Farm Service Agency

Notice of Request for Extension and Revision of a Currently Approved Information Collection

AGENCY: Farm Service Agency, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Farm Service Agency's (FSA) intention to request an extension for, and revision of, an information collection process currently in effect with respect to regulations issued under the United States Warehouse Act (USWA), related reporting and recordkeeping requirements and Standards for Approval of Warehouses Under the Commodity Credit Corporation (CCC) Charter Act.

DATES: Comments on this notice must be received on or before April 2, 1996 to be assured consideration.

ADDITIONAL INFORMATION OR COMMENTS: Judy Fry, Agricultural Marketing Specialist, Warehouse and Inventory Division, Farm Service Agency, USDA, P.O. Box 2415, Washington, D.C. 20013-2415; telephone (202) 720-7433.

SUPPLEMENTARY INFORMATION:

Title: Regulations Under the United States Warehouse Act, Related Reporting and Recordkeeping Requirements, and Standards for Approval of Warehouses Under the CCC Charter Act.

OMB Control Number: 0560-0120.

Expiration Date of Approval: February 28, 1996.

Type of Request: Extension and Revision of Currently Approved Information Collection.

Abstract: The information collected under Office of Management and Budget (OMB) Number 0560-0120, as identified above, allows FSA to effectively administer the regulations under the USWA, related reporting and recordkeeping requirements, and the Standards for Approval under the CCC Charter Act.

USWA and CCC activities are administered by FSA. Although there are several types of warehouses covered by USWA and CCC functions, the reporting requirements for a particular type of warehouse are essentially the same for all types of warehouses. With some exceptions, the same forms are used for both USWA licensing and CCC purposes. These forms are furnished to interested warehouse operators or used by warehouse examiners employed by FSA to secure and record information about the warehouse operator and the warehouse. The general purpose of the forms are identical, i.e., to provide those charged with issuing licenses under USWA or executing contracts for CCC as a basis to determine whether the warehouse and the warehouse operator meet applicable standards, to receive a license or contract, and to determine compliance once the license is issued or the contract approved.

Estimate of Burden: Public reporting burden for this information collection is estimated to average .42799 hours per response.

Respondents: Business or other for profit.

Estimated Number of Respondents: 6500.

Estimated Number of Responses per Respondent: 4.566.

Estimated Total Annual Burden on Respondents: 19,544.

Comments are sought on these requirements including: (a) whether the continued collection of information is necessary for the proper performance of USWA functions and CCC contracting activities, including whether the information will have practical utility; (b) the accuracy of FSA's estimate of burden including the validity of the methodology and assumptions used; (c) enhancing the quality, utility, and clarity of the information to be

collected; (d) minimizing the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments should be sent to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503 and to Judy Fry, Agricultural Marketing Specialist, Warehouse and Inventory Division, Farm Service Agency, USDA, P.O. Box 2415, Washington, D.C. 20013-2415; telephone (202) 720-7433. Copies of the information collection may be obtained from Judy Fry at the above address. The comment period is limited to 30 days because of the current expiration date of the information collection approval.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Signed at Washington, D.C., on January 30, 1996.

Bruce R. Weber,

Acting Administrator, Farm Service Agency.

SUPPLEMENTARY INFORMATION:

I. Abstract

The 1996 Test Census is designed to test new and improved methodologies for reducing the differential in the census results among the various components of the population, and for containing costs associated with conducting a census. The Census Bureau will use the results of this test, in combination with other research, to decide how to conduct the 2000 census. The test will be conducted in two rural sites and one urban site with a combined housing unit total of about 10,000. The rural sites (roughly 2,000 housing units) will encompass two American Indian reservations. The urban site (roughly 8,000 housing units) will encompass six census tracts in Chicago, Illinois.

A primary objective for both the rural and urban components of the test is to refine the Integrated Coverage Measurement (ICM) program. Other objectives are listed below.

Major objectives for the rural component of the test:

- Use and evaluate tribal "administrative records," such as tribal rolls, utility records, tribal school records, and tribal voter registration as coverage improvement tools.
- Use improved address list development and collection methodology.
- Implement and evaluate a "partnership agreement" with the tribes, and expand the Tribal Liaison's role to include involvement in census operational activities.

- Test the use of statistical estimation techniques to improve the enumeration of residents on American Indian reservations and trust lands.

Major objectives for the urban component of the test:

- Test the ICM program in a reengineered census setting.
- Test techniques for measuring housing unit and noninstitutional group quarters coverage in a census setting.
- Test use of administrative records for coverage improvement.
- Test improved address listing techniques.

The 1996 Test Census will include four questionnaires—two self-enumeration simple forms (consisting of basic population and housing questions), a self-enumeration Individual Census Report (used to gather population information from residents of group quarters), and a self-enumeration Be Counted form (used only in the rural sites and made available at convenient locations for persons who did not receive a
