SUBMITTED RESOLUTIONS

SENATE RESOLUTION 420—EX-PRESSING THE SENSE OF THE SENATE THAT EFFECTIVE TREATMENT AND ACCESS TO CARE FOR INDIVIDUALS WITH PSORIASIS AND PSORIATIC ARTHRITIS SHOULD BE IMPROVED

Mr. SMITH (for himself and Mr. LAUTENBERG) submitted the following resolution; which was referred to the Committee on Health, Education, Labor, and Pensions:

S. RES. 420

Whereas psoriasis and psoriatic arthritis are serious, chronic, inflammatory, disfiguring, and life-altering diseases that require sophisticated medical intervention and care;

Whereas, according to the National Institutes of Health, between 5,800,000 citizens and 7,500,000 citizens of the United States are affected by psoriasis;

Whereas psoriasis and psoriatic arthritis are—

(1) painful and disabling diseases with no cure; and

(2) diseases that have a significant and adverse impact on the quality of life of individuals diagnosed with them;

Whereas studies have indicated that psoriasis may cause as much physical and mental disability as other major diseases, including—

- (1) cancer;
- (2) arthritis;
- (3) hypertension;
- (4) heart disease;
- (5) diabetes; and
- (6) depression;

Whereas studies have shown that psoriasis is associated with elevated rates of depression and suicidal ideation;

Whereas citizens of the United States spend between \$2,000,000,000 and \$3,000,000,000 to treat psoriasis each year;

Whereas early diagnosis and treatment of psoriatic arthritis may help prevent irreversible joint damage;

Whereas treating psoriasis and psoriatic arthritis presents a challenge for patients and health care providers because—

(1) no single treatment works for every patient diagnosed with the disease;

(2) some treatments lose effectiveness over time; and

(3) all treatments have the potential to cause a unique set of side effects;

Whereas, although safer and more effective treatments are now more readily available, many people do not have access to them; and

Whereas Congress as an institution, and the members of Congress as individuals, are in a unique position to help raise public awareness about the need for increased access to effective treatment options for psoriasis and psoriatic arthritis: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes—

(A) the need for enhanced public awareness of psoriasis;

(B) the adverse impact that psoriasis can have on people living with the disease; and

(C) the importance of an early diagnosis and proper treatment of psoriasis;

(2) supports the continuing leadership provided by the Director of the National Institutes of Health and the Director of the National Institute of Arthritis and Musculoskeletal and Skin Diseases for identifying a cure and developing safer, more effective treatments for psoriasis and psoriatic arthritis; and

(3) encourages—

(A) researchers to examine the negative psychological and physical effects of psoriasis to better understand its impact on those who have been diagnosed with the disease; and

(B) efforts to increase access to treatments and care that individuals living with psoriasis and psoriatic arthritis need and deserve.

Mr. LAUTENBERG. Mr. President, I am pleased to join the junior Senator from Oregon in submitting this resolution to raise public awareness about and encourage medical research on psoriasis and psoriatic arthritis. This resolution also promotes greater access to care for those suffering from these disorders. It is my hope that Congress will continue to aid efforts in the medical community to diagnose, treat, and eventually cure this disease.

Psoriasis is a non-contagious, immune-mediated, lifelong skin disorder that has been diagnosed in more than 5 million men, women, and children in the United States. The source of psoriasis is believed to have a genetic component which triggers a faster growth cycle of skin cells that result in buildup; however, the exact cause is unknown.

Psoriatic arthritis is a condition associated with psoriasis. This disease is a chronic inflammatory disease of the joints and connective tissue, which causes stiffness, pain, swelling, and tenderness of the joints and the tissue around them. Without treatment, psoriatic arthritis can be potentially disabling and crippling. Approximately 10 to 30 percent of people with psoriasis develop psoriatic arthritis.

The National Institutes of Health, NIH, estimates that 5.8–7.5 million people are living with psoriasis. Each year,

the United States spends \$4.0 billion to treat psoriasis and psoriatic arthritis. Furthermore, about 56 million hours of work are lost each year by people who suffer from psoriasis. The National Institute of Mental Health has found that psoriasis can cause as much physical and mental disability as other major diseases. Researchers are still searching for a cure for psoriasis. In the meantime, we must continue to raise awareness, to support research efforts to cure this disease, and to treat those living with it.

I thank my colleagues for supporting this effort.
