnson, “Environmentalists share with Emery County a great desire to protect the lands of the San Rafael, but differ philosophically over what kinds of management approaches should be implemented. Each land user possesses a deep commitment to protect the San Rafael Swell and safeguard its matchless and distinctive qualities for posterity. Members of the Council advocate for
local users and work with federal and state agencies to develop a public lands strategy. They contribute to land use planning to guarantee cooperation among these eclectic bodies and Emery County interests.

In our quest for a united effort to safeguard and protect our land for thoughtful use and community stability, I recognize the need for a joint endeavor to accomplish our objectives. I commend the Emery County Public Lands Council for acting as a model for all counties, states, and individuals who desire to preserve our nation’s beautiful natural resources.

IN MEMORY OF HENRY WADE

HON. RALPH M. HALL
OF TEXAS

IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. HALL of Texas. Mr. Speaker, I rise today to pay tribute to a great and legendary District Attorney, the late Henry Wade of Dallas, whose 35-year career brought him national attention for his handling of the murder trial of Jack Ruby and the landmark abortion case Roe v. Wade. Henry passed away on March 1 at the age of 86, leaving a powerful legacy that will be reviewed and remembered as part of our Nation’s history.

It is said that Henry never lost a case he personally prosecuted. He took office in 1951 and compiled one of the Nation’s lowest rates of acquittal. In 1964, Henry led the prosecution of Jack Ruby, who shot to death Lee Harvey Oswald, the man charged with assassinating President Kennedy. Ruby died in prison while awaiting a death sentence. The 1973 Roe v. Wade decision establishing the right to abortion began in Texas when a pregnant woman, identified in court documents as “Jane Roe,” sued Henry for enforcing a state law prohibiting abortion except when necessary to save a woman’s life.

These famous cases will be reviewed by attorneys, the courts, and students of history for years to come. The name, “Henry Wade,” evokes an image of a quintessential Texas prosecuting attorney—a formidable and compelling advocate in the courtroom—whose folksy, country-boy demeanor disguised his keen intellect. Henry was a 1938 graduate of the University of Texas law school with highest honors, an editor of the law review, and a member of the Order of the Coif and Phi Beta Kappa. Throughout his illustrious career, Henry was a role model for countless young prosecuting attorneys—as well as a nemesis for defense lawyers.

Following law school, Henry practiced law, was an FBI special agent in the United States and abroad, and served in the Navy during World War II. After the war, he joined the district attorney’s office in Dallas, becoming chief felony prosecutor before winning election as district attorney. And the rest is history.

During World War II Henry served as a Fighter Director for Navy pilots. At one time he was at the top of the list in “splashes”—the term used for destroyed Japanese planes. Henry and his lifelong friend and fellow Navy officer, Thomas Unis, were inseparable during the War, and they both made a great and successful transition into public civilian life. The late Tom Unis prosecuted with Henry and later was a leading and highly regarded attorney and partner in the Dallas firm, Strasburger, Price, Kelton, Martin and Unis. I was privileged to litigate with both Henry and Tom and served with them at a couple of bases in the Pacific toward the end of World War II. I dearly respected and loved these two guys—and did all who knew them.

Mr. Speaker, Henry was a great and legendary District Attorney, a super American, and a good friend of mine. He will be missed by his children and their families, Michele Brandenberger and husband, Mike; William Kim Wade and wife, Suzanne; Henry Wade, Jr., and wife, Kristin; Wendy Ballew and husband, David; Bari Henson and husband, Dave; and 15 grandchildren. And he will be remembered as we adjourn today, let us do so by paying our last respects to “The Chief,” as he was known around the Dallas courthouse—Henry Wade.

HONORING UNITED STATES NAVAL RESERVE CAPTAIN JAMES W. KELLEY, JR. UPON HIS RETIREMENT

HON. GARY G. MILLER
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. GARY G. MILLER of California. Mr. Speaker, I rise today to commend the achievements of United States Naval Reserve Captain James W. Kelley, Jr. and wish him well upon his retirement.

In August of 1970, a time in which military service was socially unfavorable, Captain Kelley enlisted in the United States Marine Corps. He served with the Sixth Marines in Camp LeJune, North Carolina and the Fourth Marines in the Republic of South Viet Nam. He graduated from Villanova University with a Bachelor of Arts Degree in Political Science in 1975. He also holds a Master of Arts Degree in Criminal Justice from New York University and a Juris Doctorate Degree from Seton Hall School of Law.

In September of 1978, Captain Kelley received his commission as an Ensign in the Judge Advocate Corps. During his active duty military career, Captain Kelley served as a Navy Trial Counsel and a Staff Judge Advocate.

Captain Kelley was released from active duty in January of 1985, and he affiliated with Naval Reserve Intelligence Unit NISRRO 2310. As an intelligence officer, he served with VP94, USS America, US CINCLANT, and Commander Naval Reserve Intelligence Command.

In August of 1987, Captain Kelley was selected as a Canvasser Recruiter Officer, and he reported to Naval Reserve Readiness Center in Houston, Texas. He was later reassigned to the Naval Reserve Recruiting Command Detachment THREE, Dallas, where he served as the Department Head for Enlisted Programs. In September of 1994, he reported to the Bureau of Naval Personnel, as the Branch Head for Total Force Recruiting Policy.

He was then transferred to the Chief of Naval Operations as an Assistant for Manpower Policy. In May of 1997, Captain Kelley was assigned as the Officer in Charge, Naval Reserve Recruiting Command Detachment FIVE, Washington, DC. Last November, he became the Commanding Officer of Naval Reserve Recruiting Command Area FIVE upon the redesignation of Detachment FIVE to area status. This distinguished career has been celebrated with numerous awards, including, but not limited to, the Meritorious Service Medal (three awards), Navy Commendation Medal (two awards), Navy Achievement Medal (two awards), Meritorious Unit Commendation Ribbon (two awards), and the National Defense Service Medal (two awards). Additionally, he is considered to be a Navy Expert Rifleman and Navy Expert Pistol Shot.

Mr. Speaker, I ask that this 107th Congress join Captain Kelley’s wife Judy, and his children, Ryan, John, Kevin, and Megan, as he retires from the United States Naval Reserve.

CONGRATULATIONS, ALEXANDER CHRISTOFIDES

HON. DONALD M. PAYNE
OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. PAYNE of New Jersey. Mr. Speaker, I would like to ask my colleagues here in the U.S. House of Representatives to join me in honoring an outstanding public servant, Mr. Alexander Christofides, who was chosen to receive the Commissioner’s Citation, the Social Security Administration’s highest honor award.

This prestigious award is presented to those select employees who have made exceptional contributions meriting agency-wide recognition. Based on Mr. Christofides’ superior accomplishments and exemplary performance, he was chosen for this high honor. Mr. Christofides was selected based on his outstanding performance as an Operations Supervisor in the Clinton Hill District Office. He won praise for his innovative efforts in regard to service delivery to the customers of his District Office, which resulted in reduced waiting times and speedier claims processing. Furthermore, it was Mr. Christofides’ extraordinary leadership and motivational skills which enabled his entire staff to work together for the public good, in a true spirit of teamwork, towards a shared goal.

Mr. Speaker, Alexander Christofides embodies the finest tradition of government service. We are proud of his dedication to his work, his problem-solving ability and the high standards of excellence he has set in the workplace. Let us take this opportunity to extend our appreciation and congratulations to Mr. Christofides and to wish him continued success. We are indeed fortunate to have a man of his caliber serving in the Social Security Administration.
Mr. GILMAN. Mr. Speaker, I rise today to discuss a moving article from the Washington Post, which I request to be inserted and printed in the Record at the end of my statement.

The article, entitled “The Changing World One Clip at a Time,” by Dita Smith, describes a most unusual, uplifting tribute to the 6 million victims of the Holocaust by a class of Tennessee Eighth-graders and their teachers.

In 1998, the students of Whitwell Middle School, together with two dedicated teachers, Mr. David Smith, and Ms. Sandra Roberts, took it upon themselves to collect 6 million paper clips and turn them into a Memorial Sculpture in commemoration of the victims of the Holocaust. What made the ambitious project even more unique was the fact that it was conceived in a very homogeneous white, Christian town of just 1,600.

In fact, the project didn’t even originate as a project, but rather, an intimate extra-curricular course to educate the predominantly uninformed students about the tragedy of the Holocaust.

This voluntary after-school course had such a profound impact on the small-town students, that they decided to take action. The eighth-graders derived their idea from the Norwegians, who, during World War II, pinned paper clips to their lapels to express solidarity with their fellow Jewish Citizens inspired by this gesture, the students set up their own web page asking for donations of paper clips.

Their initiative quickly caught fire, and what began as a local cause, soon became an international phenomenon.

The students were overwhelmed by the outpouring of all sorts of paper clips from all over the world. They even received a donation from President Clinton.

To date, the students have collected 23 million paper clips, well surpassing their 6 million goal.

For the last leg of the project, the students have determined to find the necessary funding for an authentic German Holocaust era railroad car in which to load and display their paper clips and countless letters.

I have worked closely with Nancy Gallagher, the Educational Director, and Rabbi Justin Schwarz, the religious advisor of the Rockland County Hebrew High School to help them see this project through to completion.

Their task is a daunting one, but judging by the tenacity exhibited by the students, thus far, I have no doubt that they will succeed.

I invite my colleagues to help the Whitwell Middle School realize their noble goal, and in the process, spread their vital message of tolerance and compassion and to remember this devastating, inhumane chapter of world history.
EXTENSIONS OF REMARKS

June 29, 2001

Mr. MCHUGH. Mr. Speaker, as a life-long resident of Northern New York, I have watched the 24th Congressional District thrive as a bustling arena of agricultural production, aluminum processing, automobile parts fabrication, paper-making, tourism and textile manufacturing.

Regrettably, in the last decade or so, the trends have been altered dramatically and the manufacturing sector—which in the Northeast—has diminished considerably. Furthermore, our small family farmers have seen a dramatic decline in the price they receive for their hard-earned production, forcing many of them to abandon their beloved way of life. The statistics, unfortunately, bear this out; earlier this month it was reported that Northern New York continues to have the State's highest unemployment rate. While the unadjusted state-wide unemployment rate was 4 percent and the national rate was 4.1 percent, the rate in the ten counties in my rural Northern and Central New York District ranged as high as 9.1 percent.

Mr. Speaker, we are a proud and independent people who have long relied on our ingenuity and integrity to make our way through life. While we have accomplished

...
much through our resourcefulness, there is more that can, and must, be achieved to return greater goods to what we call "God's country." That is why I rise today to introduce a legislative package of rural economic development initiatives that I believe will create at least the initial incentives to bring new business and industry opportunities—and the attendant job creation—to our rural communities.

First, the use of high-speed Internet access is no longer limited to the wealthy or so-called computer techies. It has fast become a mainstay of everyday life, particularly in the business world. Accordingly, the first measure I am introducing, the Rural America Digital Accessibility Act, contains four incentives to help bridge the digital divide in rural America.

The technology bond initiative would provide a new type of tax incentive to help state and local governments invest in a telecommunications structure and partner with the private sector to expand broadband deployment in their communities, especially underserved rural areas. The broadband expansion grant initiative would provide these bonds by utilizing grants and loan guarantees in underserved rural communities to accelerate private-sector deployment of high-speed connections so that our residents can access the Internet with a local, rather than a long-distance, phone call. The third initiative targets funding for research to increase rural America’s broadband accessibility and make it more cost-effective.

With six four-year universities and colleges and seven-two-year colleges within my District’s boundaries, it only makes good sense for us to tap the expertise of our national educators to assist in our endeavors. Accordingly, the fourth incentive will help small- and medium-sized businesses connect with educational institutions that can provide technological assistance designed to improve the business’ competitiveness and promote economic growth.

Second, to help our farm community, I am introducing the Agricultural Producers Marketing Assistance Act. This measure would establish an Agriculture Innovation Center demonstration basis and provide desperately-needed technical expertise to assist producers in forming producer-owned, value-added endeavors. It would also help level the financial playing field for producers by providing a tax credit for eligible farmers who participate in these activities. In this way, farmers and producer groups can earn more by reaching up the educational marketing chain to capture more of the profits their product generates.

Lastly, but certainly not least, I am introducing the Rural America Job Assistance and Creation Act. This comprehensive measure is designed to address a host of issues that have been identified as problematic for residents and businesses in rural America.

Because many small businesses lack the financial capacity to support the training of highskilled workers, this legislation establishes regional skills alliances to help identify needed skills and develop and implement effective training solutions. It also encourages cooperation between educational institutions and entrepreneurs who have innovative ideas but who cannot afford the legal and consultant fees necessary to convert their concepts into reality.

Another incentive involves an expansion of the work opportunity tax credit to include small businesses located in, and individuals living in, communities experiencing population loss and slow job growth rates such as those found in rural Northern and Central New York. Approximately 100 such communities would be designated, subsidizing some 8,000 jobs in each area.

Mr. Speaker, when employees face layoffs or the shutdown of their place of employment, thereby losing some or all of their family income, the one thing that provides them some small sense of security is severance pay. While this is without a doubt a welcome helping hand in a time of need, unfortunately, this recipients often lose a third of their severance pay to taxes because they are pushed into a higher tax bracket. My legislation excludes from gross income up to $25,000 of any qualified severance payment, limited to payments of $150,000 or less.

When a company that employs 100 or more workers makes the decision that it can no longer stay in business or must reduce its workforce, the Worker Adjustment and Retraining Notification, or WARN, Act requires 60 days advance notice on a pre-established or plant closing. As part of the notification requirement, current law states that notice be served upon, among others, the applicable State dislocated worker unit and the chief elected official of the appropriate unit of local government. I believe we must expand the notification process to include, as well, the appropriate Federal- and State-elected officials, i.e., U.S. Representatives and Senators and State Legislators. The expansion included in my legislation serves two purposes: (1) to alert these officials to the situation and the impact it will have on workers and the community and (2) to provide these officials with the opportunity to assist in determining if State and/or Federal resources are available and can be utilized to prevent closure or layoffs and the loss of employment opportunities. As publicly-elected officials, we have access to many avenues that many laid-off workers and assistance at this troubling and uncertain time.

Mr. Speaker, my Congressional District borders the Canadian Provinces of Ontario and Quebec, and we consider Canadians to be not only our neighbors to the North, but our friends, as well. One valuable benefit of this association is the symbiotic relationship we have nurtured in the area of economic development and job creation. Unfortunately, the current immigration visa procedures for H–1 B professional specialty workers often complicate the employment related Travel of Canadians to the United States and preclude what should be a seamless and unencumbered process. In September 2000, the General Accounting Office reported that Immigration and Naturalization Service decisions about the priority of H–1 B applications in comparison to other types of petitions handled by INS have resulted in delays of several months in processing employers’ requests for H–1 B workers. Delays of this nature mean that businesses across the nation, but particularly in Northern New York's community, are penalized. In my border communities, workers oftentimes travel mere miles to cross the border to provide the skilled labor needed by American companies. In these instances, there appears to be no justification for the onerous delays they face in gaining timely entry into the United States to perform their duties. To streamline the process and eliminate the separate requirement that employers first submit a Labor Condition Application (LCA) to the U.S. Department of Labor for certification and then to the INS along with their petition for H–1 B workers. My legislation corrects this situation. In addition to submitting the LCA to Labor, employers would be required to submit the immigration petition and the LCA simultaneously to INS, which will continue to review and evaluate the information contained on both the LCA and the petition.

Another component of the package I am introducing will give statutory authority to the already-existing National Rural Development Partnership and State Rural Development Councils. The NRDP and its principal organization, the National Rural Development Council, have helped generate local solutions to rural development needs and a specific authorization would help establish a dedicated and predictable funding source for their activities.

Mr. Speaker, the U.S. travel and tourism industry is one of America’s largest employers and my Congressional District is no exception to that statistic. Northern New York State contains some of the most scenic and environmentally-unique lands in the entire nation: The Adirondack Mountains, the St. Lawrence River Valley and Seaway, the Champlain Valley and the Thousand Islands region. Tourism is a critical component of our economy and is universally recognized as a significant contributor to the region’s visibility, economic development, and overall quality of life. But the full potential of the industry remains untapped. Some of the factors that have limited the benefits to be realized from the tourism industry include the vastness of the region, the fragmented and unpredictable funding source for their activities. They have helped generate local solutions to rural development needs and a specific authorization would help establish a dedicated and predictable funding source for their activities.

Mr. Speaker, the U.S. travel and tourism industry is one of America’s largest employers and my Congressional District is no exception to that statistic. Northern New York State contains some of the most scenic and environmentally-unique lands in the entire nation: The Adirondack Mountains, the St. Lawrence River Valley and Seaway, the Champlain Valley and the Thousand Islands region. Tourism is a critical component of our economy and is universally recognized as a significant contributor to the region’s visibility, economic development, and overall quality of life. But the full potential of the industry remains untapped. Some of the factors that have limited the benefits to be realized from the tourism industry include the vastness of the region, the fragmented and unpredictable funding source for their activities.
The Center would fill the critical deficiency we need to play a crucial role in the economic revitalization of Northern New York. The final element of my job creation and assistance legislation mandates the General Accounting Office to examine and report to Congress on how best to address the long-term problems resulting from a lack of infrastructure and a lack of venture capital in rural areas. The study will focus on the need for expanding existing economic development and small business loan/grant programs and will include tourism and agriculture-related projects. The study will help us better identify the problems that presently exist and evaluate how infrastructure, venture capital and federal programs can be better utilized to enhance rural areas.

Mr. Speaker, during the nearly nine years I have been honored and privileged to represent the residents of Northern and Central New York, in the U.S. House of Representatives, I have joined in a wide variety of efforts to help revitalize rural America—from tax relief for individuals and the business community, protection and enhancement of the environment and addressing our energy problems to preserving our health care system, promoting fair international trade and enhancing transportation opportunities.

Most recently, since the start of the 107th Congress in January, I have spearheaded several efforts to help rural America and its citizens. I am involved in legislative initiatives that would assist our communities recover and develop property known as brownfields, and are designed to complement broader, more comprehensive brownfields legislation moving through Congress. The Brownfields Redevelopment Incentives Act provides direct federal funding, loans and loan guarantees, and tax incentives to increase the amount of support available to assess and clean pieces of abandoned, idled, or underused property where expansion, redevelopment, or reuse is complicated by environmental contamination or perceived contamination. I have also joined with several of my House colleagues from New York in introducing the Acid Rain Control Act. By reducing sulfur and nitrogen emissions, the measure would result in more than $60 billion in annual benefits by providing improvements to human health, visibility, aquatic and forest ecosystems, and buildings and cultural structures. At the same time, the EPA estimates costs associated with implementation of the Act to be about $5 billion. I think it is safe to say that this is the kind of cost-effective legislation we strive to achieve, with 12 times the benefits for the costs involved.

A third initiative I introduced earlier this year, the Self-Employed Health Affordability Act, provides for the full deductibility of health insurance costs for the self-employed. Current law provides for 100 percent deductibility in 2003, but we need to make the change immediately in order to bring relief to the many hard-working small business and farm families who must pay their own health insurance premium. Coupled with estate tax reform, rate cuts for small business, reductions and pension improvements, among other tax code changes recently enacted into law, this is another step toward helping our taxpayers keep more of their hard-earned money and decide for themselves how it should be spent.

Mr. Speaker, as stated earlier, my constituents are proud and resourceful. They, too, have continued to take the initiative to help themselves and their communities develop the tools necessary to fulfill our mutual goals.

The economic development package I am introducing today is simply one step, albeit of a more comprehensive nature, that I am taking in a long line of legislative initiatives designed to assist our communities manage the wide-ranging challenges faced by rural America in the 21st century.

### REMEMBERING WAYNE CONNALLY

HON. RALPH M. HALL
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. HALL of Texas. Mr. Speaker, I rise today to recognize the late Texas Senator Wayne Connally, my friend and colleague with whom I served in the Texas State Senate, who died on December 20. Wayne was a member of the famous Connally political family and the brother of the late Governor John Connally and Judge Merrill Connally—and was an esteemed public servant in his own right. Wayne was born and raised in Floresville, Texas, and educated in public schools in Floresville and San Antonio. He attended the University of Texas at Austin before enlisting in the U.S. Army Air Corps during World War II, after which he ranched in his native region. He viewed public service as a tenet of good citizenship and was elected to the Texas House of Representatives in 1964 and elected to the Texas Senate two years later. He represented Senate District 21 from the 59th through the 62nd Texas Legislatures and was honored by his peers as “Governor for a Day” on October 7, 1971. I served with Wayne in the Texas Senate. He was a terrific Senator—eloquent, able, and ready to stand up and fight for his District and the State of Texas. Wayne was also so very capable of friendship, and he was always responsive to anyone in need. Wayne’s over-riding goal was to uphold integrity and responsibility in government. He worked with his brother, Governor Connally, to create the first upper-level higher education institution in Laredo in 1970, the first step toward establishing Texas A&M International University in 1993. A tall, imposing figure who spent his life working as a rancher and a public leader, Wayne embodied the Texas persona—and he leaves behind a legacy of faithful service to the people of his native state that he so loved. He will be missed by his many friends and family, including his children, Wyatt, Pamela and Wesley; four grandchildren; his brother, Merrill Connally; and sister, Blanche Kline. The Texas State Senate introduced a resolution on March 19, Wayne’s birthday, recognizing his many contributions during his years of public service and his devotion to the State of Texas. As the House adjourns today, I ask that my colleagues from Texas and in the Congress join me in also paying tribute to this outstanding American, the late Wayne Connally.

### TRIBUTE TO AUDREY WEST

HON. DONALD M. PAYNE
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. PAYNE. Mr. Speaker, I would like my colleagues here in the U.S. House of Representatives to join me in paying tribute to a very special person, Mrs. Audrey West, who will be honored at a Gala Retirement Celebration on Friday, June 29, 2001 by the Newark Preschool Council, Inc. Board of Directors and Head Start Policy Council for her eleven years of dedicated service.

Audrey West began her Head Start career in September 1990. She has brought a wealth of administrative experience in providing social services and human development strategies to the operational goals of the Newark Preschool Council. Mrs. West’s leadership encompasses a broad vision and wide range of knowledge, expertise, mobilization skills and community strengthening approaches, which were vital to the successful implementation of new programs demonstrating the mission of the Newark Preschool—to prepare our children to enter kindergarten LEARN READY TO READ. As the Executive Director of the Newark Preschool Council, Mrs. West has led an agency that is on the cutting edge of the national movement to develop family advocacy and sound educational beginnings for our children as they begin their successful journeys toward good citizenship. Mrs. West’s accomplishments, role modeling and mentorship certainly serve as an outstanding example of generosity and community involvement.

A native of Trenton, New Jersey, Audrey West received her Bachelor of Arts Degree from Howard University, Washington, D.C. Ms. West holds a Master’s Degree in Public Administration from Rutgers University. She served ten years as the Director of the New Jersey Division of Public Welfare (1968–1978) and ten years as the Deputy Director and Director of the New Jersey Division of Public Welfare in the Department of Health and Human Services (1978–1988). A true pioneer, she was the first African American to serve in these positions. Audrey West was also Special Assistant to the Commissioner in the New Jersey State Department of Personnel (1988–1990).

Mr. Speaker, we in New Jersey are so proud of Mrs. West and it is a pleasure to share her achievements with my colleagues here in the U.S. House of Representatives. Please join me in expressing our congratulations to her for a job well done and our best wishes for continued health and happiness as she begins a new phase of her life.

### TRIBUTE TO ROSANNE BADER

HON. GARY G. MILLER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. GARY G. MILLER of California. Mr. Speaker, I rise to pay tribute and honor the
accomplishments of Rosanne Bader, of Pomona, California. Mrs. Bader is retiring after thirty-two years of dedicated service to the Pomona Unified School District. From her first assignment in 1969, as a teacher at Diamond Bar Elementary School, to her current position as Principal of Diamond Point Elementary School, Mrs. Bader has demonstrated outstanding teaching skills, supervisory expertise, and leadership in the development of innovative educational programs. She was the Teacher of the Year nominee in 1979 and 1980.

Numerous, well deserved honors, have been awarded to Mrs. Bader for her involvement in professional, civic and youth organizations. Mrs. Bader was recently appointed to Mount San Antonio Community College’s Board of Directors.

Mrs. Bader’s impressive record of academic, career and community service has earned the admiration and respect of those who have had the privilege of working with her. I ask that this 107th Congress join me to congratulate her on her accomplishments and thank her for her service to her community.

REVEREND VIRGINIA C. HOCH’S MEMORIAL DAY TRIBUTE

HON. BENJAMIN A. GILMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. GILMAN. Mr. Speaker, I rise today to share the insights of a post-modern preacher and a veteran, Reverend Virginia C. Hoch, concerning Memorial Day patriotism. In order to share Rev. Hoch’s thoughts with my colleagues, I request that her remarks be inserted and printed in the RECORD at the end of my statement.

Reverend Hoch delivered this moving tribute for the Memorial Day Observance in the Goshen, NY, United Methodist Church, on May 28, 2001, on the eloquent words of the proper way to commemorate Memorial Day. Rev. Hoch contrasted, what she termed, “Pathetic Patriotism” with “Prophetic Patriotism.” The former, she described as exhibiting only the pathos of war and elevating the gore of the battlefield to idolatrous levels. The latter, she explained as working for a vision of the nation which embraces the achievements, the potentials, and diversities of our inhabitants, and in which the fortunate share their blessings with those whose lives seem unblemished.

Reverend Hoch, in her sermon, discussed her own personal, familial anecdotes. She spoke of her father’s experiences as a B-17 pilot in the then U.S. Army Air Corps, and his numerous military honors, including the Air Medal, the Theatre Medal, and the Distinguished Flying Cross. However, she noted how he gave up his career in the Air Corps when he broke formation to save the lives of his crew due to the failure of his aircraft’s oxygen system. Reverend Hoch brands this action as a form of “Prophetic Patriotism,” not because he disobeyed an order, but because he put the lives of others over his own.

Reverend Hoch also shared the lessons she gained as a flight nurse in the U.S. Air Force during the Vietnam Conflict. Having witnessed first-hand the horrors of battle, she passionately deplored the glorification of war, and the tendency to desensitize ourselves to human casualty.

Reverend Hoch’s underlying message is an important one. She challenged her congregation to substitute wisdom for weapons, choose diplomacy over deployment, and to predispose peace over power. She noted, by any means, forgetting the sacrifices of our countrymen, but rather, judging and questioning decisions to engage in war. Rev. Hoch makes a crucial observation which often falls by the wayside in our Memorial Day commemorations. Accordingly I invite my colleagues to consider this powerful message in Memorial Days to come.

PATHETIC PATRIOTISM OR PROPHETIC PATRIOTISM? (Memorial Day Observance, Goshen, May 28, 2001, Rev. Virginia C. Hoch)

Today, we gather amid the pageantry, parades, and penances to recognize and remember those persons who have given their measures of devotion to protecting our national interests, the greatness of which is the right of every American to live in freedom. Yet we do not honor them nor commemostrate if the sole patriotism we portray is pathetic patriotism. We only bring their and our sacrifices into full bloom when the proper patriotism we put forth is prophetic patriotism.

To be patriotic in our patriotism is to exhibit only the pathos of war—those sentiments which long for the comradery of wars of yesteryear, and which elevate the gore of the battlefield to idolatrous stry. While it may be understandable that some may seek the regular companionship and commemoration of only those like mind and experience, the pathos of living only in past glories is to deny the truth of that for which they once fought: for the people of our country, and indeed for the people of all the people of all the world—a people of all callings, a people of all places, a people in the leisure of a lasting peace.

Rather, we are to work, pray, and long for a prophetic patriotism: a vision of our nation which accepts the wonderful achievements, the potentials, and diversities of the peoples of America as a foundation for sharing our blessings with those whose lives seem unblemished by any Divine Being, and sharing our strengths with those whom weaknesses in governmental structure and in personal living are so evident that they live on the margins of existence. It is this kind of patri- otism to which all of our celebrations ought to point.

Two years ago, Mayor Mathews told of her uncle’s struggles and triumphs in a war once fought. Today, I’d like to tell you about my first hero—my Dad.

My father was a decorated B-17 pilot in the then US Army Air Corps, receiving the Air Medal, the Theatre Medal, and the Distinguished Flying Cross. He was a lieutenant, stationed with the 309th Bombardier Group of the 8th Air Force in Thurling, England. We flew 35 missions, returning one time with a 69 shrapnel hole in his craft. His flight log is replete with the stuff that makes the hair stand on end and the heart leap for joy, but also with humor. On one occasion, they dropped un-used payloads into the English Channel, straddling the bombbay and shaking bombs, the objective of the drop was the dieting of the local population. On another, Dad missed a mission due to a bad sinus infection, and that day his crew was shot down, and the person in his seat was killed. Such is one story I have told my mind is the man who my father is, and it is a prime example of prophetic patriotism. On one of the missions, which averaged eight hours in length, when his ‘Flying Fortress’ reached altitude, he realized his oxygen mask was not working in the belly of the airship, and thus half of his crew would not survive the mission. Dad broke formation, returned to base, and saved the lives of his crew. That disobedience cost him his rank, his timely return to the states, and his career in the Air Corps. But it saved the lives of American military men. One of those men, the only one besides my father who still survives, is Father Ken Ross, a former POW, who is now a Catholic priest in East Chester, NY. My Dad lived to save lives, not to destroy them. That is a brand of prophetic patriotism that I commend, not because he disobeyed an order, but because he used his integrity to weigh the costs, and found that he could only choose life for his crew over his own ease and good fortune.

What you may not know is that I am also a veteran. Prior to entering the ministry, I served as a flight Nurse in the US Air Force during the so-called Vietnam Conflict. And it is from the perspective of the era that I speak. For Memorial Day is about the sacrifices of men and women of all our nation’s wars, starting with the Revolution. But often, we remember only those associated with wars that were popular with our country. Despite the fact that it took Congress over fifty years to establish a WW II monu- ment, the two World Wars were quite uncontested in America, as people felt the need to protect our growing democracy. As the better parts of the newly-released film “Pearl Harbor” call to mind to what extent of governance was under attack, and there was a sense of urgency among all people in our country to protect and defend our land. But then the picture got fuzzy. With Korea, we were moving to a new concept: the defense of other lands against a growing ideology with which we did not agree—a frightening entity called communism. By the time we entered Viet Nam, our country was divided in its self-image and its ideology. The pathos of patriotism had faded, and the prophetic nature of our national purpose was ever more tenuous. Our women and men went to fight an undeclared war for an undefined purpose. And they returned, not to the hero’s welcome which could have helped to put their gory memories into some sort of higher perspective, but to shame and hiding more met as renegade felons than as revered fellows. And thousands of our brothers, sisters, fathers, mothers, sons, daughters, and friends remained as dead fodder for distant turf—so many undisclosed that MIA became a cause and a banner for decades to come. Four count- less thousands of our Vietnam vets, death upon a foreign shore would have been preferable to the reality of life in a hovel of memory and torment. The pathos of patriot- ism had shown us its worst side, and we were not enthused.

Since Nam we have seen the ‘sterile’ wars in Grenada, the Persian Gulf, and the “War on Terrorism.” We have watched on TV as missiles travelled as if they were blips on a video-game screen, and we have not understood in our souls that these wars were comfort, but they were coarse. We still harbor a patriotism of pathos—that pathetic allegiance which believes that if we are there, then we belong, and all losses are okay. Yet the war is both distant and near, but to many, war still has all the allure of a video arcade to young boys on holiday.

EXTENSIONS OF REMARKS June 29, 2001
I would challenge us on this day of memorializing our war dead, to turn instead to patriotism of prophetic witness. That patriotism says not, “My country right or wrong,” but “my country—what can I do to make it right?” This is more than “America’s values above all else,” but “America’s values balanced by the needs of the peoples of the whole world.” It says not, “Might makes right,” but “Might makes mercy a mandate.” To be prophetically patriotic means to cherish the values of our country, while at the same time seeking to learn from others how their values form a free and life-giving society. It means substituting wisdom for weapons, choosing diplomacy over deployment, preferring peace over power.

Today we can choose either pathetic patriotism or prophetic patriotism. As for me and my house, we choose to honor our heroes by living prophetically patriotic lives, loving America and listening to her voice as one among many in the harmonic choir of a world community. Do we therefore still strive to learn about Bunker Hill, Gettysburg, Pearl Harbor, Okinawa & Hiroshima, Normandy, the 88th parallel, the Ho-Chi-Minh Trail, Baghdad, Chechnia, and other names that live in infamy? Of course we do, for to forget our history is to render ourselves vulnerable to a repetition of errors in judgment that is very costly to our democracy. To forget our history is to relinquish our identity as a people who are willing to sacrifice far more than the high price of a gallon of gas to serve our nation. But do we learn these names to reveal in our self-perceived supremacism over other countries? I think not. We learn, that we might be prophetic in our patriotism, working through the obstacles which confront us, while embracing the opportunities to be a people of vision who see through eyes of red, white, and blue, a world fulfilled in the memory of eternal peace.

BILLY TAYLOR IS "POSITIVELY MILWAUKEE"

HON. THOMAS M. BARRETT
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. BARRETT of Wisconsin. Mr. Speaker, I appreciate the opportunity to share with my colleagues the admiration and respect that I have for my constituent and friend Bill Taylor. On Friday, June 29, 2001, Bill Taylor is retiring from his position as a news anchorman with WTMJ-TV. He will be missed. He has been a genuine leader in our community, and I’m honored to know him.

Bill’s Model career began when he served in the U.S. Army in Saigon, Vietnam, working for the Armed Forces Radio and Television Network. He joined the WTMJ news team in 1972 and is widely respected in his field. He is the personification of dedication and loyalty. His knowledge of Milwaukee and genuine love and concern for his viewers is remarkable.

When providing expansive coverage of breaking news, Bill always has closed his breaking news, Bill always has closed his broadcasts by asking his viewers to “Do Something Positive Today.” His bright outlook on life and contagious optimism inspired TMJ4 to feature him in a segment called “Positively Milwaukee,” where he focuses on people in the Milwaukee area whose actions positively impact the community. Bill has not only inspired others to follow his advice, but he has also practiced what he preaches. He has been a part of the TMJ4 newsroom for nearly 29 years and has had a profound impact on the lives of the people of Milwaukee. Bill Taylor is “Positively Milwaukee.”

Bill has won numerous Milwaukee Press Club awards and American Bar Association certificates. In addition, he received a Regional Emmy nomination for his work on WTMJ-TV. He has set an extremely high standard for those who will follow him in the years to come, and he will be deeply missed both by his peers and his viewers. Please join me in honoring Bill Taylor for his enormous contributions to Milwaukee and wishing him well in the future.

CONGRATULATING JANICE HAHN ON HER SWARING-IN AS COUNCILWOMAN IN THE CITY OF LOS ANGELES

HON. JANE HARMAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Ms. HARMAN. Mr. Speaker, I rise today to congratulate my friend, Janice Hahn, who will be sworn in this weekend as Councilwoman representing the 15th District of the City of Los Angeles. There are few public servants as well suited as Janice to represent this diverse and unique district, much of which just happens to overlap with my own 36th District congressional seat.

A life-long resident of Los Angeles, Janice grew up in a family that honored and respected the notion of public service. Her father, the late Supervisor Kenneth Hahn, brought new meaning to the office of Supervisor. He worked tirelessly for his constituents, and bestowed this ethic to his daughter, who will now represent many of the same constituents as a member of the Los Angeles City Council.

The same ethic was imbued in her brother as well. LA City Attorney Jim Hahn, the incomparable mayor of the city of Los Angeles, will also be sworn in this weekend and I also congratulate him.

Janice ran a race that emphasized her responsiveness to community concerns and her professional experiences tell why. Janice worked as Director of Community Outreach for Western Waste Industries, Vice President for Prudential Securities in Public Finance, and Public Affairs region manager at Southern California Edison. She also served as an elected member of the Los Angeles City Charter Commission and was the Democratic nominee for Congress in 1998, when she waged a hard-fought and honorable campaign to succeed me in the 36th District.

Janice will serve in the outstanding tradition of her father and will continue to make contributions on behalf of her constituents and the city of Los Angeles.

I am honored to join her family and friends in wishing her well in her new elective office.

TRIBUTE TO THE LATE JOHN FERRARO

HON. HENRY A. WAXMAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. WAXMAN. Mr. Speaker, today the Los Angeles City Council Chamber will be dedicated in the name of John Ferraro, a highly respected and beloved City Council member who died on April 17, 2001.

John made a name for himself long before he joined the City Council in 1966. The youngest of eight children, he won an athletic scholarship to the University of Southern California where he played football for the USC Trojans. He was an all-American tackle and played in Rose Bowl games in 1944, 1945, and 1947. He was named to the National Football Foundation Hall of Fame in 1984, 1995, and the Rose Bowl Hall of Fame in 1996. More recently, he was named to the Best College Football Team of the Century by the Los Angeles Times.

After earning a Bachelor of Science Degree in Business Administration, John established a successful insurance brokerage firm in Los Angeles and became active in Democratic politics. In 1966 he was appointed to serve on the Los Angeles City Council after Council member Harold Henry died. He subsequently won nine elections and was serving his thirty-fifth year when he passed away. He served as City Council President longer than anyone in Los Angeles history.

John’s political skills were sharply honed and he made important contributions to the City of Los Angeles, including his crucial role in bringing improvements of the Los Angeles Zoo and drawing the 1984 Olympics and the Democratic National Convention 2000 to Los Angeles.

In addition to serving on the City Council, John served as President of the League of California Cities and Independent Cities Association, and he served on the boards of the National League of Cities, the Museum of Contemporary Art, the Autry Museum of Western Heritage and the Hollywood-Wilshire YMCA.

John’s dedication to public service brought him numerous awards, including the Central City Association’s 2000 Heart of the City Award, the L.A. Headquarters Association’s Asa V. Calvert Hall of Fame in 1974, the USC Hall of Fame in 1995, and the Rose Bowl Hall of Fame in 1996. More recently, he was named to the Best College Football Team of the Century by the Los Angeles Times.

John’s loss has been felt deeply by the residents of Los Angeles and the Council members who were fortunate to serve with him. He never grandstanded. He didn’t expect credit for his accomplishments. He worked quietly and effectively to achieve his goals. He was very simply a decent man and skilled advocate for the people of Los Angeles. The Dedication of the Council Chamber will help keep his memory and the generous contributions he made alive as a model for the future.
ON THE DEATH OF PATRICK B. HARRIS, FORMER STATE LEGISLATOR AND CIVIC LEADER OF ANDERSON, SOUTH CAROLINA

HON. LINDSEY O. GRAHAM OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. GRAHAM. Mr. Speaker, I am saddened to report to the House of Representatives the death of Patrick B. Harris of Anderson, South Carolina. He is survived by his wife of more than 60 years, Elizabeth.

I had the distinct honor of serving with ‘Mr. Pat’ in the South Carolina House of Representatives where he served for more than twenty years. It truly was an honor to serve with him as he was a tireless advocate on behalf of senior citizens and people with mental illness.

Among his numerous accomplishments in public office were the creation of a property-tax homestead exemption for people older than 65, creating a sales tax exemption on prescription drugs for those age 50 and older, making elder abuse a crime, and allowing prescription drugs for those age 50 and older, tax homestead exemption for people older than 60 years, Elizabeth.

With the passing of Pat Harris South Carolina has lost an extraordinary statesman and gentleman. I’m sure other Members of the House join me in sending our condolences to his family and loved ones.

EXTENSIONS OF REMARKS

ON THE PEOPLE’S REPUBLIC OF CHINA’S ROLE IN THE EXECUTION OF PRISONERS AND TRAFFICKING OF THEIR ORGANS

HON. FRANK R. WOLF OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. WOLF. Mr. Speaker, I want to share with you this statement presented before a hearing at the House International Relations Subcommittee for Human Rights and International Operations on June 27, by Wang Guoqi, a physician from the People’s Republic of China. Mr. Wang was a skin and burn specialist at the Paramilitary Police Tianjin General Brigade Hospital. Mr. Wang writes that his work “required me to remove skin and corneas from the corpses of over one hundred executed prisoners, and, on a couple of occasions, victims of intentionally botched executions.”

In a very graphic example, Mr. Wang describes how he harvested the skin off of a man who was still living and breathing.

What kind of government skins alive its own citizens?

I urge our colleagues to read this statement and to keep this egregious abuse of human rights in mind when voting on China’s trade status this year.

TESTIMONY OF WANG GUOQI, FORMER DOCTOR AT A CHINESE PEOPLE’S LIBERATION ARMY HOSPITAL

My name is Wang Guoqi and I am a 38-year-old physician from the People’s Republic of China. In 1981, after standard childhood schooling and graduation, I joined the People’s Liberation Army. By 1984, I was studying medicine at the Paramilitary Police Paramedical School. I received advanced degrees in Surgery and Human Tissue Studies, and consequently became a specialist in the burn victims unit at the Paramilitary Police Tianjin General Brigade Hospital in Tianjin.

My work required me to remove skin and corneas from the corpses of executed prisoners, and, on a couple of occasions, victims of intentionally botched executions. It is with deep regret and remorse for my actions that I stand here today testifying against the practices of organ and tissue sales from death row prisoners.

My involvement in harvesting the skin from prisoners began while performing research on cadavers at the Beijing People’s Liberation Army Surgeons Advanced Studies School, in Beijing’s 304th Hospital. This hospital is directly subordinate to the PLA, and so connections between doctors and officers were very close. In order to secure a corpse from the execution grounds, security officers and court units were given “red envelopes” with cash amounting to anywhere between 200-500 RMB per corpse. Then, after execution, the body would be rushed to the autopsy room rather than the crematorium, and we would extract skin, kidneys, livers, bones, and corneas for research and experimental purposes. I learned the process of preserving skin tissues to burn victims, and skin was subsequently sold to needy burn victims for 10 RMB per square centimeter.

After completing my studies in Beijing, and returning to Tianjin’s Paramilitary Police General Brigade Hospital, I assisted hospital directors Liu Lingfeng and Song Heping in acquiring the necessary equipment to build China’s first skin and tissue storehouse. Soon afterward, I established close ties with Section Chief Xing, a criminal investigator of the Tianjin Higher People’s Court.

Acquiring skin from executed prisoners usually took place around major holidays or during the government’s anti-drug, anti-corruption, and anti-crime campaigns, when prisoners would be executed in groups. Section Chief Xing would notify us of upcoming executions. We would put an order in advance notifying the section that we needed skin. The nine-person section would prepare all necessary equipment and arrive at the Beicang Crematorium in plain clothes with all official license plates on our vehicles replaced with civilian ones. This was done on orders of the criminal investigation section. Before removing the skin, we would cut off the ropes that bound the criminals’ hands and remove their clothing. Each criminal had identification papers in his or her pocket that detailed the executee’s name, residence, age, profession, unit, address, and crime. Nowhere on these papers was there any mention of voluntary organ donation, and clearly the prisoners did not know how their bodies would be used after death.

We had to work quickly in the crematorium, and 10-20 minutes were generally allowed to remove all possible tissue. Whatever remained was passed over to the crematorium workers. Between five and eight times a year, the hospital would send a number of teams to execution sites to harvest skin. Each team could process up to four corpses, and they would take as much as was demanded by both our hospital and fraternal hospitals. Because this system allowed us to treat so many burn victims, our department became the most reputable and profitable department in Tianjin.

Huge profits prompted our hospital to urge other departments to design similar programs. The urology department thus began its program of kidney transplant surgeries. The complexity of the surgery called for a price of $120–150,000 RMB per kidney.

With such high prices, primarily wealthy or high-ranking people were able to buy kidneys. They had the money, and the legal system would be a donor-recipient match. In the first case of kidney transplantation in August, 1990, I accompanied the urology surgeon to the higher court to collect blood samples from four death-row prisoners. The policeman escorting us told the prisoners that we were there to check their health conditions; therefore, the prisoners did not know the purpose for their blood samples or that their organs might be up for sale. Out of the four samplings, one basic and sub-group blood match was found for the recipient, and the prisoner’s kidneys were deemed fit for transplantation.

One, aged 24, was found to have a kidney that was muscled and that died five years after the surgery. Considering the high cost of tissues, the medical staff made an agreement with the patient’s family to use anyone’s kidneys after death to save lives.

With the passing of Pat Harris South Carolina has lost an extraordinary statesman and gentleman. I’m sure other Members of the House join me in sending our condolences to his family and loved ones.
Extensions of Remarks

I hereby expose all these terrible things to the light in the hope that this will help to put an end to this evil practice.

Tribute to the Mount Hope Housing Company, Inc.

Hon. Jose E. Serrano

Of New York

In the House of Representatives

Thursday, June 28, 2001

Mr. SERRANO. Mr. Speaker, I rise today to pay tribute to the Mount Hope Housing Company, Inc. (MHHC) as they celebrate their 15th anniversary today.

The Mount Hope Housing Company, Inc. was formed in 1986 as a part of intense organizing efforts of residents and community groups in the Mount Hope neighborhood in the South Bronx. Focusing first on the pressing need for the availability of affordable housing, Mount Hope completed one of the first housing tax credit projects in the United States in 1986 and to date has rehabilitated over 1,400 housing units. As a result of this intense and comprehensive effort, one in six residents of the Mount Hope neighborhood lives in a building operated by the MHHC.

Since its founding, the MHHC has continued to enhance its abilities and expand its services to the community. In 1994, the MHHC opened a thrift shop. One year later, the Mount Hope Primary Care Center opened. And in 1996, the New Bronx Employment Service was inaugurated, followed by the Neighborhood Housing Service/MHHC Home Maintenance Training Center in 1998. And now MHHC is planning to develop a community center that will house programs for area youth like a Boys and Girls Club, affordable child care and a state of the art center for computer training.

Mr. Speaker, the Mount Hope Housing Company, Inc. is another fine example of a community organization dedicated to empowering Bronx residents and revitalizing the community, using a comprehensive, self-sustaining and long-term approach. Its success reminds all of us of the contributions local organizations have made to improving the lives of citizens in their respective communities.

Mr. Speaker, I ask my colleagues to join me in paying tribute to the Mount Hope Housing Company, Inc. and in wishing them continued success.

Congressional Testimony of David Hoffman

Hon. Mike Thompson

Of California

In the House of Representatives

Thursday, June 28, 2001

Mr. THOMPSON of California. Mr. Speaker, I rise today to request that the testimony given by David Hoffman, President of Internews in Arcata, CA, be submitted into the CONGRESSIONAL RECORD. Mr. Hoffman’s valuable testimony before the House Appropriations Subcommittee on Foreign Operations is as follows:

Electronic media are the most powerful force for social change in the world today. As Americans, we live in a wide-open information age. Media are central to our economy, our culture, our political system and our everyday lives. But in many countries around the world, free media can by no means be taken for granted. In Russia, President Putin has prosecuted Victor Guizensky, whose influential television network has been critical of the government. In Ukraine, Prime Minister Kuchma has been accused of ordering the murder of a dissident journalist. In China, the government selectively censors Internet web sites that challenge the official version of events. In Iran, dozens of newspapers have been banned and their editors thrown in jail. In Zimbabwe, journalists have been beaten and jailed. In Kazakhstan and Azerbaijan, independent television stations have been suppressed.

And of course, former President Milosevic used state media as a propaganda weapon to foment hatred and violence in the Balkans. But with US government funds, Internews and other NGOs were able to provide critical support to independent broadcasters in Serbia that formed the nucleus of opposition to the Milosevic regime. In Serbia and many countries around the world, independent media have been on the front lines in the fight for freedom and democracy. With significant funding from USAID, Internews helped developed 150 independent, non-governmental broadcasters in 23 countries. During the past ten years, we have also trained 16,000 media professionals.

In all these countries we have learned that open media are essential for holding free and fair elections, for exposing corruption and human rights abuses, for allowing the free exchange of ideas, for promoting respect for uncensored news outlets, therefore, should be at the top of our foreign policy agenda.

Second, support for local broadcast media is the most effective means for building...
open, civil societies and healthy market economies in support of democratic ideals. This support needs to be sustained for the long run until stable economies and civil societies are in place.

And third, in the developing world, locally-produced television programs and other media coverage are unparalleled in their potential to effectively educate mass populations about urgent social problems such as HIV/AIDS.

We would urge the committee to give special attention to this last point.

ROLE OF MEDIA IN COMBATING HIV/AIDS IN THE DEVELOPING WORLD

At a time when the incidence of HIV/AIDS has reached catastrophic proportions in Africa, there is an important opportunity to harness the power of local media to reduce the spread of this disease. Over 17 million African children have died of AIDS since the epidemic began in the late 1970s. In at least eight sub-Saharan African nations, infection levels in the general population are 15% or higher. Yet local news coverage of this epidemic is often seriously flawed. African journalists do not usually specialize in one particular area, so their stories on this issue may be shallow and the language they use may inadvertently further stigmatize victims of HIV/AIDS. As a recent Time magazine cover story concluded, "Ignorance is the crucial reason the epidemic has run out of control."

By training local African journalists in how to cover this issue effectively and responsibly, as Internews has done in Russia and Ukraine, we can reduce the ignorance and fear that exacerbate the suffering. One of the biggest challenges of the AIDS pandemic is in reaching young audiences with needed information before they become sexually active. By focusing a media campaign on pre-pubescent African children, we can begin to get ahead of the spread of this deadly virus.

Internews therefore requests that this Committee recommend funding in the amount of $2 million for Internews to implement a media training program to combat the spread of HIV/AIDS in Africa.

As an example of what we know better than most the unequalled power of the media to inform and motivate the public. In Africa and the developing world, nothing is more effective than hearing local people in their own language speak the truth directly in their local dialect. If we can educate those voices about the true nature of the HIV virus, we can begin to change the attitudes and practices that have allowed this disease to run out of control.

WOMEN AND MEDIA IN THE DEVELOPING WORLD

In the developing world, women have a special role to play in changing public health practices and on a wide range of social issues.

In his book Development As Freedom, Nobel Prize winner Amartya Sen illustrates the importance of women in the media. Let us educate the women of women's NGOs to utilize the media to deliver their messages. Let us help start new radio programs that address the needs of women. For example, with a grant from USAID's Office of Transition Initiatives, Internews helped develop the first radio program in Indonesia specifically targeted to a female audience. This type of assistance decried for years by civil rights leaders will have the power to transform the continent. A democratic, open media in Africa is both a moral and a political imperative.

ABOUT INTERNEWS

Internews is an international non-profit organization that reaches open media worldwide. The company fosters independent media in emerging democracies, produces innovative television and radio programming and Internet content, and uses the media to reduce conflict within and between countries.

Internews programs are based on the conviction that vigorous and diverse media form an essential cornerstone of a free and open society. Internews projects currently span the former Soviet Union and Western Europe, the Middle East, Southeast Asia, Africa and the United States.

Formed in 1982, Internews Network, Inc. is a 501(c)(3) organization incorporated in California, with offices in 23 countries worldwide. The organization currently has offices in Armenia, Azerbaijan, Georgia, Kazakhstan, Uzbekistan, Tajikistan, the Kyrgyz Republic, Russia, Ukraine, Belarus, Bosnia-Herzegovina, the Federal Republic of Yugoslavia, Kosovo, France, Belgium, Israel/Palestine, Lebanon, Indonesia, Thailand, Iran, Rwanda, Tanzania, and the United States.

To support independent broadcast media, Internews has done the following (as of 12/31/00):

Since 1992, Internews has trained over 16,000 media professionals in the former Soviet Union, the Balkans, the Middle East, and Indonesia in broadcast journalism and station management.

The organization has worked with over 1500 non-governmental TV and radio stations since 1992.

Internews has also supported the development of 16 independent national television networks linking nongovernmental TV stations in the former Soviet Union, the former Yugoslavia, and the West Bank and Gaza.

Internews has formed or supported 19 national media associations around the world.

In 2000 Internews, working with local producers, created approximately 740 hours of television and radio programming. Internews' original programs reach a potential audience of 308 million viewers and listeners worldwide.

In addition, since 1994 Internews' Open Skies program has selected, acquired, versioned and distributed over 1000 hours of high-quality international documentary programming to independent television broadcasters in the former Soviet Union and the former Yugoslavia.

Just since last year the company has provided over $2 million in television and radio production equipment to nongovernmental media, in the form of grants or no-cost equipment.

Internews is primarily supported by grants. Funders include the US Agency for International Development, the Open Society Institute, the Rockefeller Foundation, the W. Alton Jones Foundation, the Joyce Mertz-Gilmore Foundation, the Corporation for Public Broadcasting, the Miriam and Ira D. Wallach Foundation, the W.K. Kellogg Foundation, and many others. The organization had a budget of $15 million in 2000.
MOTION PICTURE PRODUCTION: TO RUN OR STAY MADE IN THE USA

HON. JOHN CONYERS, JR. OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. CONYERS. Mr. Speaker, I submit that the following article from the Entertainment Law Review, by Pamela Conley Ulrich and Lance Simmons, be placed in the CONGRESSIONAL RECORD.

MOTION PICTURE PRODUCTION: TO RUN OR STAY MADE IN THE U.S.A.

(Pamela Conley Ulrich and Lance Simmons)  

I. INTRODUCTION

Globalization profoundly impacts traditional ways of conducting business, and the entertainment industry is no exception. The result is job loss, decreased income, and decreased tax receipts for states and cities. The issue of preserving the entertainment industry in the United States has received increasing attention in recent years, with the introduction of bipartisan legislation to address the problem of ‘runaway production’—the practice of shooting motion pictures in another country to take advantage of lower labor costs and incentives. This article provides an overview of the history of the entertainment industry in the United States, the factors leading to the transformation of the industry, and the possible solutions to the problem of ‘runaway production.’

II. THE HISTORY OF ‘RUNAWAY PRODUCTION’

Runaway production is not a new phenomenon. In the 1920s, when the United States was the dominant producer of motion pictures, the industry began to lose market share to other countries. The industry responded by establishing production facilities in other countries to take advantage of lower labor costs and incentives. This practice continued into the 1950s, when the United States was still the dominant producer of motion pictures.

In the 1960s, the United States began to lose market share to other countries, particularly Japan and the United Kingdom. The industry responded by establishing production facilities in other countries to take advantage of lower labor costs and incentives. This practice continued into the 1980s, when the United States was no longer the dominant producer of motion pictures.

In the 1990s, the United States began to lose market share to other countries, particularly Japan and the United Kingdom. The industry responded by establishing production facilities in other countries to take advantage of lower labor costs and incentives. This practice continued into the 2000s, when the United States was no longer the dominant producer of motion pictures.

III. CAUSES OF RUNAWAY PRODUCTION

In the Department of Commerce Report, the government delineated factors leading to runaway film and television production. These factors have contributed to the ‘substantial transformation of what was to be a traditional and quintessentially American industry into an increasingly dispersed global industry.’

A. Vertical Integration: Globalization

Vertical integration is defined by the International Monetary Fund as ‘the increasing integration of economies around the world, particularly through trade and financial flows.’ The term refers to the movement of people (labor) and knowledge (technology) across international borders.

Consequently, companies may now produce and distribute their work both domestically and internationally. As a result, the entertainment industry is now more globalized than ever before.

EXTENSIONS OF REMARKS

12609

‘Apart from the fact that thousands of job opportunities [are] lost, all [of the causes of runaway production] are examples of global labor issues, including the dislocation of labor from the United States. . . . The rate of unemployment here is a day we’re unemployed here.’

— Jack L. Daley, Executive Secretary of the Screen Actors Guild (‘‘SAG’’), and actor Charlton Heston also testified before this subcommittee. Daley stated: ‘We examined, within the context of evasion, all the causes [of runaway production] we knew. Included as compelling foreign production were foreign financial subsidies, lack of investment, low wages, and the loss of authenticity.’

‘We proposed consideration of a spread of five or seven years over which tax rebates would be paid on the average, not on the highest, income for those years.’

— An expert testimony was given before the Department of Commerce Report, that analyzed the quantity of motion pictures shot abroad and resulting from the flight of motion pictures outside of the United States. This report was prepared by the United States Department of Commerce.

EXTENSIONS OF REMARKS

June 29, 2001

B. Rising Production and Distribution Costs and Distribution

By the end of the 1990s, studio executives began to alter their business methods. Despite aggressive cost-cutting, layoffs, strategic joint ventures and movement of production facilities abroad, rising production and distribution costs have consumed profits over the last decade. Production costs rose from an average of $25.8 million to $51.5 million. Distribution costs for new feature films more than doubled. In 1990, the average motion picture cost $11.97 million to distribute, and by 1999, this cost rose to $24.53 million. At the same time, profit margins dropped. For example, Disney Studio’s profits decreased from 25 percent in 1987 to 19 percent in 1997, and Viacom’s profits dropped from 13 percent in 1997 to less than 6.5 percent in 1997. Additionally, both Time Warner and News Corporation, parent of Fox, showed declines.

C. Technological Advances

According to the Department of Commerce Report, “[N]ew technologies and tools may well be contributing to the increase in the amount of foreign production of U.S. entertainment programming.” Ten years ago, even if a foreign country had lower labor costs, it would have been prohibitively expensive to transport equipment and qualified technicians to produce a quality picture abroad. However, new technology is defeating that barrier. Everything shot on film can be transferred or scanned into a videotape format; this process creates what is referred to as dailies. However, many foreign production centers are not capable of instantly produce dailies from film. Nevertheless, technological advancement has led to the creation of high definition video, which, like dailies, offers immediate viewing capabilities approximating video. Nevertheless, technological advancement has led to the creation of high definition video, which, like dailies, offers immediate viewing capabilities approximating video.

D. Government Sweeteners

Canada is extremely aggressive in its application of both Federal and provincial subsidies to entice production north of the border. “At the federal level, the Canadian government offers tax credits to compensate for salary and wages, provides funding for equity contributions made to the plans on behalf of workers, and other workers in fields too numerous to mention.” This fiscal loss ripples through the economy affecting peripheral industries. In addition to the direct economic loss discussed above, the Monitor Report calculated an additional $3.6 billion lost in indirect expenditures. Indirect expenditures include real estate, restaurants, clothing and hotel revenues, which are not realized. In addition to these private industry losses, the government lost $1.9 billion in taxes to runaway production. As opposed to the $10.3 billion lost to the foreign production, those figures will be between $13 and $15 billion in 2001.

B. The U.S. Production Drought

“The Monitor Report stated that between 1990 and 1998, U.S. film production growth fell sharply behind the growth occurring in the top U.S. runaway production locations of Canada, Australia and the U.K. It stated that Australia “is growing at 28.4 percent annually in production of United States-U.S.-developed feature films, or more than three times the U.S. growth rate.” Similarly, “Canada is growing at 18.2 percent annually in production of U.S.-developed television projects, more than double the U.S. rate.” During the same period, annual growth rates in the United States were less than 3 percent for feature films, and 2.6 percent for television.”

C. Job Loss

Runaway production also impacts the U.S. labor market. It is estimated there are 200,000 jobs directly involved in production. It is further estimated that 20,000 jobs were lost in 1998 alone due to runaway production. However, these statistics do not fully reflect the impact of economic runaway production on employment. They fail to account for spin-off employment that accompanies film production. It is estimated by the Commerce Department that the ripple effect of secondary and tertiary jobs associated with the industry might easily double or triple the number of jobs dependent upon the industry. Regardless of the magnitude of the economic impact, the Commerce Department acknowledges that at least $18 billion in direct and indirect export revenues and $20 billion in economic activity are generated by the industry annually.

D. Loss of Pension and Health Benefits

Performers and others who work on foreign productions may lose valuable pension and health benefits. As mentioned in the Monitor Report, producers for filming in California, Australia or other countries are unable to negotiate this benefit for work performed in Canada.

B. Cultural Identity

In 1961, Congress was warned that the trend of runaway production was threatened to destroy a valuable “national asset” in the field of worldwide mass communications. As H. O’Neill Shankis, John Lehners and Robert Landis of the Hollywood AFL Film Council testified in 1961, if Hollywood became “obsolete as a production center” and the United States voluntarily surrendered its position in the world market, it would lose the prestige of leadership in the field of worldwide mass communications. As the Cold War is no longer a reason to protect cultural identity, today U.S.-produced pictures are still a conduit through which our values, such as democracy and freedom, are promoted.

V. Solutions

A. The Film California First Program

California remains a leading force in the industry, and last year took a legislative step to remedy the problem of runaway production. It passed a three-year, $45 million program aimed at reimbursing film costs incurred on public property. The Film California First (“FCF”) program is specifically directed toward increasing the state’s competitive edge in attracting and retaining film projects. To accomplish this goal, the legislation provides various subsidies to production companies for filming in California, including offering property leases at below-market rates. This legislation should serve as a model for other states, as they too struggle with an issue of increasing economic importance.

B. Wage-Based Tax Credit

A possible solution could be patterned after a legislative proposal offered, but never advanced, in the 196th Congress. Specifically, this proposal called for a wage-based tax credit for targeted productions and provided: (1) a general business tax credit that would be a dollar-for-dollar offset against any federal income tax liability; (2) a credit cap at twenty-five percent of the first $25,000 in wages and salaries paid to any employee whose work is in connection with a film or television program substantially produced in the United States and (3) availability of credit only to targeted film and television productions with costs of more than $500,000 and less than $10 million.

C. Future Solutions

To rectify the problems of runaway productions, legislation at the local, state and federal levels is paramount. Over the past thirty years, the film industry has expanded beyond California to become a major engine of economic growth in states such as New York, Texas, Florida, Illinois and North Carolina. To achieve effective legislative remedies, it is critical to examine the successful programs implemented by other nations.

Maybe it is the inexorable result of a changing world. Regardless, the proliferation of foreign subsidies for U.S. film production, which is occurring at an increasing rate worldwide, raises troubling questions of fairness, such as democracy and freedom. From a competitive standpoint, it appears as though the deck is no longer a reason to protect cultural identity, today U.S.-produced pictures are still a conduit through which our values, such as democracy and freedom, are promoted.
that provides commensurate benefits in the United States.

It is apparent that a laissez-faire, market-oriented approach to the American worker. Unemployment is extraordinarily high within the creative community, leading to seventy percent of SAG’s 100,000 plus members earning less than $7,500 annually. This economic hardship is exacerbated by runaways. Thus, it is abundantly clear that legislative remedies attempting to more adequately level the playing field must be pursued. Amid encouraging signs that a tax bill of significant consequence is likely to pass Congress in the coming months, it is imperative that the creative community take a proactive position to ensure that the tax bill provides incentives for domestic film production. It must use all resources to secure the concerns presented in the two reports outlined in this Article. Organizations, such as SAG, must work with Congress to develop a proposal that is acceptable in terms of cost and other political considerations.

While it seems unlikely that there is the political will or desire to match the incentives offered by our competitors, it is conceivable to the authors that an effective approach can be designed to substantially close the gap on cost savings without eliminating them. Thus, the approach advocated involves identifying the level where cost savings of filming abroad are minimized so as not to be the determinative location factor. An appropriate level may be in the range of ten percent cost savings versus the twenty-six percent cost savings now common in some European locations.

It is important to note the strategy used to fashion a remedy is just as important as the relief sought. The industry should be willing to approach the tax-writing committee staff with the afore-mentioned concept and work closely with them in designing a legislative remedy. This strategy represents a holistic approach to a global problem. It is important to remember the United States risks losing its economic advantage in a vital industry which carries with it enormous economic consequences. As noted in the Department of Commerce Report:

“If the most rapid growth in the most dynamic area of film production is occurring outside the United States, then employment, infrastructure, and technical skills will also grow more rapidly outside the United States, and the country could lose its competitive edge in important segments of the film industry.”

VI. CONCLUSION

Politics represents the art of the possible. The approach advocated in this Article should find a receptive ear in the halls of Congress if for nothing else than its simplicity. Timing is crucial. Left unchecked, the only continuing runaways production with the attendant of economic costs, lost jobs, and diminished tax revenues at all levels of government. In a time of waning economic growth and warning signs of dwindling surpluses and future economic weakness, including production incentives into any upcoming tax relief is essential to preserving the U.S. workforce in the American entertainment industry.

EXTENSIONS OF REMARKS

PERSONAL EXPLANATION

HON. JAMES H. MALONEY
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. MALONEY of Connecticut. Mr. Speaker, on Tuesday, June 26, 2001, I was unavoidably detained and missed rollocall No. 190. Had I been present, I would have voted No on rollocall vote No. 190.

TRIBUTE TO THE CITY OF MURRIETA, 10TH ANNIVERSARY

HON. KEN CALVERT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. CALVERT. Mr. Speaker, it is with great pleasure today to pay tribute to a wonderful, young city in my district as they prepare to celebrate their 10th Anniversary—Murrieta, California, a “Gem of the Valley.” Murrieta is an expansive valley covered with grasses and dotted with oak trees.

Incorporated as a city in July of 1991 after an overwhelming supportive vote, Murrieta has seen tremendous growth since its small beginnings as a sheep ranch. It was a young Don Juan Murrieta who first recognized the natural beauty and vitality of this California valley and bought 52,000 acres in 1873. As the years passed by, the city saw slow growth and finally a boom when the railroad came through. By 1890, almost 800 people lived in the valley. Unfortunately, by 1935 the city had gone bust like so many western towns whose livelihood depended upon the railroad.

It would not be until 1987, more than fifty years later, that Murrieta Valley would once again come into its own. That year saw explosive growth for this sleepy little town. Totaling only 542 residents in 1970 and little more than 2,250 a decade later it found its population increase by a multiple of eight by 1991, to 20,000 residents, when Murrieta became an incorporated city. This year, as they celebrate their 10th Anniversary it finds itself the home of some 50,000 residents.

As a city and community, Murrieta has thrived with the greater control of its destiny over the last 10 years. That includes providing services from within the community instead of outside, such as police, fire and library systems of its own rather than contracting for these services.

In 10 short years, the City of Murrieta has seen its population and communities grow because of dedication to affordable housing, protecting the natural beauty of the valley, good schools, low crime and clean air. The city adopted its first General Plan after more than 50 public meetings to draft a vision of what the new city would become over the next several decades. The police department was created in 1992, the fire department in 1993 and the library system in 1998. Public services like these are what bind a city together along with the building of parks and recreational facilities and more. In fact, for their incredible progress as a city Murrieta has won numerous awards for innovation and performance.

Mr. Speaker, looking back, the city of Murrieta and its residents can hold their heads high with pride at what their once small town has become in only 10 short years. I wish to extend to them my congratulations as families, community leaders and business leaders gather on this Saturday, June 30th, to celebrate their 10th Anniversary. Congratulations to the “Gem of the Valley!”

PERSECUTION OF THE MONTAGNARD PEOPLES IN VIETNAM

HON. CASS BALLINGER
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. BALLINGER of North Carolina. Mr. Speaker, today I am introducing a resolution concerning the persecution of the Montagnard peoples in Vietnam.

The Montagnards are indigenous peoples of the Central Highlands of Vietnam who have long suffered discrimination and mistreatment at the hands of successive Vietnamese governments. In the 1960’s and 1970’s the Montagnard freedom fighters were the first line in the defense of South Vietnam against invasion from the North, fighting courageously beside members of the Special Forces of the United States Army, suffering disproportionately heavy casualties, and saving the lives of many of their American and Vietnamese comrades in arms. Today the Montagnards are singled out by the Vietnamese government due to their past association with the United States, their strong commitment to their traditional way of life and to their Christian religion.

Due to this persecution, many Montagnards have attempted to flee Vietnam to other countries, including Cambodia. The Royal Government of Cambodia has announced that Montagnards found in Cambodia who express a fear of return to Vietnam will be placed under the protection of the United Nations High Commissioner for Refugees rather then forcibly repatriated to Vietnam. Unfortunately, it appears there is a policy of systematic repatriation of Montagnard asylum seekers to Vietnam by some officials of the central government. There also are credible reports that Vietnamese security forces are operating openly in the Mondulkiri and Ratanakiri provinces of Cambodia to repatriate Montagnards.

My resolution urges the government of Vietnam to allow freedom of religious belief and practice to all Montagnards, return all traditional Montagnard lands that have been confiscated, allow international humanitarian organizations to deliver humanitarian assistance directly to Montagnards in their villages, and to withdraw its security forces from Cambodia and stop hunting down refugees. It also recommends the Royal Government of Cambodia for its official policy of guaranteeing temporary asylum for Montagnards fleeing Vietnam and urges the Cambodian government to take all necessary measures to ensure that all officials and commanders of the local provincial and central governments fully obey the policy of providing temporary asylum. Finally, this resolution has the Department of State make clear to the Government of Vietnam that continued
mistratment of the Montagnard peoples represent a grave threat to the process of normalization of relations between the governments of the United States and Vietnam. I urge my colleagues to join me in supporting the Montagnard peoples of Vietnam by cosponsoring this resolution.

INTRODUCTION OF THE SMALL BUSINESS WELFARE BENEFITS PROTECTION ACT

HON. JERRY WELLER OF ILLINOIS IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. WELLER. Mr. Speaker, today, Representative NEAL (D-MA) and I introduced the Small Business Welfare Benefits Protection Act which deals with Welfare Benefit Plans governed by Section 419A of the Tax Code. The Code currently allows a deduction for contributions to multiple employer welfare benefit plans.

The purpose of this legislation is to provide some clarity to this section of the code in a fashion that protects pension tax law while allowing small businesses to provide important benefits, such as life and health insurance, long term care insurance and severance benefits to their employees. While any employer can utilize Section 419A plans, they allow small business to compete with large employers in attracting and retaining talented staff by enabling them to offer meaningful benefits like the ones I just mentioned.

Section 419A plans are independently trusted and administered ensuring employees that the funds set aside for their benefit are there when they need them most, when a company is facing economic difficulties. This is the right policy and we should do everything in our power to encourage small businesses to protect their employees against the proverbial rainy day.

In terms of clarifying the Code, my legislation would ensure that all full time employees benefit. The allowable deduction would be limited to the cost of the benefit for the year in which the deduction is taken. Finally, the bill would prevent an employer who terminates participation in plan from plundering the assets of the plan at the expense of the rank and file employees.

This legislation will ensure that 419A plans work the way they were intended to by Congress, namely to benefit employees, especially small business employees.

ACKNOWLEDGING ALL THOSE SUFFERING WITH THE DEADLY DISEASE OF HIV/AIDS IN THE CARIBBEAN

HON. CHARLES B. RANGEL OF NEW YORK IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. RANGEL. Mr. Speaker, while we take into account the millions who die each year in Africa from this deadly disease we know as HIV/AIDS, we must also focus our attention on the Caribbean, as the second largest population to become infected with this devastating disease. As the front page of the Washington Post on June 19, 2001, for those who may have missed it, I submit it for the record.

Two-thirds of all those diagnosed with the AIDS virus in the Caribbean are dead within two years. What is even more outrageous is that AIDS is the leading cause of death in the Caribbean for those aged 15 to 45 and the numbers are growing.

About one in every 50 people in the Caribbean, or 2% of the population has AIDS or is infected with HIV, the virus which causes AIDS, more than 4% in the Bahamas, and 13% among urban adults in Haiti.

The UN estimates that there were 9,600 children infected in the Caribbean. Further, the Caribbean Epidemiology Centre (CAREC) as well estimates that the overall child mortality rate will increase 60% by 2010 if treatment is not improved.

Clearly, there is a need not only for the United States government's assistance but also for those major private foundations that provide AIDS money for Africa to also develop programs that will come to the aid of those in the Caribbean.

I proudly commend Congresswoman DONNA CHRISTENSEN and her efforts to raise awareness in the community, as this disease is kept silent. I also commend the government of the Bahamas as being the only country in the region that has offered universal antiretroviral treatment over the last several years.

While we simply take medical services and treatment for granted in this country, as the number of AIDS cases decreases per year in North America and increases in the Caribbean; it is our obligation to help provide assistance to these governments in order for them to provide a simple service to their people, enabling them to live prosperous and healthy lives.

A TRIBUTE TO LT. AUGUSTUS HAMILTON, JR. AND THE MEMBERS OF THE FORCED LANDING ASSOCIATION

HON. JANICE D. SCHAKOWSKY OF ILLINOIS IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Ms. SCHAKOWSKY. Mr. Speaker, today is June 28th. We are only a few days away from the July 4th Independence Day celebrations. As fireworks light up the sky, houses are adorned with crisp flags, and children gaze in wonder at the passing parades, we must not forget the many brave men and women who courageously sacrificed their lives to preserve the freedoms and ideals we all enjoy as Americans.

Throughout our short history, America’s security as a nation has been tested and tried. It is truly wonderful that you have been spared the horrors of war. However, for all those who have known war and have died for the sake of this great country, let it be said that they did not die in vain. The gratitude felt by all Americans and our many allies throughout the world is immeasurable.

Let us extend particular thanks to the veterans of World War II. During World War II, Adolf Hitler and his Nazi regime came alarmingly close to achieving world domination. It is difficult to envision what our world might have looked like had Hitler succeeded but, thanks to the heroism of World War II veterans, we will never have to find out.

I’d now like to share a story about one very special World War II veteran, a man by the name of Augustus Hamilton, Jr., and a remarkable group of people in France who have dedicated themselves to ensuring that the memories of World War II veterans endure. This story was told to me by Mr. Hamilton’s niece, Beth White from Chicago, Illinois, and I want to thank Ms. White for taking the time to contact me.

Augustus Hamilton was born on January 4, 1922. At the age of twenty, he enlisted in the U.S. Army Air Corps the day after Pearl Harbor and quickly advanced to First Lieutenant of the 358th Fighter Group, 355th Squadron. By all accounts, he had always been a family hero—an athlete (amateur golf champion for the state of North Carolina) and football fan (also for the University of North Carolina on a football scholarship), good student, caring brother, and loving son. He was also a new husband and when he went overseas, his wife was pregnant with their child.

Lt. Hamilton served as a fighter pilot in World War II and was awarded an air medal with two oak leaf clusters. According to an excerpt from Thunderbolts over High Halden by Graham J. Hukins, "Lt. Hamilton was last seen diving on a flight of four enemy planes with another four on.

At the time of his death, Lt. Hamilton had never met or seen a photo of his only son, for the baby was born when he was overseas. He had named his fighter plane after his wife and son, "Mrs. Ham/Lil Ham 3rd." Following the crash, two of his family members persisted in denying his death. He had told his family that if he were ever seriously injured in combat, he would not come home due to his injuries, or perhaps had developed amnesia and could not contact them.

In 1993, almost half a century later, the gift of emotional closure was finally given to Lt. Hamilton’s surviving family members by a French man named Jean Luc Grusson and his volunteer organization, Forced Landing Association. In an amazing demonstration of appreciation for the U.S. soldiers who fought in World War II, the members of Forced Landing Association devote themselves to finding each of the more than 150 crash sites reported within a 30 kilometer radius of Tillieres sur Avre, an area of intense air battles because of the close proximity of three German airfields. The Association was established in 1986 and has 11 members who live in France. To date, its members have discovered 30 crash sites, including that of Lt. Hamilton.

M. Grusson uncovered Lt. Hamilton’s plane in 1993. He then spent a full year tracking down Lt. Hamilton’s surviving family members.

EXTENSIONS OF REMARKS

June 29, 2001
to return Lt. Hamilton's dog tags, "wings" (a lapel pin), a belt buckle, and other items. When the Hamilton family asked M. Grusson why he and his associates devote so much time, energy, and personal expense unearthing these crash sites, he replied, "The pilots who gave their lives need to be honored. We owe these men our freedom. They gave us our country. We must honor them." M. Grusson's associate, Jacques Larousse, also shared a personal account of the profound impact American soldiers had on him as a young child. He explained that his mother washed the uniforms of American soldiers during the war to make money. When the Americans would come to their home to retrieve their uniforms, they always brought food and chocolate bars to M. Larousse and his mother. Given the scarcity of the time, the kindness of the Americans and their generous gifts made a lasting impression on M. Larousse.

M. Grusson and M. Larousse continue to reverence these American soldiers as heroes to this very day. In fact, the members of Forced Landing Association are completing individual memorials at the crash sites of both Lt. Hamilton and Edward Blevins, Hamilton's squadron member. These sites will contain photographs and descriptive accounts of these men to commemorate their tremendous service. There will also be a ceremony on July 8th in remembrance of these fallen soldiers.

I applaud the tireless work of M. Grusson and the Forced Landing Association to keep the memory of our veterans illuminated. I hope that on this July 4th holiday, we will not take for granted the countless freedoms we enjoy. Rather, I hope we always remember that such freedoms have been kept alive through the sacrifices of others.

INTRODUCTION OF EDUCATION BILLS

HON. RON PAUL OF TEXAS IN THE HOUSE OF REPRESENTATIVES Thursday, June 28, 2001

Mr. PAUL. Mr. Speaker, I rise to introduce two bills designed to help improve education by reducing taxes on parents, teachers, and all Americans who wish to help improve education. The first bill, the Hope Plus Scholarship Act, extends the HOPE Scholarship tax credit to K–12 education expenses. Under this bill, parents could use the HOPE Scholarship to pay for a rate or reduce school tuition or to offset the cost of home schooling. In addition, under the bill, all Americans could use the Hope Scholarship to make cash or in-kind donations to public schools. Thus, the Hope Scholarship could help working parents finally afford to send their child to a private school, while other parents could take advantage of the Hope credit to help purchase new computers for their children's school.

Mr. Speaker, reducing taxes so that Americans can devote more of their own resources to education is the best way to improve America's schools. This is not just because expanding the HOPE Scholarship bill will increase the funds devoted to education but because, to use a popular buzz word, individuals are more likely than federal bureaucrats to insist that schools be accountable for student performance. When the federal government controls the education dollar, schools will be held accountable for their compliance with bureaucratic paperwork requirements and mandates that have little to do with actual education, or for students performance on a test that may measure little more than test-taking skills or the ability of education bureaucrats to design or score the test so that "no child is left behind," regardless of the child's actual knowledge. Federal rules and regulations also divert valuable resources away from classroom instruction into fulfilling bureaucratic paperwork requirements. The only way to change this system is to restore control of the education dollar to the American people so they can ensure schools meet their demands that children be provided a quality education.

My other bill, the "Professional Educators Tax Relief Act" would provide a one year tax credit to all professional educators, including librarians, counselors, and others involved in implementing or formulating the curriculum. This bill helps equalize the pay gap between educators and other professionals, thus ensuring that quality people will continue to seek out careers in education. Good teaching is the key to a good education, so it is important that Congress raise the salaries of educators by cutting their taxes.

