

following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Extension.

2. The title of the information collection: NRC Form 314—Certificate of Disposition of Materials.

3. The form number if applicable: NRC Form 314.

4. How often the collection is required: The form is submitted once, when a licensee terminates its license.

5. Who will be required or asked to report: Persons holding an NRC license for the possession and use of radioactive byproduct, source, or special nuclear material who are ceasing licensed activities and terminating the license.

6. An estimate of the number of responses: 400.

7. An estimate of the total number of hours needed to complete the requirement or request: An average of 0.5 hours per response, for a total of 200 hours.

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: NRC Form 314 furnishes information to NRC regarding transfer or other disposition of radioactive material by licensees who wish to terminate their licenses. The information is used by NRC as part of the basis for its determination that the facility has been cleared of radioactive material before the facility is released for unrestricted use.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW., (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer, Troy Hiller, Office of Information and Regulatory Affairs (3150-0028), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395-3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 415-7233.

Dated at Rockville, Maryland, this 14th day of March, 1995.

For the Nuclear Regulatory Commission.

### Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of the Office of Management and Budget review of information collection.

**SUMMARY:** The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection: 10 CFR Part 39—Licenses and Radiation Safety Requirements for Well Logging.

3. The form number if applicable: Not applicable.

4. How often the collection is required: Applications for new licenses and amendments may be submitted at any time. Applications for renewal are submitted every 5 years. Reports are submitted as events occur.

5. Who will be required or asked to report: Applicants for and holders of specific licenses authorizing the use of licensed radioactive material in well logging.

6. An estimate of the number of responses: 643.

7. An estimate of the total number of hours needed to complete the requirement or request: Approximately 3.2 hours annually per respondent for applications and reports, plus approximately 214 hours annually per recordkeeper. The industry total burden is 13,676 hours annually.

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: NRC regulations in 10 CFR Part 39 establish radiation safety requirements for the use of radioactive material in well logging operations. The information in the applications, reports and records is used by the NRC staff to ensure that the health and safety of the public is protected and that licensee possession and use of source and byproduct material is in compliance with license and regulatory requirements.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW., (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer:

Troy Hillier, Office of Information and Regulatory Affairs (3150-0130), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395-3084.

### [Docket No. 318]

### Baltimore Gas and Electric Company; Calvert Cliffs Nuclear Power Plant Unit No. 2, Environmental Assessment and Funding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of exemptions from Facility Operating License No. DPR-69, issued to Baltimore Gas and Electric Company (the licensee), for operation of the Calvert Cliffs Nuclear Power Plant, Unit No. 2 (CC2) located in Calvert County, Maryland.

### Environmental Assessment

#### Identification of the Proposed Action

This Environmental Assessment has been prepared to address potential environmental issues related to the licensee's application of February 24, 1995. The proposed action would exempt the licensee from: (1) The requirements of 10 CFR Part 50, Appendix J, Paragraph III.D.1.(a), to permit a one-time interval extension between the first and second Type A test (containment integrated leak rate test) for approximately 24 months from the spring 1995 refueling outage to the spring 1997 refueling outage and, (2) would extend the second 10-year service period to 12 years allowing the third Type A test to be performed during the spring 1999 refueling outage.

#### The Need for the Proposed Action

The proposed action is needed to permit the licensee to defer the Type A test from the spring 1995 refueling outage to the spring 1997 refueling outage, which will also result in extending the second 10-year service period to 12 years to allow the third Type A test to be performed, thereby deferring the cost of performing the tests and elimination the time required to perform the test from the critical path schedule during the upcoming spring
