Comment: Two commenters suggested that the criterion on service to the same patient population be dropped. One commenter believes the criterion is overly vague, could limit access to care as facilities seek to control their service patterns, and, in general, represents a geographically based approach that is out of keeping with modern technology and communications. Another commenter stated that the criterion is unclear, and providers could find it burdensome to assemble the data to show compliance. Other commenters shared the second commenter's concern, but instead of recommending elimination of the criterion, they suggested that a more administrable solution would be to use regional or state standards to define "same geographic area," such as, health systems area, a specified mileage amount, or our wage area.
Response: As described above, we have developed a more precisely stated test of service to the same patient population. We believe that test will be clear and understandable, not impose unrealistic burdens on providers, and allow provider-based designations that parallel service patterns.

Comment: With respect to paragraph (d)(7)(i), a commenter asserted that many currently operating facilities that are treated as provider-based by us provide types of service that are the same as those of the main provider, but serve patient populations from different geographic areas. The commenter believes these entities provide care under the direction of, and utilize substantial services from, the main provider. An example would be the geographically separate campuses of a single parent hospital that are located at various sites throughout a region. The commenter suggested that such campuses be presumed to be providerbased if they provide substantially the same services as the main provider, do not exceed the size of the main provider, and comply with all other provider-based requirements. Another commenter stated that the "same patient population" requirement should not apply to multi-campus long term care hospital locations. These locations are fundamentally different from other provider-based entities that the regulation addresses, since a long-term care hospital main provider and its remote campus furnish the same services, and offer the same programs of care, but operate in slightly different geographic areas. The commenter suggested that so long as all of the strict financial and administrative integration requirements of the proposed providerbased regulation are satisfied, the "same
patient population" requirements should not apply to long-term care hospitals. The result of this criterion would be that satellites will not be established in many underserved areas where long term services are needed. Another commenter believes a specialty facility, such as a long-term care hospital, should be exempt from the geographic proximity requirement if it can demonstrate that it will improve the quality of patient care, and offer services that are not otherwise provided in that area.

Response: We recognize that there may be some cases in which a hospital and another facility seeking providerbased status as a remote location of that hospital may meet most or all other criteria in §413.65, yet not qualify because the two facilities serve different patient populations. However, we do not agree that this result should lead us to abandon the "same patient population" test. On the contrary, we continue to believe that criterion is a valid indicator of provider-based status. Thus, we did not revise the regulation based on this comment. In this context, we note that there is no Medicare rule that would prohibit a hospital from setting up another hospital in another area. We do not agree with the commenter's assumption that because the program memorandum and proposed rule were issued in response to situations primarily involving outpatient facilities, they can apply only to such facilities. On the contrary, we believe the policies set forth in these documents are equally applicable to inpatient facilities, and should be applied in the many cases in which a determination about inpatient facilities must be made. In particular, the rules apply to remote locations of long-term care and other hospitals that are main providers, as well as to satellite facilities of hospitals and hospital units that are excluded from the hospital inpatient prospective payment system. Remote locations and satellite facilities are discussed more fully earlier in this preamble, and "satellite facilities" are specifically described in our regulations in $\S \S 412.22(\mathrm{~h})$ and $412.25(\mathrm{e})$. (As explained in that document, we are concerned that establishment of satellites by hospitals and units excluded from the inpatient PPS could lead to payment abuses, such as circumvention of certain payment caps mandated by section 4414 of the Balanced Budget Act of 1997, and we have therefore established special payment rules for those facilities. Facilities seeking to qualify as "satellites" under the inpatient payment
criteria in $\S \S 412.22(\mathrm{~h})$ and $412.25(\mathrm{e})$ would first need to comply with the provider-based requirements before being eligible for satellite status.) We have revised the final rule to clarify its application to remote locations of hospitals and satellite facilities.

Comment: The commenter believes that flexibility in the definition of "located in the immediate vicinity" needs to be met with additional considerations when viewing rural and underserved areas; for example, it should not be our intention to eliminate the provider-based designation of a rural health clinic (RHC), when the purpose of the RHC is to be an outreach to geographically isolated areas.

Response: We share the commenter's concern and have developed a special provision for RHCs, as described below.

Comment: A commenter believes that the requirement that provider-based entities serve the same population as the main provider could cause significant problems for RHCs. The unique situations addressed by hospital-based RHCs attempting to satisfy the health care needs of medically underserved areas should be considered as exceptions to the proposed rule.
Response: We continue to believe close physical proximity is an important indicator of provider-based status; however, we recognize that small rural hospitals and their RHCs may not be able to demonstrate that a substantial number of clinic patients receive services from the main provider. Small rural hospitals typically provide limited inpatient care compared to their urban counterparts, which may cause the RHC patients to seek inpatient service from other providers. In light of this, we believe small rural hospitals (less than 50 beds) that own and operate RHCs should not be expected to demonstrate that they serve the same patient population as the main provider. Therefore, we are revising the regulation to allow off-campus RHCs affiliated with small rural hospitals (less than 50 beds) to retain their provider-based status without satisfying that requirement.
Comment: Several commenters opposed the inclusion of paragraph (d)(7)(ii), since they view a State border as an arbitrary boundary inhibiting a hospital's ability to serve patients, which seems counterproductive. They also argued that a regulation that fails to recognize the operation of health care systems that function across State lines is unrealistic. Another commenter suggested that we rely on the proposal concerning serving the same patient population. It was also stated that in one case a provider can be located in a city
split by the State border with its related facility located one mile away, but in another state, while in another case, the provider and its subordinate facility can be a mile apart and in the same State. Another commenter believes that, since Medicare beneficiaries often cross borders for health care services, disallowing hospitals in these areas from establishing provider-based entities eliminates choices and prohibits the development of new services. The commenter recommended that we revise or eliminate this criterion. Another commenter suggested that LTHs and their satellites not be subject to this requirement if the main provider and its satellite are located in two contiguous States. Alternatively, the commenter suggested that we consider using the wage index areas as guidelines for the areas to be served by provider-based entities even if that area crosses State lines.
Response: After reviewing these comments, we have decided to revise the regulations to allow providers in one State to have provider-based facilities in an adjacent State, if doing so is not inconsistent with the law of either State, and other criteria are met, including those related to service to the same patient population.

Comment: With regard to paragraph (d)(7)(i), while the proposed rule permits a provider to show that a "high percentage" of patients of the main provider and the facility come from the same geographic region, new facilities would not have any historical data upon which to base this assertion, and therefore would fail to be able to demonstrate the criteria prior to operation. Another commenter believes the requirement may pose an impediment to new facilities being located in underserved or outlying areas. Thus, the commenters believe the same patient population requirement should not apply to new facilities, including new long-term care hospital satellites.
Response: We agree that it would be appropriate to establish a criterion that could be met by new facilities or organizations, and therefore have revised the final rule to include a special provision for new facilities or organizations. Under this revision, a new facility or organization, (one that has not been in operation for all of the 12 -month period immediately preceding the first day of the month in which the application for provider-based status is filed with us), may be considered to meet the criterion on service to the same patient population, if it is located in a zip code area included among those that (during the 12-month period described
above) accounted for at least 75 percent of the patients served by the main provider. We note that this provision would not be limited to long-term care hospitals' satellites or their remote locations, but would be available to all new facilities or organizations.
Section 413.65(e) Provider-based status not applicable to joint ventures

Comment: Several commenters expressed concern that this criterion would prohibit the use of joint ventures for entities that want to participate as provider-based entities, and argued that such a prohibition would unnecessarily restrict hospital flexibility. One believes this provision should be eliminated. Another commenter suggested modification of paragraph (d)(2) of the rule to establish majority ownership as the standard rather than 100 percent ownership. Still other commenters suggested that provider-based status for facilities or organizations run as joint ventures should be permitted, as long as the hospital at which the facility is located has the equipment or service under its control.

Response: We reviewed these comments carefully, but did not make any changes in the regulations based on them. When a facility or organization is run as a joint venture of two or more providers, it is by definition under their joint control, and therefore cannot be an integral and subordinate part of any individual provider. We have no interest in discouraging such ventures, but continue to believe they do not qualify as provider-based.

## Section 413.65(f) Management contracts

Comment: Several commenters expressed the view that the criterion under which the staff of the facility or organization must be employed by the provider or another organization other than a management company is too restrictive, and should be deleted. One commenter argued that, if the written contract maintains the responsibility and control for services in the hands of the main provider, the employer of the staff working at the site is not relevant Another believes the criterion will discourage economic efficiencies. If a provider is able to demonstrate integration and subordination of the offsite facility based upon other providerbased criteria, the fact that a hospital chooses to provide certain services either directly through its own employees or indirectly through an independent contractor/management arrangements is irrelevant. Another commenter argued that the proposed criterion is inconsistent with: the
provision of the Medicare statute that expressly permits coverage of "services under arrangement"; with the hospital conditions of participation that recognize that contractors may be used to furnish patient care services; and with the Provider Reimbursement Manual, which recognizes that providers commonly contract for management services and the costs of the contract services may be allowed under Medicare principles of reimbursement. Still another commenter believes the proposed criterion would negatively impact the therapy profession, and could impact the health and safety of Medicare beneficiaries.
Response: We do not believe the criterion is overly restrictive, nor do we agree that employment of the staff of a facility or organization is irrelevant to the question of whether that facility or organization is an integral and subordinate part of a provider. On the contrary, employment of the staff of such a facility or organization will normally give the provider significant control over it, thus promoting integration. Conversely, if a facility or organization is staffed by personnel who are employed by another entity that has only a contractual relationship with the provider, the facility or organization may well be an integral and subordinate part of the management company, not of the provider.
We also do not agree that the criterion is inconsistent with section 1861(w)(1) of the Act, which permits providers to make arrangements for the provision of specific health services, nor do we believe adopting this criterion will undercut the ability of providers to have selective services provided under arrangements. In this regard, we point out that existing Medicare policy, stated in section 207 of the Medicare Hospital Manual (HCFA Publication 10), emphasizes the need for the hospital to exercise professional responsibility for the arranged-for services, not merely to serve as a billing mechanism for the other party. This is consistent with our view that section 1861(w)(1) was intended to allow specific health care services to be furnished under arrangements, but was never meant to be a vehicle by which a provider could nominally operate a facility or organization, but, in fact, contract out its operation to another entity. Finally, we note that while there are various sections of the hospital conditions of participation and the Provider Reimbursement Manual that recognize the possibility that specialized health care services or management services may be provided under contract, this does not indicate that providers may
contract out entire departments or services while claiming them as provider-based. To clarify the scope of the requirement on contracted services, we have revised it to state that management staff of the facility or organization (rather than health care or support staff) need not be employed directly by the provider. We have also revised the rule to clarify that if staff of the facility or organization (other than management staff) are employed by an organization other than the management company or the provider, it must be the same organization that also employs the staff of the main provider.
Section 413.65(g) Obligations of hospital outpatient departments and hospital-based entities

## Section 413.65(g)(1)

Because of the direct relationship between the proposed changes in this section and those in $\S 489.24$ (b), comments on both proposals are discussed later, under $\S 489.24$ (b), "Special responsibilities of Medicare hospitals in emergency cases."

Comment: A commenter requested clarification as to the application of the anti-dumping requirement in the home health setting.
Response: Section 413.65(g)(1) states that the EMTALA requirements apply to hospital outpatient departments. EMTALA requirements would not apply to off-campus provider-based entities that are not hospital departments, such as home health agencies.

## Section 413.65(g)(2)

Comment: While one commenter agreed with the requirement under $\S 413.65(\mathrm{~g})(2)$ for billing of physician services with the appropriate site-ofservice indicator, another commenter also believes there should be clarification that correct billing is the responsibility of the entity performing the billing function. Both commenters suggested that the hospital notify physicians who do their own billing that they must use the correct indicator; they agree that it should not be the responsibility of the hospital.
Response: We agree that physicians (or those to whom they assign their billing privileges) are responsible for appropriate billing, but note that physicians who practice in hospitals, including off-site hospital departments, do so under privileges granted by the hospital. Thus, we believe the hospital has a role in ensuring proper billing.

## Section 413.65(g)(5)

Comment: Presently, provider-based clinics bill Medicare for the facility
charge on a UB-92 form, and the physician fee is billed separately on a HCFA-1500 form, while other payers may accept a single bill for both charges. A commenter believes it is inappropriate to mandate that two bills be submitted for all patients, as long as charges for similar services are uniform regardless of payer.

Response: As explained further below, we have revised the final rule to eliminate the part of this criterion relating to billing of services to nonMedicare patients. We believe this responds to this commenter's concern.

Comment: Many commenters stated that Medicare should treat a facility that claims a facility fee as being providerbased even when other payers do not do so, reasoning that as long as the hospital claims that the patient is an outpatient for Medicare purposes, the practices of other payers, with respect to similar patients, are not significant, and should be ignored. Another commenter believes this requirement should be eliminated, because, in the commenter's view, it has no bearing on the outpatient services delivered to Medicare beneficiaries, and therefore does not affect Medicare reimbursement. To illustrate, a large commercial insurer does not have the capability to accept certain types of outpatient claims from hospitals; therefore, it requires claims for those services to be billed on a physician claim form, so hospitals will receive the proper reimbursement. If this criteria is retained as proposed, many hospitalbased departments would not meet our criteria due to the nuances of other payers' policies, that are often contractual issues with providers. Still another commenter believes that we should reexamine the proposal made in paragraph (g)(5), and at a minimum, clarify what it means by its proposal mandating uniform "treatment of all patients, for billing purposes, as hospital outpatients." If we are proposing to mandate that all outpatients be billed on the same basis, this would effectively extend Medicare direct billing or rebundling rules to all payers. In addition, this proposed requirement would not only be contrary to past policy and practice, but would affect departments that have
differentiated billing practices. Another commenter stated that payers typically determine payments based upon how they define a particular service or their individual market power; Medicare certification of outpatient departments should not be influenced by how unrelated third parties pay for services to the patients they cover at these sites. Moreover, this criterion would be very difficult to implement, because
hospitals can have hundreds of contracts with insurance companies and the providers that subcontract for part of the risk for plans.
Response: After review of the comments on this section, we have decided to revise it to restrict the requirement for uniform billing to Medicare patients only, thus allowing hospitals to bill other payers in whatever manner is appropriate under those payers' rules. As revised, $\S 413.65(\mathrm{~g})(6)$ states that hospital outpatient departments (other than RHCs) must treat all Medicare patients, for billing purposes, as hospital outpatients. The department must not treat some Medicare patients as hospital outpatients and others as physician office patients.

Comment: A commenter stated that there appears to be some confusion as to whether this requirement applies to "departments" or all facilities and organizations seeking provider-based status. Also, the commenter asked if there is a provision of the proposed rule that mandates that a facility fee be charged to patients of facilities and organizations receiving provider-based status.
Response: As noted earlier, the proposed rule would not apply this criterion to provider-based entities (which may participate separately as providers) but only to provider-based departments. Regarding the second issue, we have, as described in response to the preceding comment, revised the final rule to eliminate the criterion regarding billing of payers other than Medicare.

## Section 413.65(g)(7)

Comment: A commenter stated that requiring written notice for each patient (presumably signed by the patient), would be an overly burdensome requirement, and requested that the requirement allow for a clear, prominently displayed sign in lieu of individual notice. Another commenter believes that the proposed requirement would apply a standard to hospital outpatient departments that is not applied to any other site of service.

Response: First, we emphasize that notice is required only for Medicare beneficiaries, not for all patients. We recognize that providing notice will generate some burden for the provider, but believe that the protection it affords to patients warrants the requirement. We considered allowing the notice requirement to be satisfied through the posting of signs, as recommended by one commenter, but concluded that use of individual written notices would more effectively ensure that each
beneficiary receives the necessary information. In response to the comment concerning settings other than hospital outpatient departments, we note that in other settings, a patient is unlikely to be misled as to what type of facility is the site of treatment, so provision of notice is not required. To avoid confusion as to when the requirement applies, we have revised the final rule to state that notice is required only if the hospital outpatient department or provider-based entity is not located on the campus of the hospital that is the main provider. We have revised this final rule to specify that the notice must be in writing, must be one the beneficiary can read and understand, and must be given to the beneficiary's authorized representative if the beneficiary is unconscious, under great duress, or for any other reason unable to read a written notice and understand and act on his or her own rights.
Section 413.65(g)(9) (redesignated in this final rule as Section 413.65(h), Furnishing all services under arrangement)

Comment: A commenter observed that $\S 413.65(\mathrm{~g})(9)$ does not preclude an outpatient facility from obtaining a certain type of service from an off-site supplier. If this is correct, if the service is provided on-site in the hospital's outpatient facility, it is not clear how the proposed regulations are intended to be applied. It would appear that if the facility is looked at as a whole, all services are not provided "under arrangements"; therefore, paragraph (g)(9) of this section would not preclude the facility from being recognized as provider-based. However, in this case, the commenter stated that both licensure and ownership requirements would be difficult to satisfy. In most cases, that portion of the facility that is operated "under arrangements" with the hospital will not be on the hospital's license, nor will that portion necessarily be owned by the hospital. Thus, the commenter urged that the "under arrangements" portion of an outpatient facility be excluded from the licensure and ownership analyses.
Response: We agree that where a facility offers a variety of services, provision of a single type of service under arrangement would not prevent the facility from meeting this criterion. The criterion could not, of course, be met by a facility that furnished only a specific type of service (such as physical therapy), and provided that service only under arrangement. In the case envisioned by the second commenter, the facility would be out of compliance
with licensure and ownership requirements, as well as the requirement involving services under arrangement, and we would agree that it could not be provider-based.

Comment: A commenter asked for clarification of "under arrangements", in reference to our other regulations that contain these terms. Also, the commenter requested clarification on the types of services to which this standard applies, that is, direct patient care as opposed to facility related services.

Response: The term "arrangements" is defined in section 1861(w)(1) of the Act and the Medicare regulations $\S 409.3$, in that "arrangements" refers to arrangements that provide that Medicare payment made to the provider that arranged for the services discharges the liability of the beneficiary or any other person to pay for the services. We wish to emphasize that the provision will apply to patient care services, not housekeeping, security, billing, or other services that are not patient care services but are needed to support their provision.

## Section 413.65(h) Inappropriate

 treatment of a facility or organization as provider-based (redesignated in this final rule as paragraph (i))Comment: This section establishes sanctions that may be used to address a main provider that has treated an entity as provider-based without our review and approval. A commenter believes that the investigation phase should precede the review of payments to the main provider. A commenter was also concerned that the individuals involved in these reviews and investigations are properly trained to make the required determinations.

Response: We believe review of payments will encompass two activities-investigation to determine whether applicable provider-based requirements were met, and a calculation of the amount of overpayment if they were not. Thus, investigation necessarily precedes recovery, but is a part of the overall effort, which is to reconsider payment amounts. To respond more effectively to concerns about how the review and recovery activities will occur, and to clarify the specific actions we will take in cases of inappropriate billing, we have reorganized paragraph (i) to deal separately with the processes of determination and review, recovery of overpayments, and the good faith effort exception. With respect to determination and review, we state that if we learn that a provider has treated a facility or organization as provider-
based and the provider had not obtained a determination of provider-based status under this section, we will review current payments and, if necessary, take action in accordance with the rules on inappropriate billing in paragraph (j), investigate and determine whether the requirements for provider-based status in paragraph (d) of $\S 413.65$ (or, for periods prior to October 10, 2000, the requirements in applicable program instructions) were met, and review all previous payments to that provider for all cost reporting periods subject to reopening in accordance with § 405.1885 and $\S 405.1889$ of this chapter. With respect to recovery of overpayments and the good faith exception, we have clarified that we will recover only the difference between the amount of payments that actually were made and the amount of payments that we estimate should have been made in the absence of a determination of providerbased status, and that recovery will not be made for any period prior to the effective date of these final rules if during all of that period the management of the entity made a good faith effort to operate it as a providerbased facility or organization, as described in paragraph (h)(3) of $\S 413.65$. In response to the comment about the competence of individuals involved in these activities, we wish to emphasize that we will ensure that staff involved in these activities have the necessary expertise.

Comment: A commenter believes that it would be unfair to apply the proposed regulations retroactively, that is, to periods before the effective date of the final rule. Even though paragraphs (h) and (i) provide for a good faith exception, it is still unfair to provide that the conditions for this exception will apply prior to the effective date of the final regulation. The commenter requested that these sections be revised to provide that the period of recovery will not extend to any period prior to the effective date of the final regulations. Another commenter also believes that any payment changes be prospective (unless the hospital did not make a good faith effort to operate the site as provider-based).

Response: We agree that it would be inappropriate to apply the rules in paragraph (h) to any period prior to their effective date, and have revised the final rule to clarify that for such periods, we will make determinations based on the program memoranda or other instructions in effect at the time. However, the criteria in paragraph (i) that form the basis for a good faith exception were in effect prior to the issuance of these regulations. Regarding
the last comment, we cannot agree to ignore possible overpayments resulting from noncompliance with published criteria in effect at that time.

Comment: A commenter believes that the term "good faith effort" should be defined to provide more direction and opportunity to comply. Also, entities making "good faith efforts" should be given an opportunity to correct those factors or criteria that render it out of compliance with the provider-based requirements.
Response: The conditions under which a provider will be found to have made a good faith effort were clarified in $\S 413.65(\mathrm{i})(2)$, and have been restated in the final rule.

## Section 413.65(i) Inappropriate billing

 (redesignated in this final rule as paragraph (j))Comment: A commenter believes that suspending all payments for outpatient services to facilities that have billed inappropriately as provider-based entities until the provider can demonstrate that payments are proper is too onerous. Instead, the commenter suggested that we consider suspending the reimbursement differential between a provider-based entity and a nonprovider-based entity until a determination is made or the facility has had a reasonable opportunity to comply.
Response: We understand the commenter's concern and have revised the final rule to authorize partial suspension of payment (that is, a reduction in payment) to the extent needed to prevent creation of an overpayment to the provider. This rule will allow payment to continue at a reduced rate, thus avoiding creation of financial hardship for the provider. To describe more clearly how we will deal with instances of inappropriate billing, we have reorganized paragraph (j) of § 413.65 to spell out more clearly the actions we will take, and the extent to which payment will be adjusted. Specifically, we state that if we find that a facility or organization is being treated as provider-based without having obtained a determination of providerbased status under this section, we will notify the provider, adjust future payments, review previous payments, determine whether the facility or organization qualifies for provider-based status under this paragraph, and continue payments only under specific conditions. The notice to the provider will explain that payments for past cost reporting periods may be reviewed and recovered, that future payments for services in or of the facility or organization will be adjusted, and that
a determination of provider-based status will be made.

We further state that we will not stop all payment in such cases, but instead, will adjust future payments to approximate as closely as possible the amounts that would be paid in the absence of a provider-based determination, if all other requirements for billing were met. We also explain that we will review previous payments and, if necessary, take action in accordance with the rules on inappropriate treatment of a facility or organization described above. The regulation states that we will determine whether the facility or organization qualifies for provider-based status under the criteria in this section. If we determine that the facility or organization qualifies for provider-based status, future payment for services at or by the facility or organization will be adjusted to reflect that determination. Even if the facility or organization does not qualify for provider-based status, however, we will continue paying, at an appropriately adjusted level, for a limited time period in order to avoid disruption of services to program beneficiaries at that site and to allow an orderly transition to freestanding status.

The notice of denial of provider-based status sent to the provider will ask the provider to notify us in writing, within 30 days of the date the notice is issued, as to whether the facility or organization (or, where applicable, the practitioners who staff the facility or organization) will be seeking to enroll and meet other requirements to bill for services in a free-standing facility. If the provider indicates that the facility, organization, or practitioners will not be seeking to enroll, or if we do not receive a response within 30 days of the date the notice was issued, all payment will end as of the 30th day after the date of notice. If the provider indicates that the facility or organization, or its practitioners, will be seeking to enroll and meet other requirements for billing for services in a free-standing facility, payment for services of the facility or organization will continue, at the adjusted amounts described in paragraph (j)(2) of this section for as long as is required for all billing requirements to be met (but not longer than 6 months) if-

- The facility or organization, or its practitioners, submit a complete enrollment application and provide all other required information within 90 days after the date of notice, and
- The facility or organization, or its practitioners, furnish all other information we need to process the enrollment application and verify that other billing requirements are met.

If the necessary applications or information are not provided, we will terminate all payment to the provider, facility, or organization as of the date we issue notice that necessary applications or information have not been submitted. We have clarified the final rule to state that these reductions will occur where inappropriate billing is or has been taking place.

Comment: A commenter believes that there are already existing mechanisms for overpayment and recoupment that may be used in the situations described in this section. At the very least, administrative actions of this type should be subject to time frames in order to protect providers from the impact of extended investigations.
Response: We plan to conduct any recovery efforts in accordance with applicable law and regulations on overpayment recovery. However, investigations may be complex and require examination of many records, and we do not agree that they should be limited by additional, self-imposed restrictions.

Comment: A commenter stated that a facility or organization that requests a provider-based determination prior to the effective date of the final rule, and meets the good faith requirements, should not be subject to recovery of overpayment for periods either before or after the effective date of the final rule. This will prevent disruptions to existing arrangements that meet the good faith exception during the time that the request is being processed.
Response: If we were to adopt this proposal, we would be guaranteeing an overpayment to providers who, for a specific time period, knowingly billed for services as those of provider-based entities, even though they met only a few of the provider-based criteria. Thus, we did not adopt this comment.

Comment: A commenter requested that the requirement found at paragraph (i)(2)(iii) be clarified to state that management is only responsible for professional services billed by the hospital.
Response: As explained earlier, we believe hospitals' privileging mechanisms give them adequate leverage to prevent inappropriate billing by practitioners using their facilities. Therefore, we did not adopt this comment.
Comment: As to the good faith criteria found in paragraph (i)(2), a commenter questioned why requirements related to public awareness were chosen for inclusion. An organization can represent itself to the public in any number of inaccurate ways in order to mislead our officials and others. The
commenter believes that we should focus our attention on more tangible expressions of good faith efforts to operate a provider based entity.
Response: We believe inclusion of this requirement is needed to help ensure that beneficiaries are protected from unexpected deductible and coinsurance liability. While we agree with the commenter that some providers may misrepresent the status of off-site facilities, we believe such providers cannot reasonably be said to have acted in good faith, and should not receive favorable treatment with respect to past overpayments.
Section 413.65(j) Correction of errors (redesignated in this final rule as paragraph ( $k$ ))

Comment: A commenter disagreed with the language in this subsection that would allow us to review and rescind, if appropriate, any past determinations. The commenter believes that this subsection should be removed and any previous determinations should be grandfathered in under the new regulations. Other commenters recommended that we grandfather facilities or organizations that had previously been determined by the regional office to be provider-based, or that have not received such a determination but have been billing as provider-based without a determination for a period of at least ten years, so that those facilities or organizations could retain provider-based status even though they do not meet the criteria in the regulations.
Response: We do not agree that it would be appropriate to grandfather existing facilities or organizations, since this would in effect create an ongoing double standard, under which some facilities or organizations are held to higher standards than others. Moreover, the fact that improper billing may have continued undetected for a long period is not a reason to continue to permit such billing. As explained in the response to the following comment, however, any adverse determination regarding provider-based status of facilities or organizations which we previously determined were providerbased will not be effective until the start of the cost reporting period after the period in which the provider is notified of the redetermination, or for at least 6 months, whichever date is later.
Comment: A commenter believes that our proposal that we may review past provider-based determinations inserts needless uncertainty into the process for making provider-based designations. The commenter is concerned that providers may file before the final rule
is published in order to avoid a crush of applications and subsequent disruption in payment, if they do not have a determination within 30 days of the rule becoming final. The commenter stated that providers need to be able to receive prompt determinations on which they can rely.

Response: We understand the concern about avoiding the need to process a large number of applications in a short time, and agree that it would not be appropriate to make abrupt changes in provider-based status. To avoid a possible crush of applications within a 30-day period, as envisioned by the commenter, we are providing the delayed effective date described earlier in this document. In addition, under § $413.65(\mathrm{j})$ of these regulations, when a facility or organization that previously was determined to be provider-based is found to no longer qualify for providerbased status, treatment of the facility or organization as provider-based will not cease until the first day of the first cost reporting period following notification of the redetermination, but not less than 6 months after the date the provider is notified of the redetermination. If there has been no prior determination of provider-based status, and a facility or organization is later found not to meet the criteria, that determination may be effective up to 6 months after the date the provider is notified of the determination, if within 30 days of the determination, the provider indicates that the facility or organization, or its practitioners, will enroll separately and, within 90 days, the facility or organization, or its practitioners, take other necessary action to enroll.
Section 489.24(b) Special responsibilities of Medicare hospitals in emergency cases

Comment: One commenter disagreed strongly with the proposed revisions to the regulation defining "comes to the emergency department," and in particular expressed the view that patients arriving on the campus, sidewalk, driveway, or parking lot of hospital facilities should not be considered to have come to the emergency department. The commenter stated the view that an obligation under section 1867 of the Act (sometimes referred to as the Emergency Medical Treatment and Active Labor Act (EMTALA), after the original title of the legislation adding section 1867) and our regulations at $\S \S 489.20(\mathrm{l})$, (m), (q), and (r), and § 489.24 should be triggered only by a presentation to the emergency department, and that only in exceptional situations should EMTALA apply to someone not technically in the
emergency department. The commenter recommended that the regulations be revised to state that in these cases, the hospital may rely on a variety of transport options, consistent with the individual's condition and established policies that are applied in a nondiscriminatory manner. The commenter also recommended that the statute be interpreted as requiring only that hospitals with emergency departments have policies and procedures to assure that a person who presents to the hospital requesting emergency services is provided a medical screening examination and, if needed, stabilization or an appropriate transfer.

Another commenter raised several arguments against the proposed change. The commenter stated that there is a legal and ethical conflict in requiring hospital personnel to leave an area of patient care and furnish assistance to another patient in a remote area of the hospital. The commenter also believes that ED personnel are not well-trained or practiced in immobilization or scene safety, and patients and staff may be put at risk if staff are asked to go into the field and render aid to a victim who needs the expert care and experience for which field emergency medical services (EMS) personnel are trained. Finally, the commenter expressed concern about possible increases in the liability insurance cost to hospitals as a result of the proposed change.

Response: We do not agree that the proposed language inappropriately extends the scope of hospitals' EMTALA responsibilities. On the contrary, existing regulations at § 489.24 make it clear that EMTALA applies to hospitals that offer services for emergency medical conditions, and we believe it would defeat the purpose of EMTALA if we were to allow hospitals to rely on narrow, legalistic definitions of "comes to the emergency department" or of "emergency department" to escape their EMTALA obligations. We would also note, as discussed further below, that there is no requirement that all areas of the hospital be equipped to provide emergency care or that treatment always be provided outside the emergency area or department. Similarly, there is no prohibition of appropriate transfers to other facilities where such a transfer is conducted in accordance with $\S 489.24$. On the contrary, the intent of the revised regulation is to ensure that patients who come to the hospital and request examination or treatment for what may be an emergency medical condition are not denied EMTALA protection simply because they enter the
wrong part of the hospital or fail to make their way to the emergency room.

Comment: Two commenters recommended clarification of the applicability of section 1867 of the Act regarding transfer requirements to scheduled patients at an "off-campus" hospital site, to ensure that the movement of scheduled patients unexpectedly requiring a higher level of care to another site of the same hospital is not construed as a "transfer" under the emergency access law, and that only those patients taken from one hospital's off-campus facility to another hospital's emergency department or inpatient unit be considered "transfers" that must be in accordance with the requirements of section 1867.

Response: We agree that movement of a patient from one part of a hospital to another, including movement from a remote location to a main hospital campus, does not constitute a "transfer"' for EMTALA purposes, nor does it require compliance with the appropriate transfer requirements in $\S 489.24$ (d). The final regulations at $\S 489.24(\mathrm{i})(3)(\mathrm{i})$ clarify this policy.

Comment: A commenter expressed the view that the proposed revision to § 489.24 does not recognize the role that EMS personnel play in emergency situations and the true medical benefit provided by EMS personnel to patients in emergency situations. The commenter recommended that language be included in the regulation to authorize hospitals' use of EMS in responding to emergency situations on hospital grounds.

Response: We agree that EMS personnel can play a valuable role in transporting patients to appropriate sources of emergency care. A hospital may not, however, meet its EMTALA obligations merely by summoning EMS personnel. EMS may be used appropriately in conjunction with an appropriate hospital response to treat and move an individual who is already on hospital property. We therefore did not make any change to these
regulations to authorize exclusive use of EMS to respond to emergency situations on hospital property.

Comment: A number of commenters stated that the anti-dumping rules implemented under section 1867 of the Act (EMTALA requirements) and our regulations at $\S \S 489.20(\mathrm{l})$, (m), (q), and (r), and § 489.24 should apply to the hospital's main campus and to all emergency departments. However, they argued that it is not reasonable to apply these rules to outpatient departments located off-campus that would not be set up to provide emergency services. In the commenters' view, it should suffice that
patients in an emergency situation be directed to the hospital's emergency room. Another commenter stated that EMTALA obligations should be limited to those hospital entities that hold themselves out as providing emergency services, and should not be enforceable anywhere outside the emergency department or anywhere on hospital property, including an outpatient department or provider-based entity. Another commenter stated that the enforcement of this requirement would lead to the elimination of servicespecific outpatient departments located off a main campus, and asked that we reconsider our policy. One commenter expressed concern that patients identifying a facility as a hospital-based department could mistakenly assume it is equipped to handle emergency cases. Another commenter believes that hospitals should be required to have policies and procedures in place to assure that all parts of the hospital are prepared to deal with getting an individual the appropriate medical screening.

Response: Existing regulations at $\S 489.24(\mathrm{~b})$ define "hospital with an emergency department" to include all hospitals that offer services for emergency medical conditions, not just those that have organized emergency rooms or departments. To the extent a hospital acquires or creates an offcampus location, identifies it to us and to the public as a part of that hospital, and claims payment for services at that location as hospital services, we believe it is not unreasonable to expect that hospital also to assume the obligations, including compliance with EMTALA requirements, which flow from hospital status. This principle does not mean, of course, that a hospital must have a fully equipped and staffed emergency department at each location. It also does not mean that every appearance by an individual at an off-campus hospital department that does not offer services for emergency medical conditions will necessarily trigger an EMTALA obligation on the part of the hospital. Individuals come to these departments for many medical purposes which may not involve potential emergency medical conditions. Under these circumstances, the hospital would not have an EMTALA obligation with respect to that individual. This principle does mean, however, that if an individual comes to an off-campus department of a hospital and a request is made for examination or treatment for a potential emergency medical condition, the hospital incurs an obligation to provide, within its
capability, an appropriate medical screening examination and necessary stabilizing treatment. In some cases, the patient may need to be taken back to the main hospital campus for a full screening and/or stabilizing treatment. Under these circumstances, the hospital is responsible for moving the patient or arranging his or her safe transport, but this movement would not be considered a "transfer"' under §489.24(b), since the patient is merely going from one part of the hospital to another. If it is necessary to transfer the patient to another medical facility, the hospital must provide an appropriate transfer in accordance with $\S 489.24(\mathrm{~d})$.

After review of the comments on this issue, we have decided to revise the regulations to state more clearly the extent of a hospital's EMTALA obligations with respect to patients who come to a hospital department located off the hospital's main campus. Provider-based entities, such as SNFs or HHAs, located off the hospital campus would not, of course, be subject to EMTALA since a patient coming to such an entity would not have come to the hospital. We will require that each offcampus hospital department, during its regular hours of operation, have in effect procedures for: (1) assessing the possibility that an emergency medical condition exists, and providing such screening (as defined in §489.24(a) and (b)) and necessary stabilization (as defined in $\S 489.24(\mathrm{c})$ ) at the off-campus site); (2) transporting the patient to the hospital's emergency room or department for screening and necessary stabilization meeting the requirements of $\S 489.24$; or (3) providing an appropriate transfer to another facility in accordance with the requirements in $\S 489.24(\mathrm{c})$. To meet these requirements, the hospital will need to develop procedures that permit staff of the offcampus department to contact emergency physicians or other qualified emergency practitioners at the main hospital campus, to obtain advice and direction regarding the handling of any potential emergencies, and to obtain prompt medical transport, by hospitalowned or other ambulance or other appropriate vehicle, either to the main hospital campus or, where an appropriate transfer is being provided, to another medical facility.

Specifically, we are adding new paragraph (i) to § 489.24 to describe a hospital's obligations. The paragraph states that, if an individual comes to a facility or organization that is located off the main hospital campus as defined in $\S 413.65(\mathrm{~b})$, but has been determined under $\S 413.65$ of this chapter to be a department of the hospital, and a
request is made on the individual's behalf for examination or treatment of a potential emergency medical condition as otherwise described in paragraph (a) of §489.24, the hospital is obligated to provide the individual with an appropriate medical screening examination and any necessary stabilizing treatment.
The capability of the hospital includes that of the hospital as a whole, not just the capability of the off-campus facility or organization. Except for cases described in paragraph (i)(3)(iii) (those in which the main hospital campus does not have the specialized capability or facilities needed to treat the individual, or the individual's condition is deteriorating so rapidly that transport to the main campus would significantly jeopardize the life or health of the individual), the obligation of a hospital under this section must be discharged within the hospital as a whole. However, the hospital is not required to locate additional personnel or staff to off-site locations to be on standby for possible emergencies.
In §489.24(i)(2), Protocols for offcampus departments, we further state that the hospital must establish protocols for the handling of potential emergency cases at off-campus departments. These protocols must include provision for direct contact between personnel at the off-campus department and emergency personnel at the main hospital campus, and may provide for dispatch of practitioners, when appropriate, from the main hospital campus to the off-campus department to provide screening or stabilization services. The intent of these requirements is to ensure timely exchange of information between the two sites, and to allow the hospital the flexibility to bring emergency personnel to the patient, rather than the opposite, where doing so is the best medical approach to meeting the patient's needs.

Under the final rule, if the off-campus department is an urgent care center, primary care center, or other facility that is routinely staffed by physicians, RNs, or LPNs, these personnel must be trained, and given appropriate protocols, for the handling of emergency cases. At least one individual on duty at the off-campus department during its regular hours of operation must be designated as a qualified medical person as described in paragraph (d). The qualified medical person must initiate screening of individuals who come to the off-campus department with a potential emergency medical condition, and may be able to complete the screening and provide any necessary stabilizing treatment at the off-campus
department, or to arrange an appropriate transfer.

The final rule further states that if the off-campus department is a physical therapy, radiology, or other facility not routinely staffed with physicians, RNs, or LPNs, the department's personnel must be given protocols that direct them to contact emergency personnel at the main hospital campus for direction. Under this direction, and in accordance with protocols established in advance by the hospital, the personnel at the offcampus department must describe patient appearance and reported symptoms and, if appropriate, arrange transportation of the individual to the main hospital campus (if the main hospital campus has the capability required by the individual, and movement to the main campus would not significantly jeopardize the individual's life or health), or assist in an appropriate transfer. Movement of the individual to the main campus of the hospital is not considered a transfer under this section, since the individual is simply being moved from one department of a hospital to another department or facility of the same hospital.

Finally, specific rules apply if the individual's condition warrants movement to a facility other than the main hospital campus, either because the main hospital campus does not have the specialized capability or facilities required by the individual, or because the individual's condition is deteriorating so quickly that taking the time required to move the individual to the main hospital campus could place the life or health of the individual in significant jeopardy. Under these circumstances, personnel at the offcampus department must, in accordance with protocols established in advance by the hospital, assist in arranging an appropriate transfer of the individual to a medical facility other than the main hospital. The hospital must have protocols to ensure that the movement is an appropriate transfer in accordance with paragraph (d)(2) of this section. The protocol must include procedures and agreements established in advance with other hospitals or medical facilities in the area of the off-campus department to facilitate these anticipated transfers. We note that the interpretive guidelines for enforcement of EMTALA requirements will be revised to conform to these new rules.

## Section 498.3 Scope and applicability

Comment: A commenter asked for clarification as to whether appeal rights would be available in the event of
revocation by us of provider-based status.

Response: We have revised § 489.3(b)(2) to specify that a determination that a facility or organization no longer qualifies for provider-based status is an initial determination, thus providing an administrative appeals mechanism for these decisions.

## D. Requirements for Payment

We proposed to revise §410.27, Outpatient Hospital Services and Supplies Incident to a Physician Service: Conditions, to require that services furnished at a location other than an RHC or an FQHC that we designate as having provider-based status under $\S 413.65$ must be under the direct supervision of a physician as defined in §410.32(b)(3)(ii).
Comment: Several commenters requested clarification of what we mean by "direct supervision." One commenter asked that we further define the nature and extent of the supervision needed to comply with our proposal. One commenter asked whether the supervision requirement would be met if a physician is in the hospital or whether the physician must be in the department while the procedure is being performed. The same commenter asked whether the physician billing for the incident to services must be of the same specialty as the procedure being performed. A large trade association stated that we appear to be replacing our current policy in section 3112.4(A) of the Intermediary Manual, which states that we assume the physician supervision requirement to be met when incident to services are furnished on hospital premises, with a policy requiring direct physician supervision at all times, in all outpatient departments, regardless of whether or not they are located on the hospital campus. The commenter recommended that if we retain a direct supervision requirement, it should be limited to outpatient departments located off-site of the main provider. One commenter stated that facilities and organizations accorded provider-based status that are located on the main provider's campus should be subject to the same physician supervision requirements that apply to "incident to" services provided elsewhere on the campus.
Response: We regret that our proposal to define "direct supervision" by referring to the definition of "direct supervision of a physician" given at §410.32(b)(3)(ii) may have been confusing to some commenters. Section 410.32(b)(3)(ii) defines "direct supervision" within (a physician) office
setting as meaning that the physician must be present in the office suite and immediately available to furnish assistance and direction throughout the performance of the procedure. The definition at $\S 410.32$ (b)(3)(ii) goes on to state that "direct supervision" does not mean that the physician must be present in the room when the procedure is performed.
Our intention in the proposed rule was to define "direct supervision" of hospital outpatient services incident to physician services when they are furnished at a department of a hospital to mean that a physician must be present on the premises of the entity accorded status as a department of the hospital and, therefore, immediately available to furnish assistance and direction for as long as patients are being treated at the site. By "direct supervision"' we do not mean that the physician must physically be in the room where a procedure or service is furnished. Nor does the supervising physician necessarily have to be of the same specialty as the procedure or service that is being performed. We emphasize that our proposed amendment of $\S 410.27$ to require direct supervision of hospital services furnished incident to a physician service to outpatients applies to services furnished at an entity that is located off the campus of a hospital that we designate as having provider-based status as a department of a hospital in accordance with the provisions of $\S 413.65$. Our proposed amendment of $\S 410.27$ to require direct supervision of hospital services furnished incident to a physician service to outpatients does not apply to services furnished in a department of a hospital that is located on the campus of that hospital. For hospital services furnished incident to a physician service to outpatients in a department of a hospital that is located on the campus of the hospital, we assume the direct supervision requirement to be met as we explain in section 3112.4(A) of the Intermediary Manual. The requirement at § 410.27 does not affect the definition of physician supervision in section 3112.4(A) of the Intermediary Manual. In response to these comments, we have revised our definition of "direct supervision by a physician" in the final regulation.
Comment: A major trade association asserted that requiring a physician to be on-site at a provider-based entity throughout the performance of all "incident to" services would be burdensome and costly for hospitals where there are a limited number of physicians available to provide
coverage, particularly in rural settings. Another commenter believes that entities with provider-based status should not be subject to physician supervision requirements that are more stringent than those applicable to freestanding facilities. A third commenter believes that this requirement is unnecessary because the requirements for integration with the hospital and other requirements for provider-based status include adequate checks and balances to ensure quality care. The commenter recommended that this proposal be omitted from the final rule with the potential for a separate, better defined, proposal at a later date.

Response: We disagree with commenters who believe the proposed supervision requirement is not necessary or that it would be burdensome to the hospital. First, the supervision requirement is separate from and independent of the providerbased requirements, and hospitals and physicians already have to meet a direct supervision of "incident to" services requirement that is unrelated to provider-based issues. That is, we require that hospital services and supplies furnished to outpatients that are incident to physician services be furnished on a physician's order by hospital personnel and under a physician's supervision (Intermediary Manual, section 3112.4(A)). We assume the physician supervision requirement is met on hospital premises because staff physicians would always be nearby within the hospital. The effect of the regulations in this final rule is to extend this assumption to a department of a provider that is located on the campus of a hospital. However, the regulation does not extend the assumption of supervision to a department of a hospital that is located off the campus of the hospital. We would not extend this assumption to a provider-based entity, regardless of its location, because the "incident to" requirement in §410.27(a)(1)(iii) applies only to hospitals. Also, as we state above, satisfying the requirements to be designated provider-based is unrelated to our requirement that hospital services furnished incident to a physician service to outpatients at an entity that has provider-based status be under the direct supervision of a physician.
Finally, this supervision requirement is entirely consistent with the direct supervision requirements currently set forth in the Medicare Carriers Manual, Part 3, section 2050.1(B).

Comment: One commenter suggested that partial hospitalization services furnished by a hospital to its outpatients be exempt from the outpatient
department "incident to" requirements, or that other requirements be drafted that would, in the commenter's opinion, be more appropriate to the nature of this care.
Response: Section 1861(s)(2)(B) restricts coverage of partial hospitalization services furnished by a hospital to its outpatients to services that meet "incident to" requirements. We do not have the discretion to ignore this statutory restriction.
Comment: One commenter asked that we provide an exception to the direct supervision requirement in the case of physical therapy services. The commenter questioned why therapists who furnish the same services in a provider-based entity that they would furnish in an independent practice should be subject to direct physician supervision in one setting and not the other.

Response: The provision on coverage for outpatient physical therapy and occupational therapy services does not require that they be "incident to" physician services (see section 1861(s)(2)(D) of the Act). Therefore, there is no need to exempt them from the supervision requirement for outpatient hospital services incident to a physician service that is furnished at a provider-based entity. We therefore made no change in the final regulation based on this comment.
Comment: One commenter suggested that we modify our proposed regulation to waive the direct supervision requirement in entities with providerbased status for certain procedures for which we already waive the direct supervision requirement when the procedures are performed on homebound patients, as set forth in section 2051 of the Medicare Carriers Manual. The commenter believes that general supervision is sufficient for these waived services, for example, the physician need not be present, but the services must be performed under a physician's overall supervision and control, and ordered by a physician.
Response: Under section 2050.2 of the Medicare Carriers Manual, subject to certain requirements, we waive the direct supervision requirement when the following services are furnished to homebound patients: injections; venipuncture; EKGs; therapeutic exercises; insertion and sterile irrigation of a catheter; changing of catheters and collection of catheterized specimen for urinalysis and culture; dressing changes, for example, the most common chronic conditions that may need dressing changes are decubitus care and gangrene; replacement and/or insertion of nasogastric tubes; removal of fecal
impaction, including enemas; sputum collection for gram stain and culture, and possible acid-fast and/or fungal stain and culture; paraffin bath therapy for hands and/or feet in rheumatoid arthritis or osteoarthritis; and, teaching and training the patient for the care of colostomy and ileostomy, the care of permanent tracheostomy, testing urine and care of the feet (diabetic patients only), and blood pressure monitoring. While we believe the commenter's suggestion has merit, we do not believe it would be appropriate to adopt it before we have had time to analyze the issue further. Therefore, we did not revise the final rule based on this comment.
In our proposed rule, we proposed to require that the same supervision levels established for diagnostic x-ray and other diagnostic tests in accordance with $\S 410.32(\mathrm{~b})(3)$ be required when these tests are furnished at an entity that has been accorded provider-based status by us.

Comment: A large industry federation generally favored our requiring that diagnostic tests be furnished at provider-based entities under levels of physician supervision that we specify, consistent with the definitions of general, direct, and personal supervision established at $\S 410.32(\mathrm{~b})(3)$. The commenter suggested that we modify the definition of general supervision to make it clear that the training of nonphysician personnel and the maintenance of necessary equipment and supplies are the responsibility of the hospital, not the physicians.
Response: We agree and we will modify our regulation accordingly.

