#### SUPPLEMENTARY INFORMATION:

##### Background

On February 4, 1994, the Department published in the Federal Register (59 FR 5390) a notice of opportunity to request administrative reviews of these antidumping duty orders. On February 28, 1994, in accordance with 19 CFR 353.22(a), two resellers of the subject merchandise to the United States, Fujian Machinery & Equipment Import & Export Corporation (FMEC) and Shandong Machinery Import & Export Corporation (SMC), requested that we conduct administrative reviews of their exports of subject merchandise to the United States. We published the notice of initiation of these antidumping duty administrative reviews on March 14, 1994 (59 FR 11768). The notice of initiation was amended on June 15, 1994 (59 FR 30770) and July 15, 1994 (59 FR 36160).

On August 16, 1995, the Department published in the Federal Register the preliminary results of the administrative reviews of the antidumping duty order on HFHTs from the PRC (60 FR 42516). A timely request for a hearing was submitted by Woodings-Verona Tool Works, Inc. (petitioner). The hearing was conducted on October 2, 1995. The Department is conducting this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

##### Scope of Review

Imports covered by this review are shipments of HFHTs from the PRC comprising the following classes or kinds of merchandise: (1) hammers and sledges with heads over 1.5 kg (3.33 pounds) (hammers/sledges); (2) bars over 18 inches in length, track tools and wedges (bars and wedges); (3) picks/mattocks; and (4) axes/adzes.

HFHTs include heads for drilling, hammers, sledges, axes, mauls, picks, and mattocks, which may or may not be painted, which may or may not be finished, or which may or may not be imported with handles; assorted bar products and track tools including wrecking bars, digging bars and tampers; and steel woodsplitting wedges. HFHTs are manufactured through a hot forge operation in which steel is sheared to required length, heated to forging temperature, and formed to final shape on forging equipment using dies specific to the desired product shape and size. Depending on the product, finishing operations may include shot-blasting, grinding, polishing and painting, and the insertion of handles for handled products. HFHTs are currently provided
