Determination of Attainment of Ozone Standard by Grand Rapids and Muskegon, Michigan; Determination Regarding Applicability of Certain Reasonable Further Progress and Attainment Demonstration Requirements

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Direct final rule.

SUMMARY: The USEPA is determining, through direct final procedure, that the Grand Rapids (Kent and Ottawa Counties) and Muskegon (Muskegon County) ozone nonattainment areas have attained the National Ambient Air Quality Standard (NAAQS) for ozone. This determination is based upon 3 years of complete, quality assured ambient air monitoring data for the years 1992-1994 that demonstrate that the ozone NAAQS has been attained in these areas. On the basis of this determination, USEPA is also determining that certain reasonable further progress and attainment demonstration requirements, along with certain other related requirements, of part D of Title I of the Clean Air Act are not applicable to the areas for so long as the areas continue to attain the ozone NAAQS. In the proposed rules section of this **Federal Register**, USEPA is proposing these determinations and soliciting public comment on them. If adverse comments are received on this direct final rule, USEPA will withdraw this final rule and address these comments in a subsequent final rule on the related proposed rule which is being published in the proposed rules section of this **Federal Register**. No additional opportunity for public comment will be provided. Unless this direct final rule is

withdrawn no further rulemaking will occur on this action.

EFFECTIVE DATE: This action will be effective July 17, 1995 unless notice is received by July 3, 1995 that someone wishes to submit adverse comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Written comments can be mailed to: Carlton T. Nash, Chief, Regulation Development Section, Air Toxics and Radiation Branch, (AT-18J), United States Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.

A copy of the air quality data and USEPA's analysis are available for inspection at the following address: (It is recommended that you telephone Madelin Rucker at (312) 886-0661 before visiting the Region 5 office).

FOR FURTHER INFORMATION CONTACT: Madelin Rucker, Regulation Development Section, Air Toxics and Radiation Branch (AT-18J), United States Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604. Telephone: (312) 886-0661.

SUPPLEMENTARY INFORMATION:

I. Background

Subpart 2 of part D of Title I of the Clean Air Act (Act) contains various air quality planning and state implementation plan (SIP) submission requirements for ozone nonattainment areas. USEPA believes it is reasonable to interpret provisions regarding reasonable further progress (RFP) and attainment demonstrations, along with certain other related provisions, so as not to require SIP submissions if an ozone nonattainment area subject to those requirements is monitoring attainment of the ozone standard (i.e., attainment of the NAAQS demonstrated with three consecutive years of complete, quality assured air quality monitoring data). As described below, USEPA has previously interpreted the general provisions of subpart 1 of part D of Title I (sections 171 and 172) so as not to require the submission of SIP revisions concerning RFP, attainment demonstrations, or contingency measures. As explained in a memorandum dated May 10, 1995 from John Seitz to the Regional Air Division Directors, entitled "Reasonable Further Progress, Attainment Demonstration, and Related Requirements for Ozone Nonattainment Areas Meeting the National Ambient Air Quality Standard," USEPA believes it is appropriate to interpret the more specific RFP, attainment demonstration

and related provisions of subpart 2 in the same manner.

First, with respect to RFP, section 171(1) states that, for purposes of part D of Title I, RFP "means such annual incremental reductions in emissions of the relevant air pollutant as are required by this part or may reasonably be required by the Administrator for the purpose of ensuring attainment of the applicable national ambient air quality standard by the applicable date." Thus, whether dealing with the general RFP requirement of section 172(c)(2), or the more specific RFP requirements of subpart 2 for classified ozone nonattainment areas (such as the 15 percent plan requirement of section 182(b)(1)), the stated purpose of RFP is to ensure attainment by the applicable attainment date.¹ If an area has in fact attained the standard, the stated purpose of the RFP requirement will have already been fulfilled and USEPA does not believe that the area need submit revisions providing for the further emission reductions described in the RFP provisions of section 182(b)(1).

USEPA notes that it took this view with respect to the general RFP requirement of section 172(c)(2) in the General Preamble for the Interpretation of Title I of the Clean Air Act Amendments of 1990 (57 FR 13498 (April 16, 1992)), and it is now extending that interpretation to the specific provisions of subpart 2. In the General Preamble, USEPA stated, in the context of a discussion of the requirements applicable to the evaluation of requests to redesignate nonattainment areas to attainment, that the "requirements for RFP will not apply in evaluating a request for redesignation to attainment since, at a minimum, the air quality data for the area must show that the area has already attained. Showing that the State will make RFP towards attainment will, therefore, have no meaning at that point." (57 FR at 13564.)²

¹ USEPA notes that paragraph (1) of subsection 182(b) is entitled "PLAN PROVISIONS FOR REASONABLE FURTHER PROGRESS" and that subparagraph (B) of paragraph 182(c)(2) is entitled "REASONABLE FURTHER PROGRESS DEMONSTRATION," thereby making it clear that both the 15 percent plan requirement of section 182(b)(1) and the 3 percent per year requirement of section 182(c)(2) are specific varieties of RFP requirements.

