

Mr. BERMAN. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

□ 2030

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

NEWBORN SCREENING SAVES LIVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Ms. ROYBAL-ALLARD) is recognized for 5 minutes.

Ms. ROYBAL-ALLARD. Madam Speaker, this week the Nation is celebrating National Public Health Week, and I can think of no better way for this House to have begun the celebration than by the passage of today's packet of critical bipartisan public health legislation.

I commend Chairman DINGELL and Chairman PALLONE for their leadership in helping to pass this group of bills which will make a significant contribution to improving our environment and the quality of our Nation's health.

Regrettably, I was unable to return from Los Angeles in time to be a part of today's floor discussion. I am particularly pleased, however, that the Newborn Screening Saves Lives Act, S. 1858, as amended by my bill, H.R. 3825, was one of the public health bills that passed today.

I extend my sincere thanks to my colleagues, Congressman MICHAEL SIMPSON, TOM REYNOLDS, and HENRY WAXMAN for their original cosponsorship of H.R. 3825, the Newborn Screening Saves Lives Act. Their commitment and steadfast efforts have helped make possible the passage of this significant piece of legislation.

In addition, I thank Senators DODD, ORRIN HATCH, HILLARY CLINTON, and EDWARD KENNEDY for championing the Senate companion bill, S. 1858.

I also thank the coalition of public health groups, especially the March of Dimes, for working with us over the last 4 years on this critical issue.

Madam Speaker, approximately 5,000 babies are born each year with detectable and treatable disorders. Forty years ago, these disorders would have gone undetected until symptoms appeared. This resulted in otherwise preventable deaths or lifelong suffering from disabling consequences such as mental retardation and cerebral palsy.

Today we have the ability to give a newborn baby a simple blood test that can identify many life-threatening genetic illnesses before symptoms occur. Fortunately, this early identification makes it possible to treat babies in time to prevent severe disorders, serious complications and even death.

Yet tragically in the United States, approximately 1,000 infants a year die or are permanently disabled from these treatable disorders. These preventable tragedies are largely due to the fact that our country lacks a national newborn screening standard. Without a national standard, our States have great disparity and variation in the quality and number of newborn screening tests an infant may receive.

Today's passage of Newborn Screening Saves Lives Act is a major step toward correcting these disparities because it encourages States to uniformly test for and keep updated a scientifically recommended panel of disorders. And it makes available the resources States need to expand and improve their newborn screening programs.

The Newborn Screening Saves Lives Act also has the potential to save millions of dollars in health care costs for families and States because it empowers parents and health care professionals with knowledge about the importance of newborn screening and follow-up care.

In addition, the bill requires the Centers for Disease Control to ensure the quality of laboratories involved in newborn screening and it establishes a system for collecting and analyzing data to help researchers develop better detection, prevention, and treatment tragedies.

Madam Speaker, by passing the Newborn Screening Saves Lives Act, this Congress seized an opportunity to protect vulnerable babies from undue suffering and death and to give them a chance for a long and healthy life. Once again, I thank my colleagues for voting to pass this critical piece of public health legislation.

RAPE OF A LITTLE GIRL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE. Madam Speaker, in the early morning hours of March 2, 1998, 10 years ago, Patrick Kennedy of Jefferson Parish, Louisiana, called 911 to report that his 8-year-old stepdaughter had been dragged from her garage to the side yard and raped by two neighborhood boys. Kennedy told the 911 operator that he saw one of the boys riding away from the house on a bicycle, so a sheriff's deputy that was immediately in the area responded to the complaint and started looking for the culprit, but he did not find the individual.

The deputy noticed that the crime scene in the backyard was somehow inconsistent with rape, and he noticed that the dog was still sleeping undisturbed in the grass. Be that as it may, Kennedy led the deputy to the victim, his stepdaughter's bedroom, where she was lying on the bed wearing a T-shirt and wrapped in a filthy, bloody cargo blanket.

Kennedy informed the deputy that he had carried his stepdaughter like an infant from the yard and placed her in a bathtub to clean her. But the deputy noticed there was no blood on Kennedy's clothes.

When the deputy tried to question the victim, Kennedy constantly interrupted and answered the questions for his stepdaughter. The victim said that she was trying to sell Girl Scout cookies when the two neighborhood boys dragged her from the garage and raped her on the grass nearby.

The victim was taken to Children's Hospital for emergency surgery to repair serious injuries to her body. At the hospital, the victim told hospital personnel and a psychologist that the two neighborhood boys had raped her, but she finally told a family member that Patrick Kennedy, her stepfather, had assaulted her.

The investigation began to focus on Kennedy because his story did not make any sense to the investigators. And then the police learned more about Patrick Kennedy and who he was. Before he called 911, Kennedy called his boss at a local moving company to say he wasn't going to work that morning and he asked a co-worker how to get blood out of a carpet. The co-worker later indicated at trial that Kennedy sounded nervous, and he said his stepdaughter had "just become a young lady."

Kennedy also called B&B Carpet Cleaning at 7:30, 2 hours before the 911 call, and he asked how to clean and remove blood stains from a carpet. Police then found a 1-gallon jug of carpet cleaner and the bloody towels Kennedy used to clean up his crime and hide the evidence.

A forensic lab confirmed that the victim had no grass or soil stains on her clothes so she could not have been assaulted in the grass. The victim later told her mother that Kennedy had raped her. At the trial, she testified that when she woke up that morning, he was on top of her, covering her eyes with his hands, and that he raped her in her own bed. The victim said she fainted and later threw up.

A jury convicted Patrick Kennedy of aggravated rape of his own 8-year-old stepdaughter and sentenced him to death in Louisiana. Under Louisiana law, a person who commits sexual assault of a child under the age of 12 is subject to the death penalty. Kennedy has appealed to the Supreme Court, and next week in Kennedy v. Louisiana, the Supreme Court will hear the
