SUPPLEMENTARY INFORMATION:

I. Introduction

The Pesticide Data Submitters List is a compilation of names and addresses of registrants who wish to be notified and offered compensation for use of their data. It was developed to assist pesticide applicants in fulfilling their obligation as required by sections 3(c)(1)(f) and 3(c)(2)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and 40 CFR part 152 subpart E regarding ownership of data used to support registration. This notice announces the availability of an updated version of the Pesticide Data Submitters List which supersedes and replaces all previous versions.

II. Ordering Information

Microfiche copies of the document are available from the National Technical Information Service (NTIS) ATTN: Order Desk 5285 Port Royal Road Springfield, VA 22161; telephone: (703) 487-4650. When requesting a document from NTIS, please provide its name and NTIS Publication Number (PB). The NTIS Publication for this version of the Pesticide Data Submitters List is PB96-210430.

III. Electronic Access

The Pesticide Data Submitters List is available on EPA's gopher server and two other pathways on the Internet. The Internet address of EPA's gopher server is gopher://gopher.epa.gov. This information also is available using file transfer protocol (ftp) on ftp.epa.gov or using the world wide web (www) Internet address on http://www.epa.gov.

The Pesticide Data Submitters List is also available on the Pesticides Special Review and Reregistration Information System Bulletin Board System. This Bulletin Board System (BBS) is a computer set up to accept calls from over a telephone line and allow callers to use the computer. Anyone with a computer or terminal connected to a phone line or networked to one can dial into the BBS and perform the functions it is set up to allow.

The telephone number of this bulletin board is (703) 308-7224. To connect to this or any other BBS, several parameters in your communication software must be set appropriately. The settings for this BBS are the standard settings for most: 8 data bits, no parity, and 1 stop bit (abbreviated as 8N1). Communication speeds from 2400 bps to 28.8K bps are available, accommodating almost all speeds available in modems on the market today. The system displays color ANSI graphics as well as ASCII text.

IV. From the Internet

The Pesticide Special Review and Reregistration Information System can be accessed via GSA's Fedworld System. Telnet or ftp to fedworld.gov and follow the onscreen instructions to get to the gateway.

V. From a LAN

Many Local Area Networks (LANs) are connected to the telephone network. While it is not possible to address the multitude of possible configurations here, your network administrator will be able to tell you if you are able to dial out to other systems from your LAN and what specific software you have available to do this.
