32 CFR Part 199
[DoD 6010.8–R]
RIN–0720–AA73
Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Health Promotion and Disease Prevention Visits and Immunizations
AGENCY: Office of the Secretary, DoD.
ACTION: Proposed rule.
SUMMARY: This proposed rule expands well-baby visits and immunizations to dependents under the age of six and improves access to preventive benefits for dependents age six and above to include health promotion and disease prevention visits in connection with immunizations, pap smears and mammograms.
DATES: Written comments will be accepted until January 6, 1997.
ADDRESSES: Forward comments to the Office of Health Services Financing Policy, Department of Defense, Room 18657 Pentagon, Washington, DC 20301–1200.
FOR FURTHER INFORMATION CONTACT: Cynthia P. Speight, Office of Assistant Secretary of Defense (Health Affairs), (703) 697–8975.
SUPPLEMENTARY INFORMATION: On February 10, 1996, P.L. 104–106 was signed into law. Section 701 of that law extends coverage of “well-baby visits” and immunizations for an additional three years, from up to two years of age to under six years of age. Section 701 also provides for additional preventive care services under the Basic CHAMPUS Program (see § 199.4) for dependents six years of age or older. This rule implements provisions of Public Law 104–106 by changing “well-baby care” to “well-child care” and by providing for additional preventive care services for dependents six years of age or older. This rule improves availability of immunizations and other preventive services, particularly for children. While these services have previously been available in military hospitals and clinics, access has depended on proximity to military medical treatment facilities with available space and services. Access, therefore, has not been uniformly attainable for all beneficiaries. These proposed preventive services and immunizations are based on recommendations of the U.S. Preventive Services Task Force which set national health goals in their report Healthy People 2000. Broad goals set by Healthy People 2000 included an increase in the span of healthy life for Americans, reduction in health disparities among Americans, and access to preventive services for all Americans. This rule strengthens existing programs within the Department and contributes significantly to national efforts toward meeting these goals.
Regulatory Procedures
Executive Order 12866 requires that a regulatory impact analysis be performed on any significant regulatory action, defined as one which would have an annual effect on the economy of $100 million or more, or have other significant effects.
The Regulatory Flexibility Act requires that each federal agency prepare a regulatory flexibility analysis when the agency issues regulations which would have a significant impact on a substantial number of small entities. This proposed rule is not a significant regulatory action under E.O. 12866, nor would it have a significant impact on small entities. In addition, this proposed rule does not impose new information collection requirements for purposes of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3511). This is a proposed rule. All public comments are invited.
