

Description: Requires metal and nonmetal mine operators to develop a rock burst control plan within 90 days after a rock burst has been experienced. Plans are required to be made available to the Mine Safety and Health Administration inspectors and are used by the mine operator for work assignments to assure miner safety and to schedule correction work..

Patrick Skees,

Acting Director IRM Policy.

BILLING CODE 4510-26-P

Job Training Partnership Training Act Indian and Native American Reporting Revisions for Program Year 1995

AGENCY: Office of the Secretary, Labor.

SUMMARY: The Director, Office of Information Resources Management Policy, invites comments on the following proposed expedited review information collection request as required by the Paperwork Reduction Act of 1980, as amended.

DATES: This expedited review is being requested in accordance with the Act, since allowing for the normal review period would adversely affect the public interest. Approval by the Office of Management and Budget has been requested by August 31, 1995.

ADDRESSES: Written comments should be addressed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer, 725 17th St., N.W., Room 10235, New Executive Office Building, Wash., DC 20503. Requests for copies of the proposed information collection request should be addressed to Theresa M. O'Malley, Department of Labor, 200 Constitution Ave., N.W., Room N-1301, Wash., DC 20210.

FOR FURTHER INFORMATION CONTACT: Theresa M. O'Malley, (202) 219-5095. Individuals who use a telecommunications device for the deaf (TTY/TDY) may call (202) 219-4720 between 1:00 p.m. and 4:00 p.m. Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 3517) requires that the Director of OMB provide interested persons an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with the agency's

ability to perform its statutory obligations.

The Director, Office of Information Resources Management Policy, publishes this notice simultaneously with the submission of this request to OMB. This notice contains the following information:

Type of Review: Expedited.

Title: JTPA Indian and Native American Reporting Revisions for Program Year 1995.

Frequency of Response: Annually.

Affected Public: Not-for-profit; State, Local or Tribal Government.

Number of Respondents: 1,920.

Estimated Time per Response: ranges from 3 mins.-22 hours.

Total Annual Burden Hours: 38,032.

Respondents Obligation to Reply: Mandatory.

Description: In accordance with our partnership with the Native American and Indian community, and in consultation with the statutorily established Native American Employment and Training Council, the Department has agreed not to proceed with the implementation of the Standard Participant Information Reporting (SPIR) for Program Year 1995. For at least one more Program Year, the Department will continue to pilot the SPIR approach with selected JTPA, Section 401 grantees and to share feedback with the Council and the grantee community at large. ETA will revisit the possible implementation of the SPIR for Program Year 1996 in partnership with the Indian and Native American community.

In the interim, the streamlining of the current reporting forms is consistent with transition to the SPIR approach. The Form 8604 (Annual Status Report) is being modified to eliminate certain elements consistent with the impact of the JTPA amendments, and to consolidate and clarify others based on the experience and advice of the Council and the grantee community. The Form 8603 (Program Status Summary) and Form 8601 (Program Planning Summary) have been modified slightly to be consistent with the changes in Form 8604. The Form 8600 (Budget Information Summary) and Form 8602 (Financial Status Report) have only been changed to reflect the amendments.

Together these forms will be used to manage the national programs authorized under Section 401 of the JTPA. These documents are the principal sources of program plans and performance data. They form the basis for the aware of funds, Federal oversight and reports to Congress.

Signed at Washington, D.C. this 30th day of June 1995.

Cheryl A. Robinson,

Acting Departmental Clearance Officer.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Keystone Coal Mining Corporation

[Docket No. M-95-86-C]

Keystone Coal Mining Corporation, 655 Church Street, Indiana, Pennsylvania 15701 has filed a petition to modify the application of 30 CFR 75.380(d)(3) (escapeways; bituminous and lignite mines) to its Emilie No. 1 Mine (I.D. No. 36-00821) located in Armstrong County, Pennsylvania. The petitioner proposes to continue utilizing the passable escapeway as it presently exists for approximately 8 to 9 feet as an alternative to enhancing the height of the overcast area due to geologic conditions of that area of the mine. The petitioner states that the main intake escapeway (E1) for the Emilie No. 1 Mine is directed out of the Emilie No. 2 Track Slope; that petitioner is unable to maintain the clearance to the height of the coal seam at one corner of the intake overcast located three crosscuts in by the slope bottom due to geologic conditions; that the clearance at the immediate corner of the overcast is 24 to 29 inches in height and that moving away from the immediate corner towards the center of the overcast and down the ramp, the height increases to 42 inches, which is the height of the coal seam; and that the total linear distance is 9 feet where the travelway is less than the seam height. The petitioner also states that application of the standard would result in a diminution of safety to the miners because a much greater distance would have to be traveled along a different escape route. In addition, the petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

2. Keystone Coal Mining Corporation

[Docket No. M-95-87-C]

Keystone Coal Mining Corporation, 655 Church Street, Indiana, Pennsylvania 15701 has filed a petition to modify the application of 30 CFR