Mr. Speaker, I urge my colleagues to join with me in returning education resources to the American people by cosponsoring my Hope Plus Scholarship Act and my Professional Educators Tax Cut Act.

VIRGIN RIVER DINOSAUR FOOTPRINT PRESERVATION ACT

HON. JAMES V. HANSEN OF UTAH IN THE HOUSE OF REPRESENTATIVES Thursday, June 28, 2001

Mr. HANSEN. Mr. Speaker, it is with pleasure that I rise today to introduce the Virgin River Dinosaur Footprint Preserve Act. This legislation is vital if we hope to preserve some of our nation's most intact and rare pre-Jurassic paleontological discoveries.

In February of 2000, Dr. Sheldon Johnson began development preparations on land adjacent to the Virgin River in southern Utah. After dropping the backhoe and noticing a square to the Virgin River in southern Utah. After dropping the backhoe and noticing a square footprint in the Navajo sandstone, Mr. Johnson picked up the phone. To his utter amazement, there in the stone were dinosaur tracks, taildraggings, and skin imprints of unprecedented quality. These paleontological discoveries are touted by scientists in the field as some of the most amazing ever discovered. The clarity and completeness of the imprints are unparalleled.

Since that time over 140,000 people from all 50 states and at least 54 foreign countries have visited the site. This attention is welcomed by the present owners, but overwhelming at the same time. Over 5,000 people came to visit on Easter weekend alone when only two volunteers were available to help! With current facilities meager at most, this is beginning to cause traffic and congestion problems for the owners and neighbors of the sight, as well as for the city of St. George, Utah.

In addition to the logistical nightmare caused by this discovery, the preservation of these valuable resources is now in jeopardy. The fragile sandstone in which the impressions have been made is susceptible to the heat and wind typical of the southern Utah climate. Rain is nearly catastrophic for these unearthed impressions.

The community and the land owners have come together and have done what they can to help. They have constructed makeshift shelters for the exposed impressions and volunteers have stepped up to help with tours. Even after all of these efforts, they still need help. The community has asked if there is anything Congress can do to help. Since these resources are of value to the entire world, there is a legitimate role for Congress and the Administration. We have discussed the possibility that the area might be worthy of National Monument designation. It is my hope that by introducing this legislation, we will attract the attention of the Administration and protect these irreplaceable resources at the same time.

We must act quickly if these national treasures are to be saved. This bill would authorize the Secretary of the Interior to purchase the land where the footprints and taildraggings are found, then authorize the conveyance of the property to the city of St. George, Utah, which will then work with the property owners and the county to preserve and protect the area and resources in question. The Secretary of the Interior would then enter into a cooperative agreement with the city and provide assistance to help further the protection of the resources.

The American people deserve the chance to see these treasures and the scientific community deserves to be able to study and learn from them as well. Without this legislation, this opportunity might not be possible. Who knows what the cost of inaction might be. I hope my colleagues will support this bill.

CHILD PASSENGER PROTECTION EDUCATION GRANTS EXTENSION ACT

HON. CONSTANCE A. MORELLA OF MARYLAND IN THE HOUSE OF REPRESENTATIVES Wednesday, June 27, 2001

Mrs. MORELLA. Mr. Speaker, I rise in support of H.R. 691 which will extend the Child Passenger Protection Grant Program for an additional two years—making the program consistent with the TEA 21 reauthorization cycle.

Currently, the Child Passenger Protection Grant program authorizes $7.5 million each year for the Secretary of Transportation to make incentive grants to states to encourage the implementation of child passenger protection programs in those states. This program is critical to ensuring that child passenger safety is on the minds of citizens nationwide.

Motor vehicle crashes are the single largest cause of child fatalities in the United States.
Each year more than 1,400 children die as motor vehicle passengers, and an additional 280,000 are injured. Despite these horrifying figures, parents are still allowing their children to ride unrestrained.

More disturbing is the fact that of children who are buckled up, roughly half are restrained incorrectly—increasing the risk of serious or fatal injuries. Tragically, most of these injuries could have been prevented. Car seats are proven life savers, reducing the risk of death by 69 percent for infants and 47 percent for toddlers.

With programs like the Child Passenger Protection Grants, we can prevent these senseless deaths and injuries by increasing awareness in our communities.

In my district, the Drivers’ Appeal for National Awareness (DANA) Foundation has worked tirelessly to increase public awareness for child passenger safety. Joe Colella, from Montgomery, and a hearty “Hi-yo Silver, away!” Foundation in memory of his niece, Dana, who died because of injuries sustained in a crash while riding in a child restraint that was installed with an incompatible system.

Joe deserves great credit for bringing the incompatibility problem to the attention of the National Highway Transportation Safety Administration (NHTSA) and to Congress. Because of the DANA Foundation’s efforts, the nation is now better educated and aware about the proper installation of children’s safety seats in motor vehicles.

Protecting our children is a national issue that deserves national attention. I urge my colleagues; to support H.R. 691, as well as other that deserves national attention. I urge my colleagues to support H.R. 691, as well as other

BROWN v. BOARD OF EDUCATION
50TH ANNIVERSARY COMMISSION

SPEECH OF
HON. CHARLES B. RANGEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. RANGEL. Mr. Speaker, I rise today to raise my colleagues on both sides of the aisle for yesterday’s overwhelming passage of H.R. 2133. This legislation would establish a commission to encourage and provide for commemorating the 50th anniversary of the Supreme Court’s unanimous and landmark 1954 decision in Brown v. Board of Education of Topeka Kansas—the most momentous in the 20th Century.

While the 13th, 14th, and 15th Amendments to the Constitution outlawed slavery, guaranteed rights of citizenship to naturalized citizens and due process, equal protection and voting rights, nearly a century would pass before the last vestiges of “legalized” discrimination and inequality would be effectively revoked. The right of equal protection under the law for African-Americans was dealt a heavy blow with the Supreme Court’s 1875 decision to uphold a lower court in Plessy v. Ferguson. The Plessy decision created the infamous “separate but equal” doctrine that made segregation “constitutional” for almost 80 years.

It was not until the 1950’s, when the NAACP defense team led by the Honorable Thurgood Marshall as general counsel, launched a national campaign to challenge segregation at the elementary school level that effective and lasting change was achieved. In five individually unique cases filed in four states and the District of Columbia, the NAACP defense team not only claimed that segregated schools told Black children they were inferior to White children, but that the “separate but equal” ruling in Plessy violated equal protection. Although all five lost in the lower courts, the U.S. Supreme Court accepted each case in turn, hearing them collectively in what became Brown v. Board of Education. The Brown decision brought a decisive end to segregation and discrimination in our public school systems, and gradually our national, cultural and social consciousness as well.

The fight, however, did not end there. We may have overcome segregation and racism, but now the fight is economic, one in which some of our schools are inferior to others because of inadequate funding, overcrowded classrooms, dilapidated school buildings and a nationwide lack of teachers. We only have to look at the high levels of crime, drug use, juvenile delinquency, teen pregnancy and unemployment to know the value of a good education. If Brown taught us anything, it is that wealth is the foundation of educational tools, young people lose hope for the future.

No one challenges the concept of investing in human capital, but it is a well-known fact that we spend ten times as much to incarcerate than we do to educate. If we can find the resources to fund a tax cut and for a U.S. prison system with nearly 2 million inmates, we can give our public schools the repairs and facilities they desperately need, we can reduce class sizes and provide adequate pay to attract the best and brightest into the teaching profession.

Again, while I applaud yesterday’s passage of H.R. 2133, I urge my colleagues to remember the lessons of Brown v. Board of Education when we consider our national priorities by committing ourselves to addressing the unfulfilled promises of equality and opportunity contained in the Brown decision.

TEAM PROBLEM SOLVERS

HON. JANICE D. SCHAKOWSKY
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Ms. SCHAKOWSKY. Mr. Speaker, recently, we debated ways to improve educational opportunities. I would like to draw my colleagues’ attention to a program that is doing just that.

The Future Problem Solving Program has a significant and positive impact on the education of students in grades 4 through 12. It is part of a nationwide and international effort to teach children and teens creative thinking and problem-solving skills. Problem-solving skills have been proven to be essential characteristics for young people entering the increasingly competitive job market. This non-profit program, which operates in 44 states as well as Australia, New Zealand, Malaysia, Chile, and Canada, teaches young people these important skills.

Students have the opportunity to apply their critical thinking skills to real-world problems such as restoration of imperiled natural habitats and genetic engineering. The program is structured around a six-step model for solving complex problems. The steps include recognizing potential challenges, generating and evaluating solutions and developing a plan for
action. Learning to apply these steps every day increases the ability of students to think critically and work efficiently.

Small teams of young people brainstorm solutions and implementation strategies for issues as varied as tourism, global interdependence, and water use. Students are taught to think not only critically but also creatively. Team Problem Solving, Action-Based Problem Solving, Individual Problem Solving, and Scenario Writing are all components of the program that reward dynamic thinkers. Students who work in small teams also learn the value of cooperation and teamwork. Young people in each of the three age divisions compete on the regional, state, and international levels. The Future Problems Solving Program is preparing the youth of today to face the demands of tomorrow.

I would like to officially recognize the contributions this program has made and will continue to make to society at large. I want to thank the adults who are enhancing the education of today's young people and the student participants who are taking the initiative to learn about and help solve today's difficult issues. These students are taking their futures into their own hands. Keep up the good work!

---

BROWN v. BOARD OF EDUCATION 50TH ANNIVERSARY COMMISSION

SPEECH OF

HON. RON PAUL
OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. PAUL. Mr. Speaker, I am pleased to join my colleagues in encouraging Americans to commemorate the 50th anniversary of Brown v. Board of Education and the end of legal segregation in America. However, I cannot support the legislation before us because it attempts to authorize an unconstitutional expenditure of federal funds for the purpose of establishing a commission to provide federal guidance of celebrations of the anniversary of the Brown decision. This expenditure is neither constitutional nor in the spirit of the brave men and women of the civil rights moment who are deservedly celebrated for standing up to an overbearing government infringing on individual rights.

Mr. Speaker, any authorization of an unconstitutional expenditure of taxpayer funds is an abuse of our authority and undermines the principles of a limited government which respects individual rights. Because I must oppose appropriations not authorized by the enumerated powers of the Constitution, I therefore reject this bill. I continue to believe that the best way to honor the legacy of those who fought to ensure that all Americans can enjoy the blessings of liberty and a government that treats citizens of all races equally is by consistently defending the idea of a limited government whose powers do not exceed those explicitly granted it by the Constitution.

---

EXTENSIONS OF REMARKS
THE OUTFITTER POLICY ACT

HON. JAMES V. HANSEN
OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. HANSEN. Mr. Speaker, I am pleased to introduce, today, the Outfitter Policy Act, which will create a statutory authority for permit terms and conditions across America's public lands.

Millions of Americans recreate on America's public lands every year, and the services Outfitters and guides allow our constituents to access many areas of our public lands that would otherwise be inaccessible. These are families and civic groups learning to enjoy and respect nature, including horse pack trips and float trips, which many of us have enjoyed.

Unfortunately, many of our federal agencies lack legislative guidance on permit administration. Without guidelines, the system is highly discretionary, and often inconsistent, creating confusion for Outfitters and guides, and ultimately reducing opportunities for our constituents to enjoy our public lands. The system established under this bill would eliminate inconsistencies, and would provide incentives for Outfitters to offer consistently high-quality services to all our constituents.

I would like to thank the original co-sponsors of this legislation for their willingness to join me in this effort to assure public lands access for all Americans, especially my good friend from Idaho, Mr. Otter. Without his hard work and dedication, this bill would never have been ready with such speed. This is a bill which appropriately balances public needs with conservation efforts, due in large measure because of his efforts. I thank him, as I thank all the co-sponsors of this bill, and hope that all my colleagues will support us in this effort.

---

MICROBICIDES DEVELOPMENT ACT OF 2001

HON. CONSTANCE A. MORELLA
OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mrs. MORELLA. Mr. Speaker, I rise today to introduce the "Microbicides Development Act of 2001". I am pleased to be joined by many of my good friends and colleagues who have signed on as original co-sponsors to this legislation. My thanks go to them.

Mr. Speaker, this week the United Nations convened a special session of the U.N. General Assembly to address how to combat the spreading HIV/AIDS epidemic. We have entered the third decade in the battle against HIV/AIDS. June 5, 1981 marked the first reported case of AIDS by the Centers for Disease Control. Since that time, over 400,000 people have died in the United States. Globally 21.8 million people have died of AIDS.

Tragically, women now represent the fastest growing group of new HIV infections in the United States and women of color are disproportionately at risk. In the developing world, women now account for more than half of HIV infections and there is growing evidence that the position of women in developing societies will be a critical factor in shaping the course of the AIDS pandemic.

So what can women do? Women need and deserve access to a prevention method that is within their personal control. Women are the only group of people at risk who are expected to protect themselves without any tools to do...
so. We must strengthen women's immediate ability to protect themselves—including providing new woman-controlled technologies. One such technology does exist called microbicides.

The Microbicides Development Act of 2001 which I am introducing, will encourage federal investment for this critical research, with the establishment of programs at the National Institutes of Health (NIH) and the Centers for Disease Control and Prevention. Through the work of the NIH, non-profit research institutions, and the private sector, a number of microbicide products are poised for successful development. But this support is no longer enough for actually getting microbicides through the development “pipeline” and into the hands of the millions who could benefit from them. Microbicides can only be brought to market if the federal government helps support critical safety and efficacy testing.

Health advocates around the world are convinced that microbicides could have a significant impact on HIV/AIDS and sexually transmitted diseases (STDs).

Researchers have identified almost 60 microbicides, topical creams and gels that could be used to prevent the spread of HIV and other STDs such as chlamydia and herpes, but interest in the private sector in microbicides research has been lacking.

According to the Alliance for Microbicide Development, 38 biotech companies, 28 for-profit groups and seven public agencies are investigating microbicides, and Phase III clinical trials have begun on four of the most promising compounds. The studies will evaluate the compounds’ efficacy and acceptability and will include consumer education as part of the compounds’ development. However, it will be at least two years before any compound trials are completed.

Currently, the bulk of funds for microbicide research comes from NIH—nearly $25 million per year—and the Global Microbicide Project, which was established with a $35 million grant from the Bill and Melinda Gates Foundation. However, more money is needed to bring the microbicides to market. Health advocates have asked NIH to increase the current budget for research to $75 million per year.

Mr. Speaker, today, the United States has the highest incidence of STDs in the industrialized world—annually it is estimated that 15.4 million Americans acquired a new STD. STDs cause serious, costly, even deadly conditions for women and their children, including infertility, pregnancy complications, cervical cancer, infant mortality, and higher risk of contracting HIV.

This legislation has the potential to save billions in health care costs. Direct cost to the U.S. economy of STDs and HIV infection, is approximately $8.4 billion. When the indirect costs, such as lost productivity, are included that figure rises to an estimated $20 billion.

With sufficient investment, a microbicide could be available around the world within five years.

I urge my colleagues to lend their support to this vital legislation.
JUNIOR ACHIEVEMENT VOLUNTEER AWARD OF EXCELLENCE WINNER, FRED HAMPTON, ALBUQUERQUE, NM

HON. HEATHER WILSON OF NEW MEXICO
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mrs. WILSON. Mr. Speaker, I rise to speak today about a distinguished member of my district who is being honored by an organization, which has had an immeasurable impact on America. Fred Hampton, a retired AT&T employee, is Junior Achievement’s National Volunteer Award of Excellence recipient this year. He has been a Junior Achievement volunteer for six years. During these six years, he has taught 60 classes and spent countless hours furthering the efforts of this organization.

Since moving to New Mexico, Fred has been involved in making a difference in the education of the area’s students. He regularly volunteers in classes of students with special needs and teaches JA classes in remote locations difficult to reach by others. In addition, his services extended beyond the classroom, as he has helped to recruit bilingual volunteers to teach JA classes in Spanish.

The history of Junior Achievement is a true testament to the indelible human spirit and American ingenuity. Junior Achievement was founded in 1919 by Horace Moses, Theodore Vail, and Senator Murray Crane of Massachusetts, as a collection of small, after-school business clubs for students in Springfield, Massachusetts.

As the rural-to-city exodus of the populace accelerated in the early 1900s, so too did the manufacturing in the nation’s youth an understanding of business, economics, and history. Junior Achievement’s success was recognized by the National Business Hall of Fame in 1975 and continues to strive for excellence not only in his community. He stresses the importance of equality in the workplace and focuses on minority recruiting. Additionally, his service extends beyond the classroom, as he has helped to recruit bilingual volunteers to teach JA classes in Spanish.

In 1940s, leaders of the day such as S. Bayard Colgate, James Cash Penney, Joseph Sprang of Gillette and others helped the organization grow rapidly. Stories of Junior Achievement’s accomplishments and of its students soon appeared in national magazines of the day such as TIME, Young Americans, Colliers, LIFE, the Ladies Home Journal and Liberty.

By 1982, Junior Achievement’s formal curriculum offering had expanded to Applied Economics (now called JA Economics), Project Business, and Business Basics. In 1988, more than one million students per year were estimated to take part in Junior Achievement programs. In the early 1990s, a sequential curriculum for grades K–6 was launched, catalyzing the organization into the classrooms of another one million elementary school students.

Today, through the efforts of more than 100,000 volunteers in the classrooms of America, Junior Achievement reaches more than four million students in grades K–12 per year. JA International takes the free enterprise message to more than one million students per year were estimated to take part in Junior Achievement programs. In the early 1990s, a sequential curriculum for grades K–6 was launched, catalyzing the organization into the classrooms of another one million elementary school students.

Mr. President, I wish to extend my heartfelt congratulations to Fred Hampton of Albuquerque, New Mexico for his outstanding service to Junior Achievement and the students of New Mexico. I am proud to have him as a member of my district and proud of his accomplishment.

SUPPORT OF NEW COLLEGE

HON. DAN MILLER OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. MILLER of Florida. Mr. Speaker, I am here today to congratulate New College on being the newest accredited independent liberal arts college in the state university system of Florida.

New College was founded in 1960 as an independent college by Sarasota and Bradenton civic leaders. When the school opened in 1964, it accepted students on their academic talents, not on their race, creed or gender. In 1975, during a time of financial uncertainty, this 650-student college joined with the University of South Florida. Even with this merger, New College retained its faculty, academic programs and competitive admissions.

New College is known as the Honors College of Florida, being the only public college or university in Florida designated as “Highly Competitive” by Barron’s Magazine. The graduates of New College are some of the brightest and most motivated of all college graduates in the country.

I wish the best of luck to New College and to all its students and faculty during its transition. They have met many challenges in the past and face more in the future, but New College will succeed and make Florida very proud. I am honored to represent this institution.

TRIBUTE TO W. GEORGE HAIRSTON III

HON. SPENCER BACHUS OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. BACHUS. Mr. Speaker, I rise today to honor Mr. W. George Hairston III for his outstanding contributions to the U.S. commercial nuclear industry and, by extension, to the nation as a whole. Mr. Hairston currently serves as president and CEO of Southern Nuclear Operating Company, and was recently inducted into the State of Alabama Engineering Hall of Fame in recognition of his accomplishments.

Mr. Hairston’s resume is extensive and distinguished. He is a veteran of the United States Army Corps of Engineers and of the Vietnam War. His degrees were earned at some of the top engineering universities in the country, such as the undergraduate engineering degree from Auburn University and his Master’s in Nuclear Engineering from the Georgia Institute of Technology. Additionally, in 1991, he successfully completed the Massachusetts Institute of Technology’s Program for Senior Executives.

Mr. Hairston is also active in his community, holding positions on the Board of Directors for the Institute of Nuclear Power Operations (INPO), where he also served as chairman of the INPO National Nuclear Accrediting Board, and the WANO-Atlanta Center Governing Board. Mr. Hairston is currently a member of the Nuclear Energy Institute (NEI) Board of Directors, Executive Committee, and the Nuclear Strategic Issues Advisory Committee (NSIAIC). He also serves as Chairman of the NEI Government Relations Advisory Committee (GRC).

It is clear that such honors and qualifications are more than most individuals could obtain in a lifetime. However, Mr. Hairston continues to strive for excellence not only in his work but also in his community. He stresses the importance of equality in the workplace and focuses on minority recruiting. Additionally, he understands the importance of cultivating in the nation’s youth an understanding...
of and an interest in the field of engineering. By serving on the Board of Directors for Junior Achievement in Birmingham and the Auburn Alumni Engineering Council, and by chairing the INROADS/Birmingham Advisory Board, Mr. Hairston positions himself as a mentor for bright, young engineers. His refusal to remain content with serving and influencing any one area or group is both admirable and challenging. His accomplishments and legacy, it is his concern for his fellow citizens and our country that truly set him apart.

Mr. Speaker, please join me in honoring Mr. W. George Hairston III, an outstanding businessman, leader, and servant to the community.

CALL FOR HUMANITARIAN ASSISTANCE TO THE PEOPLE OF THE NUBA REGION IN SUDAN

HON. CHARLES B. RANGEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. RANGEL. Mr. Speaker, I rise before you today to bring your attention to the grave situation in Sudan and specifically to the people of the Nuba region. I urgently call on President Bush and Secretary of State Colin Powell to work for an immediate lifting of the cruel siege of the Nuba region of Sudan.

For over ten years, the Government of Sudan has denied all humanitarian relief aid to the people of the Nuba, despite the terrible plight of tens of thousands of innocent civilians. Very recent reports indicate that the cumulative effect of this brutal siege has been to push 85,000 human beings to the very brink of starvation. Without immediate humanitarian intervention, thousands of people will begin to die—and they will continue to die until humanitarian aid is permitted into the region. Countless mothers will suffer the agonizing fate of watching helplessly as their children die for lack of food, and then succumbing themselves.

This is intolerable and utterly indefensible. Nowhere in the world is the denial of food aid used as a more vicious weapon of war than in the Nuba region of Sudan. Further, Government of Sudan offenses have recently burned thousands and thousands of people out of their homes, making them even more vulnerable in these precarious circumstances.

There is in Lökóchóko in northern Kenya, the center of relief operations for southern Sudan, humanitarian aid ready and able to assist the people of the Nuba tomorrow. What is required is access. It is imperative that the United States take the international lead in demanding, in the strongest possible terms, that the Government of Sudan lift this brutal siege immediately.

We must continue to work together as a nation to stop slavery, aerial bombardments of innocent civilians, religious persecution and induced famine in the Sudan. The recent passage of the Sudan Peace Act of 2001 with an overwhelming vote of 422 to 2 shows the tremendous support of the U.S. House of Representatives in applying all necessary means to bring an end to the 18-year civil war and its related atrocities. We must continue this momentum in the Senate, and show unified U.S. support with unanimous passage of the Sudan Peace Act when it comes to the Senate floor.

INTRODUCTION OF THE "ENDANGERED SPECIES CONSOLIDATION ACT"

HON. C.L. "BUTCH" OTTER
OF IDAHO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. OTTER. Mr. Speaker, since 1970, two federal agencies have had jurisdiction over implementation and enforcement of the Endangered Species nationwide—the U.S. Fish and Wildlife Service (USFWS) and the National Marine Fisheries Service (NMFS), which is part of the National Oceanic and Atmospheric Administration under the U.S. Department of Commerce. Before 1970, NMFS' programs were implemented by USFWS. This changed when President Nixon vetoed a bill extending it 3 years before the enactment of the Endangered Species Act. If President Nixon knew how ESA and NMFS would look today—30 years later—he probably would have second thoughts.

The U.S. Fish and Wildlife Service has jurisdiction of over 1,800 species of plants, mammals, birds, and fish, and an annual ESA budget of $112 million. NMFS—with responsibility for just 42 listed species of marine mammals and fish—has an annual ESA budget nearly as high as USFWS—$105 million. Many of NMFS' "species" include "evolutionarily significant unit" designations that NMFS created without Congressional authorization—an issue that is now pending in federal district court.

Mr. Speaker, the goals and activities of these two agencies have become blurred. For example, both NMFS and USFWS have undertaken the listing and recovery of Atlantic salmon, the Gulf sturgeon, and four species of sea turtles.

In the Pacific Northwest, the USFWS manages freshwater bull trout and hatchery salmon, while NMFS has devoted billions of dollars to regulate and enforce the recovery of "wild" salmon and steelhead in the same watersheds.

NMFS allows the commercial and tribal harvest of thousands of salmon that it acknowledges are endangered. NMFS' interpretation of ESA has caused hundreds of activities—including those having minimal impact—or those that actually aid—the recovery of species to be held up for months or years.

Instead of becoming more efficient, NMFS' response is to request more federal money and expand their regulatory activities while failing to identify goals of how many species of fish it needs to recover.

All species—fish and humans—deserve better from the federal government. That is why today I and my friend and colleague from Idaho, Congressman Mike Simpson, together will introduce the "Endangered Species Consolidation Act". This measure will ensure that ESA activities regarding fish that spawn in fresh or estuarine waters and migrate to ocean waters—and vice versa—are managed and coordinated through one agency—the U.S. Fish and Wildlife Service.

The bill will eliminate duplication and allow scarce resources to be focused on achieving the true objective of the Endangered Species Act—recovery of species through science-based management.

WRIGHT TOWNSHIP CELEBRATES 150TH ANNIVERSARY

HON. PAUL E. KANJORSKI
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. KANJORSKI. Mr. Speaker, I rise today to call the attention of the House of Representatives to the 150th anniversary of the founding of Wright Township in Luzerne County, Pennsylvania. I am honored to have been asked to participate in the township's Independence Day parade, which will double as a celebration of the sesquicentennial.

Wright Township was established by the Court of Quarter General Sessions on April 12, 1851. It is named for Hendrick Bradley Wright, a resident of Luzerne County who served four terms in this House between 1853 and 1881 and also served as speaker of the Pennsylvania House of Representatives and Luzerne County district attorney. In commemoration of the 150th anniversary, the National Archives and Records Administration recently donated to the township a framed photograph of Hendrick Wright taken in the 1860s.

The community was carved from Hanover Township, and has seen its population grow despite seeing part of its territory become incorporated into the new communities of Fairview Township, Rice Township and Nauvola Borough over the years. The township encompasses 13.9 square miles of land.

At its founding, Wright Township had just 152 inhabitants, and its character remained primarily rural until the 1950s. In 1950, the population was 948, which has more than quintupled to 5,593 in 2000. A major reason for the increase in population was the opening of the Crestwood Industrial Park in 1952. This 1,050-acre facility is home to more than 20 businesses that employ more than 3,000 people.

Wright Township continues to work with the Greater Wilkes-Barre Chamber of Business and Industry and businesses located or considering location in the industrial park.

To help preserve the quality of life, the residents enjoy and provide for orderly community and economic development, the township adopted a comprehensive plan and subdivision and land development and zoning ordinances in the late 1960s and early 1970s. As the township grew, it upgraded its public services to meet the citizens’ increasing needs. In 1972, the police, the public works department and the supervisors’ office moved into the newly constructed municipal building. Previously, the police operated out of the firehouse on a road developed out of a developer’s garage and the supervisors’ office was in the home of the secretary.

In the 1970s, the Wright Township Recreation Park was completed, and the township is
Mr. ETHERIDGE. Mr. Speaker, I rise today to recognize the long and distinguished career that my friend John Pittard has had in the public service arena. John has served on the City Council in my hometown of Murfreesboro, Tennessee, for 19 years, as well as other civic boards and organizations within the city.

John's pride for his community is obvious. He has helped guide the city through a period of tremendous growth, not only in population but also in quality of life. He is one of the most honorable public servants I know, and I've known him most of my life. In fact, we went to high school and college together.

John's devotion to public service comes honestly. Both his mother, Mabel Pittard, and his father, the late Homer Pittard, were long-time educators and gave much of themselves to their community. A Murfreesboro school—the Homer Pittard Campus School—was even named after John's father.

Murfreesboro owes a huge debt of gratitude to John, who never became disillusioned or cynical during his two decades of public service. He served the city because of his love for the community, nothing else. John's wife, Janice, and his daughters, Emily, Mary and Sarah, are fortunate to have such a good man in their lives.

I have a deep admiration for John and congratulate him for his many accomplishments. His decency transcends both his public and private life. Thank you, John, for being such an unselfish and caring public servant.

HONORING SKIIH ENTERPRISES, LTD.

HON. KAY GRANGER
OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Ms. GRANGER. Mr. Speaker, today I want to recognize a great Texas company, SKIIH Enterprises, Ltd., on its 20th anniversary. Over the past 20 years, SKIIH has built a reputation as one of Texas' leading mechanical/industrial contractors. I want to extend my congratulations to the company's founders, Richard Skipper and Tom Hicks, and to everyone else who has had a hand in SKIIH's success.

In 1981, Richard Skipper and Tom Hicks formed SKIIH. Mr. Skipper and Mr. Hicks had both worked in the industry for many years, which gave them the experience and knowledge they needed to create a successful business together. They started with a simple business plan, focusing on not over-extending SKIIH's limited resources and on steady, controlled growth. Because of these wise business practices and high quality work, SKIIH has become one of the best respected mechanical/industrial contractors in the state of Texas.

Today, SKIIH is a full service mechanical/industrial contractor with over 220 employees. The company has a 38,000 square foot headquarters and fabrication shop in Fort Worth, Texas, and opened an office in Lubbock, Texas two years ago. SKIIH's volume was $1 million in its first year, $4 million in the second year, and was over $33 million in 2000.

SKIIH has worked on many large construction projects in Texas. One of SKIIH's first projects was renovating the Tarrant County Courthouse in downtown Fort Worth. SKIIH has also done extensive work in North Texas on Burlington Northern Santa Fe's corporate headquarters, Nestle's Texas Distribution Center, the James West Special Care Center for Alzheimer's Disease, the University of North Texas Health Science Center, Alcon Laboratories, and the Dallas-Fort Worth Rental Car Facility. In recent years, the company has also completed many projects outside of the Fort Worth area. The most notable is the United Spirit Arena at Texas Tech University in Lubbock.

SKIIH also gives back to the industry and community. In conjunction with the Construction Education Foundation, SKIIH provides workforce training classes at North Lake College and Trimble Tech High School. The Construction Education Foundation is a coalition of North Texas contractors that trains approximately 600 apprentices each year. SKIIH sends employees to high school career days and job fairs to promote the construction business. The company also provides on-the-job training for young men and women interested in a career in construction.

Additionally, SKIIH is an active member of the Associated Builders and Contractors. The company has been awarded for its quality work by the Associated Builders and Contractors on numerous occasions. Most recently, SKIIH was awarded First Place on the local level for the 2000 Associated Builders and Contractors Excellence in Construction Awards for its work on the Dallas-Fort Worth International Airport Rental Car Facility.

Once again, Mr. Speaker, I want to congratulate SKIIH Enterprises, Ltd., for 20 years of success. I know that the next 20 years will be even more productive.

HONORING THE 20TH ANNIVERSARY OF THE NATIONAL FOUNDATION FOR ECTODERMAL DYSPLASIAS

HON. JERRY F. COSTELLO
OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. COSTELLO. Mr. Speaker, I rise today to ask my colleagues to join me in recognizing the 20th anniversary of the National Foundation for Ectodermal Dysplasias (NFED) in Mascoutah, Illinois.

The NFED is the only organization in the United States providing comprehensive services to individuals affected by the ectodermal...
dysplasia syndromes (EDS) and their families. EDS are a group of genetic disorders which are identified by absent or deficient function of at least two dysmorphologies of the ectoderm (teeth, hair, nails or glands). There are at least 150 forms of EDS that have been identified. EDS was first recognized by Charles Darwin in the late 1860’s.

EDS affects many more people that had been originally thought by Darwin. Today, the number of those individuals affected by EDS has been estimated as high as 7 in 10,000 births. Individuals affected by EDS have abnormalities of the sweat glands, tooth buds, hair follicles and nail development. Some types of EDS are mild while others are more devastating. People with EDS have been identified as having frequent respiratory infections, hearing or vision defects, missing fingers or toes, problems with their immune system and a sensitivity to light. In rare cases, the lifespan of a person with EDS may be affected. Many individuals affected by EDS cannot perspire, requiring air conditioning in the home, at work or in school. Some individuals may have missing or malformed teeth or problems with their upper respiratory tract. EDS is caused during pregnancy, as the baby is developing. During the formation of skin tissues, defects in formation of the outer layers of the baby’s skin may lead to ED.

At this time there is no cure for ED. The NFED, incorporated in 1981, is the sole organization in the world providing comprehensive services to families affected by EDS. The NFED is committed to improving lives by providing information on treatment and care and promoting research. There are more than 3000 individuals served by the NFED in 50 states and 53 countries. They have provided more than $115,000 in financial assistance to families for their dental care, medical care, air conditioning, wiggs, cooling vests and other needs. The NFED has provided patient access and granted more than $237,000 to researchers studying the various aspects of EDS. These grants have stimulated more than 2 million dollars in ED research. They continue to host continuing educational programs on ED for health care professionals and provide the most comprehensive and current information on ED in the world.

Mr. Speaker, I ask my colleagues to join me in honoring the 20 years of service of the National Foundation for Ectodermal Dysplasias in the world.

Mr. COBLE. Mr. Speaker, the words courageous and heroic are sometimes used without thought or care. In the Sixth District of North Carolina, however, those adjectives and more should be applied to one of our young citizens who bravely came to his mother’s rescue. For his efforts, eight-year-old Michael Mathis from Denton, North Carolina, was recently awarded the North Carolina 911 hero award, and he was recognized by the National Emergency Number Association. Young Michael was caught in a terrible predicament which required him to show great courage while under severe pressure. Michael didn’t let his young age hold him back from stepping up to save the life of his mother.

On February 6, 2001, Michael was riding with his mother Cathy Surratt on a road near High Point. Michael’s mother suffers from a thyroid condition and she has constant migraine headaches. During the course of the drive, Cathy began to see swirls in her eyes, pulled to the side of the road, then lost consciousness. Michael immediately got out his mother’s cell phone in order to call his stepfather, but unfortunately the phone went dead, due to the fact that their minutes had expired. Knowing that a call to 911 was free, he then called the emergency number for help. Michael tried to tell the dispatcher where they were located, but with only trees and grass visible, he was only certain that they were on Highway 109.

Shortly after that, the car, which was a stick shift, began to roll forward. Michael’s voice suddenly turned to panic, and he pleaded with the dispatcher to have someone find them. The dispatcher instructed him to take the key out of the ignition. Though he was overcome with fear, Michael managed to get the key out, and the car stopped. The dispatcher told Michael to honk the horn and flash the lights in the hope that a passing car would stop. Michael quickly complied with the dispatcher’s orders. Finally, a car stopped, and to his good fortune, the passengers in the car were an emergency worker and a trained nurse. When Michael’s stepfather arrived, the car was surrounded by people who were there to help. Cathy Surratt was taken to an area hospital where she was successfully treated and released.

The Davidson County Sheriff’s Department named Michael a 911 hero, and he was awarded a plaque at a special ceremony. This week, the National Emergency Number Association recognized Michael at its 20th annual conference, along with other National 911 heroes. I am very pleased to be able to recognize Michael as one of our North Carolina 911 heroes. On behalf of the citizens of the Sixth District of North Carolina, we offer our personal congratulations to Michael Mathis—a true hero.

honorable representative from Clark County, Ohio

HON. DAVID L. HOBSON

of Ohio

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. HOBSON. Mr. Speaker, I rise today to recognize the members of the Sayers Family from Clark County, Ohio and their combined commitment to shared American values. I rise today to commend the fact that four children of Charles and Virile Sayers have each married and raised their own families for a combined total of 231 years. The Sayer Family provides an excellent example for our community in Ohio, as well as for the country as a whole, of the importance and benefits of a strong family heritage.

In today’s society, it is very uplifting to hear stories such as these and to see the commitment this Ohio family has made to one another. It was through the Sayer Family’s strong foundation that they understood the meaning of hard work as well as the value of family. Growing up, the children were encouraged to be good students, trained in music, and helped run their family farm. They understood the meaning of responsibility and the importance of strong family ties.

I want to take this opportunity to recognize the Sayers’ for preserving such a strong family bond and for their traditional values and morals.

in the House of Representatives

Tribute to James E. Zini, D.O.

HON. MARION BERRY

of Arkansas

Thursday, June 28, 2001

Mr. BERRY. Mr. Speaker, I rise today to pay tribute to a great Arkansan and outstanding Osteopathic physician. I am proud to recognize James E. Zini, D.O., in the Congress for his invaluable contributions and service to his community, to our state, and to our nation.

Dr. Zini epitomizes the Osteopathic profession. With his application of Osteopathic practices and principals, he personifies the model D.O. physician—practicing in a small rural town taking care of people, not just treating symptoms. He started his family practice in rural Mountain View, Arkansas, in 1977. In his Mountain View and Marshall clinics, along with partner David Burnette, D.O., office manager Judy Zini, and the Zini Clinic staff, Jim makes sure that each patient visit—approximately 13,000 annually—is remembered as excellent, quality D.O. care.

Dr. Zini is Board Certified in Family Practice by the American College of Osteopathic Family Physicians and is a fellow of the college. Jim is also Board Certified by the American Board of Quality Assurance and Utilization Review Physicians.

As a founder and leader of the Arkansas Osteopathic Medical Association (AOMA), Dr. Zini tirelessly worked to advance the Arkansas Osteopathic profession: to promote the Osteopathic family in all areas affecting D.O.s; and to protect the licensure, practice and educational interests of all Arkansas D.O.s. Dr. Zini has served his state association with distinction: Founder, President, Vice President, Committee Chairperson, Member, and he received the first AOMA Physician of the Year Award in 1989. Jim is also the first D.O. to serve on the Arkansas State Medical Board—a position designated by law that he worked to enact.

Dr. Zini furthered his commitment to the Osteopathic profession at the national level: serving as an Arkansas delegate to the American Osteopathic Association (AOA) House of Delegates; numerous House committees; AOA Board of Trustees; several key AOA committees and chairmanships; and 2001–2002 AOA
President. As a community leader, Dr. Zini’s recognitions include: 1998 Flight Safety Award; Federal Aviation Administration; 1987 Distinguished Civilian Award, Mountain View Chamber of Commerce; 1996 Alumni of the Year Award, University of Health Sciences in Kansas City, Missouri; 1991 Federal Aviation Administration Certificate of Recognition; Sigma Sigma Phi Honorary Osteopathic Fraternity; and 1969 Ordained Minister, St. Paul’s United Church of Christ in Little Rock, Arkansas.

James E. Zini, D.O., is a physician, advisor and friend to many. He has dedicated his life to serving his fellow citizens as a leader in both his profession and his community, and he deserves our respect and gratitude for his priceless contributions. On behalf of the Congress, I extend congratulations and best wishes to my good friend James E. Zini, D.O., on his successes and achievements.

TRIBUTE TO CHIEF ROBERT R. GREENLAW

HON. MARGE ROUKEMA
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mrs. ROUKEMA. Mr. Speaker, I rise today to recognize and congratulate Chief Robert R. Greenlaw, C.E.M., for his outstanding achievements with the Ridgewood Emergency Services and his contributions to the protection of the Ridgewood community. Bob Greenlaw, who is now the Director of Ridgewood Emergency Services, has served the public in emergency situations for over forty years. On July 4, 2001, we will be honoring him in Ridgewood for his tremendous service. His leadership in the development of a trained volunteer fire and police department is only one of his remarkable achievements and I commend him for his efforts. The results of his dedicated service are felt throughout the Village of Ridgewood. As a leader of the men and women who protect our community, he is an inspiration for those all involved in public service.

Bob began his protection of the public in 1957 as a volunteer firefighter in Ridgewood, which is also my hometown. After a long and dedicated service in our community, Bob has assumed numerous leadership positions within the fire and police department. He was named Captain of the Ridgewood Auxiliary Police while also involving himself with emergency management. In 1980, Bob received the first two of many awards for his service, as he was given both the Emergency Medical Services Medal of Honor and the Village of Ridgewood Mayor’s Award of Excellence in the same year. Convinced that the fire and police departments could be structured differently in order to best serve the community, Bob asked the Village of Ridgewood to support a trained group of volunteers within the departments which would allow the fire and police professionals to focus on the most critical situations. Bob encouraged a handful of volunteers to join him in this program and today his inspiration has led to a department of 127 volunteers serving more than 500,000 hours each year.

EXTENSIONS OF REMARKS

The Low Income Gasoline Assistance Program Act of 2001 or LIGAP, is modeled on the successful LIHEAP program that helps seniors and disabled persons defray the cost of purchasing gasoline for travel to work, school, or regular healthcare appointments when the price of gasoline reaches or exceeds the unmanageable current levels. States will make LIGAP grants to income-eligible families who meet the distance requirements of driving at least 30 miles a day, or 150 miles per week for work, school, or medical care appointments. States are also encouraged to use their welfare reform block grant to provide transportation stipends to parents who meet the same distance standards.

This measure will enable states to operate the program through their Community Action agencies or welfare departments. Thus, states will have the flexibility to set income-eligibility standards similar to the current eligibility for LIHEAP. The prices at which the program triggers on and subsequently releases will then be set for each jurisdiction through consultation between the Secretary of Health and Human Services and the Secretary of Energy. LIGAP is not meant to be a substitute for the long-term energy solutions we all seek for our nation. Each of us understands the necessity of a comprehensive and balanced approach to energy development, but we must realize that in every state there are hard-working people and elderly individuals whose monthly budgets are being stretched to the breaking point by the cost of gasoline. While we must approach this country’s energy demand with the willingness to make the tough, long-range choices demanded of us, it is equally important that we heed the immediate damage being caused by the current high prices. We must show a willingness to provide some comfort for those Americans who are most at risk.

Mr. Speaker, we all recognize that people are suffering and that something must be done to help with the high cost of gasoline. I urge my colleagues to join us in this proposal that is both forward thinking and comprehensive.

HONORING THE LIFE AND SERVICE
FIRE CHIEF JACK FOWLER, JR.

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to honor a life spent serving others, the life of Jack Fowler, Jr. Jack was a man that selflessly dedicated his life to protecting the lives of others. On Sunday,
EXTENSIONS OF REMARKS

June 29, 2001

June 24, 2001, Jack was killed on his way home from a training session with the Volunteer Fire Department of West Pueblo. Jack was born in the nearby community of La Junta. He graduated from La Junta High School, and started his career as a firefighter at the La Junta Volunteer Fire Department, following in the footsteps of his father and grandfather. After moving to Pueblo West in 1978, Jack then joined the Pueblo West Volunteer Fire Department where he was quickly promoted to Lieutenant. After serving only two short years on the Pueblo West squad, Jack was named Captain. Not only did Jack fulfill his duties as Captain, but went above and beyond these duties, by taking many courses that enhanced his career, Highway Emergency Response, Colorado Division of Disaster Emergency Services, and Emergency Response to Hazardous Materials Incidents. He was a true professional and a dedicated member of his community.

Friends of Disabled Adults and Children are being held on September 23rd at Mount Carmel Christian Church in Stone Mountain, Georgia. Mr. and Mrs. Butchart, and their staff, are to be commended for their diligence, hard work, and big hearts. The facility is now housed in the Seventh District of Georgia, who have been served by this fine organization, join me in congratulating them, and thanking them for their kindness.

IN HONOR OF REV. KURT W. KATZMAR

HON. BOB BARR
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. BARR of Georgia. Mr. Speaker, established in 1986 in order to provide medical equipment and computers to disabled people in the metro Atlanta area who could not otherwise afford it, Friends of Disabled Adults and Children is a full-time ministry which has reached out to all people with disabilities.

After retiring from a 20-year career in the Marines in 1978, Ed Butchart took a position selling medical diagnostics products. After having met many disabled people in need of products and service, he and his wife, Annie, with the support of Mount Carmel Christian Church, started a ministry in their home garage. Ed would repair and refurbish wheelchairs and give them to those disabled individuals who could not afford to purchase one.

Since then, the ministry has helped people ranging in age from 18 months to 103 years of age. It now houses in 64,800 sq. ft. building in Stone Mountain, Georgia and to date it has provided over 7,000 wheelchairs to needy persons. The retail value of all medical equipment that has been given away now totals over $20 million.

Friends of Disabled Adults and Children received its 501(c)(3) non-profit status in November 1987. Private donations, annual golf tournaments, and community fund raisers help it remain open and able to furnish medical equipment to those who truly need it. On numerous occasions, my staff members have referred disabled adults and children to this agency. It may take a little time to acquire a certain piece of medical equipment, but Friends of Disabled Adults and Children usually is able to accommodate these individuals. Recently a single mother, who has Multiple Sclerosis, was able to get out and watch her son play baseball, because she had received an electric scooter from Friends of Disabled Adults and Children. A senior citizen recently received a new walker, fitted just for her, because her old one was broken.

This organization distributes computers to those who are disabled. This sometimes allows the disabled to learn job skills. In fact, the agency employs many disabled adults. It has a community reentry program for those who suffer from an acquired brain injury. By volunteering at Friends, these people are provided with a caring environment in which they can regain crucial skills needed to once again become productive members of society.

The Butcharts give God full credit for the growth of the center and for the many blessings they have received over the years. The 15th anniversary celebration of Friends of Disabled Adults and Children will be held on September 23rd at Mount Carmel Christian Church in Stone Mountain, Georgia. Mr. and Mrs. Butchart, and their staff, are to be commended for their diligence, hard work, and big hearts. The facility is now housed in the Seventh District of Georgia, who have been served by this fine organization, join me in congratulating them, and thanking them for their kindness.

IN HONOR OF REV. DURIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. KUCINICH. Mr. Speaker, I rise today to honor and recognize Rev. Kurt W. Katzmar for his many years of dedicated service to the First Congregational United Church of Christ. Rev. Katzmar has been the pastor of the First Congregational United Church of Christ since May 1991. As a young boy raised in Strongsville, Rev. Katzmar attended the church he now pastors. He, along with three other friends in the neighborhood, took a ride in Rev. David Hawk, founded the Berea Min- ister's Emergency Relief fund, a precursor to Church Street Ministries. This was one of many examples of his tireless support to the City of Berea, the people of Berea, and the ministry among the people of Berea.

Rev. Katzmar, along with many others in the community area, was a founder of the First Church's Church Street Ministries program. Together with Bob Dreese, Rev. Katzmar joined the church's Youth-at Risk program and the Second Mile Thrift Shop together as one ministry. When the businesses in the 17-19 Church Street building decided to move, they designed a combined program that could move into the building, enabling an expansion of the program to include the refugee-resettlement and crisis-response ministries. Rev. Katzmar made presentations to the boards, committees, and congregation, and after the grant was made, the Church Street Ministries was formed and dedicated on May 14, 1994 in a ceremony led by Rev. Katzmar.

My fellow colleagues, please join me in congratulating Rev. Katzmar on all his achievements in helping to create a welcoming atmosphere in the First Congregational United Church of Christ. His love and dedication to serving the Church has touched the hearts of all in the community.

PROTECTING AMERICAN STEEL

HON. KEN LUCAS
OF KENTUCKY
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. LUCAS of Kentucky. Mr. Speaker, America's steel industry has been hit by an unprecedented flood of low-priced, imported steel. As a member of the bipartisan Congressional Steel Caucus, I have become increasingly frustrated as I have watched this flood of low-priced imports force our steel producers to either slow production or close up shop. That is why I was pleased by the Administration's recent decision to heed the advice of the Congressional Steel Caucus in response to the unprecedented flood of low-priced, imported steel into our marketplace. If the investigation finds that unfair trade practices were used by foreign countries in the United States, we will be entitled to seek relief from imported steel—including imposing punitive tariffs and trade restrictions. This investigation is a step in the right direction. It puts foreign steel producers on notice that we will not simply stand by while unfairly subsidized steel imports leave our steel plants idle and our steelworkers without work. But we need to do more.

Over 15,000 steelworkers nationwide have lost their jobs due to the current industry crisis. Since 1997, at least 18 steel companies have filed for bankruptcy. The health insurance of 70,000 steel-company retirees is now in jeopardy—that's 70,000 Americans faced with losing health care coverage precisely at the time in their life when they can afford it the least. Although a Section 201 investigation must report its findings within 120 days, the
June 29, 2001

EXTENSIONS OF REMARKS

HON. STRICKLAND OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. STRICKLAND. Mr. Chairman, I would like to thank our Subcommittee Chairman and Ranking Member for the hard work they put into this bill, which includes a number of programs that are very important to Southern Ohio. I would like to take this opportunity to comment on these Department of Energy programs that directly affect the workers and communities supporting the Portsmouth Gaseous Diffusion Plant located in Piketon, Ohio.

First, I would like to express my support for the $110,784,000 included in the Fiscal Year 2002 Energy and Water Appropriations bill for costs associated with winterization of the Portsmouth, Ohio Gaseous Diffusion Plant and maintaining the plant on cold standby. It was just over a year ago today that the United States Enrichment Corporation, Inc. (USEC) announced that it would close the only U.S. uranium enrichment plant capable of meeting industry’s nuclear fuel specifications. While I cannot overstate my disappointment, disagreement, and disgust with that decision, I am pleased that funding will be available in Fiscal Year 2002 to ensure that the Portsmouth facility remains in a cold standby condition so that it could be restarted if needed in the future. I have been assured by the Department of Energy that the funding levels in this year’s appropriations bill will allow the Department to meet its goals, as announced in Columbus, Ohio on March 1, 2001, and as stated by then Governor Bush last October.

I am aware of report language accompanying the bill which discusses the non-proliferation programs with Russia and, specifically, the Highly Enriched Uranium (HEU) Agreement. I support this incredibly important foreign policy initiative and I agree with the language calling for the Russian HEU to “be reduced as quickly as possible.” I am also aware that the purchase of the 500 metric tons of Russian HEU has not always stayed on schedule, and I support exploring ways to accelerate the purchase of the downblended weapons grade material from Russia. However, I would hope that we can accelerate this program without adversely affecting the domestic uranium enrichment industry. Today, there are dependents upon the downblended Russian HEU for approximately 50 percent of our domestic nuclear fuel supply. Increasing that dependence makes no sense to me, particularly at a time when we are debating a national energy strategy calling for greater energy independence, reduced volatility, and supply uncertainty. We must act in a manner that strikes a reasonable balance between this significant foreign policy objective and the need to maintain a reliable and economic source of domestic nuclear fuel.

I am disappointed that the Department of Energy’s Worker and Community Transition Office funding falls short of the President’s request. I am deeply concerned that the allocated funding is inadequate to address the needs of the Department of Energy workers and communities across the DOE complex who depend on these funds to help minimize the social and economic impacts resulting from the changes in the Department of Energy’s mission.

Finally, but not least of all, I am concerned about the slight reduction in the funding for the Department of Energy’s Environment, Safety and Health Office. I am hopeful that this reduction will not impact the extremely important medical monitoring program at the Portsmouth plant, which also serves to screen past and present workers at other sites throughout the DOE complex. I hope that these funds will be restored as the bill moves through the conference committee. We now know that many workers at DOE sites, including the one in Piketon, Ohio, handled hazardous and radioactive materials with little knowledge and, oftentimes, with inadequate safety practices. In fact, a May 2000 report issued by the Department’s Office of Oversight on the Piketon Gaseous Diffusion Plant states, “Due to weaknesses in monitoring programs, such as the lack of extremity monitoring, exposure limits may have unknowingly been exceeded. In addition, communication of hazards, the rationale for and use of protective measures, accurate information about radiation exposure, and the enforcement of protective equipment use were inadequate. Further, workers were exposed to various chemical hazards for which adverse health effects had not yet been identified.” Scaling back the medical monitoring program now would be unconscionable knowing what we know today. Furthermore, the compensation program established last fall by passage of the Energy Employees Occupational Illness Compensation Program Act (EEOICPA), designed to compensate employees made ill by the work they performed for the government, would be weakened if workers are then denied access to medical screening. Although the EEOICPA is not a perfect bill, it would be a shame to hobble a long overdue program before it is even out of the gate.

HONORING THE LIFE OF ED SMITH

HON. SCOTT MCINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. McINNIS. Mr. Speaker, I ask today to honor Ed Smith, a true hero, on behalf of Congress. Ed served as the Centennial football coach, as school district administrator, and he served as a model for how to win, how to lose graciously, and how never to give in. He was also a man devoted to his family up until his recent death just months before his 100th birthday.

Professionally, Ed was revered by his colleagues. Central coach, principal and teacher John Rivas told Loretta Sword of The Pueblo Chieftain, “He was the godfather of it all, you might say, and he was always there to help me if I had a problem or a situation I didn’t have a handle on;” Ms initiative helped ensure that the Dutch Clark Stadium had the financial and community support necessary to be built. Also, he made certain that the annual All-Star games were properly organized when they were in Pueblo, and that everything went smoothly and safely. For his success, he was even honored with a golf tournament which was honored for the work he did in the athletic arena for the community. Ed was a gifted athlete himself, and he never lost his love for competition, or his skill at it. When he was 91 years old, he hit a hole-in-one with thirty-year-old golf clubs he received as a retirement gift.

During his life, Ed received many honors and awards, including having his name on the rolls of the Greater Pueblo Sports Association Hall of Fame and the Centennial Hall of Fame, but his greatest reward was that, as former coach Sollie Rasco attested, “I honestly think . . . [he] and his wife, they were at peace with one another, their family, and their God.” Indeed, Ed was a dedicated husband up until his wife, Margaret Boyer Smith’s, death. He also devoted himself to his two sons, Dr. Dean B. Smith, who preceded him in death, Dr. E. Jim Smith, and to his sixteen grandchildren and nineteen great-grandchildren.

Clearly, Mr. Speaker, Ed Smith was an inspiration to his students, colleagues, family and friends throughout his life. I am proud to have this opportunity to pay tribute to such an amazing man.
Mr. BARR of Georgia. Mr. Speaker, few times each week we open our newspapers and read about someone who is making important contributions in a particular field. It is these individuals who continue to make America a great place to live, and we should never fail to recognize their contributions. However, it is with much less frequency that we hear about people who have spent a lifetime contributing to our society in numerous different areas, always rising to the top level in each endeavor.

One such individual is Al Fowler, a native of Douglasville, Georgia. After graduating from Douglas County High School and the University of Georgia, where he earned high honors and was active in Student Government and the Future Farmers of America, Al answered his country’s call and left to fight in World War II.

During the war, Al served in the 483rd Bomber Group in Italy, where his group of B-17s suffered a casualty rate of 107%, including replacements. Although he had the option to leave after surviving 30 missions, Al Fowler stayed on the front, and stopped flying only when the war ended on the morning before his 34th mission. During his tenure, he was promoted to Brigadier General and earned a Distinguished Flying Cross for bringing his crippled aircraft back to the ground after a particularly dangerous mission.

Fortunately, Al Fowler’s time in Italy was marked by more than just war and bloodshed. It was during this time that he met his wife, who was serving with the Red Cross in Italy. They went on to be married on the Isle of Capri. At that wedding, they exchanged rings made of gold confiscated from dead German soldiers by a friendly Italian jeweler, the bride wore a dress sewn from German parachute silk, and the couple departed from their wedding in a B-17 Flying Fortress flown by the groom.

After returning to Douglasville, Al won election to the Georgia General Assembly, where he served with pride and distinction for 16 years. Next, he won election to the Georgia Public Service Commission. During his political years, he truly helped develop the state of Georgia, and was instrumental in building its communities and transportation infrastructure. Later, Al went on to become Georgia’s Adjutant General, where he started the National Guard program we rely on today.

Mr. Fowler has already been honored by his community and the State of Georgia for his service. He was recently named the 2nd recipient ever of the Chairman’s Award at our Aviation Hall of Fame in Warner Robins, Georgia. An exhibit there will honor his contributions to freedom and prosperity in America.

As Al reaches his 81st birthday, and finally begins a well-deserved retirement, I hope that other members of this body will join me in thanking him for his service to our nation and our community in Georgia.
June 29, 2001

SELF-DETERMINATION FOR SIKH HOMELAND DISCUSSED ON CAPITOL HILL

HON. CYNTHIA A. MCKINNEY
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Ms. MCKINNEY. Mr. Speaker, on Friday, June 15, the Think Tank for National Self-Determination held a very informative meeting here on Capitol Hill in the Rayburn House Office Building. The featured speaker was Dr. Gurmit Singh Aulakh, President of the Council of Khalistan. He laid out very well the strong case for self-determination for the Sikhs of Punjab, Khalistan, and for the other nations of South Asia, such as predominantly Christian Nagaland and predominantly Muslim Kashmir.

During his speech, Dr. Aulakh noted that "self-determination is the birthright of all peoples and nations." He quoted Thomas Jefferson, who wrote in our own Declaration of Independence that when a government tramples on the basic rights of the people, "it is the right of the people to alter or abolish it." Jefferson also wrote: "Resistance to tyranny is obedience to God."

India certainly is that kind of government. It has killed over 200,000 Christians in Nagaland since 1947, more than 250,000 Sikhs since 1984, over 75,000 Kashmiri Muslims since 1988, and many thousands of other minorities, including people from Assam, Manipur, Tamil Nadu, and members of the Dalit caste, the dark-skinned "Untouchables," who are the aboriginal people of South Asia, among others. Currently, there are 17 freedom movements in India.

Just recently, a group of Indian soldiers was caught trying to set fire to a Gurdwara, a Sikh temple, in Kashmir, and some houses. Local townspeople, both Sikh and Muslim, overwhelmed the soldiers and prevented them from committing this atrocity. Unfortunately, that is the reality of "the world's largest democracy."

Mr. Speaker, there are measures that America can take to prevent further atrocities and help the people of the subcontinent live in freedom. We should end our aid to the Indian government until it stops repressing the people and we should openly and publicly declare our support for self-determination for the people of Khalistan, Nagalim, Kashmir, and the other nations seeking their freedom in South Asia. This is the best way to help them. Unfortunately, that is the reality of "the world's largest democracy."

Mr. Speaker, I would like to insert Dr. Aulakh's speech into the Record for the information of my colleagues.

REMARKS OF DR. GURMIT SINGH AULAKH,
PRESIDENT, COUNCIL OF KHALISTAN

It is a pleasure to be back here with my friends at the Think Tank for National Self Determination. This is a very important organization and I am proud to support its work.

Self-determination is the birthright of all peoples and nations. Next month America will celebrate its Independence. Thomas Jefferson, author of the American Declaration of Independence, wrote that when a government

EXTENSIONS OF REMARKS

tramples on the people's rights, "it is the right of the people to alter or abolish it." He also wrote that "resistance to tyranny is obedience to God." Sikhs share that view. We are instructed by the Gurus to be vigilant against tyranny and deface its ugly head. Guru Gobind Singh, the last of the Sikh Gurus, proclaimed the Sikh Nation sovereign. Every day we pray "Raj Kare Ga Khalsa," which means "the Khalsa shall rule."

Let me tell you a little about the history of Sikh national sovereignty. Sikhs established Kalsa Rule until 1716. In 1765, Sikh rule in Punjab was re-established, and it lasted until the British conquered the subcontinent in 1849. Under Maharaja Ranjit Singh, Hindus, Sikhs, and Muslims all served in the government. All people were treated equally and fairly. The Sikh state was extensive, at one point reaching all the way to Kabul.

At the time that the British quit India, three nations were supposed to get sovereignty. Jinnah got Pakistan for the Muslims on the basis that the Hindus got India. India made a deal with the Hindu maharajah of Kashmir to keep the state within India despite a Muslim majority population. India marched the troops into Hyderabad to annex it to India by defeating the Muslim ruler, Nizam of Hyderabad. Hyderabad had a time in a majority Hindu population and a Muslim maharajah.

The third nation that was to receive sovereignty was the Sikh Nation. However, Nehru tricked the Sikh leadership of the time into taking their share with India on the promise that Sikhs would enjoy "the glow of freedom" in Punjab and no law affecting the right to pass without Sikh consent. As soon as the ink dried, however, the Indian government broke those promises. They sent a memo to all officials declaring Sikhs "a criminal race" does that sound like a democracy or a totalitarian state in the Nazi/Communist mold?--and the repression of Sikhs began. No Sikh representative has ever signed the Indian constitution to this day.

In June 1984 the Indian government attacked the holiest of Sikh shrines, the Golden Temple, in Amritsar. Ask yourself, what is that? Was it an act against tyranny anywhere in the world? Was it an act of terror against the ruling BJP, murdered missionary Graham Staines and his two sons, aged 8 and 10, by burning them to death while they slept in their jeep. Nuns have been raped, priests have been killed, schools and prayer halls have been attacked. Last year, the RSF published a booklet on how to implicate Christians and other minorities in false criminal cases.

The BJP destroyed the Babri mosque in Ayodhya and still intends to build a Hindu temple on the site. Let's have some questions here: What do you think the police really murdered? Do you believe that everyone who lives in India must be Hindu or must be subservient to Hinduism? They have called for the "Indianization" of non-Hindu religions. Is that a democratic country? U.S. Congressman Edolphus Towns pointed out that "the mere fact that [Sikhs] have the right to choose their oppressors does not mean they live in a democracy." Congressman Dana Rohrabacher said that for the minorities in India, "freedom has become a joke.

Sikh martyr Jarnail Singh Bhindranwale said that "If the Indian government attacks the Golden Temple, it will lay the foundations of Khalistan. He was right. On October 7, 1987, the Sikh Nation declared the independence of its homeland, Punjab, Khalistan. India claims that there is no support for Khalistan. It also claims to be democratic despite the atrocities. Then why not simply put the issue of independence to a vote, the democratic way? What are they afraid of?

Self-determination is the right of all people and nations. America should sanction India and stop its aid until all the people of South Asia are allowed to live in freedom. Thank you for giving me this opportunity. I hope you will support freedom for Khalistan, Kashmir, Nagaland, and all the nations of South Asia.

TRADE RELATIONS REGARDING PRODUCTS OF KAZAKHSTAN

HON. ROBERT WEXLER
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. WEXLER. Mr. Speaker, I would like to place in the Congressional Record the following letter I received from A. Machkevitch

12625
In this context the Jewish community of Kazakhstan calls upon you to exert your influence in freeing Kazakhstan from this rudder of the past, which would undoubtedly strengthen relationship between our countries and testify by facts that voices of tens of thousands of the Kazakhstani Jews have been once again heard by our American friends.

Yours Sincerely, A. Mackevych, President.

RETIRED OF REV. LEO J. O’DONOVAN, S.J. AS PRESIDENT OF GEORGETOWN UNIVERSITY

HON. ELEANOR HOLMES NORTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. NORTON. Mr. Speaker, Leo J. O’Donovan, S.J., leaves Georgetown University on June 30th after twelve splendid and productive years as the president of the oldest Catholic university in the United States. I know I am joined by the Members of the House in recognizing Father O’Donovan’s very distinguished service to Georgetown, to higher education, to this city, and to his Catholic faith.

Father O’Donovan, a summa cum laude graduate of Georgetown College, a Jesuit institution, returned to his renowned alma mater, himself a distinguished Jesuit. He has led the University in the tradition of scholarly productivity, and has strengthened interfaith and intercultural relationships and cooperation and has been a staunch supporter of other religious institutions, for which we are grateful.

These figures are higher than the national average. In 2000–2001, Georgetown University has continued to achieve distinction nationally, earning some of the most prestigious awards in higher education, including 11 Rhodes Scholarships, 7 Marshall Scholarships, and 8 Luce Foundation Scholarships since 1990. George-town’s campus, and a member of the Jesuit community. His signature especially is on the religious identity of the institution to which he has brought fresh and innovative emphasis.

I am particularly grateful to Father O’Donovan for his leadership in making Georgetown an especially good D.C. citi- en. These contributions have been plentiful and varied, from the University’s D.C. Reads literacy tutors and faculty and student support for our Catholic elementary schools, to the University’s $1 million investment that helped launch a community bank, the City First Bank.

The Reverend Leo J. O’Donovan, S.J., became Georgetown University’s 47th president in 1989, 33 years after he graduated summa cum laude from Georgetown. A member of the Society of Jesus since 1957, Fr. O’Donovan is a specialist in systematic theology and holds advanced degrees in theology and philosophy from the University of Münster, Germany. At the time of his election to serve as president of Georgetown, he was a professor of systematic theology at Weston Jesuit School of Theology in Cambridge, Massachusetts, a visiting fellow at the Woodstock Theological Center on Georgetown’s campus, and a member of Georgetown’s Board of Directors.

Under his leadership in the past twelve years, Georgetown University has continued to flourish and grow as a world-class university with a vibrant Catholic and Jesuit identity. As president, Fr. O’Donovan has sustained and enhanced Georgetown University’s traditions of scholarship, faith, and service—advancing teaching and research, strengthening the University’s commitment to educating “men and women for others,” and guaranteeing that Georgetown serves as a strong non-profit citizen in Washington, D.C.

ACADEMIC EXCELLENCE

Ranked among the top 25 universities in the nation every year in the 1990s, as well as in 2000–2001, Georgetown has continued to strengthen academic excellence and deepen its longstanding commitment to teaching and research.

Georgetown’s outstanding students continue to achieve distinction nationally, earning some of the most prestigious awards in higher education, including 11 Rhodes Scholarships, 7 Marshall Scholarships, and 8 Luce Foundation Scholarships since 1990. Geor-getown’s Law Center ranks first in the nation in the number of graduates who go into public interest and public service law. And 64 judicial clerkships have recently been awarded to Law Center graduates.

At the School of Medicine, students continue to perform exceptionally well in residency assignments they receive through the National Residency Matching Program. In 2000, more than half of our graduates received their first choice for residency, and 80 percent received one of their top two choices. These figures are higher than the national average.
and course development and made a priority the creation and funding of new teaching and research initiatives. The number of Georgetown’s endowed professorships and endowed chairs has doubled in the past twelve years. Among the new chairs in the University’s first in computer science, econometrics, and linguistics, as well as the John Carroll Distinguished Professorship in Ethics, the Bryan Professorship in Moral Philosophy, and a chair to support the scholarship and teaching of a visiting Jesuit scholar.

From Fall 1998 through Fall 2000 the number of Main Campus full-time faculty (both tenure track and non-tenure track) increased 37%. From Fall 1990 through Fall 2000, the number of full-time faculty at the Georgetown University Law Center increased 38%. Georgetown Law Center has the largest faculty in the United States.

Research and Scholarship

Georgetown’s faculty include some of the nation’s leading scholars in a wide array of fields—from linguistics to constitutional law to cancer research to health care policy. Georgetown is supported by the Klingenstein Foundation for the Advancement of Teaching as a Research 1 institution in 1994 and a Doctoral/Research-extensive university in 2000.

From FY90 to FY99, research and development funding support has increased by 119 percent. Georgetown’s library holdings have increased by more than 25% in the past ten years.

Academic Developments and Innovations

In the past 12 years, Georgetown has steadily expanded its academic programs. Currently, there are more than 90 undergraduate and graduate degree programs, including 20 doctoral programs. In recent years, numerous new interdisciplinary graduate programs have been instituted, including programs in the neurosciences and molecular and cell biology. The undergraduate curriculum has been augmented by new minors in areas such as Catholic studies and environmental studies, a new major in political economy, and a joint program in Communication, Culture, and Technology.

New graduate and professional initiatives include the Asian Law and Policy Studies Program at the Law Center, and an International Executive MBA Program at the McDonough School of Business. In 1995, the Main Campus also completed a major reorganization of academic programs, incorporating the Faculty of Languages and Linguistics into the Georgetown College.

Under Fr. O’Donovan’s leadership, innovative academic and philanthropic planning has allowed Georgetown to create a number of new teaching and research initiatives, including:

- Law Casa, a center for research on Latin American law and policy issues, and the Supreme Court of the Law Center.
- The Center for Clinical Bioethics in the Medical Center.
- The Center for German and European Studies, the Center for Australian and New Zealand Studies, and the Center for Muslim-Christian Understanding in the Walsh School of Foreign Service.
- The Center for Social Justice Research, Teaching and Service on the Main Campus.

Achievements in Admissions & Financial Aid

As Georgetown’s academic programs and faculty have advanced in stature, the admissions process has become increasingly competitive. Georgetown accepts between 20 and 25 percent of its approximately 15,000 undergraduate applicants each year and thus ranks among the nation’s most selective institutions.

At the same time, Fr. O’Donovan has worked to ensure the accessibility and affordability of a Catholic and Jesuit education, maintaining its need-blind/full-need admissions policy and increasing significantly the amount of University funding appropriated annually for undergraduate aid. Institutional scholarship aid for undergraduates increased from $14 million in 1989 to more than $34.5 million in 2000-01. Each year more than 35% of the students at Georgetown receive some form of financial assistance. Including federal and private, grant, loan, and work-study programs, Georgetown awards a total of $67.5 million in undergraduate financial aid in 2000-01. Among the recent additions to financial aid resources are the Pedro Arrupe, S.J., Scholarship for Peace fund, generated by a generous anonymous gift to enable students from war-torn regions of the world to attend Georgetown, and a special scholarship fund financed by the William and Louise Haskins’ bequest for graduates of District of Columbia schools.

In 2000-01, the Law Center again received more applications than any law school in the nation, and more than 8,600 were applied for 717 seats in the School of Medicine. One of every four medical school applicants in the country applies to Georgetown. In addition, applicant’s LSAT scores continue to be well above average. Average LSAT scores of entering law students are in the 95th percentile nationally.

Diversity at Georgetown

In 2001, in an independent survey published in Black Enterprise, Georgetown was ranked number one among non-historically black colleges and universities as a place where African American students feel that their aspirations are supported. In 1999, the publication Hispanic Business ranked MBA programs and law schools in terms of places where Hispanic students were most likely to succeed. Approximately 22% of Georgetown’s undergraduate class of 2004 are international students and students from minority and ethnic backgrounds. Each year, around 10% of the first or second among highly selective private institutions in the number of applications by African American students.

Georgetown’s Law Center has become one of the most diverse in the nation, second only to Howard University in the number of African American attorneys graduated in the U.S. During Fall 2000, minorities made up 29.3 percent of the students in the J.D. program. The percentage of minority students in the School of Medicine has increased from 20 percent in 1994 to more than 28 percent in 2000.

Of the undergraduate students enrolled during Fall 2000 who indicated a religious preference, more than half (55.3 percent) indicated that they are Roman Catholic. About 25 percent reported another Christian denomination, while about five percent indicated they are of the Jewish faith. About three percent of the undergraduates stated that they are Muslim, two percent are Hindu and one percent are Buddhist. About seven percent indicated no religion and about four percent indicated some other religious preference. About eight percent of all undergraduate students specified a religious preference and about 2.5% indicated some other religious preference.

Georgetown also has made significant strides throughout the faculty and administration. Among Fr. O’Donovan’s administrative appointments have been the first women to serve as President and Vice President of the School of Medicine, Vice President and Treasurer, and Vice President and General Counsel.

Georgetown’s Catholic and Jesuit Identity

Throughout his tenure, Fr. O’Donovan has led Georgetown’s efforts to develop further the spiritual dimension of Georgetown’s campus and intellectual life. During the past 12 years, in addition to the new academic centers listed above, the University has launched innovative initiatives in Catholic Studies and Jewish Studies. Georgetown’s nationally recognized retreat programs have grown significantly, offering a broad range of retreat options to all members of the University community, with specific retreats for those of the Catholic, Protestant, Muslim, Orthodox Christian, and Jewish faiths. The University has hosted a wide range of conferences, symposia, and lectures devoted to religious issues and topics.

In 1995, Fr. O’Donovan initiated a University-wide dialogue about ways in which the University might further deepen its Catholic and Jesuit identity. As a result of this process, in 1997, he charged a faculty-led task force to make specific recommendations about steps Georgetown could take to enhance its identity. The task force filed its report in 1998. Fr. O’Donovan then invited the entire University community to respond to this report and in May 1999 appointed four faculty committees to begin developing implementation strategies for some of the recommendations. Following the work of the faculty committees, in September 2000, Fr. O’Donovan launched a series of initiatives aimed at enhancing Georgetown’s Catholic and Jesuit identity. These included:

- Inaugurating a second chair in Catholic Social Thought using a new endowment obtained by the University—the first chair, inaugurated last academic year, is currently held by the Rev. John P. Langan, S.J.
- Promoting dialogue among faculty about Jesuit pedagogy through the work of the Center for the Study of Catholic and Jesuit Identity.
- Launching the Center for the Study of Catholic and Jesuit Identity for Peace (CNDLS), a new center that will make these discussions a part of its overall mission.
- Supporting Jesuit recruitment through the establishment of a standing committee of Jesuits and other faculty members.
- Enhancing faculty diversity with increased funding for recruitment—Georgetown has already successfully recruited three new minority faculty members; and
- Augmenting the Social Justice Research, Teaching and Service to focus on expanding the ways that Georgetown integrates research and service into academic life.

To articulate the strong Catholic and Jesuit foundation of the University, Fr. O’Donovan also charged a faculty committee led by the Provost Dorothy Brown to draft a University mission statement. In September 2000, Georgetown’s Board approved the mission statement submitted by the committee for final approval by the University community.

New Investments in Space and Facilities

Throughout his tenure, Fr. O’Donovan has been dedicated to developing strategies for effective and long-term capital investment. More than $82 million dollars has been invested in the renovation of all undergraduate
student housing. In Fall 2000, the University broke ground for the Southwest Quadrangle, a $168.5 million construction project on schedule for completion in the fall of 2003. The approval allows the University to proceed with construction and renovation plans for all buildings proposed in the plan, including modifications to hospital facilities proposed by MedStar Health. New facilities for the sciences, performing arts, and the McDonough School of Business are also part of the Master Plan, and major gifts for these have been raised through Georgetown's Third Century Campaign.

Recent campus development at the Law Center includes the completion of the Gewirz Student Center, which provides the campus' first on-site housing for law students, and the opening of a new wing of the campus' central building, which includes technologically advanced classrooms and seminar rooms and expanded student activity space. Current projects include construction of a new academic health center on the Law Center property Georgetown purchased two years ago.

Important new strategic investments include the acquisition of the Wormley School building on Prospect Street and the National Academy of Sciences buildings on Wisconsin Avenue. At the Medical Center, a new wing was completed at the Hospital in 1993, and a new research building was dedicated in 1995.

GROWTH AND ACHIEVEMENTS IN ATHLETICS

During Fr. O'Donovan's tenure as president, Georgetown's Athletic Program has regularly undergone reviews, has been found in compliance with Title IX, and has received NCAA certification. Georgetown instituted women's soccer as a varsity sport and elevated women's lacrosse to a national level sport. The University also expanded the number of scholarships for women athletes. Men's ice hockey was elevated to Division 1 status, making the Hoyas one of the nation's premier teams. The Hoyas have won the National Championship in Men's Soccer twice and are one of the nation's premier women's soccer programs. Men's lacrosse has grown in stature to become a nationally ranked team. The University also expanded the number of scholarships for women athletes. Women's basketball, soccer, and softball received NCAA certification. Georgetown continues to regularly undergo reviews, has been found in compliance with Title IX, and has received NCAA certification.

MAJOR ADMINISTRATIVE PROJECTS

With the rise of managed care, the decline of government funding for health care, and other factors, Georgetown faced serious financial challenges at the Medical Center throughout Fr. O'Donovan's tenure. To address the Medical Center's increasing budget deficits, Fr. O'Donovan established a strong focus on cost cutting, revenue enhancement, and other management strategies. In 1999, the Medical Center was able to sign a letter of commitment to pursue exclusive negotiations to form a clinical partnership with MedStar Health, a non-profit regional health care system. In June 2000, Georgetown instituted a historic partnership agreement with MedStar in which MedStar assumed all responsibility for the operations of the clinical enterprise, which includes a 335-bed hospital, a faculty practice group, and a network of community physician practices. Georgetown continues to undertake similar projects that directly benefit the District and its residents. Two of those grants expanded the work done by Georgetown faculty and students in the Archdiocese's Catholic elementary schools, which are served by Georgetown's large corps of DC Reads literacy tutors. Dedicated as well to responsible non-profit citizenship, the University also made a $1 million founding investment to help launch City First Bank, which opened in 1999 to assist individuals and businesses in under-served communities.

Fr. O'Donovan led the development of a comprehensive strategy to build stronger relationships between the University community and its surrounding neighbors. He created the position of Assistant Vice President for External Relations to promote improved communication and collaboration between the University and the local D.C. community. In recent years, Georgetown has decreased the number of undergraduate students living off campus, instituted special beeth inside pickup at the beginning and close of each academic year, and advanced its plans to build a new 780 bed residence hall complex.

In June 2001, the University inaugurated a new University Health and Wellness Center to serve the children of faculty, students, and staff, the Hoya Kids Learning Center, a child development and pre-school facility, was established in 1997 on the Main Campus. Scholarships for families in need are funded by the Office of the President.

HONORING STANTON ENGLEHART

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. McINNIS. Mr. Speaker, I stand here today to honor a man who stretches the imagination, and who uses paint to express what words cannot about Colorado, and about the beauty of our nation. Stanton Englehart has been an active participant in bringing art to communities around Colorado.

Stanton Englehart has long been recognized as one of the most prominent painters of the Southwest. He carries the honor of Professor Emeritus of Fine Art at Fort Lewis College, and his popularity and enthusiasm has brought him international recognition. He says, "I hope my paintings express some of the beauty and mystery of the earth and the sky above it. . . . The paintings are most about energy and its power as a creative force in all things."

Stanton selflessly shares that energy with just about anyone who asks him. Charlie Langdon of The Durango Herald, says that when asked by an audience member at a lecture, "Mr. Englehart would be in more Colorado arts centers, he answered, "Just call me, and tell me how much wall space you have. I'll pack a show for you and truck it to your door." Incredibly, Stanton turns out about a hundred paintings a year. Many of them are enormous." All told, he has created more than 1200 paintings, some 21 feet wide. To ensure that those without the funds to enjoy his art can do so, he donates many paintings to public institutions.
TRIBUTE TO MELANIE STOKES
HON. BOBBY L. RUSH
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. RUSH. Mr. Speaker, I rise today to honor the memory of Melanie Stokes and all women who have suffered in silence from postpartum depression and psychosis with the introduction of the Melanie Stokes Postpartum Depression Research and Care Act.

Chicago native, Melanie Stokes was a successful pharmaceutical sales manager and loving wife of Dr. Sam Stokes. However, for Melanie, no title was more important than that of mother. Melanie believed motherhood was her life mission and fiercely wanted a daughter of her own. This dream came true on February 23, 2001 with the birth of her daughter, Sommer Sky. Unfortunately, with the birth of her daughter, Melanie entered into a battle for her life with a devastating mood disorder known as postpartum psychosis. Despite a valiant fight against postpartum psychosis, which included being hospitalized a total of three times, Melanie jumped to her death from a 12-story window ledge on June 11, 2001.