Comment: Numerous commenters, including radiology and imaging specialty groups, neurologists, vascular technologists, and sonographers, questioned the level of supervision required for various specific diagnostic tests and services.
Response: Our model for this proposed requirement was the requirement for physician supervision for diagnostic tests payable under the Medicare physician fee schedule that was issued in the October 31, 1997 physician fee schedule final rule (for CY 1998) ( 62 FR 59048). There have been issues raised about the appropriate level of supervision for some specific diagnostic services, similar to the comments we received about our proposed regulation. We have not yet resolved these issues, and this final rule is not the place to convey decisions about appropriate supervision levels for specific diagnostic tests and services by individual HCPCS code. In January

1998, we sent a memorandum to all Associate Regional Administrators advising them to instruct carriers to follow their existing policies on physician supervision of diagnostic tests until we provide further instruction. We intend to instruct hospitals and intermediaries to use the October 31, 1997 physician supervision requirements as a guide, pending issuance of updated requirements. In the meantime, fiscal intermediaries, in consultation with their medical directors, will define appropriate supervision levels for services not listed in the October 31, 1997 final rule when those services are furnished at an entity with provider-based status in order to determine whether claims for these services are reasonable and necessary.

## V. Summary of and Response to MedPAC Recommendations

The following are additional recommendations contained in the report on Medicare payment policy that the Medicare Payment Advisory Commission submitted to the Congress in March 1999. (MedPAC, Report to the Congress: Medicare Payment Policy, March 1999.) We respond to recommendations that are specifically related to a particular component of the hospital outpatient PPS in the appropriate section of this preamble.

MedPAC Recommendation: MedPAC recommends that the Secretary evaluate payment amounts under the hospital outpatient PPS and the ambulatory surgical center (ASC) PPS along with the practice expense payments under the Medicare physician fee schedule for services furnished in physicians' offices to ensure that the differing payments made under the three payment systems do not create unwarranted financial incentives regarding site of care.

Response: We agree that the three payment systems should avoid creating unnecessary financial incentives to deliver care in particular settings. We will consider this matter further and evaluate differences in payments.

MedPAC Recommendation: MedPAC recommends that the Secretary study means of adjusting base prospective payment rates across ambulatory settings for patient characteristics such as age, frailty, comorbidities and coexisting conditions, and other measurable traits. Under this approach, payment would be less dependent on the type of facility and more dependent on the relative costliness of furnishing specific services to individual patients. MedPAC notes that no viable patientlevel adjuster currently exists that could be used in this fashion.

As an interim measure, MedPAC recommends, with reservations, that HCFA evaluate facility-level adjustments in order to preserve access to care for particularly vulnerable segments of the Medicare population.
Response: The underlying premise in this recommendation, as MedPAC states, is that HCFA should move toward development of a more unified and rational payment system for ambulatory care. Many powerful arguments favor such a system, but the challenges of creating and implementing it are substantial. We will give further consideration to the recommendation to study possible adjustments that could be used in various settings.
We agree that we should evaluate the need for facility-level adjustments. We believe the best course is to evaluate the need for these adjustments during the next several years as we gain actual experience with the operation of the hospital outpatient PPS and are able to observe the effects on particular provider groups. In consideration of the transitional protections provided by the BBRA 1999, we have not adopted facility-level adjustments, other than an adjustment for local labor costs, at this time.
MedPAC Recommendation: MedPAC recommends that the Secretary seek legislation to develop and implement a single update mechanism that would link conversion factor updates to volume growth across all ambulatory care settings. These settings include hospital outpatient departments, physicians' offices, and ASCs, as well as other specific settings mentioned.
Response: We believe that this proposal requires further study to determine its feasibility and possible impact. Therefore, we are not prepared to seek legislation at this time.
MedPAC Recommendation: MedPAC recommends that we not use patient diagnosis to calculate relative weights or make payments for medical visits, "given the current state of the available data and the lack of definitive rules for reporting patients' diagnoses under the proposed system."

Response: As discussed in section III.C.3, we have dropped diagnosis from our characterization of medical visit APCs. We hope to develop procedure codes for medical visits that are more descriptive of hospital outpatient resource use, rather than physician services. Once we revise procedure coding to better reflect hospital services, we will assess whether accurate diagnosis coding further improves recognition of resources.
MedPAC Recommendation: MedPAC recommends that the Secretary closely
monitor the use of hospital outpatient services to ensure that beneficiary access to care is not compromised.
Response: We plan to evaluate the operation of the new PPS to address a variety of issues, including beneficiary access to care. We note that the provisions of the BBRA 1999 should mitigate substantially any payment reductions and hence the possibility of reduced access.
MedPAC Recommendation: MedPAC recommends that the Secretary consider making payment adjustments in addition to the proposed adjustment for local area wages under the new system. These adjustments should be tied to patient characteristics. The facility-level adjustments that are made until the time that a patient-level adjuster is available should reflect the population of Medicare patients treated by facilities identified to receive the adjustments.

MedPAC points out that HCFA, in setting Medicare payment rates for hospital inpatient services, adjusts payments based on the costs or provider characteristics of hospitals (for example, sole community hospitals). Rather than continuing this practice in the outpatient setting, MedPAC recommends that HCFA move toward making adjustments based on patient characteristics and the relative costliness of resources required in furnishing care to differing patients. Any differences in the payment of the same ambulatory care service should be based on patient characteristics, rather than on the setting. MedPAC recommends that HCFA evaluate any relationships between immutable patient characteristics and the cost of furnishing care.

## Response: Other than those

 adjustments specified in sections 201 and 202 of the BBRA 1999, we have made no additional adjustments in this final rule. We will consider the possibility of adjustments in the future once we have actual experience with operation of the hospital outpatient PPS and can examine its effects. The extent to which adjustments at the level of patient characteristics will be feasible is unclear and would require further study.
## VI. Provisions of the Final Rule

The provisions of this final rule reflect the provisions of the September 8, 1998 proposed rule, except as noted elsewhere in this preamble. Following is a synopsis of the major changes we have made, either in response to comments or in order to implement provisions of the BBRA 1999 that apply to the hospital outpatient prospective payment system.

For our proposal to adjust the CY 2002 update of the conversion factor by the percentage that actual CY 2000 payments exceed the estimated CY 2000 expenditure target, we are delaying implementation of the volume control mechanism for 2 years.

For our proposal to package costs that are directly related and integral to performing a procedure or furnishing a service on an outpatient basis, we are making the following changes:

- We are creating separate APC groups to pay for blood, blood products, and anti-hemophilic factors, for splints and casts, and for certain very costly drugs that are not included in the transitional pass-through payment provision.
- We are paying separately, at cost, for the acquisition of corneal tissue.
- As required by section 201(e) of the BBRA 1999, we are not paying for certain implantable items under the DMEPOS fee schedule, but are including them as covered outpatient services. We are packaging the costs of these items into the APC payment rate for the procedures or services with which they are associated. These include implantable items used in connection with diagnostic tests, implantable DME, and implantable prosthetic devices.

For our proposal to base payment for medical visits to clinics and emergency departments on diagnosis codes as well as HCPCS codes, we are not using diagnosis codes at this time.

For our proposal to classify a new technology procedure or service within the APC group that it most closely resembles in terms of clinical characteristics and resource utilization, pending collection of additional pricing data, we are creating separate APC groups to which we can temporarily classify new technology services while we gather additional data and gain pricing experience. We are also creating a process under which interested parties may submit requests for consideration of services that may be eligible for payment as new technology.

For our proposal to pay for drugs, pharmaceuticals, and biologicals (except for cancer therapy drugs and certain infrequently used but very expensive drugs) as part of the APC payment for the service or procedure with which they are used, we are establishing transitional pass-through payments, as directed by section 201(b) of the BBRA 1999. Under this provision, an additional payment will be made for current orphan drugs, current cancer therapy drugs, biologicals, and brachytherapy, and current
radiopharmaceutical drugs and biological products.
For our proposal to classify a new or innovative medical device, drug or biological (for which we were not making payment as of December 31, 1996) within the APC group that it most closely resembles in terms of clinical characteristics and resource utilization, pending collection of additional pricing data, we are establishing transitional pass-through payments. Under this provision, as directed by section 201(b) of the BBRA 1999, an additional payment will be made for new or innovative devices, drugs, and biologicals whose cost is not insignificant in relation to the APC payment for the group of services with which they are used.

For our proposal not to establish an outlier adjustment, as directed by section 201(a) of the BBRA 1999, we will make an outlier payment when calculated bill costs exceed 2.5 times the PPS payment for a service.

For our proposal to determine comparability of resources and clinical characteristics among the codes within an APC group based on our claims data and the analyses and judgment of our medical advisors, supported by comments from medical specialty societies and trade associations, as provided in section $201(\mathrm{~g})$ of the BBRA 1999, we are limiting the variation so that the highest median cost of an item or service in an APC group is no more than two times the lowest median cost of an item or service within that group. We will also consult with an expert outside advisory panel regarding the clinical integrity of the APC groups and weights as part of our update of the PPS.

For our proposal to periodically review and update payment weights, APC groups, and other elements of the hospital outpatient PPS, as required by section 201(h) of the BBRA 1999, we will annually review the groups, relative payment weights, and the wage and other adjustments that are a part of the PPS.
For our proposal to implement the hospital outpatient PPS fully and in its entirety for all hospitals beginning as early as possible in CY 2000, with no phase-in period, as required by section 202(a) of the BBRA 1999, we are establishing transitional corridors for services furnished before January 1, 2004 to limit losses facilities might otherwise face.
For our proposal not to make any adjustments for any specific classes of hospitals, we are holding small rural hospitals harmless through CY 2003 in accordance with the requirements set by section 202(a)(3) of the BBRA 1999,
which added section $1833(\mathrm{t})(7)(\mathrm{D})(\mathrm{i})$ to the Act. Also, we are holding cancer centers permanently harmless in accordance with the requirements set by section 202(a)(3) of the BBRA 1999.
For our proposal on beneficiary coinsurance payment amounts, we are limiting the coinsurance amount for a procedure to be no more than the hospital inpatient deductible, as specified in section 204(a)(3) of the BBRA 1999.
The following is a synopsis of the principal changes that we are making in the provider-based requirements:
For our proposal to require main providers and provider-based entities to share a common license, we will require common licensure only where State law permits it. Where State law prohibits it or is silent, we will not apply the licensure requirement. We will also exempt IHS facilities and facilities located on Tribal lands from this requirement.
For our proposal requiring a main provider and a provider-based entity to serve a common service area indicated largely by overlapping patient populations, we have redefined "common service area" to mean a 75 percent threshold of patients who reside in a zip code area that is common to the main provider and the provider-based entity.
For our proposal to require providerbased entities to be in the same State as the main provider, we will allow providers in one State to have providerbased facilities in an adjacent State, if doing so is consistent both with the law of the affected States and with other criteria, including those related to a common service area.
For our proposal to require that a provider-based outpatient department bill all payers as an outpatient department, we have rescinded this requirement.
For our proposal to require FQHCs that have been billing Medicare as hospital outpatient departments to comply with the provider-based requirements, we are grandfathering both FQHCs and FQHC "look-alikes" (facilities that are organized as FQHCs but do not receive grants) so that these facilities will be considered departments of providers without having to meet $\S 413.65$ requirements.
For our proposal to apply the provider-based requirements to Indian Health Service (including tribally operated) entities, we are creating a permanent exception for those entities that were billing as departments of IHS or Tribal hospitals on or before October 10, 2000.

For our proposal to consider providerbased entities to be part of the hospital for Emergency Medical Treatment and Active Labor Act (EMTALA) ("antidumping' purposes), we are maintaining the principle that off-site hospital facilities are subject to EMTALA. We have clarified the obligations of hospitals with respect to these locations to ensure they are consistent with staffing patterns and resources.

For our proposal to apply providerbased criteria to inpatient facilities such as multi-campus hospitals created by mergers and satellites of PPS-excluded hospitals that are created by hospitals leasing space in other hospitals, we have clarified the applicability of provider-based criteria to remote locations of hospitals and hospital satellite facilities.

## VII. Collection of Information Requirements

Under the Paperwork Reduction Act (PRA) of 1995, we are required to provide 30-day notice in the Federal Register and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the PRA requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

We are soliciting public comment on each of these issues for the provisions summarized below that contain information collection requirements:

## Section 413.24 Adequate cost data and cost finding

Section 413.24(d)(6)(ii) states that a provider must develop detailed work papers showing the exact cost of the services (including overhead) provided to or by the free-standing entity and show those carved out costs as nonreimbursable cost centers in the provider's trial balance. While these information collection requirements are subject to the PRA, the burden associated with these requirements is captured under §§413.65(c)(1) and (c)(2) below.

Section 413.65 Requirements for a determination that a facility or an organization is a department of a provider or a provider-based entity

Section 413.65(b)(2) states that a provider or a facility or organization must contact HCFA and the facility or organization must be determined by HCFA to be provider-based before the main provider begins billing for services of the facility or organization as if they were furnished by a department of the provider-based entity, or before it includes costs of those services on its cost report. While these information collection requirements are subject to the PRA, the burden associated with these requirements is captured under §§ 413.65(c)(1) and (c)(2) below.
Sections 413.65(c)(1) and (c)(2) state that a main provider that acquires a facility or organization for which it wishes to claim provider-based status, including any physician offices that a hospital wishes to operate as a hospital outpatient department or clinic, must report its acquisition of the facility or organization to HCFA and must furnish all information needed for a determination as to whether the facility or organization meets the requirements in paragraph (d) of this section for provider-based status, if the facility or organization is located off the campus of the provider or would increase the provider's total costs by at least 5 percent. Furthermore, a main provider that has had one or more entities considered provider-based also must report to HCFA any material change in the relationship between it and any provider-based facility or organization, such as a change in ownership of the facility or organization or entry into a new or different management contract that could affect the provider-based status of the facility or organization.

The burden associated with this requirement is the time for the main provider to report its acquisition to HCFA, furnish all information needed for a determination, report to HCFA any material change in the relationship between it and any provider-based facility or organization, such as a change in ownership of the facility or organization or entry into a new or different management contract that could affect the provider-based status of the facility or organization. It is estimated that 105 main providers will take 10 hours for a total of 1,050 hours.

Section 413.65(d)(4)(v) states that medical records for patients treated in a facility or organization must be integrated and maintained into a unified retrieval system (or cross reference) of the main provider. The burden
associated with this requirement is the time required for the main provider to maintain medical records in a unified retrieval system. While this requirement is subject to the PRA, we believe this requirement is a usual and customary business activity and the burden associated with this requirement is exempt from the PRA, as stipulated under 5 CFR 1320.3(b)(2) and (b)(3).

Section $413.65(d)(7)(i)$ requires that for a facility or organization and the main provider that is not located on the same campus, the facility or organization must demonstrate a high level of integration with the main provider by showing that it meets all of the other provider-based criteria, and demonstrates that it serves the same patient population as the main provider, by submitting records showing that, during the 12 -month period immediately preceding the first day of the month in which the application for provider-based status is filed with HCFA, and for each subsequent 12month period meet the requirements of paragraphs (d)(7)(i)(A), (B), or (C) of this section. While the information collection requirements listed below are subject to the PRA, the burden associated with these requirements is captured under §§413.65(c)(1) and (c)(2).

Section 413.65(g)(7) states that when a Medicare beneficiary is treated in a hospital outpatient department or hospital-based entity, the hospital has a duty to notify the beneficiary, prior to the delivery of services, of the beneficiary's potential financial liability (that is, a coinsurance liability for a facility visit as well as for the physician service).
The burden associated with this requirement is the time for the provider to disseminate information to each beneficiary of the beneficiary's potential financial liability (that is, a coinsurance liability for a facility visit as well as for the physician service). It is estimated that 750 providers will make on average 667 disclosures on an annual basis, at 3 minutes per disclosure, for a total annual burden of 25,013 hours.
Section 413.65(j)(5) requires that upon notice of denial of provider-based status sent to the provider by HCFA, the notice will ask the provider to notify HCFA in writing, within 30 days of the date the notice is issued, of whether the facility or organization (or, where applicable, the practitioners who staff the facility or organization) will be seeking to enroll and meet other requirements to bill for services in a free-standing facility. This requirement is exempt from the PRA as stipulated under 5 CFR 1320.4(a)(2).

Further, if the provider indicates that the facility or organization, or its practitioners, will be seeking to meet enrollment and other requirements for billing for services in a free-standing facility, the facility or organization must submit a complete enrollment application and provide all other required information within 90 days after the date of notice; and the facility or organization, or its practitioners, furnish all other information needed by HCFA to process the enrollment application and verify that other billing requirements are met. The requirements and burden associated with the provider enrollment process are currently approved under OMB control number 0938-0685, with a current expiration date of September 30, 2001.

## Section 424.24 Requirements for Medical and Other Health Services Furnished by Providers Under Medicare Part B

Section 424.24(e)(3)(i) requires that when a partial hospitalization service occurs the physician recertification must be signed by a physician who is treating the patient and has knowledge of the patient's response to treatment. While this signature requirement is subject to the PRA, the overall requirements associated with physician recertification, as currently referenced in HCFA regulation number HCFA1006, published in the Federal Register on June 5, 1998, have not yet been approved by OMB under the PRA. Therefore, we continue to solicit comment on all of the requirements and associated burden referenced in §424.24.

## Section 419.42 Hospital Election To Reduce Copayment

Sections 419.42(b) and (c) state that a hospital must notify its fiscal intermediary of its election to reduce copayments no later than June 1, 2000 prior to the date the PPS is implemented or for subsequent calendar years, beginning with elections for calendar year 2001, no later than December 1 of the preceding calendar year. The hospital's election must be properly documented. It must specifically identify the ambulatory payment classification to which it applies and the coinsurance amounts (within the limits identified within this regulation) that the hospital has elected for each group.

The burden associated with these requirements is the time it takes a hospital to compile, review, and analyze data for both revenues and coinsurance; prepare and present the data to the hospital board; make a business decision as to whether the hospital
would elect to reduce coinsurance; and then notify its fiscal intermediary of its election. A hospital would notify its fiscal intermediary of its election to reduce coinsurance only if there were other providers, in close proximity, that would attract a majority of the hospital's business if they did not reduce their coinsurance. Since hospitals do not want to lose money by absorbing coinsurance, we anticipate that this requirement will affect 750 hospitals and take them 10 hours each for a total of 7,500 hours.

Section 419.42(e) states that the hospital may advertise and otherwise disseminate information concerning the reduced level(s) of coinsurance that it has elected. All advertisements and information furnished to Medicare beneficiaries must specify that the coinsurance reductions advertised apply only to the specified services of that hospital and that these coinsurance reductions are available only for hospitals that choose to reduce coinsurance for hospital outpatient services and are not applicable in any other ambulatory settings or physician offices.

The burden associated with this requirement is the time for the hospital to disseminate information concerning its coinsurance election. It is estimated that 750 hospitals will each take 10 hours annually to disseminate this information via newsletters and information sessions at senior citizen centers for a total of 7,500 hours.

We have submitted a copy of this final rule to OMB for its review of the information collection requirements. These requirements are not effective until they have been approved by OMB. A notice will be published in the Federal Register when approval is obtained.

If you comment on any of these information collection and record keeping requirements, please mail copies directly to the following:
Health Care Financing Administration, Office of Information Services, Information Technology Investment Management Group, Division of HCFA Enterprise Standards, Room C2-26-17, 7500 Security Boulevard, Baltimore, MD 21244-1850, Attn: John Burke HCFA-1005-FC/R-240, and
Office of Information and Regulatory
Affairs, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503, Attn.: Allison Herron Eydt, HCFA-1005-FC.

## VIII. Response to Comments

Because of the large number of items of correspondence we normally receive on Federal Register documents published for comment, we are not able to acknowledge or respond to them individually. Comments on the provision of this final rule that implement provisions of the BBRA 1999 will be considered if we receive them by the date and time specified in the DATES section of this preamble. We will not consider comments concerning provisions that remain unchanged from the September 8, 1998 proposed rule or that were changed based on public comments.

## IX. Regulatory Impact Analysis

## A. Introduction

Section 804(2) of title 5, United States Code (as added by section 251 of Pub. L. 104-121), specifies that a "major rule" is any rule that the Office of Management and Budget finds is likely to result in-

- An annual effect on the economy of \$100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment productivity, innovation, or on the ability of United States based enterprises to compete with foreignbased enterprises in domestic and export markets.
We estimate, based on a simulation model, that the effect on hospitals participating in the Medicare program associated with this final rule would be to increase Medicare payments by $\$ 600$ million in calendar year 2000. This figure includes beneficiary copayments. We estimate that the additional expenditures to hospitals from the Part B Trust Fund associated with this final rule will be $\$ 490$ million in fiscal year 2000. Therefore, this rule is a major rule as defined in Title 5, United States Code, section 804(2).

We have examined the impacts of this final rule as required by Executive Order 12866, the Unfunded Mandates Reform Act of 1995, and the Regulatory Flexibility Act (RFA) (Public Law 96354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for
major rules with economically
significant effects ( $\$ 100$ million or more annually). Because the projected spending resulting from this final rule is expected to exceed $\$ 100$ million, it is considered a major rule for purposes of the RFA.

The Unfunded Mandates Reform Act of 1995 also requires (in section 202) that agencies prepare an assessment of anticipated costs and benefits for any rule that may result in an expenditure in any 1 year by State, local, or tribal governments, in the aggregate, or by the private sector, of $\$ 100$ million. This final rule does not mandate any requirements for State, local, or tribal governments.

We generally prepare a regulatory flexibility analysis that is consistent with the RFA (5 U.S.C. 601 through 612), unless we certify that a final rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all hospitals to be small entities.

Also, section 1102(b) of the Social Security Act requires us to prepare a regulatory impact analysis for any final rule that may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. With the exception of hospitals located in certain New England counties, for purposes of section $1102(\mathrm{~b})$ of the Act, we define a small rural hospital as a hospital with fewer than 100 beds that is located outside of a Metropolitan Statistical Area (MSA) or New England County Metropolitan Area (NECMA). Section 601(g) of the Social Security Amendments of 1983 (Pub. L. 98-21) designated hospitals in certain New England counties as belonging to the adjacent NECMA. Thus, for purposes of the proposed prospective payment system, we classify these hospitals as urban hospitals.

## B. Estimated Impact on the Medicare Program

Our Office of the Actuary projects that the additional benefit expenditures from the Part B Trust Fund resulting from implementation of the hospital outpatient PPS for hospital outpatient services furnished on or after July 1, 2000, and the hospital outpatient provisions enacted by the BBRA 1999, are as follows:

| Fiscal year | Impact <br> (In millions of dollars) |
| :---: | :--- |
| 2000 ......................... | 490 |
| 2001 ........................ | 3,030 |

| Fiscal year | Impact (In millions of dollars) |
| :---: | :---: |
| 2002 | 3,520 |
| 2003 .................... | 4,230 |
| 2004 | 4,670 |

The primary objective of the hospital outpatient prospective payment system is to simplify the payment system and encourage hospital efficiency in providing outpatient services, while at the same time ensuring that payments are sufficient to compensate hospitals adequately for their legitimate costs. Another important goal of the new system is to reduce beneficiaries' share of outpatient payment to hospitals by freezing coinsurance amounts at an absolute level until they equal 20 percent of the total payment amounts.

We believe that implementation of the final PPS will ultimately further each of these goals while maintaining the financial viability of the hospital industry and ensuring access to high quality health care for Medicare beneficiaries. We expect that the provisions of this final rule with comment period will ensure that the outcomes of the PPS are reasonable and equitable while avoiding or minimizing unintended adverse consequences.

## D. Limitations of Our Analysis

The following quantitative analysis presents the projected effects of our policy changes resulting from comments, as well as statutory changes enacted by the BBRA 1999, on various hospital groups. We use the best data available. In addition, we do not make adjustments for future changes in such variables as volume and intensity. For this final rule with comment period, we are soliciting comments and information about the anticipated effects of the changes on hospitals resulting from implementation of the hospital outpatient provisions of the BBRA 1999, and our methodology for estimating them.

## E. Hospitals Included In and Excluded From the Prospective Payment System

The outpatient prospective payment system encompasses nearly all hospitals that participate in the Medicare program. However, Maryland hospitals that are paid under a cost containment waiver in accordance with section 1814(b)(3) of the Act are excluded from the PPS. Critical access hospitals (CAHs) are also excluded and are paid at cost under section $1834(\mathrm{~g})$ of the Act.
F. Quantitative Analysis of the Impact of Policy Changes on Payment Under the Hospital Outpatient PPS: Basis and Methodology of Estimates
We have analyzed the impact on hospital payment under the outpatient PPS. Our analysis compares the payment impact of PPS compared to current law. The definition and calculation of current law used in the impact analysis is the same used in estimating the conversion factor. That is, current law reflects pre-PPS payment methodologies in effect on January 1, 2000, and prior to July 1, 2000, which include the elimination of the formuladriven overpayment and application of the capital and operating cost reductions. A detailed explanation of the current law calculation can be found in section III.E.2.a.
The data used in developing the quantitative analyses presented below are taken from the CY 1996 cost and charge data and the most current provider-specific file that is used for payment purposes. Our analysis has several qualifications. First, we draw upon various sources for the data used to categorize hospitals in Table 2, below. In some cases, there is a degree of variation in the data from the different sources. We have attempted to construct these variables with the best available source overall. For individual hospitals, however, some miscategorizations are possible.
Using CY 1996 cost and charge data, we simulated payments using the prePPS and PPS payment methodologies. Although we used only singleprocedure/visit bills to determine APC relative payment weights, we used both single and multiple-procedure bills in the conversion factor and service mix calculations, regressions, and impact analyses. Both pre-PPS and PPS payment estimates include operating and capital costs, adjusted to the calendar year 1996 cost reporting period. We excluded Kaiser, New York Health and Hospital Corporation, and all-inclusive providers because reported charges on their cost reports are not actual charges. Cost-to-charge ratios for these hospitals are not comparable to all other hospitals. The excluded Maryland hospitals were not included in the calculation of the conversion factor and the simulations; however, we did include the 10 cancer hospitals that will be paid under the PPS.
We also trimmed outlier hospitals from the impact analysis because inclusion of hospitals with extremely high and low unit costs would not allow us to assess the impacts among the various classes of hospitals accurately.

First, we identified all of the outlier hospitals by using an edit of 3 standard deviations from the mean of the logged unit costs. Trimming the data in this manner ensures that only the hospitals with aberrantly high and low costs are eliminated from the impact analysis. In doing this, we removed 97 hospitals of which 41 hospitals had extremely low unit costs and 56 hospitals had extremely high unit costs. We conducted a thorough analysis of these hospitals to ensure that we did not remove any particular type of hospital (for example, teaching hospitals) that would further harm the integrity of the data. We speculate that many of these hospitals are not coding accurately, and we will continue to perform further analysis in this area following implementation of the PPS.

After we removed the 58 excluded Maryland hospitals, the all-inclusive rate hospitals, the statistical outlier hospitals, and hospitals for which we could not identify payment variables, we used the remaining 5,362 hospitals as the basis for our analysis. Table 2, Annual Impact of Outpatient Prospective Payment System in CY2000-CY2001, below, demonstrates the results of our analysis. The table categorizes hospitals by various geographic and special payment consideration groups to illustrate the varying impacts on different types of hospitals. The first column represents the number of hospitals in each category. The second column shows the hospitals' Medicare outpatient payments under the current (non-PPS) payment system as a percentage of the hospitals' total Medicare payment. The third and fourth columns show the impact of the PPS excluding the transitional corridor payments enacted by the BBRA 1999. Column three shows the percentage change in total Medicare outpatient payments comparing pre-PPS payments with payments under the PPS. The fourth column shows the change in total (outpatient and inpatient) Medicare payments resulting from implementation of the PPS for outpatient services. The fifth and sixth columns show the impact of the PPS including the transitional corridor payments enacted by the BBRA 1999. Column five shows the percentage change in Medicare outpatient payments comparing pre-PPS payments with payments under the PPS. Column six shows the change in total (outpatient and inpatient) Medicare payments resulting from implementation of the PPS for outpatient services.

The first row of Table 2 shows the overall impact on the 5,362 hospitals included in the analysis. We included
as much data as possible to the extent that we were able to capture all the provider information necessary to determine payment. Our estimates include the same set of services for both pre-PPS and PPS payments so that we could determine the impact of the PPS as accurately as possible. Because payment under the hospital outpatient PPS can only be determined if bills are accurately coded, the data upon which the impacts were developed do not reflect all CY 1996 hospital outpatient services, but only those that were coded using valid HCPCS codes.
The second row of Table 2 shows the overall impact of the PPS on the 4,828 hospitals that remain when we exclude psychiatric, long-term care, children's, and rehabilitation hospitals.

The next four rows of the table contain hospitals categorized according to their geographic location (all urban, which is subdivided into large urban and other urban, and rural). We include 2,665 hospitals located in urban areas (MSAs or NECMAs) in our analysis. Among these, 1,505 hospitals are located in large urban areas (populations over 1 million), and 1,160 hospitals are located in other urban areas (populations of 1 million or less). In addition, we include 2,160 hospitals located in rural areas in our analysis. The next two groupings are by bed-size categories, shown separately for urban and rural hospitals. The next category groups urban and rural hospitals by volume of outpatient services. We then show the distribution of urban and rural hospitals by regional census divisions.
The next three categories group hospitals according to whether or not they have residency programs (teaching hospitals that receive an indirect medical education (IME) adjustment), receive disproportionate share hospital (DSH) payments, or some combination of these two adjustments. In our analysis we show the impact of the PPS on the 3,738 nonteaching hospitals, the 821 teaching hospitals with fewer than 100 residents, and the 269 teaching hospitals with 100 or more residents.
In the DSH categories, hospitals are grouped according to their DSH payment status. The next category groups hospitals considered urban after geographic reclassification, in terms of whether they receive the IME adjustment, the DSH adjustment, both, or neither. The next five rows examine the impacts of the changes on rural hospitals by special payment groups (rural referral centers (RRCs), sole community hospitals/essential access community hospitals (SCHs/EACHs), Medicare dependent hospitals (MDHs), and hospitals that are both SCHs and

RRCs), as well as rural hospitals not receiving a special payment designation. The RRCs (164), SCH/EACHs (634), MDHs (358), and SCH and RRCs (56) shown here were not reclassified for purposes of the standardized amount.

The next grouping is based on type of ownership. These data are taken primarily from the FY 1996 Medicare cost report files, if available; otherwise, earlier cost report data are used.
The final two groups are specialty hospitals. The first set includes eye and ear hospitals, trauma hospitals (hospitals having a level one trauma center), and cancer hospitals, which are TEFRA hospitals. The last group lists all other TEFRA hospitals, specifically, rehabilitation, psychiatric, long-term care, and children's hospitals.
G. Estimated Impact of the New APC System (Includes Table 2, Annual Impact of Hospital Outpatient Prospective Payment System in CY2000-CY2001)
Column 3 compares our estimate of PPS payments without application of the BBRA 1999 transitional corridors, but incorporating policy changes and all other BBRA 1999 provisions contained in this final rule, to our estimate of payments under the current system. The percent differences shown in columns 3 and 4 between current and PPS payment (without the BBRA 1999 transitional corridors) reflect the impact of the BBRA 1999 outlier and pass-through payment adjustments and nonbudgetneutral hold-harmless provisions for cancer hospitals, as well as distributional differences attributable to variation in cost and charge structures among hospitals.
The percent changes in columns 5 and 6 are the result of comparing our estimate of PPS payments with application of the BBRA 1999 transitional corridors, as well as the statutory and policy changes contained in this final rule, to our estimate of payments under the pre-PPS system. Percent differences between the pre-PPS and the PPS payment (with the BBRA 1999 transition) reflect the combined impact of the transitional corridor adjustments, outlier and pass-through payment adjustments and the holdharmless provision for cancer hospitals, in addition to distributional differences attributable to variation in cost and charge structures among hospitals.
Basing the conversion factor on prePPS program and pre-PPS beneficiary payments and on budget-neutral outlier and pass-through adjustments results in no net change in payments to hospitals overall relative to pre-PPS payments. (As noted above, in section III.E. 2 of this
preamble, pursuant to section 201(l) of the BBRA 1999, we set the conversion factor by estimating pre-PPS rather than PPS copayments.) However, the BBRA hold-harmless provision for cancer hospitals results in a 0.2 percent increase in payments to hospitals overall because this provision is not budget neutral. Including the BBRA 1999 transitional corridor adjustments further increases payment to hospitals overall. We estimate that in calendar year 2000, payment will increase by an annual rate of 4.6 percent under the PPS compared to the pre-PPS payments.

Without the BBRA 1999 transitional corridor payments, the impact on shortterm acute care hospitals is negative for a substantial number of hospital classifications. That is, for certain groups of hospitals, payments under the PPS without the transitional corridor payments would be several percentage points below pre-PPS payments. For nearly all of these hospital groups, the BBRA 1999 transitional corridor payments mitigate this negative impact. In addition, hospital groups that experience net gains without the BBRA 1999 transitional corridor payments experience even greater gains with them. The reason is that even though the average impact for hospitals in these groups is positive, some individual hospitals experience net losses in payments and, thus, benefit from the transitional corridor payments. The hospital groups that gain without the transitional corridor payments receive even greater increases in payments with the transitional corridor payments. The following discussion highlights some of the changes in payments among hospital classifications.

Comparing the pre-PPS and PPS payment estimates, payment to lowvolume hospitals would decrease substantially without the BBRA 1999 transitional corridor payments (12.2 percent annually for rural and 7.7 percent annually for urban hospitals with fewer than 5,000 units of service). These hospitals experience a net gain with the BBRA 1999 transitional corridor payments ( 2.5 percent annually and 0.2 percent annually for lowvolume rural and urban hospitals, respectively), although these payment increases are relatively small compared to the 4.6 percent annual increase for hospitals overall. We believe several factors contribute to this outcome, including undercoding, lack of economies of scale, and the reliance on the median instead of the geometric mean in the calculation of APC weights. The majority of these hospitals (about 75 percent) are rural. For these small hospitals, some of the higher
standardized unit costs could be attributed to economies of scale. These low-volume rural hospitals also receive a greater percentage of their Medicare income (18.5 percent) from outpatient services than the national average (9.9 percent).
Major teaching hospitals, whose payments would decrease annually by 3.7 percentage points without the BBRA 1999 transitional corridor payments, gain 2.6 percent annually with the BBRA 1999 transitional corridor payments relative to pre-PPS payments. Major teaching hospitals receive less of their total Medicare income (9.1 percent) from outpatient services than the national average. This results in a 0.2 percent annual gain in their total Medicare payments. Minor teaching and nonteaching hospitals would experience marginal gains in outpatient payment without the BBRA 1999 transitional corridor payments. Payment to both hospital groups increases by 5.0 percent annually relative to the pre-PPS payment system.
Without the BBRA 1999 transitional corridor payments, hospitals with a high percentage of low-income patients (disproportionate share patient percentage greater than or equal to 0.35 ) would have a 2.5 percent annual decrease in payment relative to pre-PPS payments. But payments to these hospitals increase annually by 3.5 percent relative to pre-PPS payments with the BBRA 1999 transitional corridor payments. These hospitals have lower than average volume, and, like major teaching hospitals, receive a smaller than average percentage of their Medicare income from outpatient services. Thus, their total Medicare payments increase marginally, by 0.3 percent, with the BBRA 1999 transitional corridor payments.

Without the BBRA 1999 adjustments, payment to rural hospitals would decrease 1.8 percent annually and payment to large urban hospitals would decrease 0.3 percent annually, while payment to other urban hospitals would increase 1.8 percent annually relative to pre-PPS payments. These hospitals all experience net gains in PPS payment with the BBRA 1999 transitional corridor payments, at an annual rate of 4.4 percent, 4.3 percent, and 5.1 percent, respectively. Even though rural hospitals receive a greater percentage of their Medicare income (14.7 percent) from outpatient services compared to the national average, their total Medicare payments increase by only a fraction, 0.6 percent.
Negative impacts for urban hospitals in the Mid-Atlantic and the West North Central regions are also reversed under
the BBRA 1999 transitional corridor payments, changing from -3.4 percent to 2.4 percent on an annual basis, and from -3.5 percent to 2.5 percent on an annual basis, respectively. Similarly, rural hospitals in nearly all census regions experience net increases in payment relative to pre-PPS payments with the BBRA 1999 transitional corridor payments.
The impact on TEFRA hospitals is shown separately at the end of the table. The TEFRA hospitals were not included in determining the impact on any of the other categories discussed above (for example, geographic location, bed size, volume, etc.). These hospitals demonstrated a very low service mix, but an average unit cost that approximates the national average. We believe that undercoding or billing an all-inclusive rate could account for their low-volume, low-service mix, and average cost per unit. We expect that
once these hospitals begin to code services accurately under the PPS, payments will more closely approximate pre-PPS payments.
If the effect of the BBRA 1999 transition payments were removed, differences between pre-PPS payments and PPS payments among hospitals would still exist. These distributional differences are the result of many factors. First, cost variations among hospitals result in differences between pre-PPS payments and PPS payments, and charge structure variations result in differences between pre-PPS payments and PPS beneficiary copayment amounts. Hospitals whose costs are low relative to payment would gain under the PPS even without the BBRA 1999 transitional corridor payments. Because the transitional corridor payments are not budget neutral, these hospitals continue to gain relative to pre-PPS payments.

Redistributions may also occur as a result of current payment methods. Total Medicare outpatient payments are less than reported total costs because (in addition to the 5.8 and 10 percent reductions for operating and capital costs) the blended payment methods applicable to many surgical and diagnostic services often result in payments that are less than reported costs. Other services such as medical visits, chemotherapy services, and nonASC approved surgeries are paid based on hospital costs. The new system redistributes the current total Medicare payments, based in part on cost-based payments and in part on blended payment amounts, across all services. Hospitals, in the aggregate, will receive proportionately less for services that are currently paid based on costs, and more for services that had been paid under blended payment methods.

Table 2. Annual Impact Of Hospital Outpatient Prospective Payment System In CY2000-CY2001

|  | Number of hospitals <br> (1) | Outpatient percent(2) | Excluding BBRA transitional corridors ${ }^{1}$ |  | Including BBRA transitional corridors |  |

[^122]
## X. Federalism

We have examined this rule in accordance with Executive Order 13132, Federalism, and have determined that this final rule will not have any negative impact on the rights, roles, and responsibilities of State, local or Tribal governments.

## XI. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the Federal Register and invite public comment on the proposed rule. The notice of proposed rulemaking includes a reference to the legal authority under which the rule is proposed, and the terms and substance of the proposed rule or a description of the subjects and issues involved. This procedure can be waived, however, if an agency finds good cause that a notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest, and incorporates a statement of the finding and its reasons in the rule. We find that the circumstances surrounding this rule make it impracticable to pursue a process of notice-and-comment rulemaking before the provisions of this rule take effect.
The BBRA 1999 was enacted on November 29, 1999. This final rule incorporates the following hospital outpatient PPS provisions in the BBRA 1999: outlier adjustment for high cost cases; transitional pass-through payment adjustments for additional costs (over the payments for APCs otherwise made) for new medical devices, drugs, and biologicals; definition of APCs so that the variation of costs of items within an APC is subject to certain limits; establishment of "transitional corridors" for the first $3^{1 / 2}$ years of the new system that limit losses hospitals might otherwise face; payment for implantable devices under the hospital outpatient PPS, rather than under the Durable Medical Equipment Fee Schedule; limitation of the copayment on an outpatient procedure to the amount of the inpatient hospital deductible; requirement to review annually the APC groups, relative weights, and wage and other adjustments; and calculation of the conversion factor in a budget-neutral manner, eliminating the 5.7 percent reduction indicated in the proposed rule.
As discussed earlier in this rule, July 1,2000 is the earliest date on which we can feasibly implement the PPS. The provisions of the BBRA 1999, enacted on November 29, 1999, made numerous refinements to the PPS. With respect to the BBRA 1999 provisions, it would
have been impracticable to complete notice and comment procedures by July 1, 2000. Given the limited timeframe, given the nature and scope of the BBRA 1999 refinements, and given the time required to complete notice and comment rulemaking (to develop proposed policies, draft the proposed rule, provide a 60 -day public comment period, consider public comments, develop final policies, draft a final rule), it would not have been possible to issue this document as a proposed rule and issue a final rule by July 1.

In addition, it would not be feasible to implement the hospital outpatient PPS without the BBRA 1999 provisions, not only because of the nature of the BBRA 1999 provisions, but also because section 201(m) of the BBRA 1999 states: "Except as provided in this section, the amendments made by this section shall be effective as if included in the enactment of BBA." Therefore, if we undertook prior notice and comment procedures with respect to the BBRA 1999 provisions, then (because such procedures could not be completed by July 1, 2000) the PPS would not be implemented by July 1, 2000.

Accordingly, we find good cause to waive the procedures for prior notice and comment with respect to the provisions of this document that implement the BBRA 1999 refinements to hospital outpatient PPS. We are providing a 60-day period for public comment with respect to the provisions of this final rule with comment period that implement the BBRA refinements. We are not accepting comments with respect to the other aspects of this document (for which the public has already had an extensive opportunity to comment).

## List of Subjects

42 CFR Part 409
Health facilities, Medicare.

## 42 CFR Part 410

Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Rural areas, X-rays.

## 42 CFR Part 411

Kidney diseases, Medicare, Reporting and recordkeeping requirements.

## 42 CFR Part 412

Administrative practice and procedure, Health facilities, Medicare, Puerto Rico, Reporting and recordkeeping requirements.

## 42 CFR Part 413

Health facilities, Kidney diseases, Medicare, Puerto Rico, Reporting and recordkeeping requirements.

## 42 CFR Part 419

Health facilities, Hospitals, Medicare.

## 42 CFR Part 424

Emergency medical services, Health facilities, Health professions, Medicare.

## 42 CFR Part 489

Health facilities, Medicare, Reporting and recordkeeping requirements.

## 42 CFR Part 498

Administrative practice and procedure, Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

## 42 CFR Part 1003

Administrative practice and procedure, Archives and records, Grant program-social programs, Maternal and Child Health, Medicaid, Medicare, Penalties.
For the reasons set forth in the preamble, 42 CFR chapter IV is amended as follows:

## PART 409—HOSPITAL INSURANCE BENEFITS

A. Part 409 is amended as set forth below:

1. The authority citation for part 409 continues to read as follows:
Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

## Subpart B-Inpatient Hospital Services and Inpatient Critical Access Hospital Services

2. In § 409.10, paragraph (b) is revised to read as follows:

## §409.10 Included services.

(b) Inpatient hospital services does not include the following types of services:
(1) Posthospital SNF care, as described in $\S 409.20$, furnished by a hospital or a critical access hospital that has a swing-bed approval.
(2) Nursing facility services, described in §440.155 of this chapter, that may be furnished as a Medicaid service under title XIX of the Act in a swing-bed hospital that has an approval to furnish nursing facility services.
(3) Physician services that meet the requirements of $\S 415.102(\mathrm{a})$ of this chapter for payment on a fee schedule basis.
(4) Physician assistant services, as defined in section 1861(s)(2)(K)(i) of the Act.
(5) Nurse practitioner and clinical nurse specialist services, as defined in section 1861(s)(2)(K)(ii) of the Act.
(6) Certified nurse mid-wife services, as defined in section $1861(\mathrm{gg})$ of the Act.
(7) Qualified psychologist services, as defined in section 1861(ii) of the Act.
(8) Services of an anesthetist, as defined in § 410.69 of this chapter.

## PART 410-SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

B. Part 410 is amended as set forth below:

1. The authority citation for part 410 continues to read as follows:
Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

## Subpart A-General Provisions

2. In §410.2, the introductory text is republished, the definition of
"Community mental health center (CMHC)" is revised, and the definitions of "Encounter" and "Outpatient" are added in alphabetical order to read as follows:

## §410.2 Definitions.

As used in this part-
Community mental health center (CMHC) means an entity that-
(1) Provides outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically mentally ill, and residents of its mental health service area who have been discharged from inpatient treatment at a mental health facility;
(2) Provides 24-hour-a-day emergency care services;
(3) Provides day treatment or other partial hospitalization services, or psychosocial rehabilitation services;
(4) Provides screening for patients being considered for admission to State mental health facilities to determine the appropriateness of this admission; and
(5) Meets applicable licensing or certification requirements for CMHCs in the State in which it is located.
Encounter means a direct personal contact between a patient and a physician, or other person who is authorized by State licensure law and, if applicable, by hospital or CAH staff bylaws, to order or furnish hospital services for diagnosis or treatment of the patient.

Outpatient means a person who has not been admitted as an inpatient but who is registered on the hospital or CAH records as an outpatient and receives services (rather than supplies
alone) directly from the hospital or CAH.

## Subpart B-Medical and Other Health Services

3. In §410.27:
A. The section heading is revised;
B. The introductory text to paragraph
(a) is revised;
C. The introductory text to paragraph (a)(1) is republished;
D. The word "and" at the end of paragraph (a)(1)(i) is removed; and
E. New paragraphs (a)(1)(iii), (e), and (f) are added to read as follows:
§410.27 Outpatient hospital services and supplies incident to a physician service: Conditions.
(a) Medicare Part B pays for hospital services and supplies furnished incident to a physician service to outpatients, including drugs and biologicals that cannot be self-administered, if-
(1) They are furnished-
(iii) In the hospital or at a location (other than an RHC or an FQHC) that HCFA designates as a department of a provider under § 413.65 of this chapter; and
(e) Services furnished by an entity other than the hospital are subject to the limitations specified in §410.42(a).
(f) Services furnished at a location (other than an RHC or an FQHC) that HCFA designates as a department of a provider under $\S 413.65$ of this chapter must be under the direct supervision of a physician. "Direct supervision" means the physician must be present and on the premises of the location and immediately available to furnish assistance and direction throughout the performance of the procedure. It does not mean that the physician must be present in the room when the procedure is performed.
4. In §410.28, paragraph (a)(4) is removed, paragraph (c) is redesignated as paragraph (d), and new paragraphs (c) and (e) are added to read as follows:
§410.28 Hospital or CAH diagnostic services furnished to outpatients: Conditions.
(c) Diagnostic services furnished by an entity other than the hospital or CAH are subject to the limitations specified in §410.42(a).
(e) Medicare Part B makes payment under section 1833(t) of the Act for diagnostic services furnished at a facility (other than an RHC or an FQHC)
that HCFA designates as having provider-based status only when the diagnostic services are furnished under the appropriate level of physician supervision specified by HCFA in accordance with the definitions in $\S 410.32(\mathrm{~b})(3)(\mathrm{i})$, (b)(3)(ii), and (b)(3)(iii). Under general supervision at a facility accorded provider-based status, the training of the nonphysician personnel who actually perform the diagnostic procedure and the maintenance of the necessary equipment and supplies are the continuing responsibility of the facility.
5. A new $\S 410.42$ is added to read as follows:

## §410.42 Limitations on coverage of

 certain services furnished to hospital outpatients.(a) General rule. Except as provided in paragraph (b) of this section, Medicare Part B does not pay for any item or service that is furnished to a hospital outpatient (as defined in § 410.2) during an encounter (as defined in $\S 410.2$ ) by an entity other than the hospital unless the hospital has an arrangement (as defined in $\S 409.3$ of this chapter) with that entity to furnish that particular service to its patients. As used in this paragraph, the term "hospital" includes a CAH.
(b) Exception. The limitations stated in paragraph (a) of this section do not apply to the following services:
(1) Physician services that meet the requirements of $\S 415.102$ (a) of this chapter for payment on a fee schedule basis.
(2) Physician assistant services, as defined in section 1861(s)(2)(K)(i) of the Act.
(3) Nurse practitioner and clinical nurse specialist services, as defined in section 1861(s)(2)(K)(ii) of the Act.
(4) Certified nurse mid-wife services, as defined in section $1861(\mathrm{gg})$ of the Act.
(5) Qualified psychologist services, as defined in section 1861(ii) of the Act.
(6) Services of an anesthetist, as defined in §410.69.
(7) Services furnished to SNF residents as defined in $\S 411.15(\mathrm{p})$ of this chapter.
6. In § 410.43, paragraph (b) is revised to read as follows:

## §410.43 Partial hospitalization services: Conditions and exclusions.

(b) The following services are separately covered and not paid as partial hospitalization services:
(1) Physician services that meet the requirements of §415.102(a) of this chapter for payment on a fee schedule basis.
(2) Physician assistant services, as defined in section 1861(s)(2)(K)(i) of the Act.
(3) Nurse practitioner and clinical nurse specialist services, as defined in section 1861(s)(2)(K)(ii) of the Act.
(4) Qualified psychologist services, as defined in section 1861(ii) of the Act.
(5) Services furnished to SNF residents as defined in §411.15(p) of this chapter.

