Title: Connection of Telephone Equipment to the Telephone Network, Part 68, Sections 68.106, 68.108, 68.110.

Section 68.108 requires telephone companies to notify customers of possible discontinuance of service when customer's equipment is malfunctioning and to inform them of their right to file a complaint. Section 68.110 requires telephone companies to provide technical information concerning inter-face parameters not specified in Part 68 and to notify customers of changes in telephone company facilities, equipment, operations or procedures where such changes can be reasonably expected to render any customer's terminal equipment incompatible with the telephone company's communication facilities. The collections are designed to prevent harm to the telephone network when customer-provided equipment is connected to telephone company lines and assures that customers will not overload the telephone lines with excessive equipment which would degrade service to the customers and others.

OMB Control No.: 3060-0450.

Expiration Date: 02/28/98.

Title: Detariffing the Installation and Maintenance of Inside Wiring Services, Reports on State Regulatory Activities (CC Docket No. 79-105).

The rules applies only to the LEC serving the greatest number of access lines within the portions of the state that are, or would be, subject to the state regulation. The information filed is used by the Commission to monitor the activities of state agencies that desire to

impose price regulation for inside wiring services provided by telephone companies. The information is used to help ensure that such actions do not impede federal policies.

OMB Control No.: 3060-0439.