Melanie was not alone in her pain and depression. Each year over 400,000 women suffer from postpartum mood changes. Nearly 80 percent of new mothers experience a common form of depression after delivery, known as “baby blues.” The temporary symptoms of “baby blues” include mood swings, feelings of being overwhelmed, tearfulness, and irritability, poor sleep and a sense of vulnerability. However, a more prolonged and pronounced mood disorder known as postpartum depression affects 10 to 20 percent of women during or after giving birth. Even more extreme and rare, postpartum psychosis, whose symptoms include hallucinations, hearing voices, paranoia, severe insomnia, extreme anxiety and depression, strikes 1 in 1,000 new mothers. Postpartum depression and psychosis affect new mothers indiscriminately. Many of its victims are unaware of their condition. This phenomena is due to the inability of many women to self-diagnose their condition and society’s general lack of knowledge about postpartum depression and psychosis and the stigma surrounding depression and mental illness. Untreated, postpartum depression can lead to self-destructive behavior and even suicide, as was the case with Melanie. As was seen recently in the case of Andrea Yates of Houston, Texas who drowned her five children, postpartum depression and psychosis can also have a dire impact on one’s family and society in general.

In remembrance of Melanie Stokes and all the women who have suffered from postpartum depression and psychosis, as well as their families and friend who have stood by their side, I am introducing the Melanie Stokes Postpartum Depression Research and Care Act which will:

Expand and intensify research at the National Institute of Health and National Institute of Mental Health with respect to postpartum depression and psychosis, including increased discovery of treatments, diagnostic tools and educational materials for providers;

Provide grants for the delivery of essential services to individuals with postpartum depression and psychosis and their families, including enhanced outpatient and home-based health care, inpatient care and support services.

It is my hope that through this legislation we can ensure that the birth of a child is a wonderful time for the new mother and family, and not a time of mourning over the loss of yet another mother or child.

INSULAR AREAS OVERSIGHT AVOIDANCE ACT
HON. ROBERT A. UNDERWOOD
OF GUAM
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. UNDERWOOD. Mr. Speaker, today I would like to reintroduce the Insular Areas Oversight Avoidance Act, legislation I previously introduced during the 106th Congress. This legislation, which is cosponsored by Congresswoman DONNA CHRISTIAN-CHRISTENSEN from the Virgin Islands and Resident Commissioner ANIBAL ACEVEDO-VILA of Puerto Rico, seeks to hold the federal government more accountable in the manner that federal policy is developed towards the insular areas, which include Guam, the Virgin Islands, the Commonwealth of Puerto Rico, American Samoa, and the Commonwealth of the Northern Mariana Islands. The bill would require that the Office of Management and Budget explain any omission of any insular area from policy treatment as part of the United States in any policy statement issued by the Office of Management and Budget on federal initiatives or legislation.

The impetus for the bill is to improve federal-territorial relations and to encourage greater use of government resources in a more cost-efficient manner. Given our geographical distance from Washington, D.C., and our political status as territories, it is very difficult for insular area officials to sometimes be heard at the federal level. We face repeated challenges in ensuring that the insular areas are not forgotten in federal initiatives and policies on a daily basis, whether it be international treaties, Presidential Executive Orders, proposed legislation by the Executive Branch or Congressional Members, or federal regulations.

It is my belief that the U.S. insular areas should be considered at the outset of the development of federal policies, including Presidential initiatives. I believe that such consideration would be a more effective way of ensuring that all Americans—in the fifty states, the District of Columbia, and the insular areas—are treated fairly.

The failure of the federal government to contemplate the impact of the insular areas in federal initiatives often results in the need for the federal government to expend an exorbitant amount of resources and energy to either rectify the “oversight” through legislation or through extensive and sometimes futile negotiations with federal agency officials.

An example of such a situation is the way in which U.S. Treasury Department officials negotiate international tax treaties. There are around 75 international tax treaties that the U.S. has negotiated with other countries. The treaties govern the bi-lateral relationships the U.S. has with other countries on tax matters, including foreign investment withholding rates.

In its definition of the term “United States,” there are several definitions used by U.S. negotiators. The most commonly employed definition explicitly excludes Guam and the other insular areas by name. Another definition explicitly includes the United States as comprising the “United States.”

Currently, the Congress is considering legislation I introduced, H.R. 309, the Guam Foreign Investment Equity Act, which is trying to rectify Guam’s exclusion in the case of international tax treaties. H.R. 309 provides the Government of Guam with the authority to tax foreign investors at the same rates as states under U.S. tax treaties. The bill passed the House on May 1, and is awaiting Senate consideration.

I would not have to be pushing for the Guam Foreign Investment Equity Act if the federal government had contemplated its impact on the insular areas, including Guam, when the current U.S. tax treaties with other countries were negotiated.

To understand why this “oversight” is detrimental to Guam and the federal government, let me give you an overview of how this action has stymied economic development on Guam. Currently, under the U.S. Internal Revenue Code, there is a 30% withholding tax rate for foreign investors in Guam. Since Guam’s tax law “mirrors” the rate established under the U.S. Code, the standard rate for foreign investors in Guam is 30% since Guam is not included in the definition of United States for international tax treaties. As an example, the U.S. withholding rate for foreign investors is 10%. That means while Japanese investors are taxed at a 10% withholding tax rate on their investments in the fifty states, those same investors are taxed at a 30% withholding rate on Guam. As 75% of Guam’s commercial development is funded by foreign investors, such an omission has deprived Guam of attracting foreign investment opportunities.

Other territories under U.S. jurisdiction have already remedied this problem or are able to offer alternative tax benefits to foreign investors through delinkage, their unique covenant agreements with the federal government, or through federal statute. Guam, therefore, is the only state or territory in the United States which is unable to provide this tax benefit or to offer alternative tax benefits for foreign investors.

The Insular Areas Oversight Avoidance Act would be helpful to insular area governments and the federal government by requiring that
situations like the U.S. negotiations on international tax treaties are for the good of all U.S. jurisdictions in the country, not just the fifty states. I urge the U.S. government is currently renegotiating with Japan on the tax treaty between our two countries. While I hope that Guam is not excluded from being part of this treaty, the record of U.S. negotiators on previous tax treaties does not provide me any level of comfort. This is a perfect example of why the bill I have introduced today is needed.

KLAMATH BASIN GOVERNMENT- CAUSED DISASTER COMPENSATION ACT

HON. WALLY HERGER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. HERGER. Mr. Speaker, principles of fairness and justice demand that the Government not force some people to bear burdens, which should rightfully be borne by the public as a whole. However, that is precisely what is happening in the Klamath Basin in northern California and southern Oregon because of the Endangered Species Act (ESA), and today I rise, joined by my Oregon colleague, Congressman GREG WALDEN, to introduce legislation to address that.

The ESA has strayed far from its original mission. It was never intended to sacrifice human health and safety and economic well-being. Yet, the fact remains that under the guise of species protection, constitutionally-protected property rights are being trampled, local economies are being destroyed, families are being forced into bankruptcy and, in many cases, human health and safety are being jeopardized. There is little consideration given to the human species under the ESA. Once a species is “listed,” its needs must come first—before the rights and livelihoods of American people. As it is currently being implemented, the ESA requires species protections at any and all costs.

Regrettably, rural Western communities are disproportionately bearing the burdens and costs associated with species protection, burdens which should rightfully be borne by the public. The zero-water decision that was recently handed down in the Klamath Basin in northern California and southern Oregon has resulted in the taking by reducing contractual water deliveries to a mere percentage of their contract amounts because of pumping or other water use restrictions driven by the ESA. A rural area in my northern California Congressional District has incurred millions of dollars in excess costs on critically important infrastructure improvement projects because of ESA-mandated mitigation. In this same area a much-needed high school continues to be delayed at taxpayer expense because of the ESA. There are many examples, but the fact remains that people are suffering economically because of the implementation of the ESA.

These requirements and restrictions are, simply, an unfunded federal mandate. The federal government should not force some to bear the costs, but should bear the burden itself, or, if it cannot pay or is not willing to pay, then it should avoid the action altogether. Or, it must find some middle ground. That is simple accountability.

For these reasons, Mr. Speaker, I rise today to introduce the Klamath Basin Government-Caused Disaster Compensation Act. It requires the Secretary of the Interior to fully compensate the individuals of the Basin who have been economically harmed as a result of the restrictions that have been placed on the operations of the Klamath Project. Such payments would come from within the Department of Interior’s budget. This legislation sends a resounding message to Washington that if the federal government is going to force this kind of social and economic harm on rural America through its laws, it will be held accountable. And if rebukes these costs as unacceptable, then it will face the question of whether this kind of species protection—recklessly imposing requirements that may or may not benefit species, but that will certainly carry significant costs to real people—is a goal all Americans truly want, and if so, whether they’re willing and prepared to share the impacts.

Ultimately, the ESA itself must be modernized if we are to ensure that people and communities come first. However, real people can bear the burden as the direct result of the federal government’s actions in the Klamath Basin, and while the long-term social and other hidden impacts from this decision can never be fully mended, fairness and justice demand that the federal government step in to rectify the economic harm that it has caused.

TRIBUTE TO McNeiL FAMILY FOR 2001 NATIONAL WETLANDS AWARD

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to offer my congratulations to a couple that has taken extensive efforts to promote land stewardship, wetlands conservation, research and education in the Klamath Basin. Mike and Cathy McNeil have truly exemplified the ideals honored with the 2001 National Wetlands Award of the Natural Resources Conservation Service, the U.S. Environmental Protection Agency and the Environmental Law Institute and I would like to add my thanks and appreciation to their labors.

Nested on the edge of Rock Creek just south of Monte Vista and neighborly by the Monte Vista National Wildlife Refuge, the McNeil ranch is the fourth-generation operation. Understanding the importance of responsible development and the intersection with environmental preservation, the McNeils have launched the Rock Creek Heritage Project— an effort which protected nearly 15,000 acres of farm and ranch land in the Rock Creek Watershed. This collaborative effort, involving 27 landowners, accentuates aspects including land protection, watershed enhancement, training in holistic management, community building and support for value-added marketing of agricultural products. Extending beyond land matters, the McNeils have adopted innovative calving patterns to provide their 800 mother cows warmer birthing periods during June and July rather than throughout the cooler winter months utilized by most ranchers in the area. In all of these endeavors the McNeils have exhibited innovation, excellence and outstanding effort.

Mr. Speaker, Mike and Cathy have been united in matrimony for 20 years and have the blessing of their daughter Kelly who is 14 years of age. The teachings of her parents are allowing Cathy to value and preserve the heritage from which she comes, through the extraordinary contributions of the McNeils, wetland protection and stewardship have been heralded and an example has been established for others to follow in order to obtain ecological health while not compromising agricultural profitability. The National Wetlands Award will be one of many awards that the McNeils have garnered from their hard work— alongside the distinct recognition of being the Colorado Association of Soil Conservation District’s Conservationists of the Year in 1999 and the 2001 Steward of the Land Award issued by the American Farmland Trust. The McNeils deserve to be applauded on a job well done and I, along with my colleagues, thank them for their sustained efforts in this critically important realm and foundation to life.
Mr. HEFLY. Mr. Speaker, I rise to speak today about an organization—which is headquartered in my district and has had an immeasurable impact on America. The history of Junior Achievement is a true testament to the indelible human spirit and American ingenuity. Junior Achievement was founded in 1919 as a collection of small, after-school business clubs for students in Springfield, Massachusetts.

As the rural-to-city exodus of the populace accelerated in the early 1900s, so too did the demand for workforce preparation and entrepreneurship. Junior Achievement students were taught to develop their accomplishments and build the financial support of companies and individuals. Junior Achievement recruited numerous sponsoring agencies such as the New England Rotarians, Boys Scouts, Girl Scouts, Boys & Girls Clubs the YMCA, local churches, playground associations and schools to provide meeting places for its growing ranks of interested students.

In a few short years JA students were competing in regional expositions and trade fairs and rubbing elbows with top business leaders. In 1925, President Calvin Coolidge hosted a reception on the White House lawn to kick off Junior Achievement’s expansion. By the late 1920s, there were nearly 800 JA Clubs with some 9,000 Achievers in 13 cities in Massachusetts, New York, Rhode Island, and Connecticut.

During World War II, enterprising students in JA business clubs used their ingenuity to find new and different products for the war effort. In Chicopee, Massachusetts, a contract to manufacture 10,000 pant hangers for the U.S. Army. In Pittsburgh, JA students developed a specially designed box to carry off incendiary devices, which was approved by the Civil Defense and sold locally. Elsewhere, JA students made baby incubators and used acetylene torches in abandoned locomotive yards to obtain badly needed scrap iron.

In the 1940s, leading executives of the day such as S. Bayard Colgate, James Cash Penney, Joseph Sprang of Gillette and others helped the organization grow rapidly. Stories of Junior Achievement appeared in national magazines. In the early 1990s, a sequential curriculum for grades K-6 was launched, catalyzing the organization into the classrooms of another one million elementary school students.

Today, through the efforts of more than 100,000 volunteers in the classrooms of America, Junior Achievement reaches more than four million students in grades K-12 per year. JA International takes the free enterprise message of hope and opportunity even further to more than 1.5 million students in 111 countries. Junior Achievement has been an influential part of many of today’s successful entrepreneurs and business leaders. Junior Achievement’s success is truly the story of America—the fact that one idea can influence and benefit many lives.

Mr. Speaker, I am proud to have Junior Achievement in my district and proud of its many successes over the years. It is my hope this great organization continues to prosper and benefit many in the years to come.

EXTENSIONS OF REMARKS

HON. JOEL HEFLY
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. HEFLEY. Mr. Speaker, I rise to speak today about an organization—which is headquartered in my district and has had an immeasurable impact on America. The history of Junior Achievement is a true testament to the indelible human spirit and American ingenuity. Junior Achievement was founded in 1919 as a collection of small, after-school business clubs for students in Springfield, Massachusetts.

As the rural-to-city exodus of the populace accelerated in the early 1900s, so too did the demand for workforce preparation and entrepreneurship. Junior Achievement students were taught to develop their accomplishments and build the financial support of companies and individuals. Junior Achievement recruited numerous sponsoring agencies such as the New England Rotarians, Boys Scouts, Girl Scouts, Boys & Girls Clubs the YMCA, local churches, playground associations and schools to provide meeting places for its growing ranks of interested students.

In a few short years JA students were competing in regional expositions and trade fairs and rubbing elbows with top business leaders. In 1925, President Calvin Coolidge hosted a reception on the White House lawn to kick off Junior Achievement’s expansion. By the late 1920s, there were nearly 800 JA Clubs with some 9,000 Achievers in 13 cities in Massachusetts, New York, Rhode Island, and Connecticut.

During World War II, enterprising students in JA business clubs used their ingenuity to find new and different products for the war effort. In Chicopee, Massachusetts, a contract to manufacture 10,000 pant hangers for the U.S. Army. In Pittsburgh, JA students developed a specially designed box to carry off incendiary devices, which was approved by the Civil Defense and sold locally. Elsewhere, JA students made baby incubators and used acetylene torches in abandoned locomotive yards to obtain badly needed scrap iron.

In the 1940s, leading executives of the day such as S. Bayard Colgate, James Cash Penney, Joseph Sprang of Gillette and others helped the organization grow rapidly. Stories of Junior Achievement appeared in national magazines. In the early 1990s, a sequential curriculum for grades K-6 was launched, catalyzing the organization into the classrooms of another one million elementary school students.

Today, through the efforts of more than 100,000 volunteers in the classrooms of America, Junior Achievement reaches more than four million students in grades K-12 per year. JA International takes the free enterprise message of hope and opportunity even further to more than 1.5 million students in 111 countries. Junior Achievement has been an influential part of many of today’s successful entrepreneurs and business leaders. Junior Achievement’s success is truly the story of America—the fact that one idea can influence and benefit many lives.

Mr. Speaker, I am proud to have Junior Achievement in my district and proud of its many successes over the years. It is my hope this great organization continues to prosper and benefit many in the years to come.

FHA-INSURED HOSPITAL CONVERSION AND REINVESTMENT ACT

HON. JOHN J. LAFLAC
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. LAFLAC. Mr. Speaker, today I am introducing the “FHA-insured Hospital Conversion and Reinvestment Act.” This legislation authorizes HUD to reinvest profits from FHA loan insurance programs, including those for health care, in FHA-insured hospitals. The Department of Housing and Urban Development (HUD) insures billions of dollars of loans for hospitals under the FHA Section 242 hospital loan program. According to the Administration’s fiscal year 2002 budget, FHA hospital and health care loan insurance programs are projected to make a profit for federal taxpayers of some $32 million next year. In addition, all FHA loan programs combined will make a profit of over $2.7 billion next year for the federal taxpayer.

Currently, all of these FHA profits are used to increase the federal budget surplus. The legislation I am introducing today would authorize HUD to use some of these profits generated by FHA to proactively assist FHA-insured hospitals, either for the purpose of converting excess hospital capacity to related health care use or for the purpose of paying debt service for FHA-insured hospitals.

Conversion of excess capacity helps the hospital which converts and the community it serves. It allows better use of hospital space in a way that is more responsive to the needs of the local community. Conversion also improves the ability of all hospitals in the local area to meet community health needs by reducing over-capacity and allowing some flexibility in the use to which the existing infrastructure can be put. Under my proposed legislation, conversion of excess hospital capacity is authorized for a range of purposes, including supportive housing for the elderly, assisted living, and nursing home beds—health care needs that may be more substantial for many communities than in-hospital care.

The authority under by legislation to use FHA surplus to pay debt service for FHA-insured hospitals is intended to safeguard FHA’s pre-existing investment. Such use is contingent on a determination by HUD that such assistance would reduce the risk of default and loss on the FHA-insured loan, and would improve the financial soundness of the hospital assisted. This new authority has the effect of giving HUD similar loss mitigation tools to those it currently has with respect to single-family and multi-family FHA-insured loans.

Congress has long recognized that pro-active loss mitigation is of financial benefit to the FHA insurance fund. For example, HUD gives wide latitude to servicers of FHA-insured single-family loans to restructure debt, including making partial claims, in order to forestall foreclosures. This can be financially advantageous to the FHA fund, since foreclosures typically create a much larger loss to the fund.

The ability to conduct loss mitigation with respect to hospital loans is further complicated by the fact that many FHA-insured hospital loans are structured as public bond offerings. This makes it very difficult to restructure loans, without calling the bonds. Allowing HUD to advance funds to pay debt service obviates the need to call bonds, while allowing HUD to proactively address looming financial problems, and avert foreclosure.

This legislation would help FHA-insured hospitals nationwide, but would be of particular benefit to hospitals within the state of New York, which has one of the highest percentages of FHA-insured hospitals nationwide.

Hospitals within our state have adapted to a wide range of challenges, including Medicare cuts, squeezed reimbursement rates from private insurers, and the transition to a de-regulated environment. Community hospitals, with their lack of access to capital, face particular challenges. The least we can do is reinvest profits from federal hospital loans in the hospitals which have generated these profits.

This legislation does precisely that. I urge Congress to adopt it and would welcome the support of my colleagues.

TRIBUTE TO LIMERICK TOWNSHIP

HON. JOSEPH M. HOEFFEL
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. HOEFFEL. Mr. Speaker, I rise today to congratulate Limerick Township in Montgomery County, Pennsylvania on its 275th Anniversary. Native Americans of the Delaware
tribe were the original inhabitants of this area followed later by William Penn, who in 1682, purchased large tracts of land from the Native Americans. He developed a love for photography. He then began to photograph the abandoned mines and quarries in the Pocono Mountains. His photography has won numerous awards, and helped make others aware of the beauty in Colorado that needs to be preserved. John's artistic ability does not stop with his photos; he is also a talented violinist who performs with chamber groups, and at fundraisers. It seems that John's talent and ability is boundless. The contributions that John has made to the artistic community of the State of Colorado, not to mention the nation, is why I believe, Mr. Speaker, that John Ninneman is worthy of the praise of Congress. The black and white photos that he has taken will live forever as a reminder to all how beautiful the United States is to all that view them. I thank John for sharing his amazing talents with the public.

"RENEWABLE ENERGY AND ENERGY EFFICIENCY ACT OF 2001" ("REEA")

HON. LYNN C. WOOLSEY
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Ms. WOOLSEY. Mr. Speaker, this week I introduced the "Renewable Energy and Energy Efficiency Act of 2001" ("REEA"). This bill is a blueprint for the House Science Committee as we develop legislative priorities for the renewable energy and energy efficiency programs at the Department of Energy (DOE). The Committee's role in the national energy debate is unique, because we are required to envision the future energy needs of our country, and determine the direction of DOE's research, development and demonstration (RD&D) programs. As the Ranking Member on the Science Committee's Energy Subcommittee, this bill is my statement on our priorities.

We must establish a more level playing field for renewable energy sources, so we can reduce our reliance on coal and fossil fuels. We must encourage the development of "green industries" through increased emphasis on energy efficiency technologies. We must expand those energy sources that will contribute to a more sustainable, long-term energy future. Increased federal investment in renewable energy sources and energy efficiency technologies is smart public policy because for every dollar invested in current DOE sustainable energy programs, the benefits total $200.

My vision for our energy future is that by the year 2020, twenty percent of our energy will be generated from renewable sources. Environmental groups agree, because we cannot continue to focus our priorities on limited fossil fuel sources. Unfortunately, our federal commitment to the RD&D programs that will help us meet this goal has declined significantly since 1980. This bill is a bold effort to reverse this funding scenario by outlining a robust R&D program to fund an aggressive energy efficiency agenda.

The comment I've heard most often from the renewable energy community is that a critical element of any successful R&D program is a stable funding stream that gradually increases over time. That's why over the next five fiscal years, "REEA" authorizes total funding for DOE renewable energy programs at $3.735 billion, and energy efficiency at $5.185 billion with an additional $300 million for NASA to work on aircraft energy efficiency. If Americans are to have a secure energy future, with reliable, clean and environmentally-friendly energy sources, we must invest in renewable energy sources and make great strides in energy efficiency, so we can reduce our overall energy consumption. This means increasing support for wind, solar, geothermal and biomass energy sources.

We must also ensure that promising renewable energy and energy efficient technologies, like hydrogen fuel cells, are given commercialization assistance so that individual consumers can afford to use them. My bill establishes a competitive grant program at DOE so that private sector entities can help advance development of new technologies. Many creative and entrepreneurial individuals need only access to financial assistance to demonstrate the successful application of their renewable energy or energy efficiency technology. That's why this bill directs that at least fifty percent of the $1 billion provided for such assistance goes to small businesses and startup companies.

Mr. Speaker, for too long we have overlooked renewable energy sources when setting our energy priorities. Now is the time for a responsible energy policy that makes significant investments in clean energy sources to supplement our current energy use. We must ensure that we prevent a repeat of the energy shortages Californians and West Coast residents now face. "REEA" will be a big step toward protecting our environment, and guaranteeing a better future for our children.

IN SUPPORT OF THE LOW INCOME FAMILIES FLOOD INSURANCE ACCESS ACT

HON. GENE GREEN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. GREEN of Texas. Mr. Speaker, as we witnessed the damage wrought by Tropical Storm Allison after it went through Texas and up the East Coast, the importance of the National Flood Insurance Program (NFIP) really hit home. Thousands of my constituents suffered substantial flood damage to their homes and businesses, but some of these losses were mitigated because they had federal flood insurance.

Unfortunately, not all my constituents who needed flood insurance could afford to purchase a policy. Because of a recent redraw of Houston’s Flood Insurance Rate Map (FIRM) many of my low-income folks were brought into the 100-year flood plain, but could not afford the insurance. As a consequence of my constituents’ experience, I rise today to introduce the Low Income Families Flood Insurance Access Act.

This legislation helps bridge the insurance gap between those that can afford a flood policy and those that cannot. The bill would provide discounted flood insurance over a five-
June 29, 2001

EXTENSIONS OF REMARKS

GINA UPCHURCH RECEIVES COMMUNITY HEALTH LEADER AWARD

HON. DAVID E. PRICE
OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. PRICE of North Carolina. Mr. Speaker, I want to offer my congratulations to Gina Upchurch, one of 10 recipients of the 2001 Robert Wood Johnson Community Health Leader Award. Ms. Upchurch has earned this honor for her pathbreaking work with the Senior PHARMAssist Program based in Durham, North Carolina.

Each year, the Community Health Leadership Program recognizes ten individual who have found innovative ways to bring health care to communities whose needs have been ignored or unmet. Ms. Upchurch was selected for this prestigious recognition from a field of 577 nominees.

As founder and executive director of Senior PHARMAssist, Ms. Upchurch created a model to help seniors on limited incomes purchase expensive medications. PHARMAssist monitors the medications of their clients to help prevent life-threatening interactions and provides financial aid to those on limited incomes.

The program has helped more than 2,600 seniors get the medications they need and has educated over 800 older adults about safer usage of medication.

The counseling and support provided by PHARMAssist works. A recent study conducted by the University of North Carolina-Chapel Hill found that emergency room visits and over-night hospital stays had decreased by almost a third for seniors who had been in the program for at least one year.

Ms. Upchurch graduated from UNC with degrees in pharmacy and public health. She served in the Peace Corps in Botswana before returning to North Carolina to write her master's thesis, a policy analysis which recommended a program to provide health care to seniors throughout the state. This laid the groundwork for what eventually became Senior PHARMAssist. She oversees a $500,000 budget and has written a manual to help other communities establish a similar program.

Gina Upchurch has improved health care and helped those in need in our community. I am proud to recognize her achievements today.

DIRECT AIR SERVICE BETWEEN LOS ANGELES INTERNATIONAL AND WASHINGTON’S REAGAN NATIONAL AIRPORTS

HON. JANE HARMAN
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Ms. HARMAN. Mr. Speaker, today I have been joined by a bipartisan group of my colleagues in introducing legislation to preserve direct air service between Washington’s Reagan-National Airport (DCA) and Los Angeles International Airport (LAX).
This legislation is necessary because the Department of Transportation (DOT) decided to eliminate this critical service last Friday. In stead of permitting American Airlines, which purchased TWA, to have the TWA slots to continue to fly this route, the Department awarded them to Alaska Airlines, which will use them to start nonstop service between Washington and Seattle.

The DOT's decision disappointed tens of thousands of Californians and other passengers who have come to rely on this route and its connections to Bakersfield, Fresno, Monterey, Oakland, Palm Springs, San Diego, San Francisco, San Jose, San Luis Obispo, Santa Barbara, and elsewhere in the state.

Without this route, Los Angeles will be the largest U.S. city without non-stop air service to Washington's Reagan-National. In fact, California, the most populous state in the Union, will have no direct connection from Los Angeles to Washington. Earlier this year, 57 Members of Congress—including House Majority Leader Dick Armey and Democratic Leader Richard Gephardt and most Members of the California congressional delegation—wrote the DOT in support of American Airlines' efforts to preserve this critical service.

The legislation introduced today allows American Airlines to use two existing slot exemptions for service between Washington's Reagan National and Los Angeles. As such, it does not increase the total number of flights at Reagan-National and Los Angeles. In fact, this route, the Department of Transportation's (DOT) decision of permitting American Airlines to use two existing slot exemptions for service between Washington's Reagan National and permits Alaska Airlines to fly direct to Seattle.

Mr. Speaker, Californians rely upon nonstop air service between Los Angeles International Airport and Washington's Reagan National Airport. Without congressional action, this convenient nonstop air service will end in September.

I urge all my colleagues to support this legislation.

HONORING THE 125 YEAR HISTORY OF LA VETA, COLORADO

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to pay special tribute to La Veta, Colorado on its 125th Birthday. For over a century, the people of La Veta have contributed a rich heritage and cultural diversity to the state of Colorado. I would like Congress to wish the citizens of La Veta a very happy 125th birthday.

In 1862, Col. John M. Francisco, a former settler with the US Army at Fort Garland, and Judge Henry Daigle built Fort Francisco on land purchased from the Vigil-St. Vrain Land Grant, significantly south west of most of the San Luis Valley bound traffic. When Col. John Francisco looked down on the future site of La Veta in the mid 1850's he said, "This is paradise enough for me." The town of La Veta was incorporated on October 9, 1876.

As more settlers moved into this beautiful and fertile valley, the Fort increased in importance as shelter from Indians and as the commercial center for the area. The first Post Office, named Spanish Peaks, opened in the Plaza in 1871. By 1875 the business was almost completely gone. In 1876 the narrow gauge railroad came through La Veta several blocks north of the Fort on its way westward through the newly surveyed La Veta Pass. In 1877 the permanent rail depot was built beside the rails and the business community slowly moved north toward it. For many years, this stretch of the line between La Veta and Wagon Creek was the highest in the world.

The old depot building at the summit is listed on the National Register of Historic Places. The mountains of the Sangre de Cristo Range were long known by the Indians of the Southwest. Relics of the Basket Weaver Culture have also been found within the county. The Spanish Peaks are a historic landmark to travelers—from the early Indians to the vacationer. Besides being the railroad, La Veta has also been the center of local agriculture and coal mining.

Mr. Speaker, the citizens of Colorado are proud of La Veta's 125-year history. It is an area rich in culture, history and heritage. For that Mr. Speaker, I would like to wish La Veta happy birthday and wish its citizens good luck and prosperity for the next 125 years.

HONORING YAKOV SMIRNOFF ON THE 15TH ANNIVERSARY OF HIS CITIZENSHIP

HON. CHRISTOPHER COX
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. COX. Mr. Speaker, I rise today to pay tribute to Yakov Smirnoff, who will celebrate his 15th anniversary as a United States citizen on July 4, 2001.

When Yakov left the Soviet Union in 1977, he arrived in the U.S. with less than $100 in his pocket. But like so many new immigrants, Yakov quickly found a way to put his talents to use in his new country—and in only a few years he became one of America's most recognized comedians.

Yakov's brand of comedy appealed to so many Americans because it carried real insight. He poked fun at the daily consequences of Soviet tyranny, while displaying a remarkably American irreverence for our own foibles ("In the Soviet Union, I'd line up for three hours just to get a tasteless piece of meat and some stale bread; but in America, you can walk into any fast-food restaurant and get the same thing right away"). But he also reminded us of how fortunate we are to live in a free and democratic nation ("What a country!" became his signature line). In fact, Yakov has said that his comedy has helped him "share his experiences at becoming a real American with the audience."

Yakov's dream of becoming an American citizen was finally fulfilled on July 4, 1986, in a ceremony held at the Statue of Liberty. Describing his joy at the occasion, Yakov says: "I suddenly had two revelations. You can go to Italy but never become Italian. You can go to France but never become French. But you can come to America and become an American."

When freedom came to the formerly captive peoples of the Soviet Empire, Yakov joked that "the end of the KGB eliminated 100 percent of the torture in Russia; 50 percent of the spying—and 30 percent of my punch lines." But in fact Yakov enjoys continued success in his comedic routines. In 1992, he moved to Branson, Missouri, where he owns his own comedy theater and performs to perennially sold-out shows.

Yakov says he will continue to relish having a job that allows him to encourage Americans to cherish the freedom we have to laugh at ourselves—and yes, at our government. "I've learned that the secret to being happy is discovering your gift and having the opportunity to share it with the world," he once said. "As I found out for myself, it can be quite a ride before your gift defines itself and allows you to realize what it is."

Mr. Speaker, I urge my colleagues to join with me in paying tribute to Yakov Smirnoff on the 15th anniversary of his citizenship. He truly embodies what it means to be an American. As we prepare to celebrate the 4th of July, the United States Congress can all join with Yakov and say, "What a country!"
EXTENSIONS OF REMARKS

June 29, 2001

Second, drilling in the lakes threatens fresh waters not salt waters, and a spill would compromise drinking water for millions.

Third, drilling in and along the lakes would yield only miniscule increases in energy supply for our nation. When the risks are so high and rewards so low, it makes no sense to move forward with plans to implement drilling of any kind.

Finally, I wish to highlight an often overlooked fact about Michigan's relationship with the Great Lakes. They are the foundation of our state's robust tourism industry. In fact, tourism is the second largest industry in our state.

Americans from throughout the Midwest and beyond come to our lakeshores for recreation and relaxation. Just as Florida fears significant negative economic consequences when fuel spills threaten her coastline, so does Michigan.

The Great Lakes supply fresh water to many. They offer recreational resources to millions. They contribute to the ecology of a significant portion of the United States. We would be foolish to endanger.

Vote yes on this amendment.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

SPEECH OF
HON. BETTY MCCOLLUM
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes:

Ms. MCCOLLUM. Mr. Chairman, I strongly oppose drilling of any kind beneath the Great Lakes and urge my colleagues to support the Bonior amendment.

Visit Minnesota's North Shore and you will immediately know why.

Lake Superior is a constant source of wonder. It helps shape our landscape and climate, it supports our economy and it enhances our quality of life.

Mr. Chairman, water is a precious resource in my state. We have over 10,000 lakes. Lake Superior, of course, is the most identifiable of Minnesota's lakes. Its familiar wolf head shape visible from outer space.

Did you know the greatest of the Great Lakes (Lake Superior) is over 31,000 square miles, the same size as the entire state of Maine? Lake Superior also holds more fresh drinking water than all the other Great Lakes combined—Lake Ontario, Lake Michigan, Lake Huron, and four Lake Erie's.

Each year, millions of people from all over the world visit the lake in Minnesota for sightseeing, fishing, scuba diving and boating.

Lake Superior serves also to the economies of Minnesota and the entire Upper Midwest. Duluth, Minnesota and Superior, Wisconsin make up the busiest international inland port in America.

Our lakes, especially Lake Superior, are not isolated.

We are a part of a great chain of lakes. What happens in one lake does have an impact in all of the Lakes.

Mr. Chairman, the Great Lakes provide over 35 million people with their fresh drinking water. These lakes constitute twenty percent of the Earth's fresh water, 95% in the United States.

Why would anyone put our nation's largest source of fresh drinking water at risk?

Data from the Michigan Department of Environmental Quality shows that only 28.5% of one day's consumption of natural gas and 2.2% of one day's consumption of oil in the United States has been produced. Not enough for even one day has been produced in over 20 years.

The House last week wisely stopped the President's proposal to drill off the shores of Florida and in our national monuments. The Great Lakes are no less important.

I oppose drilling of any sort for oil and natural gas beneath the Great Lakes. Not because we do not need to find additional resources. We do. These lakes are just too vital to too many families and it's not worth the risk.

We are making progress in using energy more efficiently and reducing our reliance on oil and natural gas through energy efficiency technology and conservation. We must make bigger investments in current programs. Investments don't have to cost money either. We can and we must reduce our consumption by supporting wind and solar power and renewable fuels like ethanol.

Future generations depend on us not to jeopardize our nation's greatest natural resource. An oil spill or any related disaster on the shores of a Great Lake would impact the fresh drinking water for 35 million people. And for what? Less than a day's worth of oil and natural gas.

The Great Lakes are important to this nation. They are important to my state and to millions of families. They have been crucial in the historical and economic development of our communities and they continue to play a significant role in Minnesota, the nation and the world.

I urge my colleagues today to protect the drinking water of future generations. I urge my colleagues to support this important amendment.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

SPEECH OF
HON. CHRISTOPHER H. SMITH
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes:

Mr. SMITH of New Jersey. Mr. Speaker, I would like to express my strong support for setting aside sufficient funding for Beach Protection projects, and to keep the current language in the bill which states that 65 percent of the initial construction costs of beach replenishment projects are to be financed by the Federal Government, and 35 percent of the costs are to be paid by states and local governments.

The fact of the matter is that our beaches are national assets that deserve national protection. Just like our national parks, our beaches are not enjoyed solely by those who live near or on them. Just the opposite is true: our beaches are visited by tens of millions of people from all over the country. Foreign tourists come from all parts of the globe to visit our coasts and beaches.

My good friend, Representative TOM TANCREDO of Colorado, has offered an amendment today to strike language in the bill that directs the Secretary of the Army to honor existing Federal contracts with States, counties, and cities throughout coastal America. Under the gentleman's amendment, the Federal government would essentially shirk its responsibility, and shuffle it onto the shoulders of state and local governments, by switching the cost share ratio to 35 percent federal/65 percent local.

I rise in opposition to this amendment, because it is bad national policy, as well as bad for local taxpayers in coastal communities.

Mr. Speaker, the record is clear: states and local governments have consistently shown their commitment to assist in the preservation and replenishment of beaches along the Nation's coastlines. The proposed 35 percent federal change in cost sharing would result in the delay or elimination of several important Corps of Engineers projects, which would potentially increase the property damage from hurricanes and severe storm events. Additionally, states and localities would not be able to absorb the increased costs without raising taxes or cutting other vital priorities.

Our nation's beaches contribute to our national economy—four times as many people visit our nation's beaches each year than visit all of our National Parks combined. Yet Congress provides copious funding for national parks—as it should. It is estimated that 75% of Americans will spend some portion of their vacation at the beach this year. Beaches are the most popular destination for foreign visitors to our country as well. The amount of money spent by beach-going tourists creates an extensive economic benefit—a portion of which goes back to the Federal government in the form of income and payroll taxes.

So to suggest, as the amendment from Mr. TANCREDO does, that beach protection confers benefits to only a handful of beach-house owners, is simply false. Just look at my own State of New Jersey. Tourism is the second greatest contributor to the New Jersey economy. In 1999, tourism brought $27.7 billion to the State. Out of the 167 million trips made to New Jersey in 1999, 101 million were to the Shore area.

I would also like to thank the Committee for setting aside $413,000 in funds to complete the next stage of the Manasquan Inlet Project, which extends from the Manasquan Inlet to the Barnegat Inlet and includes the beaches of several coastal towns in Ocean County, which are in my district.
Additionally, the Manasquan Inlet is absolutely crucial the fishing industry and the general economic health of the New Jersey metropolitan shore. It is through the Manasquan Inlet that many large deep-sea fishing vessels gain their entry to the ocean and where they can return with their catch. Nearly 22,000 people are employed by the fishing industry in New Jersey, with an economic output of almost $2.1 billion. Protecting the beaches and preventing erosion benefits more than just the tourism industry.

Mr. Speaker, I urge all members of Congress to protect our nation’s beaches, coastal communities and tourism industry by keeping the Federal/Local cost share at 65 percent.

**PCBS IN THE HUDSON RIVER**

HON. MAURICE D. HINCHNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. HINCHHEY. Mr. Speaker, I rise today to commend to my colleagues the following article written by Ned Sullivan on the issue of PCB contamination in the Hudson River of New York. Ned is the highly respected executive director of Scenic Hudson, Inc., a 37 year-old nonprofit environmental organization dedicated to protecting and enhancing the scenic, natural, historic, agricultural and recreational treasures of the Hudson River and its valley. Ned and I have worked together for many years in pursuit of removing sediment contaminated by polychlorinated biphenyls (PCBs) from the “hot spots” in the upper Hudson River, in order to reduce threats to public health, revive local economies, reopen recreational opportunities along the river. I appreciate Ned’s thoughtful analysis of this important issue.

**EXTENSIONS OF REMARKS**

PCBs POSE MAJOR HEALTH THREAT TO NEW YORK CITY, AND BEYOND

HON. MAURICE D. HINCHNEY

OF NEW YORK

June 29, 2001

For decades masses of the invisible, virtually indestructible cancer-causing PCBs that General Electric dumped from its factories on the Upper Hudson have moved down the majestic river, reaching dangerous levels in New York Harbor. They are still coming, clinging fiercely to the river’s shifting silt, threatening the health of millions.

There is no question that GE has the responsibility for cleaning up the worst of them at their source, as the U.S. Environmental Protection Agency has ruled after years of intensive study. In doing so the EPA employed methodologies endorsed by the General Accounting Office (GAO) and worldwide peer review.

GE has mounted a massive advertising and public relations effort aimed at reversing the EPA’s decision. It has a force of seventeen high-powered lobbyists hard at work on the matter in Washington. For good measure the company’s legal battalions have challenged provisions of the U.S. Superfund cleanup laws as unconstitutional.

However these are the facts of the matter:

According to the EPA, the Agency for Toxic Substances and Disease Registry (U.S. Public Health Service) and the World Health Organization among others, PCBs are “an acute and chronic health hazard.” Humans exposed to the lethal substances are subject to skin, liver and brain cancers; respiratory impairments; severe acne-like skin rashes; impaired immune systems, adult reproductive system damage, and perhaps worst of all neurological defects and developmental disorders in the children of exposed females.

David Carpenter, a highly respected former dean of the School of Public Health at SUNY/Albany, has stated: “Our understanding of hazards from PCBs is growing much more rapidly than PCB levels are declining. So over time, the net reason for concern has only gotten greater, not less. Any time you decrease the IQ of your next generation, that’s the ultimate pollution.”

The PCBs enter the food chain through fish and move upward rapidly through animals and humans. EPA health risk assessments rest that humans consuming just one meal of fish from the Hudson River per week are one thousand times more susceptible to cancer.

Unfortunately large numbers of people, including the underprivileged who fish for subsistence and not sport; ethnic groups whose cultures embrace fishing, and even upscale sportspersons whose enjoyment includes cooking the catch, continue to eat Hudson fish in quantity despite the warning signs posted up and down the river.

PCBs build up in the environment, the technical word is bioaccumulate, becoming more concentrated as they move up the food chain to the human level. Less than a month ago, scientists retained by the New York State Department of Environmental Conservation (DEC) released new evidence that the PCBs have been moving from the river’s bottom onto land, where they are contaminating soil and animals along the banks, and in residential back yards.

This stands in sharp contrast to the advertising campaign GE has been waging on the Upper Hudson, showing abundant, flourishing wildlife flying over and splashing in a sparkling river.

The public has not been taken in by GE’s massive disinformation campaign. A statistically valid (plus or minus 3.5 percent) Marist College poll sponsored by Scenic Hudson reveals that 84 percent of those interviewed said the river should be cleaned up. That qualifies as a landslide.

There is no question that the Hudson must be cleaned up. Scenic Hudson has interviewed senior representatives from more than two dozen scientific, academic, governmental and environmental institutions and found every one of them in favor of a clean up. GE stands alone in insisting that science is on its side.

It is high time General Electric honored its obligations to the public.
The Senate met at 12 noon and was called to order by the President pro tempore [Mr. BYRD].

SCHEDULE
Mr. REID. Mr. President, as the Chair announced, we are going to be in morning business until 1 p.m. At 1 p.m. the Senate will begin consideration of the supplemental appropriations bill under the previous order which calls for amendments to be offered prior to 6 p.m.

Over 40 amendments have been filed. I hope and guess that probably all of those will not be offered before 6 o’clock. But I would say to the Chair that I hope Senators will come to the floor and offer those amendments, debate them, so arrangements can be made as to whether the managers will accept the amendments or whether a time will be set in the future for votes. It is the leader’s expectation we will finish this bill tomorrow. There are other appropriations bills we would like to finish this week also. In fact, the leader has every desire to finish the Interior appropriations bill and the supplemental bill this week. We will hear more from the leader at a subsequent time. But these are the two bills we must finish this week, and if we can finish them Thursday, that will be fine. I am sure, if we can’t, the leader will want to go into Friday to complete the bills, or if it takes longer than that. I think they are both capable of being finished very quickly.

There are no rollcall votes today. There will be no rollcall votes until 2:15 tomorrow after the party caucuses.

BIPARTISAN PATIENTS’ BILL OF RIGHTS
Mr. REID. Mr. President, before we adjourned for the recess, the Senate passed the bipartisan McCain-Kennedy-Edwards Patients’ Bill of Rights and proved that protecting patients’ rights is not a partisan issue. We can all be proud of the strong bipartisan compromises we reached which have the support of virtually every health care provider group in this country. This bill has achieved such overwhelming support because it represents a balanced approach to ensuring patient safety and health plan accountability without significantly raising premiums or employer costs.

This landmark legislation will ensure that every privately insured American can enjoy important patient protection. For example, the bill will ensure that patients can have access to emergency room care; women can easily access OB/GYN services; children can access the specialty care they need; patients with ongoing health care needs have continuity of care; and patients can hold their managed care plan accountable when plan decisions to withhold or limit care result in injury or death.

When I went home this past week people said, What does the bill do? Briefly, it is very old-fashioned in nature. It allows a doctor to render care that that doctor believes is appropriate to take care of that patient, whether it be prescribing a medication for surgery or other treatment. That is what the bill does.

Passage of this bill would not have been possible without the dedication and hard work of many people. First of all, the distinguished majority leader, Mr. DASCHLE, was involved in this legislation in its formative stage and every day we were in the Chamber. I think this showed to the American public what most of us have known for many years—that Senator DASCHLE really is a great leader. He indicated we were going to finish the bill before the Fourth of July break. Some people smiled, some snickered, and some thought it would be totally impossible. But it was done. It was done with all amendments being offered. Cloture was not filed. It was the way legislation should move. We spent some long hours in this Chamber, but as a result of his leadership we were able to do this week. This is an issue on which he has been working for 5 years; for 5 years we have waited to pass this meaningful and enforceable Patients’ Bill of Rights that will protect all privately insured Americans. And I say again, Senator DASCHLE was able to forge bipartisan support for this critical legislation and ensure passage as a result of his patience.

We indeed also have to acknowledge the work done by the chairman of the Health, Education, Labor, and Pen- ders, Committee, Senator TAYLOR KEN- DEDY. He was on this floor every minute of every day not only for the 2 weeks it took to pass the Patients’ Bill of Rights but for 2 weeks prior to do the education bill. He has worked on this issue longer than anyone, was able to confront every contentious amend- ment, and managed to keep the integ- rity of the bill totally intact. Senator KENNEDY did great work. It shows what a fine Senator he is. Those of us who depend on him for leadership always...
have this bill to look to, to indicate what a great Senator he is.

Senator KENNEDY has had wide experience. One of the leaders in this bill was someone without the experience of Senator KENNEDY but who did great work: Senator Edwards of North Carolina. He proved his skill, his leadership, and his dedication to being a legislator by his work on this meaningful Patients’ Bill of Rights. He has, since he came to the Senate, been a tireless voice for America’s patients, and I and the rest of America are grateful for his contributions to the rest of this legislation.

Finally, I extend my thanks to Senator JOHN MCCAIN from the other side of the aisle. During his run for President of the United States, Senator McCain promised the American people he would fight to protect a Patient’s Bill of Rights, and he did that. His name was first on this bill and he was involved as we proceeded through this legislation. He has been an extraordinary leader on this issue. Without his work, this bill would not have been possible.

It would not be fair to talk only about the proponents of this legislation. Senator Judd Gregg did an outstanding job on this bill. He was here the entire 2 weeks. He had some difficult issues to work through. I think he did an excellent job of bringing the amendments that were meaningful to the floor at the right time. We were able to have complete and fair debate. I always had great appreciation of him.

I served with Senator Gregg when he became a Member of the House of Representatives. He left to become a two-term Governor of the State of New Hampshire. He came back—to the Senate.

I always had great respect for his abilities and certainly they were evident during the work he did on the Patients’ Bill of Rights. Even though he was on the losing side of votes on many of the amendments that were offered, he was always a gentleman and a scholar. I think he did himself and this Senate very well with his work.

The Senate-passed Patients’ Bill of Rights contains every one of the patient protections listed in President Bush’s statement of principles. I hope the House of Representatives will work towards swift passage of this bill and that the President will sign into law this truly bipartisan legislation that will improve the quality of care for all Americans.

The PRESIDENT pro tempore. The Chair will state the time until 12:30 p.m. will be under the control of the Senator from Illinois, Mr. DURBIN, or his designee, and from 12:30 p.m. until 1 p.m. will be under the control of the Senator from Wyoming, Mr. THOMAS, or his designee.

Mr. REID. Mr. President, if the Senator from Wyoming wishes to say a few words, I am happy to yield him time under our time. How much time does the Senator want?

Mr. THOMAS. I was going to ask the question the President pro tempore has already answered. Thank you.

Mr. REID. The Senator from North Dakota has the floor for the time.

The PRESIDENT pro tempore. The Senator from North Dakota.

MEXICAN LONG-HAUL TRUCKS ON U.S. HIGHWAYS

Mr. DORGAN. Mr. President, later this week and perhaps through the summer we will have a discussion in both the Senate and the House about a very controversial issue. This administration and this Government will allow Mexican long-haul trucks to move across the border from Mexico into this country to drive their trucks on the highways and byways of this country unrestricted. We insinuated the grounds that the North American Free Trade Agreement requires us to do so. However, after signing NAFTA the previous administration decided, because of serious safety concerns, not to allow the Mexican trucks to operate unrestricted on America’s highways. At the moment, we allow them to cross the border and operate only in a zone within 20 miles of the Mexican border, or short-haul trucks. The Bush administration is now going to lift that restriction. That is going to cause some very serious controversy. I want to explain today why that is an important issue.

A San Francisco Chronicle reporter named Robert Collier recently went on a 3-day trip with a long-haul trucker in Mexico. His article in the San Francisco Chronicle is quite interesting and quite revealing. I ask unanimous consent to have it printed at the conclusion of my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(See Exhibits 1.)

Mr. DORGAN. What is this issue of Mexican trucks coming into the United States? Why is it important and why will it provoke controversy? Simply, the issue is this: We inspect just 1 to 2 percent of the Mexican trucks that come into this country and operate within the 20-mile restriction. And 36 percent of those Mexican trucks are turned back into Mexico for serious safety violations.

In other words, up to now, we have told Mexican truckers: We will not allow Mexican trucks to come in unrestricted on American roads because you don’t meet American safety standards. Mr. President, 98 to 99 percent of the trucks were never inspected at all because we do not have nearly enough inspectors at the border. But of those that were inspected, 36 percent were turned back into Mexico for serious safety violations.

Mexico has a regime of safety issues dealing with truckers that is very lax. They are printed at the end of the article I previously mentioned. Let me run through a few of these. It says that those who drive service trucks and other trailers, which would be over 5,000 pounds on the American roads, are only subject to inspection if they get a violation. That is by law. And the maximum fine is just $600. These are professional drivers. In the United States, we limit truckers to 10 hours of consecutive driving and then they must rest. That is all you can do in the United States, 10 hours. In Mexico, the sky is the limit. In fact, this reporter rode with one Mexican long-haul tractor for 3 days. In 3 days of driving a truck, the Mexican driver slept 7 hours—7 hours in 3 days. There is no restriction on hours with respect to Mexican drivers and truckers.

Random drug tests: In the United States, yes for all drivers; in Mexico, no.

Automatic disqualification for certain medical conditions: In the United States, yes; in Mexico, no.

Maximum weight limit for trucks: In the United States, 80,000 pounds; in Mexico, 135,000 pounds.

The point is, under NAFTA, it has been determined that the United States should allow Mexican long-haul truckers into this country unrestricted. I wonder if you want a Mexican trucker in your rear-view mirror on an American interstate, coming down the highway with questionable brakes, with questionable equipment, in a circumstance where over a third of all the trucks that we have inspected—and we have only inspected an infinitesimal number—over a third of them have been found to have serious safety violations.

This isn’t rocket science. Of course, we would not allow unrestricted Mexican long-haul truckers to come into this country on America’s roads; not until they meet all the requirements for safety that we require of our own trucking companies and our own drivers. This is not a hard question.

On the appropriations bill in the House of Representatives there was an amendment added that prohibits funding for permitting Mexican truckers to come into this country on an unrestricted basis. I have indicated I intend to offer a similar amendment in the Senate. I have offered stand-alone legislation which is more comprehensive than that, but it seems to me it is useful to offer language identical to that of the House because then it would be non-conferenceable and the restriction would become law when the appropriations bill is signed.

Senator MURRAY, the chair of the Transportation Appropriations subcommittee, talked to me and I know she is working on some language. I have not yet had an opportunity to see what that language is, but I appreciate the work she is doing. I hope when the appropriations bill leaves the Senate,
we will have included similar or identical language to that in the House; language we want to send to the 18 Mexican long-haul trucks into this country on an unrestricted basis jeopardizing the safety of Americans who are driving on the roads—virtually all citizens who are driving on our roads. We don't know why safety questions have to be in their minds.

This is a very important issue. It is one more evidence of a trade strategy that is inherently weak, that trades away our interests. How can we adopt a trade policy with another country that says: Oh, by the way, we will not allow anything that reflects safety issues from one side or the other to come in the way of trade? It doesn't make any sense to me.

This is a paramount example of trading away our ability to make safety on America's roads something that is of significant concern. We have not gotten to the position of requiring safety equipment on logs, and making of service restrictions just because we want to regulate; we did it out of concern for safety. When you are driving down the road and have an 18-wheel truck behind you full of tons and tons of material, you want to make sure that truck has been inspected, that the truck has safety equipment, and that the truck is not going to come through the back of your car right up to the rearview mirror if you happen to put on your brakes in an emergency. This is an important issue on its own. Giving up our ability to decide whether we will allow unsafe trucks to enter United States highways from Mexico is almost unforgivable. But it is part and parcel of a trade policy that has been bankrupt for a long while.

That brings me to another question about trade agreements. The administration is talking a lot now about fast-track. They are telling us that we have to do new trade agreements. I have some advice for them. I say: If you really want to fast-track something, why don't you fast-track solving some trade problems that you, along with previous administrations, have created through signing past trade agreements. Don't deal with Congress if you need fast-track legislative authority for anybody or anything; deal with fast-track trade solutions yourself.

Let me give you some examples of issues that the Administration might want to fast-track.

Today, in Canada, they are loading trucks and railroad cars full of molasses to bring into the United States. The molasses is loaded with Brazilian sugar and sent to Canada so it can be added to molasses. The molasses is a carrier that is used to circumvent our quota on sugar imports. They subvert the sugar quota by sending Brazilian sugar through Canada loaded as molasses. It is called stuffed molasses. It is fundamentally unfair trade, but we can not get anything done about it.

If you want fast track, let's fast track a solution to solving the stuffed molasses scheme.

Fast track: How about this? Do you know how many American movies we got into China last year? Ten. Ten American movies got into China—a country with an $80 billion trade surplus with the United States. This is intellectual property. It is entertainment. We got 10 movies into China because they say: That is all you can get into our country.

What about the issue of automobiles? Do you know how many automobiles we bought from Korea last year? Americans bought 450,000 cars from companies building cars in Korea. Do you know how many United States-produced cars were sold in the country of Korea last year? Twelve hundred—four years later, we still have a 38.5 percent tariff. Can you imagine that?

What about the issue of automobiles? Do you want fast track, hold up a mirror and say this in the morning: You can't take American durum wheat into Canada. You can't take American durum wheat into Canada. So we got turned around with the little 12-year-old orange truck, despite the fact that all of these semis all day long came down from Canada—evidence, it seems to me, of just one more thorn that exists in this trade circumstance, one more burr under the saddle for all those farmers and ranchers out there who have been taken by unfair trade agreements negotiated by our trade negotiators who should have known better, by trade negotiators who did not seem to stand up for this country's interest in the final agreement. They were more interested in getting an agreement than they were in getting a fair agreement.

Again, I say to the Trade Ambassador and others, if you want fast track, hold up a mirror and say this in the morning: Fast track for me means solving trade problems, solving the Canadian durum problem, solving the Canadian stuffed molasses problem, solving the problem of our getting cars into Korea, potato flakes into Korea, movies into Canada, and beef into Canada.

I can stand here and cite a couple of dozen more, if you like. Show us you can solve problems rather than creating problems, then come back to us and talk. But don't suggest to me that we do something for you to negotiate a new agreement unless you have solved the problems of the old trade agreements—yes, GATT, NAFTA, you name it, right on down the road.

I have always, when I have spoken about trade, threatened to suggest that we require our trade negotiators to wear uniforms. In the Olympics, they wear a jersey. It says “U.S.A.” across the chest. So at least in some quiet moment in some negotiating meeting someplace, these trade negotiators who seem so quick to lose are willing to look down and see whom they really represent.

Will Rogers used to say, “The United States of America has never lost a war and never won a conference.” He surely must have been thinking about our
trade negotiations, because in agreement after agreement we seem to end up on the short end. That is especially true with a trade agreement that now puts us in a circumstance where we are told we are supposed to allow Mexican long-haul trucks to come into this country under the provisions of the trade agreement notwithstanding the safety issues. That is not fair. It is not right. To do so would not be standing up for the best interests of the American people.

We have a fight about this. We are going to have controversy about it. But as I said when I started, this ought not be rocket science. We cannot and should not decide that these trade agreements either force us or allow us to sacrifice the basic safety of the American people. It doesn’t matter whether it is safety on the roads, safety with respect to food inspection, you name it. We cannot and should not allow these trade agreements to force us to sacrifice safety.

We should insist just once and for all that our trade negotiators stand up for this country’s interest. There is nothing inappropriate and nothing that ought to persuade us to be ashamed of standing up for our best economic interests. Yes, we can do that in a way that enriches all of the world and in a way that helps pull others up and assist others in need.

We can do that, but we also ought to understand we have people in need in this country. American family farmers are going broke. We have all kinds of people losing their jobs in the manufacturing sector. Manufacturing is a sector in this country that is very important and has been diminishing rather than expanding.

So let’s decide to do the right thing with our expanded trade. I want expanded trade. I want robust trade. I do not believe we should construct walls. I do not believe that a protectionist—using the pejorative term—is someone who enhances this country’s interests. But using the term “protectionist,” let me just be quick to point out there is nothing wrong with protecting our country’s best interests with respect to trade agreements that will work for this country.

So we will have this discussion this week on the Transportation Appropriations bill, that will be under the able leadership of Senator MURRAY. My expectation is we will resolve this in a way that is thoughtful and in a way that expresses common sense dealing with Mexican long-haul truckers coming into this country.

I yield the floor.

EXHIBIT 1

From the San Francisco Chronicle, Mar. 4, 2001

MEXICO’S TRUCKS ON HORIZON—LONG-DISTANCE HAULERS ARE HEADER INTO U.S. ONCE BUSH-CERTIFY

By Robert Collier

ALTAR DESERT, MEXICO.—[Editor’s Note: This week, the Bush administration is required by NAFTA to announce that Mexican long-haul trucks will be allowed onto U.S. highways—whether they have or have not been banned over concerns about safety—rather than stopping at the border. The Chronicle sent a team to get the inside story before the trucks start to roll.]

It was sometime after midnight in the middle of nowhere, and a giddy Manuel Marquez was at that moment 120 miles behind the wheel of U.S.-bound merchandise. The lights of oncoming trucks flared into a blur as they whooshed past on the narrow, two-lane highway inches from the left mirror of his truck. Also gone in a blur were Marquez’s past two days, a nearly Olympic ordeal of driving with barely a few hours of sleep.

“Hey, Mexico!” Marquez exclaimed as he slammed on the brakes around a hilly curve, steering around another truck that had slowed in the middle of the lane, its hood up and its driver nonchalantly smoking a cigarette. “We have so much talent to share with the American public’s consciousness.”

Several hours ahead in the desert darkness was the border, the end of Marquez’s 1,800-mile run. At Tijuana, he would deliver his cargo, wait for another load, then head back south.

But soon, Marquez and other Mexican truckers will be able to cross the border instead of turning around. Their feats of long-distance stamina—and, critics fear, endangerment of public safety—are coming to a California freeway near you.

Later this week, the Bush administration is expected to announce that it will open America’s highways to Mexican long-haul trucks, thus ending a long fight by U.S. truckers and highway safety advocates to keep them out.

Under limitations imposed by the United States since 1982, Mexican vehicles are allowed passage only within a narrow border commercial zone, where they must transfer their cargo to U.S.-based long-haul trucks and drivers.

The lifting of the ban—ordered last month by an arbitration panel of the North American Free Trade Agreement—has been at the center of one of the most widespread issues in the U.S.-Mexico trade relationship.

Will the end of the ban endanger American motorists by bringing thousands of potentially unsafe Mexican trucks to U.S. roads? Or will it reduce the costs of cross-border trade and end U.S. protectionism with no increase in accidents?

Two weeks ago, as the controversy grew, Marquez’s employer, Transportes Castores, allowed a Chronicle reporter and photographer to join him on a typical run from Mexico City to the border.

It was sometime way after midnight in the desert darkness. We were full of coffee, sugar and pills that are commonly used by Mexican truckers. Marquez, however, needed only a bottle of Tres Agaves tequila and a program of random highway inspections that were inaugurated with much fanfare last fall.

Almost all Mexican long-haul drivers are forced to work dangerously long hours. Very few have the skills or right lighting reflexes honed by road conditions that would make U.S. highways seem like cruise-control paradise. But he was often steering through a thick fog of exhaustion.

In Mexico, no logbooks—required in the United States to keep track of hours and itinerary—are kept. We are just like American truckers, I’m sure,” Marquez said with a grin. “We’re neither saints nor devils. But we’re good drivers, that’s for sure, or we’d all be in the ditch.”

Although no reliable statistics exist for the Bay Area’s trade with Mexico, it is estimated that the region’s exports and imports with Mexico total $6 billion annually. About 90 percent of that amount moves by truck, in tens of thousands of round trips to and from the border.

Under the decades-old border restrictions, long-haul trucks from either side must transfer their loads to short-haul “drayage” truckers, who cross the border and then come back again to take the massive trucks. The complicated arrangement is costly and time-consuming, making imported goods more expensive for U.S. consumers.

Industry analysts say that when the ban is lifted, most of the two nations’ trade will be done by Mexican drivers, who come much cheaper than American truckers because they earn only about one-third the salary and typically drive about 20 hours per day.

Although Mexican truckers would have to obey the U.S. legal limit of 10 hours consecutively driving when in the United States, safety experts worry that northbound drivers will be so sleep-deprived by the time they cross the border that the American limit will be meaningless. Mexican drivers would not, however, be bound by U.S. labor laws, such as the minimum wage.

“Are you going to be able to stay awake?” Marcos Munoz, vice president of Transportes Castores jokingly asked a Chronicle reporter before the trip. “Do you have your coffee?”

The word is slang for upper stimulant pills that are commonly used by Mexican truckers. Marquez, however, needed only a few cups of coffee to stay awake through three straight 21-hour days at the wheel.

Talking with his passengers, chatting on the CB radio with friends, and listening to the radio he brought along with him—1950s and 1960s ranchera and bolero music, he showed few outward signs of fatigue.

This week, the Bush administration is being asked to announce that Mexican long-haul trucks will be allowed onto U.S. highways—whether they have or have not been banned over concerns about safety—rather than stopping at the border. The Chronicle sent a team to get the inside story before the trucks start to roll. The lights of oncoming trucks flared into a blur as they whooshed past on the narrow, two-lane highway inches from the left mirror of his truck. Also gone in a blur were Marquez’s past two days, a nearly Olympic ordeal of driving with barely a few hours of sleep.

“Hey, Mexico!” Marquez exclaimed as he slammed on the brakes around a hilly curve, steering around another truck that had slowed in the middle of the lane, its hood up and its driver nonchalantly smoking a cigarette. “We have so much talent to share with the American public’s consciousness.”

Several hours ahead in the desert darkness was the border, the end of Marquez’s 1,800-mile run. At Tijuana, he would deliver his cargo, wait for another load, then head back south.

But soon, Marquez and other Mexican truckers will be able to cross the border instead of turning around. Their feats of long-distance stamina—and, critics fear, endangerment of public safety—are coming to a California freeway near you.

Later this week, the Bush administration is expected to announce that it will open America’s highways to Mexican long-haul trucks, thus ending a long fight by U.S. truckers and highway safety advocates to keep them out.

Under limitations imposed by the United States since 1982, Mexican vehicles are allowed passage only within a narrow border commercial zone, where they must transfer their cargo to U.S.-based long-haul trucks and drivers.

The lifting of the ban—ordered last month by an arbitration panel of the North American Free Trade Agreement—has been at the center of one of the most widespread issues in the U.S.-Mexico trade relationship.

Will the end of the ban endanger American motorists by bringing thousands of potentially unsafe Mexican trucks to U.S. roads? Or will it reduce the costs of cross-border trade and end U.S. protectionism with no increase in accidents?

Two weeks ago, as the controversy grew, Marquez’s employer, Transportes Castores, allowed a Chronicle reporter and photographer to join him on a typical run from Mexico City to the border.

It was sometime way after midnight in the desert darkness. We were full of coffee, sugar and pills that are commonly used by Mexican truckers. Marquez, however, needed only a bottle of Tres Agaves tequila and a program of random highway inspections that were inaugurated with much fanfare last fall.

Almost all Mexican long-haul drivers are forced to work dangerously long hours. Very few have the skills or right lighting reflexes honed by road conditions that would make U.S. highways seem like cruise-control paradise. But he was often steering through a thick fog of exhaustion.

In Mexico, no logbooks—required in the United States to keep track of hours and itinerary—are kept. We are just like American truckers, I’m sure,” Marquez said with a grin. “We’re neither saints nor devils. But we’re good drivers, that’s for sure, or we’d all be in the ditch.”

Although no reliable statistics exist for the Bay Area’s trade with Mexico, it is estimated that the region’s exports and imports with Mexico total $6 billion annually. About 90 percent of that amount moves by truck, in tens of thousands of round trips to and from the border.

Under the decades-old border restrictions, long-haul trucks from either side must transfer their loads to short-haul “drayage” truckers, who cross the border and then come back again to take the massive trucks. The complicated arrangement is costly and time-consuming, making imported goods more expensive for U.S. consumers.

Although Mexican truckers would have to obey the U.S. legal limit of 10 hours consecutively driving when in the United States, safety experts worry that northbound drivers will be so sleep-deprived by the time they cross the border that the American limit will be meaningless. Mexican drivers would not, however, be bound by U.S. labor laws, such as the minimum wage.

“Are you going to be able to stay awake?” Marcos Munoz, vice president of Transportes Castores jokingly asked a Chronicle reporter before the trip. “Do you have your coffee?”

The word is slang for upper stimulant pills that are commonly used by Mexican truckers. Marquez, however, needed only a few cups of coffee to stay awake through three straight 21-hour days at the wheel.

Talking with his passengers, chatting on the CB radio with friends, and listening to the radio he brought along with him—1950s and 1960s ranchera and bolero music, he showed few outward signs of fatigue.
But the 46-year-old Marquez, who has been a trucker for 25 years, admitted that the burden occasionally is too much.

''Don't kid yourself,'' he said late the third night. ''Sometimes, you get so tired, so worn, your head just falls asleep.'' U.S. safety groups predict an increase in accidents after the border is opened.

''Every day, now, there aren't enough safety inspectors available for all crossing points,'' said David Golden, a top official of the National Association of Independent Insurers, the manufacturers' truckers' lobby.

''So we need to make sure that when you're going down Interstate 5 with an 80,000-pound Mexican truck in your view mirror and you have to jam on your brakes, that truck doesn't come through your window.''

Golden said the Bush administration should delay the opening to Mexican trucks until border facilities are upgraded.

California highway safety advocates are concerned, saying the California Highway Patrol—which is the state's truck-inspection--needs to be given more inspectors and larger facilities to check incoming trucks' brakes, lights and other safety functions.

Marquez's trip started at his company's freight yard in Tijuana, an industrial suburb of Mexico City. There, his truck was loaded with a typical variety of cargo—electronics components and handicrafts bound for Los Angeles, and chemicals, printing equipment and industrial parts for Tijuana.

At the compound's gateway was a shrine with statues of the Virgin Mary and Jesus. As he drove past, Marquez crossed himself, then crossed himself again before the small Virgin on his dashboard.

''Just case, I know,' he said. ''The devil is always on these roads.''

In fact, Mexican truckers have to brave a wide variety of dangers.

As he drove through the high plateaus of central Mexico, Marquez pointed out where he was hijacked a year ago—held up at gunpoint by robbers who pulled alongside him in another truck full of canned tuna—easy to fence, he said—was stolen, along with all his personal belongings.

What's worse, some thieves wear uniforms. On one trip, Marquez said he had to pass 14 roadblocks, at which police and army soldiers searched the cargo for narcotics. Each time, Marquez stood on tiptoes to watch over their shoulders. He said, ''You have to quick eyes, or they'll take things out of the packages.''

''Twice, police inspectors asked for bribes—''something for the coffee,'' they said. Each time, he refused and got away with it.

''You're good luck for me,'' he told a Chronicle reporter. ''They ask for money but then give an American and back off. Normally, I have to pay a lot.''

Although the Mexican government has pushed hard to end the border restrictions, the Mexican trucking industry is far from united behind that position. Large trucking companies such as Transportes Castores back the border opening, while small and medium companies oppose it.

''We're ready for the United States, and we'll be driving to Los Angeles and San Francisco,'' said Munoz, the company's vice president.

''Our trucks are modern and can pass the U.S. inspections. Only about 10 companies here could meet the U.S. standards.''

''The industry has been roundly opposed by CANACAR, the Mexican national trucking industry association, which says it will result in U.S. firms taking over Mexico's trucking industry.''

''The opening will allow giant U.S. truck firms to buy large Mexican firms and crush smaller ones,'' said Miguel Quintanilla, president of CANACAR, the Mexican truckers' lobby.

Quintanilla said U.S. firms will lower their current costs by replacing their American drivers with Mexicans, yet will use the huge American advantages—superior warehouse and inventory-tracking technology, superior truck-safety regulations, which will enable them to earn more than either critics or advocates expect, because of language difficulties, Mexico's inadequate insurance coverage and Mexico's time-consuming system of customs brokers.

''The moon of my nights has hidden itself. The moon of my nights has hidden itself. The moon of my nights has hidden itself.''

along with paternal pride was sadness.

The ENERGY CRISIS

Mr. KYL. I suspect that most of my colleagues, as myself, talked to a lot of our constituents over the Fourth of July recess who reminded us of the fact that out in America there is still a problem with an energy shortage. I know I had to gas up my vehicle, as did a lot of other Americans, when I drove up to the mountains in Arizona. I had a wonderful time. I marched in a Fourth of July parade in Show Low, AZ, really the heart of America as far as I am concerned. Folks out there are still concerned because they recognize that Washington is dithering; that we are not doing anything to solve the problem of an energy shortage in this country.

Some people may call it a crisis; other people may not; but the fact is we have had a wake-up call. The question is, Will we answer the call or are we going to sit there and ignore it, and play partisan politics?

My own view is that there is no better opportunity for us to show bipartisanship, to work together toward a solution to a common problem that affects all Americans, than working together to solve this energy shortage problem. This is something on which the administration has weighed in. They have taken the issue very seriously. Very early in his term, the President asked Vice President CHEYENNE to convene a group of people to come up with some suggestions on what we could do—both short term and long term—to address this energy shortage problem.

The Vice President, along with a lot of others, came up with a series of recommendations which I would like to have us consider in the Senate. They are recommendations which deal with new production, with conservation—a majority of the recommendations, incidentally, deal with conservation, even though that has largely been ignored in the media—and recommendations dealing with new energy sources, something in which I am very interested—hydrogen fuel cells, and a whole lot of things.

The fact is, this is a serious effort. While the Republicans held the majority in the Senate, a bill was introduced which embodied many of these recommendations. Under the then-Republican leadership, it was going to be our program to take up that energy legislation in this Senate Chamber starting today or tomorrow. Sadly, that is not going to happen. The Democratic leadership announced some time ago that it had different priorities and that the Senate Chamber would not be the place for debate about the energy shortage this week following the Fourth of July recess.

It is my understanding that hearings have been scheduled and both the Finance Committee and the Energy Committee have tended to conference on different pieces of legislation. There will be hearings on the administration’s plan, as well as other ideas. And that is good. But we need to deal with this problem while we have had this wake-up call and not kick it to the back burner where we will forget about it and then, in another year or two, realize we wasted a couple of years that could have been spent in finding new energy sources, putting them into play, and providing an opportunity for Americans to enjoy the kind of prosperity we can enjoy with the proper mix of good energy sources.

There are basically two issues. One deals with the cost of producing electricity and how that electricity will be produced. The other has to do with the reality that Americans are going to use a great deal of energy—petroleum products primarily, and primarily for transportation. That is not going to change in the short term, despite the fact that the long run we will have to come up with some alternatives.

I mentioned hydrogen fuel cells as one of those possibilities. It is a little closer than I think most people would recognize. We put money into basic research at the Federal Government laboratories. The administration has placed a great deal of emphasis on that as part of their energy plan. I hope we can move down that path.

But in the meantime, we have to be realistic about the fact that Americans are going to continue to drive their automobiles. We are going to have to continue to have gasoline. We cannot wish that problem away. The question is, Do we strictly rely on the sources of oil from the Middle East, for example, or do we recognize that it really puts us behind the 8 ball if the OPEC countries want to constrain supplies and increase prices? Or if there is jeopardy to those sources from military conflict, will we have to once again send our troops and spend a great deal of energy and money to protect those energy sources as we did during the Persian Gulf war? That is one path we can take.

There are some in this country who would have us ignore the potential for energy development in this country. I think we ought to have a plan that both recognizes the potential within the United States for oil production as well as buying what we can on the market internationally.

The other aspect of that problem is refineries. We have not built new refineries in this country for 20 to 25 years. We have actually had some shut down. As one of my Democratic colleagues said during a hearing in the Finance Committee a couple weeks ago, she is a little disappointed about the fact that there is criticism of refineries making money. She said: What are my business folks in my State to do—be in the business to lose money? The fact is, they are in the business to make money. In the process of making money, they make petroleum products that we demand when we go to the service station.

When I filled my vehicle last week, I wanted gasoline to be in that pump so I could drive my family where we were going. We have a lot of demand in this country. It is we who have the demand, not the oil companies. They are the ones that provide the product and the refineries that refine that product so that we can meet our demand. Yet there is a great deal of criticism about anybody who would make money in producing one of these products. That is the only way we get the products.

The free market system has served us well. We ought to be very careful about denigrating the suppliers who have made it possible for us to enjoy our standard of living.

So my view, just to summarize, is that we should consider the President’s recommendations in a bipartisanship spirit. We should move along quickly with the hearings that I understand have been scheduled. And we should bring to
Vice President CHENEY's energy task force is on the 105 recommendations of the Energy recommendations offered by the administration. With oil consumption expected to grow by over six million barrels per day over the next 20 years, natural gas consumption to jump 50 percent and electricity demands to rise by 45 percent, we must act aggressively to increase production in each of these areas before the entire nation suffers from the shortfall. Just to meet expected electricity demands, for example, we must begin now to build between 3,200 and 1,900 new power plants over the next 20 years.

To address this reality, we should act now on the 105 recommendations of Vice President CHENEY's energy task force. This plan makes 45 recommendations to modernize and increase conservation through tax credits and the expansion of Energy Department conservation programs. It proposes 35 ways to diversify our energy supply and expand our infrastructure by encouraging new pipelines, generating plants and refineries, and streamlining our regulatory process. And this proposal strengthens America's national security by decreasing our dependence on foreign oil through increased energy production within our borders.

Some opponents to the President and Vice President rely on ad hominem attacks, misinformation, and demagoguery to cast aspersions on the administration's proposals. They claim that, because the President and Vice President were once connected to the oil business, they somehow are disqualified from energy discussions. On the contrary—these are people who actually know something firsthand about the problems in the energy industry. They do not benefit personally from efforts to increase energy production.

Opponents of this energy strategy applauded the recent imposition of price caps to the western states. However, price caps do nothing to increase energy supplies, and could very well discourage new generation power production by artificially limiting a producer's return on his or her investment. Indeed, California's two largest utilities are basically bankrupt as a result of artificial price caps on re-
tail electricity rates. I am particularly concerned about price caps because Arizona, unlike California, has moved aggressively to permit new power plants needed to satisfy the state's growing demand for electricity. FERC's recent imposition of price caps could result in delayed construction or cancellation of these new facilities.

Opponents also say that the President's proposal will not encourage conservation. As an Arizonan, I certainly support commonsense conservation efforts that help preserve our natural resources. But these opponents must not have read the President's plan, for he devotes the bulk of his recommendations to efforts to enhance conservation. Among many provisions, the administration credits to encourage use of more energy efficient products, such as hybrid or fuel-cell vehicles. It extends conservation programs in the Environmental Protection Agency and the Department of Energy, and increases funding for conservation technologies and orders federal agencies to reduce their energy usage by at least 10 percent. In total, the administration proposes $795 million for conservation programs as part of its overall budget allocation for the Department of Energy.

While these conservation efforts are important, we must also acknowledge that we cannot conserve our way out of an energy crisis. California has dramatically reduced its electricity use over the last two months, yet still faces the possibility of rolling blackouts. We must increase supply in the near-term or face even worse shortages than we have now.

Opponents also claim that we cannot meet our increased demand with renewable energy sources. We should support research into renewable energy technologies, such as hydrogen and fuel cells. Remember that, even so, non-hydro renewable energy produced only two percent of our energy supply last year and the Department of Energy reports that renewable energy will only produce, at most six percent of our energy supply by the year 2020. That isn't nearly enough to meet the growing demand for the next few decades and the costs are the lowest on record and continuing to fall. Nuclear energy use is neither a novel nor a risky concept; France receives 80 percent of all of its electricity from nuclear power.

There is a problem with disposal of nuclear waste, but it isn't so serious that the critics of nuclear power are concerned with finding an answer. They appear to be happy enough with current on-site storage. Obviously, other countries more 'green' than the U.S. have resolved the waste issue. The fact is that it's not a technology problem but a political problem.

Increased oil drilling has proven as controversial, yet it shouldn't be. Drilling in the Arctic National Wildlife Refuge, for example, is a commonsense and safe proposal to increase domestic oil production. It is also very limited in scope. Oil exploration would occur in only a small portion of ANWR, in an area one-fifth the size of Washington's Dulles Airport. Technological advances have reduced any supposed risks to the environment. Drilling pads are roughly 80 percent smaller than those a generation ago and advanced-bore drilling allows for access to supplies as far as six miles away from a single, compact drilling site.

Two concerns are raised: oil spills and harm to wildlife. The threat of spills is far greater from ocean-going tankers than from the Alaska pipeline. And the caribou have prospered since drilling began on Alaska's North Slope. This modest effort in ANWR would provide enormous benefits, producing as much as 600,000 barrels of oil a day for the next 40 years—exactly the amount we currently import from Iraq.

Moreover, oil drilling utilizes a smaller fraction of our environment than the alternative energy sources advocated by others. The Resource Development Council for Alaska reports that, to produce 50 megawatts of power, natural gas production uses two to five acres of land, solar energy consumes 1,000 acres, wind power uses 4,000 acres, and oil drilling—less than one-half of an acre. That is real conservation of our natural resources.
As it stands now, American consumers already depend on foreign and other domestic nations for more than half of our oil supply. In 20 years, that percentage will increase to 64 percent. Doesn't it make more sense to invest in domestic production so that we are not held hostage to the whims of OPEC and the need to militarily defend our interests in the major oil-producing regions?

