This directory lists sources for the funding of assistive technology for people with disabilities. Introductory information urges determination of what assistive technology is needed and the gathering of all necessary information (such as primary and secondary disabilities, employment history, income and expenses, and health insurance) prior to contacting a funding source or preparing a justification statement. Sources of funding are listed by state within the following broad categories: state technology assistance projects, state protection and advocacy agencies, and other sources of information (brief descriptions of 17 print sources). Usually provided for each listing are: organization name, address, phone numbers (voice, TTY, and fax), email, and Web site. (Contains 17 references.) (DB)
Introduction

With the advent of new technology, more and more options exist to enable persons with disabilities to live independently, to achieve higher levels of education, to participate in activities of the workplace, and to engage in hobbies and recreational activities. With the awareness of the existence of technology, persons with disabilities and their families expect access to that technology.

However, attempting to fulfill those expectations often leads to frustration as individuals seek financial assistance to purchase needed devices. Consumers and families are often confronted with a seemingly impenetrable maze of eligibility requirements, potential funding sources, restrictions, paperwork, rules and regulations, and denials and refusals. This Informed Consumer Guide attempts to provide sources of information to help negotiate that maze.

Getting Started

Before trying to find the appropriate funding source, there are two basic steps to take to lay the groundwork. First, determine what assistive technology is needed. For those with long-term disability, it is likely that the types of devices needed are already familiar; it may well be that the situation is one in which the user is seeking to replace old or outdated technology. In this case, the consumer needs to determine the specific item required (make, model, manufacturer, etc.) and from where it will be purchased. Consultation with a therapist, physician, or rehabilitation professional may be required to determine necessary features to accommodate changes in disability and/or ability levels. Once those determinations are made, acquire a prescription for the device. For parents of children with disabilities or for those who are newly disabled, consultation with medical and rehabilitation professionals is the essential first step in the process.

The second step is the gathering of information. Whether assistance is sought from an insurance company, a community organization, a government agency, or another resource, organized information is critical. Having the following available will help alleviate frustration and unnecessary delays:

- Primary Disability
- Time of Onset
- Cause of Disability
- Secondary Disability
- Time of Onset of Secondary Disability
- Cause of Secondary Disability
- Employment History
- Family Gross Income
- Monthly Expenses (rent or mortgage payments, utilities, outstanding loans and bills, medical expenses, etc.)
- Health Insurance Information
- Names, Ages, and Relationship of Dependents

Preparing a Justification Statement

Before any funds are actually appropriated, some funding sources require the applicant to prepare a justification statement. This is particularly true for government programs. When the funding source is a public or private insurance policy, either the expected beneficiary, a physician, or a therapist usually must submit a statement indicating the medical necessity of the purchase.

State vocational rehabilitation agencies normally insist that anyone applying for funds must be able to clearly demonstrate that the service or technology will enhance their ability to prepare for, get, or keep a job. If employment is not an expected outcome, then the justification statement must show that the device will improve the individual’s ability to function independently.

Often local school districts will pay for devices and auxiliary aids used in the classroom. However, parents must first be prepared to demonstrate how the device will enhance their child’s ability to obtain an appropriate education in the least restrictive environment possible.

Other funding sources will have their own specific requirements. Success in securing funding is frequently dependent on the applicant’s ability to address each agency’s unique requirements in a funding request.

ABLEDATA is funded by the National Institute on Disability and Rehabilitation Research (NIDRR), under contract number HN-96015001 and is operated by Macro International Inc. Most publications are available in accessible formats, including large print, Braille, electronic, and audio. For additional copies or for more information, contact ABLEDATA, 8630 Fenton Street, Suite 930, Silver Spring, MD 20910. 800/227-0216 or 301/608-8998 (voice), 301/608-8912 (TTY), or visit our Internet site at http://www.abledata.com.

Information for Independence

*This Guide replaces the July 1998 version of Funding Assistive Technology.
Sources of Funding Assistance and Information

A variety of projects and agencies offer funding-related information. Some are national in scope, while others are state-specific. The following listings provide a starting point.

State Technology Assistance Projects

Each state and territory in the U.S. has a Technology Assistance project that has up-to-date information on assistive technology resources for that state. Some projects have compiled lists of funding resources available in their states.

Alabama
Statewide Technology Access and Response (STAR)
System for Alabamians with Disabilities
Alabama Dept. of Rehabilitation Services
2125 East South Blvd., P.O. Box 20752
Montgomery, AL 36120-0752
V: 800/782-7656 (in state only); 334/613-3480.
TTY: 334/613-3519.
Fax: 334/613-3485.
E-mail: tbridges@rehab.state.al.us/star.
Web: http://www.rehab.state.al.us/star.

Alaska
Alaska Assistive Technology Project
Department of Education
Division of Vocational Rehabilitation Assistive Technologies of Alaska
1016 West 6th St., Suite 205
Anchorage, AK 99501
V: 800/478-4378 (in state only); 907/269-3570.
TTY: 800/898-0138 (in state only); 907/563-0153.
Fax: 907/269-3632.
E-mail: james_beck@labor.state.ak.us.
Web: http://www.labor.state.ak.us/at/index.htm.

