(CSXT) as follows: from the connection track in the northwest quadrant between the tracks of CSXT and NW at or near NW's milepost D122.6 at St. Joe, IN to the southernmost connection between NW and the industrial trackage of Steel Dynamics, Inc. (SDI) in Wilmington Township, DeKalb County, IN, at or near NW's milepost D118.6, a total distance of approximately 3.5 miles. DATES: Written comments must be submitted on or before October 27, 1995.

ADDRESSES: Send comments to Karin G. Kurz, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 3255, 2 Massachusetts Avenue N.E., Washington, DC 20212. For further information contact Ms. Kurz on 202-606-7628 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

The Producer Price Indexes (PPI), which is one of the nation's leading economic indicators, is used as a measure of price movements, an indicator of inflationary trends in the economy, an inventory valuation measure for some organizations, and a measure of purchasing power of the dollar at the primary market level. It is also used in market research and as a basis for escalation in long-term contracts.

II. Current Actions

BLS is proposing revisions to PPI disaggregation and resampling procedures, and is planning pilot projects to implement electronic collection of survey data.

New Disaggregation Procedures. The purpose of this proposed new method is to define a publication structure that is publishable virtually in its entirety, meets user needs, is continuous, and permits meaningful classification of current production. In order to satisfy the publishability of the entire structure, price quotes will be collected using a modified first step of disaggregation. Quotes will be spread across predetermined product categories which correspond to the publication cells for a Standard Industrial Classification (SIC). The design of the new disaggregation method provides for collection of enough quotes in the smaller publication cells so that they will be publishable. The result of the new method will be that there will be a smaller number of quotes for the larger cells and a larger number of quotes for