In conclusion, I commend President Bush and Vice President Cheney for producing serious and honest proposals to enact a long-term energy strategy on behalf of American consumers. A worsening energy crisis requires all of us to act swiftly on these proposals before the situation becomes more widespread.

I urge our new Democratic leaders to take a proactive and serious role in finding a way to bring solutions to the floor of the Senate. As these leaders know from their days in the minority, it is much easier to find a way to accommodate the minority's requests than fight them. I hope the new leadership will act in a truly bipartisan way and consider the administration's ideas. We're all in this energy shortage together. Democrats should work with Republicans for the good of all Americans.

THE MIDDLE EAST

Mr. KYL. Madam President, I would like to change gears a little bit and talk about another subject that is very distressing. Throughout this break I would turn the television on to the evening news, and invariably there would be a story about yet more violence in the Middle East. It really got me thinking about the fundamental issue that I think a lot of Americans have ignored.

We wring our hands. We wish that there could be peace in the Middle East, and that they could put their differences behind them and live in harmony.

So we ask—and I see newspeople basically asking different versions of this question—why can't they just go back to the peace process? Of course, Secretary Powell urged both parties to agree to a cease-fire, which temporarily they did, yet every single day there has been a bombing or other terrorist attack or attempt in the State of Israel.

The Israeli people have said: Peace is a two-way street. If Yasser Arafat and the PLO are not willing to enforce the multiple cease-fire agreements and the peace process that we thought we had agreed to before, then we will have to enforce the law, and that includes going after those terrorists who threaten our people. No nation can do otherwise.

I rise to comment briefly on this notion of "returning to the peace process." The problem is that the 1993 Oslo accords, which were the genesis of this thing we call "the peace process," were perhaps less than flawed. That is now apparent to the Israeli people, despite significant differences. Talk about a robust democracy. It exists in Israel. You have very strongly held views by different citizens in Israel, and they fight it out. During their election process, they had a very robust election contest. Then they come together with a leader, and they hope to be unified as a people.

They had desperately wanted, to borrow someone else's familiar phrase, to give peace a chance. As a result, they tried to make the Oslo accords of 1993 work. What they found after Camp David, just about a year ago this month, was that the PLO was unwilling to make the kinds of commitments that would be necessary for a lasting peace in the region. The reason for that is a fundamental difference of approach.

For the Israelis, it has been a question of incremental concessions, primarily of land, of territory. But the PLO and other Arab or Muslim groups in the Middle East apparently never had any intention of providing the quid pro quo of peace. Instead, too much of their effort has been focused on the illegitimacy, in their view, of the Israeli State, of the fundamental disagreement with the action that the United Nations took after World War II to literally create a homeland for the Jewish people. Because that homeland was taken from territory which the Palestinians saw as their lands, they have never been willing to concede the legitimacy of the Israeli State.

At Camp David, after historic concessions were made by Prime Minister Barak, concessions which had to do with the most basic rights of the Israeli citizens—name their own capital and to have that capital an undivided city, Jerusalem; concessions with respect to over 90 percent of the West Bank land returned to the Palestinians; concessions made in removing its troops from Lebanon and a whole variety of other things—after all of those concessions had been made and there was an opportunity to seize the moment and make history, the PLO, said no, he wanted one more thing. He wanted the right of return of all of the Palestinians, maybe 2 to 4 million people, maybe more, who he claims were displaced in order to create the Jewish state. All of those people had to have the right to go back to their homes.

That, of course, was the ultimate deal breaker. No Israeli leader could ever agree to that concession. That meant the fuse was lit. The end of the Jewish state as it is. As a result, those accords of a year ago, that discussion at Camp David of a year ago, concluded with no agreement. It exposed the fundamental fallacy of the Oslo accords in the first instance.

Very briefly, there were the essential flaws of the Oslo accords. The first was that if the PLO was given this 30,000-man armed force, that could be used to suppress violence rather than to promote more agitation in the Middle East. The idea was that whereas a democratic society such as Israel had a hard time dealing with these terrorists, a firm dictatorial Yasser Arafat, with an armed 30,000-man armed force, could put down these terrorists and bring peace to the area. Of course, the force expanded significantly beyond that which had been agreed to and eventually it was used to promote violence, not to suppress it.

The second premise was that Israel could withdraw from the territory before it had been promised, without losing its bargaining power or military deterrence. It had worked the other way around with regard to Egypt. Egypt, in good faith with President Sadat, dealt with the Israeli leaders up front. Israel ceded land after the peace agreement was obtained. But peace was restored between Israel and Egypt as a result. That withdrawal of Israeli forces from Egyptian land prior to the peace ensuing was a true trade of land for peace. But under the Oslo accords, the situation was reversed. Israel was required to withdraw first and then negotiate. The result, of course, has been no credible peace.

The third premise is that peace could be made with the PLO. In Israel there had been a consensus all along among all of the parties, including Labor and Likud, that it was not possible to deal with the PLO because A, the Palestinian organization was philosophically committed to Israel's destruction. It is an enemy organization that has dealt with people in a peace process who are absolutely committed to your destruction.

Secondly, the PLO's previous negotiations had been based on terrorism as the means of achieving their objectives. No Israeli government had been willing to negotiate with an entity committed to its destruction through violence.

This peace process changed that. The Israeli leaders, in a leap of faith, said: Accept this PLO peace deal with the PLO, despite this historic background.

The process itself became the basis for this understanding. A new assumption was basically created. If you are in the process of negotiating, then the quality of the people on the other side really didn't matter. That is why the Israelis were willing to make this leap of faith. It almost became a secular religion. In this country people talked about the peace process almost as the goal itself rather than the means to an end.

It turns out that the nature of the leadership of the negotiating parties does matter. So do the actions on the
ground. The quality of the other people is fundamental to the success of the negotiations. The parties were never close to agreement. Rather, the question really is whether peace was ever achievable given the Palestinian objectives.

That is why I say the fundamental assumptions of the peace process, of the Oslo accords, were flawed. To the extent, none of the three premises turned out to be correct. They all turned out to be false. The Israeli people now understand that.

The question now is how to repair the damage that resulted from an adherence to this peace process where Israel gave up more and more and more and, in the end, got no peace. Ever since the Secretary of State and other officials before him went to the Middle East, there was been a bombing or an attempt every single day, an attempt of terrorism. There is no peace.

Hopefully, this helps to explain in brief form why it is not possible to simply return to the peace process as if there were some magic in that Oslo process. The Oslo process is dead. The reason it is dead is because it was premised on fundamental fallacies. That is why the Israeli people cannot go back to that flawed process.

We in the United States should not be critical of that decision on the part of the Israeli people. The Israeli people are not to blame for dealing now with a situation of violence and lawlessness and terror in as firm a way as they possibly can to protect their own citizens. No country could do otherwise. And for Americans to be so presumptuous as to lecture the Israelis about overreacting and urging them to return to a peace process which they now recognize was fundamentally flawed is the height of arrogance. We in the United States have to be much more understanding about the difficulties of achieving peace.

Fundamentally, Madam President, I think what we have to recognize is that as long as the leadership of the other side in this controversy—primarily the PLO—is not democratically based but is totalitarian, as long as there is not an involvement of all of the Palestinian people in the decisions on the other side, there will continue to be conflict.

The nature of the leadership on the other side matters, and it matters greatly. Until there is a democratically elected Palestinian Government, until the leaders are accountable to the people, whom I suspect want peace as much as anybody else in the region or in the world, then we are not likely to get the kind of peaceful resolution for which we all hope.

So what I hope right now is that the American people will be understanding of the position of the Israeli Government; that they will be supportive of this long-time ally, the nation of Israel; that they will recognize that there is no moral equivalence between acts of terror on the one hand and attempting to enforce the law on the other; that there will be support both in terms of military and economic support but also psychologically and not buy into this notion that there is repression on the part of the Israeli Government against the other Palestinians which is the cause of the problem.

This whole idea of moral equivalence is wrong. If we go back to the founding of the Jewish state by the United Nations and recognize what was attempted there and the moral legitimacy of the Israeli State, then I think Americans will more carefully calibrate their criticism of the Israeli Government and understand that it is going to take a long time; that hearts have to be broken in order to win peace; and probably the best opportunity is for democracy to take hold in the Arab States so that the leaders are accountable to the people because in the long run, most people really want peace. They want to live together; they want to engage in commerce together; and they do not want to continue to send their sons and daughters to die for causes that are whipped up by their leadership—to die unnecessarily.

That is why I urge my colleagues in the Senate today, the administration in Washington, and the American people generally, to learn to listen carefully and to recognize that the peace process was based upon flawed assumptions, and not to urge the Israelis to act in ways that would be inimical both to their own immediate self-interests in terms of safety and the long-term interests of peace. It is a difficult subject, one that we have to confront; and we have to stand by an ally and recognize the legitimacy of other Arab aspirations and Muslim aspirations in the Middle East, in which we have a great stake as well. As long as we fail to recognize the complexity of this situation and understand the processes that were urged for so long cannot be the basis for future peace negotiations, we are not going to be able to proceed in a constructive way.

I hope the American people, as a result of these comments and others, will have the administration re-examine the U.S. policy of supporting the appeasement of the PLO, which was the PLO that engaged in the intifada started in 1987 when the intifada started. The failure to stop it was a turning point for Rabin; it caused him to decide then to begin a peace process. He thought that if Israel couldn’t handle the intifada, maybe Arafat could. But soon the 30,000-man force became a 40,000-man force, and anti-tank weapons, shoulder-fired weapons and other prohibited arms found their way into the hands of the PLO. It was, in fact, the action of or-
CONGRESSIONAL RECORD—SENATE
July 9, 2001

Israel was required to withdraw first and then negotiate. The result has been no credible peace.

This premise of Oslo had been based on the assumption that Israel was finally strong enough to be able to relinquish land while preserving its ability to deter violence. So Israel withdrew from the West Bank, except for a few military posts authorized in the Oslo agreement, and in May of 2000 also withdrew from southern Lebanon. Both actions appeared to the Arab terrorist organizations and the Palestinian Authority as a retreat from a successful campaign of violence. After the intifada, Israel withdrew from the West Bank. After the terrorism of Hezbollah, Israel withdrew from Lebanon. The PA understandably saw violence as a way to achieve its goals.

So the Bonn Process of Oslo—that Israel could withdraw first and achieve its peace objectives later—has also proven false. Arafat and the PA interpreted the withdrawals simply as a sign of weakness thus emboldening them to incite the violence that has continued unabated since Rosh Hashana.

The third, and central, premise of Oslo was that peace could be made with the PLO. In Israel, there was a consensus until 1993 among all parties, including Labor and Likud, that it was not possible to deal with the PLO. There were two reasons for this view: first, the PLO was philosophically committed to Israel's destruction; and, second, the PLO's negotiations had been historically based on terrorism. No previous Israeli government had been willing to negotiate with an entity committed to its destruction through violent means. But in 1993, Oslo created a new assumption: If you had a process—a process of negotiating—then the quality of people on the other side did not really matter. The process became almost like a secular religion. The process was the important thing, and so actions on the ground didn't matter. This notion had roots in Western dealings with leaders in countries like North Korea, Iraq, and the Soviet Union.

It turns out, though, that the nature of leadership does matter, and so do actions on the ground. The quality of people on the other side is fundamental to the success of negotiations. It is the people, not the process, that matters.

The fact is, the parties were never as close as many believed. The issue was never the desirability of peace, or what either the United States or Israel could do to bring it about. Rather, the question was whether peace was ever achievable given Palestinian objectives. Yet when Barak and Arafat were near negotiations, they both raised one more demand: that Israel must agree to the right of return, and admit more than a million Palestinians into Israel.

This notion is anathema to all Israelis. Even those on the left oppose the right of return because of its connection to the Jewish state. Israel could not survive the return of over a million Palestinians and continue to exist as a Jewish state. Barak made unprecedented concessions at Camp David. Even Leah Rabin wrote of the failure of the three Oslo concessions would cause her late husband to turn over in his grave. This move by Arafat was so shocking that virtually all Israelis lost confidence in the process. Barak lost all support. And a radical reassessment of realities set in.

Despite the disappointment at the failure of negotiations, the awakening of the Israeli people to the faulty premises and the reality of the failure of the Oslo Accords is a healthy development. The Oslo process had ended up doing severe damage to Israel's deterrent—its ability to match concessions with tangible peace.

The principal goal now should be to repair that damage. Amid all the Israeli concessions and gestures, it was assumed that there would be reciprocity on the part of the Palestinians. But the Arabs believed showing reciprocity would be a sign of weakness on their part. The evidence abounds. More Israelis were killed by terrorist acts after Oslo then in the decade before. The PLO did not fulfill the promises it made; for example, disarming the terrorists—in fact, releasing from prison some of the most dangerous Hamas terrorists—limiting its arms, and guaranteeing peace.

Moreover, and perhaps even more disturbing for the long run, the Palestinian authority created schools with a curriculum of brainwashing their children in hatred and violence. A shocked New York Times reporter last summer wrote of the creation of summer camps that even taught assassination. Former Prime Minister Benjamin Netanyahu paints the picture of posters throughout Palestinian communities showing a menacing Israeli soldier, armed to the teeth, towering over a pitiful looking Arab youngster who holds only one thing. Do you know what it is? A key. And every Arab child knows what it is. The Key to an Arab home in Jaffa, or Haifa, or any other Arab community of pre-1967 Palestine. So much for the view that the parties were "just this close." All of this has caused a reassessment of the realities, and, as I said, that is a healthy development at this point.

One must view the situation today clear eyed and in strategic terms. It is a situation of more than just military or economic power. For Israel it is quite simply a question of morale. It makes the problem right now a way of saying that it lacks either economic or military power, but rather that its people have been following a conceptual and intellectual approach to achieving peace which has turned out to be false. The result has been confusion, frustration, and a problem of morale that can only be dealt with by reevaluation of the conceptual and intellectual approach to achieving peace. The people were sold on a "process," and now find that the presumptions underlying that process were illusions. Their disillusionment has set them adrift because they see they have lost territory and credibility that would never have been lost by military force.

The Camp David concessions are especially galling now that there is a recognition that they were based upon false premises, a quid pro quo that was never to be reciprocated by the Palestinians. It makes the last several years seem very lost indeed. So the Israelis are revising their thinking.

Those of us who have cared about the security of Israel and have watched the process over the years, viewed it with great anxiety because we worried it might have resulted in irreversible losses. And yet, with the last election, we see the Israeli people rethinking the premises of Oslo and charting a course to achieve lasting peace. That Ariel Sharon, with all his political baggage, won so overwhelmingly suggests that the Israeli people are prepared to do what it takes to defend their state and to survive. Like England fighting back from its unpreparedness in the 30's and the United States after its military decline of the 1970's, Israel seems to have said, "This far and no more," and begun to rethink its approach to achieving peace and security. Countries seem to be doing better than their failed leaders, and we can hope that the Israelis are on their way back with a more realistic and sober view of what will be required for their long-term security—what kind of approach will provide real, lasting peace.

It is recognized that peace is not available now, but that it can become available in the future. The key to peace is a more democratic and much less corrupt leadership. The idea that moderate Palestinians, but they are not politically relevant right now. The Palestinians have been cursed with leaders who have always seemed to be wrong for the times. In World War I, Palestinian leaders sided with Turks against the British; in World War II, with the Nazis against the allies; in the Cold War, with the Soviets against the West; and in the Persian Gulf War, with Saddam against the coalition of allies.

Given his long record as an ideologue, a terrorist, a breaker of promises and fount of untruth, it should not
really surprise anyone that Arafat remains what he has always been. As Charles Krauthammer recently noted in The New York Times, "Arafat can be doing more to have their own opportunity. It has to manage numbers sometimes, for instance, if they become too large around Christmas vacation."

They can make changes, but they have not done that. They have an opportunity, and we have an opportunity to have much cleaner machines, which are less noisy and which are less polluting. The manufacturers have indicated they can and will do this. Of course, they need some assurance from EPA that having done it, they will be able to use these machines. But none of these things have happened. Instead, because of the difficulties that are, in fact, there and without management, agreement, and practiced moderation and compromise at home and abroad."

This would, of course, be a boon not only for the Israelis, but for the Palestinians—indeed especially for the Palestinians. For over fifty years, the United States and Israel have been bound together in a relationship that has weathered many efforts to drive a wedge between us. With the coincident election of a new leader in each country, our two great nations have an opportunity to reassess the lessons recent history has to teach us. For my part, I am optimistic that the new American administration will place a great value on our relationship with the Israeli people; and I am optimistic that the Israelis will maintain the strength and morale that they will need to await a change in Palestinian leadership. At that point there will be much more the Israelis can do to secure their future.

The United States should not push Israel into a process or into an agreement with which the government and people of Israel are not completely comfortable, with their security ensured. It is their existence that is at stake, and we must take no actions that jeopardize their security.

My colleague from Wyoming would like to use the remainder of our time. The PRESIDENT pro tempore of the Senate from Wyoming is recognized.

ENERGY

Mr. THOMAS. Madam President, I know it is now summer, but I will now talk about snow machines in the Yellowstone Park in the wintertime. It is a question that has become quite political, as a matter of fact. There have been letters sent to the Department of the Interior from the Senate on both sides.

For a number of years, in Grand Teton, in Yellowstone Park, and many of the other parks, the principal access people have had in the wintertime to enjoy their park was with snow machines. This has been a long time, really. Frankly, there hasn't been much management of that technique, unfortunately. The park officials have not had much to do with it. They have not sought to organize how and where it is done, separate the snow machines from the cross-country skiing, which can be done even more.

The real cause of the problem is still there. I am surprised, frankly, that the Senate leadership hasn't been willing to give us a chance to undertake this question of energy and energy supply. We have gone now 8, 10 years without a policy regarding energy, not having any real direction with regard to what we are going to do. We have become 60-percent dependent on OPEC and overseas oil. We haven't developed refineries, new transmission lines, or pipelines in order to move energy from where it is to where it is needed, and still our leadership here refuses to move forward.

I think we will again be facing the same kind of situation we just had if we don't move to find a long-term resolution, and we can.

We now have a policy from the administration, one that deals with domestic production. There is access to public lands, much of it standing in Alaska or in many places that could indeed have production without damage to the environment. We can do that.

We can talk about conservation. We can talk about renewables. We have to have a policy to cause us to do some of these things.

The transportation is vitally important. In Wyoming, we have great supplies of coal, for example. In order to mine and move that energy to where the market is, you have to have some transmission. There are a number of ways to do that, and we can if we decide to and commit ourselves to do it.

Research, clean coal: Our coal in Wyoming is clean, and it can be cleaner if we have research to do that.

Diversity: We can't expect to have only one source of supply for all the energy we use. We are heavy energy users, and we are willing to make many changes to that.

I am grateful for the comments of my friend, and I hope we can get the leadership here to set the agenda to move toward doing something there.

USING SNOW MACHINES IN YELLOWSTONE PARK

Mr. THOMAS. Madam President, I know it is now summer, but I will now talk about snow machines in the Yellowstone Park in the wintertime. It is a question that has become quite political, as a matter of fact. There have been letters sent to the Department of the Interior from the Senate on both sides.

For a number of years, in Grand Teton, in Yellowstone Park, and many of the other parks, the principal access people have had in the wintertime to enjoy their park was with snow machines. This has been a long time, really. Frankly, there hasn't been much management of that technique, unfortunately. The park officials have not had much to do with it.

They have not sought to organize how and where it is done, separate the snow machines from the cross-country skiing, which can be done even more.
They are now in the park as inholdings and therefore cannot be managed by the park but cannot be used for anything else. Therefore, we have two losers: One is the park which has these inholdings it cannot handle; second is the school sections are to finance education, and they are not bringing in revenue to the State of Wyoming.

To make a long story short, I have a bill I hope will be before the committee soon to allow the Secretary of the Interior and the State of Wyoming to come to some agreement in finding a value for those lands by using an appraiser upon which they agree and then work out an arrangement to either trade those lands for other Federal lands outside the park, trade them for mineral royalties, or sell but come to some financial arrangement.

I hope is getting some support for something that will be useful to Grand Teton National Park as well as the State of Wyoming.

I think our time has expired. I yield the floor.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

SUPPLEMENTAL APPROPRIATIONS ACT, 2001

The PRESIDING OFFICER (Mr. KYL). Under the previous order, the Senate will now proceed to the consideration of S. 1077, which the clerk will report.

The senior assistant bill clerk read as follows:

A bill (S. 1077) making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The assistant legislative clerk pro-

ceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, today, the Senate is debating S. 1077, the Supplemental Appropriations Act for Fiscal Year 2001.

On June 1, 2001, President Bush asked Congress to consider a supplemental request for $6.5 billion, primarily for the Department of Defense. The draft supplemental bill that is before us totals $6.5 billion, not one dime above the President’s request—not one thin dime above the President’s request. It contains no emergency funding. The President has said that he will not support such emergency spending, so the Committee has not included any emergency designations in this bill. Unrequested items in the bill are offset.

S. 1077 funds the President’s request for additional defense spending for health care, for military pay and benefits, for weapons production, for national gas and other utilities, for increased military flying hours, and for other purposes. The bill includes a net increase of $3.54 billion for the Department of Defense and $291 million for defense-related programs of the Department of Energy.

While the Appropriations Committee has approved most of the President’s request for the Department of Defense, I stress the importance of accountability for these and future funds. Financial accountability remains one of the weakest links in the Defense Department’s budget process. Just last month, the General Accounting Office reported that, of $1.1 billion earmarked for military avionics in the fiscal year 1999 supplemental, only about $88 million could be tracked to the purchase of spare parts. The remaining $1 billion, or 92 percent of the appropriation, was transferred to operations and maintenance accounts. Where is the tracking process broke down?

Perhaps a substantial portion of the money appropriated for spare parts was spent on spare parts; perhaps it was not. But, given the way the money was managed, nobody knows for sure and that, it seems to me, is an unacceptable circumstance, because one thing we do know for sure is that an adequate inventory of spare parts is a key component of readiness and the Defense Department apparently does not have an adequate inventory of spare parts. So we must do better in making sure these dollars for spare parts go for spare parts.

The supplemental funding bill before us today included $90 million for spare parts, this time specifically for the Army. As former President Reagan would have said, here we go again. To forestall a repeat of the problems that arose in accounting for spare parts expenditures provided in the fiscal year 1999 supplemental, the Committee, at my request, approved report language requiring the Secretary of Defense to follow the money and to provide Congress with a complete accounting of all supplemental funds appropriated for spare parts. The intent of this provision is to ensure that money appropriated by Congress for the purchase of spare parts does not get shifted into any other program.

The supplemental appropriations bill before us includes $90 million for defense-related programs as well. The intent of this provision is to ensure that those dollars for defense-related purposes are spent in the manner for which they were intended.

To be clear, the money for the purchase of spare parts is to be spent in the manner for which it was requested by the Defense Department. There is another reason to insist on offsets for any additional spending. As the Senate budgeted for any additional spending. The tax-cut bill reduced the surplus by $17 billion. The tax-cut bill reduced the surplus by $17 billion.

Any efforts to increase spending in this bill without offsets will only make this problem worse.

The tax-cut bill reduced the surplus by $17 billion. The tax-cut bill reduced the surplus by $17 billion.

The tax-cut bill reduced the surplus by $17 billion. The tax-cut bill reduced the surplus by $17 billion.

The tax-cut bill reduced the surplus by $17 billion. The tax-cut bill reduced the surplus by $17 billion.

The tax-cut bill reduced the surplus by $17 billion. The tax-cut bill reduced the surplus by $17 billion.

The tax-cut bill reduced the surplus by $17 billion. The tax-cut bill reduced the surplus by $17 billion.

Any efforts to increase spending in this bill without offsets will only make this problem worse.
indicated in its Statement of Administration Policy of June 19, 2001, that the President does not intend to designate the $473 million of emergency spending contained in the House-passed bill as emergency spending.

The administration further states that, "emergency supplemental appropriations should be limited to extremely rare events." The Senate supplemental bill contains no emergency designations. Nonetheless, I do believe that it is appropriate for Congress and the President to use the emergency authority from time to time in response to natural disasters and other truly unforeseen events in the nature of disasters.

As I mentioned earlier, this supplemental appropriations bill provides immediate relief through the Low-Income Home Energy Assistance, LIHEAP, for American families being hit hard by this energy crisis. Moreover, it includes funding to help educate our most needy students through the Education for the Disadvantaged Program. To help offset the cost of these two supplemenals, a rescission of unallocated dislocated worker funds under the Workforce Investment Act was also included in the committee bill.

The States have accumulated a large, unexpended balance of dislocated worker funds due to start-up delays with the Workforce Investment Act of 1998. These funds are estimated to exceed $600 million for the program year that ended on June 30, 2001. Although the rescission of dislocated worker funds will reduce the Fiscal Year 2001 appropriation from $1.59 billion to $1.37 billion, the Labor Department projects that the carryover funds from the previous program year will more than offset the rescinded funding, including carryover balances, will actually increase by $423 million in program year 2001, or 25 percent above the level for program year 2000.

Furthermore, report language was included in the supplemental appropriations bill expressing the Senate Appropriations Committee’s support for the Workforce Investment Act, the dislocated worker program, and the committee’s intent to carefully monitor the implementation and services. Should it be determined that additional funds are needed, the Appropriations Committee will do all it can to ensure that sufficient funds are included in the Fiscal Year 2002 Department of Labor, Health and Human Services, and Education, and Related Agencies Appropriations bill.

Pursuant to the unanimous consent agreement, Senator STEVENS and I will be offering a managers’ amendment that contains a number of amendments that have been agreed to by both sides. One of the items in the managers’ amendment is an amendment of mine to provide $3 million to hire additional USDA inspectors to provide the proper treatment of livestock. Another item would provide $20 million to help farms that are located in the central valley of California. The cost of these and other provisions contained in the managers’ amendment is fully offset.

I have noted in the press recently some stories that greatly concern me. I believe the American people are concerned and are becoming increasingly sensitive to the treatment of animals. Reports of cruelty to animals through improper livestock production and slaughter practices have hit a nerve with the American people. The recent announcements by major food outlets, such as McDonalds, that they would only buy products from suppliers that could assure certain levels of humane animal treatment speak volumes to changing public opinion.

The managers’ amendment will provide an additional $3 million through the USDA Office of the Secretary for activities across three department mission areas to protect and promote humane treatment of animals. Of the $3 million provided, no less than $1 million is directed to enforcement of the Animal Welfare Act, under which standards for livestock production, laboratory animals, and so-called puppy mills are established. In addition, no less than $1 million is directed for activities under the Federal Meat Inspections Act, which will enhance humane treatment in the slaughter of animals in facilities under the jurisdiction of Federal inspection. Finally, an amount up to $500,000 is directed for the development and demonstration of technologies that can be used by producers, processors, and others to provide better care of animals at all stages of their lives.

Mr. President, I shall, in conclusion, ask unanimous consent—but not right at this point—that certain newspaper articles which have been written with respect to the slaughter of animals, and the inhumane slaughter of animals, be printed in the Record at the conclusion of my remarks.

This bill responds to the President’s supplemental request for necessary defense spending, and it also provides funding for important domestic priorities. It is consistent with the one thin-ly, much-worn dime—over the President’s request. It is within the statutory spending limits. It is a responsible bill, and I urge Members to support it.

Before yielding the floor, let me express my thanks to the distinguished senior Senator from Alaska, Mr. STEVENS, who is the ranking member on the Appropriations Committee in the Senate. He is the former chairman of the committee with whom I had the privilege of working for several years in that position. And I believe it is a blessing, indeed, for me, as I stand on this floor today to present this bill, to also be able to say that Senator STEVENS and I stood shoulder to shoulder, and we shall continue to work shoulder to shoulder, as we moved forward with this bill.

I cannot adequately express my appreciation to him and to his staff and to my own staff for the great work and the excellent cooperation that have been shown in connection with the preparation and presentation of this bill.

I yield the floor.

The PRESIDENT. Does the Senator make his unanimous consent request at this time?

MR. BYRD. I do make that unanimous consent request.

There being no objection, the material was ordered to be printed in the Record, as follows:

[From the Washington Post, Apr. 10, 2001]

TWO PIECES OF PORK

IN OVERTAXED PLANTS, HUMANE TREATMENT OF CATTLE IS OFTEN A BATTLE LOST

(By Joby Warrick)

PASCO, WASH.—It takes 25 minutes to turn a live steer into steak at the modern slaughterhouse where Ramon Moreno works. For 20 years, his post was "second-legger," a job that entails cutting hocks off carcasses as they whirl past at a rate of 269 an hour. The cattle were supposed to be dead before they got to Moreno. But too often they weren’t.

"They blink. They make noises," he said softly. "The head moves, the eyes are wide and looking around."

Still Moreno would cut. On bad days, he says, dozens of animals reached his station alive and conscious. Some would survive as far as the tail cutter, the belly ripper, the hide puller. "They die," said Moreno, "piece by piece."

Under a 25-year-old federal law, slaughtered cattle and hogs first must be "stunned"—rendered insensible to pain—before being sold for human consumption. But at overtaxed plants, the law is sometimes broken, with cruel consequences for animals as well as workers. Enforcement reports, interviews, videos and worker affidavits describe repeated violations of the Humane Slaughter Act at dozens of slaughterhouses, ranging from the smallest, custom butchers to modern, automated establishments such as the sprawling IBP Inc. plant here where Moreno works.

"In plants all over the United States, this happens on a daily basis," said Lester Friedlander, a veterinarian and formerly chief government inspector at a Pennsylvania hamburger plant. "I’ve seen it happen. And I’ve talked to the veterinarians. They feel it’s out of control."

The U.S. Department of Agriculture oversees the treatment of animals in meat plants, but enforcement of the law varies dramatically. While a few plants have been forced to halt production for a few hours because of alleged animal cruelty, such sanctions are rare.

For example, the government took no action against a Texas beef company that was cited 22 times in 1998 for violations that included chopping hocks off alive cattle. In another case, agency supervisors failed to take action on multiple complaints of animal cruelty at a Florida beef plant and fired an animal health technician, who refused to let new animals inside to correct the problems to the Humane Society. The dismissal letter sent to the technician, Tim Walker,
said his disclosure had been "irreparably damaged" the agency's relations with the packing plants.

"I complained to everyone—I said, 'Look, they're skinning live cows in there.'" Walker said. "Always it was the same answer: 'We know it's true. But there's nothing we can do about it.'"

In the past three years, a new meat inspection system that shifted responsibility to industry has made it harder to catch and report cruelty problems, several federal inspectors say. Under the new system, implemented in 1998, the agency no longer tracks the number of humane-slaughter violations its inspectors find each year.

Some inspectors are so frustrated they're asking outsiders for help: The inspectors' union last spring urged Washington state authorities to crack down on alleged animal abuse at the IBP plant in Pasco. In a statement, IBP said problems described by workers in its Washington state plant "do not accurately represent the way we operate our plants. We take the issue of proper livestock handling very seriously."

But the union complained that new government policies and faster production speeds at the plant had "significantly hampered our ability to ensure compliance." Several animal welfare groups joined in the petition.

"Privatization of meat inspection has meant a real decline in the ability to catch and report violations of humane slaughter," said Gail Eisnitz of the Humane Farming Association, a group that advocates better treatment of animals. "USDA isn't simply relinquishing its humane-slaughter oversight to the meat industry, but is—without the knowledge and consent of Congress—abandoning it altogether."

The USDA's Food Safety Inspection Service, which is responsible for meat inspection, says it has not relaxed its oversight. In January, the agency ordered a review of 100 slaughterhouses. An FSIS memo reminded its 7,600 inspectors they had an "obligation to ensure compliance with humane-handling regulations." The review comes as pressure grows on both industry and regulators to improve conditions for the 155 million cattle, hogs, horses and sheep slaughtered each year in the U.S. McDonald's and Burger King have been subject to boycotts by animal rights groups protesting mistreatment of livestock.

As a result, two years ago McDonald's began requiring suppliers to abide by the American Meat Institute's Good Management Practices for Animal Handling and Stunna. The company also began conducting annual audits of meat plants. Last week, Burger King announced it would require suppliers to follow the meat institute's standards.

"Burger King Corp. takes the issues of food safety and animal welfare very seriously, and we expect our suppliers to comply," the company said in a statement.

Industry groups acknowledge that sloppy killing has tangible consequences for consumers as well as company profits. Fear and pain can cause animals to lose weight, damage meat and cost companies tens of millions of dollars a year in discarded product, according to industry estimates.

Industries also recognize an ethical imperative to treat animals with compassion. Science is blurring the distinction between the mental processes of humans and lower animals—animals, for example, that even the lowly rat may dream. Americans thus are becoming more sensitive to the suffering of food animals, even as they consume increasing amounts of meat. "Handling animals humanely," said American Meat Institute president J. Patrick Boyle, "is just the right thing to do."

Clearly, not all plants have gotten the message.

A Post computer analysis of government enforcement records found 527 violations of humane-handling regulations from 1996 to 1997, the last years for which complete records were available. The offenses range from overcrowded stockyards to incidents in which live animals were cut, skinned or scalced.

Through the Freedom of Information Act, The Post obtained enforcement documents from 28 plants that had high numbers of offenses or had drawn penalties for violating humane-handling laws. The Post also interviewed dozens of current and former federal meat inspectors and slaughterhouse workers. A reporter reviewed affidavits and secret video recordings made inside two plants.

Among the findings:

One Texas supreme Beef Packers in Ladonia, had 22 violations in six months. During one inspection, federal officials found nine live cattle dangling from an overhead rail with a stun gun jammed in its head, a violation which announced last fall it was ceasing operations, resisted USDA warnings, saying its practices were no different than others in the industry. The plant apparently followed the regulations.

A reporter reviewed affidavits and secret video recordings made inside two plants.

At an Excel Corp. beef plant in Fort Morgan, Colo., production was halted for a day in 1998 after workers allegedly cut off the leg of a live cow whose limbs had become wedged in a piece of machinery. In imposing the sanction, U.S. inspectors cited a string of violations in the previous two years, including the cutting and skinning of live cattle.

Hogs, unlike cattle, are dunked in tanks of hot water after they are stunned to soften the hides for skinning. As a result, a booted worker wearing a chemical spray to be skinning and scaling and drowns. Secret videotape from an Iowa pork plant shows hogs squealing and kicking as they are being lowered into the water.

At IBP's Pasco complex, the making of the American hamburger starts in a noisy, blood-splattered chamber shielded from view by a stainless steel wall. Here, live cattle emerge from a narrow chute to be dispatched in a process known as "knocking" or "stunning." On most days the chamber is manned by a pair of Mexican immigrants who speak little English and earn about $9 an hour for killing up to 2,000 head per shift.

The tool of choice is a captive-bolt gun, which uses a retractable metal rod into the steer's forehead. An effective stunning requires a precision shot, which workers must deliver hundreds of times daily to balky, fast-moving animals that weigh 1,000 pounds or more. Within 12 seconds of entering the chamber, the fallen steer is

CONGRESSIONAL RECORD—SENATE

July 9, 2001
shackled to a moving chain to be bled and butchered. Other workers in a fast-moving production line.

The hitch, IBP workers say, is that some “stunned” cattle wake up.

“If you put a knife into the cow, it’s going to make a noise. It says, ‘Moo!’” said Moreno, the former second-legger, who began working in the stockyard last year. “They move the head and the eyes and the leg like the cow wants to walk.”

After a blow to the head, an unconscious animal may kick or twitch by reflex. But a video reviewed last spring by IBP workers and reviewed by veterinarians for The Post, depicts cattle that clearly are alive and conscious after being stunned.

Some cattle, dangling by a leg from the plant’s overhead chain, twist and arch their backs as though trying to right themselves. Close-ups show blinking reflexes, an unmistakable sign of a conscious brain, according to guidelines approved by the American Meat Institute.

The video, parts of which were aired by Seattle’s KING last spring, shows injured cattle being trampled. In one graphic scene, workers give a steer electric shocks by jamming a battery-powered prod into its mouth.

More than 20 workers signed affidavits alleging that the violations shown on tape are commonplace and that supervisors are aware of them. The sworn statements and videos were prepared with help from the Humane Society of the United States. Some workers had taken part in a 1999 strike over what they said were excessive plant production speeds.

“I’ve seen thousands and thousands of cows go through the slaughter process alive,” IBP veteran Fuentes, the worker who was injured while working on live cattle, said in an affidavit.

“The cows can get seven minutes down the line and still be alive. I’ve been in the side-puller where they’re still alive. All the hide is stripped out down the neck there.”

IBP, the nation’s top beef processor, denounced as an “appalling aberration” the problems caught on the tape. It suggested the events may have been staged by “activists trying to raise money and promote their agenda.”

“Like many other people, we were very upset over the hidden camera video,” the company said. “We do not in any way condone some of the livestock handling that was shown.”

After the video surfaced, IBP increased worker training and installed cameras in the slaughter area. The company also questioned workers and offered a reward for information leading to identification of those responsible for the video. One worker said IBP pressured him to sign a statement denying that he had seen live cattle on the line.

“I knew that what I wrote wasn’t true,” said the worker, who did not want to be identified for fear of losing his job. “Cows still go alive every day. When cows go alive, it’s because they don’t give me time to kill them.”

Independent assessments of the workers’ claims have been inconclusive. Washington State Agriculture Department personnel launched a probe in May that included an unannounced plant inspection. The investigators say they were detained outside the facility for an hour while their identification was checked.

Grandin reviewed parts of the workers’ affidavits and said there was no mistaking what she saw.

“There were fully alive beef on that tail,” Grandin scolded.

INCONSISTENT ENFORCEMENT

Preventing this kind of suffering is officially a top priority for the USDA’s Food Safety Inspection Service. By law, a humane-slaughter designation is among a handful of offenses that can result in an immediate halt in production—and cost a meatpacker hundreds or even thousands of dollars per idle minute.

In reality, many inspectors describe humane slaughter as a blind spot: Inspectors’ regular duties rarely take them to the chambers where stunning occurs. Inconsistencies in enforcement, training and record-keeping hamper the agency’s ability to identify problems.

The meat inspectors’ union, in its petition last spring to Washington state’s attorney general, contended that federal agents are “often prevented from carrying out” the law’s humane provisions. Mandated by federal rule, among the obstacles inspectors face are “dramatic increases in production speeds, lack of support from supervisors in plants and district offices . . . new plant configurations . . . which significantly reduce our enforcement authority, and little to no access to the areas of the plants where animals are killed,” stated the union’s petition to the National Joint Council of Food Inspection Locals.

Barbara Masters, the agency’s director of slaughter operations, told meat industry executives in February she didn’t know if the number of violations was up or down, thought she believed most plants were complying with the law. “We encourage the district offices to monitor trends,” she said.

“The fact that we haven’t heard anything suggests there are no trends.”

But some inspectors see little evidence the agency is interested in hearing about problems. Under the new inspection system, the USDA stopped tracking the number of violations and dropped all mention of humane slaughter from its list of rotating tasks for inspectors.

The agency says it expects its watchdogs to enforce the law anyway. Many inspectors still do, though some occasionally wonder if it’s worth the trouble.

“It always starts an argument: Instead of re-stunning the animal, you spend 20 minutes just talking about it,” said Colorado meat inspector Gary Dahl, sharing his private views. “Yes, the animal will be dead in a few minutes anyway. But why not let him die with dignity?”

(From the Washington Post, Apr. 10, 2001)

BIG MAC’S BIG VOICE IN MEAT PLANTS

By Joby Warrick

KANSAS CITY, Mo.—Never mind the bad old days, when slaughterhouses were dark places called by the world’s No. 1 hamburger vendor is concerned, Happy Meals start with happy cows.

That was the message delivered in February by a coterie of McDonald’s consultants to a group of 140 managers who oversee the slaughter of most of the cattle and pigs Americans will consume this year. From now on, according to the company, suppliers will be judged not only on how cleanly they slaughter animals, but also on how well they manage the small details in the final minutes.

“Cows like indirect lighting,” explained Temple Grandin, an animal science assistant professor at Colorado State University and McDonald’s lead counsel on animal welfare. “Bright lights are a distraction.”

And only indoor voices, please.

“We’ve got to get rid of the yelling and screaming coming out of people’s mouths,” Grandin scolded.

So much attention on atmosphere may seem misplaced, given that the beneficiaries are seconds away from death. But McDonald’s, like much of the meat industry, is serious when it comes to convincing the public of its compassion for the cows, chickens and pigs that account for the bulk of its menu.

Bleeding in past scrapes with animal rights groups, McDonald’s has been positioning itself in recent years as an ardent defender of farm animals. It announced last year it would no longer buy eggs from companies that permit the controversial practice of withholding food and water from hens to speed up egg production.

Now the company’s headfirst plunge into slaughter policing is revolutionizing the way sizeable segments of the country look to a wide range of industry experts and observers.

“In this business, you have a pre-McDonald’s era and a post-McDonald’s era,” said Grant, the worker who has studied animal-handling practices for more than 20 years. “The difference is measured in light-years.”

Others also have contributed to the improvement, including the American Meat Institute, which is drawing ever-larger crowds to its annual “humane-handling” seminars, such as one in Kansas City. The AMI, working with Grandin, issued industry-wide guidelines in 1997 that spell out proper treatment of cows and pigs, and a calm and orderly delivery to the stockyard to a quick and painless end on the killing floor.

But the driving force for change is McDonald’s, which decided in 1998 to conduct annual inspections at every plant that puts the beef into Big Macs. The chain’s observers observe how animals are treated at each stage of the process, keeping track of even minor problems such as excessive squealing or the overuse of cattle prods.

The members of McDonald’s audit team say their job is made easier by scientific evidence that shows tangible economic benefits when animals are treated well. Meat from abused or frightened animals is often discolored and soft, and it spoils more quickly due to bacterial growth, according to the final moments of life, industry experts say.

“Humane handling results in better finished products,” AMI President Patrick Boyle said. “It also creates a safer workplace, because there’s a potential for worker injuries when animals are mishandled.”

Not everyone is convinced that slaughter practices have improved as much as McDonald’s surveys suggest. Gail Eisman, investigator for the Humane Farming Association, notes that until just a few months ago, all McDonald’s inspections were announced in advance.

“The industry’s self-inspections are meaningless,” Eisman said. “They’re designed to lull Americans into a false sense of security about what goes on inside slaughterhouses.”

But Jeff Rau, an animal scientist who attended the Kansas City seminar on behalf of the Humane Society of the United States, saw the increased attention to animal welfare as a hopeful step.

“The industry has recognized it has some work to do,” Rau said. “The next step is to convince consumers to be aware of what is happening to their food before it gets to the tables.”

Starting this year, according to McDonald’s, their food dollars can carry some weight in persuading companies to improve.”
EULOGY OF THE DOG
(By George G. Vest)

WARRENSBURG, MO, Sept. 23, 1870—Gentlemen of the Senate: I stand here to say that a man has in the world may turn against him and become his enemy. His son or daughter whom he has reared with loving care may prove ungrateful. The man may lose all that has been nearest and dearest to him, perhaps when he needs it most. A man's reputation may be sacrificed in a moment of ill-considered action. The people who are prone to fall on their knees to do us honor when success is with us may be the first to throw the stone of malice when failure settles its cloud upon our heads. The one absolutely unselfish friend that a man can have in this selfish world, the one that never deserts him, the one that never proves ungrateful or treacherous is the dog.

Gentlemen of the jury, a man's dog stands by him in prosperity and in poverty, in health and in sickness. He will sleep on the cold ground when the wintry winds blow and the snow drives fiercely, if only he can be near his master's side. He will kiss the hand that has no food to offer, he will lick the wounds that come in encounter with the roughness of the world. He guards the sleep of his pauper master as if he were a prince.

When all other friends desert, he remains. When riches take wings and reputation falls to pieces, he is as constant in his love as the sun in its journey through the heavens. If fortune drives the master forth an outcast against danger, to fight against his enemies. His son or daughter whom he has reared with loving care may prove ungrateful; his enemy. His dog asks no higher privilege than the friendship of a man.

Mr. BYRD. Mr. President, after Senator STEVENS presents his statement, if necessary.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I join the chairman of the Appropriations Committee in presenting this bill, S. 1077, to the Senate today. It provides necessary supplemental funds for the remainder of fiscal year 2001.

Let me start off by thanking Senator BYRD for his comments. It is a pleasure, once more, to present a supplemental bill to the Senate together with my great friend from West Virginia. He is chairman now. I was chairman last year. I can tell the Senate, it makes us as far as I am concerned. We work together. We may have slight disagreements from time to time, but we work those out before coming to this Chamber. I commend him for the way he is now proceeding—as rapidly as possible—to catch up on the schedule of the appropriations bills so we can complete and report them all by the end of this fiscal year.

As stated by Senator BYRD, this bill, as reported by our committee, conforms to the budget resources available for this year in both budget authority and outlays. The bill also matches the total request submitted by President Bush of $6.5 billion.

The bill does not present any emergency appropriations. All spending is within the budget caps set by Congress and within the President's request.

I commend the chairman for reporting this bill out of the committee just 1 day after the House passed the companion measure, H.R. 2216. Our committee had only 2 weeks to consider the President's request, and House adjustments, and sent this bill forward with a unanimous vote in the committee. That is a great compliment to Senator BYRD as the chairman of the committee.

I am pleased to join him in recommending the bill to the Senate. I urge all Members to support the bill and to adhere to the tight spending limits that have been adhered to by the committee itself. Nearly 90 percent of the funding provided in this bill addresses the ongoing needs of the Department of Defense.

I join also in commending the senior Senator from Hawaii, Mr. INOUYE, the chairman of the Defense Subcommittee, for his determination to meet the readiness, quality of life, and health care needs of the men and women who serve in our Nation's Armed Forces.

In addition to the amounts requested by the President and provided in the bill for the direct care system for military medicine, additional funds are also proposed for Army real property maintenance and spare parts advocated by General Shinseki, the Army Chief of Staff. Funds are also provided for Navy ship depot maintenance and engagement initiatives for the commander in chief of the U.S. Pacific Command.

Based on extensive hearings by the Defense Subcommittee and numerous discussions with the Secretary of Defense, these amounts are adequate to meet the military's needs through the end of this fiscal year.

This bill is no substitute for the significant increase in defense funds that have been sought by the President in his budget amendment. He has sought an additional $18.4 billion over the original request for fiscal year 2002. We are looking here only at amounts needed through September 30 of this year, 2001. Just 33 days from now, we will see the end of this fiscal year.

Amendments may be offered that would provide additional funds for this year—for 2001. I urge my colleagues to withhold such amendments. We have adequately discussed the needs with the Department, and we believe there are no additional funds that could be spent within this fiscal year of 2001.

We will have an opportunity to assess the needs of the Department through the Defense authorization and appropriations bills for 2002 they real year that we will address starting on October 1 of this year. We cannot address all those needs here. We do not need to deal with the 2002 requests in a 2001 supplemental appropriations bill.

I join my colleagues in their belief that we need additional resources for our national defense. I shall do my best to support the request of the President, and all other funding that we might be able to achieve, to really deal with the Department of Defense needs.

The underfunding of the past cannot be corrected in one supplemental bill. The new Secretary and the President of the United States have asked for our support while they establish priorities and determine the most vital needs for our Armed Forces. We have had significant changes in our military strategy, and we should accord the President of the United States and the Secretary of Defense the courtesy they have requested and wait for their report.

We need to move this bill out of the Senate today. I join Senator BYRD in committing to hold this bill to the level set by the committee and by the President for this fiscal year.

We need to get the military the money they need by getting this bill to conference and out of conference this week so that they will have these funds available for the remainder of this year. I also commit to working with my colleagues to secure the funding later this month, and in September, for fiscal year 2002 and future years.

In addition to the military requirements, there are several pressing disaster relief challenges that face our National Government. Through several conversations with the Director of the Federal Emergency Management Agency, Joe Allbaugh, I am anxious about the level of FEMA disaster relief funding available for the rest of this calendar year.

So far, no further supplemental request has been received from the Office of Management and Budget for this fiscal year. It is my hope that additional information will be available to the conferees on this bill later this week.

Challenges from tropical storm Allison, ice storms in the Southeast, and other disasters continue to stress our National Government. Through several discussions with the Director of the Federal Emergency Management Agency, Joe Allbaugh, I am anxious about the level of FEMA disaster relief funding available for the rest of this calendar year.
With no budget constraints, I could support additional funding for the Department of Defense, for FEMA, for LIHRAp, and several other priorities sought by many of our colleagues.

We were asked by the President to limit funding in this bill to such amounts as could be spent during the remainder of this fiscal year. That is a reasonable request. We were also asked to live within the moneys available under the funding caps set by the Congress. We have already voted on that this year, and we feel constrained by those limits.

We were asked to break the cycle of ‘emergency’ appropriations as simply a tool to get around budget limits. We do not support those actions, and the executive branch in the past has required emergency appropriations each year. We hope we will not have to pursue that policy in the future.

This bill meets the demands of the Congress and the President of the United States for budget constraints. We hope we can go to conference this week with the House. If the Senate passes this bill, as we hope, early tomorrow morning, that will take place.

I implore all Senators to work with us today to complete this bill so the funds can get to the Armed Forces by the end of this week.

We have been in sort of a vicious cycle in recent years whereby the Chairman of the Joint Chiefs and the Chiefs themselves have had to determine how much they could spend in the early parts of the fiscal year because of constraints placed on them due to the deviation of funds for peacekeeping and other activities. That has led every year to a supplemental. This is one of those supplementals for funds necessary to carry out the basic needs of our military during the summertime. The steaming hours of our Navy, the flying hours of our Air Force and our Marines and Navy, the ground exercises by our Army, and the activities that take place throughout the world by our men and women in the armed services demand additional money.

This is the bill to fund those for the remainder of July and August and September. Those activities will depend upon the passage of this bill. If the Senate passes this bill, the better off we will be in terms of the training and the activities of our men and women in the armed services to assure their capabilities to defend this country.

I urgently support this bill. I urgently urge the Senate to pass it as soon as possible.

I request the cooperation of every Member of the Senate in trying to help us accomplish that objective no later than tomorrow afternoon.

Mr. CONRAD. Mr. President, I am pleased to rise today in support of S. 1077, the Supplemental Appropriations Act for Fiscal Year 2001.

The Senate bill provides $8.477 billion in new discretionary budget authority, offset by the rescission of $1.553 billion of budget authority provided in previous years, for a net increase of $6.924 billion. As a result of this additional budget authority, outlays will increase by $1.291 billion in 2001. The Senate bill meets its revised section 302(a) and 302(b) allocations for budget authority and is well under—by more than $1 billion—those allocations for outlays.

I commend Chairman BYRD and Senator STEVENS for their bipartisan effort under unusual circumstances in bringing this important measure to the floor within its allocation and without resorting to unnecessary emergency designs. This bill provides important resources to our uniformed personnel, including funding statutory increases in pay and health care. In addition, it provides assistance to low-income families for heating and education.

I urge adoption of the bill.

I ask for unanimous consent that a table displaying the Budget Committee scoring of this bill printed in the RECORD. There being no objection, the table was ordered to be printed in the RECORD, as follows:

| S. 1077, SUPPLEMENTAL APPROPRIATIONS ACT, 2001 |
|-----------------|-----------|-----------|
|                  | Discretionary | Mandatory |
| Senate-reported bill: | Budget Authority | 6,544 | 936 | 7,480 |
|                  | Outlays       | 1,291 | 936 | 2,227 |
| Amounts available within Senate 302(a) allocation: | Budget Authority | 6,545 | 936 | 7,481 |
|                  | Outlays       | 2,687 | 936 | 3,623 |
| House-passed bill: | Budget Authority | 6,545 | 936 | 7,481 |
|                  | Outlays       | 1,396 | 936 | 2,732 |
| President’s request: | Budget Authority | 6,543 | 936 | 7,479 |
|                  | Outlays       | 1,232 | 936 | 2,168 |
| Senate-reported bill compared to House-passed bill: | |
| Amounts available within Senate 302(a) allocation: | Budget Authority | (1) | 0 | (1) |
|                  | Outlays       | (1,196) | 0 | (1,196) |
| House-passed bill: | Budget Authority | (1) | 0 | (1) |
|                  | Outlays       | (50) | 0 | (50) |
| President’s request: | Budget Authority | 1 | 0 | 1 |
|                  | Outlays       | 59 | 0 | 59 |

Notes: Details may not add to totals due to rounding. Prepared by SBC Majority Staff, June 26, 2001.

Mr. CONRAD. I yield the floor and suggest the absence of a quorum.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the passage of this legislation be discharged.

Mr. CONRAD. I ask for unanimous consent that the order for the passage of this legislation be discharged.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the passage of this legislation be discharged.

The PRESIDING OFFICER. (Mr. COCHRAN). Without objection, it is so ordered.

AMENDMENT NO. 863

Mr. BYRD. Mr. President, I shall send to the desk a managers’ amendment supported by Senator STEVENS and myself. It consists of a package of amendments. These amendments have been cleared on both sides, and I know of no controversy concerning them.

Next is an amendment by Senators HUTCHISON and INHOFE for storm damage repair at military facilities in Texas and Oklahoma.

The next amendment is offered by Senators TORICELLI and CORZINE to convey surplus firefighting equipment in New Jersey.

The next is an amendment by myself to make technical corrections in the energy and water chapter in title I.

Next is an amendment for storm damage repair at military facilities in Texas and Oklahoma offered by Senators HUTCHISON and INHOFE.

Next is an amendment by Senator STEVENS to increase the authorization for the Bassett Army Hospital.

Next is an amendment to provide $3 million for the U.S. Department of Agriculture for humane treatment of animals. That is my amendment. It is fully offset by a later amendment.

Next is an amendment offered by Senators GRASSLEY, ROBERTS, and STEVENS to expedite rulemaking for crop insurance.

Next is an amendment by Senators FEINSTEIN and BOXER and SMITH of Oregon and WYDEN to provide $20 million for the Klamath Basin. Funding is offset in a later amendment.

This will be followed by an amendment by myself in the agriculture chapter to provide an offset for the $3 million for humane treatment of animals.

Next is an amendment to increase a rescission in the committee bill for the oil and gas guarantee program by $4.8 million.

Next is an amendment to strike section 2101 of the committee bill dealing with the Oceans Commission.

Next is an amendment to clarify the use of D.C. local funds to prevent the demolition by neglect of historic properties, followed by an amendment to redirect the expenditure of $250,000 within the Western Area Power Administration, followed by an amendment by Senator BURNS to provide a transfer of $3 million for the Bureau of Land Management energy permitting activities.

Next is an amendment by Senator HARKIN to clarify the timing of the dislocated worker rescission in the committee bill.

This will be followed by a technical change to a heading in the bill.

Next is an amendment offered by Senator DOMENICI to make a technical date correction in the Perkins Vocational Education Act.

Next is an amendment by myself and Senator STEVENS to authorize the expenditure of $20 million previously appropriated, subject to authorization, to the Corporation for Public Broadcasting for digital conversion by local stations.
Next is an amendment to allow the Architect of the Capitol to make payments to Treasury for water and sewer services provided by the District of Columbia.

These will be followed by amendments by Senators MURRAY and STEVENS to, one, appropriate $16,800,000 to repair damage caused in Seattle by the Nisqually earthquake; two, appropriate $2 million for a joint U.S.-Canada commission dealing with connection of the Alaska Railroad to the North American system; and, three, make certain technical corrections. The funding is offset by rescissions.

Next is an amendment by Senator INOUYE to transfer $1 million from the Morris K. Udall Foundation to the Native Nations Institute.

And finally an amendment to name a building in the State of Virginia for a late House colleague, Norm Sisisky, on behalf of Senator WARNER.

I ask unanimous consent that the amendments be considered en bloc and that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I ask unanimous consent that the managers' amendment be agreed to and that it be considered as original text for the purpose of further amendment.

Mr. STEVENS. Reserving the right to object, Mr. President, it is my understanding that the chairman of the committee will offer another unanimous consent request for a second managers' amendment.

Mr. BYRD. Yes. I make that request in conjunction with the request pending.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will report the amendment by number for the information of the Senate.

The bill clerk reads as follows:

The Senator from West Virginia [Mr. BYRD], for himself and Mr. STEVENS, proposes an amendment numbered 861.

The PRESIDING OFFICER. The amendment has been agreed to.

The amendment (No. 861) was agreed to.

The text of the amendment is printed in today's RECORD under "Amendments Submitted."

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. The Senator's unanimous consent request included the request for a second managers' amendment; am I correct?

The PRESIDING OFFICER. That request has been granted.
standing might be or might not be. No matter what happens, one's dog is still one's dog.

A long, frustrating day at work melts into insincerity—gone—with the healing salve of warm, excited greetings from one's ever faithful, eternally loyal dog.

President Truman was supposed to have remarked: If you want a friend in Washington, buy a dog. I often think about Mr. Truman's words. No wonder so many political leaders have chosen the dog as a faithful companion and canine confidante. Former Senate Republican leader, Robert Dole, was constantly bringing his dog, "Leader"—every day—to work with him. President Bush has "Barney" and "Spot." President Truman had an Irish setter named "Mike." President Ford had a golden retriever named "Lucky." The first President Bush had Millie.

Of course, there was President Franklin Roosevelt and his dog, "Fala." They had such a close relationship that his political opponents once attempted and failed to kill him by attacking his dog. Eleanor Roosevelt recalled that for months after the death of her husband, every time someone approached the door of her house, Fala would run to it in excitement, hoping that it was President Roosevelt coming home.

The only time I remember President Nixon becoming emotional, except when he was resigning the Presidency, perhaps more so in the first instance, was in reference to his dog "Checkers." At the turn of the century, George G. Vest delivered a deeply touching summation before the jury in the trial involving the killing of a dog, Old Drum. This occurred, I think, in 1869. There were two brothers-in-law, both of whom served in the Union Army. They lived in Johnson County, MO. One was named Leonidas Hornsby. The other was named Charles Burden.

Burden owned a dog, and he was named "Old Drum." He was a great hunter dog. Any time that his dog backed one could know for sure that it was on the scent of a raccoon or other animal.

Leonidas Hornsby was a farmer who raised livestock and some of his calves and lambs were being killed by animals. He, therefore, swore at any dog that appeared on his property.

One day there appeared on his property a hound. Someone said: "There's a dog out there in the yard." Hornsby said: "Shoot him..."

The dog was killed. Charles Burden, the owner of the dog, was not the kind of man to take something like this lightly. He went to court. He won his case and was awarded $25. Hornsby appealed, and, if I recall, on the appeal there was a reversal, whereupon the owner of the dog decided to employ the best lawyer that he could find in the area.

He employed a lawyer by the name of George Graham Vest. This lawyer gave a summation to the jury. Here is what he said:

The best friend that a man has in this world may turn against him and become his enemy. His son or daughter whom he has reared with loving care may prove ungrateful. Those who are nearest and dearest to us, those whom we trust with our happiness and our good name may become traitors to their faith. The money that a man has, he may lose. It flies away as if by magic when he needs it most. A man may sacrifice his reputation in a moment of ill-considered action.

The people who so proudly fall on their knees and do us honor when success is with us may be the first to throw the stone of malice when failure settles its cloud upon our heads. The one absolutely unfailingly friend that a man can have in this selfish world, the one that never deserts him, the one that never proves ungrateful or treacherous, is the dog.

Gentlemen of the jury, a man's dog stands by him in prosperity and in poverty, in health and in sickness. He will sleep on the cold ground when the wintry winds blow, and, if the snow drives fiercely, if only he can be near his master's side. He will kiss the hand that has no food to offer, he will lick the wounds and sores that come in encounter with the roughness of the world. He guards the sleep of his pauper master as if he were a prince.

When all other friends desert, he remains. When riches take wings and reputation fails to pieces, he is as constant in his love as the Sun in its journey through the heavens.

If fortune drives the master forth and outcast into the world, friendless and homeless, the faithful dog asks no higher privilege than that of accompanying him, to guard him against danger, to fight against his enemies.

And when the last scene of all comes, death takes the master in its embrace and his body is laid in the cold ground, no matter if all other friends desert him and pursue their way, there by his graveside will the noble dog be found, his head between his paws, his tail curled in alert watchfulness, faithful and true, even unto death.

Well, of course, George Vest won the case. It was 1869 or 1870. In 1879 he ran for the U.S. Senate and was elected and served in the Senate for 24 years. The citizens in Warrensburg, MO, decided to build a statue to Old Drum, and that statue stands today in the courtyard at Warrensburg. Harry Truman contributed $250 to the building of the statue. I recently asked new senators from Missouri have they heard about Old Drum. I asked that of Krt Bond one day and he remembered, so upon his first occasion to visit Warrensburg, MO, after that, he brought me a picture of the statue of Old Drum.

So, just a little pot, a little treat, a little attention for the dog is all that a pet asks. How many members of the human species can love so completely? How does man return that kind of affection?

I remember a recent news program that told of a man who was going around killing dogs and selling the meat from them. A couple of years ago, NBC News reported that American companies were importing and selling tests made in China, in which the poor beasts are unable to turn around or lie down in natural positions, and this way they live for months at a time. On profit-driven factory farms, veal calves are confined to dark wooden crates so small that they are prevented from lying down or scratching themselves. These creatures feel; they know pain. They suffer pain just as we humans suffer pain. Egg-laying hens are confined to battery cages. Unable to spread their wings, they are reduced to nothing more than an egg-laying machine.

Last April, the Washington Post detailed the inhumane treatment of live-stock in our Nation's slaughterhouses. A 23-year-old Federal law requires that cattle and hogs to be slaughtered must first be stunned, thereby rendered insensitive to pain, but mounting evidence indicates that this is not always being done. That these animals are sometimes cut, skinned, and scalded while still able to feel pain.

A Texas beef company, with 22 citations for cruelty to animals, was found to have violated this law. An inspection of an Iowa pork plant confirmed that carcasses were sometimes cut, skinned, and scalded while still able to feel pain.
CONGRESSIONAL RECORD—SENATE  

July 9, 2001

Mr. REID. Mr. President, this amendment has been sent to the desk on behalf of Senators SCHUMER, REID, DODD, LIEBERMAN, and CORZINE that would rescind $33.9 million in unnecessary spending from the supplemental appropriations bill.

This money would finance an unnecessary and inappropriate notice to taxpayers on the rebate they will receive as part of the Economic Growth and Tax Relief Reconciliation Act of 2001.

This amendment is offered to help uphold the standards of professionalism and integrity that the Internal Revenue Service has historically tried to maintain.

These standards are threatened by this partisan notification.

The letter reads:

We are pleased to inform you that the United States Congress passed and President George W. Bush signed into law the Economic Growth and Tax Relief Reconciliation Act of 2001, which provides long-term relief for all Americans who pay income taxes. The new tax law provides immediate tax relief in 2001 and long-term tax relief for the years to come.

In 1975, a similar rebate was made available to taxpayers and it was simply included in the refunds.

I look forward to working with my colleague on this amendment, as does Senator SCHUMER, as debate on the supplemental appropriations proceeds. I hope this amendment will be accepted.

Mr. President, I ask unanimous consent that the amendment be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 863

Mr. REID. Mr. President, on behalf of Senator FEINGOLD, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The senior assistant bill clerk read as follows:

The Senate from Nevada [Mr. Reid] for Mr. Feingold, proposes an amendment numbered 863.

Mr. REID. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To increase the amount provided to combat HIV/AIDS, malaria, and tuberculosis, and to offset that increase by rescinding amounts appropriated to the Navy for the V-22 Osprey aircraft program)

On page 28, beginning on line 9, strike “$100,000,000” and all that follows through line 13, and insert the following: “$693,000,000, to remain available until expended: Provided, That this amount may be made available, notwithstanding any other provision of law, for a United States contribution to a global trust fund to combat HIV/AIDS, malaria, and tuberculosis: Provided, further, That the entire amount made available under this heading is designated by the Congress as an emergency requirement pursuant to section
CRAIG, Mr. MILLER, Mr. CRAPO, and Mr. STEVENS made the motion that the Senate stand in recess for a moment to have lunch, if necessary.

Mr. CRAIG. Mr. President, I send an amendment to the Senate floor and wishes to offer an amendment to the amendment that currently has a B-1B mission, and actually eliminates the B-1B entirely from Mountain Home Air Force Base in my State, from McConnell Air Force Base in Kansas, and from Robbins Air Force Base in Georgia.

Such a drawdown in the B-1B fleet has the same national impact as would B-2 eyeability. This magnitude should not be made without consultation with Congress. There was no opportunity for advice and consent on the part of the Air Force or the Office of the Secretary of Defense.

Therefore, I offer this amendment on behalf of myself and Senator ROBERTS to preempt any precipitous action by the Department of Defense that could circumvent the right of Congress to review such a significant change in our Air Force's defense strategy.

This amendment will prevent any 2001 funds from being used for the preparation of retiring, dismantling, or reassigning any portion of the B-1B fleet. This would allow Congress the necessary time to consider the significance of the Air Force's decision and its impact with regard to the fiscal year 2002 defense budget.

The B-1B satisfies a very specific warfighting requirement as our fastest long-range bomber capable of flying intercontinental missions without refueling. With its flexible weapons payloads and a high carrying capacity, it is extremely effective against time-sensitive and mobile targets.

While cutting the force structure is advocated as a means of cost savings and weapons upgrade, it comes at a significant national security cost. Removal of the B-1B from Mountain Home Air Force Base calls into question DOD's support of the composite wing which is the basis for the air expeditionary wing concept and raises other long-term strategic and mission questions.

The composite wing is our Nation's "911 call" in times of conflict that require rapid reaction and deployment over long distances. Do we want to eliminate our nation's 911 call, particularly in light of a future defense strategy that requires the increase capabilities that the B-1B offers as a long-range, low-altitude, fast-penetration bomber?

Mountain Home Air Force Base is unique.

At Mountain Home, we train our men and women in uniform as they are expected to fight by bringing together the composite wing mission with our premier training range with significant results that will ensure that we are the next generation air power leaders.

We have composite wing training twice a month, premier night low-altitude training, dissimilar air combat training, and the current composite wing configuration fulfills the air expeditionary wing requirement 100 percent. Without the B1-B in the composite wing, our target load capability is reduced by 60 percent.

Removal of the B1-B from the three bases will actually increase costs while reducing operational readiness: The B1 missions for the National Guard at McConnell and Robbins Air Force Bases have far greater capability than active duty units at Dyess Air Force Base in Texas and Ellsworth Air Force Base in South Dakota, with 25 percent less cost per flying hour, due to decreased wear and tear on the aircraft. Also, the National Guard repairs B-1 engines for the whole fleet at 60 percent of the depot cost. As a result of the high costs associated with traveling to others bases for training, other B1-B wings from Dyess Air Force Base and Ellsworth Air Force Base take part only once a year in composite wing training, whereas the B1-B wing at Mountain Home Air Force Base conducts this type of training twenty four times per year. The result is that aviators from Mountain Home are rated higher in operational inspections and training because of the enhanced training opportunities which they receive at reduced cost to the government.

The Department of Defense shouldn't make budget decisions which change major national security objectives without congressional review. Military budget decisions should be made for the right reasons and not be based on playing political favors, especially when it impacts our operational capability and readiness, and will cost the government more money in the long run. Therefore, I urge my colleagues to support this amendment which will provide Congress with time to review the Air Force's decision and its effects on our national defense structure.

I have another amendment for proposal that is to be drafted and that I believe the ranking member will offer before the 6 o'clock deadline. I will speak briefly to that amendment. It deals with grain and commodity sales to Israel.

Israel, as we all know, began to receive cash transfer assistance in 1979 which replaced, in part, commodity imports under the Food for Peace program. This aid transfers assistance specifically for commodity purchases. Israel agreed to continue to receive United States grain, of which it has purchased 1.6 million metric tons...
every year since, or until this year, 2001, and ship half of it in privately owned United States-flagged commercial vessels. That, in essence, was the agreement in 1979.

Despite a level of United States aid in every year since 1984 that has been higher than the 1979–1983 level, Israel never increased its grain imports. That was significant to a quid pro quo: As our rates increased, support would go up, and so would their purchases of commodities. Had proportionality been the test, Israel would have reached the 2.45 million tons at least at one point. It never has. However, Israel has consistently cited proportionality in reference to the 2001 Foreign Operations appropriation act in stating its intent to cut purchases of approximately 1.2 million metric tons in this fiscal year. This cut is disproportionately greater than the reduction of the U.S. aid from the 2000–2001 fiscal period and is not consistent with congressional intent.

My amendment, which will be proposed later this afternoon, reshapes this, ensuring that a side letter agreement, with the terms of at least as favorable treatment as those in the year 2001, would be more consistent with past congressional intent and previous bilateral relations. Proportionality is something that I don’t think can be or should be effectively argued whereas they did not respond when our aid increased.

We will be bringing a letter to the floor insisting that Israel stay consistent with what was agreed to following 1979 as it related to turning, if you will, commodity import programs into cash transfer assistance. We think we have honored our agreement with Israel. The amendment simply requires them to honor their agreement with us.

I yield the floor.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CONRAD. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

USE OF MEDICARE AND SOCIAL SECURITY TRUST FUNDS

Mr. CONRAD. Mr. President, I enjoyed reading the Washington Post this morning and listening to the weekend talk shows. I noticed I was the subject of a number of the articles and a number of the shows. I must say, I didn’t recognize the policy that was being ascribed to me. I know people have taken what I have proposed and twisted it and distorted it in a way that is almost unrecognizable. I think after examination it is clear why they have done that, but we will get into that in a moment.

The article I would refer to is Robert Novak’s piece in this morning’s Washington Post that was headlined, “Kent Conrad’s Show Trial.”

Mr. Novak asserted that a hearing that I will be chairing later this week to talk about the fiscal condition of the country and where we are headed is some kind of a show trial. I want to assure Mr. Novak and anyone else who is listening, I have no interest in show trials. I do have a very serious interest in where we find ourselves after the fiscal policy that the President proposed has been adopted in the Congress because I think it has created serious problems.

Mr. Daniels, the head of the Office of Management and Budget, was on one of the talk shows this weekend and he said I was engaged in what he referred to as “medieval economics.” I kind of like better the way Mr. Novak referred to me. He accused me of “antique fiscal conservatism.” “Antique fiscal conservatism,” that is the characterization he applied to the policies I proposed. Mr. Daniels called it “medieval economics.”

What is it that I have talked about that has aroused such ire? All I have said is I don’t think we ought to be using the trust funds of Medicare and Social Security for other purposes.

That is what I have said. I think that is the right policy. I don’t think we should be using the trust funds of Social Security and Medicare for other purposes. After I made that statement, and after I noted that the latest numbers that come from this administration suggest that in fact we will be doing precisely that this year and next year, Mr. Daniels responded by suggesting that means Senator CONRAD favors a tax increase at a time of an economic slowdown.

That is not my proposal. That is not what I suggested. In fact, my record is precisely the opposite of that. They know that. They know that as the ranking Democrat on the Budget Committee this year, I didn’t propose a tax increase in the midst of an economic slowdown. It is precisely the opposite of that. I proposed a $60 billion tax reduction as part of the Democratic alternative to the budget the President proposed. In fact, I supported much more tax relief as fiscal stimulus in this year than the President had in his plan.

So please, let’s not be mischaracterizing my position and suggesting I was for a tax increase at a time of economic slowdown. That is not the truth. That isn’t my record. My record is absolutely clear. Through all of the records of the Budget Committee and the debate on the floor, both during the budget resolution and the tax bill, my record is as clear as it can be. I favored fiscal stimulus this year, more fiscal stimulus than the President proposed—not a tax increase, a tax cut.

Mr. Daniels, don’t mischaracterize my position. You know full well I have not been called for a tax increase in times of an economic slowdown. You know full well that my record was calling for a tax cut—in fact, more of a tax cut in this year of economic slowdown than the President was calling for.

It is true that over the 10 years of the budget resolution I called for a substantially smaller tax cut than the President proposed because I was concerned about exactly what happened. Let’s turn to that because this is what set off this discussion.

As we look at the year we are now in, fiscal year 2001, if we start with the total surplus of $275 billion and take out the Social Security surplus of $17 billion, we leave with a surplus of $156 billion and the Medicare trust fund of $28 billion, that leaves us with $92 billion. The cost of the President’s tax cut which actually passed the Congress wasn’t what he proposed. It was substantially different than he proposed because it was more front-end loaded. $74 billion this year. And $33 billion of that is a transfer out of this year into next year—a 2-week delay in corporate tax receipts in order to make 2002 look better because they knew they were going to have a problem of raiding the Medicare trust fund in 2002.

What did they do? They delayed certain corporate receipts by 2 weeks—$33 billion worth—and put them over into 2002. That added to the cost of the tax bill.

There is only $40 billion of real stimulus in this tax bill that is going to go into the hands of the American people during this year. But that cost is $74 billion because of this cynical device they use to delay corporate tax receipts to make 2002 look better.

As we go down and look at the cost of other budget resolution policies for this year—largely the bill that is on the floor right now, the supplemental appropriations bill for certain emergencies—and we look at possible economic revisions that their own administration has suggested will come—that is, we are not going to receive the amount of revenue anticipated—we then see that we are into the Medicare trust fund by $17 billion this year. That is what it shows for this year.

We had distinguished economists testify before the Budget Committee. Based on what they said, next year we are going to not only be using the entire Medicare trust fund surplus but we are actually going to be using some of the Social Security trust fund as well, $24 billion next year; that is, if we take into account a series of other policy choices that are going to have to be made.
That is the question I am raising. Mr. Daniels wants to change that into a discussion of having a tax increase this year. They are forecasting strong economic growth. That is their forecast. Yet with a forecast of strong economic growth starting next year, we see that we are into the Medicare trust fund and the Social Security trust fund next year. We have problems with the two funds in 2003 and 2004, and that is before a single appropriations bill has passed.

This is not a question of the Congress spending more money and putting us back in the deficit ditch. That is not this situation. We are in trouble just based on the budget resolution that was passed—the Republican budget resolution, I might add.

Their tax cut—the tax cut supported by the President and the reduction in revenue that they themselves are predicting—we have trouble going into the Medicare and Social Security trust funds just on the basis of those factors: The budget resolution that they endorsed, the tax cut that they proposed and the President signed, and the economic slowdown that they are predicting.

We are into the trust funds already. That is before the President’s request for additional funding for defense. He has already asked for $18 billion for next year. That has a 10-year effect of over $200 billion.

The question I am raising is, Where should that money come from? We are already into the trust fund before the President’s defense request. Should that come out of the trust funds of Medicare and Social Security? Should we raise taxes to fund it? Should we cut other spending to fund it? Where should the money come from? Or, does the administration believe we should just go further into the Social Security and Medicare trust funds? I hope that is not what they believe because I think that would be a mistake.

Again, this is all within the context of the forecast of a stronger economy, of a growing economy. Is that circumstance the right policy to fund the President’s additional spending requests for defense and the right policy to take it out of the Medicare trust fund or the Social Security trust fund? I don’t think so. I think that is a serious mistake. As I say, we are already in trouble. We are already into the trust funds before the President’s defense request, before any new spending for education.

Remember that the Senate just passed, almost unanimously, a bill that authorized more than $300 billion of new spending for education. It is not in the budget resolution. We can see that if we fund just a part of that—if we only fund $150 billion of it—that makes the 10-year situation with the trust funds more serious.

This is before any funding for natural disasters. There is no funding for natural disasters in the budget. Yet we know we spend $5 billion to $6 billion a year on natural disasters. Should that funding come out of the Medicare and Social Security trust funds? That is exactly where we are headed.

The question is, Is that the right policy? That is before the tax extenders are dealt with. Those are popular measures such as the research and development tax credit and the wind and solar energy credits. Some of them run out this year. We are going to extend them. Yet that is not in the budget. Is it the right policy to fund the tax extenders out of the Medicare and Social Security trust funds? Because that is what we are poised to do.

The alternative minimum tax—that now affects some 2 million taxpayers, but under the tax bill that has passed it is going to affect 35 million taxpayers—just to fix the part of the alternative minimum tax that is caused by the tax bill we just passed would cost over $200 billion to fix. That is not in the budget. Should that money come out of the Medicare and Social Security trust funds? Because that is what we are poised to do.

I have said I do not think that is a good policy. I do not think we should pay for a defense buildup out of the trust funds of Social Security and Medicare. I do not think we should pay for additional education funding out of the trust funds. I do not think we should pay for natural disasters or tax extenders or the alternative minimum tax fix out of the Medicare and Social Security trust funds. Because that is what we are poised to do.

I think, as I have said, at a time of strong economic growth—which is what is in the forecast—as a policy we should be using the Medicare and Social Security trust funds to fund other parts of governmental responsibility. I think that is a profoundly wrong policy. Any private-sector organization in America that tried to use the retirement funds of their employees to fund the operations of the organization would be headed for a Federal institution, but it would not be the Congress of the United States; they would be headed for a Federal prison because that is fraud, to take money that is intended for one purpose and to use it for another.

I think, as I have said, at a time of strong economic growth—which is what is in the forecast—as a policy we should be using the Medicare and Social Security trust funds to fund other parts of governmental responsibility. I think that is a profoundly wrong policy. Any private-sector organization in America that used the retirement funds of their employees to fund the operations of the organization would be headed for a Federal institution, but it would not be the Congress of the United States; they would be headed for a Federal prison because that is fraud, to take money that is intended for one purpose and to use it for another.

We have stopped that practice. In the last year we stopped raiding the trust funds to use those moneys for other purposes. We have stopped it. We have used that money to pay down debt. That is the right policy.

We also do not go back to the bad old days of raiding every trust fund in sight in order to make the bottom line look as if it balances. I suggest to my colleagues, using the Medicare trust fund or the Social Security trust fund for the other costs of Government is not a responsible way to operate. That is the point I have made.

I do not advocate a tax increase at a time of economic slowdown. I want to repeat, my proposal that I gave my colleagues was for a substantial tax cut this year, fiscal stimulus, $60 billion of fiscal stimulus that I supported in this year. But we are not talking about an economic slowdown being projected by this administration for the next 10 years.

I just saw the Secretary of the Treasury, the top spokesman on economic policy for this administration, at a meeting overseas saying they anticipate a return to strong economic growth next year. That is their projection. That is their forecast.

