

processing plants) (except nonfood-processing areas); all aerial applications; and aircraft and buses.

### III. Uses Supported

Amvac, manufacturer of technical-grade dichlorvos, is supporting the following uses under reregistration. A detailed technical label will be sent to every dichlorvos registrant to provide guidance as to the specific uses that can be formulated from this technical product. The only uses for which this product could be used to formulate end-use products would be as follows:

#### *Domestic Uses*

Use of impregnated resin pest strip in campers, trailers, homes, cabins, garages, basements, and garbage cans. Use of total-release fogger (less than 1% active ingredient) in homes, cabins, garages, and basements. Use of total-release fogger (greater than 1% active ingredient) and nontotal-release aerosol in homes, cabins, garages, and basements only by a licensed pest control operator (PCO). Use of nontotal-release fogger and liquid formulations only by PCO in domestic dwellings. Dog and cat flea collars.

#### *Agricultural Uses*

Use of impregnated resin pest strip over nonperishable packaged and bagged or bulk stored raw and processed commodities. Use of impregnated resin strip and total-release fogger (less than 1% active ingredient) in animal buildings and dairy milk rooms. Use of commercial aerosol/foggers only by PCO in warehouses, silos, bulk bins, and in food-processing, food-manufacturing, and food-handling and storage plants containing nonperishable packaged or bagged or bulk raw or processed food commodities and the nonfood areas of these sites. Liquid formulations for a variety of agricultural uses including animal premises and direct livestock animal treatment. Liquid formulations for use in mushroom houses and only for use by PCO. Liquid formulations for use only in commercial application equipment for space treatment and for use by PCO in warehouses, silos, bulk bins and food-processing, food-manufacturing, and food service establishments containing nonperishable, packaged, or bagged raw or processed food commodities or bulk raw or processed food commodities, and non-food handling areas. Use of nontotal-release aerosol only by PCO in animal buildings and dairy barns (milk rooms).

#### *Other Uses*

Use of impregnated dispenser in enclosed outdoor utility equipment. Use of impregnated resin pest strip in museum collections, insect traps, garbage cans, catch basins, and trash dumpsters. Use of total-release fogger (greater than 1% active ingredient) and only by PCO in warehouses, railroad cars, theaters, and industrial plants. Liquid formulations for crack and crevice use only (not space spray) and only by PCO in nonfood areas of commercial, industrial, and institutional sites, kennels, outside surfaces of buildings, refuse dumps, refuse and solid waste containers, and wine cellars. Liquid formulations only for veterinary use for direct application to domestic animals.

### IV. Scope of this Notice

This notice pertains to all Amvac end-use registrations and technical registrations. On the effective date of this document, Amvac must delete the appropriate uses from its labels. Since Amvac is the sole registrant of the technical-grade dichlorvos, there will no longer be a manufacturing use product available from which to formulate any dichlorvos-registered products for the uses Amvac is requesting to delete, unless Amvac withdraws its request. End-use registrants are being notified by certified mail of Amvac's decision to delete these uses. End-use registrants who purchase technical dichlorvos with a revised label may only formulate their products for the uses allowed on the technical label. For purposes of public information, Amvac will allow dichlorvos to be formulated for those uses listed in Section III of this notice. Any registrant that does not change its label to conform to the new technical label will be in violation of FIFRA. If any of the end-use registrants (or any other persons) desire to retain any of the uses for which deletion is requested, they are encouraged to contact Amvac to seek retention of that use. EPA intends to approve the proposed amendments at the close of the comment period unless Amvac withdraws or amends its request. The following list specifies the registrations affected by this notice: 5481-9, 5481-13, 5481-41, 5481-73, 5481-96, 5481-200, 5481-201, 5481-202, 5481-203, 5481-204, 5481-205, 5481-206, 5481-207, 5481-208, 5481-216, 5481-217, 5481-220, 5481-240, 5481-241, 5481-334, 5481-338, 5481-340, 5481-341, 5481-342, 5481-343, 5481-344, 5481-345, 5481-346, 5481-347, 5481-348.

### V. Existing Stocks Provisions

Under the authority of FIFRA section 6(a)(1), EPA will establish certain limitations on the distribution and use of existing stocks of dichlorvos products subject to any final cancellation notice. EPA defines the term "existing stock" to mean any quantity of dichlorvos products in the United States on the effective date an application for amendment of registration is granted by the Agency. Such existing stocks include dichlorvos products that have been formulated, packaged, and labeled and are being held for shipment or release or have been shipped or released into commerce.

The Agency will permit Amvac to sell and distribute existing stocks of products with current labels for up to 1 year after the effective date of an amendment. Any sale or distribution of such products by Amvac after that 1-year period which do not bear labeling consistent with any amendment granted pursuant to this notice will be a violation of federal law. Any existing stocks remaining in the possession of all other persons after 1 year may continue to be sold, distributed, and used until such existing stocks are exhausted.

EPA reserves the right to amend this existing stocks provision should conditions warrant such amendment. Users need to be aware that it is their responsibility to determine whether residues of dichlorvos-treated food will result in illegal residues under FFDCA.

### VI. Comments

Persons interested in commenting on the proposed use deletions are invited to submit their written comments on or before May 19, 1995 to the address given above. Registrants should be aware that EPA will consider these comments in the context of other ongoing Agency activities relating to dichlorvos.