## PART 411-EXCLUSIONS FROM MEDICARE AND LIMITATIONS ON MEDICARE PAYMENT

C. Part 411 is amended as set forth below:

1. The authority citation for part 411 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

## Subpart A-General Exclusions and Exclusion of Particular Services

## 2. In § 411.15:

A. The introductory text is republished;
B. The section heading to paragraph $(\mathrm{m})$ is revised;
C. Paragraph (m)(1) is revised;
D. Paragraph (m)(2) is redesignated as paragraph (m)(3);
E. The introductory text to newly redesignated paragraph (m)(3) is republished;
F. Newly redesignated paragraphs $(\mathrm{m})(3)(\mathrm{iii}),(\mathrm{m})(3)(\mathrm{iv})$, and (m)(3)(v) are redesignated as paragraphs (m)(3)(iv), $(\mathrm{m})(3)(\mathrm{v})$, and (m)(3)(vi), respectively; and
G. New paragraphs (m)(2) and (m)(3)(iii) are added to read as follows:
§411.15 Particular services excluded from coverage.
The following services are excluded from coverage:
(m) Services to hospital patients-(1) Basic rule. Except as provided in paragraph (m)(3) of this section, any service furnished to an inpatient of a hospital or to a hospital outpatient (as defined in § 410.2 of this chapter) during an encounter (as defined in $\S 410.2$ of this chapter) by an entity other than the hospital unless the hospital has an arrangement (as defined in § 409.3 of this chapter) with that entity to furnish that particular service to the hospital's patients. As used in this paragraph (m)(1), the term
"hospital" includes a CAH.
(2) Scope of exclusion. Services subject to exclusion from coverage under the provisions of this paragraph
(m) include, but are not limited to, clinical laboratory services; pacemakers and other prostheses and prosthetic devices (other than dental) that replace all or part of an internal body organ (for example, intraocular lenses); artificial limbs, knees, and hips; equipment and supplies covered under the prosthetic device benefits; and services incident to a physician service.
(3) Exceptions. The following services are not excluded from coverage:
(iii) Nurse practitioner and clinical nurse specialist services, as defined in section 1861(s)(2)(K)(ii) of the Act.

## PART 412—PROSPECTIVE PAYMENT SYSTEMS FOR INPATIENT HOSPITAL SERVICES

D. Part 412 is amended as set forth below:

1. The authority citation for part 412 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

## Subpart C-Conditions for Payment Under the Prospective Payment Systems for Inpatient Operating Costs and Inpatient Capital-Related Costs

2. In §412.50, paragraphs (a) and (b) are revised to read as follows:
§412.50 Furnishing of inpatient hospital services directly or under arrangements.
(a) The applicable payments made under the prospective payment systems, as described in subparts H and M of this part, are payment in full for all inpatient hospital services, as defined in $\S 409.10$ of this chapter. Inpatient hospital services do not include the following types of services:
(1) Physician services that meet the requirements of $\S 415.102$ (a) of this chapter for payment on a fee schedule basis.
(2) Physician assistant services, as defined in section 1861(s)(2)(K)(i) of the Act.
(3) Nurse practitioner and clinical nurse specialist services, as defined in section 1861(s)(2)(K)(ii) of the Act.
(4) Certified nurse mid-wife services, as defined in section $1861(\mathrm{gg})$ of the Act.
(5) Qualified psychologist services, as defined in section 1861 (ii) of the Act.
(6) Services of an anesthetist, as defined in $\S 410.69$ of this chapter.
(b) HCFA does not pay any provider or supplier other than the hospital for services furnished to a beneficiary who is an inpatient, except for the services
described in paragraphs (a)(1) through (a)(6) of this section.

## PART 413-PRINCIPLES OF REASONABLE COST REIMBURSEMENT; PAYMENT FOR END-STAGE RENAL DISEASE SERVICES; PROSPECTIVELY DETERMINED PAYMENT RATES FOR SKILLED NURSING FACILITIES

E. Part 413 is amended as set forth below:

1. The authority citation for part 413 continues to read as follows:
Authority: Secs. 1102, 1812(d), 1814(b), 1815, 1833(a), (i), and (n), 1871, 1881, 1883, and 1886 of the Social Security Act ( 42 U.S.C. 1302, 1395f(b), 1395g, 13951, 13951(a), (i), and (n), 1395x(v), 1395hh, 1395rr, 1395tt, and 1395 ww ).

## Subpart A—Introduction and General Rules

## §413.1 [Amended]

2. In §413.1, paragraph (a)(2)(viii) is removed.

## Subpart B—Accounting Records and Reports

3. In $\S 413.24$, the heading to paragraph (d) is republished, and a new paragraph (d)(6) is added to read as follows:

## §413.24 Adequate cost data and cost

 finding.(d) Cost finding methods. * * *
(6) Management contracts. (i) If the main provider purchases services for a department of the provider or a provider-based entity through a management contract or otherwise directly assigns costs to the department or entity, the like costs of the main provider must be carved out to ensure that they are not allocated to the department of the provider or providerbased entity. However, if the like costs of the main provider cannot be separately identified, the costs of the services purchased through a management contract must be included in the main provider's administrative and general costs and allocated among the provider's overall statistics.
(ii) Costs of free-standing entities may not be shown in the provider's trial balance for purposes of stepping down overhead costs to these entities. The provider must develop detailed work papers showing the exact cost of the services (including overhead) provided to or by the free-standing entity and show those carved out costs as
nonreimbursable cost centers in the provider's trial balance.

## Subpart E-Payments to Providers

4. A new $\S 413.65$ is added to read as follows:
§413.65 Requirements for a determination that a facility or an organization has provider-based status.
(a) Scope and definitions. (1) Scope. This section applies to all facilities or organizations for which provider-based status is sought, including remote locations of hospitals, as defined in paragraph (a)(2) of this section and satellite facilities as defined in $\S 412.22(\mathrm{~h})(1)$ and $\S 412.25(\mathrm{e})(1)$ of this chapter, other than ESRD facilities. Determinations for ESRD facilities are made under § 413.174 of this chapter.
(2) Definitions. In this subpart E, unless the context indicates otherwise-

Campus means the physical area immediately adjacent to the provider's main buildings, other areas and structures that are not strictly contiguous to the main buildings but are located within 250 yards of the main buildings, and any other areas determined on an individual case basis, by the HCFA regional office, to be part of the provider's campus.
Department of a provider means a facility or organization or a physician office that is either created by, or acquired by, a main provider for the purpose of furnishing health care services of the same type as those furnished by the main provider under the name, ownership, and financial and administrative control of the main provider, in accordance with the provisions of this section. A department of a provider may not be licensed to provide health care services in its own right, may not by itself be qualified to participate in Medicare as a provider under $\S 489.2$ of this chapter, and Medicare conditions of participation do not apply to a department as an independent entity. For purposes of this part, the term "department of a provider" does not include an RHC or, except as specified in paragraph (m)(1) of this section, an FQHC.
Free-standing facility means an entity that furnishes health care services to Medicare beneficiaries and that is not integrated with any other entity as a main provider, a department of a provider, remote location of a hospital, satellite facility, or a provider-based entity.
Main provider means a provider that either creates, or acquires ownership of, another entity to deliver additional
health care services under its name, ownership, and financial and administrative control.

Provider-based entity means a provider of health care services, or an RHC or an FQHC as defined in $\S 405.2401$ (b) of this chapter, that is either created by, or acquired by, a main provider for the purpose of furnishing health care services of a different type from those of the main provider under the name, ownership, and administrative and financial control of the main provider, in accordance with the provisions of this section.

Provider-based status means the relationship between a main provider and a provider-based entity or a department of a provider, remote location of a hospital, or satellite facility, that complies with the provisions of this section.

Remote location of a hospital means a facility or an organization that is either created by, or acquired by, a hospital that is a main provider for the purpose of furnishing inpatient hospital services under the name, ownership, and financial and administrative control of the main provider, in accordance with the provisions of this section. A remote location of a hospital may not be licensed to provide inpatient hospital services in its own right, and Medicare conditions of participation do not apply to a remote location of a hospital as an independent entity. For purposes of this part, the term "remote location of a hospital" does not include a satellite facility as defined in § 412.22(h)(1) and § $412.25(\mathrm{e})(1)$ of this chapter.
(b) Responsibility for obtaining provider-based determinations. (1) A facility or organization is not entitled to be treated as provider-based simply because it or the main provider believe it is provider-based.
(2) A main provider or a facility or organization must contact HCFA and the facility or organization must be determined by HCFA to be providerbased before the main provider bills for services of the facility or organization as if the facility or organization were provider-based, or before it includes costs of those services on its cost report.
(3) A facility that is not located on the campus of a hospital and is used as a site of physician services of the kind ordinarily furnished in physician offices will be presumed to be a free-standing facility, unless it is determined by HCFA to have provider-based status.
(c) Reporting. (1) A main provider that creates or acquires a facility or organization for which it wishes to claim provider-based status, including any physician offices that a hospital wishes to operate as a hospital
outpatient department or clinic, must report its acquisition of the facility or organization to HCFA if the facility or organization is located off the campus of the provider, or inclusion of the costs of the facility or organization in the provider's cost report would increase the total costs on the provider's cost report by at least 5 percent, and must furnish all information needed for a determination as to whether the facility or organization meets the requirements in paragraph (d) of this section for provider-based status.
(2) A main provider that has had one or more facilities or organizations considered provider-based also must report to HCFA any material change in the relationship between it and any provider-based facility or organization, such as a change in ownership of the facility or organization or entry into a new or different management contract that could affect the provider-based status of the facility or organization.
(d) Requirements. An entity must meet all of the following requirements to be determined by HCFA to have provider-based status.
(1) Licensure. The department of the provider, remote location of a hospital, or satellite facility and the main provider are operated under the same license, except in areas where the State requires a separate license for the department of the provider, remote location of a hospital, or satellite facility, or in States where State law does not permit licensure of the provider and the prospective department of the provider, remote location of a hospital, or satellite facility under a single license. If a State health facilities' cost review commission or other agency that has authority to regulate the rates charged by hospitals or other providers in a State finds that a particular facility or organization is not part of a provider, HCFA will determine that the facility or organization does not have providerbased status.
(2) Operation under the ownership and control of the main provider. The facility or organization seeking provider-based status is operated under the ownership and control of the main provider, as evidenced by the following:
(i) The business enterprise that constitutes the facility or organization is 100 percent owned by the provider.
(ii) The main provider and the facility or organization seeking status as a department of the provider, remote location of a hospital, or satellite facility have the same governing body.
(iii) The facility or organization is operated under the same organizational documents as the main provider. For
example, the facility or organization seeking provider-based status must be subject to common bylaws and operating decisions of the governing body of the provider where it is based.
(iv) The main provider has final responsibility for administrative decisions, final approval for contracts with outside parties, final approval for personnel actions, final responsibility for personnel policies (such as fringe benefits/code of conduct), and final approval for medical staff appointments in the facility or organization.
(3) Administration and supervision. The reporting relationship between the facility or organization seeking provider-based status and the main provider must have the same frequency, intensity, and level of accountability that exists in the relationship between the main provider and one of its departments, as evidenced by compliance with all of the following requirements:
(i) The facility or organization is under the direct supervision of the main provider.
(ii) The facility or organization is operated under the same monitoring and oversight by the provider as any other department of the provider, and is operated just as any other department of the provider with regard to supervision and accountability. The facility or organization director or individual responsible for daily operations at the entity-
(A) Maintains a reporting relationship with a manager at the main provider that has the same frequency, intensity, and level of accountability that exists in the relationship between the main provider and its departments; and
(B) Is accountable to the governing body of the main provider, in the same manner as any department head of the provider.
(iii) The following administrative functions of the facility or organization are integrated with those of the provider where the facility or organization is based: billing services, records, human resources, payroll, employee benefit package, salary structure, and purchasing services. Either the same employees or group of employees handle these administrative functions for the facility or organization and the main provider, or the administrative functions for both the facility or organization and the entity are-
(A) Contracted out under the same contract agreement; or
(B) Handled under different contract agreements, with the contract of the facility or organization being managed by the main provider.
(4) Clinical services. The clinical services of the facility or organization seeking provider-based status and the main provider are integrated as evidenced by the following:
(i) Professional staff of the facility or organization have clinical privileges at the main provider.
(ii) The main provider maintains the same monitoring and oversight of the facility or organization as it does for any other department of the provider.
(iii) The medical director of the facility or organization seeking provider-based status maintains a reporting relationship with the Chief Medical Officer or other similar official of the main provider that has the same frequency, intensity, and level of accountability that exists in the relationship between the medical director of a department of the main provider and the Chief Medical Officer or other similar official of the main provider, and is under the same type of supervision and accountability as any other director, medical or otherwise, of the main provider.
(iv) Medical staff committees or other professional committees at the main provider are responsible for medical activities in the facility or organization including quality assurance, utilization review, and the coordination and integration of services, to the extent practicable, between the facility or organization seeking provider-based status and the main provider.
(v) Medical records for patients treated in the facility or organization are integrated into a unified retrieval system (or cross reference) of the main provider.
(vi) Inpatient and outpatient services of the facility or organization and the main provider are integrated, and patients treated at the facility or organization who require further care have full access to all services of the main provider and are referred where appropriate to the corresponding inpatient or outpatient department or service of the main provider.
(5) Financial integration. The financial operations of the facility or organization are fully integrated within the financial system of the main provider, as evidenced by shared income and expenses between the main provider and the facility or organization. The costs of the facility or organization are reported in a cost center of the provider, and the financial status of the facility or organization is incorporated and readily identified in the main provider's trial balance.
(6) Public awareness. The facility or organization seeking status as a department of a provider, remote
location of a hospital, or satellite facility is held out to the public and other payers as part of the main provider. When patients enter the provider-based facility or organization, they are aware that they are entering the main provider and are billed accordingly.
(7) Location in immediate vicinity. The facility or organization and the main provider are located on the same campus, except where the following requirements are met:
(i) The facility or organization demonstrates a high level of integration with the main provider by showing that it meets all of the other provider-based criteria, and demonstrates that it serves the same patient population as the main provider, by submitting records showing that, during the 12 -month period immediately preceding the first day of the month in which the application for provider-based status is filed with HCFA, and for each subsequent 12month period-
(A) At least 75 percent of the patients served by the facility or organization reside in the same zip code areas as at least 75 percent of the patients served by the main provider;
(B) At least 75 percent of the patients served by the facility or organization who required the type of care furnished by the main provider received that care from that provider (for example, at least 75 percent of the patients of an RHC seeking provider-based status received inpatient hospital services from the hospital that is the main provider); or
(C) If the facility or organization is unable to meet the criteria in paragraph $(d)(7)(i)(A)$ or $(d)(7)(i)(B)$ of this section because it was not in operation during all of the 12-month period described in the previous sentence, the facility or organization is located in a zip code area included among those that, during all of the 12-month period described in the previous sentence, accounted for at least 75 percent of the patients served by the main provider.
(ii) A facility or organization is not considered to be in the "immediate vicinity" of the main provider unless the facility or organization and the main provider are located in the same State or, where consistent with the laws of both States, adjacent States.
(iii) A rural health clinic that is otherwise qualified as a provider-based entity of a hospital that is located in a rural area, as defined in $\S 412.62(\mathrm{f})(1)$ (iii) of this chapter, and has fewer than 50 beds, as determined under §412.105(b) of this chapter, is not subject to the criterion in this paragraph (d)(7).
(e) Provider-based status not applicable to joint ventures. A facility or
organization cannot be considered provider-based if the entity is owned by two or more providers engaged in a joint venture. For example, where a hospital has jointly purchased or jointly created free-standing facilities under joint venture arrangements, neither party to the joint venture arrangement can claim the free-standing facility as a providerbased entity.
(f) Management contracts. Facilities and organizations that otherwise meet the requirements of paragraph (d) of this section, but are operated under management contracts, must also meet all of the following criteria:
(1) The staff of the facility or organization, other than management staff, are employed by the provider or by another organization, other than the management company, which also employs the staff of the main provider.
(2) The administrative functions of the facility or organization are integrated with those of the main provider, as determined under criteria in paragraph (d)(3)(iii) of this section.
(3) The main provider has significant control over the operations of the facility or organization as determined under criteria in paragraph (b)(3)(ii) of this section.
(4) The management contract is held by the main provider itself, not by a parent organization that has control over both the main provider and the facility or organization.
(g) Obligations of hospital outpatient departments and hospital-based entities. (1) Hospital outpatient departments located either on or off the campus of the hospital that is the main provider must comply with the antidumping rules in §§ 489.20(l), (m), (q), and (r) and $\S 489.24$ of this chapter. If any individual comes to any hospitalbased entity (including an RHC) located on the main hospital campus, and a request is made on the individual's behalf for examination or treatment of a medical condition, as described in $\S 489.24$ of this chapter, the hospital must comply with the anti-dumping rules in $\S 489.24$ of this chapter.
(2) Physician services furnished in hospital outpatient departments or hospital-based entities (other than RHCs) must be billed with the correct site-of-service indicator, so that applicable site-of-service reductions to physician and practitioner payment amounts can be applied.
(3) Hospital outpatient departments must comply with all the terms of the hospital's provider agreement.
(4) Physicians who work in hospital outpatient departments or hospitalbased entities are obligated to comply
with the non-discrimination provisions in $\S 489.10(\mathrm{~b})$ of this chapter.
(5) Hospital outpatient departments (other than RHCs) must treat all Medicare patients, for billing purposes, as hospital outpatients. The department must not treat some Medicare patients as hospital outpatients and others as physician office patients.
(6) In the case of a patient admitted to the hospital as an inpatient after receiving treatment in the hospital outpatient department or hospital-based entity, payments for services in the hospital outpatient department or hospital-based entity are subject to the payment window provisions applicable to PPS hospitals and to hospitals and units excluded from PPS set forth at §412.2(c)(5) of this chapter and at $\S 413.40(\mathrm{c})(2)$, respectively.
(7) When a Medicare beneficiary is treated in a hospital outpatient department or hospital-based entity (other than an RHC) that is not located on the main provider's campus, the hospital has a duty to provide written notice to the beneficiary, prior to the delivery of services, of the amount of the beneficiary's potential financial liability (that is, of the fact that the beneficiary will incur a coinsurance liability for an outpatient visit to the hospital as well as for the physician service, and of the amount of that liability). The notice must be one that the beneficiary can read and understand. If the beneficiary is unconscious, under great duress, or for any other reason unable to read a written notice and understand and act on his or her own rights, the notice must be provided, prior to the delivery of services, to the beneficiary's authorized representative.
(8) Hospital outpatient departments must meet applicable hospital health and safety rules for Medicareparticipating hospitals in part 482 of this chapter.
(h) Furnishing all services under arrangement. A facility or organization may not qualify for provider-based status if all patient care services furnished at the facility are furnished under arrangement.
(i) Inappropriate treatment of a facility or organization as providerbased. (1) Determination and review. If HCFA learns that a provider has treated a facility or organization as providerbased and the provider had not obtained a determination of provider-based status under this section, HCFA will-
(i) Review current payments and, if necessary, take action in accordance with the rules on inappropriate billing in paragraph ( j ) of this section;
(ii) Investigate and determine whether the requirements in paragraph (d) of this section (or, for periods prior to October 10,2000 , the requirements in applicable program instructions) were met; and
(iii) Review all previous payments to that provider for all cost reporting periods subject to re-opening in accordance with § 405.1885 and $\S 405.1889$ of this chapter.
(2) Recovery of overpayments. If HCFA finds that payments for services at the facility or organization have been made as if the facility or organization were provider-based, even though HCFA had not previously determined that the facility or organization qualified for provider-based status, HCFA will recover the difference between the amount of payments that actually were made and the amount of payments that HCFA estimates should have been made in the absence of a determination of provider-based status, except that recovery will not be made for any period prior to October 10, 2000 if during all of that period the management of the entity made a good faith effort to operate it as a providerbased facility or organization, as described in paragraph (h)(3) of this section.
(3) Exception for good faith effort. HCFA determines that the management of a facility or organization has made a good faith effort to operate it as a provider-based entity if-
(i) The requirements regarding licensure and public awareness in paragraphs $(\mathrm{d})(1)$ and $(\mathrm{d})(6)$ of this section are met;
(ii) All facility services were billed as if they had been furnished by a department of a provider, remote location of a hospital, satellite facility, or a provider-based entity of the main provider; and
(iii) All professional services of physicians and other practitioners were billed with the correct site-of-service indicator, as described in paragraph $(\mathrm{g})(2)$ of this section.
(j) Inappropriate billing. If HCFA finds that a facility or organization is being treated as provider-based without having obtained a determination of provider-based status under this section, HCFA will notify the provider, adjust future payments, review previous payments, determine whether the facility or organization qualifies for provider-based status under this paragraph, and continue payments only under specific conditions, as described in paragraphs (j)(1), (j)(2), (j)(3), and (j)(4) of this section.
(1) Notice to provider. If HCFA finds that inappropriate billing has occurred or is occurring since no provider-based
determination has been made by HCFA, HCFA will issue written notice to the provider that payments for past cost reporting periods may be reviewed and recovered as described in paragraph (i) of this section, that future payments for services in or of the facility or organization will be adjusted as described in paragraph $(\mathrm{j})(2)$ of this section, and that a determination of provider-based status will be made.
(2) Adjustment of payments. If HCFA finds that inappropriate billing has occurred or is occurring since no provider-based determination has been made by HCFA, HCFA will adjust future payments to the provider, the facility or organization, or both, to approximate as closely as possible the amounts that would be paid, in the absence of a provider-based determination, if all other requirements for billing were met.
(3) Review of previous payments. If HCFA finds that inappropriate billing has occurred or is occurring since no provider-based determination has been made by HCFA, HCFA will review previous payments and, if necessary, take action in accordance with the rules on inappropriate treatment of a facility or organization as provider-based in paragraph (h) of this section.
(4) Determination regarding providerbased status. If HCFA finds that inappropriate billing has occurred or is occurring since no provider-based determination has been made by HCFA, HCFA will determine whether the facility or organization qualifies for provider-based status under the criteria in this section. If HCFA determines that the facility or organization qualifies for provider-based status, future payment for services at or by the facility or organization will be adjusted to reflect that determination. If HCFA determines that the facility or organization does not qualify for provider-based status, future payment for services at or by the facility or organization will be made only in accordance with the rules in paragraph (i)(5) of this section.
(5) Continuation of payment. The notice of denial of provider-based status sent to the provider will ask the provider to notify HCFA in writing, within 30 days of the date the notice is issued, of whether the facility or organization (or, where applicable, the practitioners who staff the facility or organization) will be seeking to enroll and meet other requirements to bill for services in a free-standing facility. If the provider indicates that the facility, organization, or practitioners will not be seeking to enroll, or if HCFA does not receive a response within 30 days of the date the notice was issued, all payment under this paragraph (i)(5) will end as
of the 30th day after the date of notice. If the provider indicates that the facility or organization, or its practitioners, will be seeking to meet enrollment and other requirements for billing for services in a free-standing facility, payment for services of the facility or organization will continue, at the adjusted amounts described in paragraph $(\mathrm{j})(2)$ of this section for as long as is required for all billing requirements to be met (but not longer than 6 months) if the facility or organization, or its practitioners, submit a complete enrollment application and provide all other required information within 90 days after the date of notice; and the facility or organization, or its practitioners, furnish all other information needed by HCFA to process the enrollment application and verify that other billing requirements are met. If the necessary applications or information are not provided, HCFA will terminate all payment to the provider, facility, or organization as of the date HCFA issues notice that necessary applications or information have not been submitted.
(k) Correction of errors. HCFA may review a past determination of providerbased status for a facility or organization or may review the status of a facility or organization (that is, whether the facility or organization is providerbased) if no determination regarding provider-based status has previously been made, if HCFA believes that status may be inappropriate, based on the provisions of this section. If HCFA determines that a previous determination was in error, and the entity should not be considered provider-based, HCFA notifies the main provider. Treatment of the facility or organization as provider-based ceases with the first day of the next cost report period following notification of the redetermination, but not less than 6 months after the date of notification.
(1) Status of Indian Health Service and Tribal facilities and organizations. Facilities and organizations operated by the Indian Health Service or Tribes will be considered to be departments of hospitals operated by the Indian Health Service or Tribes if, on or before April 7, 2000, they furnished only services that were billed as if they had been furnished by a department of a hospital operated by the Indian Health Service or a Tribe and they are:
(1) Owned and operated by the Indian Health Service;
(2) Owned by the Tribe but leased from the Tribe by the IHS under the Indian Self-Determination Act (Pub. L. 93-638) in accordance with applicable regulations and policies of the Indian

Health Service in consultation with Tribes: or
(3) Owned by the Indian Health Service but leased and operated by the Tribe under the Indian Self-
Determination Act (Pub. L. 93-638) in accordance with applicable regulations and policies of the Indian Health Service in consultation with Tribes.
(m) FQHCs and "look-alikes". A facility that has, since April 7, 1995, furnished only services that were billed as if they had been furnished by a department of a provider will continue to be treated, for purposes of this section, as a department of the provider without regard to whether it complies with the criteria for provider-based status in this section, if the facility-
(1) Received a grant before 1995 under section 330 of the Public Health Service Act, or is receiving funding from such a grant under a contract with the recipient of such a grant and meets the requirements to receive a grant under section 330 of the Public Health Service Act; or
(2) Based on the recommendation of the Public Health Service, was determined by HCFA before 1995 to meet the requirements for receiving such a grant.
(n) Effective date of provider-based status. Provider-based status for a facility or organization is effective on the earliest date on which a request for provider-based status has been made, and all requirements of this part have been met.

## Subpart F-Specific Categories of Costs

5. In §413.118, the heading to paragraph (d) is republished, and a new paragraph (d)(5) is added to read as follows:
§ 413.118 Payment for facility services related to covered ASC surgical procedures performed in hospitals on an outpatient basis.
(d) Blended payment amount. * * *
(5) For portions of cost reporting periods beginning on or after October 1, 1997, for purposes of calculating the blended payment amount under paragraph (d)(4) of this section, the ASC payment amount is the sum of the standard overhead amounts reduced by deductibles and coinsurance as defined in section 1866(a)(2)(ii) of the Act.

## 6. In § 413.122:

A. The heading to paragraph (b) is republished
B. A new paragraph (b)(5) is added
C. The heading to paragraph (c) is republished; and
D. A new paragraph (c)(4) is added to read as follows:
§413.122 Payment for hospital outpatient radiology services and other diagnostic procedures.
(b) Payment for hospital outpatient radiology services. * * *
(5) For hospital outpatient radiology services furnished on or after October 1, 1997, the blended payment amount is equal to the sum of-
(i) 42 percent of the hospital-specific amount; and
(ii) 58 percent of the fee schedule amount calculated as 62 percent of the sum of the fee schedule amounts payable for the same services when furnished by participating physicians in their offices in the same locality, less deductible and coinsurance as defined in section 1866(a)(2)(A)(ii) of the Act.
(c) Payment for other diagnostic procedures. * * *
(4) For other diagnostic services furnished on or after October 1, 1997, the blended payment amount is equal to the sum of-
(i) 50 percent of the hospital-specific amount; and
(ii) 50 percent of the fee schedule amount calculated as 42 percent of the sum of the fee schedule amounts payable for the same services when furnished by participating physicians in their offices in the same locality less deductible and coinsurance as defined in section 1866(a)(2)(A)(ii) of the Act.
7. In $\S 413.124$, paragraph (a) is revised to read as follows:
§413.124 Reduction to hospital outpatient operating costs.
(a) Except for sole community
hospitals, as defined in $\S 412.92$ of this chapter, and critical access hospitals, the reasonable costs of outpatient hospital services (other than capitalrelated costs of these services) are reduced by 5.8 percent for services furnished during portions of cost reporting periods occurring on or after October 1, 1990 and until the first date that the prospective payment system under part 419 of this chapter is implemented.

## Subpart G-Capital-Related Costs

8. In §413.130, the heading to paragraph ( j ) and the introductory text to paragraph (j)(1) are republished, and paragraph $(\mathrm{j})(1)(\mathrm{ii})$ is revised to read as follows:

## §413.130 Introduction to capital-related costs.

(j) Reduction to capital-related costs. (1) Except for sole community hospitals and critical access hospitals, the amount of capital-related costs of all hospital outpatient services is reduced by-
(ii) 10 percent for portions of cost reporting periods occurring on or after October 1, 1991 and until the first date that the prospective payment system under part 419 of this chapter is implemented.
F. A new part 419, consisting of §§ 419.1, 419.2, 419.20, 419.21, 419.22, 419.30, 419.31, 419.32, 419.40, 419.41, 419.42, 419.43, 419.44, 419.50, 419.60, and 419.70, is added to read as follows:

## PART 419—PROSPECTIVE PAYMENT SYSTEM FOR HOSPITAL OUTPATIENT DEPARTMENT SERVICES

## Subpart A-General Provisions

Sec.
419.1 Basis and scope.
419.2 Basis of payment.

## Subpart B—Categories of Hospitals and Services Subject to and Excluded From the Hospital Outpatient Prospective Payment System

419.20 Hospitals subject to the hospital outpatient prospective payment system.
419.21 Hospital outpatient services subject to the outpatient prospective payment system.
419.22 Hospital outpatient services excluded from payment under the hospital outpatient prospective payment system.

## Subpart C—Basic Methodology for Determining Prospective Payment Rates for Hospital Outpatient Services

419.30 Base expenditure target for calendar year 1999.
419.31 Ambulatory payment classification (APC) system and payment weights.
419.32 Calculation of prospective payment rates for hospital outpatient services.

## Subpart D—Payments to Hospitals

419.40 Payment concepts.
419.41 Calculation of national beneficiary copayment amounts and national Medicare program payment amounts.
419.42 Hospital election to reduce copayment.
419.43 Adjustments to national program payment and beneficiary copayment amounts.
419.44 Payment reductions for surgical procedures.

## Subpart E—Updates

419.50 Annual updates.

## Subpart F-Limitations on Review

419.60 Limitations on administrative and judicial review.

## Subpart G—Transitional Corridors

419.70 Transitional adjustment to limit decline in payment.
Authority: Secs. 1102, 1833(t), and 1871 of the Social Security Act (42 U.S.C. 1302, $13951(\mathrm{t})$, and 1395hh).

## PART 419—PROSPECTIVE PAYMENT SYSTEM FOR HOSPITAL OUTPATIENT DEPARTMENT SERVICES

## Subpart A—General Provisions

## §419.1 Basis and scope.

(a) Basis. This part implements section 1833(t) of the Act by establishing a prospective payment system for services furnished on or after July 1, 2000 by hospital outpatient departments to Medicare beneficiaries who are registered on hospital records as outpatients.
(b) Scope. This subpart describes the basis of payment for outpatient hospital services under the prospective payment system. Subpart B sets forth the categories of hospitals and services that are subject to the outpatient hospital prospective payment system and those categories of hospitals and services that are excluded from the outpatient hospital prospective payment system. Subpart C sets forth the basic methodology by which prospective payment rates for hospital outpatient services are determined. Subpart D describes Medicare payment amounts, beneficiary copayment amounts, and methods of payment to hospitals under the hospital outpatient prospective payment system. Subpart E describes how the hospital outpatient prospective payment system may be updated. Subpart F describes limitations on administrative and judicial review. Subpart G describes the transitional payment adjustments that are made before 2004 to limit declines in payment for outpatient services.

## §419.2 Basis of payment.

(a) Unit of payment. Under the hospital outpatient prospective payment system, predetermined amounts are paid for designated services furnished to Medicare beneficiaries. These services are identified by codes established under the Health Care Financing Administration Common Procedure Coding System (HCPCS). The prospective payment rate for each service or procedure for which payment is allowed under the hospital outpatient prospective payment system is
determined according to the methodology described in subpart C of this part. The manner in which the Medicare payment amount and the beneficiary copayment amount for each service or procedure are determined is described in subpart D of this part.
(b) Determination of hospital outpatient prospective payment rates: Included costs. The prospective payment system establishes a national payment rate, standardized for geographic wage differences, that includes operating and capital-related costs that are directly related and integral to performing a procedure or furnishing a service on an outpatient basis. In general, these costs include, but are not limited to-
(1) Use of an operating suite, procedure room, or treatment room;
(2) Use of recovery room;
(3) Use of an observation bed;
(4) Anesthesia, certain drugs, biologicals, and other pharmaceuticals; medical and surgical supplies and equipment; surgical dressings; and devices used for external reduction of fractures and dislocations;
(5) Supplies and equipment for administering and monitoring anesthesia or sedation;
(6) Intraocular lenses (IOLs);
(7) Incidental services such as venipuncture;
(8) Capital-related costs;
(9) Implantable items used in connection with diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests;
(10) Durable medical equipment that is implantable;
(11) Implantable prosthetic devices (other than dental) which replace all or part of an internal body organ (including colostomy bags and supplies directly related to colostomy care), including replacement of these devices; and
(12) Costs incurred to procure donor tissue other than corneal tissue.
(c) Determination of hospital outpatient prospective payment rates: Excluded costs. The following costs are excluded from the hospital outpatient prospective payment rates:
(1) Medical education costs for approved nursing and allied health education programs.
(2) Corneal tissue acquisition costs incurred by hospitals that are paid for on a reasonable cost basis.
(3) Costs for services listed in §419.22.

Subpart B-Categories of Hospitals and Services Subject to and Excluded From the Hospital Outpatient Prospective Payment System
§419.20 Hospitals subject to the hospital outpatient prospective payment system.
(a) Applicability. The hospital outpatient prospective payment system is applicable to any hospital participating in the Medicare program, except those specified in paragraph (b) of this section, for services furnished on or after July 1, 2000.
(b) Hospitals excluded from the outpatient prospective payment system. (1) Those services furnished by Maryland hospitals that are paid under a cost containment waiver in accordance with section 1814(b)(3) of the Act are excluded from the hospital outpatient prospective payment system.
(2) Critical access hospitals (CAHs) are excluded from the hospital outpatient prospective payment system.

## §419.21 Hospital outpatient services subject to the outpatient prospective payment system.

Except for services described in $\S 419.22$, effective for services furnished on or after July 1, 2000, payment is made under the hospital outpatient prospective payment system for the following:
(a) Medicare Part B services furnished to hospital outpatients designated by the Secretary under this part.
(b) Services designated by the Secretary that are covered under Medicare Part B when furnished to hospital inpatients who are either not entitled to benefits under Part A or who have exhausted their Part A benefits but are entitled to benefits under Part B of the program.
(c) Partial hospitalization services furnished by community mental health centers (CMHCs).
(d) The following medical and other health services furnished by a comprehensive outpatient rehabilitation facility (CORF) when they are provided outside the patient's plan (of care); or by a home health agency (HHA) to patients who are not under an HHA plan or treatment; or by a hospice program furnishing services to patients outside the hospice benefit:
(1) Antigens.
(2) Splints and casts.
(3) Pneumococcal vaccine, influenza vaccine, and hepatitis $B$ vaccine.
§419.22 Hospital outpatient services excluded from payment under the hospital outpatient prospective payment system.

The following services are not paid for under the hospital outpatient prospective payment system:
(a) Physician services that meet the requirements of $\S 415.102$ (a) of this chapter for payment on a fee schedule basis.
(b) Nurse practitioner and clinical nurse specialist services, as defined in section 1861(s)(2)(K)(ii) of the Act.
(c) Physician assistant services, as defined in section 1861(s)(2)(K)(i) of the Act.
(d) Certified nurse-midwife services, as defined in section $1861(\mathrm{gg})$ of the Act.
(e) Services of qualified psychologists, as defined in section 1861(ii) of the Act.
(f) Services of an anesthetist as defined in §410.69 of this chapter.
(g) Clinical social worker services as defined in section 1861(hh)(2) of the Act.
(h) Outpatient therapy services described in section 1833(a)(8) of the Act.
(i) Ambulance services, as described in section 1861(v)(1)(U) of the Act, or, if applicable, the fee schedule established under section 1834(l).
(j) Except as provided in
§419.22(b)(11), prosthetic devices, prosthetics, prosthetic supplies, and orthotic devices.
(k) Except as provided in § 419.2(b)(10), durable medical equipment supplied by the hospital for the patient to take home.
(l) Clinical diagnostic laboratory services.
(m) Services for patients with ESRD that are paid under the ESRD composite rate and drugs and supplies furnished during dialysis but not included in the composite rate.
(n) Services and procedures that the Secretary designates as requiring inpatient care.
(o) Hospital outpatient services furnished to SNF residents (as defined in $\S 411.15(\mathrm{p})$ of this chapter) as part of the patient's resident assessment or comprehensive care plan (and thus included under the SNF PPS) that are furnished by the hospital "under arrangements" but billable only by the SNF, regardless of whether or not the patient is in a Part A SNF stay.
(p) Services that are not covered by Medicare by statute.
(q) Services that are not reasonable or necessary for the diagnosis or treatment of an illness or disease.

## Subpart C-Basic Methodology for Determining Prospective Payment Rates for Hospital Outpatient Services

§419.30 Base expenditure target for calendar year 1999.
(a) HCFA estimates the aggregate amount that would be payable for
hospital outpatient services in calendar year 1999 by summing-
(1) The total amounts that would be payable from the Trust Fund for covered hospital outpatient services without regard to the outpatient prospective payment system described in this part; and
(2) The total amounts of coinsurance that would be payable by beneficiaries to hospitals for covered hospital outpatient services without regard to the outpatient prospective payment system described in this part.
(b) The estimated aggregate amount under paragraph (a) of this section is determined as though the deductible required under section 1833(b) of the Act did not apply.

## §419.31 Ambulatory payment classification (APC) system and payment weights.

(a) APC groups. (1) HCFA classifies outpatient services and procedures that are comparable clinically and in terms of resource use into APC groups. Except as specified in paragraph (a)(2) of this section, items and services within a group are not comparable with respect to the use of resources if the highest median cost for an item or service within the group is more than 2 times greater than the lowest median cost for an item or service within the group.
(2) HCFA may make exceptions to the requirements set forth in paragraph (a)(1) in unusual cases, such as low volume items and services, but may not make such an exception in the case of a drug or biological that has been designated as an orphan drug under section 526 of the Federal Food, Drug and Cosmetic Act.
(3) The payment rate determined for an APC group in accordance with §419.32, and the copayment amount and program payment amount determined for an APC group in accordance with subpart D of this part, apply to every HCPCS code classified within an APC group.
(b) APC weighting factors. (1) Using hospital outpatient claims data from calendar year 1996 and data from the most recent available hospital cost reports, HCFA determines the median costs for the services and procedures within each APC group.
(2) HCFA assigns to each APC group an appropriate weighting factor to reflect the relative median costs for the services within the APC group compared to the median costs for the services in all APC groups.
(c) Standardizing amounts. (1) HCFA determines the portion of costs determined in paragraph (b)(1) of this section that is labor-related. This is
known as the "labor-related portion" of hospital outpatient costs.
(2) HCFA standardizes the median costs determined in paragraph (b)(1) of this section by adjusting for variations in hospital labor costs across geographic areas.

## §419.32 Calculation of prospective payment rates for hospital outpatient services.

(a) Conversion factor for 1999. HCFA calculates a conversion factor in such a manner that payment for hospital outpatient services furnished in 1999 would have equaled the base expenditure target calculated in $\S 419.30$, taking into account APC group weights and estimated service frequencies and reduced by the amounts that would be payable in 1999 as outlier payments under §419.43(d) and transitional pass-through payments under §419.43(e).
(b) Conversion factor for calendar year 2000 and subsequent years. (1) Subject to paragraph (b)(2) of this section, the conversion factor for a calendar year is equal to the conversion factor calculated for the previous year adjusted as follows:
(i) For calendar years 2000, 2001, and 2002, by the hospital inpatient market basket percentage increase applicable under section 1886(b)(3)(B)(iii) of the Act reduced by one percentage point.
(ii) For calendar years 2003 and subsequent years, by the hospital inpatient market basket percentage increase applicable under section 1886(b)(3)(B)(iii) of the Act.
(2) Beginning in calendar year 2000, HCFA may substitute for the hospital inpatient market basket percentage in paragraph (b) of this section a market basket percentage increase that is determined and applied to hospital outpatient services in the same manner that the hospital inpatient market basket percentage increase is determined and applied to inpatient hospital services.
(c) Payment rates. The payment rate for services and procedures for which payment is made under the hospital outpatient prospective payment system is the product of the conversion factor calculated under paragraph (a) or paragraph (b) of this section and the relative weight determined under § 419.31(b).
(d) Budget neutrality. HCFA adjusts the conversion factor as needed to ensure that updates and adjustments under §419.50(a) are budget neutral.

## Subpart D—Payments to Hospitals

## §419.40 Payment concepts.

(a) In addition to the payment rate described in §419.32, for each APC
group there is a predetermined beneficiary coinsurance amount as described in §419.41(a). The Medicare program payment amount for each APC group is calculated by applying the program payment percentage as described in § 419.41(b).
(b) For purposes of this section-
(1) Coinsurance percentage is calculated as the difference between the program payment percentage and 100 percent. The coinsurance percentage in any year is thus defined for each APC group as the greater of the following: the ratio of the APC group unadjusted copayment amount to the annual APC group payment rate, or 20 percent.
(2) Program payment percentage is calculated as the lower of the following: the ratio of the APC group payment rate minus the APC group unadjusted coinsurance amount, to the APC group payment rate, or 80 percent.
(3) Unadjusted coinsurance amount is calculated as 20 percent of the wageadjusted national median of charges for services within an APC group furnished during 1996, updated to 1999 using an actuarial projection of charge increases for hospital outpatient department services during the period 1996 to 1999.
(c) Limitation of coinsurance amount to inpatient hospital deductible amount. The coinsurance amount for a procedure performed in a year cannot exceed the amount of the inpatient hospital deductible established under section 1813(b) of the Act for that year.

## §419.41 Calculation of national beneficiary coinsurance amounts and national Medicare program payment amounts.

(a) To calculate the unadjusted coinsurance amount for each APC group, HCFA-
(1) Standardizes 1996 hospital charges for the services within each APC group to offset variations in hospital labor costs across geographic areas;
(2) Identifies the median of the wageneutralized 1996 charges for each APC group; and
(3) Determines the value equal to 20 percent of the wage-neutralized 1996 median charge for each APC group and multiplies that value by an actuarial projection of increases in charges for hospital outpatient department services during the period 1996 to 1999. The result is the unadjusted beneficiary coinsurance amount for the APC group.
(b) HCFA calculates annually the program payment percentage for every APC group on the basis of each group's unadjusted coinsurance amount and its payment rate after the payment rate is adjusted in accordance with §419.32.
(c) To determine payment amounts due for a service paid under the hospital
outpatient prospective payment system, HCFA makes the following calculations:
(1) Makes the wage index adjustment in accordance with $\S 419.43$.
(2) Subtracts the amount of the applicable Part B deductible provided under $\S 410.160$ of this chapter.
(3) Multiplies the remainder by the program payment percentage for the group to determine the preliminary Medicare program payment amount.
(4) Subtracts the program payment amount from the amount determined in paragraph (c)(2) of this section to determine the coinsurance amount.
(i) The coinsurance amount for an APC cannot exceed the amount of the inpatient hospital deductible established under section 1813(b) of the Act for that year.
(ii) The coinsurance amount is computed as if the adjustments under $\S 419.43(\mathrm{~d})$ and (e) (and any adjustment made under $\S 419.43$ (f) in relation to these adjustments) had not been paid.
(5) Adds the amount by which the coinsurance amount would have exceeded the inpatient hospital deductible for that year to the preliminary Medicare program payment amount determined in paragraph (c)(3) of this section to determine the final Medicare program payment amount.

## §419.42 Hospital election to reduce coinsurance.

(a) A hospital may elect to reduce coinsurance for any or all APC groups on a calendar year basis. A hospital may not elect to reduce copayment for some, but not all, services within the same group.
(b) A hospital must notify its fiscal intermediary of its election to reduce coinsurance no later than-
(1) June 1, 2000, for coinsurance elections for the period July 1, 2000 through December 31, 2000; or
(2) December 1 preceding the beginning of each subsequent calendar year.
(c) The hospital's election must be properly documented. It must specifically identify the APCs to which it applies and the coinsurance amount (within the limits identified below) that the hospital has selected for each group.
(d) The election of reduced coinsurance remains in effect unchanged during the year for which the election was made.
(e) In electing reduced coinsurance, a hospital may elect a level that is less than that year's wage-adjusted coinsurance amount for the group but not less than 20 percent of the APC payment rate as determined in $\S 419.32$.
(f) The hospital may advertise and otherwise disseminate information
concerning the reduced level of coinsurance that it has elected. All advertisements and information furnished to Medicare beneficiaries must specify that the coinsurance reductions advertised apply only to the specified services of that hospital and that coinsurance reductions are available only for hospitals that choose to reduce coinsurance for hospital outpatient services and are not allowed in any other ambulatory settings or physician offices.
§419.43 Adjustments to national program payment and beneficiary coinsurance amounts.
(a) General rule. HCFA determines national prospective payment rates for hospital outpatient department services and determines a wage adjustment factor to adjust the portion of the APC payment and national beneficiary coinsurance amount attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner.
(b) Labor-related portion of payment and copayment rates for hospital outpatient services. HCFA determines the portion of hospital outpatient costs attributable to labor and labor-related costs (known as the "labor-related portion", of hospital outpatient costs) in accordance with $\S 419.31$ (c)(1).
(c) Wage index factor. HCFA uses the hospital inpatient prospective payment system wage index established in accordance with part 412 of this chapter to make the adjustment referred to in paragraph (a) of this section.
(d) Outlier adjustment-(1) General rule. Subject to paragraph (d)(4) of this section, HCFA provides for an additional payment for each hospital outpatient service (or group of services) for which a hospital's charges, adjusted to cost, exceed the following:
(i) A fixed multiple of the sum of-
(A) The applicable Medicare hospital outpatient payment amount determined under § 419.32(c), as adjusted under $\S 419.43$ (other than for adjustments under this paragraph (d) or paragraph (e) of this section); and
(B) Any transitional pass-through payment under paragraph (e) of this section.
(ii) At the option of HCFA, a fixed dollar amount.
(2) Amount of adjustment. The amount of the additional payment under paragraph (d)(1) of this section is determined by HCFA and approximates the marginal cost of care beyond the applicable cutoff point under paragraph (d)(1) of this section.
(3) Limit on aggregate outlier adjustments_(i) In general. The total of the additional payments made under this paragraph (d) for covered hospital outpatient department services furnished in a year (as estimated by HCFA before the beginning of the year) may not exceed the applicable percentage specified in paragraph (d)(3)(ii) of this section of the total program payments (sum of both the Medicare and beneficiary payments to the hospital) estimated to be made under this part for all hospital outpatient services furnished in that year. If this paragraph is first applied to less than a full year, the limit applies only to the portion of the year.
(ii) Applicable percentage. For purposes of paragraph (d)(3)(i) of this section, the term "applicable percentage" means a percentage specified by HCFA up to (but not to exceed)-
(A) For a year (or portion of a year) before 2004, 2.5 percent; and
(B) For 2004 and thereafter, 3.0 percent.
(4) Transitional authority. In applying paragraph (d)(1) of this section for hospital outpatient services furnished before January 1, 2002, HCFA may-
(i) Apply paragraph (d)(1) of this section to a bill for these services related to an outpatient encounter (rather than for a specific service or group of services) using hospital outpatient payment amounts and transitional passthrough payments covered under the bill; and
(ii) Use an appropriate cost-to-charge ratio for the hospital or CMHC (as determined by HCFA), rather than for specific departments within the hospital.
(e) Transitional pass-through for additional costs of innovative medical devices, drugs, and biologicals-(1) General rule. HCFA provides for an additional payment under this paragraph for any of the following that are provided as part of a hospital outpatient service (or group of services):
(i) Current orphan drugs. A drug or biological that is used for a rare disease or condition with respect to which the drug or biological has been designated as an orphan drug under section 526 of the Federal Food, Drug and Cosmetic Act if payment for the drug or biological as an outpatient hospital service under this part was being made on the first date that the system under this part is implemented.
(ii) Current cancer therapy drugs and biologicals and brachytherapy. A drug or biological that is used in cancer therapy, including, but not limited to, a chemotherapeutic agent, an antiemetic,
a hematopoietic growth factor, a colony stimulating factor, a biological response modifier, a bisphosphonate, and a device of brachytherapy, if payment for the drug, biological, or device as an outpatient hospital service under this part was being made on the first date that the system under this part is implemented.
(iii) Current radiopharmaceutical drugs and biological products. A radiopharmaceutical drug or biological product used in diagnostic, monitoring, and therapeutic nuclear medicine procedures if payment for the drug or biological as an outpatient hospital service under this part was being made on the first date that the system under this part is implemented.
(iv) New medical devices, drugs, and biologicals. A medical device, drug, or biological not described in paragraph (e)(1)(i), (e)(1)(ii), or (e)(1)(iii) of this section if-
(A) Payment for the device, drug, or biological as an outpatient hospital service under this part was not being made as of December 31, 1996; and
(B) The cost of the device, drug, or biological is not insignificant (as defined in paragraph (e)(1)(iv)(C) of this section) in relation to the hospital outpatient fee schedule amount (as calculated under §419.32(c)) payable for the service (or group of services) involved.
(C) The cost of the device, drug, or biological is considered not insignificant if it meets all of the following thresholds:
(1) Its expected reasonable cost exceeds 25 percent of the applicable fee schedule amount for the associated service.
(2) The expected reasonable cost of the new drug, biological, or device must exceed the current portion of the fee schedule amount determined to be associated with the drug, biological, or device by 25 percent.
(3) The difference between the expected reasonable cost of the item and the portion of the hospital outpatient fee schedule amount determined to be associated with the item exceeds 10 percent of the applicable hospital outpatient fee schedule amount.
(2) Limited period of payment. The payment under this paragraph (e) with respect to a medical device, drug, or biological applies during a period of at least 2 years, but not more than 3 years, that begins-
(i) On the first date this section is implemented in the case of a drug, biological, or device described in paragraphs (e)(2)(i), (e)(2)(ii), or (e)(2)(iii) of this section and in the case of a device, drug, or biological described
in paragraph (e)(1)(iv) of this section and for which payment under this part is made as an outpatient hospital service before the first date; or
(ii) In the case of a device, drug, or biological described in paragraph (e)(1)(iv) of this section not described in paragraph (e)(2)(i) of this section, on the first date on which payment is made under this part for the device, drug, or biological as an outpatient hospital service.
(3) Amount of additional payment. Subject to paragraph (e)(4)(iii) of this section, the amount of the payment under this paragraph is-
(i) In the case of a drug or biological, the amount by which the amount determined under section 1842(o) of the Act for the drug or biological exceeds the portion of the otherwise applicable Medicare hospital outpatient fee schedule amount that HCFA determines is associated with the drug or biological; or
(ii) In the case of a medical device, the amount by which the hospital's charges for the device, adjusted to cost, exceeds the portion of the otherwise applicable Medicare hospital outpatient fee schedule amount that HCFA determines is associated with the device.
(4) Limit on aggregate annual adjustment-(i) General rule. The total of the additional payments made under this paragraph for hospital outpatient services furnished in a year, as estimated by HCFA before the beginning of the year, may not exceed the applicable percentage specified in paragraph (e)(4)(ii) of this section of the total program payments estimated to be made under this section for all hospital outpatient services furnished in that year. If this paragraph is first applied to less than a full year, the limit applies only to the portion of the year.
(ii) Applicable percentage. For purposes of paragraph (e)(4)(i) of this section, the term "applicable percentage" means-
(A) For a year (or portion of a year) before 2004, 2.5 percent; and
(B) For 2004 and thereafter, a percentage specified by HCFA up to (but not to exceed) 2.0 percent.
(iii) Uniform prospective reduction if aggregate limit projected to be exceeded. If HCFA estimates before the beginning of a year that the amount of the additional payments under this paragraph (e) for the year (or portion thereof) as determined under paragraph (e)(4)(i) of this section without regard to this paragraph (e)(4)(iii) would exceed the limit established under this paragraph (e)(4)(iii), HCFA reduces pro rata the amount of each of the additional payments under this paragraph for that
year (or portion thereof) in order to ensure that the aggregate additional payments under this paragraph (as so estimated) do not exceed the limit.
(f) Budget neutrality. Outlier adjustments under paragraph (d) of this section and transitional pass-through payments under paragraph (e) of this section are established in a budgetneutral manner.

