

practicable to issue the preliminary results in 245 days, section 751(a)(3)(A) allows the Department to extend this time period to 365 days.

We determine that it is not practicable to issue the preliminary results within 245 days because the review involves collecting and analyzing information from a large number of companies. Further, there are new legal issues to address because this is the first review of this antidumping duty order under the new law.

Accordingly, the deadline for issuing the preliminary results of this review is now no later than March 31, 1997. The deadline for issuing the final results of this review will be 120 days from the publication of the preliminary results.

This extension is in accordance with section 751(a)(3)(A) of the Act.

Dated: August 15, 1996.

Susan H. Kuhbach,

Acting Deputy Assistant Secretary, Import Administration.

National Institute of Standards and Technology

Notice of Government Owned Invention Available for Licensing

AGENCY: National Institute of Standards and Technology, Commerce.

SUMMARY: The invention listed below is owned by the U.S. Government, as represented by the Department of Commerce, and is available for licensing in accordance with 35 U.S.C. 207 and 37 CFR Part 404 to achieve expeditious commercialization of results of federally funded research and development.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on this invention may be obtained by writing to: Marcia Salkeld, National Institute of Standards and Technology, Office of Technology Partnerships, Building 820, Room 213, Gaithersburg, MD 20899; Fax 301-869-2751. Any request for information should include the NIST Docket No. and Title for the relevant invention as indicated below.

SUPPLEMENTARY INFORMATION: NIST may enter into one or more Cooperative Research and Development Agreements ("CRADA") with licensees to perform further research on the invention for purposes of commercialization. NIST may grant licensees an option to negotiate for exclusive licenses to any jointly owned inventions which arise from the CRADAs as well as an option to negotiate for exclusive royalty-bearing licenses for NIST employee

inventions which arise from the CRADAs.

The invention available for licensing is:

NIST Docket No. 96-009

Title: Interferometric Thickness Variation Test Method For Windows and Silicon Wafers Using a Diverging Wavefront

Description: A non-contact method of using an infrared interferometer for determining a full aperture map of thickness variation and central thickness of silicon wafers and windows. The IR interferometer maps the thickness variation over the entire wafer surface in one rapid measurement. A second measurement with the same device determines the central thickness of the wafer. If the wafer has substantial bow, a third measurement with the wafer reversed permits determination of the bow and separation of its effect from the thickness variation measurement.

Dated: August 12, 1996.