75.380(d)(4) (escapeways; bituminous and lignite mines) to its Emilie No. 1 Mine (I.D. No. 36-00821) located in Armstrong County, Pennsylvania. The petitioner proposes to continue utilizing its secondary/alternate escapeway as it presently exists. The petitioner states that the secondary/alternate escapeway for the Emilie No. 1 Mine is directed through to the East Mains Section cut through to the Emilie No. 2 Mine's main line track entry, along the belt and track, and up the belt slope to the surface; that two features in and about the slope area of the escapeway are less than the requirements of the standard; that the distance from the sidewall of the slope to the edge of the belt is 54 inches wide and the two airlock doors in the slope are 46 inches wide. The petitioner states that application of the standard would result in a diminution of safety to the miners because a much greater distance would have to be traveled along a different escape route. In addition, the petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

3. Canterbury Coal Company

[Docket No. M-95-88-C]

Canterbury Coal Company, R.D. 1, Box 119, Avonmore, Pennsylvania 15618 has filed a petition to modify the application of 30 CFR 75.380(d)(3) (escapeways; bituminous and lignite mines) to its David Mine (I.D. No. 36-00813) located in Armstrong County, Pennsylvania. The petitioner requests a modification of the standard to allow passage of the alternate or secondary escapeway through an area where crossing over two overcasts limits the passage height to less than 5 feet. The petitioner states that the two overcasts were installed in the mine prior to 1971; that the secondary or alternate escapeway is routed over the overcasts which isolate it from the belt and track entries; that the height of the secondary escapeway over the overcasts is 42 inches for 12 feet, and 43 inches for 13 feet at the track and belt overcasts; and that all personnel entering the mine are instructed on escapeway and escape procedures. The petitioner asserts that the proposed alternative method would provide the safest and shortest practical means of escape from the active mining section.

4. R. S. Coal Company

[Docket No. M-95-89-C]

R. S. Coal Company, P.O. Box 526, Trevorton, Pennsylvania 17881 has filed a petition to modify the application of 30 CFR 75.1400 (hoisting equipment;

general) to its No. 1 Slope (I.D. No. 36-07108) located in Northumberland County, Pennsylvania. The petitioner proposes to use a slope conveyance (gunboat) in transporting persons without installing safety catches or other no less effective devices but instead use an increased rope strength/safety factor and secondary safety rope connection in place of such devices. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

5. Primrose Coal Company

[Docket No. M-95-90-C]

Primrose Coal Company, 214 Vaux Avenue, Tremont, Pennsylvania 17981 has filed a petition to modify the application of 30 CFR 75.1002-1 (location of other electric equipment; requirements for permissibility) to its Primrose Slope (I.D. No. 36-04629) located in Schuylkill County, Pennsylvania. The petitioner proposes to use nonpermissible electric equipment within 150 feet of the pillar line and to suspend equipment operation anytime methane concentration at the equipment reaches 0.5 percent, either during operation or during a pre-shift examination. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

6. R & D Coal Company

[Docket No. M-95-91-C]

R & D Coal Company, 214 Vaux Avenue, Tremont, Pennsylvania 17981 has filed a petition to modify the application of 30 CFR 75.1002-1 (location of other electric equipment; requirements for permissibility) to its Buck Mountain Slope (I.D. No. 36-02053) located in Schuylkill County, Pennsylvania. The petitioner proposes to use nonpermissible electric equipment within 150 feet of the pillar line and to suspend equipment operation anytime methane concentration at the equipment reaches 0.5 percent, either during operation or during a pre-shift examination. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

7. Cobre Mining Company

[Docket No. M-95-09-M]

Cobre Mining Company, 303 Fierro Road, PO Box 424, Hanover, New Mexico 88041 has filed a petition to modify the application of 30 CFR 57.11055 (inclined escapeways) to its

Continental Mine (I.D. No. 29-00233) located in Grant County, New Mexico. The petitioner proposes to modify the use of its present underground secondary escape route. The petitioner proposes to install two vent or fire doors on the 1300 level at the No. 2 shaft, one on each side of the shaft in the drifts leading to and from the shaft; to have a rest or refuge station equipped with telephone and audio, compressed air and water lines, suitable hand tools, and stopping materials located between the air doors; to install a ladderway in the No. 2 shaft cage compartments that would extend from the 1300 level up to the 400 level station, a total distance of 900 vertical feet; to establish rest areas on the 1000, 800, and 600 foot levels; to have a walkway approximately 450 feet from the 400 level station that extends to the west wall of the open pit and daylight and the 6-13 stope connected to the east end of the west wall of the pit; to have the 99 stope connected to the bottom level of the pit and if any changes are detected in mine ventilation, the emergency escape would be carried out entirely in fresh air. The petitioner also proposes to retimber all refuge stations, level stations, rest areas or walkways, or install ground support when necessary; to remove all scrap from the station area; to seal and lock all walkways (drifts) leading from the rest stations into any unnecessary or abandoned stope areas. After the ladderway from 1300 to 400 level is completed in the No. 2 shaft, the lagging would be removed from No. 53 for 316 feet and a bulkhead would be installed, a concrete and rebar plug poured to form a bearing set with a chute type drawpoint, the No. 2 shaft would be filled with clean gravel from the concrete plug to the surface, the manway would be constructed with 6 by 8 inch stringers nailed in from the end plate to the center dividers, and 3 by 5 inch lagging would be nailed down on the stringers to the outside of the shaft guides forming a 48 by 51 inch landing with at least a 25 by 25 inch ladder opening; at each landing 2 by 12 inch laggings would be installed from guide to guide to form a horizontal partition, three laggings would be nailed on a 1 foot space to a height of 5 feet, a chain link wire would be installed between the landings to further close the manway, ladders would be installed in 24 foot sections that would be inclined from each landing to the center divider above and bolted to a 7 foot vertical center divider for additional handholds. The petitioner states that no electrical power would be near the

