

as well. Specifically, what technologies, legal remedies, and policy frameworks, or combinations thereof, can be used to effectively protect the security of the Internet, the public switched network, and other communications systems?

A panel of witnesses drawn from the public will be assembled to discuss the following topics with a panel of senior Administration officials, members of the Security Issues forum, and members of the U.S. Advisory Council on the NII, and to field questions and comments from other members of the public.

The public meeting will consist of two panels. The first panel, entitled "Experiences and Expectations," representing users of the NII, should address questions in three principal areas:

1. As systems evolve from a closed to a more open status, what are your expectations and needs regarding the availability and reliability of services and information on the NII? Examples of risks include loss of proprietary or personal information or network disruptions or outages.

2. How does your organization plan to ensure that information and underlying systems are available to legitimate users? Consider technical, managerial, and legal strategies.

3. How should government support the reliability and availability of the NII? What government policies or guidance would bolster your confidence in the NII?

The second panel, entitled, "current State of Affairs and Future Challenges," represented industry providers of communications services, whether cable, wireless, satellite, Internet, or public switched network communications, should address questions in three principal areas:

1. What are the security risks faced by industry providers of communications services today? As networks evolve from a closed status to a more open one, how will the interoperability of systems and the expansion of universal access affect availability and reliability? How do you plan to address potential threats such as network disruptions and outages or degradation of service as new services are implemented? Consider technical, managerial, and legal strategies.

2. Do you feel that end-users are aware of the level of availability and reliability associated with various components of the NII? What steps have you taken to educate or meet the expectations of the user in the areas of availability and reliability of the NII, particularly within the Internet?

3. How should government support availability and reliability in the NII? Some examples might include

legislation, public education, or regulation.

II. Guidelines for Participation in the Public Hearing

Individuals who would like to participate on a panel must request an opportunity to do so no later than March 20, 1995, by submitting a brief, 1-2 page summary position statement. If approved, each participant will be allowed to present brief opening remarks. Primary participation, however, shall be during the general discussion to follow, according to the format described above.

Participants in the public meeting will testify before and participate in discussions with a panel consisting of members of the Advisory Council, members of the Security Issues Forum, and other Administration officials.

Individuals not selected as panel participants may offer comments or ask questions of the witnesses by requesting an opportunity to do so and being recognized during the meeting by the chairs of the meetings. Oral remarks offered in this fashion should not exceed three minutes. No advance approval is required to attend the public meetings, offer comments, or present questions.

The public meeting will be chaired by Ms. Sally Katzen, Chair of the NII Security Issues Forum. The meeting will be co-chaired by Mr. Bob Marquette, Deputy Manager, National Communications Systems; Mr. Tom Sugrue, Deputy Assistant Secretary for Communications and Information, National Telecommunications and Information Administration; and Mr. Robert Pepper, Chief, Office of Plans & Policy, Federal Communications Commission.

OFFICE OF PERSONNEL MANAGEMENT

Notice of Request for Reclearance of an Information Collection for Comprehensive Medical Plans

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a request for reclearance of an information collection.

Comprehensive Medical Plans: Applications to Participate in Federal Employees Health Benefits (FEHB) Program and Contractor Records Retention is used by OPM to determine if Comprehensive Medical Plans applying for participation in the Federal Employees Health Benefits Program meet the requirements for participation. The second part of this clearance covers recordkeeping requirements imposed on the plans that participate in the FEHB program for the purpose of contract auditing and monitoring.

The total annual reporting burden is estimated to be 13,230 hours based on 49 applications at an average time burden of 270 hours per plan. The recordkeeping burden is estimated to be 300 hours. Therefore, the total annual reporting burden including both recordkeeping and reporting requirements equals 13,530 (13,230 plus 300) hours.
