On March 26, 1999, the Commission issued another order extending the date for the project's construction commencement and construction completion to June 21, 2001 and June 21, 2003, respectively. No project facilities have been constructed to date.

The licensee has requested an amendment to change the project capacity from 6.3 MW to 7.4 MW with a 14.8 percent increase in hydraulic capacity to allow maximum power production during high flows; modify the intake and diversion structures to accommodate the increased flow needed to support the increased generation capacity, including an increase of surface area to the fish screens; reroute the first 2,500 feet of penstock to avoid a 0.46 acre sphagnum bog/wetland; bury the first 2,500 feet of the penstock to a depth of about 100 feet to eliminate the need for the approved siphon; shift the location of the powerhouse slightly to facilitate the use of an existing access road and create a short spur road, allowing access to the powerhouse from the north instead of the east, improving the aesthetics in the area; change the current tailrace design from a 140-foot-long buried pipe to a slightly shorter open channel, and modify the overhead transmission line, proposed in the current license, to a buried transmission line to provide greater reliability, visual benefits and eliminate the need for raptor protection.

Title: Clean Air Act Tribal Authority (OMB Control No. 2060-0306; EPA ICR No. 1676.02) expiring 05/31/01, renewal.

Abstract: This ICR requests clearance of EPA's review and approval process for determining Tribal eligibility to carry out the Clean Air Act (CAA). Tribes may choose to submit a CAA eligibility determination and a CAA program application to EPA at the same time for approval and EPA will review both submittals simultaneously. EPA will use this information to determine if a Tribe meets the statutory criteria under section 301(d) of the CAA and is qualified for purposes of implementing an Air Quality Program. Section 114 of the CAA is the authority for the collection of information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 40 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: February 22, 2001.
