

Automotive located in Columbus, Mississippi, identified fractional H.P. electric motors as the articles produced. Information obtained during the investigation showed that electric motors for windowlift, ABS, and windshield wiper applications was the primary output at the subject plant during the time period covered by the petition.

Section 223(b)(1) of the Trade Act of 1974 provides that a trade adjustment assistance certification may not apply to a worker whose separation from employment occurred more than one year prior to the date the petition was filed. The Trade Act does not give the Secretary authority to waive this statutory limitation. Since the December 1996 layoffs were more than one year prior to the January 8, 1998 petition date, the workers producing starter motors and commercial starter motors at Columbus cannot be considered in the TAA petition determination.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, D.C. this 29th day of April 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.
