

If the Speaker won't keep the House in session to allow this vote, I urge President Bush to call an immediate energy special session of Congress. Under article II, section 3 of the Constitution, the President has the power, quote, on extraordinary occasions to convene the Congress. If \$4 a gallon of gas isn't an extraordinary occasion that demands action by the Congress, I don't know what is.

The Congress should stay in session and do its job and give the bipartisan pro-drilling majority a vote. And, Mr. President, if this Congress tries to leave town without voting on more drilling, use your constitutional authority, bring them back and make them work.

RENEWABLE ENERGY AND ENERGY EFFICIENCY EXPO

(Mr. CARNAHAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARNAHAN. Mr. Speaker, I rise to thank Congressman MARK UDALL and Congressman ZACH WAMP and the Renewable Energy and Energy Efficiency Caucus for sponsoring the expo today in the Cannon Caucus Room. I urge all Members and staff to attend.

I believe Members from both sides of the aisle can agree that renewable energy and energy efficiency will be a big part of our effort to wean ourselves from a dangerous reliance on foreign oil.

This new and developing sector of the economy will generate thousands of new jobs, high-paying green collar jobs, that will remain in America and won't be outsourced.

The union of renewable energy and energy efficiency with the built environment will not only generate new jobs and new technology, but it will help to immediately address global climate change. According to recent studies, the quickest and easiest way to positively affect global climate change is to design and build—or retrofit—high-performance green buildings. These buildings are energy efficient, healthy, safe, and secure.

Developing buildings that use renewable energy and seeking energy efficiency is a win for the economy, for the environment, and for the people who work in them.

MEDIA FAIRNESS INITIATIVE: MEDIA DONATIONS FAVOR DEMOCRATS

(Mr. SMITH of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Texas. Mr. Speaker, the story of the 2008 election is being told by a partisan media. If you have any doubt, just follow the money.

An analysis by Investor's Business Daily shows that journalists contributed 15 times more money to Democrats than Republicans during this election cycle. While 235 journalists donated to Democrats, just 20 gave to Republicans, a margin of more than 10-1. And journalists who gave to Senator OBAMA outnumbered those who contributed to Senator MCCAIN by a 20-1 margin. No wonder nearly seven in 10 Americans say the media wants Senator OBAMA to win the election, according to a recent poll.

Mr. Speaker, we need to promote fairness and objectivity in journalism. Only then we will restore Americans' faith in the media.

CONSUMER SAFETY

(Mr. KLEIN of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KLEIN of Florida. Mr. Speaker, yesterday the House passed two pieces of legislation critical to consumer safety, both in my district in south Florida and of course throughout the United States.

The first bill, the Product Safety Modernization Act, bans dangerous chemicals in the manufacture of children's toys to keep them safe. The second bill, the Family Smoking Prevention and Tobacco Control Act, grants the FDA necessary authority to restrict tobacco marketing and sales to children.

Mr. Speaker, one of the most important responsibilities as parents that we have is to keep our children safe. I'm proud that we passed these bills by a bipartisan majority to demonstrate that we will not allow our children to be exposed to toxic chemicals by unscrupulous toy manufacturers or cigarette company marketers.

The rash of product recalls in the last year prove that we must be vigilant when it comes to consumer safety. Thanks to this week's legislation, parents in south Florida and across the Nation can rest a little easier.

UNFINISHED BUSINESS

(Mr. WESTMORELAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WESTMORELAND. Mr. Speaker, I want to call today your attention to something yesterday. We had a vote 213-212 to adjourn this House without passing a comprehensive energy bill, without being able to vote on drilling. So what I've done, Mr. Speaker, I've got a number here. Call (202) 224-3121. Ask for Speaker PELOSI if you want to make sure that we do something before we leave this Chamber today or tomorrow to vote on drilling; or call and ask for your Member of Congress and find

out if they were the swing vote that made us leave this city without voting for you.

But I'll tell you what, not only are they leaving Washington, DC, they're going to get on jets on your dime. They're going to fly to Africa and Europe and all over this world on your dime while you don't have money at your house to go on a family vacation, or even go to the store sometimes, they're going to be flying around here.

Call this number. Mr. Speaker, I hope they will put it on the Internet. I hope we will let Speaker PELOSI, the Democratic leadership, know we're tired of this. We need to know where you stand. We need to drill for U.S. oil.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. ROSS). Members are reminded they must address their remarks to the Chair.

CONGRATULATING THE ENERGY RENEWABLE AND ENERGY EFFICIENCY CAUCUS

(Mrs. BOYDA of Kansas asked and was given permission to address the House for 1 minute.)

Mrs. BOYDA of Kansas. Mr. Speaker, in contrast, I would like to just stand up and, again, like so many others, not rail on somebody, but to thank the bipartisan Energy Renewable and Energy Efficiency Caucus.

Our country is facing deep, deep energy problems, and I think the good people of Kansas certainly understand that the way that we're going to address that is coming and looking at the bipartisan commonsense solutions.

I want to just congratulate—this is a bipartisan group—the Renewable Energy and Energy Efficiency Caucus. And I would like to specifically thank Representative MARK UDALL and Representative ZACH WAMP, a Republican, for coming together and making this such an important issue. It's over in the Cannon Caucus Room. And I certainly ask each of us to get over there and to support this bipartisan effort.

You know, I think people in Kansas are sick and tired of everybody railing on somebody else. It's time that we work together.

□ 1030

THE EFFECTS OF HIGH GASOLINE PRICES

(Mr. CARTER asked and was given permission to address the House for 1 minute.)

Mr. CARTER. Mr. Speaker, today in Texas the temperature is going to be about 103 to 105 degrees. It's going to be hot, and it's been hot for the last 2 weeks.