American Samoa
American Samoa Assistive Technology Service (ASATS) Project
Division of Vocational Rehabilitation, Department of Human Resources
Pago Pago, American Samoa 96799
TTY: 011/684/223-7874.
Fax: 011/684/699-1376.
E-mail: edperei@yahoo.com.

Arizona
Arizona Technology Access Program (AzTAP)
Northern Arizona University
4105 N. 20th Street, Suite 260
Phoenix, AZ 85016
V: 800/477-9921 (in state only); 602/728-9534.
TTY: 602/728-9536.
Fax: 602/728-9353.
E-mail: jill.oberstein@nau.edu.
URL: http://www.nau.edu/ihd/aztap.html.

Arkansas
Arkansas Increasing Capabilities Access Network (ICAN)
Department of Education/Vocational Education Division
Arkansas Rehabilitation Services
2201 Brookwood Drive, Suite 117
Little Rock, AR 72202
V/TTY: 800/828-2799 (in state only); 501/666-8868.
Fax: 501/666-5319.
E-mail: aehurst@ars.state.ar.us.

California
California Assistive Technology System (CATS)
Department of Rehabilitation
P.O. Box 944222
Sacramento, CA 94244-2220
Voice: 916/263-8687.
TTY: 916/263-8685.
Fax: 916/263-8683.
E-mail: info@atnet.org.

Colorado
Colorado Assistive Technology Project
The Pavilion, A036/6140
1919 Ogden Street
Denver, CO 80218
V: 800/255-3477 (in state only); 303/864-5100.
TTY: 303/864-5110.
Fax: 303/864-5119.
E-mail: cathy.bodine@uchsc.edu.
Web: http://www.uchsc.edu/atp/.

Connecticut
Connecticut Assistive Technology Program
Department of Social Services
Bureau of Rehabilitation Services
25 Sigourney St., 11th Floor
Hartford, CT 06106
V: 800/537-2549 (in state only); 860/424-4881.
TTY: 860/424-4839.
Fax: 860/424-4850.
E-mail: Techact@UConnvm.uconn.edu.

Delaware
Delaware Assistive Technology Initiative (DATI)
Center for Applied Science and Engineering
University of Delaware/A.I. duPont Hospital for Children
1600 Rockland Road, Room 154
P.O. Box 269
Wilmington, DE 19899-0269
V/TTY: 800/870-DATI (in state only)
V: 302/651-6790.
TTY: 302/651-6794.
Fax: 302/651-6793.
E-mail: dati@asel.udel.edu.

Other Sources of Information

National Rehabilitation Information Center (NARIC)
http://www.naric.com

NARIC maintains an extensive collection of printed material pertaining to the procurement and utilization of assistive technology. The following documents from the NARIC library have been selected as being particularly useful for people searching for assistive device funding. Some of the publications are available on the Internet. Paper copies of most documents are available at a nominal charge. NARIC’s contact information follows:

NARIC
1010 Wayne Ave., Suite 800
Silver Spring, MD 20910.
V: 800/346-2742
TTY: 301/495-5626

Among the many resources listed in this 2-volume directory are a wide variety of funding sources.

This article provides an overview for Individualized Education Program (IEP) teams on obtaining funding for assistive technology (AT) for students with disabilities. The article describes a number of AT funding resources, including basic eligibility requirements, and offers suggestions for making successful claims, including documentation. Funding sources discussed include the Individuals with Disabilities Education Act (IDEA), Medicaid programs, the Developmental Disabilities and Assistance and Bill of Rights Act Amendments of 1987, vocational rehabilitation (VR) programs, and private insurance.

This booklet contains key information on funding assistive technology through the health system. This publication covers important topics of critical importance to individuals with disabilities who are entering the workforce including students transitioning from school, assistive technology for the college student, and the availability of assistive technology.

This booklet presents a detailed discussion of the work incentives available under the Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) programs, with an emphasis on using work incentives as a tool to fund assistive technology (AT). Topics discussed include: disincentives such as the $700 Substantial Gainful Employment (SGA) rule and the Continuing Disability Review (CDR); avoiding the $700 SGA rule in the SSDI program through income averaging and deductions; the trial work period; continuing eligibility for Medicare, and the right to buy in after eligibility ends; Sections 1619(a) and 1619(b); earned income exclusions in calculating the SSI check; Ticket to Work/Work Incentives Improvement Act (WIIA) provisions; and the SSI Plan for Achieving Self Support (PASS).

This article addresses the fact that the independent living movement may be making inroads into policy but change in practice is moving more slowly. Likewise, although assistive technology concerns have been incorporated into legislation, the delivery system continues to be inaccessible in many ways. Financing is still one of the major problems in accessing technology. Sources of funding are described as well as a variety of creative approaches to filling the gaps in funding.

