Information Collections Conducted by State Disability Determination Services (DDS) on Behalf of SSA—0960—NEW. The information collections are conducted in support of the SSA's disability program. There are three categories of information collections—medical evidence requirements (MER), consultative exams (CE), and consultative exam (CE) providers. DDSs use MER information to determine a person's physical and/or mental status prior to making a disability determination. DDSs use CE information to make disability determinations when the claimant's own medical sources cannot or will not provide the information. The information obtained from claimants is used to obtain release of medical information to personal physicians and to confirm scheduled appointments. DDSs use the CE provider information to verify a medical provider's credentials and license before hiring them to conduct consultative exams. The respondents are medical providers and claimants for CE information collections and medical providers for CE providers and MER information collections.