## §419.44 Payment reductions for surgical procedures.

(a) Multiple surgical procedures. When more than one surgical procedure for which payment is made under the hospital outpatient prospective payment system is performed during a single surgical encounter, the Medicare program payment amount and the beneficiary copayment amount are based on-
(1) The full amounts for the procedure with the highest APC payment rate; and
(2) One-half of the full program and the beneficiary payment amounts for all other covered procedures.
(b) Terminated procedures. When a surgical procedure is terminated prior to completion due to extenuating circumstances or circumstances that threaten the well-being of the patient, the Medicare program payment amount and the beneficiary copayment amount are based on-
(1) The full amounts if the procedure is discontinued after the induction of anesthesia or after the procedure is started; or
(2) One-half of the full program and the beneficiary coinsurance amounts if the procedure is discontinued after the patient is prepared for surgery and taken to the room where the procedure is to be performed but before anesthesia is induced.

## Subpart E—Updates

## §419.50 Annual review.

(a) General rule. Not less often than annually, HCFA reviews and updates groups, relative payment weights, and the wage and other adjustments to take into account changes in medical practice, changes in technology, the addition of new services, new cost data, and other relevant information and factors.
(b) Consultation requirement. HCFA will consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to review (and advise HCFA concerning) the clinical integrity of the groups and weights. The panel may use data collected or developed by entities and organizations (other than the Department of Health and Human Services) in conducting the review.
(c) Effective dates. HCFA conducts the first annual review under paragraph (a) of this section in 2001 for payments made in 2002.

## Subpart F-Limitations on Review

§419.60 Limitations on administrative and judicial review.
There can be no administrative or judicial review under sections 1869 and 1878 of the Act or otherwise of the following:
(a) The development of the APC system, including-
(1) Establishment of the groups and relative payment weights;
(2) Wage adjustment factors;
(3) Other adjustments; and
(4) Methods for controlling
unnecessary increases in volume.
(b) The calculation of base amounts described in section 1833(t)(3) of the Act.
(c) Periodic adjustments described in section 1833(t)(9) of the Act.
(d) The establishment of a separate conversion factor for hospitals described in section 1886(d)(1)(B)(v) of the Act.
(e) The determination of the fixed multiple, or a fixed dollar cutoff amount, the marginal cost of care, or applicable percentage under $\S 419.43$ (d) or the determination of insignificance of cost, the duration of the additional payments (consistent with §419.43(e)), the portion of the Medicare hospital outpatient fee schedule amount associated with particular devices, drugs, or biologicals, and the application of any pro rata reduction under §419.43(e).

## Subpart G—Transitional Corridors

## \$419.70 Transitional adjustment to limit decline in payment.

(a) Before 2002. Except as provided in paragraph (d) of this section, for covered hospital outpatient services furnished before January 1, 2002, for which the prospective payment system amount (as defined in paragraph (e) of this section) is-
(1) At least 90 percent, but less than 100 percent, of the pre-BBA amount (as defined in paragraph (f) of this section), the amount of payment under this part is increased by 80 percent of the amount of this difference;
(2) At least 80 percent, but less than 90 percent, of the pre-BBA amount, the amount of payment under this part is increased by the amount by which the product of 0.71 and the pre-BBA amount exceeds the product of 0.70 and the prospective payment system amount;
(3) At least 70 percent, but less than 80 percent, of the pre-BBA amount, the
amount of payment under this part is increased by the amount by which the product of 0.63 and the pre-BBA amount, exceeds the product of 0.60 and the PPS amount; or
(4) Less than 70 percent of the preBBA amount, the amount of payment under this part shall be increased by 21 percent of the pre-BBA amount.
(b) For 2002. Except as provided in paragraph (d) of this section, for covered hospital outpatient services furnished during 2002, for which the prospective payment system amount is-
(1) At least 90 percent, but less than 100 percent, of the pre-BBA amount, the amount of payment under this part is increased by 70 percent of the amount of this difference;
(2) At least 80 percent, but less than 90 percent, of the pre-BBA amount, the amount of payment under this part is increased by the amount by which the product of 0.61 and the pre-BBA amount exceeds the product of 0.60 and the prospective payment system amount; or
(3) Less than 80 percent of the preBBA amount, the amount of payment under this part is increased by 13 percent of the pre-BBA amount.
(c) For 2003. Except as provided in paragraph (d) of this section, for covered hospital outpatient services furnished during 2003, for which the prospective payment system amount is-
(1) At least 90 percent, but less than 100 percent, of the pre-BBA amount, the amount of payment under this part is increased by 60 percent of the amount of this difference; or
(2) Less than 90 percent of the preBBA amount, the amount of payment under this part is increased by 6 percent of the pre-BBA amount.
(d) Hold harmless provisions-(1) Temporary treatment for small rural hospitals. For covered hospital outpatient services furnished in a calendar year before January 1, 2004 for which the prospective payment system amount is less than the pre-BBA amount, the amount of payment under this part is increased by the amount of that difference if the hospital-
(i) Is located in a rural area as defined in $\S 412.63(\mathrm{~b})$ of this chapter or is treated as being located in a rural area under section 1886(d)(8)(E) of the Act; and
(ii) Has 100 or fewer beds as defined in $\S 412.105(\mathrm{~b})$ of this chapter.
(2) Permanent treatment for cancer hospitals. In the case of a hospital described in §412.23(f) of this chapter for which the prospective payment system amount is less than the pre-BBA amount for covered hospital outpatient services, the amount of payment under
this part is increased by the amount of this difference.
(e) Prospective payment system amount defined. In this paragraph, the term "prospective payment system amount" means, with respect to covered hospital outpatient services, the amount payable under this part for these services (determined without regard to this paragraph or any reduction in coinsurance elected under $\S 419.42$ ), including amounts payable as copayment under $\S 419.41$, coinsurance under section 1866(a)(2)(A)(ii) of the Act, and the deductible under section 1833(b) of the Act.
(f) Pre-BBA amount defined-(1) General rule. In this paragraph, the "pre-BBA amount" means, with respect to covered hospital outpatient services furnished by a hospital or a community mental health center (CMHC) in a year, an amount equal to the product of the reasonable cost of the provider for these services for the portions of the provider's cost reporting period (or periods) occurring in the year and the base provider outpatient payment-tocost ratio for the provider (as defined in paragraph (f)(2) of this section).
(2) Base payment-to-cost-ratio defined. For purposes of this paragraph, HCFA shall determine these ratios as if the amendments to sections 1833(i)(3)(B)(i)(II) and 1833(n)(1)(B)(i) of the Act made by section 4521 of the BBA, to require that the full amount beneficiaries paid as coinsurance under section 1862(a)(2)(A) of the Act are taken into account in determining Medicare Part B Trust Fund payment to the hospital, were in effect in 1996. The "base payment-to-cost ratio" for a hospital or CMHC means the ratio of-
(i) The provider's payment under this part for covered outpatient services furnished during the cost reporting period ending in 1996, including any payment for these services through costsharing described in paragraph (e) of this section; and
(ii) The reasonable cost of these services for this period, without applying the cost reductions under section 1861(v)(1)(S) of the Act.
(g) Interim payments. HCFA makes payments under this paragraph to hospitals and CMHCs on an interim basis, subject to retrospective adjustments based on settled cost reports.
(h) No effect on coinsurance. No payment made under this section affects the unadjusted coinsurance amount or the coinsurance amount described in § 419.41.
(i) Application without regard to budget neutrality. The additional payments made under this paragraph-
(1) Are not considered an adjustment under § 419.43 (f); and
(2) Are not implemented in a budget neutral manner.

## PART 424-CONDITIONS FOR MEDICARE PAYMENT

G. Part 424 is amended as set forth below:

1. The authority citation for part 424 continues to read as follows:
Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).
2. In $\S 424.24$, the heading to paragraph (e) is republished, and a new paragraph (e)(3) is added to read as follows:
§424.24 Requirements for medical and other health services furnished by providers under Medicare Part B.
(e) Partial hospitalization services: Content of certification and plan of treatment requirements-
(3) Recertification requirements.
(i) Signature. The physician recertification must be signed by a physician who is treating the patient and has knowledge of the patient's response to treatment.
(ii) Timing. The first recertification is required as of the 18th day of partial hospitalization services. Subsequent recertifications are required at intervals established by the provider, but no less frequently than every 30 days.
(iii) Content. The recertification must specify that the patient would otherwise require inpatient psychiatric care in the absence of continued stay in the partial hospitalization program and describe the following:
(A) The patient's response to the therapeutic interventions provided by the partial hospitalization program.
(B) The patient's psychiatric symptoms that continue to place the patient at risk of hospitalization.
(C) Treatment goals for coordination of services to facilitate discharge from the partial hospitalization program.

## PART 489—PROVIDER AGREEMENTS AND SUPPLIER APPROVAL

H. Part 489 is amended as set forth below:

1. The authority citation to part 489 continues to read as follows:
Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

## Subpart B—Essentials of Provider Agreements

2. In $\S 489.20$, the introductory text to the section is republished; the introductory text to paragraph (d) is revised; paragraphs (d)(3), (d)(4), and (d)(5) are redesignated as paragraphs (d)(4), (d)(5), and (d)(6), respectively; and a new paragraph (d)(3) is added to read as follows:

## §489.20 Basic commitments.

The provider agrees to the following:
(d) In the case of a hospital or a CAH that furnishes services to Medicare beneficiaries, either to furnish directly or to make arrangements (as defined in §409.3 of this chapter) for all Medicarecovered services to inpatients and outpatients of a hospital or a CAH except the following:
(3) Nurse practitioner and clinical nurse specialist services, as defined in section $1861(\mathrm{~s})(2)(\mathrm{K})(\mathrm{ii})$ of the Act.
3. In §489.24, the definition for "Comes to the emergency department" in paragraph (b) is revised, and a new paragraph (i) is added to read as follows:

## §489.24 Special responsibilities of

 Medicare hospitals in emergency cases.(b) * * *

Comes to the emergency department means, with respect to an individual requesting examination or treatment, that the individual is on the hospital property. For purposes of this section, "property" means the entire main hospital campus as defined in $\S 413.65(\mathrm{~b})$ of this chapter, including the parking lot, sidewalk, and driveway, as well as any facility or organization that is located off the main hospital campus but has been determined under $\S 413.65$ of this chapter to be a department of the hospital. The responsibilities of hospitals with respect to these offcampus facilities or organizations are described in paragraph (i) of this section. Property also includes ambulances owned and operated by the hospital even if the ambulance is not on hospital grounds. An individual in a nonhospital-owned ambulance on hospital property is considered to have come to the hospital's emergency department. An individual in a nonhospital-owned ambulance off hospital property is not considered to have come to the hospital's emergency department even if a member of the ambulance staff contacts the hospital by telephone or telemetry communications
and informs the hospital that they want to transport the individual to the hospital for examination and treatment. In these situations, the hospital may deny access if it is in "diversionary status," that is, it does not have the staff or facilities to accept any additional emergency patients. If, however, the ambulance staff disregards the hospital's instructions and transports the individual on to hospital property, the individual is considered to have come to the emergency department.
(i) Off-campus departments. If an individual comes to a facility or organization that is located off the main hospital campus but has been determined under $\S 416.35$ of this chapter to be a department of the hospital and a request is made on the individual's behalf for examination or treatment of a potential emergency medical condition as otherwise described in paragraph (a) of this section, the hospital is obligated in accordance with the rules in this paragraph to provide the individual with an appropriate medical screening examination and any necessary stabilizing treatment or an appropriate transfer.
(1) Capability of the hospital. The capability of the hospital includes that of the hospital as a whole, not just the capability of the off-campus department. Except for cases described in paragraph (i)(3)(ii) of this section, the obligation of a hospital under this section must be discharged within the hospital as a whole. However, the hospital is not required to locate additional personnel or staff to off-campus departments to be on standby for possible emergencies.
(2) Protocols for off-campus departments. The hospital must establish protocols for the handling of individuals with potential emergency conditions at off-campus departments. These protocols must provide for direct contact between personnel at the offcampus department and emergency personnel at the main hospital campus and may provide for dispatch of practitioners, when appropriate, from the main hospital campus to the offcampus department to provide screening or stabilization services.
(i) If the off-campus department is an urgent care center, primary care center, or other facility that is routinely staffed by physicians, RNs, or LPNs, these department personnel must be trained, and given appropriate protocols, for the handling of emergency cases. At least one individual on duty at the offcampus department during its regular hours of operation must be designated
as a qualified medical person as described in paragraph (d) of this section. The qualified medical person must initiate screening of individuals who come to the off-campus department with a potential emergency medical condition, and may be able to complete the screening and provide any necessary stabilizing treatment at the off-campus department, or to arrange an appropriate transfer.
(ii) If the off-campus department is a physical therapy, radiology, or other facility not routinely staffed with physicians, RNs, or LPNs, the department's personnel must be given protocols that direct them to contact emergency personnel at the main hospital campus for direction. Under this direction, and in accordance with protocols established in advance by the hospital, the personnel at the offcampus department must describe patient appearance and report symptoms and, if appropriate, either arrange transportation of the individual to the main hospital campus in accordance with paragraph (i)(3)(i) of this section or assist in an appropriate transfer as described in paragraphs (i)(3)(ii) and (d)(2) of this section.
(3) Movement or appropriate transfer from off-campus departments-(i) If the main hospital campus has the capability required by the individual and movement of the individual to the main campus would not significantly jeopardize the life or health of the individual, the personnel at the offcampus department must assist in arranging this movement. Movement of the individual to the main campus of the hospital is not considered a transfer under this section, since the individual is simply being moved from one department of a hospital to another department or facility of the same hospital.
(ii) If transfer of an individual with a potential emergency condition to a medical facility other than the main hospital campus is warranted, either because the main hospital campus does not have the specialized capability or facilities required by the individual, or because the individual's condition is deteriorating so rapidly that taking the time needed to move the individual to the main hospital campus would significantly jeopardize the life or health of the individual, personnel at the offcampus department must, in accordance with protocols established in advance by the hospital, assist in arranging an appropriate transfer of the individual to a medical facility other than the main hospital. The protocols must include procedures and agreements established in advance with other hospitals or
medical facilities in the area of the offcampus department to facilitate these appropriate transfers. Such a transfer would require-
(A) That there be either a request by or on behalf of the individual as described in paragraph (d)(1)(ii)(A) of this section or a certification by a physician or a qualified medical person as described in paragraph (d)(1)(ii)(B) or (d)(1)(ii)(C) of this section; and
(B) That the transfer comply with the requirements described in paragraph (d)(2) of this section.
(iii) If the individual is being appropriately transferred to another medical facility from the off-campus department, the requirement for the provision of medical treatment in paragraph (d)(2)(i) of this section would be met by provision of medical treatment within the capability of the transferring off-campus department.
PART 498-APPEALS PROCEDURES FOR DETERMINATIONS THAT AFFECT PARTICIPATION IN THE MEDICARE PROGRAM AND FOR
DETERMINATIONS THAT AFFECT THE PARTICIPATION OF ICFs/MR AND CERTAIN NFs IN THE MEDICAID PROGRAM
I. Part 498 is amended as set forth below:

1. The authority citation for part 498 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).
2. In $\S 498.2$, the introductory text is republished, and the definition of "Provider" is revised to read as follows:

## §498.2 Definitions.

As used in this part-
Provider means a hospital, critical access hospital (CAH), skilled nursing facility (SNF), comprehensive outpatient rehabilitation facility (CORF), home health agency (HHA), or hospice, that has in effect an agreement to participate in Medicare, that has in effect an agreement to participate in Medicaid, or a clinic, rehabilitation agency, or public health agency that has a similar agreement but only to furnish outpatient physical therapy or outpatient speech pathology services, and prospective provider means any of the listed entities that seeks to participate in Medicare as a provider or to have any facility or organization determined to be a department of the provider or provider-based entity under $\S 413.65$ of this chapter.
3. In §498.3, the introductory text to paragraph (b) is republished; paragraphs (b)(2) through (b)(15) are redesignated as paragraphs (b)(3) through (b)(16), respectively; and a new paragraph (b)(2) is added to read as follows:

## §498.3 Scope and applicability.

(b) Initial determinations by HCFA. HCFA makes initial determinations with respect to the following matters:
(2) Whether a prospective department of a provider, remote location of a hospital, satellite facility, or providerbased entity qualifies for provider-based status under $\S 413.65$ of this chapter, or whether such a facility or entity currently treated as a department of a provider, remote location of a hospital, satellite facility, or a provider-based entity no longer qualifies for that status under § 413.65 of this chapter.

## PART 1003—CIVIL MONEY PENALTIES, ASSESSMENTS AND EXCLUSIONS

J. Part 1003 is amended as set forth below:

1. The authority citation for part 1003 is revised to read as follows:

Authority: 42 U.S.C. 1302, 1320-7, 1320a7a, 1320a-7e, 1320b-10, 1395u(j), 1395u(k), $1395 \mathrm{cc}(\mathrm{g}), 1395 \mathrm{dd}(\mathrm{d})(1), 1395 \mathrm{~mm}, 1395 \mathrm{nn}(\mathrm{g})$, 1395ss(d), 1396(m), 11131(c), and 11137(b)(2).
2. Section 1003.100 is amended by revising paragraph (a), by republishing the introductory text to paragraphs (b) and (b)(1), by revising paragraphs (b)(1)(xi) and (b)(1)(xii), and by adding paragraph (b)(1)(xiii) to read as follows:

## § 1003.100 Basis and purpose.

(a) Basis. This part implements sections 1128(c), 1128A, 1128E, 1140, $1866(\mathrm{~g}), 1876(\mathrm{i}), 1877(\mathrm{~g}), 1882(\mathrm{~d})$ and 1903(m)(5) of the Social Security Act, and sections 421(c) and 427(b)(2) of Pub. L. 99-660 (42 U.S.C. 1320a-7, 1320a-7a, 1320a-7e, 1320a-7c, 1320b$10,1395 \mathrm{cc}(\mathrm{g}), 1395 \mathrm{~mm}, 1395 \mathrm{ss}(\mathrm{d})$, 1396(m), 11131(c), and 11137(b)(2)).
(b) Purpose. This part-
(1) Provides for the imposition of civil money penalties and, as applicable, assessments against persons who-
(xi) Are physicians or entities that enter into an arrangement or scheme that they know or should know has as a principal purpose the assuring of referrals by the physician to a particular entity that, if made directly, would violate the provisions of $\S 411.353$ of this title;
(xii) Violate the Federal health care programs' anti-kickback statute as set forth in section 1128B of the Act; or
(xiii) Knowingly and willfully present, or cause to be presented, a bill or request for payment for nonphysician services furnished to hospital patients (unless the services are furnished by the hospital, either directly or under an arrangement) in violation of sections 1862(a)(14) and 1866(a)(1)(H) of the Act.
3. Section 1003.102 is amended by republishing the introductory text to paragraph (b), by adding and reserving paragraphs (b)(12) through (b)(14), and by adding a new paragraph (b)(15) to read as follows:
§ 1003.102 Basis for civil money penalties and assessments.
(b) The OIG may impose a penalty, and where authorized, an assessment against any person (including an insurance company in the case of paragraphs (b)(5) and (b)(6) of this section) whom it determines in accordance with this part-
(15) Has knowingly and willfully presented, or caused to be presented, a bill or request for payment for items and services furnished to a hospital patient for which payment may be made under the Medicare or another Federal health care program, if that bill or request is inconsistent with an arrangement under section 1866(a)(1)(H) of the Act, or violates the requirements for such an arrangement.
4. Section 1003.103 is amended by revising paragraph (a), by adding and reserving paragraphs (i) and (j), and by adding a new paragraph (k) to read as follows:

## §1003.103 Amount of penalty.

(a) Except as provided in paragraphs (b) and (d) through (k) of this section,
the OIG may impose a penalty of not more than $\$ 10,000$ for each item or service that is subject to a determination under § 1003.102.
(k) For violations of section 1862(a)(14) of the Act and § 1003.102(b)(15), the OIG may impose a penalty of not more than $\$ 2,000$ for each bill or request for payment for items and services furnished to a hospital patient.
5. Section 1003.105 is amended by republishing the introductory text to paragraph (a)(1) and by revising paragraph (a)(1)(i) to read as follows:

## § 1003.105 Exclusion from participation in Medicare, Medicaid and other Federal health care programs.

(a)(1) Except as set forth in paragraph (b) of this section, in lieu of or in addition to any penalty or assessment, the OIG may exclude from participation in Medicare, Medicaid and other Federal health care programs the following persons for a period of time determined under § 1003.107-
(i) Any person who is subject to a penalty or assessment under
§ 1003.102(a), (b)(1) through (b)(4), or (b)(15).

Dated: March 3, 2000.

## Nancy-Ann Min DeParle,

Administrator, Health Care Financing Administration.

Dated: March 28, 2000.

## June G. Brown,

Inspector General, Department of Health and Human Services.

Approved: March 29, 2000.

## Donna E. Shalala,

Secretary.
Note: The following addenda will not appear in the Code of Federal Regulations.

Note to Addenda A, B, C, E and F: Addenda A, B, and C have a number of errors in the following columns: APC, status indicator, payment rate, and national unadjusted coinsurance and minimum unadjusted coinsurance. We identified these errors too late in preparing this rule for publication to correct them. Some of the errors are related to the status codes assigned to the HCPCS codes and APCs.
Some errors affect addenda B, C, and E. Several of these errors involve procedures incorrectly identified as inpatient procedures, and one inpatient procedure incorrectly identified as an outpatient procedure. Certain PET scan codes and other codes are shown in incorrect APCs.
Screening sigmoidoscopy and colonoscopy
APCs have the wrong HCPCS codes and incorrect payment rates and coinsurance amounts. Certain dental codes were inadvertently identified as errors, so their correct APC assignments, payment rate and coinsurance amounts were not shown in the addenda. Two breath tests are subject to the clinical diagnostic lab fee schedule. We have listed below the corrections that have payment implications.
Addendum F does not include status indicators G and H which identify items that are eligible for pass-through payments. (See section III.B. 3 of the preamble for a complete description of all status indications used in conjunction with this final rule.)
We also note that the word "proposed" should not appear on any Addenda contained in this final rule such as on Addendum A or C .
The fiscal intermediaries will receive the necessary changes to process outpatient PPS claims correctly. We will post the corrected Addendum B on our Website and publish a correction document in the Federal Register.
Our Website address is http://
www.hcfa.gov/medicare/hopsmain.htm.

${ }^{1}$ Not subject to national coinsurance. Minimum unadjusted coinsurance is $25 \%$ of the payment rate. The payment rate is the lower of the HOPD payment rate or the Ambulatory Surgical Center payment
${ }^{2}$ Not subject to national coinsurance.
${ }^{3}$ Eligible for pass-through payments. See Preamble for payment rate determination. See Addendum K for complete list of pass-through codes.

Addendum F.-Status Indicators: How Various Services Are Treated Under Outpatient PPS

| Indicator | Service | Status |
| :---: | :---: | :---: |
| A .. | Pulmonary Rehabilitation Clinical Trial | Not Paid Under PPS |
| C ............. | Inpatient Procedures | Admit Patient; Bill as Inpatient |
| A ... | Durable Medical Equipment, Prosthetics and | DMEPOS Fee Schedule |
| E | Non-Covered Items and Services | Non-paid |
| A ............ | Physical, Occupational and SpeechTherapy | Rehabilitation Fee Schedule |
| A ............. | Ambulance | Ambulance Fee Schedule |
| A | EPO for ESRD Patients | National Rate |
| A | Clinical Diagnostic Laboratory Services | Laboratory Fee Schedule |
| A .... | Physican Services for ESRD Patients | Not Paid Under PPS |
| A | Screening Mammography | National Rate |
| N .. | Incidental Services, packaged into APC Rat | Packaged |
| P ............. | Partial Hospitalization | Paid Per Diem APC |
| S ............. | Significant Procedure, Not Discounted When | Paid |
| T .............. | Procedure, Multiple When Discount Applies | Paid |
| V ............. | Visit to Clinic or Emergency Department | Paid |
| X ............. | Ancillary Service ................................................................................................ | Paid |

Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants ProgramPest Management: Request for Proposals and Request for Input; Notice

## DEPARTMENT OF AGRICULTURE

## Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—Pest Management: Request for Proposals and Request for Input
AGENCY: Cooperative State Research, Education, and Extension Service.
ACTION: Notice of Request for Proposals and Request for Input.

SUMMARY: The Cooperative State Research, Education and Extension Service (CSREES) announces the availability of grant funds and requests proposals for the Integrated Research, Education, and Extension Competitive Grants Program-Pest Management for fiscal year (FY) 2000 to support integrated, multifunctional agricultural research, extension, and education activities that address pest management priorities in United States agriculture, particularly those priorities addressing anticipated regulatory losses of key pest management tools resulting from the implementation of the Food Quality Protection Act (FQPA) of 1996. The Integrated Research, Education, and Extension Competitive Grants Program-Pest Management will have four program components: Crops at Risk from FQPA Implementation (CAR); FQPA Risk Avoidance and Mitigation for Major Food Crop Systems (RAMP); Methyl Bromide Transitions (MBT); and Pest Management Centers. The amount available for support of this program in FY 2000 is approximately $\$ 11,000,000$.
This notice sets out the objectives for these projects, the eligibility criteria for projects and applicants, the application procedures, and the set of instructions needed to apply for a Pest Management grant under this authority.
By this notice, CSREES additionally solicits stakeholder input from any interested party regarding the FY 2000 Integrated Research, Education, and Extension Competitive Grants Program-Pest Management for use in the development of any future requests for proposals for this program.
DATES: Proposals must be transmitted by June 6, 2000, as indicated by the postmark or date on courier bill of lading. Proposals transmitted after this date will not be considered for funding. Comments regarding this request for proposals are requested within six months from the issuance of this notice. Comments received after that date will be considered to the extent practicable.
addresses: The address for handdelivered proposals or proposals
submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program-Pest Management; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program-Pest Management; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250-2245.

Written user comments should be submitted by first-class mail to: Policy and Program Liaison Staff; Office of Extramural Programs; USDA-CSREES; STOP 2299; 1400 Independence Avenue, S.W.; Washington, D.C. 202502299; or via e-mail to: RFP-
OEP@reeusda.gov. In your comments, please include the name of the program and the fiscal year of the RFP to which you are responding.

## FOR FURTHER INFORMATION CONTACT:

Applicants and other interested parties are encouraged to contact the following individuals: CAR: Dr. Rick Meyer; National Program Leader; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C. 202502210; Telephone: (202) 401-4891; Fax: (202) 401-4888; e-mail address: hmeyer@reeusda.gov.; RAMP: Dr. Steve Yaninek; National Program Leader; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C.; Telephone: (202) 401-6702; Fax: 202-401-4888; e-mail address: syaninek@reeusda.gov.; MBT: Dr. Robin Huettel; National Program Leader; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400

## Stakeholder Input

CSREES is soliciting comments regarding this solicitation of applications from any interested party. These comments will be considered in the development of any future RFP for the program. Such comments will be forwarded to the Secretary or his designee for use in meeting the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). This section requires the Secretary to solicit and consider input on a current RFP from persons who conduct or use agricultural research, education and extension for use in formulating future RFPs for competitive programs. Comments should be submitted as provided for in the
ADDRESSES and DATES portions of this Notice.

## Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under 10.303, Integrated Research, Education, and Extension Competitive Grants Program.

## Part I—General Information

## A. Legislative Authority and Background

Section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626) authorized the Secretary of Agriculture to establish a research, education, and extension competitive grants program to provide funding for integrated, multifunctional agricultural research, extension, and education activities. Subject to the availability of appropriations to carry out this program, the Secretary may award grants to colleges and universities (as defined by 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977
(NARETPA) (7 U.S.C. 3103)) on a competitive basis for integrated research, education, and extension projects. Grants are to be awarded to address priorities in United States agriculture that involve integrated research, education, and extension activities as determined by the Secretary in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board.
On November 19, 1999, the Secretary published in the Federal Register [64 FR 63560] a notice that the
administration of this grant program had been delegated to the Cooperative State Research, Education, and Extension Service (CSREES). This notice also solicited public comment from persons who use or conduct research, extension, or education regarding the priorities to be addressed by this new program. In addition, this notice announced a public meeting to obtain comments to use in developing the proposed rule and requests for proposals for this new grant program. The public meeting was held on December 6, 1999. All the comments and the official transcript of the meeting have been made available for review on the CSREES web page (http:// www.reeusda.gov/integrated/). This RFP was developed in consultation with the Advisory Board. In addition, the comments and testimonies from the December 6, 1999, public meeting were considered in the formulation of this RFP.
The entire program is funded in FY 2000 at $\$ 37,637,702$ (after deduction for administrative expenses) for the following integrated activities: Water Quality ( $\$ 12,374,115$ ), Food Safety ( $\$ 14,277,277$ ), and the Pest Management Component that includes: Pesticide Impact Assessment $(\$ 4,322,310)$, Crops at Risk from Food Quality and Protection Act (FQPA) Implementation
(\$952,000), FQPA Risk Mitigation Program for Major Food Crop Systems ( $\$ 3,808,000$ ), and Methyl Bromide Transitions ( $\$ 1,904,000$ ). There will be three RFP's for this program. The Water Quality and Food Safety Programs will each have a separate RFP, while the latter four programs will be announced as one RFP. This notice announces and describes the Pest Management component of the Program.

CSREES will administer the Integrated Research, Education, and Extension Competitive Grants Program by determining priorities in United States agriculture through Agency stakeholder input processes and in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board. Each RFP for the different program areas (i.e., Water Quality, Food Safety, etc.) will be developed each fiscal year based on these established priorities and the resulting determined approaches to solving these critical agricultural issues. Although this overall grant program seeks to solve critical agricultural issues through an integration of research, education, and extension activities, a component of a RFP, depending on the priority being addressed and/or the stage at which the priority is being addressed, may request proposals that are research, education, or extension only, or a combination thereof. However, the overall overarching approach to solving the critical agricultural issue, priority, or problem will be through an integration of research, education, and extension activities within each individual program area.

## B. Purpose, Priorities, and Fund Availability

The components of the Integrated Competitive Grants Program-Pest Management are Crops at Risk from FQPA Implementation program (CAR); FQPA Risk Avoidance and Mitigation for Major Food Crop Systems (RAMP); Methyl Bromide Transitions Program (MBTP); and Pesticide Impact Assessment Program (hereafter referred to as "Pest Management Centers"). These four components will address anticipated regulatory losses of key pest management tools resulting from the implementation of the Food Quality Protection Act of 1996 (FQPA) (see http://www.epa.gov/oppfead1/fqpa/ index.html), other regulatory actions, or other agreements (e.g., Clean Air Act, as amended 1990).

The four components of the Integrated Research, Education, and Extension Competitive Grants Program-Pest Management will support a wide range
of complementary research, education, and extension activities. Together, these four components support activities to assess the use and efficacy of available pest management tools, develop and demonstrate the efficacy of reduced-risk pesticides and other pest management alternatives, and identify possible transition and mitigation strategies that serve as viable pest management options for crops and agro-ecosystems at risk due to anticipated regulatory actions.

By integrating these four separate program components into a single competitive grants program, CSREES has responded to stakeholder suggestions that the Agency develop a coordinated program to address pest management challenges that face the Nation in the short- and long-terms. Projects supported by the four components of the Integrated Activities Pest Management Competitive Grants Program provide a coordinated response to FQPA needs and issues. CSREES also expects that Integrated Research, Education, and Extension Competitive Grants Program—Pest Management projects will be integral components of other CSREES pest management programs such as the Pest Management Alternatives Program (PMAP), the Regional Integrated Pest Management Grants Program (RIPM), the Pesticide Applicator Training program (PAT), the Minor Crops Program (IR-4), and to pest management activities funded under the regional Sustainable Agriculture Research and Education program (SARE) and the National Research Initiative (NRI).
There is no commitment by USDA to fund any particular proposal or to make a specific number of awards.
Approximately $\$ 11$ million will be available to fund proposals in FY 2000 distributed among the program components as follows: CAR-\$952,000, RAMP-\$3,808,000, MBT-\$1,904,000 and Pest Management Centers$\$ 4,322,310$.

## C. Definitions

For the purpose of awarding grants under this program, the following definitions are applicable:
(1) Administrator means the Administrator of the Cooperative State Research, Education, and Extension Service (CSREES) and any other officer or employee of the Department to whom the authority involved my be delegated.
(2) Authorized departmental officer means the Secretary or any employee of the Department who has the authority to issue or modify grant instruments on behalf of the Secretary.
(3) Authorized organizational representative means the president or
chief executive officer of the applicant organization or the official, designated by the president or chief executive officer of the applicant organization, who has the authority to commit the resources of the organization.
(4) Budget period means the interval of time (usually 12 months) into which the project period is divided for budgetary and reporting purposes.
(5) Cash contributions means the applicant's cash outlay, including the outlay of money contributed to the applicant by non-Federal third parties.
(6) Department or USDA means the United States Department of Agriculture.
(7) Education activity means formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.
(8) Extension activity means an act or process that delivers science-based knowledge and informal educational programs to people, enabling them to make practical decisions
(9) Grant means the award by the Secretary of funds to an eligible organization or individual to assist in meeting the costs of conducting, for the benefit of the public, an identified project which is intended and designed to accomplish the purpose of the program as identified in these guidelines.
(10) Grantee means an organization designated in the grant award document as the responsible legal entity to which a grant is awarded.
(11) Integrated means to bring the three components of the agricultural knowledge system (research, education, and extension) together around a problem area or activity.
(12) Matching means that portion of allowable project costs not borne by the Federal Government, including the value of in-kind contributions.
(13) Peer review means an evaluation of a proposed project for scientific or technical quality and relevance performed by experts with the scientific knowledge and technical skills to conduct the proposed work or to give expert advice on the merits of a proposal.
(14) Principal investigator/Project director means the single individual designated by the grantee in the grant application and approved by the Secretary who is responsible for the direction and management of the project.
(15) Prior approval means written approval evidencing prior consent by an authorized departmental officer as defined in (2) above.
(16) Project means the particular activity within the scope of the program supported by a grant award.
(17) Project period means the period, as stated in the award document and modifications thereto, if any, during which Federal sponsorship begins and ends.
(18) Research activity means a scientific investigation or inquiry that results in the generation of knowledge.
(19) Secretary means the Secretary of Agriculture and any other officer or employee of the Department to whom the authority involved may be delegated.
(20) Third party in-kind contributions means non-cash contributions of property or services provided by nonFederal third parties, including real property, equipment, supplies and other expendable property, directly benefitting and specifically identifiable to a funded project or program.
(21) Total integrated, multifunctional research, education, and extension approach means that the combination of grants (although the individual grants may involve only research, education, or extension activities or a combination thereof) awarded under the fiscal year's program components will work together to address the priorities in United States agriculture as determined by the Secretary of Agriculture in consultation with the Advisory Board, that involve integrated research, extension, and education activities.

## D. Eligibility

Proposals may be submitted by colleges and universities as defined in section 1404 of the National
Agricultural research, Extension, and Teaching Policy Act of 1977
(NARETPA). The terms "college" and "university" mean an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which a bachelor's degree or any other higher degree is awarded, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association. Although an applicant may be eligible based on its status as one of these entities, there are factors which may exclude an applicant
from receiving Federal financial and nonfinancial assistance and benefits under this program (e.g., debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information). Eligible applicants may subcontract to organizations not eligible under these requirements.
Please note that a research foundation maintained by a college or university is not eligible to receive an award under this program.

## E. Matching Requirements

## 1. General Requirement

If a grant provides a particular benefit to a specific agricultural commodity, the grant recipient is required to provide funds or in-kind support to match the amount of the grant funds provided. See section 10. c. on "Matching Funds"' under Part III, B, "Content of Proposals" for more details.

## 2. Waiver

CSREES may waive the matching funds requirement specified in the above paragraph for a grant if CSREES determines that (a) the results of the project, while of particular benefit to a specific agricultural commodity, are likely to be applicable to agricultural commodities generally; or (b) the project involves a minor commodity, the project deals with scientifically important research, and the grant recipient is unable to satisfy the matching funds requirement.

## F. Funding Restrictions

CSREES has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of research, education, or extension space; the purchase or installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

## G. Types of Grant Instruments

In FY 2000 all projects will be awarded using a "New Grant" instrument. In future years, projects under the Integrated Research, Education, and Extension Competitive Grants Program authority can be awarded using one of the grant instruments described below:
(1) New grant. This is a grant instrument by which the Department agrees to support a specified level of effort for a project that generally has not been supported previously under this program. This type of grant is approved on the basis of peer review recommendations.
(2) Renewal grant. This is a grant instrument by which the Department agrees to provide additional funding for a project period beyond that approved in an original or amended award, provided that the cumulative period does not exceed the statutory limitation. When a renewal application is submitted, it should include a summary of progress to date from the previous granting period. A renewal grant shall be based upon new application, de novo peer review and staff evaluation, new recommendation and approval, and a new award instrument.
(3) Supplemental grant. This is an instrument by which the department agrees to provide small amounts of additional funding under a new or renewal grant as specified above and may involve a short-term (usually six months or less) extension of the project period beyond that approved in an original or amended award, but in no case may the cumulative period for the project exceed the statutory limitation. A supplement is awarded only if required to assure adequate completion of the original scope of work and if there is sufficient justification to warrant such action. A request of this nature normally will not require additional peer review.

## H. Funding Mechanisms

The two mechanisms by which new, renewal, and supplemental grants shall be awarded are as follows:
(1) Standard grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined time period without the announced intention of providing additional support at a future date.
(2) Continuation grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date, provided that performance has been satisfactory, appropriations are available for this purpose, and continued support will be in the best interests of the Federal government and the public. This kind of mechanism normally will be awarded for an initial one-year period, and any subsequent continuation project grants will be awarded in one-year increments. The award of a continuation project grant to fund an initial or succeeding budget period does not constitute an obligation to fund any subsequent budget period. Unless prescribed otherwise by CSREES, a grantee must submit a separate application for continued support for each subsequent fiscal year.

Requests for such continued support must be submitted in duplicate at least three months prior to the expiration date of the budget period currently being funded. Decisions regarding continued support and the actual funding levels of such support in future years usually will be made administratively after consideration of such factors as the grantee's progress and management practices and the availability of funds. Since initial peer reviews are based upon the full term and scope of the original application, additional evaluations of this type generally are not required prior to successive years' support. However, in unusual cases (e.g., when the nature of the project or key personnel change or when the amount of future support requested substantially exceeds the grant application originally reviewed and approved), additional reviews may be required prior to approving continued funding.

## Part II—Program Description

## A. Project Types

Approximately, $\$ 952,000$ is available for CAR projects in FY 2000. Proposals should be between two to four years in duration with a budget of not more than $\$ 200,000$ per year.

Approximately $\$ 3,808,000$ is available for RAMP projects in FY 2000.
Proposals can be up to five years in duration with a maximum budget of $\$ 500,000$ per year.

Approximately $\$ 1,904,000$ is available for MBT proposals. It is anticipated that $12-15$ grants of up to two years in duration will be awarded in this program component.

Approximately $\$ 4,322,000$ is available for Pest Management Center proposals. Pest Management Centers will be supported for a 3-year period at levels reflective of the activities proposed.

Grants awarded under the Program Area Description of MBT (as described in this RFP) will be issued as "New Grant" instruments and will be awarded as "Standard Grants." Grants awarded under the Program Area Descriptions of CAR, RAMP, and Pest Management Center (as described in this RFP) will be issued as "New Grant" instruments and may be awarded as "Continuation Grants."

## B. Program Area Description

The Integrated Research, Education, and Extension Competitive Grants Program-Pest Management supports efforts to modify existing pest management approaches or develop new methods that address needs created by the implementation of regulatory
actions. Projects supported under this authority must show evidence of research, education, and extension integration at the program or institutional level.

Alternative pest control chemistries and practices resulting from FQPA tolerance reassessment and reregistration should be considered when preparing proposals for this program. These priorities are determined through a critical evaluation of pest management needs for a commodity and the effect of regulatory changes on current pest management practices. These priorities were published in a November 18, 1999, Federal Register notice titled "Pesticide Reregistration Performance Measures and Goals" [64 FR 63036-63045]. This notice is available on the Environmental Protection Agency (EPA) web site at http://www.epa.gov/ fedrgstr/EPAFR-CONTENTS/1999/November/Day-18/ contents.htm/. This notice provides the schedule for completion of regulatory review for high priority chemicals. The overall priorities for FQPA review are also available on the EPA web site at http://www.eps.gov/oppfead1/fqpa/ toleran.htm/.

Activities funded by the Integrated Research, Education, and Extension Competitive Grants Program-Pest Management will address work needed to facilitate grower knowledge and adoption of pesticides that are newly registered or are candidates for registration. Recently-registered chemical pesticides are identified in annual reports on the web site of the EPA Office of Pesticide Programs at http://www.epa.gov/pesticides. Pesticides that are candidates for registration in FY 2000 are named in the interim work plan of the EPA Registration Division. The interim work plan is available on the web at http:// www.epa.gov/opprd001/workplan. Twenty-five new chemicals are included in the work plan in addition to many new uses for 64 alreadyregistered chemicals. The work plan provides the trade name, crops, and company for each chemical and identifies those chemicals that qualified for the EPA reduced-risk status. Biopesticides that are recently registered and those under consideration for registration are identified on the web site at www.epa.gov/pesticides/ biopesticides/. Updates to EPA pesticide priority review and reregistration lists are available at http://www.epa.gov/ pesticides. EPA also issues an electronic newsletter that will announce updates. Sign-up information for the electronic newsletter is available at http:// www.epa.gov/pesticides.

The phase out of methyl bromide is required under Title IV of the Clean Air Act (as amended in 1990) because of its ozone-depleting potential. In October 1998, the Clean Air Act was amended to change the phase out date to 2005 , in harmonization with the date agreed to in the Montreal Protocol. More information on the phase out of methyl bromide is available on the EPA website at http://www.epa. gov/ozone/mbr/ harmoniz.html.
Proposals are solicited for the following program areas:

1. Crops at Risk From FQPA Implementation (CAR) (Program Area 112.1)
(Maximum award: \$200,000 per year for two to four years).
The Crops at Risk from FQPA Implementation (CAR) program is an intermediate-term (two to four years) research, education, and extension competitive grants program with at-risk crops or cropping systems as the focal point. Several crops and cropping systems face potentially severe economic impacts as a result of the possible restrictions or elimination of certain pesticides resulting from implementation of the Food Quality Protection Act (FQPA) of 1996 and other regulatory actions. In the short-term, small-acreage fruit and vegetable crops are most vulnerable. However, many more crops, including large-acreage grain, forage and fiber crops, will be impacted during the pesticide review process. Development of new multipletactic pest management strategies designed to assist producers during the transition is the goal of this program component.
Specific Objectives: a. Evaluate new approaches to pest management techniques and technology (rates, timing,pre-harvest intervals, application methods and equipment, post-harvest treatment etc.) That could reduce or eliminate pesticide residues of concern or the effects of these residues.
b. Develop new pest management tactics based on alternative technologies, including products of genetic engineering, biological organisms, biological pesticides, new chemical pesticides, and cultural practices; and
c. Demonstrate and describe how new tactics can be economically and practically integrated into pest management programs for individual crops.

Updates to EPA pesticide priority review and registration lists are available at http://www.epa.gov/ pesticides. EPA also issues an electronic newsletter that will announce updates.

Sign-up information for the electronic newsletter is available at http:// www.epa.gov/pesticides.

Proposals that address priorities established by stakeholders representing an entire crop production region, consider crosscutting challenges, and show evidence of multi-state or withinstate cooperation regarding research, education, and extension will be given preference.
2. FQPA Risk Avoidance and Mitigation for Major Food Crop Systems Program (RAMP) (Program Area 112.2)
(Maximum award: \$500,000 per year for up to five years).

