

Background and Purpose

This modification of 33 CFR 165.1105 is being proposed to accommodate the homeporting of a new aircraft carrier at Naval Air Station North Island. There were previously only two aircraft carriers homeported at Naval Air Station North Island; however, a third aircraft carrier has recently been designated to homeport at Naval Air Station North Island. The modification and expansion of this security zone is needed to accommodate the homeporting of this third aircraft carrier at Naval Air Station North Island.

The modification and expansion of this security zone will prevent recreational and commercial craft from interfering with military operations involving all naval vessels homeported at Naval Air Station North Island, and it will protect transiting recreational and commercial vessels, and their respective crews, from the navigational hazards posed by such military operations. Entry into, transit through, or anchoring within this security zone is prohibited unless authorized by the Captain of the Port.

Regulatory Evaluation

This regulation is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. It has been exempted from review by the Office of Management and Budget under that Order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040, February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10(e) of the regulatory policies and procedures of DOT is unnecessary. This proposal will have minimal additional impact on vessel traffic because it is only a slight modification and expansion of the existing security zone codified at 33 CFR 165.1105.

Small Entities

Under 5 U.S.C. 601 *et seq.*, the Coast Guard must consider whether this proposal would have significant impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). The Coast Guard expects the economic impact of the proposal to be minimal on all entities. Because it

expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposed regulation contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposed regulation under the principles and criteria contained in Executive Order 12612 and has determined that this regulation does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of this regulation and concluded that, under Figure 2-1, paragraph (34)(g), of Commandant Instruction M16475.1C, it will have no significant environmental impact and it is categorically excluded from further environmental documentation. A Categorical Exclusion Determination and Environmental Analysis Checklist will be available for inspection and copying in the docket to be maintained at the address listed in ADDRESSES.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 141 and 142

[FRL-6014-2]

National Primary Drinking Water Regulations: Consumer Confidence Reports

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of data availability; request for comments.

SUMMARY: In February 1998, EPA proposed the Consumer Confidence Report rule (62 FR 7606, Feb. 13, 1998). To test certain language that this rule would mandate, EPA convened focus group sessions. These groups of consumers provided comments on proposed definitions of regulatory terms and health effects language, as well as general comments on the consumer confidence reports. EPA will consider the input of the focus groups when making decisions regarding the final rule. The report of the focus group moderator, transcripts of the sessions, and supporting documents are available for review. EPA requests comments on the results of the focus group study.

DATES: Comments must be post-marked by midnight June 15, 1998.

ADDRESSES: Send written comments to CCR Docket Clerk (W-97-18); Water Docket (MC-4101); U.S. Environmental Protection Agency; 401 M Street, SW; Washington, DC 20460. Submit electronic comments to ow-docket@epamail.epa.gov.

Please submit an original and three copies of your comments and enclosures

(including references). Electronic comments must be submitted as a Word Perfect 5.1 or 6.1 file, or as an ASCII file avoiding the use of special characters. Comments will also be accepted on disks in WordPerfect 5.1 or 6.1, or ASCII file format. Electronic comments on this Notice may be filed online at many Federal Depository Libraries. Commenters who want EPA to acknowledge receipt of their comments should include a self-addressed, stamped envelope. No facsimiles (faxes) will be accepted.

FOR FURTHER INFORMATION CONTACT: The Safe Drinking Water Hotline (800-426-4791) for general information about the proposed rule. The Safe Drinking Water Hotline is open Monday through Friday, excluding Federal holidays, from 9 a.m. to 5:30 p.m. Eastern Time. For technical inquiries, contact Françoise M. Brasier (202-260-5668) or Rob Allison (202-260-9836).

SUPPLEMENTARY INFORMATION: The Consumer Confidence Report rule would require community water systems to mail to each of their customers an annual report on local drinking water quality. The report would include such information as the source of local drinking water, the levels of any contaminants detected in water delivered to consumers, violations of drinking water regulations, and other information about local water quality. The proposed rule sets few requirements for the format of the reports, thereby allowing water suppliers to tailor their reports around the information that they must present.

EPA proposed several brief definitions of regulatory terms (e.g., "maximum contaminant level") that systems would have to include in their reports. EPA also proposed brief health effects language for each regulated contaminant. Water systems would have to include this language in their reports whenever they detected a regulated contaminant in excess of its legal limit. In the proposal's preamble, EPA discussed options for both sets of language and requested comment on which language would be most useful to consumers.
