[Docket No. CP97-546-000]

National Fuel Gas Supply Corporation; Notice of Application

May 30, 1997.

Take notice that on May 27, 1997, National Fuel Gas Supply Corporation (National Fuel), 10 Lafayette Square, Buffalo, New York 14203, filed in Docket no. CP97-546-000 an application pursuant to Section 7(b) of the Natural Gas Act (NGA) and Part 157 of the Commission's Regulations for permission and approval to abandon certain underground natural gas storage facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

National Fuel proposes to abandon five wells, and five segments of 2-inch pipeline totaling 685 feet. The wells will be plugged, 102 feet of the pipeline will be removed, and the remaining pipeline will be abandoned in-place. The facilities to be abandoned are part of National Fuel's Belmouth Storage Field in Elk County, Pennsylvania. National Fuel states that it is abandoning the wells because their poor deliverability and injection performance does not justify the expense of reconditioning the wells, which is necessary due to deterioration of the well casings, to keep them in operation as storage wells. National Fuel also states that the pipeline segments to be abandoned are attached to the wells and will not serve any purpose after the wells are plugged. National Fuel further states that abandonment of the wells will not decrease field performance.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 20, 1997, file with the Federal Energy Regulatory Commission at 888 First Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and