² See also "Procedures for Processing Requests to Redesignate Areas to Attainment," from John Calcagni, Director, Air Quality Management Division, to Regional Air Division Directors, September 4, 1992, at page 6 (stating that the "requirements for reasonable further progress * * * will not apply for redesignations because they only have meaning for areas not attaining the standard") (hereinafter referred to as "September 1992 Calcagni memorandum").

Second, with respect to the attainment demonstration requirements of section 182(b)(1), an analogous rationale leads to the same result. Section 182(b)(1) requires that the plan provide for "such specific annual reductions in emissions * * * as necessary to attain the national primary ambient air quality standard by the attainment date applicable under this Act." As with the RFP requirements, if an area has in fact monitored attainment of the standard, USEPA believes there is no need for an area to make a further submission containing additional measures to achieve attainment. This is also consistent with the interpretation of certain section 172(c) requirements provided by USEPA in the General Preamble to Title I, as USEPA stated there that no other measures to provide for attainment would be needed by areas seeking redesignation to attainment since "attainment will have been reached." (57 FR at 13564; see also September 1992 Calcagni memorandum at page 6.) Upon attainment of the NAAQS, the focus of State planning efforts shifts to the maintenance of the NAAQS and the development of a maintenance plan under section 175A.

Similar reasoning applies to other related provisions of subpart 2 such as the contingency measure requirements of section 172(c)(9). USEPA has previously interpreted the contingency measure requirement of section 172(c)(9) as no longer being applicable once an area has attained the standard since those "contingency measures are directed at ensuring RFP and attainment by the applicable date." (57 FR at 13564; see also September 1992 Calcagni memorandum at page 6.)

USEPA emphasizes that the lack of a requirement to submit the SIP revisions discussed above exists only for as long as an area designated nonattainment continues to attain the standard. If USEPA subsequently determines that such an area has violated the NAAQS, the basis for the determination that the area need not make the pertinent SIP revisions would no longer exist. The USEPA would notify the State of that determination and would also provide notice to the public in the **Federal Register**. Such a determination would mean that the area would have to address the pertinent SIP requirements within a reasonable amount of time, which USEPA would establish taking into account the individual circumstances surrounding the particular SIP submissions at issue. Thus, a determination that an area need not submit one of the SIP submittals amounts to no more than a suspension

of the requirement for so long as the area continues to attain the standard.

The State must continue to operate an appropriate air quality monitoring network, in accordance with 40 CFR part 58, to verify the attainment status of the area. The air quality data relied upon to determine that the area is attaining the ozone standard must be consistent with 40 CFR Part 58 requirements and other relevant USEPA guidance and recorded in USEPA's Aerometric Information Retrieval System (AIRS).

The determinations that are being made with this action are not equivalent to the redesignation of the area to attainment. Attainment of the ozone NAAQS is only one of the criteria set forth in section 107(d)(3)(E) that must be satisfied for an area to be redesignated to attainment. To be redesignated the State must submit and receive full approval of a redesignation request for the area that satisfies all of the criteria of that section, including the requirement of a demonstration that the improvement in the area's air quality is due to permanent and enforceable reductions and the requirements that the area have a fully-approved SIP meeting all of the applicable requirements under section 110 and part D and a fully-approved maintenance plan.

Furthermore, the determinations made in this action do not shield an area from future USEPA action to require emissions reductions from sources in the area where there is evidence, such as photochemical grid modeling, showing that emissions from sources in the area contribute significantly to nonattainment in, or interfere with maintenance by, other nonattainment areas. USEPA has authority under sections 110(a)(2)(A) and 110(a)(2)(D) to require such emission reductions if necessary and appropriate to deal with transport situations.

II. Analysis of Air Quality Data

The USEPA has reviewed the ambient air monitoring data for ozone (consistent with the requirements contained in 40 CFR Part 58 and recorded in AIRS) for the Grand Rapids and Muskegon ozone nonattainment areas in the State of Michigan from 1992 through the present time. On the basis of that review USEPA has concluded that the area attained the ozone standard during the 1992-1994 period and continues to attain the standard at this time. For ozone, an area may be considered attaining the NAAQS if there are no violations, as determined in accordance with the regulation codified at 40 CFR 50.9, based on three

(3) consecutive calendar years of complete, quality assured monitoring data. A violation occurs when the ozone air quality monitoring data show greater than one (1) average expected exceedance per year at any site in the area at issue. An exceedance occurs when the maximum hourly ozone concentration exceeds 0.124 parts per million (ppm). The data should be collected and quality-assured in accordance with 40 CFR part 58, and recorded in the AIRS in order for it to be available to the public for review.

