Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Storm Damage Reduction and Beach Erosion Control Project at Fenwick Island, Sussex County, DE

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The action being taken is an evaluation of the alternatives for storm damage reduction and the control of further erosion at Fenwick Island, Delaware. The purpose of any consequent work would be to provide shore property protection and to stabilize the shoreline at a predetermined width.

FOR FURTHER INFORMATION CONTACT: Questions regarding the DEIS should be addressed to Mr. Steve Allen, (215) 656-6559, U.S. Army Corps of Engineers, CENAP-PL-E, Wanamaker Building, 100 Penn Square East, Pennsylvania, PA 19107-3390.

SUPPLEMENTARY INFORMATION:

1. Proposed Action

a. The proposed document evaluates a study area approximately 1.5 miles in length and includes nearshore and offshore areas along the Fenwick Island

coastline. This area is subject to daily and storm wave action, which creates severe beach erosion problems.

b. The authority for the proposed project is the resolution adopted by the U.S. Senate Committee on Environment and Public Works dated 23 June 1988.

2. Alternatives

In addition to the no action alternative, the alternatives considered for storm damage reduction and erosion control will fall into structural and non-structural categories. The structural measures being considered for beach erosion control and storm damage reduction include, but will not be limited to bulkheads, seawalls, revetments, offshore breakwaters, groins, beach (berm and dune) restoration/nourishment, beach sills, or combinations thereof. Non-structural measures being considered are development regulations, and land acquisition.

3. Scoping

a. This study is the third of three interim feasibility studies addressing long-term storm damage reduction along the Atlantic Ocean Coast of Delaware from Cape Henlopen to Fenwick Island. The Fenwick Island area was identified in the Reconnaissance Report: Delaware Coast From Cape Henlopen to Fenwick Island (September 1991), as one of the primary areas to be recommended for further study in the feasibility phase.

b. The scoping process is on-going and has involved preliminary coordination with Federal, State, and local agencies. Participation of the general public and other interested parties and organizations will be invited by means of a public notice. Based on the input of these agencies and the interested public, a decision to have a formal scoping meeting will be made.

c. The significant issues and concerns that have been identified include the impacts of the project on aquatic biota, water quality, intertidal habitat, shallow water habitat, cultural resources, and socio-economics.

4. Availability

It is estimated the DEIS will be made available to the public in August 1999.

Army Federal Register Liaison Officer.
