

allotment to verify the authorized location, the number of livestock and periods of use for billing purposes, recorded brands to verify ownership, and reasons for any nonuse. The information on the form is used by the BLM authorized officer to determine if the applied for use is within the permittees' or lessees' preference (permitted level of use), to determine if the applied for use would be consistent with multiple-use objectives, and develops appropriate terms and conditions and makes the authorization according to 43 CFR 4130.3-1 and 4130.3-2. The authorized officer may deny the requested grazing use or a change in the annual grazing schedules by issuing a decision which includes a right of protest and administrative appeal. The grazing authorization remains in effect during the "grazing fee year". Without this information, the BLM would not be able to assure proper administration of the use of the public lands as required by law and would result in unauthorized use, improper billings, and nonpayment of fees due the Federal Government.

After the authorization is approved, the billing is then computer generated with the applicant's name, address, stated qualifications, and mailed to the grazing permittee or lessee.

The information required by law is only available from the applicants and uses information already available for the purpose identified. Since grazing on the unreserved public lands is administered only by the BLM, there is no duplication of information collections.

The BLM Form 4130.1 was designed to request only basic information required to administer the grazing authorization process. The majority of the information is contained in the applicant's ownership documents, previously approved grazing permit, or lease and displayed on Form 4130-3a. The data contained in columns 7, 8, 9 and 10 of Form 4130-1 are computer generated; therefore, the burden is minimized for all respondents.

The information requested by the form is subject to change from 1 grazing year to another and is necessary for annual collection of grazing fees. For example, a permittee may choose to graze less livestock than scheduled during the year and amend the authorized use to take nonuse. There is no opportunity to conduct the collection less frequently and collect user fees as required by law.

This information collection is consistent with guidelines in 5 CFR 1320.6 without which the BLM would not be able to administer the Public

Land Laws. There are no assurances of confidentiality but the Privacy Act Notice is provided to inform the applicants of the uses to be made.

The annual cost to the Government is estimated to be \$120,000 based on \$10,000 for forms and processing and \$110,000 to review returned applications at \$20 per hour. Annual costs to the respondents is estimated at \$40,000 based on \$20 per hour to prepare the forms.

The respondents spend an average of 20 minutes (0.333 hours) to review, check records, make changes and sign, resulting in 2,000 burden hours based on approximately 6,000 forms that are submitted for BLM's consideration annually. Response time has been estimated from those respondents who have completed the form in the presence of BLM employees.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will also become a matter of public record.

Dated: October 8, 1998.
