Comparisons of Industry Standards Cited in the NRC Standard Review Plan and Related Documents: Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability and request for comments.

SUMMARY: The Nuclear Regulatory Commission (NRC) has published the following three NUREG/CR documents for review and comment: NUREG/CR-6382 entitled "Comparisons of ASTM Standards Cited in the NRC Standard Review Plan, NUREG-0800, and Related Documents," NUREG/CR-6385 entitled "Comparisons of ANS, ASME, AWS, and NFPA Standards Cited in the NRC Standard Review Plan, NUREG-0800, and Related Documents," and NUREG/CR-6386 entitled "Comparisons of ANSI Standards Cited in the NRC Standard Review Plan, NUREG-0800, and Related Documents." In addition, comparisons of selected structural codes and standards cited in the Standard Review Plan or recent NRC staff evaluation reports are presented in Appendix B of NUREG/CR-6358 entitled "Assessment of United States Industry Structural Codes and Standards for Application to Advanced Nuclear Power Reactors." Given recent and ongoing efforts by the NRC to revise Regulatory Guides related to standards issued by the Institute of Electrical and Electronics Engineers (IEEE), comparisons for IEEE standards were not included in these NUREG/CR documents.

These reports provide the results of comparisons of the cited and latest versions of selected industry standards cited in the Nuclear Regulatory Commission Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants (NUREG-0800) and associated Regulatory Guides and Code of Federal Regulations sections. The comparisons in NUREG/CR-6382, -6385, and -6386 were performed by Battelle Pacific Northwest Laboratories. The comparisons in Appendix B of NUREG/CR-6358 were

performed by Stevenson and Associates. The work was performed in support of the NRC's Standard Review Plan Update and Development Program, and will be used by the NRC to evaluate whether the SRP citations to the industry standards should be updated. The purpose of this Notice is to solicit public comments on whether the industry standard citations should be updated, and if so, what exceptions should be included with the citations. **DATES:** Submit comments on NUREG/CR-6382, -6385, -6386, and Appendix B of NUREG/CR-6358 by May 13, 1996. Comments received after this date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Mail comments to: Chief, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Mail Stop T-6 D59, U. S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Comments may be hand-delivered to 11545 Rockville Pike, Maryland between 7:45 a.m. and 4:15 p.m. on Federal workdays.

NUREG/CR-6382, -6385, -6386, and -6358 are available for inspection and copying for a fee at the NRC Public Document Room, 2120 L Street NW (Lower Level), Washington DC 20555-0001. Copies of these documents can also be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington DC 20402-9328 or the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161-0002.

FOR FURTHER INFORMATION CONTACT: Gene Y. Suh, Office of Nuclear Reactor Regulation, Mail Stop O-12 E4, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001, telephone (301) 415-1263.

SUPPLEMENTARY INFORMATION: The standard comparisons presented in these documents have been prepared by Battelle Pacific Northwest Laboratories and Stevenson and Associates and have not been reviewed by the NRC staff. Therefore the suggestions and recommendations contained in these reports are the work of the contractors, and their implementation is contingent upon NRC acceptance of justifications for revisions to the SRP. It is anticipated that the contractor's recommendations for SRP citations in the straightforward standard comparisons presented in Section 2 of NUREG/CR-6382, -6385, and -6386 will be implemented, subject to NRC staff review and NRC resolution of public comments. Further staff

review and evaluation, including resolution of public comments, will be needed prior to updating the SRP citations for the problematic standard comparisons presented in Section 3 of NUREG/CR-6382, -6385, -6386, and in Appendix B of NUREG/CR-6358. Comments and suggestions concerning the comparisons are solicited, specifically on whether an update to the latest version is appropriate and on any necessary exceptions and qualifications required to update the citations to the latest version.

Dated at Rockville, Maryland, this 5th day of February, 1996.

For the Nuclear Regulatory Commission.

R.W. Borchardt,

Chief, Inspection Program Branch, Division of Inspection and Support Programs, Office of Nuclear Reactor Regulation.