manway; that escaping miners would be in fresh air entirely from all areas on the 1300 level; and that its approximately 3,300 feet from the No. 3 shaft areas down 13-1 drift to the No. 2 shaft station and approximately 4,800 feet from 13-17 drift off 13-5 drift to the No. 2 shaft station by 13-17 drift. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

Request for Comments

Persons interested in these petitions may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before August 7, 1995. Copies of these petitions are available for inspection at that address.

Dated: June 29, 1995.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (95-051)]

Agency Report Forms Under OMB Review

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Agency Report Forms Under OMB Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed information collection requests to OMB for review and approval, and to publish a notice in the Federal Register notifying the public that the agency has made submission.

Copies of the proposed forms, the requests for clearance (OMB 83-1), supporting statements, instructions, transmittal letters, and other documents submitted to OMB for review, may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Paperwork Reduction Project.

DATES: Comments are requested by August 7, 1995. If you anticipate commenting on a form but find that time to prepare will prevent you from

submitting comments promptly, you should advise the OMB Paperwork Reduction Project and the Agency Clearance Officer of your intent as early as possible.

ADDRESSES: Donald J. Andreotta, NASA Agency Clearance Officer, Code JT, NASA Headquarters, Washington DC 20546; Office of Management and Budget, Paperwork Reduction Project (2700-0073), Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Bessie B. Berry, NASA Reports Officer, (202) 358-1368.

Reports

Title: Small Business and Small Disadvantaged Business Concerns and Related Contract Provisions—NASA FAR Supplement Part 18-19.

OMB Number: 2700-0073.

Type of Request: Extension.

Frequency of Report: Quarterly.

Type of Respondent: Business or other for profit, Not-for-profit institutions.

Number of Respondents: 295.

Responses Per Respondent: 3.

Annual Responses: 885.

Hours Per Response: 16.21.

Annual Burden Hours: 14,346.

Number of Recordkeepers: 0.

Annual Hours Per Recordkeeping: 0.

Annual Recordkeeping Burden Hours: 0.

Total Annual Burden Hours: 14,346.

Abstract-Need/Uses: NASA requires more frequent reporting of small disadvantaged business subcontract awards in order to more effectively manage its goal for small disadvantaged business participation.

Dated: June 29, 1995.

Donald J. Andreotta,

Deputy Director, IRM Division.

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Cooperative Agreement for Design Access: Civiscape

AGENCY: National Endowment for the Arts, NFAH.

ACTION: Notification of availability.

SUMMARY: The National Endowment for the Arts requests proposals leading to the award of a Cooperative Agreement for a project titled, "Design Access: Civiscape." The objectives of Civiscape are: (1) To implement and maintain innovative digital forums for the design community and interested audiences in the arts that are accessible by the Internet; (2) To provide the design

community and interested audiences in the arts with outstanding working examples of innovative and/or experimental designs for interfaces, navigational systems, information environments, and other integral components of interactive online information systems; (3) To develop software tools specifically for the needs of artists and designers; (4) To provide basic online digital reference and access services; and (5) To develop and implement non-digital forums (a symposium, conference, etc.) that brings together the design community, interested artists, citizens, and technology experts to demonstrate emerging technologies and discuss Civiscape in the context of current issues relating to online interactive communications. Funding by the Endowment is limited to no more than \$200,000. Respondents to the Solicitation are requested to indicate the value of any contribution to the program that they are able to offer, such as donations of staff time, space, materials, equipment, indirect costs, or other important elements. Those interested in receiving the Solicitation should reference Program Solicitation PS 95-07 in their written request and include two (2) self-addressed labels. Verbal requests for the Solicitation will not be honored.

DATES: Program Solicitation PS 95-07 is scheduled for release approximately July 24, 1995 with proposals due on August 24, 1995.

ADDRESSES: Requests for the Solicitation should be addressed to National Endowment for the Arts, Contracts Division, Room 217, 1100 Pennsylvania Ave., NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: William I. Hummel, Contracts Division, National Endowment for the Arts, 1100 Pennsylvania Ave., NW., Washington, DC 20506 (202/682-5482).

William I. Hummel,

Director, Contracts and Procurement Division.
