

Background

Request for Funding and Technical Assistance

The request for funding and technical assistance was submitted jointly by the Washington State Department of Corrections and the Washington Association of Sheriffs & Police Chiefs. It proposed utilizing collaborative efforts to develop more effective supervision and housing of violent offenders.

This project is being addressed through a partnership between local and state correctional agencies to evaluate the risks and needs of the offenders under correctional control of the State of Washington utilizing validated risk instruments by both jail and prison facilities so that policy decision-makers can be informed of the use of public resources. The proposal includes the development of a data information infrastructure that can integrate both county and state corrections information on offender risks that would result in a statewide profile of offenders, facilities and programs.

This collaborative approach could become a model for other states and jurisdictions. It involves a number of agencies at the federal, state and local levels.

The funding will address:

- Risk assessment in support of managing bed space for violent/persistent offenders;
- Community-based intermediate sanctions for non-violent offenders at the local and state level of government (county and state corrections); and
- Development of an information infrastructure to support these activities.

Desired Outcomes

- Statewide implementation of an objective jail classification system;
- Future housing needs based on risk/risk impact formulas/cost per offender;
- Future correctional option needs based on risk projections;
- Future data network/software needs;
- Fiscal analysis of future legislative requests or legislative proposals with bed impact analysis information; and
- Statewide capacity guidelines.

Components of the Project

- Offender risk/needs assessment
- Capacity/facility/correctional options assessments
- Information system evaluation and recommendations
- Projection of future housing needs and legislative impacts.

Related Activities

In addition to the cooperative agreement, a series of 7 or 8 technical assistance events are being coordinated by NIC in collaboration with the CPO to develop information that is necessary to contribute to the work funded under the cooperative agreement.

Purpose: The National Institute of Corrections is seeking applications for a cooperative agreement to do the project management to assist selected subject matter experts and the correctional planning team from the Washington State Department of Corrections, Washington Association of Sheriffs and Police Chiefs, and the Washington State Justice Information Network to develop and implement purposeful, informed policies and standards to effectively manage the correctional offender population. The Washington State/Local Planning for Correctional Population Management will be a collaborative effort between NIC and CPO program staff and the cooperative agreement recipient.
