NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Notice of Pending Submittal to the Office of Management and Budget (OMB) for Review

AGENCY: U. S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review or continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: Data Report on Spouse.
2. Current OMB approval number: 3150-0026.
3. How often the collection is required: On Occasion.
4. Who is required or asked to report: NRC employees, NRC contractors, and NRC licensee access authorization applicants who marry after completing NRC's Personnel Security Forms; or marry after having been granted an NRC access authorization or employment clearance.
5. The number of annual respondents: 60.
6. The number of hours needed annually to complete the requirement or request: 15 (.25 hours per response).
7. Abstract: Completion of the NRC Form 354 is a mandatory requirement for NRC employees, contractors, licensee applicants, and employee applicants who marry after submission of the Personnel Security Forms, or after

receiving an access authorization or employment clearance to permit the NRC to assure there is no increased risk to the common defense and security.

Submit, by December 26, 1995, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

Documents Containing Reporting or Recordkeeping Requirements; Notice of Pending Submittal to the Office of Management and Budget (OMB) for Review

AGENCY: U. S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection

request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review and continued approval of information collection requirements currently approved by OMB under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR Part 75—Safeguards on Nuclear Material—Implementation of US/IAEA Agreement.
 2. Current OMB approval number: 3150-0055.
 3. How often the collection is required: Installation information is submitted upon written notification from the Commission. Changes are submitted as occurring. Nuclear Material accounting and control information is submitted in accordance with specified instructions.
 4. Who is required or asked to report: All persons licensed or certified by the Commission or Agreement States to possess source or special nuclear material at an installation specified on the U. S. eligible list as determined by the Secretary of State or his designee and filed with the Commission, as well as holders of construction permits and persons who intend to receive source material.
 5. The number of annual respondents: 5 recordkeepers. There are no reporting respondents because the IAEA is currently not selecting NRC-licensed facilities for inspection.
 6. The number of hours needed annually to complete the requirement or request: 4,000 (800 hours each for 5 recordkeepers).
 7. Abstract: 10 CFR Part 75 establishes a system of nuclear material accounting and control to implement the agreement between the United States and the International Atomic Energy Agency (IAEA). Under that agreement, NRC is required to collect the information and make it available to the IAEA. This submittal will reflect a reduction in burden because the IAEA is currently not selecting NRC-licensed facilities for inspection.
- Submit comments that address the following by December 26, 1995:
1. Is the proposed collection of information necessary for the proper performance of the functions of the NRC, including whether the information will have practical utility?
 2. Is the estimate of burden accurate?
 3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the collection of information be minimized, including the use of automated collection techniques?

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review or continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR Part 52, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants."

2. Current OMB approval number: 3150-0151.

3. How often the collection is required: On occasion and every 10 to 20 years for applications for renewal.

4. Who is required or asked to report: Designers of commercial nuclear power plants, electric power utilities, and any person eligible under the Atomic Energy Act to apply for a construction permit for a nuclear power plant.

5. The number of annual respondents: Two applications for design certification will be under review during the next three years.

6. The number of hours needed annually to complete the requirement or request: Approximately 65,333 hours per year for both applications in addition to the burden associated with 10 CFR Parts 20, 50, 73 and 100 (approved by OMB under Clearance Nos. 3150-0014, 3150-0011, 3150-0002, and 3150-0093, respectively).

7. Abstract: 10 CFR Part 52 establishes requirements for the granting of early site permits, certifications of standard nuclear power plant designs, and licenses which combine in a single license a construction permit and an operating license with conditions (combined licenses). Part 52 also establishes requirements for renewal of these permits, certifications, and licenses; amendments to them; exemptions from certifications; and variances from early site permits.

NRC uses the information collected to assess the adequacy and suitability of an applicant's site, plant design, construction, training and experience, and plans and procedures for the protection of the public health and safety. The NRC review of such information and the findings derived from that information form the basis of NRC decisions and actions concerning the issuance, modification, or revocation of site permits, design certifications, and combined licenses for nuclear power plants.
