

that are regulated by State and other Federal agencies, including the U.S. Environmental Protection Agency, the Ohio Environmental Protection Agency, and the Ohio Department of Health. As a result of these other environmental issues, SMC and CFMC are conducting a remedial investigation/feasibility study (RI/FS) for the SMC, Cambridge, Ohio, facility. In a letter dated July 5, 1995, SMC requested that the EIS be further expanded to examine the impacts of depositing, on one of the slag piles, contaminated soils and sediments resulting from site remediation under the RI/FS.¹

A notice of intent to revise the scope of this EIS—to consider the impacts of depositing soils and sediments on the West Slag Pile and relocating slag from offsite—was published in the Federal Register on August 21, 1995 (60 FR 43477). In addition, SMC has stated that some of the slag may have a commercial use. Further information is needed from SMC to evaluate the impacts of this use. An additional expansion in scope may be needed to include this alternative.

The NRC hopes to accomplish three main objectives at the December 5, 1995, meeting;

- To describe NRC's overall decommissioning process for a nuclear facility, with an emphasis on opportunities for public involvement and participation, and the EIS portion of the process.
- To provide a status report on the EIS, including the additional alternatives of returning offsite slag and contaminated soils and sediments to the existing slag piles for permanent disposal.
- To provide a brief status report on the offsite slag situation.

NRC anticipates that the information provided at the public meeting will stimulate additional public comment. NRC will keep the roundtable participants, and the general public, informed of its decision-making process on this issue, and provide opportunities for public comment, including additional meetings such as this.

NRC recently prepared a preliminary draft of the EIS for the Cambridge facility and requested agencies cooperating in its development (Ohio Environmental Protection Agency, Ohio Department of Health, and the U.S. Environmental Protection Agency) to provide comments on this preliminary draft, consistent with their responsibilities under law. This is a

preliminary draft that will be revised, based on these agencies' comments, and issued in the spring of 1996 as a draft for public comment. NRC will be soliciting public comments on the EIS at that time, after consideration and resolution of the cooperating agencies' comments.

Conduct of Meeting

The meeting will be held on December 5, 1995, in the Pritchard-Laughlin Civic Center, Cambridge, Ohio. The meeting will begin at 7:00 p.m. and will end at 10:00 p.m. The meeting will be facilitated by F.X. Cameron, NRC's Special Counsel for Public Liaison. The purpose of this meeting is to discuss, with representative stakeholders and the public, information concerning NRC's decommissioning process. The meeting will involve invited representatives from the following groups: NRC, SMC, CFMC, State and local officials, local citizen groups, and the public. These representatives will participate in a facilitated round-table discussion. An agenda for the meeting will be prepared and distributed to all invited representatives, as well as placed in the local public document room, in advance of the meeting. The public will be present during the meeting and time will be provided for public comment. Future information meetings will be held periodically concerning other issues relating to the decommissioning of the Shieldalloy facility and the remediation of offsite contamination.

Advisory Committee on Reactor Safeguards Subcommittee Meeting on Thermal Hydraulic Phenomena; Notice of Meeting

The ACRS Subcommittee on Thermal Hydraulic Phenomena will hold a meeting on November 28 and 29, 1995, at the General Electric Nuclear Energy (GENE) Headquarters, 175 Curtner Avenue, San Jose, California.

Most of the meeting will be closed to public attendance to discuss GENE proprietary information pursuant to 5 U.S.C. 552b(c)(4), with the exception of an approximately two-hour session that will be open to the public beginning at 8:30 a.m. on November 28, 1995.

The agenda for the subject meeting shall be as follows:

Tuesday, November 28, 1995-8:30 a.m. until the conclusion of business.

Wednesday, November 29, 1995-8:30 a.m. until the conclusion of business

The Subcommittee will continue its review of the GENE Test and Analysis Program being conducted in support of the Simplified Boiling Water Reactor (SBWR) passive plant design certification. Discussion topics will include: Revision C of the GENE Test and Analysis Program description document and the SBWR scaling analysis report. The purpose of this meeting is to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Electronic recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the cognizant ACRS staff engineer(s) named below five days prior to the meeting, if possible, so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of GENE, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the scheduling of sessions which are open to the public, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by contacting the cognizant ACRS staff engineer, Mr. Paul A. Boehnert (telephone 301/415-8065) between 7:30 a.m. and 4:15 p.m. (EST) (after November 16, 1995, contact Dr. Medhat El-Zeftawy at 301/415-