What I am saying is, if we are in a period of strong economic growth, it is not right to raid the trust funds of Medicare and Social Security for other purposes. It is just wrong. It should not be done. But that is exactly where we are headed. The record is just as clear as it can be. We are going to be into the Medicare trust fund and even the Social Security trust fund next year just with the budget resolution that has passed, just with the tax cut that has passed, and just with the slowdown in the economy that we already see. That is where we are. That is before any additional money for defense. That is before any additional money for education. That is before any money for natural disasters or tax extenders or to fix the AMT problem. And that is before additional economic revisions we anticipate receiving in August from the Congressional Budget Office.

When we factor in those matters, what we see is a sea of red ink, what we see is a very heavy invasion of both the Medicare trust fund and the Social Security trust fund. That is where we are headed. They are projecting a strong return to economic growth.

The question I am posing to my colleagues, and to this administration, is, Does that make any sense as a policy? I do not think so. I do not think this is where we want to go, especially given the fact that we know in 11 years the baby boomers start to retire and then our fiscal circumstance changes dramatically.

We have to get ready for that eventuality. The first thing to get ready for is not to raid the Medicare trust fund and the Social Security trust fund at a time of surpluses. That is just wrong. They can call me an antique fiscal conservative. They can call me somebody...
Mr. DORGAN. Mr. President, I wonder if the Senator would answer some of my colleague's numbers. I don't think this is antique fiscal conservatism. I think this is good old-fashioned, Midwestern common sense. You do not take the retirement funds of your citizens to fund the operation of Government. You do not take the health care funds of your people for other operations of Government. I want no part of it. But that is not the case that this rosy scenario everybody talked about—especially conservatives coming to the floor of the Senate—was: "This economy is going to grow for ever, and the surplus will last year after year after year. And let's put in place tax and spending decisions that anticipate that!"

My colleague, Senator CONRAD, and I and others repeatedly said the conservative viewpoint would be a viewpoint that says let's be cautious. Yes, when we have surpluses, let's provide some tax cuts. Let's provide some investments we need. But let's be a little bit cautious in case those surpluses don't materialize.

Yet here we are, just a couple of months from those fiscal policy decisions, and we are going to have a midsession review by the Office of Management and Budget which is what the chairman of the Budget Committee about. That midsession review almost certainly will tell us this economy is much softer than anticipated and we will not have the surpluses we expected. Things might get better, but they might not. And if they don't, we might very well head back into very significant deficit problems.

I ask my colleague, when does the Office of Management and Budget give us their midsession review? Is that supposed to be in July?

Mr. CONRAD. Typically, we would get it in July or August. We are hearing already from the Congressional Budget Office that they anticipate that the forecast will be somewhat reduced because economic growth is not as strong as was anticipated. That means we will have less revenue than was in the forecast.

My colleague and I warned repeatedly that these 10-year forecasts are uncertain. Nobody should be counting on every penny to actually be realized. Some said to us in rejoinder: There is going to be more money. I remember some of my colleagues on the Budget Committee saying they think the forecast is too low.

I hope over time that will be the case. I hope the economy strongly recovers. I hope we have even more revenue. That would be terrific. But I don't think we can base Government policy on that. We certainly can't bet on every dime of the revenue that is in a 10-year forecast.

The reason it matters so much is because if we look ahead—these are the years of surpluses we are in now—but, according to the Social Security, what happens, starting in the year 2016, we start to run into deficits in both Medicare and Social Security. Medicare is the yellow part of the bars; Social Security is the red. These surpluses that we now enjoy turn to massive deficits.

Mr. DORGAN. I wonder if the Senator would yield for a question.

Mr. CONRAD. I am happy to yield.

Mr. DORGAN. Mr. President, I noticed some press coverage today by some folks who were raising some questions about my colleague's numbers. I wonder if the Senator would answer this question. Is it not the case that this question of tax cuts and fiscal policy was always based on surpluses we do not yet have? Is it not the case that this rosy scenario everybody talked about—especially conservatives coming to the floor of the Senate—was: "This economy is going to grow forever, and we surpluses year after year. And let's put in place tax and spending decisions that anticipate that?"

Mr. CONRAD. Typically, we would get it in July or August. We are hearing already from the Congressional Budget Office that they anticipate that the forecast will be somewhat reduced because economic growth is not as strong as was anticipated. That means we will have less revenue than was in the forecast.

Mr. DORGAN. I wonder if the Senator would yield for a question.

Mr. CONRAD. I am happy to yield.

Mr. DORGAN. Mr. President, I noticed some press coverage today by some folks who were raising some questions about my colleague's numbers. I wonder if the Senator would answer this question. Is it not the case that this question of tax cuts and fiscal policy was always based on surpluses we do not yet have? Is it not the case that this rosy scenario everybody talked about—especially conservatives coming to the floor of the Senate—was: "This economy is going to grow forever, and we surpluses year after year. I ask my colleague, when does the Office of Management and Budget give us their midsession review? Is that supposed to be in July?

Mr. CONRAD. Typically, we would get it in July or August. We are hearing already from the Congressional Budget Office that they anticipate that the forecast will be somewhat reduced because economic growth is not as strong as was anticipated. That means we will have less revenue than was in the forecast.

My colleague and I warned repeatedly that these 10-year forecasts are uncertain. Nobody should be counting on every penny to actually be realized. Some said to us in rejoinder: There is going to be more money. I remember some of my colleagues on the Budget Committee saying they think the forecast is too low.

I hope over time that will be the case. I hope the economy strongly recovers. I hope we have even more revenue. That would be terrific. But I don't think we can base Government policy on that. We certainly can't bet on every dime of the revenue that is in a 10-year forecast.

The reason it matters so much is because if we look ahead—these are the years of surpluses we are in now—but, according to the Social Security, what happens, starting in the year 2016, we start to run into deficits in both Medicare and Social Security. Medicare is the yellow part of the bars; Social Security is the red. These surpluses that we now enjoy turn to massive deficits.
I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. NEILSON of Nebraska). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess until the hour of 5 p.m. today.

Mr. STEVENS. Reserving the right to object, Mr. President, will the Senator indicate whether we can get some time limit to make sure people understand the time limit of submission of amendments today? Parliamentary inquiry, Mr. President, if the Senator will yield for a moment.

Mr. BYRD. Yes, I yield for that purpose.

Mr. STEVENS. Is it not the case that all amendments to this bill must be filed and presented by 6 p.m. today?

The PRESIDING OFFICER. The Senator is correct; all amendments must be offered.

Mr. STEVENS. Offered on the floor of the purpose or they will not be eligible for consideration.

The PRESIDING OFFICER. First-degree amendments must be offered by 6 p.m. today.

The Senator from West Virginia.

Mr. BYRD. I renew my request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Thereupon, the Senate, at 4:31 p.m., recessed until 5 p.m. and reassembled when called to order by the Presiding Officer (Mr. DAYTON).

SUPPLEMENTAL APPROPRIATIONS ACT, 2001—Continued

The PRESIDING OFFICER. The Senator from Ohio.

AMENDMENT NO. 865

Mr. VOINOVICH. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is laid aside. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. VOINOVICH), for himself, Mr. HELMS, Mr. SESSIONS, and Mr. CRAPO, proposes an amendment numbered 865.

Mr. VOINOVICH. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows: pursuant to the social security surpluses by preventing on-budget deficits)

At the appropriate place, insert the following:

CONGRESSIONAL RECORD—SENATE 12661

SEC. 9. PROTECT SOCIAL SECURITY SURPLUSES

(a) SHORT TITLE.—This section may be cited as the “Protect Social Security Surpluses Act of 2001”.

(b) REVISION OF ENFORCING DEFICIT TARGETS.—Section 253 of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 903) is amended by—

(1) by striking subsection (b) and inserting the following:

“(b) EXCESS DEFICIT; MARGIN.—The excess deficit is, if greater than zero, the estimated deficit for the budget year, minus the margin for that year. In this subsection, the margin for each fiscal year is 0.5 percent of estimated total outlays for that fiscal year.”;

(2) by striking subsection (c) and inserting the following:

“(c) ELIMINATING EXCESS DEFICIT.—Each non-exempt account shall be reduced by a dollar amount calculated by multiplying the baseline level of sequesterable budgetary resources in the account at that time by the uniform percentage necessary to eliminate an excess deficit;”;

and

(3) by striking subsections (g) and (h).

(c) ECONOMIC AND TECHNICAL ASSUMPTIONS.—Notwithstanding section 254(j) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 904(k)), the Office of Management and Budget shall use the economic and technical assumptions underlying the report issued pursuant to section 1106 of title 31, United States Code, for purposes of determining the excess deficit under section 253(b) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended by subsection (b).

(d) APPLICATION OF SEQUESTRATION TO BUDGET ACCOUNTS.—Section 256(k) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 906(k)) is amended by—

(1) striking paragraph (2); and

(2) redesignating paragraphs (3) through (6) as paragraphs (2) through (5), respectively.

(e) STRENGTHENING SOCIAL SECURITY POINTS OF ORDER.—

(1) IN GENERAL.—Section 312 of the Congressional Budget Act of 1974 (2 U.S.C. 643) is amended by inserting at the end the following:

“(g) STRENGTHENING SOCIAL SECURITY POINTS OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider a resolution on the budget (or any amendment thereto or conference report thereon) or any bill, joint resolution, amendment, motion, or conference report that would violate or amend section 13301 of the Budget Enforcement Act of 1990.

(2) SUPER MAJORITY REQUIREMENT.—

(A) POINT OF ORDER.—Section 904(c)(1) of the Congressional Budget Act of 1974 is amended by inserting “312(g),” after “310(d)(2),”.

(B) WAIVER.—Section 904(d)(2) of the Congressional Budget Act of 1974 is amended by inserting “312(g),” after “310(d)(2),”.

(3) ENFORCEMENT OF EACH FISCAL YEAR.—

The Congressional Budget Act of 1974 is amended in—

(A) section 301(a)(7) (2 U.S.C. 632(a)(7)), by striking “for each fiscal year” through the period and inserting “for each fiscal year covered by the resolution”; and

(B) section 311(a)(3) (2 U.S.C. 632(a)(3)), by striking “beginning with the fiscal year” through the period and inserting the following: “for any of the fiscal years covered by the concurrent resolution.”.

(f) EFFECTIVE DATE.—This section and the amendments made by this section shall apply to fiscal years 2002 through 2006.

Mr. VOINOVICH. Mr. President, one of the primary reasons I wanted to offer this amendment was an opportunity to bring fiscal responsibility to our Nation and help reduce our national debt. As many of my colleagues know, for decades successive Congresses and Presidents spent money on items that, while important, they were unwilling to pay for with an alternative, do without. In the process, Washington ran up a staggering debt and mortgaged our future. Today our national debt stands at about $7.5 trillion. That costs about $200 billion a year in interest payments.

From the time I arrived in the Senate, I have worked to rein in spending and lower the national debt. Over the past 2 1/2 years, I have cosponsored and sponsored a number of amendments designed to bring fiscal discipline to the Federal Government. In March of 1999, I offered an amendment to use whatever on-budget surplus as calculated in the fiscal year 2000 budget to pay down the debt. In March of 2000, I again offered my amendment to use the on-budget surplus calculated for fiscal year 2001 for debt reduction. In an effort to bring spending under control, Senator ALLARD and I offered an amendment in June of 2000 to direct $12 billion of fiscal year 2000 on-budget surplus toward debt reduction. The amendment passed by an overwhelming 95-3 and committed Congress to designate the on-budget surpluses to reduce the national debt, keeping these funds from being used for additional Government spending. Our amendment provided the mechanism to assure that Congress would begin the serious task of paying down the debt.

Further, this past April, Senator FEINGOLD, Senator GINGRICH, and I offered an amendment to the fiscal year 2002 budget designed to tighten enforcement of existing spending controls. Our amendment created an explicit point of order against directed scoring and abuses of emergency spending.

Even with all the amendments I proposed and cosponsored to bring Federal spending under control, I have never lost sight of the fact that we need to enact a Social Security lockbox. Make no mistake, adopting a Social Security lockbox is about protecting Social Security benefits. Social Security beneficiaries will not know the difference if we pass or do not pass a Social Security lockbox. What we are doing today will not have an impact at all on the beneficiaries. The amendment I am offering today will permanently lockbox the Social Security surplus and prevent it from being used for any other purpose.

For decades, the Social Security surplus was used by Congress after Congress and President after President to offset Federal spending. For many of those years, Members of both the House and Senate worked to put the Social Security surplus off limits from
being used for such Federal spending. We talked a lot about it. In 1999, after years of wrangling, in a landmark budget agreement passed in 1995, our Federal Government finally achieved a balanced budget. With this good news, it became apparent that Congress and the President would not need to use the Social Security surplus for spending. This was made possible by our economic prosperity which guaranteed and generated a huge increase in tax revenues, which we knew about, and in turn a massive on-budget surplus. Because the United States was running in the black for the first time in recent memory. Social Security surpluses were used to pay down the national debt instead of being used for spending. Indeed, since 1999, there has been a political consensus not to return to spending that surplus.

However, the economic prosperity this Nation enjoyed as recently as months ago is fading, although I hope this is only a temporary situation. Surplus projections are likely to be revised downward. Yet, Congressional yearning for more spending has not abated.

For fiscal year 2001, Congress, with the encouragement of the Clinton administration, increased nondefense discretionary spending 14.3 percent. That is something people have not taken into consideration. Nondefense discretionary spending in the last budget was 14.3 percent above the year before and increased overall spending by 8 percent, which was way above inflation. All of this was on top of large increases in the previous years' budgets.

If we fund the education bill that the Senate recently passed, which increases spending by 62 percent or $14 billion, and if we spend the $31.4 billion increase in defense spending that the administration is talking about, we could end up spending a portion of the on-budget surplus of fiscal year 2003 and beyond. Part of the reason for this is the fact that the tax reduction was more front-end loaded than the President had intended.

Frankly, if the economy really falters, we could bump up against the Social Security trust fund next year. Nearly everyone in this Chamber agrees we should not spend that surplus, and the public has grown to expect that Congress won't return to spending that it. This year's budget resolution was designed in part to avoid spending that surplus.

At the moment, we are de facto lockingbox Social Security. Therefore, it makes perfect sense to take the next step and lockbox these funds permanently. It is the best possible action we could take to bring fiscal discipline to the 107th Congress. One thing it guarantees we don't touch Social Security, and on the other it ensures we will continue to pay down debt, which fulfills the commitment we have all made and which will give us the interest savings. It is a two-for: We won't spend it; second, it will allow us to continue to pay down the national debt. That is part of what I refer to as the three-legged stool. That three-legged stool in terms of my support for the budget resolution was: Hold spending down, reduce debt, and reduce taxes. But all three of them have to be present. We have to preserve that one stool of reducing the national debt.

If my colleagues think back to the 1980s, they will remember the dramatic increase in the national debt, primarily because of the use of the Social Security surplus. I was here. I was president of the National League of Cities. I came to this Congress before the Finance Committee and supported the Republican proposal to limit spending in any point of any written during that period of time that taxes were reduced and spending went up. Republicans wanted to spend on defense, the Democrats wanted to spend on social programs, and the way they paid for it was to touch the Social Security surplus.

I don't want that to happen while I am a Member of the Senate. I don't think any of my other colleagues want that to happen again.

The 1995 budget was the first time in over three decades that Congress did not use Social Security to pay for Federal spending. Again, in 2000, Congress did not use Social Security spending, although I must say it was hand-to-hand combat to make sure it wasn't used. There was direct scoring, there was emergency spending, and all kinds of other gimmicks because CBO had said we were spending the Social Security surplus, and the only thing that saved us was we got back here in January and CBO came out with new projections, and the budget surplus was more than what we had originally anticipated it to be.

Although the economy is not as robust as it was a year ago, we must resist the temptation to fall off the wagon of fiscal responsibility and resist the urge to resume spending that Social Security trust fund. The amendment we are offering guarantees we will not fall off the wagon. It contains two enforcement mechanisms: A supermajority point of order written into law establishing a Social Security lockbox is the best way to verify that the Social Security surplus remains untouched by those who would spend it. It would also force Congress to fiscal discipline and to make the hard choices in prioritizing our spending with the funds that we have today at our disposal.

I urge my colleagues to join me in support of this amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. VOINOVICH. I yield the floor.

The PRESIDING OFFICER. The Senator from West Virginia.
Mr. BYRD. Did the distinguished Senator from Ohio offer his amendment?

The PRESIDING OFFICER. Yes, he offered his amendment.

AMENDMENT NO. 866 TO AMENDMENT NO. 865

Mr. BYRD. Mr. President, on behalf of Senator CONRAD, I offer an amendment authored by Mr. CONRAD to be an amendment in the second degree to the amendment offered by Mr. VOINOVICH.

I ask unanimous consent that after the clerk states the title of this amendment, that it and the amendment in the first degree be temporarily laid aside.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senate from West Virginia [Mr. BYRD] for Mr. CONRAD, proposes amendment numbered 866 to amendment No. 865.

The amendment is as follows:

(Purpose: To establish an off-budget lockbox to strengthen Social Security and Medicare) Strike all after the first word and insert the following:

TITLE—SOCIAL SECURITY AND MEDICARE OFF-BUDGET LOCKBOX ACT OF 2001

SEC. 1. SHORT TITLE.

This title may be cited as the “Social Security and Medicare Off-Budget Lockbox Act of 2001”.

SEC. 2. STRENGTHENING SOCIAL SECURITY POINTS OF ORDER.

(a) In General.—Section 312 of the Congressional Budget Act of 1974 (2 U.S.C. 643) is amended by inserting at the end the following:

“(g) Strengthening Social Security Point of Order.—It shall not be in order in the House of Representatives or the Senate to consider a concurrent resolution on the budget (or any amendment thereto or conference report thereon) or any bill, joint resolution, amendment, motion, conference report that would violate or amend this section.”

(b) Super Majority Requirement.—

(1) Point of Order.—Section 904(c)(1) of the Congressional Budget Act of 1974 is amended by inserting “312(g),” after “310(b)(2),”.

(2) Waiver.—Section 904(d)(2) of the Congressional Budget Act of 1974 is amended by inserting “312(g),” after “310(d)(2),”.

(c) Enforcement in Each Fiscal Year.—

The Congressional Budget Act of 1974 is amended in—

(1) section 301(a)(7) (2 U.S.C. 622(a)(7)), by striking “for the fiscal year” through the period and inserting “for each fiscal year covered by the resolution”; and

(2) section 311(a)(3) (2 U.S.C. 622(a)(3)), by striking beginning with “for the first fiscal year” through the period and inserting the following: “for any of the fiscal years covered by the concurrent resolution.”

SEC. 3. EXCLUSION OF MEDICARE TRUST FUND FROM BUDGET.

“SEC. 316. (a) Exclusion of Medicare Trust Fund from All Budgets.—Notwithstanding any other provision of law, the receipts and disbursements of the Federal Hospital Insurance Trust Fund shall be not be counted as new budget authority, outlays, receipts, or deficit or surplus for purposes of—

“(1) the budget of the United States Government as submitted by the President;

“(2) the congressional budget; or

“(3) the Balanced Budget and Emergency Deficit Control Act of 1985 amended by adding at the end the following:

“Medicare as funded through the Federal Hospital Insurance Trust Fund.”

(b) Budgetary Treatment of Hospital Insurance Trust Fund.—Section 710(a) of the Social Security Act (42 U.S.C. 911(a)) is amended—

(1) by striking “and” the second place it appears and inserting a comma; and

(2) by inserting after “Federal Disability Insurance Trust Fund” the following: “, Federal Hospital Insurance Trust Fund”.

SEC. 4. PREVENTING ON-BUDGET DEFICITS.

(a) Points of Order To Prevent On-Budget Deficits.—Section 312 of the Congressional Budget Act of 1974 (2 U.S.C. 643) is amended by adding at the end the following:

“(h) Points of Order To Prevent On-Budget Deficits.—

“(1) Concurrent Resolutions on the Budget.—It shall not be in order in the House of Representatives or the Senate to consider a concurrent resolution on the budget (or any amendment thereto or conference report thereon) or any bill, joint resolution, amendment, motion, conference report that would violate or amend this section.”

(b) Super Majority Requirement.—

(1) Point of Order.—Section 904(c)(1) of the Congressional Budget Act of 1974 is amended by inserting “312(g),” after “312(g),”.

(2) Waiver.—Section 904(d)(2) of the Congressional Budget Act of 1974 is amended by inserting “312(g),” after “312(g),”.

The PRESIDING OFFICER. The amendments are laid aside. The Senator from North Dakota.

Mr. CONRAD. Mr. President, very briefly, I thank Senator BYRD for introducing my amendment in the second degree to the amendment of the Senator from Ohio, and indicate to my colleagues the nature of the amendment. I think the Senator from Ohio is going in basically the right direction, but I do not think he is protecting both of the trust funds. I have offered, in the second degree, my amendment that would protect both the Social Security trust fund and the Medicare trust fund but also provide protection. I think both are in danger.

Unfortunately, as I said several moments ago with respect to where we find ourselves, after the budget resolution is passed, after the tax cut is passed, and with the anticipated reduction in the revenue forecast because of the slowdown in the economy, we see we are headed for being into the Medicare trust fund this year, the Medicare...
and Social Security trust fund next year and for all the years that follow. That is before any appropriations have passed. That is before the President’s major request for additional defense spending.

We are already in trouble. We are already headed for raiding the trust funds of Medicare and Social Security. So I am glad the Senator from Ohio has sent up an amendment. I have provided an amendment in the second degree that I think is stronger and provides additional protection and acknowledges that we have a responsibility not just to the Social Security trust fund but to the Medicare trust fund as well.

AMENDMENT NO. 867

Mr. CONRAD. If I could at this moment, on a separate matter, I send an amendment to the desk to the underlying bill. This amendment is to provide in the appropriations for a situation we have just encountered on one of the Indian reservations in my State, the Turtle Mountain Indian Reservation. It is offset so it does not add to the overall cost of the supplemental. But we have found a situation that is extraordinarily serious on the Turtle Mountain Indian Reservation.

Very briefly, I will just describe that and then end so my colleague from Missouri, who is seeking recognition, can gain in floor.

Over 200 homes on the Turtle Mountain Reservation are infested with black mold; 40 percent of them that have been tested have the worst kind of black mold. This is throughout the structures. It is in the basements. It is running up the studs, in the ceilings, in the insulation. People in these homes are sick. We have had two infants die. People who are in the families and medical experts on the reservations believe their deaths are related to the conditions in these homes.

It is because of extraordinarily wet conditions in that part of our State. We have had 7 years of wet conditions. It is as though these houses are in a sponge and the sponge is full and the houses are wicking up the surface water. In fact, if you look in the crawl spaces of these homes, they are filled with water and that water has found its way up through the entire structure and has created the perfect environment for this black mold growth.

We have had the CDC there, the Corps of Engineers, and FEMA. It is a crisis situation that requires emergency housing for some 200 families.

The tribal chairman told me he is about to move people into a school gymnasium because the conditions in these homes are so bad.

I went there personally over the break. I can testify it is the worst situation they had and I have dealt with black mold in our own home here in Washington, DC, in just one small area, where seven times our home flooded because the city sewer system could not handle torrential downpours here. We are the low spot on the block. It cost me $4,000 and three contractors to fix just one small part of one corner of our house.

These are houses that have it throughout. The basements are loaded with black mold. It is in the studding. In fact, you can see it in the beams across the ceilings of these homes.

In every home we went into, people testified to the illnesses. In fact, the tribal chairman himself is ill from these circumstances.

This is an emergency situation that simply must be addressed. Obviously, the committee could not have known about it because nobody knew about it. But I offer that amendment for that purpose, and I thank my colleagues.

THE PRESIDING OFFICER. The clerk will report the amendment.

Mr. STEVENS addressed the Chair.

THE PRESIDING OFFICER. The Senator will suspend until the clerk reports the amendment.

The assistant legislative clerk read as follows:

The Senator from North Dakota [Mr. CONRAD] proposes an amendment numbered 867.

Mr. STEVENS. Mr. President, I ask unanimous consent these amendments not be read. They are being offered for purposes of qualification under the time agreement, and I ask that apply to all amendments, unless Senators wish to make their statements.

THE PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To provide funds for emergency housing on the Turtle Mountain Indian Reservation)

AMENDMENTS NO. 868 AND NO. 869, EN BLOC

Mr. STEVENS. Mr. President, on behalf of Senator MCCAIN, I send two amendments to the desk and ask they be qualified under the time agreement. The PRESIDING OFFICER. The clerk will report the amendments.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] for Mr. MCCAIN, proposes amendments numbered 868 and 869, en bloc.

The amendments are as follows:

(Purpose: To increase amounts appropriated to the Department of Defense)

On page 11, between lines 8 and 9, insert the following:

S 1207. In addition to the amounts appropriated to the Department of Defense for fiscal year 2001 in other provisions of this Act or in the Department of Defense Appropriations Act, 2001 (Public Law 106–259), $2,736,100 is hereby appropriated, out of any funds in the Treasury not otherwise appropriated, to the Department of Defense for the fiscal year ending September 30, 2001, for purposes under headings in the Department of Defense Appropriations Act, 2001, and in amounts, as follows:

- "Military Personnel, Army", $30,000,000;
- "Military Personnel, Navy", $10,000,000;
- "Military Personnel, Air Force", $332,500,000;
- "Reserve Personnel, Army", $30,000,000;
- "Operation and Maintenance, Army", $916,400,000;
- "Operation and Maintenance, Navy", $354,300,000;
- "Operation and Maintenance, Marine Corps", $295,700,000;
- "Operation and Maintenance, Air Force", $59,600,000;
- "Operation and Maintenance, Defense-Wide", $9,000,000;
- "Operation and Maintenance, Army Reserve", $30,000,000;
- "Operation and Maintenance, Army National Guard", $106,000,000;
- "Aircraft Procurement, Army", $50,000,000, to remain available for obligation until September 30, 2003;
- "Procurement of Weapons and Tracked Combat Vehicles, Army", $10,000,000, to remain available for obligation until September 30, 2003;
- "Procurement of Ammunition, Army", $14,000,000, to remain available for obligation until September 30, 2003;
- "Other Procurement, Army", $40,000,000, to remain available for obligation until September 30, 2003;
- "Aircraft Procurement, Navy", $85,000,000, to remain available for obligation until September 30, 2003;
- "Aircraft Procurement, Air Force", $108,100,000, to remain available for obligation until September 30, 2003;
- "Other Procurement, Air Force", $33,300,000, to remain available for obligation until September 30, 2003;
- "Research, Development, Test and Evaluation, Air Force", $8,000,000, to remain available for obligation until September 30, 2002; and
- "USS Cole", $49,000,000.

Provided. That the entire amount made available in this section is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended: Provided, further, That the entire amount under this section shall be available only to the extent that an official budget request for that specific dollar amount that includes the designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, is transmitted by the President to the Congress.

12664
(Purpose: To provide additional funds for military programs, maintenance-critical maintenance, force protection, and other purposes by increasing amounts appropriated to the Department of Defense for fiscal year 2001 by other provisions of this Act or the Department of Defense Appropriations Act, 2001 (Public Law 106-259), funds are hereby appropriated, out of any funds in the Treasury not otherwise appropriated, to the Department of Defense for the fiscal year ending September 30, 2001, for purposes under headings in the Department of Defense Appropriations Act, 2001, and in amounts, as follows:

1. Under the heading “MILITARY PERSONNEL, NAVY”, $181,000,000, of which $1,000,000 shall be available for the supplemental subsistence allowance under section 402a of title 37, United States Code.
2. Under the heading “MILITARY PERSONNEL, MARINE CORPS”, $21,000,000.
3. Under the heading “RESERVE PERSONNEL, NAVY”, $1,800,000,000, which shall be available for enhancement of force protection for United States forces in the Persian Gulf region and elsewhere worldwide.
4. Under the heading “OPERATION AND MAINTENANCE, ARMY”, $103,000,000.
5. Under the heading “OPERATION AND MAINTENANCE, NAVY”, $72,000,000, of which $36,000,000 shall be available for enhancement of force protection for United States forces in the Persian Gulf region and elsewhere worldwide.
6. Under the heading “OPERATION AND MAINTENANCE, AIR FORCE”, $379,000,000.
7. Under the heading “OPERATION AND MAINTENANCE, AIR FORCE Reserve”, $6,000,000.
8. Under the heading “OTHER PROCUREMENT, NAVY”, $45,000,000, to remain available for obligation until September 30, 2003, which shall be available for enhancement of force protection for United States forces in the Persian Gulf region and elsewhere worldwide.
9. The amount appropriated by chapter 10 of title II to the Department of the Treasury for Departmental Offices under the heading “SALARIES AND EXPENSES” is hereby reduced by $30,000,000.
10. The matter in chapter 11 of title II under the heading “NATIONAL AERONAUTICS AND SPACE ADMINISTRATION HUMAN SPACE FLIGHT” shall not take effect.
11. Of the unobligated balance of the total amount in the Treasury that is to be disbursed from special accounts established pursuant to section 75(e) of the Tariff Act of 1930, $200,000,000 may not be disbursed under that section.
12. Of the funds appropriated to the National Aeronautics and Space Administration under the heading “HUMAN SPACE FLIGHT” in the Departments of Veterans Affairs and Housing and Urban Development, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106-377), the following amounts:

(A) From the amounts for the life and microgravity research mission for the human space flight, $40,000,000.
(B) From the amount for the Electric Auxiliary Power Units for Space Shuttle Shuttle Upgrades, $23,800,000.
(C) Of the funds appropriated to the Department of Commerce for the National Institute of Standards and Technology under the heading “INDUSTRIAL TECHNOLOGY SERVICES” in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106-353), $6,700,000 for the Advanced Technology Program.
(D) Of the funds appropriated to the Department of Commerce for the International “TRAINING AND EMPLOYMENT SERVICES” in the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106-354), $19,000,000 of the amount available for Trade Development.
(E) Of the funds appropriated by chapter 1 of the Emergency Steel Loan Guarantee and Emergency Oil and Gas Guaranteed Loan Act of 1996 (Public Law 104-51), $22,800,000.
(F) Of the funds appropriated to the Department of Transportation for the Maritime Administration under the heading “MARITIME GUARANTEE PROGRAM ACCOUNT” in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106-553), $21,000,000.
(G) Of the funds appropriated for the Export-Import Bank under the heading “SURVIVABILITY ACCOUNT” in the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 2001 (as enacted into law by Public Law 106-429), $80,000,000.
(H) Of the funds appropriated to the Department of Labor for the Employment and Training Administration under the heading “TRAINING AND EMPLOYMENT SERVICES” in the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106-654), the following:

(A) From the amounts for Dislocated Worker Employment and Training Activities, $41,500,000.
(B) From the amounts Adult Employment and Training Activities, $10,000,000.
(C) Of the unobligated balance of funds previously appropriated by the Department of Transportation for the Federal Transit Administration that remain available for obligation in fiscal year 2001, the following:

(A) From the amounts for Transit Planning and Research, $34,000,000.
(B) From the amounts for Job Access and Reverse Commute Grants, $76,000,000.

FOREST SERVICE
STATE AND PRIVATE FORESTRY
For an additional amount for “State and Private Forestry” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended: Provided, That the entire amount is designated by Congress as an emergency requirement under section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(A)).

NATIONAL FOREST SYSTEM
For an additional amount for the “National Forest System” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended: Provided, That the entire amount is designated by Congress as an emergency requirement under section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(A)).

CAPITAL IMPROVEMENT AND MAINTENANCE
For an additional amount for “Capital Improvement and Maintenance” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $1,000,000, to remain available until expended: Provided, That the entire amount is designated by Congress as an emergency requirement under section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(A)).
We thank him and commend him for bringing it to the attention of this body.

I have two measures.

First, I don’t believe there is a Member of this body who has waterways in his or her State who doesn’t understand the importance of the work done by the U.S. Army Corps of Engineers. Within the beltway, however, items such as flood control and river transportation are viewed as some sort of luxury we can do without. We can’t do without them. I have been there. I have seen the devastation and the heartbreak. I have seen the families in great crisis. I have seen the farms and the homes and the communities destroyed. Unless you have been there, you cannot really believe.

Clearly, the view in some eastern editorial boardrooms is rather clouded, and elite drawing rooms can’t see that there are people who live and work along and depend upon the river. These are the people about whom we should be concerned.

I invite those who can tell us how to manage the rivers to come out and take a look at our rivers sometime. They might be very surprised at what they find.

In the State of Missouri, we have nearly 1,000 miles of land bordering the Missouri and Mississippi Rivers. Water transportation is low cost, safe, fuel efficient, and provides an insurance policy against runaway shipping costs charged by railroads that otherwise would face no competition. The environmental community assumes that monopolists don’t raise prices. They do. But on the environmental side, to put the price of water transportation in perspective. One medium-sized 15-barge tow carries the same amount of grain as 870 tractor trailer trucks. Clearly, this comparison demonstrates the fuel efficiency and clean air benefits to the environment. It also reduces congestion, reduces highway wear and tear, improves safety, and costs less.

In Missouri, one-third of our agricultural production comes from the 100-year-flood plain. The Washington Post, that still believes food comes from the grocery store and not the farm, believes that this land should not be in production and flood protection should be a low priority.

Those who criticize the projects administered by the Corps typically do it from a safe distance. One of the biggest critics of the Corps in the Midwest sits safely behind a 500-year urban flood wall.

Policymakers in Washington stress export and jobs but many fail to make the connection between exports and the transportation necessary to export. Unless we have purged the laws of physics and unless there are strange new business practices which don’t require buyers to take delivery of sold goods, then transportation ultimately remains necessary.

Policymakers in Washington stress the need for additional power production that is good for the environment but propose inadequate budgets and policies for hydropower generation.

In the last Administration, policy and budgets to undermine the Corps where almost an annual event. Regrettably, the most recent budget proposed for fiscal year 2002 shows no recognition of how important the mission of the Corps is. I have a flood control project in Kansas City that will protect industries employing 12,000 people. The budget request for 2002 asks for enough money to keep the contractors busy for a fraction of the year. Not only is the project delayed, and not only does delay subject the citizens to prolonged flood risk unnecessarily, but the delay increases the costs of the project which I would expect the number-crunchers at OMB to find if nothing else gets their attention.

Regrettably, the supplemental request does not include one red cent for operations and maintenance for the Corps of Engineers notwithstanding flood control, navigation, hydropower generation and environmental needs resulting from Midwestern flooding on the upper Mississippi, a Pacific earthquake which occurred in February, Tropical Storm Allison which occurred weeks ago as well as remaining problems associated with Hurricane Floyd and ice storms in the South.

Specifically, there are needs estimated to be: $50 million in response to the Midwest flooding; $72 million in the Southwest impacted by ice storms; $37 million for the Atlantic Seaboard in response to Hurricane Floyd and other weather events; $59 million for the Pacific Northwest impacted by earthquakes and debris, embankments are dangerously eroded, power outages are more frequent, and environmental preservation measures are short-changed. Unless the Corps receives supplemental funding, many navigation channels will not be able to accommodate normal commercial flow and flood control projects will be in serious jeopardy of failure. Recent damages and deterioration of hydroelectric facilities coupled with the national energy crisis have underscored the urgent need to undertake necessary repairs to hydropower projects in the Pacific Northwest.

While I will withhold offering an amendment at this time, I will do what I can do in conference to urge conferees to accept the House correction of the omission. I will seek unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOND. Mr. President, my second item deals with the defense budget.

While the administration’s request for a supplemental appropriations bill for the Department of Defense includes what the administration believes is the
minimum needed to get by for the remainder of this fiscal year (01), I respectfully disagree with their definition of "minimum."

Although we are hearing promises of an amended '02 budget with a huge defense plus-up, it is clear that the Defense Department appropriations bill for 2002 may indeed be the last of the 13 appropriations bills we will consider this year. That unfortunate timing may threaten the availability of all the extra funds many believe the Pentagon desperately needs. Simply put, there is no guarantee that the money the Pentagon needs will be there when the Senate takes up the amended Defense appropriation bill for 2002.

We must stop kicking the can down the road with promises to our forces—their need is urgent, they need help now. The cup will only continue to worsen, we need to act now.

Just last week, the Navy's top officer, Admiral Vern Clark, said he is trying to rid the United States Navy of the "psychology of deficiency"—the accepted culture of resource shortages as a normal condition.

Sadly, Mr. President, this "psychology of deficiency" has not only infected the culture of our Armed Forces, but I am afraid it has become the culture.

The vast majority of the enlisted troops and officers on active duty today know only a culture of getting by on the minimum funding possible. They call it "doing more with less," but the reality has been for almost a decade now, one of "doing too much with too little."

That is simply unacceptable. Every day, soldiers, sailors, airmen and marines risk their very lives for the values that have made this country the most valued nation of freedom the world has ever known.

And in exchange for their lives, what do we do? We give them barely enough money to accomplish their mission safely. The bare minimum and no more. That is how we repay our troops? No wonder our Armed Forces have suffered from a persistent morale problem that has manifested itself in a chronic inability to hold onto large numbers of our most talented troops.

The "bare minimum" of funding is no way for our society to uphold our end of the social contract with our troops. That is not how we keep faith with those who defend our Nation's interests at their own personal risk.

How badly have we fallen short on our end of the social contract?

At the current level of funding, it will take 160 years to replace the Navy's shore infrastructure. The backlog of maintenance and repair exceeds $3.5 billion.

Recently the Marine Corps Commandant spoke about the terrible funding choices we force him to make. In order to keep marines ready for combat in case war breaks out in the near-term, the Commandant has to steal money from accounts dedicated to modernizing the Marine Corps for tomorrow's wars. If this persists, the Marine Corps may find itself on a battle-field in the future without the proper, modern equipment to help guarantee a quick victory with few U.S. casualties. Even with the supplemental, the Army does not have the $145.1 million it needs to run its specialty training and schools. That means thousands of soldiers may not qualify in their combat specialties, which directly affects the combat readiness of Army units.

When we tell our soldiers "sorry, we don't have enough money to train you properly to do your job," what do you think the effect is on morale? The impact is devastating. That is what each of our noble loyal dead so much difficulty holding onto: Retaining its most skilled workers.

Our U.S. Air Force is currently operating and maintaining the oldest fleet in our history. On average, our aircraft are about 22 years old and are getting older. An aging fleet costs more, both in effort and dollars, to operate and maintain.

Last year, while we flew only 97 percent of our programmed flying hours, doing so cost us 103 percent of our budget. Over the past 5 years, our costs per flying hour have risen almost 50 percent. That is a terrible cycle:

older planes cost more to maintain, which robs money from accounts to buy new planes, and so on. It is a death spiral for our Air Force.

Time and again history has shown us the folly of funding our troops as if peace will persist forever, as if war will never come. I thought this country learned that lesson in the opening days of the Korean war when Americans were caught unprepared, under-prepared, and under-trained, and many paid with their lives.

I know the President of the United States knows this. I know Secretary of Defense Rumsfeld knows this. These are good men who know it is time to get the U.S. military on a more solid footing. I have worked closely with them in the past. I will continue to work with them. They will find me to be their most loyal supporter in this effort. But we can no longer afford to wait. We must act now.

That is why I am rising today to offer an amendment to add $1.45 billion to the fiscal year 2001 supplemental appropriations for the Defense Department. The amendment seeks to add the funds to the Defense Department that are needed, and can be spent, in what remains of the fourth quarter of the current fiscal year.

The amendment includes funds that will be directed exclusively to the operations and maintenance accounts of each of the four services. This is money the Pentagon needs right now to ensure that critical repairs and training are not delayed further.

There are emergency designations in this measure. All the money appropriated must be obligated by September 30 of this year. And the money shall be available only to the extent that an official budget request for that specific dollar amount includes the designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, and is transmitted by the President to the Congress. We must begin to tell our troops that indeed help is on the way, that this is the time to send the help.

AMENDMENT NO. 872

Mr. President, I send the amendment to the desk and ask unanimous consent that it be included in the qualified list of amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To increase amounts appropriated for the Department of Defense)

At the end of title III, add the following:

SEC. 1. In addition to the amounts appropriated to the Department of Defense for fiscal year 2001 by other provisions of this Act or the Department of Defense Appropriations Act, 2001 (Public Law 106–259), funds are hereby appropriated to the Department of Defense for the fiscal year ending September 30, 2001, for purposes under headings in the Department of Defense Appropriations Act, 2001, and in amounts, as follows:

(1) Under the heading "OPERATION AND MAINTENANCE, NAVY", $577,250,000.

(2) Under the heading "OPERATION AND MAINTENANCE, MARINE CORPS", $21,000,000.

(3) Under the heading "OPERATION AND MAINTENANCE, ARMY", $600,000,000.

(4) Under the heading "OPERATION AND MAINTENANCE, NAVY", $590,000,000.

(5) Under the heading "OPERATION AND MAINTENANCE, ARMY", $6,000,000.

(6) Under the heading "OPERATION AND MAINTENANCE, AIR FORCE", $500,000,000.

(7) Under the heading "OPERATION AND MAINTENANCE, ARMY RESERVE", $30,000,000.

(8) Under the heading "OPERATION AND MAINTENANCE, NAVY RESERVE", $19,100,000.

(9) Under the heading "OPERATION AND MAINTENANCE, ARMY NATIONAL GUARD", $39,400,000.

(b) The total amount appropriated under subsection (a) shall be available only to the extent that an official budget request for that specific dollar amount includes the designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, and is transmitted by the President to the Congress.

(c) The total amount appropriated under subsection (a) is hereby designated by Congress as an emergency requirement pursuant
Section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

(d) All of the funds appropriated and available under this section shall be obligated not later than September 30, 2001.

Mr. REID. Mr. President, I send an amendment to the desk for Senator HOLLINGS under my name under the authorized list.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID], for Mr. HOLLINGS, proposes an amendment numbered 974.

The amendment is as follows:

(Purpose: Ensuring funding for defense and education and the supplemental appropriation by repealing tax cuts for 2001)

At the appropriate place, insert the following:

... ENSURING FUNDING FOR DEFENSE AND EDUCATION AND THE SUPPLEMENTAL APPROPRIATION BY REPEALING TAX CUTS FOR 2001...

(a) REPEAL.—

(1) IN GENERAL.—Section 101 of the Economic Growth and Tax Relief Reconciliation Act of 2001 is repealed.

(2) APPLICATION OF CODE.—The Internal Revenue Code of 1986 shall be applied and administered as if such section 101 (and the amendments made by such section) had never been enacted.

(3) CONFORMING AMENDMENTS.—

(A) IN GENERAL.—Section I of the Internal Revenue Code of 1986 (relating to tax imposed) is amended by adding at the end the following new subsection:

(i) Rate Reductions After 2001.—

(1) Initial Bracket Amount.—For purposes of this paragraph, the initial bracket amount is—

(ii) the amount for any taxable year beginning after December 31, 2008, shall be determined under subsection (b) by substituting ‘‘2007’’ for ‘‘1992’’ in subparagraph (B) thereof, and

(iii) such adjustment shall not apply to the amount referred to in subparagraph (B)(iii).

If any amount after adjustment under the preceding sentence is not a multiple of $50, such amount shall be rounded to the next lowest multiple of $50.

(ii) Reductions in Rates After December 31, 2001.—In the case of taxable years beginning in a calendar year after 2001, the corresponding percentage specified for such calendar year in the table under section (C) shall be substituted for the otherwise applicable tax rate in the tables under subsections (a), (b), (c), (d), and (e).

In the case of taxable years beginning during calendar year:

The corresponding percentages shall be substituted for the following:

<table>
<thead>
<tr>
<th></th>
<th>2002 and 2003</th>
<th>2004 and 2005</th>
<th>2006 and thereafter</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>27.0%</td>
<td>28.0%</td>
<td>30.0%</td>
</tr>
<tr>
<td></td>
<td>39.6%</td>
<td>38.5%</td>
<td>36.0%</td>
</tr>
<tr>
<td></td>
<td>26.0%</td>
<td>25.0%</td>
<td>23.0%</td>
</tr>
<tr>
<td></td>
<td>32.0%</td>
<td>31.0%</td>
<td>29.0%</td>
</tr>
<tr>
<td></td>
<td>38.0%</td>
<td>35.0%</td>
<td>33.0%</td>
</tr>
</tbody>
</table>

(3) Adjustment of Tables.—The Secretary shall prescribe the appropriate tax rate in the tables under subsection (f) to carry out this subsection.

(b) CONFORMING AMENDMENTS.—

(i) Paragraphs (B) of section 1(g)(7) of such Code is amended by striking ‘‘15 percent’’ in clause (ii)(II) and inserting ‘‘10 percent’’.

(ii) Section 1(b) of such Code is amended—

(I) by striking ‘‘28 percent’’ both places it appears in paragraphs (1)(A)(ii)(I) and (1)(B)(i) and inserting ‘‘25 percent’’; and

(II) by striking paragraph (131).

(iii) Section 531 of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the accumulated taxable income’’.

(iv) Section 541 of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the accumulated taxable income’’.

(v) Section 3402(p)(1)(B) of such Code is amended by striking ‘‘7, 15, 28, or 31 percent’’ and inserting ‘‘7 percent, any percentage applicable to any of the 3 lowest income brackets in the table under section 1(c)’’.

(vi) Section 3402(p)(2) of such Code is amended by striking ‘‘15 percent’’ and inserting ‘‘10 percent’’.

(vii) Section 3402(q)(1) of such Code is amended by striking ‘‘equal to 28 percent of such payment’’ and inserting ‘‘equal to the product of the third lowest rate of tax applicable under section 1(g)(7) and such payment’’.

(viii) Section 3402(q)(3) of such Code is amended by striking ‘‘31 percent’’ and inserting ‘‘the fourth lowest rate of tax applicable under section 1(c)’’.

(ix) Section 3406(a)(1) of such Code is amended by striking ‘‘equal to 31 percent of such payment’’ and inserting ‘‘equal to the product of the fourth lowest rate of tax applicable under section 1(c) and such payment’’.

(x) Section 1327 of the Revenue Reconciliation Act of 2001 is amended by striking ‘‘28 percent’’ and inserting ‘‘the third lowest rate of tax applicable under section 1(c) of the Internal Revenue Code of 1986’’.

(x) Effective Dates.—

(I) IN GENERAL.—Except as provided in clause (ii), the amendments made by this paragraph shall apply to taxable years beginning after December 31, 2001.

(ii) AMENDMENTS TO STITHOLDING PROVISIONS.—The amendments made by clauses (v), (vi), (vii), (viii), (ix), and (x) of subparagraph (B) shall apply to amounts paid after December 31, 2003.

(b) RESERVE FUND FOR DEFENSE AND EDUCATION.—Subtitle II of title II of H. Con. Res. 8 (107th Congress) is amended by inserting at the end the following:

... SEC. 219. STRATEGIC RESERVE FUND FOR DEFENSE AND EDUCATION.

If legislation is reported by the Committee on Appropriations of the Senate or the Committee on Appropriations of the House of Representatives, or an amendment thereto is offered or a conference report thereon is submitted, that would increase funding for defense or education, the chairman of the appropriate Committee on Appropriations shall revise the aggregates, functional totals, allocations, and other appropriate levels and limits in this resolution for that measure by nonenabling the amount from the...
July 9, 2001

CONGRESSIONAL RECORD—SENATE

12669

an amount equal to $150,000,000 is rescinded
through proportional reductions to the por-
tions of such accounts that contain such
funds.

On page 36, line 9, strike “$300,000,000” and
insert “$450,000,000.”

AMENDMENT NO. 875

Mr. REID. Mr. President, I ask unanimous
consent that the amendment be set aside, and I send an amendment to
the desk on behalf of Senator JOHNSON.

The PRESIDING OFFICER. Without
objection, it is so ordered. The clerk will
report the amendment.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID], for
Mr. JOHNSON, proposes an amendment num-
bered 875.

The amendment is as follows:

(Purpose: To amend the Higher Education
Act of 1965 to make certain interest rate
classes permanent)

At the appropriate place, insert the fol-
lowing:

SEC. __. EXTENSION OF INTEREST RATE PROV-
ISIONS.

(a) TECHNICAL CORRECTION.—Paragraph (6)
of section 455(b) of the Higher Education Act
of 1965 (20 U.S.C. 1077e(b)), as redesignated by
section 8381(c)(1) of the Transportation E-
quity Act for the 21st Century (Public Law
105-178; 112 Stat. 498) is redesignated as para-
graph (7) of that section.

(b) EXTENSION.—

(1) AMENDMENTS.—Sections 427A(k),
428C(c)(1), 438(b)(2)(I), and 455(b)(6) of such
Act (20 U.S.C. 1077a(k), 1076-3(c)(1), 1087-
1(b)(2)(I), 1087b(b)(6)) are each amended by
striking “and before July 1, 2003,” each place
it appears.

(2) CONFORMING AMENDMENTS.—

(A) Section 427A(k) of such Act is amended
by striking the subsection heading and in-
serting in its place the following: “INTEREST RATES FOR
NEW LOANS ON OR AFTER OCTOBER 1, 1998.—”.

(B) Section 438(b)(2)(I) of such Act is amend-
ed—

(i) by striking the subparagraph heading
and inserting the following: “INTEREST RATE PRO-
VISION FOR NEW LOANS ON OR AFTER OCTOBER 1,
1998.—”;

(ii) in clause (i), by striking “2000,” and in-
serting “2000”;

(C) Section 455(b)(6) of such Act is amend-
ed—

(i) by striking the paragraph heading and
inserting the following: “INTEREST RATE PRO-
VISION FOR NEW LOANS ON OR AFTER OCTOBER 1,
1998.—”;

(ii) in subparagraph (D), by striking “1999,”
and inserting “1999.”

Mr. REID. Mr. President, this amend-
ment for Senator JOHNSON preserves a
bipartisan compromise achieved in the
1998 Higher Education Act that reduced and
stabilized higher education loan in-
terest rates. The amendment that has
been offered amends the Higher Edu-
cation Act to continue the current stu-
dent loan interest rate formulas, pre-
serving the successful system that
helps put millions of students through
school every year.

The House resolution includes a
Technical Reserve Fund that makes it
possible to fix the problem in 2001 be-
fore a crisis develops in 2003 when the
current formula for calculating inter-
est rates is due to expire. But the re-
serve fund in the resolution will expire
early next year. Therefore, action is
needed so that Congress and the fi-
nancial aid community can turn to im-
proving financial aid programs all over
this country.

Mr. President, I suggest the absence
of a quorum.

The PRESIDING OFFICER. The clerk
will call the roll.

The assistant legislative clerk pro-
ceded to call the roll.

Mr. REID. Mr. President, I ask unan-
imous consent the order for the quorum
call be rescinded.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. REID. Mr. President, in relation to
the amendment I offered on behalf of
Senator HOLLINGS, the Record should
reflect that I have spoken to the Sen-
ar from South Carolina on several
occasions today. He feels very strongly
about the subject matter of this amend-
ment. I am glad I had this slot
available for the Senator, and I am
happy to have offered this amendment
on his behalf. Senator HOLLINGS will be
available to speak more on the subject
at a later time.

Mr. President, I suggest the absence
of a quorum.

The PRESIDING OFFICER. The clerk
will call the roll.

The assistant legislative clerk pro-
ceded to call the roll.

Mr. BYRD. Mr. President, I ask unan-
imous consent that the order for the quorum
call be rescinded.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. REID. Mr. President, in relation to
the amendment I offered on behalf of
Senator HOLLINGS, the Record should
reflect that I have spoken to the Sen-
ar from South Carolina on several
occasions today. He feels very strongly
about the subject matter of this amend-
ment. I am glad I had this slot
available for the Senator, and I am
happy to have offered this amendment
on his behalf. Senator HOLLINGS will be
available to speak more on the subject
at a later time.

Mr. President, I suggest the absence
of a quorum.

The PRESIDING OFFICER. The clerk
will call the roll.

The assistant legislative clerk pro-
ceded to call the roll.

Mr. BYRD. Mr. President, I ask unan-
imous consent that the order for the quorum
call be rescinded.

The PRESIDING OFFICER. Without
objection, it is so ordered.

MORNING BUSINESS

Mr. BYRD. Mr. President, subject to
change by the leadership, I ask unanimous
consent that there now be a pe-
riod for the transaction of morning
business, not to extend beyond the
hour of 6:30 p.m., and that Senators
may be permitted to speak for not to exceed 10 minutes each.

The PRESIDING OFFICER. Without
objection, it is so ordered.

The Senator from North Carolina.

Mr. HELMS. I ask it be in order for
me to deliver my remarks seated at my
desk.

The PRESIDING OFFICER. Without
objection, it is so ordered.

RES IPSA LOQUITUR

Mr. HELMS. Mr. President, the July
edition of the American Legion maga-
azine features a remarkable statement
of obvious truth by a much maligned
American who deserves far better than
the petty sniping he endures at the
hands of cunning politicians and the
media, neither of whom would ac-
knowledge the truth if they fell over it
in the middle of the street.

U.S. Supreme Court Justice Clarence
Thomas pulled no punches in this arti-
cle. His piece in the American Legion
magazine was headed, appropriately,
“Courage v. Civility.” Mr. Justice
Thomas knows a good bit about both.
He is, himself, a civil gentleman who
possesses great courage.

The subhead on his piece pinpoints a
great deal about how a good many
American freedoms are being lost. One
of the things he says is, those who cen-
ter themselves put fear ahead of free-
dom. I will quote briefly from two or
three statements made by the distin-
guished Justice of the Supreme Court.
He said:

I do not believe that one should fight over
things that don’t really matter. But what
about things that do matter? It is not com-
forting to think that the natural tendency
inside us is to settle for the bottom, or even
the middle of the stream.

This tendency, in large part, results from
an overemphasis on civility. None of us
should be uncivil in our manner as we debate
issues of consequence. No matter how dif-
cult it is, good manners should be routine.
However, in the effort to be civil in conduct,
many who know better actually dilute firm-
ly held views to avoid appearing
“judgmental.” They curb their tongues not
CONGRESSIONAL RECORD—SENATE
July 9, 2001

COURAGE V. CIVILITY
THOSE WHO CENSOR THEMSELVES PUT FEAR AHEAD OF FREEDOM
(By Clarence Thomas)

My beliefs about personal fortitude and the importance of defending timeless principles of justice grew out of the wonderful years I spent with my grandparents, the years I have spent in Washington and my interest in world history—especially the history of countries in which the rule of law was surrendered to the rule of fear, such as during the rise of Nazism in what was then one of the most educated and cultured countries in Europe.

I have now been in Washington, D.C., for more than two decades. When I first arrived here in 1979, I thought there would be great debates about principles and policies in this city.

I expected citizens to feel passionately about what was happening in our country, to candidly and passionately debate the policies that had been implemented and suggest new ones.

I was disabused of this heretical notion in December 1980, when I was unwittingly candied with a young Washington Post reporter. He fairly and thoroughly displayed my naive openness in his op-ed about our discussion, in which I had raised what I thought were legitimate objections to a number of sacred policies, such as affirmative action, welfare, school busing—policies I felt were not well served their intended beneficiaries. In my innocence, I was shocked at the public reaction. I had never been called such names in my entire life.

Why were these policies beyond question? What or who placed them off limits? Would it not be useful for those who felt strongly about these matters, and who wanted to solve the same problems, to have a point of view and to be heard? Sadly, in most forums of public dialogue in this country, the answer is no.

It became clear in rather short order that on very difficult issues, such as race, there was not only no room for honest debate. Those who raised questions that suggested doubt about popular policies were subjected to intimidation. Debate was not permitted. Orthodoxy reigned.

Today, no one can honestly claim surprise at the venomous attacks against those who take positions that are contrary to the policies of the day. The shrill attacks on those who claim to shape opinions. Such attacks have been standard fare for some time.

If you trim your sails, you appease those who lack the courage to disagree or to disagree on the merits but prefer to engage in personal attacks. A good argument diluted by ad hominem attacks is not nearly as good as the undiluted argument, because we are afraid to arrive at truth through a process of honest and vigorous debate. Arguments should not sneak around in disguise, as if dissent were some evil in our midst. One should not be cowed by criticism.

In my humble opinion, those who come to engage in debates of consequence, and who are not afraid of the true and the real, are right. The reaction of our critics shows both the power of self-deception and intentioned self-deception at best. It is not worth it. In my office, a little sign reads: "To avoid criticism, say nothing, do nothing, be nothing." None of us really believes that the things we fear discussing honestly these days are really trivial—and the reaction of our critics shows that we are right. If our dissents are really trivial, why is it not worth the trouble?

But is it worth it? Just what is worth it, and what is not? If one wants to be popular, it is counterproductive to disagree with the majority. If one wants to be rewarded with safe water, one can afford to keep silent until the next vacation, it isn't worth the agony. If one just wants to muddle through, it is not worth it. In my office, a little sign reads: "To avoid criticism, say nothing, do nothing, be nothing."

None of us really believes that the things we fear discussing honestly these days are really trivial—and the reaction of our critics shows that we are right. If our dissents are really trivial, why are their reactions so intense? If our views are trivial, why the heart-healing? Like you, I do not want to waste my time on the trivial. I certainly have no desire to be browbeaten and intimidated for the trivial.

What makes it all worthwhile? What makes it worthwhile is something greater than all of us. There are those things that are one time more important than our comfort or discomfort—if not our very lives: Duty, honor, country! There was a time when all was to be set aside for these.

The plow was left idle, the hearth without fire, the homestead abandoned.

To enter public life is to step outside our more confined, comfortable sphere, and to face the tension of difference, competition and citizen-ship. What makes it all worthwhile is to devote ourselves to the common good.

It goes without saying that we must participate in the affairs of our country. If we think they are important and have an impact on our lives, but how are we to do that? In what manner should we participate?

I do not believe that one should fight over things that don't matter. We don't fight about what things that do matter? It is not comforting to think that the natural tendency is to settle for the bottom, or even the middle of the stream.

This tendency, in large part, results from an overemphasis on civility. None of us believes that truly vile attacks are going to be allowed here in our debates about issues of consequence. No matter how difficult it is, good manners should be routine. However, in the effort to be civil in conduct, many who know better actually dilute firmly held views to avoid appearing "judgmental." They curb their tongues not only in form but also in substance. The insistence on civility in the form of our debates has the perverse effect of canabilizing our principles, the very essence of a civil society. That is why civility cannot be the governance principle.

By yielding to a false form of civility, we sometimes allow our critics to intimidate us. As I have said, active citizens are often subjected to truly vile attacks; they are branded as mean-spirited, racist, Uncle Tom, homophobic, sexist, etc. To this we often respond (if not succumb), so as not to be constantly fighting, by trying to be tolerant and nonjudgmental—i.e., we censor ourselves. This is not civility. It is cowardice, or well-intentioned self-deception at best.

The little-known story of Dimitar Peshev shows both the power of self-deception and the explosive effect of telling the truth and the dangers inherent in allowing the rule of law and the truth to pass to political movements of the moment.

Peshev was the vice president of the Bulgarian Parliament during World War II. He was a man like many—simple and straightforward, not a great intellectual, not a military hero—just a civil servant doing his job as best he could, raising his family, struggling through a terrible moment in European history.

Bulgaria was pretty lucky because it managed to stay out of the fighting, even though the Bulgarians had placed their government—and the king—under enormous pressure to enter the war on the side of the Axis, or at a minimum to permit the destruction of the Bulgarian Jews. Bulgaria had no tradition of widespread anti-semitism, and the leaders of the country were generally unwilling to turn over their own citizens to certain death. But like all the other European countries, Bulgaria moved toward the Holocaust in small steps.

Peshev was one of many Bulgarian officials who heard rumors of the new policy and constantly queried his ministers. They lied to him, and for a time he believed their lies. Perhaps the ministers somehow believed the lies themselves. But in the final hours, a handful of citizens from Peshev's hometown raced to Sofia to tell him the truth: that Jews were being rounded up, that the trains were going there.

According to the law, such actions were illegal. So Peshev forced his way into the office of the interior minister, demanding to know what was going on. But instead of using the official line, but Peshev didn't believe him. He demanded that the minister place a telephone call to the local authorities and refuse to cooperate in the destruction of the Jews. This brave act saved the lives of the Bulgarian Jews. Peshev then circulated a letter to
THE ANNUAL MEETING OF THE CORPORATION FOR NATIONAL SERVICE

Mr. LOTT. Mr. President, I would like to take this opportunity to recognize the recent meeting of the board of directors of the Corporation for National Service which was hosted by my home State of Mississippi. Mississippians are known for their hospitality and liberalism, so playing host to this meeting in Jackson was a natural fit.

The board members used this forum to elect Stephen Goldsmith, chairman of the board of directors for the Corporation for National Service. As the former mayor of Indianapolis, Chairman Goldsmith earned a reputation for innovative thinking, reducing spending, and improving infrastructure. I wish him the best of luck in his new role as chairman.

I also understand that at this year’s meeting of the board, a coalition of religious and community leaders praised President Bush for his faith-based and community initiatives, and announced the creation of the Mississippi Faith-Based Coalition for Community Renewal. My constituents advise me that this coalition will work with the President to implement his faith-based plan and bring hope and opportunity to all Mississipians.

HONORING NOBEL LAUREATES

Mr. BIDEN. Mr. President, on July 18 here in Washington, the American College of Neuropsychopharmacology will be honoring its members who have won the Nobel Prize for Medicine or Physiology. The honorees include the three Nobel Prize winners from the year 2000: Dr. Arvid Carlsson from Goteborg University in Sweden, Dr. Paul Greengard from Rockefeller University in New York City, and Dr. Eric Kandel from Columbia University in New York City. Also being honored is the 1970 Nobel Prize winner, Dr. Julius Axelrod from the National Institutes of Health in Maryland. Together, these Nobel Prize winners have helped us begin to understand how the most mysterious and important human organ, the brain, actually works.

The brain is a huge collection of nerve cells, connected to each other in complicated networks. Nerve impulses, which are the means of communicating information from the brain to the various parts of the body, are conducted from one end of a nerve cell to another by a form of electrical action. Dr. Axelrod’s work set the stage for our modern knowledge of brain neurotransmission by establishing the important role of neurotransmitters, which are chemicals that serve to transmit these nerve impulses from one nerve cell to another through a connecting region called the synapse. A key first step in understanding the brain was this discovery that, as nerve impulses move from nerve cell to nerve cell, they switch from an electrical conduction to a chemical conduction and then back again to an electrical conduction.

Dr. Carlsson started to fill in this general outline by discovering that the chemical dopamine was one of these important chemicals that transmits nerve signals from one nerve cell to another. Moreover, dopamine seemed to be very important in controlling body motions. Dr. Carlson’s work with experimental animals who were deficient in dopamine led to the seminal discovery that Parkinson’s disease in humans, a disabling and progressive disease associated with tremors and impaired mobility, was directly related to a deficiency of a certain number of parts of the brain. This landmark finding led directly to the treatment of Parkinson’s disease with L-dopa, a drug that is converted to dopamine in the body. To this very day, the foundation for the treatment of this illness is the use of medications that increase dopamine in the brain or mimic its action there.

Dr. Carlson also discovered that the drugs used to treat schizophrenia, a severe mental illness affecting thought processes, also seemed to work by affecting the action of dopamine in the brain. In contrast to the situation with Parkinson’s disease, in which administration of L-dopa seemed to work by increasing dopamine levels, the antipsychotic drugs such as thorazine, which are used to treat schizophrenia, seemed to work by blocking the action of dopamine in the brain. To this very day, medications that block the effects of dopamine remain the mainstay of treatment for schizophrenia. Dr. Carlson’s work was instrumental in establishing the biological foundation of mental illness, which has led to our ability to target treatment of such disorders with medications based on their specific biochemical cause.

Dr. Greengard carried this line of work one step further, examining exactly how such neurotransmitters work as they transfer nerve impulses from one nerve cell to another through the connecting region called the synapse. He described in detail the cascade of chemical reactions that occurs as the neurotransmitter chemicals stimulate the next nerve cell in the nerve pathway, which results in conversion of the nerve impulse back into an electrical signal. Particularly important was the discovery of the different speeds at which these nerve signals are transmitted across the synapse. This
framework enabled him to establish, on a molecular and biochemical level, the mechanism of action of various drugs that act on the brain's nervous system. Finally, Dr. Kandel expanded the context of this research area by showing how such complex processes as memory and learning are directly related to the basic biochemical foundations outlined by Drs. Greengard, Carlson, and Axelrod. In detailed studies in animals, Dr. Kandel showed that the process of memory was associated with specific changes in the shape and functioning of the synapse region that connects pairs of nerve cells. This research revealed that these connections between nerve cells, rather than just passive junctions, are actually vitally important in the complicated processes of the nervous system.

The brain could be said to be the ultimate human frontier. As scientists pieced together the function of all the other organs in the body over the last few centuries, the brain remained an enigma. The work of Drs. Axelrod, Carlson, Greengard, and Kandel starts to clear away some of the mystery that surrounds the brain, and this research has already led to practical, clinical advances to help millions of people with neurological and mental disorders such as Parkinson's disease and schizophrenia. This basic understanding of how the brain works is clearly necessary for understanding of the numerous brain disorders that affect many more millions of people worldwide, some of which are just starting to be elucidated. Moreover, these pioneering studies have opened the door to the development of targeted medications to treat such illnesses. I am particularly excited about the possibility that this research will unlock the key to the medical treatment of substance abuse disorders, whose social impact in our country is enormous. On behalf of the many people who stand to live longer, more fulfilling lives as a result of their discoveries, I extend my deepest congratulations to these esteemed Nobel laureates.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred June 2, 1999 in Greenfield, MA. Jonathan Shapiro, 18, and Matthew Rogers, 20, used a pocketknife to cut an anti-gay slur into the back of a high school classmate. Government’s first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can be a source of reassurance that by passing this legislation, we can change hearts and minds as well.

UNITED NATIONS CONFERENCE ON THE ILLICIT TRADE IN SMALL ARMS AND LIGHT WEAPONS IN ALL ITS ASPECTS

Mrs. FEINSTEIN. Mr. President, today in New York the United Nations convened the conference on the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, the first effort by the U.N. to address the pressing issue of small arms trafficking.

The mass proliferation of small arms—shoulder-mounted missiles, anti-tank weapons, grenade launchers, high-powered sniper rifles and other tools of death—is fueling civil wars, terrorism and the international drug trade throughout the world.

The grimmest figures come from developing countries where cheap and easy to use small arms and light weapons, such as AK-47s and similar military assault rifles, have become the weapons of choice of narco-traffickers, terrorists and insurgents.

The problem is staggering: An estimated 500 million illicit small arms and light weapons are in circulation around the globe, and in the past decade four million people have been killed by them in civil war and bloody fighting.

Nine out of 10 of these deaths are attributed to small arms and light weapons. According to the International Committee of the Red Cross, more than 50 percent of those killed are believed to be civilians.

Starting today, the United Nations will host a conference on the Illicit Trade in Small Arms and Light Weapons in All Its Aspects. At this conference, the U.N., for the first time, will seek to devise international standards and procedures for curtailting small arms trafficking. It is an issue of extreme importance to the United States. Not only because of the violence and devastation itself, but because of the threat these weapons pose to our political, economic and security interests.

The volume of weaponry has fueled cycles of violence and been a major factor in the devastation witnessed in recent conflicts in Africa, the Balkans, and South Asia, among other places. These conflicts undermine regional stability and endanger the spread of democracy and free-markets around the world. Here are a few examples.

In Mexico a lethal flow of guns south from the United States has fed the Arellano Felix drug cartel and are believed responsible for at least 21 deaths, including two infants, six children and a pregnant 17-year-old girl shot and killed during a murder at Rancho el Rodeo in September 1998.

In Albania more than 650,000 weapons and 20,000 tons of explosives disappeared from government depots in the three years leading up to the outbreak of violence in the Balkans, according to the U.N. The continued presence of the weapons poses a very real threat to NATO and U.S. peacekeepers in the region.

And in Colombia, the continued instability is in part due to the torrential flow of rifles and pistols to rebel groups and drug gangs who have used the imported weapons to murder judges, journalists, police officers, as well as innocent passers-by.

The increased access by terrorists, guerrilla groups, criminals, and others to small arms and light weapons puts in jeopardy U.S. law enforcement efforts, business people based or traveling overseas, and even U.S. tourists.

In approaching the United Nations Conference, it is critical that the U.S. government negotiate and support making the trafficking of small arms traceable and eliminate the secrecy that permits thousands of weapons to fuel crime and war without anyone’s knowledge of their source.

It is my hope the United Nations will move to create international procedures to control the proliferation of small arms and light weapons. The United States has some of the strongest arms export controls in the world, and it is in the U.S. interest to see that those standards are equaled by the world community.

In addition, the United States has a moral responsibility to push for the development of measures that stop weapons from winding up in the hands of abusive government forces, terrorists and drug-traffickers.

Specifically, the U.S. Government should champion a conference program of action that mandates countries’ early negotiations on legally binding procedures: a Framework Convention on International Arms Transfers that sets out export criteria based on countries’ current obligations under international law; and an International Agreement on Marking and Tracing that ends up in the hands of the manufacturer and import and record-keeping on arms production, possession and transfer.

The Program of Action must also include the establishment of regional and international transparency mechanisms and concrete steps to achieve improved implementation and enforcement of arms embargoes.
Mr. OLSON intimated when he was answering questions concerning the “Arkansas Project,” that Senator could have followed up at the hearing. No Senator did.

Second, some have argued that Mr. Olson improperly attempted to minimize his role in the so-called “Arkansas Project” during his confirmation hearing. The charges include allegations that only belatedly did Mr. Olson “admit” that he and his firm provided legal services to the American Spectator, that he had discussions in social settings with those working on Arkansas Project matters, and that he himself authored articles for the magazine paid for out of the special Richard Mellon Scaife fund.

Each of these allegations, however, is contradicted by the factual record. Mr. Olson testified that he and others at his law firm performed legal services for the American Spectator beginning in 1994, that they billed the magazine for those services at their normal market rates, and that those services actually performed. Indeed, that Mr. Olson’s firm provided legal services to the American Spectator has been widely known and a matter of public record for several years. It is not something that he “admitted” under close questioning. Those legal services—involving such things as book contracts and employee disputes—were not “in connection with” the “Arkansas Project,” and any suggestion to the contrary, based on the record as I know it, is wrong as a matter of fact.

As for Mr. Olson’s presence in social settings with individuals associated with the “Arkansas Project,” the questions were asked and Mr. Olson never made any attempt to minimize his attendance at those social events. He stated that he was unaware of any discussions at those events concerning the Scaife-funded efforts to investigate Clinton scandals, and no one has contradicted that testimony. Indeed, every knowledgeable individual—including one of Mr. Olson’s chief critics—has confirmed that testimony. I also understand that journalists employed by other magazines and newspapers—competitors of the American Spectator—and a wide range of other persons also attended those social events. Thus, they also had discussions “in social settings” with those working on Arkansas Project matters, but no responsible person would assert that their attendance at those events made them participants in the American Spectator’s “Arkansas Project.”

Mr. Olson also testified during his hearing about his authorship and co-authorship of several articles critical of the American Spectator and its editors. Indeed, he voluntarily provided copies of those American Spectator articles to the Judiciary Committee in his response to the committee’s standard questionnaire, well in advance of his confirmation hearing. It is simply not correct, as a matter of fact, to suggest that he has modified his understanding of the authorship of the articles after the committee hearing.

As to the American Spectator’s internal bookkeeping for its payments to Mr. Olson or his law firm, it seems plain that Mr. Olson had no way of knowing how the Spectator categorized those payments for its own purposes, any more than taxpayers will know from the face of the check to what internal account the Government will charge the rebate checks flowing from President Bush’s tax cut. Mr. Olson said that he never even saw the checks which were sent to his law firm’s headquarters in Los Angeles in payment of routine client billings. All of this is in the record.

There was no “expansion” or change in Mr. Olson’s testimony on the foregoing points over the last several weeks. It is similarly inaccurate to say, as some critics do, that Mr. Olson “modified” his understanding of his recollections, or “conceded” additional knowledge. To a remarkable degree, Mr. Olson has clearly and consistently answered the questions we asked him. His testimony, moreover, has been fully confirmed by the individuals most closely associated with the “Arkansas Project,” including the editor-in-chief, editor, and publisher of the American Spectator magazine during the relevant time period, as well as the three individuals who primarily performed the investigative journalism funded by the “Arkansas Project.”

Each of these individuals stepped forward voluntarily to confirm the accuracy of Mr. Olson’s testimony. Indeed, there is no one with peremptory knowledge of these events who has contradicted Mr. Olson.

Third, some mistakenly attempt to create a conflict in Mr. Olson’s testimony by confusing the amounts he was paid for writing articles for the American Spectator with the very different amounts that Mr. Olson’s law firm received for providing legal services to the American Spectator over a span of many years. Mr. Olson told the Senate that he was paid from $500 to $1,000 for his articles that appeared in the American Spectator magazine, whereas his firm received $94,405 for legal services. The attempt to create a conflict on this issue requires mixing apples with oranges. There were two different types of payments, for different types of services. In his April 19 answers, Mr. Olson explained that in addition to the $500 to $1,000 fees he received for the articles, his law firm “has received payments for legal services rendered to the American Spectator from time to time, by me and by others at the firm, at our normal market rates.” Given that those legal fees were for legal services provided to the magazine
over a period of more than 5 years, involving the work of several attorneys, the $94,405 figure is in no way surprising. More significantly, Mr. Olson at all times distinguished between the firm's legal fees, and the separate, comparatively modest amounts he received personally for writing articles for the magazine. It is, again, a factual mistake to suggest that he ever sought to confuse those two amounts.

Fourth, some have criticized Mr. Olson for allegedly refusing to respond to an allegation about American Spectator dinner parties. I question whether the Senate should even get into this issue of who attended what dinner parties, given the absence of any serious issue here, and the freedom of speech and press values inherent in a magazine's activities. But this particular allegation is without foundation; the source who publicly contradicted himself appeared only in the pages of the Washington Post. No Senator asked Mr. Olson about that particular allegation, which I believe is not even an issue in this debate. This is not an issue of the nominees of either party an obligation to respond to every far-fetched or baseless charge that might find its way into print. Moreover, one member of the committee did make an inquiry about Mr. Olson's social contacts with employees of the American Spectator and Mr. Olson fully answered that question in writing. So it is factually incorrect to state that he refused to respond to that question.

Fifth, Mr. Olson's statement that his legal services for the American Spectator magazine were not for the purpose of conducting investigations of the Clintons is allegedly contradicted by the fact that Mr. Olson's firm was conducted research and sent Mr. Olson's social contacts with employees of the American Spectator and Mr. Olson fully answered that question in writing. So it is factually incorrect to state that he refused to respond to that question.

The Washington Post editorial board also shares this view. On May 18, after all of the questions regarding the "Arkansas Project," Mr. Bennett is independent; he had no partisan axe to grind in favor of Mr. Olson in connection with this nomination; he, in fact, was a lead counsel for President Clinton for several years; he was not maneuvering for advantage in future nominations; he is a lawyer experienced in weighing evidence and cross-examining witnesses; he looked at the evidence; and his conclusion that these allegations are ill-founded is worthy of our respect.

I agree wholeheartedly with Mr. Bennett. I too have received Mr. Olson's statements before the committee regarding his role in the "Arkansas Project," and I find Mr. Olson's statements to be clear and accurate.

The Washington Post editorial board also shares this view. On May 18, after all of the questions regarding the "Arkansas Project," the Washington Post endorsed Mr. Olson's nomination to be Solicitor General, noting "Mr. Olson is one of Washington's most talented and successful appellate lawyers, a man who served with distinction in the Justice Department during the 1980s and whose work is widely admired across party lines." According to the Washington Post, "Mr. Olson's prior service at the Justice Department indicates that he understands the difference between the role of private citizen and public servant." As for Mr. Olson's testimony regarding his role in the "Arkansas Project," the Washington Post concluded that "there's no evidence that his testimony was inaccurate in any significant way," and that "the Democrats would be wrong to block Mr. Olson." (Emphasis added.)

The Senate thus far has not done a good job of reviewing President Bush's nominees, and in many cases has made upstanding individuals the victims of partisan attacks. The deeply partisan vote over the Solicitor Generalship was a low point. I strongly believe that every nominee deserves fairness in this process and a full chance to get his or her position into the record and considered. It is not right to leave the record incomplete. I hope that, by setting the record straight, the Senate can move on and treat future nominees more fairly.

It is particularly noteworthy that Robert Bennett, one of the most notable lawyers in this country and counsel to the Senate Judiciary Committee. More than almost any other person, he knows that facts of the Clinton matters. During an interview with Wolf Blitzer on CNN on May 22, Mr. Bennett stated: "I have recently read [Mr. Olson's] responses to the Senate, and I have looked at a lot of the material, and if I were voting, I would say that Ted Olson was more than candid with the Senate." Mr. Bennett is independent; he had no partisan axe to grind in favor of Mr. Olson in connection with this nomination; he, in fact, was a lead counsel for President Clinton for several years; he was not maneuvering for advantage in future nominations; he is a lawyer experienced in weighing evidence and cross-examining witnesses; he looked at the evidence; and his conclusion that these allegations are ill-founded is worthy of our respect.

I agree wholeheartedly with Mr. Bennett. I too have received Mr. Olson's statements before the committee regarding his role in the "Arkansas Project," and I find Mr. Olson's statements to be clear and accurate.

The Washington Post editorial board also shares this view. On May 18, after all of the questions regarding the "Arkansas Project," the Washington Post endorsed Mr. Olson's nomination to be Solicitor General, noting "Mr. Olson is one of Washington's most talented and successful appellate lawyers, a man who served with distinction in the Justice Department during the 1980s and whose work is widely admired across party lines." According to the Washington Post, "Mr. Olson's prior service at the Justice Department indicates that he understands the difference between the role of private citizen and public servant." As for Mr. Olson's testimony regarding his role in the "Arkansas Project," the Washington Post concluded that "there's no evidence that his testimony was inaccurate in any significant way," and that "the Democrats would be wrong to block Mr. Olson." (Emphasis added.)

CONGRESSIONAL RECORD—SENATE

July 9, 2001

S. 258

The Miss America Organization is one of the Nation’s leading achievement programs and the world’s largest provider of scholarships for young women. The Miss America Organization provides young women with the opportunity to grow personally and professionally while instilling a spirit of community service through a variety of community-based programs.

As a former schoolteacher, I commend Angela for her selfless dedication to the education of the young people of Hawaii and our country. I wish her well as she continues her education and continues to enrich the lives of the children in Hawaii.

