

Information Mail." At that point, a menu will be displayed that has an option "U.S. Nuclear Regulatory Commission" that will take you to the NRC Online main menu. The NRC Online area also can be accessed directly by typing "/go nrc" at a FedWorld command line. If you access NRC from FedWorld's main menu, you may return to FedWorld by selecting the "Return to FedWorld" option from the NRC Online Main Menu. However, if you access NRC at FedWorld by using the NRC's toll-free number, you will have full access to all NRC systems, but you will not have access to the main FedWorld system.

If you contact FedWorld using Telnet, you will see the NRC area and menus, including the NRC-EDIN Menu. Although you will be able to download documents and leave messages, you will not be able to write comments or upload files (comments). If you contact FedWorld using FTP, all files can be accessed and downloaded but uploads are not allowed; all you will see is a list of files without descriptions (normal Gopher look). An index file listing all files within a subdirectory, with descriptions, is available. There is a 15-minute time limit for FTP access.

Although FedWorld can also be accessed through the World Wide Web, like FTP that mode only provides access for downloading files and does not display the NRC-EDIN Menu.

For more information on NRC bulletin boards call Mr. Arthur Davis, Systems Integration and Development Branch, NRC, Washington, DC 20555, telephone (301) 415-5780; e-mail AXD3@nrc.gov.

**FOR FURTHER INFORMATION CONTACT:**

Robert S. Wood, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415-1255, e-mail RSW1@nrc.gov; or for the Antitrust SRP, Michael J. Davis, telephone (301) 415-1016, e-mail MJD1@nrc.gov.

**SUPPLEMENTARY INFORMATION:** The Draft Standard Review Plan on Antitrust describes the procedures used by the NRC staff to implement the antitrust review and enforcement prescribed in Sections 105 and 186 of the Atomic Energy Act of 1954, as amended and will replace the original NUREG-0970. These procedures are principally covered by the Commission's Rules and Regulations in 10 CFR 2.101, 2.102, 2.2, 50.33a, 52.77, 50.80, and 50.90. These procedures set forth the steps and criteria the staff applies in the antitrust

review of combined construction permit/operating license applications and amendments to construction permits, operating licenses, and combined licenses. In addition, the procedures describe how the staff enforces compliance by licensees with antitrust license conditions.

The Draft Standard Review Plan on Power Reactor Licensee Financial Qualifications and Decommissioning Funding Assurance describes the process the NRC staff uses to review the financial qualifications and methods of providing decommissioning funding assurance required of power reactor licensees. This draft SRP will be used as the basis for reviews as the electric utility industry moves from an environment of rate regulation toward greater competition. The NRC is concerned that rate deregulation and disaggregation resulting from various restructuring actions involving power reactor licensees could have adverse effects on the protection of public health and safety.

Dated at Rockville, Maryland, this 20th day of December, 1996.

For the Nuclear Regulatory Commission.

John C. Hoyle,

*Secretary of the Commission.*

**[IA 96-100]**

**In the Matter of John Maas;  
Confirmatory Order Prohibiting  
Involvement in NRC-Licensed  
Activities (Effective Immediately)**

I

Mr. John Maas was employed as President of National Circuits Caribe, Inc. (NCCI) in Fajardo, Puerto Rico, in 1991. NCCI possessed and used radioactive materials at its Fajardo, Puerto Rico facility under the authority of a general license issued by the Nuclear Regulatory Commission (NRC) pursuant to 10 CFR 31.5. The general license authorized the licensee to use byproduct material contained in devices designed and manufactured for the purpose of gauging or controlling thickness of materials during industrial processes. NCCI filed for bankruptcy under Chapter 11 in Puerto Rico in March 1991 but the case was dismissed in October 1991 due to lack of response from the company. The Fajardo facility was abandoned sometime around October 1991.

II

On June 23, 1993, the NRC was notified by the Commonwealth of Puerto Rico's Bureau of Radiological Health (Bureau) of the discovery of radioactive sources and a quantity of hazardous chemicals on property leased from the Puerto Rico Industrial Development Corporation (PRIDCO) by NCCI. Bureau personnel indicated that the abandoned sources had been found in an abandoned building by PRIDCO personnel.

The NRC, Region II, staff performed an inspection of the site on June 30, 1993, and determined there were five sources containing microcurie amounts of Thallium-204 or Promethium-147. The sources were in backscatter gauges that were authorized for use by NCCI under an NRC general license, specified in 10 CFR 31.5. The staff determined that the source/gauges had been abandoned at the site since October 1991. NRC and PRIDCO oversaw the disposal of the gauges, which was completed in September 1994.

**Oconee Nuclear Station, Units 1, 2, and 3; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing; Correction**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of Issuance; Correction.

**SUMMARY:** This document corrects a notice appearing in the Federal Register on December 18, 1996 (61 FR 66699), that considers issuance of amendments to Facility Operating License Nos. DPR-38, DPR-47, and DPR-55, issued to the Duke Power Company. This action is necessary to correct an erroneous date.