The FQPA Risk Avoidance and Mitigation for Major Food Crop Systems Program (RAMP) is a long-term (up to five years) research, education, and extension competitive grants program to develop reduced risk pest management strategies for agro-ecosystems. Global markets for food and grain products demand high quality at competitive prices. Growers are faced with meeting market demands and ever-increasing production costs coupled with decreasing or unstable commodity prices. Added to these constraints are concerns posed by implementation of regulatory actions over the next decade. Many of the pest management tools growers have depended on in the past may be restricted or eliminated. Growers face uncertainty regarding which pest management tactics will continue to be available and how to make use of new technologies, such as bioengineered crop innovations and precision agriculture in their production systems. There is a critical need to devise pest management systems that consider all aspects of crop production

Projects supported by RAMP will have a food, fiber and grain production system focus and can include consideration of food safety, occupational safety, water quality and other environmental concerns. The program will address the major acreage cropping systems including, but not limited to, corn, soybean, wheat, cotton and rice, as well as, the fruits and vegetables most important in the human diet, especially the diets of infants and children. Emphasis will be placed on development and implementation of new and innovative pest management systems designed to maintain crop productivity and profitability while addressing environmental quality and human health concerns. The goal of this long-term effort is to eliminate or minimize pesticide residues of concern on foods, in drinking water, and in the environment. This program also
supports projects to reduce occupational risk for producers and their employees. These will be long-term projects and will evolve from in-depth discussions of pest management needs and priorities involving stakeholders. Projects are intended to enhanced stability and sustainability of agricultural production systems and will be multi-state or regional in scale, typically involve multiple cropping systems that define an agroecosystem. A major goal of this effort will be the development of pest management systems that are based on an advanced understanding of cropping system biology and ecology.
Specific Objectives: a. Develop methods of pest management that reduce or eliminate the risk from pesticide residues; and b. Develop and implement information intensive approaches to pest management based on a more complete understanding of crop and pest biology, their interactions and mutual impacts, and factors impacting the stability of pest management systems in major cropping systems.
Proposals that strive to maintain crop economic viability based on a diverse bio-based pest management system are encouraged. Proposals should address priorities established by stakeholders representing an entire cropping system and consider crosscutting challenges, and must show evidence for multi-state and multi-disciplinary cooperation regarding research, education, and extension. Proposals should catalog and review the pest management tactics currently being used in the targeted cropping system, then define opportunities for new pest management approaches as part of the proposal. All proposals should include an outreach component to promote the exchange of pest management information among researchers, extension agents, producers, and commodity groups as it relates to the project. Outreach efforts can make use of publications, website development, field days, workshops or other relevant planning and outreach activities. Successful proposals will provide milestones and independently verifiable indicators that can be used to measure progress and impact across a range of ecological, agronomic and economic criteria. Budgetary provisions should be made to support formal stakeholder reviews after the second field season and at the end of the project.

## 3. Methyl Bromide Transitions Program (MBT) (Progam Area 112.3)

(No Maximum award and up to two years; however, it is anticipated that 1215 grants will be funded).

The Methyl Bromide Transitions Program (MBT) supports the discovery and implementation of practical pest management alternatives for commodities affected by the phase-out of methyl bromide. Projects supported by MBT will focus on short- to intermediate-term solutions for all commodities at risk using presently available or newly developed pest management technologies and practices Since alternatives to methyl bromide that have thus far been developed require different pest management strategies than those used for methyl bromide alone, projects supported by MBT will emphasize the development and implementation of integrated management approaches. This includes increased research, education and extension activities on all commodities at risk, including field trials and other demonstration projects that enhance the adoption of pest management alternatives for all commodities. It also will support the technology transfer of results to growers through education and outreach programs.
Specific Objectives: a. Conduct integrated research, education, and extension activities for pest management alternatives on strawberry, tomato, other vegetables, fruits and nuts;
b. Conduct integrated research, education, and extension activities for pest management alternatives for nurseries, including the floral industry and forest nurseries (e.g., general nursery production, production for pest and pathogen-free rootstocks);
c. Develop extension activities to implement pest management alternatives, including field trials and other demonstration projects that enhance the adoption of alternative management practices; and
d. Increase transfer of results to growers through education and outreach programs that promote the implementation of pest management alternatives.
Proposals that address priorities established by stakeholders, consider crosscutting challenges, and show evidence of multi-state or within-state cooperation involving research, education, and extension will be given preference.

## 4. Pest Management Centers (Program Area 112.4)

(No maximum award; however, budget requests should be at levels reflective of the complexity and intensity of agriculture within the region for a duration up to three years).

USDA has placed a high priority on the establishment of Pest Management Centers as a means of strengthening its
connection with production agriculture, research and extension programs, and agricultural stakeholders throughout the United States. USDA and EPA have recognized the need for a pest management information network that can quickly respond to information needs of the public and private sectors. When fully implemented, Pest Management Centers will help USDA and its partner institutions identify, prioritize and coordinate a national pest management research, extension, and education program implemented on a regional basis.

Pest Management Centers will be the focal point for team building efforts, communication networks, and stakeholder participation within a given region. Pest Management Centers will promote open communication, exchange of information and resources, collaboration, and integration of activities among individuals, institutions, states, and regions into coordinated efforts around common themes that span institutional or geographical boundaries. Pest Management Centers also will bring together and help focus the institutional and individual expertise needed to successfully address a range of pest management issues confronting farmers and other pest managers (e.g., regulatory restrictions, development of pest resistance, invasive species, and biotechnology). When fully implemented, Pest Management Centers will maximize the availability of dispersed expertise, reduce duplication of effort, enhance interdisciplinary and multiorganizational efforts, and provide regional expert information, technology, and education upon which production agriculture, government agencies, and agricultural stakeholders can draw.

The process to develop the Pest Management Centers will begin in FY 2000 with the formation of four geographically-based regional Pest Management Centers with one in each of the north central, northeastern, southern, and western regions of the United States. The four regional Pest Management Centers funded in FY 2000 by this RFP will be instrumental in creating a regional process that will evolve into Agroecological Pest Management Centers in FY 2003, based upon agroecologically defined crop production regions.

Pest Impact Assessment Program funds will be used to implement and support the regional Pest Management Centers. The regional Pest Management Centers will fulfill a real and immediate need in establishing a national 2-way pest management communication network which includes USDA and
other government agencies, scientists at colleges and universities, and stakeholders focusing on pest management issues. These activities, among other things, will ensure broad based stakeholder participation in initiating a 3 -year process to facilitate the planning and development of future Agroecological Pest Management Centers.

Successful applicants for FY 2000 regional Pest Management Centers should present a plan that will demonstrate their capacity to form and fund collaborative information networks that cross traditional institutional, disciplinary, and geographic boundaries to address the region's pest management priorities. The four successful proposals funded in FY 2000 will be expected to conduct the following activities:
a. Establish a team of pest managers, producers and commodity groups, and other stakeholders that represent the diversity of capabilities, institutions, and pest management issues found in the region.
b. Establish a regionally-based pest management information and communication network linking USDA and other Federal agencies with agricultural researchers and stakeholders throughout the region. Among the responsibilities of the network will be to (1) collect, synthesize, and disseminate information on pest management practices; (2) coordinate crop profile development and develop pest management strategy plans for important commodities in the region; and (3) coordinate science reviews of documents related to crop production, pest management, regulatory, health, and environmental risk issues.
c. Facilitate an interactive process designed to identify appropriate boundaries for agroecological pest management areas in the United States. Once determined, agroecological areas will serve to demarcate the Agroecological Pest Management Centers needed to address regional and National priorities. These Agroecological Pest Management Centers will be geographically defined by an appropriate set of criteria, such as agroecological or crop production regions, that reflect principal agricultural production zones in the country and address the broad spectrum of pest management needs within each region. The function of the regional Pest Management Centers will be redistributed in FY 2003 to the newly defined Agroecological Pest Management Centers that will be established in an open and fair competitive process during FY 2003.

The planning for the FY 2003 Pest Management Centers should be an integral part of the proposal for the FY 2000 regional Pest Management Centers Thus applicants should include plans for:
a. Bringing together pest management professionals and stakeholders to establish the pest management information network and to identify and prioritize agroecological pest management needs. Agroecological Pest Management Centers will serve as regional hubs responsible for ensuring efficient access to pest management expertise and data available through colleges and universities.
b. Defining functional agroecologoically based pest management regions within the four geographic regions of the country to facilitate the evolution of regional Pest Management Centers into Agroecological Pest Management Centers.
c. Participating as a regional representative on a national steering committee established by CSREES to harmonize regional pest management needs into a proposed comprehensive national network compatible and complimentary agroecologically based Pest Management Centers.
Proposed budgets could include funding for a regional Pest Management Center director and support staff, and to support the information network. Regional Pest Management Centers will be supported for a 3 -year period. Annual funding beyond the first year will be dependent upon demonstration of the regional Pest Management Center's accomplishments and the continued availability of Federal funds.

## C. Expected Program Outputs and Reporting Requirements

The grantee must prepare an annual report that details all significant activities towards achieving the goals and objectives of the project. The narrative should be succinct and be no longer than five pages, using 12-point, single-spaced type. The report also should include a listing of any students who worked on the project (report graduate degrees awarded and undergraduates trained, as applicable). A budget summary should be attached to this report, which will provide an overview of all monies spent during the reporting period.

## Part III—Preparation of a Proposal

## A. Program Application Materials

Program application materials are available at the Integrated Research, Education, and Extension Competitive

Grants Program website (http:// www.reeusda.gov/integrated/). If you do not have access to our web page or have trouble downloading material, you may contact the Proposal Services Unit, Office of Extramural Programs, USDA/ CSREES at (202) 401-5048. When calling the Proposal Services Unit, please indicate that you are requesting forms for the Integrated Research, Education, and Extension Competitive Grants Program—Pest Management These materials may also be requested via Internet by sending a message with your name, mailing address (not e-mail) and phone number to psb@reeusda.gov. State that you want a copy of the Program Description and application materials (orange book) for the Fiscal Year 2000 Integrated Research, Education, and Extension Competitive Grants Program-Pest Management.

## B. Content of Proposals

## 1. General

The proposal should follow these guidelines, enabling reviewers to more easily evaluate the merits of each proposal in a systematic, consistent fashion:
(a) The proposal should be prepared on only one side of the page using standard size ( $81 / 2^{\prime \prime} \times 11^{\prime \prime}$ ) white paper, one inch margins, typed or word processed using no type smaller than 12 point font, and single or double spaced. Use an easily readable font face (e.g., Geneva, Helvetica, Times Roman).
(b) Each page of the proposal, including the Project Summary, budget pages, required forms, and any appendices, should be numbered sequentially.
(c) The proposal should be stapled in the upper left-hand corner. Do not bind. An original and 14 copies ( 15 total) must be submitted in one package, along with 10 copies of the "Project Summary" as a separate attachment.
(d) If applicable, proposals should include original illustrations (photographs, color prints, etc.) in all copies of the proposal to prevent loss of meaning through poor quality reproduction.

## 2. Cover Page (Form CSREES-661)

Each copy of each grant proposal must contain an "Application for Funding", Form CSREES-661. One copy of the application, preferably the original, must contain the pen-and-ink signature(s) of the proposing principal investigator(s)/project director(s) (PI/PD) and the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant
resources to the project. Any proposed PI/PD or co-PI/PD whose signature does not appear on Form CSREES-661 will not be listed on any resulting grant award. Complete both signature blocks located at the bottom of the
"Application for Funding" form.
Form CSREES-661 serves as a source document for the CSREES grant database; it is therefore important that it be completed accurately. The following items are highlighted as having a high potential for errors or
misinterpretations:
(a) Title of Project (Block 6). The title of the project must be brief (80-character maximum), yet represent the major thrust of the effort being proposed. Project titles are read by a variety of nonscientific people; therefore, highly technical words or phraseology should be avoided where possible. In addition, introductory phrases such as "investigation of" or "research on" "education for" or "outreach that" should not be used.
(b) Program to Which You Are Applying (Block 7). "Integrated Research, Education, and Extension Competitive Grants Program—Pest Management."
(c) Program Area and Number (Block 8). The name of the program component, e.g., CAR, 112.1 or RAMP, 112.2 should be inserted in this block.
(d) Type of Award Request (Block 13). Check the block for "new."
(e) Principal Investigator(s)/Project Director(s) (PI/PD) (Block 15). The designation of excessive numbers of coPI/PD's creates problems during final review and award processing. Listing multiple co-PI/PD's, beyond those required for genuine collaboration, is therefore discouraged. Note that providing a Social Security Number is voluntary, but is an integral part of the CSREES information system and will assist in the processing of the proposal.
(f) Type of Performing Organization (Block 18). A check should be placed in the box beside the type of organization which actually will carry out the effort. For example, if the proposal is being submitted by an 1862 Land-Grant Institution but the work will be performed in a department, laboratory, or other organizational unit of an agricultural experiment station, box " 03 " should be checked. If portions of the effort are to be performed in several departments, check the box that applies to the individual listed as PI/PD \#1 in Block 15.a.
(g) Other Possible Sponsors (Block 22). List the names or acronyms of all other public or private sponsors including other agencies within USDA and other programs funded by CSREES
to whom your application has been or might be sent. In the event you decide to send your application to another organization or agency at a later date, you must inform the identified CSREES Program Director as soon as practicable. Submitting your proposal to other potential sponsors will not prejudice its review by CSREES; however, duplicate support for the same project will not be provided. Complete the "Application for Funding," Form CSREES-661, in its entirety.
(h) One copy of the "Application for Funding" form must contain the signatures (in ink) of the PI/PD's and authorized organizational representative for the applicant organization.

## 3. Table of Contents

For consistency and ease in locating information, each proposal must contain a detailed Table of Contents just after the cover page. The Table of Contents should contain page numbers for each component of the proposal. Page numbers should begin with the first page of the Project Description.

## 4. Project Summary

The proposal must contain a Project Summary of 250 words or less on a separate page which should be placed immediately after the Table of Contents and should not be numbered. The names and affiliated organizations of all PI/PD's and co-PI/PD's should be listed on this form as well as the title of the project, in addition to the title of the project. The summary should be a selfcontained, specific description of the activity to be undertaken and should focus on: overall project goal(s) and supporting objectives; plans to accomplish project goal(s); and relevance of the project to the Integrated Competitive Grants Program-Pest Management. The importance of a concise, informative Project Summary cannot be overemphasized.

## 5. Project Description

For CAR, RAMP, and MBT proposals, the project description may not exceed 15 single- or double-spaced pages. Project descriptions for Pest Management Centers may not exceed 20 single- or double-spaced pages. The Project Description should include the following components.
a. Introduction and Rationale: Include a clear statement of the problems to be addressed and goals expected to be accomplished. Describe the supporting objectives; questions; research, education and/or extension components to be included; and/or partners that will be used to accomplish the goal(s) set. In addition, this section should include in-
depth information on the following, when applicable:

1. Estimates of the magnitude of the issues and their relevance to stakeholders and to ongoing StateFederal food and agricultural research, education and extension programs.
2. Role of stakeholders in problem identification, planning, implementation and evaluation as appropriate.
3. Reasons for having the work performed by the proposing institution. 4. For CAR, RAMP, and MBTP proposals only: A detailed plan for the research, education, and technology transfer that will be used to implement the pest management alternative solution in the field, and should identify milestones and independently verifiable indicators.
b. Objectives: Clear, concise, complete, and logically arranged statement(s) of the specific aims of the proposed effort must be included in all proposals. Pest Management Center proposals should indicate which information needs will be given first priority, and identify major Center deliverables, such as crop profiles, reports, databases, and Web sites.
c. Procedures: For CAR, RAMP, and MBTP Proposals: The procedures or methodology to be applied to the proposed effort should be explicitly stated. This section should include but not necessarily be limited to:
4. A description of the proposed investigations and/or experiments in the sequence in which it is planned to carry them out;
5. Techniques to be employed, including their feasibility;
6. Kinds of results expected;
7. Means by which data will be analyzed or interpreted;
8. Pitfalls that might be encountered; and
9. Limitations to proposed procedures.

For Pest Management Center Proposals: The proposal should provide details regarding the procedures and processes that will be used to manage the Pest Management Center. Proposals should include, but not necessarily be limited to, the following aspects of Center management:

1. Identify the Center Director and other key personnel who will comprise the Center's staff;
2. Describe how the Pest Management Center will be managed, including how and by who work priorities will be established (e.g., steering and stakeholder advisory committees), how partner institutions and stakeholders will participate in Center management, how information collected by the Center
will be aggregated and disseminated, and how Center activities will be coordinated with the activities of the other three regional Centers;
3. Describe the open and competitive process that will be used to identify the institutions and individuals that will form the information network in the region (Centers should build upon existing regional coordination efforts to the extent possible or should indicate why existing efforts are not relevant. The proposal should also describe how coordination with the National Agricultural Statistics Service (NASS), the Economic Research Service (ERS), EPA, the Agricultural Research Service (ARS), and other government agencies will be ensured;
4. Provide an action plan, including milestones, for the establishment of the Pest Management Center, the regional information network, the participatory process to identify agro-ecosystems centers; and
5. Describe the process that will be used to hold an "independent" evaluation of the Center on an annual basis (Members of the review team should reflect the Center's "community of interest'", including member institutions, Center clients, and stakeholder groups. The results of the annual review will be used by CSREES to determine whether continued funding of the Center is justified.).
d. Cooperation and Institutional Units Involved: Cooperative and multi-state applications are encouraged. Identify each institutional unit contributing to the project. Identify each institution in a multiple-institution proposal and designate the lead institution. When appropriate, the project should be coordinated with the efforts of other State and/or national programs. Clearly define the roles and responsibilities of each institutional unit of the project team, if applicable.
e. Literature Review: A summary of pertinent publications with emphasis on their relationship to the effort being proposed should be provided and should include all important and recent publications from other institutions, as well as those from the applicant institution. The citations themselves should be accurate, complete, and written in an acceptable journal format.

## 6. Appendices to Project Description

Appendices to the Project Description are allowed if they are directly germane to the proposed project and are limited to a total of two of the following: reprints (papers that have been published in peer reviewed journals) and preprints (manuscripts in press for a peer reviewed journal; these must be
accompanied by a letter of acceptance from the publishing journal).

## 7. Key Personnel

All senior personnel who are expected to be involved in the effort must be clearly identified. For each person, the following should be included:
a. The roles and responsibilities of each PI/PD and/or collaborator should be clearly described;
b. An estimate of the time commitment involved for each PI/PD and/or collaborator; and
c. Vitae of each PI/PD, senior associate, and other professional personnel. This section should include vitae of all key persons who are expected to work on the project, whether or not CSREES funds are sought for their support. The vitae should be limited to two (2) pages each in length, excluding publications listings. A chronological list of all publications in refereed journals during the past four (4) years, including those in press, must be provided for each project member for which a curriculum vitae is provided. Also list only those non-refereed technical publications that have relevance to the proposed project. All authors should be listed in the same order as they appear on each paper cited, along with the title and complete reference as these usually appear in journals.

## 8. Conflict-of-Interest List

A Conflict-of-Interest List must be provided for all individuals involved in the project (identified as key personnel). Each list should be on a separate page and include alphabetically the full names of the individuals in the following categories: (a) All collaborators on projects within the past four years, including current and planned collaborations; (b) all coauthors on publications within the past four years, including pending publications and submissions; (c) all persons in your field with whom you have had a consulting or financial arrangement within the past four years, who stand to gain by seeing the project funded; and (d) all thesis or postdoctoral advisees/advisors within the past four years (some may wish to call these life-time conflicts). This form is necessary to assist program staff in excluding from proposal review those individuals who have conflicts-ofinterest with the personnel in the grant proposal. The Program Director must be informed of any additional conflicts-ofinterest that arise after the proposal is submitted.
9. Collaborative and/or Subcontractual Arrangements

If it will be necessary to enter into formal consulting or collaborative arrangements with others, such arrangements should be fully explained and justified. In addition, evidence should be provided that the collaborators involved have agreed to render these services. If the need for consultant services is anticipated, the proposal narrative should provide a justification for the use of such services, a statement of work to be performed, and a resume or curriculum vita for each consultant. For purposes of proposal development, informal day-today contacts between key project personnel and outside experts are not considered to be collaborative arrangements and thus do not need to be detailed.

All anticipated subcontractual arrangements also should be explained and justified in this section. A proposed statement of work and a budget for each arrangement involving the transfer of substantive programmatic work or the providing of financial assistance to a third party must be provided. Agreements between departments or other units of your own institution and minor arrangements with entities outside of your institution (e.g., requests for outside laboratory analyses) are excluded from this requirement.

If you expect to enter into subcontractual arrangements, please note that the provisions contained in 7 CFR Part 3019, USDA Uniform Administrative Requirements for Grant and Other Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, and the general provisions contained in 7 CFR Part 3015.205, USDA Uniform Federal Assistance Regulations, flow down to subrecipients. In addition, required clauses from Sections 40-48 ("Procurement Standards") and Appendix A ("Contract Provisions’’) to 7 CFR Part 3019 should be included in final contractual documents, and it is necessary for the subawardee to make a certification relating to debarment/ suspension.

## 10. Budget (Form CSREES-55)

a. Budget Form. Prepare the budget, Form CSREES-55, in accordance with instructions provided. A budget form is required for each year of requested support. In addition, a cumulative budget is required detailing the requested total support for the overall project period. The budget form may be reproduced as needed by applicants. Funds may be requested under any of
the categories listed on the form, provided that the item or service for which support is requested is allowable under the authorizing legislation, the applicable Federal cost principles, and these program guidelines, and can be justified as necessary for the successful conduct of the proposed project. Applicants must also include a Budget Narrative to justify their budgets (see section b below.)
The following guidelines should be used in developing your proposal budget(s):

1. Salaries and Wages. Salaries and wages are allowable charges and may be requested for personnel who will be working on the project in proportion to the time such personnel will devote to the project. If salary funds are requested, the number of Senior and Other Personnel and the number of CSREESFunded Work Months must be shown in the spaces provided. Grant funds may not be used to augment the total salary or rate of salary of project personnel or to reimburse them for time in addition to a regular full-time salary covering the same general period of employment Salary funds requested must be consistent with the normal policies of the institution.
2. Fringe Benefits. Funds may be requested for fringe benefit costs if the usual accounting practices of your organization provide that organizational contributions to employee benefits (social security, retirement, etc.) be treated as direct costs. Fringe benefit costs may be included only for those personnel whose salaries are charged as a direct cost to the project.
3. Nonexpendable Equipment. Nonexpendable equipment means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $\$ 5,000$ (or lower depending on institutional policy) or more per unit. As such, items of necessary instrumentation or other nonexpendable equipment should be listed individually by description and estimated cost in the Budget Narrative. This applies to revised budgets as well, as the equipment item(s) and amount(s) may change.
4. Materials and Supplies. The types of expendable materials and supplies which are required to carry out the project should be indicated in general terms with estimated costs in the Budget Narrative.
5. Travel. The type and extent of travel and its relationship to project objectives should be described briefly and justified. If foreign travel is proposed, the country to be visited, the
specific purpose of the travel, a brief itinerary, inclusive dates of travel, and estimated cost must be provided for each trip. Airfare allowances normally will not exceed round-trip jet economy air accommodations. U.S. flag carriers must be used when available. See 7 CFR Part 3015.205(b)(4) for further guidance.
6. Publication Costs/Page Charges. Include anticipated costs associated with publications in a journal (preparing and publishing results including page charges, necessary illustrations, and the cost of a reasonable number of coverless reprints) and audio-visual materials that will be produced. Photocopying and printing brochure, etc., should be shown in Section I., "All Other Direct Costs" of Form CSREES-55.
7. Computer (ADPE) Costs. Reimbursement for the costs of using specialized facilities (such as a university- or department-controlled computer mainframe or data processing center) may be requested if such services are required for completion of the work.
8. All Other Direct Costs. Anticipated direct project charges not included in other budget categories must be itemized with estimated costs and justified in the Budget Narrative. This also applies to revised budgets, as the item(s) and dollar amount(s) may change. Examples may include space rental at remote locations, subcontractual costs, and charges for consulting services, telephone, facsimile, shipping costs, and fees necessary for laboratory analyses. You are encouraged to consult the "Instructions for Completing Form CSREES-55, Budget," of the Application Kit for detailed guidance relating to this budget category. Form AD-1048 must be completed by each subcontractor or consultant and retained by the grantee. Pest Management Centers proposals should indicate that sub-contractual arrangements are anticipated, but should not identify specific institutions. Successful Pest Management Center applicants will be expected to conduct an open and competitive process to identify institutional members of its regionallybased information network, after which subcontractual arrangements can be made between the Center's host institution and member institutions.
9. Indirect Costs. Section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310) limits indirect costs for this program to 19 percent of total Federal funds provided under each award. Therefore the recovery of indirect costs under this program may
not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 19 percent of total Federal funds awarded. If no rate has been negotiated, a reasonable dollar amount (equivalent to less than 19 percent of total Federal funds requested) in lieu of indirect costs may be requested, subject to approval by USDA.
b. Budget Narrative. All budget categories, excluding Indirect Costs, for which support is requested, must be individually listed (with costs) and justified on a separate sheet of paper and placed immediately behind the Budget Form. Explanations of matching funds or lack there of on commodityspecific projects also are to be included in this section.
c. Matching Funds. If an applicant concludes that matching funds are not required as specified under Part I (e), a justification should be included in the Budget Narrative. CSREES will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. CSREES retains the right to make final determinations regarding matching requirements.

For those grants requiring matching funds as specified under Part I (e), proposals should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Written verification means:
(a) For any third party cash contributions, a separate pledge agreement for each donation, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) the dollar amount of the cash donation; and (5) a statement that the donor will pay the cash contribution during the grant period; and
(b) For any third party in-kind contributions, a separate pledge agreement for each contribution, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) a good faith estimate of the current fair market value of the third party in-kind contribution; and (5) a statement that the donor will make the contribution during the grant period.

The sources and amount of all matching support from outside the applicant institution should be summarized on a separate page and placed in the proposal immediately following the Budget Narrative. All pledge agreements must be placed in the proposal immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circular A-21, Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

## 11. Current and Pending Support (Form CSREES-663)

All proposals must contain Form CSREES-663 listing other current public or private support (including in-house support) to which key personnel identified in the proposal have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Analogous information must be provided for any pending proposals that are being considered by, or that will be submitted in the near future to, other possible sponsors, including other USDA Programs or agencies. Concurrent submission of identical or similar proposals to the possible sponsors will not prejudice proposal review or evaluation by the CSREES for this purpose. However, a proposal that duplicates or overlaps substantially with a proposal already reviewed and funded (or to be funded) by another organization or agency will not be funded under this program. Note that the project being proposed should be included in the pending section of the form.

## 12. Assurance Statement(s), (Form CSREES-662)

A number of situations encountered in the conduct of projects require special assurances, supporting documentation, etc., before funding can be approved for the project. In addition to any other situation that may exist with regard to a particular project, it is expected that some applications submitted in response to these guidelines will involve the following:
a. Recombinant DNA or RNA Research. As stated in 7 CFR Part 3015.205 (b)(3), all key personnel identified in the proposal and all endorsing officials of the proposing organization are required to comply with the guidelines established by the National Institutes of Health entitled,
"Guidelines for Research Involving Recombinant DNA Molecules," as revised. If your project proposes to use recombinant DNA or RNA techniques, you must so indicate by checking the "yes" box in Block 19 of Form CSREES661 (the Cover Page) and by completing Section A of Form CSREES-662. For applicable proposals recommended for funding, Institutional Biosafety Committee approval is required before CSREES funds will be released.
b. Animal Care. Responsibility for the humane care and treatment of live vertebrate animals used in any grant project supported with funds provided by CSREES rests with the performing organization. Where a project involves the use of living vertebrate animals for experimental purposes, all key project personnel identified in a proposal and all endorsing officials of the proposing organization are required to comply with the applicable provisions of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 et seq.) and the regulations promulgated thereunder by the Secretary in 9 CFR Parts 1, 2, 3, and 4 pertaining to the care, handling, and treatment of these animals. If your project will involve these animals, you should check "yes" in block 20 of Form CSREES-661 and complete Section B of Form CSREES-662. In the event a project involving the use of live vertebrate animals results in a grant award, funds will be released only after the Institutional Animal Care and Use Committee has approved the project.
c. Protection of Human Subjects. Responsibility for safeguarding the rights and welfare of human subjects used in any grant project supported with funds provided by CSREES rests with the performing organization. Guidance on this issue is contained in the National Research Act, Pub. L. No. 93-348, as amended, and implementing regulations promulgated by the Department under 7 CFR Part 1c. If you propose to use human subjects for experimental purposes in your project, you should check the "yes" box in Block 21 of Form CSREES-661 and complete Section C of Form CSREES662. In the event a project involving human subjects results in a grant award, funds will be released only after the appropriate Institutional Review Board has approved the project.

## 13. Certifications

Note that by signing Form CSREES661 the applicant is providing the certifications required by 7 CFR Part 3017, as amended, regarding Debarment and Suspension and Drug Free Workplace, and 7 CFR Part 3018, regarding Lobbying. The certification
forms are included in the application package for informational purposes only. These forms should not be submitted with the proposal since by signing form CSREES-661 your organization is providing the required certifications. If the project will involve a subcontractor or consultant, the subcontractor/consultant should submit a form AD-1048 to the grantee organization for retention in their records. This form should not be submitted to USDA.

## 14. Compliance With the National Environmental Policy Act (NEPA) (Form CSREES-1234)

As outlined in 7 CFR Part 3407 (the Cooperative State Research, Education, and Extension Service regulations implementing NEPA), the environmental data for any proposed project is to be provided to CSREES so that CSREES may determine whether any further action is needed. In some cases, however, the preparation of environmental data may not be required. Certain categories of actions are excluded from the requirements of NEPA.

In order for CSREES to determine whether any further action is needed with respect to NEPA, pertinent information regarding the possible environmental impacts of a particular project is necessary; therefore, Form CSREES-1234, "NEPA Exclusions Form," must be included in the proposal indicating whether the applicant is of the opinion that the project falls within a categorical exclusion and the reasons therefore. If it is the applicant's opinion that the proposed project falls within the categorical exclusions, the specific exclusion must be identified. Form CSREES-1234 and supporting documentation should be included as the last page of this proposal.

Even though a project may fall within the categorical exclusions, CSREES may determine that an Environmental Assessment or an Environmental Impact Statement is necessary for an activity, if substantial controversy on environmental grounds exists or if other extraordinary conditions or circumstances are present which may cause such activity to have a significant environmental effect.

## C. Submission of Proposals

## 1. When To Submit (Deadline Date)

Proposals must be transmitted by June 6,2000 , as indicated by postmark or date of courier bill of lading. Proposals transmitted after this date will not be considered for funding.

## 2. What To Submit

An original and 14 copies must be submitted. In addition submit 10 copies of the proposal's Project Summary. All copies of the proposals and the Project Summaries must be submitted in one package.

## 3. Where To Submit

Applicants are strongly encouraged to submit completed proposals via overnight mail or delivery service to ensure timely receipt by the USDA. The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program -Pest Managment; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.
Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program-Pest Management; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250-2245.

## D. Acknowledgment of Proposals

The receipt of all proposals will be acknowledged by e-mail. Therefore, applicants strongly are encouraged to provide e-mail addresses, where designated, on the Form CSREES-661. If the applicant's email address is not indicated, CSREES will acknowledge receipt of proposal by letter.

Once the proposal has been assigned an identification number, please cite that number on all future correspondence. If the applicant does not receive an acknowledgment within 60 days of the submission deadline, please contact the Program Director.

## Part IV—Review Process

## A. General

Each proposal will be evaluated using a 3-part process. First, each proposal will be screened to ensure that it meets the administrative requirements as set forth in this request for proposals-tier review process. Second, a panel will consider the relevance of the proposal to program objectives. Third, a technical peer panel will consider the technical merits of the proposal. The relevancy panel will be comprised of representatives from USDA and other federal agencies, farm and commodity
organizations, environmental and consumer groups, experts from colleges and universities, and others as needed. The technical peer panel will include representatives with appropriate scientific backgrounds from colleges and universities, USDA, EPA, and organizations with research, education, and extension expertise as needed. Funding determinations will come from a rank-ordered list of projects based on the combined relevancy and scientific peer panel scores. CSREES has found the above review process most appropriate for evaluating pest management grant proposals as proven through the administration of the Pest Management Alternatives Research Program as authorized under the Competitive, Special, and Facilities Research Grant Act.
Overall, peer review panel members will be selected based upon their training and experience in relevant scientific, education or extension fields taking into account the following factors: (a) The level of formal scientific technical education, and extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education and/or extension activities; (b) the need to include as peer reviewers experts from various areas of specialization within relevant scientific, education, and extension fields; (c) the need to include as reviewers other experts (producers, range or forest managers/ operators, consumers, etc.) who can assess relevance of the proposals to targeted audiences and to program needs; (d) the need to include as peer reviewers experts from a variety of organizational types (e.g., colleges, universities, industry, state and Federal agencies, private profit and non-profit organizations), and geographic locations; (e) the need to maintain a balanced composition of peer review groups with regard to minority and female representation and an equitable age distribution; and (f) the need to include members that can judge the effective usefulness to producers and the general public of each proposal.

## B. Evaluation Criteria

Priority will be given for integrated, multifunctional research, education, and extension projects.
The criteria used to evaluate proposals submitted to the Integrated Research, Education, and Extension Competitive Grants Program-Pest Management will vary depending on which of the four program components you are requesting funding from. The two sets of evaluation criteria are listed below.

1. Evaluation Criteria for CAR, RAMP, and MBT Proposals

Proposals for CAR, RAMP, and MBT funding will be evaluated based on the criteria described below. The relevancy panel will assign up to 30 points based on Criterion a, and the technical panel will assign up to 70 points based on Criteria b-f. The criteria are listed below.
a. Relevance to Program Objectives (30 points): Factors that will be considered include the importance of the crop/pest combination (particularly agronomic and economic considerations; e.g., magnitude of the pest problem if a widely used pesticide is no longer available), number of crops and pesticides addressed, user involvement in planning and implementation, potential for rapid integration into production practices, and demonstration of consideration of existing pest management programs.
b. Importance of the Problem (10 points): particularly ecological and agronomic considerations.
c. Technical Quality of the Approach (15 points): include the feasibility of attaining objectives; and the adequacy of professional training and experience, facilities and equipment.
d. Potential to Reduce Reliance on Pesticides (15 points).
e. Level of End-User Involvement (20 points): Examples are grower or commodity group involvement in planning or conducting research trials and demonstrations.
f. Appropriateness of the Budget (10 points).

## 2. Evaluation Criteria for Pest Management Center Proposals

Proposals for Pest Management Center funding will be evaluated based on the criteria described below. The relevancy panel will assign up to 30 points based on Criterion a, and the technical panel will assign up to 70 points based on Criteria b-e. The criteria are listed below.
a. Relevance to Program Objectives (30 points).
b. Appropriateness of Process to Establish Information Network (20 points): The process to establish the information network should ensure that all eligible colleges and universities have an opportunity to be become a member of the regional Center's information network.
c. Capacity to Attain Program Objectives (20 points): Factors that will be considered include the ability to provide leadership to form a broadbased regional information network; the strength of the action plan for
development of Pest Management Centers organized around crop production regions (agro-ecosystems); the ability to foster research, extension and education collaborations, interdisciplinary teams, and interinstitutional partnerships; the adequacy, professional training and experience of Center staff; and the level of institutional support for Center including facilities and equipment.
d. Level of End-User Involvement (20 points): Factors that will be considered include evidence that stakeholders were consulted during proposal preparation and will participate in operation of the Center, and the ability to establish partnerships with stakeholders to accomplish Center objectives.
e. Appropriateness of the Budget (10 points): The budget should be reflective of the complexity and intensity of agriculture within the region.

## C. Conflicts-of-Interest and Confidentiality

During the peer evaluation process, extreme care will be taken to prevent any actual or perceived conflicts-ofinterest that may impact review or evaluation. For the purpose of determining conflicts-of-interest, the academic and administrative autonomy of an institution shall be determined by reference to the January 1998 issue of the Codebook for Compatible Statistical Reporting of Federal Support to Universities, Colleges, and Nonprofit Institutions, prepared by Quantum Research Corporation for the National Science Foundation.

Names of submitting institutions and individuals, as well as proposal content and peer evaluations, will be kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process. Therefore, the names of the reviewers will not be released to applicants. At the end of the fiscal year, names of panelists will be made available in such a way that the panelists cannot be identified with the review of any particular proposal.

## Part V—Additional Information

## A. Access To Review Information

Copies of summary reviews, not including the identity of reviewers, will be sent to the applicant PI/PD after the review process has been completed.

## B. Grant Awards

## (1) General

Within the limit of funds available for such purpose, the awarding official of

CSREES shall make grants to those responsible, eligible applicants whose proposals are judged most meritorious under the procedures set forth in this RFP. The date specified by the awarding official of CSREES as the effective date of the grant shall be no later than September 30 of the Federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. It should be noted that the project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by CSREES under this RFP shall be expended solely for the purpose for which the funds are granted in accordance with the approved application and budget, the regulations, the terms and conditions of the award, the applicable Federal cost principles, and the Department's assistance regulations (parts 3015 and 3019 of 7 CFR).
(2) Organizational Management Information
Specific management information relating to an applicant shall be submitted on a one-time basis as part of the responsibility determination prior to the award of a grant identified under this RFP, if such information has not been provided previously under this or another CSREES program. CSREES will provide copies of forms recommended for use in fulfilling these requirements as part of the preaward process.
(3) Grant Award Document and Notice of Grant Award

The grant award document shall include at a minimum the following:
(a) Legal name and address of performing organization or institution to whom the Administrator has awarded a grant under the terms of this request for proposals;
(b) Title of project;
(c) Name(s) and address(es) of PI/PD's chosen to direct and control approved activities;
(d) Identifying grant number assigned by the Department;
(e) Project period, specifying the amount of time the Department intends to support the project without requiring recompetition for funds;
(f) Total amount of Departmental financial assistance approved by the Administrator during the project period;
(g) Legal authority(ies) under which the grant is awarded;
(h) Approved budget plan for categorizing allocable project funds to
accomplish the stated purpose of the grant award; and
(i) Other information or provisions deemed necessary by CSREES to carry out its respective granting activities or to accomplish the purpose of a particular grant.

The notice of grant award, in the form of a letter, will be prepared and will provide pertinent instructions or information to the grantee that is not included in the grant award document.

## C. Use of Funds; Changes

(1) Delegation of Fiscal Responsibility

Unless the terms and conditions of the grant state otherwise, the grantee may not in whole or in part delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of grant funds.

## (2) Changes in Project Plans

(a) The permissible changes by the grantee, PI/PD(s), or other key project personnel in the approved project grant shall be limited to changes in methodology, techniques, or other aspects of the project to expedite achievement of the project's approved goals. If the grantee and/or the PI/PD(s) are uncertain as to whether a change complies with this provision, the question must be referred to the CSREES Authorized Departmental Officer (ADO) for a final determination.
(b) Changes in approved goals or objectives shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes. In no event shall requests for such changes be approved which are outside the scope of the original approved project.
(c) Changes in approved project leadership or the replacement or reassignment of other key project personnel shall be requested by the grantee and approved in writing by the awarding official of CSREES prior to effecting such changes.
(d) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the grantee and approved in writing by the ADO prior to effecting such transfers, unless prescribed otherwise in the terms and conditions of the grant.
(e) Changes in Project Period: The project period may be extended by CSREES without additional financial support, for such additional period(s) as the ADO determines may be necessary to complete or fulfill the purposes of an approved project, but in no case shall the total project period exceed five
years. Any extension of time shall be conditioned upon prior request by the grantee and approval in writing by the ADO, unless prescribed otherwise in the terms and conditions of a grant.
(f) Changes in Approved Budget: Changes in an approved budget must be requested by the grantee and approved in writing by the ADO prior to instituting such changes if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or in the grant award.

## D. Applicable Federal Statutes and Regulations

Several Federal statutes and regulations apply to grant proposals considered for review and to project grants awarded under this program. These include, but are not limited to:

7 CFR Part 1.1—USDA
implementation of the Freedom of Information Act.
7 CFR Part 3—USDA implementation of OMB Circular No. A-129 regarding debt collection.
7 CFR Part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as amended.

7 CFR Part 3015—USDA Uniform Federal Assistance Regulations, implementing OMB directives (i.e., Circular Nos. A-21 and A-122) and incorporating provisions of 31 U.S.C. 6301-6308 (the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95-224), as well as general policy requirements applicable to recipients of Departmental financial assistance.

7 CFR Part 3017—USDA
implementation of Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants).
7 CFR Part 3018—USDA
implementation of Restrictions on Lobbying. Imposes prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans.

7 CFR Part 3019—USDA
implementation of OMB Circular A110, Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other
Nonprofit Organizations.
7 CFR Part 3052—USDA
implementation of OMB Circular No. A133, Audits of States, Local
Governments, and Non-profit
Organizations.

7 CFR Part 3407-CSREES procedures to implement the National Environmental Policy Act of 1969, as amended.

29 U.S.C. 794 (section 504, Rehabilitation Act of 1973) and 7 CFR Part 15B (USDA implementation of statute)—prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.
35 U.S.C. 200 et seq.-Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs
(implementing regulations are contained in 37 CFR Part 401).

## E. Confidential Aspects of Proposals

 and AwardsWhen a proposal results in a grant, it becomes a part of the record of CSREES
transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be clearly marked within the proposal. The original copy of a proposal that does not result in a grant will be retained by the Agency for a period of one year. Other copies will be destroyed. Such a proposal will be released only with the consent of the applicant or to the extent required by law. A proposal may be withdrawn at any time prior to the final action thereon.

## F. Regulatory Information

For the reasons set forth in the final Rule-related Notice to 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995, as amended (44 U.S.C. chapter 35), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524-0022.

Done at Washington, D.C., this 4th day of April 2000.

## Charles W. Laughlin,

Administrator, Cooperative State Research, Education, and Extension Service.

Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants ProgramNational Food Safety Initiative: Request for Proposals and Request for Input; Notice

## DEPARTMENT OF AGRICULTURE

## Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative: Request for Proposals and Request for Input

AGENCY: Cooperative State Research, Education, and Extension Service, USDA.
ACTION: Notice of request for proposals and request for input.
summary: The Cooperative State Research, Education and Extension Service (CSREES) announces the availability of grant funds and requests proposals for the Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative for fiscal year (FY) 2000 to support integrated, multifunctional agricultural research, extension, and education activities that address food safety priorities in United States agriculture. The amount available for support of this program in FY 2000 is approximately $\$ 14,277,000$.
This notice sets out the objectives for these projects, the eligibility criteria for projects and applicants, the application procedures, and the set of instructions needed to apply for a Food Safety grant under this authority.
By this notice, CSREES additionally solicits stakeholder input from any interested party regarding the FY 2000 Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative for use in the development of any future requests for proposals for this program.
DATES: Proposals must be transmitted by June 6,2000 , as indicated by the postmark or date on courier bill of lading. Proposals transmitted after this date will not be considered for funding. Comments regarding this request for proposals are requested within six months from the issuance of this notice. Comments received after that date will be considered to the extent practicable. adDresses: The address for handdelivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program-National Food Safety Initiative; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250-2245.

Written user comments should be submitted by first-class mail to: Policy and Program Liaison Staff; Office of Extramural Programs; USDA-CSREES; STOP 2299; 1400 Independence
Avenue, S.W.; Washington, D.C. 202502299; or via e-mail to: RFP-
OEP@reeusda.gov. In your comments, please include the name of the program and the fiscal year of the RFP to which you are responding.
FOR FURTHER INFORMATION: Applicants and other interested parties are encouraged to contact Dr. Jan Singleton; National Program Leader, Food Science and Food Safety; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2220; 1400 Independence
Avenue, S.W.; Washington, D.C. 202502220; telephone: (202) 401-1954; fax: (202) 401-5179; email:

## Stakeholder Input

CSREES is soliciting comments regarding this solicitation of applications from any interested party. These comments will be considered in the development of any future RFP for the program. Such comments will be forwarded to the Secretary or his designee for use in meeting the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). This section requires the Secretary to solicit and consider input on a current RFP from persons who conduct or use agricultural research, education and extension for use in formulating future RFPs for competitive programs. Comments should be submitted as provided for in the ADDRESSES and DATES portions of this Notice.

## Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under 10.303, Integrated Research, Education, and Extension Competitive Grants Program.

## Part I—General Information

## A. Legislative Authority and Background

Section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626) authorized the Secretary of Agriculture to establish a research, education, and extension competitive grants program to provide funding for integrated, multifunctional agricultural research, extension, and education activities. Subject to the availability of appropriations to carry out this program, the Secretary may award grants to colleges and universities (as defined by 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977
(NARETPA) (7 U.S.C. 3103)) on a competitive basis for integrated research, education, and extension projects. Grants are to be awarded to address priorities in United States agriculture that involve integrated research, education, and extension activities as determined by the Secretary in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board.

On November 19, 1999, the Secretary published in the Federal Register (64

FR 63560) a notice that the administration of this grant program had been delegated to the Cooperative State Research, Education, and Extension Service (CSREES). This notice also solicited public comment from persons who use or conduct research, extension, or education regarding the priorities to be addressed by this new program. In addition, this notice announced a public meeting to obtain comments to use in developing the proposed rule and requests for proposals for this new grant program. The public meeting was held on December 6, 1999. All the comments and the official transcript of the meeting have been made available for review on the CSREES web page (http://
www.reeusda.gov/integrated/). This RFP was developed in consultation with the Advisory Board. In addition, the comments and testimonies from the December 6, 1999, public meeting were considered in the formulation of this RFP.
The entire program is funded in FY 2000 at $\$ 37,637,702$ (after deduction for administrative expenses) for the following integrated activities: Water Quality (\$12,374,115), Food Safety (\$14,277,277), Pesticide Impact Assessment $(\$ 4,322,310)$, Crops at Risk from Food Quality and Protection Act (FQPA) Implementation ( $\$ 952,000$ ), FQPA Risk Mitigation Program for Major Food Crop Systems $(\$ 3,808,000)$, and Methyl Bromide Transition Program ( $\$ 1,904,000$ ). There will be three RFP's for this program. The Water Quality and Food Safety Programs will each have a separate RFP, while the latter four programs will be announced as one RFP. This notice announces and describes the Food Safety component of the Program.
CSREES will administer the Integrated Research, Education, and Extension Competitive Grants Program by determining priorities in United States agriculture through Agency stakeholder input processes and in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board. Each RFP for the different program areas (i.e., Water Quality, Food Safety, etc.) will be developed each fiscal year based on these established priorities and the resulting determined approaches to solving these critical agricultural issues. Although this overall grant program seeks to solve critical agricultural issues through an integration of research, education, and extension activities, a component of a RFP, depending on the priority being addressed and/or the stage at which the priority is being addressed, may request proposals that are research, education,
or extension only, or a combination thereof. However, the overall overarching approach to solving the critical agricultural issue, priority, or problem will be through an integration of research, education, and extension activities within each individual program area.

## B. Purpose, Priorities, and Fund Availability

The purpose of the National Food Safety Initiative is to support projects that address selected priority issues in food safety and demonstrate an integrated approach to solving problems in food safety research, education, and extension as described in this RFP. Various models for integration of research, education, and extension will be considered for funding. Proposals describing multistate, multiinstitutional, multidisciplinary, and/or multifunctional activities (and combinations thereof) are acceptable. However, special emphasis will be given to proposals describing multifunctional activities that integrate research, education, and extension (i.e. those that contain research, education, and extension components).

The component areas described below address priority issues in food safety that were identified by stakeholders during a series of public meetings held to solicit program input from various users of food safety information at the local, state, regional, and national levels. Interdepartmental food safety priorities and those supported by the Presidential Food Safety Initiative were also considered in the development of this RFP.
There is no commitment by USDA to fund any particular proposal or to make a specific number of awards.
Approximately $\$ 14,277,000$ will be available to fund proposals in FY 2000. Proposals are being solicited in 12 component areas: (1) Qualitative and Quantitative Risk Assessments; (2) Control Measures for Food-Borne Microbial Pathogens; (3) Sources and Incidence of Microbial Pathogens; (4) Antibiotic Resistant Microbial Pathogens; (5) Improving the Safety of Fresh Fruits and Vegetables; (6) Food Handler Education and Training for Consumer and Youth; (7) Food Handler Education for High-risk and Hard-toreach Audiences; (8) Food Handler Education for Commercial and NonCommercial Audiences; (9) Hazard Analysis and Critical Control Points Model Development, Testing and Implementation; and (10) Integrating Food Safety into Related Agricultural Problems. In addition, proposals are being solicited for (11) National

Coordination of Integrated Food Safety Programs and Resources and a (12) National Center for Home Food Processing and Preservation.