WESTMINSTER CHRISTIAN ACADEMY

Mr. BOND, Mr. President, I rise to recognize Westminster Christian Academy in St. Louis on winning the Region 3 award at the We the People... The Citizen and the Constitution national finals held on April 21-23, 2001.

This award is presented to the school in each of five geographic regions with the highest cumulative score during the national finals. The students of Westminster Christian Academy competed against 49 classes throughout the Nation. They demonstrated a remarkable understanding of the fundamental ideas and values of American constitutional Government.

I had the pleasure to meet with this group of outstanding students during their visit in April, and I am pleased to congratulate them and their teacher Mr. Ken Boesch on such a fine accomplishment. I also commend Westminster Christian Academy as well, for proving to be a model school that has surpassed the expectations for our country. Through hard work, dedication, and discipline they have surpassed the medium.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HUTCHINSON (for himself and Mr. DUBBIN)

S. Con. Res. 59. A concurrent resolution expressing the sense of Congress that there should be established a National Community Health Center Week to raise awareness of health care needs for our community, migrant, public housing, and homeless health centers; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

At the request of Ms. SOWE, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a co-sponsor of S. 258, a bill to amend title XVIII of the Social Security Act to provide for coverage under the medicare program of annual screening pap smear and screening pelvic exams.

At the request of Mr. HAGEL, the name of the Senator from Wisconsin (Mr. KOHL) was added as a cosponsor of S. 261, a bill to authorize the design and construction of a temporary education center at the Vietnam Veterans Memorial.

At the request of Ms. COLLINS, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 326, a bill to amend title XVIII of the Social Security Act to eliminate the 15 percent reduction in payment rates under the prospective payment system for home health services and to permanently increase payments for such services that are furnished in rural areas.

At the request of Mr. SARBANES, the names of the Senator from Connecticut (Mr. LIEBERMAN) and the Senator from California (Mr. SESSIONS) were added as cosponsors of S. 392, a bill to grant a Federal Charter to Korean War Veterans Association, Incorporated, and for other purposes.

At the request of Mr. MIKULSKI, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. 452, a bill to amend title XVIII of the Social Security Act to ensure that the Secretary of Health and Human Services provides appropriate guidance to physicians, providers of services, and ambulance providers that are attempting to properly submit claims under the medicare program to ensure that the Secretary does not target inadvertent billing errors.

At the request of Mr. DOMENICI, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 543, a bill to provide for equal coverage of mental health benefits with respect to health insurance coverage unless comparable limitations are imposed on medical and surgical benefits.

At the request of Mr. KENNEDY, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 583, a bill to amend the Food Stamp Act of 1977 to improve nutrition assistance for working families and the elderly, and for other purposes.

At the request of Mr. SCHUMER, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 586, a bill to reduce acid deposition under the Clean Air Act, and for other purposes.

At the request of Mr. LUGAR, the name of the Senator from Kentucky
CONGRESSIONAL RECORD—SENATE

July 9, 2001

S. 1079
At the request of Mr. Levin, the name of the Senator from Connecticut (Mr. Lieberman) was added as a cosponsor of S. 1079, a bill to amend the Public Works and Economic Development Act of 1965 to provide assistance to communities for the redevelopment of brownfield sites.

S. 1096
At the request of Mr. Thompson, the names of the Senator from Nebraska (Mr. Hagel) and the Senator from Massachusetts (Mr. Kerry) were added as cosponsors of S. 1095, a bill to amend title 38, United States Code, to restore promised GI Bill educational benefits to Vietnam era veterans, and for other purposes.

S. 1153
At the request of Mr. Craig, the name of the Senator from Wyoming (Mr. Thomas) was added as a cosponsor of S. 1153, a bill to amend the Food Security Act of 1985 to establish a grassland reserve program to assist owners in restoring and protecting grassland.

S. 1155
At the request of Mr. Hutchison, the name of the Senator from Michigan (Ms. Stabenow) was added as a cosponsor of S. Res. 61, a resolution expressing the sense of the Senate that the Secretary of Veterans Affairs should recognize board certifications from the American Association of Physician Specialists, Inc., for purposes of the payment of special pay by the Veterans Health Administration.

S. Res. 61
At the request of Mr. Hagel, the name of the Senator from Delaware (Ms. Boxer) were added as cosponsors of S. Con. Res. 45, a concurrent resolution encouraging the development of strategies to reduce hunger and poverty, and to promote free market economies and democratic institutions, in sub-Saharan Africa.

S. CON. RES. 59
Expressing the sense of Congress that there should be established a National Community Health Center Week to raise awareness of health services provided by community, migrant, public housing, and homeless health centers

S. Res. 53
At the request of Mr. Hagel, the names of the Senator from Delaware (Mr. Biden) and the Senator from California (Mrs. Boxer) were added as cosponsors of S. Con. Res. 53, concurrent resolution encouraging the development of strategies to reduce hunger and poverty, and to promote free market economies and democratic institutions, in sub-Saharan Africa.

submitted resolutions

Whereas community, migrant, public housing, and homeless health centers are nonprofit and community owned and operated health providers that are vital to the Nation’s communities;

Whereas there are more than 1,029 of these health centers serving nearly 12,000,000 people at 3,200 health delivery sites, spanning urban and rural communities in the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands;

Whereas these health centers have provided cost-effective, quality health care to the Nation’s poor and medically underserved, including the working poor, the uninsured, and many high-risk and vulnerable populations;

Whereas these health centers act as a vital safety net in the Nation’s health delivery system, meeting escalating health needs and reducing health disparities;

Whereas these health centers provide care to 1 of every 9 uninsured Americans, 1 of every 8 low-income Americans, and 1 of every 3 rural Americans, who care otherwise lack access to health care;

Whereas these health centers, and other innovative programs in primary and preventive care, reach out to 600,000 homeless persons and more than 650,000 farm workers;

Whereas these health centers make health care responsive and cost-effective by integrating the delivery of primary care with aggressive outreach, patient education, translation, and enabling support services;

Whereas these health centers increase the use of preventive health services such as immunizations, Pap smears, mammograms, and glaucoma screenings;

Whereas there are more than 1,029 of these health centers serving nearly 12,000,000 people at 3,200 health delivery sites, spanning urban and rural communities in the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands;

Whereas these health centers increase the use of preventive health services such as immunizations, Pap smears, mammograms, and glaucoma screenings;
Whereas in communities served by these health centers, maternal mortality rates have been reduced between 10 and 40 percent;  
Whereas these health centers are built by community initiative;  
Whereas federal grants provide money empowering communities to find partners and resources and to recruit doctors and health professionals;  
Whereas Federal grants, on average, contribute 28 percent of these health centers' budgets, with the remainder provided by State and local governments, Medicare, Medicaid, private contributions, private insurance, and patient fees;  
Whereas these health centers are community oriented and patient focused;  
Whereas these health centers tailor their services to fit the special needs and priorities of communities, working together with schools, businesses, churches, community organizations, foundations, and State and local governments;  
Whereas these health centers contribute to the health and well-being of their communities, keeping children healthy and in school and helping adults remain productive and on the job;  
Whereas these health centers engage citizen participation and provide jobs for 50,000 community residents; and  
Whereas the establishment of a National Community Health Center Week for the week beginning August 31, 2001, would raise awareness of the health services provided by these health centers: Now, therefore, be it  
Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—  
(1) there should be established a National Community Health Center Week to raise awareness of health services provided by community, migrant, public housing, and homeless health centers; and  
(2) the President should issue a proclamation calling on the people of the United States and interested organizations to observe such a week with appropriate programs and activities.

SA 874. Mr. REID (for Mr. WELLS) proposed an amendment to the bill S. 1077, supra.  
SA 875. Mr. REID (for Mr. JOHNSON) proposed an amendment to the bill S. 1077, supra.

TEXT OF AMENDMENTS

SA 861. Mr. BYRD (for himself and Mr. STEVENS) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.  
On page 11, after line 8, insert the following:  
"SEC. 1207. Of the amounts appropriated in this Act under the heading 'Operation and Maintenance, Army', $8,000,000 shall be available for the purpose of repairing storm damage at Fort Sill, Oklahoma, and Red River Army Depot, Texas."  
On page 11, after line 8, insert the following:  
"SEC. 1208. (a) Of the total amount appropriated under this Act to the Army for operation and maintenance, such amount as may be necessary shall be available for a conveyance by the Secretary of the Army, without consideration, of all right, title, and interest of the United States in and to the firefighting and rescue vehicles described in subsection (b) to the City of Bayonne, New Jersey.  
(b) The firefighting and rescue vehicles referred to in subsection (a) are a rescue hazardous materials truck, a 2,000 gallon per minute pump, and a 100-foot elevated platform truck, all of which are at Millitary Ocean Terminal, Bayonne, New Jersey."

On page 11, line 15, before the period, insert: "Provided: Provided, That funding is authorized for Project 01-D-107, Atlas Relocation and Operations, and Project 01-D-108, Microsystems and Engineering Science Application Complex".  
On page 13, after line 8, insert the following:  
"SEC. 1402. Notwithstanding any other provision of law, the Federal Crop Insurance Corporation shall promulgate final regulations to carry out section 522(b) of the Federal Crop Insurance Act of 1970 (7 U.S.C. 522(b)), without regard to:
  "(1) the notice and comment provisions of section 553 of title 5, United States Code;  
  "(2) the Statement of Policy of the Secretary of Agriculture effective July 24, 1971 (36 FR 13804), relating to notices of proposed rulemaking and public participation in rulemaking; and  
  "(3) chapter 35 of title 44, United States Code (commonly known as the 'Paperwork Reduction Act')."

On page 22, line 13, after "purposes of D.C."

SEC. 2105. Under the heading of 'Food and Drug Administration', $1,000,000, to remain available until September 30, 2002: Provided, That of these funds, no less than $1,000,000 shall be used for enforcement of the Animal Welfare Act: Provided further, That of these funds, no less than $1,000,000 shall be used to enhance human slaughter practices under the Federal Meat Inspections Act: Provided further, That of these funds, no less than $1,000,000 shall be used to enhance human slaughter practices under the Federal Meat Inspections Act: Provided further, That these funds may be transferred to and merged with appropriations for agencies performing this work.

On page 14, after line 25, insert the following:  
"SEC. 2103. (a) Not later than August 1, 2001, the Federal Crop Insurance Corporation shall promulgate final regulations to carry out section 522(b) of the Federal Crop Insurance Act of 1970 (7 U.S.C. 522(b)), without regard to:
  "(1) the notice and comment provisions of section 553 of title 5, United States Code;  
  "(2) the Statement of Policy of the Secretary of Agriculture effective July 24, 1971 (36 FR 13804), relating to notices of proposed rulemaking and public participation in rulemaking; and  
  "(3) chapter 35 of title 44, United States Code (commonly known as the 'Paperwork Reduction Act')."

On page 14, after line 25, insert the following:  
"SEC. 2104. In addition to amounts otherwise available, $20,000,000 from amounts pursuant to 15 U.S.C. 1344-4 for the Secretary of Agriculture to make available financial assistance related to water conservation to eligible producers in the Klamath Basin, as determined by the Secretary."  
On page 14, after line 25 insert the following new section:  
"SEC. 2105. Under the heading of 'Food Stamp Program' in Public Law 106-387, the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2000, in the sixth proviso, strike "$194,000,000" and insert in lieu thereof "$191,000,000".

On page 15, after line 22, strike "$100,000,000" and insert "$120,000,000".

On page 16, beginning with line 25, strike all through line 4 on page 17.

On page 17, line 5, strike "2202" and insert "2201".

On page 17, line 24, strike "2203" and insert "2211".
transferred all local funds resulting from the lapse of personnel vacancies, caused by the rescission of funds under section 396 of the Communications Act of 1934 (47 U.S.C. 396) is an eligible entity in accordance with principles and criteria established by the Corporation. Provided, That these funds shall be non-reimbursable: Provided further, That these funds shall be available until expended."

On page 42, after line 25, insert the following:

""ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS"

For an additional amount for 'Acquisition, Construction, and Improvements', $1,000,000, to remain available until expended."

On page 42, after line 24, insert the following:

"SEC. 2902. Notwithstanding section 47106(b)(2) of title 49, United States Code or any provision of an application for a project grant under chapter 471 of that title may propose projects at Abbeville Municipal Airport and Akutan Airport, and the Secretary may make project grants for such projects.

On page 43, after line 24, insert the following:

"FEDERAL PAYMENT TO MORRIS K. Udall Scholarship and Excellence in National Environmental Policy Foundation"

Of the funds available under this heading in H.R. 5658 of the 106th Congress, as incorporated by reference in Public Law 106-554, $1,000,000 shall be made available for necessary expenses incurred pursuant to section 6(7) of the Morris K. Udall Scholarship and Excellence in National Environmental and Native American Public Policy Act of 1992 (20 U.S.C. 5604(7)), to remain available until expended.

On page 44, after line 20, insert the following:

"FEDERAL AVIATION ADMINISTRATION"

"GRANTS-IN-AID FOR AIRPORTS (AIRPORT AND AIRWAY TRUST FUND)"

"RESCISSION OF CONTRACT AUTHORIZATION"

"Of the unobligated balances authorized under 49 U.S.C. 48103, as amended, $30,000,000 are rescinded."

On page 45, after line 1, insert the following:

"EMERGENCY HIGHWAY RESTORATION"

For the costs associated with the long term restoration or replacement of seismically-vulnerable highways recently damaged during the Nisqually earthquake, $12,800,000, to remain available until expended: Provided, That of the amount made available under this head, $5,000,000 shall be for a fixed guideway modernization project at the Eisenhower Tunnel in Denver, Colorado, and $2,000,000 shall be for the Magnolia Bridge in Seattle, Washington."

On page 45, at the end of line 6, insert the following: "Provided, That this amount may be made available, notwithstanding any other provision of law, for a United States contribution to a global trust fund to combat HIV/AIDS, malaria, and tuberculosis: Provided, further, That the entire amount made available under this heading is designated by the Congress as an emergency requirement pursuant to section

"ALASKA RAILROAD COMMISSION"

To enable the Secretary of Transportation to make an additional grant to the Alaska Railroad, $2,000,000 for a joint United States and Canadian commission to study the feasibility of connecting the rail system in Alaska to the North American continental rail system."

On page 44, between lines 21 and 22, insert the following:

"FEDERAL ENVIRONMENTAL PROTECTION AGENCY"

"ENVIRONMENTAL MANAGEMENT BUILDING AT NORFOLK NAVAL SHIPYARD"

"For the costs associated with the long term restoration or replacement of seismically-vulnerable highways recently damaged during the Nisqually earthquake, $12,800,000, to remain available until expended: Provided, That of the amount made available under this head, $5,000,000 shall be for a fixed guideway modernization project at the Eisenhower Tunnel in Denver, Colorado, and $2,000,000 shall be for the Magnolia Bridge in Seattle, Washington."

On page 45, after line 1, insert the following:

"EMERGENCY HIGHWAY RESTORATION"

For the costs associated with the long term restoration or replacement of seismically-vulnerable highways recently damaged during the Nisqually earthquake, $12,800,000, to remain available until expended: Provided, That of the amount made available under this head, $5,000,000 shall be for the Magnolia Bridge in Seattle, Washington."

On page 45, after line 23, insert the following: "Provided, That this amount may be made available, notwithstanding any other provision of law, for a United States contribution to a global trust fund to combat HIV/AIDS, malaria, and tuberculosis: Provided, further, That the entire amount made available under this heading is designated by the Congress as an emergency requirement pursuant to section
SA 864. Mr. CRAIG (for Mr. ROBERTS (for himself, Mr. CLELAND, Mr. MILLER, Mr. CRAPO, and Mr. BROWNBACK)) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

At the appropriate place, insert the following:

(a) SHORT TITLE.—This section may be cited as the “Protect Social Security Surpluses Act of 2001.”

(b) ENFORCING DEFICIT TARGETS.—Section 253 of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 903) is amended—

(1) by striking subsection (b) and inserting the following:

“(b) EXCESS DEFICIT; MARGIN.—The excess deficit is, if greater than zero, the estimated deficit for the budget year, minus the margin for that year. In this subsection, the margin for each fiscal year is 0.5 percent of estimated total outlays for that fiscal year.”;

(2) by striking subsection (c) and inserting the following:

“(c) ELIMINATING EXCESS DEFICIT.—Each non-exempt account shall be reduced by a dollar amount calculated by multiplying the baseline level of sequesterable budgetary resources in that account at that time by the uniform percentage necessary to eliminate an excess deficit.”; and

(3) by striking subsections (g) and (h).

(c) ECONOMIC AND TECHNICAL ASSUMPTIONS.—Notwithstanding section 254(f) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 904(f)), the Office of Management and Budget shall use the economic and technical assumptions underlying the report issued pursuant to section 1106 of title 31, United States Code, for purposes of determining the excess deficit under section 255(b) of the Balanced Budget and Emergency Deficit Control Act of 1985, as added by subsection (b).

SA 865. Mr. VOINOVICH (for himself, Mr. HELMS, Mr. SESSIONS, and Mr. CRAPO) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

At the appropriate place, insert the following:

(a) SHORT TITLE.—This section may be cited as the “Protect Social Security Surpluses Act of 2001.”

(b) ENFORCING DEFICIT TARGETS.—Section 253 of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 903) is amended—

(1) by striking subsection (b) and inserting the following:

“(b) EXCESS DEFICIT; MARGIN.—The excess deficit is, if greater than zero, the estimated deficit for the budget year, minus the margin for that year. In this subsection, the margin for each fiscal year is 0.5 percent of estimated total outlays for that fiscal year.”;

(2) by striking subsection (c) and inserting the following:

“(c) ELIMINATING EXCESS DEFICIT.—Each non-exempt account shall be reduced by a dollar amount calculated by multiplying the baseline level of sequesterable budgetary resources in that account at that time by the uniform percentage necessary to eliminate an excess deficit.”; and

(3) by striking subsections (g) and (h).

(c) ECONOMIC AND TECHNICAL ASSUMPTIONS.—Notwithstanding section 254(f) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 904(f)), the Office of Management and Budget shall use the economic and technical assumptions underlying the report issued pursuant to section 1106 of title 31, United States Code, for purposes of determining the excess deficit under section 255(b) of the Balanced Budget and Emergency Deficit Control Act of 1985, as added by subsection (b).

SA 866. Mr. BYRD (for Mr. CONRAD) proposed an amendment to amendment SA 865 proposed by Mr. VOINOVICH to the bill (S. 1077) making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

At the appropriate place, insert the following:

TITLE —SOCIAL SECURITY AND MEDICARE OFF-BUDGET LOCKBOX ACT OF 2001

SEC. 01. SHORT TITLE.

This title may be cited as the “Social Security and Medicare Off-Budget Lockbox Act of 2001.”

SEC. 02. STRENGTHENING SOCIAL SECURITY POINTS OF ORDER.

(a) IN GENERAL.—Section 312 of the Congressional Budget Act of 1974 (2 U.S.C. 632(a)(7), by striking “for the fiscal year” through the period and inserting “for each fiscal year covered by the resolution”; and

(b) STRENGTHENING MEDICARE POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider a concurrent resolution on the budget (or any amendment thereto or conference report thereon) or any bill, joint resolution, amendment, motion, or conference report that would violate or amend section 1301 of the Budget Enforcement Act of 1990.

(c) E F F E C T I V E  D A T E.—This section and the amendments made by this section shall apply to fiscal years 2002 through 2006.
to consider any concurrent resolution on the budget (public, conference, or conference report on the resolution) that would cause a decrease in surpluses or an increase in deficits of the Federal Hospital Insurance Trust Fund in any year relative to the levels set forth in the applicable resolution.

(b) BASELINE TO EXCLUDE HOSPITAL INSURANCE TRUST FUND.—Section 257(b)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985 is amended by striking "shall be included in" and inserting "shall not be included in any.

(c) Medicare Firewalls.—Section 311(a) of the Congressional Budget Act of 1974 (2 U.S.C. 642(a)) is amended by adding after paragraph (3), the following:

"(4) Enforcement of Medicare Levels in the Senate.—After a concurrent resolution on the budget is agreed to, it shall not be in order in the Senate to consider any bill, joint resolution, amendment, motion, or conference report that would cause a decrease in surpluses or an increase in deficits of the Federal Hospital Insurance Trust Fund in any year relative to the levels set forth in the applicable resolution.".

SEC. 04. PREVENTING ON-BUDGET DEFICITS.

(a) Points of Order to Prevent on-Budget Deficits.—Section 312 of the Congressional Budget Act of 1974 (2 U.S.C. 643) is amended by adding at the end the following:

"(b) Points of Order to Prevent on-Budget Deficits.—

"(1) Concurrent Resolutions on the Budget.—It shall not be in order in the House of Representatives or the Senate to consider any concurrent resolution on the budget, or conference report thereon or amendment thereto, that would cause or increase an on-budget deficit for any fiscal year.

"(2) Super Majority Requirement.—

"(1) Point of Order.—Section 904(c)(1) of the Congressional Budget Act of 1974 is amended by inserting "312(h)", after "312(g)", and

"(2) Waiver.—Section 904(d)(2) of the Congressional Budget Act of 1974 is amended by inserting "312(h)", after "312(g)".

SA 867. Mr. CONRAD proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

On page 47, between lines 20 and 21, insert the following:

"COMMUNITY DEVELOPMENT BLOCK GRANTS.—For emergency housing for Indians on the Turtle Mountain Indian Reservation, there shall be made available $10,000,000 through the Indian community development block grant program under the Housing and Community Development Act of 1974. Amounts made available for programs administered by the Department of Housing and Urban Development under the Act shall be reduced on a pro rata basis by $10,000,000. The Federal Emergency management Agency shall provide technical assistance to Indians with respect to the acquisition of emergency housing on the Turtle Mountain Indian Reservation.

"SA 868. Mr. STEVENS (for Mr. McCAIN (for himself, Mr. LIEBERMAN, and Ms. LANDRIEU)) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

On page 11, between lines 8 and 9, insert the following:

"SEC. 1207. In addition to the amounts appropriated to the Department of Defense for fiscal year 2001 in other provisions of this Act or in the Department of Defense Appropriations Act, 2001 (Public Law 106–259), $2,736,100 is hereby appropriated, out of any funds in the Treasury not otherwise appropriated, to the Department of Defense for the fiscal year ending September 30, 2001, for purposes under headings in the Department of Defense Appropriations Act, 2001, and in amounts, as follows:

- "Military Personnel, Army", $30,000,000;
- "Military Personnel, Navy", $10,000,000;
- "Military Personnel, Air Force", $332,500,000;
- "Reserve Personnel, Army", $30,000,000;
- "Operation and Maintenance, Army", $916,400,000;
- "Operation and Maintenance, Navy", $514,500,000;
- "Operation and Maintenance, Marine Corps", $226,700,000;
- "Operation and Maintenance, Air Force", $59,600,000;
- "Operation and Maintenance, Defense-Wide", $9,000,000;
- "Operation and Maintenance, Army Reserve", $30,000,000;
- "Operation and Maintenance, Army National Guard", $106,000,000;
- "Aircraft Procurement, Army", $50,000,000, to remain available for obligation until September 30, 2003;
- "Procurement of Weapons and Tracked Combat Vehicles, Army", $10,000,000, to remain available for obligation until September 30, 2003;
- "Procurement of Ammunition, Army", $14,000,000, to remain available for obligation until September 30, 2003;
- "Other Procurement, Army", $40,000,000, to remain available for obligation until September 30, 2003;
- "Aircraft Procurement, Navy", $65,000,000, to remain available for obligation until September 30, 2003;
- "Research, Development, Test and Evaluation, Air Force", $8,000,000, to remain available for obligation until September 30, 2002; and
- "USS Cole", $49,000,000.

Provided, That the entire amount made available in this section is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended: Provided, further, That the entire amount under this section shall be available only to the extent that an official budget request for a dollar amount that includes the designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, is transmitted by the President to the Congress.

SA 869. Mr. STEVENS (for Mr. McCAIN (for himself, Mr. LIEBERMAN, and Ms. LANDRIEU)) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

After section 3002, insert the following:

"SEC. 3003. (a) In addition to the amounts appropriated to the Department of Defense for fiscal year 2001 by other provisions of this Act or the Department of Defense Appropriations Act, 2001 (Public Law 106–259), funds are hereby appropriated, out of any funds in the Treasury not otherwise appropriated, to the Department of Defense for the fiscal year ending September 30, 2001, for purposes under headings in the Department of Defense Appropriations Act, 2001, and in amounts, as follows:

- "Military Personnel, Navy", $161,000,000, of which $1,000,000 shall be available for the supplemental subsistence allowance under section 402a of title 37, United States Code.
- "Operation and Maintenance, Army", $103,000,000.
- "Operation and Maintenance, Marine Corps", $181,000,000, of which $6,000,000 shall be available for enhancement of force protection for United States forces in the Persian Gulf region and elsewhere worldwide.
- "Operation and Maintenance, Marine Corps Reserve", $72,000,000, of which $36,000,000 shall be available for enhancement of force protection for United States forces in the Persian Gulf region and elsewhere worldwide.
- "Operation and Maintenance, Air Force", $397,000,000.
- "Operation and Maintenance, Air Force Reserve", $212,000,000.
- "Operation and Maintenance, Navy Reserve", $212,000,000.
- "Other Procurement, Navy", $45,000,000, to remain available for obligation until September 30, 2003, which shall be available for enhancement of force protection for United States forces in the Persian Gulf region and elsewhere worldwide.

Provided, That the amount appropriated by chapter 10 of title II to the Department of the Treasury for Departmental Offices under the heading "Salaries and Expenses" is hereby reduced by $30,000,000.

(e) The matter in chapter 11 of title II under the heading "National Aeronautics and Space Administration Human Space Flight" shall not take effect.
SA 870. Mr. STEVENS (for Mr. HUTCHINSON) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

On page 13, between lines 23 and 24, insert the following:

FOREST SERVICE
STATE AND PRIVATE FORESTRY
For an additional amount for "State and Private Forestry" to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended: Provided, That the entire amount is designated by Congress as an emergency requirement under section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(A)).

NATIONAL FOREST SYSTEM
For an additional amount for the "National Forest System" to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended: Provided, That the entire amount is designated by Congress as an emergency requirement under section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(A)).

CAPITAL IMPROVEMENT AND MAINTENANCE
For an additional amount for "Capital Improvement and Maintenance" to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $4,000,000, to remain available until expended: Provided, That the entire amount is designated by Congress as an emergency requirement under section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(A)).

SA 871. Mr. STEVENS (for Mr. CRAIG) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

On page 29, between lines 2 and 3, insert the following:

Scc. 2506. In exercising the authority to provide cash transfer assistance for Israel for the fiscal year ending September 30, 2001, the President shall:

(1) ensure that the level of such assistance does not cause an adverse impact on the total level of non-military exports from the United States to Israel; and

(2) enter into a side letter agreement with Israel providing for the purchase of grain in the same amount and in accordance with terms at least as favorable as the side letter agreement in effect for the fiscal year ending September 30, 2000.

SA 872. Mr. BOND (for himself and Mr. MCCAIN) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes; as follows:

At the end of title III, add the following:

SEC. 301. ENSURING FUNDING FOR DEFENSE AND EDUCATION AND THE SUPPLEMENTAL APPROPRIATION BY REPEALING TAX CUTS FOR 2001.

(a) REPEAL.—

(1) IN GENERAL.—Section 101 of the Economic Growth and Tax Relief Reconciliation Act of 2001 is repealed.

(2) APPLICATION OF CODE.—The Internal Revenue Code of 1986 shall be applied and administered as if such section 101 (and the amendments made by such section) had never been enacted.

(3) CONFORMING AMENDMENTS.—

(A) IN GENERAL.—Section 1 of the Internal Revenue Code of 1986 shall be applied and administered as if the definition of "personal" which was in effect before such section took effect is repealed.

(B) APPLICATION OF CODE.—The Internal Revenue Code of 1986 shall be applied and administered as if there were no limitations on the amount of the deduction for charitable contributions, charitable remainder interests, and the deduction for charitable donations of works of art.

(C) CONFORMING AMENDMENTS.—

Section 189 shall be applied as if any item of income, gain, loss, or deduction for the taxable year with respect to which the deduction referred to in section 189 is allowed were a loss or deduction.

(D) CONFORMING AMENDMENTS.—

The amendment made by the preceding subsection shall be applied as if the credit under section 28(b)(1) were not reduced by the amount of 0.3 percent (as reduced under section 28(b)(2)) for the fiscal year 2001.
(i) $13,000 ($12,000 in the case of taxable years beginning on January 1, 2008) in the case of subsection (a),
(ii) $10,000 in the case of subsection (b), and
(iii) 1 the amount applicable under clause (i) (after adjustment, if any, under subparagraph (C)) in the case of subsections (c) and (d).

(3) ADJUSTMENT.—In prescribing the tables under subsection (f) which apply with respect to taxable years beginning in calendar years after 2001—one
(i) $13,000, any percentage applicable under subsection 11(b) shall make no adjustment to the initial bracket amount for any taxable year beginning before January 1, 2009,
(ii) the cost-of-living adjustment used in making adjustments to the initial bracket amount for any taxable year beginning after December 31, 2008, shall be determined under subsection (f)(3) by substituting '2007' for '1992' in subparagraph (B) thereof, and
(iii) such adjustment shall not apply to the amount referred to in subparagraph (B) (iii) (B) (i).

2 If any amount after adjustment under the preceding sentence is not a multiple of $50, such amount shall be rounded to the next lowest multiple of $50.

(2) REDUCTIONS IN RATES AFTER DECEMBER 31, 2001.—In the case of taxable years beginning in a calendar year after 2001, the corresponding percentage specified for such calendar year in the following table shall be substituted for the otherwise applicable tax rate in the tables under subsections (a), (b), (c), (d), and (e).

In the case of taxable years beginning during calendar year:

The corresponding percentages shall be determined from the following:

<table>
<thead>
<tr>
<th>Year</th>
<th>28%</th>
<th>31%</th>
<th>36%</th>
<th>39.6%</th>
</tr>
</thead>
<tbody>
<tr>
<td>2002 and 2003</td>
<td>27.0%</td>
<td>30.0%</td>
<td>35.0%</td>
<td>38.5%</td>
</tr>
<tr>
<td>2004 and 2005</td>
<td>25.0%</td>
<td>29.0%</td>
<td>34.0%</td>
<td>37.5%</td>
</tr>
<tr>
<td>2006 and thereafter</td>
<td>25.0%</td>
<td>28.0%</td>
<td>33.0%</td>
<td>35.0%</td>
</tr>
</tbody>
</table>

(3) ADJUSTMENT OF TABLES.—The Secretary shall adjust the tables prescribed under subsection (f) to carry out this subsection.

(B) CONFORMING AMENDMENTS.—
(1) Subparagraph (B) of section 1(g)(7) of such Code is amended by striking ‘‘15 percent’’ in clause (ii)(II) and inserting ‘‘10 percent’’.

(ii) Section 1(h) of such Code is amended—
(I) by striking ‘‘28 percent’’ both places it appears in paragraphs (1)(A)(i)(I) and (1)(B)(i) and inserting ‘‘25 percent’’, and
(II) by striking paragraph (19).

(iii) Section 531 of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the accumulated taxable income’’.

(iv) Section 541 of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(v) Section 3402(b)(1)(B) of such Code is amended by striking ‘‘$7, 15, 28, or 31 percent’’ and inserting ‘‘7 percent, any percentage applicable to any of the 3 lowest income brackets in section 1(c)’’.

(vi) Section 3402(b)(2)(B) of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(vii) Section 3402(b)(2) of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(viii) Section 3402(b)(2) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(ix) Section 3402(c)(1) of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(x) Section 3402(c)(2) of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(ix) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to’’ and all that follows and inserting ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(x) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(x) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(x) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(x) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xi) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xii) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xiii) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xiv) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xv) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xvi) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xvii) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xviii) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xix) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(xx) Section 3402(d)(2)(c) of such Code is amended by striking ‘‘equal to the product of the highest rate of tax under section 1(c) and the undisbursed personal holding company income’’.

(2) Such amount shall be rescinded from such Federal appropriations accounts as the Secretary of Defense shall specify before July 31, 2001.

(b) Effective August 1, 2001, if the Secretary of Defense has not specified accounts for rescissions under subsection (a), of the funds described in subsection (a)(1) and remaining in Federal appropriations accounts, an amount equal to $150,000,000 is rescinded through proportional reductions to the por-
hearing will examine past and current U.S. efforts to convince offshore tax havens to cooperate with U.S. efforts to stop tax evasion, the role of the Organization of Economic Cooperation and Development, (OECD), tax haven project in light of U.S. objectives, and the current status of U.S. support for the project, in particular for the core elements requiring information exchange.

The hearing will take place on Wednesday, July 18, 2001, at 2 p.m. in room 628 of the Dirksen Senate Office Building. For further information, please contact Linda J. Gustitus of the subcommittee staff at (202) 224-3721.

SUBCOMMITTEE ON NATIONAL PARKS

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a hearing has been scheduled before the Subcommittee on National Parks of the Committee on Energy and Natural Resources.

The hearing will take place on Tuesday, July 17, 2001, beginning at 2:30 p.m. in room 366 of the Dirksen Senate Office Building in Washington, DC.

The purpose of the hearing is to receive testimony on the following bills: S. 281, to authorize the design and construction of a temporary education center at the Vietnam Veterans Memorial; S. 386 and H.R. 146, to authorize the Secretary of the Interior to study the suitability and feasibility of designating the Great Falls Historic District in the city of Paterson, New Jersey, as a unit of the National Park System, and for other purposes; S. 513 and H.R. 182, to amend the Wild and Scenic Rivers Act to designate a segment of the Eightmile River in the State of Connecticut for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes; S. 921 and H.R. 1009, to adjust the boundary of the William Howard Taft National Historic Site in the State of Ohio, to authorize an exchange of land in connection with the historic site, and for other purposes; and S. 1087, to authorize the Secretary of the Interior to issue right-of-way permits for natural gas pipelines within the boundary of the Great Smoky Mountains National Park.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, those wishing to submit written testimony for the hearing record should send two copies of their testimony to the Subcommittee on National Parks, Committee on Energy and Natural Resources, U.S. Senate, 312 Dirksen Senate Office Building, Washington, DC 20510.

For further information, please contact David Brooks of the committee staff at (202) 224-9863.

BIPARTISAN PATIENT PROTECTION ACT

On June 29, 2001, the Senate passed S. 1052, as follows:

S. 1052

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Bipartisan Patient Protection Act".

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows: Sec. 1. Short title; table of contents.

TITLE I—IMPROVING MANAGED CARE

Subtitle A—Utilization Review; Claims; and Internal and External Appeals

Sec. 101. Utilization review activities.

Sec. 102. Procedures for initial claims for benefits and prior authorization determinations.

Sec. 103. Internal appeals of claims denials.

Sec. 104. Independent external appeals procedures.

Sec. 105. Health care consumer assistance fund.

Subtitle B—Access to Care

Sec. 111. Consumer choice option.

Sec. 112. Choice of health care professional.

Sec. 113. Access to emergency care.

Sec. 114. Timely access to specialists.

Sec. 115. Patient access to obstetrical and gynecological care.

Sec. 116. Access to pediatric care.

Sec. 117. Continuity of care.

Sec. 118. Access to needed prescription drugs.

Sec. 119. Coverage for individuals participating in approved clinical trials.

Sec. 120. Required coverage for minimum hospital stay for mastectomies and lymph node dissections for the treatment of breast cancer and coverage for secondary consultations.

Subtitle C—Access to Information

Sec. 121. Patient access to information.

Sec. 122. Genetic information.

Subtitle D—Protecting the Doctor-Patient Relationship

Sec. 131. Prohibition of interference with certain medical communications.

Sec. 132. Prohibition of discrimination against providers based on licensure.

Sec. 133. Prohibition against improper incentive arrangements.

Sec. 134. Payment of claims.

Sec. 135. Protection for patient advocacy.

Subtitle E—Definitions

Sec. 151. Definitions.

Sec. 152. Preemption; State flexibility; construction.

Sec. 153. Exclusions.

Sec. 154. Coverage of limited scope plans.

Sec. 155. Regulations.

Sec. 156. Incorporation into plan or coverage documents.

TITLE II—APPLICATION OF QUALITY CARE STANDARDS TO GROUP HEALTH PLANS AND HEALTH INSURANCE COVERAGE UNDER THE PUBLIC HEALTH SERVICE ACT

Sec. 201. Application to group health plans and group health insurance coverage.

Sec. 202. Application to individual health insurance coverage.

Sec. 203. Cooperation between Federal and State authorities.

Sec. 204. Elimination of option of non-Federal governmental plans to be exempted from requirements concerning genetic information.

TITLE III—APPLICATION OF PATIENT PROTECTION STANDARDS TO FEDERAL HEALTH CARE PROGRAMS

Sec. 301. Application of patient protection standards to Federal health care programs.

TITLE IV—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

July 9, 2001

CONGRESSIONAL RECORD—SENATE 12683
Sec. 607. Definition of born-alive infant.
Sec. 606. Annual review.
Sec. 605. Sense of Senate with respect to
Sec. 604. Sense of Senate with respect to
Sec. 603. Fiscal year 2002 medicare pay-
Sec. 602. Customs user fees.

jeopardize the life or health of the partici-

pant, beneficiary, or enrollee in order to maintain or regain maximum function. Such
determination shall be made in accordance
with the medical exigencies of the case and as soon as possible, but in no case later than 72
hours after the time the request is re-
cieved by the plan or issuer under this sub-
paragraph.

(C) ONGOING CARE.—

(i) Concurrent review.—

(I) In general.—Subject to clause (ii), in the case of a concurrent review of ongoing
care (including hospitalization), which re-
sults in a termination or reduction of such
care, the plan or issuer must provide by tele-
phone and in printed form notice of the con-
current review determination to the indi-
vidual or the individual’s designee and the
individual’s health care provider in accord-
ance with the medical exigencies of the case and as soon as possible, with sufficient time
prior to the termination or reduction to allow for an appeal under section 103(b)(3) to be
concluded, prior to the termination or redu-
tion takes effect.

(II) CONTENTS OF NOTICE.—Such notice
shall include, with respect to ongoing health
services approved, the number of total of
approved services, the date of onset of services, and the next review date, if any, as well as a
statement in the individual’s rights to fur-
ther appeal.

(ii) Rule of construction.—Clause (i)
shall not be construed as requiring plans or
issuers to provide coverage of care that
would exceed the coverage limitations for
such care.

(2) RETROSPECTIVE DETERMINATION.—
A group health plan, or health insurance issuer
offering health insurance coverage, shall make a retrospective determination on a
claim for benefits in accordance with the medical exigencies of the case and as soon as possible, but not later than 30 days after the
date on which the plan or issuer receives in-
formation that is reasonably necessary to enable the plan or issuer to make a deter-
mination on the claim, or, if earlier, 60 days
after the date of receipt of the claim for ben-
efits.

(c) NOTICE OF A DENIAL OF A CLAIM FOR BENEFITS.—Written notice of a denial made
under an initial claim for benefits shall be issued to the participant, beneficiary, or en-
rollee (or authorized representative) and the

(1) Right to Initial Appeal.—

(A) In general.—A participant, bene-
ficiary, or enrollee (or authorized represent-
ative) may appeal any denial of a claim for
benefits under section 102 within the proce-
dures described in this section.

(B) Time for Appeal.—

(1) IN GENERAL.—(A) In the case of

such care, the plan or issuer must provide by tele-
phone and in printed form notice of the con-
current review determination to the indi-
vidual or the individual’s designee and the
individual’s health care provider in accord-
ance with the medical exigencies of the case and as soon as possible, with sufficient time
prior to the termination or reduction to allow for an appeal under section 103(b)(3) to be
concluded, prior to the termination or redu-
tion takes effect.

(II) CONTENTS OF NOTICE.—Such notice
shall include, with respect to ongoing health
services approved, the number of total of
approved services, the date of onset of services, and the next review date, if any, as well as a
statement in the individual’s rights to fur-
ther appeal.

(iii) Rule of construction.—Clause (i)
shall not be construed as requiring plans or
issuers to provide coverage of care that
would exceed the coverage limitations for
such care.

(2) Retrospective Determination.—A group health plan, or health insurance issuer
offering health insurance coverage, shall make a retrospective determination on a
claim for benefits in accordance with the medical exigencies of the case and as soon as possible, but not later than 30 days after the
date on which the plan or issuer receives in-
formation that is reasonably necessary to enable the plan or issuer to make a determination on the claim, or, if earlier, 60 days
after the date of receipt of the claim for ben-
efits.

(b) Notice of a Denial of a Claim for Benefits.—Written notice of a denial made
under an initial claim for benefits shall be issued to the participant, beneficiary, or en-
rollee (or authorized representative) and the

(1) Right to Initial Appeal.—

(A) In general.—A participant, bene-
ficiary, or enrollee (or authorized represent-
ative) may appeal any denial of a claim for
benefits under section 102 within the proce-
dures described in this section.

(B) Time for Appeal.—

(1) IN GENERAL.—(A) In the case of

such care, the plan or issuer must provide by tele-
phone and in printed form notice of the con-
current review determination to the indi-
vidual or the individual’s designee and the
individual’s health care provider in accord-
ance with the medical exigencies of the case and as soon as possible, with sufficient time
prior to the termination or reduction to allow for an appeal under section 103(b)(3) to be
concluded, prior to the termination or redu-
tion takes effect.

(II) CONTENTS OF NOTICE.—Such notice
shall include, with respect to ongoing health
services approved, the number of total of
approved services, the date of onset of services, and the next review date, if any, as well as a
statement in the individual’s rights to fur-
ther appeal.

(iii) Rule of construction.—Clause (i)
shall not be construed as requiring plans or
issuers to provide coverage of care that
would exceed the coverage limitations for
such care.

(2) Retrospective Determination.—A group health plan, or health insurance issuer
offering health insurance coverage, shall make a retrospective determination on a
claim for benefits in accordance with the medical exigencies of the case and as soon as possible, but not later than 30 days after the
date on which the plan or issuer receives in-
formation that is reasonably necessary to enable the plan or issuer to make a determination on the claim, or, if earlier, 60 days
after the date of receipt of the claim for ben-
efits.

(c) Notice of a Denial of a Claim for Benefits.—Written notice of a denial made
under an initial claim for benefits shall be issued to the participant, beneficiary, or en-
rollee (or authorized representative) and the

(1) Right to Initial Appeal.—

(A) In general.—A participant, bene-
ficiary, or enrollee (or authorized represent-
ative) may appeal any denial of a claim for
benefits under section 102 within the proce-
dures described in this section.

(B) Time for Appeal.—

(1) IN GENERAL.—(A) In the case of

such care, the plan or issuer must provide by tele-
phone and in printed form notice of the con-
current review determination to the indi-
vidual or the individual’s designee and the
individual’s health care provider in accord-
ance with the medical exigencies of the case and as soon as possible, with sufficient time
prior to the termination or reduction to allow for an appeal under section 103(b)(3) to be
concluded, prior to the termination or redu-
tion takes effect.

(II) CONTENTS OF NOTICE.—Such notice
shall include, with respect to ongoing health
services approved, the number of total of
approved services, the date of onset of services, and the next review date, if any, as well as a
statement in the individual’s rights to fur-
ther appeal.

(iii) Rule of construction.—Clause (i)
shall not be construed as requiring plans or
issuers to provide coverage of care that
would exceed the coverage limitations for
such care.

(2) Retrospective Determination.—A group health plan, or health insurance issuer
offering health insurance coverage, shall make a retrospective determination on a
claim for benefits in accordance with the medical exigencies of the case and as soon as possible, but not later than 30 days after the
date on which the plan or issuer receives in-
formation that is reasonably necessary to enable the plan or issuer to make a determination on the claim, or, if earlier, 60 days
after the date of receipt of the claim for ben-
efits.

(c) Notice of a Denial of a Claim for Benefits.—Written notice of a denial made
under an initial claim for benefits shall be issued to the participant, beneficiary, or en-
rollee (or authorized representative) and the

(1) Right to Initial Appeal.—

(A) In general.—A participant, bene-
ficiary, or enrollee (or authorized represent-
ative) may appeal any denial of a claim for
benefits under section 102 within the proce-
dures described in this section.

(B) Time for Appeal.—

(1) IN GENERAL.—(A) In the case of

such care, the plan or issuer must provide by tele-
phone and in printed form notice of the con-
current review determination to the indi-
vidual or the individual’s designee and the
individual’s health care provider in accord-
ance with the medical exigencies of the case and as soon as possible, with sufficient time
prior to the termination or reduction to allow for an appeal under section 103(b)(3) to be
concluded, prior to the termination or redu-
tion takes effect.

(II) CONTENTS OF NOTICE.—Such notice
shall include, with respect to ongoing health
services approved, the number of total of
approved services, the date of onset of services, and the next review date, if any, as well as a
statement in the individual’s rights to fur-
ther appeal.

(iii) Rule of construction.—Clause (i)
shall not be construed as requiring plans or
issuers to provide coverage of care that
would exceed the coverage limitations for
such care.

(2) Retrospective Determination.—A group health plan, or health insurance issuer
offering health insurance coverage, shall make a retrospective determination on a
claim for benefits in accordance with the medical exigencies of the case and as soon as possible, but not later than 30 days after the
date on which the plan or issuer receives in-
formation that is reasonably necessary to enable the plan or issuer to make a determination on the claim, or, if earlier, 60 days
after the date of receipt of the claim for ben-
efits.
(C) ONGOING CARE DETERMINATIONS.—
(1) Subject to clauses (ii), in the case of a concurrent review determination described in section 102(b)(1)(C)(1)(i), which results in a termination or reduction of such care, the plan or issuer must provide notice of the determination on the appeal under this section by telephone and in printed form to the individual and the individual's health care provider in accordance with the medical exigencies of the case and as soon as possible, with sufficient time prior to the termination or reduction of coverage for an external appeal under section 104 to be completed before the termination or reduction takes effect.

(ii) RULE OF CONSTRUCTION.—Clause (i) shall not be construed as requiring plans or issuers to provide coverage of care that would exceed the coverage limitations for such care.

(4) RETROSPECTIVE DETERMINATION.—A group health plan, or health insurance issuer offering health insurance coverage, shall make a retrospective determination on an appeal of a denial of benefits if more than 30 days after the date on which the plan or issuer receives necessary information that is reasonably necessary to enable the plan or issuer to make the determination of the appeal and in no case later than 60 days after the date the request for the appeal is received.

(c) CONDUCT OF REVIEW.—
(1) IN GENERAL.—A review of a denial of a claim for benefits under this section shall be conducted by an individual with appropriate expertise who was not involved in the initial determination.

(2) PEER REVIEW OF MEDICAL DECISIONS BY HEALTH CARE PROFESSIONALS.—A review of an appeal of a denial of a claim for benefits that is based on a lack of medical necessity and appropriateness, or based on an experimental or investigational treatment, or requires an evaluation of medical facts—
(A) shall be made by a physician (allopathic or osteopathic); or
(B) in a claim for benefits provided by a non-physician health professional, shall be made by reviewers (including at least one practicing non-physician health professional of the same or similar specialty; with appropriate expertise (including, in the case of a child, appropriate pediatric expertise) and the treating health care professional in accordance with the medical exigencies of the case and as soon as possible, but in no case later than 2 days after the date of completion of the review (or, in the case described in subparagraph (B) or (C) of subsection (b)(3), within the 72-hour or applicable period referred to in such section).

(d) NOTICE OF DETERMINATION.—
(1) IN GENERAL.—Written notice of a determination made under an internal appeal of a denial of a claim for benefits shall be issued to the participant, beneficiary, or enrollee (or authorized representative) and the treating health care professional in accordance with the medical exigencies of the case and as soon as possible, but in no case later than 2 days after the date of completion of the review (or, in the case described in subparagraph (B) or (C) of subsection (b)(3), within the 72-hour or applicable period referred to in such section).

(2) FINAL DETERMINATION.—The decision by a plan or issuer under this section shall be treated as the final determination of the plan or issuer of a denial of a claim for benefits. The failure of a plan or issuer to issue a determination on an appeal of a denial of a claim for benefits under this section within the 60-day period established for such a determination shall be treated as a final determination on an appeal of a denial of a claim for benefits for purposes of proceeding to external review (and (A) may be made orally. A group health plan, or health insurance issuer offering health insurance coverage, shall not be construed as requiring plans or issuers to provide written confirmation of such request in a timely manner on a form prescribed by the plan or issuer upon written confirmation shall be treated as a consent for purposes of subparagraph (A)(i). In the case of such an oral request for such a review, the making of the request (and the timing of such request) shall be treated as the making at that time of a request for such an external review without regard to the time that would otherwise have been required for the request.

(3) REQUIREMENTS OF NOTICE.—With respect to a determination made under this section, the notice described in paragraph (1) shall be provided in printed form and written in a language understandable by the participant, beneficiary, or enrollee and shall include—
(A) the specific reasons for the determination (including a summary of the clinical or scientific evidence used in making the determination);
(B) procedures for obtaining additional information concerning the determination; and
(C) notification of the right to an independent external review under section 104 and instructions on how to initiate such a review.

SEC. 104. INDEPENDENT EXTERNAL APPEALS PROCEDURES.

(a) RIGHT TO EXTERNAL APPEAL.—A group health plan, and a health insurance issuer offering health insurance coverage, shall provide written notice of a denial of a claim for benefits to the participant, beneficiary, and enrollee (or authorized representative) with access to an independent external review for any denial of a claim for benefits.

(b) INITIATION OF THE INDEPENDENT EXTERNAL REVIEW PROCESS.—
(1) TIME TO FILE.—A request for an independent external review conducted under this section shall be filed with the plan or issuer not later than 180 days after the date on which the participant, beneficiary, or enrollee receives notice of the denial of a claim for benefits under section 103(d)(4) or notice of waiver of internal review under section 103(a)(4) or the date on which the plan or issuer has failed to make a timely decision under (2) and notifies the participant or beneficiary that it has failed to make a timely decision and that the beneficiary must file an appeal with an external review entity within 180 days if the participant or beneficiary desires to file such an appeal.

(2) FILING OF REQUEST.—
(A) IN GENERAL.—Upon the filing of a request for independent external review under this section, the plan or issuer shall—
(i) provide the participant, beneficiary, or enrollee with a copy of the notice described in paragraph (1); and
(ii) the denial of the claim for benefits does not exceed the coverage limitations for any of the conditions described in clause (i) or (ii) of subsection (b)(2)(A).

(B) REQUIREMENTS AND EXCEPTION RELATING TO GENERAL RULE.—
(1) ORAL REQUESTS PERMITTED IN EXPEDITED OR CONCURRENT CASES.—In the case of an expedited or concurrent external review as provided for under subsection (e), the request may be made orally. A group health plan, or health insurance issuer offering health insurance coverage, shall provide written confirmation of such request in a timely manner on a form prescribed by the plan or issuer upon written confirmation shall be treated as a consent for purposes of subparagraph (A)(i). In the case of such an oral request for such a review, the making of the request (and the timing of such request) shall be treated as the making at that time of a request for such an external review without regard to the time that would otherwise have been required for the request.

(2) EXCEPTION TO FILING PER REQUIREMENT OF INDIGENCY.—Payment of a filing fee shall not be required under subparagraph (A)(iv) where there is a certification (in a form and manner specified in guidelines established by the appropriate Secretary) that the participant, beneficiary, or enrollee is indigent (as defined in such guidelines).

(c) REFERRAL TO QUALIFIED EXTERNAL REVIEW ENTITY UPON REQUEST.—
(1) IN GENERAL.—Upon the filing of a request for independent external review with the group health plan, or health insurance issuer offering health insurance coverage, the plan or issuer shall immediately refer such request, and forward the plan or issuer’s initial decision (including the information described in section 103(d)(3)(A)), to a qualified external review entity selected in accordance with this section.

(2) ACCESS TO PLAN OR ISSUER AND HEALTH PROFESSIONAL INFORMATION.—With respect to an independent external review conducted under this section, the plan or issuer, the participant, beneficiary, or enrollee (or authorized representative), the plan or issuer, and the treating health care professional (if any) shall provide the external review entity with information that is necessary to conduct a review under this section, as determined and requested by the entity. Such information shall be provided not later than 5 days after the date on which the request for information is received, or, in a case described in clause (i) or (ii) of subsection (e)(1)(A), by such earlier time as may be necessary to comply with the applicable timeline under such clause.

(3) SCREENING OF REQUESTS BY QUALIFIED EXTERNAL REVIEW ENTITIES.—
(A) IN GENERAL.—With respect to a request referred to a qualified external review entity under subsection (b), if the request is for a denial of a claim for benefits, the entity shall refer such request for the conduct of an independent medical review unless the entity determines that—
(i) any of the conditions described in clauses (i) or (ii) of subsection (b)(2)(A) have not been met;
(ii) the denial of the claim for benefits does not involve a medically reviewable decision under subsection (d)(2);
the item or service for which the claim is independent medical review if the benefit for such determination.

(iii) Denials otherwise based on an evaluation of medical facts—A determination that the item or service or condition is not covered based on grounds that require an evaluation of the medical facts by a health care professional in the specific case involved to determine the coverage and extent of coverage of the item or service or condition.

(iv) The plan or coverage document.

(E) Independent determination.—In making determinations under this section, a qualified external review entity and an independent medical reviewer shall:

(i) Consider the claim under review without deference to the determinations made by the plan or issuer of the recommendation of the treating health care professional (if any); and

(ii) Consider, but not be bound by the definition used by the plan or issuer of ‘‘medically necessary and appropriate’’, or ‘‘experimental or investigational’’, or other substantially equivalent terms that are used by the plan or issuer to describe medical necessity and appropriateness or experimental or investigational nature or condition.

(f) Determination of independent medical reviewer.—An independent medical reviewer shall, in accordance with the deadline described in subsection (e), prepare a written determination to uphold, reverse, or modify the denial under review. Such written determination shall include:

(A) The determination of the reviewer;

(B) The specific reasons for the determination, including a summary of the clinical or scientific evidence used in making the determination;

(C) With respect to a determination to reverse or modify the denial under review, a timeframe within which the plan or issuer must comply with such determination.

(g) Nonbinding nature of additional recommendations.—In addition to the determination under subparagraph (F), the reviewer may provide the plan or issuer and the treating health care professional with additional recommendations in connection with a decision. Any such recommendations shall not affect (or be treated as part of) the determination and shall not be binding on the plan or issuer.

(2) Timelines and notifications.—

(A) Prior authorization determination.—In general.—The independent medical reviewer (or reviewers) shall make a determination on a denial of a claim for benefits that is referred to the reviewer under subsection (c)(3) in accordance with the following timelines, except that the timelines described in clause (i) would seriously jeopardize the life or health of the participant.
beneficiary, or enrollee or the ability of the participant, beneficiary, or enrollee to maintain or regain maximum function. Such determination shall be made as soon in accordance with the medical exigencies of the case and as soon as possible, but in no case later than 72 hours after the time the request for external review is received by the qualified external review entity.

(ii) COMPLIANCE WITH DETERMINATION.—Notwithstanding clause (i), in the case of a review described in such subclause that involves a termination or reduction of care, the reviewing determination shall be completed not later than 24 hours after the time the request for external review is received by the qualified external review entity and before the end of the approved period of care.

(B) RETROSPECTIVE DETERMINATION.—The independent medical reviewer (or reviewers) shall complete a review in the case of a retroactive determination on an appeal of a denial of a claim for benefits that is referred to the reviewer under subsection (c)(3) in no case later than 60 days after the date the request for external review is received by the qualified external review entity.

(2) NOTIFICATION OF DETERMINATION.—The external review entity shall ensure that the plan or issuer, the participant, beneficiary, or enrollee (or authorized representative) and the treating health care professional (if any) receives a copy of the written determination of the independent medical reviewer prepared under subsection (d)(3) not later than 60 days after the date the request for external review is received by the qualified external review entity.

(3) FORM OF NOTICES.—Determinations and notices under this subsection shall be written in a manner calculated to be understood by a participant.

(f) COMPLIANCE.—

(1) APPLICATION OF DETERMINATIONS.—

(A) WRITTEN DETERMINATIONS BINDING ON PLAN.—The determinations of an external review entity and an independent medical reviewer under this section shall be binding upon the plan or issuer involved.

(B) COMPLIANCE WITH DETERMINATION.—If the determination of an independent medical reviewer is to reverse or modify the denial, the plan or issuer, upon the receipt of such determination, shall authorize coverage to comply with the medical reviewer’s determination in accordance with the timeframe established by the medical reviewer.

(2) FAILURE TO COMPLY.—

(A) IN GENERAL.—If a plan or issuer fails to comply with the timeframe established under paragraph (1)(B) with respect to a participant, beneficiary, or enrollee, where such failure to comply is caused by the plan or issuer, the participant, beneficiary, or enrollee may obtain the items or services (in a manner consistent with the determination of the independent external reviewer) from any provider regardless of whether the provider is a participating provider under the plan or coverage.

(B) REIMBURSEMENT.—

(i) IN GENERAL.—Where a participant, beneficiary, or enrollee seeks reimbursement of the costs of such items or services, the plan or issuer involved shall authorize such reimbursement to the treating health care professional or to the participant, beneficiary, or enrollee (in the case of a participant, beneficiary, or enrollee who pays for the costs of such items or services).

(ii) AMOUNT.—The plan or issuer shall fully reimburse a professional, participant, beneficiary, or enrollee under clause (i) for the reasonable cost of the items or services that were provided (regardless of any plan limitations that may apply to the coverage of such items or services) as long as the items or services were provided in a manner consistent with the determination of the independent medical reviewer.

(C) FAILURE TO REIMBURSE.—Where a plan or issuer fails to provide reimbursement to a professional, participant, beneficiary, or enrollee in accordance with this paragraph, the professional, participant, beneficiary, or enrollee may commence a civil action (or utilize other remedies available under law) to recover only the amount of any such reimbursement that is owed by the plan or issuer and any necessary legal costs or expenses (including attorney’s fees) incurred in recovering such reimbursement.

(D) AVAILABLE REMEDIES.—The remedies provided under this paragraph are in addition to any other available remedies.

(g) PENALTIES AGAINST AUTHORIZED OFFICIALS FOR DENIAL OF AN EXTERNAL REVIEW ENTITY.—

(A) MONETARY PENALTIES.—

(1) IN GENERAL.—In any case in which the determination of an external review entity is not followed by a group health plan, or by a health insurance issuer offering health insurance coverage, any person who, acting in the capacity of authorizing a benefit determined by an external medical reviewer under subsection (c), the participant, beneficiary, or enrollee involved.

(2) ADDITIONAL PENALTY FOR FAILING TO FOLLOW TIMELINE.—In any case in which a plan or issuer fails to provide reimbursement to a professional, participant, beneficiary, or enrollee in accordance with this paragraph, the plan or issuer shall fully reimburse a professional, participant, beneficiary, or enrollee for the reasonable cost of the items or services that were provided (regardless of any plan limitations that may apply to the coverage of such items or services) as long as the items or services were provided in a manner consistent with the determination of the independent medical reviewer.

(B) RETROSPECTIVE DETERMINATION.—The determining determination of an external review entity is not followed by a group health plan, or by a health insurance issuer offering health insurance coverage, any person who, acting in the capacity of authorizing a benefit determined by an external medical reviewer under subsection (c), the participant, beneficiary, or enrollee involved.

(C) INDEPENDENCE.—

(i) IN GENERAL.—Subject to paragraph (B), each independent medical reviewer in a group health plan, or a health insurance issuer offering health insurance coverage, in which a plaintiff alleges that a person responsible under the applicable State or Federal law (including sections 502 and 503 of the Employee Retirement Income Security Act of 1974), including the right to file judicial actions to enforce rights.

(g) QUALIFICATIONS OF INDEPENDENT MEDICAL REVIEWERS.—In referring a denial to 1 or more individuals to conduct independent medical review under subsection (c), the qualified external review entity shall ensure that—

(A) each independent medical reviewer meets the qualifications described in paragraphs (2) and (3); and

(B) each independent medical reviewer is a physician (allopathic or osteopathic) or health care professional who—

(A) is appropriately credentialled or licensed in 1 or more States to deliver health care services; and

(B) typically treats the condition, makes the diagnosis, or provides the type of treatment under review.

(3) INDEPENDENCE.—

(A) IN GENERAL.—Subject to subparagraph (B), each independent medical reviewer in a case shall—

(i) not be a related party (as defined in paragraph (7)); and

(ii) not have a material familial, financial, or professional relationship with such a party; and

(B) EXCEPTION.—Nothing in subparagraph (A) shall be construed to—

(i) prohibit an individual, solely on the basis of affiliation with the plan or issuer,
(C) The health care professional that provides the items or services involved in the denial.

(D) The institution at which the items or services (or treatment) involved in the denial are provided.

(E) The manufacturer of any drug or other item that is included in the items or services involved in the denial.

(F) Any other party determined under any regulations to have a substantial interest in the denial involved.

(h) QUALIFIED EXTERNAL REVIEW ENTITIES.—

(1) SELECTION OF QUALIFIED EXTERNAL REVIEW ENTITIES.—The appropriate Secretary shall implement procedures—

(i) to assure that the selection process among qualified external review entities will not create any incentives for external review entities to make a decision in a biased manner; and

(ii) for auditing a sample of decisions by such entities to assure that such decisions are made in a unbiased manner.

Such no selection process under the procedures implemented by the appropriate Secretary may give either the plan or issuer to an independent medical reviewer in connection with a re-

view, including the provision of items or services—

(A) by a physician, a reviewer shall be a practicing physician (allopathic or osteopathic) of the same or similar specialty, as a physician who, acting within the appropriate scope of practice within the State where the service is provided or rendered, typically treats the condition, makes the diagnosis, or provides the type of treatment under review; or

(B) by a non-physician health care professional, a reviewer (or reviewers) shall include at least one practicing non-physician health care professional of the same or similar specialty as the non-physician health care professional who, acting within the appropriate scope of practice within the State where the service is provided or rendered, typically treats the condition, makes the diagnosis, or provides the type of treatment under review; or

(C) not exceed a reasonable level; and

(D) not be contingent on the decision rendered by the reviewer.

(6) LIMITATIONS ON REVIEWER COMPENSATION.—Compensation provided by a qualified external review entity to an independent medical reviewer in connection with a review under this section shall—

(A) be consistent with the standards and criteria established by the appropriate Secretary to assure there is no real or apparent conflict of interest in the conduct of external review activities; and

(B) provide that the costs of the external review process shall be borne by the plan or issuer.

(7) RELATED PARTY DEFINED.—For purposes of this section, the term "related party" means, with respect to a related health care professional, that the individual provides health care services to individual patients on average at least 2 days per week.

(8) PEDIATRIC EXPERTISE.—In the case of an external review relating to a child, a reviewer shall have expertise under paragraph (2) in pediatrics.

From serving as an independent medical reviewer:

(1) a non-affiliated individual is not reasonably available;

(II) the affiliated individual is not involved in the provision of items or services in the case under review;

(III) the fact of such an affiliation is disclosed to the plan or issuer and the participating, beneficiary, or enrollee (or authorized representative) and neither party objects; and

(IV) the affiliated individual is not an employee of the plan or issuer and does not provide services exclusively or primarily to or on behalf of the plan or issuer;

(ii) prohibit an individual who has staff privileges at the institution where the treatment in question is provided with respect to an individual who is not a related party (as defined in subparagraph (C)) as meeting the requirements of subparagraph (B) as meeting the requirements of subparagraph (C).

The terms and conditions of a contract under paragraph (2) shall—

(A) not exceed a reasonable level; and

(B) not be contingent on the decision rendered by the reviewer.

(7) LIMITATIONS ON REVIEWER COMPENSATION.—Compensation provided by a qualified external review entity to an independent medical reviewer in connection with a review under this section shall—

(A) be consistent with the standards and criteria established by the appropriate Secretary to assure there is no real or apparent conflict of interest in the conduct of external review activities; and

(B) provide that the costs of the external review process shall be borne by the plan or issuer.

Subparagraph (B) shall not be construed as applying to the imposition of a filing fee under subsection (b)(2)(A)(v) or costs incurred by the participant, beneficiary, or enrollee (or authorized representative) or treating health care professional (if any) in support of the review, including the provision of additional evidence or information.

(4) QUALIFICATIONS.—

(A) IN GENERAL.—In this section, the term "qualified external review entity" means, in relation to a plan or issuer, an entity that is initially certified (and periodically recertified) under paragraph (4)(A) as meeting the following requirements:

(i) The entity has (directly or through contracts or other arrangements) sufficient medical, legal, and other expertise and sufficient staff and organizational capacity to perform the functions of a qualified external review entity under this section on a timely basis, including making determinations under subsection (b)(2)(A) and providing for independent medical reviews under subsection (d).

(ii) The entity is not a plan or issuer or an affiliate of a plan or issuer, and is not an affiliate or trade association of plans or issuers or of health care providers.

(iii) The entity has provided assurances that it will conduct external review activities consistent with the applicable requirements of this section and standards specified in subparagraph (C), including that it will not conduct any external review activities in a case unless the independence requirements of subparagraph (B) are met with respect to the case.

(iv) The entity has provided assurances that it will provide information in a timely manner under subparagraph (D).

(v) The entity meets such other requirements as the appropriate Secretary provides by regulation.

(B) INDEPENDENCE REQUIREMENTS.—

(i) IN GENERAL.—Subject to clause (ii), an entity meets the independence requirements of this subparagraph with respect to any case if the entity—

(I) is not a related party (as defined in subsection (g)(7));

(II) does not have a material familial, financial, or professional relationship with such a party; and

(III) does not otherwise have a conflict of interest with such a party (as determined under regulations).

(ii) EXCEPTION FOR REASONABLE COMPENSATION.—Nothing in clause (i) shall be construed to prohibit receipt by a qualified external review entity of compensation from a plan or issuer for performing external review activities under this section if the compensation is provided consistent with clause (iii).

(iii) LIMITATIONS ON ENTITY COMPENSATION.—Compensation provided by a plan or issuer to a qualified external review entity in connection with reviews under this section shall—

(I) not exceed a reasonable level; and

(II) not be contingent on any decision rendered by the entity or by any independent medical reviewer.

(C) CERTIFICATION AND RECERTIFICATION PROCESS.—

(i) IN GENERAL.—The initial certification and recertification of a qualified external review entity shall be made—

(I) under a process that is recognized or approved by the appropriate Secretary; or

(II) by a qualified private standard-setting organization that is approved by the appropriate Secretary under clause (iii).

In taking action under clause (i), the appropriate Secretary shall give deference to entities that are under contract with the Federal Government or with an applicable State authority to perform functions of the type performed by qualified external review entities.

(ii) PROCESS.—The appropriate Secretary shall not recognize or approve a process under clause (i)(I) unless the process applies standards (as promulgated in regulations) that ensure that a qualified external review entity—

(I) will carry out (and has carried out, in the case of recertification) the responsibilities of such an entity in accordance with this section, including meeting applicable deadlines; and

(II) will meet (and has met, in the case of recertification) appropriate indicators of fiscal integrity;
(III) will maintain (and has maintained, in the case of a State) a plan or coverage described in subparagraphs (C) and (D); (vi) LIMITATION.—No qualified external review entity having a contract with a plan or issuer, and no person who is employed by any such entity or who furnishes services for such entity (including as an independent medical reviewer), shall be held by reason of the performance of any duty, function, or activity required or authorized pursuant to this section, to be civilly liable under any law of the United States or of any State (or political subdivision thereof) if there was no actual malice or gross misconduct in the performance of such duty, function, or activity.

(5) REPORT.—Not later than 12 months after the general effective date referred to in section 501, the General Accounting Office shall prepare and submit to the appropriate committees of Congress a report concerning—

(A) the information that is provided under paragraph (3)(D);

(B) the number of denials that have been upheld by independent medical reviewers and the number that have been reversed by such reviewers; and

(C) the extent to which independent medical reviewers are required to provide coverage for benefits that are specifically excluded under the plan or coverage.

SEC. 105. HEALTH CARE CONSUMER ASSISTANCE FUND.

(a) GRANTS.—

(1) IN GENERAL.—The Secretary of Health and Human Services shall provide a grant to a State under a grant under this subsection (as the "Secretary") shall establish a Health Care Consumer Assistance Fund, to be used to award grants to eligible States to carry out consumer assistance activities (including programs established by States prior to the enactment of this Act) designed to provide information, assistance, and referrals to consumers of health insurance products.

(2) ELIGIBILITY.—To be eligible to receive a grant under this subsection a State shall prepare and submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a State plan that describes—

(A) the manner in which the State will ensure that consumers have direct access to consumer assistance personnel during regular business hours;

(B) the manner in which the State will oversee the health care consumer assistance office, its activities, product materials and evaluation program (including any evaluation conducted by States prior to the enactment of this Act); and

(C) the extent to which independent medical reviewers are required to provide coverage for benefits that are specifically excluded under the plan or coverage.

SEC. 106. HEALTH CARE CONSUMER ASSISTANCE FUND.

(a) GRANTS.—

(1) IN GENERAL.—The Secretary of Health and Human Services (referred to in this section as the "Secretary") shall establish a Health Care Consumer Assistance Fund, to be used to award grants to eligible States to carry out consumer assistance activities (including programs established by States prior to the enactment of this Act) designed to provide information, assistance, and referrals to consumers of health insurance products.

(2) ELIGIBILITY.—To be eligible to receive a grant under this subsection a State shall prepare and submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a State plan that describes—

(A) the manner in which the State will ensure that consumers have direct access to consumer assistance personnel during regular business hours;

(B) the manner in which the State will oversee the health care consumer assistance office, its activities, product materials and evaluation program (including any evaluation conducted by States prior to the enactment of this Act); and

(C) the extent to which independent medical reviewers are required to provide coverage for benefits that are specifically excluded under the plan or coverage.

SEC. 105. HEALTH CARE CONSUMER ASSISTANCE FUND.

(a) GRANTS.—

(1) IN GENERAL.—The Secretary of Health and Human Services (referred to in this section as the "Secretary") shall establish a Health Care Consumer Assistance Fund, to be used to award grants to eligible States to carry out consumer assistance activities (including programs established by States prior to the enactment of this Act) designed to provide information, assistance, and referrals to consumers of health insurance products.

(2) ELIGIBILITY.—To be eligible to receive a grant under this subsection a State shall prepare and submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a State plan that describes—

(A) the manner in which the State will ensure that consumers have direct access to consumer assistance personnel during regular business hours;

(B) the manner in which the State will oversee the health care consumer assistance office, its activities, product materials and evaluation program (including any evaluation conducted by States prior to the enactment of this Act); and

(C) the extent to which independent medical reviewers are required to provide coverage for benefits that are specifically excluded under the plan or coverage.

SEC. 105. HEALTH CARE CONSUMER ASSISTANCE FUND.

(a) GRANTS.—

(1) IN GENERAL.—The Secretary of Health and Human Services (referred to in this section as the "Secretary") shall establish a Health Care Consumer Assistance Fund, to be used to award grants to eligible States to carry out consumer assistance activities (including programs established by States prior to the enactment of this Act) designed to provide information, assistance, and referrals to consumers of health insurance products.

(2) ELIGIBILITY.—To be eligible to receive a grant under this subsection a State shall prepare and submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a State plan that describes—

(A) the manner in which the State will ensure that consumers have direct access to consumer assistance personnel during regular business hours;

(B) the manner in which the State will oversee the health care consumer assistance office, its activities, product materials and evaluation program (including any evaluation conducted by States prior to the enactment of this Act); and

(C) the extent to which independent medical reviewers are required to provide coverage for benefits that are specifically excluded under the plan or coverage.
shall, directly or through a contract with an independent entity, have for at least one year demonstrated experience in serving the needs of health care consumers, provide for the establishment and operation of a State health care consumer assistance office.

(b) Eligibility or poverty.—To be eligible to enter into a contract under subparagraph (A), an entity shall demonstrate that it has the technical, organizational, and professional capacity to deliver the services described in subsection (b) to all public and private health insurance participants, beneficiaries, or enrollees.

(C) EXISTING STATE ENTITY.—Nothing in this section shall prevent the funding of an existing health care consumer assistance program that otherwise meets the requirements of this section.

(b) USE OF FUNDS.—

(1) BY STATE.—A State shall use amounts provided under this grant award to carry out the following activities:

(A) the operation of a toll-free telephone hotline to respond to consumer requests;

(B) the coordination of state educational materials on available health insurance products and on how best to access health care services; and

(C) the provision of education on effective ways to obtain health care services, or the refusal to pay for such services, to enrollees.

(2) BY PROVIDER.—An entity that directly establishes a health care consumer assistance program for enrollees, enrollees, or beneficiaries of the office and that the entity is independent of the State shall ensure that:

(A) the office establishes and implements procedures and protocols to ensure the confidentiality of all information shared by a participant, beneficiary, or enrollee of a State health insurance issuer or group health plan for the additional cost of the creation and maintenance of the option described in subsection (a)(3), the amount of any additional premium charged by the health insurance issuer in the group market.

(b) ADDITIONAL COSTS.—The amount of any additional premium charged by the health insurance issuer group health plan for the additional cost of the creation and maintenance of the option described in subsection (a)(3), the amount of any additional premium charged by the health insurance issuer in the group market.

(b) CONTRACT ENTITY.—In the case of an entity that enters into a contract with a State under subsection (a)(3), the entity shall provide assurances that the entity has no conflict of interest in carrying out the activities of the office and that the entity is independent of group health plans, health insurance issuers, providers, and enrollees of health care consumers.

(c) OPEN SEASON.—An enrollee, participant, or beneficiary, may change to the offering provided under this section any time during a time period determined by the health insurance issuer or group health plan.

SEC. 112. CHOICE OF HEALTH CARE PROFESSIONAL.

(a) PRIMARY CARE.—If a group health plan, or a health insurance issuer that offers health insurance coverage, requires or provides for designation by a participant, beneficiary, or enrollee of a participating primary care provider, then the plan or issuer shall permit each participant, beneficiary, or enrollee to designate any participating primary care provider who is available to accept such individual.

(b) SPECIALISTS.—

(1) IN GENERAL.—Subject to paragraph (2), a group health plan and a health insurance issuer that offers health insurance coverage, requires or provides for designation by a participant, beneficiary, or enrollee of a participating specialist care provider, then the plan or issuer shall permit each participant, beneficiary, or enrollee to designate any participating specialist care provider who is available to accept such individual.

(b) LIMITATION.—Paragraph (1) shall not apply to specialty care if the plan or issuer clearly informs participants, beneficiaries, enrollees and health plans of appropriate referral procedures from any qualified participating health care professional who is available to accept such individual.

(c) CONSTRUCTION.—Nothing in this subsection shall be construed as affecting the application of section 114 (relating to access to specialty care).
CONGRESSIONAL RECORD—SENATE  July 9, 2001

SEC. 113. ACCESS TO EMERGENCY CARE.

(a) EMERGENCY SERVICES.—

(1) IN GENERAL.—If a group health plan, or health insurance coverage offered by a health insurance issuer, provides or covers any benefit with respect to services in an emergency department of a hospital, the plan or issuer shall cover emergency ambulance services (as defined in paragraph (2)(B)) furnished under the plan or coverage under the same terms and conditions as apply with respect to other services (D) of subsection (a)(1) under which coverage is provided for emergency services.

(2) EMERGENCY AMBULANCE SERVICES.—For purposes of this section, the term ‘emergency ambulance services’ means ambulance services (as defined for purposes of section 1861(s)(7) of the Social Security Act) furnished or covered by a health insurance issuer on emergency medical condition (as defined in subsection (a)(2)(A)) to a hospital for the receipt of emergency services (as defined in subsection (a)(2)(B)) in a case in which the emergency services are covered under the plan or coverage pursuant to subsection (a)(1) and a prudent layperson, with an average knowledge of health and medicine, could reasonably expect that the absence of such transport would result in placing the health of the individual in serious jeopardy, see insubstantial impairment of bodily function, or serious dysfunction of any bodily organ or part.

(b) TIMELY ACCESS.—

(1) IN GENERAL.—A group health plan or health insurance issuer offering health insurance coverage shall ensure that participants, beneficiaries, and enrollees receive timely access to specialists who are appropriate to the condition of, and accessible to, the participant, beneficiary, or enrollee, when such specialty care is a covered benefit under the plan or coverage.

(2) RULE OF CONSTRUCTION.—Nothing in paragraph (1) shall be construed—

(A) to require the coverage under a group health plan or health insurance coverage of benefits or services;

(B) to prohibit a plan or issuer from including providers in the network only to the extent necessary to meet the needs of the plan’s or issuer’s participants, beneficiaries, or enrollees; or

(C) to override any State licensure or scope-of-practice law.

(3) ACCESS TO CERTAIN PROVIDERS.—

(A) IN GENERAL.—With respect to specialty care under this section, if a participating specialist may authorize such referrals, procedures, tests, and other medical services with respect to such condition, or coordinate the care for such condition, subject to the terms of a treatment plan (if any) referred to in subsection (c) with respect to the condition.

(B) ONGOING SPECIAL CONDITION DEFINED.—In this subsection, the term ‘ongoing special condition’ means a condition or disease that—

(i) is life-threatening, degenerative, potentially disabling, or congenital; and

(ii) requires specialized medical care over a prolonged period of time.

(c) TREATMENT PLANS.—

(1) IN GENERAL.—A group health plan or health insurance issuer may require that the specialty care be provided when the plan or issuer determines that—

(A) pursuant to a treatment plan, but only if the treatment plan—

(i) is developed by the specialist, in consultation with the case manager or primary care provider, and the participant, beneficiary, or enrollee, and

(ii) is approved by the plan or issuer in a timely manner, if the plan or issuer requires such approval; and

(B) in accordance with applicable quality assurance and utilization review standards of the plan or issuer.

(2) NOTIFICATION.—Nothing in paragraph (1) shall be construed as prohibiting a plan or issuer from requiring the specialist to provide high quality care in treating the condition.

(d) SPECIALIST DEFINED.—For purposes of this section, the term ‘specialist’ means, with respect to the condition of the participant, beneficiary, or enrollee, a health care provider, facility, or center that has adequate expertise through appropriate training and experience (including, in the case of a child, appropriate pediatric expertise) to provide high quality care in treating the condition.

SEC. 115. PATIENT ACCESS TO OBSTETRICAL AND GYNECOLOGICAL CARE.

