

Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Telephone: (703) 306-1885.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate NSF-CBMS Regional Research Conferences in Mathematical Sciences proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: May 15, 1995.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8027]

Sequoyah Fuels Corporation

[License No. SUB-1010]

Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by the "Native Americans for a Clean Environment's Petition for an Order Requiring Sequoyah Fuels Corporation to File a Final Site Characterization Plan and for an Order Forbidding Transfer of SFC Property Prior to Obtaining a License Amendment," dated March 11, 1995, the Native Americans for a Clean Environment (NACE or Petitioner) request that the Nuclear Regulatory Commission take action with regard to Sequoyah Fuels Corporation (SFC or Licensee).

Petitioner requests that the NRC: (1) Reverse the NRC staff's decision to permit SFC to proceed with site characterization without submitting a revised Final Site Characterization Plan (SCP) by issuing an order requiring SFC to submit a revised Final SCP, or at the minimum a Confirmatory Action Letter requiring SFC to submit a Final SCP by a date certain; (2) issue an order forbidding SFC, Sequoyah Fuels International, Sequoyah Holding Corporation, or any other associated corporation that holds title to property under License SUB-1010, from transferring any interest in any of its property before SFC applies for and receives a license amendment permitting such a transfer; (3) before

issuing any such license amendment, find reasonable assurance that any entity acquiring an interest in the SFC property fully understands the nature of the liabilities and responsibilities it is undertaking for cleanup and long-term care of the site and that it has the financial capability to carry out those responsibilities; and (4) obtain or perform a title search of all property used in connection with the SFC license in order to clarify the identity and ownership of all property subject to License SUB-1010.

As the bases for its requests, Petitioner states that: (1) Given the serious deficiencies found by the staff in its review of the SFC Draft SCP, the NRC staff illegally and improperly excused SFC from its obligation to submit a final SCP, in violation of the Timeliness in Decommissioning Rule, the NRC's Action Plan to Ensure Timely Cleanup of SDMP Sites, the NRC's December 29, 1992, Demand for Information to SFC, the Memorandum of Understanding between the NRC and the Environmental Protection Agency, and commitments by the NRC to NACE that SFC would be required to demonstrate how it would sample all potentially contaminated areas in a site characterization plan; (2) SFC is presenting a "Trust Indenture" to several towns and the county of Sequoyah for the creation of an industrial park; (3) the Trust Indenture depicts the 1400 acres of land subject to License SUB-1010 as the candidate area for the industrial park, but neither the Trust Indenture nor the associated documents refers to actual or potential contamination of the site due to groundwater migration from the contaminated processing area, of effluent streams and ditches, or of the Carlisle School, the need to obtain a license amendment before transferring this property, the transferee's potential liability for cleanup of the property, or that SFC has been ordered by NRC and EPA to characterize the extent of contamination on this property; (4) the 1400 acres subject to the Trust Indenture surrounds the 85-acre processing area SFC has identified as the major focus of its site characterization and cleanup effort; and (5) SFC has made conflicting representations regarding the size of the "facility" or "site" to the NRC and in the Trust Indenture.

The Petition is being evaluated pursuant to 10 CFR 2.206 of the Commission's regulations. The Petition has been referred to the Director of the Office of Nuclear Material Safety and Safeguards. As provided by § 2.206,

appropriate action will be taken on this Petition within a reasonable time.

A copy of the Petition is available for inspection at the Commission's Public Document Room at 2120 L Street NW., Washington, DC 20555.

Dated at Rockville, Maryland this 10th day of May, 1995.

For the Nuclear Regulatory Commission.

Carl J. Paperiello,

Director, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-M

[Docket Nos. 50-277 and 50-278]

Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing

In the matter of Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, Atlantic City Electric Company, Peach Bottom Atomic Power Station, Units 2 and 3.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR-44 and DPR-56, issued to the Philadelphia Electric Company (PECO, the licensee), for operation of the Peach Bottom Atomic Power Station, Units 2 and 3 (Peach Bottom, PBAPS), located in York County, Pennsylvania.

The proposed amendment, requested by the licensee in a letter dated September 29, 1994, as supplemented by letters dated March 3, 1995 and March 30, 1995, would represent a full conversion from the current Technical Specifications (TS) to a set of TS based on NUREG-1433, "Standard Technical Specifications, General Electric Plants, BWR/4," Revision O, September 1992. NUREG-1433 has been developed through working groups composed of both NRC staff members and the BWR/4 owners and has been endorsed by the staff as part of an industry-wide initiative to standardize and improve TS. As part of this submittal, the licensee has applied the criteria contained in the Commission's Final Policy Statement on Technical Specification Improvements for Nuclear Power Reactors of July 22, 1993 to the current Peach Bottom Technical Specifications, and, using NUREG-1433 as a basis, developed a proposed set of improved TS for PBAPS.

The licensee has categorized the proposed changes to the existing TS into four general groupings. These groupings are characterized as administrative changes, relocated changes, more
