

in obtaining education, securing both service-connected and non-service related disability and survivor benefits, providing home loans with favorable interest rates, enabling appropriate medical care, and generally improving the quality of life for Oregon's veterans.

I rise today to thank the ODVA and its employees for the important service they provide to our state. I am heartened by the ODVA's sixty year record of accomplishment and I look forward to many more years of service to Oregon and its community of veterans.

BLACK HISTORY TRIBUTE TO
TOMIE ZEAN TURNER GREEN

HON. BENNIE G. THOMPSON

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 10, 2005

Mr. THOMPSON of Mississippi. Mr. Speaker, I would like to recognize outstanding African Americans of the 2nd Congressional District of Mississippi, and their contribution to Black History. The 23 counties of the 2nd District are well represented from both a local and national perspective.

Americans have recognized black history annually since 1926, first as "Negro History Week" and later as "Black History Month." In fact, black history had barely begun to be studied—or even documented—when the tradition originated. Although blacks have been in America as far back as colonial times, it was not until the 20th century that they gained a presence in our history books.

Though scarcely documented in history books, if at all, the crucial role African Americans have played in the development of our nation must not be overlooked.

I would like to recognize Judge Tomie Zean Turner Green of Hinds County. Educated in Jackson Public Schools, upon completing the 11th grade at Jim Hill School, Judge Green entered Tougaloo College where she obtained her Bachelor of Arts degree. She earned a Master of Science degree from Jackson State University, and a Doctor of Jurisprudence from the Mississippi College School of Law.

Judge Green served in the Mississippi House of Representatives from 1992–1998 and served as the Vice Chair of Ethics and as sub-chair of the Judiciary A committee. She also served on the Elections, Insurance, the Managed Care and Local & Private Legislation, Constitution and Investigation of State Offices committees. In 1999, Judge Green took the oath of office to become the first woman elected to the Hinds County Circuit Court. Since that time Judge Green has increased the accessibility and efficiency to the court by shifting judicial operations. Since she took the bench, Judge Green has served on the Judiciary Advisory Committee on Rules, and the Supreme Court's Committee on Media and the Courts.

Judge Green is best noted for in Hinds County for her sponsorship and support of the several laws such as the Municipal Public Hazard Law; Illegal Acts on Premises Law; the Professional Licensure and Child Welfare and Child Support Enforcement Act, etc. Additionally, Judge Green has sought legislation to in-

sure fairness for workers injured while on the job; raise the age for minors to legally possess a handgun from 18 to 21 years of age; to build and fund a stadium for Jackson State University; to establish a law school at Jackson State University; and to increase the opportunity and participation of minorities in state contracts for goods and services.

In addition to her dedication and commitment to her career, Judge Green has also expressed the same to her community. Judge Green is currently a member of the St. Peter Baptist Church of Jackson, MS. She is a member of the Magnolia Bar Association, Mississippi Bar Association, the Federal Bar Association, the Hinds County Bar Association, Phi Alpha Delta Legal Fraternity. Other memberships have included: Zeta Phi Beta Sorority, Inc. Phi Kappa Phi Honor Society, the NAACP, Southern Christian Leadership Conference (SCLC), MS League of Women Voters, American Association of University Women and Central Mississippi Coalition of 100 Black Women.

I take great pride in recognizing and paying tribute to this outstanding African American of the 2nd Congressional District of Mississippi who deserves mention, not only in the month of February but year round.

TRIBUTE TO DAVID LEE BUCKNAM

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 10, 2005

Mr. UDALL of Colorado. Mr. Speaker, I rise today to pay tribute to the hard work of David Lee Bucknam, a dedicated public servant in Colorado who recently passed away.

Mr. Bucknam, who was 60 when he died November 22, 2004, spent 24 years directing the inactive-mine reclamation program of the Colorado Division of Mineral and Geology (Division), sealing abandoned mines and restoring the soil and water they contaminated.

Earlier today, I introduced two bills designed to address the barriers hampering the cleanup of abandoned hardrock mines in Colorado and throughout the west. The introduction of these bills reminded me of Mr. Bucknam and others like him who worked hard to protect the public and promote wise environmental stewardship. Mr. Bucknam worked with me and my staff on this legislation I am introducing today and I would like to take this opportunity to express my posthumous appreciation for his assistance and for all the work he did for Colorado.

Mr. Bucknam was born in Brockport, New York in 1944 and arrived in Lakewood, Colorado when he was 10. He became an avid and skilled mountaineer and skier, getting an early start in the Denver Junior Group of the Colorado Mountain Club in his teens. In the "Juniors" he headed climbing trips and outings, taught mountaineering skills to other teens and adults, and shared his love of the outdoors. He continued to climb throughout the western United States, in the Himalayas, in Canada and in Mexico.

Mr. Bucknam taught junior high history and geography for several years, worked for the Colorado Land Use Commission and then for

over 24 years with the Colorado Department of Natural Resources. He retired as Director of the Office of Active and Inactive Mines, and when asked what he did, he always smiled and said he "closed up old mines". Under his leadership, Colorado's Inactive Mine Reclamation Program and the Colorado Mine Safety and Training program were nationally recognized. He was a mentor and role-model for many of the employees in the Department. His competence and dedication—coupled with his compassion for his co-workers and his leadership on national issues—made a lasting impact not only on the Division, but the state and the nation as well. In 1990 he served as president of the National Association of Abandoned Mined Land Programs and continued to provide leadership to the Association by serving on several national committees.

During his tenure at the Division, he helped secure access to about 400 abandoned mines a year out of an estimated 20,000 in the state in order to address the problems they created and reclaim the surrounding land and water. He also helped work on the endless problem of underground coal fires, of which at least 29 subterranean fires still smolder in coal seams throughout Colorado.

Mr. Bucknam's love of the outdoors, his service to his state and community, and his work on addressing the legacy of mining activity are all worthy of recognition. My staff and I wish to express our thoughts and wishes to his family and coworkers.

CELEBRATING THE ACHIEVEMENTS OF RICHARD "HEAT-WAVE" BERLER

HON. HENRY CUELLAR

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 10, 2005

Mr. CUELLAR. Mr. Speaker, I rise today to recognize the accomplishments and contributions of Richard Berler of Laredo, TX.

Better known as "Heatwave", Mr. Berler is the chief meteorologist at KGNS-TV in Laredo, TX. This past Monday, February 14th, Berler, 51, celebrated 25 years of reporting and predicting the weather at the station.

Having started at a time when weather forecasts were not considered a serious part of the News, Berler has taken his job to a higher level and positively affected the local community.

Originally from Westport, Connecticut, Berler was first attracted to Laredo for its unique climate. Having always studied climate patterns for a hobby, Berler found it fascinating when he learnt about Laredo hitting 100 degrees as early as the month of February. Laredo is unique for its semiarid and subtropical climate, and it occasionally gets hot dry air from the Mexican Plateau.

After attending college at Florida State University and then working for a small station in Minnesota, Berler found an opening at KGNS in Laredo and jumped at the opportunity. Almost immediately after working, Berler became a meteorologist, taking his own atmospheric readings before every newscast to improve the accuracy of his predictions. He