## C. Definitions

For the purpose of awarding grants under this program, the following definitions are applicable:
(1) Administrator means the Administrator of the Cooperative State Research, Education, and Extension Service (CSREES) and any other officer or employee of the Department to whom the authority involved my be delegated.
(2) Authorized departmental officer means the Secretary or any employee of the Department who has the authority to issue or modify grant instruments on behalf of the Secretary.
(3) Authorized organizational representative means the president or chief executive officer of the applicant organization or the official, designated by the president or chief executive officer of the applicant organization, who has the authority to commit the resources of the organization.
(4) Budget period means the interval of time (usually 12 months) into which the project period is divided for budgetary and reporting purposes.
(5) Cash contributions means the applicant's cash outlay, including the outlay of money contributed to the applicant by non-Federal third parties.
(6) Department or USDA means the United States Department of Agriculture.
(7) Education activity means formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.
(8) Extension activity means an act or process that delivers science-based knowledge and informal educational programs to people, enabling them to make practical decisions.
(9) Grant means the award by the Secretary of funds to an eligible organization or individual to assist in meeting the costs of conducting, for the benefit of the public, an identified project which is intended and designed to accomplish the purpose of the program as identified in these guidelines.
(10) Grantee means an organization designated in the grant award document as the responsible legal entity to which a grant is awarded.
(11) Integrated means to bring the three components of the agricultural knowledge system (research, education,
and extension) together around a problem area or activity.
(12) Matching means that portion of allowable project costs not borne by the Federal Government, including the value of in-kind contributions.
(13) Peer review means an evaluation of a proposed project for scientific or technical quality and relevance performed by experts with the scientific knowledge and technical skills to conduct the proposed work or to give expert advice on the merits of a proposal.
(14) Principal investigator/Project director means the single individual designated by the grantee in the grant application and approved by the Secretary who is responsible for the direction and management of the project.
(15) Prior approval means written approval evidencing prior consent by an authorized departmental officer as defined in (2) above.
(16) Project means the particular activity within the scope of the program supported by a grant award.
(17) Project period means the period, as stated in the award document and modifications thereto, if any, during which Federal sponsorship begins and ends.
(18) Research activity means a scientific investigation or inquiry that results in the generation of knowledge.
(19) Secretary means the Secretary of Agriculture and any other officer or employee of the Department to whom the authority involved may be delegated.
(20) Third party in-kind contributions means non-cash contributions of property or services provided by nonFederal third parties, including real property, equipment, supplies and other expendable property, directly benefitting and specifically identifiable to a funded project or program.
(21) Total integrated, multifunctional research, education, and extension approach means that the combination of grants (although the individual grants may involve only research, education, or extension activities or a combination thereof) awarded under the fiscal year's program components will work together to address the priorities in United States agriculture as determined by the Secretary of Agriculture in consultation with the Advisory Board, that involve integrated research, extension, and education activities.

## D. Eligibility

Proposals may be submitted by colleges and universities as defined in section 1404 of the National
Agricultural Research, Extension, and

Teaching Policy Act of 1977 (NARETPA). The terms "college" and "university" mean an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which a bachelor's degree or any other higher degree is awarded, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association. Although an applicant may be eligible based on its status as one of these entities, there are factors which may exclude an applicant from receiving Federal financial and nonfinancial assistance and benefits under this program (e.g., debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information). Eligible applicants may subcontract to organizations not eligible under these requirements.

Please note that a research foundation maintained by a college or university is not eligible to receive an award under this program.

## E. Matching Requirements

## 1. General Requirement

If a grant provides a particular benefit to a specific agricultural commodity, the grant recipient is required to provide funds or in-kind support to match the amount of the grant funds provided. See section 10. c. on "Matching Funds" under Part III, B, "Content of Proposals" for more details.

## 2. Waiver

CSREES may waive the matching funds requirement specified in the above paragraph for a grant if CSREES determines that (a) the results of the project, while of particular benefit to a specific agricultural commodity, are likely to be applicable to agricultural commodities generally; or (b) the project involves a minor commodity, the project deals with scientifically important research, and the grant recipient is unable to satisfy the matching funds requirement.

## F. Funding Restrictions

CSREES has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of research, education, or extension space; the purchase or
installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

## G. Types of Grant Instruments

In FY 2000 all projects will be awarded using a "New Grant" instrument. In future years, projects under the Integrated Research, Education, and Extension Competitive Grants Program authority can be awarded using one of the grant instruments described below:
(1) New grant. This is a grant instrument by which the Department agrees to support a specified level of effort for a project that generally has not been supported previously under this program. This type of grant is approved on the basis of peer review recommendations
(2) Renewal grant. This is a grant instrument by which the Department agrees to provide additional funding for a project period beyond that approved in an original or amended award, provided that the cumulative period does not exceed the statutory limitation. When a renewal application is submitted, it should include a summary of progress to date from the previous granting period. A renewal grant shall be based upon new application, de novo peer review and staff evaluation, new recommendation and approval, and a new award instrument.
(3) Supplemental grant. This is an instrument by which the department agrees to provide small amounts of additional funding under a new or renewal grant as specified above and may involve a short-term (usually six months or less) extension of the project period beyond that approved in an original or amended award, but in no case may the cumulative period for the project exceed the statutory limitation. A supplement is awarded only if required to assure adequate completion of the original scope of work and if there is sufficient justification to warrant such action. A request of this nature normally will not require additional peer review.

## H. Funding Mechanisms

The two mechanisms by which new, renewal, and supplemental grants shall be awarded are as follows:
(1) Standard grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined time period without the announced intention of providing additional support at a future date.
(2) Continuation grant. This is a funding mechanism whereby the Department agrees to support a
specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date, provided that performance has been satisfactory, appropriations are available for this purpose, and continued support will be in the best interests of the Federal government and the public. This kind of mechanism normally will be awarded for an initial one-year period, and any subsequent continuation project grants will be awarded in one-year increments. The award of a continuation project grant to fund an initial or succeeding budget period does not constitute an obligation to fund any subsequent budget period. Unless prescribed otherwise by CSREES, a grantee must submit a separate application for continued support for each subsequent fiscal year. Requests for such continued support must be submitted in duplicate at least three months prior to the expiration date of the budget period currently being funded. Decisions regarding continued support and the actual funding levels of such support in future years usually will be made administratively after consideration of such factors as the grantee's progress and management practices and the availability of funds. Since initial peer reviews are based upon the full term and scope of the original application, additional evaluations of this type generally are not required prior to successive years' support. However, in unusual cases (e.g., when the nature of the project or key personnel change or when the amount of future support requested substantially exceeds the grant application originally reviewed and approved), additional reviews may be required prior to approving continued funding.

## Part II—Program Description

## A. Project Types

For Program Areas 1 through 10, the maximum total award is $\$ 600,000$, and for a project period up to three years. For Program Areas 11 and 12, the maximum total award is $\$ 600,000$ per year and for a project period up to four years.
Proposals that focus on one functional area (i.e., research only, education only, or extension only) are acceptable. However, applicants should explain how the separate functional area will meet the overall goal of a total integrated, multifunctional research, education, and extension approach.
Applications received in any of the aforementioned program areas should include budgets commensurate with the
activities proposed. Grants awarded under Program Description Areas 1 through 10 of this RFP will be issued as "New Grant" instruments and will be awarded as "Standard Grants." Grants awarded under Program Description Areas 11 and 12 of this RFP will be issued as "New Grant" instruments and may be awarded as "Continuation Grants."

## B. Program Area Description

Integrated research, education, and/or extension proposals that address the following selected priority issues are requested:

For Program Areas 1 through 10:
(Maximum award: \$600,000 and up to three years).
(1) Qualitative and Quantitative Risk Assessments (Program Area 111.1)

This category will support the development and testing of comprehensive, qualitative and/or quantitative science-based risk assessments for microbial food-borne pathogens (e.g., Listeria monocytogenes, Campylobacter jejuni, Cyclospora, Salmonella, etc.) and/or their toxins associated with ready-to-eat foods, including those foods that are fresh, minimally processed or processed.
(2) Control Measures for Food-borne Microbial Pathogens (Program Area 111.2)

This category will support the establishment of the scientific bases for, and the development of, models for identifying and validating critical control points, critical limits, and process capability related to control measures for significant food-borne microbial pathogens and/or their toxins in production, processing and distribution of foods.
(3) Sources and Incidence of Microbial Pathogens (Program Area 111.3)

This category will support identification of the sources and incidence of microbial pathogens of animal and human origin that impact on food safety and the development and implementation of strategies for their prevention and control.
(4) Antibiotic Resistant Microbial Pathogens (Program Area 111.4)

This category will support: (a) The identification of factors that lead to the development of antibiotic resistant microbial pathogens related to food safety; (b) the identification and application of measures to prevent antibiotic resistence; and (c) the development and application of
alternative approaches to the use of antibiotics.
(5) Improving the Safety of Fresh Fruits and Vegetables (Program Area 111.5)

This category will support the development of projects that focus on improving the safety of fresh and minimally processed imported and domestic fruits and vegetables, which includes: (a) The development of safe and efficacious techniques to enhance or ensure microbiological safety; (b) approaches that relate to postproduction, harvesting, handling, transportation, and distribution control measures to the prevention of microbial pathogen infection or crosscontamination; or (c) development of procedures for sampling to accurately detect the presence of microbial pathogens and/or their toxins.
(6) Food Handler Education and Training for Consumers and Youth (Program Area 111.6)
This category will support the development of education and training programs that promote and enhance general food safety and food handler education for youths, adults, and older Americans preparing food in the home. Special emphasis will be given to education efforts that support activities of the Presidential Food Safety Initiative and the Fight BAC campaign of the government and industry-wide Partnership for Food Safety Education. Information about the Presidential Initiative, Fight BAC, and the Partnership for Food Safety Education can be found at the following website: http://www.foodsafety.gov.
(7) Food Handler Education for Highrisk and Hard-to-reach Audiences (Program Area 111.7)

This category will support the development of consumer education and training programs for high-risk or under-served groups (i.e. pregnant or nursing mothers, infants, children, the chronically ill, those with limited resources, those with low literacy skills, or those who speak English as a second language). Projects that target families receiving Federal food assistance are encouraged.
(8) Food Handler Education for Commercial and Non-commercial Audiences, Including Food Handler Certification Training and Other Train-the-trainer Programs (Program Area 111.8)

This category will support the development, implementation, and evaluation of train-the-trainer programs for food handlers in commercial and
non-commercial settings (e.g., institutional food service, retail establishments, hospitals, health care facilities, day care facilities, congregate meal sites, gleaning and food recovery programs, food banks, soup kitchens, churches, service clubs, etc.). Special emphasis will be given to the development and implementation of food handler certification programs.
(9) Hazard Analysis and Critical Control Points (HACCP) Model Development, Testing, and Implementation (Program Area 111.9)

This category will support the development of projects that focus on the development of HACCP models for education and training in four targeted areas: (a) Minimizing microbial food safety hazards for fresh fruits and vegetables through the development of training and education programs for domestic and international growers and producers; (b) HACCP plan development and implementation in small and very small meat and poultry plants and other small food processing plants; (c) HACCP plan development and implementation in retail establishments, including distribution and transportation sectors of the food industry; (d) HACCP train-the-trainer programs using currently available models, curricula, and materials. HACCP model development must include pilot-testing, model implementation and evaluation. Regional, multi-state, or national workshops focused on training potential users of the HACCP models will be supported and are encouraged.
(10) Integrating Food Safety into Related Agricultural Programs (Program Area 111.10)

This category will support the development of projects that incorporate food safety concepts and food safety education into other topical areas in agriculture including, but not limited to, those focusing on: (a) Water quality; (b) animal waste management; (c) integrated pest management; (d) small farms; and (e) sustainable agriculture. For example, projects in this category might focus on developing educational programs that teach growers and producers how to reduce the risk of food-borne illness by minimizing microbial and pesticide contamination through integrated pest management, the control of pesticide application, water quality, and animal waste management. Priority consideration will be given to proposals that describe multi-disciplinary efforts that include those with expertise in food safety and nutrition.

In addition CSREES is soliciting proposals in the following areas:

For Program Areas 11 and 12:
(Maximum award: \$600,000/per year and up to four years)
(11) National Coordination of Integrated Food Safety Programs and Resources (Program Area 111.11)

This category will support the development of integrated food safety resources that facilitate national and international networking and coordination among the various users of food safety information, from production to consumption (i.e. farmers, producers, growers, packers, shippers, retailers, food service workers, processors, inspectors, veterinarians, sanitarians, educators, researchers, consumers, etc.). Special emphasis will be given to the development of databases and interactive software that support decision-making and problemsolving among food safety researchers, educators, consumers, and others. Proposals to support national or regional conferences, multi-user distance education programs, satellite videoteleconferences, and other communication transfer technologies will be supported.
(12) Home Food Processing and Preservation (Program Area 111.12)

This category will support the development of a National Center for Home Food Processing and Preservation. Activities conducted by the Center should include: (a) Reviewing recent research conducted in the public and private sectors on home food processing and preservation techniques, and formulating recommendations for new recipes and guidelines based on the reviews; (b) updating current guidelines on home food processing and preservation; (c) developing and testing new recipes and guidelines on home food processing and preservation methods for specialty foods, ethnic foods, and new varieties of fruits and vegetables; (d) establishing distribution mechanisms for disseminating new guidelines for home food processing and preservation; and (e) identifying areas where further research in home food processing and preservation techniques are needed.

## C. Expected Program Outputs and Reporting Requirements

The grantee must prepare an annual report that details all significant activities towards achieving the goals and objectives of the project. The narrative should be succinct and be no longer than five pages, using 12-point, single-spaced type. The report also
should include a listing of any students who worked on the project (report graduate degrees awarded and undergraduates trained, as applicable). A budget summary should be attached to this report, which will provide an overview of all monies spent during the reporting period.

## Part III—Preparation of a Proposal

## A. Program Application Materials

Program application materials are available at the Integrated Research, Education, and Extension Competitive Grants Program website (http:// www.reeusda.gov/integrated/). If you do not have access to our web page or have trouble downloading material, you may contact the Proposal Services Unit, Office of Extramural Programs, USDA/ CSREES at (202) 401-5048. When calling the Proposal Services Unit, please indicate that you are requesting forms for the Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative. These materials may also be requested via Internet by sending a message with your name, mailing address (not e-mail) and phone number to psb@reeusda.gov. State that you want a copy of the Program Description and application materials (orange book) for the Fiscal Year 2000 Integrated
Research, Education, and Extension Competitive Grants Program-National Food Safety Initiative.

## B. Content of Proposals

## 1. General

The proposal should follow these guidelines, enabling reviewers to more easily evaluate the merits of each proposal in a systematic, consistent fashion:
(a) The proposal should be prepared on only one side of the page using standard size ( $8^{1 / 2^{\prime \prime}} \times 11^{\prime \prime}$ ) white paper, one inch margins, typed or word processed using no type smaller than 12 point font, and single or double spaced. Use an easily readable font face (e.g., Geneva, Helvetica, Times Roman).
(b) Each page of the proposal, including the Project Summary, budget pages, required forms, and any appendices, should be numbered sequentially.
(c) The proposal should be stapled in the upper left-hand corner. Do not bind. An original and 14 copies ( 15 total) must be submitted in one package, along with 10 copies of the "Project Summary" as a separate attachment.
(d) If applicable, proposals should include original illustrations
(photographs, color prints, etc.) in all copies of the proposal to prevent loss of
meaning through poor quality reproduction.

## 2. Cover Page (Form CSREES-661)

Each copy of each grant proposal must contain an "Application for Funding’", Form CSREES-661. One copy of the application, preferably the original, must contain the pen-and-ink signature(s) of the proposing principal investigator(s)/project director(s)(PI/PD) and the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant resources to the project. Any proposed PI/PD or co-PI/PD whose signature does not appear on Form CSREES-661 will not be listed on any resulting grant award. Complete both signature blocks located at the bottom of the
"Application for Funding" form.
Form CSREES-661 serves as a source document for the CSREES grant database; it is therefore important that it be completed accurately. The following items are highlighted as having a high potential for errors or
misinterpretations:
(a) Title of Project (Block 6). The title of the project must be brief (80-character maximum), yet represent the major thrust of the effort being proposed. Project titles are read by a variety of nonscientific people; therefore, highly technical words or phraseology should be avoided where possible. In addition, introductory phrases such as "investigation of" or "research on", "education for" or "outreach that" should not be used.
(b) Program to Which You Are Applying (Block 7). ' Integrated Research, Education, and Extension Competitive Grants Program—National
Food Safety Initiative."
(c) Program Area and Number (Block
8). The name of the program
component, e.g. Qualitative and
Quantitative Risk Assessments, 111.1 or Control Measures for Food-borne Microbial Pathogens, 111.2 should be inserted in this block.
(d) Type of Award Request (Block 13). Check the block for "new."
(e) Principal Investigator(s)/Project Director(s) (PI/PD) (Block 15). The designation of excessive numbers of coPI/PD's creates problems during final review and award processing. Listing multiple co-PI/PD's, beyond those required for genuine collaboration, is therefore discouraged. Note that providing a Social Security Number is voluntary, but is an integral part of the CSREES information system and will assist in the processing of the proposal.
(f) Type of Performing Organization
(Block 18). A check should be placed in
the box beside the type of organization which actually will carry out the effort. For example, if the proposal is being submitted by an 1862 Land-Grant Institution but the work will be performed in a department, laboratory, or other organizational unit of an agricultural experiment station, box " 03 " should be checked. If portions of the effort are to be performed in several departments, check the box that applies to the individual listed as PI/PD \#1 in Block 15.a.
(g) Other Possible Sponsors (Block 22). List the names or acronyms of all other public or private sponsors including other agencies within USDA and other programs funded by CSREES to whom your application has been or might be sent. In the event you decide to send your application to another organization or agency at a later date, you must inform the identified CSREES Program Director as soon as practicable. Submitting your proposal to other potential sponsors will not prejudice its review by CSREES; however, duplicate support for the same project will not be provided. Complete the "Application for Funding," Form CSREES-661, in its entirety.
(h) One copy of the "Application for Funding" form must contain the signatures (in ink) of the PI/PD's and authorized organizational representative for the applicant organization.

## 3. Table of Contents

For consistency and ease in locating information, each proposal must contain a detailed Table of Contents just after the cover page. The Table of Contents should contain page numbers for each component of the proposal. Page numbers should begin with the first page of the Project Description.

## 4. Project Summary

The proposal must contain a Project Summary of 250 words or less on a separate page which should be placed immediately after the Table of Contents and should not be numbered. The names and institutions of all PI/PD's and co-PI/PD's should be listed on this form, in addition to the title of the project. The summary should be a selfcontained, specific description of the activity to be undertaken and should focus on: overall project goal(s) and supporting objectives; plans to accomplish project goal(s); and relevance of the project to the goals of the National Food Safety Initiative. The importance of a concise, informative Project Summary cannot be overemphasized.

## 5. Project Description

The Project Description may not exceed a total of 18 pages including figures and tables.
(a) Justification: This section should include in-depth information on the following, when applicable:
(i) a statement must be given at the beginning of the justification that clearly identifies the area(s) in Part II B that is (are) addressed in the proposal;
(ii) estimates of the magnitude of the food safety problem and its relevance to ongoing National food and agricultural research programs; and
(iii) reasons for having the work performed by the proposing institution.
(b) Objectives: Clear, concise, complete, and logically arranged statement(s) of specific aims of the proposed effort must be included in all proposals.
(c) Methodology: The procedures or methodology to be applied to the proposed effort should be explicitly stated. This section should include but not necessarily be limited to:
(i) a description of the proposed activities and the sequence in which they will be carried out;
(ii) procedures, techniques, methodologies, or approaches to be employed, including their feasibility;
(iii) kinds of results or expected outcomes;
(iv) evaluation methods or means by which data/information will be analyzed or interpreted;
(v) problems that might be encountered; and
(vi) limitations to proposed procedures, techniques, methodologies, or approaches.
(d) Literature Review: A summary of pertinent publications with emphasis of their relationship to the effort being proposed should be provided and should include all important and recent publications from other institutions, as well as those from the applicant institution. The citations themselves should be accurate, complete, and written in an acceptable journal format.
(e) Current Work: Current unpublished institutional activities "to date" in the program area under which the proposal is being submitted should be described.
(f) Cooperation and Institutional Units Involved: Cooperative, multiinstitutional and multidisciplinary applications are encouraged. Identify each institutional unit contributing to the project and designate the lead institution or institutional unit. When appropriate, the project should be coordinated with the efforts of other State and/or national programs. Clearly
define the roles and responsibilities of each institutional unit of the project team, if applicable.
(g) Equipment and Facilities: All facilities which are available for use or assignment to the project during the requested period of support should be reported and described briefly. Any potentially hazardous materials, procedures, situations, or activities, whether or not directly related to a particular phase of the effort, must be explained fully, along with an outline of the precautions to be exercised.
Examples include work with toxic chemicals and experiments that may put human subjects or animals at risk. All items of major instrumentation available for use or assignment to the proposed project should be itemized. In addition, items of non-expendable equipment needed to conduct and bring the project to a successful conclusion should be listed, including dollar amounts and, if funds are requested for their acquisition, justified.
(h) Project Timetable: The proposal should outline all important phases as a function of time, year by year, for the entire project, including periods beyond the grant funding period.

An applicant for the National Center for Home Food Processing and Preservation should include a management plan to ensure efficient administration of the grant and how activities will be integrated across collaborators.

## 6. Appendices to Project Description

Appendices to the Project Description are allowed if they are directly germane to the proposed project and are limited to a total of two of the following: Reprints (papers that have been published in peer reviewed journals) and preprints (manuscripts in press for a peer reviewed journal; these must be accompanied by a letter of acceptance from the publishing journal).

## 7. Key Personnel

All senior personnel who are expected to be involved in the effort must be clearly identified. For each person, the following should be included:
a. The roles and responsibilities of each PI/PD and/or collaborator should be clearly described;
b. An estimate of the time commitment involved for each PI/PD and/or collaborator; and
c. Vitae of each PI/PD, senior associate, and other professional personnel. This section should include vitae of all key persons who are expected to work on the project, whether or not CSREES funds are
sought for their support. The vitae should be limited to two (2) pages each in length, excluding publications listings. A chronological list of all publications in refereed journals during the past four (4) years, including those in press, must be provided for each project member for which a curriculum vitae is provided. Also list only those non-refereed technical publications that have relevance to the proposed project. All authors should be listed in the same order as they appear on each paper cited, along with the title and complete reference as these usually appear in journals.

## 8. Conflict-of-Interest List

A Conflict-of-Interest List must be provided for all individuals involved in the project (identified as key personnel). Each list should be on a separate page and include alphabetically the full names of the individuals in the following categories: (a) All collaborators on projects within the past four years, including current and planned collaborations; (b) all coauthors on publications within the past four years, including pending publications and submissions; (c) all persons in your field with whom you have had a consulting or financial arrangement within the past four years, who stand to gain by seeing the project funded; and (d) all thesis or postdoctoral advisees/advisors within the past four years (some may wish to call these life-time conflicts). This form is necessary to assist program staff in excluding from proposal review those individuals who have conflicts-ofinterest with the personnel in the grant proposal. The Program Director must be informed of any additional conflicts-ofinterest that arise after the proposal is submitted.
9. Collaborative and/or Subcontractual Arrangements

If it will be necessary to enter into formal consulting or collaborative arrangements with others, such arrangements should be fully explained and justified. In addition, evidence should be provided that the collaborators involved have agreed to render these services. If the need for consultant services is anticipated, the proposal narrative should provide a justification for the use of such services, a statement of work to be performed, and a resume or curriculum vita for each consultant. For purposes of proposal development, informal day-today contacts between key project personnel and outside experts are not considered to be collaborative
arrangements and thus do not need to be detailed.
All anticipated subcontractual arrangements also should be explained and justified in this section. A proposed statement of work and a budget for each arrangement involving the transfer of substantive programmatic work or the providing of financial assistance to a third party must be provided.
Agreements between departments or other units of your own institution and minor arrangements with entities outside of your institution (e.g., requests for outside laboratory analyses) are excluded from this requirement.

If you expect to enter into subcontractual arrangements, please note that the provisions contained in 7 CFR Part 3019, USDA Uniform Administrative Requirements for Grant and Other Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, and the general provisions contained in 7 CFR Part 3015.205, USDA Uniform Federal Assistance Regulations, flow down to subrecipients. In addition, required clauses from Sections 40-48 ("Procurement Standards") and Appendix A ("Contract Provisions'") to 7 CFR Part 3019 should be included in final contractual documents, and it is necessary for the subawardee to make a certification relating to debarment/ suspension.

## 10. Budget (Form CSREES-55)

a. Budget Form. Prepare the budget, Form CSREES-55, in accordance with instructions provided. A budget form is required for each year of requested support. In addition, a cumulative budget is required detailing the requested total support for the overall project period. The budget form may be reproduced as needed by applicants. Funds may be requested under any of the categories listed on the form, provided that the item or service for which support is requested is allowable under the authorizing legislation, the applicable Federal cost principles, and these program guidelines, and can be justified as necessary for the successful conduct of the proposed project. Applicants must also include a Budget Narrative to justify their budgets (see section b below.)
The following guidelines should be used in developing your proposal budget(s):

1. Salaries and Wages. Salaries and wages are allowable charges and may be requested for personnel who will be working on the project in proportion to the time such personnel will devote to the project. If salary funds are requested, the number of Senior and Other

Personnel and the number of CSREESFunded Work Months must be shown in the spaces provided. Grant funds may not be used to augment the total salary or rate of salary of project personnel or to reimburse them for time in addition to a regular full-time salary covering the same general period of employment. Salary funds requested must be consistent with the normal policies of the institution.
2. Fringe Benefits. Funds may be requested for fringe benefit costs if the usual accounting practices of your organization provide that organizational contributions to employee benefits (social security, retirement, etc.) be treated as direct costs. Fringe benefit costs may be included only for those personnel whose salaries are charged as a direct cost to the project.

## 3. Nonexpendable Equipment.

 Nonexpendable equipment means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $\$ 5,000$ (or lower depending on institutional policy) or more per unit. As such, items of necessary instrumentation or other nonexpendable equipment should be listed individually by description and estimated cost in the Budget Narrative. This applies to revised budgets as well, as the equipment item(s) and amount(s) may change.4. Materials and Supplies. The types of expendable materials and supplies which are required to carry out the project should be indicated in general terms with estimated costs in the Budget Narrative.
5. Travel. The type and extent of travel and its relationship to project objectives should be described briefly and justified. If foreign travel is proposed, the country to be visited, the specific purpose of the travel, a brief itinerary, inclusive dates of travel, and estimated cost must be provided for each trip. Airfare allowances normally will not exceed round-trip jet economy air accommodations. U.S. flag carriers must be used when available. See 7 CFR Part 3015.205(b)(4) for further guidance.
6. Publication Costs/Page Charges. Include anticipated costs associated with publications in a journal (preparing and publishing results including page charges, necessary illustrations, and the cost of a reasonable number of coverless reprints) and audio-visual materials that will be produced. Photocopying and printing brochure, etc., should be shown in Section I., "All Other Direct Costs" of Form CSREES-55.
7. Computer (ADPE) Costs. Reimbursement for the costs of using specialized facilities (such as a university- or department-controlled computer mainframe or data processing center) may be requested if such services are required for completion of the work.
8. All Other Direct Costs. Anticipated direct project charges not included in other budget categories must be itemized with estimated costs and justified in the Budget Narrative. This also applies to revised budgets, as the item(s) and dollar amount(s) may change. Examples may include space rental at remote locations, subcontractual costs, and charges for consulting services, telephone, facsimile, shipping costs, and fees necessary for laboratory analyses. You are encouraged to consult the "Instructions for Completing Form CSREES-55, Budget," of the Application Kit for detailed guidance relating to this budget category. Form AD-1048 must be completed by each subcontractor or consultant and retained by the grantee.
9. Indirect Costs. Section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310) limits indirect costs for this program to 19 percent of total Federal funds provided under each award. Therefore the recovery of indirect costs under this program may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 19 percent of total Federal funds awarded. If no rate has been negotiated, a reasonable dollar amount (equivalent to less than 19 percent of total Federal funds requested) in lieu of indirect costs may be requested, subject to approval by USDA.
b. Budget Narrative. All budget categories, with the exception of Indirect Costs for which support is requested, must be individually listed (with costs) and justified on a separate sheet of paper and placed immediately behind the Budget Form. Explanations of matching funds or lack thereof on commodity-specific projects also are to be included in this section.
c. Matching Funds. If an applicant concludes that matching funds are not required as specified under Part I (e), a justification should be included in the Budget Narrative. CSREES will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. CSREES retains the right to make final determinations regarding matching requirements.

For those grants requiring matching funds as specified under Part I (e),
proposals should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Written verification means:
(a) For any third party cash contributions, a separate pledge agreement for each donation, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) the dollar amount of the cash donation; and (5) a statement that the donor will pay the cash contribution during the grant period; and
(b) For any third party in-kind contributions, a separate pledge agreement for each contribution, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) a good faith estimate of the current fair market value of the third party in-kind contribution; and (5) a statement that the donor will make the contribution during the grant period.
The sources and amount of all matching support from outside the applicant institution should be summarized on a separate page and placed in the proposal immediately following the Budget Narrative. All pledge agreements must be placed in the proposal immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circular A-21, Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

## 11. Current and Pending Support (Form CSREES-663)

All proposals must contain Form CSREES-663 listing other current public or private support (including in-house support) to which key personnel identified in the proposal have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Analogous information must be provided for any pending proposals that are being considered by, or that will be submitted in the near future to, other
possible sponsors, including other USDA Programs or agencies. Concurrent submission of identical or similar proposals to the possible sponsors will not prejudice proposal review or evaluation by the CSREES for this purpose. However, a proposal that duplicates or overlaps substantially with a proposal already reviewed and funded (or to be funded) by another organization or agency will not be funded under this program. Note that the project being proposed should be included in the pending section of the form.
12. Assurance Statement(s), (Form CSREES-662)

A number of situations encountered in the conduct of projects require special assurances, supporting documentation, etc., before funding can be approved for the project. In addition to any other situation that may exist with regard to a particular project, it is expected that some applications submitted in response to these guidelines will involve the following:
a. Recombinant DNA or RNA Research. As stated in 7 CFR Part 3015.205 (b)(3), all key personnel identified in the proposal and all endorsing officials of the proposing organization are required to comply with the guidelines established by the National Institutes of Health entitled, "Guidelines for Research Involving Recombinant DNA Molecules," as revised. If your project proposes to use recombinant DNA or RNA techniques, you must so indicate by checking the "yes" box in Block 19 of Form CSREES661 (the Cover Page) and by completing Section A of Form CSREES-662. For applicable proposals recommended for funding, Institutional Biosafety Committee approval is required before CSREES funds will be released.
b. Animal Care. Responsibility for the humane care and treatment of live vertebrate animals used in any grant project supported with funds provided by CSREES rests with the performing organization. Where a project involves the use of living vertebrate animals for experimental purposes, all key project personnel identified in a proposal and all endorsing officials of the proposing organization are required to comply with the applicable provisions of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 et seq.) and the regulations promulgated thereunder by the Secretary in 9 CFR Parts 1, 2, 3, and 4 pertaining to the care, handling, and treatment of these animals. If your project will involve these animals, you should check "yes" in block 20 of Form CSREES-661 and complete Section B of

Form CSREES-662. In the event a project involving the use of live vertebrate animals results in a grant award, funds will be released only after the Institutional Animal Care and Use Committee has approved the project.
c. Protection of Human Subjects. Responsibility for safeguarding the rights and welfare of human subjects used in any grant project supported with funds provided by CSREES rests with the performing organization. Guidance on this issue is contained in the National Research Act, Pub. L. No. 93-348, as amended, and implementing regulations promulgated by the Department under 7 CFR Part 1c. If you propose to use human subjects for experimental purposes in your project, you should check the "yes" box in Block 21 of Form CSREES-661 and complete Section C of Form CSREES662. In the event a project involving human subjects results in a grant award, funds will be released only after the appropriate Institutional Review Board has approved the project.

## 13. Certifications

Note that by signing Form CSREES661 the applicant is providing the certifications required by 7 CFR Part 3017, as amended, regarding Debarment and Suspension and Drug Free Workplace, and 7 CFR Part 3018, regarding Lobbying. The certification forms are included in the application package for informational purposes only. These forms should not be submitted with the proposal since by signing form CSREES-661 your organization is providing the required certifications. If the project will involve a subcontractor or consultant, the subcontractor/consultant should submit a form $\mathrm{AD}-1048$ to the grantee organization for retention in their records. This form should not be submitted to USDA.

## 14. Compliance with the National Environmental Policy Act (NEPA) (Form CSREES-1234)

As outlined in 7 CFR Part 3407 (the Cooperative State Research, Education, and Extension Service regulations implementing NEPA), the environmental data for any proposed project is to be provided to CSREES so that CSREES may determine whether any further action is needed. In some cases, however, the preparation of environmental data may not be required. Certain categories of actions are excluded from the requirements of NEPA.

In order for CSREES to determine whether any further action is needed with respect to NEPA, pertinent
information regarding the possible environmental impacts of a particular project is necessary; therefore, Form CSREES-1234, "NEPA Exclusions Form," must be included in the proposal indicating whether the applicant is of the opinion that the project falls within a categorical exclusion and the reasons therefore. If it is the applicant's opinion that the proposed project falls within the categorical exclusions, the specific exclusion must be identified. Form CSREES-1234 and supporting documentation should be included as the last page of this proposal.
Even though a project may fall within the categorical exclusions, CSREES may determine that an Environmental Assessment or an Environmental Impact Statement is necessary for an activity, if substantial controversy on environmental grounds exists or if other extraordinary conditions or circumstances are present which may cause such activity to have a significant environmental effect.

## C. Submission of Proposals

## 1. When To Submit (Deadline Date)

Proposals must be transmitted by June 6,2000 , as indicated by postmark or date of courier bill of lading. Proposals transmitted after this date will not be considered for funding.

## 2. What To Submit

An original and 14 copies must be submitted. In addition submit 10 copies of the proposal's Project Summary. All copies of the proposals and the Project Summaries must be submitted in one package.

## 3. Where To Submit

Applicants are strongly encouraged to submit completed proposals via overnight mail or delivery service to ensure timely receipt by the USDA. The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative; c/o Proposal Services Unit; Cooperative State Research, Education,
and Extension Service; U.S. Department
of Agriculture; STOP 2245; 1400
Independence Avenue, S.W.;
Washington, D.C. 20250-2245.

## D. Acknowledgment of Proposals

The receipt of all proposals will be acknowledged by e-mail. Therefore, applicants are encouraged to provide email addresses, where designated, on the Form CSREES-661. If the applicant's e-mail address is not indicated, CSREES will acknowledge receipt of the proposal by letter.
Once the proposal has been assigned an identification number, please cite that number on all future correspondence. If the applicant does not receive an acknowledgment within 60 days of the submission deadline, please contact the Program Director.

## Part IV—Review Process

## A. General

Each proposal will be evaluated in a 2-part process. First, each proposal will be screened to ensure that it meets the administrative requirements as set forth in this request for proposals. Second, proposals that meet these requirements will be technically evaluated by a peer review panel.

Peer review panel members will be selected based upon their training and experience in relevant scientific, education or extension fields taking into account the following factors: (a) The level of formal scientific, technical education, and extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education and/or extension activities; (b) the need to include as peer reviewers experts from various areas of specialization within relevant scientific, education, and extension fields; (c) the need to include as reviewers other experts (producers, range or forest managers/operators, consumers, etc.) who can assess relevance of the proposals to targeted audiences and to program needs; (d) the need to include as peer reviewers experts from a variety of organizational types (e.g., colleges, universities, industry, state and Federal agencies, private profit and non-profit organizations), and geographic locations; (e) the need to maintain a balanced composition of peer review groups with regard to minority and female representation and an equitable age distribution; and (f) the need to include members that can judge the effective usefulness to producers and the general public of each proposal.

## B. Evaluation Factors

The evaluation factors below will be used in reviewing applications submitted in response to this request for proposals:
(1) Overall merit of the proposal.
(a) The project goal, approach, or hypothesis is conceptually adequate and related to selected priority issues identified in the request for proposals;
(b) Objectives are clearly described and related to selected priority issues identified in the request for proposals;
(c) There is a demonstrated need for the project;
(d) The target audience(s) is identified (where appropriate);
(e) The proposed technique, procedure, or methodology is clearly described;
(f) The technique, procedure, or methodology is suitable and feasible for the proposed project;
(g) The evaluation procedures, or means by which data will be analyzed and interpreted, are clearly described and are suitable for the proposed project;
(h) The expected results or outcomes are clearly stated; and (i) The probability of success of the project is indicated.
(2) Qualifications of the proposed project personnel, adequacy of the facilities, and budget request.
(a) The roles of all project personnel are clearly defined;
(b) There is evidence that project personnel have sufficient expertise needed to complete the project;
(c) There is evidence of partnerships with other disciplines and institutions;
(d) There is sufficient time allocated
for systematic attainment of objectives;
(e) There is evidence of institutional experience and competence in the identified area of work;
(f) There is adequate support personnel, facilities, and instrumentation;
(g) All necessary budget information is provided and all figures are tallied correctly;
(h) The budget narrative provides adequate justification for all budget categories; and
(i) The proposed budget is appropriate for the scope of the project.
(3) The relevance of the proposed project to current issues in food safety and related topical areas.
(a) The relevance to current issues in food safety is described; and
(b) The project makes a unique and original contribution to food safety. Proposals submitted for the National Center for Home Food Processing and Preservation also will be judged on the
quality of the management plan that is proposed.

Priority will be given for integrated, multifunctional research, education, and extension projects.

## C. Conflicts-of-Interest and Confidentiality

During the peer evaluation process, extreme care will be taken to prevent any actual or perceived conflicts-ofinterest that may impact review or evaluation. For the purpose of determining conflicts-of-interest, the academic and administrative autonomy of an institution shall be determined by reference to the January 1998 issue of the Codebook for Compatible Statistical Reporting of Federal Support to Universities, Colleges, and Nonprofit Institutions, prepared by Quantum Research Corporation for the National Science Foundation.
Names of submitting institutions and individuals, as well as proposal content and peer evaluations, will be kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process. Therefore, the names of the reviewers will not be released to applicants. At the end of the fiscal year, names of panelists will be made available in such a way that the panelists cannot be identified with the review of any particular proposal.

## Part V—Additional Information

## A. Access To Review Information

Copies of summary reviews, not including the identity of reviewers, will be sent to the applicant PI/PD after the review process has been completed.

## B. Grant Awards

## (1) General

Within the limit of funds available for such purpose, the awarding official of CSREES shall make grants to those responsible, eligible applicants whose proposals are judged most meritorious under the procedures set forth in this RFP. The date specified by the awarding official of CSREES as the effective date of the grant shall be no later than September 30 of the Federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. It should be noted that the project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by CSREES under this RFP shall be
expended solely for the purpose for which the funds are granted in accordance with the approved application and budget, the regulations, the terms and conditions of the award, the applicable Federal cost principles, and the Department's assistance regulations (parts 3015 and 3019 of 7 CFR).
(2) Organizational Management Information
Specific management information relating to an applicant shall be submitted on a one-time basis as part of the responsibility determination prior to the award of a grant identified under this RFP, if such information has not been provided previously under this or another CSREES program. CSREES will provide copies of forms recommended for use in fulfilling these requirements as part of the preaward process.
(3) Grant Award Document and Notice of Grant Award

The grant award document shall include at a minimum the following:
(a) Legal name and address of performing organization or institution to whom the Administrator has awarded a grant under the terms of this request for proposals;
(b) Title of project;
(c) Name(s) and address(es) of PI/PD's chosen to direct and control approved activities;
(d) Identifying grant number assigned by the Department;
(e) Project period, specifying the amount of time the Department intends to support the project without requiring recompetition for funds;
(f) Total amount of Departmental financial assistance approved by the Administrator during the project period;
(g) Legal authority(ies) under which the grant is awarded;
(h) Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the grant award; and
(i) Other information or provisions deemed necessary by CSREES to carry out its respective granting activities or to accomplish the purpose of a particular grant.

The notice of grant award, in the form of a letter, will be prepared and will provide pertinent instructions or information to the grantee that is not included in the grant award document.

## C. Use of Funds; Changes

(1) Delegation of Fiscal Responsibility

Unless the terms and conditions of the grant state otherwise, the grantee may not in whole or in part delegate or
transfer to another person, institution, or organization the responsibility for use or expenditure of grant funds.

## (2) Changes in Project Plans

(a) The permissible changes by the grantee, $\mathrm{PI} / \mathrm{PD}(\mathrm{s})$, or other key project personnel in the approved project grant shall be limited to changes in methodology, techniques, or other aspects of the project to expedite achievement of the project's approved goals. If the grantee and/or the PI/PD(s) are uncertain as to whether a change complies with this provision, the question must be referred to the CSREES Authorized Departmental Officer (ADO) for a final determination.
(b) Changes in approved goals or objectives shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes. In no event shall requests for such changes be approved which are outside the scope of the original approved project.
(c) Changes in approved project leadership or the replacement or reassignment of other key project personnel shall be requested by the grantee and approved in writing by the awarding official of CSREES prior to effecting such changes.
(d) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the grantee and approved in writing by the ADO prior to effecting such transfers, unless prescribed otherwise in the terms and conditions of the grant.
(e) Changes in Project Period: The project period may be extended by CSREES without additional financial support, for such additional period(s) as the ADO determines may be necessary to complete or fulfill the purposes of an approved project, but in no case shall the total project period exceed five years. Any extension of time shall be conditioned upon prior request by the grantee and approval in writing by the ADO, unless prescribed otherwise in the terms and conditions of a grant.
(f) Changes in Approved Budget: Changes in an approved budget must be requested by the grantee and approved in writing by the ADO prior to instituting such changes if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or in the grant award.

## D. Applicable Federal Statutes and Regulations

Several Federal statutes and regulations apply to grant proposals considered for review and to project grants awarded under this program. These include, but are not limited to:
7 CFR Part 1.1—USDA
implementation of the Freedom of Information Act.
7 CFR Part 3—USDA implementation of OMB Circular No. A-129 regarding debt collection.

7 CFR Part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as amended.

7 CFR Part 3015—USDA Uniform Federal Assistance Regulations, implementing OMB directives (i.e., Circular Nos. A-21 and A-122) and incorporating provisions of 31 U.S.C. 6301-6308 (the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95-224), as well as general policy requirements applicable to recipients of Departmental financial assistance.
7 CFR Part 3017—USDA implementation of Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants).

7 CFR Part 3018—USDA
implementation of Restrictions on Lobbying. Imposes prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans.

7 CFR Part 3019—USDA implementation of OMB Circular A110, Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.

7 CFR Part 3052—USDA
implementation of OMB Circular No. A133, Audits of States, Local Governments, and Non-profit Organizations.
7 CFR Part 3407-CSREES procedures to implement the National Environmental Policy Act of 1969, as amended.

29 U.S.C. 794 (section 504,
Rehabilitation Act of 1973) and 7 CFR
Part 15B (USDA implementation of statute)—prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.
35 U.S.C. 200 et seq.-Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs
(implementing regulations are contained in 37 CFR Part 401).

## E. Confidential Aspects of Proposals

 and AwardsWhen a proposal results in a grant, it becomes a part of the record of CSREES transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be
clearly marked within the proposal. The original copy of a proposal that does not result in a grant will be retained by the Agency for a period of one year. Other copies will be destroyed. Such a proposal will be released only with the consent of the applicant or to the extent required by law. A proposal may be withdrawn at any time prior to the final action thereon.

## F. Regulatory Information

For the reasons set forth in the final Rule-related Notice to 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope
of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995, as amended ( 44 U.S.C. chapter 35), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524-0022.

Done at Washington, D.C., this 4th day of April 2000.

## Department of Agriculture

Cooperative State Research, Education and Extension Service

Integrated Research, Education, and Extension Competitive Grants ProgramWater Quality: Request for Proposals and Request for Input; Notice

## DEPARTMENT OF AGRICULTURE

## Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program-Water Quality: Request for Proposals and Request for Input
AGENCY: Cooperative State Research, Education, and Extension Service.
ACTION: Notice of request for proposals and request for input.

SUMMARY: The Cooperative State Research, Education and Extension Service (CSREES) announces the availability of grant funds and requests proposals for the Integrated Research, Education, and Extension Competitive Grants Program-Water Quality for fiscal year (FY) 2000 to support integrated, multifunctional agricultural research, extension, and education activities that address water quality priorities in United States agriculture. The amount available for support of this program in FY 2000 is approximately \$12,400,000.
This notice sets out the objectives for these projects, the eligibility criteria for projects and applicants, the application procedures, and the set of instructions needed to apply for a Water Quality grant under this authority.
By this notice, CSREES additionally solicits stakeholder input from any interested party regarding the FY 2000 Integrated Research, Education, and Extension Competitive Grants Program-Water Quality for use in the development of any future requests for proposals for this program.
DATES: Proposals must be transmitted by June 6,2000 , as indicated by the postmark or date on courier bill of lading. Proposals transmitted after this date will not be considered for funding. Comments regarding this request for proposals are requested within six months from the issuance of this notice. Comments received after that date will be considered to the extent practicable.
ADDRESSES: The address for handdelivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program-Water Quality; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, SW; Washington, DC 20024.
Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education,
and Extension Competitive Grants Program—Water Quality; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, SW;
Washington, DC 20250-2245.
Written user comments should be submitted by first-class mail to: Policy and Program Liaison Staff; Office of Extramural Programs; USDA-CSREES; STOP 2299; 1400 Independence Avenue, S.W.; Washington, D.C. 202502299; or via e-mail to: RFP-
OEP@reeusda.gov. In your comments, please include the name of the program and the fiscal year of the RFP to which you are responding.
FOR FURTHER INFORMATION: Applicants and other interested parties are encouraged to contact Dr. Timothy C.
Strickland; Water Quality Chair; Natural Resources and Environment Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.;

## Stakeholder Input

CSREES is soliciting comments regarding this solicitation of applications from any interested party. These comments will be considered in the development of any future RFP for the program. Such comments will be forwarded to the Secretary or his designee for use in meeting the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). This section requires the Secretary to solicit and consider input on a current RFP from persons who conduct or use agricultural research, education and extension for use in formulating future RFPs for competitive programs. Comments should be submitted as provided for in the ADDRESSES and DATES portions of this Notice.

## Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under 10.303, Integrated Research, Education, and Extension Competitive Grants Program.

## Part I-General Information

## A. Legislative Authority and Background

Section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626) authorized the Secretary of Agriculture to establish a research, education, and extension competitive grants program to provide funding for integrated, multifunctional agricultural research, extension, and education activities. Subject to the availability of appropriations to carry out this program, the Secretary may award grants to colleges and universities (as defined by 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA) (7 U.S.C. 3103)) on a competitive basis for integrated research, education, and extension projects. Grants are to be awarded to address priorities in United States agriculture that involve integrated research, education, and extension activities as determined by the Secretary in consultation with the National

Agricultural Research, Extension, Education, and Economics Advisory Board.

On November 19, 1999, the Secretary published in the Federal Register [64 FR 63560] a notice that the administration of this grant program had been delegated to the Cooperative State Research, Education, and Extension Service (CSREES). This notice also solicited public comment from persons who use or conduct research, extension, or education regarding the priorities to be addressed by this new program. In addition, this notice announced a public meeting to obtain comments to use in developing the proposed rule and requests for proposals for this new grant program. The public meeting was held on December 6, 1999. All the comments and the official transcript of the meeting have been made available for review on the CSREES web page (http:// www.reeusda.gov/integrated/). This RFP was developed in consultation with the Advisory Board. In addition, the comments and testimonies from the December 6, 1999, public meeting were considered in the formulation of this RFP.

The entire program is funded in FY 2000 at $\$ 37,637,702$ (after deduction for administrative expenses) for the following integrated activities: Water Quality (\$12,374,115), Food Safety (\$14,277,277), Pesticide Impact Assessment $(\$ 4,322,310)$, Crops at Risk from Food Quality and Protection Act (FQPA) Implementation $(\$ 952,000)$, FQPA Risk Mitigation Program for Major Food Crop Systems $(\$ 3,808,000)$, and Methyl Bromide Transition Program ( $\$ 1,904,000$ ). There will be three RFP's for this program. The Water Quality and Food Safety Programs will each have a separate RFP, while the latter four programs will be announced as one RFP. This notice announces and describes the Water Quality component of the Program.
CSREES will administer the Integrated Research, Education, and Extension Competitive Grants Program by determining priorities in United States agriculture through Agency stakeholder input processes and in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board. Each RFP for the different program areas (i.e., Water Quality, Food Safety, etc.) will be developed each fiscal year based on these established priorities and the resulting determined approaches to solving these critical agricultural issues. Although this overall grant program seeks to solve critical agricultural issues through an integration of research, education, and
extension activities, a component of a RFP, depending on the priority being addressed and/or the stage at which the priority is being addressed, may request proposals that are research, education, or extension only, or a combination thereof. However, the overall overarching approach to solving the critical agricultural issue, priority, or problem will be through an integration of research, education, and extension activities within each individual program area.

