Title: Application and Summary Report for an Emergency Exemption for Pesticides. (EPA ICR No. 0596.05; OMB No. 2070-0032). This is a request to extend the expiration date of a presently approved collection.

Abstract: Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, the EPA may temporarily authorize states, territories, and Federal agencies to ship and use unregistered pesticides in emergency situations. To ensure that an emergency actually exists, and that use of the pesticide will not pose an unreasonable risk to human health or the environment, the EPA requires exemption applicants to explain the circumstances necessitating the emergency use and to provide details on the pesticide and its proposed application. Following the application of the pesticide, applicants must submit a report to the EPA describing the pesticide treatment and its effectiveness, as well as any adverse effects.

Burden Statement: The public burden for this collection of information is estimated to average 101 hours per response for reporting and 2 hours per recordkeeper annually. This estimate includes the initial request for an emergency exemption and the time needed to complete and submit the summary report after the pesticide application. Included in this estimate is also the time needed to review instructions, search existing data sources, gather and maintain data needed, and review the collection of information.

Respondents: States, territories and Federal agencies.**Estimated No. of Respondents:** 300.**Estimated No. of Responses per Respondents:** 1.**Estimated Total Annual Burden on Respondents:** 30,500 hours.**Frequency of Collection:** On occasion.

SUPPLEMENTARY INFORMATION: The Agency has issued Reregistration Eligibility Decision (RED) documents for the pesticidal active ingredients listed above. Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1988, EPA is conducting an accelerated reregistration program to reevaluate existing pesticides to make sure they meet current scientific and regulatory standards. The data base to support the reregistration of each of the chemicals listed above is substantially complete. EPA has determined that all currently registered products subject to reregistration containing these active ingredients are eligible for reregistration.

All registrants of products containing one or more of the above listed active ingredients have been sent the appropriate RED documents and must respond to labeling requirements and product specific data requirements (if applicable) within 8 months of receipt.

Products containing other active ingredients will not be reregistered until those other active ingredients are determined to be eligible for reregistration.

The reregistration program is being conducted under Congressionally mandated time frames, and EPA recognizes both the need to make timely reregistration decisions and to involve the public. Therefore, EPA is issuing these REDs as final documents with a 60-day comment period. Although the 60-day public comment period does not affect the registrant's response due date, it is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the RED. All comments will be carefully considered by the Agency. If any comment significantly affects a RED, EPA will amend the RED by publishing the amendment in the **Federal Register**.
