

**Proposed Project: The National Sample Survey of Registered Nurses, 2000—NEW**

The National Sample Survey of Registered Nurses (NSSRN) is carried out to assist in fulfilling three Congressional mandates. (1) Section 951 of P.L. 94-63 requires gathering data on: (a) The number and distribution of nurses, by type of employment and location practice; (b) the number of nurses practicing full-time and part-time within the U.S. and within each State; (c) the average rate of compensation for nurses, by type of practice and location of practice; (d) the activity status of the total number of nurses with advanced training or graduate degrees in nursing,

by specialty, including nurse practitioners, nurse clinicians, nurse researchers, nurse educators, and nurse supervisors and administrators; and (f) the number of nurses entering the U.S. annually from other nations. (2) Section 806(f) of P.L. 105-392 requires discipline workforce information and analytical activities for advanced nursing education, workforce diversity, and basic nursing education and practice. (3) Section 792 of Title VII of the Public Health Service Act calls for the collection and analysis of data on health professions.

The information from this survey will serve policy makers, legislative bodies, health professionals, and government agencies to inform workforce policies.

Data collected in this survey will assist in determining the impact that changes in the health care system are having on employment status of Registered nurses and their employment settings.

The proposed survey design for the 2000 NSSRN follows that of the previous six surveys and the projected sample size is approximately 49,200 registered nurses, with a response rate of 80%. Each respondent will be asked to complete a self-administered mail questionnaire containing items on educational background, duties, employment status and setting, geographic mobility, and income.

Respondent burden is estimated as follows:

Form	Number of respondents	Responses per respondent	Hours per response	Total burden hours
Survey .....	39,360	1	120	13,120

<sup>1</sup> Minutes.