## B. Purpose, Priorities, and Fund Availability

The CSREES Water Quality Program is being enhanced by the establishment of a new water quality program authorized under section 406 of AREERA for an Integrated Research, Education, and Extension Competitive Grants Program. This program will bring university scientists, instructors, and extension educators into more effective and efficient partnerships with Federal interagency priority programs in addressing water quality issues in U.S. agriculture. This program will also provide the flexibility necessary for CSREES to bring the resources of researchers, instructors, and extension educators to national initiatives and programmatic partnerships that target evolving water quality needs.

The Water Quality Program is targeted directly to the identification and resolution of agriculturally-related degradation of water quality. Proposals are sought that will provide watershedbased information that can be used to: Assess sources of water quality impairment in targeted watersheds; develop and/or recommend options for continued improvement of water quality in targeted watersheds; and evaluate the relative costs and benefits associated with cleanup from all responsible sectors (e.g., farming, processing, urban runoff, municipal waste treatment, etc.). The program will favor proposals that have a clear problem statement and that are "place-based." "Place-based" means that the proposers have identified a specific location where the work is to be conducted so that the results and implications of the work conducted can be associated with a specific, georeferenced location. Categories of water quality needs that have been identified, both individually by USDA and in partnership with other Federal programs, include:
-Development and implementation of voluntary approaches that will enable producers to comply with newly developing Federal and State Total

Maximum Daily Load regulations for non-point source pollutants.
-Coordination of targeted research, education, and extension activities to minimize any adverse impacts that agricultural, forest, and range management practices; food and agricultural product processing; and/ or livestock production systems may have on the Nation's water quality.
-Applied research evaluating the efficacy of currently recommended management practices and strategies to improve water quality.
-Evaluation and error assessment of currently available data sets being used for Geographic Information Systems (GIS) based decision-support models for watershed management.
-Projects supporting the pilot activities of the National Science and Technology Council's National Environmental Monitoring Initiative. This initiative seeks to integrate the Nation's environmental monitoring and related research networks and programs. For more information, see (http://www.epa.gov/cludygxb/Pubs/ factsheet.html).
-Development and validation of costeffective means to reduce the contribution of agriculture to the development of harmful algal blooms and hypoxic conditions in coastal systems.
-Development and validation of costeffective means to reduce the contribution of animal and food processing wastes to water quality degradation.
-Documenting the coincident status and trends of multiple resources and related water quality, demographic, and socioeconomic condition; relating status and trends to human and natural causes and consequences; predicting future trajectories and rates of change; assessing associated uncertainties; and identifying data, information and research needed to reduce future uncertainties.
-Evaluation of the efficacy of USDA conservation programs' implementation.
-Projects addressing the Action Items identified in the President's Clean Water Action Plan (February 1998), see (http://www.cleanwater.gov/) for more information.
There is no commitment by USDA to fund any particular proposal or to make a specific number of awards.
Approximately $\$ 12.4$ million will be available to fund proposals in FY 2000. Proposals are being solicited in each of four component areas: National Facilitation proposals, Regional Water Quality Coordination proposals,

Extension Education proposals, and Integrated Research, Education, and Extension proposals.

## C. Definitions

For the purpose of awarding grants under this program, the following definitions are applicable:
(1) Administrator means the Administrator of the Cooperative State Research, Education, and Extension Service (CSREES) and any other officer or employee of the Department to whom the authority involved my be delegated.
(2) Authorized departmental officer means the Secretary or any employee of the Department who has the authority to issue or modify grant instruments on behalf of the Secretary.
(3) Authorized organizational representative means the president or chief executive officer of the applicant organization or the official, designated by the president or chief executive officer of the applicant organization, who has the authority to commit the resources of the organization.
(4) Budget period means the interval of time (usually 12 months) into which the project period is divided for budgetary and reporting purposes.
(5) Cash contributions means the applicant's cash outlay, including the outlay of money contributed to the applicant by non-Federal third parties.
(6) Department or USDA means the United States Department of Agriculture.
(7) Education activity means formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.
(8) Extension activity means an act or process that delivers science-based knowledge and informal educational programs to people, enabling them to make practical decisions.
(9) Grant means the award by the Secretary of funds to an eligible organization or individual to assist in meeting the costs of conducting, for the benefit of the public, an identified project which is intended and designed to accomplish the purpose of the program as identified in these guidelines.
(10) Grantee means an organization designated in the grant award document as the responsible legal entity to which a grant is awarded.
(11) Integrated means to bring the three components of the agricultural knowledge system (research, education,
and extension) together around a problem area or activity.
(12) Matching means that portion of allowable project costs not borne by the Federal Government, including the value of in-kind contributions.
(13) Peer review means an evaluation of a proposed project for scientific or technical quality and relevance performed by experts with the scientific knowledge and technical skills to conduct the proposed work or to give expert advice on the merits of a proposal.

## (14) Principal investigator/Project

 director means the single individual designated by the grantee in the grant application and approved by the Secretary who is responsible for the direction and management of the project.(15) Prior approval means written approval evidencing prior consent by an authorized departmental officer as defined in (2) above.
(16) Project means the particular activity within the scope of the program supported by a grant award.
(17) Project period means the period, as stated in the award document and modifications thereto, if any, during which Federal sponsorship begins and ends.
(18) Research activity means a scientific investigation or inquiry that results in the generation of knowledge.
(19) Secretary means the Secretary of Agriculture and any other officer or employee of the Department to whom the authority involved may be delegated.
(20) Third party in-kind contributions means non-cash contributions of property or services provided by nonFederal third parties, including real property, equipment, supplies and other expendable property, directly benefitting and specifically identifiable to a funded project or program.
(21) Total integrated, multifunctional research, education, and extension approach means that the combination of grants (although the individual grants may involve only research, education, or extension activities or a combination thereof) awarded under the fiscal year's program components will work together to address the priorities in United States agriculture as determined by the Secretary of Agriculture in consultation with the Advisory Board, that involve integrated research, extension, and education activities.

## D. Eligibility

Proposals may be submitted by colleges and universities as defined in section 1404 of the National
Agricultural research, Extension, and

Teaching Policy Act of 1977
(NARETPA). The terms "college" and "university" mean an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which a bachelor's degree or any other higher degree is awarded, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association. Although an applicant may be eligible based on its status as one of these entities, there are factors which may exclude an applicant from receiving Federal financial and nonfinancial assistance and benefits under this program (e.g., debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information). Eligible applicants may subcontract to organizations not eligible under these requirements.
Please note that a research foundation maintained by a college or university is not eligible to receive an award under this program.

## E. Matching Requirements

## 1. General Requirement

If a grant provides a particular benefit to a specific agricultural commodity, the grant recipient is required to provide funds or in-kind support to match the amount of the grant funds provided. See section 10. c. on "Matching Funds"' under Part III, B, "Content of Proposals" for more details.

## 2. Waiver

CSREES may waive the matching funds requirement specified in the above paragraph for a grant if CSREES determines that (a) the results of the project, while of particular benefit to a specific agricultural commodity, are likely to be applicable to agricultural commodities generally; or (b) the project involves a minor commodity, the project deals with scientifically important research, and the grant recipient is unable to satisfy the matching funds requirement.

## F. Funding Restrictions

CSREES has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of research, education, or extension space; the purchase or
installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

## G. Types of Grant Instruments

In FY 2000 all projects will be awarded using a "New Grant" instrument. In future years, projects under the Integrated Research, Education, and Extension Competitive Grants Program authority can be awarded using one of the grant instruments described below:
(1) New grant. This is a grant instrument by which the Department agrees to support a specified level of effort for a project that generally has not been supported previously under this program. This type of grant is approved on the basis of peer review recommendations.
(2) Renewal grant. This is a grant instrument by which the Department agrees to provide additional funding for a project period beyond that approved in an original or amended award, provided that the cumulative period does not exceed the statutory limitation. When a renewal application is submitted, it should include a summary of progress to date from the previous granting period. A renewal grant shall be based upon new application, de novo peer review and staff evaluation, new recommendation and approval, and a new award instrument.
(3) Supplemental grant. This is an instrument by which the department agrees to provide small amounts of additional funding under a new or renewal grant as specified above and may involve a short-term (usually six months or less) extension of the project period beyond that approved in an original or amended award, but in no case may the cumulative period for the project exceed the statutory limitation. A supplement is awarded only if required to assure adequate completion of the original scope of work and if there is sufficient justification to warrant such action. A request of this nature normally will not require additional peer review.

## H. Funding Mechanisms

The two mechanisms by which new, renewal, and supplemental grants shall be awarded are as follows:
(1) Standard grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined time period without the announced intention of providing additional support at a future date.
(2) Continuation grant. This is a funding mechanism whereby the Department agrees to support a
specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date, provided that performance has been satisfactory, appropriations are available for this purpose, and continued support will be in the best interests of the Federal government and the public. This kind of mechanism normally will be awarded for an initial one-year period, and any subsequent continuation project grants will be awarded in one-year increments. The award of a continuation project grant to fund an initial or succeeding budget period does not constitute an obligation to fund any subsequent budget period. Unless prescribed otherwise by CSREES, a grantee must submit a separate application for continued support for each subsequent fiscal year. Requests for such continued support must be submitted in duplicate at least three months prior to the expiration date of the budget period currently being funded. Decisions regarding continued support and the actual funding levels of such support in future years usually will be made administratively after consideration of such factors as the grantee's progress and management practices and the availability of funds. Since initial peer reviews are based upon the full term and scope of the original application, additional evaluations of this type generally are not required prior to successive years' support. However, in unusual cases (e.g., when the nature of the project or key personnel change or when the amount of future support requested substantially exceeds the grant application originally reviewed and approved), additional reviews may be required prior to approving continued funding.

## Part II—Program Description

## A. Project Types

Approximately $\$ 1,000,000$ is available for National Facilitation proposals. The maximum total award is $\$ 400,000$, with an annual funding limitation of $\$ 100,000$. The project period may be one to four years in duration. It is anticipated that two to five grants will be awarded in this program component.

Approximately $\$ 5,000,000$ is available for Regional Water Quality Coordination proposals. Projects will be supported at expected levels of up to $\$ 650,000$ per year/per region for up to four years. Projects involving more than one region may be considered for larger funding. CSREES expects that some regions will request less funding due to a smaller number of states within the region. It is
anticipated that ten grants will be awarded in this program component.

Approximately $\$ 1,400,000$ is available for Extension Education proposals. The maximum total award is $\$ 300,000$, with an annual funding limitation of $\$ 100,000$. The project period may be one to three years in duration. It is anticipated that 12-15 grants will be awarded in this program component.

Approximately $\$ 3,600,000$ is available for Integrated Research, Education and Extension proposals. The maximum total award is $\$ 600,000$, with an annual funding limitation of $\$ 200,000$. The project period may be one to three years in duration. It is anticipated that 5-15 grants will be awarded in this program component.

Applications received in any of the aforementioned program areas should include budgets commensurate with the activities proposed. Grants awarded under the Program Description Areas of National Facilitation, Extension Education, and Integrated Research, Education, and Extension (as described in this RFP) will be issued as "New Grant" instruments and will be awarded as "Standard Grants." Grants awarded under the Program Area Description of Regional Water Quality Coordination (as described in this RFP) will be issued as "New Grant" instruments and may be awarded as "Continuation Grants."

## B. Program Area Description

1. National Facilitation Proposals (Program Area 110.1)

## (Maximum award: \$100,000/year for up to four years).

Proposals are invited for projects that develop and initiate nationally coordinated programs that will contribute to an increase in public understanding and involvement in community decision-making and that facilitate the development of public policy on water resources issues. Because protection of local watersheds and aquifers often requires communitybased actions, decisions about land use, land management practices, waste water management alternatives for areas without sewers, storm water controls, and the protection and restoration of riparian zones are critical to individual and public planning. All proposals are required to include specific, measurable accomplishments for each project year and a projected time-line. While it is not required that projects be fully independent within the 4 -year project period, it is expected that the timeline will culminate in the establishment of an independently supported national coordination effort.

This component of the CSREES Water Quality Program seeks to provide a common base of knowledge in support of individuals and communities grappling to formulate public policy and management strategies that will allow growth and increased profitability while protecting the water resource. Projects will be supported that facilitate the appropriate application of tools and techniques (i.e., Geographic Information Systems, decision support systems, remote sensing, economic analysis, and world wide web technologies) to strengthen awareness of the water quality impacts of current and proposed land use activities by both community decision-makers and individual property owners. These tools can also be used to target specific problems and locations in need of additional attention. Projects should contribute to an increase in community partnerships and networks that develop solutions to particular concerns identified through the projects and in response to increased citizen awareness of local issues. The result will be more citizen involvement, wider dispersal of information, and more rational analysis of environmental decisions in the community and the nation. Metadata and accomplishment reports should be delivered annually to the appropriate regional coordination group (see Regional Water Quality Coordination Proposals below).
2. Regional Water Quality Coordination Proposals (Program Area 110.2)
(Maximum award: \$650,000 per year/ per region for up to four years. Projects involving more than one region may be considered for larger funding. CSREES expects that some regions will request less funding due to a smaller number of states within the region).
CSREES invites proposals to ensure the integration of water quality efforts within the jurisdiction of each of the ten regions established by the U.S.
Environmental Protection Agency
(EPA). The EPA Regions are:
Region 1-Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.
Region 2-New Jersey, New York, and the territories of Puerto Rico and the U.S. Virgin Islands.

Region 3-Delaware, Maryland, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

Region 4-Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.
Region 5-Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.
Region 6-Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

Region 7-Iowa, Kansas, Missouri, and Nebraska.

Region 8-Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming.

Region 9—Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

Region 10-Alaska, Idaho, Oregon, and Washington.
Proposals may be submitted for one or any combination of regions.

This component of the CSREES Water Quality Program is designed to make research, education, and extension resources of the university system more accessible to Federal, State, and local water quality improvement efforts, thus enhancing opportunities for agricultural producers and agriculturally impacted communities to adopt voluntary approaches for the improvement of water quality. Grantees are expected to facilitate the conceptualization and implementation of multi-partner efforts that minimize duplication of effort and that leverage multiple funding sources into a common collaborative effort. As such, it is expected that coordination grantees will initiate partnership activities with key water quality efforts in their region. Proposers should clearly identify the water quality issues and education, extension, and research efforts that are common to the region. A plan should be presented that lays out the approaches to be employed for regional resource sharing, communication, priority setting, and outreach. The proposal should also discuss Federal and State water quality activities in the region and present a strategy for establishing partnerships with appropriate programs.

Each proposal must include provision for a regional coordination mechanism (whether an individual, a committee, or an office) and for a Water Quality Research, Education, and Extension Coordinator in each State or Territory in the Region. Regional coordinators will be expected to work with CSREES National Program Leaders to provide liaison among Federal activities (e.g., U.S. Environmental Protection Agency (EPA) Regional Offices, U.S. Geological Survey National Water Quality Assessment Program (USGS NAWQA) Coordination Offices, USDA
Agricultural Research Service(ARS) Regional Offices, USDA Forest Service (FS) Regional Offices, National
Aeronautics and Space Administration (NASA), National Oceanic and
Atmospheric Administration (NOAA), Bureau of Land Management (BLM), etc.), State environmental organizations, and the State Water Quality Research,

Education, and Extension Coordinators within the Region. Successful projects will thus provide more efficient development, evaluation, and dissemination of information on watershed improvement, management, and monitoring, and in the development of comparable watershed sampling protocols, data, metadata, and reporting. Provision should be included in the budget request for the regional coordinator to participate in monthly conference calls as well as a national coordination meeting to be held annually in the Washington, D.C. area.

Each regional project must include a plan for the development and maintenance of a georeferenced, watershed-based reporting system. This reporting system will serve as the primary vehicle for reporting progress and accomplishments of the CSREES Water Quality Program. Regional projects are expected: (1) To serve as the repository for the reporting of all projects funded on an ad hoc basis by other components of the CSREES Water Quality Program; (2) to collaborate in the linkage of their databases and reporting systems to other funded regions; (3) to periodically conduct water quality needs assessments for the region and report on partnerships and progress in water quality improvement; (4) to facilitate the incorporation of relevant projects that may become funded in the region through CSREES programs (including other sections of the Water Quality Program, the National Research Initiative, the Animal Waste Center, the Initiative for Future Agriculture and Food Systems) or through other federal and state programs (e.g., EPA 319, EPA National Center for Environmental Research and Quality Assurance (NCERQA), National Science Foundation (NSF), NOAA, etc.); and (5) to be compatible with related information sources (e.g., USGS NAWQA Program, EPA Know Your Watershed, CSREES Integrated Pest Management Program, and the CSREES Pesticide Impact Assessment Program, etc.).
3. Extension Education Proposals (Program Area 110.3)
(Maximum award: \$100,000/year for one to three years).

Proposals are invited for Extension Education projects to address water quality issues of State or local importance. One mission of the CSREES Water Quality Program is to provide leadership in extension education that will enable individuals, industry, and government to effect changes enhancing and protecting the Nation's water
resources for the public good. The vision is to be recognized as an important and effective partnership providing leadership for water quality education to help people, industry, and governments prevent and solve current and emerging water quality problems. Proposals for this program are expected to address one or more of the seven strategic extension priorities of the Water Quality Program (see http:// www.reeusda.gov/nre/water/ strategi.htm). The seven areas of emphasis for the education program are under-served audiences, watersheds and aquifers, surface water systems, public policy, individual actions, volunteerism,and partnership. All proposals are required to include specific, measureable accomplishments for each project year. Metadata and accomplishments reports will be delivered annually to the appropriate regional coordination group. See "Regional Water Quality Coordination Proposals" above.
4. Integrated Research, Education, and Extension Proposals (Program Area 110.4)
(Maximum award: \$200,000/year up to three years).
Proposals are invited that integrate water quality research, education, and extension to solve water quality problems at the whole watershed. Proposals should: (a) Identify the cause of water quality degradation;
(b) conduct research filling the gaps that are critical to the development of water improvement practices and programs; (c) implement watershedscale improvement programs; (d) evaluate and monitor the efficacy of the improvement programs implemented; (e) assess the costs and benefits of water quality management practices that are developed; and (f) conduct evaluations closing the loop and improving our understanding of the drivers of water quality degradation. Each proposal is expected to present a fully integrated research, education, and extension approach to accomplish the objectives listed in a-f above. CSREES also encourages the inclusion of a curriculum development component that takes advantage of the integrated watershed activities to enhance environmental education at all levels. The proposing investigators are expected to justify watershed selection (e.g., the level of water quality degradation-chemical, physical, and biological; the relative distribution of agricultural, range or forestry land uses within the watershed; and/or proximity to coastal resources) and to demonstrate
capacities for establishing and/or maintaining watershed-wide partnerships for the project's implementation. Preference will be given to proposals that: (1) Demonstrate a substantial potential to contribute long term information, existing opportunities for leveraging support and cost sharing, and active public and private sector participation; (2) take advantage of the participatory educational and extension opportunities engendered by the watershed's restoration and by its continued management; and/or (3) focus on watersheds where the project will better inform policy makers in developing the most equitable multistate and/or regional strategies for water quality improvement. All proposals are required to include specific, measurable accomplishments each project year. Metadata and accomplishments reports will be delivered annually to the appropriate regional coordination groups. See "Regional Water Quality Coordination Proposals" above.

## C. Expected Program Outputs and Reporting Requirements

It is expected that outputs from successful projects will include: the development of watershed management partnerships, increased involvement of community and business sectors in watershed restoration and management, enhanced understanding of regionallyappropriate watershed management practices, increased coordination and partnership between universities and other Federal research and management agencies, and the establishment and maintenance of monitoring and assessment activities related to the agricultural-water quality interface.

All projects selected for award will be required to deliver metadata and annual reports, a final summary report, a bibliography of publications and training materials resulting from support, and an impacts analysis. All reports will be geo-referenced to the watersheds where activities were performed. The final summary report must include total funding (Federal, matching and other) and a listing of students who worked on the project (report graduate degrees awarded and undergraduates trained).

The grantee must prepare an annual report that details all significant activities towards achieving the goals and objectives of the project. The narrative should be succinct and be no longer than 10 pages, using 12-point, single-spaced type. A budget summary should be attached to this report, which will provide an overview of all monies spent during the reporting period.

## Part III—Preparation of a Proposal

## A. Program Application Materials

Program application materials are available at the Integrated Research, Education, and Extension Competitive Grants Program website (http:// www.reeusda.gov/integrated/). If you do not have access to our web page or have trouble downloading material, you may contact the Proposal Services Unit, Office of Extramural Programs, USDA/ CSREES at (202) 401-5048. When calling the Proposal Services Unit, please indicate that you are requesting forms for the Integrated Research, Education, and Extension Competitive Grants Program—Water Quality. These materials may also be requested via Internet by sending a message with your name, mailing address (not e-mail) and phone number to psb@reeusda.gov. State that you want a copy of the Program Description and application materials (orange book) for the Fiscal Year 2000 Integrated Research, Education, and Extension Competitive Grants Program—Water Quality.

## B. Content of Proposals

## 1. General

The proposal should follow these guidelines, enabling reviewers to more easily evaluate the merits of each proposal in a systematic, consistent fashion:
(a) The proposal should be prepared on only one side of the page using standard size ( $81 / 2^{\prime \prime} \times 11^{\prime \prime}$ ) white paper, one inch margins, typed or word processed using no type smaller than 12 point font, and single or double spaced. Use an easily readable font face (e.g., Geneva, Helvetica, Times Roman).
(b) Each page of the proposal, including the Project Summary, budget pages, required forms, and any appendices, should be numbered sequentially.
(c) The proposal should be stapled in the upper left-hand corner. Do not bind. An original and 14 copies ( 15 total) must be submitted in one package, along with 10 copies of the "Project Summary" as a separate attachment.
(d) If applicable, proposals should include original illustrations (photographs, color prints, etc.) in all copies of the proposal to prevent loss of meaning through poor quality reproduction.

## 2. Cover Page (Form CSREES-661)

Each copy of each grant proposal must contain an "Application for Funding'", Form CSREES-661. One copy of the application, preferably the original, must contain the pen-and-ink
signature(s) of the proposing principal investigator(s)/project director(s)(PI/PD) and the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant resources to the project. Any proposed PI/PD or co-PI/PD whose signature does not appear on Form CSREES-661 will not be listed on any resulting grant award. Complete both signature blocks located at the bottom of the
"Application for Funding" form.
Form CSREES-661 serves as a source document for the CSREES grant database; it is therefore important that it be completed accurately. The following items are highlighted as having a high potential for errors or misinterpretations:
(a) Title of Project (Block 6). The title of the project must be brief (80-character maximum), yet represent the major thrust of the effort being proposed. Project titles are read by a variety of nonscientific people; therefore, highly technical words or phraseology should be avoided where possible. In addition, introductory phrases such as
"investigation of" or "research on" "education for" or "outreach that" should not be used.
(b) Program to Which You Are Applying (Block 7). "Integrated Research, Education, and Extension Competitive Grants Program—Water Quality."
(c) Program Area and Number (Block 8). The name of the program component, e.g. National Facilitation Proposal, 110.1 or Regional Water Quality Coordination Proposal, 110.2 should be inserted in this block.
(d) Type of Award Request (Block 13). Check the block for "new."
(e) Principal Investigator(s)/Project Director(s) (PI/PD) (Block 15). The designation of excessive numbers of coPI/PD's creates problems during final review and award processing. Listing multiple co-PI/PDs, beyond those required for genuine collaboration, is therefore discouraged. Note that providing a Social Security Number is voluntary, but is an integral part of the CSREES information system and will assist in the processing of the proposal.
(f) Type of Performing Organization (Block 18). A check should be placed in the box beside the type of organization which actually will carry out the effort. For example, if the proposal is being submitted by an 1862 Land-Grant Institution but the work will be performed in a department, laboratory, or other organizational unit of an agricultural experiment station, box " 03 " should be checked. If portions of the effort are to be performed in several
departments, check the box that applies to the individual listed as PI/PD \#1 in Block 15.a.
(g) Other Possible Sponsors (Block 22). List the names or acronyms of all other public or private sponsors including other agencies within USDA and other programs funded by CSREES to whom your application has been or might be sent. In the event you decide to send your application to another organization or agency at a later date, you must inform the identified CSREES program manager as soon as practicable. Submitting your proposal to other potential sponsors will not prejudice its review by CSREES; however, duplicate support for the same project will not be provided. Complete the "Application for Funding," Form CSREES-661, in its entirety
(h) One copy of the "Application for Funding" form must contain the signatures (in ink) of the PI/PD's and authorized organizational representative for the applicant organization.

## 3. Table of Contents

For consistency and ease in locating information, each proposal must contain a detailed Table of Contents just after the cover page. The Table of Contents should contain page numbers for each component of the proposal. Page numbers should begin with the first page of the Project Description.

## 4. Project Summary

The proposal must contain a Project Summary of 250 words or less on a separate page which should be placed immediately after the Table of Contents and should not be numbered. The names and institutions of all PI/PD's and co-PI/PD's should be listed on this form, in addition to the title of the project. The summary should be a selfcontained, specific description of the activity to be undertaken and should focus on: overall project goal(s) and supporting objectives; plans to accomplish project goal(s); and relevance of the project to regional, State, or local water quality efforts and/ or list of CSREES Water Quality Program Priorities listed above. The importance of a concise, informative Project Summary cannot be overemphasized. Summaries for Regional Water Quality Coordination Proposals should also indicate all organizations participating in the effort, the organization that will house the database effort, and the mechanism that will be used to coordinate between organizations.

## 5. Project Description

For Regional Water Quality Coordination and for Integrated Research, Education, and Extension proposals, the project description may not exceed 15 single- or double-spaced pages of written text and may not exceed a total of 20 pages after inclusion of figures and tables.

For National Facilitation and for Extension Education proposals, the project description may not exceed 8 single- or double-spaced pages of written text and may not exceed a total of ten pages after inclusion of figures and tables.
The project description should include the following:
a. Introduction and Rationale: Include a clear statement of the problems to be addressed and goals expected to be accomplished. Describe the supporting objectives; questions; research, education and/or extension components to be included; and/or partners that will be used to accomplish the goal(s) set. If preparing a Regional Coordination proposal, describe the current limitations to effective regional water quality management and describe the key stakeholders that must be included to overcome these limitations.
b. Approach:
(1) Describe the activities to be performed, the means by which data and information will be analyzed and interpreted, the methods that will be used for information transfer, the methods that will be used to evaluate adoption and project impact, and the limitations and pitfalls to the approaches selected.
(2) A plan should be presented for coordination and communication between project collaborators.
(3) A project timeline.
(4) A description of outcomes and expected deliverables.
(5) Literature Review. All references cited should be complete, including titles and all co-authors, and should conform to an acceptable journal format.
In addition to the above, the National Facilitation and Regional Coordination proposals should describe the roles and responsibilities of central coordinators and should present a management plan for the administration of the project including facilitation of communication, planning, and annual report preparation.

## 6. Appendices to Project Description

Appendices to the Project Description are allowed if they are directly germane to the proposed project and are limited to a total of two of the following: reprints (papers that have been
published in peer reviewed journals) and preprints (manuscripts in press for a peer reviewed journal; these must be accompanied by a letter of acceptance from the publishing journal).

## 7. Key Personnel

All senior personnel who are expected to be involved in the effort must be clearly identified. For each person, the following should be included:
a. The roles and responsibilities of each PI/PD and/or collaborator should be clearly described;
b. An estimate of the time commitment involved for each PI/PD and/or collaborator; and
c. Vitae of each PI/PD, senior associate, and other professional personnel. This section should include vitae of all key persons who are expected to work on the project, whether or not CSREES funds are sought for their support. The vitae should be limited to two (2) pages each in length, excluding publications listings. A chronological list of all publications in refereed journals during the past four (4) years, including those in press, must be provided for each project member for which a curriculum vitae is provided. Also list those nonrefereed technical publications that have relevance to the proposed project. All authors should be listed in the same order as they appear on each paper cited, along with the title and complete reference as these usually appear in journals.

## 8. Conflict-of-Interest List

A Conflict-of-Interest List must be provided for all individuals involved in the project (identified as key personnel). Each list should be on a separate page and include alphabetically the full names of the individuals in the following categories: (a) All collaborators on projects within the past four years, including current and planned collaborations; (b) all coauthors on publications within the past four years, including pending publications and submissions; (c) all persons in your field with whom you have had a consulting or financial arrangement within the past four years, who stand to gain by seeing the project funded; and (d) all thesis or postdoctoral advisees/advisors within the past four years (some may wish to call these life-time conflicts). This form is necessary to assist program staff in excluding from proposal review those individuals who have conflicts-ofinterest with the personnel in the grant proposal. The Program Director must be informed of any additional conflicts-of-
interest that arise after the proposal is submitted.
9. Collaborative and/or Subcontractual Arrangements

If it will be necessary to enter into formal consulting or collaborative arrangements with others, such arrangements should be fully explained and justified. In addition, evidence should be provided that the collaborators involved have agreed to render these services. If the need for consultant services is anticipated, the proposal narrative should provide a justification for the use of such services, a statement of work to be performed, and a resume or curriculum vita for each consultant. For purposes of proposal development, informal day-today contacts between key project personnel and outside experts are not considered to be collaborative arrangements and thus do not need to be detailed.

All anticipated subcontractual arrangements also should be explained and justified in this section. A proposed statement of work and a budget for each arrangement involving the transfer of substantive programmatic work or the providing of financial assistance to a third party must be provided. Agreements between departments or other units of your own institution and minor arrangements with entities outside of your institution (e.g., requests for outside laboratory analyses) are excluded from this requirement.

If you expect to enter into subcontractual arrangements, please note that the provisions contained in 7 CFR Part 3019, USDA Uniform Administrative Requirements for Grant and Other Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, and the general provisions contained in 7 CFR Part 3015.205, USDA Uniform Federal Assistance Regulations, flow down to subrecipients. In addition, required clauses from Sections 40-48 ("Procurement Standards") and Appendix A ("Contract Provisions") to 7 CFR Part 3019 should be included in final contractual documents, and it is necessary for the subawardee to make a certification relating to debarment/ suspension.

## 10. Budget (Form CSREES-55)

a. Budget Form. Prepare the budget, Form CSREES-55, in accordance with instructions provided. A budget form is required for each year of requested support. In addition, a cumulative budget is required detailing the requested total support for the overall project period. The budget form may be
reproduced as needed by applicants. Funds may be requested under any of the categories listed on the form, provided that the item or service for which support is requested is allowable under the authorizing legislation, the applicable Federal cost principles, and these program guidelines, and can be justified as necessary for the successful conduct of the proposed project.
Applicants must also include a Budget Narrative to justify their budgets (see section b below.)
The following guidelines should be used in developing your proposal budget(s):

1. Salaries and Wages. Salaries and wages are allowable charges and may be requested for personnel who will be working on the project in proportion to the time such personnel will devote to the project. If salary funds are requested, the number of Senior and Other Personnel and the number of CSREESFunded Work Months must be shown in the spaces provided. Grant funds may not be used to augment the total salary or rate of salary of project personnel or to reimburse them for time in addition to a regular full-time salary covering the same general period of employment. Salary funds requested must be consistent with the normal policies of the institution.
2. Fringe Benefits. Funds may be requested for fringe benefit costs if the usual accounting practices of your organization provide that organizational contributions to employee benefits (social security, retirement, etc.) be treated as direct costs. Fringe benefit costs may be included only for those personnel whose salaries are charged as a direct cost to the project.
3. Nonexpendable Equipment. Nonexpendable equipment means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $\$ 5,000$ (or lower depending on institutional policy) or more per unit. As such, items of necessary instrumentation or other nonexpendable equipment should be listed individually by description and estimated cost in the Budget Narrative. This applies to revised budgets as well, as the equipment item(s) and amount(s) may change.
4. Materials and Supplies. The types of expendable materials and supplies which are required to carry out the project should be indicated in general terms with estimated costs in the Budget Narrative.
5. Travel. The type and extent of travel and its relationship to project objectives should be described briefly
and justified. If foreign travel is proposed, the country to be visited, the specific purpose of the travel, a brief itinerary, inclusive dates of travel, and estimated cost must be provided for each trip. Airfare allowances normally will not exceed round-trip jet economy air accommodations. U.S. flag carriers must be used when available. See 7 CFR Part 3015.205(b)(4) for further guidance.
6. Publication Costs/Page Charges. Include anticipated costs associated with publications in a journal (preparing and publishing results including page charges, necessary illustrations, and the cost of a reasonable number of coverless reprints) and audio-visual materials that will be produced. Photocopying and printing brochure, etc., should be shown in Section I., "All Other Direct Costs" of Form CSREES-55.

## 7. Computer (ADPE) Costs.

Reimbursement for the costs of using specialized facilities (such as a university- or department-controlled computer mainframe or data processing center) may be requested if such services are required for completion of the work.
8. All Other Direct Costs. Anticipated direct project charges not included in other budget categories must be itemized with estimated costs and justified in the Budget Narrative. This also applies to revised budgets, as the item(s) and dollar amount(s) may change. Examples may include space rental at remote locations, subcontractual costs, and charges for consulting services, telephone, facsimile, shipping costs, and fees necessary for laboratory analyses. You are encouraged to consult the "Instructions for Completing Form CSREES-55, Budget," of the Application Kit for detailed guidance relating to this budget category. Form AD-1048 must be completed by each subcontractor or consultant and retained by the grantee.
9. Indirect Costs. Section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310) limits indirect costs for this program to 19 percent of total Federal funds provided under each award. Therefore the recovery of indirect costs under this program may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 19 percent of total Federal funds awarded. If no rate has been negotiated, a reasonable dollar amount (equivalent to less than 19 percent of total Federal funds requested) in lieu of indirect costs may be requested, subject to approval by USDA.
b. Budget Narrative. All budget categories, excluding Indirect Costs, for which support is requested must be individually listed (with costs) and justified on a separate sheet of paper and placed immediately behind the Budget Form. Explanations of matching funds or lack thereof on commodityspecific projects also are to be included in this section.
c. Matching Funds. If an applicant concludes that matching funds are not required as specified under Part I (e), a justification should be included in the Budget Narrative. CSREES will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. CSREES retains the right to make final determinations regarding matching requirements.

For those grants requiring matching funds as specified under Part I (e), proposals should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Written verification means:
(a) For any third party cash contributions, a separate pledge agreement for each donation, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) the dollar amount of the cash donation; and (5) a statement that the donor will pay the cash contribution during the grant period; and
(b) For any third party in-kind contributions, a separate pledge agreement for each contribution, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) a good faith estimate of the current fair market value of the third party in-kind contribution; and (5) a statement that the donor will make the contribution during the grant period.

The sources and amount of all matching support from outside the applicant institution should be summarized on a separate page and placed in the proposal immediately following the Budget Narrative. All pledge agreements must be placed in the proposal immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circulars A-21, Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.
11. Current and Pending Support (Form CSREES-663)
All proposals must contain Form CSREES-663 listing other current public or private support (including in-house support) to which key personnel identified in the proposal have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Analogous information must be provided for any pending proposals that are being considered by, or that will be submitted in the near future to, other possible sponsors, including other USDA Programs or agencies. Concurrent submission of identical or similar proposals to the possible sponsors will not prejudice proposal review or evaluation by the CSREES for this purpose. However, a proposal that duplicates or overlaps substantially with a proposal already reviewed and funded (or to be funded) by another organization or agency will not be funded under this program. Note that the project being proposed should be included in the pending section of the form.

## 12. Assurance Statement(s), (Form CSREES-662)

A number of situations encountered in the conduct of projects require special assurances, supporting documentation, etc., before funding can be approved for the project. In addition to any other situation that may exist with regard to a particular project, it is expected that some applications submitted in response to these guidelines will involve the following:
a. Recombinant DNA or RNA Research. As stated in 7 CFR Part 3015.205 (b)(3), all key personnel identified in the proposal and all endorsing officials of the proposing organization are required to comply with the guidelines established by the National Institutes of Health entitled, "Guidelines for Research Involving Recombinant DNA Molecules," as revised. If your project proposes to use recombinant DNA or RNA techniques, you must so indicate by checking the "yes" box in Block 19 of Form CSREES661 (the Cover Page) and by completing Section A of Form CSREES-662. For applicable proposals recommended for
funding, Institutional Biosafety Committee approval is required before CSREES funds will be released.
b. Animal Care. Responsibility for the humane care and treatment of live vertebrate animals used in any grant project supported with funds provided by CSREES rests with the performing organization. Where a project involves the use of living vertebrate animals for experimental purposes, all key project personnel identified in a proposal and all endorsing officials of the proposing organization are required to comply with the applicable provisions of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 et seq.) and the regulations promulgated thereunder by the Secretary in 9 CFR Parts 1, 2, 3, and 4 pertaining to the care, handling, and treatment of these animals. If your project will involve these animals, you should check "yes" in block 20 of Form CSREES-661 and complete Section B of Form CSREES-662. In the event a project involving the use of live vertebrate animals results in a grant award, funds will be released only after the Institutional Animal Care and Use Committee has approved the project.
c. Protection of Human Subjects. Responsibility for safeguarding the rights and welfare of human subjects used in any grant project supported with funds provided by CSREES rests with the performing organization. Guidance on this issue is contained in the National Research Act, Pub. L. No. 93-348, as amended, and implementing regulations promulgated by the Department under 7 CFR Part 1c. If you propose to use human subjects for experimental purposes in your project, you should check the "yes" box in Block 21 of Form CSREES-661 and complete Section C of Form CSREES662. In the event a project involving human subjects results in a grant award, funds will be released only after the appropriate Institutional Review Board has approved the project.

## 13. Certifications

Note that by signing Form CSREES661 the applicant is providing the certifications required by 7 CFR Part 3017, as amended, regarding Debarment and Suspension and Drug Free Workplace, and 7 CFR Part 3018, regarding Lobbying. The certification forms are included in the application package for informational purposes only. These forms should not be submitted with the proposal since by signing form CSREES-661 your organization is providing the required certifications. If the project will involve a subcontractor or consultant, the subcontractor/consultant should submit
a form AD-1048 to the grantee organization for retention in their records. This form should not be submitted to USDA.
14. Compliance with the National Environmental Policy Act (NEPA) (Form CSREES-1234)

As outlined in 7 CFR Part 3407 (the Cooperative State Research, Education, and Extension Service regulations implementing NEPA), the environmental data for any proposed project is to be provided to CSREES so that CSREES may determine whether any further action is needed. In some cases, however, the preparation of environmental data may not be required. Certain categories of actions are excluded from the requirements of NEPA.

In order for CSREES to determine whether any further action is needed with respect to NEPA, pertinent information regarding the possible environmental impacts of a particular project is necessary; therefore, Form CSREES-1234, "NEPA Exclusions Form," must be included in the proposal indicating whether the applicant is of the opinion that the project falls within a categorical exclusion and the reasons therefore. If it is the applicant's opinion that the proposed project falls within the categorical exclusions, the specific exclusion must be identified. Form CSREES-1234 and supporting documentation should be included as the last page of this proposal.

Even though a project may fall within the categorical exclusions, CSREES may determine that an Environmental Assessment or an Environmental Impact Statement is necessary for an activity, if substantial controversy on
environmental grounds exists or if other extraordinary conditions or circumstances are present which may cause such activity to have a significant environmental effect.

## C. Submission of Proposals

## 1. When to Submit (Deadline Date)

Proposals must be transmitted by June 6,2000 , as indicated by postmark or date of courier bill of lading. Proposals transmitted after this date will not be considered for funding.

## 2. What to Submit

An original and 14 copies must be submitted. In addition submit 10 copies of the proposal's Project Summary. All copies of the proposals and the Project Summaries must be submitted in one package.
3. Where to Submit

Applicants are strongly encouraged to submit completed proposals via overnight mail or delivery service to ensure timely receipt by the USDA. The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program—Water Quality; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program-Water Quality; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 202502245.

## D. Acknowledgment of Proposals

The receipt of all proposals will be acknowledged by e-mail. Therefore, applicants are encouraged to provide email addresses, where designated, on the Form CSREES-661. If the applicant's email address is not indicated, CSREES will acknowledge receipt of the proposal by letter

Once the proposal has been assigned an identification number, please cite that number on all future correspondence. If the applicant does not receive an acknowledgment within 60 days of the submission deadline, please contact the Program Director.

## Part IV-Review Process

## A. General

Each proposal will be evaluated in a 3-part process. First, each proposal will be screened to ensure that it meets the administrative requirements as set forth in this request for proposals. Second, proposals that meet these requirements will be technically evaluated by a peer review panel. Each program component will have a separate review panel. Third, proposals ranked highly by the technical peer review panel will be evaluated by a panel of experts that will select awardees based on an evaluation of: national coverage, topical coverage, level of participation from stakeholder community, likelihood for the implementation of voluntary approaches to water quality improvement, and convergence with USDA and federal partnership priorities.

Peer review panel members will be selected based upon their training and experience in relevant scientific, education or extension fields taking into account the following factors: (a) The level of formal scientific, technical education, and extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education and/or extension activities; (b) the need to include as peer reviewers experts from various areas of specialization within relevant scientific, education, and extension fields; (c) the need to include as reviewers other experts (producers, range or forest managers/operators, consumers, etc.) who can assess relevance of the proposals to targeted audiences and to program needs; (d) the need to include as peer reviewers experts from a variety of organizational types (e.g., colleges, universities, industry, state and Federal agencies, private profit and non-profit organizations), and geographic locations; (e) the need to maintain a balanced composition of peer review groups with regard to minority and female representation and an equitable age distribution; and (f) the need to include members that can judge the effective usefulness to producers and the general public of each proposal.

## B. Evaluation Factors

The evaluation factors below will be used in reviewing applications submitted in response to this request for proposals:
(1) The proposal specifies realistic water quality-related outcomes and presents an approach with high
technical and/or educational merit.
(2) The proposal identifies, documents, and addresses water quality problems of Federal, State, regional, or local importance.
(3) The proposal specifically addresses one or more of the program priorities identified in Part II.
(4) The proposal establishes the integrated nature of the Water Quality program and includes inter-disciplinary approaches.
(5) The proposal encompasses the development of partnerships among the various stakeholders to generate support and resources.
(6) The proposal includes a budget adequate to carry out project activities and which is cost-effective and justified.
(7) The proposal provides a clear plan for accomplishments reporting.
(8) The proposal clearly demonstrates that the investigators and institutions involved in the project exhibit that: (a) Project personnel have appropriate training and a demonstrated awareness
of previous and alternative approaches to the problem identified in the proposal, and performance record and/ or potential for future accomplishments; (b) appropriate time has been allocated for systematic attainment of objectives; (c) the participating institutions have experience and competence in subject areas appropriate to the successful completion of the project; and (d) adequate support personnel, facilities, and instrumentation are available or obtainable. For the National Facilitation proposals and Regional Water Quality Coordination proposals will also be judged on the quality of the management plan that is proposed. Priority will be given for integrated, multifunctional research, education, and extension projects.

## C. Conflicts-of-Interest and Confidentiality

During the peer evaluation process, extreme care will be taken to prevent any actual or perceived conflicts-ofinterest that may impact review or evaluation. For the purpose of determining conflicts-of-interest, the academic and administrative autonomy of an institution shall be determined by reference to the January 1998 issue of the Codebook for Compatible Statistical Reporting of Federal Support to Universities, Colleges, and Nonprofit Institutions, prepared by Quantum Research Corporation for the National Science Foundation.

Names of submitting institutions and individuals, as well as proposal content and peer evaluations, will be kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process. Therefore, the names of the reviewers will not be released to applicants. At the end of the fiscal year, names of panelists will be made available in such a way that the panelists cannot be identified with the review of any particular proposal.

## Part V—Additional Information

## A. Access to Review Information

Copies of summary reviews, not including the identity of the reviewers, will be sent to all applicant PI/PD's automatically, after the review process has been completed.

## B. Grant Awards

(1) General.

Within the limit of funds available for such purpose, the awarding official of CSREES shall make grants to those responsible, eligible applicants whose
proposals are judged most meritorious under the procedures set forth in this RFP. The date specified by the awarding official of CSREES as the effective date of the grant shall be no later than September 30 of the Federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. It should be noted that the project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by CSREES under this RFP shall be expended solely for the purpose for which the funds are granted in accordance with the approved application and budget, the regulations, the terms and conditions of the award, the applicable Federal cost principles, and the Department's assistance regulations (parts 3015 and 3019 of 7 CFR).
(2) Organizational Management Information.

Specific management information relating to an applicant shall be submitted on a one-time basis as part of the responsibility determination prior to the award of a grant identified under this RFP, if such information has not been provided previously under this or another CSREES program. CSREES will provide copies of forms recommended for use in fulfilling these requirements as part of the preaward process.
(3) Grant Award Document and Notice of Grant Award.
The grant award document shall include at a minimum the following:
(a) Legal name and address of performing organization or institution to whom the Administrator has awarded a grant under the terms of this request for proposals;
(b) Title of project;
(c) Name(s) and address(es) of PI/PD's chosen to direct and control approved activities;
(d) Identifying grant number assigned by the Department;
(e) Project period, specifying the amount of time the Department intends to support the project without requiring recompetition for funds;
(f) Total amount of Departmental financial assistance approved by the Administrator during the project period;
(g) Legal authority(ies) under which the grant is awarded;
(h) Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the grant award; and
(i) Other information or provisions deemed necessary by CSREES to carry out its respective granting activities or
to accomplish the purpose of a particular grant.
The notice of grant award, in the form of a letter, will be prepared and will provide pertinent instructions or information to the grantee that is not included in the grant award document.

## C. Use of Funds; Changes

(1) Delegation of Fiscal Responsibility

Unless the terms and conditions of the grant state otherwise, the grantee may not in whole or in part delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of grant funds.
(2) Changes in Project Plans
(a) The permissible changes by the grantee, $\mathrm{PI} / \mathrm{PD}(\mathrm{s})$, or other key project personnel in the approved project grant shall be limited to changes in methodology, techniques, or other aspects of the project to expedite achievement of the project's approved goals. If the grantee and/or the PI/PD(s) are uncertain as to whether a change complies with this provision, the question must be referred to the CSREES Authorized Departmental Officer (ADO) for a final determination.
(b) Changes in approved goals or objectives shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes. In no event shall requests for such changes be approved which are outside the scope of the original approved project.
(c) Changes in approved project leadership or the replacement or reassignment of other key project personnel shall be requested by the grantee and approved in writing by the awarding official of CSREES prior to effecting such changes.
(d) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the grantee and approved in writing by the ADO prior to effecting such transfers, unless prescribed otherwise in the terms and conditions of the grant.
(e) Changes in Project Period: The project period may be extended by CSREES without additional financial support, for such additional period(s) as the ADO determines may be necessary to complete or fulfill the purposes of an approved project, but in no case shall the total project period exceed five years. Any extension of time shall be conditioned upon prior request by the grantee and approval in writing by the

ADO, unless prescribed otherwise in the terms and conditions of a grant.
(f) Changes in Approved Budget: Changes in an approved budget must be requested by the grantee and approved in writing by the ADO prior to instituting such changes if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or in the grant award.

## D. Applicable Federal Statutes and Regulations

Several Federal statutes and regulations apply to grant proposals considered for review and to project grants awarded under this program. These include but are not limited to: 7 CFR Part 1.1—USDA
implementation of the Freedom of Information Act.

7 CFR Part 3—USDA implementation of OMB Circular No. A-129 regarding debt collection.

7 CFR Part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as amended. 7 CFR Part 3015—USDA Uniform Federal Assistance Regulations, implementing OMB directives (i.e., Circular Nos. A-21 and A-122) and incorporating provisions of 31 U.S.C. 6301-6308 (the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95-224), as well as general policy requirements applicable to recipients of Departmental financial assistance.

7 CFR Part 3017—USDA
implementation of Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants). 7 CFR Part 3018—USDA
implementation of Restrictions on Lobbying. Imposes prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans.

7 CFR Part 3019—USDA
implementation of OMB Circular A110, Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations. 7 CFR Part 3052—USDA implementation of OMB Circular No. A133, Audits of States, Local Governments, and Non-profit Organizations.

7 CFR Part 3407-CSREES procedures to implement the National Environmental Policy Act of 1969, as amended.
29 U.S.C. 794 (section 504, Rehabilitation Act of 1973) and 7 CFR Part 15B (USDA implementation of statute)—prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.
35 U.S.C. 200 et seq.-Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs
(implementing regulations are contained in 37 CFR Part 401).

