BILLING CODE 4910-59-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 981014259-8312-02; I.D. 032699A]

Fisheries of the Northeastern United States; Summer Flounder Fishery; Commercial Quota Harvested for Maine

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Commercial quota harvest.

SUMMARY: NMFS announces that the summer flounder commercial quota available to the State of Maine has been harvested. Vessels issued a commercial Federal fisheries permit for the summer flounder fishery may not land summer flounder in Maine for the remainder of calendar year 1999, unless additional quota becomes available through a transfer. Regulations governing the summer flounder fishery require publication of this notice to advise the State of Maine that the quota has been harvested and to advise vessel permit holders and dealer permit holders that no commercial quota is available for landing summer flounder in Maine.

DATES: Effective 0001 hours, March 30, 1999, through December 31, 1999.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, Fishery Policy Analyst, (978) 281-9273.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is apportioned among the coastal states from North Carolina through Maine. The process to set the annual commercial quota and the percent allocated to each state are described in § 648.100.

The initial total commercial quota for summer flounder for the 1999 calendar year was set equal to 11.11 million lb (5,039 kg) (63 FR 72203, December 31, 1998). The percent allocated to vessels landing summer flounder in Maine is 0.04756 percent, or 5,285 lb (2,397 kg).

Section 648.100(e)(4) stipulates that any overages of commercial quota landed in any state be deducted from that state's annual quota for the following year. In the calendar year 1998, a total of 5,168 lb (2,344 kg) were landed in Maine, creating a 377 lb (171 kg) overage that was deducted from the amount allocated for landings in the state during 1999 (64 FR 5196, February 3, 1999). The resulting quota for Maine was 4,908 lb (2,226 kg).

Section 648.101(b) requires the Administrator, Northeast Region, NMFS (Regional Administrator), to monitor state commercial quotas and to determine when a state's commercial quota is harvested. The Regional Administrator is further required to publish notification in the **Federal Register** advising a state and notifying Federal vessel and dealer permit holders that, effective upon a specific date, the state's commercial quota has been harvested and no commercial quota is available for landing summer flounder in that state. The Regional Administrator has determined, based upon dealer reports and other available information, that the State of Maine has attained its quota for 1999.

The regulations at § 648.4(b) provide that Federal permit holders agree, as a condition of the permit, not to land summer flounder in any state that the Regional Administrator has determined no longer has commercial quota available. Therefore, effective 0001 hours, March 30, 1999, further landings of summer flounder in Maine by vessels holding commercial Federal fisheries permits are prohibited for the remainder of the 1999 calendar year, unless additional quota becomes available through a transfer and is announced in the **Federal Register**. Effective March 30, 1999, federally permitted dealers are also advised that they may not purchase summer flounder from federally permitted vessels that land in Maine for the remainder of the calendar year, or until additional quota becomes available through a transfer.

Classification

This action is required by 50 CFR part 648 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 30, 1999.

George H. Darcy,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[Docket No. 981014259-8312-02; I.D. 032699B]

Fisheries of the Northeastern United States; Scup Fishery; Commercial Quota Harvested for Winter I Period

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Commercial quota harvested for Winter I period.

SUMMARY: NMFS announces that the scup commercial quota available in the Winter I period to the coastal states from Maine to North Carolina has been harvested. Commercial vessels may not land scup in the northeast region for the remainder of the 1999 Winter I quota period (through April 30, 1999).

Regulations governing the scup fishery require publication of this notice to advise the coastal states from Maine to North Carolina that the quota has been harvested and to advise vessel permit holders and dealer permit holders that no commercial quota is available for landing scup in these states.

DATES: Effective 0001 hours April 1, 1999, through April 30, 1999.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, Fishery Policy Analyst, (978) 281-9273.

SUPPLEMENTARY INFORMATION: Regulations governing the scup fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is allocated into three quota periods, based upon percentages of the annual quota. The Winter I commercial quota (January through April) is distributed to the coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state are described in § 648.120.

The initial total commercial quota for scup for the 1999 calendar year was set equal to 2,534,000 lb (1,149,403 kg) (63 FR 72203, December 31, 1998). The Winter I period quota, which is equal to 45.11 percent of the annual commercial
