SUPPLEMENTARY INFORMATION:

I. Background and Purpose

Title V of the 1990 Clean Air Act Amendments (sections 501-507 of the Clean Air Act ("the Act")), and implementing regulations at 40 Code of Federal Regulations (CFR) Part 70, require that states develop and submit operating permit programs to the EPA by November 15, 1993, and that the EPA act to approve or disapprove each program within one year after receiving the submittal. The EPA's program review occurs pursuant to section 502 of the Act and the Part 70 regulations, which together outline criteria for approval or disapproval. Additionally, section 502(g) of the Act and the Part 70 regulations outline criteria for granting interim approval where a program substantially, but not fully, meets the requirements of the Act and Part 70. The EPA may grant interim approval to such a program for a period of up to two years.

On January 13, 1995, the state of Missouri submitted an operating permits program to the EPA. Supplemental submissions were made by the state on August 14, 1995; September 19, 1995; and October 16, 1995. On April 11, 1996, Region VII determined that Missouri's program contained the minimum elements required for interim approval as specified in 40 CFR 70.4(d). The rationale for the EPA's determination that interim approval is appropriate is contained in the December 15, 1995, Federal Register document (60 FR 64404) which proposed interim approval of the program. In that document, the Region identified the revisions that were required in order for Region VII to be able to grant full approval. The state was required to adopt and submit these revisions to the EPA within 12 months of the effective date of the notice of final interim approval which published on April 11, 1996.

The EPA is also proposing to approve revisions submitted pursuant to section 110 of the Act to update references in rule 10 CSR 10-6.020, and to modify permit provisions in rule 10 CSR 10-6.065 with regard to the Missouri intermediate operating permit program. Specifically, the revisions to rule 10 CSR 10-6.020 update a reference to the Standard Industrial Classification Manual and revise Table 2 entitled, "List of Named Installations" so that it is consistent with applicable EPA regulations.