## E. Confidential Aspects of Proposals and Awards

When a proposal results in a grant, it becomes a part of the record of CSREES transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be clearly marked within the proposal. The original copy of a proposal that does not result in a grant will be retained by the Agency for a period of one year. Other copies will be destroyed. Such a proposal will be released only with the consent of the applicant or to the extent required by law. A proposal may be withdrawn at any time prior to the final action thereon.

## F. Regulatory Information

For the reasons set forth in the final Rule-related Notice to 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995, as amended ( 44 U.S.C. chapter 35), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524-0022.
Done at Washington, D.C., this 4th day of April 2000.

# Department of the Treasury 

Fiscal Service
31 CFR Part 210
Federal Government Participation in the Automated Clearing House; Interim Rule

## DEPARTMENT OF THE TREASURY

## Fiscal Service

## 31 CFR Part 210

## RIN 1510-AA81

## Federal Government Participation in the Automated Clearing House

agency: Financial Management Service, Fiscal Service, Treasury.
ACTION: Interim Rule with request for comment.

SUMMARY: We're issuing an interim rule amending our regulation governing the use of the Automated Clearing House (ACH) system by Federal agencies. Our regulation generally adopts the ACH rules developed by NACHA-The Electronic Payments Association (NACHA) (ACH Rules) as the rules governing ACH transactions by Federal agencies. We're revising our regulation to reflect changes that NACHA has made to the ACH Rules since the publication of NACHA's 1999 rule book. DATES: This interim rule is effective May 8,2000 . Comments must be received by June 6, 2000. The incorporation by reference of the publication listed in the rule is approved by the Director of the Federal Register as of May 8, 2000.
ADDRESSES: You can download this interim rule at the following World Wide Web address: http:// www.fms.treas.gov/ach/.
You may also inspect and copy this interim rule at: Treasury Department Library, Freedom of Information Act (FOIA) Collection, Room 5030, Main Treasury Building, 1500 Pennsylvania Avenue, NW, Washington, DC 20220. Before visiting, you must call (202) 6220990 for an appointment.
You may send comments electronically to the following address: 210comments@fms.treas.gov. You may also mail comments to Cynthia L. Johnson, Director, Cash Management Policy and Planning Division, Financial Management Service, 401 14th Street, SW, Room 420, Washington, DC 20227.

## FOR FURTHER INFORMATION CONTACT:

Walt Henderson, Senior Financial Program Specialist, at (202) 8746705 or
walt.henderson@fms.treas.gov;
Natalie H. Diana at (202) 874-6590 or natalie.diana@fms.treas.gov;
Adam Martin, Financial Program Specialist, at (202) 874-6881 or adam.martin@fms.treas.gov;
Cynthia L. Johnson, Director, Cash Management Policy and Planning Division, at (202) 874-6590 or cindy.johnson@fms.treas.gov; or

Margaret Marquette, Deputy Chief
Counsel, at (202) 874-6681.

## SUPPLEMENTARY INFORMATION:

## I. Background

On April 9, 1999, we published a final rule in the Federal Register (64 FR 17472). The final rule amended our regulations at 31 CFR Part 210 (Part 210), which govern the use of the ACH system by Federal agencies (agencies). The ACH system is a nationwide electronic funds transfer system that provides for the interbank clearing of credit and debit transactions and for the exchange of information among participating financial institutions. The final rule adopted the ACH Rules published in NACHA's 1999 rule book (including rule changes with an effective date on or before September $17,1999)$ as the rules governing all Government ACH transactions, with 11 exceptions.

NACHA periodically updates the ACH Rules. Each year NACHA publishes a new rule book that reflects the changes to the ACH Rules that have been approved since the publication of the previous rule book. NACHA recently published its 2000 rule book.

Part 210 provides that any amendment to the ACH Rules, as published in the 1999 Rule Book, that takes effect after September 17, 1999, will not apply to Government ACH entries unless we publish notice of acceptance of the amendment in the Federal Register. 31 CFR 210.3(b)(2). We're publishing this interim rule in order to indicate which amendments to the ACH Rules we're accepting and which amendments we're rejecting, and to provide an opportunity for comment.

## II. Summary of Rule Changes

## A. Changes to ACH Rules

The ACH Rules published in NACHA's 2000 rule book reflect changes to the ACH Rules published in NACHA's 1999 rule book related to seven topics:

## 1. Self-Audit Requirements

NACHA has revised the self-audit provisions of the ACH Rules to require self-audits annually rather than every three years; to require third-party service providers to conduct self-audits; to require proof be retained that a selfaudit was completed; and to require that originating depository financial institutions (ODFIs) and receiving depository financial institutions (RDFIs) specifically warrant that they have completed self-audits. The effective date of these changes was December 17, 1999.

## 2. Point-of-Purchase Electronic Check

 TransactionsNACHA has adopted an interim rule to provide a legal framework for the conversion of checks to ACH debit entries at the point-of-purchase. The interim rule expands the definition of Prearranged Payment and Deposit (PPD) format in the ACH Rules to allow this format to be used to initiate a one-time ACH debit entry to a Receiver's account for purchases made in person at the point-of-purchase. The implementation period for the interim rule began on September 17, 1999 and will continue through September 14, 2000.

NACHA also has adopted a final rule, which will take effect when the interim rule ends, that amends the ACH Rules by establishing a legal framework to allow for the conversion of checks to ACH debit entries at the point-ofpurchase. The amendment creates a new Standard Entry Class (SEC) code, POP (Point-of-Purchase Entry), that will allow for an Originator to initiate a onetime ACH debit entry to a Receiver's account for purchases made in person at the point-of-purchase. This rule change will become effective as of September 15, 2000.

## 3. Accounts Receivable Check Truncation

NACHA has adopted an interim rule expanding the definition of the PPD format in the ACH Rules to allow Originators to utilize the PPD format to truncate checks received through the U.S. mail for payment for goods or services and convert them to ACH debit entries. The rule provides a legal framework to allow pilot tests of lockbox check truncation. The rule requires the Originator to provide the consumer with notice of the check truncation policy prior to receiving the first check payment that will be truncated. The consumer must authorize the entry in writing, signed or similarly authenticated, unless the notice to the consumer indicates that the item will be truncated if the consumer doesn't provide the Originator with written notice not to truncate. The implementation period for the interim rule began on December 17, 1999, and will continue through December 15, 2000.

## 4. ACH Operator Definition

NACHA has revised the definition of ACH Operator to more clearly define the role and functions assumed by ACH Operators when clearing and settling

ACH transactions. This revision became effective June 18, 1999. ${ }^{1}$

## 5. Cross-Border Payments

NACHA has amended the ACH Rules to establish two new SEC codes, CBR (Corporate Cross-Border Transactions) and PBR (Consumer Cross-Border Transactions), to be used for the origination and receipt of cross-border ACH entries. The amendment will become effective as of September 15, 2000.

## 6. Re-Presented Check Entries

NACHA has established a new SEC code to provide commercial depositors and their financial institutions with a legal framework and technical specifications to transmit ACH debit entries to collect checks that have been returned for insufficient or uncollected funds. The new code will become effective as of September 15, 2000.

## 7. Types of Accounts for ACH <br> Transactions

NACHA has established two new sets of transaction codes to support the transmission of ACH credit and debit entries to financial institutions' general ledger accounts and the transmission of credit entries to loan accounts. This change to the ACH Rules will become effective as of September 15, 2000.

## B. ACH Rule Changes That We Are Accepting

We are accepting all of the changes to the ACH Rules that are reflected in the 2000 Rule Book with two exceptions discussed in Section C below. Under the interim rule, there are still 11 provisions of the ACH Rules that Part 210 preempts, except that we are broadening our preemption of the ACH rules enforcement provisions to include the self-audit requirements (see 210.2(d)(3)). No change to the 11 preempted provisions is necessary to reflect our preemption of the changes related to types of accounts, because we were aware of NACHA's intention to permit the crediting of ACH credits to general ledger and loan accounts and had already preempted that provision of the ACH Rules for Federal payments other than vendor payments. See 64 FR 17474.

All of the ACH rule changes that we are accepting are effective as of the

[^278]effective date of publication of this interim rule or NACHA's effective date for the rule change, whichever is later.
Point-of-Purchase Electronic Check Transactions

We're accepting both the interim and the final ACH rule changes that allow an Originator to initiate a one-time ACH debit entry to a Receiver's account for purchases made in person at the point-of-purchase.

We are currently engaged in pilot programs with several agencies to test the conversion of checks to ACH debit entries at the point-of-purchase. We believe that these transactions could expand the utility of the ACH system and might provide useful and costeffective applications for Government agency collections. We also recognize, however, that the conversion of checks to ACH debits raises various issues, including the kind of disclosure and authorization that is appropriate for such transactions and the kinds of checks that can or should be converted.

While we believe that the establishment of a legal framework for such transactions is desirable, it's difficult to determine the appropriate responsibilities and liabilities of the parties before the application of this technology has been tested. Moreover, attempting to establish a definitive legal framework for point-of-purchase check conversion by agencies at this time could hamper innovation and impede operational flexibility. Because of the diversity and unique concerns of Government check collections, it's unclear whether the model of POP check conversion will be workable or appropriate on a Government-wide basis. Accordingly, although we're accepting the NACHA's interim and final rule changes in order to provide a basic legal foundation for these transactions, we anticipate that we would seek public comment on the rules governing POP check conversion before engaging in POP check conversion on anything other than a pilot basis. In addition, in view of the experimental nature of pilot programs, it is possible that our pilots may not conform to all of the requirements otherwise imposed under the ACH Rules. It is our intention, however, to ensure that any on-going Government POP check conversion programs that we might establish in the future will conform to the ACH Rules that we incorporate in Part 210.

## Accounts Receivable Check Truncation

We're accepting the Interim Rule that provides a legal framework for
Originators to truncate checks received
through the mail in payment for goods or services and convert them to ACH debit entries. The rule requires the Originator to provide the consumer with notice of the check truncation policy prior to receiving the first check payment that will be truncated. The Receiver must authorize the truncation, either by "opting-in" (meaning that the Receiver must authorize the entry in writing, signed or similarly authenticated), or "opting-out" (meaning that the notice to the Receiver indicates that the Receiver may provide the Originator with written notice not to truncate the check).

Although we're not engaged in lockbox check truncation at this time, we are aware that lockbox check truncation could offer significant cost savings for Government collections. However, we're concerned that consumers understand and consent to such transactions. It is therefore our intention to seek public comment on the rules governing lockbox check truncation before engaging in lockbox check truncation other than on a pilot basis. As discussed above in the context of POP check conversion, pilot programs, by virtue of their very nature in exploring new or novel applications of technology, may not conform to all of the requirements otherwise imposed under the ACH Rules.

## ACH Operator Definition

We are accepting the revisions to the ACH Operator definition.

## Cross-Border Payments

We are accepting the rules establishing two new SEC codes to be used for the origination and receipt of cross-border ACH entries. We don't anticipate that agencies will be utilizing these codes for the origination or receipt of cross-border entries in the immediate future. However, it is possible that at some future time, agencies may wish to utilize these codes.

## Re-Presented Check Entries

We're accepting the rule changes that establish a new SEC code to provide commercial depositors and their financial institutions with a legal framework and technical specifications to transmit ACH debit entries to collect checks that have been returned for insufficient or uncollected funds. We believe that the ability to use ACH debit entries in this manner may facilitate the Government's ability to collect on checks that have been returned unpaid.

## C. ACH Rule Changes That We Aren't Accepting

## Self-Audit Requirements

We aren't accepting the ACH Rule changes related to the self-audit requirements. The purpose of the changes to the self-audit requirements is to promote better compliance with the ACH Rules. We believe that compliance with the ACH Rules is important and we are working with agencies to achieve Government-wide compliance with all ACH Rule requirements, including applicable time frames. Federal agencies are subject to oversight and audit requirements unique to the Federal Government. For example, the Office of the Inspector General and the General Accounting Office periodically review and audit various aspects of Federal agencies' operations. Accordingly, we believe that the imposition of a separate ACH compliance self-examination is both unnecessary and unlikely to significantly enhance the Government's compliance with Part 210.

## Types of Accounts for ACH

Transactions
We're not accepting, for Federal payments other than vendor payments, the changes to the ACH Rules that permit the crediting of ACH credits to a financial institution general ledger account or to a loan account. Section 210.5 provides that ACH credit entries representing Federal payments other than vendor payments must be deposited to an account at a financial institution in the name of the recipient, with three exceptions. As discussed in the rulemaking release that accompanied our adoption of this requirement, the term "account" for purposes of $\S 210.5$ is intended to mean a deposit account and not a loan account or general ledger account. See 64 FR 17472, 17474 (1999). We believe that important consumer protections are associated with the crediting of Federal payments to a deposit account, including those available under Regulation E (12 CFR Part 205) and Regulation DD (12 CFR Part 230), as well as the availability of Federal deposit or share insurance. Therefore, we're not accepting this change to the ACH Rules with respect to payments other than vendor payments.

## D. Section-by-Section Analysis

Section 210.2(a)
We are amending the definition of ACH Rules to reflect NACHA's name change from the National Automated Clearing House Association to

NACHA—The Electronic Payments Association.

## Section 210.2(d)

We are amending the definition of "applicable ACH Rules" at section 210.2(d) to reference the rules published in NACHA's 2000 rule book rather than the rules published in NACHA's 1999 rule book. In addition, we are amending section 210.2(d)(3) to exclude the selfaudit requirements of the ACH Rules.
Section 210.3(b)
We are amending subsection 210.3(b), "Incorporation by reference-applicable ACH Rules," by replacing the references to the ACH Rules as published in the 1999 rule book with references to the ACH Rules as published in the 2000 rule book.

## Section 210.5

We are revising section 210.5, "Account requirements for Federal payments," by specifically providing in subsection 210.5(a) that an ACH entry representing a Federal payment other than a vendor payment must be deposited into a deposit account at a financial institution. This revision of the regulatory language does not represent a substantive change from the existing rule since, as discussed above, the rulemaking release that accompanied our adoption of this requirement indicated that § 210.5 was intended to require that Federal payments other than vendor payments must be deposited to a deposit account and not a loan account or general ledger account. See 64 FR 17472, 17474 (1999).

We also are amending the first sentence of § 210.5 to read,
"Notwithstanding ACH Rules 2.1.2, 4.1.3, and Appendix Two, section 2.2 (listing general ledger and loan accounts as permissible transaction codes) * * *" in order to clarify that the requirements of § 210.5 preempt the ACH Rules that would otherwise allow ACH credits generally to be sent to general ledger or loan accounts.

## III. Procedural Requirements

## A. Request for Comment

We invite comment on all aspects of the interim rule.

## B. Request for Comment on Plain Language

On June 1, 1998, the President issued a memorandum directing each agency in the Executive branch to write its rules in plain language. This directive is effective for all new proposed and final rulemaking documents issued on or after January 1, 1999. We invite comment on how to make this interim
rule clearer. For example, you may wish to discuss: (1) Whether we have organized the material to suit your needs; (2) whether the requirements of this interim rule are clear; or (3) whether there is something else we could do to make this rule easier to understand.

## C. Notice and Comment; Effective Date

We find that good cause exists for issuing this interim rule without prior notice and comment. Under the Administrative Procedure Act, an agency is permitted to issue a rule without prior notice and comment when the agency for good cause finds that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). We believe that it is important to address the publication of new ACH rules as quickly as possible in order to mitigate the uncertainty and inconvenience to financial institutions that would result from a time lag in responding to NACHA's rule changes. When we proposed to address changes to the ACH Rules by reviewing and responding to rule changes on an annual basis, we received many comments expressing concern over the potential consequences of such a time lag. For these reasons, we conclude that we have good cause for issuing this interim rule without prior notice and comment. Nevertheless, we are inviting comment and will consider the comments received. For these reasons we also find that good cause exists to make this interim rule effective without a delayed effective date.

## D. Executive Order 12866

This interim rule does not meet the criteria for a "significant regulatory action" as defined in Executive Order 12866. Therefore, the regulatory review procedures contained therein do not apply.

## E. Regulatory Flexibility Act

Because notice and public comment are not required, the Regulatory Flexibility Act (5 U.S.C. 601) does not apply.

## F. Paperwork Reduction Act

We ask for no new collections of information in this final rule. Therefore, the Paperwork Reduction Act (44 U.S.C. 3501) does not apply.

## List of Subjects in 31 CFR Part 210

Automated Clearing House, Electronic funds transfers, Financial institutions, Fraud, Incorporation by reference.

## Authority and Issuance

For the reasons set out in the preamble, 31 CFR Part 210 is amended as follows:

## PART 210—FEDERAL GOVERNMENT PARTICIPATION IN THE AUTOMATED CLEARING HOUSE

1. The authority citation for part 210 continues to read as follows:

Authority: 5 U.S.C. 5525; 12 U.S.C. 391; 31 U.S.C. 321, 3301, 3302, 3321, 3332, 3335, and 3720.
2. Revise § 210.2(a) and (d) to read as follows:

## §210.2 Definitions.

*     *         *             *                 * 

(a) ACH Rules means the Operating Rules and the Operating Guidelines published by NACHA-The Electronic Payments Association (NACHA), a national association of regional member clearing house associations, ACH Operators and participating financial institutions located in the United States.
(d) Applicable ACH Rules means the ACH Rules with an effective date on or before September 15, 2000, as published in Parts I, II, and IV of the " 2000 ACH Rules: A Complete Guide to Rules \& Regulations Governing the ACH Network," except:
(1) ACH Rule 1.1 (limiting the applicability of the ACH Rules to members of an ACH association);
(2) ACH Rule 1.2.2 (governing claims for compensation);
(3) ACH Rule 1.2.4; 2.2.1.10; Appendix Eight and Appendix Eleven (governing the enforcement of the ACH Rules, including self-audit requirements);
(4) ACH Rules 2.2.1.8; 2.6; and 4.7 (governing the reclamation of benefit payments);
(5) ACH Rule 8.3 and Appendix Two (requiring that a credit entry be originated no more than two banking days before the settlement date of the entry-see definition of "Effective Entry Date" in Appendix Two).

* ${ }^{*}{ }^{*}{ }^{*}{ }^{*}{ }^{*}{ }^{*}$ * ${ }^{\text {® }}$ 210.3(b) to read as follows:

## §210.3 Governing law.

(b) Incorporation by referenceapplicable ACH Rules. (1) This part incorporates by reference the applicable ACH Rules, including rule changes with an effective date on or before September 15, 2000, as published in Parts I, II, and IV of the " 2000 ACH Rules: A Complete Guide to Rules \& Regulations Governing the ACH Network." The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies of the " 2000 ACH Rules" are available from NACHA-The Electronic Payments Association, 13665 Dulles Technology Drive, Suite 300, Herndon, Virginia 20171. Copies also are available for public inspection at the Office of the Federal Register, 800 North

Capitol Street, NW., Suite 700, Washington, D.C.
(2) Any amendment to the applicable ACH Rules that takes effect after September 15, 2000, shall not apply to Government entries unless the Service expressly accepts such amendment by publishing notice of acceptance of the amendment to this part in the Federal Register. An amendment to the ACH Rules that is accepted by the Service shall apply to Government entries on the effective date of the rulemaking specified by the Service in the Federal Register document expressly accepting such amendment.
4. Revise § 210.5 to read as follows:

## §210.5 Account requirements for Federal payments.

(a) Notwithstanding ACH Rules 2.1.2, 4.1.3, and Appendix Two, section 2.2 (listing general ledger and loan accounts as permissible transaction codes), an ACH credit entry representing a Federal payment other than a vendor payment shall be deposited into a deposit account at a financial institution. For all payments other than vendor payments, the account at the financial institution shall be in the name of the recipient, except as provided in paragraph (b) of this section.

Dated: April 4, 2000.
Richard L. Gregg,
Commissioner.

[^0]:    ${ }^{1}$ For purposes here, "designation" refers to the practice of assigning rate schedule numbers as well as sheet designations, for purposes of identification and document tracking.
    ${ }^{2}$ For purposes of this rule, use of the term "rate schedule" refers to three types of filings: sets of terms and conditions for service offered to all who qualify for the service, such as an Open Access Transmission Tariff; agreements with specific terms for service negotiated between named seller(s) and buyer(s), such as a Facilities Agreement or Coordination Agreement; or form agreements under which a specific customer takes service under a tariff.
    ${ }^{3}$ The Commission is adopting the gas program's pagination guidelines as the model for the electric program for several reasons. The gas guidelines use unique tariff sheet designations that, once assigned, cannot be reused. Therefore, the applicants, the Commission, and the public will have a common point of reference for every rate schedule sheet without the need for further identifiers, such as the date of filing or the docket number. Further, the gas guidelines provide for the use of standardized nomenclature, which conveys important information about the applicants' filings (e.g. a proposed change in the tariff pursuant to FPA section 205 ('"Third Revised Sheet No.") or a

[^1]:    ${ }^{7} 49$ U.S.C. app. 1 (1988).
    ${ }^{8} 18$ CFR Part 35; 18 CFR Part 154; 18 CFR Part 341.
    ${ }^{9}$ See 18 CFR 154.5; 18 CFR 341.11.
    ${ }^{10} 18$ CFR 35.9.
    ${ }^{11}$ The proposed revision provided that the Director of the Office of Electric Power Regulation (OEPR) would have the power to reject these filings. OEPR has since been dissolved and functionally replaced by the Office of Markets, Tariffs, and Rates.
    ${ }^{12}$ For the convenience of the reader, unless the context otherwise indicates, we will use the term

[^2]:    "tariff sheet" in the remainder of the narrative discussion when referring to public utility rate schedules.

[^3]:    ${ }^{13}$ See 18 CFR 35.2(b) and n.1.

[^4]:    ${ }^{14}$ See 18 CFR 154.1(d).
    ${ }^{15}$ Final Regulations Clarifying the Filing Obligations for Part 284 Transportation and Sale of Natural Gas, Order No. 516, 54 FR 47758 (November 17, 1989), FERC Stats. \& Regs., Regulation Preambles 1986-1990 II 30,864 (November 9, 1989). See also 18 CFR 154.1(d).

[^5]:    1618 CFR 35.5

[^6]:    ${ }^{17}$ The Commission recently reorganized the delegation authorities to reflect the creation of the Office of Markets, Tariffs, and Rates (OMTR). Section 375.308(a)(3) has been redesignated $\S 375.307(\mathrm{k})(3)$. The final regulations adopted here reflect this change.
    ${ }^{18}$ Consumers notes that the Director of the Office of Pipeline Regulation, through delegated authority, frequently informs gas pipelines that their electronically-filed tariff sheets failed to comply with certain formatting and/or pagination requirements without rejecting those filings. However, we note that those letters also inform the gas pipelines that, if not corrected, usually within one working day, their filing and effective dates may be delayed.
    ${ }^{19}$ The WPSC suggests that the Director be allowed to reject only those tariff sheets that are not properly paginated. We are not persuaded to limit the circumstances in which filings may be rejected only to those not properly paginated. In any event, we note that a filing that is incomplete is not properly filed with the Commission, and there is nothing for the Commission to act on, either directly or by delegation.

[^7]:    ${ }^{20}$ See 18 CFR 385.713.

[^8]:    ${ }^{21}$ Section 205(d) of the FPA (16 U.S.C. 824 d (d)) provides that, unless the Commission otherwise provides, no change shall be made to a tariff except after 60 days' notice given by a filing by the utility, and that the filing must plainly state the changes

[^9]:    being made and the time when the changes will go into effect.
    ${ }^{22}$ Consumers also raises questions and issues related to filing tariff sheets electronically. As the Commission has not yet initiated any proceeding

[^10]:    addressing electronic filing, it is premature to address these issues at this time.
    ${ }^{23}$ See 18 CFR 35.2(b) and n.1.
    ${ }^{24} 44$ U.S.C. 3507(d).

[^11]:    ${ }^{25}$ The proposed change may have even less impact on utilities, as the Commission assumes utilities currently maintain an informal recordkeeping system for proposed tariff sheets pending a final designation from the Commission. This informal system will no longer be necessary to maintain, as tariff sheet designations will be assigned by the utilities prior to filing the tariff sheets.

[^31]:    ${ }^{1} 64$ FR 31195 (June 10, 1999); 64 FR 34851 (corrections). The Commission first raised the subject of alternative execution, or block trading, procedures in its Concept Release on the Regulation of Noncompetitive Transaction Executed on or Subject to the Rules of a Contract Market. 63 FR 3708 (January 26, 1998). Through the Concept Release, the Commission wished to explore whether certain alternative executive procedures for large size or other types of orders could be developed to satisfy the needs of market participants while furthering the policies and purposes of the Commodity Exchange Act and the Commission's Regulations.
    ${ }^{2}$ The CX's block trading proposal was published in the Federal Register for public comment on October 7, 1999. 64 FR 54620.

[^32]:    ${ }^{3}$ The Commission approved the CME's application for designation as a contract market in the Five-Year and Ten Year Agency Note futures contracts on March 13, 2000. The current trading hours for these contracts are as follows: 7:20 a.m.2 p.m. Central Time Monday through Friday for open outcry trading; 2:10 p.m.-7:05 a.m. Central Time Monday through Thursday for GLOBEX2 trading; and 5:30 p.m.-7:05 a.m. Central Time Sundays and holidays for GLOBEX2 trading.

[^33]:    ${ }^{4}$ The CTA must be registered under the Act (which includes without limitation any investment advisor registered as such with the Securities and Exchange Commission that is exempt from regulation under the Act or the Commission's regulations) with total assets under management exceeding \$50 million.
    ${ }^{5}$ In connection with block trades entered into by a CTA (which satisfies certain registration and financial conditions) on behalf of its customers, the underlying customer orders do not have to satisfy the minimum threshold requirement. Accordingly, a CTA registered under the Act (including without limitation any investment advisor registered as such with the Securities and Exchange Commission that is exempt from regulation under the Act or the Commission's regulations) with total assets under management exceeding \$50 million may aggregate orders from different accounts to satisfy the minimum size requirement.
    ${ }^{6}$ Completed block transactions may be reported to the Exchange in one of two ways: (1) through telephone to the Exchange's GLOBEX Control Center from 5:30 p.m. Central Time on Sunday through 2:00 p.m. Central time on Friday; and (2) through select price reporting terminals available

[^34]:    on the Exchange floor during Regular Trading
    Hours (7:30 a.m.-2:00 p.m. Central Time) Monday through Friday.

[^35]:    ${ }^{1}$ Since Mr. McPhail is the only participant in the Plan, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3-3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

[^36]:    ${ }^{2}$ As discussed herein, Triumph Funds are generally expected to be organized as venture capital operating companies that are managed by Triumph.

[^37]:    ${ }^{3}$ For purposes of this exemption, the term "full investment responsibility" means that the fiduciary responsible for making the investment decision has and exercises discretionary management authority over all of the assets of the group trust or other plan assets entity.

[^38]:    ${ }^{4}$ The Department's regulation at 29 CFR 2510.3101(c) defines the term "operating company" as an entity that is primarily engaged, directly or through a majority-owned subsidiary or subsidiaries, in the production or sale of a product or service other than the investment of capital. The term "operating

[^39]:    ${ }^{7}$ According to the applicant, the term "portfolio company" refers to each of the operating companies in which a private equity fund has made an investment. Thus, for example, when a private equity fund, such as a Triumph Fund, makes an investment in a start-up, high tech company, that company becomes one of the private equity fund's portfolio companies and will remain so as long as the private equity fund retains its investment in that high tech company. Similarly, if a private equity fund acquires an interest in an investment management firm, the investment management firm will become a portfolio company of the private equity fund.

[^40]:    ${ }^{8}$ In this regard, it is noted that the corresponding section of the Code relating to "disqualified persons" (see section 4975(e)(2)(H) and (I)) does not contain a similar provision which would make the owner of 10 percent or more of a service provider a disqualified person with respect to a Plan. Nevertheless, because the service provider is a "disqualified person" under section $4975(\mathrm{e})(2)(\mathrm{B})$ of the Code, Triumph has requested that the exemption extend to both the Code and the Act in order to avoid any potential concerns regarding the possibility of indirect prohibited transactions.

[^41]:    ${ }^{9}$ The Department is providing no opinion in this proposed exemption regarding whether, or to what extent, a Plan engaging in the subject transaction with a Triumph Fund would violate section 406(a) of the Act, once the Triumph Fund becomes a party in interest with respect to the Plan, under the circumstances described herein.

[^42]:    ${ }^{10}$ PTE 84-14 permits various parties which are related to employee benefit plans to engage in transactions involving plan assets if, among other conditions, the assets are managed by QPAMs (i.e., banks, savings and loan associations, insurance companies or investment advisers registered under the Investment Advisers Act of 1940), which are independent of the parties in interest involved in such transactions and meet certain specified financial standards. PTE 96-23 permits various transactions involving employee benefit plans whose assets are managed by INHAMs and parties in interest to such plans, who are service providers or their affiliates (other than the INHAM and its affiliates).

[^43]:    ${ }^{11}$ For purposes of this exemption, reference to provisions of Title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

[^44]:    ${ }^{12}$ Under the Original Plan, the term
    "Impairment" was defined as "* * * the sum of (a) the loss of interest which would have been credited to Participating Contractholders in the normal course of business had FML not been placed in rehabilitation, as determined by the Receiver, and (b) the loss of liquidity due to the limited access of Participating Contractholders to their cash values, as determined by the Receiver."
    ${ }^{13}$ It is represented that many of the objections concerning the Original Plan of Rehabilitation related to the fact that the Plan had not included

[^45]:    ${ }^{15}$ In this regard, since its rehabilitation, FML has improved the investment quality of its assets and its financial strength. In addition, FML has stabilized its revenue and achieved levels of surplus in excess of minimum state regulatory requirements. Further, FML has continued to pay dividends to Contractholders under participating Contracts and excess interest credits under other Contracts (e.g., universal life and deferred annuity contracts).
    By an order of the Court dated April 30, 1996, FML increased policyholder dividends and declared interest crediting rates of certain Contracts beginning in 1996. In addition, FML petitioned the Court to pay an increased one-time policyholder dividend and declared interest credit beginning in 1999 because of its financial capacity to do so and in recognition of the fact that the policyholder dividends and declared interest credits paid on its Contracts had generally been lower during the period of rehabilitation than those for comparable policies of other insurers.
    ${ }^{16}$ The Closing Date of the rehabilitation under the Third Amended Plan of Rehabilitation is expected to occur after December 31, 2000.
    ${ }^{17}$ The Rehabilitator has been advised by outside securities and tax counsel that the Preferred Stock constitutes equity rather than debt. Additionally, the Rehabilitator has relied upon a private letter ruling issued by the Internal Revenue Service on July 14, 1999 which treats the Preferred Stock and the Common Stock as equity rather than as debt.

[^46]:    ${ }^{18}$ However, the Department expresses no opinion herein on whether such distributions will satisfy the terms and conditions of section 408(e) of the Act.
    ${ }^{19}$ The bid procedures, which will strictly control the selection process for the Investor as well as the post-closing activities of the Investor, are designed to prevent any negotiation among potential Investors because the winning bid is to be determined solely on the basis of the bid price per share, the financial condition of the Investor and the statutory requirements of the Pennsylvania Rehabilitation Statute.

[^47]:    ${ }^{20}$ It is represented that the Rehabilitator has been advised by outside rehabilitation counsel and attorneys for the Pennsylvania Insurance Department that the Pennsylvania Insurance Company Mutual Stock Conversion Act (Conversion Act), which governs the demutualization of an insurer under Pennsylvania law, will not be applicable to FML's situation. It was determined that the Third Amended Plan of Rehabilitation did not contemplate a conversion transaction since the assets of FML would be transferred to a separate company (FLIC) by assumption reinsurance and FML would then be liquidated. Also, it was determined that the Conversion Act would not apply to a company in rehabilitation or liquidation because conflicts would exist with the applicable Pennsylvania rehabilitation/liquidation laws.

[^48]:    ${ }^{21}$ Even though Mutual Members are deemed "Contractholders" for purposes of claims distribution, they are not entitled to receive cash as are Class 3 Claimants. Instead, Mutual Members will be entitled to receive Plan Stock. Class 3 Claims include claims for losses under the insurance policy such as death proceeds, annuity proceeds or investment values. Class 10 Claims, which represent the claims of shareholders or other owners, are not deemed "loss claims" under a policy. Rather, such claims are deemed analogous to mutual membership interests.
    ${ }^{22}$ Article IV of the Third Amended Plan of Rehabilitation generally provides that the policyholder eligible to participate in the distribution of Plan Stock or Plan Credits resulting from such Plan is "the Person specified in the Contract, or in a subsequent document, as the 'Contractholder' or 'owner' of such Contract, or any similar designation in the Contract, as shown on the books and records of FML." FML further represents that its insurance contracts that provide benefits under an employee benefit plan, typically designate the employer that sponsors the plan, or a trustee acting on behalf of the plan, as the Contractholder or owner of the policy. In regard to those Contracts that designate the employer or trustee as Contractholder or owner of the policy, FML represents that under Article IV of the Third Amended Plan of Rehabilitation, it will make distributions resulting from such Plan to the employer or trustee as Contractholder or owner of the Contract.

    In general, it is the Department's view that, if an insurance policy is purchased with assets of an employee benefit plan, including participant contributions, and if there exist any participants under the plan (as defined at 29 CFR 2510.3-3) at the time when FML incurs the obligation to distribute Plan Stock or Plan Credits, then such consideration would constitute an assets of such employee benefit plan. Under these circumstances, the appropriate plan fiduciaries must take all necessary steps to safeguard the assets of the plan in order to avoid engaging in a violation of the fiduciary responsibility provisions of the Act.

[^49]:    ${ }^{23}$ Voting rights are set forth in the FML By-laws which provide: "At all meetings, each member shall be entitled to one vote irrespective of the number of policies or amount of insurance held by a member."

[^50]:    ${ }^{24}$ It should be noted that the value of the Plan Stock or Plan Credits that will be received by a Mutual Member will reflect the bid price paid by the Investor for Group Common Stock. Because the bid process does not allow the Investor to bid on or purchase Preferred Stock (except for the Plan Credit Shares), there is no means of establishing an immediate market value. Consequently, the $\$ 25$ per share liquidation value as described herein is deemed to approximate the fair market value of such stock. The Investor will also be required to purchase Preferred Stock at that price as well.
    ${ }^{25}$ In other words, if a Mutual Member is eligible to receive Plan Credits, the Common Stock allocated to that Mutual Member will become part of the Plan Credit Shares that will be purchased by the Investor in order to fund the purchase of Plan Credits for the Mutual Member.

[^51]:    ${ }^{26}$ As noted in Section III(i) of the Definitions, "Policyholder Stock" refers to those shares of Group Common or Group Preferred Stock that will be issued and distributed to Mutual Members. Thus, it consists of Plan Stock plus any shares of Group Stock (in excess of Plan Stock) that are issued for purposes of correcting errors in the allocation of Plan Stock, less Plan Credit Shares and any disclaimed shares.

[^52]:    ${ }^{27}$ Specifically, Section 5.08 of the Third Amended Plan of Rehabilitation provides that for one year after closing, the Investor may not purchase or enter into an agreement to purchase Group Stock from Group or the shareholders of Group, or take other action which would result in the Investor being affiliated with Group. In addition, Section 5.09 of the Third Amended Plan provides that for one year after closing, Group and any company controlled directly or indirectly by Group will not purchase or redeem nor enter into an agreement to purchase or redeem, Group Stock from Mutual Members that, when combined with the value of Plan Credit Shares, has an aggregate value that exceeds 50 percent of the value of the Plan Stock.
    ${ }^{28}$ FML has still not determined how many shares of Plan Stock will constitute the "small number of shares" required for a Mutual Member to participate in the commission-free purchase and sales program nor has it decided on the duration of such program.

[^53]:    ${ }^{29}$ Section I.A. provides no relief from sections 406(a)(1)(E), 406(a)(2) and 407 for any person rendering investment advice to an Excluded Plan within the meaning of section 3(21)(A)(ii) and regulation 29 CFR 2510.3-21(c).

[^54]:    ${ }^{30}$ For purposes of this proposed exemption, each plan participating in a commingled fund (such as a bank collective trust fund or insurance company pooled separate account) shall be considered to own the same proportionate undivided interest in each asset of the commingled fund as its proportionate interest in the total assets of the commingled fund as calculated on the most recent preceding valuation date of the fund.
    ${ }^{31}$ In the case of a private placement memorandum, such memorandum must contain substantially the same information that would be disclosed in a prospectus if the offering of the certificates were made in a registered public offering under the Securities Act of 1933. In the Department's view, the private placement memorandum must contain sufficient information to permit plan fiduciaries to make informed investment decisions. For purposes of this proposed exemption, references to "prospectus" include any related prospectus supplement thereto, pursuant to which certificates are offered to investors.

[^55]:    ${ }^{32}$ The Department notes that PTE 83-1 [48 FR 895, January 7, 1983], a class exemption for mortgage pool investment trusts, would generally apply to trusts containing single-family residential mortgages, provided that the applicable conditions of PTE 83-1 are met. McDonald requests relief for single-family residential mortgages in this exemption because it would prefer one exemption for all trusts of similar structure. However, McDonald has stated that it may still avail itself of the exemptive relief provided by PTE 83-1.
    ${ }^{33}$ Guaranteed governmental mortgage pool certificates are mortgage-backed securities with respect to which interest and principal payable is guaranteed by the Government National Mortgage Association (GNMA), the Federal Home Loan Mortgage Corporation (FHLMC), or the Federal National Mortgage Association (FNMA). The Department's regulation relating to the definition of

[^56]:    "trust" rights under any yield supplement or similar arrangement which obligates the sponsor or master servicer, or another party specified in the relevant pooling and servicing agreement, to supplement the interest rates otherwise payable on the obligations described in section III.B.(1), in accordance with the terms of a yield supplement arrangement described in the pooling and servicing agreement, provided that such arrangements do not involve swap agreements or other notional principal contracts.

[^57]:    ${ }^{38}$ It is the Department's understanding that where a plan invests in REMIC "residual" interest certificates to which this exemption applies, some of the income received by the plan as a result of such investment may be considered unrelated business taxable income to the plan, which is subject to income tax under the Code. The Department emphasizes that the prudence requirement of section 404(a)(1)(B) of the Act would require plan fiduciaries to carefully consider this and other tax consequences prior to causing plan assets to be invested in certificates pursuant to this proposed exemption.

[^58]:    ${ }^{39}$ If a trust issues subordinated certificates, holders of such subordinated certificates may not share in the amount distributed on a pro rata basis with the senior certificateholders. The Department notes that the proposed exemption does not provide relief for plan investment in such subordinated certificates.

[^59]:    ${ }^{40}$ The pass-through rate on certificates representing interests in trusts holding leases is determined by breaking down lease payments into "principal" and "interest" components based on an implicit interest rate.

[^60]:    ${ }^{1}$ Any portion of the closed session consisting solely of staff briefings does not fall within the Sunshine Act's definition of the term "meeting" and, therefore, the requirements of the Sunshine Act do not apply to any such portion of the closed session. 5 U.S.C. 552(b)(a)(2) and (b). See also 45 CFR § 1622.2 \& 1622.3.

[^61]:    ${ }^{1}$ These estimates are based on Form $\mathrm{N}-23 \mathrm{C}-1$ filings for 1999.
    ${ }^{2}$ The burden hour estimates are based upon consultation with lawyers and accountants familiar with the practices of fund boards and the staff of investment advisers.

[^62]:    ${ }^{1}$ JP Life, through JP Life Account A, issued two forms of individual flexible payment variable annuity contracts (the "Alpha Contracts"). Applicants represent that the Alpha Contracts are not currently being offered and that JP Life Account A does not file updated post-effective amendments consistent with the terms and conditions of relevant SEC no-action precedent. See, e.g., Great-West Life \& Annuity and Insurance Company (pub. avail. Oct. 23, 1990) ("Great-West"). Applicants state that in reliance on such precedent, certain information about the Alpha Contracts, JP Life Account A, and JPVF is provided to Alpha Contractowners in lieu of filing post-effective amendments to the registration statements relating to the Alpha Contracts or delivering updated Contract prospectuses to those Contractowners.

[^63]:    ${ }^{2}$ In the Matter of Jefferson Pilot Variable Fund, Inc. and Jefferson Pilot Advisory Corporation, Investment Company Act Rel. Nos. 23301 (July 1, 1998) (Order) and 23242 (June 5, 1998) (Notice). Applicants state that, because the JPVF 500 Portfolio is a series of JPVF, it will be entitled to rely on the JPVF Order. As a condition to the application, Applicants state that they will take no action in reliance on the JPVF Order with respect to the JPVF 500 Portfolio unless and until the operation of the Portfolio in the manner contemplated by the JPVF Order is approved, following the Substitution, by the holders of a "majority of the outstanding voting securities" of the Portfolio within the meaning of the 1940 Act.

[^64]:    ${ }^{3}$ As here applicable, Rule 17a-7 exempts transactions between registered investment companies or separate series of registered investment companies from Section 17(a) of the 1940 Act, provided the conditions specified in that Rule are met. Applicants cannot literally comply with the terms of Rule 17a-17 because paragraph (a) thereof requires that the transaction be "for no consideration other than cash," whereas the subject transactions will involve the use of portfolio securities as consideration. However, the SEC Staff has granted several no-action letters under similar circumstances. See, e.g., Federated Investors (pub avail. April 21, 1994); Trust Funds Institutional Managers Trust (pub. avail. July 20, 1988); Metropolitan Series Fund, Inc. (pub. avail Aug. 29, 1986).

[^65]:    ${ }^{4}$ Applicants state that they have sent and will continue to send to Alpha Contractowners all relevant information about the proposed Substitution in accordance with the terms of GreatWest. Applicants further state that the substance of the disclosures about the Substitution that they have made or will make to Alpha Contractowners was or will be essentially identical to the disclosures about the Substitution that have already been made or will be made to all other affected Contractowners. Applicants state that certain of these disclosures have already been delivered and that all such further disclosures will be sent at approximately the same time to owners of Alpha Contracts as to all other affected Contractowners.

[^66]:    ${ }^{1}$ The GPU subsidiaries that purchase workers compensation insurance from UMI as the following: GPU Advanced Resources, Inc., Metropolitan Edison Company, Pennsylvania Electric Company, Jersey Central Power \& Light Company, GPU International, Inc., GPU Service, Inc., GPU Nuclear, Inc., Prime Energy Limited Partnership ('Prime") and Onondaga Cogeneration Limited Partnership ("Onondaga") (collectively, "Subsidiaries").
    ${ }^{2}$ In addition to GPU and its Subsidiaries, the current UMI members and policy holders are the following: South Jersey Industries, Inc., Central Hudson Gas \& Electric Corp., Empire State Electric Energy Research Corp., Griffth Oil Co., Long Island Water Corp., Middleburg Telephone, New York State Electric \& Gas Corp., Niagara Mohawk Power Corp., Rochester Gas \& Electric Corp. and Fi-Net Technologies.

[^67]:    ${ }^{1}$ Western-Southern and Western Southern Life are Touchstone Affiliates.

[^68]:    ${ }^{2}$ The Funds will combine as follows: TS Bond with and into CW Bond, TS G \& I with and into CW Value Plus, TS Value Plus with and into CW Value Plus, TS International with and into CW International and TS Emerging with and into CW Emerging.
    ${ }^{3}$ Class A shares of each Acquired Fund and each Acquiring Fund have the same maximum sales load. Class A shares of TS G \& I, TS Value Plus, TS International and TS Emerging and each corresponding Acquiring Fund have the same maximum distribution fee. Class A shares of TS Bond have a maximum distribution fee of $0.25 \%$ and Class A shares of CW Bond have a maximum distribution fee of $0.35 \%$. From May 1, 2000 to October 31, 2001, Touchstone Advisors will waive a portion of the distribution fee on Class A shares of CW Bond so that the maximum distribution fee on the shares will be $0.25 \%$. Class C shares of each Acquired Fund and each Acquiring Fund have the same maximum CDSC and the same maximum distribution fee. Class C shares of each Acquired Fund are not subject to a sales load while Class C shares of each Acquiring Fund have a maximum sales load of $1.25 \%$. The $1.25 \%$ sales load will be waived on future purchases of Class $C$ shares of the Acquiring Funds by the current shareholders of the Acquired Funds.

[^69]:    ${ }^{4}$ The Board's consideration of this factor included considering that, upon giving effect to the waivers of certain fees, that the advisory fees and other fees of an Acquiring Fund will be no higher than those paid by the corresponding Acquired Fund.

[^70]:    ${ }^{1} 15$ U.S.C. $78 \mathrm{~s}(\mathrm{~b})(1)$.
    ${ }^{2} 17$ CFR 240.19b-4.

    ${ }^{4}$ Index Fund Shares are shares in an open-end management investment company registered under

[^71]:    ${ }^{9} 12$ CFR 220. The Federal Reserve Board issued Regulation T pursuant to Section 7(c) of the Act.
    ${ }^{10}$ SPDRs represent interests in a unit investment trust that holds a portfolio of stocks replicating the S\&P 500 Index. See Securities Exchange Act Release No. 31591 (December 11, 1992), 57 FR 60253 (order approving File No. SR-Amex-92-18).
    ${ }^{11}$ See letter from Michael J. Schoenfeld, Senior Securities Regulation Analyst, Federal Reserve Board, to James M. McNeil, Chief Examiner, Amex, dated February 1, 1993 ("1993 Letter").
    ${ }^{12}$ See Letter, supra note 11.
    ${ }^{13}$ MidCap SPDRs represent interests in a unit investment trust that holds a portfolio of stocks replicating the S\&P MidCap 400 Index. See Securities Exchange Act Release No. 35534 (March 24, 1995), 60 FR 16686 (order approving File No. SR-Amex-94-52).
    ${ }^{14}$ According to the Amex, the Federal Reserve Board staff confirmed this position in a telephone conversation between Michael J. Schoenfeld, Senior Securities Regulation Analyst, Federal Reserve Board, and James M. McNeil, Chief Examiner, Amex, on May 1, 1995. Conversation between Michael Cavalier, Associate General Counsel, Legal and Regulatory Policy, Amex, and Yvonne Fraticelli, Special Counsel, Division, Commission, on February 24, 2000.
    ${ }^{15}$ See Board of Governors of the Federal Reserve System Docket No. R-977 (April 24, 1996), 61 FR 20386 (permitting the adoption of margin requirements "deemed appropriate by the exchange that trades the option, subject to the approval of the Securities and Exchange Commission'").

[^72]:    ${ }^{16}$ DIAMONDS are units of beneficial interest in the DIAMONDS Trust, which holds a portfolio of stocks replicating the Dow Jones Industrial Average. See Securities Exchange Act Release No. 39525 (January 8, 1998), 63 FR 2438 (order approving File No. SR-Amex-97-29). In connection with the commencement of trading in DIAMONDS, the Amex requested confirmation from the Federal Reserve Board staff that margin treatment of DIAMONDS would be comparable to that for SPDRs under Regulation T. See letter from James M. McNeil, Chief Examiner, Amex, to Scott Holz, Senior Attorney, Legal Division, The Federal Reserve Board, dated December 3, 1997. In response, the Federal Reserve Board staff noted, among other things, that the amendments to Regulation T that became effective on June 1, 1997, provide that the margin requirement for listed options is the amount specified by the national securities exchange that trades the option. Thus, the Federal Reserve Board staff indicated that DIAMONDS could serve as cover for a short position in index options if the rules of the appropriate self-regulatory organization specified that DIAMONDS qualify for such treatment. See letter from Scott Holz, Senior Attorney, the Federal Reserve Board, to James M. McNeil, Chief Examiner, Amex, dated January 8, 1998.
    ${ }^{17}$ Nasdaq 100 shares are units of beneficial interest in the Nasdaq-100 Trust, a portfolio of stocks replicating the Nasdaq 100 Index. See Securities Exchange Act Release No. 41119 (February 26, 1999, 64 FR 11510 (order approving File No. SR-Amex-98-34).
    ${ }^{18}$ Under Amex Rule 900C, the "aggregate current index value" is the current index group value (i.e., the current numerical index value of a stock index group multiplied by $\$ 1.00$ ) multiplied by the index multiplier (i.e. the number specified in a stock index option contract by which the market closing index group value is to be multiplied to arrive at the value required to be delivered upon valid exercise of the contract).

[^278]:    ${ }^{1}$ Part 210 adopted the ACH Rules published in NACHA's 1999 rule book (including rule changes with an effective date on or before September 17, 1999) as the rules governing all Government ACH transactions, with certain exceptions. Although NACHA's effective date for the ACH Operator definition was June 18, 1999, the changes to the definition were not published in the 1999 rule book and thus not previously incorporated in Part 210.