The Grand Rapids and Muskegon areas have demonstrated attainment of the ozone NAAQS based on ozone monitoring data for the years 1992 through 1994. The ozone monitoring network in Grand Rapids consists of two monitors located in Kent County. A monitor was established in Ottawa County in 1989 and relocated to Allegan County in 1993. The State, however, did reestablish a monitor in Ottawa county in 1994. Two exceedances of the ozone standard have been monitored since 1992 in the Grand Rapids area, both of these occurred at the Grand Rapids monitor in Kent County. At this site, the first exceedance of 0.156 ppm occurred in 1993, and the second exceedance of 0.149 ppm occurred in 1994. The ozone monitoring network in Muskegon consists of one monitor located in Muskegon County. Three exceedances of the ozone standard have been monitored since 1992 in the Muskegon area, all three of these occurred at the Muskegon monitor in Muskegon County. At this site, one exceedance was recorded during each of the years 1992, 1993, and 1994 at concentrations of 0.129 ppm, 0.141 ppm, and 0.146 ppm, respectively. Data stored in AIRS was used to determine the annual average expected exceedances for each area for the years 1992, 1993, and 1994. Data contained in AIRS have undergone quality assurance review by the State and USEPA. Since the annual average number of expected exceedances for each monitor during the most recent three years is equal to 1.0, the Grand Rapids and Muskegon areas are considered to have attained the standard. A more detailed summary of the ozone monitoring data for the area is provided in the USEPA technical support document dated May 12, 1995.

III. Final Action

USEPA determines that the Grand Rapids and Muskegon ozone nonattainment areas have attained the ozone standard and continue to attain the standard at this time. As a consequence of USEPA's determination that the Grand Rapids and Muskegon

areas have attained the ozone standard, the requirements of section 182(b)(1) concerning the submission of the 15 percent plan and ozone attainment demonstration and the requirements of section 172(c)(9) concerning contingency measures are not applicable to the area so long as the area does not violate the ozone standard.

USEPA emphasizes that these determinations are contingent upon the continued monitoring and continued attainment and maintenance of the ozone NAAQS in the affected areas. If a violation of the ozone NAAQS is monitored in the Grand Rapids and Muskegon areas (consistent with the requirements contained in 40 CFR part 58 and recorded in AIRS), USEPA will provide notice to the public in the **Federal Register**. Such a violation would mean that the area would thereafter have to address the requirements of section 182(b)(1) and section 172(c)(9) since the basis for the determination that they do not apply would no longer exist.

As a consequence of the determinations that the areas have attained and that the reasonable further progress and attainment demonstration requirements of section 182(b)(1) and contingency measure requirements of section 172(c)(9) do not presently apply, the sanctions clocks started by USEPA as a result of the findings made on January 21, 1994 regarding incompleteness of the section 181(b)(1) 15 percent plans and 172(c)(9) contingency plans are hereby stopped as the deficiency for which the clocks were started no longer exists.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any state implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action will become effective on July 17, 1995. However, if the USEPA receives adverse comments by July 3, 1995, then the USEPA will publish a notice that withdraws the action, and will address these comments in a subsequent final rule on the related proposed rule which is being published in the proposed rules section of this **Federal Register**.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities (5 U.S.C. 603 and 604). Alternatively, USEPA may

certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000. This action's determination does not create any new requirements, but allows suspension of the indicated requirements. Therefore, because the approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected.

Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act") (signed into law on March 22, 1995) requires that the Agency prepare a budgetary impact statement before promulgating a rule that includes a Federal mandate that may result in expenditure by State, local, and tribal governments, in aggregate, or by the private sector, of \$100 million or more in any one year. Section 203 requires the Agency to establish a plan for obtaining input from and informing, educating, and advising any small governments that may be significantly or uniquely affected by the rule.

Under section 205 of the Unfunded Mandates Act, the Agency must identify and consider a reasonable number of regulatory alternatives before promulgating a rule for which a budgetary impact statement must be prepared. The Agency must select from those alternatives the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule, unless the Agency explains why this alternative is not selected or the selection of this alternative is inconsistent with law.

Because this final rule is estimated to result in the expenditure by State, local, and tribal governments or the private sector of less than \$100 million in any one year, the Agency has not prepared a budgetary impact statement or specifically addressed the selection of the least costly, most cost-effective, or least burdensome alternative. Because small governments will not be significantly or uniquely affected by this rule, the Agency is not required to develop a plan with regard to small governments.

Under Section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 1, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it

extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See Section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Nitrogen oxides, Ozone, Volatile organic compounds, Intergovernmental relations, Reporting and record keeping requirements.

Authority: 42 U.S.C. 4201-7601q.

Dated: May 18, 1995.

Valdas V. Adamkus,

Regional Administrator.

Part 52, chapter 1, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401-7671q.

Subpart X—Michigan

2. Section 52.1174 is amended by adding new paragraph (k) to read as follows:

* * * * *

§ 52.1174 Control strategy: Ozone.

(k) Determination—EPA is determining that, as of July 17, 1995, the Grand Rapids and Muskegon ozone nonattainment area has attained the ozone standard and that the reasonable further progress and attainment demonstration requirements of section 182(b)(1) and related requirements of section 172(c)(9) of the Clean Air Act do not apply to the area for so long as the area does not monitor any violations of the ozone standard. If a violation of the ozone NAAQS is monitored in the Grand Rapids and Muskegon ozone nonattainment area, these determinations shall no longer apply.
