DEPARTMENT OF DEFENSE

Department of the Navy

**Public Hearing for the Draft
Environmental Impact Statement for
Establishment of the United States
Navy Mine Warfare Center of
Excellence in the Corpus Christi Bay
Area, Texas**

Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR parts 1500-1508), the Department of the Navy has prepared and filed with the U.S. Environmental Protection Agency a Draft Environmental Impact Statement (DEIS) for establishment of the United States Navy Mine Warfare Center of Excellence (the "Center") in the Corpus Christi Bay Area, Texas.

The Navy proposes to collocate the majority of its mine warfare and mine counter measures assets in proximity to each other at the Ingleside/Corpus Christi Naval Complex. This will allow for comprehensive air and surface mine warfare training and joint operations. Congress directed the Navy to establish the "Center" at Naval Station Ingleside, Texas, in the FY 1994 Defense Appropriations Act. The DEIS evaluates the reasonable alternatives to implementing the proposed action in the Corpus Christi Bay area. In addition to the various facility location alternatives, a "no action" alternative was evaluated which the "Center" would not be established.

The proposed action includes new construction and/or modification of existing facilities at Naval Station Ingleside and Naval Air Station Corpus Christi, and proposes the establishment of training and operating areas in the Gulf of Mexico. Construction would consist of a magnetic silencing facility, an aviation mine counter measures sled facility, a small craft pier, and the construction and/or modification of

facilities needed to support two MH-53E Sea Dragon helicopter squadrons and one explosive ordnance disposal mobil unit. The training and operating areas would be located off North Padre Island and within Mineral Management Service Lease Blocks 732, 733, 734, 793, 799, and 816. This would include an ordnance detonation area required for the detonation of practice mines using a maximum of 10 pounds of C-4 explosive. Surface restrictions in these areas would be established to allow for both daily training and quarterly integrated training. The establishment of the "Center" involves the transfer of approximately 4,820 military personnel and their families (approximately 4,877 dependents) to the Corpus Christi Bay Area.

Dredging activities associated with the project involve new work dredging and subsequent maintenance dredging of the magnetic silencing facility. Dredging for the magnetic silencing facility would require removal of between 250,000 and 410,000 cubic yards of material to obtain the depth of water required for facility and turning basin operations. The total 50-year dredging maintenance requirement could range between 400,000 to 650,000 cubic yards, depending upon the initial area dredged. The existing Navy disposal area near Ingleside would be used for dredge material disposal.

The DEIS has been distributed to various federal, state, and local agencies, elected officials, special interest groups, and interest individuals. It is also on file and available for review at the Corpus Christi Public Library (Main branch and Flour Bluff branch) and at the Ingleside Public Library. A limited number of single copies are available at the address listed at the end of this notice.

The Navy will conduct two public hearings to inform the public of the DEIS findings and to solicit comments: The first hearing will be on Tuesday, June 6, 1995, beginning at 7 p.m. at the Flour Bluff ISD Auditorium, 2505 Waldron Road, Flour Bluff, Texas; and the second hearing will be on Wednesday, June 7, 1995, beginning at 7 p.m. at the Ingleside High School Cafeteria, 640 Mustang Drive, Ingleside, Texas. Federal, state, and local agencies, and interested parties are invited to be present or represented at the hearing. Oral comments will be heard and transcribed by a stenographer. To assure accuracy of the record, all comments should be submitted in writing. All comments, both oral and written, will become part of the public record in the study. In the interest of available time, each speaker will be asked to limit oral