(a) GENERAL RIGHTS.—

(1) DIRECT ACCESS.—A group health plan, or health insurance issuer offering health insurance coverage, described in subsection (b), may not require authorization or referral by the plan, issuer, or any person (including a primary care provider described in subsection (b)(2)) in the case of a female participant, beneficiary, or enrollee who offers coverage for obstetrical or gynecological care provided by a participating health care professional who specializes in obstetrics or gynecology.

(2) OBSTETRICAL AND GYNECOLOGICAL CARE.—A group health plan or health insurance issuer described in subsection (b) shall not require the provision of obstetrical and gynecological care, and the ordering of related obstetrical and gynecological items and services, pursuant to the direct access described in paragraph (1), by participating health care professional who specializes in obstetrics or gynecology and who is authorized by the primary care provider to perform such services.

(b) APPLICATION OF SUBSECTION.—A group health plan, or health insurance issuer offering health insurance coverage, described in subsection (a), may not require authorization or referral by the plan, issuer, or any person (including a primary care provider described in subsection (b)(2)) in the case of a female participant, beneficiary, or enrollee who offers coverage for obstetrical or gynecological care provided by a participating health care professional who specializes in obstetrics or gynecology and who is authorized by the primary care provider to perform such services.
work of the plan or issuer.

(2) prov
vider if such provider participates in the net-

tion of a participating primary care provider

for the child, the plan or issuer shall permit

cess or a health care provider is terminated (as de-

health insurance coverage, and a treating

sions of the plan or health insurance cov-

sions of coverage under the terms and condi-

s role of such notice; (C) is scheduled to undergo non-elective

s to the provider at the time of such notice;

(D) is pregnant and undergoing a course of

er with respect to coverage of pediatric care.

or the date of completion of reasonable follow-up

care patient described in subsection (a)(4)(D) shall

nences of treatment by such provider's consent during a

or coverage after the date of the termination

of the contract with the group health plan or

health insurance issuer) and not to impose

tinary care; and

(2) requires the designation by a partici-

ant, beneficiary, or enrollee of a partici-

ating primary care provider.

(c) CONSTRUCTION.—Nothing in subsection

shall be construed to—

(1) waive any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

(2) preclude the group health plan or health insurance issuer involved from requiring the notify the primary care health care professional or the plan or issuer of treatment decisions.

SEC. 116. CONTINUITY OF CARE.

(a) PEDIATRIC CARE.—In the case of a person

who has a child who is a participant, beneficiary, or enrollee under a group health plan, or a health insurance issuer, if the plan or issuer requires or provides for the designa-

tion of a participating primary care provider for the child, the plan or issuer shall permit such person to designate a physician (allopathic or osteopathic) who specializes in pediatrics as the child's primary care provider.

(b) EFFECT OF TERMINATION OF CONTRACT WITH HEALTH INSURANCE ISSUER.—If a contract for the provision of health insurance coverage under a group health plan and a health insurance issuer is terminated and, as a result of such termination, coverage of services of a health care provider is terminated with respect to an individual, the provisions of paragraph (1) and the succeeding provisions of this section shall apply under the plan in the same manner as if there had been a contract between the plan and the provider that had been terminated, but only with respect to benefits that are covered under the plan after the contract termination.

(3) REQUIREMENTS.—The requirements of this paragraph are that the plan or issuer—

(A) notify the continuing care patient in-

stance of any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

(B) provide to such plan or issuer necessary medical information related to the care provided.

The treating health care provider agrees otherwise to adhere to such plan's or issuer's policies and procedures, including procedures regarding referrals and obtaining prior authorization and providing services pursuant to a treatment plan (if any) approved by the plan or issuer.

(d) RULES OF CONSTRUCTION.—Nothing in this section shall be construed—

(A) to require the continuation of coverage of benefits which would not have been covered if the provider remained a participating provider; or

(B) with respect to the termination of a contract under subsection (a) to prevent a group health plan or health insurance issuer from requiring that the health care provider—

(A) notify participants, beneficiaries, or enrollees of their rights under this section; or

(B) provide the plan or issuer with the name of each participant, beneficiary, or enrollee who the provider believes is a continuing care patient.

SEC. 117. CONTINUITY OF CARE.

(a) TERMINATION OF PROVIDER.—

(1) IN GENERAL.—(A) A contract between a group health plan, or a health insurance issuer offering health insurance coverage, and a treating health care provider is terminated (as defined in paragraph (e)(4)), or

(B) benefits or coverage provided by a health care provider are terminated because of a determination of non-participation of such provider participation in such plan or coverage, the plan or issuer shall meet the require-

ments of paragraph (3) with respect to each continu-

ing care patient.

(2) TREATMENT OF TERMINATION OF CONTRACT WITH HEALTH INSURANCE ISSUER.—If a contract for the provision of health insurance coverage under a group health plan and a health insurance issuer is terminated and, as a result of such termination, coverage of services of a health care provider is terminated with respect to an individual, the provisions of paragraph (1) and the succeeding provisions of this section shall apply under the plan in the same manner as if there had been a contract between the plan and the provider that had been terminated, but only with respect to benefits that are covered under the plan after the contract termination.

(3) REQUIREMENTS.—The requirements of this paragraph are that the plan or issuer—

(A) notify the continuing care patient in-

stance of any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

(B) provide the patient with an opportu-

nity to notify the plan or issuer of the pa-

tient's need for transitional care; and

(C) subject to subsection (c), permit the pa-

sect to the course of treatment by such pro-

contribute to the provider's consent during a

or coverage after the date of the termination

of the contract with the group health plan or

health insurance issuer) and not to impose

tinary care; and

(2) requires the designation by a partici-

ant, beneficiary, or enrollee of a partici-

ating primary care provider.

(c) CONSTRUCTION.—Nothing in subsection

shall be construed to—

(1) waive any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

(2) preclude the group health plan or health insurance issuer involved from requiring the notify the primary care health care professional or the plan or issuer of treatment decisions.

SEC. 116. CONTINUITY OF CARE.

(a) PEDIATRIC CARE.—In the case of a person

who has a child who is a participant, beneficiary, or enrollee under a group health plan, or a health insurance issuer, if the plan or issuer requires or provides for the designa-

tion of a participating primary care provider for the child, the plan or issuer shall permit such person to designate a physician (allopathic or osteopathic) who specializes in pediatrics as the child's primary care provider.

(b) EFFECT OF TERMINATION OF CONTRACT WITH HEALTH INSURANCE ISSUER.—If a contract for the provision of health insurance coverage under a group health plan and a health insurance issuer is terminated and, as a result of such termination, coverage of services of a health care provider is terminated with respect to an individual, the provisions of paragraph (1) and the succeeding provisions of this section shall apply under the plan in the same manner as if there had been a contract between the plan and the provider that had been terminated, but only with respect to benefits that are covered under the plan after the contract termination.

(3) REQUIREMENTS.—The requirements of this paragraph are that the plan or issuer—

(A) notify the continuing care patient in-

stance of any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

(B) provide the patient with an opportu-

nity to notify the plan or issuer of the pa-

tient's need for transitional care; and

(C) subject to subsection (c), permit the pa-

ent to elect to continue to be covered with

or coverage after the date of the termination

of the contract with the group health plan or

health insurance issuer) and not to impose

tinary care; and

(2) requires the designation by a partici-

ant, beneficiary, or enrollee of a partici-

ating primary care provider.

(c) CONSTRUCTION.—Nothing in subsection

shall be construed to—

(1) waive any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

(2) preclude the group health plan or health insurance issuer involved from requiring the notify the primary care health care professional or the plan or issuer of treatment decisions.

SEC. 116. CONTINUITY OF CARE.

(a) PEDIATRIC CARE.—In the case of a person

who has a child who is a participant, beneficiary, or enrollee under a group health plan, or a health insurance issuer, if the plan or issuer requires or provides for the designa-

tion of a participating primary care provider for the child, the plan or issuer shall permit such person to designate a physician (allopathic or osteopathic) who specializes in pediatrics as the child's primary care provider.

(b) EFFECT OF TERMINATION OF CONTRACT WITH HEALTH INSURANCE ISSUER.—If a contract for the provision of health insurance coverage under a group health plan and a health insurance issuer is terminated and, as a result of such termination, coverage of services of a health care provider is terminated with respect to an individual, the provisions of paragraph (1) and the succeeding provisions of this section shall apply under the plan in the same manner as if there had been a contract between the plan and the provider that had been terminated, but only with respect to benefits that are covered under the plan after the contract termination.

(3) REQUIREMENTS.—The requirements of this paragraph are that the plan or issuer—

(A) notify the continuing care patient in-

stance of any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

(B) provide the patient with an opportu-

nity to notify the plan or issuer of the pa-

tient's need for transitional care; and

(C) subject to subsection (c), permit the pa-

ent to elect to continue to be covered with

or coverage after the date of the termination

of the contract with the group health plan or

health insurance issuer) and not to impose

tinary care; and

(2) requires the designation by a partici-

ant, beneficiary, or enrollee of a partici-

ating primary care provider.
SEC. 118. ACCESS TO NEEDED PRESCRIPTION DRUGS.

(a) IN GENERAL.—To the extent that a group health plan, or health insurance coverage offered by a health insurance issuer, provides coverage for benefits with respect to prescription drugs, and limits such coverage to drugs included in a formulary, the plan or issuer shall—

(1) ensure the participation of physicians and pharmacists in developing and reviewing such formulary; and

(2) provide for disclosure of the formulary to providers; and

(3) in accordance with the applicable quality assurance and utilization review standards of the plan or issuer, provide for exceptions from the formulary limitation when a non-formulary alternative is medically necessary and appropriate and, in the case of such an exception, apply the same cost-sharing requirements that would have applied in the case of a drug covered under the formulary.

(b) COVERAGE OF APPROVED DRUGS AND MEDICAL DEVICES.—

(1) IN GENERAL.—A group health plan (or health insurance coverage offered in connection with such a plan) that provides any coverage of prescription drugs or medical devices shall—

(A) in the case of a prescription drug—

(i) be included in the labeling authorized by the application in effect for the drug pursuant to subsection (b) or (j) of section 505 of the Federal Food, Drug, and Cosmetic Act, without regard to any postmarketing requirements that may apply under such Act; or

(ii) is included in the labeling authorized by the application in effect for the drug pursuant to subsection (b) or (j) of section 505 of the Federal Food, Drug, and Cosmetic Act, without regard to any postmarketing requirements that may apply under such Act; or

(B) in the case of a medical device, is included in the labeling authorized by a regulation under subsection (d) or (3) of section 513 of the Federal Food, Drug, and Cosmetic Act, without regard to any postmarketing requirements that may apply under such Act; or

(ii) an application approved under section 515 of such Act, without regard to any postmarketing requirements that may apply under such Act; or

(ii) the application in effect for the drug pursuant to section 515 of such Act, without regard to any postmarketing requirements that may apply under such Act; or

(ii) an application approved under section 515 of such Act, without regard to any postmarketing requirements that may apply under such Act;

(2) PAYMENT RATE.—In the case of covered items and services provided by—

(A) a participating provider, the payment rate shall be at the rate the plan or issuer shall—

(i) the National Institutes of Health; or

(ii) the Department of Defense; or

(B) a nonparticipating provider, the payment rate shall be at the rate the plan or issuer would normally pay for comparable services under subparagraph (A).

(c) PROHIBITION ON PENALTIES OR INCENTIVES.—In implementing the requirements of this section, a group health plan, and a health insurance issuer providing health insurance coverage, that provides coverage with respect to drugs or medical devices, may not—

(1) impose any penalties or incentives on providers; and

(2) discriminate against the individual on the basis of the enrollee’s participation in such trial.

SEC. 119. COVERAGE FOR INDIVIDUALS PARTICIPATING IN APPROVED CLINICAL TRIALS.

(a) COVERAGE.—

(1) IN GENERAL.—If a group health plan, or health insurance issuer that is providing health insurance coverage, provides coverage to a qualified individual as described in subsection (b), the plan or issuer shall—

(A) not deny the individual participation in the clinical trial referred to in subsection (b); or

(B) if the plan or issuer is not a participating provider, the plan or issuer shall—

(i) the National Institutes of Health; or

(ii) the Department of Veteran Affairs; or

(iii) the Department of Defense; or

(b) REQUIREMENT TO PROVIDE MEDICAL ATTENTION.—A group health plan, and a health insurance issuer providing health insurance coverage, that provides coverage with respect to drugs or medical devices, may not—

(1) to be comparable to the system of peer review and investigations used by the National Institutes of Health; and

(2) assure unbiased review of the highest ethical standards by qualified individuals having no interest in the outcome of the review.

(d) PROHIBITION ON PENALTIES OR INCENTIVES.—In implementing the requirements of this section, a group health plan, and a health insurance issuer providing health insurance coverage, that provides medical and surgical benefits shall ensure that in any case in which the attending physician for such purpose is determined by the attending physician to be comparable to the system of peer review and investigations used by the National Institutes of Health; and

(2) assure unbiased review of the highest ethical standards by qualified individuals having no interest in the outcome of the review.

(e) CONSTRUCTION.—Nothing in this section shall be construed to limit a plan’s or issuer’s coverage with respect to clinical trials.

SEC. 120. REQUIRED COVERAGE FOR MINIMUM HOSPITAL STAY FOR MASTECTOMIES AND LYMPH NODE DISSECTIONS FOR THE TREATMENT OF BREAST CANCER, AND COVERAGE FOR SECONDARY CONSULTATIONS.

(a) INPATIENT CARE.—

(1) IN GENERAL.—A group health plan, and a health insurance issuer providing health insurance coverage, that provides medical and surgical benefits shall ensure that in any case in which the attending physician determines—

(A) a mastectomy; or

(B) a lymph node dissection for the treatment of breast cancer; and

(2) CONSTRUCTION.—Nothing in this section shall be construed as requiring the provision of inpatient coverage if the attending physician and patient determine that a shorter period of hospital stay is medically appropriate.

(b) PROHIBITION ON CERTAIN MODIFICATIONS.—In implementing the requirements of this section, a group health plan, and a health insurance issuer providing health insurance coverage, that provides medical and surgical benefits shall ensure that full coverage is provided for secondary consultations whether such consultation is based on a positive or negative initial diagnosis. In any case in which the attending physician certifies in writing that services necessary for such a secondary consultation are not sufficiently available from specialists operating under the plan or coverage with respect to whose services coverage is otherwise provided under such plan or by such issuer, such plan or issuer shall ensure that such coverage is provided with respect to the specialties necessary for secondary consultation with any other specialist selected by the attending physician for such purpose at no additional cost to the individual, for which the plan or issuer shall have paid if the specialist was participating in the network of the plan or issuer.

(2) EXCEPTION.—Nothing in paragraph (1) shall be construed as requiring the secondary provision of secondary consultations where the patient determines not to seek such a consultation.

SEC. 121. CONGRESSIONAL RECORD—SENATE.

July 9, 2001
CONGRESSIONAL RECORD—SENATE

SEC. 121. PATIENT ACCESS TO INFORMATION.

(a) REQUIREMENT.—

(1) DISCLOSURE.—A group health plan, and a health insurance issuer that provides coverage in connection with health insurance coverage, shall provide for the disclosure of the following information and enrollees—

(i) of the information described in subsection (b) at the time of the initial enrollment of the participant, beneficiary, or enrollee under the plan or coverage; and

(ii) of such information on an annual basis—

(I) in connection with the election period of the plan or coverage if the plan or coverage has such an election period; or

(II) in the case of a plan or coverage that does not have an election period, in conjunction with the beginning of the plan or coverage year; and

(iii) of information relating to any material reduction to the benefits or information described in such subsection or subsection (c), in the form of a notice provided not later than 30 days before the date on which the reduction takes effect.

(B) PARTICIPATING PROVIDERS, BENEFICIARIES, AND ENROLLEES.—The disclosure required under paragraph (A) shall be provided—

(i) jointly to each participant, beneficiary, and enrollee who reside at the same address; or

(ii) in the case of a beneficiary or enrollee who does not reside at the same address as the participant or another enrollee, separately to the participant or other enrollees and such beneficiary or enrollee.

(2) PROVISION OF INFORMATION.—Information shall be provided to participants, beneficiaries, or enrollees, to the extent that such information is provided to participants, beneficiaries, or enrollees via the United States Postal Service or other private delivery service.

(b) REQUIRED INFORMATION.—The informational materials to be distributed under this section shall include for each option available under the group health plan or health insurance coverage the following:

(1) BENEFITS.—A description of the covered benefits, including—

(A) any in- and out-of-network benefits; and

(B) specific preventive services covered under the plan or coverage if such services are covered.

(2) CANCELLATION AND TERMINATION OF COVERAGE.—A description of any circumstances under which such treatments are authorized, a description of the process of the authorization, and the circumstances under which such treatments are furnished without meeting applicable plan or coverage requirements, such as prior authorization or precertification, and appeal procedures for such determinations.

(3) TREATMENTS.—A description of the process for determining whether such treatments are authorized, a description of the process for determining whether such treatments are furnished without meeting applicable plan or coverage requirements, such as prior authorization or precertification, and appeal procedures for such determinations.

(4) EXPERIMENTAL AND INVESTIGATIONAL TREATMENTS.—A description of the process for determining whether such treatments are authorized, a description of the process for determining whether such treatments are furnished without meeting applicable plan or coverage requirements, such as prior authorization or precertification, and appeal procedures for such determinations.

(5) PRESCRIPTION DRUGS.—To the extent a plan or issuer provides coverage for prescription drugs, a statement of whether such prescription drugs are covered by the plan, issuer, or claims administrator.

(6) OTHER BENEFITS.—A description of any other benefits limitations, including—

(A) any monetary limits or limits on the number of visits, days, or services, and any specific coverage exclusions; and

(B) any definition of medical necessity used in making coverage determinations by the plan, issuer, or claims administrator.

(2) COST-SHARING.—A description of any cost-sharing requirements, including—

(A) any premiums, deductibles, coinsurance, copayment amounts, and liability for balance billing, for which the participant, beneficiary, or enrollee may be liable; and

(B) any maximum out-of-pocket expense for which the participant, beneficiary, or enrollee may be liable.

(3) COVERAGE EXCLUSIONS.—A description of any other benefit limitations, including—

(A) any in- and out-of-network benefits; and

(B) specific preventive services covered under the plan or coverage if such services are covered.

(c) MANNER OF DISCLOSURE.—Each plan and issuer shall—

(1) DISCLOSURE TO PARTICIPANTS.—A group health plan, and a health insurance issuer that provides coverage in connection with health insurance coverage, shall provide for the disclosure to participants, beneficiaries, and enrollees—

(i) jointly to each participant, beneficiary, and enrollee, of the information described in such subsection or subsection (b).
combination does not result in any reduction in the premium that would otherwise be provided to the recipient.

(19) **AVAILABILITY OF ADDITIONAL INFORMATION.**—A statement that the information described in subsection (g), and instructions on obtaining additional information (including telephone numbers and, if available, Internet websites), shall be made available upon request.

(20) **DESIGNATED DECISIONMAKERS.**—A description of the participants and beneficiaries with respect to whom each designated decisionmaker (including primary care providers and specialists) and facilities in connection with the provision of health care under the plan or coverage.

(c) **ADDITIONAL INFORMATION.**—The informational materials to be provided upon the request of a participant, beneficiary, or enrollee shall include for each option available under a group health plan or health insurance coverage the following:

(1) **STATUS OF PROVIDERS.**—The State license or issuer's confidentiality practices, including primary care providers and specialists and facilities in connection with the provision of health care under the plan or coverage.

(2) **Compensation Methods.**—A summary description by category of the applicable methods (such as copayment, fee-for-service, salary, bundled payments, per diem, or a physical exam of the individual, in order to safeguard the confidentiality, as described in subsection (d), of such predictive genetic information so disclosed on the recipient's electronic media—

ii) the recipient has affirmatively consented to the disclosure of such information in such form.

(2) **MANNER OF DISCLOSURE.**—The information so disclosed and provides the information in printed form if the information is not received.

SEC. 122. GENETIC INFORMATION.

(a) **Definitions.**—In this section:

(1) **Family member.** The term "family member" means, with respect to an individual—

(A) the spouse of the individual;

(B) a dependent child of the individual, including a child who is born to or placed for adoption with the individual; and

(C) all other individuals related to the individual by blood or by legal adoption (including information concerning an individual or a family member of such individual).

(2) **Genetic information.**—The term "genetic information" means information about genetic predisposition or inherited characteristics that may derive from an individual or a family member of such individual (including information about a request for or the receipt of genetic services by such individual or a family member of such individual).

(3) **Genetic services.**—The term "genetic services" means health services, including genetic tests, provided to obtain, assess, or interpret genetic information for diagnostic and therapeutic purposes, and for genetic education and counseling.

(B) **NOTICE OF CONFIDENTIALITY PRACTICES**—A notification of the recipient of predictive genetic information concerning an individual or a family member of the individual (including information about a request for or the receipt of genetic services by such individual or a family member of such individual).
issuer offering health insurance coverage, shall not be construed as to supersede any provision of State law, solely on the basis of such license or certification.

(b) Construction.—Subsection (a) shall not be construed as to—

(1) as requiring the coverage under a group health plan or health insurance coverage of a particular benefit or service or to prohibit a plan or issuer from including providers only to the extent necessary to meet the needs of the plan’s or issuer’s participants, beneficiaries, or enrollees or from establishing any terms or conditions of health care quality and cost controls consistent with the responsibilities of the plan or issuer;

(2) to override any State licensure or restriction, if any, to a plan or issuer that offers network coverage to include for participation every willing provider who meets the terms and conditions of the plan or issuer.

SEC. 131. PROHIBITION AGAINST IMPROPER IN-CENTIVE ARRANGEMENTS.

(a) In General.—A health plan and a health insurance issuer offering health insurance coverage may not operate any physician incentive plan (as defined in subparagraph (B) of section 1876(i)(8) of the Social Security Act) unless the requirements described in clauses (1), (ii)(I), and (iii) of subsection (a) of such section are met with respect to such a plan.

(b) Application.—For purposes of carrying out paragraph (1), any reference in section 1876(i)(8) of the Social Security Act to the Secretary, an eligible organization, or an individual enrolled with the organization shall be treated as a reference to the applicable authority, a group health plan or health insurance issuer with respect to such a contract or agreement, or the operation of such a contract or agreement, or the operation of such a contract or agreement, or the operation of any partnership, association, or other organization that enters into or administers such a contract or agreement.

(c) Scope.—For purposes of this section, the term ‘physician incentive plan’ has the meaning given such term in section 1876(i)(8) of the Social Security Act to the Secretary, an eligible organization, or an individual enrolled with the organization.

SEC. 132. PROHIBITION OF DISCRIMINATION AGAINST PROVIDERS BASED ON LICENSURE.

(a) In General.—A group health plan, and a health insurance issuer with respect to the provision of health insurance coverage, may not retaliate against a participant, beneficiary, or enrollee with respect to the participant’s, beneficiary’s, enrollee’s or provider’s use of, or participation in, a utilization review process or a grievance process of the plan or issuer.

(b) Initiates, cooperates, or otherwise participates in an investigation or proceeding by such an agency with respect to such care, services, or conditions.

If an institutional health care provider is a participating provider with such a plan or issuer, the provisions of the previous sentence shall apply to the provider in relation to care, services, or conditions affecting one or more patients within an institutional health care provider in the same manner as they apply to the plan or issuer in relation to care, services, or conditions affecting one or more participants, beneficiaries, or enrollees; and for purposes of applying this sentence, any reference to a plan or issuer is deemed a reference to the institutional health care provider.

(2) Good faith action.—For purposes of paragraph (1), a protected health care professional is considered to be acting in good faith with respect to disclosure of information or participation if, with respect to the information disclosed, that professional reasonably believes the information to be true.

(C) the information evidences either a violation of a law, rule, or regulation, of an applicable accreditation standard, or of a generally recognized professional or clinical standard or that a patient is in imminent hazard of loss of life or serious injury; and

(D) subject to subparagraphs (B) and (C) of paragraph (3), the internal procedures of the plan, issuer, or institutional health care provider established for the purpose of addressing quality concerns before making the disclosure.

(3) Exception and special rule.—

(1) General exception.—Paragraph (1) does not apply if—

A group health plan, and a health insurance issuer offering group health insurance coverage, shall provide for prompt payment of claims, subject to limitations of subparagraphs (A) and (B) of paragraph (2) and the information disclosed is limited to—

(i) the disclosure relates to an imminent hazard of loss of life or serious injury to a patient;

(ii) the disclosure is made to an appropriate private accreditation body pursuant to disclosure procedures established by the body to determine whether the entity is in compliance with the scope of the investigation or proceeding.

(3) Internal procedure exception.—Subparagraph (D) of paragraph (2) shall not apply if—

A group health plan, and a health insurance issuer offering group health insurance coverage, shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.

(b) Nullification.—Any contract provision or agreement between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a health care provider (or group of health care providers) shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.

(b) Nullification.—Any contract provision or agreement between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a health care provider (or group of health care providers) shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.

(b) Nullification.—Any contract provision or agreement between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a health care provider (or group of health care providers) shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.

(b) Nullification.—Any contract provision or agreement between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a health care provider (or group of health care providers) shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.

(b) Nullification.—Any contract provision or agreement between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a health care provider (or group of health care providers) shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.

(b) Nullification.—Any contract provision or agreement between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a health care provider (or group of health care providers) shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.

(b) Nullification.—Any contract provision or agreement between a group health plan or health insurance issuer in relation to health insurance coverage (including any partnership, association, or other organization that enters into or administers such a contract or agreement) and a health care provider (or group of health care providers) shall not prohibit or otherwise restrict a health care professional from advising such a participant, beneficiary, or enrollee who is a patient of the professional about the health status of the individual or medical care or treatment for the individual’s condition or disease, regardless of whether benefits for such care or treatment are provided under the plan or coverage, if the professional is acting within the lawful scope of practice.
demonstrates that it would have taken the same adverse action even in the absence of the activities protected under such paragraph.

Notice.—A group health plan, health insurance issuer, and institutional health care provider shall give notice, to be provided or approved by the Secretary of Labor, setting forth excerpts from, or summaries of, the pertinent provisions of this subsection and information pertaining to enforcement of such provisions.

SEC. 151. DEFINITIONS.

(a) The terms defined in this section shall have the meaning given such terms in section 1852(h)(2) of the Employee Retirement Income Security Act of 1974, paragraph 1974, subparagraph (1) shall be construed to apply only with respect to the health insurance issuer offering health insurance coverage (if any) offered in connection with the plan.

(b) The term “prohibited health care professional” means an individual who is licensed, accredited, or certified under State law to provide health care services and who is operating within the scope of such licensure, accreditation, or certification.

(c) The term “health care provider” includes a physician or other health care professional, as well as an institutional or other facility or agency that provides such services that is licensed, accredited, or certified to provide health care items and services under applicable State law.

(d) The term “network” means, with respect to a group health plan or health insurance issuer offering health insurance coverage, the participating health care professionals and providers through whom the plan or issuer provides health care items and services to participants, beneficiaries, or enrollees.

(e) The term “nonparticipating” means, with respect to a health care provider that provides health care items and services to a participant, beneficiary, or enrollee under group health plan or health insurance coverage, a health care provider that is not a participating health care provider with respect to such items and services.

(f) The term “participating” means, with respect to a health care provider that provides health care items and services to a participant, beneficiary, or enrollee under group health plan or health insurance coverage, a health care provider that furnishes such items and services under a contract or other arrangement with the plan or issuer.

(g) The term “prior authorization” means the process of obtaining prior approval from a health insurance issuer or group health plan for the provision or coverage of medical services.

(h) The term “requirements imposed under this title” means a requirement under this title, and in applying the requirements of this title, “requirement” shall be construed to apply only with respect to the health insurance issuer and with respect to a group health plan that is not a Federal governmental plan, a requirement that substantially complies (within the meaning of subsection (c) with a patient protection requirement (as defined in paragraph (3)) and does not prevent the application of other requirements under this title (other than substantially compliant requirements), in applying the requirements of this title under section 2707 and 2753 (as applicable of the Public Health Service Act (as added by title II), subject to subsection (a)(2).

(h) In general.—The State law shall apply instead of the patient protection requirement otherwise applicable with respect to health insurance coverage and non-Federal governmental plans.

SEC. 152. PREEMPTION, STATE FLEXIBILITY, CONSTRUCTION.

(a) Continued Applicability of State Law With Respect to Health Insurance Issues With State Law Requirements Imposed Under Title XX.

(b) Continued Preemption With Respect to Other Self-Insured Health Plans.—Nothing in this title shall be construed to affect or modify the provisions of section 514 of the Employee Retirement Income Security Act of 1974 with respect to self-insured health plans.

(c) Construction.—In applying this section, a State law that provides for equal access to, and availability of, all categories of licensed health care providers and services shall not be treated as preventing the application of any requirement of this title.

(b) Application of Substantially Compliant State Laws.

(1) In general.—In the case of a State law that imposes, with respect to health insurance coverage offered by a health insurance issuer and with respect to a group health plan that is a non-Federal governmental plan, a requirement that substantially complies (within the meaning of subsection (c) with a patient protection requirement (as defined in paragraph (3)) and does not prevent the application of other requirements under this title (other than substantially compliant requirements), in applying the requirements of this title under section 2707 and 2753 (as applicable of the Public Health Service Act (as added by title II), subject to subsection (a)(2).

(2) In general.—In the case of a State law that imposes, with respect to health insurance coverage offered by a health insurance issuer and with respect to a group health plan that is a non-Federal governmental plan, a requirement that substantially complies (within the meaning of subsection (c)) with a patient protection requirement (as defined in paragraph (3)) and does not prevent the application of other requirements under this title (other than substantially compliant requirements), in applying the requirements of this title under section 2707 and 2753 (as applicable of the Public Health Service Act (as added by title II), subject to subsection (a)(2).

(3) Limitation.—In the case of a group health plan covered under title I of the Employee Retirement Income Security Act of 1974, paragraph (1) shall be construed to apply only with respect to the health insurance coverage (if any) offered in connection with the plan.

(4) Construction.—In this section:

(A) Patient Protection Requirement.—The term “patient protection requirement” means a requirement under this title, and includes (as a single requirement) a group or related set of requirements under a section or similar unit under this title.

(B) Substantially Compliant.—The terms “substantially compliant”, or “substantial compliance” with respect to a State law, mean that the State law substantially complies with a patient protection requirement and has a similar effect.

(C) Determinations of Substantial Compliance.—

(1) Certification by States.—A State may submit to the Secretary a certification that a State law provides for patient protections that are at least substantially compliant with one or more patient protection requirements. Such certification shall be accompanied by such information as may be required to permit the Secretary to make the determination described in paragraph (2)(A).

(2) Review.—

(A) In general.—The Secretary shall promptly review a certification submitted under paragraph (1) with respect to a State law to determine if the State law substantially complies with a patient protection requirement (or requirements) to which the law relates.

(B) Approval Deadlines.—Such a certification is considered approved unless the Secretary notifies the State in writing, within 90 days after the date of receipt of the certification, that the certification is disapproved (and the reasons for disapproval) or that specified additional information is needed to make the
such petition is submitted.

because it provides for greater protections

(B) does not vary reimbursement for such
provider based on an agreement to contract
terms and conditions or the utilization of
health care items or services relating to such
provider;

(C) allows access to an provider that is
lawfully authorized to provide the covered
services and that agrees to accept the terms
and conditions of payment established under
the plan or by the issuer; and

(D) for which the issuer does not require prior authorization before providing
for any health care services.

SEC. 154. COVERAGE OF LIMITED SCOPE PLANS.

Only for purposes of applying the require-
moments of this title under sections 2707 and
2733 of the Public Health Service Act and
section 174 of the Employee Retirement In-
come Security Act of 1974, sections
2791(c)(2)(A), and section 733(c)(2)(A) of the
Employee Retirement Income Security Act
of 1974 shall be deemed not to apply.

SEC. 155. REGULATIONS CONCERNING GENETIC INFORMATION.

The Secretaries of Health and Human
Services and Labor shall issue such regula-
tions as may be necessary or appropriate to
carry out this title. Such regulations shall be
issued consistent with section 104 of
Health Insurance Portability and Account-
ability Act of 1996. Such Secretaries may
promulgate any interim final rules as the
Secretaries determine are appropriate to
carry out this title.

SEC. 156. INCORPORATION INTO PLAN OR CO-
VERAGE DOCUMENTS.

The requirements of this title with respect
to a group health plan or health insurance
coverage are deemed to be incorporated into,
and made a part of, such plan or the policy,
certificate, or contract providing such cov-

ence are enforceable under law as if di-
rectly included in the documentation of such
plan or the certificate, or contract.

TITLE II—APPLICATION OF QUALITY CARE STANDARDS TO GROUP HEALTH PLANS AND HEALTH INSURANCE COVERAGE UNDER THE PUBLIC HEALTH SERVICE ACT

SEC. 201. APPLICATION TO GROUP HEALTH PLANS AND GROUP HEALTH INSUR-
ANCE COVERAGE UNDER THE PUBLIC HEALTH SERVICE ACT

(a) IN GENERAL.—Subpart 2 of part A of
title XXVII of the Public Health Service Act
is amended by adding at the end the fol-
lowing new section:

SEC. 2707. PATIENT PROTECTION STANDARDS.

“Each group health plan shall comply with
patient protection requirements under title I
of the Bipartisan Patient Protection Act,
and each health insurance issuer shall com-
ply with patient protection requirements
under such title with respect to group health
insurance coverage it offers, and such re-
quirements shall be deemed to be incor-
porated into this subsection.”

(b) CONFORMING AMENDMENT.—Section
2721(b)(2)(A) of such Act (42 U.S.C.
330gg–21(b)(2)(A)) is amended by inserting “(other
than section 2707)” after “requirements of
such subparts.”

SEC. 250. COOPERATION BETWEEN FEDERAL AND
STATE AUTHORITIES.

Part C of title XXVII of the Public Health
Service Act (42 U.S.C. 300gg–81 et seq.)
is amended by adding at the end the follow-

SEC. 2753. PATIENT PROTECTION STANDARDS.

“Each health insurance issuer shall com-
ply with patient protection requirements
under title I of the Bipartisan Patient
Protection Act with respect to individual
health insurance coverage it offers, and such
requirements shall be deemed to be incor-
porated into this subsection.”

SEC. 202. APPLICATION TO INDIVIDUAL HEALTH
INSURANCE COVERAGE.

Part B of title XXVII of the Public Health
Service Act is amended by inserting after
section 2702 the following new section:

SEC. 2753. PATIENT PROTECTION STANDARDS.

“Each health insurance issuer shall com-
ply with patient protection requirements
under title I of the Bipartisan Patient
Protection Act with respect to individual
health insurance coverage it offers, and such
requirements shall be deemed to be incor-
porated into this subsection.”

SEC. 203. COOPERATION BETWEEN FEDERAL
AND STATE AUTHORITIES.

(a) Agreement with States.—A State may
enter into an agreement with the Secre-
tary for the delegation to the State of some
or all of the Secretary’s authority
under this title to enforce the requirements
applicable under title I of the Bipartisan
Patient Protection Act with respect to health
insurance coverage offered by a health insur-
ance issuer offering health insurance
coverage under a group health plan that is
a non-Federal governmental plan.
(b) Delegations.—Any department, agen-
cy, or instrumentality of a State to which
authority is delegated under an agree-
ment entered into under this section may,
if authorized under State law and to the extent
consistent with such agreement, exercise the
powers of the Secretary under this title
which relate to such authority.”

SEC. 204. ELIMINATION OF OPTION OF NON-FED-
ERAL GOVERNMENTAL PLANS TO BE
EXCEPTED FROM REQUIREMENTS
CONCERNING GENETIC INFORMATION.

Section 2721(b)(2) of the Public Health
Service Act (42 U.S.C. 330gg–21(b)(2)) is
amended—

(1) in subparagraph (A), by striking “If the
plan sponsor” and inserting “Except as pro-
vided in subparagraph (D), if the plan spon-
or”;

(2) by adding at the end the following:

(D) ELECTION NOT APPLICABLE TO REQUIRE-
MENTS CONCERNING GENETIC INFORMATION.—
The election described in subparagraph (A)
shall not be available with respect to the
provisions of subsections (b), (c), and (d) of
subpart 2 of part A of the Bipartisan Patient
Protection Act and the provisions of section
2702(b) to the extent that the subsections
and section apply to genetic information (or
information about a receipt of genetic services
by an individual or a family member of such individual).”
TITLE III—APPLICATION OF PATIENT PROTECTION STANDARDS TO FEDERAL HEALTH CARE PROGRAMS

SEC. 301. APPLICATION OF PATIENT PROTECTION STANDARDS TO FEDERAL HEALTH CARE PROGRAMS

(a) APPLICATION OF STANDARDS.—

(1) IN GENERAL.—Each Federal health care program shall comply with the patient protection requirements under title I, and such requirements shall be deemed to be incorporated into this section.

(2) CAUSE OF ACTION RELATING TO PROVISION OF HEALTH BENEFITS.—Any individual who receives a benefit item or service under a Federal health care program shall have a cause of action against the Federal Government under sections 562(n) and 514(d) of the Employee Retirement Income Security Act of 1974, and the provisions of such sections shall be deemed to be incorporated into this section.

(b) RULES OF CONSTRUCTION.—For purposes of this subsection:

(A) each Federal health care program shall be deemed to be a group health plan;

(B) the Federal Government shall be deemed to be the plan sponsor of each Federal health care program; and

(C) each group health plan eligible for benefits under a Federal health care program shall be deemed to be a participant, beneficiary, or enrollee under that program.

(c) DEFINITION OF FEDERAL HEALTH CARE PROGRAM DEFINED.—In this section, the term ‘Federal health care program’ has the meaning given that term under section 1128B(f) of the Social Security Act (42 U.S.C. 1395w-7b) except that, for purposes of this section, such term includes the Federal employees health benefits program established under chapter 89 of title 5, United States Code.

TITLE IV—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

SEC. 401. APPLICATION OF PATIENT PROTECTION STANDARDS TO FEDERAL HEALTH CARE PROGRAMS

Subpart B of part 7 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended by adding at the end the following new section:

"SEC. 714. PATIENT PROTECTION STANDARDS.

"(a) IN GENERAL.—Subject to subsection (b), a group health plan (and a health insurance issuer offering group health insurance coverage in connection with such a plan) shall comply with the requirements of title I of the Bipartisan Patient Protection Act (as in effect as of the date of the enactment of such Act), and such requirements shall be deemed to be incorporated into this subsection.

"(b) PLAN SATISFACTION OF CERTAIN REQUIREMENTS.—

"(1) SATISFACTION OF CERTAIN REQUIREMENTS THROUGH INSURANCE.—For purposes of subsection (a), insofar as a group health plan provides benefits in the form of health insurance coverage in connection with such a plan shall comply with the requirements of section 111 of the Bipartisan Patient Protection Act (as in effect as of the date of the enactment of such Act), and those requirements shall be deemed to be incorporated into this subsection.

"(2) SATISFACTION OF CERTAIN REQUIREMENTS THROUGH PROVIDER AGREEMENTS.—Insofar as a group health plan provides benefits in the form of health insurance coverage in connection with such a plan shall comply with the requirements of section 111 of the Bipartisan Patient Protection Act (as in effect as of the date of the enactment of such Act), and those requirements shall be deemed to be incorporated into this subsection.

"(c) ENFORCEMENT OF CERTAIN REQUIREMENTS.—

"(1) COMPLAINTS.—Any protected health care professional who believes that a patient professional has been retaliated or discriminated against in violation of section 111(b)(1) of the Bipartisan Patient Protection Act, or with respect to a complaint filed within 180 days of the date of the alleged retaliation or discrimination.

"(2) INVESTIGATION.—The Secretary shall investigate such complaints and shall determine if a violation of such section has occurred and, if so, shall issue an order to ensure that the protected health care professional does not suffer any loss of pay, benefits in relation to the plan, or provider involvement, as a result of the violation found by the Secretary.

"(3) CONFORMING AMENDMENTS.—The Secretary shall issue regulations to coordinate the requirements on group health plans and health insurance issuers under this section with the requirements imposed under the other provisions of this title. In order to reduce duplication and clarify the rights of participants and beneficiaries with respect to information that is required to be provided, such regulations shall coordinate the information disclosure requirements under section 111 of the Bipartisan Patient Protection Act with the requirements imposed under part 1, so long as such coordination does not result in any reduction in the information that would otherwise be provided to participants and beneficiaries.

"(d) SATISFACTION OF CERTAIN REQUIREMENTS THROUGH PROVIDER AGREEMENTS.—Insofar as a group health plan provides benefits in the form of health insurance coverage in connection with such a plan shall comply with the requirements of section 111 of the Bipartisan Patient Protection Act (as in effect as of the date of the enactment of such Act), and those requirements shall be deemed to be incorporated into this subsection.

"(e) CONFORMING AMENDMENTS.—(1) Section 732(a) of such Act (29 U.S.C. 1135(a)) is amended by inserting ‘‘(a)’’ after ‘‘Sec. 502.’’ and by adding at the end the following new subsection:

"(2) CONSTRUCTION.—Nothing in this subsection shall be construed to affect or modify the responsibilities of the fiduciaries of a group health plan under part B.

"(g) TREATMENT OF SUBSTANTIALLY COMPLIANT STATE LAWS.—For purposes of applying this subsection, any reference in this subsection to a requirement of section another provision in the Bipartisan Patient Protection Act with respect to a health insurance issuer is deemed to include a reference to a requirement of the law that substantially complies (as determined under section 152(c) of such Act) with the requirement in such section or other provision.

"(h) APPLICATION TO CERTAIN PROHIBITIONS AGAINST RETALIATION.—With respect to compliance with the requirements of section 152(b) of the Bipartisan Patient Protection Act, for purposes of this subtitle the term ‘‘group health plan’’ is deemed to include a reference to an institutional health care provider.

"(i) ENFORCEMENT OF CERTAIN REQUIREMENTS.—

"(1) COMPLAINTS.—Any protected health care professional who believes that a patient professional has been retaliated or discriminated against in violation of section 152(b)(1) of the Bipartisan Patient Protection Act, or with respect to a complaint filed within 180 days of the date of the alleged retaliation or discrimination.

"(2) INVESTIGATION.—The Secretary shall investigate such complaints and shall determine if a violation of such section has occurred and, if so, shall issue an order to ensure that the protected health care professional does not suffer any loss of pay, benefits in relation to the plan, or provider involvement, as a result of the violation found by the Secretary.

"(3) CONFORMING AMENDMENTS.—The Secretary shall issue regulations to coordinate the requirements on group health plans and health insurance issuers under this section with the requirements imposed under the other provisions of this title. In order to reduce duplication and clarify the rights of participants and beneficiaries with respect to information that is required to be provided, such regulations shall coordinate the information disclosure requirements under section 121 of the Bipartisan Patient Protection Act with the requirements imposed under section 121 of the Bipartisan Patient Protection Act (as defined in section 1132(b)(3)) is amended by inserting ‘‘(a)’’ after ‘‘Sec. 503.’’ and by adding at the end the following new subsection:

"(b) IN THE CASE OF A GROUP HEALTH PLAN (AS DEFINED IN SECTION 733) COMPLIANCE WITH THE REQUIREMENTS OF SUBTITLE A OF TITLE I OF THE BIPARTISAN PATIENT PROTECTION ACT, AND COMPLIANCE WITH REGULATIONS PROMULGATED BY THE SECRETARY, IN THE CASE OF A CLAIMS DENIAL SHALL BE DEEMED COMPLIANCE WITH SUBSECTION (A) WITH RESPECT TO SUCH CLAIMS DENIAL.

"(c) CONFORMING AMENDMENTS.—(1) Section 732(a) of such Act (29 U.S.C. 1135(a)) is amended by striking ‘‘section 711’’ and inserting ‘‘sections 711 and 714.’’

The table of contents in section 1 of such Act is amended by inserting after the item relating to section 713 the following new item:

"(d) PATIENT PROTECTION STANDARDS.

"(2) SATISFACTION OF CERTAIN REQUIREMENTS THROUGH INSURANCE.—For purposes of applying this subsection, any reference in this subsection to a requirement of section another provision in the Bipartisan Patient Protection Act with respect to a health insurance issuer is deemed to include a reference to a requirement of the law that substantially complies (as determined under section 152(c) of such Act) with the requirement in such section or other provision.

"(3) CONFORMING AMENDMENTS.—(1) Section 502(b)(3) of such Act (29 U.S.C. 1132(b)(3)) is amended by inserting ‘‘(other than section 152(b)(3))’’ after ‘‘part 7.’’
(a) Finality of claim. A claim for benefits under a group health plan shall be final if—

(1) in general.—Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132) is amended by adding at the end the following new subsection:

"(n) DIRECT PARTICIPATION.—

"(i) IN GENERAL.—For purposes of this subparagraph, an employer or plan sponsor shall not be treated as engaged in direct participation in a decision with respect to any claim for benefits for denial thereof in the case of any particular participant or beneficiary solely by reason of—

"(I) any efforts that may have been made by the employer or plan sponsor to advocate for authorization of coverage for that or any other participant or beneficiary (or any group of participants or beneficiaries), or

"(II) any provision that may have been made by the employer or plan sponsor for benefits which are not covered under the terms and conditions of the plan for that or any other participant or beneficiary (or any group of participants or beneficiaries)."

"(ii) RULES OF CONSTRUCTION.—For purposes of subsection (n)(1), paragraph (A) does not authorize a cause of action against an employer or other plan sponsor for the performance of, or the failure to perform, any non-medically reviewable duty under the plan.

"(iii) NON-MEDICALLY REVIEWABLE DUTY.—

"The term ‘non-medically reviewable duty’ means a duty the discharge of which does not include the making of a medically reviewable decision.

"(1) Health care professional.—The term ‘health care professional’ means an individual who is licensed, accredited, or certified by a State or other laws to provide specified health care services and who is operating within the scope of such licensure, accreditation, or certification.

"(2) Health care professional.—The term ‘health care professional’ means an individual who—

"(A) Acted as a health care professional; or

"(B) Is responsible for the performance of, or the failure to perform, any non-medically reviewable duty under the plan.

"(3) Exclusion of hospitals.—No treating hospital of the participant or beneficiary shall be liable under paragraph (1) for the performance of, or the failure to perform, any non-medically reviewable duty of the plan, the plan sponsor, or any health insurance issuer offering health insurance coverage in connection with the plan.

"(4) Rule of construction.—Nothing in paragraph (3) shall be construed to limit the liability (whether direct or vicarious) of the plan, the plan sponsor, or any health insurance issuer offering health insurance coverage in connection with the plan.

"(5) Requirement of exhaustion.—

"For purposes of this subparagraph, an employer or plan sponsor shall not be treated as engaged in direct participation in a decision with respect to any claim for benefits for denial thereof in the case of any particular participant or beneficiary solely by reason of—

"(I) any efforts that may have been made by the employer or plan sponsor to advocate for authorization of coverage for that or any other participant or beneficiary (or any group of participants or beneficiaries), or

"(II) any provision that may have been made by the employer or plan sponsor for benefits which are not covered under the terms and conditions of the plan for that or any other participant or beneficiary (or any group of participants or beneficiaries)."
(A) IN GENERAL.—A cause of action may not be brought under paragraph (1) in connection with any denial of a claim for benefits of any individual until all administrative processes under sections 102 and 103 of the Bipartisan Patient Protection Act of 2001 (if applicable) have been exhausted.

(B) EXCEPTION FOR NEEDED CARE.—A participant or beneficiary may seek relief exclusively from a Federal court under subsection 502(a)(1)(B) prior to the exhaustion of administrative remedies under sections 102, 103, or 104 of the Bipartisan Patient Protection Act (as required by paragraph (A)) if it is demonstrated to the court that the exhaustion of such remedies would cause irreparable harm to the health of the participant or beneficiary. Notwithstanding the awarding of relief under subsection 502(a)(1)(B) pursuant to this subparagraph, no relief shall be available as a result of, or arising under, paragraph (1)(A) or paragraph (1)(B), with respect to a participant or beneficiary, unless the requirements of subparagraph (A) are met.

(C) RECEIPT OF BENEFITS DURING APPEALS PROCESS.—Receipt by the participant or beneficiary of the benefits involved in the claim for benefits may suspend the deadlines for administrative processes referred to in subparagraph (A) or of any action commenced under this subsection.

(i) shall not preclude continuation of all such administrative processes to their conclusion if so moved by any party, and

(ii) shall not preclude any liability under subsection (o) and this subsection in connection with such claim.

The court in any action commenced under this subsection shall take into account any receipt of benefits during such administrative process in determining the amount of the damages awarded.

(D) ADMISSIBILITY.—Any determination made by a reviewer in an administrative proceeding under section 103 of the Bipartisan Patient Protection Act of 2001 shall be admissible in any Federal court proceeding and shall be presented to the trier of fact.

(E) OPENING OF PROCEEDINGS.—

(A) IN GENERAL.—The remedies set forth in this subsection (n) shall be the exclusive remedies for causes of action brought under this section.

(B) ASSESSMENT OF CIVIL PENALTIES.—In addition to the remedies provided for in paragraph (1) (relating to the failure to provide contract benefits in accordance with the plan), a civil assessment, in an amount not to exceed $5,000,000, payable to the claimant may be awarded in any action under such paragraph if the claimant establishes by clear and convincing evidence that the alleged conduct carried out by the defendant demonstrated bad faith and flagrant disregard for the rights of the participant or beneficiary under the plan and was a proximate cause of the personal injury or death that is the subject of the claim.

(ii) LIMITATION ON ATTORNEYS' FEES.—

(A) IN GENERAL.—Notwithstanding any other provision of law, or any arrangement, agreement, or contract regarding an attorney's fees, in any action brought in connection with a denial of a claim for benefits of any individual the attorney's contingency fee allowable for a cause of action brought pursuant to this subsection shall not exceed 1⁄3 of the total amount of the plaintiff's recoverable under the reimbursement of actual out-of-pocket expenses of the attorney.

(B) DETERMINATION BY DISTRICT COURT.—The United States district court in which the action was pending shall determine the final disposition, including all appeals, of the action within the scope of employment under this section in accordance with the decisions of the participant or beneficiary shall be transferred to, and assumed by, the designated decisionmaker, and

(ii) with respect to such liability, the designated decisionmaker shall be substituted for the employer or plan sponsor (or employee) in the action and may not raise any defense that the employer or plan sponsor (employee) could not assert if such a decisionmaker were not so deemed.

(B) AUTOMATIC DESIGNATION.—A health insurance issuer shall be deemed to be a designated decisionmaker for purposes of subparagraph (A) with respect to the participants and beneficiaries of an employer or plan sponsor, whether or not the employer or plan sponsor makes such a designation, and shall be deemed to have assumed unconditionally all liability of the employer or plan sponsor under such designation in accordance with subsection (o), unless the employer or plan sponsor affirmatively enters into a contract to prevent the service of the designated decisionmaker.

(19) PREVIOUSLY PRO下的ED SERVICES.—

(A) IN GENERAL.—Except as provided in this paragraph, a cause of action shall not arise under paragraph (1) where the denial involved relates to a cause of action that has already been fully provided to the participant or beneficiary under the plan or coverage and the claim relates solely to the subsequent denial of payment for the provision of such item or service.

(B) EXCEPTION.—Nothing in subparagraph (A) shall be construed to—

(i) prohibit a cause of action under paragraph (1) where the nonpayment involved results in the participant or beneficiary being unable to receive further items or services that are directly related to the item or service involved in the denial referred to in subparagraph (A) or that are part of a continuing treatment or series of procedures;

(ii) limit liability that otherwise would arise from the provision of the item or services or the performance of a medical procedure.

(20) EXEMPTION FROM PERSONAL LIABILITY FOR INDIVIDUAL MEMBERS OF BOARDS OF DIRECTORS OF TRUSTEES, ETC.—Any individual who—

(A) a member of a board of directors of an employer or plan sponsor; or

(B) a member of an association, committee, employee organization, joint board of trustees, or other similar group of representatives of the entities that are the plan sponsor or plan maintained by two or more employers and one or more employee organizations;

shall not be personally liable under this subsection for conduct that is within the scope of employment of the individuals unless the individual acts in a fraudulent manner for personal enrichment.

(21) REQUIREMENTS FOR DESIGNATED DECISIONMAKERS OF GROUP HEALTH INSURANCE ISSUERS.—In general, the designated decisionmaker shall—

(A) in general.—Notwithstanding the direct participation (as defined in paragraph (5)(c)(i)) of an employer or plan sponsor, in any proceeding in which there is deemed to be a designated decisionmaker under subparagraph (B) that meets the requirements of subparagraph (o)(1)(A) for an employer or other plan sponsor, (i) all liability of such employer or plan sponsor (and any employee thereof acting within the scope of employment) under this section in connection with the decision of the participant or beneficiary shall be transferred to, and assumed by, the designated decisionmaker, and

(ii) with respect to such liability, the designated decisionmaker shall be substituted for the employer or plan sponsor (or employee) in the action and may not raise any defense that the employer or plan sponsor (employee) could not assert if such a decisionmaker were not so deemed.

(B) AUTOMATIC DESIGNATION.—A health insurance issuer shall be deemed to be a designated decisionmaker for purposes of subparagraph (A) with respect to the participants and beneficiaries of an employer or plan sponsor, whether or not the employer or plan sponsor makes such a designation, and shall be deemed to have assumed unconditionally all liability of the employer or plan sponsor under such designation in accordance with subsection (o), unless the employer or plan sponsor affirmatively enters into a contract to prevent the service of the designated decisionmaker.

(18) RELIEF FROM LIABILITY FOR EMPLOYER OR OTHER PLAN SPONSOR BY MEANS OF DESIGNATED DECISIONMAKERS.—

(A) IN GENERAL.—Notwithstanding the direct participation (as defined in paragraph (5)(c)(i)) of an employer or plan sponsor, in any proceeding in which there is deemed to be a designated decisionmaker under subparagraph (B) that meets the requirements of subparagraph (o)(1)(A) for an employer or other plan sponsor, (i) all liability of such employer or plan sponsor (and any employee thereof acting within the scope of employment) under this section in connection with the decision of the participant or beneficiary shall be transferred to, and assumed by, the designated decisionmaker, and

(ii) with respect to such liability, the designated decisionmaker shall be substituted for the employer or plan sponsor (or employee) in the action and may not raise any defense that the employer or plan sponsor (employee) could not assert if such a decisionmaker were not so deemed.

(B) AUTOMATIC DESIGNATION.—A health insurance issuer shall be deemed to be a designated decisionmaker for purposes of subparagraph (A) with respect to the participants and beneficiaries of an employer or plan sponsor, whether or not the employer or plan sponsor makes such a designation, and shall be deemed to have assumed unconditionally all liability of the employer or plan sponsor under such designation in accordance with subsection (o), unless the employer or plan sponsor affirmatively enters into a contract to prevent the service of the designated decisionmaker.

(17) NO EFFECT ON STATE LAW.—No provision of this section shall be construed to—

(A) be applicable in connection with any denial of a claim for benefits of any individual under the plan and was a proximate cause of the personal injury or death that is the subject of the claim.

(B) LIMITATION.—Subparagraph (A) does not apply in connection with any directed recordkeeper to the extent that the directed recordkeeper fails to follow the specific instructions of the plan or the employer or other plan sponsor, including the distribution of enrollment information and distribution of disclosure materials under this Act or title I of the Bipartisan Patient Protection Act of 2001 and whose duties do not include making decisions on claims for benefits.

(C) LIMITATION.—Subparagraph (A) shall not be construed to—

(i) prohibit a cause of action under paragraph (1) where the nonpayment involved results in the participant or beneficiary being unable to receive further items or services that are directly related to the item or service involved in the denial referred to in subparagraph (A) or that are part of a continuing treatment or series of procedures;
(ii) assumes unconditionally all liability of the plan sponsor (or employee) to cover any losses as a result of liability arising under a decision declared as a designated decisionmaker under this part.

The appropriate amounts of liability insurance and minimum capital and surplus levels for purposes of subparagraphs (A) and (B) shall be determined by an actuary using sound actuarial principles and accounting practices pursuant to established guidelines of the American Academy of Actuaries and in accordance with such regulations as the Secretary may prescribe and shall be maintained throughout the term for which the designation is in effect. The provisions of this paragraph in the case of a designated decisionmaker that is a group health plan, plan sponsor, or health insurance issuer and that is regulated under Federal law or a State financial solvency law.

(4) LIMITATION ON APPOINTMENT OF TREATING PHYSICIANS.—A treating physician who directly delivered the care, treatment, or provided the patient services that subject the cause of action by a participant or beneficiary under subparagraph (a) or section 514(d)(9) may not be designated as a designated decisionmaker unless with respect to such participant or beneficiary.

(2) CONFORMING AMENDMENT.—Section 502(a)(1) of such Act (29 U.S.C. 1132(a)(1)) is amended—

(A) by striking "or" at the end of subparagraph (A);

(B) in subparagraph (B), by striking "plan," and inserting "plan;", and

(C) by adding at the end the following new subparagraph:

(2) FOR THE relief provided for in subsection (b) of this section (n) and 402(a) and as required under section 121(b)(9) of the Bipartisan Patient Protection Act.

Any liability assumed by a designated decisionmaker pursuant to this subsection shall be in addition to any liability that it may otherwise have under applicable law.

(2) QUALIFICATIONS FOR DESIGNATED DECISIONMAKERS.—

(A) IN GENERAL.—Subject to subparagraph (B), an entity is qualified under this paragraph to serve as a designated decisionmaker with respect to a participant or beneficiary under a group health plan if the entity has the ability to assume the liability described in paragraph (1) with respect to participants and beneficiaries under such plan, including requirements relating to the financial obligation for timely satisfying the assumed liability, and maintains with the plan sponsor and the Secretary certification of such ability. Such certification shall be provided to the plan sponsor and the Secretary certification of such ability. Such certification shall be provided to the plan sponsor and the Secretary certification of such ability.

(B) SPECIAL QUALIFICATION IN THE CASE OF CERTAIN REVIEWABLE DECISIONS.—In the case of a group health plan that provides benefits consisting of medical care to a participant or beneficiary only through health insurance coverage offered by a single health insurance issuer, such issuer is the only entity that may be qualified under this paragraph to serve as a designated decisionmaker with respect to such participant or beneficiary, and shall serve as the designated decisionmaker unless the employer or other plan sponsor acts affirmatively to prevent such service.

(3) REQUIREMENTS RELATING TO FINANCIAL OBLIGATIONS.—For purposes of paragraph (2)(A), the requirements relating to the financial obligation of an entity for liability shall include—

(A) coverage of such entity under an insurance policy or other arrangement, secured by such entity, to effectively insure such entity against losses arising from professional liability claims, including those arising from its service as a designated decisionmaker under this paragraph (B) evidence of minimum capital and surplus levels that are maintained by such entity.

(1) Section 102 relating to procedures for internal appeals of claims and prior authorization determinations.

(II) Section 103 of such Act (relating to internal appeals of claims denials).

(III) Section 104 of such Act (relating to independent external review procedures).

(II) EXCEPTION FOR CERTAIN ACTIONS FOR WRONGFUL DEATH.—Clause (i) shall not apply with respect to an action for wrongful death if the applicable State law provides (or has been construed to provide) for damages in such an action which are only punitive or exemplary in nature.

(III) EXCEPTION FOR WILLFUL OR WANTON DISREGARD FOR THE RIGHTS OR SAFETY OF OTHERS.—Clause (i) shall not apply with respect to any cause of action described in subparagraph (A) if, in such action, the plaintiff establishes by clear and convincing evidence that conduct carried out by the defendant with willful or wanton disregard for the rights or safety of others was a proximate cause of the personal injury or wrongful death that is the subject of the action.

(IV) DEFINITIONS.—

(A) GROUP HEALTH PLAN AND OTHER RELATED TERMS.—The provisions of sections 701 and 773 apply for purposes of this subsection in the same manner as they apply for purposes of part 7, except that the term "group health plan" includes a group health plan as defined in section 701(b).

(B) PERSONAL INJURY.—The term 'personal injury' means a physical injury and includes an injury arising out of the treatment of a personal injury to treat a mental illness or disease.

(C) CLAIM FOR BENEFIT; DENIAL.—The terms "claim for benefit" and 'denial of a benefit' include actions brought under section 1144 and 1144(c) is amended—

(1) NON-PREEMPTION OF CERTAIN CAUSES OF ACTION.—

(A) IN GENERAL.—Except as provided in this subsection, nothing in this title (including section 502) shall be construed to supersede or otherwise alter, amend, modify, invalidate, or impair any cause of action under State law of a participant or beneficiary under a group health plan (or the estate of such a participant or beneficiary) to recover damages resulting from personal injury or for wrongful death against any person if such cause of action arises by reason of a medically reviewable decision.

(B) MEDICALLY REVIEWABLE DECISION.—For purposes of subparagraph (A), the term 'medically reviewable decision' means a denial of a claim for benefits under the plan which is described in section 104(d)(2)(B) of the Bipartisan Patient Protection Act of 2001 (relating to medically reviewable decisions).

(2) LIMITATION ON PUNITIVE DAMAGES.—

(A) IN GENERAL.—Except as provided in clauses (ii) and (iii), with respect to a cause of action described in subparagraph (A) brought with respect to a participant or beneficiary under a group health plan, the Bipartisan Patient Protection Act of 2001 were satisfied with respect to the participant or beneficiary:

(1) Section 102 relating to procedures for internal appeals of claims and prior authorization determinations.

(II) Section 103 of such Act (relating to internal appeals of claims denials).

(III) Section 104 of such Act (relating to independent external review procedures).

(II) EXCEPTION FOR CERTAIN ACTIONS FOR WRONGFUL DEATH.—Clause (i) shall not apply with respect to an action for wrongful death if the applicable State law provides (or has been construed to provide) for damages in such an action which are only punitive or exemplary in nature.

(III) EXCEPTION FOR WILLFUL OR WANTON DISREGARD FOR THE RIGHTS OR SAFETY OF OTHERS.—Clause (i) shall not apply with respect to any cause of action described in subparagraph (A) if, in such action, the plaintiff establishes by clear and convincing evidence that conduct carried out by the defendant with willful or wanton disregard for the rights or safety of others was a proximate cause of the personal injury or wrongful death that is the subject of the action.

(IV) DEFINITIONS.—

(A) GROUP HEALTH PLAN AND OTHER RELATED TERMS.—The provisions of sections 701 and 773 apply for purposes of this subsection in the same manner as they apply for purposes of part 7, except that the term 'group health plan' includes a group health plan as defined in section 701(b).

(B) PERSONAL INJURY.—The term 'personal injury' means a physical injury and includes an injury arising out of the treatment of a personal injury to treat a mental illness or disease.

(C) CLAIM FOR BENEFIT; DENIAL.—The terms 'claim for benefit' and 'denial of a benefit' include actions brought under section 1144 and 1144(c) is amended—

(1) NON-PREEMPTION OF CERTAIN CAUSES OF ACTION.—

(A) IN GENERAL.—Except as provided in this subsection, nothing in this title (including section 502) shall be construed to supersede or otherwise alter, amend, modify, invalidate, or impair any cause of action under State law of a participant or beneficiary under a group health plan (or the estate of such a participant or beneficiary) to recover damages resulting from personal injury or for wrongful death against any person if such cause of action arises by reason of a medically reviewable decision.

(B) MEDICALLY REVIEWABLE DECISION.—For purposes of subparagraph (A), the term 'medically reviewable decision' means a denial of a claim for benefits under the plan which is described in section 104(d)(2)(B) of the Bipartisan Patient Protection Act of 2001 (relating to medically reviewable decisions).

(2) LIMITATION ON PUNITIVE DAMAGES.—

(A) IN GENERAL.—Except as provided in clauses (ii) and (iii), with respect to a cause of action described in subparagraph (A) brought with respect to a participant or beneficiary under a group health plan, the Bipartisan Patient Protection Act of 2001 were satisfied with respect to the participant or beneficiary:
(B), the actual making of such decision or the exercise of control in making such decision or in the conduct constituting the failure.

(ii) RULES OF CONSTRUCTION.—For purposes of the employer or plan sponsor (or employee) shall not be construed to be engaged in direct participation because of any form of decisionmaking or other conduct that is merely collateral or precedent to the decision described in subparagraph (B) on a particular claim for benefits of a particular participant or beneficiary, including (but not limited to) any participation by the employer or plan sponsor (or employee) in the processing of creating, continuing, modifying, or terminating the plan or any benefit under the plan or in the process not intentionally focused solely on the particular situation of the participant or beneficiary referred to in paragraph (1)(A); and

(iii) any participation by the employer or other plan sponsor (or employee) in the design of any benefit under the plan, including the amount of copayment and limits connected with such benefit;

(iv) irrelevance of certain collateral efforts made by employer or plan sponsor.—For purposes of this subparagraph, an employer or plan sponsor (or employee) shall not be treated as engaged in direct participation in a decision with respect to any claim for benefits or denial thereof in the case of any participant or beneficiary solely by reason of—

(I) any efforts that may have been made by the employer or plan sponsor to advocate for authorization of coverage for that or any other participant or beneficiary (or any group of participants or beneficiaries), or

(ii) that any efforts that may have been made by the employer or plan sponsor for benefits which are not covered under the terms and conditions of the plan for that or any other participant or beneficiary (or any group of participants or beneficiaries).

(v) PREEMPTION OF EXHAUSTION.—

(A) IN GENERAL.—Except as provided in subparagraph (B), a review under section 502(e)(1)(A)(i) may not be brought under paragraph (1)(A) after 10 additional days after the date on which such time period has expired and the filing of such action shall not affect the duty of the independent medical reviewer (or reviewers) to make a determination pursuant to section 502(e)(1)(A)(i).

(B) EXCEPTIONS FOR NEEDED CARE.—A participant or beneficiary may bring an action under section 502(d) after 10 additional days after the date on which such time period has expired and the filing of such action shall not affect the duty of the independent medical reviewer (or reviewers) to make a determination pursuant to section 104(e)(1)(A)(i).

(C) EXCEPTION FOR NEEDED CARE.—A participant or beneficiary may bring an action under section 502(d) after 10 additional days after the date on which such time period has expired and the filing of such action shall not affect the duty of the independent medical reviewer (or reviewers) to make a determination pursuant to section 502(e)(1)(A)(i).
Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by section 402(a), is amended further by adding at the end the following new subsection:

'‘(q) LIMITATIONS ON ACTIONS RELATING TO GROUP HEALTH PLANS.—

‘‘(1) IN GENERAL.—Except as provided in paragraph (2), no action may be brought under subsection (a)(1)(B), (a)(2), or (a)(3) by a participant or beneficiary seeking relief based on the application of any provision in section 118(a)(3), 119, or 120 of the Bipartisan Patient Protection Act (as incorporated under section 714). This subsection shall apply to all civil actions that are filed on or after January 1, 2002.‘‘

SEC. 404. LIMITATIONS ON ACTIONS.

Section 502 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132) (as amended by section 402(a)) is amended further by adding at the end the following new subsection:

'‘(q) LIMITATIONS ON ACTIONS RELATING TO GROUP HEALTH PLANS.—

‘‘(1) IN GENERAL.—Except as provided in paragraph (2), no action may be brought under subsection (a)(1)(B), (a)(2), or (a)(3) by a participant or beneficiary seeking relief based on the application of any provision in section 118(a)(3), 119, or 120 of the Bipartisan Patient Protection Act (as incorporated under section 714). This subsection shall apply to all civil actions that are filed on or after January 1, 2002.‘‘

SEC. 405. COOPERATION BETWEEN FEDERAL AND STATE AUTHORITIES.

It is the sense of the Senate that the court should consider the loss of a nonwaive earning spouse or parent as an economic loss for the purposes of the Bipartisan Patient Protection Act. Furthermore, the court should define the compensation for the loss not as minimum services, but rather in terms of full and whole replacement cost for the family.
c) TREATMENT OF RELIGIOUS NONMEDICAL PROVIDERS.—

(1) IN GENERAL.—Nothing in this Act (or the amendments made thereby) shall be construed to—

(A) restrict or limit the right of group health plans, and of health insurance issuers offering health insurance coverage, to include as providers religious nonmedical providers;

(B) require such plans or issuers to—

(i) utilize medically based eligibility standards or criteria in deciding provider status of religious nonmedical providers; or

(ii) use medical professionals or criteria to decide patient access to religious nonmedical providers;

(C) require such plans or issuers to exclude religious nonmedical providers because they do not provide medical or other required data, inconsistent with the religious nonmedical treatment or nursing care provided by the provider.

(2) RELIGIOUS NONMEDICAL PROVIDER.—For purposes of this subsection, the term ‘religious nonmedical provider’ means a provider who provides no medical care but who provides only religious nonmedical treatment or nursing care.

(d) TRANSITION FOR NOTICE REQUIREMENT.—

The disclosure of information required under section 121 of this Act shall first be provided pursuant to—

(1) subsection (a) with respect to a group health plan that is maintained as of the general effective date, not later than 30 days before the beginning of the first plan year to which title I applies in connection with the plan under such subsection; or

(2) subsection (b) with respect to a individual health insurance coverage that is in effect as of the general effective date, not later than 30 days before the first date as of which title I applies to the coverage under such subsection.

SEC. 502. COORDINATION IN IMPLEMENTATION.

The Secretary of Labor and the Secretary of Health and Human Services shall ensure, through the execution of an interagency memorandum of understanding among such Secretaries, that—

(1) regulations, rulings, and interpretations issued by such Secretaries relating to the same matter over which such Secretaries have responsibility under the provisions of this Act (and the amendments made thereby) are administered so as to have the same effect at all times; and

(2) coordination of policies relating to enforcing the same requirements through such Secretaries in order to have a coordinated enforcement strategy that avoids duplication of enforcement efforts and assigns priorities in enforcement.

SEC. 503. SEVERABILITY.

If any provision of this Act, an amendment made by that provision, or any part thereof, is held to be unconstitutional, the remainder of this Act, the amendments made by that provision, and the application of the provisions of such to any person or circumstance shall not be affected thereby.

TITLe VI—MISCELLANEOUS PROVISIONS

SEC. 601. NO IMPACT ON SOCIAL SECURITY Trust Funds.

(a) IN GENERAL.—Nothing in this Act (or any amendment made by this Act) shall be construed to alter or amend the Social Security Act (or any regulation promulgated under that Act).

(b) TRANSFERS.—

(1) EXISTING OR SECRETARY.—The Secretary of the Treasury shall annually estimate the impact that the enactment of this Act has on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401).

(2) TRANSFER OF FUNDS.—If, under paragraph (1), the Secretary of the Treasury estimates that the enactment of this Act has a negative impact on the income and balances of the trust funds established under section 201 of the Social Security Act (42 U.S.C. 401), the Secretary shall transfer, not less frequently than quarterly, from the general revenues of the Federal Government an amount sufficient so as to ensure that the income and balances of such trust funds are not reduced as a result of the enactment of such Act.

SEC. 602. CUSTOMERS USER FEES.

Section 1300j(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 85j((3)) is amended by striking ‘‘2003’’ and inserting ‘‘2011, except that fees may not be charged under paragraphs (9) and (10) of such subsection after March 31, 2006’’.

SEC. 603. FISCAL YEAR 2002 MEDICARE PAYMENTS.

Notwithstanding any other provision of law, any letter of credit under part B of title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.) that would otherwise be sent to the Treasury shall be inserted in the Medicare Reserve Account on September 30, 2002, by a carrier with a contract under section 1824 of that Act (42 U.S.C. 1395u) shall be sent on October 1, 2002.

SEC. 604. SENSE OF SENATE WITH RESPECT TO PARTICIPATION IN CLINICAL TRIALS AND ACCESS TO SPECIALTY CARE.

(a) FINDINGS.—

(1) Breast cancer is the most common form of cancer among women, excluding skin cancer.

(2) During 2001, 182,800 new cases of female invasive breast cancer will be diagnosed, and 40,800 women will die from the disease.

(3) In addition, 1,400 male breast cancer cases are projected to be diagnosed, and 400 men will die from the disease.

(4) Breast cancer is the second leading cause of cancer death among all women and the leading cause of cancer death among women between ages 40 and 55.

(5) This year 8,600 children are expected to be diagnosed with cancer.

(6) 1,500 children are expected to die from cancer this year.

(7) There are approximately 333,000 people diagnosed with multiple sclerosis in the United States and 200 more cases are diagnosed each week.

(8) Parkinson’s disease is a progressive disorder of the central nervous system affecting 1,000,000 in the United States, and 6,500 new cases are diagnosed each year.

(9) An estimated 186,100 men will be diagnosed with prostate cancer this year.

10. 31,500 men will die from prostate cancer this year.

11. While information obtained from clinical trials is essential to finding cures for diseases and therapies that improve the quality of life, trial participation bears the risk of fatal results. Future efforts should be taken to protect the health and safety of adults and children who enroll in clinical trials.

(12) While employers and health plans should be responsible for covering the routine costs associated with federally approved clinical trials and health plans should not be held legally responsible for the design, implementation, or outcome of such clinical trials, consistent with any applicable State or Federal liability statutes.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) women battling life-threatening, deadly diseases, including advanced breast or ovarian cancer, should have the opportunity to participate in a federally approved or funded clinical trial recommended by their physician;

(2) an individual should have the opportunity to participate in a federally approved or funded clinical trial recommended by their physician if—

(A) that individual—

(i) has a life-threatening or serious illness for which no standard treatment is effective; and

(ii) is eligible to participate in a federally approved or funded clinical trial according to the trial protocol with respect to treatment of the illness;

(B) that individual’s participation in the trial offers meaningful potential for significant clinical benefit for the individual; and

(C) either—

(i) the referring physician is a participating health care professional and has concluded that the individual’s participation in the trial would be appropriate, based upon the individual meeting the conditions described in subparagraph (A); or

(ii) the participant, beneficiary, or enrollee provides medical and scientific information establishing that the individual’s participation in the trial would be appropriate, based upon the individual meeting the conditions described in subparagraph (A).

(3) a child with a life-threatening illness, including cancer, should be allowed to participate in a federally approved or funded clinical trial if that participation meets the requirements of paragraph (2);

(4) that a child with a rare disease should be allowed to go to a cancer center capable of providing high quality care for that disease; and

(5) a health maintenance organization’s decision that an in-network physician without the necessary expertise can provide care for a seriously ill patient, including a woman battling cancer, should be appealable to an independent, impartial body, and that this same right should be available to all Americans in need of access to high quality specialty care.

SEC. 605. SENSE OF THE SENATE REGARDING FAIR REVIEW PROCESS.

(a) FINDINGS.—

(1) A fair, timely, impartial independent external appeals process is essential to any meaningful program of patient protection.

(2) The independence and objectivity of the review organization and review process must be ensured.

(3) It is incompatible with a fair and independent appeals process to allow a health maintenance organization to select the review organization that is entrusted with providing a neutral and unbiased medical review.

(4) The American Arbitration Association and arbitration standards adopted under chapter 44 of title 28, United States Code (28 U.S.C. 1738 et seq.) are inherently unfair, the right of one party to a dispute to choose the judge in that dispute.
PLANS.—If the Secretary, in any report submitted to the Secretary of Health and Human Services shall make, within 2 years after the general effective date referred to in section 606(a)(1), and annually thereafter for each of the succeeding 4 calendar years (or until a repeal is effective under subsection (b)), a report concerning the impact of this Act, and the views organizations. (b) ANNUAL REVIEW.—If the Secretary, in any report submitted under subsection (a), determines that the recoupment of costs in the 2 years after the enactment of this Act, and the views organizations. (c) FUNDING.—From funds appropriated to the Department of Health and Human Services shall be available to the Secretary of Health and Human Services for the purpose of conducting audits of health insurance companies and plans that have failed to file reports under subsection (a), to the extent that any member of the species Homo sapiens at any point prior to being born alive as defined in this section.

(b) DEFINITION.—In this section, the term "person", "human being", "child", and "individual" as including born-alive infant.

(b) LIMITATION WITH RESPECT TO CERTAIN PLANS.—If the Secretary, in any report submitted under subsection (a), determines that more than 30% of individuals in the United States have lost their health insurance coverage as a result of the enactment of this Act, as compared to the number of individuals with health insurance coverage in the 12-month period preceding the date of enactment of this Act, section 402 of this Act shall be repealed effective on the date that is 12 months after the date on which the report is submitted, and the submission of any further reports under subsection (a) shall not be required.

(c) FUNDING.—From funds appropriated to the Department of Health and Human Services for fiscal years 2003 and 2004, the Secretary of Health and Human Services shall provide funding as necessary to study and develop the appropriate process for selection of the independent external review entity.

SEC. 606. ANNUAL REVIEW.

SEC. 607. DEFINITION OF BORN-ALIVE INFANT.

(a) In general.—Chapter 1 of title 1, United States Code, is amended by adding at the end the following:

"*8. 'Person', 'human being', 'child', and 'individual' as including born-alive infant.*"

(b) As used in this section, the term "born alive", with respect to a member of the species Homo sapiens, means the complete expulsion or extraction from his or her mother of that member, at any stage of development, who after such expulsion or extraction breathes or has a beating heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, regardless of whether the umbilical cord has been cut, and regardless of whether the expulsion or extraction occurs as a result of natural or induced labor, other than professional medical treatment performed in a medical environment.

(c) Nothing in this section shall be construed to affirm, deny, extend, or contract any legal status or legal rights applicable to any member of the species Homo sapiens at any point prior to being born alive as defined in this section.

(b) MEDICAL AMENDMENT.—The table of sections at the beginning of title 1, United States Code, is amended by adding at the end the following new item:

"1. 'Person', 'human being', 'child', and 'individual' as including born-alive infant."

(b) SENSE OF THE SENATE.—It is the sense of the Senate that the Senate should be empowered to maintain and develop the appropriate process for selection of the independent external review entity.

(b) LIMITATION WITH RESPECT TO CERTAIN PLANS.—If the Secretary, in any report submitted to the appropriate committees of Congress a report concerning the impact of this Act, and the views organizations. (b) ANNUAL REVIEW.—If the Secretary, in any report submitted under subsection (a), determines that the recoupment of costs in the 2 years after the enactment of this Act, and the views organizations.

SEC. 606. ANNUAL REVIEW.

SEC. 607. DEFINITION OF BORN-ALIVE INFANT.