In addition to providing excellent commentary on the Americans with Disabilities Act (ADA) and the TECH act, this article does a superb job of addressing some of the common concerns that disabled individuals, employers, and rehabilitation counselors have about purchasing assistive technology. Simple and straightforward check lists are also included alongside detailed funding strategies to make the funding allocation process less intimidating.

This article highlights the need for and the impact of loan financing programs for the acquisition of assistive technology. The importance of consumer involvement in all aspects of program development and operation are emphasized. An in-depth review of the potential that loan financing holds for persons with disabilities is provided through a discussion of the need for alternative financing strategies, an analysis of the results of the National Research of Loan Financing Strategies, and a sample of loan financing programs for assistive technology in operation in 1996.

This pamphlet is an excellent guide for parents attempting to attain assistive technology for their children. Specifically, it offers advice from other parents on how to get started, where to look for money, and what to do when applying for funding. Places to contact for more information or for help are included throughout and telephone numbers are listed at the end of the pamphlet in a "Resources" section.

9. "Funding And Assistive Technology," by A System of Technology to Achieve Results (STAR). State of Minnesota, Governor's Advocacy on Technology for People with Disabilities. 1996. NARC Accession Number: O12188N

The arduous task of obtaining funding for assistive technology can be a frustrating and exhausting experience for anyone. This brochure was designed essentially to minimize anxiety for newcomers to the funding allocation game. It highlights funding options and contact information and provides a concise and informative discussion of an individual's rights and entitlements in regards to education, employment, and independent living.

This bibliography is a thorough review of relevant literature up to 1994. It is primarily oriented towards finding funding for an individual's assistive technology. However, suggestions on where and how to find funding for technology programs, program grants, and service delivery models are given in the final section.

Worth Reading

Using the most common sources for assistive technology funding like Social Security or Medicaid is a general rule, but don't overlook using work incentives for financial assistance. To ensure a complete understanding of some familiar resources and the policies to obtain funding, this booklet discusses the differences between Medicare and Medicaid, Supplemental Security Income and Social Security. It also illustrates how devices needed for everyday use can correlate in to a work related expense that may be deductible.

This booklet is for attorneys and advocates seeking quick and detailed information on assistive technology funding through the education system. It gives an outlined description of the Individuals with Disabilities Education Act (IDEA) and it's regulations and assistive technology funding requirements. Supreme Court decisions are also presented, expressing the
public school's special education system obligation to provide students with disabilities assistive technology devices in school and in the home.

This article discusses a regulatory interpretation by the Office of Special Education and Rehabilitative Services (OSERS) in the U.S. Department of Education that as students transit from special education programs to adult life, the assistive devices purchased for their use by education systems may be transferred to rehabilitation systems to facilitate the transition from school to work.

This is an excellent article, addressed primarily toward health care providers, that talks about factors third party payers consider when determining whether or not to pay for an assistive device, and it talks about the kinds of questions health care providers should be asking themselves when recommending devices to clients or patients.

Though written in 1992, this on-line handbook continues to provide a valuable overview of assistive technology funding opportunities and options. Some of the information is outdated, but the book remains useful.

Strong self-advocacy skills can make a big difference when it comes to securing funding for assistive technology. This article tackles some general funding obstacles and discusses the "essential elements" needed to succeed. A six-step process is also presented to illustrate the importance of heightening one's ability to express his/her assistive technology needs effectively.

7. Exceptional Parent Magazine.

This excellent monthly publication always seems to have helpful information for parents about locating financial resources to get the products and services needed by their children with disabilities. Check out their web site at http://www.eparent.com.

**Combatting Common Funding Excuses . . .**

The subtitle to this article is "Common funding 'excuses' given in response to requests for funding of computers and environmental control devices in the major funding programs," and it lists all of the common excuses given by funding sources, as well as suggested arguments to combat those excuses! It is available through the Assistive Technology Funding and Systems Change Project (see above for the address).

B. "You Want Us To Fund That, Too?" also by Lewis Golinker (1995). Same availability as previous article.

This article addresses the "common excuses" used to deny funding through Medicaid, special education, vocational rehabilitation, and private insurance companies, and suggests arguments to combat those excuses.

Similar to the articles above, but this one deals specifically with home modification requests to various agencies.

This article describes the types of private health insurance available, how to review your own health plan for assistive technology coverage information, and how private health plans commonly respond to requests for assistive technology.

**The Key To Successful Funding**

While beginning the search for funding can be intimidating, the key to success is information, both general and knowing agency requirements. An agency's decision to grant funding for assistive technology is often contingent upon an applicant's knowledge of the process, determination, and preparation. Before beginning to explore their funding options, individuals should be able to identify any special needs and the assistive technology needed to meet them. Time should also be taken to become familiar with potential funding sources, their eligibility requirements, necessary paperwork, and payment policies. Most importantly, applicants should select funding sources in accordance with their needs and be able to justify the funding request to meet the agency's goals.

This guide was researched and written by Anjanette Daigle, Stephen Lowe, Katherine Belknap and Lynn Halverson and produced by ABLEDATA.
