

electronic integrated circuits and microassemblies; insulated wire and cable; insulating fittings for electrical machines; waste and scrap of primary cells and batteries; mirrors; lenses; photographic cameras; photocopying apparatus; instruments and appliances used in dental, medical, veterinary and surgical sciences; measuring instruments; counters, automatic regulating or controlling instruments or apparatus; contact static eliminator brush for copiers; and typewriter ribbons.

Zone procedures would exempt Ricoh from Customs duty payments on foreign materials used in production for export. On domestic sales, the company would be able to choose the duty rates that apply to the finished products (primarily duty-free, with some up to 8.1%) rather than the duty rates that would otherwise apply to the foreign-sourced materials noted above (duty-free to 12.5 percent, weighted average 4.3%). The application indicates that the savings from zone procedures will help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at one of the following addresses:

1. *Submissions Via Express/Package Delivery Services:* Foreign-Trade-Zones Board, U.S. Department of Commerce, Franklin Court Building—Suite 4100W, 1099 14th St. NW, Washington, DC 20005; or
2. *Submissions Via the U.S. Postal Service:* Foreign-Trade-Zones Board, U.S. Department of Commerce, FCB—Suite 4100W, 1401 Constitution Ave. NW, Washington, DC 20230.

The closing period for their receipt is February 4, 2003. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to February 19, 2003).
