Reregistration Eligibility Decision Documents for Ethephon, et al.; Availability for Comment Correction; Extension of Public Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice correction.

SUMMARY: In this notice EPA is correcting a Notice of Availability of Reregistration Eligibility Decision (RED) for active ingredients of Ethephon, Linuron and Metolachlor which published in the **Federal Register** on May 24, 1995 and is reopening the comment period.

DATE: The comment period for this RED is reopened and comments are due by August 31, 1995.

FOR FURTHER INFORMATION CONTACT: Technical questions on the decisions in this RED and on this correction should be directed to the appropriate chemical review managers listed below:

List	Chemical Name	Case No.	Chemical Review Manager	Telephone No.
List A	Ethephon	Case 0382	Judy Loranger	(703) 308-8056
List A	Linuron	Case 0047	Karen Jones	(703) 308-8047
List A	Metolachlor	Case 0001	Jane Mitchell	(703) 308-8061

Correction

In FR Doc. 95-12566 published in the **Federal Register** of Wednesday, May 24, 1995, beginning on page 27505, in the 2nd column, fourth line from the top, the sentence "EPA has determined that all currently registered products subject to reregistration containing these active ingredients are eligible for reregistration.", is corrected to read as follows: "EPA has determined that all currently registered products subject to reregistration containing Metolachlor are eligible for reregistration except those with uses for potatoes, soybeans, and peanuts. An eligibility decision for these uses cannot be made at this time because under current policies, section 409 tolerances under the Federal Food, Drug & Cosmetic Act (FFDCA) are needed because Metolachlor concentrates in some of the processed fractions of these crops and such tolerances may be barred by the Delaney Clause. EPA has determined that all currently registered products subject to reregistration containing Linuron are eligible for reregistration except for the use of Linuron on cotton, potato, non-cropland (rights-of-way), and sweet corn until additional generic data are submitted. The Agency is unable to make a reregistration eligibility decision on the use of Linuron on potatoes

because under current policies tolerances under section 409 of the (FFDCA) are needed for this use, but such a tolerance may be barred by the Delaney clause in section 409."

There are no changes regarding Ethephon.

Dated: July 20, 1995.

Lois Rossi,

Director, Special Review and Reregistration Division, Office of Pesticide Programs.