(a) In general.—Chapter 1 of title 1, United States Code, is amended by adding at the end the following:

"*8. 'Person', 'human being', 'child', and 'individual' as including born-alive infant.*"

(b) As used in this section, the term "born alive", with respect to a member of the species Homo sapiens, means the complete expulsion or extraction from his or her mother of that member, at any stage of development, who after such expulsion or extraction breathes or has a beating heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, regardless of whether the umbilical cord has been cut, and regardless of whether the expulsion or extraction occurs as a result of natural or induced labor, other than professional medical treatment performed in a medical environment.

(c) Nothing in this section shall be construed to affirm, deny, extend, or contract any legal status or legal rights applicable to any member of the species Homo sapiens at any point prior to being born alive as defined in this section.

(b) MEDICAL AMENDMENT.—The table of sections at the beginning of title 1, United States Code, is amended by adding at the end the following new item:

"1. 'Person', 'human being', 'child', and 'individual' as including born-alive infant."

The PRESIDING OFFICER. Is there objection?

Mr. WELSTON. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. REID. Mr. President, therefore, I move to proceed to the consideration of H.R. 333, and I will send a cloture motion to the desk. I also ask unanimous consent that on Thursday, July 12, beginning at 9 a.m., there be a period for debate of 3 hours prior to the cloture vote to be divided as follows: 2 hours under Senator WELLSTONE's control, and 1 hour equally divided between the chairman and ranking member of the Judiciary Committee, or their designees; that if cloture is invoked, the Senate proceed to the bill by consent and Senator LEAHY, or his designee, be recognized to offer the text of S. 420, the Senate-passed bankruptcy bill, as a substitute amendment; that if a cloture motion is filed on that amendment, the cloture motion on the substitute amendment mature on Tuesday, July 17; that prior to that vote, there be a period for debate beginning at 9 a.m., divided as follows: 2 hours under the control of the senior Senator from Minnesota, Mr. WELLSTONE, and 1 hour equally divided between the chairman and ranking member of the Judiciary Committee, or their designees; that once the substitute amendment has been offered and cloture filed, the bill be laid aside until Tuesday, July 17; and that both mandatory quorum calls be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TUESDAY, JULY 10, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate resumes consideration of the supplemental appropriations bill tomorrow, Tuesday, at 10 a.m., there be 2 hours of concurrent debate equally divided between Senator LEAHY, and Senator CONRAD, or their designees, in relation to the amendment Nos. 866 and No. 865. Further, that following the use or yielding back of time, the amendments be laid aside.

The PRESIDING OFFICER (Mr. WELLSTONE). Without objection, it is so ordered.

Mr. REID. Mr. President, I also announce to the Senate that there will be every attempt made to have a vote at 2:15 p.m. on this or in relation to these two amendments. We are working on that now. We were very close to having agreement on that but were unable to do it.

The PRESIDING OFFICER. I order that the Sergeant-at-Arms do cause the vote to be taken and the result of it to be entered on the record.

Mr. REID. Mr. President, I ask unanimous consent that on Tuesday, July 10, immediately following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the supplemental appropriations bill; further, that the Senate recess from 12:30 to 2:15 for our weekly party conferences.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, on Tuesday, the Senate will convene at 10 a.m. and resume consideration of the supplemental appropriations bill. The Senate is going to recess from 12:30 to 2:15 for the weekly party conferences. Rollcall votes are expected as the Senate works
to complete action on the supplemental appropriations bill tomorrow. It could be a late evening. We have a number of amendments we are trying to resolve. Senator BYRD and Senator STEVENS want to finish that, as does the majority leader, Senator DASCHLE.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 7:20 p.m., adjourned until Tuesday, July 10, 2001, at 10 a.m.
EXTENSIONS OF REMARKS

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, July 10, 2001 may be found in the Daily Digest of today’s RECORD.

MEETINGS SCHEDULED

JULY 11

9 a.m.

Governmental Affairs

Business meeting to consider the nomination of Othoneh Armendariz, of Texas, to be a Member of the Federal Labor Relations Authority; and the nomination of Kay Coles James, of Virginia, to be Director of the Office of Personnel Management.

SD–342

9:30 a.m.

Governmental Affairs

To hold hearings on S. 803, to enhance the management and promotion of electronic Government services and processes by establishing a Federal Chief Information Officer within the Office of Management and Budget, and by establishing a broad framework of measures that require using Internet-based information technology to enhance citizen access to Government information and services.

SD–342

Appropriations

Labor, Health and Human Services, and Education Subcommittee

To hold hearings to examine genomic research issues.

SH–216

Commerce, Science, and Transportation

To hold hearings to examine existing laws protecting Internet privacy both in the United States and abroad, and the impact privacy legislation may have on the market.

SR–253

Armed Services

Readiness and Management Support Subcommittee

To hold hearings on proposed legislation authorizing funds for fiscal year 2002 for the Department of Defense and the Future Years Defense Program, focusing on the readiness of United States military forces and the fiscal year 2002 budget amendment.

SR–222

10 a.m.

Finance

To continue hearings to examine the role of tax incentives in energy policy.

SD–215

Health, Education, Labor, and Pensions

To hold hearings to examine the achievement of parity for mental health services.

SD–430

2 p.m.

Appropriations

District of Columbia Subcommittee

To continue hearings on proposed legislation making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 2002.

SD–192

Armed Services

Strategic Subcommittee

To hold hearings on proposed legislation authorizing funds for fiscal year 2002 for the Department of Defense and the Future Years Defense Program, focusing on the budget request for national security space programs, policies, operations, and strategic systems and programs.

SR–222

2:30 p.m.

Intelligence

To hold closed hearings on intelligence matters.

SH–219

3 p.m.

Foreign Relations

To hold hearings on the nomination of Aubrey Hooks, of Virginia, to be Ambassador to the Democratic Republic of the Congo; the nomination of Donald J. McConnell, of Ohio, to be Ambassador to the State of Eritrea; the nomination of Peter R. Chaves, of Pennsylvania, to be Ambassador to the Republic of Sierra Leone; the nomination of Nancy J. Powell, of Iowa, to be Ambassador to the Republic of Ghana; and the nomination of George McCade Staples, of Kentucky, to be Ambassador to the Republic of Cameroon, and to serve concurrently and without additional compensation as Ambassador to the Republic of Equatorial Guinea.

SD–419

5:45 p.m.

Armed Services

Closed business meeting with British Secretary of State for Foreign and Commonwealth Affairs.

SR–236

JULY 12

8:30 a.m.

Agriculture, Nutrition, and Forestry

To hold hearings on the nomination of James R. Moseley, of Indiana, to be Deputy Secretary of Agriculture; and the nomination of Joseph J. Jen, of California, to be Under Secretary of Agriculture for Research, Education, and Economics, to be followed by hearings to examine the context, framework, and content of the comprehensive federal Farm Bill authorization and new agriculture policy that can provide a more sustainable and predictable long-term economic safety net.

SR–332

9 a.m.

Appropriations

Energy and Water Development Subcommittee

Business meeting to consider the nomination of Patricia Lynn Scarlett, of California, to be Assistant Secretary for Policy, Management, and Budget; the nomination of William Gerry Myers III, of Idaho, to be Solicitor, the nomination of Bennett William Raley, of Colorado, to be Assistant Secretary for Water and Science, the nomination of Frances P. Mainella, of Florida, to be Director of the National Park Service, the nomination of John W. Keys III, of Utah, to be Commissioner of Reclamation, all of the Department of the Interior; the nomination of Vicky A. Bailey, of Indiana, to be Assistant Secretary of Energy for International Affairs and Domestic Policy; a proposed revision of the statement for completion by presidential nominees; and the appointment of subcommittee membership.

   calendar business.

SD-366
The House met at 2 p.m. and was called to order by the Speaker pro tempore (Mr. Simpson).

DESIGNATION OF THE SPEAKER PRO TEMPORE
The SPEAKER pro tempore laid before the House the following communication from the Speaker:

I hereby appoint the Honorable Michael K. Simpson to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER
The Reverend Larry D. Ferguson, Senior Pastor, Christ Church, Plymouth, Indiana, offered the following prayer:

Dear Heavenly Father, Creator of the Universe, we come to You on behalf of this Nation and more particularly on behalf of the United States House of Representatives. Lord, we come here for several reasons. You said in Jeremiah 33:3, "Call unto Me and I will answer you." We are calling unto You now, Lord. You said in Your great book of wisdom, Proverbs, Chapter 3, Verses 5 and 6, "Lean not on your own understanding, acknowledge Me in all of your ways, and I will direct your paths." Lord, we are acknowledging You right now.

Father, You said in Matthew, 7:7, "Ask and it shall be given to you, seek and you shall find, knock and it shall be opened unto you." Lord, we are asking, seeking and knocking right now.

Father, You are our Jehovah Jireh, our Provider, and we are looking unto You. We recognize that You have all wisdom, all power, and all understanding.

So, Father, as this House argues and debates important issues, when the vote is taken and the dust settles, we pray that the consensus will be Your will. We seek for Your will to be done on Earth, as it is in Heaven.

We pray, Lord, that when decisions have been made, that there will be a mutual respect and camaraderie between those that have taken different positions on each issue. And, Lord, after this day is completed, that somehow, You will be glorified and we and this Nation will be blessed.

In the name of our Lord and Saviour Jesus Christ, the One that died on the Cross and rose again that we might have victory over sin and death. Amen.

THE JOURNAL
The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof. Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE
The SPEAKER pro tempore. Will the gentleman from Indiana (Mr. Buyer) come forward and lead the House in the Pledge of Allegiance.

Mr. BUYER led the Pledge of Allegiance.

WELCOMING THE REVEREND LARRY D. FERGUSON, SENIOR PASTOR, CHRIST CHURCH, PLYMOUTH, INDIANA
(Mr. BUYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUYER, Mr. Speaker, the opening prayer for today's House session has been given to us by Pastor Larry Ferguson. Pastor Ferguson ministers at Christ Church in Plymouth, of Marshall County, Indiana, where he has been a Senior Pastor for 6 years with his wife Kathy, and his Pastor's son Darin, and his wife Kathy, who is also in the United States Air Force and is present in the gallery today.

Pastor Ferguson preached his first sermon as a freshman in high school and later completed 4 years of training for the ministry at Cincinnati Bible Seminary in Cincinnati, Ohio. Since that time, he has been involved in providing spiritual nourishment to many. Whether it is in providing leadership as a principal to a Christian school, giving guidance to Christian churches who are struggling, or nurturing the health of marriages and families, Pastor Ferguson has been following the Biblical admonition to "heal the broken-hearted."

Pastor Ferguson has also used his talents to proclaim the Gospel through song and over the airwaves in Christian radio ministry.

For 35 years, Pastor Ferguson has been ministering, and he has touched more lives than he may ever know. I am thankful for his prayer today, and in his prayer I agree that in this House, we do quest for the greater understanding.

ALLOW HOUSE TO VOTE OPPOSING HOLDING OLYMPICS IN CHINA
(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS, Mr. Speaker, as probably one of the most bipartisan Members of this body, I call on the Republican leadership to allow this House to vote on whether the Olympics should be held in the Communist dictatorship of China.

Three months ago, with an overwhelming bipartisan vote, the House Committee on International Relations expressed itself against China holding the Olympics by approving H. Con. Res. 73. I am asking the Speaker and the majority leader no longer to bottle up our legislation and to allow the representatives of the American people to speak their minds on this issue.

Religion is persecuted, political freedom does not exist, media freedom does not exist, our airplane is forced down, our servicemen and women are held in captivity for 11 days; yet this body is not allowed to vote on whether the Olympics should be held in Beijing.

Mr. Speaker, allow us a vote.

TIME FOR GOVERNOR DAVIS TO TAKE A STAND
(Mr. BALLENGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BALLENGER, Mr. Speaker, I rise today to discuss the real cause of the rolling blackouts and out-of-control energy prices in California. Governor Davis and his big government cronies caused California's energy crisis through their backward and politically motivated approach to energy. Bowing to pressure from radical environmentalists and advice from his pollsters, Governor Davis increased regulation of the energy industry, thus prohibiting increased energy production and limiting modernization of infrastructure. The Davis approach is the wrong approach.

Now, in order to save his political future, Governor Davis has put political
advisors on the government payroll. Not only do Californians have to pay outrageous prices to cool their homes, but they also have to pay for consultants to tell Governor Davis how to minimize the political damage caused by his mishandling of California’s energy needs. Even California’s Democrat state comptroller has said that she will not pay for Davis’s political expenses with the taxpayers’ dime.

Throughout this crisis, Gray Davis has been seeking political remedies instead of looking for positive solutions to solve the real-life problems of his citizens. All the while, California families are suffering. It is time for the Governor to take a stand and do what is right for California, instead of what is right for his career.

CORRUPTION AT THE JUSTICE DEPARTMENT

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, FBI Agent Hanssen pleaded guilty to spying for Russia. Now, think about it: First he said, the devil made me do it; now he says he just wants to make amends. Spare me.

The truth is Janet Reno sold the farm to China. FBI agents are spying for Russia, nuclear military secrets are disappearing faster than Viagra at Niagara, and nobody is doing anything about it. Nothing. Beam me up.

Wake up, Congress, and smell the espionage. I yield back the massive corruption at the Justice Department that goes without meaningful oversight.

AMERICANS DESERVE ENERGY SOLUTIONS, NOT BLACKOUTS

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, the United States of America has the strongest economy in this world, and to maintain America’s prosperity, America must have energy.

Over the past few months, California, an undisputed driving force in our Nation’s economy, has had to endure rolling blackouts during the past several months. And now, the fastest growing city in the United States, Las Vegas, Nevada, has also witnessed rolling blackouts due to energy shortages.

Blackouts cannot and should not be tolerated.

It is time to implement real solutions to reverse the energy shortage. Through conservation methods and through expansion and development of our natural energy resource base, we can provide abundant and less costly energy. But to do this we need to implement a national energy policy that includes greater production of diverse energy supplies and an equal reliance on bold conservation measures.

This balanced energy policy will ensure that when Americans flick on that light switch, that their lights always go on, and blackouts will be a thing of the past.

SIGN DISCHARGE PETITION NO. 2

(Mr. FILNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FILNER. Mr. Speaker, here we are, a year after the electricity crisis hit California and the West. The crisis and suffering continues. And where is the President? Not one item in his energy plan addresses the crisis in the West. And where is FERC, the Federal Energy Regulatory Commission? They seem more intent on protecting the industry than the consumers who pay their bills.

A year after the crisis, we have not yet had a debate on this House floor on resolving the issues in California and the West.

The bill that is coming up through the Committee on Commerce does nothing to address this crisis in California. The only way to get a fair discussion on the House floor is to sign Discharge Petition No. 2. That allows and puts in order any bill that really addresses the issues in the West and electricity.

It is time to put cost-based rates on the price of electricity and refund the criminal overcharges since last year.

Mr. Speaker, let us have a debate on this House floor. Sign Discharge Petition No. 2.

PRESIDENT SHOWS STRONG COMMITMENT TO NASA

(Mr. BRADY of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADY of Texas. Mr. Speaker, as a former member of the House Committee on Science, I am a strong supporter of NASA and the International Space Station. So is President Bush, but you would not know so if you listened to some of the rumors going around Houston and our Johnson Space Center.

But here are the facts. Only last year NASA told us on the Committee on Science that they would need $14.4 billion for the coming year. Even after they raised the request recently, the President’s budget meets that request at $14.5 billion; meets NASA’s request. The President also increases funding for the space station, for the launch initiative, and keeps a sustained level of six space shuttle flights.

Understandably, at budget time you are going to have some partisan spin, but, seriously, how can you criticize the President when he gives NASA what it asked for, at a level nearly $1 billion higher than where it has languished for 4 of the last 5 years?

The fact is, for space supporters in Congress, we have never started a budget year so strongly, and our congressional appropriators are trying to do more. Unfortunately, only in Washington are budget increases spun as budget cuts.

SUPPORT BIPARTISAN PATIENT PROTECTION ACT OF 2001

(Mrs. CHRISTENSEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. CHRISTENSEN. Mr. Speaker, now that we are back from the Independence Day recess and the celebration of the passage of the Patients’ Bill of Rights, the one introduced by the gentleman from Michigan (Mr. GINGELL), the gentleman from Iowa (Mr. GANSKE) and the gentleman from Georgia (Mr. NORWOOD), must be at the top of our agenda.

This bill, the Bipartisan Patient Protection Act of 2001, is the only one which comprehensively reforms the current managed care system to better meet the needs of those who elected us. During the break misinformation and scare tactics continued. It is important that the American public know the truth.

Many of the ads say that the bill would raise the cost of insurance. Not true. What they fail to say is that in the past 3 years or so, the cost of managed care has already increased at an average of 7.1 percent, and the increase is projected to be in double digits for this year. The ads also fail to tell us that while the costs have gone up, less services are covered.

Where the same provisions have been enacted in States, there have not been any extraordinary increases in premiums or significant increases in lawsuits. What has happened is that the people in those States have been able to access medically necessary health care, and we need to extend that to the rest of the Nation.

Mr. Speaker, let us pass the bill and let us move on to reduce disparities and provide universal coverage.

DENY OLYMPICS TO CHINA

(Mr. SPENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SPENCE. Mr. Speaker, what fellowship does light have with darkness? The President, what he gives NASA, what it asked for, at a level nearly $1 billion higher than where it has languished for 4 of the last 5 years?

What fellowship does the symbol of the human spirit, the Olympic Games, have with Chinese tyranny?

Sixty-four years ago the Nazi propaganda machine proudly flaunted the
1936 Olympic Games as an example of the leadership of Adolph Hitler. That horrible miscalculation by the International Olympic Committee gave credibility to a man and a regime that killed 6 million Jews.

Amazingly, 44 years later, the IOC granted the games, the 1980 games to the Soviet Union on the very eve of their launch of the war against Afghanistan. Today, the IOC is ignoring history and considering awarding the international games of peace to the People’s Republic of China in 2008.

I say again, Mr. Speaker, what fellowship does light have with darkness? What fellowship does the symbol of the human spirit have with Chinese tyranny? Let it be the voice from this citadel of liberty that the International Olympic Committee should say “no” to Beijing for the 2008 Olympic games.

PATIENTS’ BILL OF RIGHTS

(Mr. BERRY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BERRY. Mr. Speaker, here we go again. Once again, we are taking up the Patients’ Bill of Rights in this House. We have already passed a good, a true, an honest Patients’ Bill of Rights in the House of Representatives. We passed it in the 105th Congress; we passed it in the 106th. It was a bipartisan effort. Now we are going to be presented with a new Patients’ Bill of Rights that they say is 80 percent like the real Patients’ Bill of Rights, the Ganske-Dingell-Norwood-Berry bill.

Mr. Speaker, it is amazing that we are going to try once again to fool the American people and trick them into believing that the insurance companies are not going to control their destiny when it comes to health care. The fact is, if we do not pass the Ganske-Dingell-Norwood-Berry bill, Mr. Speaker, the energy production in the United States is equally important as that produced outside of the United States. In fact, more so. It enhances environmental standards. It promotes energy efficiency. It promotes research and development, and it provides reliable and affordable supplies.

Mr. Speaker, it matches a very important truism: we cannot produce food and fiber in the United States without oil and gas, and we cannot produce oil and gas without food and fiber. We need to be a partnership in all aspects of producing the energy needs of this country.

We encourage our colleagues to take a good look at our suggestion. We look forward to working with both sides of the aisle in developing this national energy policy, as well as with the administration.

COMMUNICATION FROM THE HONORABLE MARK E. SOUDER, MEMBER OF CONGRESS

The Speaker pro tempore laid before the House the following communication from the Honorable Mark E. Souder, Member of Congress:

H. CON. RES. 170

July 10, 2001

WASHINGTON, DC

HOUSE OF REPRESENTATIVES

Dear Mr. Speaker: This is to formally notify you, pursuant to Rule VIII of the Rules of the House of Representatives, that my office has been served with a civil subpoena for documents issued by the Superior Court for Allen County, Indiana in a civil case pending there.

After consultation with the Office of General Counsel, I have determined that it is consistent with the precedents and privileges of the House to advise the party who issued the subpoena that I have no documents that are responsive to the subpoena.

Sincerely,

Mark E. Souder,

Member of Congress.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SIMPSON). Pursuant to clause 8 of rule XX, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered or on which a vote is objected to under clause 6 of rule XX.

Any record votes on postponed questions will be taken after debate has concluded on all motions to suspend the rules, but not before 6 p.m. today.

ENCOURAGING CORPORATIONS TO CONTRIBUTE TO FAITH-BASED ORGANIZATIONS

Mr. WHITFIELD. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 170) encouraging corporations to contribute to faith-based organizations.
may have 5 legislative days within which to revise and extend their remarks on this legislation and to insert extraneous material on the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. WHITFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of House Concurrent Resolution 170, which calls on America’s corporations to increase their support of faith-based charities.

In 1999, the last year in which facts were available, a total of $190.16 billion were contributed to charities throughout America. Of that amount, corporations contributed $43.9 billion or 23 percent of the total amount given to charities in America came from corporations. Unfortunately, some of America’s largest corporations as a matter of policy explicitly discriminate against faith-based organizations.

Now, there are many effective charitable groups throughout our country. These organizations have developed effective programs to assist people to recover from drug and alcohol addiction, provide food and shelter for the homeless, rehabilitate prison inmates, and to teach job skills that will allow individuals to move from poverty to productivity, from dependence to independence.

Now, in this resolution, we are not encouraging faith-based groups to do any proselytizing. As a matter of fact, they do not proselytize and recommend their particular religion. They are there to help, serve one purpose only, and that is to provide assistance to people who need assistance.

For example, charities like the Alpha Alternative Pregnancy Care Center in my hometown of Hopkinsville, Kentucky. There are places where women in an unwanted pregnancy situation can turn for Christian compassion and help in a time of great personal crisis. They minister to their clients with parenting skills, classes, material assistance, and counseling. If this faith-based charity were to receive corporate support, perhaps Alpha Alternative could also expand its services to include other medical diagnostic services and job training programs. But with corporate policies banning support for worthwhile faith-based charities, community groups like Alpha Alternative will never reach their true potential.

I ask my colleagues today to join with me in voting for this resolution calling on the conscience of America’s largest companies not to discriminate against an organization that is successfully advancing philanthropic and human causes, and not to discriminate merely because they happen to be faith based. As I said earlier, these groups are not out proselytizing. They are not out trying to impose their religion on anyone, and this legislation is not trying to impose religion on anyone. This legislation simply asks corporate America to help effective organizations, whether they be faith based or secular.

Mr. Speaker, I reserve the balance of my time.

Mr. EDWARDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am not sure exactly what role Congress should have in trying to dictate to American families or American corporations how they should contribute their charitable contributions and to whom they should contribute those dollars, but I would say of the faith-based initiative resolution has, in effect, no real legal teeth to it. Much of it is a sense of Congress, and to the extent that the goal of this resolution is to say to individuals and corporate leaders to take a look at faith-based charities in America, they are doing a lot of good work addressing social problems, then I endorse that approach.

Were this resolution more than in effect, a sense of Congress and was actually going to dictate policy corporate trusts, I certainly would have thought it would have made sense for the House committees to have met either the Committee on the Judiciary, or the Committee on Commerce, to at least have a hearing on this to try and direct $1.9 billion in charitable giving. It is my understanding that there was no House committee hearing of either the Committee on the Judiciary or the Committee on Commerce on this measure. However, because this resolution is basically a voluntary message to corporations to consider the good work of many faith-based charities, I would not adamantly object to the principal goal of this.

Mr. Speaker, I would like to comment on today is why this voluntary approach toward giving to faith-based charities is much more acceptable to me and other Members of Congress and religious leaders than the President’s faith-based initiative. The President’s faith-based initiative in contrast to this has several fundamental flaws, and if this bill had any of these flaws built into it in the essence of law, I would oppose this resolution.

First of all, the President’s faith-based initiative as exemplified in H.R. 7 would lead to religious strife, as thousands of different faith-based groups would be competing for tens of billions of Federal tax dollars. If one wants to write a prescription for religious strife in America, Mr. Speaker, I could think of no better way to do it than to have thousands of churches and houses of worship coming to our Nation’s capital and competing before Cabinet Members for tens of billions of dollars of Federal money.

The fourth problem I have with the faith-based initiative and the President’s program in contrast to this resolution is that the President’s faith-based initiative would actually subsidize, subsidize religious discrimination. It would actually take Federal tax dollars and allow a faith-based group to put up a sign, paid for by our tax dollars, that would say, no Jew, no Catholic, no Mormon, no Baptist need apply here for a federally funded job. I think that type of approach to helping charities is really a great retreat in our 40-year march toward greater civil rights in America.

The fifth objection I have to the President’s proposal on faith-based initiatives versus this sense of Congress resolution is that the President’s proposal really puts Congress and faith-based groups into a Catch-22. If we say that they cannot use Federal dollars to proselytize, to push their religion and their faith upon others, then, in effect, what we are doing is giving Federal dollars to faith-based groups and saying that they can proselytize in faith-based organizations.

In effect, the President’s program, if implemented, would actually take the faith out of faith-based organizations, the very thing I would believe the gentleman from Kentucky (Mr. WHITFIELD) and I would agree makes many faith-based organizations so special, the fact that they can inject their faith into their process of turning around people’s lives and solving their problems.

So my point, Mr. Speaker, is this: I am not sure exactly whether this should be a top priority today for Congress, and in fact a sense of Congress resolution, to be telling corporate foundations how to spend billions of dollars, but I do applaud the gentleman from Kentucky (Mr. WHITFIELD) in what I interpret is his basic approach, to send a message to America to say, let’s support the good work of faith-based organizations.

As a person of faith, I believe these organizations are doing excellent work in many cases. Not in all cases, but in
Mr. Speaker, unlike my friend and colleague, the gentleman from Kentucky, for yielding time to me, and for his kind words.

Mr. Speaker, the seeds for this resolution come from a speech that our President gave at the University of Notre Dame commencement ceremony a few months ago. In that speech, President Bush laid out for America a challenge "was to revive the spirit of citizenship, to marshal the compassion of our people to meet the continuing needs of our Nation."

He went on to remind us that, in his words, "It is not sufficient to praise charities and community groups. We must support them." This is both a public obligation and a personal responsibility.

Mr. Speaker, unlike my friend and colleague the gentleman from Texas, I hope this body will take up H.R. 7, the Community Solutions Act, and take it up soon. It will create enhanced incentives for charitable giving, it will expand charitable choice, it will break down the barriers that prevent charitable sectors from being greater partners in the war on poverty.

I believe the debate on the faith-based initiative will be a great and historic one, one that may help us turn the corner in the war on poverty, so I am a strong and passionate supporter.

But in the meantime, this resolution that is before us today is designed to nudge corporate America into providing even more immediate reinforcements to faith-based organizations that are already taking up the mission that the President has called for, organizations that have heeded the President’s call, and that of so many, many American leaders that have gone before him.

This resolution seeks to draw attention to charitable efforts that are already under way, that are already working so beautifully; more importantly, to draw attention to the sad lack of support that these groups have received, not from individuals but from America’s wealthiest foundations.

This resolution celebrates good news, and it points out tragic news.

First, the good news. As both of the previous speakers have noted, each Member of this House can point with pride and with great satisfaction to organizations in his or her community that are lifting lives and healing neighborhoods and making a wonderful difference. These groups are the conscience of our people. They are helping people recover from drug and alcohol addiction. They are providing shelter, comfort, and food for the homeless. They are rehabilitating prison inmates and breaking the cycle of recidivism.

Hundreds of these organizations were represented recently at the faith-based summit here in Washington. As a participant in that summit, I can say there was more positive energy for poverty relief gathered here in the Capital than at any time in decades.

There were wonderful organizations like Rawhide Boys Ranch from northeastern Wisconsin. Established nearly four decades ago as a faith-based alternative to juvenile detention, Rawhide accepts 100 troubled boys each year without regard to race or religious belief or economic background. These boys are counseled, given personal academic and vocational training, and they are taught discipline and given love. This program changes lives because it changes hearts.

There were organizations like Urban Hope, a faith-based ministry in Green Bay, Wisconsin, committed to empowering and revitalizing people and communities through entrepreneurship; yes, entrepreneurship. It teaches credit and budgeting, entrepreneurial ideas, and has a microloan program. In its brief time of existence, it has launched over 121 new businesses in the Green Bay area.

Of course, nearly every community in America has a Bureau of Catholic Charities. There are over 1,600 agencies, institutions, and organizations that make up Catholic Charities. Over 9½ million people each year, people who are in need, turn to them for services ranging from adoption to soup kitchens, child care to prison ministry, disaster relief to refugee and immigration assistance.

In summary, these armies of compassion are fighting brush fires all across this great land.

Now the sad news, the tragic news. According to the Capital Research Center, my colleague, the gentleman from Kentucky (Mr. WHITFIELD) has just mentioned, the 10 largest U.S. corporate foundations have given away roughly $2 billion each year to charities, but a mere fraction of that has gone to these organizations that each of us have referred to.

It has given little to them regardless of their effectiveness. In fact, of the 10 largest corporations in America, six have specific restrictions that either ban outright giving to faith-based organizations, or greatly restrict it.

Whatever the cause—whatever the reason, it is time for these restrictions to fall. It is time for the reticence of corporate America to end. It is time for corporate America, it is time for foundations and American citizens everywhere, to take up the cause of these organizations to contribute, to give them what they can, whether it be financial resources, tools, expertise, whatever they can give to help us fight poverty and the consequences of poverty.

I urge my colleagues to support this resolution. It is a sense of the Congress resolution, but it shines a spotlight on the wonderful work that is being done, and it shines a spotlight on the sad tragedy that too many corporations, too many foundations have not been there to help. I think shining this spotlight is important, and I hope it will make a difference.

Mr. Speaker, I would like to point out, not knowing the facts, since there was not a committee hearing on this, that some of the corporations whose charitable contributions are in effect being criticized today might not want to give to some faith-based groups because they do proselytize.

I know the gentleman from Kentucky talked about groups that do not proselytize. There are many faith-based groups that provide soup kitchens, alcohol and drug rehabilitation programs, and they do not proselytize. But there are many other faith-based groups that part of their very mission
as a religious, pervasively sectarian entity is to proselytize, to sell their faith to others to try to change their lives.

So not knowing what the policy is, these corporations, that might be one valid reason why many of these corporations choose not to give their philanthropy to faith-based organizations. Agreed and the gentleman from Kentucky today for pointing out the good work done by faith-based groups of many different religious faiths across the country. But Mr. Speaker, as we begin this opening chapter in the debate this summer on the role of government and faith-based organizations, I think it is important that we keep in historical perspective the reason why our Founding Fathers felt so strongly about the separation of government and its ability to regulate religion.

Mr. Speaker, many Americans would be surprised that God is not mentioned in America’s governing document, our Constitution. Was this an unintended omission? Did our Founding Fathers intend to show disrespect toward God and faith? Did they not understand the importance of religion in our country? One could imagine modern-day politicians railing against this “discrimination” against religion shown by our Founding Fathers. Worse yet, they could be attacked for beginning the Bill of Rights with these words: “Congress shall make no law respecting an establishment of religion.”

Were Madison, Jefferson, and others guilty of anti-religious, anti-faith discrimination? The truth is, our Founding Fathers did not mention God in our Constitution not out of disrespect to God or religion, but out of total reverence for religious liberty. They believed that liberty proved that government involvement harmed rather than helped religion.

Jefferson wrote reverently of the wall of separation between church and State. Mr. Speaker, that wall of separation is not designed to keep people of faith out of government, but rather, to keep government and its regulations out of religion and our faith.

Were our Founding Fathers right or wrong in separating politics from religion? Let us fast-forward to today’s world. In Denmark, churches are subsidized by taxes, and church attendance is extremely low. In China, citizens are put in prison for their religious beliefs. In Afghanistan, the government is taking religious minorities and forcing them to wear identification symbols that evoke Nazi tactics. In the Middle East and Sudan, religious differences have been the basis for conflict and hatred and terrorism.

In contrast to those countries where government and religion are so entwined, in the United States religious faith and freedom, tolerance, and generosity are flourishing. The difference is that in the other countries, government and religion are intertwined. But in the United States, our Bill of Rights prohibits government from direct involvement in our religion and our own personal faith.

Madison and Jefferson were not so anti-religion after all when they created the wall of separation between church and State. As I said, that wall is not intended to keep people of faith out of being involved in government or having a voice in government, but rather, it was clearly intended to keep government from being able to control religion.

How wise they were in establishing that wall. Maybe our Founding Fathers expressed true reverence in recognizing that faith should be a matter only between an individual and God, with no need for government interference.

Despite what our Founding Fathers and all the lessons of human history, I believe it should alarm Americans of all faiths that the administration and some Members of Congress propose other legislation, in contravention of the First Amendment, that would allow the Federal government to send billions of dollars directly to churches, synagogues and houses of worship. This proposal, soon to be voted on in the House, is known as charitable choice. Unlike this resolution, it would have the teeth of law.

So-called charitable choice legislation is a bad choice. Direct government funding of our houses of worship would inevitably lead to government regulation of religion. Government simply cannot spend billions of tax dollars without audits and regulations. Do we really want Federal auditors and investigators digging through the financial records of our churches, synagogues, and houses of worship? Do we really want government officials deciding which religions and which houses of worship should receive billions of Federal tax dollars? I could not think of a better cause or a better way to destroy the separation of church and state.

Charitable choice legislation is not designed to keep people of faith out of government, but rather, to keep government and its ability to regulate religion out of religion and our faith.

Our Founding Fathers understood that government involvement harmed rather than helped religion. Mr. Speaker, that wall is not designed to keep government and its regulations out of religion and our faith.

Mr. Speaker, I yield back the balance of my time.
I also want to thank my friend, the gentleman from Texas (Mr. Edwards). I appreciate his support of this resolution and his unwavering support with me and others on tax alternatives. He has been consistent. We have a disagreement on charitable choice and government funding, but we do not oppose private funding. It is wrong for us to cast aspersions on others who disagree with certain parts because we have an honest disagreement about what this country should do and how we should proceed. And we have had several good debates on that. This resolution is not part of that debate.

This resolution should be unanimous because those who oppose public funds also speak in favor of private funds, and this encourages more private-sector funding. But if corporate private-sector funding does not go to faith-based and is biased against faith-based organizations as well, where do these resource-poor organizations go?

Many of our most effective poverty-fighting organizations are in the country's toughest areas, in the poorest areas of my hometown of Fort Wayne, of Milwaukee, of Chicago, of New York, of Boston, wherever you go, they are people rich but resource poor. They are often struggling to get through that day or that week. They often have volunteers who work many, many hours and into the night. When government employees often leave at 5 o'clock, we see these people volunteering, because many of the problems in our toughest neighborhoods occur between 10 at night and 4 in the morning; not often when government employees are there. Often they work without health benefits or any other kind of benefits. Also, the churches from which they arise often have no financial resources.

We are talking about the church itself or the ministry. Because I agree, if the money goes straight to the churches and gets incorporated and they become dependent on that, we will wreck the churches of America, like has happened to some degree, as the gentleman from Texas (Mr. Edwards) pointed out, around the world. But this is in their outreach ministries. Can they, if they do not proselytize with government funds, can they be included in faith-based organizations?

Now, the problem, as President Bush has pointed out and the Capital Research Center and as previous speakers have previously pointed out, many of our top organizations ban funding for faith-based organizations. Number one, General Motors, says that contributions generally are not provided to religious organizations. Number three, the Ford Motor Company, says as a general policy they do not support religious or sectarian programs. Number four, ExxonMobile, says we do not provide funds for political or religious causes. Number six, IBM, does not make corporate donations or grants from corporate philanthropic funds to religious groups.

Where are they to turn? If the biggest funders deny them, if the government denies them, if their churches are poor, and yet they are the most effective, where do they turn?

In President Bush's Notre Dame commencement speech, and I am proud I graduated from Notre Dame and I am thrilled he gave this speech at Notre Dame, he quoted Knute Rockne, certainly the most famous football coach in American history, next to our fellow congressman, the gentleman from Nebraska (Mr. Osborne), Knute Rockne said, "I have found prayers work best when you have big players." Big players in this case are the volunteers and the dollars.

There has been a lot of misunderstanding about President Bush's faith-based initiative. He has always said from the beginning that private giving is first and foremost. The amount of private giving in America far exceeds anything that the government will do in these areas.

Number one are individual contributions, which are in this bill, which would allow nonitemizers to tax deduct, as well as some other incentives for individual giving and corporate giving; and, number two, is to urge corporate foundations and corporate entities themselves to give private donations. That is where the real dollars will come, and that is where there is the least strings. At a minimum, this Congress should not only pass this resolution today but the tax part of the President's initiative.

His second most important part was the so-called compassion fund, because even now faith-based organizations are eligible but I do not know where the grants are. They have no idea, a lot of times, what the laws are on proselytizing, how to set up 501(c)(3)'s, how to get sued and so they do not get intermingled. That compassion fund is a critical part of the President's agenda. All the focus has been on number three, which we have already passed through the House, which is already law in welfare reform, and which is law in other areas, and that is the so-called charitable choice provision. It is important. I strongly support it.

The bill that passed out of the committee just before we left for the July 4th break made the differentiations that I believe are needed to follow constitutional law, and I strongly support that. But it is most important for us to remember that the key thing is to get the dollars to where the resources, the people resources are. And that starts first and foremost with individual giving and corporate giving.

Once again, I commend the gentleman from Wisconsin (Mr. Green) for his resolution today, for our House leadership, for the gentleman from Kentucky (Mr. Whitfield), and the gentleman from Texas (Mr. Edwards), and others, for doing this. We are a diverse country that needs to protect our diversity. But our multiple faiths in this country will always be the anchor of our diversity.

Mr. Speaker, I include for the Record the commencement speech the President gave at Notre Dame, which I referred to earlier.

REMARKS BY THE PRESIDENT IN COMMENCEMENT ADDRESS

THE PRESIDENT: Thank you, Father Malloy. Thank you all for that warm welcome. Chairman McCartan, Father Scully, Dr. Hatch, Notre Dame trustees, members of the class of 2001. (Applause.) It is a high privilege to receive this degree. I'm particularly pleased that it bears the great name of Notre Dame. My brother, Jeb, may be the Catholic in the family—(laughter)—but being from Florida, I'm the only Domer. (Laughter and applause.)

I have spoken in this campus once before. It was in 1980, the year my Dad ran for Vice President with Ronald Reagan. I think I really won over the crowd that day. (Laughter.) In fact, I'm sure of it, because all six of them walked me to my car. (Laughter.)

That was back when what was then the Catholic university and is now the top Catholic university in the world was president of this university, during a tenure that in many ways defined the reputation and values of Notre Dame. It's a real honor to be with Father Hesburgh, and with Father Joyce. Between these, two good priests have given nearly a century of service to Notre Dame. I'm told that Father Hesburgh, now holds 146 honorary degrees. (Applause.) That's pretty darn impressive. Father, but I'm gaining on you. (Laughter.) As of today, I'm only 146 behind. (Laughter.)

Let me congratulate all the members of the class of 2001. (Applause.) You made it, and we're all proud of you on this big day. I also congratulate the parents, who, after these years, are happy, proud—and broke. (Laughter and applause.)

I commend this fine faculty, for the years of work and instruction that produced this outstanding class. And I'm pleased to join my fellow honorees, as well. I'm in incredibly distinguished company: athletes, church officials and an eminent scientist. We're sharing a memorable day and a great honor, and I congratulate you all. (Applause.)

Notre Dame, as a Catholic university, carries forward a great tradition of social teaching. It calls on all of us, Catholic and non-Catholic, to honor family, to protect life in all its stages, to serve and uplift the poor. This university is more than a community of scholars. It is a community of conscience—and an ideal place to report on our nation's commitment to the poor, and how we're keeping it.

In 1964, the year I started college, another President from Texas delivered a commencement address talking about this national commitment. In that speech, President Lyndon Johnson issued a challenge. He said, "This is the time for decision. You are the generation which must decide. Will you decide to leave the future a society where a man is condemned to hopelessness because he was born poor? Or will you join to wipe out poverty in this land?"

In that speech, Lyndon Johnson advocated a War on Poverty. He has noble intentions and enduring success. Poor families got basic health care; disadvantaged children were
Given a head start in life, yet, there were also times that no one wanted or intended. The welfare entitlement became an enemy of personal effort and responsibility, turning many recipients into dependents. The War on Poverty also turned too many young people, for the wrong reasons, into a generation that compassion had become the work of government alone.

In 1996, welfare reform confronted the first of these problems, with a five-year time limit on benefits, and a work requirement to receive them. Instead of a way of life, welfare became of temporary use, a program, not an entitlement, but a transition. Thanks in large part of this change, welfare rolls have been cut in half. Work and self-respect have been returned to many lives. This is a tribute to the Republicans and democrats we agreed on reform, and to the President who signed it: President Bill Clinton. (Applause.)

Our nation has confronted welfare dependency. But our work is only half done. Now we must confront the second problem: to revive the spirit of citizenship—to marshal the compassion of people to meet the continuing needs of our nation. This is a challenge to my administration, and to each one of you. We must meet that challenge—because, if we don’t, it is personal support on the hard road to recovery.

Welfare as we knew it has ended, but poverty has not. When over 12 million children live below the poverty line, we are not a post-poverty America. Most states were among the first wave of welfare recipients who have reached the law’s five-year time limit. The easy cases have already left the welfare rolls. The hardest problems remain—people with far fewer skills and greater barriers to work. People with complex human problems, like illiteracy and addiction, abuse and mental illness. Often they don’t know what will happen to them, to their families, to their children. But we cannot sit and watch, leaving them to their own struggles and their own fate.

There is a great deal at stake. In our attitudes and actions, we are determining the character of our country. When poverty is considered normal, the War on Poverty is consigned to permanent social division, becoming a nation of caste and class, divided by fences and gates and guards. Our nation should be clear, and it’s difficult: we must build our country’s unity by extending our country’s blessings. We make that commitment because we are Americans. Aspiration is the essence of our country. We believe in social mobility, not social Darwinism. We are the country of the second chance, where failure is never final. And that dream has sometimes been deferred. It must never be abandoned.

We are committed to compassion for practical reasons. When men and women are lost to themselves, they are also lost to our nation. When millions are hopeless, all of us are diminished by the loss of their gifts. And we’re committed to compassion for moral reasons. Jewish prophets and Catholic teaching both speak of God’s special concern for the poor. This is the most radical teaching of faith—that the value of life is not dependent, or contingent upon skill. That value is a reflection of God’s image.

Much of today’s poverty has more to do with a failed society than a troubled economy. And often when a life is broken, it can only be restored by another caring, concerned human being. The answer for an abandoned child, the answer for an abused child—it requires the presence of a mentor. The answer to addiction is not a demand for self-sufficiency—it is personal support on the hard road to recovery.

The hope we seek is found in safe havens for battered women and children, in homeless shelters, in crisis pregnancy centers, in programs that tutor and conduct job training and social work when they happen to be on parole. All these efforts prove not just a benefit, but attention and kindness, a touch of courtesy, a dose of grace.

Mother Teresa said that what the poor often need, even more than shelter and food— though these are desperately needed, as we ought to know—is the sense of belonging is within the power of each of us to provide. Many in this community have shown what compassion can accomplish.

Notre Dame’s own Lou Nanni is the former director of South Bend’s Center for the Homeless—an institution founded by two Notre Dame professors. It provides guests with everything from drug treatment to mental health service, to classes in the Great Books, to preschool for young children. Discipline is tough. Faith is encouraged. The men and women who come are committed and consistent and central to its mission. Lou Nanni describes this mission as “repairing the fabric” of society by letting people know they are no rejects, they are a gift from God and God-given potential of every human being.

Compassion often works best on a small and human scale. It is generally better when a call for help is local, not long distance. Here at this university, you’ve heard that call and responded. It is part of what makes Notre Dame great and its president, the late Rev. Theodore Hesburgh, a saint.

This is my message today: there is no national society which is not a caring society. And any effective war on poverty must deploy what Dorothy Day called “the weapons of spirit.”

There is only one problem with groups like South Bend’s Center for the Homeless—there are not enough of them. It’s not sufficient to praise charities and community groups, we must support them. And this is both a public obligation and a personal responsibility.

For example, the War on Poverty made a federal commitment to the poor. The welfare reform legislation of 1996 made that commitment more effective. For the task ahead, we must follow the lead of our首页 the War on Poverty in America. Our society must enlist, equip and empower idealistic Americans in the works of compassion that only they can provide.

Government has an important role. It will never be replaced by charities. My administration increases funding for major social welfare and poverty programs by 8 percent. Yet, government must also do more to take the side of charities and community healers, and support their work. We’ve had enough of the stale debate between big government and a shallow, indifferent government. Government must be active enough to fund services for the poor— and humble enough to let good people in local communities provide those services.

So I have created a White House Office of Faith-based and Community Initiatives. (Applause.) Through that office we are working to encourage churches, help faith based and non-itemizers. (Applause.) This could encourage almost $15 billion a year in new charitable giving. My attitude is, everyone in America—whether they are well-off or not—should have the same incentive and reward for giving.

And we’re in the process of implementing and expanding “charitable choice”—the idea that already exists in the tax law, that faith-based organizations should not suffer discrimination when they compete for contracts to provide social services. (Applause.) Government should applaud the teaching of faith, but it should support the good works of the faithful. (Applause.)

Some critics of this approach object to the idea of government funding going to any group motivated by faith. But they should take a look around them. Public money already goes to groups like the Center for the Homeless and, on a larger scale, to Catholic Charities. Do the critics really want to cut them off? Medicaid and Medicare money currently goes to religious hospitals. Should that be banned? Of course not. (Applause.)

America has a long tradition of accommodating and encouraging religious institutions when they pursue public goals. My administration did not create that tradition—but we will expand it to confront some urgent problems.

Today, I am adding two initiatives to our agenda, in the areas of housing and drug treatment. Owning a home is a source of dignity for families and stability for communities—and organizations like Habitat for Humanity make that dream possible for many low income Americans. Groups of this type currently receive some funding from the Department of Housing and Urban Development. The budget I submit to Congress next year will propose a three-fold increase in this funding—which will expand homeownership, and the hope and pride that come with it. (Applause.)

And nothing is more likely to perpetuate poverty than a life enslaved to drugs. So we’ve proposed $1.6 billion in new funds to combat this disease. I call this the plan to close the gap between 5 million Americans who need drug treatment, and the 2 million who currently receive it. We will also propose that all federal support for drug treatment go to faith-based and community groups.

The federal government should do all these things; but others have responsibilities, as well—including corporate America.

Many corporations in America do good work, in good causes. But if we hope to substantially reduce poverty and suffering in our country, corporate America needs to give more—and to give better. (Applause.)

Faith-based organizations do not receive only a tiny percentage of overall corporate giving. Currently, six of the 10 largest corporate givers in America explicitly rule out or restrict donations to faith-based groups, regardless of their effectiveness. The federal government will not discriminate against faith-based organizations, and neither should corporate America.

In the same spirit, I hope America’s foundations consider ways they may devote more of their money to our nation’s neighborhood organizations that help the homeless. Let’s work together to convene a summit this fall, asking corporate and philanthropic leaders throughout America to join me at the White House to discuss how to remove barriers to giving to community organizations—both secular and religious.
Ultimately, your country is counting on each of you. Krute Knolke once said, "I have found that you work best when you have big players." (Laughter.) We can pray for the justice of our country, but you're the big players we need to achieve it.

Government can promote compassion, corporations and foundations can fund it, but the citizens—it's the citizens who provide it. A determined assault on poverty will require both an active government, and active citizens.

There is more to citizenship than voting—though I'd strongly advise you to pay them. (Laughter.) Citizenship is empty without concern for our fellow citizens, without the ties that bind us to one another and build a common good.

If you already realize this and you're acting on it, I thank you. If you haven't thought about it, I leave you with this challenge: serve a neighbor in need. Because a life of service is a life of significance. Because if a life is to be truly meaningful, ultimately, it is borne of service and consumerism can build a prison of wants. Because a person who is not responsible for others is a person who is truly alone. Because there are few better ways to express our love for America than to care for other Americans. And because the same God who endows us with individual rights also calls us to social obligations.

So let me return to Lyndon Johnson's charge. You're the generation that must decide. Will you ratify poverty and division with your apathy—or will you build a common good with your idealism? Will you be the spectator in the renewal of your country—our citizen?

The methods of the past may have been flawed, but the idealism of the past was not an illusion. Your calling is not easy, because you must do the acting and the caring. But there is fulfillment in that sacrifice, which creates hope for the rest of us. Every life you help proves that every life might be helped. The act itself proves the possible. And hope is always the beginning of change.

Thank you for having me, and God bless. (Applause.)

Mr. WHITFIELD. Mr. Speaker, how much time is remaining?

The SPEAKER pro tempore (Mr. SIMPSON). The gentleman from Kentucky has 2 minutes remaining.

Mr. WHITFIELD. Mr. Speaker, I yield myself the balance of my time.

I want to thank the gentleman from Wisconsin (Mr. GREEN) for bringing this important issue to the forefront. We have a lot of people in America reaching out asking for a helping hand.

We have a lot of organizations who have programs in place that can assist those people. This resolution today simply calls on corporate America to not discriminate against a group simply because they are faith-based.

I would also like to thank the gentleman from Texas for his remarks today.

Mr. TAUZIN. Mr. Speaker, I too rise in support of H. Con. Res. 170, which calls for increased support of faith-based charities by U.S. corporations.

The United States is blessed with an industrious people and great wealth; we are the envy of the world. But a great and prosperous nation can and must do better—each of us has a duty to alleviate the suffering of the poor and oppressed in our own communities. Some of the most effective organizations for meeting the needs of poor Americans are faith-based, yet these are the very groups that face discrimination by corporate America.

According to Leslie Lenkowsky in last month's edition of Commentary, in 1998 only some 2 percent of the money donated by the nation's largest foundations went to religiously affiliated institutions, and much of that was earmarked for institutions like hospitals and universities. The Capital Research Center found that six of the ten largest companies in America explicitly "ban or restrict" donations to faith-based charities.

Why would some of the greatest corporations in the country institute policies that prevent funding of some of America's most effective charities at a time when Congress has taken a leading role in knocking down discriminatory barriers that prevent faith-based charities from competing for government grants and contracts?

On a bipartisan basis, Congress started the work of expanding charitable choice in 1996 with welfare reform, and followed up with the welfare-to-work grant program in 1997. In 1998, Congress added charitable choice to the Community Services Block Grant Program and in 2000 we added charitable choice to substance abuse treatment and prevention services under the Public Health Services Act.

We know that these programs work, and the States are also finding great success. A study of Indiana's "Faith Works" program, which allows welfare recipients to get assistance from faith-based charities instead of secular providers, found that those opting for such charities came from more distressed family situations and had deeper personal crises than those opting for the secular alternative. The study concluded that what these people found at faith-based charities was more emotional and spiritual support than what could ever be offered by a secular institution. In some personal situations additional support might be the difference between life and death.

I predict that Congress will knock down more barriers against faith-based charities in programs like the Community Health Centers program this year, and many more next year. As Congress has already moved to provide more access to faith-based charities by Americans in the greatest need, I believe that Congress should call on American corporations to give more even-handedly and generously to faith-based charities.

Mr. STARK. Mr. Speaker, I rise today in opposition of H. Con. Res. 170, a Resolution Encouraging Corporations to Contribute to Faith-Based Organizations.

I am a strong supporter of corporations increasing donations to philanthropic organizations to help the most needy in our society. Even with the strong economy over the past few years, many Americans have not shared in this nation's prosperity. Thus, more corporate donations are needed to help the many Americans living in poverty.

However, it is important for the government advocating corporate support of one charitable organization over another. Our Founding Fathers included the establishment clause in the United States Constitution to ensure that the government did not play the role of endorsing religion. This policy has given Americans the freedom to carry out their religious worship in whichever manner they choose without fear of government oppression. Today, this resolution takes the first step toward the government playing the role of supporting religious charitable organization over others and challenging the founding Father's willingness to promote the establishment clause in our constitution.

Even more disturbing, it appears that this resolution is the first step in the Bush Administration attempting to promote their faith-based initiative that supports the misguided action of promoting government sponsored discrimination. It has been reported that the Bush administration has agreed to create a regulation that would allow religious charitable organizations to legally avoid hiring gay employees because of their sexual orientation in exchange for these groups' support for their faith-based initiative.

In the mid-20th century, many racial minorities, women and gays began the long fight for equal rights in this nation. It is a fight that still has a long way to go. The struggle of these groups has inspired not a country to make America a better place where all men and women are truly created equal.

If the reported allegation about the administration creating a regulation to promote discrimination is true, then the Bush Administration has signaled to the nation that it wants to return to the dark days in this nation's history when our government sponsored discrimination against certain groups. If today, the Bush Administration is willing to support government sponsored discrimination against homosexuals, then which group is next? Will it be women? Will it be African Americans or Hispanics? Will it be religious worshippers of Catholicism, Judaism or the Nation of Islam? I urge the Bush Administration to return to the dark days in this nation's history when our government sponsored discrimination against certain groups.

I urge my colleagues to oppose H. Con. Res. 170 and say no to discrimination.
CONGRESSIONAL RECORD—HOUSE 12721

Whereas June 26th of each year is the United Nations Day in Support of Victims of Torture: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That, on the occasion of the United Nations International Day in Support of Victims of Torture, Congress pays tribute to all victims of torture in the United States and around the world who are struggling to overcome the physical scars and psychological effects of torture.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Florida (Ms. ROS-LEHTINEN) and the gentleman from California (Mr. LAN- TOS) each will control 20 minutes. The Chair recognizes the gentle- woman from Florida (Ms. ROS- LEHTINEN).

Whereas June 26th of each year is the United Nations Day in Support of Victims of Torture: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That, on the occasion of the United Nations International Day in Support of Victims of Torture, Congress pays tribute to all victims of torture in the United States and around the world who are struggling to overcome the physical scars and psychological effects of torture.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Florida (Ms. ROS-LEHTINEN) and the gentleman from California (Mr. LAN- TOS) each will control 20 minutes. The Chair recognizes the gentle- woman from Florida (Ms. ROS- LEHTINEN).

General Leave

Ms. ROS-LEHTINEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the concurrent resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentle- woman from Florida?

There was no objection.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may con- sume.

The Convention against Torture and other Cruel, Inhuman or Degrading Treatment or Punishment underscores that freedom, justice, and peace rests on the recognition of the inalienable rights of all members of the human family.

It further states that these basic rights derive from the inherent dignity of the human person. Thus, when one individual suffers, all of humanity suffers. When one individual is tortured, the scars inflicted by such horrific treatment are not only on the victim but in the global system, as the use of torture undermines, debilitates, and erodes the very essence of that system.

Torture not only terrorizes individuals but entire societies, the impact of which is felt in future generations as well. It is used as a weapon against de- mocracy by eliminating the leadership of the opposition and by frightening the general population into submis- sion.

As a Member of Congress who rep-resents men, women, and children who have fled repressive regimes, I have witnessed firsthand the mental and physical damage that torture inflicts on the individual and on society as a whole. I have constituents who are Cuban refugees, for example, who have been subjected to electroshock treat- ment by Castro’s authorities because of their pro-democracy activities.

I represent one of the largest Holo- caust survivor communities in North America. My district includes victims of right-wing authoritative regimes as well as oppressive leftist totalitarian dictators. I have seen the anguish in their eyes as well as the strength of their spirit, their courage, and their determination.

There are more than 500,000 survivors of torture in the United States; and this resolution, Mr. Speaker, seeks to honor them.

House Concurrent Resolution 168 uses the occasion of the United Nations Day in Support of Victims of Torture as an opportunity to remember and pay hom- age to the victims of torture and to under- score the commitment that the United States Congress has outlined in the last few years through passage of the Torture Victims Relief Act of 1998 and the Torture Victims Relief Reau- thorization Act of 1999.

It is a message to the survivors in the U.S., and indeed throughout the world, that the U.S. has not forgotten their suffering nor its obligation as a global leader to help prevent such vio- lations of the inherent dignity of human beings. I ask my colleagues to support this bipartisan resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume; and I rise in strong support of H. Res. 168. I want to commend my dear friend and colleague, the gentlewoman from Florida (Ms. ROS-LEHTINEN), for intro- ducing this important resolution.

Mr. Speaker, I have the dubious dis- tinction of being the only Member of Congress ever to have lived under and fought against both a Nazi and a com- munist dictatorship. So torture is something with which I am personally and intimately familiar with.

The resolution before this House today pays tribute to the millions of courageous men and women who have suffered the terrible mental and physical damage perpetrated by other human beings. It is an unfortunate re- ality, Mr. Speaker, that around the globe on every continent men, women, and even children are abused by those who are in positions of authority and who abuse their power by inflicting harm on others.

Mr. Speaker, every year our Depart- ment of State in its country reports on human rights practices, catalogs for us the numerous countries involved in this heinous practice. Torture and other cruel, inhuman and degrading treatment or punishment is a violation of international law, Mr. Speaker, as reflected in the Convention Against Torture to which I am proud to say the United States is a party. But more than that, it is an attack on the de- cency of every human being who lives in a world where such heinous prac- tices exist.

Mr. Speaker, this House has been at the forefront of trying to ease the suf- fering of the many who have survived
these awful practices. We have initiated and passed legislation creating U.S. programs that address the psychological and physical needs of those who have survived brutal torture. These programs have helped thousands of such victims. It is only fitting that the House pay tribute to all of the victims of torture around the globe who are struggling to overcome the effects of torture.

Mr. Speaker, I urge all of my colleagues to support H. Res. 168.

Ms. ROS-LEHTINEN. Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, although the gentlewoman from Minnesota (Ms. McCOLLUM) has been with us only a short time, she has made an excellent name for herself in her commitment to the finest causes that we deal with.

Mr. Speaker, I yield such time as she may consume to the gentlewoman from Minnesota (Ms. MCCOLLUM).

Ms. MCCOLLUM. Mr. Speaker, I thank the gentlewoman from California for his kind words.

Mr. Speaker, I am proud to be part of a special organization located in Minnesota. It is The Center for Victims of Torture. The Center was established in 1985 to heal the emotional and physical scars of government-inflicted torture on individuals, their families, and our communities. Torture victims face debilitating and unimaginable social, physical, emotional and spiritual scarring.

Many survivors are challenged with daily constant anxiety, depression, and suffer from fear. Torture is a crime against humanity. It is a crime against all of us.

Today I stand here with my colleagues to ensure that the United States works in collaboration with all nations to end government-sponsored torture, to end policies and practices that violate human rights. Although the memories cannot be erased, the wounds can be healed.

Mr. LANTOS. Mr. Speaker, I yield such time as she may consume to the gentlewoman from California (Ms. WATSON).

Ms. WATSON. Mr. Speaker, I rise in support of H. Con. Res. 168, to express support for victims of torture, and I thank Congresswoman ROS-LEHTINEN for bringing this issue to the floor.

Although torture and other cruel, inhuman or degrading treatment is prohibited under international human rights law, state-officials in countries all over the world are responsible for the ill-treatment of individuals. Today, hundreds of thousands of victims of torture live in the United States. They are typically well-educated, well-trained people who were subjected to politically motivated torture by repressive regimes. They were tortured because of what they believe, what they said or did, or for what they represented. Many torture survivors suffer in silence, enduring incessant physical and emotional anguish. These courageous individuals, who often suffered for speaking out for freedom and justice, deserve, our full and uncompromising support.

When Congress passed the Torture Victims Relief Act of 1998, we agreed that victims should have access to rehabilitation services, enabling them to become productive members of our communities. I also encourage my colleagues to support the Torture Victim's Relief Re-authorization Act—H.R. 1405, to fund domestic torture treatment centers and the Human Rights Information Act—H.R. 1152, to facilitate the prosecution of torturers.

As a member of the Congressional Caucus on Human Rights, I join Congresswoman ROS-LEHTINEN and Congressman SMITH in this recognition of all victims of torture in the United States and around the world who are struggling to overcome their physical and psychological scars. I urge support of H. Con. Res. 168.

Mr. GILMAN. Mr. Speaker, at this time I wish to thank the Chairwoman of the Subcommittee on International Operation and Human Rights, the gentlelady from Florida (Ms. ROS-LEHTINEN), for reminding us of the role that the United States must take in combating the use of torture and other forms of degrading treatment or punishment throughout the world.

However, it is not enough to merely denounce torture without assiting the victims in their recovery from the physical and psychological effects that they suffer. People suffering from the effects of torture suffer from severe impairments, often requiring lengthy medical and psychological treatments. Torture victims are often ashamed or too traumatized to speak out against the practice, both in their countries of origin and abroad.

Because torture victims sometimes cannot speak for or help themselves, Americans want their government to speak for those victims, to provide assistance to stop human rights abuses, to investigate allegations of torture, and also to provide rehabilitation services for the victims of torture through the Torture Victims Protection Act. They also want us to press for universal protection against torture through the enforcement of the rights set out in the Universal Declaration of Human Rights, the Convention Against Torture, and the UN Charter. These are the themes of the worthy resolution before us, and we should start expressing our solidarity with the victims of torture in the United States and throughout the world.

Accordingly, I am pleased to join my colleagues in supporting H. Con. Res. 168.

Mr. LANTOS. Mr. Speaker, I yield back the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SIMPSON). The question is on the motion offered by the gentlewoman from Florida (Ms. ROS-LEHTINEN) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 168.

The question was taken. The SPEAKER pro tempore, in the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mrs. ROS-LEHTINEN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered. The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair’s prior announcement, further proceedings on this motion will be postponed.

TROPICAL FOREST CONSERVATION ACT REAUTHORIZATION

Mr. CHABOT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 231) to reauthorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004, as amended.

The Clerk read as follows:

H.R. 231
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ELIGIBILITY FOR BENEFITS.

Section 905(a)(2) of the Tropical Forest Conservation Act of 1998 (22 U.S.C. 2431c(a)(2)) is amended by striking “major”.

CONGRESSIONAL RECORD—HOUSE July 10, 2001
Mr. Speaker, I rise in strong support of H.R. 2131 which reauthorizes the Tropical Forest Conservation Act of 1998, and commend the gentleman from Ohio (Mr. PORTMAN) for introducing this reauthorization bill, and the gentleman from Illinois (Mr. HYDE), the chairman of the Committee on International Relations, for moving it so expeditiously through the legislative process.

Mr. Speaker, 3 years ago Congress overwhelmingly approved the landmark Tropical Forest Conservation Act. This legislation provided funding for the administration to pursue actively debt swaps, buybacks and other devices with developing nations in return for concrete efforts to protect tropical forests. Since Congress enacted this important legislation, the Clinton administration successfully concluded an agreement to reduce debt owed by the Government of Bangladesh to the United States in exchange for a new plan to protect 4 million acres of mangrove forests in that country. These forests protect the world’s only genetically secure population of Bengal tigers.

At the moment, Mr. Speaker, there are 11 nations on 3 continents interested in negotiating new tropical forest conservation debt reduction agreements with the United States. It is critical that the Bush administration continue the active implementation of the Tropical Forest Conservation Act. Tropical forests around the globe are rapidly disappearing. The latest figures indicate that 30 million acres of tropical forests are being lost every single year. This is an area larger than the State of Pennsylvania. Tropical forests harbor much of the world’s biodiversity. They act as carbon sinks, helping to reduce greenhouse gases as they absorb large amounts of carbon dioxide from the atmosphere, and provide habitat for many plant species that are used to develop life-saving medicines and pharmaceutical products.

It has been estimated that up to 30 million acres of tropical forests are lost each year, an area roughly the size of Pennsylvania. This alarming rate of destruction emphasizes the need to act, and act quickly, to preserve these valuable assets and biodiversity.

The Tropical Forest Conservation Act reauthorization is a sound, free-market approach to a very serious global environmental problem. It will encourage the preservation of tropical forests without creating a burden on the American taxpayer. It is a good, sensible piece of legislation. It is worthy of our support, and I urge its adoption.

Mr. Speaker, I commend my colleague, the gentleman from Ohio (Mr. PORTMAN) for proposing this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 2131 which reauthorizes the Tropical Forest Conservation Act of 1998, and commend the gentleman from Ohio (Mr. PORTMAN) for introducing this reauthorization bill, and the gentleman from Illinois (Mr. HYDE), the chairman of the Committee on International Relations, for moving it so expeditiously through the legislative process.

It will encourage the preservation of tropical forests without creating a burden on the American taxpayer. It is a good, sensible piece of legislation. It is worthy of our support, and I urge its adoption.

Mr. Speaker, I commend my colleague, the gentleman from Ohio (Mr. PORTMAN) for proposing this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. CHABOT. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. PORTMAN), the principal sponsor of the legislation.

Mr. PORTMAN. Mr. Speaker, I thank the gentleman from Ohio (Mr. CHABOT) for yielding me this time, and I thank the distinguished gentleman from California (Mr. LANTOS) for his statement and for his strong support of this legislation.

Mr. Speaker, I rise today in strong support of this legislation. It is bipartisan, it is bicameral, and it reauthorizes a program which can work well to address serious problems.

Four years ago, Mr. Speaker, we introduced this bill with 33 other colleagues in order to continue what is a very innovative conservation program which helps protect the world’s most valuable tropical forests through these debt-for-nature mechanisms.

Mr. Speaker, I also thank the gentleman from Illinois (Mr. HYDE) and the ranking member (Mr. LANTOS) gentleman from Nebraska (Mr. BEREURER) and other members of the Committee on International Relations, including the gentleman from Ohio (Mr. CHABOT), for their expedited consideration of the legislation and unanimous approval of it on June 20.

I also want to thank them for the improvements they made to the legislation. The three amendments that were accepted in committee, I think, perfect the legislation and make it work better, given the evolving nature of some of the debt-for-nature relationships we might have.

Four years ago I introduced this original bill with our former colleagues Lee Hamilton and John Kasich. It was approved by the House and passed by the Senate under unanimous consent, and was signed into law by President Clinton.

The legislation was developed with the support and input of a lot of people, including some of the major respected international environmental organizations such as the Nature Conservancy, the World Wildlife Fund and Conservation International. Their support and ongoing commitment to this program and their involvement in this program as a potential third party has been and will continue to be very valuable to its success.

Mr. Speaker, I also note that our freshman colleague, the gentleman from Illinois (Mr. KIRK), was instrumental in developing the original Tropical Forest Conservation Act when he
was a senior member of the Committee on International Relations staff. I am delighted that he is an original cosponsor of the legislation.

The United States has a significant national interest in protecting these forests around the world. As has been said by the gentleman from California (Mr. LANTOS), these forests provide a wide range of benefits. We know they harbor between 50 and 90 percent of the terrestrial biodiversity on Earth. We know that they act as carbon sinks, absorbing massive quantities of carbon dioxide from the environment, and we know that carbon dioxide taken out of the atmosphere helps reduce the effect of greenhouse gases. They also help regulate rainfall on which agriculture and coastal resources depend, and they are important to regional and global climate.

Furthermore, these tropical forests are the breeding ground for new medicines. We are told that fully a quarter of the prescription drugs currently used in the United States come from tropical forests. We are also told that of the more than 3,000 plants the National Cancer Institute has identified as being active against cancer, 70 percent are found in these tropical forests.

Regrettably, these forests are rapidly disappearing. The gentleman from California (Mr. LANTOS) talked about that, and stated an area the size of Pennsylvania is being destroyed every year. We believe that half the tropical forests are already gone.

The heavy debt burden of these countries that have these forests is a contributing factor to the disappearance of these forests. Why? Because these countries must resort to exploitation of their natural resources, timber, minerals, and precious metals, to generate revenue to service burdensome external debt.

At the same time, poor governments tend to have very few resources to set aside and protect their tropical forests. This act addresses these economic pressures by authorizing the President to allow eligible countries to engage in debt swaps, buybacks or restructuring in exchange for protecting threatened tropical forests on a sustained basis over time.

The legislation is based on the previous Bush administration's Enterprise for the Americas Initiative that allowed the President to structure certain debt in exchange for conservation efforts, but only in Latin America. This legislation and its predecessor expands on the countries eligible, the requirements, and the legislation expands it beyond Latin America to protect tropical forests that are threatened worldwide. The bill provides for very different ways to leverage scarce resources available for international conservation.

Under two of the three options made available under this bill, third-party debt swaps where third parties can come in, such as the Nature Conservancy or Conservation International, and also debt buybacks, in those two cases, there is no cost at all to the United States Government.

Under the third option provided for under this legislation, the United States and an eligible country can agree to restructure the debt. Our Government in this case does provide a subsidy to cover the difference between the so-called net present value of the debt and the net present value of whatever the new debt is. Now, net present value is a fancy term, but it refers to what an investment bank, say, on Wall Street might use as they look at the debt to determine what it is really worth, what its actual value is.

Our Government provides this subsidy because we get something in return for it. We get something in return in the sense that the amount of debt forgiven is less than the amount that is placed in these tropical forest funds. Therefore, we get leverage. In fact, taxpayers will usually get at least $2 in conservation funds back into the fund in local currency for every $1 of Federal funds that would be spent.

Part of this leverage comes from the fact that the host country is required to use local currency in a tropical forest fund. Second, these tropical forest funds have integrity, are broadly supported within the host country; and, therefore, conservation organizations are interested in placing their own private money in these funds. We believe this is producing additional private sector leverage of government conservation dollars, and we believe the potential for that is great.

The final point I would just like to make about the restructuring option is that I believe if we are going to reduce or eliminate debts that are owed by poorer countries to the United States, it only makes sense that we get something in return for it. In this case we do, in fact, get something in return through this initiative. It is a win-win, for us, for the poorer country, and for the environment.

Last year, as mentioned earlier, the United States did conclude a tropical forest debt reduction agreement with Bangladesh, which is a less developed country that is heavily burdened by foreign debt. The gentleman from Nebraska (Mr. BEREUTER), who is with us this afternoon, has been quite focused on Bangladesh. In fact, I can remember at the first hearing we had on this subject 3 or 4 years ago, he raised the fact that Bangladesh was a country that was not included within the requirements because they could use this initiative in order to reduce some of their debt and save some of their endangered tropical forests. In fact, that has happened. It allows in Bangladesh the protection of over 4 million acres of endangered mangrove forests, and it prevents the world's only genetically secure population of Bengal tigers.

At present, we believe there are at least 11 nations on three continents interested in negotiating these kinds of Tropical Forest Act debt reduction agreements. In fact, we have reason to believe that Belize, El Salvador, and Thailand are ready to move on such agreements this year. Furthermore, as many Members know, President Bush has expressed his strong support for this program.

I would also like to briefly address the authorization for funds included in this legislation. First, I want to make the point this authorization is actually less than the authorization over the last 3 years. In fact, looking out over the 3-year period, it is roughly $100 million less than was provided in the previous and original authorization.

Second, I would say that authorization is consistent with what the Bush administration has said is their commitment to providing adequate funding for this initiative. In other words, it fits within the budget so long as we are making progress toward restructuring agreements around the world, and, again, I think there is adequate evidence that we have lots of countries lined up and interested, and we will be able to move forward aggressively from this point on.

Before I close, Mr. Speaker, I would like to offer my thanks and appreciation, also, to some key staff members who got us here today: Adolfo Franco, Frank Record, Peter Yeo, David Abramowitz, Keith O'Neil, and Carol Doherty of the Committee on International Relations majority and minority staffs for their expertise and all their diligent work on this legislation. Also, like Frank Tim Miller and Maile Gradison of Maile's office for their dedication to this initiative, and Jeff Burnam with Senator LUGAR and Jim Green with Senator BIDEN for helping to develop the companion bill on the Senate side, which is identical to the legislation introduced in the House and almost identical to the legislation that we have on the floor this afternoon.

Again, this is a good program, worthy of reauthorization. It holds great promise. I urge my colleagues on both sides of the aisle to enthusiastically support the passage today of H.R. 2131.

Mr. LANTOS. Mr. Speaker, I want to commend my friend for his eloquent statement, and I want to identify myself with it.

Mr. Speaker, it gives me a great deal of pleasure to yield such time as he may consume to the gentleman from American Samoa (Mr. FALEOMAVAEGA), one of the nationally recognized leaders in this field.

Mr. FALEOMAVAEGA. Mr. Speaker, I am honored to be a cosponsor of H.R.
Ms. KYLIE MORALES, for the tremendous work of the National Institutes of Health, a certain drug that has come out of this research conducted by Dr. Cox is a substance that has very positive effects in curing HIV. I am talking about AIDS. That is all because of the preservation of these plants.

Mr. Speaker, we must preserve these tropical resources that may hold the key to curing cancer, even AIDS and other deadly diseases afflicting humanity. If rare tropical plants are not protected, their genetic codes and potential benefits will be lost forever to mankind.

Mr. Speaker, I urge my colleagues to support this piece of legislation. I thank my good friend from Ohio for his management of this legislation and especially the ranking member, the gentleman from California (Mr. LANTOS), for his leadership in bringing this legislation to the floor. Again, I urge my colleagues to support this bill.

Mr. CHABOT. Mr. Speaker, I yield 3 minutes to the gentleman from Nebraska (Mr. BEREUTER), one of the distinguished members of the Committee on International Relations. Mr. BEREUTER. Mr. Speaker, I rise in very strong support of this legislation. It has been very well explained by many of my colleagues, including the distinguished primary sponsor of this legislation and the original act, the gentleman from Ohio (Mr. PORTMAN). So I will not have to go over the details, that is for sure; but I do want to mention and reemphasize one thing the gentleman from Ohio said and, that is, that the program builds upon former President George Bush's innovative Enterprise for the Americas Initiative and is another creative example of how our country can address developing-country debt while helping to protect the environment.

The act gives the President the authority to reduce certain forms of development assistance and food aid debt owed to the United States in exchange for the deposit by eligible developing countries of local currencies in a tropical forest fund to preserve, restore and maintain tropical forests. These funds are used by qualified nongovernmental organizations working to preserve the world's most endangered tropical forests.

A board of directors in the United States comprised of U.S. public and private officials oversees this program and annually reports to Congress on progress made to implement the program.

The gentleman from Ohio was gracious in mentioning at the time the House International Relations Committee proceeded to mark up the original act that he was interested in Bangladesh because when it has come to debt forgiveness or debt reduction in the past, by a strange set of circumstances, Bangladesh has fallen through the cracks and they needed some assistance. I wanted to make sure that they were not neglected. It turns out that Bangladesh is the first beneficiary of the Tropical Forest Conservation Act.

Before I offered my amendment to assure eligibility for Bangladesh I had to look to see if it had a tropical forest to be saved in that country of such huge population density with all of its drought and flooding problems. They do. As mentioned in terms of square miles, I will put it in square kilometers. 14,000 square kilometers of tropical forest areas in the Chittagong Hill Tracts and in the Sunderbans. As mentioned by the gentleman from Ohio, this is one of the few remaining refuges for the Bengal tiger. Currently, the Bangladeshi board of directors, which will disburse the trust funds, is reviewing how some of the funds operate in establishing its procedures for implementing the agreement.

There are only 11 countries considering it right now on three different continents, but I have no doubt the number will expand dramatically when interested people and their governments understand the benefits.

Mr. Speaker, this Member would like to very specifically commend the distinguished gentleman from Ohio (Mr. PORTMAN), the sponsor of this legislation and the original act; and the ranking member of the Committee on International Relations, the distinguished gentleman from California (Mr. LANTOS), for their leadership and support for conservation efforts in the developing world and for their work to reauthorize this program. Of course, the expedited treatment of this legislation by our chairman, the distinguished gentleman from Illinois (Mr. HYDE), is also to be commended; and I am pleased to be an original cosponsor.

Mr. Speaker, this Member urges all of our colleagues to support the reauthorization of the Tropical Forest Conservation Act, as it provides direct benefits to both developing and developed countries.

Mr. CHABOT. Mr. Speaker, I yield 3½ minutes to the gentleman from California (Mr. ROHRABACHER), also a distinguished member of the Committee on International Relations.

Mr. ROHRABACHER. Mr. Speaker, I rise in support of H.R. 2131.

Mr. Speaker, let me just note that the argument that we must try to preserve our tropical rain forests because the tropical rain forests have a possible treasure house of biodiversity for this generation and future generations I think is a very valid argument.

I have lived in jungles in my life. I understand the concept of jungle life, if not tens of thousands, of variety of not only animal and insect and plant life but all kinds of life that is surrounding one in the jungle. And, yes, in future
generations we may find tremendous assets that are right in front of our face but we do not recognize it nor do we use it.

The issue of trading debt with some of these countries and getting for that debt a commitment to try to preserve these rain forests, I think, is a very good idea. Let us just remember that in many cases these countries would not be repaying that debt anyway. So this is a win-win proposal.

Let me just say, however, that believing in this bill and believing in the biodiversity of the jungles does not mean that one has to believe that the jungles in some way contribute to helping the global warming situation. I have heard that several times in the arguments here on the floor.

Let me just say that global warming, if one takes it by the people who advocate it, one would not advocate bulldozing the bunch of global baloney myself, but even if one does believe in global warming as precisely presented by those people who are trying to convince the rest of us that it is true, one would not advocate bulldozing the rain forests. In fact, consistent with the global warming theory what one would want to do is to clear-cut all of the rain forests and bulldoze them because the rain forests are one of the major contributors on this planet of carbon dioxide and methane, which are the global-warming gases.

Termites eating in the jungles produce more of what they call greenhouse gases than does the internal combustion engine. By the way, I do not believe in global warming so I would never advocate bulldozing the jungles, but if one believes in it that is what they want to do and they, of course, want to also get rid of old growth trees. The older the growth of the trees the more one wants to cut it down and replant young trees. The essence of global warming is saying that one wants young, vibrant trees and plants to take in carbon dioxide and give out oxygen.

Let me just say, our jungles and our old growth trees do just the opposite. They give out more CO₂ than they are taking in oxygen. So let us support this effort to try to save the jungles and save those forests and rain forests around the world and let us take advantage of this very commonsensical approach of debt restructuring. Let us not get trapped into using arguments that just do not hold water and are not scientifically viable. There has been enough nonsense on global warming and other areas.

Let us just say that the rain forests are valuable and let us save them.

Mr. GILCHREST. Mr. Speaker, will the gentleman yield?

Mr. LANTOS. Mr. Speaker, I yield to the gentleman from Maryland.

Mr. GILCHREST. Mr. Speaker, I would just like to say that the number of facts that are out there dealing with carbon dioxide, methane, and a number of other greenhouse gases show that in the last 50 years the dramatic increase in these gases is clear evidence that human activity is causing the climate to warm.
