BILLING CODE 5000-04-P

**Department of the Army
Corps of Engineers**

**Intent to Prepare a Draft Environmental
Impact Statement (DEIS) for Flood
Damage Control on the Upper Des
Plaines River, IL**

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The Chicago District, U.S. Army Corps of Engineers, is investigating the feasibility of various methods to reduce flood damage along portions of the Upper Des Plaines River (UDPR) in Lake and Cook Counties, Illinois.

A feasibility study of the proposed action is being conducted under Congressional authority known as the Chicago-South End of Lake Michigan (C-SELM) Urban Water Damage Study Authority. This authority is contained in Section 206 of the 1958 Flood Control Act (Public Law 85-500), two resolutions by the Senate Committee on

Public Works adopted 22 July 1969, and 29 March 1973, and a resolution by the House Committee on Public Works adopted 11 April 1974. The feasibility study was undertaken as a result of a formal request for a reconnaissance study by the Illinois Division of Water Resources in October 1986. The reconnaissance study was completed by the Chicago District in 1989. This study supported further Federal involvement at the feasibility stage for flood protection on the Upper Des Plaines River. The State of Illinois, Metropolitan Water Reclamation District of Greater Chicago, and Lake County Stormwater Management Commission have agreed to share the cost of the feasibility study with the Chicago District. The purpose of this feasibility study is to (1) describe and evaluate the scope of the flooding problems on the UDPR basin, (2) describe and evaluate alternative plans to resolve the flooding problems, and (3) select a recommended plan. The focus of this investigation is overbank flooding along the mainstem of the UDPR in Lake and Cook Counties, Illinois.

FOR FURTHER INFORMATION CONTACT:

Questions or comments about the proposed action and DEIS should be addressed to Dr. Ken Derickson, Planning Division, Department of the Army, Corps of Engineers, 111 North Canal Street, Chicago, Illinois, 60606-7206, ATTN: CENCC-PD-S, telephone (312) 353-6475. An issues-scoping meeting is tentatively planned during the Fall of 1995.

SUPPLEMENTARY INFORMATION: The Upper Des Plaines River, located in Lake and Cook Counties of Northeastern Illinois, is subject to severe overbank flooding due to inadequate channel carrying capacity to carry peak flows during major storm events. Damaging floods, in the mostly urban watershed, have occurred several times over the past 50 years. The most recent floods, in 1986 and 1987, caused damages exceeding \$100 million. Homes, commercial/industrial facilities, public/municipal sites, streets, golf courses, cemeteries, and recreational/open space areas were adversely impacted by these latter two floods in many communities along the Upper Des Plaines River. Due to the projected high rate of development along the UDPR in Lake County, damages due to flooding are expected to increase by about 50 percent over the next 50 years, if no action is taken. At the request of the State of Illinois in October 1986, the Chicago District conducted a reconnaissance study of these flooding problems along the UDPR.
