¹ The term "family" refers to a group of two or more persons related by birth, marriage, or adoption and residing together. Every family must include a reference person.
² Adjusted by consumer price index research series (CPI-U-RS).
³ Data for American Indians and Alaska natives, native Hawaiians and other Pacific Islanders, and those reporting two or more races are included in the total but not shown separately.
⁴ Beginning with data for 2009, the upper income interval used to calculate median incomes was expanded to \$250,000 or more.
⁵ Reflects implementation of Census 2010-based population controls comparable to succeeding years.
⁶ The 2014 Current Population Survey (CPS) Annual Social and Economic Supplement (ASEC) included redesigned income questions, which were implemented to a subsample of the 98,000 addresses using a probability split panel design. These 2013 data are based on the 2014 ASEC sample of 68,000 addresses that received income questions similar to those used in the 2013 ASEC and are consistent with data in earlier years.
⁷ These 2013 data are based on the 2014 ASEC sample of 30,000 addresses that received redesigned income questions and are consistent with data in later years.
⁸ The CPS allows respondents to choose more than one race. Data shown are for "white alone, non-Hispanic," "black alone," and "Asian alone" race categories. ("Black" is also "black or African American.") Family race and Hispanic origin are based on the reference person.
 Note: Poverty thresholds are updated each year to reflect changes in the consumer price index (CPI-U).
 For details see publication Series P-60 on the Current Population Survey and Annual Social and Economic Supplements.
