

kind of curious about the previous argument.

The facts are that the stimulus in my district in California is in fact working, and without it, there would be even more layoffs. It's not that this whole thing started in January of 2009. The Great Recession started the previous 2 years, so we've been trying to catch up.

The stimulus is actually working. Thousands of teachers are working in California as a result of the stimulus. Thousands of jobs have been created. And in my own district, schools are being repaired and major transportation projects are going forward.

So I know in my district that the stimulus is working regardless of what the media may be saying. It is working. Without it, there would be even greater layoffs.

FRITZ CUBIN

(Mrs. LUMMIS asked and was given permission to address the House for 1 minute.)

Mrs. LUMMIS. Mr. Speaker, I rise today in memory of my friend, Dr. Frederick "Fritz" Cubin, husband of former Wyoming Congresswoman Barbara Cubin who served the Cowboy State for 14 years in this U.S. House.

After a lengthy illness, Fritz passed away this past Monday. Our condolences go out to Barbara, sons Bill and Eric, and their family and friends.

Fritz had many passions: his family always first, hunting and politics taking the silver and bronze.

Dr. Cubin served his country in the United States Air Force. He served his family as a confidante to his wife, a devoted father to his sons. A family doctor for many, he also served his community, making his appointed rounds to Casper's retirement homes to the very end.

Fritz Cubin was a fierce patriot, with apologies to no one. He will be missed.

HONORING PETTY OFFICER SECOND CLASS LARRY ALLEN STONE AND PETTY OFFICER SECOND CLASS MARIO MAESTAS FOR THEIR SERVICE

(Mr. BOOZMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOOZMAN. Mr. Speaker, I rise today to honor the distinguished careers of Navy SEALs Petty Officer Second Class Larry Allen Stone and Petty Officer Second Class Mario Maestas. These officers were accomplished SEALs who selflessly dedicated themselves to serving our country and gave the ultimate sacrifice.

Stone was a member of the United States Navy SEAL Team Two, Little

Creek Amphibious Base, where he was a lead communications instructor for the team. His superior skill with communications and equipment earned him a job instructing new SEALs, and his athletic prowess earned him the title of Outstanding Athlete in his unit.

Maestas served 5 years in the Navy before becoming a Navy SEAL in 2000. As a SEAL, he participated in combat missions in Kosovo, including deployments in support of Task Force Falcon, Kosovo, from which he earned the Navy Commendation Medal, the National Defense Service Medal, the Good Conduct Medal, and a Flag Letter of Commendation.

We are honoring these fallen SEALs during a memorial and building dedication for the Naval Special Warfare facilities at Fort Chaffee, Arkansas, Saturday, February 27, 2010.

Stone and Maestas devoted their lives to our country. They are truly American heroes who will be remembered for their service and sacrifice.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. PERRIELLO). Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

MEMBERS HAVE AN OBLIGATION TO DEAL WITH OUR ECONOMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. SPACE) is recognized for 5 minutes.

Mr. SPACE. Mr. Speaker, I rise today to discuss our economy. I do not rise, however, to cast blame, engage in political posturing, or cast aspersions against my colleagues on the other side of the aisle. I rise to speak to what I believe all of us who have been blessed with the right of representation for our constituents have an obligation to do; that is, to deal with our economy.

Our constituents don't really care how we got here; they don't care who is to blame; they, frankly, don't care who comes up with the solutions, but they deserve and need resolution to these economic problems that we are facing right now. What our constituents on both sides of the aisle deserve is vision: vision of the future, vision of a new economy.

Back in Ohio's 18th Congressional District, Mr. Speaker, things are especially difficult. It is the area known as Appalachian Ohio, consisting of 16 of the poorest counties in the State of Ohio with the highest unemployment rates, the highest poverty rates. And with those high poverty rates come the manifestations of poverty, including hunger, homelessness, the breakdown of the traditional family unit, a lack of access to health care, a lack of access to education. The list goes on and on.

What I have been attempting to do in southeastern Ohio and what I urge my colleagues to consider doing around the country is to look forward to a future of economic prosperity, one where we know that things will be better.

For example, in the area of energy, I have organized an effort called Renew Ohio that is designed to focus on the jobs of the future. One of those fields that we know is an emerging sector is the field of energy. Not only will developments in technology and investments in energy sectors ultimately bring down the cost of energy, ridding ourselves of this dangerous and cancerous dependence on foreign oil, it will also create millions of jobs. It is obvious and it is promising.

Another sector, health care. Because of the aging nature of our society, we know that there will be future prospects for employment in the field of health care.

Another sector, technology. By bringing broadband, for example, to unserved and underserved areas of America, we are going to be advancing opportunities for economic growth and bridging the divide that exists right now in rural America when it comes to access to health care and education.

And, finally, agriculture. Agricultural jobs of tomorrow are quite different from the ones we know of today and the jobs of yesterday. It is a field that shows promise when it comes to trade, a field that shows promise with its relationship to energy, and one that, if we position ourselves correctly in, will create jobs for tomorrow.

This crisis that we are dealing with in this country, which has become very personal to every American, is one that we must address without regard to partisan politics. Our constituents clearly are ahead of Congress on that issue. They don't want blame. They don't want aspersions. They don't want excuses. They want answers and they want vision and they want leadership.

I urge Members on both sides of the aisle in this hallowed Hall to work together to find consensus and to move forward for a brighter tomorrow.

CONCERN AFTER IRAN "WARHEAD" REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BURTON) is recognized for 5 minutes.

Mr. BURTON of Indiana. Mr. Speaker, one of the biggest problems facing the Middle East and the entire world is the nuclear development program that Iran is involved in right now.

The International Atomic Energy Agency in just the last few days has said that Iran is probably developing a nuclear warhead that they could use at some point in the future as their nuclear development program continues to expand. They have 3,000 or 4,000 centrifuges over there refining weapons-grade nuclear material right now.
