

EXTENSIONS OF REMARKS

HONORING THE 50TH ANNIVERSARY OF JAMES SPRING & WIRE COMPANY

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 2010

Mr. GERLACH. Madam Speaker, I rise today to congratulate the owners and employees of James Spring & Wire Company of Frazer, Chester County as they celebrate the Company's 50th anniversary.

Company founder Richard James may be best known for turning a simple, high-tension spring into "a wonderful toy" that, as the jingle said, was "fun for a girl or a boy." The toy James created is the Slinky.

In 1960, the current owners of James Spring & Wire bought the Company and built it into a leading manufacturer of custom springs, wire and strip forms and stampings. The Company's success over the last half-century is no doubt the result of exemplary leadership and entrepreneurial vision combined with highly-skilled and hard-working employees.

Madam Speaker, I ask that my colleagues join me today in congratulating the owners and employees of James Spring & Wire Company on reaching this memorable milestone and recognizing the important role small businesses such as this one play in making Chester County and all of Southeastern Pennsylvania a great place to live, work and raise a family.

RECOGNIZING MAY AS NATIONAL CANCER RESEARCH MONTH

HON. LOIS CAPPS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 2010

Mrs. CAPPS. Madam Speaker, May is National Cancer Research Month and I rise to pay tribute to the invaluable contributions made by scientists and clinicians across the United States who are working not only to overcome this devastating disease, but also to prevent it.

This year, nearly 1.5 million Americans will be diagnosed with cancer and over 500,000 Americans will die from cancer. But the good news is that our nation's investment in cancer research is having a remarkable impact. The five-year survival rate for all cancers has improved over the past 30 years to more than 65 percent. Discoveries and developments in prevention, early detection, and treatment have led to cures for many types of cancer and have led others to be transformed into manageable chronic conditions. Furthermore, many of these advancements have had signifi-

cant impacts on developing treatments for other common and costly diseases such as diabetes, heart disease, Alzheimer's, HIV/AIDS and macular degeneration.

Madam Speaker, National Cancer Research Month is the time to reaffirm our further commitment to finding treatments, cures and better tools for prevention, building on the momentum of recent years. As the more than 31,000 members of the American Association for Cancer Research and their partners continue their quest for cancer prevention and cures, Congress must stand behind them and invest in our research infrastructure.

I salute America's cancer researchers and their ongoing efforts and vow to be a partner in the ongoing war on cancer.

RECOGNIZING MONACAN HIGH SCHOOL FOR ORGANIZING PROJECT 186

HON. ERIC CANTOR

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 2010

Mr. CANTOR. Madam Speaker, I rise today to thank the students and teachers of Monacan High School in Chesterfield County, Virginia, for collecting and shipping much needed school supplies for students in Afghanistan.

Jessica M. Heising, an English teacher at Monacan High, organized Project 186 with the purpose of collecting 186 backpacks and school supplies for each student in an all-girls school in the Paktika province of Afghanistan. The project was successful, and the supplies will improve the learning outcomes of the 186 students.

I commend the teachers, students, faculty, and families who gave of their time and talents to influence the lives of students in Afghanistan for good.

HONORING THE INTERNATIONAL MYELOMA FOUNDATION

HON. BRIAN HIGGINS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 2010

Mr. HIGGINS. Madam Speaker, I come to the floor today to help raise awareness of myeloma. Myeloma is a cancer in the bone marrow affecting production of red cells, white cells, and stem cells. It is also commonly known as "multiple myeloma" since it affects multiple areas of bone marrow.

Myeloma is the second most common blood cancer after lymphomas. Each year approximately 20,000 Americans are diagnosed with myeloma and 10,000 lose their battle with this disease. At any one time there are over

100,000 myeloma patients undergoing treatment for their disease in the U.S.

Although the incidences of many types of cancers are decreasing, the frequency of myeloma cases continues to climb. Once thought of as a disease of the elderly, it is now being found in increasing numbers in people under 65 and it is not uncommon to find patients in their 30s.

As the oldest and largest myeloma foundation, the International Myeloma Foundation (IMF) is dedicated to improving the quality of life of myeloma patients while working toward prevention and a cure. This dedication has led to dramatic and important advances in treatment for multiple myeloma in the last few years. Unfortunately, the needless disparity in coverage between oral and intravenous (IV) chemotherapy has left many patients unable to utilize many of these breakthroughs.

I believe myeloma patients and their doctors should be able to take advantage of the treatment that is best suited for each patient, and not have to select their treatment based on insurance coverage. This is why I introduced my bill, HR 2366, The Cancer Drug Coverage Parity Act of 2009. The Cancer Drug Coverage Parity Act works to eliminate these inequities for cancer patients whose insurance has differences in the way oral and intravenous chemotherapy treatments are covered. This is an important issue for myeloma patients, their families, and every American battling cancer.

Madam Speaker, I ask my distinguished colleagues to join me in recognizing the exemplary work being done by the IMF to improve the quality of life of myeloma patients and their families and their efforts to find a cure in the fight against cancer.

THE OLD BRICK PLAYHOUSE

HON. SHELLEY MOORE CAPITO

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 2010

Mrs. CAPITO. Madam Speaker, I rise today to honor The Old Brick Playhouse of Elkins, West Virginia for the tremendous service they

provide to the youth of Randolph, Upshur, and surrounding counties through its Apprentice program.

Founded in 1992 by Executive Director Missy Armentrout McCollam, the Old Brick's Apprentice program utilizes arts education to foster confidence, leadership and team building skills through a student-acted and produced play or musical.

One needs only to look at the numbers to see the strength of this program. From an initial cast of a mere 20 high school students, the Apprentices today overflow the theater doors with an enrollment of more than 100 students, spanning grades 6-12.

Instilling a commitment to continuing education and expanding one's horizons, the Apprentice program's legacy is unmistakable. Some of the more than 2,000 Apprentice alumni have gone on to attend some of our nation's most prestigious colleges and universities. Others have gone on to act professionally. Many have achieved distinguished careers in business, law, medicine, or teaching; and, nearly all have become model citizens worthy of emulation.

Truly one of those small, local treasures to all in the community it enriches, I commend the Old Brick Playhouse of Elkins, West Virginia for its outstanding leadership and commitment over the past 18 years. Having been recently recognized at the highest state and national levels, I urge my colleagues to join me in honoring this wonderful organization.
