

inspections are required every five years: (1) internal inspection to seal system on IFR's equipped with primary and secondary seals in situations where the owner to operator has decided to forego the annual visual inspection; and (2) measurement of gaps between the tank wall and primary seal on EFR's. An internal inspection in which the tank is emptied and degassed is required at least every 10 years for IFR's.

Another control option allowed is for owners or operators to equip vessels with closed-vent systems and 95-percent efficient control devices. It is expected that very few, if any, vessels will be equipped with these systems; however, owners or operators of vessels with such systems are required to submit, for the Administrator's approval, an operating plan describing system design specifications and an operation, maintenance, and inspection plan for the system. In the event the owner or operator has installed a flare, a report showing compliance with visible emission provisions shall be furnished to the Administrator. For closed-vent systems with control devices, quarterly reports are required informing the Administrator of each occurrence that results in excess emissions. Annual reports of the results of these inspections and seal gap measurements are required. These reports shall identify each storage vessel that is determined to be out of compliance with the standard, the nature of the defects, and the date the vessel was emptied or the repair was made. The owner or operator must keep copies of all reports and records for two years.

The owner or operator of each benzene storage vessel shall, for the life of the source, keep readily accessible records showing the dimension of the vessel and an analysis showing the capacity of the storage vessel. For each vessel with a closed vent system and 95-percent efficient control device, records of the operating plan shall be kept for the life of the control device. Records of monitored parameters and maintenance shall be kept for two years.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Charter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on September 28, 1995.

Burden Statement: The annual public reporting and recordkeeping burden for

this collection of information is estimated to average 11.85 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 162.

Estimated Number of Respondents: 162.

Frequency of Collection: Quarterly and Semi-annual.

Estimated Total Annual Burden on Respondents: 8,628 Hours.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1080.09 and OMB Control No. 2060-0185 in any correspondence.

Committee Meetings of the Grand Canyon Visibility Transport Commission

AGENCY: Environmental Protection Agency.

ACTION: Notice of meeting.

SUMMARY: The United States Environmental Protection Agency (U.S.

EPA) is announcing a meeting of the Grand Canyon Visibility Transport Commission (Commission).

The Commission will meet from 10:00 am-12:00 pm, Monday, June 10, 1996 at the Shrine of the Ages next to the Main Visitors Center in Grand Canyon National Park. At the meeting the Commission will finalize its recommendations to the U.S. EPA. The recommendations will address what actions are deemed necessary to protect visibility in sixteen National Parks and Wilderness areas on the Colorado Plateau.

The Commission was established by U.S. EPA on November 13, 1991 (see 56 FR 57522, November 12, 1991). All meetings are open to the public. These meetings are not subject to the provisions of the Federal Advisory Committee Act, Public Law 92-463, as amended.

FOR FURTHER INFORMATION CONTACT: Mr. John Leary, Project Manager for the Grand Canyon Visibility Transport Commission, Western Governors' Association, 600 17th Street, Suite 1705, South Tower, Denver, Colorado 80202; telephone number (303) 623-9378; facsimile machine number (303) 534-7309.

Dated: May 9, 1996.

Felicia Marcus,

Regional Administrator, U.S. Environmental Protection Agency, Region 9.

Science Advisory Board; Notification of Public Advisory Committee Meetings

Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that two committees of the Science Advisory Board (SAB) will meet on the dates and times described below. All times noted are Eastern Time. All meetings are open to the public. Due to limited space, seating at meetings will be on a first-come basis. For further information concerning specific meetings, please contact the individuals listed below. Documents that are the subject of SAB reviews are normally available from the originating EPA office and are *not* available from the SAB Office.

1. Human Exposure and Health Subcommittee (HEHS)

The Human Exposure and Health Subcommittee (HEHS) of the Science Advisory Board's (SAB) Integrated Risk Project will meet on June 13-14, 1996,
