Proposed Projects

1. Know Your Status Media Campaign Evaluation

New—The Centers for Disease and Prevention's (CDC) National Center for HIV, STD, and TB Prevention (NCHSTP) proposes a media campaign to promote knowledge of HIV status, using marketing clusters to target media messages. The purpose of this campaign is to increase the number of HIV positive people who are aware of their status and are receiving appropriate medical treatment. It is believed that knowledge of infection will reduce risk behavior and medical treatment will reduce infectiousness. CDC will conduct an evaluation of this campaign which will examine 2 target clusters and 4 control clusters in about 4 cities selected for intervention. Data will be collected via 4 types of surveys: (1) Telephone surveys; (2) street intercept surveys; (3) Hotline surveys; and (4) counseling and testing site surveys. Assuming a sample size of 500 for each cluster and 2 rounds of data collection (baseline and post intervention) for the telephone survey, and sample sizes of 167 for each cluster in the street intercepts, plus the first 1,000 surveyed callers and counseling and testing site

clients in each city, the totals are as below.

Telephone Survey: 20,000 respondents (members of marketing clusters in intervention cities) will be surveyed by telephone in 2 rounds (baseline and post intervention, 10,000 each). It will take approximately 15 minutes to complete the survey for a total burden of 5,000 hours. Because this survey will be conducted to home telephone numbers, there will be no cost burden to the respondents.

Street Survey: 4,000 respondents (members of marketing clusters in intervention cities) will be surveyed in street intercepts in 2 rounds (baseline and post intervention, 2,000 each). It will take approximately 15 minutes to complete the survey for a total burden of 1,000 hours. There will be no cost burden to the respondents.

Hotline Additional Questions: HIV Hotlines serving intervention cities will be asked to add questions to their existing quality control surveys. This will add up to 3 minutes to the existing surveys for a total burden of 200 hours. There will be no additional cost to the respondents.

Counseling and Testing Site Survey: HIV Testing and Counseling Sites in intervention cities will be asked to add questions to their existing data collection on persons seeking HIV counseling and testing. This will add up to 5 minutes to completing the intake data for a total burden of 333 hours. There will be no additional cost to the respondents.

This evaluation will determine the success of the media elements of the campaign, provide information for improving the campaign when it is spread to additional sites, and determine the usefulness of targeting media campaigns by market clusters.

The total cost of this evaluation to the Federal government will be \$400,000 for the surveys. The total burden hours are expected to be 6533 hours. Total cost to respondents is \$0.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total response burden (in hours)
Telephone Survey	20,000	1	15/60	5,000
Street Survey	4,000	1	15/60	1,000
Hotline Additional Questions	4,000	1	3/60	200
Counseling and Testing Site Survey	4,000	1	5/60	333.3
Total	32,000	6,533
