Petal Gas Storage Company; Notice of Proposed Changes in FERC Gas Tariff

July 7, 1995.

Take notice that on July 5, 1995, Petal Gas Storage Company, (Petal) tendered for filing proposed changes in its FERC Gas Tariff, Volume No. 1.

Petal states that the proposed changes are intended to allow Petal to provide its firm customers to use the more flexible capacity release procedures set forth by the Commission in Order Nos. 577 and 577A. On May 2, 1995, Petal tendered tariff sheets entitled Second Revised Sheet No. 8 and First Revised Sheet No. 9 which were rejected by letter order dated June 5, 1995. Petal proposes that Substitute Second Revised Sheet No. 8 and Substitute First Revised Sheet No. 9 be made effective August 4, 1995.

Petal states that copies of the filing were served on the company's firm customers.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before July 14, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make Protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Agency Information Collection Activities Up For Renewal

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR)

listed below is coming up for renewal. Before submitting the renewal package to the Office of Management and Budget, EPA is soliciting comments on specific aspects of the collection as described.

DATES: EPA requests comments by no later than September 11, 1995.

FOR FURTHER INFORMATION: Call the Acid Rain Hotline (202/233-9620), or Kenon Smith (202/233-9164). Send written comments (in duplicate) regarding these burden estimates or any other aspect of this information collection, including suggestions for reducing this burden, to Kenon Smith, 401 M Street, SW., 6204J, Washington, DC 20460.

SUPPLEMENTARY INFORMATION: *Title:* Acid Rain Program ICR; OMB Control Numbers: 2060-0258 and 2060-0221.

Abstract: The Acid Rain Program was established under Title IV of the 1990 Clean Air Act Amendments. 40 CFR part 72 *et seq.* The program calls for major reductions of the pollutants that cause acid rain while establishing a new approach to environmental management.

Emissions monitoring and reporting is the foundation upon which the allowance trading system is based. Without accurate monitoring, recordkeeping, and reporting of emissions, the integrity and efficiency of the allowance system would be undermined. There would be no assurance that emissions had been reduced and economic benefits of a market-based system could not be realized.

The total public reporting burden for the regulations implementing the ARP was estimated in the Agency's initial ICR (2060-0221 and 2060-0258) at 1,880,959 hours distributed over approximately 2007 respondents affected by this rule. In order to obtain a permit, the public reporting burden to develop a permit application and compliance plan including certification of a designated representative is estimated at 370 hours per application. For tracking and transferring allowances, the public reporting burden to complete and submit an allowance tracking system general account application (if necessary) and an allowance transfer form is estimated to average 30 hours and 2 hours, respectively. The burden for assembling and submitting an application to obtain allowances from the conservation and renewable energy reserve is estimated to average 80 hours per application. To meet the emissions monitoring requirements, the public reporting burden is estimated to average 40 hours per report per plant for preparing and

submitting quarterly emissions data reports, and 20 hours per plant for submitting a one-time monitoring plan. A burden on the voluntary small diesel refineries program is estimated to be 270 hours for the entire industry. The opt-in program carries an estimated reporting burden averaging 80 hours per response and an annual recordkeeping burden averaging 2 hours per respondent. Finally, for auctions and direct sales, the estimated burden for submitting a bid or application is approximately 5 hours. All these burden estimates include time for reviewing instructions, searching existing data sources, gathering and maintaining the necessary data, and completing the collection of information.

In addition to the above requirements, affected sources must meet the annual compliance certification requirements; the public burden for this annual year-end reporting is estimated at 8,416 hours, which includes the submission of detailed information on plant operations, such as utilization data and dispatch system information. These estimates for compliance reporting are not included in the above total burden estimates which are already in the existing ICR.

The information collection requirements and detailed information on the burden estimates contained in the ICR document (Jan. 11, 1993) are available for viewing at Air Docket No. A-91-43. The EPA would like to elicit comments to:

- (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

Dated: June 28, 1995.

Janice Wagner,

Acting Director, Acid Rain Division.

Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses; Public Review of a Notification of Intent To Certify Equipment

AGENCY: Environmental Protection Agency.

ACTION: Notice of agency receipt of a notification of intent to certify equipment and initiation of 45-day public review and comment period.

SUMMARY: The Agency has received from the Lubrizol Corporation, a notification of intent to certify urban bus retrofit/rebuild equipment pursuant to 40 CFR Part 85, Subpart O. EZ-TRAP™ is Lubrizol's trademark for this equipment. Pursuant to § 85.1407(a)(7), today's **Federal Register** notice summarizes the notification below, announces that the notification is available for public review and comment, and initiates a 45-day period during which comments can be submitted. The Agency will review this notification of intent to certify, as well as comments received, to determine whether the equipment in the notification of intent to certify should be certified. If certified, the equipment can be used by urban bus operators to reduce the particulate matter of urban bus engines.

This notification of intent to certify, as well as other materials specifically relevant to it, are contained in Category VI-A of Public Docket A-93-42, entitled "Certification of Urban Bus Retrofit/Rebuild Equipment". This docket is located at the address below.

Today's notice initiates a 45-day period during which the Agency will accept written comments relevant to whether or not the equipment included in this notification of intent to certify should be certified. Comments should be provided in writing to Public Docket A-93-42, Category VI-A, at the address below. An identical copy should be submitted to William Rutledge, also at the address below.

DATES: Comments must be submitted on or before August 28, 1995.

ADDRESSES: Submit separate copies of comments to each of the two following addresses:

1. U.S. Environmental Protection Agency, Public Docket A-93-42 (Category VI-A), Room M-1500, 401 M Street S.W., Washington, DC 20460.
2. William Rutledge, Technical Support Branch, Manufacturers Operations Division (6405J), 401 "M" Street S.W., Washington, DC 20460.
