NUCLEAR REGULATORY COMMISSION

[Docket No. 50-263]

Northern States Power Company, Monticello Nuclear Generating Plant; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from 10 CFR 55.59 for Facility Operating License No. DPR-22, issued to Northern States Power Company (NSP or the licensee), for operation of the Monticello Nuclear Generating Plant, located in Wright County at the licensee's site in Wright and Sherburne Counties, Minnesota.

Environmental Assessment

Identification of the Proposed Action

The proposed action would allow the licensed operator requalification examinations for the Monticello Nuclear Generating Plant to be rescheduled after the current refueling outage. The requested exemption would extend the completion date for the examinations from March 9, 2000, to May 12, 2000.

The proposed action is in accordance with the licensee's application for exemption dated January 19, 2000.

The Need for the Proposed Action

The proposed action is needed to provide a one-time extension of the requalification program duration from March 9, 2000, to May 12, 2000. The proposed action is needed due to the delay in completing the examinations for the current requalification cycle because of (1) an unplanned outage in addition to two planned outages, (2) a delayed start of the second refueling outage, and (3) mid-cycle training program enhancements.
