

proposing significant changes to these orders, or have made *ex parte* presentations to propose ideas not presented in comments. In addition, parties have had the opportunity to observe changes in the level of competition in the marketplace. In this Public Notice, we invite parties to update and refresh the record on specific issues in these two proceedings to reflect all these developments. We note that implementation of high-cost universal service support also requires changes to access charges and that, therefore, access charge reform will be considered together with implementation of high-cost universal service support.

First, in their petitions for reconsideration of the *Price Cap Fourth Report and Order*, some parties have argued for a higher X-Factor, and some have argued for a lower X-Factor, for use in determining the price cap indices for price cap local exchange carriers (LECs). Parties are invited to update their comments and refresh the record on the specific arguments raised in these petitions for reconsideration.

In addition, Bell Atlantic and Ameritech have made specific pricing flexibility proposals that differ in several respects from proposals contained in the record developed in response to the *Access Charge Reform Notice*, 62 FR 4670 (January 31, 1997). First, because these proposals were made a year after issuance of the *Access Charge Reform Order*, they reflect both the measures adopted by the Commission in that order and developments in the marketplace since adoption of that order. Second, Bell Atlantic and Ameritech propose that the criteria used to evaluate the degree of competition vary by service. They also set forth proposals for phased relief as the competition in various services increases. We seek comment on these proposals.

Finally, on December 9, 1997, the Consumer Federation of America, the International Communications Association, and the National Retail Federation petitioned the Commission to initiate a rulemaking addressing the prescription of interstate access rates to cost-based levels. On February 24, 1998, MCI petitioned the Commission to "revisit and significantly modify its Access Reform policies by July 1, 1998." Parties are invited to update their comments and refresh the record for both of these proceedings based on intervening events. Parties are specifically invited to comment on whether and how we could implement specific forms of pricing flexibility for LECs subject to prescriptive access rates. To the extent

that we have not already addressed the concerns set forth in MCI's petition, we will consider MCI's petition in connection with RM-9210. Any updates or comments on matters contained in MCI's petition should be filed in that proceeding.
