

Specifically, Mr. Leonhard (1) fabricated experimental records and falsely represented them to his supervisor as being results obtained from multiple electrophysiological screening sessions conducted on eight animals; and (2) fabricated two surgical records as evidence of experimental preparations (implantation of indwelling electrodes) on two animals, which in fact had not been done. The experimental records did not appear in any publications.

Mr. Leonhard has accepted the ORI finding and has entered into a Voluntary Exclusion Agreement with ORI in which he has voluntarily agreed, for the three (3) year period beginning September 8, 1997:

(1) To exclude himself from serving in any advisory capacity to the Public Health Service (PHS), including but not limited to service on any PHS advisory committee, board, and/or peer review committee, or as a consultant; and

(2) That any institution that submits an application for PHS support for a research project on which Mr. Leonhard's participation is proposed or which uses him in any capacity on PHS supported research or that submits a report of PHS-funded research in which he is involved must concurrently submit a plan for supervision of his duties to the funding agency for approval. The supervisory plan must be designed to ensure the scientific integrity of Mr. Leonhard's research contribution. The institution also must submit a copy of the supervisory plan to ORI.

No scientific publications were required to be corrected as part of this Agreement.
